## Migration

# Internal Migration (Series C 1-88) 

## C 1-75. General note.

Data in these series are based on comparison of State of birth and State of residence of the native population enumerated at successive decennial censuses of population. The migration measured is the net movement from the time of birth to the census date. Migrants defined in this way include only those persons who have moved from one State to another and are, on the census date, living in States other than those in which they were born.

These statistics for migrants do not represent the total number of persons who have moved from the State or geographic division in which they were born to other States or divisions during any given period of time. Some of those who moved from one State to another died before the following census date. Some moved from and returned, between censuses, to their State of birth. Others moved to places outside the conterminous United States.

A native is defined as a person born in the United States, Puerto Rico, or an outlying area of the United States or persons born in a foreign country who have at least one parent born in the United States. Persons for whom place of birth was not reported are included under native. See also text for series A 105-118, A 119-134, and A 135-142 and general note, A 1-371.
Through 1950, the figures showing classification by race were not ordinarily based on replies to census questions asked by enumerators, but were rather obtained by observation. The figures do not, therefore, reflect a clear-cut definition of biological stock. The population of Negro and other races consists of Negroes, American Indians, Japanese, Chinese, Filipinos, and some other groups. Persons of mixed white and other parentage were placed in the classification of the parent who was not white. Persons of Mexican birth or ancestry who are not definitely Indian or of stock other than white have been classified as white in all censuses except that of 1930 . The lack of comparability introduced by this factor is substantial in the West South Central, Mountain, and Pacific Divisions. For revised 1980 figures for regions showing Mexicans classified as white, see series B 216-230 in Historical Statistics of the United States, 17891945.

For a discussion of 1960 and 1970 data on race and a more complete statement concerning earlier years, see text for series A 91-104.

C 1-14. Native population, by residence within or outside State, division, and region of birth, by race, 1850-1970.
Source: Special compilations made by the University of Pennsylvania Studies of Population Redistribution and Economic Growth from the following U.S. Bureau of the Census reports: 1850, The Seventh Census of the United States: 1850, pp. xxxvi-xxxviii; 1860, Eighth Census of the United States: 1860, table 5 for each State, pp. 10-589 (various pages) and pp. 616-619; 1870, Ninth Census Reports, vol. I, pp. 327-335; 1880, Tenth Census Reports, Population; pp. 484-491; 1890, Eleventh Census Reports, Population, part 1, pp. 564-567 and 576-579; 1900, Twelfth Census Reports, Population, vol. I, part 1, pp. 686-693 and 702-705; 1910, Thirteenth Census Reports, Population, vol. I, pp. 730-744; 1920, Fourteenth Census Reports, Population, vol. II, pp. 626-640; 1930, Fifteenth Census

Reports, Population, vol. 11, pp. 153-167; 1940, Sixteenth Census Reports, State of Birth of the Native Population, pp. 20-39; 1950, U.S. Census of Population: 1950, vol. IV, Special Reports, State of Birth; pp. 4A-24 to 4A-43; 1960, U.S. Census of Population: 1960, vol. II, Subject Reports, State of Birth; 1970, U.S. Census of Population: 1970, vol. II, Subject Reports, State of Birth.
In 1860, persons who were born in territories and who were then residing in territories were assumed to be residing in the territory of their birth.
See general note for series C 1-75for definition of race and nativity; see also text for series A 172-194for definition of division and region.

C 15-24. Native population born in each division, by division of residence, by race, 1850-1970.

Source: See source for series C 1-14.
See also general note for series C 1-75 for definition of race and nativity.

C 25-75. Estimated net intercensal migration of total, native white, foreign-born white, and Negro population, by States, 1870-1970.
Source: Components of change method, U.S. Bureau of the Census, Current Population Reports, Population Estimates and Projections, series p. 25, No. 72, p. 5; No. 304, p. 12; and No. 406, pp. 10 and 14. Survival rate method, 1870-1950, Everett S. Lee, Ann Ratner Miller, Carol P. Brainerd, and Richard A. Easterlin, Population Redistribution and Economic Growth: United States, 1870-1950, vol. I, the American Philosophical Society, Philadelphia, 1957, pp. 107-231 (copyright). 1950-1960, Hope T. Eldridge, Net Intercensal Migrationfor States and Geographic Divisions of the United States, 1950-1960 (Analytical and Technical Reports, No. 5) Population Studies Center, University of Pennsylvania, Philadelphia, table A-1 (copyright).
The estimate of the net migration data shown for the component of change method was obtained by subtracting the national increase for the intercensal period (births minus deaths) from the difference between the census counts at the beginning and the end of the period.

The estimates of net migration by the survival rate method were obtained by a residual method, using survival ratios derived from census data. The loss through mortality during an intercensal period was estimated on the basis of the ratios of appropriate age groups as enumerated in successive decennial censuses. The difference between the enumerated population at the end of the decennial period and the estimated survivors from the beginning to the end of the period was assumed to be net migration. Computations were by age groups for each sex, the figures presented in series C $25-75$ being summations for ages 10 years and over at the end of each intercensal period. For the native population, the figures show the estimated amount of net internal migration. For the foreign born, the figures represent the estimated net change attributable to direct movement into the State from abroad and the net gain or loss in the exchange of foreign-born residents with other States.

See general note for series C 1-75for definition of race and nativity.

C 76-80. Estimated annual movement of the farm population, 19201970.

Source: U.S. Department of Agriculture, Economic Research Service, 1920-1962, Farm Population Estimutes for 1910-1962, ERS130, 1963; 1963-1970, Farm Population Estimates, annual issues.
Estimates of the total farm population and of the annual changes in its components have utilized data from the censuses of population and agriculture and the Current Population Survey, conducted by the Bureau of the Census, and surveys of the Department of Agriculture. For a history of the procedures used and the successive revisions of the series, see Department of Agriculture, Major Statistical Series of the U.S. Department of Agriculture, vol. 7, Agricultural Handbook No. 365, 1969.

Farm population figures relate to the rural civilian population living on farms, regardless of occupation or source of income. From 1850 to 1960 the definition of a farm has varied. See general note for series $\mathrm{K} 1-203$ and text for series $\mathrm{K} 1-3$ for discussion of the changes in definition. Since 1960 a farm is defined as a place of 10 acres or more from which at least $\$ 50$ worth of farm products were sold in the preceding year, or a place of less than 10 acres from which at least $\$ 250$ worth of products were sold. Persons living on or what
might be considered farmland are classed as nonfarm if they rent for cash a house and yard only. Likewise, persons in institutions, summer camps, motels, and tourist camps located in the open country are also classed as nonfarm.

C 81-88. Mobility status and type of mobility of the population one year old and over, 1947-1970.

Source: U.S. Bureau of the Census, Current Population Reports, series P-20, No. 235.
The population was classified by mobility status on the basis of a comparison between the place of residence of each individual on the survey date and the place of residence one year earlier. Persons classified as movers include all those whose place of residence in the United States was different at the end of the period and at the beginning of the period.
For similar information for earlier years, see Donald J. Bogue, Henry S. Shryock, Jr., and Siegfried A. Hoermann, "Subregional Migration in the United States, 1935-40," vol. 1,Streams of Migration Between Subregions, Scripps Foundation Studies in Population Distribution, No. 5, Miami, Ohio, 1957.

* Statistics for more recent years in continuation of many of the still-active series shown here appear卉 in annual issues of the Statistical Abstract of the United States, beginning with the 1975 edition. For $\boldsymbol{*}$ direct linkage of the historical series to the tables in the $\boldsymbol{A b s t r a c t}$, see Appendix I in the Abstract.

