<b>Biosynthesis and Degradation</b>		<b>Bioenergetics</b>	
The biosynthesis of brain gangliosides. Ganglioside-glycosylating activity in rat brain neuronal perikarya fraction. <i>By H. J. F. Maccioni, S. S. Defilipo, C. A. Landa &amp; R. Caputto</i>	673	The interaction between mitochondrial NADH-ubiquinone oxidoreductase and ubiquinol-cytochrome <i>c</i> oxidoreductase. Evidence for stoichiometric association. <i>By C. I. Ragan &amp; C. Heron</i>	783
Reconstitution of chlorophyllide formation by isolated etioplast membranes. <i>By W. T. Griffiths</i>	681	The interaction between mitochondrial NADH-ubiquinone oxidoreductase and ubiquinol-cytochrome <i>c</i> oxidoreductase. Restoration of ubiquinone-pool behaviour. <i>By C. Heron, C. I. Ragan &amp; B. L. Trumpower</i>	791
Oxidative degradation of haemoglobin by nitrosobenzene in the erythrocyte. <i>By K. Hirota, H. A. Itano &amp; T. S. Vedvick</i>	693	The membrane potential of mouse ascites-tumour cells studied with the fluorescent probe 3,3'-dipropylloxadicarbocyanine. Amplitude of the depolarization caused by amino acids. <i>By R. D. Philo &amp; A. A. Eddy</i>	801
Measurement and kinetic study of the formation of adrenaline sulphate <i>in vitro</i> . <i>By K. P. Wong</i>	777	Equilibrium and steady-state models of the coupling between the amino acid gradient and the sodium electrochemical gradient in mouse ascites-tumour cells. <i>By R. D. Philo &amp; A. A. Eddy</i>	811
Uptake and degradation of iodine-labelled chylomicron remnant particles by monolayers of rat hepatocytes. <i>By C. H. Florén &amp; Å. Nilsson</i>	827	Sub-mitochondrial location of Ruthenium Red-sensitive calcium-ion transport and evidence for its enrichment in a specific population of rat liver mitochondria. <i>By F. L. Bygrave, T. P. Heaney &amp; C. Ramachandran</i>	1011
Some high-performance liquid-chromatographic studies of the metabolism of aflatoxins by rat liver microsomal preparations. <i>By G. E. Neal &amp; P. J. Colley</i>	839	The subcellular location, maturation and response to increased plasma glucagon of Ruthenium Red-insensitive calcium-ion transport in rat liver. <i>By F. L. Bygrave &amp; C. J. Tranter</i>	1021
Biosynthesis of plasma-membrane proteins during myogenesis of skeletal muscle <i>in vitro</i> . <i>By G. A. Cates &amp; P. C. Holland</i>	873	<b>Subcellular Structures</b>	
Effect of zinc status of rats on the synthesis and degradation of copper-induced metallothioneins. <i>By I. Bremner, W. G. Hoekstra, N. T. Davies &amp; B. W. Young</i>	883	Changes in the form of Arrhenius plots of the activity of glucagon-stimulated adenylate cyclase and other hamster liver plasma-membrane enzymes occurring on hibernation. <i>By M. D. Houslay &amp; R. W. Palmer</i>	909
Catalase model systems. Decomposition of hydrogen peroxide catalysed by mesoferrihaem, deuteroferrihaem, coproferrihaem and haematoferrihaem. <i>By H. Hatzikonstantinou &amp; S. B. Brown</i>	893	Subcellular structure of bovine thyroid gland. The localization of the peroxidase activity in bovine thyroid. <i>By M. J. S. de Wolf, A. R. Lagrou, H. J. J. Hilderson, G. A. F. van Dessel &amp; W. S. H. Dierick</i>	939
The role of peroxide in haem degradation. A study of the oxidation of ferrihaems by hydrogen peroxide. <i>By S. B. Brown, H. Hatzikonstantinou &amp; D. G. Herries</i>	901		

