

MAY 2021

2021 NORTON CYBER SAFETY INSIGHTS REPORT GLOBAL RESULTS

PREPARED BY

Survey Method

The research was conducted online by The Harris Poll on behalf of NortonLifeLock among 10,030 adults (aged 18+) in 10 countries. The survey was conducted February 15-28, 2021 in Australia (n=1,005), France (n=1,000), Germany (n=1,001), India (n=1,000), Italy (n=1,000), Japan (n=1,020), Netherlands (n=1,000), New Zealand (n=1,004), the United Kingdom (n=1,000), and the United States (n=1,000). Data are weighted where necessary to bring them in line with their actual proportions in the population; India was weighted to the population of those who are online. Weighted variables varied by country and included one or more of the following: age, gender, race/ethnicity, region, education, marital status, internet usage, household size, household income, size of place, and propensity to be online. A global postweight was applied to ensure equal weight of each country in the global total.

Population projection estimates cited are calculated based on adult population (age 18+) figures from the U.S. Census Bureau's 2021 International Data Base and Pew Research Center 2017 Global Attitudes Survey. No estimates of theoretical sampling error can be calculated.

Throughout the report, references to YOY changes represent differences in results from the 2019 Global NLCSIR Study, conducted online by the Harris Poll on behalf of NortonLifeLock among 10,063 adults (aged 18+) in 10 countries from November 5 to December 2, 2019.

CYBERCRIME: INCIDENCE, IMPACT, AND ATTITUDES

In a year filled with restrictions and lockdowns, cybercriminals were not deterred as nearly 330 million adults in 10 countries* experienced cybercrime in the past 12 months. Despite many consumers saying they are taking more precautions online because they are concerned about cybercrime, more than 2 in 5 feel more vulnerable to cybercrime than they did before the COVID-19 pandemic, and half aren't sure how to protect themselves.

*Australia, France, Germany, India, Italy, Japan, Netherlands, New Zealand, United Kingdom, United States

