Introduction

India occupies a significant portion of South Asia. It was part of the British Empire from 1858 until 1947 when it was split along religious lines into two nations at independence: the Hindu-majority India and the Muslim-majority Pakistan³. Its highly diverse population consists of thousands of ethnic groups and hundreds of languages.

Northeast India comprises the states of Arunāchal Pradesh, Assam, Manipur, Meghālaya, Mizoram, Nāgāland, Sikkim and Tripura. It is connected to the rest of India through a narrow corridor of the state of West Bengal. Along its northern boundary, India shares borders with Pakistan, China and Nepal (for more information on disputed border areas see page 11), it also borders Bhutan, Myanmar (Burma) and Bangladesh. The mostly hilly and mountainous regions are home to many hill tribes, with their own distinct languages and cultures.

Geographical names policy

PCGN policy for India is to use the Roman-script geographical names found on official India-produced sources. The [Survey of India](#) is responsible for the standardization of geographical names in India and produces official maps of the country. These are primarily in Hindi and English (the website also has some maps in the official state languages).

Language/s

The [Constitution of India](#) states that the two official languages of India are Hindi (written in Devanagari script) and English (which has continued to be a widely-used lingua franca post independence). The [Eighth Schedule of the Indian Constitution](#) lists a further 22 languages, which are classified as scheduled

¹ English is widely used for official and commercial purposes. Language codes given in this Factfile are ISO-639 codes.

³ From which Bangladesh later split, becoming an independent country in 1972.

languages and given recognition, status and official encouragement in India: Assamese, Bengali, Bodo, Dogri, Gujarati, Hindi, Kannada, Kashmiri, Konkani, Malayalam, Manipuri, Maithili, Marathi, Nepali, Oriya, Punjabi, Sanskrit, Santhali, Sindhi, Tamil, Telugu and Urdu. There are calls for a further 38 languages to be included.

Hindi is the most commonly spoken language (43.6% speak it as their first language per the 2011 census) and it serves as the lingua franca across much of northern and western India. English is used in some parts of government and higher education. Bengali is the second most spoken language (around 8.3% speak it as their first language). It is primarily spoken and understood in the eastern and northeastern regions of India, particularly in the state of West Bengal where it is one of the official languages (along with English). The [Central Institute of Indian Languages](#) was set up in 1969 to assist and co-ordinate the development of Indian languages.

Geographical names for India's official maps are field collected in the original language, e.g. Marathi, Telugu, Urdu etc. These names are then transcribed by the Survey of India into a standard Devanagari script form, then via the Hunterian System⁴ into Roman script, to produce the final official form, labelled "English". Over recent years, there has been an effort to update the names in India still spelt in an Anglicized manner, e.g. see under Karnāṭaka on page 5.

Devanagari is an abugida script, whereby each consonant has an inherent vowel (a), that can be changed with different vowel signs (illustrated below with the consonant 'pa').

Administrative structure

At first-order administrative level (ADM1), India is divided into 28 states and 8 union territories. The union territories are governed by administrators, appointed by the President of India. Three of the territories (Delhi, Jammu and Kashmir, Puducherry) have partial statehood, with legislatures and a Lieutenant Governor who acts as a representative of the President of India. Several Indian states have two administrative centres (PPLAs). Known as the summer and winter capitals, the administrative functions are shared between the two PPLAs depending on the season.

At ADM2 level, the states and territories often use different local titles for the same level of subdivision; several villages or village clusters may be called tehsils, talukas, subdivisions, mandals or circles.

⁴ A transliteration method developed in the late nineteenth century by William Wilson Hunter. It is the system also used to romanize names in Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

⁵ For consonants see the [BGN/PCGN romanization system for Nepali](#).

Disputed Areas

India is involved in several territorial disputes:

Kashmir

There is a complex and longstanding dispute between China, India and Pakistan of the whole Kashmir region. Some sections were unilaterally ceded by Pakistan to China in 1963 and are under the *de facto* control of China. PCGN recommends showing the names of the *India-administered Kashmir* region and *Pakistan-administered Kashmir* region in italics to acknowledge their disputed status on mapping. Please ask PCGN for further advice on how to label this area on mapping.

Trans-Karakoram Tract

This area between India, Pakistan and China is claimed by India, but was unilaterally ceded by Pakistan to China in 1963. It is *de facto* administered as part of Xinjiang Autonomous Region. It should be labelled on a map as part of China with disputed boundaries, and a label explaining that the area is 'Claimed by India, ceded to China by Pakistan.'

Aksai Chin

This area is claimed by India but administered by China as part of Xinjiang Autonomous Region. It should be labelled on a map as part of China with disputed boundaries, and a label explaining that the area is 'Claimed by India, administered by China.'

Arunāchal Pradesh

A large part of this northern state of India is claimed by China. It should be shown as part of India.

Doklam

This disputed area is located near the tri-junction of China (Tibet), Bhutan and India. It is claimed by China and Bhutan.

TOPONYMIC FACT FILE

Sir Creek

The boundary is disputed between Pakistan and India along Sir Creek in the Rann of Kutch, which empties into the Arabian Sea. The position of the final point of the boundary will determine the start of the maritime boundary, thus affecting the EEZ of both countries.

Others

The border between India and China from Aksai Chin to Nepal has six smaller disputed areas: Demchok, Chumar, Kaurik, Shipki Pass, Jadh Ganga (Nelang) and Bara Hoti-lapthal.