	PAGE		PAGE
Taurocholate-sodium co-transport by brush-border membrane vesicles isolated from rat ileum.	951	Prostaglandin receptors on human platelets. Structure activity relationships of stimulatory prostaglandins.	921
By H. Lücke, G. Stange, R. Kinne & H. Murer		By D. E. MacIntyre, E. W. Salzman & J. L. Gordon	
<b>Cellular Interactions and Control Processes</b>		Effects of <i>p</i> -chlorophenylalanine and $\alpha$ -methylphenylalanine on amino acid uptake and protein synthesis in mouse neuroblastoma cells.	931
A simple assay for adenylate cyclase in intact cells by affinity elution chromatography.	699	By C. J. Kelly & T. C. Johnson	931
By A. K. Sinha & R. W. Colman		Protection of the pancreatic $\beta$ -cell glucoreceptor mechanism for insulin secretion during culture in chemically defined medium.	959
Aerobic glycolysis and lymphocyte transformation.	703	By E. Gylfe	959
By D. A. Hume, J. L. Radik, E. Ferber & M. J. Weidemann		Activities and some properties of 5'-nucleotidase, adenosine kinase and adenosine deaminase in tissues from vertebrates and invertebrates in relation to the control of the concentration and the physiological role of adenosine.	965
The role of calcium ions in the regulation of rat thymocyte pyruvate oxidation by mitogens.	711	By J. R. S. Arch & E. A. Newsholme	965
By D. A. Hume, E. K. Vijayakumar, F. Schweinberger, L. M. Russell & M. J. Weidemann		Properties of pyruvate kinase and phosphoenolpyruvate carboxykinase in relation to the direction and regulation of phosphoenolpyruvate metabolism in muscles of the frog and marine invertebrates.	979
Asynchrony in the synthesis of secretory proteins in the venom gland of the snake <i>Vipera palaestinae</i> .	733	By V. A. Zammit & E. A. Newsholme	979
By U. Oron, S. Kinamon & A. Bdolah		Maximum activities and effects of fructose biphosphate on pyruvate kinase from muscles of vertebrates and invertebrates in relation to the control of glycolysis.	989
Activity and androgenic control of enzymes associated with the tricarboxylic acid cycle, lipid oxidation and mitochondrial shuttles in the epididymis and epididymal spermatozoa of the rat.	741	By V. A. Zammit, I. Beis & E. A. Newsholme	989
By D. E. Brooks		Zinc-binding protein in the livers of neonatal, normal and partially hepatectomized rats.	999
The time course of the effect of hypophysectomy and oestrogen treatment on the hepatic metabolism of androst-4-ene-3,17-dione in male and female rats.	753	By H. Ohtake, K. Hasegawa & M. Koga	999
By P. Skett		Product inhibition of <i>o</i> -aminophenol glucuronidation by <i>p</i> -nitrophenyl glucuronide in detergent-treated microsomal fractions.	1007
Effects of glucagon and insulin on fatty acid synthesis and glycogen degradation in the perfused liver of normal and genetically obese ( <i>ob/ob</i> ) mice	761	By R. D. Howland	1007
By G. Y. Ma, C. D. Gove & D. A. Hems		Alkylation of deoxyribonucleic acid <i>in vivo</i> in various organs of C57BL mice by the carcinogens <i>N</i> -methyl- <i>N</i> -nitrosourea, <i>N</i> -ethyl- <i>N</i> -nitrosourea and ethyl methanesulphonate in relation to induction of thymic lymphoma. Some applications of high-pressure liquid chromatography.	1031
Cerebral oxidized and reduced nicotinamide-adenine dinucleotide phosphate and glucose 6-phosphate dehydrogenase in mice during exposure to high oxygen pressure.	769	By J. V. Frei, D. H. Swenson, W. Warren & P. D. Lawley	1031
By D. E. Dodd & M. D. Faiman			
Metabolic activation of acetylenic substituents to derivatives in the rat causing the loss of hepatic cytochrome <i>P</i> -450 and haem.	853		
By I. N. H. White			
The submicrosomal localization of acyl-coenzyme A-cholesterol acyltransferase and its substrate, and of cholesteryl esters in rat liver.	863		
By S. Balasubramaniam, S. Venkatesan, K. A. Mitropoulos & T. J. Peters			

	PAGE		PAGE
Control of sterol metabolism in rat adrenal mitochondria. By J. I. Mason, J. R. Arthur & G. S. Boyd	1045	Influence of mouse age and erythrocyte age on glutathione metabolism By E. C. Abraham, J. F. Taylor & C. A. Lang	819
<b>Development</b>		<b>Metabolism in Whole Organisms</b>	
Polyamine metabolism in liver of young rats. By M. E. Brosnan, G. W. Symonds, D. E. Hall & D. L. Symonds	727	The location of purine phosphoribosyltransferase activities in <i>Escherichia coli</i> . By M. G. P. Page & K. Burton	717

