

AIR-HARDENING CLAY

STORAGE INSTRUCTIONS

STORING CLAY AFTER OPENING PACKAGE

DAS Air-Dry Clay will harden over time once exposed to air – this is a purposeful, desirable reaction as it allows a finished project to harden without baking.

To store clay not used for the immediate project, please follow these steps to ensure your clay is usable once removed from the original packaging.

- Clay will harden when exposed to air as the clay's moisture evaporates
- To prevent moisture removal, place unused clay in an airtight zipped plastic bag or surround clay in plastic wrap and store in an airtight container
- Place airtight bags or containers in a cool location where there is no exposure to direct sunlight
- When stored correctly, Air-Dry Clay has been known to retain moisture for many years

List of DAS Air-Dry Clay items requiring storage prep:

Part #	UPC	Description
F348200	8000144007028	DAS STONE 1 KG
F348700	8000144009220	DAS WOOD 350G
F348800	8000144009206	DAS WOOD 700G
F387000	8000144074112	DAS 1.1 LB WHITE
F387100	8000144043002	DAS 1.1 LB TERRACOTTA