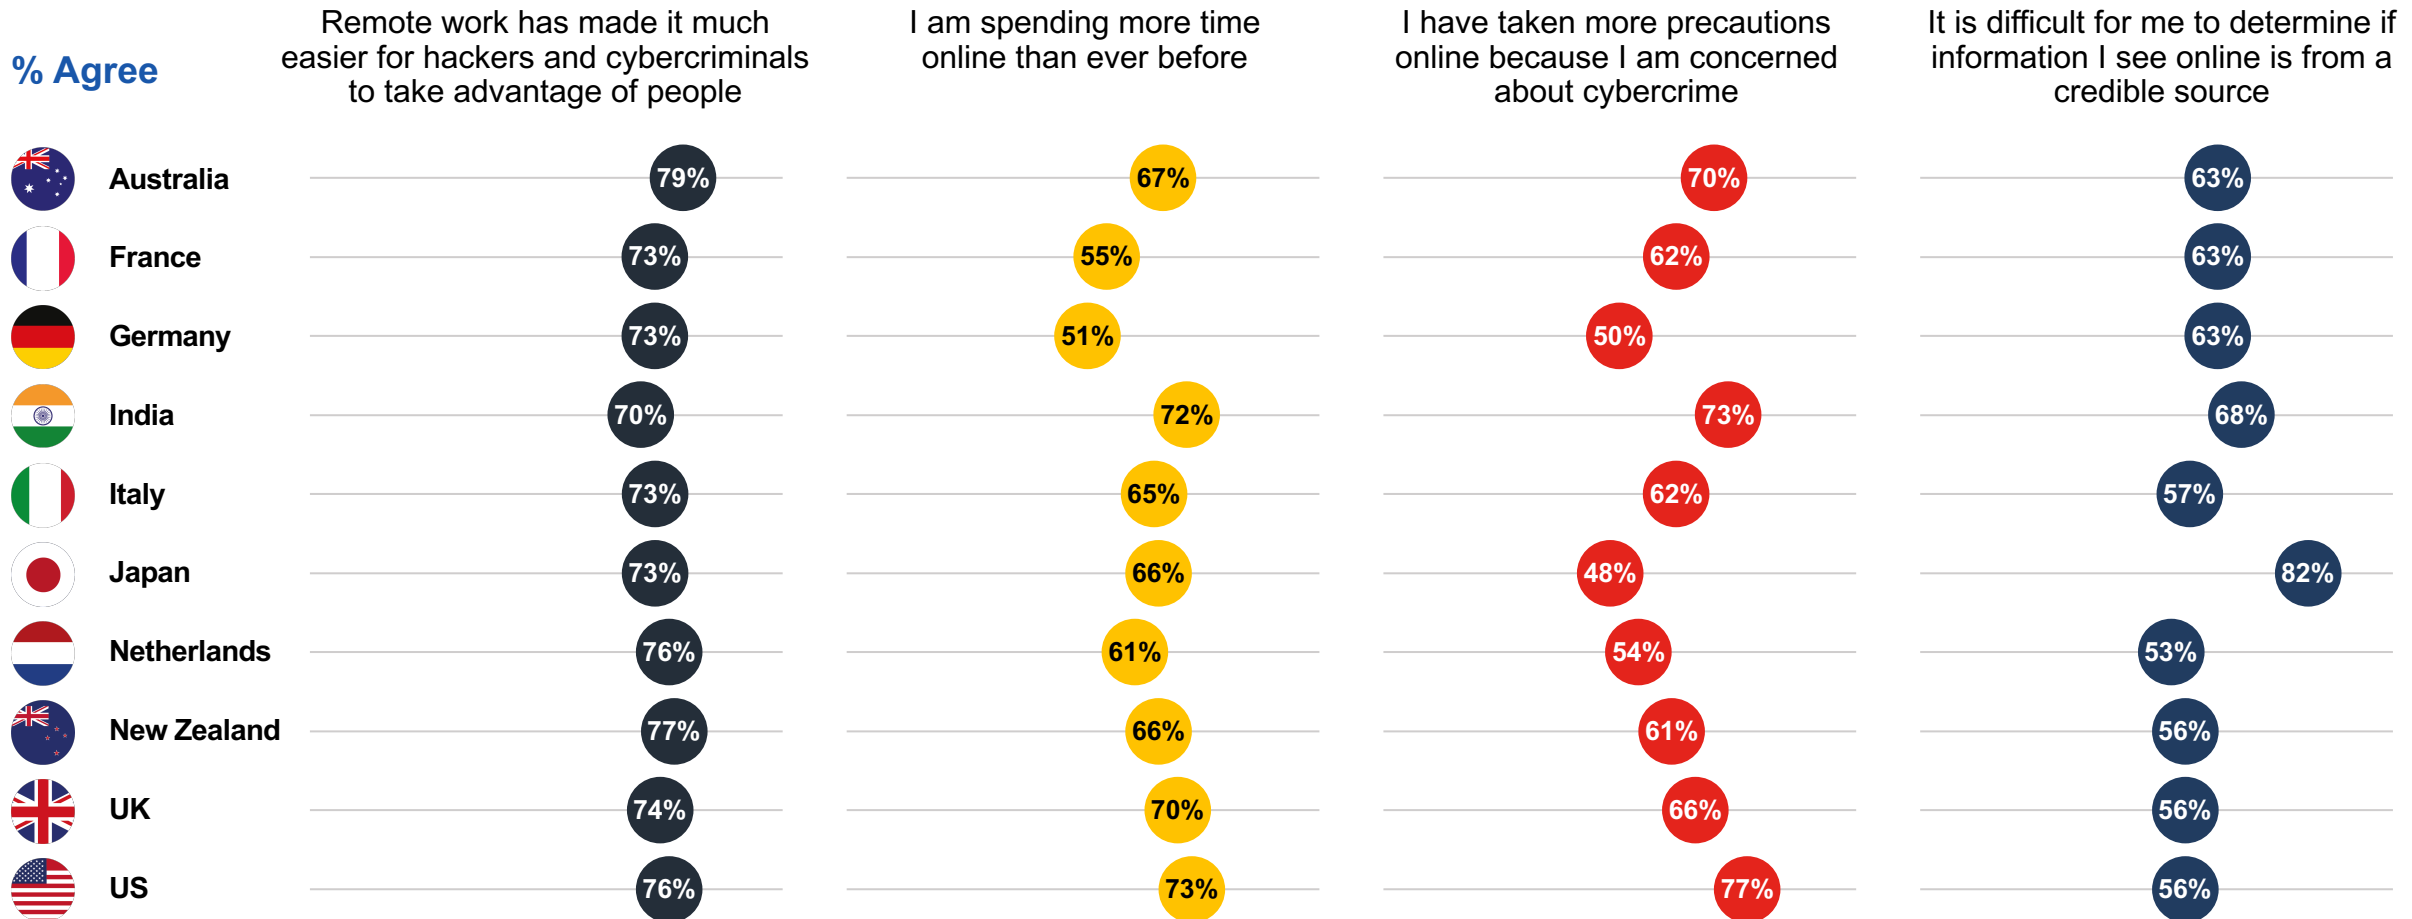

Nearly 2 in 3 Adults Say They Are Spending More Time Online Than Ever Before, With a Similar Proportion Saying They Have Taken More Precautions Online Because of Cybercrime Concerns

Attitudes About Online Behaviors

(Global Total)

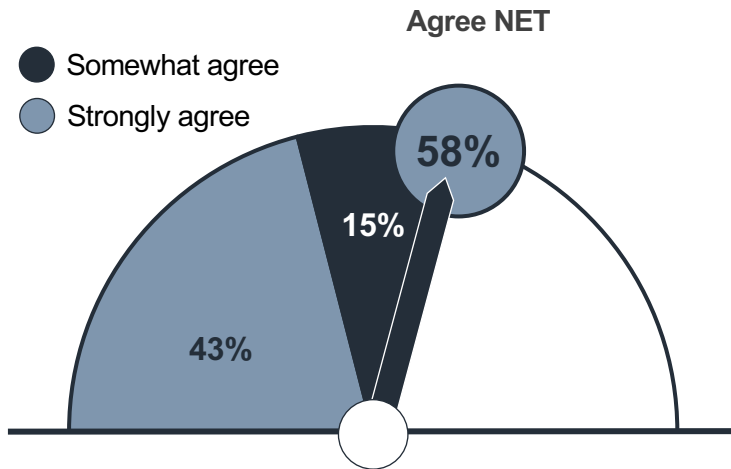

Those in India and the US are More Likely to Be Taking More Precautions Online; Those in Japan are Most Likely to Struggle With Deciphering if Information is From a Credible Source

More Than Half of Adults Are More Worried Than Ever About Being the Victim of Cybercrime, But a Similar Proportion Don't Know How To Protect Themselves From It

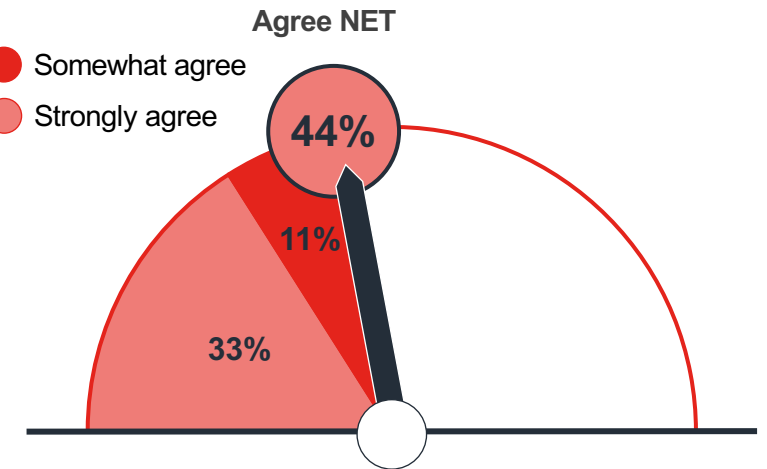

Attitudes About Cybercrime (Global Total)

