

Supplementary Table 2. Enrichment for Gene Ontology (GO) terms in genes up- and down-regulated after 3 days of ETC-159 treatment. For each GO category (biological process, cellular component and molecular function) we report the significant GO terms (adjusted P-value <5%). Enrichments were calculated by Webgestalt (WEB-based GEne SeT AnaLysis Toolkit, (Zhang, B., Kirov, S.A., Snoddy, J.R. (2005). WebGestalt: an integrated system for exploring gene sets in various biological contexts. Nucleic Acids Res, 33(Web Server issue), W741-748)) and using the set of tumor expressed genes as the background (see Methods). For each significant GO term we report: the number of reference genes in the category (C), the number of genes in the gene set and also in the category (O), the expected number in the category (E), the ratio of enrichment (R), and P-value of significance of the enrichment adjusted by the multiple tests

Enrichment for GO terms in genes up-regulated after 3 days of ETC-159 treatment							
GO category	Genes in the category (C)	Genes in the gene set (O)	Expected number (E)	Ratio of enrichment (R)	Adjusted P-value	GO term name	GO term
biological process	919	30	11.43	2.62	7.00E-04	response to wounding	GO:0009611
