

Table 1. Localization of β -gal positivity in human prostatectomy specimens.

Patient Samples	β -gal staining	
	Area with hyperplasia/PIN	Area with cancer
1	+	-
2*	-	+
3	-	-
4	++	-
5	+	-
6	+	-
7**	+++	-
8	-	-
9	-	-
10	-	-
11	++	-
12	++	-

Note: +++ and ++ indicate strong β -gal staining easily detectable at 100X magnification; + indicates weak β -gal staining only detectable at 400X magnification. * indicates Patient B of Figure 4f. ** indicates Patient A of Figure 4f.