I am more worried than ever about being the victim of cybercrime

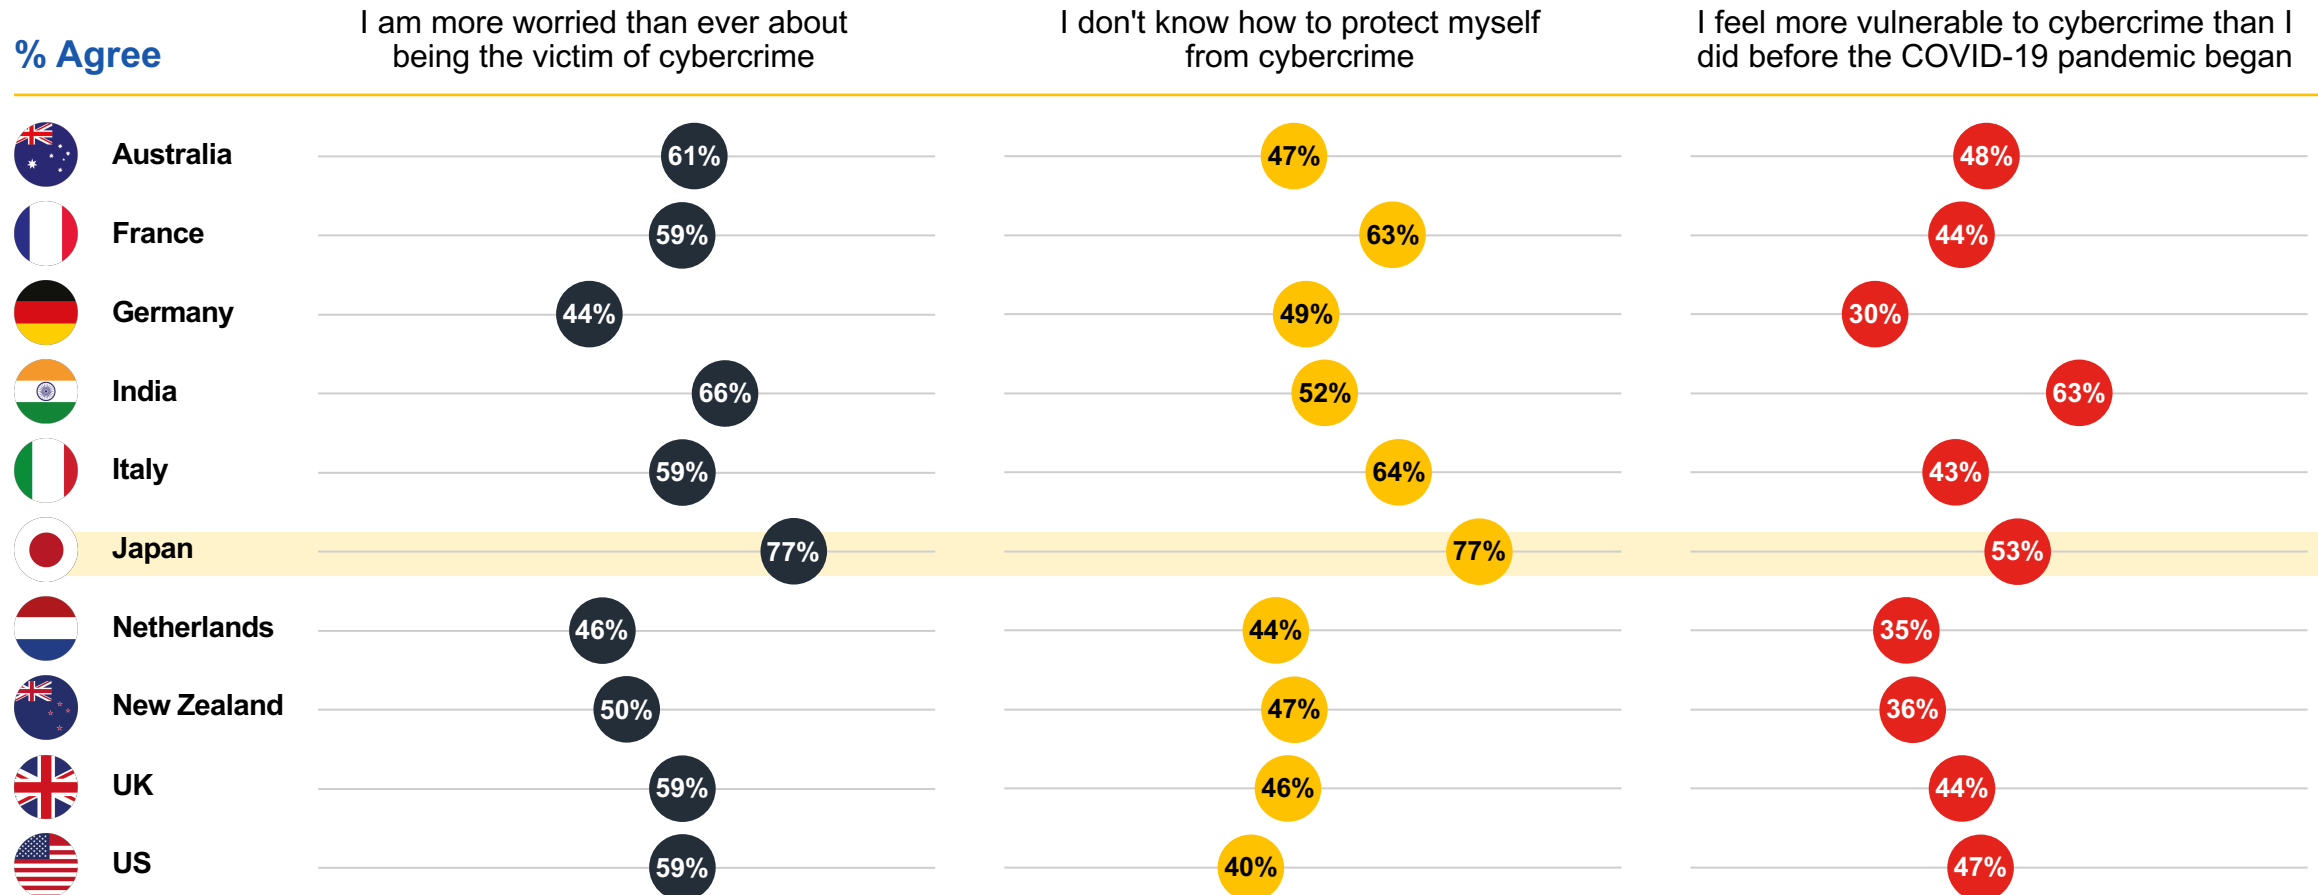

I don't know how to protect myself from cybercrime

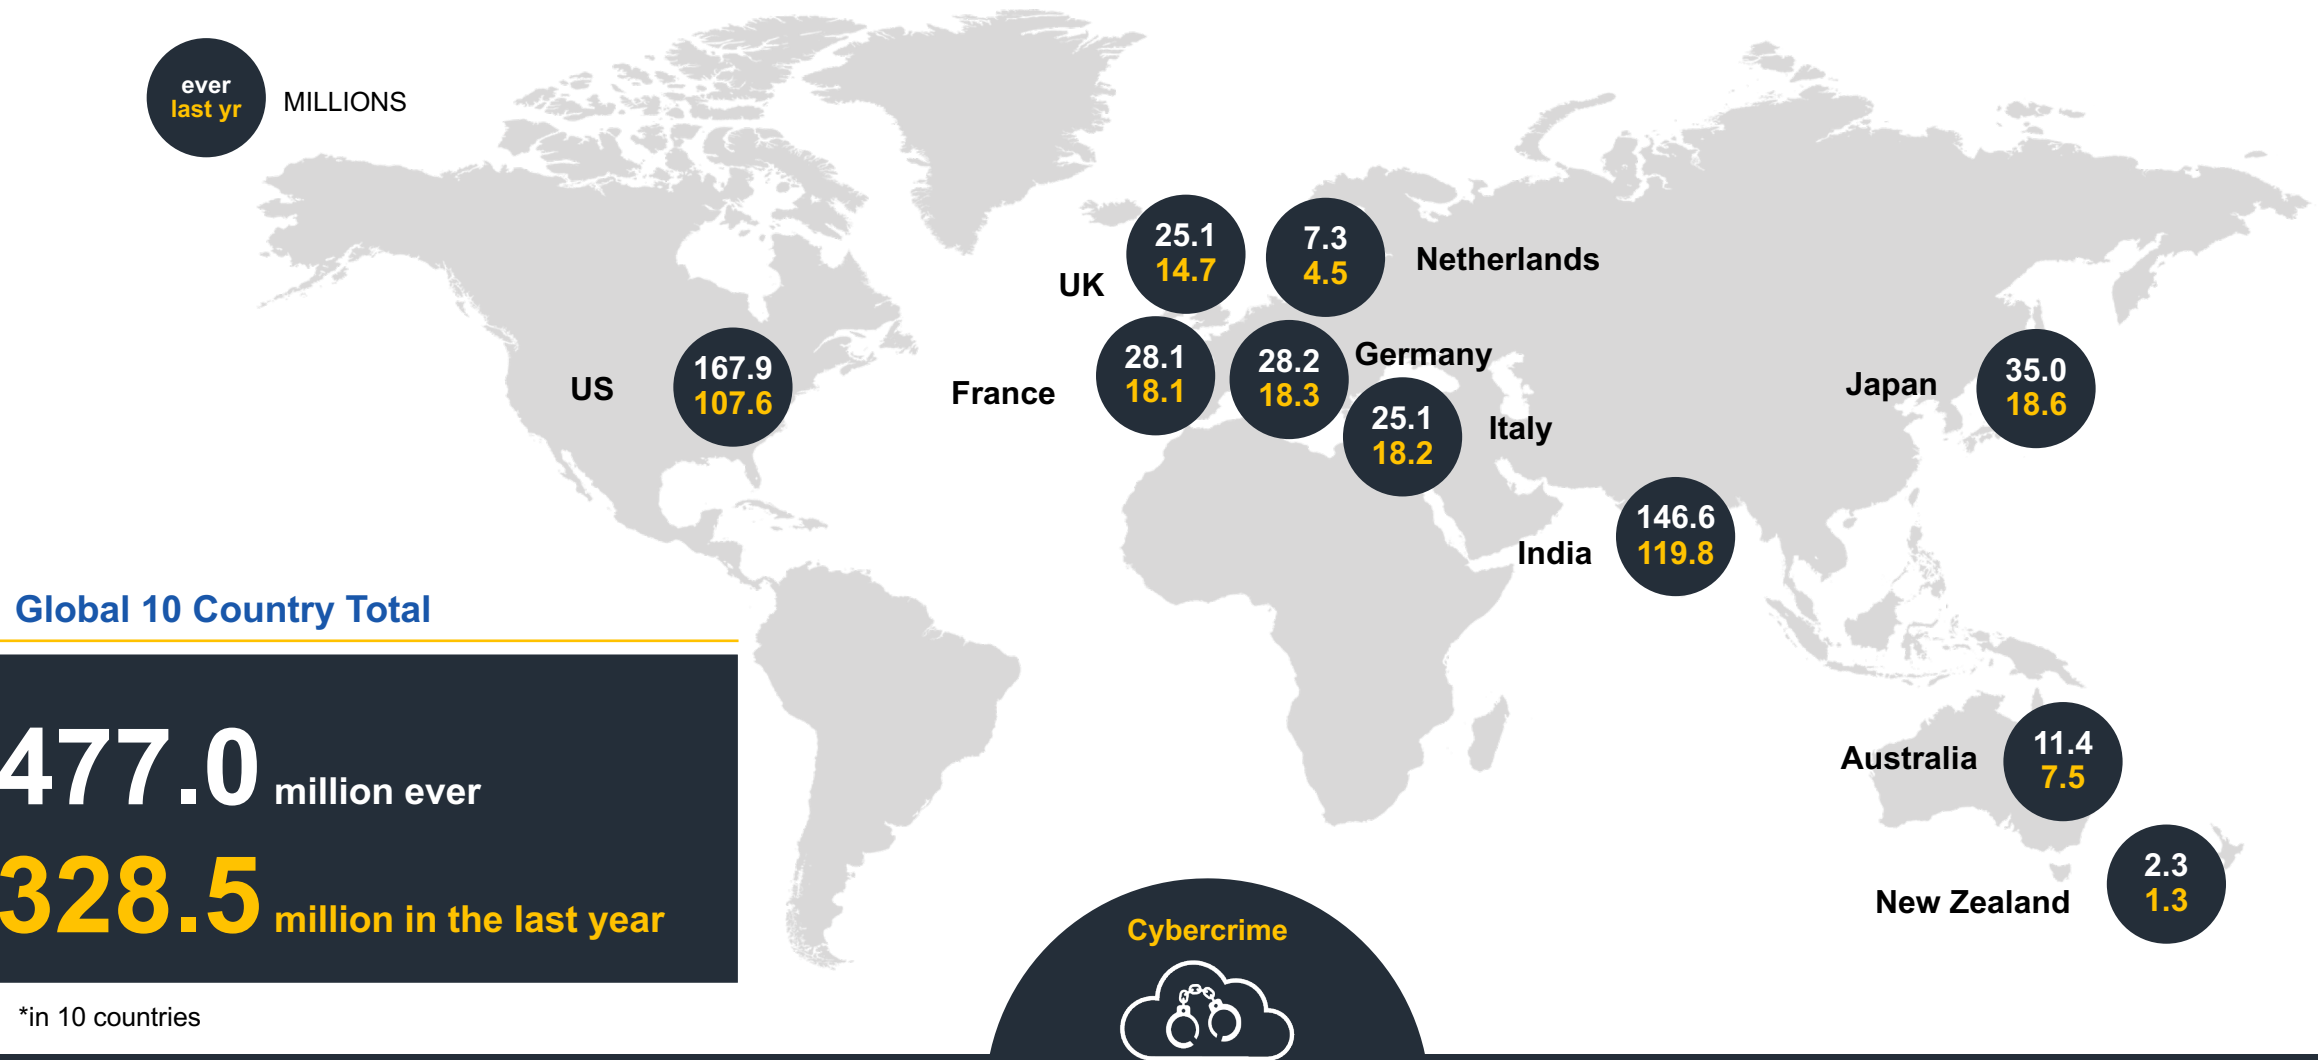

I feel more vulnerable to cybercrime than I did before the COVID-19 pandemic began

Adults In Japan Among the Most Likely To Be Worried About Cybercrime and Feel More Vulnerable to It Than They Did Before The Pandemic, But Also Most Likely To Not Know How To Protect Themselves From It

More than 475 Million Consumers* Have Ever Been the Victim of a Cybercrime; Nearly 330 Million in the Past 12 Months Alone

More Than Half of Consumers Have Experienced a Cybercrime, With Around 1 in 3 Falling Victim in the Past 12 Months Alone

On average across all 10 countries, the past 12 month cybercrime rate has remained steady (36% in 2019)

Top 3 Cybercrimes Ever Experienced

1  **22%**

Detected malicious software on a computer, Wi-Fi network, smartphone, tablet, smart home, or other connected device

2  **14%**

Detected unauthorized access on an email account

3  **13%**

Detected unauthorized access on a social media account

IDENTITY THEFT: INCIDENCE AND ATTITUDES

Globally*, around 6 in 10 adults are very worried their identity will be stolen but a similar proportion say they would have no idea what to do if it were. With over 55 million people in 10 countries having experienced ID theft in the past 12 months, it is no surprise that more than three-quarters of adults wish they had more information on what to do if their identity were stolen.

