Tagetes species, flor de Muerto, cemetery San Juan Sacatepeques, Nov 2014

A photograph of a field of yellow flowers, likely Tagetes, scattered across a mix of green grass and brown soil. The flowers are in various stages of bloom, some fully open and others as buds. The text 'FLOR DE MUERTO' is overlaid in white, bold, sans-serif font in the lower-left quadrant.

FLOR DE MUERTO

Most yellow and orange marigolds are called flor de muerto in Guatemala. Most Spanish terms are not biologically precise, and the number of different species covered by the designation flor de muerto varies by region.

Tagetes species, flor de Muerto, San Juan, la Laguna, Nov 2014

Tagetes species, flor de muerto
Various *Tagetes* species grown in the ethnobotanical garden surrounding the
FLAAR office building.
