Lecture—3 hours; discussion—1 hour. Prerequisites: Biological Sciences 1A, 1B, 1C, Mathematics 16A, 16B; Statistics 13 recommended. Theoretical and experimental analysis of the distribution, growth and regulation of species populations; predator-prey and competitive interactions; and the organization of natural communities. Application of evolutionary and ecological principles to selected environmental problems.—I. (I.) Sih

101. Human Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one course from course 30, Anthropology 1, 2, Genetics 10, or the equivalent. Critical variables in the processes that relate humans and their environment. Emphasis on the biological, cultural, social, and psychological forces which encourage stability or change in human ecological relationships. (Same course as Anthropology 101.) GE credit: SocSci, Div.—II. (II.) Richerson, Mulder

(a) Environmental Science

110. Principles of Environmental Science (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 1A or 7A, Mathematics 16B or 21B, and Biological Sciences 1A. Application of physical and chemical principles, ecological concepts, and systems approach to policy analysis of atmospheric environments, freshwater and marine environments, land use, energy supplies and technology, and other resources.—III. (III.) Richerson

116. The Oceans (3)

Lecture—3 hours. Introductory survey of the marine environment; oceanic physical phenomena, chemical constituents, geological history, the sea's biota, and utilization of marine resources. (Same course as Geology 116.) GE credit: SciEng.—I, II. (I, II.) Spero, Cowen

116G. The Oceans: Discussion (2)

Discussion—2 hours. Prerequisite: course 116/Geology 116 concurrently. Scientific method applied to the discovery of the processes, biota, and history of the oceans. Group discussion and preparation of papers on related topics. (Same course as Geology 116G). GE credit with concurrent enrollment in course 116: Wrt.—I, II. (I, II.) Spero, Cowen

(b) Ecological Analysis

121. Population Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1B, 1C, Mathematics 16A-16B. Development of exponential and logistic growth models for plant and animal populations, analysis of age structure and genetic structure, analysis of competition and predator-prey systems. Emphasis is on developing models and using them to make predictions and solve problems. Offered in alternate years. GE credit: SciEng, Wrt.—II. Hastings

123. Introduction to Field and Laboratory Methods in Ecology (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 100 or the equivalent, Statistics 102 or the equivalent. Introduces students to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis.—III. (III.) Quinn, M. Schwartz

124. Marine and Coastal Field Ecology (10)

Lecture—6 hours; discussion—4 hours; seminar—1 hour; laboratory—18 hours (Summer Session I). Prerequisite: Biological Sciences 1A; Statistics 13; course 100. Full-time study at Bodega Marine Laboratory. Intensive lecture-laboratory-field study of current ecological theory and problems with emphasis on marine populations and communities; techniques and evaluation of quantitative field research.—summer. Chow

125A. Field Ecology (4)

Lecture—15 hours; discussion—10 hours; field work—15 hours (for two-week period). Prerequisite: consent of instructor. Designed to instruct and demonstrate to students the value and approaches of experimental research using the hypothetico-deductive experimental approach. May be taken only as part of the White Mountain Research Supercourse.—III. (III.) Quinn

125B. Physiological Ecology (4)

Lecture—15 hours; discussion—10 hours; laboratory—15 hours (for two-week period). Prerequisite: consent of instructor. An examination of the functional means by which animals and plants cope with their environments, the physiological limits that determine the boundary conditions of various ecological niches. Unifying principles that describe the regulatory features of all animals or plants emphasized. May be taken only as part of the White Mountain Research Supercourse.—III. (III.) Quinn

125C. Applied Conservation Biology (4)

Lecture—10 hours; discussion—10 hours; field work—15 hours (for two-week period). Prerequisite: consent of instructor. Designed to introduce students to the complexities, and realities, of natural resource exploitation and preservation, emphasizing the trade-offs between economic benefits and ecosystem stability and sustainability. May be taken only as part of the White Mountain Research Supercourse.—III. (III.) Quinn

126. Environmental and Occupational Epidemiology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: introductory course in statistics and upper division standing. Methods and contemporary issues in environmental and occupational epidemiology. Effects of carcinogens, reproductive hazards, lifestyle factors, air and water pollution, infectious agents, and other hazards on human populations. Discussion of epidemiologic study designs, biases, and risk assessment.

(c) Cultural Ecology

133. Cultural Ecology (4)

Lecture—3 hours; discussion—1 hour. Comparative survey of the interaction between diverse human cultural systems and the environment. Primary emphasis given to people in rural and relatively undeveloped environments as a basis for interpreting more complex environments. (Same course as Anthropology 133.) GE credit: SocSci, Div, Wrt.—III. (III.) Orlove

(d) Aquatic Ecosystems Analysis

150A. Physical and Chemical Oceanography (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Environmental Science and Policy/Geology 116, Physics 9B, Mathematics 22C, Chemistry 1C; or upper division standing in a natural science and consent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as Geology 150A.) —I. (I.) McClain, Spero

150B. Geological Oceanography (3)

Lecture—3 hours. Prerequisite: Geology 50 or 116. Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as Geology 150B.)—II. (II.) McCain

150C. Biological Oceanography (4)

Lecture—3 hours; discussion—1 hour; fieldwork—one weekend field trip required. Prerequisite: Biological Sciences 1A and a course in general ecology or consent of instructor. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. (Same course as Geology 150C.)

151. Limnology (4)

Lecture—3 hours; discussion—1 hour; special project. Prerequisite: Biological Sciences 1A and junior standing. The biology and productivity of inland waters with emphasis on the physical and chemical environment.—III. (III.) C. Goldman

151L. Limnology Laboratory (3)

Laboratory—6 hours; two weekend field trips. Prerequisite: course 151 (may be taken concurrently); junior, senior, or graduate standing. Limnological studies of lakes, streams, and reservoirs with interpretation of aquatic ecology.—III. (III.) C. Goldman

155. Wetland Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Plant Biology 117 required; course 110 or 151 recommended. Introduction to wetland ecology. The structure and function of major wetland types and principles that are common to wetlands and that distinguish them from terrestrial and aquatic ecosystems.—I. (I.) Rejmankova

155L. Wetland Ecology Laboratory (3)

Lecture—1 hour; laboratory—6 hours; fieldwork—two 1-day weekend field trips. Prerequisite: course 155 required (may be taken concurrently). Modern and classic techniques in wetland field ecology. Emphasis on sampling procedures, vegetation analysis, laboratory analytical procedures, and examples of successful wetland restoration techniques.—I. (I.) Rejmankova

(e) Environmental Policy Analysis**160. Environmental Decision Making (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Political Science 1, Economics 1A, intermediate statistics, course 1 and course 166 or Political Science 182; upper division standing or consent of instructor. Alternative models of environmental policymaking, and application to case studies of decision making in the U.S. and California.—II. (II.) Sabatier

161. Environmental Law (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing and one course in environmental science (course 1, 10, 110, Biological Sciences 1A, Environmental Toxicology 10, or Resource Sciences 100); English 1 and Political Science 1 recommended. Introduction for non-Law School students to some of the principal issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA. GE credit: SocSci, Wrt.—II. (II.) Wandesforde-Smith

163. Energy and Environmental Aspects of Transportation (4)

Lecture—3 hours; extensive writing. Prerequisite: Economics 1A and Civil and Environmental Engineering 162. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as Civil and Environmental Engineering 163.) Offered in alternate years. GE credit: Wrt.—(I.) Sperling

164. Ethical Issues in Environmental Policy (3)

Lecture—3 hours. Prerequisite: courses 160, 168A; seniors only in Environmental Policy Analysis and Planning or by consent of instructor. Basic modes of ethical reasoning and criteria of distributive justice applied to selected topics in environmental policymaking.—III. (III.) Sabatier

165. Science, Experts and Public Policy (4)

Lecture—4 hours. Prerequisite: upper division standing in the social or biological sciences; course 160 or Political Science 108 recommended. Analysis of factors affecting the influence of scientists, planners, and other experts in policymaking. Several cases and controversies will be examined.

166. Policy Making in Natural Resource Agencies (4)

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: Political Science 1. Analysis of factors that shape the behavior and performance of public agencies responsible for natural resource manage-

ment and environmental protection. Internet resources and field work used to design and execute a research and writing project on a selected agency or inter-agency program. GE Credit: Wrt.—(I.) Wandesforde-Smith

167. Energy Policy (4)

Lecture—4 hours. Prerequisite: Resource Sciences 3 or Engineering 160; course 160 or Political Science 101, 107, or 109. Overview of U.S. energy policy; policy analysis, philosophy and methods; major policy issues, such as renewable vs. nonrenewable; and applied studies of power plants, solar residential, and state policy options. Offered in alternate years.

168A. Methods of Environmental Policy Evaluation (5)

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: Statistics 13; Economics 100 or Agricultural and Resource Economics 100A; Mathematics 16B or 21B; course 1; upper division standing. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefit-cost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation.—(I.)

168B. Methods of Environmental Policy Analysis (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 168A. Continuation of course 168A, with emphasis on examination of the literature for applications of research and evaluation techniques to problems of transportation, air and water pollution, land use, and energy policy. Students will apply the methods and concepts by means of a major project.—II. (II.)

(f) Environmental Planning**170. Conservation Biology Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 and Economics 1A; Economics 100 or Agricultural and Resource Economics 100A recommended. Analysis of policies designed to conserve species and their habitats. Emphasis on how individual incentives affect the success of conservation policies. Valuation of endangered species and biodiversity. Criteria for deciding conservation priorities.—III. (III.)

171. Environmental Planning (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; a course in social science and a course in environmental science. Laws, institutions, design and analysis methods, and means of implementation of plans for land use, air and water quality, transportation, and energy are examined. Theoretical and practical readings are used. Political and technical problems common to all planning processes emphasized.—III. (III.) Johnston

172. Public Lands Management (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A. Investigation of alternative approaches to public lands management by Federal and state agencies. The role each agency's legislation plays in determining the range of resource allocations. GE credit: SocSci.—II. (II.)

173. Land Use and Growth Controls (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Political Science 1, Economics 1A, intermediate statistics (Sociology 106 or Statistics 102 or the equivalent), and local government (Applied Behavioral Science 157, 158 or Political Science 100, 102 or 104.) Exposes students to the economic, political, and legal factors affecting land use and growth controls, and helps students critically evaluate written materials in terms of their arguments and supporting data.—III. Johnston

175. Natural Resource Economics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100B or Economics 100 or the equivalent. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil).

(Same course as Agricultural and Resource Economics 175.) GE credit: SocSci.—II. (II.) Farzin

178. Applied Research Methods (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Statistics 103 or Sociology 106 or the equivalent. Research methods for analysis of urban and regional land use, transportation, and environmental problems. Survey research and other data collection techniques; demographic analysis; basic forecasting, air quality, and transportation models. Collection, interpretation, and critical evaluation of data.—III. (III.)

179. Environmental Impact Reporting (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: upper division standing; Biological Sciences 1A; one course from the following: course 1, 10, 110, Environmental Toxicology 10, or Environmental and Resource Sciences 100. Methods of analysis used in environmental impact reporting. Emphasis on effective writing; review and management of impact reports in the context of rational democratic planning systems.—I. (I.) Johnston

179L. Environmental Impact Reporting Using Geographic Information (2)

Laboratory/discussion—2 hours; laboratory—4 hours. Prerequisite: course 179 concurrently. Introduction to Geographic Information Systems (GIS) by using ArcView for assessment and environmental planning. Not open for credit to students who have completed Applied Biological Systems Technology 180, 181 or Agricultural Systems and Environment 132.—I. (I.) Johnston

(g) Other Courses**190. Workshops on Environmental Problems (1-8)**

Laboratory—2-16 hours. Prerequisite: consent of instructor. Workshops featuring empirical analyses of contemporary environmental problems by multidisciplinary student teams. Guided by faculty and lay professionals, the teams seek to develop an integrated view of a problem and outline a series of alternative solutions. Open to all upper division and graduate students on application. (P/NP grading only.)—I, II, III. (I, II, III.)

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses**212A. Environmental Policy Process (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course in public policy (e.g., Environmental Science and Policy 160); environmental law (e.g., Environmental Science and Policy 161); course in bureaucratic theory (e.g., Political Science 187 or Environmental Science and Policy 166); course in statistics (e.g., Sociology 106 or Agricultural and Resource Economics 106). Introduction to selected topics in the policy process, applications to the field of environmental policy. Develops critical reading skills, understanding of frameworks of the policy process and political behavior, and an ability to apply multiple frameworks to the same phenomena. Offered in alternate years. (Same course as Ecology 212A.)—(III.) Sabatier

212B. Environmental Policy Evaluation (4)

Lecture—1 hour; discussion—1 hour; seminar—2 hours. Prerequisite: intermediate microeconomics (e.g., Economics 100); Statistics 108 or Agricultural and Resource Economics 106; policy analysis (e.g., Environmental Science and Policy 168A or the equivalent); Agricultural and Resource Economics 176.

Methods and practices of policy analysis; philosophical and intellectual bases of policy analysis and the political role of policy analysis. (Same course as Ecology 212B.) Offered in alternate years.—(II.)

220. Tropical Ecology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: advanced introductory ecology course—course 100, Evolution and Ecology 101, 117; Evolution and Ecology 138 recommended. Open to graduate and undergraduate students who meet requirement subject to consent of instructor. An overview of present status of knowledge on structure and processes of major tropical ecosystems. Differences and similarities among tropical and temperate systems stressed. Offered in alternate years.—(III.) Rejmankova

228. Advanced Simulation Modeling (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 128-128L; Statistics 108 or Agricultural and Resource Economics 106. Advanced techniques in simulation modeling; optimization and simulation, dynamic parameter estimation, linear models, error propagation, and sensitivity testing. Latter half of course will introduce model evaluation in ecological and social system models.

252. Sustainable Transportation Technology and Policy (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 160 or the equivalent. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as Civil and Environmental Engineering 252.)—III. (III.) Sperling

275. Economic Analysis of Resource and Environmental Policies (4)

Lecture/discussion—4 hours. Prerequisite: Agricultural and Resource Economics 204/Economics 204. Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as Agricultural and Resource Economics 275.)—III. (III.)

278. Research Methods in Environmental Policy (3)

Lecture/discussion—3 hours. Prerequisite: Agricultural and Resource Economics 106 or the equivalent. Introduction to scientific research in environmental policy. Major issues in the philosophy of the social sciences. How to design research that acknowledges theoretical assumptions and that is likely to produce evidence in an intersubjectively reliable fashion with explicit recognition of its uncertainties. Offered in alternate years.—(II.) Sabatier

298. Directed Group Study (1-5)

299. Research (1-12)

Prerequisite: graduate standing. (S/U grading only.)

Ruby Reed, Ph.D., Lecturer
Michael W. Stimmann, Cooperative Extension Specialist

The Major Program

Toxic agents found in the environment include pesticides, food additives, industrial waste, metals and chemicals produced by animals, plants, fungi and bacteria. Students in the Environmental Toxicology major learn about the potential for toxicants to produce adverse effects by understanding both the environmental fate and biological activity of compounds. They learn about monitoring concentrations and the distribution and persistence of agents found in water, soil, air and foods. Toxicity testing procedures and exposure assessment are used to help signal potential for harm to humans and other species. By understanding the cellular targets and biochemical mechanisms perturbed by toxicants, toxicologists can better estimate adverse effects. Overall, the program teaches students how knowledge of the origin, fate and action of toxic agents helps toxicologists evaluate the risk of adverse effects and balance risks against the benefits of use.

The Program. Preparatory courses in biology, chemistry, mathematics, and physics are required to provide the chemical and biological principles which underlie toxicology. Students in the major are expected to understand the environmental fate and biological activity of different classes of toxic substances, and the legislative issues which arise from chemical use. Opportunities are available to develop in-depth understanding in areas of emphasis through selection of electives.

Internships and Career Alternatives. Occupations that use environmental toxicology include industrial hygiene, environmental health and safety, monitoring and field sampling, residue or forensic analysis, pest control, pharmaceutical or food additive toxicity testing and research, risk assessment and managing regulatory compliance. A substantial proportion of graduates elect to pursue advanced training in graduate or professional schools. Others with the B.S. degree have gone on to law or medical school, as well as to degrees in pharmacology, toxicology, agricultural and environmental chemistry, or public

health. During undergraduate study, optional internships or research projects are recommended to provide training and work experience to help students set future goals.

B.S. Major Requirements:

	UNITS
English Composition Requirement	0-8
See College requirement	
Preparatory Subject Matter	61-69
Biological Sciences 1A, 1B, 1C	15
Chemistry 2A-2B-2C or 2AH-2BH-2CH, and 118A-118B-118C or 128A-128B-128C	24-27
Agricultural Management and Rangeland Resources 21	3
Environmental Toxicology 10 or Environmen- tal Science and Policy 10	3-4
Mathematics 16A-16B or 21A-21B	6-8
Physics 1A-1B or 7A-7B	6-8
Statistics 100	4
Breadth/General Education	36
Satisfaction of the General Education requirement to include courses selected with adviser's approval to complement the major (courses in agricultural eco- nomics, environmental studies, political science, psychology, and sociology are particularly recommended.)	24
Additional breadth in humanities and social sciences	12
Depth Subject Matter	29-30
Biological Sciences 101, 102, 103	6-7
Environmental Toxicology 101, 112A-112B, 114A-114B, 138 and (128, 131, 135, or 146)	23
Restricted/Other Electives	24
Electives selected for area of specialization with adviser's approval.	
Unrestricted Electives	13-30
Total Units for the Degree	180

Major Adviser. R.H. Rice.

Advising Center for the major is in 4137 Meyer Hall. Contact Tracy Grissom, Academic Program Adviser, (530) 752-1042.

Minor Program Requirements:

	UNITS
Environmental Toxicology	18
Environmental Toxicology 101, 112A, 114A, 138	12
Elective courses 6 units minimum, selected from Environmental Toxicology 10, 128, 131, 135, 146, 190, 198 and 199 (4 units combined maximum of 190, 198 and 199 with adviser approval)	6

Minor Adviser. R.S. Tjeerdema

Graduate Study. Programs of study leading to M.S. and Ph.D. degrees are available through related Graduate Groups such as Pharmacology and Toxicology, Biochemistry and Molecular Biology, and Agricultural and Environmental Chemistry. For information on graduate study, contact the Advising Office or the appropriate graduate adviser. See also the Graduate Studies chapter of this catalog.

Graduate Advisers. M.G. Miller (*Pharmacology and Toxicology*), T. Shibamoto (*Agricultural and Environmental Chemistry*).

Courses in Environmental Toxicology (ETX)

Lower Division Courses

10. Introduction to Environmental Toxicology (3)

Lecture—3 hours. Hazardous substances, their effects on humans and their actions and movement in the environment. Emphasis on substances of current concern. GE credit: SciEng.—III. Tjeerdema

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses**101. Principles of Environmental Toxicology (3)**

Lecture—3 hours. Prerequisite: Chemistry 8B, 118B, or 128B, and Biological Sciences 1A. Principles of toxicology with a focus on environmental and industrial chemicals. Topics include fate and effects of chemicals in organisms and the environment, air pollutants, insecticides, aquatic toxicology, endocrine disruptors, biomarkers and bioassays and risk assessment. GE credit: SciEng.—I. (I.) Denison

112A. Toxicants in the Environment (3)

Lecture—3 hours. Prerequisite: course 101 or consent of instructor. Properties of toxic chemicals which influence their distribution and transformations; action of environmental forces which affect toxicant breakdown, movement, and accumulation; sources and occurrence of major classes of environmental toxicants. GE credit: SciEng.—II. (II.) Charles, Tjeerdema

112B. Toxicants in the Environment (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 2C; course 112A; consent of instructor. Continuation of 112A. Toxic chemicals—primarily pollutants—in the environment; concepts and techniques of sampling, detecting, and measuring toxicants of current concern; collection, interpretation, and use of analytical data. Limited enrollment. Environmental Toxicology majors will be given preference for enrollment. GE credit: SciEng.—III. (III.) Shibamoto

114A. Biological Effects of Toxicants (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102; course 101 and Neurobiology, Physiology, and Behavior 101 recommended. Biological effects of toxic substances in living organisms. Metabolism, cellular and tissue targets, mechanisms of action, and pathological effects. GE credit: SciEng.—II. (II.) Rice

114B. Biological Effects of Toxicants: Experimental Approaches (4)

Lecture/discussion—2 hours; discussion/laboratory—4 hours. Prerequisite: course 114A and consent of instructor if non-major. Illustrates basic principles of toxicology and acquaints students with laboratory techniques for evaluating potential toxicity of chemicals. Continuation of course 114A. Limited enrollment. Environmental Toxicology majors will be given preference for enrollment. GE credit: SciEng.—III. (III.) Miller

127. Environmental Stress and Development in Marine Organisms (10)

Lecture—4 hours; laboratory—12 hours; discussion—2 hours. Prerequisite: course 101 or Biological Sciences 102 or 104 or the equivalent; course 114A or Nutrition 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as Nutrition 127.) GE credit: SciEng.—summer. Cherr

128. Food Toxicology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102 and 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as Food Science and Technology 128.) GE credit: SciEng.—III. (III.) Shibamoto, Russell

131. Air Pollutants and Inhalation Toxicology (3)

Lecture—3 hours. Prerequisite: Chemistry 8B (may be taken concurrently) or the equivalent; Biological Sciences 102 recommended. Toxicology of air pollu-

ants in the ambient and occupational environments. Environmental fates, biological effects, air-quality criteria and standards, and pulmonary responses to these pollutants. GE credit: SciEng.—I. (I.) Kado

135. Health Risk Assessment of Toxicants (3)

Lecture—3 hours. Prerequisite: course 101; course 114A recommended. Current practices of health risk assessment of environmental chemicals using toxicological principles and their application to regulatory control of these chemicals. GE credit: SciEng.—I. (I.) Reed

138. Legal Aspects of Environmental Toxicology (3)

Lecture—3 hours. Prerequisite: course 10 or 101 recommended. Federal and California legislation concerning air and water pollution, pesticide use, food and feed additives, consumer protection, and occupational exposure to toxic substances; roles of federal regulatory agencies; alternatives to government control.—II. Stimmann

146. Exposure and Dose Assessment (3)

Lecture—3 hours. Prerequisite: course 112A; course 135 recommended. The exposure component of risk assessment; specifically, the presence and/or formation of toxic substances in environmental media, their movement within and between contaminated media, and the contacts of human populations with those media. GE credit: SciEng.—III. (III.) Wong

190. Seminar (1)

Seminar—1 hour. Prerequisite: consent of instructor. Selected topics presented by students, faculty, or outside speakers covering current research and instructional activities within environmental toxicology. Reports and discussion concerning oral and written presentations, literature sources, and career opportunities. (P/NP grading only.)—I, II, III. (I, II, III.)

190C. Research Group Conference (1)

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference of advanced research methods and the interpretation of research results. (P/NP grading only.)—I, II, III. (I, II, III.)

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.)

194HA-194HB. Honors Research (3-3)

Discussion—1 hour; laboratory—6 hours. Prerequisite: senior standing, minimum GPA of 3.25, consent of instructor. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings. (P/NP grading only; deferred grading pending completion of sequence.)

194HC. Honors Research (3)

Laboratory—6-9 hours; discussion—1 hour. Prerequisite: senior standing, minimum GPA of 3.25, and consent of instructor. Continuation of course 194HA-194HB. (P/NP grading only.)

197T. Tutoring in Environmental Toxicology (1-5)

Hours and duties will vary depending upon course being tutored. Prerequisite: advanced standing in Environmental Toxicology, a related major, or the equivalent experience and consent of instructor. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit up to a total of 5 units. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**203. Environmental Toxicants (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 128C (or the equivalent), or Chemistry 8B

and consent of instructor. Toxic chemicals: selected topics illustrating their occurrence, structure, and the reactions underlying detection, toxicity, fate, and ecological importance. Offered in alternate years.—II.

214. Mechanisms of Toxic Action (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103, and consent of instructor. Chemical, biochemical, and molecular mechanisms underlying the adverse effects of toxic chemicals. Students are required to write a grant proposal and participate in a grant review panel. Offered in alternate years.—(III.) Denison, Hammock

220. Analysis of Toxicants (3)

Lecture—3 hours. Prerequisite: course 101 and consent of instructor; course 203 recommended. Principles of the microanalysis of toxicants. Theoretical considerations regarding separation, detection, and quantitative determination of toxicants using chemical and instrumental techniques.—I. (I.) Charles

220L. Analysis of Toxicants Laboratory (2)

Laboratory—6 hours. Prerequisite: course 220 (may be taken concurrently) and consent of instructor. Laboratory techniques for microanalysis of toxicants. Separation, detection, and quantitative determination of toxicants using chemical and instrumental methods.—I. (I.)