*Australia, France, Germany, India, Italy, Japan, Netherlands, New Zealand, United Kingdom, United States

55 Million Consumers* Were the Victim of Identity Theft in the Past 12 Months

Global 10 Country Total

55.3 million

*in 10 countries
°Source: Online survey of 5,006 US adults conducted by The Harris Poll on behalf of NortonLifeLock, February 2021.

Similar Proportions Both Very Worried Their Identity Will Be Stolen and Would Have No Idea What to Do If It Were; Only About Half Feel Well Protected Against Identity Theft

Agreement with Attitudes Toward Identity Theft (Global Total)

Agree NET

I wish I had more information on what to do if my identity was stolen

I am very worried that my identity will be stolen

I would have no idea what to do if my identity was stolen

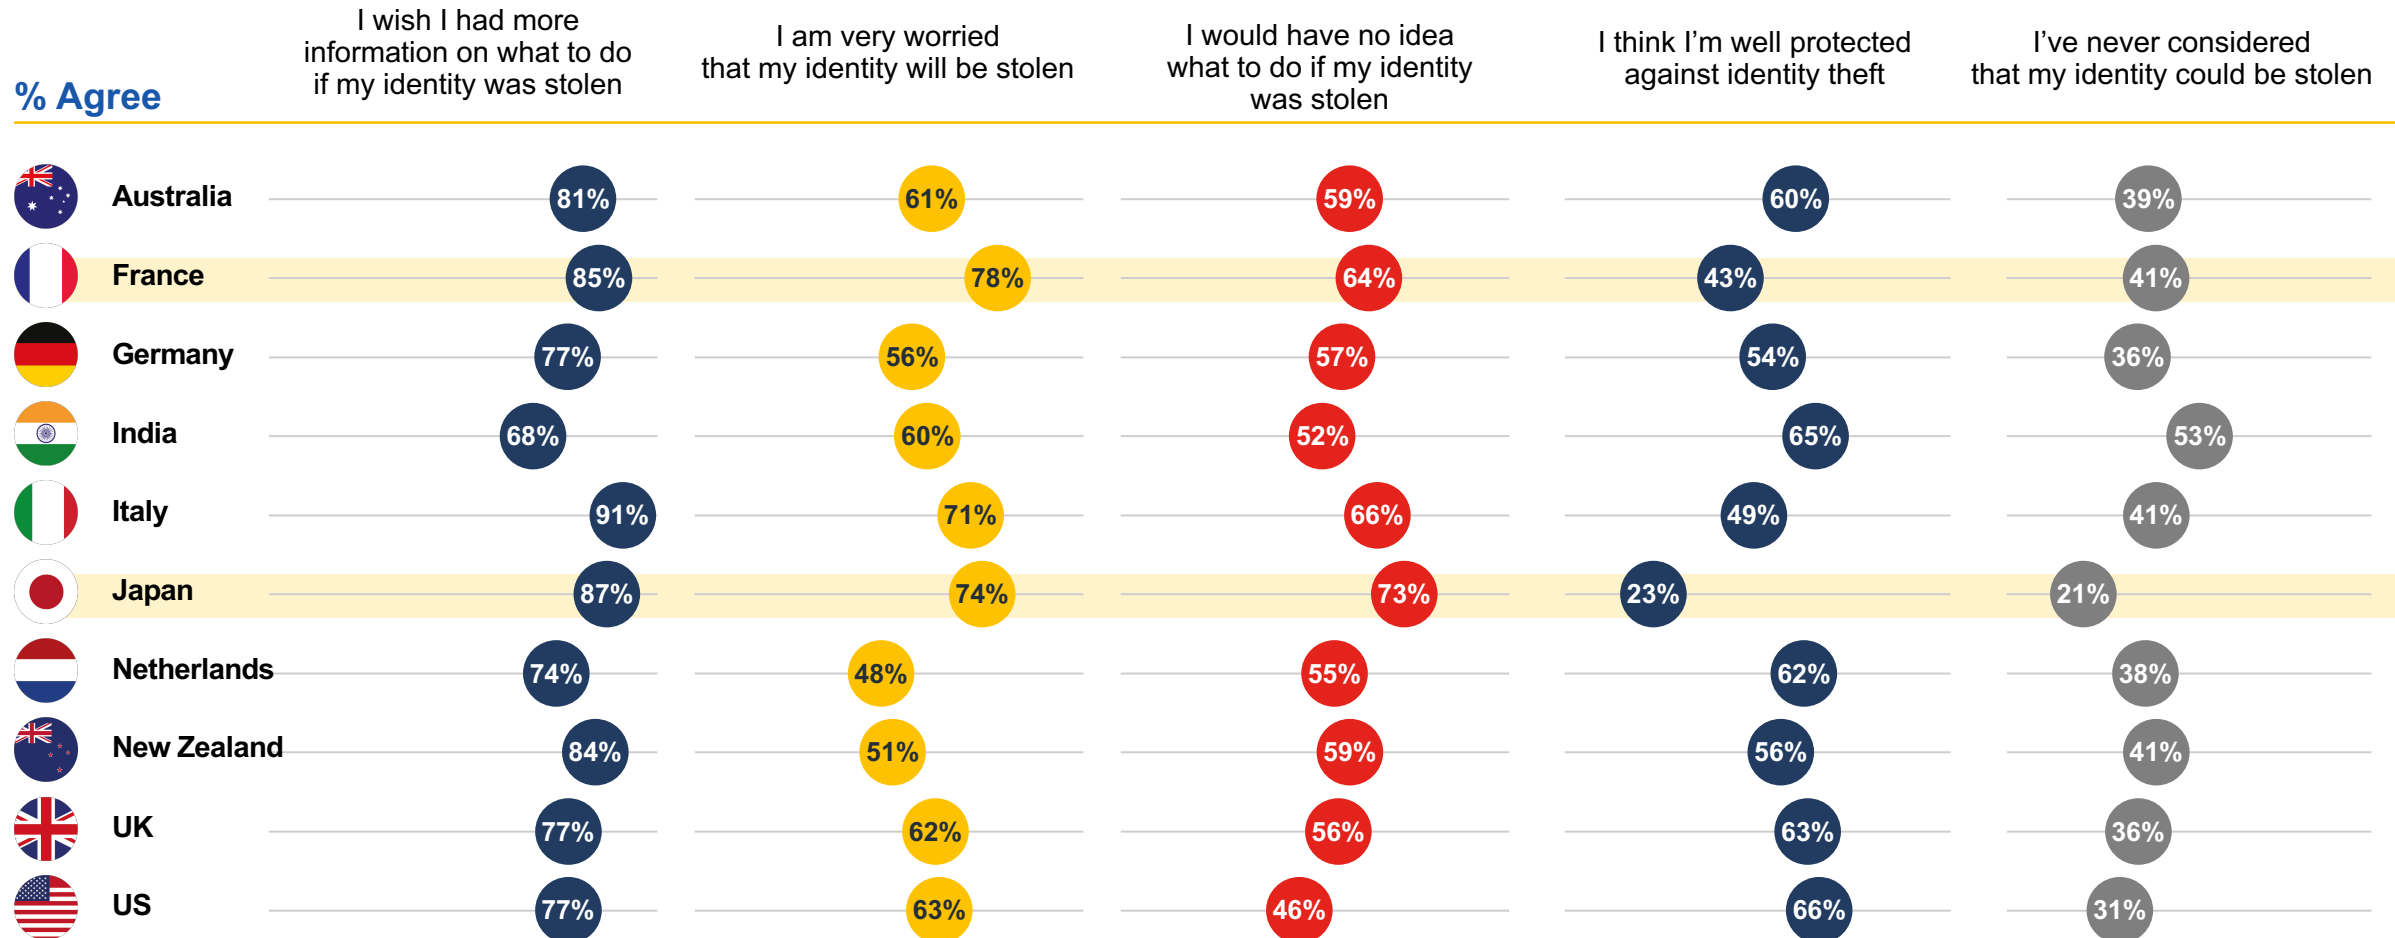