Series C 1-14. Native Population, by Residence Within or Outside State, Division, and Region of Birth, by Race: 1850 to 1970

Series C 15-24. Native Population Born in Each Division, by Division of Residence, by Race: 1850 to 1970 [Exclude ersons born outside United States and persons for whom State of birth was not reported]

# International Migration and Naturalization (Series C 89-331) 

C 89-157. General note.
The continuous record of immigration to the United States began in 1819, under the Act of 1819 , which required the captain or master of a vessel arriving from abroad to deliver to the local collector of customs a list or manifest of all passengers taken on board, This list was to designate the age, sex, and occupation of each passenger, "the country to which they severally belonged," and the number that had died on the voyage. Copies of these manifests were to be transmitted to the Secretary of State, who reported the information periodically to Congress. Subsequently, the Act of 1855prescribed quarterly reports to the Secretary of State and annual reports to Congress. Later acts have continued to require the collection of such information.
Although the reporting of alien arrivals was required by the Act of 1798 , which expired two years later, the number arriving before 1819 is not known. William J. Bromwell, in his History of Immigration to the United States, 1856 (pp. 18-19), estimated the number of passengers of foreign birth arriving here from the close of the Revolutionary War to 1819 , at 250,000 . This estimate was used by the Bureau of Statistics which later compiled the official statistics of immigration.
Immigration statistics were compiled by the Department of State for 1820-1870; by the Treasury Department, Bureau of Statistics, for 1867-1895; and since 1892, by a separate Office or Bureau of Immigration, now a part of the Immigation and Naturalization Service. For 1892-1932, the Bureau of Immigration issued annual reports. For 1933-1940, the data were summarized in the Annual Report of the Secretary oj Labor; for 1941, they were issued in the Annual Report of the Attorney General; for 1942, no report was published; and for subsequent years, the statistics appeared in the Annual Report of the Immigration and Naturalization Service.

Since 1820 the official immigration data have undergone many changes in the reporting area covered. During the first decades only arrivals by vessel at Atlantic and Gulf ports were reported. Arrivals at Pacific ports were first included in 1860. During the Civil War the only Southern ports that reported were those controlled by the Federal Government. Later the reporting area was expanded to include arrivals at outlying possessions, Arrivals in Alaska were first reported in 1871, but only irregularly thereafter until 1904, after which Alaska was regularly included among the places of entry. Arrivals in Hawaii were first included in 1901,Puerto Rico in 1902, and the Virgin Islands in 1942.

Counting arrivals at the land borders was not required by the early immigration acts, and the counting of such arrivals did not approach completeness until after 1904. For 1820-1823, a few arrivals by land borders were included. Complete reporting was attempted in 1855 with only partial success, was interrupted for several years by the Civil War, and was discontinued in 1885. Beginning in 1894, European immigrants who arrived at Canadian ports with the declared intention of proceeding to the United States were included in the immigration statistics. Some immigration was reported at land border stations established in 1904. More stations were opened in the following years, but reporting of land border arrivals was not fully established until 1908.

The statistical treatment of Canadian and Mexican immigrants at times has differed from that of other immigrants. When reporting of arrivals by lend borders was discontinued in 1885, regular reporting of Canadian and Mexican arrivals by vessel was also discontinued; however, a few Canadian and Mexican immigrants were reported in most of the following years. Arrivals of Canadians and Mexicans by land borders began to be reported in 1906, and reporting was fully
established in 1908under authority of the Act of 1907, which provided for the inspection of Canadians and Mexicans at the land borders.

Not all aliens entering via the Canadian and Mexican borders are counted for inclusion in the immigration statistics. Before 1930, no count was made of residents of a year or longer of Canada, Newfoundland, or Mexico who planned to remain in the United States less than 6 months. For 1930-1945the following classes of aliens entering via the land borders were counted and included in the statistics of immigration:
(1) Those who have not been in the United States within 6 months, who come to stay more than 6 months; (2) those for whom straight head tax is a prerequisite to admission, or for whom head tax is specially deposited and subsequently converted to straight head tax account; (3) those required by law or regulation to present an immigration visa or re-entry permit, and those who surrender either, regardless of whether they are required by law or regulation to do so; (4) those announcing an intention to depart via a seaport of the United States for Hawaii or insular possessions of the United States, or for foreign countries, except arrivals from Canada intending to return thereto by water; and (5) those announcing an intention to depart across the other land boundary.

These classes were revised in 1945 so that the statistics of arriving aliens at land border ports of entry for 1945-1952 included (1)arriving aliens who came into the United States for 30 days or more; and (2) returning alien residents who had been out of the United States more than 6 months. Arriving aliens who came into the United States for 29 days or less were not counted except those certified by public health officials, aliens held for a board of special inquiry, aliens excluded and deported, and aliens in transit who announced an intention to depart across another land boundary, or by sea.

Since 1953, all arriving aliens at land border ports of entry are counted and included except Canadian citizens and British subjects resident in Canada who were admitted for 6 months or less, and Mexican citizens who were admitted for 72 hours or less in the United States.
Persons who cross the land borders for brief periods (border crossers) are not included in the immigration and emigration statistics. The Immigration and Naturalization Service publishes statistics on alien and citizen border crossers in the Annual Report, however.
Arrivals in and departures from the Philippines were recorded in the port tables for 1910-1924, but were not included in the total immigration data. For 1925-1931, such arrivals and departures were obtained annually from the Bureau of Insular Affairs, War Department, and published in separate tables. The Immigration Service has no records since 1932 of arrivals in, or departures from, the Philippines to foreign countries.
Data on aliens admitted to conterminous United States from insular possessions were compiled from 1908 through 1964. Aliens admitted from the Virgin Islands were first recorded in 1917. The departure of aliens from the mainland to Puerto Rico was first recorded in 1918. Data on aliens from Guam began in 1929; Samoa, in 1932.

Definition of terms. For 1820-1867, immigration totals (compiled by the Department of State) were shown as alien passenger arrivals, but may have included alien passengers who died before arrival, and did include, for 1856-1867, temporary visitors among arriving alien passengers. For the 12 -year period, the temporary visitors constituted about $1 \%$ percent of the alien passenger arrivals.

For 1868-1891, the Bureau of Statistics immigrant arrival figures (exciuding temporary visitors), were reported. Since 1892, official immigration data have been compiled by the Office of Immigration (and its successors) and for 1892-1895 its totals were 7 to 8 percent lower than those for the Bureau of Statistics for that period. The difference is largely attributable to the limitation of the Office of Immigration figuresto alien steerage passengers; cabin classpassengers were not again included as immigrants until 1904. A further difference was that the Bureau of Statistics figures were for arrivals and those of the Office of Immigration were for admissions.
For 1895-1897, the Office of Immigration readopted arrivals and the figures include the 2,419 aliens debarred in 1895, the 2,799 in 1896 , and 1,880 in 1897. In later years, the immigration data were further refined to exclude aliens in transit through the United States (1904), and resident aliens returning from a visit abroad (1906).

In 1906 arriving aliens were divided into two classes: Immigrants, or those who intended to settle in the United States, and nonimmigrants, or admitted aliens who declared an intention not to settle in the United States, and all aliens returning to resume domiciles formerly acquired in the United States.

The official record of emigration began in 1907 and ended in 1957. It was made possible by the Immigration Act of 1907, which required all steamship companies carrying departing aliens to furnish manifests similar to those required for arriving aliens.