228. Gas Chromatography/Mass Spectrometry of Toxic Chemicals (3)

Lecture—1 hour; discussion—1 hour; laboratory—3 hours. Prerequisite: course 220 and Chemistry 129C; or consent of instructor. Application of GC/MS techniques to investigate toxic chemicals. Mass spectral fragmentations and their application to the structural elucidation. Practical application of GC/MS in current research. Preference given to environmental toxicology graduate students.—II. (II.) Shibamoto

234. Neurophysiological Basis of Neurotoxicology (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology and Behavior 101 or the equivalent; basic understanding of neurophysiology. Mechanisms of action at the cellular and systemic level of a number of different neurotoxins and toxicants. Examples of ways toxins may act on the nervous system and techniques for study of neurotoxicology. (Same course as Physiology 234.)—I. (I.) Woolley

240. Ecotoxicology (3)

Lecture—3 hours. Prerequisite: elementary course in toxicology and ecology or the equivalent, or consent of instructor. Principles of toxicology as applied to chemical action on natural populations, communities, and ecosystems. Physical, chemical, and biological characteristics which influence ecotoxic effects, modelling, and field research. Selected case histories are analyzed and presented in class.—III. (III.) Matsumura

250. Reproductive Toxicology (3)

Lecture—1.5 hours; lecture/discussion—1.5 hours. Prerequisite: Physiology 220 or Pharmacology—Toxicology 203. Application of toxicological principles in reproductive studies. Effects of toxicants on the male, female, and developing embryo/fetus. Critical evaluation of reproductive toxicity studies and development of mechanistic approaches to understanding how chemical exposure can adversely affect reproduction. Offered in alternate years.—(II.) Miller, Golub

290. Seminar (1)

Seminar—1 hour. Current topics in environmental toxicology. (S/U grading only.)—I, II, III. (I, II, III.)

290C. Advanced Research Conference (1)

Lecture/discussion—1 hour. Prerequisite: consent of instructor. Presentation and critical discussion of advanced research methods and interpretation of research results. Designed primarily for graduate students. (S/U grading only.)—I, II, III. (I, II, III.)

297T. Tutoring in Environmental Toxicology (1-5)

Hours and duties will vary depending upon course being tutored. Prerequisite: graduate standing in Environmental Toxicology, a related major, or the equivalent experience, and consent of instructor. Teaching toxicology including conducting discussion

groups for regular departmental courses under direct guidance of staff. May be repeated for credit up to a total of 5 units. (S/U grading only.)

298. Group Study (1-5)

299. Research (1-12)
(S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Graduate Study. The Graduate Group in Epidemiology offers programs of study and research leading to the M.S. and Ph.D. degrees. Areas of emphasis include environmental/occupational epidemiology; infectious disease epidemiology; epidemiologic methods and biostatistics; health services and economics; zoonotic and vector-borne epidemiology; and nutritional, wildlife epidemiology. For detailed information regarding the program, address the chairperson of the group.

Graduate Advisers. I. Gardner (*Medicine and Epidemiology*), P. Kass (*Population Health and Reproduction*), J. Utts (*Statistics*).

Required Courses for the Program

Prerequisite Courses. Prerequisites may be taken concurrently with required courses below.

Mathematics 16A-16B or 21A-21B
Statistics 102, 106, and 108, or Preventive Veterinary Medicine 402, 403

Required Courses. These courses are required of all students in the program (M.S. and Ph.D. degrees). These requirements cannot be waived and must be met before a student's Qualifying Examination.

Epidemiology 204, 205A, 205B, 206, 207, 208 and 290

Statistics 130A-130B
One course from Population Health and Reproduction 202 or Statistics 144

Related Courses. For additional course work in epidemiology, please see Medicine and Epidemiology, Preventive Veterinary Medicine, Population Health and Reproduction, Epidemiology and Preventive Medicine, and Statistics.

Courses in Epidemiology (EPI)

Graduate Courses

204. Statistical Models, Methods, and Data Analysis for Scientists (4)

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: Statistics 130B or 131B, or 133; Statistics 108 recommended. Development of broad sta-

tistical skills useful for the analysis of scientific data. Special emphasis given to determining factors associated with characteristics like disease and time-to-event. Analysis of data that can be modeled as generalized linear and generalized linear mixed models, parametric and non-parametric survival models, and models for correlated, clustered, longitudinal data.—III. Johnson

205A. Principles of Epidemiology (4)

Lecture—4 hours. Prerequisite: Preventive Veterinary Medicine 402 or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Preventive Veterinary Medicine 405.)—I. (I.)

205B. Integration of Epidemiologic Concepts (2)

Discussion—2 hours. Prerequisite: Preventive Veterinary Medicine 405/course 205A can be taken concurrently. In-depth analysis and integration of basic epidemiologic concepts and approaches to epidemiologic research presented in Preventive Veterinary Medicine 405/course 205A, with more mathematical and theoretical basis and examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of diagnostic tests, study design, and surveillance.—I. (I.)

206. Epidemiologic Study Design (3)

Lecture—1.5 hours; discussion—0.9 hours; laboratory—1.8 hours. Prerequisite: Preventive Veterinary Medicine 405/course 205A, course 205B. Builds on concepts presented in course 205A. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in course 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Preventive Veterinary Medicine 406A.)—II. (II.)

207. Advanced Concepts in Epidemiologic Study Design (3)

Lecture/discussion—3 hours. Prerequisites: course 206, course 205A/Preventive Veterinary Medicine 405 and course 206/Preventive Veterinary Medicine 406A or the equivalent. In-depth integration of advanced concepts in study design, with theory and examples, including confounding, effect modification under additive and multiplicative models, internal and external validity, bias, misclassification, alternate designs, source populations, statistical power and sample size, causation, and genetic epidemiology.—III. (III.)

208. Analysis and Interpretation of Epidemiologic Data (3)

Lecture—16 sessions; laboratory—21 sessions; project. Prerequisite: course 204 (may be taken concurrently) and 207, and either Statistics 144 or Population Health and Reproduction 202 and entry level skill in standard statistical software (e.g., SPSS, BMDP, SAS, Stata, MinTab, S-Plus). Application of theory and concepts of statistics and epidemiology to analysis and interpretation of data typically found in veterinary and human epidemiologic research.—III. Beckett

210A. Analytic Epidemiology I: Case-Control Studies (3)

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Statistics 130B and Preventive Veterinary Medicine 406 (or the equivalent), or consent of instructor. Theory and practice of epidemiologic data analysis. Topics include confounding, stratification, matching, interaction, and logistic regression. (Same course as Population Health and Reproduction 210A.)—II. (II.) Kass

210B. Analytic Epidemiology II: Cohort Studies (3)

Lecture—3 hours. Prerequisite: course 210A. Theory and practice of epidemiologic data analysis. Topics include rates, rate standardization, cohort analysis, Poisson regression, and survival/failure-time meth-

ods. (Same course as Population Health and Reproduction 210B.)—III. (III.) Kass

220. Problems in Epidemiologic Study Design (4)

Lecture—3 hours; term paper. Prerequisite: Preventive Veterinary Medicine 405 and 406 or the equivalent; Population Health and Reproduction 207 concurrently; Statistics 102 and 106 or the equivalent. Design and development of research protocols and funding applications for peer review. Application of research methods data collection and management and statistical analysis in research proposals. Methods of evaluating research proposals, mechanisms of funding, specifying human subjects considerations.—III. (III.) Gold

222. Epidemiological Modeling (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Preventive Veterinary Medicine 405. Techniques of model building and simulation of infectious diseases will be explored. Epidemiologic modeling philosophy, construction and validation will be emphasized. Offered in alternate years.—II. Carpenter

223. Spatial Epidemiology (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Preventive Veterinary Medicine 405 or Environmental Studies 126 or Veterinary Medicine 409. Geographic Information Systems (GIS) and spatial statistics. Students are expected to complete a term project based on their graduate research. Offered in alternate years.—II. Carpenter

224. Health and Ecological Risk Analysis (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Preventive Veterinary Medicine 406 or consent of instructor; background in statistics, including multi-variable techniques; a course in differential equations. A methodological approach to risk analysis for human and animal-related health and ecological issues. Basic principles of risk analysis, including perception, communication, assessment and management. Emphasis on the assessment of risk.—III. (III.) Carpenter

240. Principles of Injury Epidemiology (3)

Lecture/discussion—3 hours. Overview of the epidemiology of human injury, including general principles, surveillance methods, behavioral factors, environmental factors, treatment issues and engineering and legal interventions related to vehicular injuries, drownings, falls, fires and burns, poisonings, firearm injuries, and other intentional injuries.—I. (I.) Romano

250. Introduction to Clinical Research Design and Epidemiology (1)

Lecture—1 hour. Prerequisite: graduate standing or medical/nursing personnel. For medical personnel who are or will be involved in medical research. Review of basics of clinical study design and analysis of clinical data. (S/U grading only.)—I. (I.) McCurdy, Romano

251. Environmental Epidemiology (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 405 (may be taken concurrently); upper division undergraduates who have completed Environmental Studies 126; or the equivalent. Examination of the human health effects and the risk of disease from community, occupational, and personal exposure to toxic substances. Offered in alternate years.—I. Gold

260. Epidemiology of Chronic Diseases and Aging (3)

Lecture/discussion—3 hours. Overview of the epidemiology of chronic disease in old age. Topics include biology of aging, epidemiology of cardiovascular disease, neoplasms, osteoporosis and fractures, psychosocial factors and health in old age, dementias, functional status and prevention of disease.—II. (II.)

270. Research Methods in Occupational Epidemiology (3)

Laboratory/discussion—3 hours. Prerequisite: Environmental Studies 126 or Preventive Veterinary Medicine 405; and Statistics 102 or Epidemiology and Preventive Medicine 402. Methods used in epidemiologic research on occupational hazards. Topics

include design and analysis of cohort and case-control studies, sample size, measuring dose, choosing a control group, validation of employment and health data, interpreting negative studies, and analysis software. Offered in alternate years.—III. Beaumont

290. Seminars in Epidemiology (1)

Seminar—1 hour. Students will actively participate in presentation and discussion of ongoing or published research projects in epidemiology. (S/U grading only.)—III. (III.)

291. Seminars in Human Health Services Research and Clinical Epidemiology (1)

Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as General Medicine 291.) (S/U grading only.)—I, II, III. (I, II, III.)

298. Group Study (1-5)

Seminar—1-5 hours. Group study in selected areas of epidemiology.

299. Research (1-12)

Research in selected areas of epidemiology. (S/U grading only.)

Charles Wade, Ph.D., Adjunct Professor (*Neurobiology, Physiology, and Behavior*)

Graduate Study. The Graduate Group in Exercise Science offers a program of study and research leading to an M.S. degree. Advanced training is provided in two areas of emphasis. The Exercise Physiology Area involves the study of functional, metabolic, nutritional, and regulatory aspects of the cardiovascular, respiratory, and skeletal muscle systems as they relate to movement and exercise. The Biomechanics Area includes the study of skeletal muscle mechanics, motor control, biomechanical analysis of human movement, tissue mechanics, motor control, and clinical biomechanics.

Graduate Advisers. D. Hawkins, E. Schelegle, K. Williams

Courses in Exercise Science (EXS)

Graduate Courses

200A. Introduction to Research: History and Philosophy in Physical Education (2)

Discussion—1 hour; seminar—1 hour. Prerequisite: consent of instructor. Fundamental tenets of science and their application to current research in human performance; benchmark studies in the evolution of the field. —I. (I.)

200B. Problem Solving and Research Design in Physical Education (2)

Discussion—1 hour; seminar—1 hour. Prerequisite: course 200A. Conventional approaches to problem solving; processes in research design and analysis; written and oral presentation of a thesis proposal.—III. (III.)

201. Exercise Cardiorespiratory Physiology (3)

Lecture/discussion—3 hours. Prerequisite: undergraduate course in systemic physiology, exercise physiology, and biochemistry (intermediary metabolism). Advanced course on integrated responses of the cardiovascular and respiratory systems to exercise. Includes hemodynamic, neurohormonal, and autonomic aspects of cardiac and vascular function, principles of myocardial metabolism, and mechanisms underlying changes in pulmonary function and gas transport.—I. Stebbins

220. Research Topics in Biomechanics (3)

Lecture—2 hours; seminar—1 hour. Prerequisite: graduate standing and consent of instructor; course 115 recommended. Survey of current research into diverse areas of the biomechanics of human movement. Topics will include locomotion, sport biomechanics, electromyography, musculoskeletal and tissue mechanics, advances in measurement technology, clinical biomechanics. (Same course as Biomechanical Engineering 220.) Offered in alternate years. Not open for credit to students who have taken Physical Education 220.—III. K. Williams

221. Anthropometry in Physical Activity (3)

Lecture—2 hours; laboratory—five 3-hour sessions to alternate weekly with five 1-hour discussion sessions. Prerequisite: Exercise Biology 101 and 102. Consideration of physical constitution, body proportions, and body composition in man as they affect physical performance, and of body structural and compositional changes accompanying prolonged, systematic physical conditioning. Offered in alternate years.

222. Metabolic Functions in Exercise (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Exercise Biology 102, Neurobiol-

ogy, Physiology and Behavior 101. Review of the current research literature on the metabolic responses to exercise in man; a laboratory survey of respiratory response, metabolic and water balances, blood gas adjustments and acid-base balance with particular reference to the effect of environmental conditions.—III. (III.)

224. Exercise Electrocardiography (2)

Lecture—2 hours. Prerequisite: Exercise Biology 112 or consent of instructor. Physiological bases and clinical implications of normal and abnormal exercise electrocardiograms (ECG) are treated in detail. Exercise prescription is considered as is the predictive significance of normal and abnormal ECG. Offered in alternate years.—I. Holly

225. Seminar in Cardiac Rehabilitation (2)

Seminar—2 hours. Prerequisite: Exercise Biology 112 or graduate standing and consent of instructor. Critical examination of literature dealing with the causes, prevention and treatment of cardiovascular disease with particular emphasis on intervention through cardiac rehabilitation. Both the theoretical bases and practical approaches to cardiac rehabilitation will be examined. Offered in alternate years.—(I.) Holly

227. Research Techniques in Biomechanics (4)

Lecture—2 hours; laboratory—4 hours; term paper/discussion—1 hours. Prerequisite: consent of instructor, Mathematics 22B; Exercise Biology 115 recommended. Experimental techniques for biomechanical analysis of human movement are examined. Techniques evaluated include data acquisition and analysis by computer, force platform analysis, strength assessment, planar and three-dimensional videography, data reduction and smoothing, body segment parameter determination, electromyography, and biomechanical modeling. (Same course as Biomedical Engineering 227/Mechanical and Aeronautical Engineering 227.) —II. (II.) K. Williams

228. Skeletal Muscle Mechanics: Form, Function, Adaptability (4)

Lecture—4 hours. Prerequisite: basic background in biology, physiology, and engineering; Engineering 35 and 45, Mathematics 21D; and Neurobiology, Physiology and Behavior 101 recommended. Basic structure and function of skeletal muscle examined at the microscopic and macroscopic level. Muscle adaptation in response to aging, disease, injury, exercise, and disuse. Analytic models of muscle function. (Same course as Biomedical Engineering 228.)—(I.) Hawkins

290. Seminar in Exercise Science (1)

Seminar—1 hour. Prerequisite: graduate standing; required of all first year students for first two quarters. Presentation and discussion of topics of interest, and the analysis of research in exercise science. Not open for credit to students who have taken Physical Education 290. (S/U grading only.)—(II, III.) Hawkins

298. Group Study (1-5)

Prerequisite: graduate standing; consent of instructor.

299. Research (1-12)

Prerequisite: graduate standing; consent of instructor and Department Chairperson. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

Feminist Theory and Research

Judith Newton, Ph.D., Program Director
Program Office, 2222 Hart Hall (530-752-4686)

World Wide Web:

<http://cougar.ucdavis.edu/wms/deprogram.html>

Graduate Study. The program in Women and Gender Studies offers courses leading to a *designated emphasis* in Feminist Theory and Research. The courses provide theoretical and interdisciplinary perspectives to students already preparing for the Ph.D. in one of 12 participating departments (Anthropology, Comparative Literature, Dramatic Art, Education, English, French, German, History, Italian, Psychology, Spanish, and Sociology). Students complete all requirements for the Ph.D., including the dissertation, in one of the participating departments. The additional requirements leading to the designated emphasis consist of two core courses (Women's Studies 200A and 200B) and two courses on gender, one of which must be in the student's home department. It is expected that an analysis of gender will be a central component of the student's doctoral examination and dissertation.

Graduate Adviser. Consult the Women and Gender Studies office (530-752-4686).

Fermentation Science

(College of Agricultural and Environmental Sciences)

The Major Program

The Fermentation Science major is a program of study of the fundamental and applied sciences related to the use of microorganisms as production and processing agents. A broad, interdisciplinary food-related education is offered with specialization in the study of application of microorganisms for production of beer and other alcoholic beverages, manufacture of foods such as cheese, waste treatments, and the production of microbial cells, drugs, enzymes, hormones, solvents, acids, and vitamins.

The Program. The major in fermentation science leads to a Bachelor of Science degree. Most of the instruction for the major is done in the Department of Food Science and Technology and in the Department of Viticulture and Enology. Students also take courses in chemistry, microbiology, molecular and cellular biology, genetics, and computer science. Electives often include additional courses in sensory science, management and viticulture.

Preparatory Requirements. Before transferring into the Fermentation Science major, students must complete the following courses with a grade of C– or better and with a combined grade point average of at least 2.5 at the University of California (at least 3.0 for similar courses taken at community college) for these and all other preparatory courses. In addition, students' overall GPAs must be 2.25 or higher. All courses must be taken for a letter grade.

- Biological Sciences 1A.....5 units
- Chemistry 2A, 2B, 2C, 8A.....17 units
- Mathematics 16A.....3 units
- Physics 7A.....4 units

Recommendations. Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into required upper division courses and may thus delay graduation. Some courses may be available at UC Davis during Summer Session.

- Chemistry 8B.....4 units
- Mathematics 16B.....3 units
- Physics 7B.....4 units
- Biological Sciences 102.....3 units

Career Alternatives. Graduates qualify for supervisory, technical, production, product development, quality control, research, sales, or executive positions in the food, beverage, and allied industries, in the fermentation industries, and in governmental agencies. Students who choose to continue in graduate study have done so in such areas as food science-enology, microbiology, agricultural and environmental chemistry, and biochemistry.

B.S. Major Requirements:

UNITS

English Composition Requirement.....0-8
See College requirement

Preparatory Subject Matter.....58-63

- Biological Sciences 1A.....5
- Biological Sciences 102, 103.....6
- Chemistry 2A-2B-2C.....15
- Chemistry 8A-8B or 118A-118B or 128A-128B, 129A.....6-8
- Agricultural Management and Rangeland Resources 21 or the equivalent with adviser approval.....3
- Mathematics 16A-16B or 21A-21B.....6-8
- Microbiology 102-102L.....6
- Physics 7A and 7B.....8
- Agricultural Management and Rangeland Resources 120 or Food Science and Technology 117 or Statistics 106 or 100.....3-4

Breadth/General Education.....0-24
See General Education requirement

Depth Subject Matter.....40

(Courses in depth subject matter may not be taken on the P/NP grading basis. Overall GPA in depth subject matter must be 2.0 or greater.)

- Choose from Biological Sciences 101; Chemical Engineering 161B, 161C, 161L, 206; Chemistry 107A, 107B, 108, 130; Food Science and Technology 102A, 102B, 104, 104L, 108, 109, 110A, 110B, 123, 123L, 128, 205, 250, 250L; Microbiology 105, 140, 150, 155L, 250; Viticulture and Enology 3, 123, 123L, 124, 124L, 125, 125L, 126, 126L, 128, 128L, 129, 135, 140, 186, 190X, 200, 219, 224, 225, 235 (no variable-unit 190, 192, 199, 299 courses allowed toward depth requirement)

Restricted Electives.....28

Selected according to student's educational goals and upon approval by adviser. Only 6 units of 192 or 6 units of 190, 198, 199, 290, or 298 may be counted; or a total of 8 units of these courses combined. A list of approved courses is available from advisers.

Unrestricted Electives.....17-22

Total Units for the Degree.....180

Major Adviser. C.W. Bamforth (*Food Science and Technology*)

Advising Center for the major is located in 111 Cruess Hall (530-752-1468).

Graduate Study. Refer to the Graduate Studies degree programs in Agricultural and Environmental Chemistry, Biochemistry, Chemical Engineering, Food Science, Genetics, Microbiology, Viticulture and Enology.

Family and Community Medicine

See Medicine, School of

Fiber and Polymer Science

(College of Agricultural and Environmental Sciences)
Faculty. See under Textiles and Clothing.

The Major Program

The fiber and polymer science major is concerned with the physical, chemical, and structural properties of fibers and polymers and how these relate to fiber and polymer performance and end-use.

The Program. All students in this major take a common core of course work in chemistry, physics, and mathematics, and depth subject matter in fiber and polymer science, organic and physical chemistry, and technical writing. In the restricted electives, students select courses from areas such as computer science and mathematics, chemistry, marketing and management, material and advanced fiber and polymer science, and textiles.

Career Alternatives. The major prepares the student for a career in a wide range of industries in the areas of research and development, technical marketing and management, production, quality control, and science teaching (on completion of an additional year in the teaching credential program). The companies employing Fiber and Polymer Science graduates are in the fiber, polymer, industrial product, textile and/or chemical business. Graduates are prepared to enter the graduate program in textiles or agricultural and environmental chemistry with a specialization in fiber and polymer chemistry, and fiber and polymer science programs at other universities.

B.S. Major Requirements:

	UNITS
English Composition Requirement	7-12
See College requirement	0-8
Communication 1	4
English 104A, 104B, 104C, 104D, 104E, or 104F	3

Textiles and Clothing 6 or Engineering 45 ..4
 Courses selected from the following:
 Fiber and Polymer Science 100, 150,
 161, 161L, 180A and 180B; and Textiles
 and Clothing 163 and 163L

Minor Adviser. Y.-L. Hsieh.

Courses in Fiber and Polymer Science (FPS)

Upper Division Courses

100. Principles of Polymer Materials Science (3)
 Lecture—3 hours. Prerequisite: Chemistry 2A-2B;
 Chemistry 8A-8B or Engineering 45; introductory
 physics. The basic principles of polymer science are
 presented including polymer structure and synthe-
 sis; polymerization mechanisms, polymer classes,
 properties, and reactions; polymer morphology, rhe-
 ology, and characterization; polymer processing.
 (Same course as Materials Science Engineering
 147.)—II. (II.) Pan

110. Plastics in Society and the Environment (4)
 Lecture—3 hours; discussion—1 hour. Prerequisite:
 Chemistry 10 or introductory course in physical sci-
 ences. Basic concepts and methodologies in the
 study of plastics. Formation, classification, structure,
 properties, processing, and formulation. Their appli-
 cation to societal needs, and their impact on society
 and the environment. GE credit: SciEng or SocSci,
 Wrt.

150. Polymer Syntheses and Reactions (3)
 Lecture—3 hours. Prerequisite: Chemistry 128B or
 8B, and Chemistry 107A. Organic and physical
 chemistry aspects of polymer syntheses and reac-
 tions including polymerization mechanisms, kinetics
 and thermodynamics for major types of organic high
 polymers.—III. (III.) Hsieh

161. Structure and Properties of Fibers (3)
 Lecture—3 hours. Prerequisite: Textiles and Clothing
 6 and Chemistry 8B. The structure, properties and
 reactions of natural- and man-made fibers; the rela-
 tions between molecular structure of fibers and their
 physical properties; interactions of fibers and deter-
 gents. Offered in alternate years.—I. (I.) Hsieh

161L. Textile Chemical Analysis Laboratory (1)
 Laboratory—3 hours. Prerequisite: course 161 (may
 be taken concurrently). Laboratory methods and pro-
 cedures employed in qualitative and quantitative
 analysis of textile fibers and auxiliaries. Offered in
 alternate years.—I. (I.) Hsieh

180A-180B. Introduction to Research in Fiber and Polymer Science (2)

Laboratory/discussion—6 hours. Prerequisite: senior
 standing in major related to Fiber and Polymer Sci-
 ence, and consent of instructor. Senior thesis on
 independent problems. Research begun in course
 180A will be continued and completed in course
 180B. (Deferred grading only, pending completion of
 sequence.)—I, II, III. (I, II, III.)