I think I'm well protected against identity theft

I've never considered that my identity could be stolen

Consumers in France and Japan Most Concerned Their Identity Will Be Stolen, but Also Are Least Likely to Feel Well Protected Against It

3

PROTECTING PERSONAL PRIVACY

Despite more than 3 in 5 consumers* saying they accept certain risks to their online privacy to make their life more convenient, the vast majority report being concerned about data privacy, with almost two-thirds feeling more alarmed than ever about their privacy.

*in Australia, France, Germany, India, Italy, Japan, Netherlands, New Zealand, United Kingdom, United States

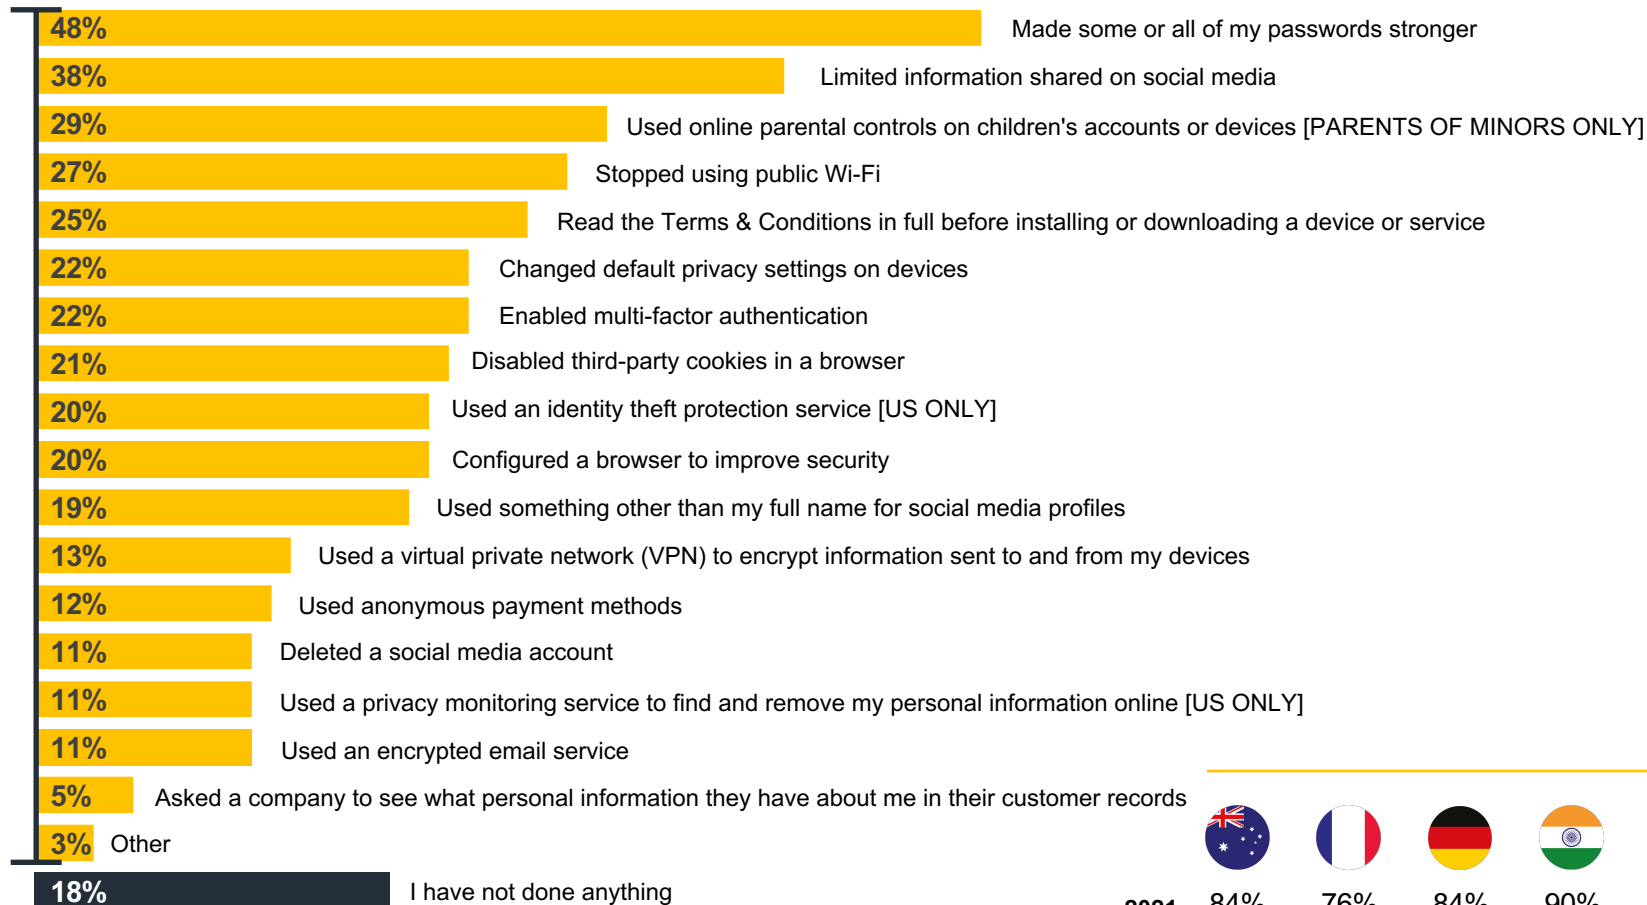

More than Three-Quarters Concerned About Data Privacy, with Close to Two-Thirds More Alarmed Than Ever