For 1908-1932, aliens arriving in or departing from the United States were classified as follows: Arriving aliens with permanent domicile outside the United States who intended to reside permanently in the United States were classed as immigrants; departing aliens with permanent residence in the United States who intended to reside permanently abroad were classed as emigrants; all alien residents making a Temporary trip abroad and all aliens residing abroad making a temporary trip to the United States were classed as nonimmigrants on the inward journey and nonemigrants on the outward. Permanent residence was defined as residence of 1 year or longer. (Annual Report of the Commissioner General of Immigration, 1908, p. 6.)
Since 1933, aliens arriving in the United States have been classified as immigrants or nonimmigrants. Immigrants are nonresident aliens admitted to the United States for permanent residence. Until July 1, 1968, they were further classified as quota and nonquota immigrants. Quota immigrants were those subject to the established quotas of Eastern Hemisphere countries and their dependencies. Nonquota immigrants included natives of the Western Hemisphere and their spouses and children, immediate relatives of U.S. citizens, and certain groups of special immigrants. Beginning July 1, 1968, immigrants have been classified as those subject to the numerical limitations of the Eastern Hemisphere, those subject to the numerical limitations of the Western Hemisphere, and those exempt from numerical limitations. Those that are exempt include immediate relatives (parents, spouses, and children) of US. citizens and various classes of special immigrants.
Nonimmigrants are nonresident aliens admitted to the United States for a temporary period. Included in this group are visitors for business and pleasure, students and their spouses and children, temporary workers and trainees and their spouses and children, foreign government officials, exchange visitors and their spouses and children, international representatives, treaty traders and investors, representatives of foreign information media, fiances(ees) of U.S. citizens and their children, intracompany transferees and their spouses and children, NATO officials, aliens in transit, and, for statistical purposes, permanent resident aliens returning after short trips abroad. Excluded are border crossers, crewmen, and insular travelers.
Data on emigrants have not been kept since 1957. Emigrants were aliens who resided in the United States for a year or longer and who left for a Permanent residence abroad. Nonemigrants were resident aliens of the United States who left the United States for a temporary period abroad, or nonresident aliens of the United States who were in the United States for less than a year who were returning to their permanent residence abroad. Since 1957 data have been
kept only on aliens departing. They include all aliens departing by sea or air except for direct departures to Canada.

The old definitions of immigrant, emigrant, nonimmigrant, and nonemigrant somewhat impaired the reliability of net immigration figures. While immigrants were admitted for permanent residence, they could depart prior to residence of 1 year, in which case they were counted as immigrants on arrival and nonemigrants on departure. Persons coming in temporarily, however, as nonimmigrants who failed to leave within a year would have been counted as emigrants on departure.

## C 89-119. Immigrants, by country, 1820-1970.

Source: 1820-1932, U.S. Immigration and Naturalization Service, unpublished data, and U.S. Bureau of Immigration, Annual Report of the Commissioner General of Immigration, as follows: 1820-1926 Report for 1926, pp. 170-178; 1927-1931, Report for 1931, pp. 222-223; 1932, Report for 1932, pp. 120-125; 1933-1957, U.S. Immigration and Naturalization Service, unpublished data; 1958-1970, Annual Report of the Immigration and Naturalization Service, annual issues.

Prior to 1906, data cover countries from which the aliens came; thereafter, countries of last permanent residence. Owing to changes in the list of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. Under the provisions of the Immigration and Nationality Act, subquotas of 100 each were established for colonies or dependencies, to be charged against the quota of the mother country. Because of these provisions, statistics were compiled, between January 1953 and July 1968, for each colony or dependency having a subquota. Under the Act of October 3, 1965, colonies and dependencies of foreign states are alloted 200 visa numbers each, chargeable to the mother country.
The principal changes in reporting immigrants by country since 1820 are shown in the detailed listing below.

See also general note for series C 89-157.

## C 90-101. Immigration from Europe, 1820-1970.

## Source: See source for series C 89-119.

Since 1820, territorial transfers in Europe have, to a certain extent, impaired the comparability of immigration statistics from that continent. Data for Austria-Hungary were not reported until 1861. Austria and Hungary have been reported separately since 1905. For 1938-1945, Austria is included with Germany. Bulgaria, Serbia, and Montenegro were first reported in 1899. In 1920, Bulgaria was reported separately, as was the Kingdom of Serbs, Croats, and Slovenes (identified as Yugoslavia since 1922). Prior to 1925, Northern Ireland was included with Ireland (Eire). The figures for Norway and Sweden were combined from 1820-1868; since 1869, each country has been reported separately. Poland was recorded as a separate country for 1820-1898 and since 1920. During 18991919, Poland was included with Austria-Hungary, Germany, and Russia. There is no record of immigration from Romania prior to 1880.
International transfers in territory following World War I resulted in the establishment of several countries. In 1920, Czechoslovakia, Finland, Poland, and the Kingdom of Serbs, Croats, and Slovenes (designated as Yugoslavia in 1922) were added to the immigration lists; in 1924, Albania, Estonia, Latvia, and Lithuania were added; in 1925 , the Free City of Danzig and Luxembourg were added.
The Immigration Act of 1924, which established quotas for all independent countries in Europe, Asia, Africa, and the Pacific, effected a further change in the immigration lists of countries. This change, however, was not fully felt until 1931. In that year, Andorra, Iceland, Liechtenstein, Monaco, and San Marino were added to the European countries, and the Russian Empire was classified into European Russia (designated as U.S.S.R. in Europe from 1947 through 1963) and Siberia, or Asiatic Russia. Since 1964, all the U.S.S.R. has been included in Europe. The principal effect of the 1924 Act,
however, was in the extension of the lists of Asian, African, and Western Hemisphere countries.
In 1950, Bessarabia and the northern portion of Bukovina were included in the U.S.S.R. instead of in Romania. The Dodecanese Islands were included in Greece instead of Italy. The Free Territory of Trieste, formerly a part of Italy and Yugoslavia, was established as an independent country until 1959, when it again became part of Italy and Yugoslavia in immigration statistics.

## C 102-109. Immigration from Asia, 1820-1970.

Source: See source for series C 89-119.
China and India are the only countries in Asia for which the records of immigration to the United States date back to 1820. A few immigrants from Japan were recorded in 1861, 1866, and 1867, but complete records for Japan begin with 1869. Figures for Turkey in Asia are available since 1869. Data on some immigration from Arabia are recorded for 1876-1895; from Armenia for 1874-1895; and from Persia for 1871-1895. For 1896-1923, immigration from Asia included only China, India, Japan, Turkey in Asia, and "other Asia." In 1924, Syria was added, and in 1925, Armenia, Palestine, and Persia (Iran) were added to the lists of Asian countries. Since 1934, Armenia has been included in Russia. In 1931, Siberia, or Asiatic Russia, was separated from European Russia, and Iraq and Siam (Thailand) were added to the lists. Since 1964, all the U.S.S.R. has been included in Europe.

In 1945, the classification of country in the country-of-birth statistics (on which the Quota Law was based) was adopted for the immigration statistics. This change resulted in the addition to the immigration lists of Afghanistan, Arabian Peninsula, Bhutan, Muscat, Nepal, Saudi Arabia, and Asiatic colonies, dependencies, and protectorates of European countries. Since 1948, the following countries have been added to the immigration lists: (1948) Burma, Ceylon, Jordan, Korea, and Pakistan; (1949) Israel (formerly included with Palestine), Lebanon (formerly included with Syria), and Yemen; (1950) Indonesia; (1952) Bonin Volcano Islands, Ryukyu Islands, Cambodia, Laos, and Vietnam; (1957) Formosa; (1961) Cyprus; (1963)Kuwait; (1964) Malaysia; (1967) Singapore.