## RAPID PAPERS

	PAGE		PAGE
<b>Bioenergetics</b>		Effect of imposed serum deprivation on growth of the mouse 3T3 cell. Dissociation from changes in potassium ion transport as measured from [ <sup>36</sup> Rb]rubidium ion uptake. By J. T. Tupper & L. Zografos	
Inability of tributyltin-induced chloride/hydroxyl exchange to stimulate calcium transport in mitochondria isolated from flight muscle of the sheep blowfly <i>Lucilia cuprina</i> . By F. L. Bygrave & R. L. Smith	1075		1063
<b>Subcellular Structures</b>		Differentiation of the changes in alkaline phosphatase from calcium ion-activated adenosine triphosphatase activities associated with increased calcium absorption in chick intestine By S. M. Lane & D. E. M. Lawson	
Sodium-dependent alanine transport in plasma-membrane vesicles from rat liver. By J. M. M. van Amelsvoort, H. J. Sips & K. van Dam	1083		1067
<b>Cellular Interactions and Control Processes</b>		Dibutyryladenosine 3':5'-cyclic monophosphate-mediated changes in rat cells involve macromolecular alterations in vinblastine-precipitable proteins By A. T. Meza & M. Rieber	
Regulation of monkey liver serine hydroxymethyltransferase by nicotinamide nucleotide. By K. S. Ramesh & N. A. Rao	1055		1071
The adenylate cyclase-activating activity of cholera toxin is not associated with a nicotinamide-adenine dinucleotide glycohydrolase activity. By R. M. Tait & S. van Heyningen	1059	<b>General Methods</b>	
		Interference by branched-chain amino acids in the assay of alanine with alanine dehydrogenase By P. Lund & G. Baverel	
			1079

<b>Biosynthesis and Degradation</b>			
Chemical structure and biodegradability of halogenated aromatic compounds. Two catechol 1,2-dioxygenases from a 3-chloro-benzoate-grown pseudomonad. By E. Dorn & H.-J. Knackmuss	73	Properties of mitochondria isolated from cyanide-sensitive and cyanide-stimulated cultures of <i>Acanthamoeba castellanii</i> . By S. W. Edwards & D. Lloyd	203
Chemical structure and biodegradability of halogenated aromatic compounds. Substituent effects on 1,2-dioxygenation of catechol. By E. Dorn & H.-J. Knackmuss	85	The protonmotive force in bovine heart sub-mitochondrial particles. Magnitude, sites of generation and comparison with the phosphorylation potential. By M. C. Sorgato, S. J. Ferguson, D. B. Kell & P. John	237
Effect of non-histone chromosomal proteins on transcription <i>in vitro</i> in sea-urchin. By E. Di Mauro, F. Pedone & M. Pomponi	95	The protonmotive force in phosphorylating membrane vesicles from <i>Paracoccus denitrificans</i> . Magnitude, sites of generation and comparison with the phosphorylation potential. By D. B. Kell, P. John & S. J. Ferguson	257
The mechanism of haem catabolism. A study of haem breakdown in spleen microsomal fraction and in a model system by <sup>18</sup> O labelling and metal substitution. By R. F. G. J. King & S. B. Brown	103	<b>Subcellular Structures</b>	
A method for the analysis of protein turnover characteristics. Indirect estimation of rates of protein degradation. By N. Paskin & R. J. Mayer	153	Subcellular distribution of glycosidases in human polymorphonuclear leucocytes. By R. F. Rest, M. H. Cooney & J. K. Spitznagel	53
Fatty acid biosynthesis in the leaves of barley, wheat and pea. By J. Wharfe & J. L. Harwood	163	The identification of rat intestinal membrane enzymes after electrophoresis on polyacrylamide gels containing sodium dodecyl sulphate. By H.-P. Hauri & J. R. Green	61
Distinction between binding and endocytosis of human asialo-transferrin by the rat liver. By E. Regoeczi, P. Taylor, M. W. C. Hatton, K.-L. Wong & A. Koj	171	The lipid composition of a barley mutant lacking chlorophyll <i>b</i> . By P. Bolton, J. Wharfe & J. L. Harwood	67
Sequential deiodination of thyroxine in rat liver homogenate. By T. J. Visser, D. Fekkes, R. Docter & G. Hennemann	221	Properties of a cytochrome <i>c</i> -enriched light particulate fraction isolated from the photosynthetic bacterium <i>Rhodospseudomonas spheroides</i> . By J. Barrett, C. N. Hunter & O. T. G. Jones	267
A protein-glucan intermediate during paramylon synthesis. By A. D. Tomos & D. H. Northcote	283	Localization of ferrochelatase and of newly synthesized haem in membrane fractions from <i>Rhodospseudomonas spheroides</i> . By J. Barrett & O. T. G. Jones	277
Turnover of metallothioneins in rat liver. By R. D. Andersen, W. P. Winter, J. J. Maher & I. A. Bernstein	327	Velocity sedimentation of organelles at low centrifugal force in an isokinetic gradient. By T. G. Pretlow, II, J. I. Kreisberg, W. D. Fine, G. A. Ziemán, M. G. Brattain & T. P. Pretlow	303
<b>Bioenergetics</b>			
The transport of $\alpha$ -aminoisobutyrate into <i>Crithidia fasciculata</i> . By M. Midgley	191	Heterogeneity of lysosomes originating from rat liver parenchymal cells. Metabolic relationship of subpopulations separated by density-gradient centrifugation. By H. Pertoft, B. Wärmegård & M. Höök	309

