[REDACTED]

Thank you for your patience as we conducted a search of any research with these very specific criteria. After reviewing what scientific materials identified through a request to county health leadership and a subsequent full data query of county communications, we can now confirm that we have no records responsive to your request.

Best,

Kate

To:

Kate Willson

Multnomah County Health Department

Portland, Oregon

Submitted via email to: kate.willson@multco.us

Dear Ms. Willson,

This is a formal request for access to general records, made under Oregon's Public Records Law.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of Multnomah County Government describing the purification of any "SARS-COV-2" (including any "variant" of "SARS-COV-2") said to have caused disease in humans (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as

"isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Clarifications re: the above Request

Please note that I am NOT requesting studies/reports where researchers failed to purify the suspected "virus" and instead cultured an unpurified sample or other unpurified substance, and/or performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or sequenced the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or produced electron microscopy images of unpurified things.

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in-order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

Further, I am not requesting records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other small things).

Further, please also note that my request above is not limited to records that were authored by the Multnomah County Government or that pertain to work done at/by the Multnomah County Government. Rather, my request includes any study or report matching the above description, for example (but not limited to) a published peer-reviewed study authored by anyone, anywhere, ever, downloaded or printed by health officials at Multnomah County Government, Oregon and possibly (but not necessarily) relied on as evidence of a disease-causing "virus".

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Format:

Pdf documents sent to me via email; I do not wish for anything to be shipped to me.