192. Internship in Fiber and Polymer Science (1-12)

Internship—3-36 hours. Prerequisite: consent of
 instructor. Work experience off campus in a fiber and

polymer science related area. Supervision by a
 member of the Textiles and Clothing faculty. (P/NP
 grading only.)

197T. Tutoring in Fiber and Polymer Science (1-5)

Tutorial—3-15 hours. Prerequisite: upper division
 fiber and polymer science related major and consent
 of instructor. Tutoring of students in Fiber and Poly-
 mer Science courses. Assistance with discussion
 groups and laboratory sections under supervision of
 instructor. May be repeated for credit if tutoring in
 another Fiber and Polymer Science course. (P/NP
 grading only.)

198. Directed Group Study (1-5)
 Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing and consent of
 instructor. (P/NP grading only.)

Graduate Courses

250A-F. Special Topics in Polymer and Fiber Science (3)

Lecture—3 hours. Prerequisite: Fiber and Polymer
 Science 100 or consent of instructor. Selected topics
 of current interest in polymer and fiber science. Top-
 ics will vary each time the course is offered. (Same
 course as Materials Science and Engineering 250A-
 F.) (Formerly Textiles and Clothing course 250A-F.)—
 I, II, III. (I, II, III.) Hsieh, Pan, Sun

299. Research (1-12)

Independent study—3-36 hours. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for
 credit. (S/U grading only.)—I, II, III. (I, II, III.)

Film Studies

(College of Letters and Science)

The interdisciplinary minor in Film Studies provides
 insight into and critical perspectives on the role of
 film in culture. The minor emphasizes connections
 between visual media and other forms of representa-
 tion, and between Film Studies and other academic
 disciplines. Students will gain an understanding of
 the history of film, an awareness of genres, national
 traditions and representational conventions, and an
 ability to "read" films aesthetically, culturally, ideolog-
 ically, and historically. The minor is sponsored by the
 Humanities Program.

Minor Program Requirements:

UNITS

Film Studies	24
Humanities 10	4
Upper division courses selected from the fol- lowing list, with no more than two courses from any one category	20
<i>(a) Problems and Themes in Cinema:</i> Anthropology 136, Classics 102, Dra- matic Art 115, English 160, 161A, 161B, 162, Humanities 124, 125, Women's Studies 162	
<i>(b) Cinema, Nation and Nationality:</i> German 119, 142C, Italian 150, Japan- ese 106, Russian 129, Spanish 148	
<i>(c) Film and Social Identities:</i> African American and African Studies 170, 171, Humanities 120, 122, Women's Studies 160, 164	
<i>(d) Film/Video Production:</i> Art Studio 115, 116, 117	
<i>(e) Popular and Visual Culture:</i> American Studies 130, 133, 139, Art Stu-	

dio 150, Communication 140, Textiles and Clothing 107, Women's Studies 139

Restrictions: No more than two courses from a single department or program may be offered in satisfaction of the minor requirements.

Note: With a minor adviser's prior approval, up to four units of internship (e.g., American Studies 192, Communication 192, or Women's Studies 192) in television/video/film production may be offered toward satisfying the requirements of the minor. Such courses will be considered part of the "Film/Video Production" category.

Advising. Humanities Program, (530) 752-0431.

Fisheries

See **Animal Science; Biological and Agricultural Engineering; and Wildlife, Fish, and Conservation Biology**

Food Biochemistry

(College of Agricultural and Environmental Sciences)

The Major Program

The major in food biochemistry stresses the principles of chemistry and biochemistry as related to constituents of foods and the changes which occur in the constituents before and during processing and during storage. Particular emphasis is placed on the role of and changes in the carbohydrates, lipids, proteins, enzymes, and nucleic acids and their effect on the quality attributes of foods.

The Program. The food biochemistry curriculum stresses a strong background in chemistry, physics, mathematics, and biology at the lower division level. At the upper division level, students take specialized courses in food science and technology and advanced biochemistry and nutrition. Through the appropriate choice of electives, students may emphasize certain research areas such as nutrition, food processing, or toxicology.

Career Alternatives. The main employment options for a food biochemistry graduate are in research and development at large food industry units; in laboratory-related employment in quality assurance, new food technology, and food analysis; or in any position requiring knowledge of biochemical techniques, such as in clinical laboratories. The major offers excellent preparation for graduate study in areas such as food science, nutrition, biochemistry, and environmental toxicology. Food biochemistry has also been chosen as a pre-professional major by students interested in medical, veterinary, optometry, pharmacy, or dental school.

B.S. Major Requirements:

Graduate Study. Refer to the Graduate Studies chapter of this catalog.

Food Science

(College of Agricultural and Environmental Sciences)

The Major Program

Food science applies chemical, physical, biological, engineering, and social sciences to processing, preservation, development, packaging, storage, evaluation, identity and utilization of foods.

The Program. Students majoring in food science spend the first two years of study developing the scientific and general background necessary for upper division study. The science courses include chemistry, biology, physics, and mathematics. General background is provided by courses in the social science/humanities area and by optional courses in introductory food science. At the upper division level, students take courses in nutrition, food microbiology, food chemistry, food analysis, food commodities, food processing, and food engineering, and may choose to specialize in one of five career-oriented options. Students enrolled in the program are eligible for various scholarships, including scholarships from the Institute of Food Technologists.

Career Alternatives. Opportunities for employment include positions in the food and allied industries, local, state, and federal government agencies, and educational and research institutions. Graduate study for the food science student may lead to the M.S. or Ph.D. degree in food science, or in related fields such as agricultural chemistry, biochemistry, engineering, microbiology, and nutrition.

B.S. Major Requirements:

	UNITS
English Composition Requirement	4-8
See College requirement (one course of which must be English 102A, 102B, 102C, 102D, 102E, 102F, or 102G with food science or related area, or English 104A, 104B, 104C, 104D, 104E, or 104F)	4-8
Preparatory Subject Matter	54-60
Mathematics 16A-16B-16C	9
Biological Sciences 1A, 1C	10
Chemistry 2A-2B-2C	15
Organic chemistry (see option for requirement)	
Physics 7A-7B-7C	12
Food Science and Technology 1 and/or 2; both recommended, but not required	3-6

Food Science and Technology 50	5
Nutrition 10 (or approved substitute)	3

Breadth/General Education	24
Satisfaction of General Education requirement plus social science and humanities electives to total 24 units	

Depth Subject Matter	48
Biological Sciences 102, 103	6
Agricultural Management and Rangeland Resources 120	4
Food Science and Technology 100A, 100B, 101A, 103, 104, 104L, 160, 190	26
Food Science and Technology 110A-110B, Applied Biological Systems Technology 110L	8
Food Science and Technology 127 or 107 ...	4

Select one of the following five options:

Food Technology Option

The Food Technology option provides a broad exposure to food chemistry, food microbiology, food engineering and food processing. Students find positions in quality assurance, product development, and food processing in the food industry.

Specific course requirements	12
Chemistry 8A-8B	6
Food Science and Technology 108, 109	6

Selected additional courses	15
Select courses from a master list available from the department Advising Center.	

Food Business and Management Option

The Food Business and Management option allows students to integrate study of the science and technology of food with that of business and economics in a unique program. Students prepare for positions of management in small food companies, and research-and-development oriented marketing or technical sales opportunities in corporate food industries.

Specific course requirements	25
Chemistry 8A-8B	6
Economics 1A	5
Agricultural and Resource Economics 112, 113	8
Management 100	3
Food Science and Technology 109	3

Selected additional courses	10
Select courses from a master list available from the department Advising Center.	

Consumer Food Science Option

The Consumer Food Science option prepares students for jobs in food product formulation, research-and-development oriented marketing and sensory analysis, quality assurance, extension service, creative writing, and community service. Students who fulfill the requirements for the teaching credential teach elementary or secondary school home economics.

Specific course requirements	21
Chemistry 8A-8B	6
Food Science and Technology 47, 101B, 127 (107 is also required), 109, 159	12
Consumer Science 100	3

Selected additional courses	10
Select courses from a master list available from the department Advising Center.	

Food Biology/Microbiology Option

The Food Biology/Microbiology option is for students interested in research and development careers with food companies or government laboratories, in teaching and research at academic institutions, or in professional (medical, veterinary, pharmacy, optometry or dental) school. This option prepares students for graduate study and research in several areas, including food science, biochemistry, biotechnology, microbiology, and post-harvest biology.

Specific course requirements	17-23
Biological Sciences 1B	5
Chemistry 8A-8B or 118A-118B-118C	6-12
Microbiology 102, 102L	6

Selected additional courses.....10

Select courses from a master list available from the department Advising Center.

Food Chemistry Option

The Food Chemistry option prepares students for graduate study and research in such areas as flavor chemistry, food additive chemistry, biotechnology, biochemistry and toxicology. This option is for students interested in research and development careers with food companies or government laboratories, in teaching and research at academic institutions, or in professional (medical, veterinary, or dental) school.

Specific course requirements.....20-21

Chemistry 118A-118B-118C or 128A-128B-128C, 129A 11-12
Chemistry 107A-107B, 124A 9

Selected additional courses.....10

Select courses from a master list available from the department Advising Center.

Unrestricted Electives5-24**Total Units for the Degree180**

Major Adviser. E. Bandman (*Food Science and Technology*).

Advising Center for the major is located in 111 Cruess Hall (530-752-1468).

Graduate Study. A program of study and research leading to the M.S. and Ph.D. degrees in Food Science is available (see below). For further information on graduate study, contact the graduate adviser.

Food Science (A Graduate Group)

David M. Ogrzydzak, Ph.D., Chairperson of the Group

Group Office, 111 Cruess Hall (530-752-1466);
Fax: 530-752-4759)

Faculty. Includes members from twelve departments in the Colleges of Agricultural and Environmental Sciences and Engineering, and the Schools of Medicine and Veterinary Medicine.

Graduate Study. The interdepartmental Graduate Group in Food Science offers programs of study leading to the M.S. degree and to the Ph.D. degree. Graduate studies stress the application of the biological, chemical, physical, and behavioral sciences to the processing, preservation, quality evaluation, public health aspects, and utilization of foods. For the M.S. degree, there are five areas of specialization: chemistry-biochemistry, microbiology, engineering-technology, sensory science, and enology. Individually designed programs are also acceptable. For the Ph.D., there are four areas of emphasis: biochemistry, chemistry, microbiology/fermentation, and sensory science. Detailed information regarding graduate study is available through the Group Chairperson or the Group Office.

Graduate Advisers. Contact the Food Science Graduate Group Office at kjhunter@ucdavis.edu.

Major Program and Graduate Study. See the majors in Food Science, Food Biochemistry, and Fermentation Science; and for graduate study, refer to the Graduate Studies chapter of this catalog.

Related Courses. See courses in Consumer Science, Engineering, Molecular and Cellular Biology, Nutrition, and Viticulture and Enology; Environmental Toxicology 101, Population Health and Reproduction 150, Plant Biology 172 and 172L.

Courses in Food Science and Technology (FST)

Lower Division Courses**1. Principles of Food Science (3)**

Lecture—2 hours; discussion—1 hour. Food science fundamentals. Fresh and processed food technologies; world food problems; food composition; food microbiological and toxicological safety; food laws; evaluation of acceptability and nutritional value. Not open for credit to students who have completed any

Food Science and Technology course except course 10.—II. (II.) Bandman

3. Introduction to Brewing and Beer (3)

Lecture—3 hours. Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. GE credit: SciEng.—I. (I.) Bamforth

10. Food Science, Folklore and Health (3)

Lecture—3 hours. Ancient and modern food folklore in relation to health and well-being. Food safety, organic food, herbalism, food preservation, and nutritional enhancement. Not open for credit to students who have completed course 2. GE credit: SciEng or SocSci.—I, III. (I, III.) Russell

47. Food Product Development Field Study (1)

Discussion—6 hours; fieldwork—2 days (course given between winter and spring quarters). Prerequisite: advance enrollment required in winter quarter with instructor; background knowledge in foods from such courses as Food Science and Technology 1. Commercial aspects of the large-scale development, distribution, and evaluation of food products intended for human consumption. (Former course Consumer Science 47.) (P/NP grading only.)—III. (III.) Shoemaker

50. Introduction to Food Preservation (5)

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: Chemistry 2A, Biological Sciences 1A. Processes used for preservation of food quality as applied to fruit, vegetable, cereal, dairy, seafood, and meat commodity groups. Laboratory exercises include canning, refrigeration, freezing, fermentation and dehydration preservation operations.—III. (III.) Krochta

99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

Upper Division Courses**100A. Food Chemistry (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B; Biological Sciences 1A recommended. Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water.—I. (I.) Dungan

100B. Food Properties (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A or consent of instructor. Sensory quality, chemical and microbial safety, and nutritional properties of foods. Effects of food processing and preparation on these properties. Selected properties of food commodities.—II. (II.) Guinard

101A. Food Chemistry Laboratory (2)

Lecture/laboratory—1 hour/3 hours. Prerequisite: course 100A (may be taken concurrently). Chemical aspects of food composition described in course 100A.—I. (I.) Reid

101B. Food Properties Laboratory (2)

Lecture/laboratory—1 hour/3 hours. Prerequisite: course 100B (may be taken concurrently). Study of properties of food described in course 100B.—II. (II.) Russell

102A. Malting and Brewing Science (4)

Lecture—4 hours. Prerequisite: Biological Sciences 102, 103; senior standing recommended. The technology of the malting, brewing and fermentation processes is integrated with the chemistry, biochemistry and microbiology that determine industrial practices and product quality. Not open for credit to students who have taken course 102.—II. (II.) Bamforth

102B. Practical Malting and Brewing (4)

Lecture/discussion—2 hours; laboratory—6 hours. Prerequisite: course 102A and analytical experience beyond Chemistry 2C, such as Viticulture and Enology 123, Food Science and Technology 103, 123L, Molecular and Cellular Biology 120L. Open to seniors only in Fermentation Science or Food Science and Technology. Provides practical working knowledge of analytical methods used in malting and brewing and experience with brewing materials

and processes, by analysis of samples that illustrate the range of values experienced in practice and pilot scale brewing.—III. (III.) Bamforth

103. Physical and Chemical Methods for Food Analysis (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hour. Prerequisite: Chemistry 2C, 8B, Biological Sciences or Animal Biology 102 (may be taken concurrently), courses 100A, 101A (may be taken concurrently). Theory and application of physical and chemical methods for determining the constituents of foods. Modern separation and instrumental analysis techniques are stressed.—I. (I.) Mitchell

104. Food Microbiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 102. Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry.—II. (II.) C. Price

104L. Food Microbiology Laboratory (4)

Lecture—1 hour; discussion—1 hour; laboratory—6 hours. Prerequisite: Biological Sciences 1A, course 104. Cultural and morphological characteristics of microorganisms involved in food spoilage, in food-borne disease, and food fermentation. Analysis of microbiological quality of foods.—II, III. (II, III.) Ogrzydzak, Young

107. Food Sensory Science (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Agricultural Systems and Environment 120 or course 117 (may be taken concurrently). Critical examination of techniques and theories of sensory measurement of food; measures of consumer perception and acceptance. An introduction to the sensory and cognitive systems associated with the perception of food. Not open for credit to students who have completed course 107A.—I. O'Mahoney

108. Food Processing Plant Sanitation (3)

Lecture—3 hours. Prerequisite: Chemistry 8B, Biological Sciences 1A. Discussion of factors relating to sanitary control of food processing including water treatment, chemical and physical sanitizing agents, principles of cleaning and hard surface detergency, metal corrosion, concepts in the disposal of wastes and the pertinence of government control agencies.—I. (I.)

109. Principles of Quality Assurance in Food Processing (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Statistics 13 or Agricultural Systems and Environment 120. Quality assurance measurement techniques applied to selected food processed products emphasized. Rationale for establishing valid quality assurance programs including selection of samples at critical points. Statistical problems in quality assurance programs used by the food industry.—III. (III.) K. McCarthy

110A. Physical Principles in Food Processing (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: Physics 5A and 5B or 7A-7B-7C or the equivalent; calculus recommended. Not open for credit to students enrolled in College of Engineering. Applications of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, and problem solving.—I. (I.) M. McCarthy

110B. Heat and Mass Transfer in Food Processing (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: course 110A or the equivalent; Applied Biological Systems Technology 110L recommended (may be taken concurrently). Rate processes: conduction, convection, and radiation heat transfer; microwave heating, refrigeration, freezing, psychrometrics; mass transfer during drying and storage.—II. (II.) Singh

117. Design and Analysis for Sensory Food Science (3)

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Statistics 13 or consent of instructor. Methods of design and analysis for sensory food sci-

ence. Relative merits and limitations of parametric and nonparametric approaches. Use of human judges. Data analysis and computation. Modifications for quality assurance.—I. (I.) O'Mahoney

119. Chemistry and Technology of Milk and Dairy Products (4)

Lecture—4 hours; demonstrations and a field trip. Prerequisite: Biological Sciences 1A and 102, or consent of instructor. Composition, structure and properties of milk and products derived from milk. Relates chemical, microbiological, and technological principles to commercial practices in processing of milk and its products.—III. Rosenberg

120. Principles of Meat Science (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A. Anatomical, physiological, developmental and biochemical aspects of muscle underlying the conversion of muscle to meat. Includes meat processing, preservation, microbiology and public health issues associated with meat products. (Same course as Animal Science 120.) GE credit: SciEng.—III. (III.) Brandman, Lee

120L. Meat Science Laboratory (2)

Discussion—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1A; course 120 (may be taken concurrently). Laboratory exercises and student participation in transformation of live animal to carcass and meat, structural and biochemical changes related to meat quality, chemical and sensory evaluation of meat, and field trips to packing plant and processing plants. (Same course as Animal Science 120L.)—III. (III.) Lee

121. Principles of Poultry Product Technology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103 (may be taken concurrently). Quality, preservation, and processing of avian products. Topics include quality control, nutrition, chemistry, biochemistry, microbiology, and functional properties.—I. (I.) King

123. Introduction to Enzymology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103. Principles of physical, chemical and catalytic properties of enzymes and their importance. Purification, characterization, and quantitative evaluation of reaction conditions on activity are stressed. Specificity and mechanism of action illustrated by use of selected enzymes. (Former course Biochemistry and Biophysics 123.)—III. (III.) G. Smith

123L. Enzymology Laboratory (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 103, course 123 (concurrently). Laboratory procedures involved in detection, purification and characterization of enzymes. (Former course Biochemistry and Biophysics 123L.)—III. (III.) G. Smith

127. Sensory Evaluation of Foods (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Agricultural Systems and Environment 120 or course 117. A critical examination of methods of sensory measurement applied to food and beverage systems; descriptive analysis and consumer tests and their application to quality assurance, product development and optimization.—II. (II.) Guinard

128. Food Toxicology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as Environmental Toxicology 128.) GE credit: SciEng.—III. (III.) Mitchell, Shibamoto

131. Food Packaging (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, Biological Sciences 1A, Physics 7C. Principles of food packaging. Functions of packaging. Properties of metal, glass, paper and plastic materials and packages. Design, fabrication, and applications of food packaging. Packaging of fresh and processed foods, including fruits and vegetables, dairy foods, beer and wine.—I. (I.) Krochta

159. New Food Product Ideas (2)

Lecture/discussion—2 hours. Prerequisite: upper division standing with background course work in

food science (course 50 or 100A), biological sciences (Biological Sciences 1A, 1B, 1C), or the physical sciences (Physics 5A, 5B, 5C or Chemistry 2A, 2B, 2C). Course will familiarize students with initial stages of food product development, including definition and articulation of a problem, generation of ideas to solve the problem, screening of ideas, and the formal presentation of a new product concept.—I. Haard

160. Food Product Development (4)

Lecture—1 hour; discussion—1 hour; laboratory—6 hours. Prerequisite: upper division standing with background course work in food science (course 50 or 100A), biological sciences (Biological Sciences 1A, 1B, 1C), or the physical sciences (Physics 5A, 5B, 5C or Chemistry 2A, 2B, 2C). Product implementation stage of food product development including preliminary product description, prototype development, product testing, and formal presentation of a new product development.—II. (II.) Shoemaker

190. Senior Seminar (1)

Seminar—1 hour. Prerequisite: senior standing or consent of instructor. Selected topics presented by students on recent advances in food science and technology. Reports and discussions concerning oral and written presentations, literature sources and career opportunities.—I. (I.) Shoemaker

192. Internship for Advanced Undergraduates (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in the practical application of food science.(P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

201. Food Chemistry and Biochemistry (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103. Topics on enzymes, proteins, pigments, lipids, and vitamins. Biochemical principles and methods related to food composition, preservation, and processing. Research proposals and group problem solving.—I. (I.) Shoemaker, Frankel

202. Chemical and Physical Changes in Food (4)

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 103; Chemistry 107B. Fundamental principles of chemistry and physics are applied to a study of changes in water binding properties and activity, changes in proteins, nutrients, toxic constituents, and other compounds during storage, heating, freezing, dehydrating, and concentrating of food materials.

203. Food Processing (3)

Lecture—3 hours. Prerequisite: course 110A, Physics 5C or 7C, Chemistry 107B, and one undergraduate food processing course. Principles of food engineering applied to food processing. Relationship of Newtonian and non-Newtonian fluid properties to heat and momentum transfer. Application of mass transfer in controlling kinetics and quality changes of foods.—II. (II.) K. McCarthy, M. McCarthy

204. Advanced Food Microbiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C, 103, course 104 or a course in microbiology. Principles of and recent developments in food microbiology, including food pathogen virulence and detection, parameters of microbial growth in food, and the microbiology of food and beverage fermentations.—III. (III.) Price, Ogrzydzak

205. Industrial Microbiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 102, 103; Microbiology 130A-130B or Biological Sciences 101 recommended. Use of microorganisms for producing substances such as amino acids, peptides, enzymes, antibiotics and organic acids. Emphasis on metabolic regulation of pathways leading to fermentation products, on yeast fermentations,

and on genetic manipulations (including recombinant DNA techniques) of industrial microorganisms. Offered in alternate years.—III. Ogrydziak

207. Advanced Sensory-Instrumental Analyses (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 107 and consent of instructor. Basic principles of measurement of color, texture, and flavor of foods by sensory and instrumental methods. Advanced statistical analysis of relation of colorimetry, texturometry, and chemistry of volatile compounds to perception of appearance, texture, flavor. Offered in alternate years.

210. Proteins: Functional Activities and Interactions (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103. The relationships of structure of proteins to their biological functions. Structural proteins, complexing proteins, and catalytic proteins in plant and animal materials and products.—II. (II.) G. Smith

211. Lipids: Chemistry and Nutrition (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103, Chemistry 107B, 128B. Chemistry of lipids as it pertains to research in food and nutrition. Relations between lipid structure and their physical properties in tissues and foods. Regulation of absorption, transport, and metabolism of lipids. Implications of dietary fats and health.—II. (II.) German

217. Advanced Food Sensory Science (2)

Lecture—2 hours. Prerequisite: course 107A (may be taken concurrently). Advanced study of the techniques and theory of the sensory measurement of food as an analytical tool and as a measure of consumer perception and acceptance. Advanced examination of the sensory and cognitive systems associated with the perception of food.—I. (I.) O'Mahoney

227. Food Perception and the Chemical Senses (2)

Lecture—2 hours. Prerequisite: course 107B (may be taken concurrently), or consent of instructor. Examination of the anatomy and physiology of the chemical senses (taste, smell, and the trigeminal senses) and how they are involved in the perception of food and food intake.—II. (II.) Guinard

250. Chromatographic and Electrophoretic Methods (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 2A-2B-2C, 8A-8B, 107A-107B; Biological Sciences 102 and 103 or consent of instructor. Theory and practice of gas and liquid chromatography and electrophoresis for analytical and preparative applications. Choice and optimization of separation methods, detection systems and recovery of purified sample components.—III. (III.) German

250L. Chromatographic and Electrophoretic Methods Laboratory (1)

Laboratory—3 hours. Prerequisite: course 250 concurrently. Practice of gas and liquid chromatography and electrophoresis for analytical and preparative applications. Choice and optimization of separation methods, detection systems, and recovery of purified sample components.—III. (III.) German

290. Seminar (1)

Seminar—1 hour. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Ogrydziak, Shoemaker

290C. Advanced Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Critical presentation and evaluation of original research by graduate students. Planning of research programs and proposals. Discussion led by individual major instructors for their research group. (S/U grading only.)—I, II, III. (I, II, III.)

291. Advanced Food Science Seminar (1)

Seminar—1 hour. Prerequisite: completion of at least one quarter of course 290. Oral presentation of student's original research, discussion, and critical evaluation. (S/U grading only.)—III. (III.)

