

Figure S6 Confocal images of HeLa cells (WT, DRP1-KO, and DRP1-OPA1-DKO) at 30 min after treatment with either (a) 0.1% v/v DMSO (vehicle control) or (b) 10 μ M PXA. HSP60 (green) was stained as a marker for the mitochondrial matrix, and TOMM20 (red) was stained as a marker for the outer mitochondrial membrane (OMM).
