

Accelerator Workshops

We offer workshops that provide clarity of vision and senior stakeholder alignment to help you transform faster, and advance your IT, applications, and workforce initiatives.

Consulting

With our outcome-focused approach, we accelerate your ability to deliver cloud platforms, workforce experiences, data and applications, and achieve business resiliency.

Enterprise Configuration & Rack Integration

We can engineer, integrate, configure, cable, deploy and install custom rack technology into any data center environment, so that you can receive new technology that is ready to deploy with scalable and consistent results.

Deployment

We've spent over 30 years building a deployment practice to support your IT team. We can assist with basic hardware installations through to planning, configuration, and complex integrations.

Migration

Migrate your data efficiently with greater data integrity and availability, using proven tools to streamline migrations and dependable best practices.

Residency

Dell Technologies Residents are highly skilled technical experts, individually selected to meet your unique needs, address skills gaps, maximize the potential of new technology, and much more.

Support

Support Technologies Services extend your IT team, enabling you to address issues before they impact your business. Gain access to hardware and software support 24x7x365.

Infrastructure Managed Services

Let us manage and optimize your IT operations so you can free up resources for strategic projects. We can reduce complexity, risk and costs while improving operations in multi-cloud environments.

Cyber Recovery Consulting

Have our technical specialists work with you to create a strategy and design a backup and recovery solution that will protect your critical data and allow you to recover from data loss or security incidents quickly and confidently.

Incident Recovery Retainer Service

In the event of a cyber incident, IRRS includes incident recovery hours to help customers recover fast and get back to business with minimal interruption with the help of our team of industry-certified experts in cybersecurity and infrastructure.

Short Term Storage

Short Term Storage provides the capability to hold orders in our warehouse for up to 90 days, helping customers secure continuity of supply, lock in pricing and optimize delivery lead times.