298. Group Study (1-5)

299. Research (1-12)

Prerequisite: graduate standing. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Food Service Management

(College of Agricultural and Environmental Sciences)

Faculty. See under the Department of Nutrition.

The Major Program and Graduate Study. Food Service Management is incorporated within the major of Clinical Nutrition. If you are interested in preparing for a career in commercial organizations such as hotels, restaurants, industrial cafeterias, or contract food services, as well as in public or private institutions such as hospitals, correctional institutions, schools, or colleges, consult the Department of Nutrition.

Related Courses. See Food Science and Technology, and Nutrition.

Courses in Food Service Management (FSM)

Questions pertaining to the following courses should be directed to the instructor or to the Nutrition Department Advising Office, 1202E Meyer Hall (530-752-2512).

Upper Division Courses

120. Principles of Quantity Food Production (3)

Lecture—3 hours. Prerequisite: Food Science and Technology 100B and 101B. Fundamental principles of food service management including quantity food preparation, institutional equipment, receiving and storage, service, menu planning, merchandising, and safety.—III. (III.)

120L. Quantity Food Production Laboratory (2)

Laboratory—6 hours. Prerequisite: course 120. Laboratory experience in quantity food production and service.—I. (I.)

122. Food Service Systems Management (3)

Lecture—3 hours. Prerequisite: Agricultural and Resource Economics 112, courses 120, 120L, 121. Principles of quantity food production management: production schedules, portion control, financial management, layout and equipment planning, evaluation of alternative systems, and computer applications.—II. (II.)

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: one upper division course in Food Service Management and consent of instructor. Work experience on or off campus in practical aspects of food service management, supervised by a faculty member. (P/NP grading only.)—Steinberg

197T. Tutoring in Food Service Management (1-2)

Discussion/laboratory—3 or 6 hours. Prerequisite: Dietetics or related major; completion of the Food Service Management course in which tutoring is done. Tutoring of students in food service management, assistance with discussion groups or laboratory sections; weekly conference with instructor in charge of course; written evaluations. May be repeated if tutoring a different course. (P/NP grading only.)—Steinberg

198. Directed Group Study (1-5)

(P/NP grading only.)—Steinberg

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)—Steinberg

Margo R. Kaufman, M.A., Senior Lecturer Emerita

Marshall Lindsay, Ph.D., Professor Emeritus

Ruth B. York, Ph.D., Senior Lecturer Emerita

The Major Program

The major program assures proficiency in all four of the language skills—speaking, understanding, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-speaking world through the study of its literature, traditions, and institutions.

The Program. The department encourages its students to work closely with the academic adviser in designing a major tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty. The department sponsors an active French Club and a chapter of Pi Delta Phi, the National French Honor Society. Each year, a substantial number of students with good preparation in French participate in the university's very popular Education Abroad Program, which maintains centers at seven French universities.

Career Alternatives. Foreign language teachers, a cardiologist, a veterinarian, a naval commander at the Pentagon, a professor of Political Science, lawyers, sales representatives, journalists, an anesthesiologist, a law professor, translators, a senior applications programmer, travel agents, independent business owners, a senior museum preparator, nurses, financial managers, stock brokers, and an industrial attaché for a French Trade Commission, all graduated with an A.B. in French from UC Davis and represent only a small fraction of the career choices documented in a recent survey of department graduates.

A.B. Major Requirements:

UNITS

Preparatory Subject Matter19-36

French 1, 2, 3 (or the equivalent)0-15

French 21, 22, 2317

Linguistics 1 or 44

Depth Subject Matter44

French 100, 101, 102, 103, 10420

Two additional upper division French literature courses8

Elective courses in French literature, language, or civilization to be chosen in consultation with undergraduate adviser...16

Total Units for the Major63-80

Recommended

French 101, 102, 103, 104, 107, and 160 plus other

upper division courses for a total of 45 units for stu-

dents interested in obtaining a "single subject" teaching credential in California.

Major Adviser. N. Guynn.

Minor Program Requirements:

UNITS

French24

French 1004

Two courses from French 101, 102 or 103...8

Three elective courses in French language,

literature, or civilization one of which

must be either French 107 or 10812

Honors Program. Candidates for high or highest honors in French must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in French 194H (3 units) and French 195H (3 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.5 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in French are in addition to the regular requirements for the major in French.

Teaching Credential Subject Representative. S. Clay. See also under the Teacher Education Program.

Graduate Study. The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in French. Candidates for the Ph.D. have the option of enriching their degree program by preparing a designated emphasis in Critical Theory, Feminist Theory and Research, Classics, or African American and African Studies. Detailed information may be obtained from the graduate advisers or the department chairperson.

Graduate Advisers. M.I. Manoliu (M.A., Ph.D. degrees—French Linguistics); M. Blanchard (M.A., Ph.D. degrees—French Literature).

Prerequisite Credit. Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

Courses in French (FRE)

Students offering high school language preparation as a prerequisite must take a placement test.

Course Placement. Students with two years of high school French normally take French 2, those with three years take French 3 and those with four years take French 21.

Lower Division Courses

1. Elementary French (5)

Lecture/discussion—5 hours; laboratory—1 hour. Students who have successfully completed French 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.—I, II, III. (I, II, III.)

1G. French for Graduate Students (5)

Lecture/discussion—5 hours. A course designed to prepare students for the graduate reading examination in French. (P/NP grading only.)—III. (III.)

2. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1.—I, II, III. (I, II, III.)

3. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Continuation of course 2.—I, II, III. (I, II, III.)

8. French Conversation (2)

Recitation—3 hours. Prerequisite: course 3 or the equivalent. Practice in initiating and maintaining conversation. Oral presentations, oral quizzes, and oral final exam. May be repeated once for credit. Not open to native speakers.—I, II, III. (I, II, III.)

21. Intermediate French (5)

Lecture/discussion—5 hours. Prerequisite: course 3. Grammar, oral practice, composition. Initiation to French institutions; reading and discussion of short literary texts.—I, II, III. (I, II, III.)

22. Intermediate French (5)

Lecture/discussion—5 hours. Prerequisite: course 21. Continuation of course 21. Grammar, oral practice, composition. Contemporary French culture; reading and discussion of a play.—I, II, III. (I, II, III.)

23. Intermediate French (5)

Lecture/discussion—5 hours. Prerequisite: course 22. Continuation of course 22. Grammar, oral practice, composition. Current topics in French politics and culture; reading and discussion of a novel.—I, II, III. (I, II, III.)

38. Intermediate French Conversation (2)

Recitation—3 hours. Prerequisite: course 8 or the equivalent. Continued practice in initiating and maintaining conversation. Oral presentations, oral quizzes, and oral final exam. May be repeated once for credit. Not open to native speakers.—I, II, III. (I, II, III.)

50. French Film (4)

Lecture—1 hour; discussion—2 hours; term paper. Introduction to the tradition of French cinema from its invention by Méliès and the Lumière brothers through New Wave (especially the works of Truffaut and Godard) and more recent developments in French and Francophone film. Taught in English. Offered in alternate years. GE credit: ArtHum, Wrt.—(I, II, III.) Van Den Abbeele

51. Major Works of French Literature in Translation (4)

Lecture—2 hours; discussion—1 hour; term paper. Readings in English translation of key works of French and Francophone literature from the Middle Ages to the present. Particular attention is given to the long-standing interest of French writers in issues of social, regional, gender, sexual, and ethnic identity. GE credit: ArtHum, Div, Wrt.—II. (II.) Van Den Abbeele

52. France and the French-Speaking World (4)

Lecture—2 hours; discussion—1 hour; term paper. Taught in English. A survey of the history and culture of France and the French-speaking world, especially Canada, the Caribbean and Africa. Study of social, historical and cultural issues that occupy the French-speaking world, with particular attention to mass media. GE credit: ArtHum, Div, Wrt.—III. (III.) Van Den Abbeele

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

100. Composition in French (4)

Lecture—3 hours; term paper. Prerequisite: course 23; course 20 strongly recommended. Instruction and practice in expository writing in French, with emphasis on organization, correct syntax, and vocabulary building.—I, II, III. (I, II, III.) Clay

101. Introduction to French Poetry (4)

Lecture—3 hours; short papers. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of works representing the main types of French poetry. Study of French poetic conventions and versification. GE credit: ArtHum.—I. (I.) Blanchard

102. Introduction to French Drama (4)

Lecture—3 hours; short papers. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of plays representing the main types of French drama, with emphasis on dramatic structure and techniques. GE credit: ArtHum.—II. (II.) Guynn

103. Introduction to French Prose (4)

Lecture—3 hours; short papers. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of works representing main types of French prose, with emphasis on narrative structure and techniques. GE credit: ArtHum.—III. (III.) Kusch

104. Translation (4)

Lecture—3 hours; numerous short in-class translations; frequent supplementary outside reading. Prerequisite: course 100 or the equivalent. Practice in English-to-French translation using a variety of non-literary materials, illustrating different problems and styles. Not open to students who have spent an academic year as an EAP student in a Francophone country or who have completed course 138.—I, II. (I, II.) Clay

106. French in Business and the Professions (4)

Lecture—1 hour; discussion—2 hours; frequent written assignments. Prerequisite: course 100 or consent of instructor. The French language as used in the commercial sphere. Emphasis on proper style and form in letter-writing, and in non-literary composition. Technical terminology in such diverse fields as government and world business.—I. (I.) Clay

107. The Making of Modern France (4)

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Introduction to French culture through a historical approach to topics such as the citizen and the state (politics, justice, social security), the nation and centralization, the rise of public education, colonization, class and social relationships. Offered in alternate years. GE credit: ArtHum.—(I.) Constable

108. Topics in Contemporary French Culture (4)

Lecture—3 hours; extensive writing. Prerequisite: course 100 or consent of instructor. Contemporary French culture through specific topics such as women and French culture, decolonization and modernization, the politics of education, immigration in France, Francophone cultures. May be repeated once for credit when topic differs. Offered in alternate years. GE Credit: ArtHum.—(II.) Praeger

110. Stylistics and Creative Composition (4)

Lecture—3 hours; frequent papers. Prerequisite: course 100 or consent of instructor. Intensive course in creative composition using a variety of techniques and literary styles, patterned on Queneau's *Exercices de style*. Practice in such stylistic modifications as inversion, antithesis, changes in tense, mood, tonality, etc. The writing of poetry.—II. (II.) Manoliu

115. Medieval French Literature and Society (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. The social and cultural life of medieval France as studied through its representation in such literary works as *La Chanson de Roland*, courtly love lyric, the Arthurian romances of Chrétien de Troyes, *Aucassin et Nicolette*, selected fabliaux and farces. Offered in alternate years. GE credit: ArtHum.—I. Guynn

116. The French Renaissance (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Overview of major works and writers with particular attention to the historical context of the turbulent 16th century. Writers to be read may include Rabelais, Marot, Ronsard, Du Bellay, Labé, Marguerite de Navarre, Montaigne, and D'Aubigné. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(III.) Van Den Abbeele

117A. Baroque and Preclassicism (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. The literature and intellectual culture of the period between the Renaissance and French classicism. Offered in alternate years. GE credit: ArtHum.—(II.) Van Den Abbeele

117B. The Classical Moment (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Literature, culture, and politics in the "Age of Louis XIV." May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(III.) Van Den Abbeele

118A. The Age of Reason and Revolution (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Literature and philosophy of the French Enlightenment. Readings from

such authors as Bayle, Fontenelle, Montesquieu, Voltaire, Rousseau and Diderot. Offered in alternate years. GE credit: ArtHum.—(II.) Kusch

118B. Private Lives and Public Secrets: The Early French Novel (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 103. History of the French *roman* from the Middle Ages to the Revolution with particular emphasis on the novels of the 18th century. Offered in alternate years. GE credit: ArtHum.—II. Kusch

119A. The Romantic Imaginary (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Major concepts and themes of French Romanticism, such as dream and the supernatural, impossible love, exoticism, revolution, individualism, nature, the *mal du siècle*, Romantic irony, the creative imagination, the cult of ruin. Offered in alternate years. GE credit: ArtHum.—II. Constable

119B. Realism, History and the Novel (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Investigation of the narrative and historical codes of French realist fiction, with emphasis on the representation of history in the realist novel, its depiction of social "realities" such as class and gender, and its relation to the historical situation of post-revolutionary society. Offered in alternate years. GE credit: ArtHum.—(III.) Constable

119C. From Baudelaire to Surrealism (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101. Study of the main poets and poetic movements from the mid-19th to the early 20th century, including Baudelaire, the Symbolists, and the Surrealists. Offered in alternate years. GE credit: ArtHum.—(I.) Constable

120. Modern French Thought (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Overview of post-Second World War French intellectual currents from existentialism to structuralism and deconstructionism. Readings will include Sartre and de Beauvoir, Camus, Lévi-Strauss, Lacan, Barthes, Foucault, Derrida, Kristeva, Sollers, Cixous, and Irigaray. Offered in alternate years. GE credit: ArtHum.—(I.) Blanchard

121. Twentieth Century French Novel (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 103. Novels and theories of the novel, from Proust to the Nouveau Roman and beyond. Readings from among Gide, Sartre, de Beauvoir, Camus, Breton, Beckett, Robbe-Grillet, Sarraute, Simon, Barthes, Duras, Tournier, Perec, Modiano, Guibert, Toussaint. Offered in alternate years. GE credit: ArtHum.—(II.) Praeger

124. Post-Colonialist and Francophone Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Introduction to Post-Independence Black African and/or Caribbean and/or North African literatures written in French. Selected topics include: identity and subjectivity, the role of the intellectual, women's voices, languages and oral literatures, cultural syncretism, theories of post-colonialism. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div.—(III.) Adejunmobi

125. French Literature and Other Arts (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. The relationship between French literature and other arts—painting, music, cinema, architecture, opera—from different periods. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—II. Guynn

127. Paris: Modernity and Metropolitan Culture (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Study of the representation of Paris in 19th and 20th century texts and its importance in defining the experience and art of modernity. Offered in alternate years. GE credit: ArtHum.—(III.) Constable

130. From Page to Stage: Theatre and Theatricality (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 102. French theater as literature and performance. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—I. Guynn

133. Gender and Politics in French Literature and Culture (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Examination of the thematic, theoretical and political tendencies in contemporary French fiction. Barthes, Foucault, Duras, Guibert, considered in terms of their writing on identity and gender. Offered in alternate years. GE credit: ArtHum, Div.—I. Praeger

140. Study of a Major Writer (4)

Lecture—3 hours; term paper. Prerequisite: course 100 and course 101, 102, or 103 as appropriate to selected topic, or consent of instructor. Concentrated study of works of a single author. May be repeated once for credit as author-subject changes.—II. (II.)

141. Selected Topics in French Literature (4)

Lecture—3 hours; term paper or short papers. Prerequisite: courses 100 and 101 or 102 or 103 as appropriate to the selected topic or consent of instructor. Subjects and themes such as satiric and didactic poetry of the Middle Ages, poetry of the *Pléiade*, theater in the eighteenth century, pre-romantic poetry, etc. May be repeated twice for credit when topic differs.—II. (II.)

160. Topics in French Morphosemantics (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 and Linguistics 1. Analysis of controversial grammatical phenomena with emphasis on the semantic content and the pragmatic function of such categories as tense, mood and gender. Offered in alternate years.—III. Manilou

161. Modern French Syntax (4)

Lecture—3 hours; short papers. Prerequisite: course 160. Presentation of basic concepts of contemporary approaches to French syntax. Consideration of new explanations of so-called "irregular" phenomena in current language models.—III. (III.) Manilou

162. History of French Language (4)

Lecture—3 hours; term paper. Prerequisite: course 160. Main periods in development of the French language, from Latin to contemporary popular aspects, with emphasis on relationship between socio-cultural patterns and evolution of the language. GE credit: ArtHum.—II. (II.) Manilou

192. Internship (1-12)

Internship—3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Practical application of the French language through work experience in government and/or business, culminating in an analytical term paper on a topic approved by the sponsoring instructor. (P/NP grading only.)

194H. Special Study for Honors Students (4)

Independent study—4 hours. Prerequisite: open only to French majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in French literature, civilization, or language studies. (P/NP grading only.)

195H. Honors Thesis (4)

Independent study—4 hours. Prerequisite: course 194H. Writing of an honors thesis on a topic in French literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.)—I, II, III. (I, II, III.)

197T. Tutoring in French (1-4)

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of Chairperson. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

197TC. Tutoring in the Community (2-4)

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of Chair-

person. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

200. Literary Analysis (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing. Basic principles of applied literary theory. Concepts and methods of the critical analysis of literature and literary texts. Basic principles of bibliographic research will be covered at the beginning of the course.—I. (I.)

201. History of French: Phonology and Morphosyntax (4)

Seminar—3 hours; term paper. Prerequisite: courses 159, 160, 250A, or consent of instructor. Presentation of the main changes in the phonematic and grammatical structures of French, from Latin to contemporary spoken aspects.—III. (III.) Manilou

204. Topics in Medieval Literature (4)

Seminar—3 hours; term paper. Study of Medieval French literature, focusing on a particular period, milieu, literary movement, genre, or theoretical approach. May be repeated for credit when topic differs.—I. (I.) Van Den Abbeele

205A. Sixteenth-Century Literature: The Humanists (4)

Seminar—3 hours. French humanism in its most varied forms. Although at different times Rabelais and Montaigne will be primarily studied, other leading intellectuals and religious writers will also receive attention. May be repeated for credit when different topic is studied.—I. (I.) Van Den Abbeele

206A. Seventeenth-Century Literature: Theater (4)

Seminar—3 hours. Works of Corneille, Racine, Molière, and minor dramatists. One or more authors may be covered. May be repeated for credit with consent of instructor when different topics are studied.—II. (II.) Van Den Abbeele

206B. Seventeenth-Century Literature: Prose (4)

Seminar—3 hours; term paper and/or exposé. Works of authors such as Pascal, Descartes, Mme de Lafayette. One or more authors may be covered. May be repeated for credit with consent of instructor as different topics are studied from quarter to quarter.—I. (I.) Van Den Abbeele

206C. Seventeenth-Century Literature: Poetry (4)

Seminar—3 hours; term paper and/or exposé. Studies of the works of one or more poets of the period. May be repeated for credit with consent of instructor.—III. (III.) Van Den Abbeele

207A. Eighteenth-Century Literature: Philosophies (4)

Seminar—3 hours; term paper and/or exposé. Not a course in philosophy, but an examination of the role of philosophy in the design and context of literary works. Study of one or more authors. May be repeated for credit.—II. (II.) Kusch

207B. Eighteenth-Century Literature: Novel (4)

Seminar—3 hours. Rise of the novel. Study of narrative experiments in the context of the philosophical climate and new literary values. Course may treat one or more novelists of the period. May be repeated for credit when different topics are studied.—III. (III.) Kusch

208A. Nineteenth-Century Literature: Fiction (4)

Seminar—3 hours. Study of the works of one or several novelists and/or short-story writers of the period. May be repeated for credit with consent of instructor when different topics are studied.—I. (I.) Constable

208B. Nineteenth-Century Literature: Poetry (4)

Seminar—3 hours. Study of the works of one or several poets of the period. May be repeated for credit

with consent of instructor when different topics are studied.—III. (III.) Constable

209A. Twentieth-Century: Prose (4)

Seminar—3 hours; term paper and/or exposé. Study of the works of one or several writers of the period.—II. (II.) Praeger

209B. Twentieth-Century: Theater (4)

Seminar—3 hours; term paper and/or exposé. Study of the works of one or several dramatists of the period. May be repeated for credit with consent of instructor.—II. (II.)

209C. Twentieth-Century: Poetry (4)

Seminar—3 hours; term paper and/or exposé. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor.—III. (III.) Blanchard

210. Studies in Narrative Fiction (4)

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—I. (I.) Praeger

211. Studies in Criticism (4)

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—II. (II.) Blanchard

212. Studies in the Theater (4)

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—I. (I.)

213. Studies in Poetry (4)

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—II. (II.)

214. Study of a Literary Movement (4)

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—III. (III.)

250A. French Linguistics: Morphematics (4)

Seminar—4 hours. Prerequisite: courses 159, 160, or consent of instructor. Theoretical approach to French grammar, with emphasis on morphematics, i.e., a semantic analysis of grammatical categories, as well as of their paradigmatic and syntactic relations.—I. (I.) Manoliu

250B. French Linguistics: Transformational Syntax (4)

Seminar—4 hours. Prerequisite: course 250A or consent of instructor. Presentation of French syntax exemplified by a core of transformational rules (such as subjectivization, passivization, relativization) focusing on the most recent developments in the field (i.e., case grammars, generative semantics, trace theory).—I. (I.) Manoliu

251. Trends in French Contemporary Linguistics (4)

Seminar—3 hours; term paper. Prerequisite: course 250A or 250B or consent of instructor. Issues in contemporary French linguistic thought and their relationship to the development of theoretical linguistics. Topics such as pragmatics, semantics, symbolic logic, speech acts, etc. Intended for students in French linguistics or those interested in applying linguistic models to literature. May be repeated once for credit with consent of instructor when topic differs.—I. (I.) Manoliu

261. Current Issues in Modern French Syntax (4)

Seminar—3 hours; term paper. Prerequisite: course 161. Presentation of contemporary approaches to French syntax. Explanations of various less regular phenomena, with reference to on-going changes in modern spoken French. May be repeated for credit with consent of instructor when topic differs. Offered in alternate years. —II. Manoliu

297. Individual Study (1-5)

(S/U grading only.)

298. Group Study (1-5)

Seminar—1-5 hours. May be repeated for credit with consent of instructor.

299. Research (1-12)

(S/U grading only.)

299D. Dissertation Research (1-12)

(S/U grading only.)

Professional Courses

300. Teaching of a Modern Foreign Language (3)

Lecture/discussion—3 hours. Prerequisite: senior or graduate standing; a major or minor in a modern foreign language.—III. (III.)

390A. The Teaching of French in College (2)

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. May be repeated for credit with consent of instructor. (S/U grading only.)—I. (I.) Wagnild

390B. The Teaching of French in College (2)

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)—II. (II.) Wagnild

390C. The Teaching of French in College (2)

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)—II. (II.) Wagnild

390D. Teaching Intermediate French (2)

Lecture/discussion—2 hours. Prerequisite: course 390A, 390B, 390C. Focus on how to teach intermediate French grammar, literature, and composition. (S/U grading only.)—I. (I.) Clay

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Freshman Seminar Program

Aram Yengoyan, Program Director
Program Office, 17 Wellman (Teaching Resources Center) (530-752-6050)

World Wide Web: <http://trc.ucdavis.edu/TRC>

Committee in Charge

James Baughn, Ph.D. (*College of Engineering*)
John Boe (*College of Letters and Science*)
Connie Bowe, M.D. (*School of Medicine*)
William Hornof, D.V.M., Ph.D. (*School of Veterinary Medicine*)
Annie King, Ph.D. (*College of Agricultural and Environmental Sciences*)
Will Davis, Ph.D. (*Teaching Resources Center*)

Course in Freshman Seminar (FRS)

(Questions pertaining to the following course should be directed to the instructor or to the Teaching Resources Center.)

Lower Division Course

1A-Z. Freshman Seminar (2)

Seminar—2 hours. Prerequisite: open only to students who have completed fewer than 45 quarter units. Investigation of a special topic (A-Z) through shared readings, discussions, written assignments, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis upon student participation in learning.—I, II, III. (I, II, III.)

Fungal Biology and Ecology

(College of Agricultural and Environmental Sciences)
The minor in Fungal Biology and Ecology is open to all students interested in a concentrated exposure to and knowledge of the fungi and allied organisms.

The minor is sponsored by the Plant Pathology Department.

Minor Program Requirements

UNITS

Fungal Biology and Ecology.....18-20

Plant Pathology 130, 148, 15011
Select 7-9 units from Food Science and Technology 104, Medical Microbiology and Immunology 130, Plant Biology 146, Plant Pathology 40, 135, 151, Science and Society 30, Soil Science 111, 112; Plant Pathology 224 (available to advanced students with consent of instructor).....7-9

Minor Adviser: J. D. MacDonald.