C 110-114. Immigration from America, 1820-1970.
Source: See source for series C 89-119.
Prior to 1920, Canada and Newfoundland were recorded under country of last permanent residence as British North America. For 1920-1924, combined figures are available for Canada and Newfoundland; for 1925-1948, each was reported separately. Since 1950, Newfoundland has been included in Canada. Inspection of Canadians and Mexicans was first authorized by the Act of 1907. The first complete year for which all immigration via the land borders was recorded is, therefore, 1908.
Immigration from Mexico has been recorded for 1820-1885 and for 1894 to the present. Immigration statistics for the West Indies have been available since 1820 . For $1820-1860$, there was no classification of the West Indies, by country. For 1861-1898, some immigration was recorded from Antigua (1873-1895), Bahamas (18711895), Barbados (1869-1895), Bermuda (1861-1895), Cuba (18691898), Curacao (1873-1895), Haiti (1869-1895),Jamaica (1869-1895), Puerto Rico (1869-1895), Saint Croix (1871-1895), Saint Thomas (1872-1895), and Trinidad (1874-1895). For 1899-1924, there again was no classification by country of immigration from the West Indies. Immigration from Cuba has been separately recorded since 1925; from the British West Indies, Dominican Republic, Dutch West Indies, French West Indies, and Haiti since 1931; and from Bermuda since 1945. For detailed data, see Annual Report of Commissioner General of Immigration for each year, 1892-1932. Since January 1953, all countries in the West Indies have been reported.
Immigration from Central America has been recorded since 1820, but not by country during most of that period. Separate statistics are available for 1895-1898for Guatemala, Honduras, Nicaragua, and

El Salvador; and for 1895-1897 for Costa Rica. British Honduras was also enumerated separately for 1874-1910. With the above exceptions, only figures for total immigration were available for Central America until 1925. Immigration has been reported separately from British Honduras since 1925, and from the Canal Zone, Costa Rica, Guatemala, Honduras, Nicaragua, Panama, and El Savador since 1931.
Immigration from South America has also been reported in total since 1820 but, with the following exceptions, not by country until 1925. For 1869-1895, separate enumerations were made for Brazil, Chile, Colombia, Ecuador, Guiana, Peru, and Venezuela; and for 1871-1895 for the Argentine Republic. Separate figures for Brazil have been again available since 1925; and since 1931 for Argentina, Bolivia, British Guiana (since 1967, Guyana), Dutch Guiana (Surinam), French Guiana, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, and Venezuela.

## C 115. Immigration from Africa, 1820-1970.

Source: See source for series C 89-119.
Immigration from Africa has been recorded since 1820, but, with few exceptions, was not classified by country until 1931. There is record of some immigration from Liberia in 1829, 1839, 1844, and 1857-1893; Algeria, 1872-1894; Egypt, 1869-1895; and South Africa, 1869-1895. For 1890-1924, only immigration for continental Africa was reported. Immigration from Ethiopia (Abyssinia), Liberia, Morocco, and Union of South Africa has been recorded since 1931. In 1945, "other Africa" was classified into Cameroons (British Mandate), Cameroons (French Mandate), Ruanda and Urundi (trust territory, Belgium), South-West Africa (Mandate of the Union of South Africa), Tanganyika (trust territory, United Kingdom), Togoland (British Mandate), Togoland (trust territory, France), and colonies, dependencies, or protectorates of Belgium, France, Great Britain, Italy, Portugal, and Spain. Many of these countries have since gained their independence.

Since 1945, the following countries have been added: 1953: Libya and Somaliland (Italian administration), and Southern Rhodesia. Eritrea, which was federated with Ethiopia, was included with Ethiopia. 1957: Ghana (composed of British territories, Gold Coast and British Togoland), Sudan, and Tunisia. 1961: Congo, Republic of the Congo, Dahomey, Gabon, Ivory Coast, Malagasy Republic, Republic of Mali, Niger, Nigeria, Republic of Senegal, Somali Republic, and Upper Volta. 1963: Burundi and Rwanda, formerly Ruanda-Urundi. 1967: Botswana and Lesotho.

## C 116-118. Immigration from Australasia, 1870-1970.

## Source: See source for series C 89-119.

Immigration from Australia was recorded separately in 1822, 1839-1840, and for most of the years 1854-1898. For 1899-1924, a combined total was recorded for Australia, Tasmania, and New Zealand, and, since 1925, Australia has again been reported separately. Separate figures for New Zealand are available for $1870-1890$. For 1891-1893, New Zealand was included in "all other countries"; for 1894-1898, in "Pacific Islands, not specified," and for 1899-1924, with Australia and Tasmania. Separate figures for New Zealand have again been available since 1925.

The following countries were added to the immigration lists of the Pacific in 1945: Nauru (British Mandate); Territory of New Guinea including appertaining islands (Australian Mandate); Western Samoa (New Zealand Mandate); Yap and other Pacific Islands under Japanese Mandate; and colonies, dependencies, or protectorates of France, Great Britain, Japan, Netherlands, and Portugal. In 1952, the Pacific Islands (trust territory, U.S. administration) were added. In 1962, Western Samoa gained its independence and, since 1968, Nauru has also been an independent nation. Yap and several of the other islands once under the mandate of Japan are now included in Japan.

C 120-137. Immigrants, by major occupation group, 1820-1970.
Source: U.S.Department of the Treasury, Bureau of Statistics, 1820-1890, Arrivals of Alien Passengers and Immigrants in the United States, 1820-1890, pp. 42-49; 1891, Immigration into the United States Showing Number, Nationality, Sex, Age, Occupation, Desiination, ... from 1820-1903. U.S. Bureau of Immigration 1892-1898, Annual Report of Commissioner General of Immigration, annual issues. U.S. Immigration and Naturalization Service, 1899-1944, unpublished data; 1945-1970, Annual Report of the Immigration and Naturalization Service, annual issues, and unpublished data.

The major occupation groups for 1820-1898 include the following categories: Professional-occupations which involve a liberal education or its equivalent and mental rather than manual skills; commercial-agents, bankers, hotelkeepers, manufacturers, and merchants and dealers; skilled-occupations requiring special training of a manual rather than mental nature. A "farmer" is one who operates a farm, either for himself or for others; a "farm laborer" is one who works on a farm for the man who operates it. The "no occupation" group includes dependent women and children, other aliens without occupation, and aliens whose occupations were not stated.
Although the data are shown in broad occupation groups, the instructions for compiling statistics specified that the occupation should he described as precisely as possible. For example, civil engineer, stationary engineer, mining engineer, brass polisher, steel polisher, iron molder, wood turner, etc., should be so described, and not entered simply as engineer, polisher, molder, turner, or other indefinite designation.
From 1945 to 1951, the Immigration and Naturalization Service applied the major occupation groups as shown in the Sixteenth Census of the United States, Alphabetical Index of Occupations and Industries. It also grouped occupations of immigrants for 1899-1944 (compiled in unpublished records) as closely as possible into the new groups. From 1952 to 1961, occupations were coded and grouped in accordance with the definitions in U.S. Census of Population: 1950, Alphabetical Index of Occupations and Industries; beginning with 1962, occupations have been grouped according to the 1960 index.
The occupation figures include all immigrants, those with and without work experience. The "no occupation" group includes housewives, unemployed, retired persons, students, children under 14 years of age, aliens with no occupation, and occupation unknown or not reported.
See also general note'for series C 89-157.
C 138, 140-142. Immigrants, by age, 1820-1970.
Source: U.S. Department of the Treasury, Bureau of Statistics, 1820-1897, Monthly Summary of Commerce and Finance of the U.S., No. 12, series 1902-1903, pp. 4358 and 4362; U.S. Bureau of Immigration, 1898-1932, Annual Report of the Commissioner General of Immigration, annual issues; U.S. Immigration and Naturalization Service, 1933-1957, unpublished data; 1958-1970, Annual Report of the Immigration and Naturalization Service, annual issues, and unpublished data.
Some of the published estimates have been revised because of apparent printing errors in the source.
The age groups used to classify immigrants have changed a number of times since 1820, thereby impairing to a certain extent their comparability. For $1820-1898$, the classification was: Under 15 years, 15 to 40, and over 40. In addition, the age of nearly $250,000 \mathrm{immi}-$ grants, or 4 percent of the total, for 1820-1866 was not reported.
For 1899-1917, the age classification was: Under 14 years, 14 to 44, and 45 years and over; for 1918-1924: Under 16 years, 16 to 44, and 45 years and over.