The Majority Have Taken Some Steps to Protect Their Online Privacy, Most Commonly Making Passwords Stronger or Limiting Information Shared on Social Media

Steps Taken to Protect Online Activities and Personal Information (Global Total)

82%
have taken
some action

Those in Japan are least likely to have taken steps to hide their online footprint

% Who Have Taken At Least One Step by Country

Nearly 2 in 5 Adults Say They Took Steps To Protect Their Online Activities Specifically As A Result of The Pandemic

Took steps to protect online activities and personal information as a result of changes to lifestyle since the COVID-19 pandemic began

Global Total

% Yes by Country

Though Consumers Are Taking Action and Want to Do More to Protect Their Privacy, Close to Half Still Say They Don't Know How

% Agree

I want to do more to protect my privacy

- Strongly agree
- Somewhat agree

I don't know how to protect my privacy

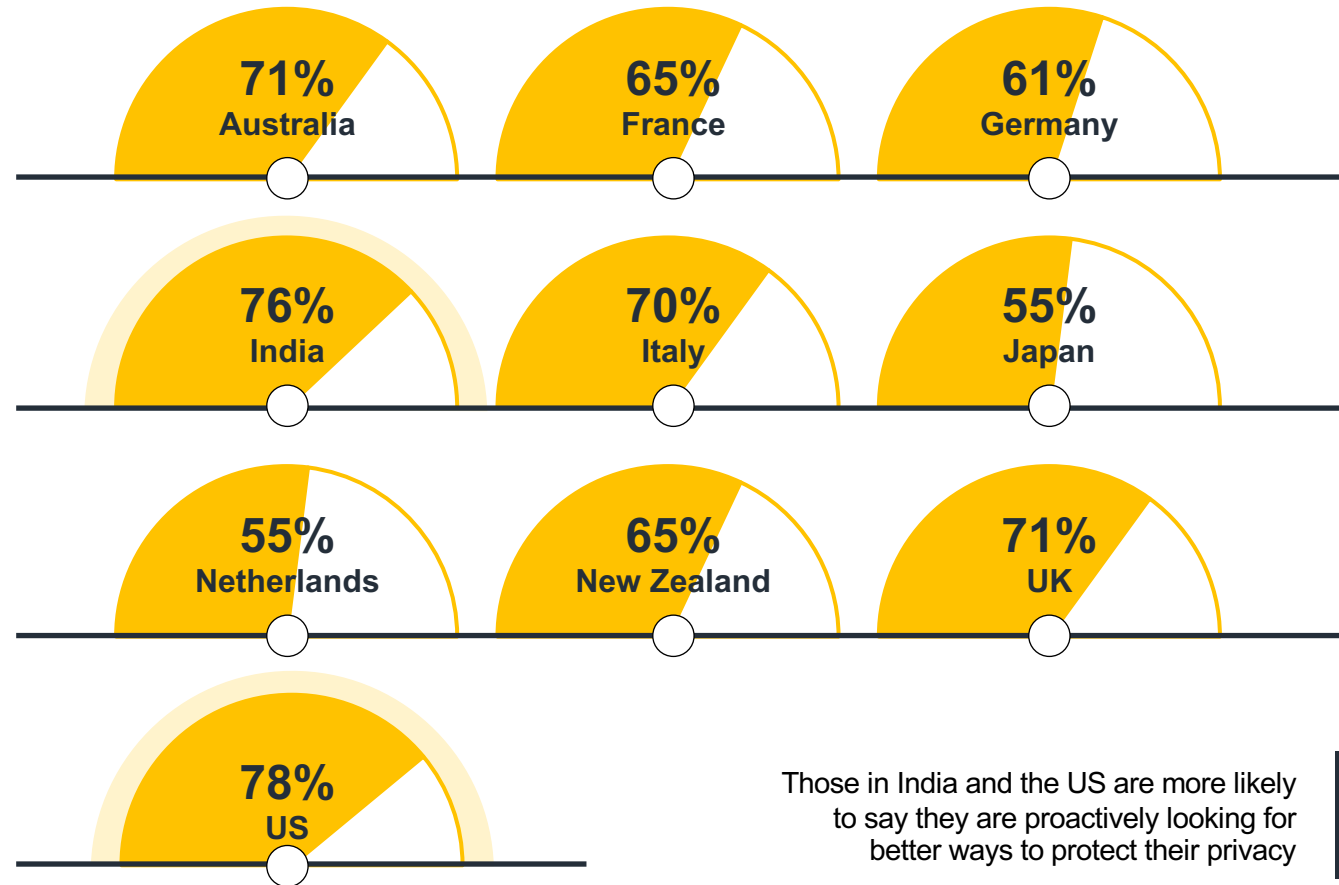

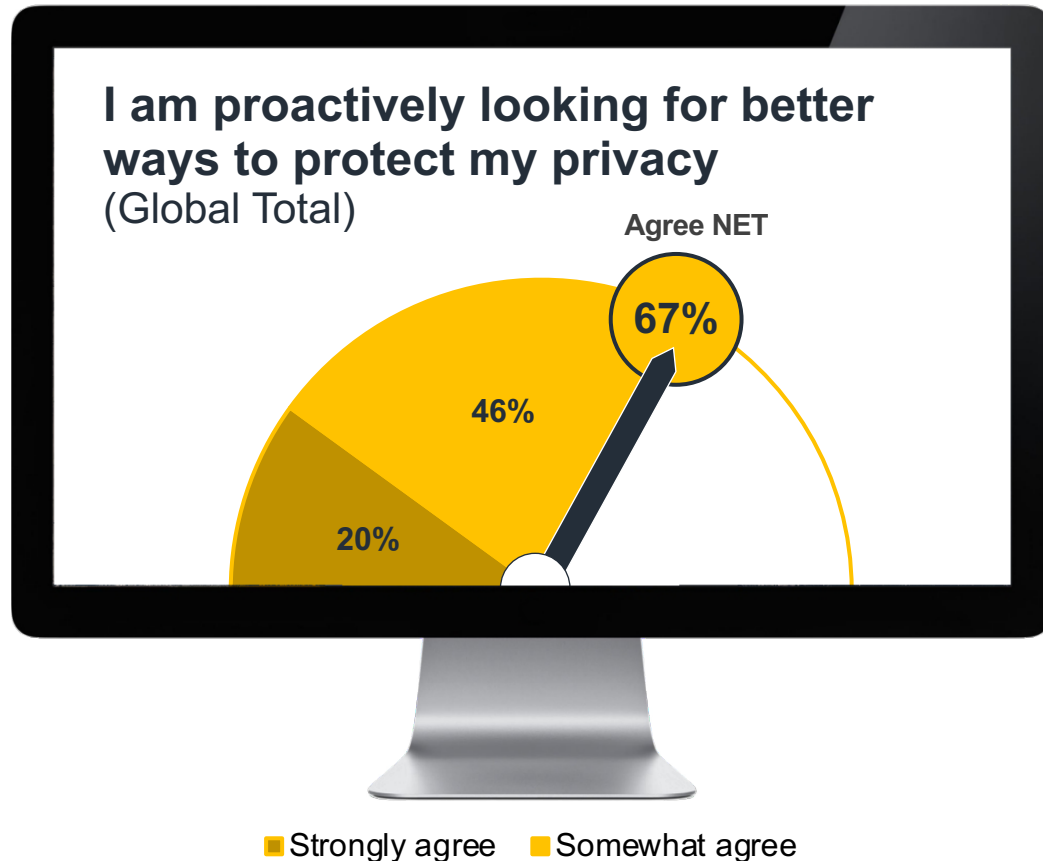

- Strongly agree
- Somewhat agree

Those in Japan are more likely to agree that they don't know how to protect their privacy

While 8 in 10 Want To Do More To Protect Their Privacy, Only Two-Thirds Are Proactively Looking For Better Ways To Do So

% Agree