Genetics

Faculty

Steffen Abel, Ph.D., Assistant Professor (*Vegetable Crops*)
David Begun, Ph.D., Assistant Professor (*Evolution and Ecology*)
Alan B. Bennett, Ph.D., Professor (*Vegetable Crops*)
Linda F. Bisson, Ph.D., Professor (*Viticulture and Enology*)
John Bowman, Ph.D., Assistant Professor (*Plant Biology*)
Anne Bagg Britt, Ph.D., Associate Professor (*Plant Biology*)
Sean Burgess, Ph.D., Assistant Professor (*Molecular and Cellular Biology*)
Kenneth C. Burtis, Ph.D., Associate Professor (*Molecular and Cellular Biology*)
Judy Callis, Ph.D., Professor (*Molecular and Cellular Biology*)
Roger Chetelat, Ph.D., Geneticist (*Vegetable Crops*)
Douglas Cook, Ph.D., Professor (*Plant Pathology*)
Gino A. Cortopassi, Ph.D., Associate Professor (*Molecular Biosciences*)
Michael E. Dahmus, Ph.D., Professor (*Molecular and Cellular Biology*)
Abhaya Dandekar, Ph.D., Professor (*Pomology*)
Mary Delany, Ph.D., Associate Professor (*Animal Science*)
Jorge Dubcovsky, Ph.D., Associate Professor (*Agronomy and Range Science*)
Jan Dvorak, Ph.D., Professor (*Agronomy and Range Science*)

Bryce W. Falk, Ph.D., Professor (*Plant Pathology*)
 Thomas R. Famula, Ph.D., Professor (*Animal Science*)
 Charles S. Gasser, Ph.D., Professor (*Molecular and Cellular Biology*)
 Paul Gepts, Ph.D., Professor (*Agronomy and Range Science*)
 Robert L. Gilbertson, Ph.D., Professor (*Plant Pathology*)
 David G. Gilchrist, Ph.D., Professor (*CEPRAP*)
 Thomas Gradziel, Ph.D., Associate Professor (*Pomology*)
 Paul H. Gumerlock, Ph.D., Assistant Professor (*Hematology and Oncology*)
 John H. Harada, Ph.D., Professor (*Plant Biology*)
 James A. Harding, Ph.D., Professor (*Environmental Horticulture*)
 R. Scott Hawley, Ph.D., Professor (*Molecular and Cellular Biology*)
 Dennis Hedgecock, Ph.D., Geneticist (*Bodega Marine Laboratory*)
 Wolf-Dietrich Heyer, Ph.D., Professor (*Microbiology*)
 Michael J. Holland, Ph.D., Professor (*Biological Chemistry*)
 Clarence I. Kado, Ph.D., Professor (*Plant Pathology*)
 Ken Kaplan, Ph.D., Assistant Professor (*Molecular and Cellular Biology*)
 Daniel Kliebenstein, Ph.D., Assistant Professor (*Vegetable Crops*)
 Stephen C. Kowalczykowski, Ph.D., Professor (*Microbiology*)
 Hsing-Jien Kung, Ph.D., Professor (*Biological Chemistry*)
 Charles Langley, Ph.D., Professor (*Center for Population Biology*)
 Janine LaSalle, Ph.D., Assistant Professor (*Microbiology and Immunology*)
 Tom Ledig, Ph.D., Lecturer (*Environmental Horticulture*)
 Hongzhe Li, Ph.D., Assistant Professor (*Biological Chemistry*)
 William Lucas, Ph.D., Professor (*Plant Biology*)
 Leslie A. Lyons, Ph.D., Assistant Professor (*Population Health and Reproduction*)
 David J. Mackill, Ph.D., Research Geneticist (*Agronomy and Range Science*)
 Marta Marthas, Ph.D., Associate Adjunct Professor (*Primate Center*)
 Bernie May, Ph.D., Professor (*Animal Science*)
 Gale McGranahan, Ph.D., Pomologist (*Pomology*)
 Juan F. Medrano, Ph.D., Professor (*Animal Science*)
 Carole Meredith, Ph.D., Professor (*Viticulture and Enology*)
 Danika Metallinos-Bannasch, Ph.D. (*Population Health and Reproduction*)
 Frederick J. Meyers, Ph.D., Professor (*Hematology and Oncology*)
 Richard Michelmore, Ph.D., Professor (*Vegetable Crops*)
 Maria Mudryj, Ph.D., Assistant Professor (*Microbiology and Immunology*)
 James D. Murray, Ph.D., Professor (*Animal Science*)
 Jeanette E. Natzle, Ph.D., Associate Professor (*Molecular and Cellular Biology*)
 David Neale, Ph.D., Lecturer (*Environmental Horticulture*)
 Sergey Nuzhdin, Ph.D., Associate Professor (*Evolution and Ecology*)
 Anita M. Oberbauer, Ph.D., Associate Professor (*Animal Science*)
 Dan E. Parfitt, Ph.D., Pomologist (*Pomology*)
 Martin L. Privalsky, Ph.D., Professor (*Microbiology*)
 Carlos F. Quiros, Ph.D., Professor (*Vegetable Crops*)
 Kathryn L. Radke, Ph.D., Associate Professor (*Animal Science*)
 Raymond L. Rodriguez, Ph.D., Professor (*Molecular and Cellular Biology*)
 Pamela C. Ronald, Ph.D., Associate Professor (*Plant Pathology*)
 Leslie Rose, Ph.D., Assistant Professor (*Molecular and Cellular Biology*)
 Mark Sanders, Ph.D., Lecturer (*Molecular and Cellular Biology*)
 Earl Sawai, Ph.D., Assistant Adjunct Professor (*Pathology*)

Carl W. Schmid, Ph.D., Professor (*Molecular and Cellular Biology*)
 Michael F. Seldin, Ph.D., Professor (*Biological Chemistry*)
 Douglas Shaw, Ph.D., Professor (*Pomology*)
 Mitchell Singer, Ph.D., Associate Professor (*Microbiology*)
 Neelima Sinha, Ph.D., Associate Professor (*Plant Biology*)
 David G. Smith, Ph.D., Professor (*Anthropology*)
 Dina St. Clair, Ph.D., Associate Professor (*Vegetable Crops*)
 Valley J. Stewart, Ph.D., Professor (*Microbiology*)
 Michael Syvanen, Ph.D., Professor (*Microbiology and Immunology*)
 Larry R. Teuber, Ph.D., Professor (*Agronomy and Range Science*)
 M. Andrew Walker, Ph.D., Associate Professor (*Viticulture and Enology*)
 Craig H. Warden, Ph.D., Associate Professor (*Rowe Program*)
 Thea A. Wilkins, Ph.D., Associate Professor (*Agronomy and Range Science*)
 Valerie M. Williamson, Ph.D., Professor (*Nematology*)
 Reen Wu, Ph.D., Professor (*Pulmonary Medicine*)
 John I. Yoder, Ph.D., Professor (*Vegetable Crops*)
Graduate Study. The Graduate Group in Genetics offers programs of study and research leading to the M.S. and Ph.D. degrees. The Group is subdivided into three affinity groups: molecular, animal, and plant. Each of these affinity groups provides broad training in genetics, combined with an emphasis specific to its area. Both model genetic organisms and agricultural species are studied using molecular and classical approaches. For additional information regarding the program, contact the group administrative assistant at 530-752-4863.

Graduate Adviser. Consult Genetics Graduate Group Office.

Courses in Genetics (GGG)

Graduate Courses

201A. Transmission Genetics (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101, introductory statistics and calculus. Study of segregation, linkage, and mapping and the modifications of Mendel's original genetic model.—I. (I.)

201B. Cytogenetics (3)

Lecture—3 hours. Prerequisite: course 201A or consent of instructor. Study of cytogenetics including meiosis, recombination, chromosomes, haploidy, aneuploidy, trisomics, monosomics, autopolyploids and intra- and interspecific manipulation.—III. (II.)

201C. Molecular Biology (4)

Lecture—4 hours. Prerequisite: Molecular and Cellular Biology 221A or the equivalent. Pass 1 restricted to graduate students in biochemistry and molecular biology, microbiology, or genetics. Structure and organization of DNA and chromatin; DNA replication, repair and recombination; transcription and RNA processing; protein biosynthesis and turnover; transcriptional and post-transcriptional control mechanisms; examples from eukaryotic and eubacterial cells, and viruses. (Same course as Molecular and Cellular Biology 221C.)—III. (III.)

201D. Quantitative and Population Genetics (5)

Lecture—5 hours. Prerequisite: course 201A or consent of instructor. Basic concepts of quantitative and population genetics including gene and genotypic frequencies, multiple factor hypothesis, phenotypic and genotypic values, heritability, selection, genetic variation, the detection of quantitative trait loci and evolution in populations. Experimental and analytical methods.—II. (II.) Famula, Neale, Shaw

205. Molecular Genetics Laboratory (5)

Laboratory—15 hours. Prerequisite: Biological Sciences 101 (may be taken concurrently) or the equivalent, enrolled in Genetics Graduate Group. Students will conduct experiments in molecular genetics laboratories. Individual research problems will emphasize experimental design, experience with methodologies, and data interpretation. May be

repeated up to three times for credit. (S/U grading only).—I, II, III. (I, II, III.)

207L. Research Methods in Plant Genetics Laboratory (2-5)

Laboratory—6-15 hours. Prerequisite: course 207 (may be taken concurrently). Working knowledge of contemporary methodologies in plant genetics is obtained by participating in research programs of the various Plant Genetics Affinity Group members. (S/U grading only).—I, II, III. (I, II, III.)

210. Horizontal Gene Transfer (3)

Lecture/discussion—3 hours. Prerequisite: background in basic microbiology and genetics required; introductory course in molecular biology, biotechnology and microbial and animal/plant genetics recommended. Transfer of genes between unrelated organisms in nature. Dissemination of foreign DNA from genetically engineered organisms, including plants and animals. Mechanisms by which genes are transferred horizontally, and between kingdoms.—I. (I.) Kado

220. Genomics and Biotechnology of Plant Improvement (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. (Same course as Vegetable Crops 220.)—II. Michelmore

291. Seminar in History of Genetics (2)

Seminar—2 hours. Prerequisite: Biological Sciences 101. The development of modern genetic theories beginning with Mendel.—II. (II.)

292A. Seminar in Cytogenetics (1-3)

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Topics related to the deletion, duplication and rearrangement of chromosome regions. Offered in alternate years.—(I.)

292B. Seminar in Quantitative Genetics (1-3)

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Topics of current interest related to the inheritance of continuous characters. Offered in alternate years.—(II.)

292C. Seminar in Developmental Genetics (1-3)

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Topics in the area of cell-specific control of genes in development. Offered in alternate years.—I.

292D. Seminar in Population, Evolutionary and Ecological Genetics (1-3)

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Topics related to the analysis and prediction of genetic changes in populations. Offered in alternate years.—II.

293. Seminar in Animal Genetics (1-3)

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Emphasis on recent advances in the field of animal genetics, ranging from quantitative genetics to molecular biology as it relates to animals.—III. (III.)

295. Seminar in Molecular Genetics (1-3)

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Topics of current interest related to the structure, modification and expression of genes.—I. (I.)

296. Scientific Professionalism and Integrity (2)

Lecture—1 hour; seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Review of basic skills required of contemporary scientists. Topics include scientific conduct, manuscript preparation, grant writing, seminar presentations, and time management. Emphasis on responsibilities of scientists to factually and thoughtfully communicate results. (S/U grading only).—I. (I.) Yoder

297. Seminar in Plant Genetics (1-3)

Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Current topics in plant genetics will be examined in student-conducted seminars and discussion format. The integration of molecular,

organismal and population genetics to address questions in plant biology will be emphasized.

298. Group Study (1-5)

Prerequisite: consent of instructor. Group study of selected topics in genetics. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Course

300. Methods in Teaching Genetics (1-3)

Lecture/discussion. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching genetics. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion or laboratory sections, formulating examinations under supervision of instructor. May be repeated for credit up to 3 times or 9 units if teaching in different genetics related course. (S/U grading only.)—I, II, III.

Geographic Information Systems

(College of Agricultural and Environmental Sciences)

The Department of Biological and Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnics, archaeology, military exercises, and computer-aided design. Prerequisites include Mathematics 16A-16B, Statistics 13 or Agricultural Systems and Environment 120 or Civil and Environmental Engineering 114, and Agricultural Systems and Environment 21 or Computer Science Engineering 15.

Minor Program Requirements:

UNITS

Geographic Information Systems.....18

Applied Biological Systems Technology 180, 18110

Select 8 or more units from Agricultural Systems and Environment 121, Applied Biological Systems Technology 175, Applied Biological Systems Technology/Hydrologic Science 182, Environmental and Resource Sciences 105, 185, 186, or 186L.....8

Minor Advisers: R. Plant, W. Wallender.

Geographic Studies

(College of Agricultural and Environmental Sciences)

The interdepartmental minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the earth's surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the earth's surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college and also with graduate programs in geography. The minor is sponsored by the Department of Environmental Design.

Minor Program Requirements:

UNITS

Geographic Studies20

Geography 103
Select at least one course from three of the following areas17

(a) Human geography:

Human and Community Development 141, 142; International Agricultural Development 104; Environmental and Resource Sciences 173; or other courses approved by the adviser.

(b) Methods in geography:

Environmental and Resource Sciences 105, 185, 186; or other courses approved by the adviser.

(c) Regional ecosystems:

Landscape Architecture 168; Wildlife, Fish, and Conservation Biology 156, 157; Environmental and Resource Science 144; Evolution and Ecology 121; Geography 123, 131; or other courses approved by the adviser.

(d) Individual study:

Select a maximum of 4 units of 192 (Internship) or 199 (Research) in any appropriate department.

Minor Adviser. D.J. Dingemans.

Geography

Courses in Geography (GEO)

Lower Division Courses

1. Physical Geography (4)

Lecture—3 hours; laboratory—2 hours. Basic physical elements of the human habitat, especially climate, landforms, soils, and natural vegetation.—II. (II.)

2. Introduction to Cultural Geography (3)

Lecture—3 hours. Traditional systems of habitat use: their characteristics, origin, occurrence, ecology. Development of contemporary cultural patterns and patterns in man-land relationships. Emphasis on the nonindustrial world. GE credit: SocSci.—III. (III.) Allan

2G. Introduction to Cultural Geography:

Discussion (1)

Discussion—1 hour; short papers. Prerequisite: course 2 concurrently. Small group discussion of topics and readings assigned for course 2. Preparation and discussion of short papers. GE credit with concurrent enrollment in course 2: Wrt.—III. (III.) Allan

10. The World's Regions (3)

Lecture—3 hours. The major geographic regions of the world; their origins, physical environments, cultures and economies; their interactions and global roles. Designed for non-majors.—I, II, III. (I, II, III.) Dingemans, Allan

98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)

99. Independent Study (1-5)

Prerequisite: consent of instructor, primarily for lower division students. (P/NP grading only.)

Upper Division Courses

121. North America (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1 and 2 or consent of instructor. Landscapes and lifeways in the United States and Canada, and the ways in which physical and human forces have contributed to their variety. Regional stresses within and between the two countries.—(III.)

123. Western Europe (3)

Lecture—3 hours. Prerequisite: courses 1 and 2 or consent of instructor. Geographic conditions and their relation to the economic, social, and political

problems of the countries of Western Europe.—I. (II.) Dingemans

126. Southern Asia (3)

Lecture—3 hours. Prerequisite: courses 1 and 2, or consent of instructor. Physical, cultural, and historical geography of Southern Asia.—III. (III.) Allan

131. California (4)

Lecture—3 hours; discussion—1 hour. The regional nature and variety of California: landforms, climates, vegetation, and soils; water, agriculture, and the cities. Ecological problems caused by increasing population and technological pressures on these environments.—III. (III.) Dingemans

143. Political Geography (4)

Lecture—3 hours; term paper. Areal differentiation of major natural and cultural phenomena affecting the world's political organization.—(I.) Dingemans

151. History of Geographic Thought (4)

Lecture—3 hours; term paper. Prerequisite: three upper division courses in geography. The literature of geography: objectives, subdivisions, and development of the subject.—(III.)

155. Urban Geography (4)

Lecture—3 hours; term paper. Prerequisite: course 5 or consent of instructor. Geography of land use within cities. The processes of change, and theories of economic and social organization of urban space. The urban landscape as a product of history, planning policy, transportation systems, and residential structure.—(I.) Dingemans

161. Conservation of Resources and Environment (4)

Lecture—4 hours. Principles of natural-resource and environmental-quality conservation. Land use conflicts between forestry, agricultural, mining, municipal, and recreational interests. Roles of industry, government, and society in creating and resolving resource and environmental problems.—(I.)

170. Cultural Ecology (4)

Lecture—3 hours; term paper. Prerequisite: course 2 or Anthropology 2. Geographic theories of environment-man relations. Ecologic relations of gatherers, fishermen, hunters, cultivators, and urbanites; their environmental impacts; their domestic plants and animals.—(III.)

171. Cultural Geography (4)

Lecture—3 hours; term paper. Prerequisite: course 2 or consent of instructor. Consideration of principal concepts and approaches in cultural geography in modern times, and links with, and parallels in, other disciplines.—(III.)

192. Student Internship in Geography (2-4)

Internship—5-15 hours at employing agency; term paper. Prerequisite: consent of undergraduate Geography major adviser and consent of instructor. Supervised program of student internships with public agencies dealing with geographical problems. The application and evaluation of theoretical concepts through work experience with a variety of assignments and work schedules. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates. (1-5)

(P/NP grading only.)

Geography (A Graduate Group)

Deborah L. Elliott-Fisk, Ph.D., Chairperson of the Group

Group Office, 201 Walker Hall (530-752-4119; geography@ucdavis.edu)

Faculty

Nigel Allan, Ph.D., Professor (*Geography*)

Michael Barbour, Ph.D., Professor (*Environmental Horiculture*)

David Boyd, Ph.D., Associate Professor (*Anthropology*)
 Cynthia Brantley, Ph.D., Professor (*History*)
 Stephen Brush, Ph.D., Professor (*Human and Community Development*)
 Dennis Dingemans, Ph.D., Associate Professor (*Geography*)
 Deborah L. Elliott-Fisk, Ph.D., Professor (*Wildlife, Fish, and Conservation Biology*)
 Mark Francis, M.L.A., Professor (*Landscape Architecture*)
 Charles Goldman, Ph.D., Professor (*Environmental Science and Policy*)
 Steven Greco, Ph.D., Assistant Professor (*Landscape Architecture*)
 Louis Grivetti, Ph.D., Professor (*Nutrition*)
 Lynette Hart, Ph.D., Associate Professor (*Population Health and Reproduction*)
 David Hird, D.V.M., Ph.D., Professor (*Veterinary Medicine*)
 Frank Hirtz, L.L.D., Ph.D., Associate Professor (*Human and Community Development*)
 Lovell (Tu) Jarvis, Ph.D., Professor (*Agricultural and Resource Economics*)
 Robert Johnston, M.S., Professor (*Environmental Science and Policy*)
 Suad Joseph, Ph.D., Professor (*Anthropology, Women and Gender Studies*)
 Carl Keen, Ph.D., Professor (*Nutrition*)
 Martin Kenney, Ph.D., Professor (*Human and Community Development*)
 Nguyen Kien, Ph.D., Professor (*Anesthesiology*)
 F. Thomas Ledig, Ph.D., Associate Professor (*Environmental Horticulture*)
 Bo Lonnerdal, Ph.D., Professor (*Nutrition*)
 Jay R. Lund, Ph.D., Professor (*Civil and Environmental Engineering*)
 Dean MacCannell, Ph.D., Professor (*Landscape Architecture*)
 Roger McDonald, Ph.D., Professor (*Nutrition*)
 Jay Mechling, Ph.D., Professor (*American Studies*)
 Janet Momsen, Ph.D., Professor (*Human and Community Development*)
 Debbie Niemeier, Ph.D., Associate Professor (*Civil and Environmental Engineering*)
 Ben Orlove, Ph.D., Professor (*Environmental Science and Policy*)
 Patsy Eubanks Owens, M.L.A., Professor (*Landscape Architecture*)
 Richard Plant, Ph.D., Professor (*Agronomy and Range Science*)
 James Quinn, Ph.D., Professor (*Environmental Science and Policy*)
 David Robertson, Ph.D., Professor (*English*)
 Lynn Roller, Ph.D., Professor (*Classics, Art History*)
 Margaret Rucker, Ph.D., Professor (*Textiles and Clothing*)
 Heath Schenker, M.A., Associate Professor (*Landscape Architecture*)
 Art Shapiro, Ph.D., Professor (*Evolution and Ecology*)
 Michael P. Smith, Ph.D., Professor (*Human and Community Development*)
 Margaret Swain, Ph.D., Assistant Adjunct Professor (*Anthropology*)
 Robert L. Thayer, Jr., M.A., Professor, (*Landscape Architecture*)
 Susan Ustin, Ph.D., Associate Professor (*Land, Air and Water Resources*)
 Stefano Varese, Ph.D., Professor (*Native American Studies*)
 Wesley W. Wallender, Ph.D., Professor (*Land, Air and Water Resources*)
 Geoffrey Wandesforde-Smith, Ph.D., Associate Professor (*Political Science*)
 Miriam J. Wells, Ph.D., Professor (*Human and Community Development*)
 Diane Wolf, Ph.D., Associate Professor (*Sociology*)
 Truman Young, Ph.D., Assistant Professor (*Environmental Horticulture*)

Emeriti Faculty

Thomas Cahill, Ph.D., Professor Emeritus
 Seymour Gold, Ph.D., Professor Emeritus
 Jack Ives, Ph.D., Professor Emeritus
 Stephen Jett, Ph.D., Professor Emeritus

Affiliated Faculty

M. Kat Anderson, Ph.D., Researcher (*Environmental Horticulture*)
 James Grieshop, Ph.D., Specialist, Cooperative Extension (*Human and Community Development*)
 Greg McPherson, Ph.D., Researcher (*Western Center for Urban Forest Research and Education*)
 Charlene Sailor, Ph.D., Associate Research Scientist
 Sheri Zidenberg-Cherr, Ph.D., Specialist (*Cooperative Extension Specialist in Nutrition*)

Graduate study. The Graduate Group in Geography offers programs of study and research leading to the M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. Areas of thematic emphasis include biogeography, cultural-human geography, medical-nutritional geography, tourism, and environmental geography. Current research project locales include the Caribbean, eastern Europe, southeast Asia, Africa, and the United States (especially California).

Preparation. Most students considered for admission will have an undergraduate major in geography or in a closely related field. Generally, a student with an undergraduate degree in a closely-allied field will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic methods, plus an additional 9 units of geographic coursework. The student's guidance committee must certify definition of this requirement.

Graduate adviser. D. Boyd (*Anthropology*), S. Brush (*Human and Community Development*).

Courses in Geography (GEO)

Graduate Courses

200A. Research Trends in Geography (1)
 Seminar—1 hour. Major current research themes and trends in geography. (S/U grading only.)

200B. Geographical Concepts (4)
 Lecture—3 hours; term paper. Prerequisite: undergraduate course work in geography or consent of instructor; graduate standing. Survey of key concepts and thematic content of the discipline of geography, including the role of science and humanism, the classical context of the discipline, and process, structure and scale.—I. (I.) Dingemans

200C. Theory and Practice of Geography (4)
 Lecture—3 hours; term paper. Prerequisite: graduate standing. Development of geographical theory; key concepts and theories; their chronology, and application to the practice of geography. Analytical background to geographical theory; application of theory to geographical practice and research projects.—II. (II.) Momsen

200D. Research Methods in Geography (4)
 Lecture—3 hours; term paper. Prerequisite: graduate standing, courses 200B and 200C, or consent of instructor. Survey of research methods in geography, including the use of logic, theory and paradigms, research design, and analytical techniques, including statistics and modeling.—III. (III.)

201. Sources and General Literature of Geography (4)
 Discussion—4 hours. Prerequisite: graduate standing in geography; consent of instructor. Designed for students preparing for higher degrees in geography. May be repeated for credit in one or more of the following subfields: physical, cultural, economic, urban, historical, political, conservation, and regional geography.—I, II, III. (I, II, III.)

290. Seminar: Selected Regions (4)
 Seminar—3 hours. Region to be announced annually.—I, II, III. (I, II, III.)

291. Seminar in Cultural Geography (4)
 Seminar—3 hours.—I, II, III. (I, II, III.)

292. Seminar in Plant Geography (4)

Seminar—3 hours; seminar paper. Prerequisite: graduate standing. Examination of that aspect of cultural plant geography dealing with human impacts and vegetation change in the earth's major biomes. Particular emphasis on the New World's savannas, deserts, and grasslands. Offered in alternate years.—I.

295. Seminar in Urban Geography (4)

Seminar—3 hours.—II. (II.)

297. Graduate Group in Geography Seminar (2)

Lecture/discussion—1 hour; term paper. Prerequisite: graduate standing. Seminars by UC Davis faculty and prominent national and international scholars; research presentations by Graduate Group in Geography Ph.D. candidates. May be repeated for credit. (S/U grading only.)

