

# Expanding access points

in the communities we serve

While significantly improving the overall environment of care within its Ambulatory Care Center and other existing outpatient clinics through modernizing finishes and furnishings; **Ochsner LSU Health also developed over 11 newly renovated outpatient clinics and a multispecialty medical office building** to increase access to care for new and existing patients.

Spring Lake Primary Care Clinic, Shreveport

Urgent Care, West Monroe

More than one **million square feet have been added** since 2018, making healthcare more accessible.

Committed to making healthcare available when and where patients need it, Ochsner LSU Health has increased outpatient and community locations from seven in 2018 to 19 locations and a multispecialty medical office building with multiple clinics.

# Partnership Investments in Our Facilities

Since becoming Ochsner LSU Health, **investment in facilities has increased 730%** compared to the previous five years.

## Investment in Facilities

Ochsner LSU Health System of North Louisiana is a not-for-profit healthcare system formed in 2018. **Since its inception, Ochsner LSU Health has significantly increased access to care in the communities it serves** and added multiple locations; implemented the area's most advanced electronic health record system, telemedicine and digital medicine programs; worked alongside its partners to increase the student class size at LSU Health Shreveport – School of Medicine; improved quality and patient safety; and upgraded equipment and infrastructure with major investments in facilities.

## Ochsner LSU Health Shreveport – Academic Medical Center

Following the inception of the Ochsner and LSU Health Shreveport partnership, **major investments began in the flagship hospital on Kings Highway in Shreveport where the facility, infrastructure and aesthetics received very few updates over the past decades.** Significant improvements have been made in the safety and overall environment of care for patients and working environment for the employees, physicians and residents by providing modernized finishes and furnishings in patient rooms and common spaces,

additional LED lighted parking, elevator upgrades and several clinical department expansions.

Over the past three years, **numerous infrastructure systems including HVAC, chiller/cooling towers, lighting, medical gases, roofsw and elevators have been upgraded at the Ochsner LSU Health Shreveport – Academic Medical Center, which have extended the life and overall reliability of the campus** to provide continuous care to its community.

## Ochsner LSU Health Shreveport – St. Mary Medical Center

Since occupying the campus in 2019, **Ochsner LSU Health has renovated over 50% of the existing one million square foot facility to provide state-of-the-art care.** Services on the campus now include inpatient women's services and neonatal intensive care in the main hospital, a 72,000 square foot ambulatory surgery center and comprehensive diagnostic and imaging center. There are now several clinics on campus including maternal fetal medicine, obstetrics & gynecology, dermatology, gastroenterology, neurosurgery,

pain management and more at the 1801 Fairfield Medical Office Building.

In revitalizing the campus, which had been shuttered since 2013, **Ochsner LSU Health made meaningful and necessary updates** by upgrading elevators, repaving parking lots, providing new LED interior lighting, and rebuilding central plant infrastructure. The dramatic south wing drive water fountains were also repaired for staff and visitors to enjoy.

## Ochsner LSU Health Shreveport – Monroe Medical Center

The Monroe Medical Center campus has been revitalized by the Ochsner LSU Health partnership through installing new exterior perimeter LED lighting to enhance security, modernized finishes in patient rooms and common spaces to improve patient experience, renovating the pharmacy department, and re-designing the resident lounge suite to promote a healthier educational environment.

Ochsner LSU Health invested in many infrastructure projects to improve redundancy and overall reliability for the Monroe Medical Center including upgrades to the existing high-voltage distribution, chilled water, pneumatic tube, building automation and HVAC systems.