	PAGE		PAGE
<b>Cellular Interactions and Control Processes</b>			
Resistance to the aminoglycoside antibiotic neamine in <i>Escherichia coli</i> . A new mutant whose Nea <sup>R</sup> phenotype results from the cumulative effects of two distinct mutations. By G. Delcuve, T. Cabezón, A. Herzog, M. Cannon & A. Bollen	1	A study of regulation of gluconeogenesis and the supply of cytosolic reducing equivalents for lactate formation in rat kidney-cortical-tubule fragments incubated with pyruvate. By E. D. Saggerson	131
Mechanisms of replenishment of nuclear androgen receptor in rat ventral prostate. By E. Van Doorn & N. Bruchovsky	9	Ontogeny of the vitellogenic response to oestradiol and of the soluble nuclear oestrogen receptor in embryonic-chick liver. By C. B. Lazier	143
The effect of lipid peroxidation on the calcium-accumulating ability of the microsomal fraction isolated from chicken breast muscle. By T. J. Player & H. O. Hultin	17	The activity of glucagon-stimulated adenylate cyclase from rat liver plasma membranes is modulated by the fluidity of its lipid environment. By I. Dipple & M. D. Houslay	179
Factors effecting the activity of guanylate cyclase in lysates of human blood platelets. By A. F. Adams & R. J. Haslam	23	Effects of maternal ethanol consumption on hepatic lipid biosynthesis in foetal and neonatal rats. By A. K. Rawat	213
The effects of digestive enzymes on characteristics of placental insulin receptor. Comparison of particulate and soluble receptor preparations. By S. Clark, M. DeLuise, R. G. Larkins, R. A. Melick & L. C. Harrison	37	Effect of oestrogen and 1,25-dihydroxy-cholecalciferol on 25-hydroxycholecalciferol metabolism in primary chick kidney-cell cultures. By E. Spanos, D. I. Barrett, K. T. Chong & I. MacIntyre	231
Reversal by Triton WR-1339 of ethynyl-oestradiol-induced hepatic cholesterol esterification. By R. A. Davis, R. Showalter & F. Kern, Jr.	45	Phosphorylation of adenosine monophosphate in the mitochondrial matrix. By H. A. Krebs & D. Wiggins	297
Alterations in response of rat white adipocytes to insulin, noradrenaline, corticotropin and glucagon after adrenalectomy. Correction of these changes by adenosine deaminase. By B. M. Fernandez & E. D. Saggerson	110	<b>Metabolism in Whole Organisms</b>	
Regulation of pyruvate dehydrogenase activity in rat epididymal fat-pads and isolated adipocytes by adrenaline. By S. J. Smith & E. D. Saggerson	119	Uptake of substrates for milk-fat synthesis by lactating-rabbit mammary gland. By C. S. Jones & D. S. Parker	291
		Diurnal variation and response to food withdrawal of lactose synthesis in lactating rats. By D. T. Carrick & N. J. Kuhn	319

### RAPID PAPERS

#### Cellular Interactions and Control Processes

Evidence for the involvement of superoxide in vitamin K-dependent carboxylation of glutamic acid residues of prothrombin.

By M. P. Esnouf, M. R. Green, H. A. O. Hill, G. B. Irvine & S. J. Walter

345

Diminished excretion of polyamines from BHK-21/C13 cells exposed to methylglyoxal bis-(guanyldiazone).

By M. A. L. Melvin & H. M. Keir

349

#### Metabolism in Whole Organisms

Is a urea cycle present in insects?