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

299D. Individual Study (1-12)

Prerequisite: graduate student status in Geography and consent of instructor. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Major Programs

"Civilization exists by geological consent—subject to change without notice."

Will Durant

Geology is the study of the Earth, and in particular the history, the structure, the evolution of life, and the processes that have molded the Earth and its inhabitants. The coming of the space age has also extended the field to include the solid planets of the solar system. Although often attracted to the study of geology by an aesthetic appreciation and enjoyment of the earth, geologists commonly approach their studies from an interest either in the academic or the applied aspects of the science.

The academic aspects include the study of the history of life, the Earth, and the planets, and of the processes that drive the historical evolution. The study of historical evolution through "deep time" is what fundamentally distinguishes geology from most of the other physical sciences. The study of the processes that drive this evolution can involve the application of any of the physical or life sciences to understanding the Earth. In this sense, geology is truly an interdisciplinary science.

The applied aspects of the science generally involve the interaction between humans and the earth. Applied studies include the study of mineral resources including oil and water; identification and mitigation of Earth hazards such as earthquakes, landslides, and volcanic eruptions; identification and mitigation of polluted ground water; and land use planning.

The Program. Students interested in becoming professional geologists or continuing their geological studies at the graduate level should elect the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. Both programs allow students to emphasize an aspect of the field of particular interest to them. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study. Transfer students should have completed as much as possible of the preparatory subject matter listed below. High school preparation for either program should include high school chemistry and four years of mathematics or the equivalent.

Internships and Career Alternatives. The largest employer of geologists has traditionally been the oil industry, although recently more opportunities have been available in environmental geology with consulting firms and government agencies. Government organizations and research laboratories also employ geologists in a variety of other capacities. There is a growing need for earth science teachers at all pre-college levels, and colleges and universities provide opportunities in teaching and research. Entry level positions are available with a Bachelor's degree. A Master's degree is the usual professional level degree, and a Ph.D. is generally required for research and academic positions. Internships during undergraduate training are a means of exploring potential career opportunities and can lead to positions after graduation. UC Davis students have interned at the California Division of Mines and Geology, the State Department of Water Resources, and various consulting firms.

Education Abroad Options. The department strongly encourages interested students to pursue a portion of their studies abroad. Within the constraints of the campus and College residence requirements, it is possible for students to complete significant portions of the Geology major at an international institution provided that the student consults with one of the undergraduate advisers and carefully plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Geology majors have spent their junior or senior years completing upper division coursework at EAP partner institutions including the University of Leeds, the University of Edinburgh, and the University of Otago.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	40-43
Geology 3, 3L, 50, 50L, 60.....	13
Mathematics 16A-16B or 21A-21B.....	6-8
Chemistry 2A-2B.....	10
Physics 7A-7B.....	8
Statistics 13 or 13AT or 32 or 102.....	3-4
Depth Subject Matter	36
Geology 100, 100L, 101, 101L, 103, 107, 107L, 108, 109, 109L.....	24
Additional upper division electives chosen from upper division courses in geology. Upper division courses in related fields may satisfy this requirement if approved <i>in advance</i> by the major adviser.....	12
Total Units for the Major	76-79

Recommended

Chemistry 2C or Hydrologic Science 134, Physics 7C.

B.S. Major Requirements:

	UNITS
Preparatory Subject Matter	57-59
Geology 3, 3L, 50, 50L, 60, 62.....	15
Mathematics 21A-21B-21C.....	12
Chemistry 2A-2B.....	10
Select one of the following three options:	
General Geology option:	
Hydrologic Science 134 or Chemistry 2C.....	5-6
Statistics 32 or 102.....	3-4
Physics 7A-7B-7C or 9A-9B-9C.....	12
Geochemistry/Petrology option:	
Hydrologic Science 134 or Chemistry 2C.....	5-6
Statistics 32 or 102.....	3-4
Mathematics 21D.....	4
Physics 9A-9B.....	8
Quantitative/Geophysics option:	
Mathematics 21D and 22A.....	7
Physics 9A-9B-9C.....	12
Depth Subject Matter	52
Geology 100, 100L, 101, 101L, 103, 105, 106, 107, 107L, 108, 109, 109L, 110.....	40
Additional upper division electives chosen from Geology 130-190 courses, Hydrologic Science 144, 146 and related fields approved <i>in advance</i> by major adviser. No more than 3 units upper division elective credit for Geology 115-129 courses. Maximum of 6 units upper division elective credit for Geology 192 or 194A-194B or 194HA-194HB.....	12
Total Units for the Major	109-111

English Composition Requirement

It is recommended that all majors complete the English composition requirement (English 101 or 102 or 104 or the equivalent) before or concurrently with the following courses: Geology 100, 101, 105N, 106, 108, 109L, 110.

Recommended

For those who are intending to pursue a career in geology or who are planning to apply to graduate programs in the earth sciences, one or more of the following courses are recommended for any of the options or specifically to supplement the options as listed. Note that Mathematics 22A is not a necessary prerequisite to Physics 9C:

General Geology option: Mathematics 21D, 22A, 22B, Physics 9A-9B-9C instead of 7A-7B-7C, Statistics 104, 106, 108.

Geochemistry/Petrology option: Mathematics 22A, Physics 9C, Hydrology 134 and Chemistry 2C, Chemistry 110A.

Quantitative/Geophysics option: Mathematics 22B, Statistics 32 or 102, Hydrology 134 or Chemistry 2C.

Major Advisers. A.B. degree: R. Cowen; B.S. degree: I.P. Montañez, R.A. Zierenberg, P. Schiffman.

Minor Program Requirements:

Students in other disciplines may elect to complete a minor in Geology by choosing a geological subject emphasis listed below. On transcripts the minor will appear as a minor in *Geology*.

	UNITS
Geology	19-24
Select one of the five emphases below.	
General Geology emphasis.....	19-20
Geology 50 (or 1) and 50L.....	5-6
Geology 100, 101, 109 and either 107 or 108.....	11
Geology 116 or 134.....	3
Minor Advisers. R. Cowen, R.J. Twiss.	

Engineering Geology emphasis.....19-22

Geology 50 and 50L.....5
Civil Engineering 171, 171L.....5
Three courses chosen from Geology 134, 161, 162, Hydrologic Science 103, 144, 146, Soil Science 118, 120.....9-12

Minor Adviser. R.J. Twiss

Geochemistry emphasis.....19-22

Geology 60 and either 146 or 148.....7
Chemistry 110A and 110B, or Materials Science and Engineering 130 and 134.....6
(Chemistry majors may substitute one of the elective courses for Chemistry 110B.)

Two elective courses chosen from Chemistry 110C, Geology 108, 146, 148, Hydrologic Science 134, Soil Science 102.....6-9
(Chemistry 110C and Materials Science and Engineering 134 cannot both be counted toward the minor.)

Minor Adviser. R.A. Zierenberg.

Oceanography emphasis.....21-24

Geology 108, 116, 150A, 150B, 150C.....16
Two courses chosen from Environmental Science and Policy 100, 151, Geology 109, 152.....5-8

Minor Adviser. H.J. Spero.

Paleobiology emphasis.....20-21

Geology 107 and 107L, 108.....8
Geology 152.....4
At least eight additional units from the following: Anthropology 151 or 152, Evolution and Ecology 100, 101, 102, 105, 112-112L, 140, 149, Geology 109, 150C.....8-9

Minor Adviser. R. Cowen.

Integrated Science Teaching Credential. Students wishing to prepare for the teaching credential in Integrated Science with a concentration in Geoscience may do so by satisfying the requirements for the A.B. degree in Geology (77-79 units) and 36-37 additional units of science as outlined below. Students may also prepare for the science credential by taking the B.S. degree in Geology (108-111 units) and an additional 30-32 units as indicated by the asterisks below.

Biological Sciences 1A-1B-1C*.....15
Chemistry 2C.....5
Physics 7C.....4
Geology 36*.....4
Geology 116-116G*.....5
Atmospheric Science 60* or 100*.....3-4

Students are advised to take the following courses as upper division electives in the A.B. program: Geology 105, 106, and 134.....12-13

Teaching Credential Subject Representative. H.W. Day. See also under Education—Teacher Education.

Graduate Study. The Department of Geology offers a program of study and research leading to the M.S. and Ph.D. degrees. For information regarding graduate study in geology, address the Graduate Adviser, Department of Geology.

Graduate Advisers. C.E. Leshner, J.S. McClain, S.J. Carlson.

Courses in Geology (GEL)

Lower Division Courses

1. The Earth (4)

Lecture—3 hours; discussion—1 hour. Introduction to study of the Earth for those not majoring in geology or associated sciences. Not open for credit to students who have taken course 50. GE credit: SciEng.—I, II, III. (I, II, III.) Cowen, Verosub

3. History of Life (3)

Lecture—3 hours. Prerequisite: course 1 recommended. The history of life during the three and one-half billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains. GE credit: SciEng.—II. (II.) Cowen

3G. History of Life: Discussion (1)

Discussion—1 hour. Prerequisite: course 3 concurrently. Small group discussion and preparation of short papers for course 3. GE credit with concurrent enrollment in course 3: Wrt.—II. (II.) Cowen

3L. History of Life Laboratory (1)

Laboratory—3 hours. Prerequisite: course 3 concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution.—II. (II.) Cowen

4. Evolution: Science and World View (3)

Lecture—2 hours; discussion—1 hour. Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines. GE credit: SciEng.—I. (I.) Vermeij

10. Modern and Ancient Global Environmental Change (3)

Lecture—3 hours. Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of nonsustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history. GE credit: SciEng.—III. (III.) Montanez

12. Evolution and Paleobiology of Dinosaurs (2)

Lecture—2 hours. Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies.—II. (II.) Carlson

17. Earthquakes and Other Earth Hazards (2)

Lecture—2 hours. The impact of earthquakes, volcanoes, landslides and floods on Man, his structures and his environment. Discussion of the causes, effects, and solution of geologic problems in rural and urban settings.—III. (III.) Dewey

20. Geology of California (2)

Lecture—2 hours; demonstration—1 hour. The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. GE credit: Wrt.—II. (II.)

25. Geology of National Parks (2)

Lecture—2 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Each park provides a visual focus for understanding a variety of geologic processes such as mountain building, volcanism, stream erosion, and glacial action.—I. (I.)

32. Volcanoes (3)

Lecture—3 hours. Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE: SciEng.—II. (II.) Schiffman

35. Rivers (3)

Lecture—3 hours. Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips. GE credit: SciEng.—III. Mount

36. The Solar System (4)

Lecture—3 hours; discussion—1 hour. Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course 113-113G.) GE credit: SciEng, Wrt.—III. (III.)

50. Physical Geology (3)

Lecture—3 hours. Prerequisite: high school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for course 1 or the equivalent may receive only 2 units for course 50.—I. (I.) McClain

50L. Physical Geology Laboratory (2)

Laboratory—6 hours; one or two one-day field trips. Prerequisite: course 50 (preferably taken concurrently). Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for course 1L or the equivalent may receive only 1 unit for course 50L.—I. (I.) McClain

60. Earth Materials: Introduction (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 2A; Mathematics 16A or 21A; course 1 or 50, 50L. Physical and chemical properties of rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations.—I. (I.) Day

62. Optical Mineralogy (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 60 (may be taken concurrently); high school physics is strongly recommended. Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section.—I. (I.) Day

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor; lower division standing. (P/NP grading only.)

Upper Division Courses

100. Earth Dynamics I: Extensional and Translational Processes (3)

Lecture—3 hours. Prerequisite: course 50, 50L, Physics 7A or 9A (may be taken concurrently), or consent of instructor. Structural features of, and geophysical constraints on, regions of extensional and translational tectonics. Observation, formation, and tectonic environments of joints, fractures, normal faults, and strike-slip faults. GE credit: SciEng, Wrt.—I. (I.) Moores

100L. Earth Dynamics I: Structure/Tectonics Laboratory (1)

Laboratory—3 hours; two one-day field trips required. Prerequisite: course 50L and course 100 (may be taken concurrently); or consent of instructor. Introduction to three-dimensional analysis of geologic structures; introduction to field techniques; interpretation of topographic and geologic maps; tectonic analysis of extensional and strike-slip terranes.—I. (I.) Moores

101. Earth Dynamics II: Convergent and Collisional Processes (3)

Lecture—3 hours. Prerequisite: courses 50-50L, 100, Mathematics 21B or 16B (may be taken concurrently), Physics 5A or 7A or 9A (may be taken concurrently); or consent of instructor. Geophysical and structural signatures of convergent tectonics, subduction zones, plate collisions and mountain belts. Topics include ductile deformation, folds, seismic Benioff zones, gravity and isostasy. Examples of collisions and resulting mountain belts. Examples drawn from western North America. GE credit: SciEng, Wrt.—II. (II.) Moores

101L. Earth Dynamics II: Structure/Tectonics Laboratory (2)

Laboratory and fieldwork—6 hours; six days of field trips on four separate weekends required. Prerequisite: courses 50L, 100L, and 101 (may be taken con-

currently); or consent of instructor. Continuation of Geology 100L. Analysis of three-dimensional geologic structures; introduction to field techniques; field-mapping projects; interpretation of topographic and geologic maps; tectonic analysis of convergent and collisional terranes.—II. (II.) Moores

103. Field Geology (3)

Fieldwork and laboratory—9 hours; 7-8 days on weekends during quarter. Prerequisite: course 101L or consent of instructor. Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports.—III. (III.) Leshner

105. Earth Materials: Igneous Rocks (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: courses 60, 62; Mathematics 16A or 21A; Chemistry 2B (may be taken concurrently). Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Wrt.—II. (II.) Leshner

106. Earth Materials: Metamorphic Rocks (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 105, Chemistry 2B, Mathematics 16A or 21A. Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Wrt.—III. (III.) Day

107. Earth History: Paleobiology (3)

Lecture—3 hours. Prerequisite: courses 3-3L or Biological Sciences 1B. The evolution and ecological structure of the biosphere from the origin of life to the present.—II, III. (II, III.) Cowen, Carlson

107L. Earth History: Paleobiology Laboratory (2)

Laboratory—6 hours. Prerequisite: courses 3-3L or Biological Sciences 1B; course 107 (may be taken concurrently). Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory.—III. (III.) Carlson

108. Earth History: Paleoclimates (3)

Lecture—3 hours. Prerequisite: course 1 or Geology/Environmental Science and Policy 116; and Chemistry 2A; or consent of instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SciEng, Wrt.—I. (I.) Spero

109. Earth History: Sediments and Strata (2)

Lecture—2 hours. Prerequisite: courses 50-50L. Principles of stratigraphic and sedimentologic analysis. Evaluation of historical and modern global changes in sedimentation within terrestrial and marine environments. Examination of the plate tectonic, climatic and oceanographic factors controlling the distribution and exploitation of economic fluids within sedimentary rocks. GE credit with concurrent enrollment in course 109L: SciEng.—II. (II.) Sumner

109L. Earth History: Sediments and Strata Laboratory (2)

Laboratory—6 hours (includes four 1-day field trips). Prerequisite: course 109 (may be taken concurrently). Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit with concurrent enrollment in course 109: Wrt.—II. (II.) Sumner

110. Summer Field Geology (8)

Fieldwork—8 hours/day, 6 days/week for six weeks. Prerequisite: courses 103, 109; course 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. GE credit: SciEng, Wrt.—summer

115. Earth Science, History, and People (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; course 1. Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: SciEng or SocSci, Wrt.—III. (III.) Cowen

116. The Oceans (3)

Lecture—3 hours. Prerequisite: upper division standing or consent of instructor. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents, geological history, and the sea's biota; and utilization of marine resources. (Same course as Environmental Science and Policy 116.) GE credit: SciEng.—I, II. (I, II.) Cowen, Spero

116G. The Oceans: Discussion (2)

Discussion—2 hours. Prerequisite: course 116/Environmental Science and Policy 116 concurrently. Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of papers. (Same course as Environmental Science and Policy 116G.) GE credit with concurrent enrollment in course 116. Wrt.—I, II. (I, II.) Cowen, Spero

129. Sample Preparation and Techniques for Petrology (1)

Laboratory—3 hours. Prerequisite: courses 60-60L. Introduction to petrographic laboratory techniques for petrographers. Topics covered may include thin and polished section preparation, rock crushing/grinding, mineral separation, staining, and photomicroscopy. (P/NP grading only.)—II. (II.) Winter

130. Non-Renewable Natural Resources (3)

Lecture—3 hours. Prerequisite: course 1. Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects.—II. (II.) Zierenberg

134. Environmental Geology and Land Use Planning (3)

Lecture—3 hours. Prerequisite: one course in Geology, preferably course 50 or 1, or consent of instructor. Geologic aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources. GE credit: SciEng, Wrt.—III. (III.)

138. Introductory Volcanology (4)

Lecture—2 hours; fieldwork—6 hours. Prerequisite: upper division standing, course 60 and 109 or the equivalents, or consent of instructor. Principles of physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field component. GE credit: SciEng.—summer (summer) Schiffman

139. Fluvial Geomorphology (5)

Lecture—3 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: courses 50, 50L; Mathematics 21B or 16B recommended. Advanced analysis of fluvial processes, including geomorphic evolution of rivers, floodplains and watersheds at various spatial and temporal scales, and in response to changing land use. Laboratory exercises examine methods of geomorphic analysis of rivers. Includes three weekend field trips.—II. (II.) Mount

142. Basin Analysis (5)

Lecture—3 hours; laboratory—6 hours; two required one-day field trips. Prerequisite: course 50 and 50L; course 109 recommended. Integrated analysis of sedimentary basins from initiation to maturity, including geophysics of basin formation, controls on sedimentary fill, subsidence and thermal evolution, fluid flow, rock alteration due to fluid flow, and applications to petroleum exploration and hydrology.—(I.) Sumner

143. Advanced Igneous Petrology (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 105, Mathematics 16C or 21C, Chemistry 2C. Physical and chemical properties of magmatic envi-

ronments and processes of igneous rock formation. Laboratory study of representative igneous rocks. GE credit: SciEng, Wrt.—(II.) Leshner

144. Historical Ecology (3)

Lecture—3 hours. Prerequisite: upper division course in environmental science or ecology, or an introductory course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion, evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical perspective on the biosphere of future.—II. Vermeij

145. Advanced Metamorphic Petrology (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 106; Hydrologic Science 134 or Chemistry 2C; Mathematics 16C or 21C. Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites. Offered in alternate years. GE credit: SciEng, Wrt.

146. Isotope Geochemistry (3)

Lecture—3 hours. Prerequisite: Chemistry 2C or consent of instructor. Principles and applications of nuclear chemistry to geology. Methods of determining geologic ages using K-Ar, Rb-Sr, Nd-Sm, and U-Pb isotopes. The interpretation of apparent ages determined by isotopic methods. The age and origin of the earth. Offered in alternate years.—(II.) Day

147. Geology of Ore Deposits (4)

Lecture—3 hours; laboratory—3 hours; optional one-weekend field trip. Prerequisite: Chemistry 2C or Hydrologic Science 134, courses 60, 62, and 105. Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered in alternate years.—III. Zierenberg

148. Stable Isotopes and Geochemical Tracers (3)

Lecture—3 hours. Prerequisite: Chemistry 2C or Hydrologic Science 134; courses 50, 50L, 60. Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered in alternate years.—(III.) Zierenberg

150A. Physical and Chemical Oceanography (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 116/Environmental Science and Policy 116; Physics 9B; Mathematics 21D; Chemistry 2C; or upper division standing in a natural science and consent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as Environmental Science and Policy 150A.)—I. (I.) McClain, Spero

150B. Geological Oceanography (3)

Lecture—3 hours. Prerequisite: course 50 or 116. Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as Environmental Science and Policy 150B.)—II. (II.) McClain

150C. Biological Oceanography (4)

Lecture—3 hours; discussion—1 hour; fieldwork—one weekend field trip required. Prerequisite: Biological Sciences 1A and a course in general ecology or consent of instructor. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. (Same course as Environmental Science and Policy 150C.)—II. (II.)

152. Paleobiology of Protista (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: courses 107 or Biological Sciences 1A or consent of instructor. Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered in alternate years.

156. Hydrogeology and Contaminant Transport (5)

Lecture—3 hours; laboratory—3 hours; term paper. Prerequisite: Hydrologic Science 145, Civil and Environmental Engineering 144 or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as Hydrologic Science 146.)—II. Fogg

160. Geological Data Analysis (3)

Lecture/discussion—3 hours. Prerequisite: Mathematics 21A or the equivalent. Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. Use of computer in lectures and homework.—II. Ito

161. Exploration Geophysics and Seismology (3)

Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 5C or 7C or 9C; or consent of instructor. Principles of exploration geophysics and seismology. Use of gravity, magnetic, electrical resistivity, electromagnetic, and seismic measurements to determine structure of the Earth's crust. Interpretation of data using computers. Survey of well-logging techniques. Seismology and earthquakes.—I. (I.)

162. Geophysics of the Solid Earth (3)

Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 5C or 7C or 9C; or consent of instructor. Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics.—(II.) Kellogg

163. Planetary Geology and Geophysics (3)

Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 7C or 9C, and course 50 or 36 or Astronomy 10, or consent of instructor. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft.—II. Kellogg

175. Advanced Field Geology (1-6)

Fieldwork—3-18 hours. Prerequisite: course 110 or graduate standing in Geology. Advanced problems and methods in geologic field studies. Preparation of a geologic report. May be repeated up to a total of six units when topic differs.—I, II, III. (I, II, III.)

182. Field Studies in Marine Geochemistry (2-8)

Lecture—3 hours; laboratory—1-3 hours; fieldwork—6-40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected.

190. Seminar in Geology (1)

Discussion—1 hour; seminar—1 hour; written abstracts. Prerequisite: major in Geology. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Montanez

192. Internship in Geology (1-12)

Internship. Prerequisite: upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated for credit for a total of 10 units. (P/NP grading only.)

194A-194B. Senior Thesis (3-3)

Prerequisite: open to Geology majors who have completed 135 units and who do not qualify for the honors program. Guided independent study of a selected topic, leading to the writing of a senior thesis. (Deferred grading only, pending completion of course sequence.)

194HA-194HB. Senior Honors Project (3-3)

Independent study—9 hours. Prerequisite: open to Geology majors who have completed 135 units and who qualify for the honors program. Guided independent study of a selected topic, leading to the writing of an honors thesis. (Deferred grading only, pending completion of sequence.)

198. Directed Group Study (1-5)

Prerequisite: senior standing in Geology or consent of instructor.

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**205. Advanced Field Stratigraphy (3)**

Lecture—1 hour; field work—2 hours. Prerequisite: courses 109 and 110 or consent of instructor; course 206 recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. May be repeated for credit.—(III.) Sumner

206. Stratigraphic Analysis (3)

Lecture—3 hours. Prerequisite: courses 109, 109L or consent of instructor; course 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. May be repeated for credit when topic differs. Offered in alternate years.—(I.) Montanez

214. Active Tectonics (3)

Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation.

216. Tectonics (3)

Lecture/discussion—3 hours. Prerequisite: course 101 or consent of instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth's deformed belts. Offered in alternate years.—(I.) Moores

217. Topics in Geophysics (3)

Lecture—1 hour; seminar—2 hours. Prerequisite: consent of instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. May be repeated for credit.—(II.)

