Appendix C. List of articles considered in the review:

1. Alldredge M W, Walsh D P, Sweanor L L, Davies R B and Trujillo A 2015 Evaluation of translocation of black bears involved in human–bear conflicts in South-central Colorado. *Wildl. Soc. Bull.* **39** 334–340.

2. Anderson C R, Ternent M A and Moody D S 2002 Grizzly bear-cattle interactions on two grazing allotments in Northwest Wyoming. *Ursus* **13** 247–256.

3. Andreasen A M, Stewart K M, Sedinger J S, Lackey C W and Beckmann J P 2018 Survival of cougars caught in non-target foothold traps and snares. *J. Wildl. Manag.* **82** 906–917.

4. Baruch-Mordo S, Breck S, Wilson K and Theobald D 2008 Spatiotemporal distribution of black bear-human conflicts in Colorado, USA. *J. Wildl. Manag.* **72** 1853–1862

5. Baruch-Mordo S, Webb C T, Breck S W and Wilson K R 2013 Use of patch selection models as a decision support tool to evaluate mitigation strategies of human–wildlife conflict. *Biol. Conserv.* **160** 263–271

6. Beckmann J P and Lackey C W 2018 Lessons Learned From a 20-Year collaborative study on American black bears. *Hum–Wildl. Interact.* **12** 396–404

7. Berger K M 2006 Carnivore-livestock conflicts: Effects of subsidized predator control and economic correlates on the sheep industry. *Conserv. Biol.* **20** 751–761

8. Blecha K A, Boone R B and Alldredge M W 2018 Hunger mediates apex predator's risk avoidance response in wildland–urban interface. *J. Anim. Ecol.* **87** 609–622

9. Blejwas K, Sacks B, Jaeger M and McCullough D 2002 The effectiveness of selective removal of breeding coyotes in reducing sheep predation. *J. Wildl. Manag.* **66** 451–462

10. Bradley E H, Robinson H S, Bangs E E, Kunkel K, Jimenez M D, Gude J A and Grimm T 2015 Effects of wolf removal on livestock depredation recurrence and wolf recovery in Montana, Idaho, and Wyoming. *J. Wildl. Manag.* **79** 1337–1346.

11. Bradley E and Pletscher D 2005 Assessing factors related to wolf depredation of cattle in fenced pastures in Montana and Idaho. *Wildl. Soc. Bull.* **33** 1256–1265.

12. Bradley E H, Pletscher D H, Bangs E E, Kunkel K E, Smith D W, Mack C M, Meier T J, Fontaine J A, Niemeyer C C and Jimenez M D 2005 Evaluating wolf translocation as a nonlethal method to reduce livestock conflicts in the Northwestern United States. *Conserv. Biol.* **19** 1498–1508.

13. Bonnell M A and Breck S W 2017 Using resident-based hazing programs to reduce human-coyote conflicts in urban environments. *Hum–Wildl. Interact.* **11** 146–155

14. Boonman-Berson S, Turnhout E and Carolan M 2016 Common sensing: Human-black bear cohabitation practices in Colorado. *Geoforum* **74** 192–201

15. Burdett C L, Crooks K R, Theobald D M, Wilson K R, Boydston E E, Lyren L M, Fisher R N, Vickers T W, Morrison S A and Boyce W M 2010 Interfacing models of wildlife habitat and human development to predict the future distribution of puma habitat. *Ecosphere* **1** doi:10.1890/ES10-00005.1

16. Coleman T H, Schwartz C C, Gunther K A and Creel S 2013 Influence of overnight recreation on grizzly bear movement and behavior in Yellowstone National Park. *Ursus* **24** 101–110

17. Coltrane J A and Sinnott R 2015 Brown bear and human recreational use of trails in Anchorage, Alaska. *Hum-Wildl. Interact.* **9** 132–147.

18. Coogan S C P and Raubenheimer D 2016 Might macronutrient requirements influence grizzly bear–human conflict? Insights from nutritional geometry. *Ecosph*ere **7** e01204.

19. Dagley C M, Berrill J, Leonard L P and Kim Y G 2018 Restoration thinning enhances growth and diversity in mixed redwood/Douglas-fir stands in northern California, U.S.A. *Restor. Ecol.* **26** 1170–1179.

