Setting up CarambolaAI Direct Implementation Guide

How to Implement CarambolaAI unit on your site

Our unit implementation will include a Header and Body implementation.
It means you will implement the script we provided in both locations of the page.

Before starting implementation, please make sure the following are applied:

1. Make sure the location of the unit is known to your technical team as per the decision made with CarambolaAI's team.
2. Make sure Carambola unit will not be refreshed on your end - in order for us to monetize ideally.

* On the next page you will find the example of the implementation.

> How does it look on your code

Header script - This code must be located on the Header part

Example:

```
<head> XXX </head>
```

Body script -

- Find the location you would like to locate CarambolaAI's unit.

- Implement the body script.
- The code must be located in the body.

Example:

```
<body> XXX </body>
```

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="utf-8" />
  <title></title>
  <!-- Carambola Head Script Start -->
  <script
src="https://m4FE8ZEyzwWTGfYQS.ay.delivery/manager/m4FE8ZEyzwWTGfYQS"
type="text/javascript" referrerpolicy="no-referrer-when-downgrade"></script>
  <!-- Carambola Head Script End -->
</head>
<body>
  <!-- Carambola Body Script Start -->
  <img height='0' width='0' alt=''
src='//pixel.carambo.la/Pixel/{publisher_key}/{domain_id}/0/1/{wid}'
style='display:block;width:0;height:0;' /> <div id="carambolaplacement">
</div> <script class="carambola"
src="https://units.carambo.la/scripts/carambola.min.js?
pid={publisher_key}&did={domain_id}&wid={wid}&container=carambolaplacement">
</script>
  <!-- Carambola Body Script End -->
</body>
</html>
```

Header code

Body code

**For any question or concern , reach out to
our operations team.**

Good Luck!
