

# 6 Benefits of Security Film for Businesses

## From Your FCPD Crime Prevention Unit

### Ease of Mind

Security film is an addition to already existing windows to limit glass breakage. Incorporating Security film into an overall prevention strategy including surveillance and alarm systems, employee training, and relationships with your Police Department can help you feel more confident you are protecting your assets, employees, and our community.

1

#### Designed to Stop Intrusion

While surveillance and alarm systems are great security platforms, they detect and possibly deter someone from committing a break-in. Security Film help to deter somebody from making entry, or at least making getting inside far more difficult.

#### Cost Effective

Throughout the Franconia and Springfield areas, many of our shopping centers and businesses are older buildings. Security film can help us upgrade our business communities to keep assets, employees, and guests safer. Furthermore, there are a variety of protection options, from stopping someone punching or kicking to even stopping a bullet.

2

3

#### Easy to Obtain

Security Film can be obtained by going through a vendor or installer or through online stores and home improvement stores. You can have it applied or make it your next DIY project!

#### Protect Your Assets

Almost 60 percent of commercial burglaries in the Franconia, Springfield, and Lorton areas involved smash and grabs. Providing upgraded deterrents like Security film can hinder these types of attacks by denying entry or at least slowing them down.

4

5

#### Protect Your People

There may be a lock on the doors, but can they get in by breaking the glass? In addition, shattering glass may injure those close by. When you need to, make sure you can truly secure your location