By R. Pant & S. Kumar

341

<b>Biosynthesis and Degradation</b>		<b>Bioenergetics</b>	
Comparative biochemistry of $\beta$ -oxidation. An investigation into the abilities of isolated heart mitochondria of various animal species to oxidize long-chain fatty acids, including the C <sub>22:1</sub> monoenes. By H. Osmundsen & J. Bremer	379	Superoxide dismutase and catalase in the protection of the proton-donating systems of nitrogen fixation in the blue-green alga <i>Anabaena cylindrica</i> . By L. E. A. Henry, I. N. Gogotov & D. O. Hall	373
Mechanism of dealkylation of clionasterol in the insect <i>Tenebrio molitor</i> . By P. J. Pettler, W. J. S. Lockley, H. H. Rees & T. W. Goodwin	397	The purification and some properties of rusticyanin, a blue copper protein involved in iron(II) oxidation from <i>Thiobacillus ferrooxidans</i> . By J. C. Cox & D. H. Boxer	497
Utilization by the isolated perfused rat liver <i>N</i> -acetyl-D-[1- <sup>14</sup> C]galactosamine and <i>N</i> -[ <sup>3</sup> H]-acetyl-D-galactosamine for the biosynthesis of glycoproteins. By A. D. MacNicoll, F. S. Wusteman, G. M. Powell & C. G. Curtis	421	Derivation of an electron-transport rate equation, energy-conservation equations and a luminescence-flux equation of algal and plant photosynthesis. By Y.-S. Li	569
Kinetics of polyamine synthesis and turnover in mouse fibroblasts. By F. McCormick	427	Calcium ion cycling in rat liver mitochondria. By C. Ramachandran & F. L. Bygrave	613
Effects of amino acids, ammonia and leupeptin on protein synthesis and degradation in isolated rat hepatocytes. By P. O. Seglen	469	<b>Subcellular Structures</b>	
Modeccin, the toxin of <i>Adenia digitata</i> . Purification, toxicity and inhibition of protein synthesis <i>in vitro</i> . By A. Gasperi-Campani, L. Barbieri, E. Lorenzoni, L. Montanaro, S. Sperti, E. Bonetti & F. Stirpe	491	The distribution of phosphatidylinositol in microsomal membranes from rat liver after biosynthesis <i>de novo</i> . Evidence for the existence of different pools of microsomal phosphatidylinositol by the use of phosphatidylinositol-exchange protein. By P. J. Brophy, P. Burbach, S. A. Nelemans, J. Westerman, K. W. A. Wirtz & L. L. M. van Deenen	413
Incorporation of ribonucleic acid <i>in vitro</i> into dense ribonucleoprotein-like materials by isolated rat liver nuclei. By I. Suzuka	503	Analytical subcellular fractionation of needle-biopsy specimens from human liver. By T. J. Peters & C. A. Seymour	435
Metabolism and the triggering of germination of <i>Bacillus megaterium</i> . Concentrations of amino acids, organic acids, adenine nucleotides and nicotinamide nucleotides during germination. By I. R. Scott & D. J. Ellar	627	The brush border of rabbit kidney, a cellular compartment free of glycolytic enzymes. By D. Busse, H. U. Wahle, H. Bartel & B. Pohl	509
Metabolism and the triggering of germination of <i>Bacillus megaterium</i> . Use of L-[ <sup>3</sup> H]alanine and tritiated water to detect metabolism. By I. R. Scott & D. J. Ellar	635	Transverse organization of phospholipids across the bilayer plasma-membrane sub-fractions of rat hepatocytes. By J. A. Higgins & W. H. Evans	563