Those in India and the US are more likely to say they are proactively looking for better ways to protect their privacy

Perhaps Explaining Why More Don't Proactively Protect Their Online Privacy, Many Say They Accept Certain Risks For Convenience and Feel It Is Simply Impossible To Do

% Agree

I accept certain risks to my online privacy to make my life more convenient

- Strongly agree
- Somewhat agree

It's impossible to protect my privacy

- Strongly agree
- Somewhat agree

Those in Australia, New Zealand, and the US are more likely to say they accept certain risks to make their life more convenient

4

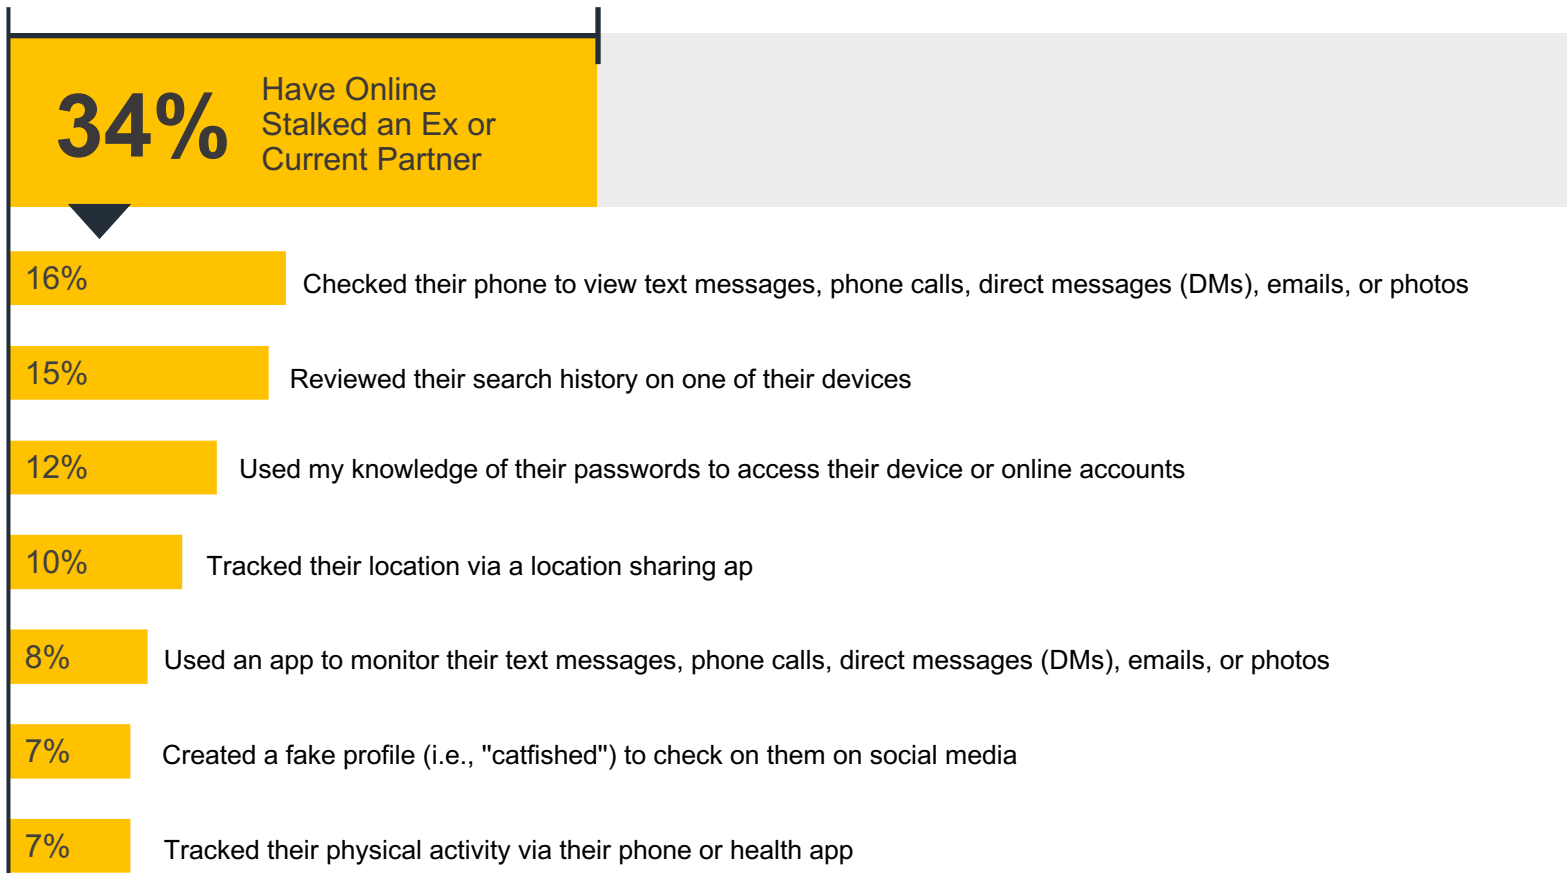

ONLINE CREEPING

While over one-third of adults* who have been in a romantic relationship admit to online “stalking” their current or former partners, most consumers do not condone it. However, there are glaring differences in attitudes and awareness across countries between those under 40 and those 40+, with younger adults being much more likely to condone online stalking, to be aware of creepware, or to think their partner would be likely to plant it on their device.

*in Australia, France, Germany, India, Italy, Japan, Netherlands, New Zealand, United Kingdom, United States

One-Third of Adults Who Have Been In A Romantic Relationship Have Checked In On An Ex Or Partner Without Their Knowledge or Consent
