Internal Standards Solutions

PRODUCT OVERVIEW

Our Internal Standards Solutions (ISS) streamlines internal and industry standards into a single, seamless platform empowering Engineering Leaders to reduce risks related to quality, safety, and compliance. Unlike mail, email, proprietary portals, or in person delivery, this solution, within Engineering Workbench, allows you to share the most current documents with suppliers and allows you to monitor usage compliance.

TECHNOLOGY VALUE

- Access all internal and external standards with living traceability in one location as a single source of truth

- AI-powered cognitive search engine surfaces the correct information from the millions of pages indexed inside Engineering Workbench

- Smart Compare feature automatically highlights all changes to updated standards, comparing versions

- Easily understand requirement relationships between standards with over 39 million in-line links for industry-to-industry references inside standards

- Create direct links to documents, pages, and phrases inside of the standards to revisit, and share easily with colleagues

- Create annotations and bookmarks inside of documents on the platform, organize standards into folders for streamlined project management, and download standards

- Create shared watch lists and automatic monitoring to track documents, alerting users and suppliers of changes