Although only three age groups were generally used before 1925, a more detailed classification was used for 1910-1924for single females: 15 to 19 years, 20 to 24,25 to 29 , and 30 to 34 in 1910; 14 to 21 years, 22 to 29,30 to 37 , and 38 to 44 for 1911-1917; 16 to 21 years, 22 to 29,30 to 37 , and 38 to 44 for 1918-1924.

In 1925 the age classification was enlarged from 3 to 6 groups: Under 16 years, 16 to 21, 22 to 29, 30 to 37, 38 to 44, and 45 years and over. In 1940, it was enlarged to 12 groups, with a lower limit of under 11 years, 5 -year age groups until 60 , and an upper limit of over 60 years. In 1945, it was further enlarged into $\overline{0}$-year groups, with a lower age limit of under 5 years and an upper open-end limit of 100 years and over. The upper limit has since been changed to 95 and over.
See also general note for series C 89-157.
C 139. Male immigrants, 1820-1970.
Source: Senate Doc. No. 756, 61st Congress, 1820-1910, Reports of the Immigration Commission, vol. 3. U.S. Bureau of Immigration, 1911-1931, Annual Report of the CommissionerGeneral of Immigration, 1931; 1932, Annual Report of the Commissioner General of Immigration, 1932. U.S. Immigration and Naturalization Service, 1933-1939, unpublished data; 1940-1970, Annual Report of the Immigration and Naturalization Service, annual issues.
Although the Act of 1819 required that arriving immigrants be recorded by sex, these data were not satisfactorily compiled before 1869. (See Senate Doc. No. 756 cited above.) The earlier reports of the Secretary of State to Congress contain partial data on this subject, and in 1911 the Immigration Commission compiled percentage data to show the approximate sex distribution for 1820-1867. The data are not complete, as in most years sex was not reported for a considerable number of immigrants, but on the whole the percentages may be accepted as fairly representative of the sex distribution in the years considered. For continuity of data throughout the 1820-1970 period, the above mentioned percentages have been applied to the total immigration figures for the years 1820 through 1867 to arrive at an estimate of the number of male immigrants. Data for 1869 through 1970 reflect actual data of immigration by sex.

C 143-157. Annual quota and aliens admitted, by classes, 1925-1970.
Source: US. Immigration and Naturalization Service, Annual Report of Immigration and Naturalization Service, annual issues, Presidential Proclamations on quotas, and unpublished data.

For 1925-1929, the annual quota (series C 143) of 164,667 was based on 2 percent of the foreign-born residents in the United States as determined by the 1890 census. The "national origin" formula which determined quotas from 1929 until the Act of October 3, 1965, went into effect,provided that the annual quota equal one-sixth of one percent of the number of white inhabitants in the continental United States in 1920, less Western Hemisphere immigrants and their descendants. The annual quota for each nationality was then determined by the same ratio to 150,000 as the number of inhabitants of each nationality living in the continental United States in 1920 to the total inhabitants, although a minimum quota for any nationality was 100. As territorial boundaries changed and new countries were established, slight changes in quotas occurred.

The Act of October 3, 1965, abolished the quota system and in its place set up an annual numerical limitation of 170,000 immigrants from the Eastern Hemisphere, with no more than 20,000 immigrants to come from any one country. From December 1, 1965, through June 30, 1968, countries retained their old quotas, but unused visa numbers from each year went into a general pool of numbers available on a first-come, first-served basis during the next year. On July 1, 1968, the new law and the system of numerical limitations went fully into effect. Also at that time a numerical limitation of 120,000 per year was imposed on Western Hemisphere immigration, which had previously been unrestricted. The Act of October 3, 1965, thereby abolished the "national origins" system and gave persons from every country within each hemisphere an equal chance to immigrate to the United States.

The classes presented in these series are legal classes of admission defined in the Act of 1924 and the Immigration and Nationality Act of 1952 as amended by the Act of October 3, 1965. Returning
resident aliens, who have been counted before as immigrants, are included with nonimmigrants.
In general, statistics on aliens admitted have been derived from manifests or entry documents. Changes in regulations extending documentary waivers for nonimmigrants entering via the Canadian or Mexican border, or from adjacent islands, have impaired comparability of the nonimmigrant statistics.
See also general note for series C $89-157$.
C 158-161. Aliens deported, required to depart, and excluded, 18921970.

Source: US. Immigration and Naturalization Service, Annual Report of Immigration and Naturalization Service, 1967, pp. 46, 50, and 1970, p. 85.
C 159, aliens deported. Undesirable aliens who have violated certain immigration laws may be expelled or deported under formal deportation proceedings. Deportation of alien contract laborers within one year after entry was authorized by the Act of 1888 . Deportation statistics, however, have been compiled only since 1892, shortly after enactment of the Act of 1891, which provided for the deportation of all aliens who entered unlawfully. The classes of deportable aliens were extended by subsequent acts and are now defined in the Immigration and Nationality Act of 1952 as amended by the Act of October 3, 1965. The principal deportable classes are criminals (including violators of narcotic laws), immoral classes, mental or physical defectives, public charges, subversives, and those who entered illegally or failed to maintain or comply with the conditions of admission.
C 160, aliens required to depart. Aliens who would be deportable under certain sections of the law may forego formal deportation hearings and depart voluntarily either at their own expense, or if deemed desirable, at the expense of the Government. Statistics on aliens required to depart have been recorded since 1927.
C 161, aliens excluded. Prior to 1882, various State laws were enacted excluding from admission to the United States undesirable aliens such as paupers, felons, and diseased aliens. The first Chinese exclusion law was passed in 1882. Lunatics, idiots, and persons likely to become public charges were first excluded by the Act of 1882 .
Statistics on aliens excluded were first compiled in 1892, shortly after passage of the Act of 1891, which extended the classes of excludable aliens. Subsequent acts, principally the Immigration Act of 1917, and the Immigration and Nationality Act of 1962, extended these classes further. At present, the principal classes excluded are attempted illegal entries, criminals (including violators of narcotic laws), immoral persons, subversive or anarchistic persons, attempted entry without proper documents, mental or physical defectives, stowaways, and those likely to become a public charge.

## C 162-167. Aliens naturalized, by type of provision, 1907-1970.

Source: 1907-1930, U.S. Bureau of Naturalization, Annual Report of the Commissioner of Naturalization; 1931-1970, U.S. Immigration and Naturalization Service, Annual Report of the Immigration and Naturalization Service, annual issues.
See also general note for series C 168-180.
General naturalization provisions. Since the first naturalization statute of 1790, residence in the United States, good moral character, and an oath to support the Constitution have been required of persons seeking U.S. citizenship. The Act of April 14, 1802, incorporated the requisites of 5 years' residence in the United States, favorable disposition to the happiness of the nation, good moral character, and attachment to the principles of the Constitution. These prerequisites for naturalization are still in basically the same form today.
Married to U.S. citizens. Prior to 1922, married women were ineligible for judicial naturalization during coverture. The Act of September 22, 1922, however, eliminated sex and marital status as factors for eligibility and established a one year residence require-
ment for a woman who married a U.S. citizen. On May 24, 1934, another act provided similar benefits but extended them to the spouse of a U.S. citizen, woman or man, and set a 3 -year residence requirement which has continued into the current statute.

