13 **Supplementary Figure 1. Cumulative GHG mitigation across all modelled abatement activities in the global forest sector 2015**
 14 **- 2075, across carbon price and growth scenarios (all mitigation levels are projected relative to the same baseline simulation**
 15 **with no mitigation incentive).**

16
 17 **Supplementary Figure 2. Conceptual diagram depicting different sources of costs borne by land managers and comparison to**
 18 **total mitigation costs for a specific price and quantity threshold ($P^* \cdot Q^*$)**
