

Top 10 Things You Can Do to Protect Endangered Plants

1. Visit botanical gardens, arboreta, wildlife refuges, and other locations to learn about endangered plants.
 2. Plant native plants, which are key to maintaining our natural ecosystems.
 3. Never harvest threatened or endangered plants. It is illegal to harm any endangered plants live in the wild.
 4. Buy plants from reputable buyers. Plant collectors must be particularly careful to ensure unusual plants are legal.
 5. Don't plant invasive plants, which can wreak havoc on native ecosystems and endangered plants and animals.
 6. Minimize use of herbicides and pesticides, which are hazardous pollutants that affect wildlife at many levels.
 7. Buy reused wood or Forest Stewardship Council certified wood, highly recycled paper, and fair-trade coffee.
 8. Don't drain! Some of the most precious habitats in the country are wetlands with unique plants and animals.
 9. When choosing a first or second home, look for houses that are already built.
 10. Don't destroy habitat. Protecting habitat saves entire communities of animals and plants.
