RECOMMENDATIONS
FOR WINE WITH MEALS

Excellent wines from Penfolds
Hunter River Valley Vineyards

Diamond Hermitage
An excellent dry red table wine—delightful with any meal. Serve at room temperature.

Penfolds Chatterbox
The sweetest of the white table wines, golden in colour, light and delicate to the taste. Should be served chilled.

Penfolds Graves
Pronounced to rhyme with halve, this is a delicate and refreshing semi-sweet white table wine. Serve chilled.

Ban On Shoe X-ray Machines Resented

An open invitation to members of the A.C.T. Advisory Council to have their feet X-rayed was yesterday extended by the manager of a Canberra shoe store which is equipped with a fluoroscope, which will be banned by proposed A.C.T. legislation.

On Monday the council approved draft legislation to prohibit the use of fluoroscopes in shoe stores or by unauthorised persons.

The proposed legislation will provide a penalty of £50 against unauthorised persons who operate an X-ray machine.

The manager of Johnston Bros. shoe store in Alinga Street, Civic Centre, Mr. W. A. Johnston, said yesterday that the council had "an atom bomb complex."

A fluoroscope he had for seven years cost about £200 and it had given great service in fitting shoes.

It was essential for the correct fitting of shoes. It was the only way that a child's shoes could be fitted exactly to ensure that foot-bones were not pushed out of shape.

"We have at least a dozen measuring devices, but the X-ray machine is the surest and easiest way to ensure correct fittings," said Mr. Johnston.

He said he felt the A.C.T. legislation would be a bar in the path of progress towards better fitting shoes.

The time that a foot would be under X-ray was only a matter of seconds

and there was little real likelihood of danger.

"I have been using it for seven years and there have been no ill-effects," he said.

Many old people who had their feet examined under the machine were surprised to find how their foot-bones were pushed out of shape by ill-fitting shoes.

"If the Advisory Council members accept my invitation I think they will get a shock too," said Mr. Johnston.

About 50 per cent. of men's shoes were too short and too wide, resulting in the toes being pushed to the side.

"We are fighting a battle to overcome ill-fitting shoes and the only way we can do it is to show an adult his feet under the machine, to prove to him what his shoes are doing to his feet," said Mr. Johnston.

He said the majority of shoe stores in Canberra used the machines, which were a necessary aid to fitting.

Managers of several other stores said the machines had been satisfactory and they would not remove them until the legislation came into force and they were told to get rid of them.

Czech Purge Of Waverers

PRAGUE, Tuesday (A.A. P.-Reuter): A purge has started in Czechoslovakia directed against Communists held responsible for "revisionism" and "liberalist tendencies" among the country's intelligentsia, according to well-informed quarters.

In the strongest outburst against "revisionism" since the Hungarian uprising, some artists and writers in particular were accused by the party's Central Committee 10 days ago of "wavering" in their loyalty to the party line.

It was thought the purge would also affect senior officials in ministries responsible for the periodical literary press, which was violently criticised by the committee as being permeated by "nihilism and scepticism."

Yesterday, Rude Pravo the party newspaper, attacked as "mistaken" certain theoreticians who thought the literary process should be "outside any influence of the party," which actually had to assign to the artist and his work their place in the social structure.

Coming only a few days before the expected visit to Prague of the Soviet Communist Party leader M. Zhdanov, these attacks were seen by foreign observers as a still further indication of the party line which has been set in Prague and against "nationalism" and "bourgeois liberalism" even at the time of the Polish and Hungarian uprisings.

Cannot Give Land Away

Three English women who bought land in Queanbeyan 34 years ago now find that they cannot even give the land away.

Misses Marie Cook and Gertrude and Evelyn Macfarlane, of Canterbury, England, paid rates on the land since 1923 until 1956, when they offered it to the Queanbeyan Municipal Council as a gift.

They have forwarded to the council the title deeds of the land, which is situated near the racecourse.

At its last meeting, the Town Clerk, Mr. R. B. Smith, said the costs involved in the transferring of the land to the council's name would be £11/13/-.

The unimproved capital value of the land was £10.

The council decided to notify the women of its refusal to accept the land, but will advise them that it will refer their wish to dispose of the property to a local estate agent.

£150 MORE FOR ROADS

The Queanbeyan Municipal Council has been granted an additional £150 for roadworks in the 1956-57 programme.

This grant has been made under the Commonwealth Aid Road Scheme.

The Municipal Council has been advised of this by Mr. J. W. Seiffert, M.L.A. The £150 represents 10 per cent. of the council's original grant for the year

R.A.N. Ships On Way Home From Malaya

Three ships of the R.A.N. which have been serving with the strategic reserve in Malayan waters are now on their way back to Australia.

They are the aircraft carrier Melbourne and the anti-submarine frigates Queenborough and Quickmatch.

Announcing this yesterday, the Minister for the Navy, Mr. Davidson, said they all left Singapore last Saturday.

They had been replaced in the strategic reserve by the R.A.N. destroyers Tobruk and Anzac, which arrived at Singapore in April and later took part with the Melbourne, Queenborough and Quickmatch and ships of other SEATO navies in exercise Astra.

Mr. Davidson said that the Melbourne would arrive at Darwin on June 28 and reach Brisbane on July 1.

The Queenborough would reach Sydney on July 8 and Brisbane from July 5 until July 6.

The Quickmatch would arrive at Melbourne on July 9 to begin leave and undergo a refit.

Registrations Of Vehicles Rise

More new motor vehicles were registered throughout Australia last month than for any monthly period since last November.

In May, 19,273 new vehicles, including 13,267 cars, were registered, compared with registrations of between 14,000 and 16,000 in the previous five months.

Last November total registrations were 19,293.

During May, 9,496 of the vehicles registered were in the metropolitan areas and 9,775 in country areas.
