

**2011 VOLUME OF TRAFFIC
ON THE PRIMARY ROAD SYSTEM
OF IOWA**

Introduction

The Office of Transportation Data, in cooperation with the Federal Highway Administration, prepares this biennial traffic report. This report is used by federal, state and local governmental agencies in determining highway needs, construction priorities, route location with environmental impact studies and the application of appropriate design standards. The general public uses this information in determining the amount of traffic that passes a given area as they make their development plans and propose land use changes. The above reflects only a few of the many technical uses for this data.

The traffic volumes depicted in this report are derived from data obtained at 8,000 count locations during 2008, 2009, 2010 and 2011. The 2008, 2009 and 2010 count data has been updated to reflect 2011 annual average daily traffic volumes. All primary roads were considered open to normal traffic flow, that is, roads that were under construction or carried detour routes have been estimated to reflect normal conditions. An asterisk has been placed at the right in the Section Description to identify those sections where the traffic was estimated from previous years count data.

Each primary route is subdivided into sections which are listed in order from west to east or from south to north. The length of each section is governed by county lines, corporation lines, junctions and high volume intersections. Section lengths are shown to the nearest 1000th of a mile. The route number and length of each section reflect the official road conditions as of January 1, 2011. Annual average daily traffic volumes shown at the end of each route tabulation represent the weighted values for that route.

Innerlegs, ramps, loops and connections at interchanges or grade level intersections are not shown in this report. Traffic volumes for these road segments may be obtained from the Office of Transportation Data (515-239-1323) or by emailing Ron Bunting at Ronald.Bunting@dot.iowa.gov.

Explanation of Table Headings

<u>Term</u>	<u>Description</u>
Route	<p>The official route numbers assigned to all Interstate, United States and Iowa Routes in Iowa. Route sections which have two or more assigned Primary Route numbers are listed as follows:</p> <ul style="list-style-type: none">Two Interstate Routes - Interstate with lowest route numberAny Interstate and Primary Route - with Interstate RouteTwo U.S. Routes - U.S. Route with lowest route numberU.S. and Iowa Route - with U.S. RouteTwo Iowa Routes - Iowa Route with lowest route number
Section Description	<p>A general description of the route section. Special messages are not indented, general descriptions are indented. If the traffic volume has been estimated an asterisk (*) will be shown.</p>
Rural/Municipal	<p>R = Rural M = Municipal</p>
Section Length	<p>The length of the described highway section shown to the nearest 1000th of a mile.</p>
Annual Average Daily Traffic	<p>General unit of measure for traffic, which represents the annual average traffic per day (AADT). It is established by adjusting periodic counts to AADT by using factors derived from permanent continuous automatic traffic recorders.</p>
Vehicle Classification	<p>The distribution of vehicle types which could be expected on a typical day.</p>
Average Daily Vehicle Miles	<p>The product of the section length times the annual daily traffic. A separate average daily vehicle miles has been computed for trucks and buses. Pickups and vans are not considered trucks. Vehicle miles of curves, loops, connections and inner legs not considered on the traveled way are used to calculate the mainline vehicle miles and average daily traffic totals.</p>

2011