	PAGE		PAGE
Differential light-scattering of granal and agranal chloroplasts and their fragments. By Á. Faludi-Dániel, G. E. Bailek, G. Horváth, Z. Sz.-Rózsa & R. P. F. Gregory	647	The influence of passive stretch on the growth and protein turnover of the denervated extensor digitorum longus muscle. By D. F. Goldspink	595
<b>Cellular Interactions and Control Processes</b>			
Oestrogen-induced cholesterol and fatty acid biosynthesis in <i>Xenopus laevis</i> liver during vitellogenic response. By D. F. Smith, T. M. Penning, A. Q. Ansari, K. A. Munday & M. Akhtar	353	Phosphorylation of glucose in isolated rat hepatocytes. Sigmoidal kinetics explained by the activity of glucokinase alone. By F. Bontemps, L. Hue & H.-G. Hers	603
Measurement of adenosine 3':5'-cyclic monophosphate by competitive binding to salt-dissociated protein kinase. By S. O. Døskeland & H.-J. Haga	363	Effect of adrenalectomy on acceleration of gluconeogenesis by calcium ions, adenosine 3':5'-cyclic monophosphate and adrenaline in rat kidney tubules. By D. W. R. Macdonald & E. D. Saggerson	641
<b>Development</b>			
The pH-dependence of sugar transport and of glycolysis in cultured Ehrlich ascites-tumour cells. By E. Kaminskas	453	Developmental change in the activity of lipoprotein lipase (clearing-factor lipase) in rat lung, cardiac muscle, skeletal muscle and brown adipose tissue. By A. Cryer & H. M. Jones	447
Induction of rat kidney gluconeogenesis during acute liver intoxication by carbon tetrachloride. By M. J. Faus, J. A. Lupiáñez, A. Vargas & F. Sánchez-Medina	461	Functional heterogeneity of UDP-glucuronosyltransferase as indicated by its differential development and inducibility by glucocorticoids. Demonstration of two groups within the enzyme's activity towards twelve substrates. By G. J. Wishart	485
Chromatin structure through the cell cycle. Studies with regenerating rat liver. By A. Caplan, M. G. Ord & L. A. Stocken	475	Adenine nucleotides in foetal rat liver cells. Compartmentation and variation with age. By P. H. van Lelyveld & F. A. Hommes	527
The effect of sugars on (pro)insulin biosynthesis. By S. J. H. Ashcroft, J. Bunce, M. Lowry, S. E. Hansen & C. J. Hedeskov	517	<b>Metabolism in Whole Organisms</b>	
The effect of dietary carbohydrate and fat on the activities of some enzymes responsible for glycerolipid synthesis in rat liver. By H. P. Glenny, M. Bowley, S. L. Burditt, J. Cooling, P. H. Pritchard, R. G. Sturton & D. N. Brindley	535	Glutamine metabolism in the kidney during induction of, and recovery from, metabolic acidosis in the rat. By D. M. Parry & J. T. Brosnan	387
Effects of testosterone on messenger ribonucleic acid and protein synthesis in rat seminal vesicle. By S. J. Higgins & J. M. Burchell	543	Metabolism of surfactants sodium undecyltriethoxy sulphate and sodium dodecyltriethoxy sulphate in the rat. By A. J. Taylor, G. M. Powell, D. Howes, J. G. Black & A. H. Olavesen	405
The mode of regulation of pyruvate dehydrogenase of lactating rat mammary gland. Effects of starvation and insulin. By M. A. Baxter & H. G. Coore	553	The metabolic fate of [2- <sup>14</sup> C]folic acid and a mixture of [2- <sup>14</sup> C]- and [3',5',9- <sup>3</sup> H]-folic acid in the rat. By P. A. Barford, F. J. Staff & J. A. Blair	579
The role of lipid components of the diet in the regulation of the fatty acid composition of the rat liver endoplasmic reticulum and lipid peroxidation. By C. T. Hammer & E. D. Wills	585	The biochemical basis for the conjugation of bile acids with either glycine or taurine. By D. A. Vessey	621

## RAPID PAPERS

	PAGE		PAGE
<b>Biosynthesis and Degradation</b>			
Stereospecific biosynthesis of triacylglycerols in mammary glands from lactating rats. By S. M. Cooper & M. R. Grigor	659	Demonstration of functional heterogeneity of hepatic uridine diphosphate glucuronosyl-transferase activities after administration of 3-methylcholanthrene and phenobarbital to rats. By G. J. Wishart	671
The lipoprotein lipase (clearing-factor lipase) activity of cells isolated from rat cardiac muscle. By P. Chohan & A. Cryer	663		
<b>Cellular Interactions and Control Processes</b>			
The involvement of phosphatidate phosphohydrolase and phospholipase A activities in the control of hepatic glycerolipid synthesis. Effects of acute feeding with glucose, sorbitol, glycerol and ethanol. By R. G. Sturton, P. H. Pritchard, L.-Y. Han & D. N. Brindley	667	<b>Development</b>	
		Disialoganglioside G <sub>D1a</sub> of rat brain subcellular particles during development. By H. K. M. Yusuf & J. W. T. Dickerson	655