218. Analysis of Structures in Deformed Rocks (3)

Seminar—3 hours. Prerequisite: courses 100, 100L, 101, 101L, 170; or consent of instructor. Recent advances in the understanding and analysis of structures in brittlely and ductilely deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered in alternate years.—III. Twiss

219. Fracture and Flow of Rocks (3)

Lecture—3 hours. Prerequisite: courses 100, 101, Mathematics 21 or 16, Physics 7 or 9, or consent of instructor. Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered in alternate years.—(III.) Twiss

220. Mechanics of Geologic Structures (3)

Lecture—3 hours. Prerequisite: course 170, Mathematics 21C, Physics 9A or 5A, or consent of instructor; Mathematics 21D and 22A recommended. Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic struc-

tures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered in alternate years.—(III.) Twiss

226. Advanced Sedimentary Petrology (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 144 or consent of instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. May be repeated for credit when topic differs.—II. (II.) Sumner

227. Stable Isotope Biogeochemistry (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: graduate standing and consent of instructor. Discussion and application of stable isotope techniques for scientific research problems. Course emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory will develop basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes.—(III.) Spero

228. Topics in Paleoceanography (3)

Lecture—3 hours. Prerequisite: courses 108, 150A or consent of instructor. Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the geologic record. Topics vary. May be repeated for credit.—(III.) Spero

235. Surface Processes (3)

Seminar—3 hours. Prerequisite: courses 50, 50L, 139; Mathematics 21B or 16B recommended. Recent advances in the analysis of landforms and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. May be repeated for credit when topic differs.—(II.) Mount

236. Inverse Theory in Geology and Geophysics (3)

Lecture—3 hours. Prerequisite: consent of instructor. Inversion of data for model parameters. Evaluation of parameter uncertainties. Linear and nonlinear problems for discrete and continuous models. Bakus-Gilbert inversion. Offered in alternate years.—(III.) McClain

238. Theoretical Seismology (3)

Lecture—3 hours. Prerequisite: consent of instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. Offered in alternate years. (P/NP grading only.)—III. McClain

240. Geophysics of the Earth (3)

Lecture—3 hours. Prerequisite: Earth Sciences and Resources 201, Physics 9B, Mathematics 22B. Physics of the earth's crust, mantle, and core. Laplace's equation and spherical harmonic expression of gravity and magnetic fields. Elastic wave equation in geologic media. Body and surface seismic waves. Equations of state, thermal structure of the earth. Offered in alternate years.—II. Kellogg

241. Geomagnetism (3)

Lecture—3 hours. Prerequisite: graduate standing. Nature and origin of the Earth's magnetic field. Present field and recent secular variation. Spherical harmonic analysis. Paleosecular variation. Polarity transitions and geomagnetic excursions. Statistics of polarity intervals. Dynamo theory. Planetary magnetism. Offered in alternate years.

242. Paleomagnetism (3)

Lecture—3 hours. Prerequisite: graduate standing. Principles and applications of paleomagnetism. Physical basis of rock and mineral magnetism. Field and laboratory techniques. Instrumentation. Analysis of paleomagnetic data. Statistical methods. Rock magnetic properties. Geological and geophysical applications. Offered in alternate years.—(II.) Verosub

246. Physical Chemistry of Metamorphic Processes (3)

Lecture—3 hours. Prerequisite: course 145, Chemistry 110A, or consent of instructor. Physicochemical

principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered in alternate years.

247. Metamorphic Petrology Seminar (3)

Seminar—3 hours. Prerequisite: course 145 or consent of instructor; course 246 recommended. Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). May be repeated for credit when topic differs. Offered in alternate years. (S/U grading only.)

250. Advanced Geochemistry Seminar (3)

Seminar—3 hours. Prerequisite: course 146 or consent of instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geology, origin and chemistry of the oceans. Subject varies yearly depending on student interest. May be repeated for credit. Offered in alternate years.—(I.) Zierenberg

253. Current Topics in Igneous Petrology (3)

Seminar—3 hours. Prerequisite: graduate standing in Geology; course 143 or consent of instructor. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis. May be repeated for credit when topic differs. (S/U grading only.)—(I.) Leshner

254. Physical Chemistry of Igneous Processes (3)

Lecture—3 hours. Prerequisite: course 143 or consent of instructor; Chemistry 110A required; Chemistry 110B and 110C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered in alternate years.—III. Leshner

255. Experimental Petrology (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 143 or consent of instructor. Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered in alternate years.—(I.) Leshner

260. Paleontology (3)

Seminar—3 hours. Prerequisite: graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. May be repeated for credit when topic differs.—I, III. (I, III.) Carlson, Vermeij

281N. Instrumental Techniques for Earth Scientists (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Mathematics 21A, 21B, 21C, Physics 7A, 7B, 7C or 9A, 9B, 9C or consent of instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research.—I. Schiffman

285. Field Studies in Marine Geochemistry (2-8)

Lecture—3 hours; laboratory—1-3 hours; fieldwork—6-40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected.

290. Seminar in Geology (1)

Seminar—1 hour; discussion—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. (S/U grading only.)—I, II, III. (I, II, III.) Montanez

291. Geology of the Sierra Nevada (1)

Seminar—one day-long session. Prerequisite: consent of instructor. Short oral presentations by students and faculty concerning results of their past work and plans for future work in the Sierra. A written abstract is required following the format required at professional meetings. (S/U grading only.)—(III.) Day

292. River Forum (1)

Seminar—1 hour; optional field trips to evaluate local rivers. Prerequisite: graduate standing. Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. (S/U grading only.)—I, II, III. (I, II, III.) Mount

294. Structure/Tectonics Forum (1)

Seminar—1 hour. Prerequisite: graduate student in geology or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. (S/U grading only.)—I, II, III. (I, II, III.)

295. Advanced Problems in Geodynamics (3)

Seminar—3 hours. Prerequisite: courses 100 and 101 or consent of instructor. Seminar dealing with problems in geodynamics. Topics will vary (e.g., ductile deformation mechanisms, brittle fracture, earthquake prediction, driving forces for plate tectonics, mantle convection). Emphasis on recent literature. May be repeated for credit when topic differs. Offered in alternate years. (S/U grading only.)—III.

296. Advanced Problems in Tectonics (3)

Seminar—3 hours. Prerequisite: course 101 or consent of instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. May be repeated for credit. Offered in alternate years. (S/U grading only.)—III. Moores

298. Group Study (1-5)

299. Research (1-12)

(S/U grading only.)

Professional Courses

390. Methods of Teaching Geology (1)

Discussion—1 hour. Prerequisite: graduate student standing in Geology. Discussion of methods and problems of teaching geology. Topics include departmental facilities, grading efficiency/effectiveness, Teaching Assistant/student interaction, and teaching techniques for lecturing, discussions, and labs. Participation in teaching program required for Ph.D. in Geology. (S/U grading only.)—I. (I.) Carlson

391. Ethical Issues in Earth Sciences (1)

Seminar—1 hour. Prerequisite: graduate standing in Geology or consent of instructor. Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. Offered in alternate years. (S/U grading only.)—(III.) Kellogg

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Minor Program Requirements:

	UNITS
Geophysics.....	21-24
Engineering 5	3
Geology 161, 162N	6
Applied Science Engineering 115	3
One course sequence chosen from the following:.....	9-12
a. Atmospheric Science 120, 121A, 121B;	
b. Geology 100, 100L, 101, 101L;	
c. Mathematics 118A, 118B, 118C;	
d. Physics 104A, 104B, 105C.	
Minor adviser. J.S. McClain, Department of Geology, 392 Physics/Geology, 752-7093.

Faculty

- Carlee Arnett, Ph.D., Assistant Professor
- Clifford A. Bernd, Dr.Phil., Professor
- Gail Finney, Ph.D., Professor
- Ingeborg Henderson, Ph.D., Senior Lecturer, *Academic Senate Distinguished Teaching Award*
- Winder McConnell, Ph.D., Professor
- Karl R. Menges, Dr.Phil., Professor
- Peter M. Schaeffer, Ph.D., Professor

Emeriti Faculty

- John F. Fetzer, Ph.D., Professor Emeritus
- H. Guenther Nerjes, Ph.D., Professor Emeritus
- Fritz Sammern-Frankenegg, Dr.Phil., Lecturer Emeritus

The Major Program

The German major explores in depth the literature and language, the culture and commerce of the German-speaking world. Whereas the General Program accommodates specifically those students whose interest lies in literary studies, German Area Studies as well as the Culture and Commerce emphasis are two options that combine advanced language study with courses featuring the contributions of the German-speaking world to fields such as music, art, philosophy, history, and economics.

The Program. Two of the three major emphases reflect the department's primary emphasis on literary figures, movements and themes, and thus they share a common core of upper division literature electives. The Culture and Commerce emphasis has as its goal functional language competency to enable students to live and work in a German-speaking environment. A key feature of this track is a work/study experience abroad. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper division courses offered in German.

Career Alternatives. Completion of the major prepares students for graduate study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	16-27
German 1-2-3 (or the equivalent).....	0-15
German 20, 21, 22	12

Depth Subject Matter44

General Program

German 101A, 101B, 103..... 12
 German 120 4
 Three courses chosen from upper division literature offerings taught in German..... 12
 Four additional upper division courses selected from 104–109 and 121–198, upon the explicit advance approval of the undergraduate major adviser 16
 The above category may be satisfied in part by one or more courses in Comparative Literature, in another national literature, or from German literature-in-translation offerings (111–119, 140–142) upon consultation with, and advance approval of, the undergraduate major adviser.

German Culture and Commerce Emphasis

German 103, 104, 109A, 109B..... 16
 German 118E or 120 4
 German 143, 192 12
 Three elective courses from at least two of the following subjects 12
 Economics 110B, 116, 160A, 160B, 162, History 144A, 144B, Political Science 123, 137
Recommended: International Relations 1, German 101A, 101B

German Area Studies Emphasis

German 101A, 101B, 103..... 12
 German 120 4
 Two courses chosen from upper division literature courses that are taught in German 8
 History 144A or 144B 4
 Four elective courses in accordance with the student's interest chosen from at least two of the following three areas after consultation with and approval of the adviser 16

Humanities:

History 143, Philosophy 170, 175.

Social Sciences:

Geography 123, Political Science 117, 137.

Fine Arts:

Art 176C, 177A, 177B, Music 110A, 110C, 110D, 110E.

Special consideration is also given to such courses in Comparative Literature as the 164 series, where pan-European movements influential upon German literature are at issue.

Total Units for the Major60-71

Minor Program Requirements:

The Department offers a German Language and Literature minor. In addition, individualized minor programs may be designed upon consultation with the undergraduate adviser.

Students are particularly encouraged to consider a minor that combines a coherent group of courses to emphasize area studies in German (i.e., German philosophy, the arts, history, political science, as well as literature). The purpose of the minor is to provide students with the opportunity to augment their training in other fields by acquiring proficiency in the German language and exposure to German literature and culture.

UNITS

German Language and/or Literature20-24

Choose courses numbered from German 101A through 109B and literature courses that are taught in German 20-24

Major Adviser. P. Schaeffer.

Honors and Honors Program. The honors program comprises two quarters of study under course

Geophysics

(College of Letters and Science)

Geophysics is study of the physical properties and processes within and surrounding the Earth. Many problems in the Earth Sciences require geophysical techniques for study. The interdisciplinary minor in geophysics is for students with backgrounds in the physical sciences, engineering and other fields who are interested in pursuing a graduate or professional career in geophysics, or who require a significant knowledge in the field. The curriculum reflects the need for such students to have a firm foundation of geophysics classes, as well as courses from the vast diversity of disciplines from many departments that are included in geophysics.

The minor is sponsored by the Department of Geology, 174 Physics/Geology Building.

194HA–194HB, which will include a research paper. See also the University and College requirements.

Teaching Credential Subject Representative.

I. Henderson. See also under the Teacher Education Program.

Graduate Study. The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German Literature. Additional degree options for a *designated emphasis* are available through departmental affiliations with the programs in Social Theory and Comparative History, Critical Theory, Feminist Theory, and second language acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Adviser.

Graduate Adviser. K.R. Menges.

Prerequisite Credit. Credit normally will not be given on the lower division level for a course that is the prerequisite of a course already successfully completed.

Courses in German (GER)

Lower Division Courses

Course Placement: Students with two years of high school German normally continue in German 2; those with three years, German 3; those with four years, German 20.

1. Elementary German (5)

Discussion—5 hours; laboratory—two 1/2-hour sessions. Introduction to German grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed German 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I, II, III. (I, II, III.)

2. Elementary German (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1 in areas of grammar and basic language skills.—I, II, III. (I, II, III.)

3. Elementary German (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Completion of grammar sequence and continuing practice of all language skills through cultural texts.—I, II, III. (I, II, III.)

6. Conversational German (3)

Discussion—3 hours. Prerequisite: course 3. Designed to develop intermediate language skills with special emphasis on communication and grammatical accuracy. Course 6 may be taken concurrently with course 20.—I, II, III. (I, II, III.) Henderson

20. Intermediate German (4)

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: course 3. May be taken concurrently with course 6. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts. Not open for credit to students who have completed course 4. (Former course 4.)—I, II. (I, II.)

21. Composition and Conversation (4)

Discussion—3 hours; extensive writing. Prerequisite: course 20 or consent of instructor. Practice in short essay writing. Discussion based on readings from a variety of German texts.—I, II, III. (I, II, III.)

22. Composition and Conversation (4)

Discussion—3 hours; extensive writing. Prerequisite: course 21 or consent of instructor. Practice in short essay writing with an aim toward refinement and expansion of vocabulary. Discussion based on readings in a variety of German.—I, II, III. (I, II, III.)

47. Erasmus and Christian Humanism (4)

Lecture/discussion—3 hours; term paper. Erasmus is studied as a protagonist of contemporary ideas such as the equality of men and women, individual human dignity, peace and disarmament, pluralistic society and tolerance, in the context of Renaissance Europe,

and his influence in the following centuries. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Schaeffer

48. Myth and Saga in the Germanic Cultures (4)

Lecture—3 hours; term paper. Knowledge of German not required. Reading in English translation from the Norse Eddas, the Volsung and Sigurd-Siegfried cycles, and the Gudrun lays; literary mythology in German Romanticism culminating in Wagner's "total art-work" concept and The Ring of the Nibelung cycle. May not be counted toward major in German. GE credit: ArtHum, Wrt.—I. (I.) Schaeffer

49. Freshman Colloquium (2)

Seminar—2 hours. Prerequisite: open only to students who have completed 40 or fewer quarter units of transferable college-level work. Readings, discussion and written projects treating topics such as communist-capitalist tension in German literary culture; masculine "versus" feminine authorial consciousness; disintegration and reconstitution of language reflecting cultural transformation; exorcising post-holocaust national guilt and individual frustration—Germany's new European "mission."—II. (II.)

92. Field Work in German (1-12)

Internship—3-36 hours. Prerequisite: lower division standing. Total immersion program in Germany or a German speaking setting in the U.S. to further develop students' proficiency in the German language. (P/NP grading only.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

Upper Division Courses

101A. Survey of German Literature, 800–1800 (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21. German literature from the Middle Ages to Romanticism (800-1800) with an emphasis on providing an overview of major "movements" and authors. GE credit: ArtHum.—I. (I.) Schaeffer

101B. Survey of German Literature, 1800–Present (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21. German literature from the age of Romanticism (1800) to the present with an emphasis on providing an overview of major "movements" and authors. GE credit: ArtHum.—III. (III.) Menges

103. Writing Skills in German (4)

Lecture—3 hours; extensive writing. Prerequisite: course 22. Practice in different kinds of writing, such as abstracts, correspondence, lecture summaries, analysis of or response to short literary texts.—I. Henderson

104. Translation (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 21 or the equivalent or consent of instructor. Exercises in German-to-English, English-to-German translation using texts from the areas of culture and commerce. Not open for credit to students who have completed course 104A. Offered in alternate years.—I. McConnell

105. The Modern German Language (4)

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: course 20; Linguistics 1 recommended. Introduction to the linguistic analysis of contemporary German, including its phonology, morphology, syntax and semantics, as well as sociolinguistic considerations.—I. (I.) Arnett

106. History of the German Language (4)

Discussion—3 hours; extensive writing. Prerequisite: course 21; course 105 or Linguistics 1 recommended or consent of instructor. Survey of the development of the German language and the study of its structure in historical perspective.—II. (II.) Benware

108. Varieties of Contemporary German (4)

Lecture—3 hours; laboratory and/or individual/ group consultation on projects. Prerequisite: courses 22, 105. Study of relations between the standard lan-

guage, *Umgangssprachen*, and dialects. Approach is both descriptive and sociolinguistic. Class or individual projects on regional differences, including all of the contiguous German-speaking area of Europe.—I. (I.) Benware

109A. Business German (4)

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: course 22 or consent of instructor. Specialized advanced language course using business-oriented information and publications as the basis for discussions, roleplay, reports, compositions and translations.—III. Henderson

109B. Advanced Business German (4)

Lecture/discussion—3 hours; laboratory/discussion—1 hour. Prerequisite: course 109A or consent of instructor. Specialized advanced language course designed as a sequel to German 109A. Expands on previously introduced materials and features new topics such as the EU, the European Currency System, German company forms and the stock market.—III. (III.) Henderson

111. Major Writers in Translation (4)

Lecture—3 hours; extensive writing. Prerequisite: sophomore standing recommended. Knowledge of German not required. Examination (in English) of representative works by a major writer in the German speaking sphere, set in the broader cultural context of the relevant period of movement in each case. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Wrt.—II.

112. Topics in German Literature (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: upper division standing or consent of instructor. Investigation of significant themes and issues within their European context. Knowledge of German is not required. May be repeated once for credit. Offered in alternate years. GE credit: ArtHum, Wrt.—III. McConnell

113. Goethe's Faust (4)

Discussion—3 hours; term paper. Knowledge of German not required. Intensive study of Goethe's *Faust* in its entirety. Discussions and readings in English; reading the text in the original is encouraged. Offered in alternate years. GE credit: ArtHum, Wrt.—II. Schaeffer

115. German Literature Since 1945 (4)

Lecture—3 hours; extensive writing. Knowledge of German not required. Major writers of the post-war generation of Austria, Switzerland and Germany: novelists, such as Böll, Grass, Johnson, Walser, Handke; playwrights such as Frisch, Dürrenmatt and Hochhuth; and poets, such as Celan, Enzensberger, and Aichinger. May be repeated for credit in different topic area. GE credit: ArtHum, Wrt.—I. (I.) Menges

117. The Nibelungen Tradition: Medieval, Musical, and Modern (4)

Lecture—3 hours; extensive writing. Knowledge of German not required. Three modes of the Nibelungen legend: the Medieval epic poem *Nibelungenlied*, the Scandinavian *Volsunga Saga*, Wagner's music drama *Ring of the Nibelungen*, and Thomas Mann's *Blood of the Walsungs* in their intellectual environment and interrelationship. GE credit: ArtHum, Wrt.—II. (II.) McConnell

118A. Vienna at the Turn of the Twentieth Century (The End of the Habsburg Empire) (4)

Lecture—1 hour; discussion—2 hours; extensive writing. Knowledge of German not required. Cultural ferment in Vienna, capital of the multinational Habsburg empire, at the turn of the century, with consideration of innovations in literature, music, graphic arts, architecture, philosophy and psychology, heralding European modernism. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Finney

118B. Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism (4)

Lecture—1 hour; discussion—2 hours; extensive writing. Knowledge of German not required. Expressionism in graphic arts, literature, film, New Objectivity, Brecht and Bauhaus considered in the context of the failure of the German experiment in democracy,

the Weimer Republic of 1919-33. Offered in alternate years. GE credit: ArtHum, Wrt.—III. Menges

118C. Germany Under the Third Reich (4)

Lecture/discussion—3 hours; term paper. Prerequisite: background in modern European history; course 118B recommended. No knowledge of German required. Interdisciplinary study of German society and culture during the Third Reich (1933-45); readings in aesthetics, history, and philosophy; study of Fascist culture in literature, film, architecture, and the graphic arts; focus on everyday life in Hitler's Germany. Offered in alternate years. GE credit: ArtHum, Wrt.—I. McConnell

118D. Germany Between 1949 and 1989: Division and Restoration (4)

Lecture/discussion—3 hours; term paper. Knowledge of German not required. Survey of German history as a divided country. Associated cultural phenomena such as the so-called Economic Miracle, the Student Movement, the Historians' Debate through a variety of theoretical and aesthetics texts and films. Offered in alternate years. GE credit: ArtHum.—II. Menges

118E. Contemporary German Culture (4)

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: course 50. Thorough introduction into the political, economic, social and cultural scene of Germany today (Austria and Switzerland marginally included). Historical background and comparative perspectives. Readings from a variety of sources, films and videotapes. Knowledge of German not required. Offered in alternate years. GE credit: ArtHum, Wrt.—II. Menges

119. From German Fiction to German Film (4)

Lecture—3 hours; discussion—1 hour; term paper. Examines a number of film adaptations of major German prose works and plays to ascertain the types of changes involved in the shift in medium and the positive and negative effects achieved by such transferences. GE credit: ArtHum, Wrt.—II. (II.) Menges

120. Survey of German Culture (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21. Major developments in such areas of German life as the arts, philosophical thought, social institutions, and political history. GE credit: ArtHum.—III. (III.) Henderson

121. The Medieval Period in German Literature (4)

Discussion—3 hours; extensive writing. Prerequisite: course 21. Literary-philosophical profile of the Mittelhochdeutsche Blütezeit in terms of the significant epics, romances, and lyric poetry. Readings in German. Offered in alternate years. GE credit: ArtHum.—II. McConnell

122A. Humanism and Reformation (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Exemplary literary works of the sixteenth century tracing the principal lines of development and showing the reflection in literature of the social scene. Offered in alternate years. GE credit: ArtHum.—I. Schaeffer

122B. The Literary Baroque (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Exemplary literary works of the seventeenth century tracing the principal lines of development and showing the reflection in literature of the social scene. Offered in alternate years. GE credit: ArtHum.—II. Schaeffer

123. Literature of the Classical Age (4)

Discussion—3 hours; term paper. Prerequisite: course 21. A critical assessment of principal works of Goethe and Schiller in their development from Sturm and Drang individualism and rebellion to the balanced harmony of the classical period. Offered in alternate years. GE credit: ArtHum.—I. Bernd

124. Major Movements in German Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 21 or the equivalent. Examination of significant Movements and Schools in German literary history (e.g., the medieval Troubadours, Storm and Stress, the romantics, the George Circle, the Expressionists), with particular emphasis on the broader cultural dynamics and ideologies as these

apply to individual literary works. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—II. Finney

125. Short Fiction: 1880-1914 (4)

Lecture—3 hours; term paper. Prerequisite: course 21. Representative short German fiction in the fin-de-siècle period, to attain conversance with various prose styles and the cultural currents they reflect. Offered in alternate years. GE credit: ArtHum.—(III.) Schaeffer

126. Modern German Literature (4)

Discussion—3 hours; extensive writing. Prerequisite: course 21. Selections from significant works of major twentieth-century writers, such as Hesse, Mann, Kafka, Rilke, Brecht, Grass. May be repeated for credit with consent of Undergraduate Major Adviser.—I. (I.) Menges

127. Studies in Major Writers (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 21 or the equivalent. Examination of representative works by a major writer, set in the broader cultural context of the relevant period or movement in each case. May be repeated once for credit when a different author is covered. Offered in alternate years.—I, III. McConnell

129. Postwar Women Writers (4)

Discussion—3 hours; term paper. Prerequisite: course 21 or consent of instructor. Survey of major women writing in German since 1945. Considers such issues as the existence of "feminine writing" and of feminist aesthetics. Writers include Seghers, Bachmann, Wolf, Kirsch, Morgner, Wohmann, Stefan, and Schwaiger.—III. (III.) Finney

130. Modernity and its Discontents: the Tradition of German Cultural Critique (4)

Lecture—2 hours; discussion—1 hour; four short papers. Prerequisite: History 4B or 4C. Philosophical and aesthetic tradition of *Kulturkritik*, from Romanticism to present. Authors include Herder, Schiller, Novalis, Hegel, Marx, Nietzsche, Freud, Spengler, Klages, Heidegger, Gehlen, The Frankfurt School. Illustrations from landscape and city representations. Knowledge of German not required. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Menges

131. German Lyric Poetry (4)

Lecture—3 hours; term paper. Prerequisite: course 21. Study of the genre of lyric poetry from the late Middle Ages through Renaissance, Baroque, Classical, Romantic, and Modern periods in correlation with other literary forms and the social climate of each period. Offered in alternate years. GE credit: ArtHum.—I. Schaeffer

132. The German Novelle (4)

Lecture—3 hours; term paper. Prerequisite: course 21. Inquiry into the art of the "Novelle" through analysis of the materials and formal devices of representative authors from Goethe to Kafka. Offered in alternate years. GE credit: ArtHum.—I. Bernd

133. The German Drama (4)

Lecture—3 hours; term paper. Prerequisite: course 21. Readings in the works of Germany's leading dramatists from the eighteenth century to the present day, such as Lessing, Goethe, Schiller, Kleist, Büchner, Hauptmann, Brecht. Offered in alternate years. GE credit: ArtHum.—III. Finney

134. Topics in German Intellectual History (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Topics in German intellectual history with materials from a number of periods, genres, and disciplines. May be repeated twice for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(I, III.) Schaeffer, Menges

140. German Political Literature from the Middle Ages to the Present (4)

Lecture—3 hours; extensive writing. Prerequisite: English 3 or 4. Knowledge of German not required. Examination of the relationship of art to politics in German literary history from the time of Walther von der Vogelweide in the Middle Ages, through the Reformation, the period of Romanticism, and the Twentieth Century. Offered in alternate years. GE credit: ArtHum, Wrt.—II. McConnell

141. The Holocaust and its Literary Representation (4)

Lecture—2 hours; discussion—1 hour; term paper. Knowledge of German not required. Aesthetic representation and metaphorical transformation of the holocaust in its human and historical perspectives. Offered in alternate years. GE credit: ArtHum, Wrt.—(I.) Menges

142. New German Cinema (4)

Lecture—3 hours; discussion—1 hour. Knowledge of German not required. A survey of representative works of the most influential filmmakers of the New-German cinema: Alexander Kluge, Volker Schlöndorff, Rainer Werner Fassbinder, Werner Herzog, Hans-Jürgen Syberberg, Wim Wenders, Margarethe von Trotta, Helke Sander, Helma Sanders-Brahms and Jutta Brückner.—I. Menges

143. Language Through Media (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Study of contemporary German-language news media—press, video, film, CD-ROM, Internet—for insight into political and cultural developments in the German-speaking countries. Discussion of contents, critical approaches, writing of summaries, rebuttals and comments. Offered alternate years.—(II.) Arnett

145. The Literature of Deviance: Mann, Hesse, Kafka (4)

Lecture/discussion—3 hours; term paper. Close study of selected prose works as representative of modernism's fascination with social, sexual, and psychological alienation. Attention to the nuanced portrayal of deviance through formal innovations in fiction. Taught in English. Offered in alternate years.—II. Finney

160. Love in the Middle Ages (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21. Analysis of the phenomenon of love in selected medieval lyrical poems and romances of the twelfth and thirteenth century Blütezeit. Origins of courtly love, love and individualism, love and the Church, love and adultery. Not offered every year.—I. McConnell

165. The German Epigram (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 21. Survey of the German epigram from its beginnings to the present, tracing the origins and development of the genre, its place in European literature, and its function as a mirror of the history of ideas. Offered in alternate years.—I. Schaeffer

166. Die Meistersinger (4)

Lecture/discussion—3 hours; listening—1 hour. Prerequisite: course 21. Wagner's music drama *Die Meistersinger von Nürnberg* against the background of the city's cultural history, the practice of Meistersang and the historical Hans Sachs. The relationship of words to music, and the resulting music-drama as an eminently humanistic work. Offered in alternate years.—III. Schaeffer

167. Ribaldry in German Literature (4)

Laboratory/discussion—3 hours; extensive writing. Prerequisite: course 21 or consent of instructor. Survey of German Literature from late Middle Ages to Age of Goethe, focusing on ribaldry, i.e., earthy humor close to everyday life, sometimes for its own sake, more often as social satire or the promotion of causes such as the Reformation. Offered in alternate years.—III. Schaeffer

168. Multiculturalism in German Literature (4)

Lecture/discussion—3 hours; term paper/discussion—1 hour. Prerequisite: course 21 or consent of instructor. Examples of German literature in which "encounter with the other" is thematic. Going from the High Middle Ages to mid-20th century, these examples reflect contact with people of color, different beliefs and cultures and inner-German minorities. Offered in alternate years. GE credit: ArtHum, Div.—II. Schaeffer

185. The Age of Bismarck (4)

Discussion—3 hours; term paper. Prerequisite: course 21. Notable literary repercussions that took place when Germany's international status reached its peak during the age of the Iron Chancellor. The

poetry of Storm, the prose of Fontane, the drama of Hauptmann. Offered in alternate years. GE credit: ArtHum.—II. Bernd

192. Field Work in German (1-12)

Internship—3-36 hours. Prerequisite: course 109A or consent of instructor. Total immersion program in Germany or a German speaking setting in the U.S. to further develop students proficiency in the German language. May be repeated twice or up to 12 units of credit with consent of instructor. (P/NP grading only.)

