

Emoji Candidates (Provisional)

[Index & Help](#) | [Images & Rights](#) | [Spec](#) | [Proposing Additions](#)

The following emoji characters are candidates for inclusion in a future version of Unicode. **These characters are *not* final!** The characters were based on proposals received by the Unicode Consortium, reviewed by the Unicode Emoji Subcommittee, and selected on the basis of the *Emoji Selection Factors* in [Submitting Emoji Proposals](#). That page also describes the [Process and Timeline](#) for proposals.

See also [Draft Candidates](#).

Background

Provisional candidates are subject to prioritization, and may not included be in the next release of Unicode. Temporary IDs are assigned, not code points. *Draft candidates* are “short-listed”, and have been assigned draft code points, but are still subject to change or removal. *Final candidates* will be in the next release of Unicode, but do not have final code points or properties.

The **Attributes** column contains provisional information about the candidate:

- > **X** indicates that the character (tentatively) would be after X in [Emoji Ordering](#).
- ∈ **modifier_base** indicates that the character would allow skin-tone modifiers
- ∈ **gender_base** indicates that the character would have ZWJ sequences for gender
- ∈ **component** indicates that the character is used as a component of a sequence, and is not normally listed separately on emoji keyboards.

The count of new variants is in the Other Keywords column, such as “+ 5 🍷”. The abbreviations and symbols are documented in [Emoji Counts Key](#), and the symbol meanings can be seen by hovering with a mouse. Where the last Sample cell is marked with the symbol +, there is a row for an pre-existing character that has new gender and/or modifier variants. For example, + 5 🍷 means that additional 5 skintone variants on the original character are added, and + 20 🍷 means 20 zwj sequences are added, used to compose two other characters with a skintone on each.

[Feedback](#) on the CLDR Short Name, Keywords, ordering, and category is welcome.

When looking at the linked proposals for candidates or accepted characters it is important to keep two points in mind:

1. New proposals must follow the form in [Submitting Emoji Proposals](#). This form may have changed since earlier proposals were submitted.
2. The UTC may accept a proposal for reasons other than those stated in the proposal, and does not necessarily endorse or consider relevant all of the proposed reasons.