## Contents of Volume 174, No. 3, 1978

<b>Biosynthesis and Degradation</b>			
The biosynthesis of brain gangliosides. Ganglioside-glycosylating activity in rat brain neuronal perikarya fraction. By H. J. F. Maccioni, S. S. Defilipo, C. A. Landa & R. Caputto	673	Effect of zinc status of rats on the synthesis and degradation of copper-induced metallothioneins. By I. Bremner, W. G. Hoekstra, N. T. Davies & B. W. Young	883
Reconstitution of chlorophyllide formation by isolated etioplast membranes. By W. T. Griffiths	681	Catalase model systems. Decomposition of hydrogen peroxide catalysed by mesoferrihaem, deuteroferrihaem, coproferrihaem and haematoferrihaem. By H. Hatzikonstantinou & S. B. Brown	893
Oxidative degradation of haemoglobin by nitrosobenzene in the erythrocyte. By K. Hirota, H. A. Itano & T. S. Vedvick	693	The role of peroxide in haem degradation. A study of the oxidation of ferrihaems by hydrogen peroxide. By S. B. Brown, H. Hatzikonstantinou & D. G. Herries	901
Measurement and kinetic study of the formation of adrenaline sulphate <i>in vitro</i> . By K. P. Wong	777	<b>Bioenergetics</b>	
Uptake and degradation of iodine-labelled chylomicron remnant particles by monolayers of rat hepatocytes. By C. H. Florén & Å. Nilsson	827	The interaction between mitochondrial NADH-ubiquinone oxidoreductase and ubiquinol-cytochrome <i>c</i> oxidoreductase. Evidence for stoichiometric association. By C. I. Ragan & C. Heron	783
Some high-performance liquid-chromatographic studies of the metabolism of aflatoxins by rat liver microsomal preparations. By G. E. Neal & P. J. Colley	839	The interaction between mitochondrial NADH-ubiquinone oxidoreductase and ubiquinol-cytochrome <i>c</i> oxidoreductase. Restoration of ubiquinone-pool behaviour. By C. Heron, C. I. Ragan & B. L. Trumppower	791
Biosynthesis of plasma-membrane proteins during myogenesis of skeletal muscle <i>in vitro</i> . By G. A. Cates & P. C. Holland	873		

	PAGE		PAGE
The membrane potential of mouse ascites-tumour cells studied with the fluorescent probe 3,3'-dipropylloxadicarbocyanine. Amplitude of the depolarization caused by amino acids. By R. D. Philo & A. A. Eddy	801	Asynchrony in the synthesis of secretory proteins in the venom gland of the snake <i>Vipera palaestinae</i> . By U. Oron, S. Kinamon & A. Bdolah	733
Equilibrium and steady-state models of the coupling between the amino acid gradient and the sodium electrochemical gradient in mouse ascites-tumour cells. By R. D. Philo & A. A. Eddy	811	Activity and androgenic control of enzymes associated with the tricarboxylic acid cycle, lipid oxidation and mitochondrial shuttles in the epididymis and epididymal spermatozoa of the rat. By D. E. Brooks	741
Sub-mitochondrial location of Ruthenium Red-sensitive calcium-ion transport and evidence for its enrichment in a specific population of rat liver mitochondria. By F. L. Bygrave, T. P. Heaney & C. Ramachandran	1011	The time course of the effect of hypophysectomy and oestrogen treatment on the hepatic metabolism of androst-4-ene-3,17-dione in male and female rats. By P. Skett	753
The subcellular location, maturation and response to increased plasma glucagon of Ruthenium Red-insensitive calcium-ion transport in rat liver. By F. L. Bygrave & C. J. Tranter	1021	Effects of glucagon and insulin on fatty acid synthesis and glycogen degradation in the perfused liver of normal and genetically obese ( <i>ob/ob</i> ) mice By G. Y. Ma, C. D. Gove & D. A. Hems	761
<b>Subcellular Structures</b>			
Changes in the form of Arrhenius plots of the activity of glucagon-stimulated adenylate cyclase and other hamster liver plasma-membrane enzymes occurring on hibernation. By M. D. Houslay & R. W. Palmer	909	Cerebral oxidized and reduced nicotinamide-adenine dinucleotide phosphate and glucose 6-phosphate dehydrogenase in mice during exposure to high oxygen pressure. By D. E. Dodd & M. D. Faiman	769
Subcellular structure of bovine thyroid gland. The localization of the peroxidase activity in bovine thyroid. By M. J. S. de Wolf, A. R. Lagrou, H. J. J. Hilderson, G. A. F. van Dessel & W. S. H. Dierick	939	Metabolic activation of acetylenic substituents to derivatives in the rat causing the loss of hepatic cytochrome <i>P</i> -450 and haem. By I. N. H. White	853
Taurocholate-sodium co-transport by brush-border membrane vesicles isolated from rat ileum. By H. Lücke, G. Stange, R. Kinne & H. Murer	951	The submicrosomal localization of acyl-coenzyme A-cholesterol acyltransferase and its substrate, and of cholesteryl esters in rat liver. By S. Balasubramaniam, S. Venkatesan, K. A. Mitropoulos & T. J. Peters	863
<b>Cellular Interactions and Control Processes</b>			
A simple assay for adenylate cyclase in intact cells by affinity elution chromatography. By A. K. Sinha & R. W. Colman	699	Prostaglandin receptors on human platelets. Structure activity relationships of stimulatory prostaglandins. By D. E. MacIntyre, E. W. Salzman & J. L. Gordon	921
Aerobic glycolysis and lymphocyte transformation. By D. A. Hume, J. L. Radik, E. Ferber & M. J. Weidemann	703	Effects of <i>p</i> -chlorophenylalanine and $\alpha$ -methylphenylalanine on amino acid uptake and protein synthesis in mouse neuroblastoma cells. By C. J. Kelly & T. C. Johnson	931
The role of calcium ions in the regulation of rat thymocyte pyruvate oxidation by mitogens. By D. A. Hume, E. K. Vijayakumar, F. Schweinberger, L. M. Russell & M. J. Weidemann	711	Protection of the pancreatic $\beta$ -cell glucoreceptor mechanism for insulin secretion during culture in chemically defined medium. By E. Gylfe	959

