

evaluate the proposals during its funding decisions. The Sea Grant Budget Form (NOAA Form 90–4) provides information similar to, but more detailed than, standardized budget forms SF–424A or SF–424C, and allows the NSGO to determine whether or not the breakdown cost of multi-project grant awards is reasonable. Collectively, the data supplied in these documents form the basis for many of NSGO’s responses to the Administration, the Congress, other agencies, and to the public about the scope of Sea Grant activities.

The National Sea Grant College Program Act (33 U.S.C. 1126) also provides for the designation of a public or private institution of higher education, institute, laboratory, or State or local agency as a Sea Grant college or Sea Grant institute. Applications are required for designation of Sea Grant Colleges and Sea Grant Institutes, although no forms are required. The data the collection provides helps the National Sea Grant Office determine the suitability of the applicant for meeting the standards and conditions for being a Sea Grant College as set forth in 33 U.S.C. 1126 and 15 CFR 918.5.

Affected Public: Academic and not-for-profit institutions; individuals or households; business or other for-profit organizations; State, local, or Tribal government.

The symposium will facilitate the USPTO’s efforts to implement its obligations under the President’s Executive Order 14110, titled “Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence.”

DATES: The symposium will take place on March 27, 2024, from 10 a.m. to 3 p.m. PT. Persons seeking to attend, either virtually or in person, must register by March 22, 2024, at the web page provided in the **ADDRESSES** section of this notice. Seating is limited for in-person attendance.

SUPPLEMENTARY INFORMATION: The USPTO AI/ET Partnership provides opportunities to bring stakeholders together through a series of engagements to share ideas, feedback, experiences, and insights regarding the intersection of IP and AI/ET. Several of the previous AI/ET Partnership events focused on patent-related inventorship issues. For example, participants in the inaugural AI/ET Partnership meeting in June 2022 discussed patent policy issues related to AI/ET inventions, including subject matter eligibility, disclosure, and inventorship. Additionally, the AI/ET Partnership meeting held in February 2023 focused on various IP policy issues with respect to AI-driven innovation, including ways to address inventions created with significant AI contributions, and unanticipated IP challenges from AI-driven innovation.

The AI/ET Partnership meeting on March 27, 2024, will build on the above-mentioned meetings and will feature panel discussions by experts in the fields of patent, trademark, and copyright law that focus on: (1) a comparison of copyright and patent law approaches to the type and level of human contribution needed to satisfy authorship and inventorship requirements; (2) ongoing copyright litigation involving generative AI; and (3) laws and policy considerations surrounding name, image, and likeness (NIL) issues, including the intersection of NIL and generative AI.

This USPTO event is intended to complement, but not duplicate, the ongoing initiatives of the U.S. Copyright Office to examine copyright law and policy issues raised by AI technologies, which are described at www.copyright.gov/ai/.