Children of U.S. citizens. Statutes prior to the Act of October 14, 1940, made no provisions for the naturalization of a minor child except under special circumstances. Beginning with the 1940 Act, a child born outside the United States, one or both of whose parents is a U.S. citizen at the time of petitioning, may be naturalized if under the age of 18 , if not otherwise disqualified, and if residing permanently in the United States with the citizen parent. No particular period of residence is required and if the child is of "tender years" he may be presumed to be of good moral character and attached to the principles of the Constitution. Children adopted by U.S. citizens before attaining 16 years of age were also first provided for in the 1940 Act and similar legislation was reenacted in the Act of October 3, 1965. The current law requires a specified period of residence, generally 2 years, but adoption does not have to be in the United States as specified in the earlier law.
Military. Prior to 1918, special provisions were not made for persons who had served in the U.S. Armed Forces. The Act of May 9, 1918, and subsequent amendments expiring December 8, 1943, provided for the simplified naturalization of veterans of World War I and prior conflicts. The Act of March 27, 1942, for which the termination date for filing petitions was set on December 31, 1946, gave special benefits to World War II servicemen. The Act of June 1,1948, made permanent the provisions for the expeditious naturalization of persons serving honorably in the U.S. Armed Forces during World Wars I and II. On September 26, 1961, another act amended the above to include those serving in the Korean Conflict occurring between June 25, 1950, and July 1, 1955. The Act of October 24, 1968, added the Vietnam Conflict for a period beginning February 28, 1961, and ending on a date to be fixed by the President.

## C 168-180. General note.

Prior to 1906, individual courts kept records of naturalizations, but no national data were compiled. The Act of 1906 required all courts conducting naturalization proceedings to file with a central Federal agency a copy of each declaration of intention and petition of naturalization filed and of each certificate of naturalization issued.
For 1907-1912, naturalization statistics were compiled by the Bureau of Immigration and Naturalization. For 1913-1932, they were compiled by the Bureau of Naturalization. For 1933-1940, they were given in the Annual Report of the Secretary of Labor and, for 1941, in the Annual Report of the Attorney General. No report was published in 1942. For subsequent years, the statistics appeared in the Annual Report of the Immigration and Naturalization Service.

## C 168. Declarations filed, 1907-1970.

Source: 1907-1910, U.S. Department of Labor, Annual Report of the Secretary of Labor, 1940, p. 115; 1911-1970, U.S. Immigration and Naturalization Service, Annual Report of Immigration and Naturalization Service, annual issues.
See also general note for series C 168-180.
Section 331 of the Nationality Act of 1940 provided that an applicant for naturalization after reaching the age of $\mathbf{1 8}$ years must make, under oath, not less than 2 nor more than 7 years prior to his petition for naturalization, a signed declaration of intention to become a citizen. This section contained substantially the requirements of the Basic Naturalization Act of 1906 concerning the declaration of intention. The Immigration and Nationality Act of 1952, which repealed the Nationality Act of 1940, provides that a declaration of intention may be filed, but it is not a prerequisite to naturalization. In a number of States, in order to obtain employment, a license, etc., an alien applicant must prove that he intends to become a citizen. The law permits the filing of a declaration to show such intent.

Prior to 1930, the number of declarations of intention was far in excess of the number of aliens naturalized. This was due mainly to the failure of many aliens to file a petition for naturalization within the prescribed time limit, as well as the denial of a number of petitions for naturalization. In most of the years since 1930 the number of aliens naturalized has exceeded the declarations filed, because of the increasing number of persons who were exempted from the general requirements for a declaration of intention.

Since 1907, a number of laws were passed exempting special classes of persons from the general requirement of a declaration of intention. Most of these laws were codified into the Nationality Act of 1940. Included among such exempted classes were noncitizen spouses of United States citizens; certain former citizens; noncitizens who, because of misinformation, erroneously exercised the rights of citizenship; noncitizens who, at the time of entering the United States, were under 16 years of age; certain noncitizens who served honorably in the United States Armed Forces or on certain vessels; and certain noncitizen children.

## C 169. Aliens naturalized, 1907-1970.

Source: See source for series C 168.
"Aliens naturalized" are aliens upon whom naturalization was conferred in the United States by a naturalization court or outside of the United States by a representative of the Immigration and Naturalization Service. The total number of aliens naturalized includes both civilian and military naturalizations. Statistics on naturalizations do not include repatriations.
Separate statistics on repatriations are compiled by the Immigration and Naturalization Service which also compiles statistics on certificates of derivative citizenship granted and denied, expatriations and certificates of naturalization revoked, and petitions for naturalization denied.

## C 170-171. Aliens naturalized, by sex, 1923-1970.

Source: 1923-1932, U.S. Bureau of Naturalization, Annual Report of fhe Commissioner of Naturalization, annual issues; 1933-1940, U.S. Department of Labor, Annual Report of the Secretary of Labor, annual issues; 1941-1970, U.S. Immigration and Naturalization Service, Annual Report of the Immigration and Naturalization Service, annual issues.

C 172-179. Aliens naturalized, by area of former allegiance, 19231970.

Source: U.S. Bureau of Naturalization, 1923-1932, Annual Report of the Commissioner of Naturalization, annual issues; U.S. Immigration and Naturalization Service, 1933-1935, unpublished data; 19361970, Annual Report of the Immigration and Naturalization Service, annual issues.

## See also general note for series C 168-180.

"Country of former allegiance or nationality" is the country of which the alien at the time was a citizen or subject. Data on the number of aliens naturalized, by country or region of former allegiance, have been compiled only from 1922. Owing to changes in the list of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. The principal changes in reporting since 1923 are shown for individual series below.

C 172, Northwestern Europe. Includes the British Empire, Norway, Sweden, Denmark, Netherlands, Belgium, Luxembourg, Switzerland, France, and, beginning 1948, Iceland. Beginning 1948, Ireland has been reported separately. Australia has been reported separately from 1951, and included in "All other" (series C 179). For earlier years, Ireland and Australia are included under the British Empire. See text for series C 176, C 177, and C 179 for former British territories.

C 173, Central Europe. Includes Germany, Poland, Czechoslovakia, Austria, Hungary, and Yugoslavia. For 1938-1947,Austria was included with Germany.

C 174, Eastern Europe. Includes the Union of Soviet Socialist Republics, Latvia, Estonia, Lithuania, Finland, Romania, Bulgaria, and Turkey. For 1923-1927, Lithuania comprised portions of Russia and Germany. European and Asiatic Turkey are included in Eastern Europe.

C 175, Southern Europe. Includes Greece, Italy, Spain, Portugal, and for 1929-1970, "Other Europe," which comprises Albania, the Free City of Danzig, Liechtenstein, San Marino, Monaco, Andorra, and for the years 1950-1959, Trieste. For 1923-1928,"Other Europe" was recorded under the "miscellaneous" group of countries and is included with "All other" (C 179).

C 176, Asia. The Asian countries reported separately and the beginning dates are shown below:

Afghanistan (1929); Arabian Peninsula (1943); Bhutan (1945); Burma (1949); Cambodia (1959); Ceylon (1948); China (1932); Cyprus (1961); India (1948, British Empire formerly); Indonesia (1950);Iran (1929); Iraq (1929); Israel (1950, Palestine formerly); Japan (1932); Jordan (1948, formerly called Trans-Jordan and included with Palestine prior to 1948); Korea (1948, Japan formerly); Kuwait (1962); Laos (1960); Lebanon (1950, included in Syria formerly); Malaysia (1963); Maldive Republic (1970);Muscat and Oman (1945); Nepal (1945); Pakistan (1948, included in British Empire formerly); Palestine (reported separately 1929-1944 and since 1948; included in British Empire 1945-1947); Philippines (1929); Saudi Arabia (1945); Singapore (1967); Southern Yemen (1969); Syria (reported separately 1928-1944, 1948-1958, and 1962-1970; included in France, 1944-1947 and in United Arab Republic, 1959-1961; Thailand (Siam, 1944); Vietnam (1952); Yemen (1950); and Tiawan (Formosa, 1957).
Until 1953, racial restrictions upon naturalization limited the naturalization of aliens who were citizens or subjects of countries located in Asia. (See text for series C 180.)

