

A**B**

Suppl. Fig 8. a, Inhibition of different p53 target genes by corresponding siRNAs. Western blotting was performed using anti-p53 (DO-1 monoclonal, Santa Cruz Biotech), anti-Hi95 (polyclonal, Quark Biotech), anti-p21 (F-5 monoclonal, Santa Cruz Biotech) and anti-PUMA (rabbit polyclonal, Abcam) antibodies. **b**, Growth curves of RKO/V and RKO/sip53 cells untreated or treated with NAC (5 mM). $P > 0.95$ compared to the correspondent untreated cells by Student's t test.
