

Supplementary Figure S1. Kaplan-Meier survival curves by prediagnostic dietary calcium intakes, stratified by stage, histologic type, and grade^a

^aCalcium intakes: solid line (<500 mg/d for men≤70 y and women≤50 y and <600 mg/d for men>70 y and women>50 y); dashed line (500-1000 mg/d for men≤70 y and women≤50 y and 600-1200 mg/d for men>70 y and women>50 y); dotted line (>1000 mg/d for men≤70 y and women≤50 y and >1200 mg/d for men>70 y and women>50 y).