C 178, other America. Includes Mexico, the West Indies, Central and South America. Figures for Mexico date from 1924; for the West Indies (Cuba, Dominican Republic, and Haiti separately) from 1929. For 1924-1928, the figures for Central and South America were combined. Separate figures have been compiled for independent countries in Central and South America beginning with 1929, except in 1933.

C 179, all other. Includes "miscellaneous" countries 1923-1928; repatriated Americans, 1924-1934; "stateless" nationals from 1945; Ethiopia from 1929; Liberia from 1929; and countries which were former territories. Former territories and the beginning dates of separate report are shown below:

Formerly French territories: Libya (1953); Tunisia (1937); Sudan (1957); Morocco (1958); Guinea (1960); Central African Republic, Chad, Congo, Dahomey, Gabon, Ivory Coast, Malagasy Republic, Republic of Mali, Mauritania, Niger, Republic of Senegal, Togo, and Upper Volta (1961); Algeria and Cameroon (1963). Formerly British Territories: Egypt, included in British Empire, 1945-1947, reported separately 1929-1944 and since 1948; South West Africa (1952); Southern Rhodesia (1953); Union of South Africa (1948); Australia (1951); Nauru (1952); New Guinea (1962); New Zealand (1952); and Western Samoa (1952). Ghana (1959), Nigeria and Sierra Leone (1961);Tanganyika (1962);Kenya (1964), Malawi, Uganda, and Zanzibar (1965); Zambia (1966); Gambia (1967); Tanzania (1968), Botswana and Lesotho (1969), Mauritius and Swaziland (1970). Formerly Belgian territories: Republic of the Congo (1961), Burundi and Rwanda (1964). Formerly Italian Administration: Somaliland (1953; Somali Republic as of
1961). Formerly international administration: Tangier (1953). Separate figures are available for the following United States possessions: American Samoa, Canal Zone, Puerto Rico, Virgin Islands, and Wake and Midway Islands (1945-1951 and since 1955); Hawaii (1955-1959); Guam (1944-1951, and since 1955); Bonin Islands (1962-1968); Christmas Islands (since 1964); the Ryukyu Islands (since 1960); and Swains Island (since 1962).

## C 180. Petitions denied, 1907-1970.

Source: 1907-1921, U.S. Bureau of Naturalization, Report of Commissioner of Naturalization, as follows: 1907-1917, Report for 1917, p. 5; 1918-1919, Report for 1919, p. 4; 1920, Report for 1920, pp. 5-6; 1921-1957, U.S. Immigration and Naturalization Service, Annual Report of Immigration and Naturalization Service, annual issues.
See also general note for series C 168-180.
Statistics on petitions denied have been compiled since 1907. The Basic Naturalization Act of 1906 and subsequent naturalization laws specified the eligibility requirements for naturalization. Petitions for naturalization of aliens who fail to meet the prerequisites for naturalization may be denied by the courts at the final naturalization hearing. Included among the reasons for denial are lack of knowledge and understanding of history, principles, and form of government of the United States, failure to establish good moral character, lack of attachment to the Constitution of the United States, inability to speak (read, write) the English language, failure to establish lawful admission to the United States or to meet residence requirements, etc.
In the early laws the right to become naturalized was limited to white persons, and petitions of persons of ineligible races were denied. Gradually such restrictions were removed with respect to Negroes, Filipinos, races indigenous to North and South America and adjacent islands, Chinese, and Guamanians. In 1952, the Immigration and Nationality Act removed all racial restrictions to naturalization.

## C 181-194. Citizenship status of the population, 1890-1970.

Source: U.S. Bureau of the Census. 1890-1940, total, native, and total foreign-born population, and 1930-1940, citizenship status of foreign born and persons 21 years old and over, Sixteenth Census Reports, Population, vol. 11, part 1; 1890-1920, data on persons 21 years old and over, and 1920, citizenship status of foreign born, Fifteenth Census Reports, Population, vol. 11; 1950, U.S. Census of Population: 1950, vol. 11, part 1; 1960, U.S. Census of Population: 1960, vol. I, part 1; 1970, U S. Census of Population: 1970, vol. II, Subject Reports.
Citizenship. Information on citizenship was used to classify the population into two major categories, citizens and aliens. Citizens are further classified as native or naturalized. "Native" includes all persons born in the United States, Puerto Rico, the Canal Zone, Guam, American Samoa, or the Virgin Islands and persons born abroad of American parents or at sea. It was assumed that all natives were citizens. See also text for series A 105-118.

In 1970, when information on citizenship was missing, it was assigned on the basis of related information.

These statistics relate to the citizenship status of the population at the date of the specified decennial census.

C 195-227. Native population of foreign or mixed parentage, by country of origin of parents, 1900-1970.
Source: U.S.Bureau of the Census. 1900-1940, Sixteenth Census Reports, Population, Country of Origin of Foreign Stock; 1950, U.S. Census of Population: 1950, vol. IV, Special Reports, Nativity and Parentage; 1960, U.S. Census of Population: 1960, vol. I, part 1;1970, U.S. Census of Population: 1970, vol. 11, Subject Reports.

The category "native" comprises persons born in the United States, in the Commonwealth of Puerto Rico, in an outlying area of the

United States, or at sea. Also included in this category is the small number of persons who, although they were born in a foreign country, have at least one native American parent. When information on place of birth was missing, nativity was assigned on the basis of related information. In previous censuses, persons for whom nativity was not reported were generally classified as native. The rules for determining the nativity of parents are generally the same as those for determining the nativity of the person himself.
Parentage. Information on birthplace of parents is used to classify the native population into two categories: native of native parentage and native of foreign or mixed parentage. The category "native of native parentage" comprises native persons with both parents born in the United States. The category "native of foreign or mixed parentage" includes native persons with one or both parents foreign born.

The definition of country of birth of parents is similar to that used in series C 228-295, below, with one important exception. The classification by country of birth of parents for 1930 and later years is made on the basis of boundaries existing at the date of the specified decennial census. This is the same procedure used for all of the years in series C 228-295. However, the 1920 data on country of birth of parents shown in this series are based on pre-World War I boundaries because of the difficulty of obtaining correct replies on the basis of postwar boundaries for parents of persons enumerated.

See also text for series A 91-104, A 105-118, A 119-134, and A 135-142.

C 228-295. Foreign-born population, by country of birth, 1850-1970.
Source: U.S. Bureau of the Census. 1850-1930, total foreign born, Fifteenth Census Reports, Population, vol. II, p. 233; 19101940, foreign-born white, Sixteenth Census Reports, Population, vol. II, part 1, p. 43; 1950, U.S. Census of Population: 1950, vol. IV, Special Reports, Nativity and Parentage, p. 3A-71 and vol. IV, Special Reports, Nonwhite Population by Race, p. 3B-82, and unpublished data; 1960, U.S. Census of Population: 1960, vol. I, part 1; 1970, U.S. Census of Population: 1970, vol. II, Subject Reports.

