## Rialto

"We have been impressed with how Rialto has enabled multiple teams to both place and investigate orders, and we no longer have to send long email chains between teams when ordering books.

The single interface and integration with Leganto has proved time and cost effective, and we now have a very high level of automation across our acquisitions processes." - Imperial College London

Rialto is an academic marketplace that creates a seamless workflow for selection and acquisition and allows libraries to make informed decisions in the book-buying process.

### What's new in Rialto:

- **Rialto Analytics:** We've recently added two new Rialto Analytics Dashboards, the 'Use And Cost Dashboard' and 'Rialto Acquisitions Dashboard', to help libraries easily access information about orders and resources purchased in Rialto. [View our on-demand webinar to learn more: Rialto Analytics.](#)
- **More Transparency and Flexible Options for Selection Plans:** For libraries using Selection Plans for automated purchasing, Rialto now displays the Match Reason to help users readily identify why one offer was selected from others. We've also introduced Selection Plan Slips that resembles an approvals and slips workflow for libraries wanting a more classic approach to managing profiles.
- **Badge Links (from Idea Exchange!):** Easily navigate throughout Rialto with new clickable links adjacent to badges. For example, when viewing an offer with an "In Your List", "In Your Cart" or "Purchased in Rialto" badge, users will be able to quickly navigate to that page where the specific offer is included.

**Visit us at ELUNA!** Are you attending the ELUNA Annual Meeting in May? Join one of our many Rialto sessions to get the latest product updates and hear from other Rialto libraries about their experience. We look forward to seeing you in Minneapolis! [View the agenda.](#)