	PAGE		PAGE
Activities and some properties of 5'-nucleotidase, adenosine kinase and adenosine deaminase in tissues from vertebrates and invertebrates in relation to the control of the concentration and the physiological role of adenosine.	965	Alkylation of deoxyribonucleic acid <i>in vivo</i> in various organs of C57BL mice by the carcinogens <i>N</i> -methyl- <i>N</i> -nitrosourea, <i>N</i> -ethyl- <i>N</i> -nitrosourea and ethyl methanesulphonate in relation to induction of thymic lymphoma. Some applications of high-pressure liquid chromatography.	1031
By J. R. S. Arch & E. A. Newsholme		By J. V. Frei, D. H. Swenson, W. Warren & P. D. Lawley	
Properties of pyruvate kinase and phosphoenolpyruvate carboxykinase in relation to the direction and regulation of phosphoenolpyruvate metabolism in muscles of the frog and marine invertebrates.	979	Control of sterol metabolism in rat adrenal mitochondria.	1045
By V. A. Zammit & E. A. Newsholme		By J. I. Mason, J. R. Arthur & G. S. Boyd	
Maximum activities and effects of fructose bisphosphate on pyruvate kinase from muscles of vertebrates and invertebrates in relation to the control of glycolysis.	989	<b>Development</b>	
By V. A. Zammit, I. Beis & E. A. Newsholme		Polyamine metabolism in liver of young rats.	727
Zinc-binding protein in the livers of neonatal, normal and partially hepatectomized rats.	999	By M. E. Brosnan, G. W. Symonds, D. E. Hall & D. L. Symonds	
By H. Ohtake, K. Hasegawa & M. Koga		Influence of mouse age and erythrocyte age on glutathione metabolism	819
Product inhibition of <i>o</i> -aminophenol glucuronidation by <i>p</i> -nitrophenyl glucuronide in detergent-treated microsomal fractions.	1007	By E. C. Abraham, J. F. Taylor & C. A. Lang	
By R. D. Howland		<b>Metabolism in Whole Organisms</b>	
		The location of purine phosphoribosyltransferase activities in <i>Escherichia coli</i> .	717
		By M. G. P. Page & K. Burton	

## RAPID PAPERS

	PAGE		PAGE
<b>Bioenergetics</b>		The adenylate cyclase-activating activity of cholera toxin is not associated with a nicotinamide-adenine dinucleotide glycohydrolase activity.	1059
Inability of tributyltin-induced chloride/hydroxyl exchange to stimulate calcium transport in mitochondria isolated from flight muscle of the sheep blowfly <i>Lucilia cuprina</i> .	1075	By R. M. Tait & S. van Heyningen	
By F. L. Bygrave & R. L. Smith		Effect of imposed serum deprivation on growth of the mouse 3T3 cell. Dissociation from changes in potassium ion transport as measured from [ <sup>86</sup> Rb]rubidium ion uptake.	1063
<b>Subcellular Structures</b>		By J. T. Tupper & L. Zografos	
Sodium-dependent alanine transport in plasma-membrane vesicles from rat liver.	1083	Differentiation of the changes in alkaline phosphatase from calcium ion-activated adenosine triphosphatase activities associated with increased calcium absorption in chick intestine	1067
By J. M. M. van Amelsvoort, H. J. Sips & K. van Dam		By S. M. Lane & D. E. M. Lawson	
<b>Cellular Interactions and Control Processes</b>			
Regulation of monkey liver serine hydroxymethyltransferase by nicotinamide nucleotide.	1055		
By K. S. Ramesh & N. A. Rao			

	PAGE		PAGE
Dibutyryladenosine 3':5'-cyclic monophosphate-mediated changes in rat cells involve macromolecular alterations in vinblastine-precipitable proteins	1071	<b>General Methods</b>	
<i>By A. T. Meza &amp; M. Rieber</i>		Interference by branched-chain amino acids in the assay of alanine with alanine dehydrogenase	
		<i>By P. Lund &amp; G. Baverel</i>	1079
