Dassault Systemes S.A.

Dassault Systemes Anti-Piracy & Compliance Program

Dassault Systemes owns a suite of software products used primarily in the Product Lifecycle Management (PLM) industry. The main brands are:

- CATIA
- SolidWorks
- SIMULIA
- DELMIA
- ENOVIA
- 3Dvia

The licenses to use this software can only be:

1. sold by parties authorised to do so (as resellers) by Dassault Systemes; and
2. used by parties who have bought their licences from authorised resellers.

Users/Buyers

If you are using any of Dassault Systemes' software without a license, then you are in breach of Dassault Systemes' intellectual property rights and subject to legal action. Your best bet is to contact a Dassault Systemes authorised reseller local to you, and get the necessary license(s).