20. DeCesare N, Wilson S, Bradley L, Gude J, Inman R, Lance N, Laudon K, Nelson A, Ross M and Smucker T 2018 Wolf-livestock conflict and the effects of wolf management: Wolf- Livestock Conflict. *J. Wildl. Manag.* **82** 711–722

21. Dietsch A, Teel T and Manfredo M 2016 Social values and biodiversity conservation in a dynamic world. *Conserv. Biol.* **30** doi:10.1111/cobi.12742.

22. Elbroch M L, Feltner J and Quigley H 2017 Human–carnivore competition for antlered ungulates: do pumas select for bulls and bucks? *Wildl. Res*. **44** 523–533

23. Gore M, Knuth B, Curtis P and Shanahan J 2006 Education programs for reducing American black bear-human conflict: Indicators of success? *Ursus* **17** 75–80

24. Gunther K A, Haroldson M A, Frey K, Cain S L, Copeland J and Schwartz C C 2009 Grizzly bear–human conflicts in the Greater Yellowstone ecosystem, 1992–2000. *Ursus* 15 10–22

25. Hanley Z L, Cooley H S, Maletzke B T and Wielgus R B 2018 Forecasting cattle depredation risk by recolonizing gray wolves. *Wildl. Biol.* wlb.00419

26. Hebblewhite M 2011 Unreliable knowledge about economic impacts of large carnivores on bovine calves. *J. Wildl. Manag*. **75** 1724–1730.

27. Hiller T L, Mcfadden-Hiller J E, Jenkins S R, Belant J L and Tyre A J 2015 Demography, prey abundance, and management affect number of cougar mortalities associated with livestock conflicts. *J. Wildl. Manag.* **79** 978–988.

28. Hoffmann C F, Montgomery R A and Jepson P R 2017 Examining the Effect of Billboards in Shaping the Great Wolf Debate of the American West. *Hum. Dimens. Wildl.* **22** 267–281

29. Johnson H E, Lewis D L, Lischka S A and Breck S W 2018 Assessing ecological and social outcomes of a bear-proofing experiment. *J. Wildl. Manag.* **82** 1102–1114

30. Johnson H E et al. 2018 Human development and climate affect hibernation in a large carnivore with implications for human–carnivore conflicts. *J. Appl. Ecol.* **55** 663– 672

31. Kirby R, Alldredge M W, Pauli N J 2016 The diet of black bears tracks the human footprint across a rapidly developing landscape. *Biol. Conserv.* **200** 51–59

32. Kline K N, Taylor J D and Morzillo A T 2018 Estimating stand-level economic impacts of black bear damage to intensively managed forests. *Can. J. Forest Res*. **48** 758–765

33. Lance N, Breck S W, Sime C A, Callahan P and Shivik J A 2010 Biological, technical, and social aspects of applying electrified fladry for livestock protection from wolves (*Canis lupus*). *Wildl. Res.* **37** 708–714

34. Laufenberg J S, Johnson H E, Doherty P F and Breck S W 2018 Compounding effects of human development and a natural food shortage on a black bear population along a human development-wildland interface. *Biol. Conserv.* **224** 188–198

35. Lewis D L, Baruch-Mordo S, Wilson K R, Breck S W, Mao J S and Broderick J 2015 Foraging ecology of black bears in urban environments: guidance for human-bear conflict mitigation. *Ecosphere* **6** 141

36. MacHutchon A and Wellwood D 2002 Assessing the risk of bear-human interaction at river campsites. *Ursus* **13** 293–297

37. MacHutchon A and Wellwood D 2002 Reducing bear-human conflict through river recreation management. *Ursus* **13** 357–360

38. Martin S and McCurdy K 2009 Wilderness food storage in Yosemite: Using the theory of planned behavior to understand backpacker canister Use. *Hum. Dimens. Wildl.* **14** 206–218

39. Mattson D, Logan K and Sweanor L 2011 Factors governing risk of cougar attacks on humans. *Hum-Wildl. Interact.* **5** 135–158

40. Mazur R L 2010 Does aversive conditioning reduce human–black bear conflict? *J. Wildl. Manag.* **74** 48–54

41. Meadows L and Knowlton F 2000 Efficacy of guard llamas to reduce canine predation on domestic sheep. *Wildl. Soc. Bull.* **28** 614–622.

42. Merkle J A, Krausman P R and Booth M M 2011 Behavioral and attitudinal change of residents exposed to human–bear interactions. *Ursus* **22** 74–83

43. Merkle J A, Krausman P R, Decesare N J and Jonkel J J 2011 Predicting spatial distribution of human–black bear interactions in urban areas. *J. Wildl. Manag.* **75** 1121–1127.

