

FLAAR Reports all Available

Now, starting this month, you can Subscribe to the FLAAR Reports.

This means you will receive each topic, including tips on TRENDS if desired, **directly**, from Nicholas Hellmuth's office.

For the past 14 years, the only way to get a new FLAAR Report was to look and try to find the PDFs. Now you can get anything and **everything sent to you directly**.

We have special offers for:

- Distributors
- Manufacturers
- End-users (print shops)

Subscriptions for Distributors

If you are a distributor for printers, inks, media, cutters, RIP software or related wide-format inkjet workflow products, you can select what level of Subscription you wish.

You can also ask Dr. Hellmuth to help you figure out which Chinese trade shows to attend (and which are not worth attending).

You can hire FLAAR to assist you to discuss which brand of printer, after-market or OEM ink to select, which source for media and substrates, etc.

Subscriptions for Manufacturers

If you are a manufacturer it really helps for you to learn what is going on in the rest of the world. Even if you are able to attend the regional printer expos, or if you do, you are probably stuck in your booth. So it's tough for your key personnel to see what's happening behind the scenes elsewhere with inks media, printers, and cutters.

So now you can have a Subscription to keep track of what is going on.

Realize, there is no other web site, there is no other source with the experience, knowledge, reach, resources, and energy to recognize the pros and cons of different inks, substrates, printers, and other parts of the wide-format inkjet workflow.

FLAAR is unique, in part because we really enjoy providing a learning experience.

The information in the FLAAR Reports is not in our web pages; and the information in the TRENDS includes additional information delivered in-person by Dr. Hellmuth (so you receive the full-color FLAAR Reports in electronic PDF format PLUS you can speak directly to Nicholas via Skype, e-mail, or in person). In other words, if you have a Subscription you will be better able to compete.

Subscriptions for printshops

We provide information, assistance, tips, and knowledge for printshops large and small. Whether a major service provider or a family run business, whether a start-up or a third generation major printing company, whether a retirement business or a nationally known printing company, you will have an edge on your competitors if you learn the pros and cons of new printers BEFORE you sink your money into an unproven technology.

Subscriptions for professional associations

If you are a trade organization, or trade show with members, you might wish to have all your members receive the FLAAR Reports.

All levels of Subscriptions provide consulting (when consulting is desired):

All levels of Subscriptions at \$1200 and above provide consulting (no extra charges). The higher the level of Subscription, the more time you can ask for. At Subscription levels \$3200 and above you can meet with Dr. Hellmuth in-person at international printer expos and ask your questions directly.

So you are not merely getting abundant information on all aspects of the workflow, PLUS, you can also ask questions directly to Dr. Nicholas and/or any members of his staff.

Price if you bought **one by one**: \$51,546

Price if you bought by subject (**all subjects together**) \$34,071

**Price if you ask for a subscription \$24,000
(can be paid quarterly)**
