

Attention All Parents:

Does your child have any of the following symptoms during or after school?

Headaches/Migraines	Asthma/Shortness of Breath	Allergies
Mood/Behavior Problems	Difficulty Concentrating	Anxiety/Depression
Hyperactivity	Frequent/Chronic Illness	Skin Rashes
Learning Problems	Blood Sugar Fluctuations	Numbness/Tingling
Dizziness/Nausea	Muscle Spasms	Sleep Difficulties
Memory Loss	Muscle Aches/Joint Pain	Night Sweats
Erratic Heart Rate	Distorted Hearing	Weakness/Fatigue

If so, your child may be suffering from radiation sickness.

Microwave transmitters for wireless Internet (Wi-Fi) are installed in many area schools. **These devices are exposing your child to non-ionizing radiation for 6 hours per day, 184 days per year.**

Non-ionizing radiation has been confirmed through thousands of scientific studies to cause all of the above symptoms and chronic, cumulative exposure can lead to serious, life-threatening health problems such as cancer, leukemia, brain tumors, and diabetes.

Have you given consent for your child to be exposed to this health risk?

The fact that Wi-Fi is in widespread use does NOT mean it is safe.

Wi-Fi is an unregulated technology that has never been safety tested. FCC (U.S.) and Industry Canada standards are NOT biologically based, and they do not apply to Wi-Fi. The FCC and Industry Canada are NOT health agencies.

For more information and/or to join efforts to stop the unlawful irradiation of our children in school, please visit www.citizensforsafetechnology.org.
