Hi, Christine,
This is a response to my FOIA and in my translation to human language it means "they don't have records".
Please correct me if I am wrong and please add this one to your collection.

Thank you for everything

Re: FOIA Request 22-226

Dear Natalia Litbarg:

I am responding to your request dated and received in my office on February 25, 2022, under the Illinois Freedom of Information Act (FOIA) in which you requested records from October 1, 2019 - present:

"Description of Requested Records:

All studies and/or reports in the possession, custody or control of the University of Illinois System describing the purification of the alleged "COVID-19 virus" (aka "SARS-COV-2", including any alleged "variants") directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (*i.e.* monkey kidney cells aka Vero cells; fetal bovine serum).

Clarification of Request:

Please note that I am **not** requesting studies/reports where researchers failed to **purify** the suspected "virus" and instead:

- cultured some specimen, and/or
- performed an amplification test (i.e. PCR), and/or
- fabricated a genome from sequences (allegedly) detected in an impure substance, and/or
- produced electron microscopy images of unpurified things.

I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and am **not** requesting records that describe **replication** of a 'virus' without host cells. Nor am I requesting records that describe a strict fulfillment of Koch's Postulates, or records that describe a suspected "virus" floating in a vacuum, or private patient information.

I simply request records that describe **purification** (separation of the alleged virus from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, **authored by anyone, anywhere.**

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible."

Other than your submission of a date range, this request is identical to your previous request dated and received in my office on February 17, 2022. Based on the above terms and wording that you have used, our office has shared your request with University records custodians who, because of nature of their work, may have had responsive records. Utilizing the word and terms you provided, those University records custodians cannot identify responsive records.

You have a right, under the law, to seek a review of this response by the Public Access Counselor (PAC) in the Office of the Attorney General. The PAC may be reached by phone at 877-299-3642, by email to public.access@ilag.gov, or by postal mail at the Public Access Bureau, 500 S. 2nd Street, Springfield, Illinois 62706. You also have the right to seek judicial review under section 11 of this Act.

If you have any questions or would like to discuss how to narrow the scope of your request, please contact me at 217-333-6400.

Sincerely,

Kirsten Ruby
Senior Associate Director
and Chief Records Officer
