

# Stromberg Carburetor Ltd.

Stromberg Carburetor manufacture and sell a range of products based on the Stromberg model 97 carburetor design, used on Ford V8 vehicles in the 1930's, and on a wide variety of cars and trucks ever since. We also sell a range of carburetor linkage and fuel delivery products, and a growing range of other merchandise using the Stromberg and 97 names will be launched through 2010 and beyond. This will include clothing, signs, license plate surrounds and more. The company strives to offer only the highest quality products, through continuous product innovation and process improvement. To ensure that consumers are purchasing only genuine Stromberg products, and to ensure their proper installation and function, we diligently monitor and control their design, manufacturing, distribution and advertising.