44. Miller S D, Schoen J W and Schwartz C C 2017 Trends in brown bear reduction efforts in Alaska, 1980–2017. *Ursus* **28** 135–149.

45. Moss W E, Alldredge M W and Pauli J N 2015 Quantifying risk and resource use for a large carnivore in an expanding urban–wildland interface. *J. Appl. Ecol.* **53** 371–378.

46. Nelson A A, Kauffman M J, Middleton A D, Jimenez M, McWhirter D and Gerow K G 2016 Native prey distribution and migration mediates wolf (Canis lupus) predation on domestic livestock in the Greater Yellowstone Ecosystem. *Can. J. Zool*. **94** 291–299

47. Parks M and Messmer T 2016 Participant perceptions of range rider programs operating to mitigate wolf-livestock conflicts in the western United States: nonlethal wolf depredation management. *Wildl. Soc. Bull.* **40** doi: 10.1002/wsb.671

48. Parker I D and Feldpausch-Parker A M 2013 Yellowstone grizzly delisting rhetoric: an analysis of the online debate. Wildl. Soc. Bull. 37 248-255.

49. Peirce K N and Van Daele L J 2006 Use of a garbage dump by brown bears in Dillingham, Alaska. *Ursus* **17** 165–177

50. Proctor M F, Kasworm W, Annis K M, MacHutchon A G, Teisberg J E, Radandt T G and Servheen C 2018 Conservation of threatened Canada-USA trans-border grizzly bears linked to comprehensive conflict reduction. *Hum-Wildl. Interact.* **12** 348–372

51. Podruzny S, Cherry S, Schwartz C and Landenburger L 2002 Grizzly bear denning potential conflict areas in the Greater Yellowstone Ecosystem. *Ursus* **13** 19-28

52. Poessel S A, Breck S W, Teel T L, Shwiff S, Crooks K R and Angeloni L 2012 Patterns of human–coyote conflicts in the Denver Metropolitan Area. *J. Wildl. Manag.* **77** 297–305

53. Poessel S A, Gese E M and Young J K 2017 Environmental factors influencing the occurrence of coyotes and conflicts in urban areas. *Landscape Urban Plan.* **157** 259–269

54. Poessel S A, Mock E C and Breckc S W 2017 Coyote (*Canis latrans*) diet in an urban environment: variation relative to pet conflicts, housing density, and season. *Can. J. Zool.* **95** 287–297

55. Robinson H S, Wielgus R B, Cooley H S and Cooley S W 2008 Sink populations in carnivore management: Cougar demography and immigration in a hunted population. Ecological applications. *Ecol. Soc. Am.* **18** 1028–1037

56. Russell W, Carnell K and Mcbride J 2001 Black Bear (*Ursus americanus Pallas*) feeding damage across timber harvest edges in Northern California Coast Redwood (*Sequoia sempervirens* [D. Don] Endl.) Forests, USA. *Nat. Area. J.* **21** 324–329

57. Schwartz C C, Gude P H, Landenburger L, Haroldson M A and Podruzny S 2012 Impacts of rural development on Yellowstone wildlife: linking grizzly bear *Ursus arctos* demographics with projected residential growth. *Wildl. Biol.* **18** 246–257

58. Smith T S, Herrero S, Layton C S, Larsen R T and Johnson K R 2012 Efficacy of firearms for bear deterrence in Alaska. *J. Wildl. Manag*. **76** 1021–1027

59. Smith T S, Hopkins B, Gookin J and Thompson S 2018 Portable electric fencing for bear deterrence and conservation. *Hum–Wildl. Interact.* **12** 309–321

60. Smith T and Johnson A B 2004 Modeling the effects of human activity on Katmai brown bears (Ursus arctos) through the use of survival analysis. *Arctic* **57** doi: 10.14430/arctic492.

61. Spencer R, Beausoleil R and Martorello D 2007 How agencies respond to human–black bear conflicts: a survey of wildlife agencies in North America. *Ursus* **18** 217–229

62. Stone S A, Stewart W B, Timberlake J, Haswell P M, Najera F, Bean B S and Thornhill D J 2017 Adaptive use of nonlethal strategies for minimizing wolf–sheep conflict in Idaho. *J. Mammal*. **98** 33–44

63. Sweanor L, Logan K, Bauer J, Millsap B and Boyce W 2008 Puma and human spatial and temporal use of a popular California State Park. *J. Wildl. Manag.* **72** 1076–1084