The foreign born population comprises all persons born outside the United States, Puerto Rico, or an outlying area of the United States, except those persons with at least one American parent. Persons born in any of the outlying areas, and American citizens born abroad or at sea, are regarded as native.
The statistics on country of birth are generally based on the political boundaries of foreign nations existing at the date of the specified decennial census. Because of boundary changes following World War I and World War II, accurate comparisons over the entire period, 1850-1950, can be made for relatively few countries. These countries include England, Scotland, Wales, Norway, Sweden, Netherlands, Switzerland, Spain, Portugal, Canada (total of Canada-French, Canada-other, and Newfoundland), and Mexico. For several other countries, as for example, Italy, France, and Belgium, the figures are slightly affected by boundary changes; but these changes have not been so great as to destroy entirely the value of comparative figures. The boundaries of other countries, as for example, U.S.S.R., Austria, Hungary, Romania, and Greece, have been so changed that comparisons over time are subject to a large margin of error.

Statistics on country of birth of the foreign born have generally been restricted to those countries which had at the time of the census a separate political entity. For 1860-1900, however, an exception was made in the case of Poland. Although Poland was not restored to its original status as an independent country until the end of World War I, its historical position was such that Polish immigrants generally regarded Poland as their country of birth regardless of the political sovereignty over their birthplace. For 1860-1890, persons reported as born in Poland were so tabulated without qualification. In the census of 1900, an attempt was made to distinguish Austrian, German, and Russian Poland, and separate statistics for each were presented. In the census of 1910, persons reported as born in Poland
were assigned either to Russia, Germany, or Austria. The figures for 1910, however, have been adjusted on the basis of mother tongue data, to conform as nearly as possible to the conditions in 1930.
Since World War I, the greatest difficulties encountered in the country-of-birth statistics have been the classification of persons born in the former Austro-Hungarian Empire. Many persons born within the prewar boundaries of this Empire could not or did not give the census enumerator the information needed for the determination of their country of birth on the basis of postwar geography. It is therefore quite possible that some persons were assigned to Austria who were really born within the present areas of either Czechoslovakia or Yugoslavia, and that persons were assigned to Hungary who were born within the present areas of Romania or Yugoslavia. Similarly, it is possible that some persons born in Latvia, Estonia, or Lithuania were assigned to Russia. Persons for whom Austria-Hungary was reported in the 1950 census were allocated on the basis of surname to the various countries created out of the territory of the old empire after World War I. Even with this procedure, however, there appears to be some indication that Austria and Hungary are overreported at the expense of Yugoslavia and Czechoslovakia. In 1950 the situation was further complicated by the fact that, although there were extensive de facto boundary changes as a result of World War 11, only a small number of these changes were officially recognized by the United States at that time.
Since 1950, persons have been allocated to a specific country based on mother tongue data.

C 296-301. Passenger arrivals and departures, 1908-1970.
Source: U.S. Bureau of Immigration, 1908-1930,Annual Report of the Commissioner General of Immigration. U.S. Immigration and Naturalization Service, 1931-1949, Report of Passenger Travel Between the United States and Foreign Countries, annual issues; 19501970, Annual Report of the Immigration and Naturalization Service, annual issues.
Statistics on passenger travel are obtained from passenger manifests or lists required by law to be prepared by carriers for vessels and aircraft traveling between the United States and foreign countries. Arrival manifests were first required under the Act of 1819, while
similar manifests of departing passengers were first required under the Act of 1907.

Prior to 1908, statistical information on passenger travel is incomplete. From 1820 through 1856, reports showed the total number of alien passengers arrived. During the years 1857 through 1867, data reflected the arrivals of immigrants as well as all alien passenger arrivals. Beginning in 1868, the data related to immigrant arrivals only, a practice that continued until 1906, when alien arrivals were classified into two groups: immigrants and nonimmigrants. No record of the movement of U.S. citizen passengers was made before 1908.

Data relating to the inward and outward movement of passengers became complete in 1908, when, as the result of the Act of 1907, departure records were first compiled. U.S. citizen passengers were also reported for the first time during that year.

C 302-331. Passengers arriving and departing by area of embarkation or debarkalion, flag of carrier, and mode of travel, 1931-1970.
Source: U.S. Immigration and Naturalization Service, 1931-1949, Report of Passenger Travel Between the United States and Foreign Countries, annual issues; 1950-1970, Annual Report of the Immigration and Naturalization Service, annual issues.

Detailed statistics relating to the inward and outward movement of passengers were first reported in 1931. These data have, since their inception, been derived from passenger manifests or lists required by law of international carriers arriving in and departing from the United States.

Country of embarkation is the foreign country where the passenger boards the vessel or aircraft which brings him to the United States; country of debarkation is the foreign country where the passenger disembarks from the vessel or aircraft which he boarded in a U.S. port. The origin or final destination of the passenger is not reported. For example, a passenger proceeding from Frankfurt to Paris, where he boards a plane for New York, is counted as arrived in New York from France. Flag of carrier means the nationality of the carrier; cruise travel denotes movement of passengers who embark on a carrier at a U.S. port for a round trip cruise to foreign territory and return on the same carrier. Cruise travel is counted for both inbound and outbound passengers.

Series C 89-119. Immigrants, by Country: 1820 to 1970

[^0]:    * Denotes firstyear for which figures include Alaska and Hawaii.

    NA Not available.
    ${ }^{2}$ Based on 25-percent sample.
    ${ }^{4}$ Excludes Mexicans: classified under "other races."

[^1]:    * Denotes first year for which figures include Alaska and Hawaii.

[^2]:    - Represents zero.
    ${ }^{1}$ For $1820-1867$ excludes returning citizens: therefore, for those years, does not agree with series C 120 and C 138
    ${ }^{2}$ Comprises Eire and Northern Ireland.
    ${ }^{3}$ Comprises Norway, Sweden, Denmark, and Iceland
    ${ }_{4}^{3}$ Comprises Netherlands, Belgium, Luxembourg, Switzerland, and France.
    5 Includes Austria 1938 to 1945.
    ${ }_{6}{ }^{5}$ Comprises Czecdoslovakia (since 1920), Yugoslavia (since 1920), Hungary (since

[^3]:    1861), and Austria (since 1861, except for the years 1938-1945, when Austria was included with Germany). (excluding Asian U.S.S.R. between 1931 and 1963, Latvia, Estonia, Li.thuania, and Finland).
    ${ }^{\circ}$ Comprises Romania, Bulgaria, and Turkey in Europe.
    Comprises Romanja, Bulgaria, and Turkey in Europe. ${ }^{10}$ Between 1899 and 1919, included with Austria-Hungary, Germany, and Russia.

[^4]:    ${ }^{1}$ For 1820-1867, includes returning citizens.

[^5]:    1 For 1820-1837, figures include returning citizens: for 1820-1866, figures include immigrants not shown separately, whose age was not reported.
    ? For $1940-1844$, figures in series $C 141$ include, and those in series C 142 exclude
    centages. These percentages have been applied to the total number of immigrants to estimate the number of males during those years.
    4 Not reported. ${ }^{5} 6$ months ending- June 30 .
    63 months ending December 31. , 9 months ending September 30.

[^6]:    1 Represents quota immigrants through June 30,1888 ; see text for series C $143-15 \%$ EffectiveJuly 1, 1968, natives Ofthe Eastern Hemisphere became subject to an annual numerical imitation of 170,000 adult Spouses and chis
    adulu.s. citlzens. children of natives of Western Hemisphere countries. Beginning July 1, 1968, natives of west numerical limitation of 120,000.

[^7]:    Represents zero.
    Includes adopted children.

[^8]:    ${ }^{1}$ See text for list of countries.
    Data for 1943-1947 and 1954-1956 include naturalizations in various theaters of war or areas occupied by U.S. Forces.

    Included in Northwestern Europe as part of British Empire. do not agree with source auoted. Source excludes Armed Forces overseas whereas the data shown here include them.
    ${ }_{8}^{8}$ Included in "All other." were not reported separately.
    ${ }_{7}$ September 27,1906, to June 30,1907.

[^9]:    See footnotes at end of table.