194HA-194HB. Honors Program (3-3)

Independent study—2 hours; term paper. Prerequisite: open only to majors with a 3.5 minimum GPA in at least 135 graduation units. (A) Research of an integrative nature (in either "General" or "Area Studies Emphasis" fields of major), guided by thesis advisor chosen by student; (B) Writing of Honors Thesis on topic selected by student in consultation with thesis advisor. (P/NP grading only. Deferred grading only, pending completion of course sequence.)

197T. Tutoring German (2-4)

Lecture—2-4 hours; term paper. Prerequisite: course 22. Tutoring and leading of special discussion sections in first-year language classes. Offers teaching opportunities under guidance of staff after initial observation period. Exposes course participants to all phases of language teaching; instant feedback and discussion. (P/NP grading only.)—Henderson

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

202. Middle High German (4)

Discussion—3 hours; lecture—1 hour. Outline of grammar; selections from Middle High German epic, romance, and lyric poetry.—II. (II.) McConnell

206. Cognitive Grammar for Applied Linguists (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Analysis of grammar and application of cognitive grammar to language instruction. Syntactical problems and analyses relevant to the language the student will teach. Not offered every year.—III. Arnett

210. Techniques of Literary Scholarship (4)

Seminar—3 hours; term paper. The bibliographical, organizational, and methodological tools and resources for advanced, independent research.—I. (I.)

211. Concepts in Literary Theory (4)

Seminar—3 hours; written reports. Advanced course in concepts of literary theory and criticism. Discussion of the emergence of theoretical concepts and their impact on the understanding and appreciation of literary works. Discussion in German and English, readings in German.—II. (II.) Menges

212. Contemporary Approaches to Literary Theory (4)

Seminar—3 hours; term paper. Study of contemporary theoretical approaches such as structuralism, deconstruction, feminism, Marxism/Frankfurt School, and reception theory in conjunction with the works of major authors.—III. (III.) Finney

239. Narrative and Narrative Theory (4)

Seminar—3 hours; term paper. Studies, in a theoretical and literary historical context, major elements of 19th- and 20th-century narrative, such as techniques of framing, refraction, and montage; narrative perspective; mimesis; and self-consciousness. Focuses on paradigmatic prose texts alongside a spectrum of critical approaches. Offered in alternate years.—I. Finney

240. Forms of German Verse (4)

Seminar—3 hours; term paper. The development of German verse from the Middle Ages to the present, with special emphasis on different techniques of text analysis and interpretation. May be repeated for credit with consent of instructor. Offered in alternate years.—II. Bernd

241. The German Drama (4)

Seminar—3 hours; term paper. The major forms of German drama from its origins to the middle of the twentieth century. May be repeated for credit with consent of instructor.—I. (I.) Finney

242. The German Novelle (4)

Seminar—3 hours; term paper. The major German *Novellen*, with particular emphasis on the flowering of this genre in the nineteenth century. May be repeated for credit with consent of instructor.—II. (II.) Bernd

243. Fontane and the Rise of the Modern German Novel (4)

Seminar—3 hours; term paper. Fontane, the father of the modern German novel and the chief German representative of the European novel at its greatest, in the context of the nineteenth-century European political and social scene.—II. (II.) Bernd

244. Gender and Comedy (4)

Seminar—3 hours; term paper. Studies of genre and gender in German-language comedy by male and female writers from the 18th century to the present. Authors treated include Lessing, Kleist, Büchner, Ebner-Eschenbach, Hauptmann, Hofmannsthal, Frisch, Langner, and Jelinek. Offered in alternate years.—III. Finney

252. The Writings of Lessing (4)

Seminar—3 hours; term paper. Study of Lessing's theory of literature with particular emphasis upon his critical attacks on French drama.—I. (I.) Bernd

253. Goethe (4)

Seminar—3 hours; term paper. Study of the origins of Goethe's thought in German Pietism, and his principal artistic, autobiographical, scientific, and philosophical works.—I. (I.) Bernd

254. Schiller (4)

Seminar—3 hours; term paper. A critical analysis of Schiller's major works and his impact on the intellectual climate in Germany during the late eighteenth and early nineteenth centuries.—III. (III.) Menges

255. Aesthetics in the Age of Goethe (4)

Seminar—3 hours; term paper. Prerequisite: German 200A, 200B, 200C. Focuses on the emergence of aesthetic autonomy from eighteenth century normative poetics during the Age of Goethe. This involves the shift from a model based on the imitation of nature (and the Ancients) to a new concept grounded in the individuality of aesthetic experience.—I. (I.) Menges

257. Heinrich von Kleist (4)

Seminar—3 hours; term paper. Kleist's important dramatic and prose works; special attention will be given to the peculiar hermeneutic problems in modern German, French, and Anglo-American Kleist criticism.—III. (III.) Bernd

258. The Novels of Thomas Mann (4)

Seminar—3 hours; term paper. Reading of selected novels with emphasis on aesthetic techniques, originality, ethical and political views, and influence on the contemporary literary scene in Germany.—II. (II.) Menges

259. Studies in Kafka (4)

Seminar—3 hours; term paper. Study of Kafka's narrative techniques with special emphasis in the shorter works on the existential development from its roots in Expressionism.—II. (II.) Finney

260. The Poetry of Rilke (4)

Seminar—3 hours; term paper. Study of the principal motifs, myths, images, and problems in the poetry of Rainer Maria Rilke.—I. (I.) Menges

261. Brecht and the Epic Theater (4)

Seminar—3 hours; term paper. A reading of Brecht's works with emphasis on the ideas which impelled the development of new literary forms and concepts.—III. (III.) Menges

262. Studies in Turn-of-the-Century Culture (4)

Seminar—3 hours; term paper. Investigates literary currents in turn-of-the-century Germany and Austria against the background of contemporaneous developments in psychology, the visual arts, philosophy, and music. Authors treated include Hauptmann, Holz and Schlaf, Schnitzler, T. Mann, Wedekind, Musil,

Hofmannsthal. Offered in alternate years.—(II.) Finney

285. Middle High German Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Extensive reading of Middle High German texts in the original language. Examines linguistic and literary problems. May be repeated for credit when topic differs.—III. (III.) McConnell

288. The Renaissance and Reformation in German Literature (4)

Seminar—3 hours; term paper. The parabolic and didactic style in Germany's literature during the sixteenth century. May be repeated for credit with consent of instructor.—I. (I.) Schaeffer

289. German Literature of the Baroque (4)

Seminar—3 hours; term paper. The "*Elegantiadeal*" and the varying methods used to portray it in seventeenth-century German literature. May be repeated for credit with consent of instructor.—I. (I.) Schaeffer

290. The Enlightenment in German Literature (4)

Seminar—3 hours; term paper. Revolt against the concept of the "*Elegantiadeal*," and evolution of a new literature based on reason and wit. May be repeated for credit with consent of instructor.—I. (I.) Schaeffer

292. Sentimentality and Sturm und Drang in German Literature (4)

Seminar—3 hours; written reports. Reaction to overemphasis on Reason: theories of Hamann and Herder and works of poets such as Lenz, Leisewitz, the early Goethe and Schiller. May be repeated for credit with consent of instructor.—III. (III.) Menges

293. The Classical Age of German Literature (4)

Seminar—3 hours; term paper. Inquiry into the aesthetic and humanistic qualities of Germany's greatest literary epoch. May be repeated for credit with consent of instructor.—III. (III.) Bernd

294. The Romantic Period in German Literature (4)

Seminar—3 hours; term paper. Survey of the works of early nineteenth-century authors in reaction against the age of classicism. May be repeated for credit with consent of instructor.—I. (I.) Menges

295. Poetic Realism in German Literature (4)

Seminar—3 hours; term paper. Outstanding figures in German literature between 1840 and 1890. Important phases in their developments will be treated. May be repeated for credit with consent of instructor.—I. (I.) Bernd

296. Twentieth-Century German Literature (4)

Seminar—3 hours; term paper. Considers the revolt of the Hauptmann generation, Symbolism, Expressionism, and the chief currents of the contemporary scene. May be repeated for credit with consent of instructor.—I. (I.) Menges, Finney

297. Special Topics in German Literature (4)

Seminar—3 hours; term paper. Various special topics in German literature, which may cut across the more usual period and genre rubrics. May be repeated for credit when topic differs.

298. Group Study (1-5)

(S/U grading only.)

299D. Special Study for the Doctoral Dissertation (1-12)

(S/U grading only.)

Professional Courses

390A. The Teaching of German (2)

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—I. (I.) Henderson

390B. The Teaching of German (2)

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—II. (II.) Henderson

390C. The Teaching of German (2)

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—III. (III.) Henderson

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Henderson

Professional Course**400. Tutorial and Instructional Internship (1-3)**

Discussion—1-3 hours. Prerequisite: graduate standing. Apprentice training in ongoing undergraduate literature courses taught by regular staff, with supplementary weekly critique sessions; intern leadership of discussion sections under staff supervision. May be repeated for credit.—I, II, III. (I, II, III.)

Global and International Studies

(College of Letters and Science)

The interdisciplinary minor in Global and International Studies will enable students not only to learn about global and international issues at UC Davis, but also to gain first-hand academic experience abroad. The minor is designed for students who intend to focus their interest in global and international studies in either the Arts and Humanities or the Social Sciences.

Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of study. Each proposal must be approved by the Academic Advisory Committee.

The minor is sponsored by the Humanities Program. For information, contact the Director of the Humanities Program or the Director of the Education Abroad Center.

Minor Program Requirements:

UNITS

Global and International Studies24

Arts and Humanities Emphasis:

One course from Anthropology 4, 20, International Relations 1, Political Science 3 or Sociology 54

One upper division UC Davis general course on global or international studies in the Arts and Humanities3-4

Course cluster requirement.....16-17

The minor requires the selection of inter-related courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies in the Arts and Humanities.

Suggested course clusters include:

1) Country or region-specific courses: Western Europe; Russian and East/Central Europe; Asia and the Pacific; Latin and South America; Africa and the Middle East; Jewish Studies; specific countries.

or

2) Courses clustered around a thematic field in global and international studies: people and nationalities; the individual and society, arts, language, literature and culture.

Study abroad and international internships. The course cluster requirement may be met in one of two ways: 1) completion of a minimum of 16-17 units in the course cluster emphasis by taking UC Davis

accredited courses while participating in EAP or another study abroad program, or 2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Those students who are unable to study abroad or participate in an international internship may fulfill the requirement by taking appropriate global/international courses at UC Davis that are approved by the Academic Advisory Committee.

Social Science Emphasis:

One course from Anthropology 20, International Relations 1, Political Science 3, or Sociology 54

One upper division UC Davis general course on global or international studies in the Social Sciences3-4

Course cluster requirement.....16-17

The minor requires the selection of inter-related courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies in the Social Sciences.

Suggested course clusters for the Social Science Emphasis:

1) Country or region-specific courses in the Social Sciences: Western Europe; Russian and East/Central Europe; Asia and the Pacific; Latin and South America; Africa and the Middle East; Jewish Studies; specific countries.

or

2) Courses clustered around a thematic field in global and international studies: world trade and development; peace and security; global environment, health, and natural resources.

Study abroad and international internships. This requirement may be met in one of two ways: 1) completion of a minimum of 16-17 units in the course cluster emphasis by taking UC Davis accredited courses while participating in EAP or another study abroad program, or 2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Those students who are unable to study abroad or participate in an international internship may fulfill the requirement by taking appropriate global/international courses at UC Davis that are approved by the Academic Advisory Committee.

Restriction. No more than two courses from a single UC Davis department may be offered in satisfaction of the minor requirements.

Foreign language study. Students are strongly encouraged to study a foreign language, particularly the language of the country in which and about which they intend to study.

The Major Program

The history major develops critical intelligence and fosters an understanding of ourselves and our world through the study of the past—both remote and recent.

The Program. A student electing a major in History may complete Plan I or Plan II. Plan I enables students to receive a broad education in histories of several geographic areas. Plan II encourages interested students, including those preparing for graduate work in history, to enroll in a seminar, to undertake independent work, and to study the history of historical thought as part of the major. Students preferring more active engagement in research and writing are encouraged to follow Plan II.

Career Alternatives. A degree in history is excellent preparation for a professional career such as teaching, law, journalism, public administration, or business management. Professional schools in these

and related fields are looking for students who can weigh conflicting evidence, evaluate alternative courses of action or divergent points of view, and express conclusions logically in everyday language. These analytical skills are stressed in history classes, and their mastery gives the history student a solid preparation for subsequent training in a specialized career.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter (Plan I or II).....	20
Five lower division courses, including at least two from each of two of the following fields.....	20
(a) <i>Western Civilization</i> : History 3, 4A, 4B, 4C, 10, 30	
(b) <i>Asian Civilization</i> : History 8, 9A, 9B	
(c) <i>United States and Latin America</i> : History 17A, 17B, 72A, 72B, 85, 86	
(d) <i>Africa</i> : History 15	
Depth Subject Matter—Plan I.....	40-41
Four upper division courses from one of the fields of concentration listed below	16
Three upper division courses from one of the other fields of concentration listed below	12
Two upper division courses from a field or fields other than those chosen to satisfy the two preceding requirements	8
One course from the following: History 101 or 102 or 103 (in field of concentration)....	4-5
Total Units for the Major, Plan I	60-61
Depth Subject Matter—Plan II.....	42
Four upper division courses from one of the fields of concentration listed below. Include a two-quarter sequence of courses	16
Three upper division courses from one of the other fields listed	12
History 101	5
History 102 in field of concentration (in exceptional circumstances, a student may, with the permission of an adviser, take the seminar in another field).....	5
History 103 in field of concentration.....	4
Total Units for the Major, Plan II.....	62
Fields of Concentration	
a. <i>Pre-Industrial Europe</i> : History 102A, 102B, 102C, 102D, 102P, 102X, 111A, 111B, 111C, 121A, 121B, 121C, 122, 125, 130A, 130B, 130C, 131A, 131B, 131C, 133, 135A, 136, 139A, 144A, 148A, 151A, 151B.	
b. <i>Modern Europe</i> : History 102E, 102F, 102I, 102X, 134A, 135B, 138A, 138B, 138C, 139B, 141, 142, 143, 144B, 145, 146A, 146B, 147A, 147B, 147C, 148B, 149A, 151C, 151D.	
c. <i>United States History</i> : History 102K, 102L, 102M, 102X, 169A, 169B, 170A, 170B, 170C, 171, 173, 174A, 174B, 174C, 174D, 175A, 175B, 175C, 176A, 176B, 177A, 177B, 178, 180A, 180B, 180C, 181, 183A, 183B, 185A, 185B, 187A, 187B, 188A, 188B, 189A, 189B, 189C.	
d. <i>Asian History</i> : History 102G, 102H, 102N, 102Q, 102R, 102X, 110, 191A, 191B, 191C, 191D, 191E, 191F, 194A, 194B, 194C, 194D, 194E, 196A, 196B.	
e. <i>African History</i> : History 102O, 102X, 110, 115A, 115B, 115C, 116.	
f. <i>Latin American History</i> : History 102J, 102X, 110, 161A, 161B, 162, 163A, 163B, 165, 166A, 166B, 168, 169A, 169B.	
g. Within broad fields, a student may wish to concentrate some of the courses on a particular area or period, such as China or Great Britain or Medieval Europe. Special approval is not required.	

Major Advisers. See the department's Web site for updated information.

History and Philosophy of Science. Courses from the History and Philosophy of Science program may count toward the History major. History and Philosophy of Science 130A fulfills upper division requirements in the field of pre-industrial Europe. History and Philosophy of Science 130B, 150, and 180 fulfill upper division requirements in either the U.S. or Modern Europe field.

Students can create a field in the History of Science upon consultation with a faculty adviser. They may draw upon the relevant History courses (History 85, 135A, 135B, 139A, 139B, 185A, and 185B) as well as History and Philosophy of Science offerings to do so.

Consult the History and Philosophy of Science program for a more detailed description of course offerings this area and the minor in History and Philosophy of Science.

Minor Program Requirements:

The minor in History consists of five upper division courses chosen so that at least three courses are in one field and at least one course is in another field. The two fields shall be chosen from among those defined in the catalog for the major. However, students may also, in consultation with and with the authorization of a faculty adviser, define other thematic fields.

	UNITS
History.....	20
At least 20 units of upper division history courses	20
Examples of minor with thematic emphasis: Pre-Law (British and American Political and Constitutional Development); The Twentieth Century; The History of Ideas in Society.	

Minor Advisers. Same as major advisers.

Honors and Honors Program. A student becomes eligible for graduation with honors by meeting the minimum GPA (usually 3.5) and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the History Department honors program with a GPA of 3.5 or above and write a thesis that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project, interviews, and faculty recommendations. Students admitted to the program must complete the History 104A, 104B, 104C sequence of honors courses, which requires the completion of a senior honors thesis. Students who anticipate seeking admission to the honors program are urged to complete at least one History 102 (undergraduate seminar) before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year. Students may follow either Plan I or Plan II described above, and may substitute History 104B and 104C for any courses in their program other than History 102.

Students who anticipate pursuing graduate work in history or a teaching credential, and who do not wish to opt for the research emphasis embodied in the honors program, are encouraged to select Plan II of the major.

Study Abroad and the History Major. The department strongly encourages interested students to pursue their studies abroad. While there are no specific required courses or prerequisites, students are urged to take at least one history course that touches upon the geographic area where they plan to study abroad before departing. To receive a history degree from UC Davis, students must complete at least 18 upper division units in the history major at UC Davis (which can also include History 101, 102, 103). The remaining major requirements can be fulfilled abroad

provided that (a) the course should be evaluated as at least four UC Davis units by the Office of the University Registrar, (b) the course should be considered upper division by the standards set forth by the Education Abroad Program, or (c) the student presents copies of the course work, syllabus, and writing assignments to the department's liaison person with the EAP office for approval. Note: students who wish to receive credit for courses taken abroad under programs other than EAP may petition the Undergraduate Program Committee to do so.

Teaching Credential Subject Representative. See also the section on the Teacher Education Program.

Waiver Program for Single-Subject Teaching Credential in History. The Department of History is currently working with the School of Education to develop a program of study to satisfy the California Teaching Commission's Subject Matter Competency requirement for the single subject credential in history/social science. For more information, contact Nancy McTyghe at the Area 3 History and Cultures Project, 175 Kerr Hall.

Graduate Study. The Department of History offers programs of study and research leading to the M.A. and Ph.D. degrees in history. Detailed information may be obtained by writing to the Graduate Adviser, Department of History.

Graduate Advisers. See the department's Web site for updated information.

American History and Institutions. This University requirement can be satisfied by passing any one of the following courses in History: 17A, 17B, 72A, 72B, 170A, 170B, 170C, 171A, 171B, 174A, 174B, 174C, 175A, 175B, 175C, 176A, 176B, 177A, 177B, 180A, 180B, 183A, 183B. The upper division courses may be used only with the consent of the instructor. (See also under University requirements.)

Courses in History (HIS)

Lower Division Courses

3. Cities: A Survey of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Survey of western civilization, focusing on nine cities, at the period of their greatest creativity: Athens, Rome, Constantinople, Paris, Florence, Amsterdam, London, Berlin, Moscow. Illustrated with slides, music, and optional films. GE credit: ArtHum.—II. (II.)

4A. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Growth of western civilization from late antiquity to the Renaissance. GE credit: ArtHum, Wrt.—I. (I.)

4B. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Development of western civilization from the Renaissance to the Eighteenth Century. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.)

4C. History of Western Civilization (4)

Lecture—3 hours; discussion—1 hour. Development of Western Civilization from the Eighteenth Century to the present. GE credit: ArtHum, Wrt.—I, II. (I, II.)

7. Ethnicity, Race, and Identity in Latin America (4)

Lecture—3 hours; discussion—1 hour. Race in Latin America from the Conquest to contemporary social movements. Questions about identities and boundaries using a variety of materials to explore race and ethnicity over time. GE credit: ArtHum, Wrt.—I.

8. History of Indian Civilization (4)

Lecture—3 hours; discussion—1 hour; written reports. Survey of Indian civilization from the rise of cities (ca. 2000 B.C.) to the present, emphasizing themes in religion, social and political organization, and art and literature that reflect cultural interaction and change. GE credit: ArtHum, Div.—III. (III.)

9A. History of East Asian Civilization (4)

Lecture—3 hours; discussion—1 hour. Surveys traditional Chinese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary China are provided. GE credit: ArtHum, Div, Wrt.—II, III. (II, III.)

9B. History of East Asian Civilization (4)

Lecture—3 hours; discussion—1 hour. Surveys traditional Japanese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary Japan are provided. GE credit: ArtHum, Div, Wrt.—I. (I.)

10B. World History, c. 1350-1850 (4)

Lecture—3 hours; discussion—1 hour. Major topics in world history from the 14th century to the beginning of the 19th century. Topics will vary but may include oceans as systems of human communication and conflict; the global consequences of "industrious revolutions" in Europe and Asia, etc. Offered in alternate years. GE credit: ArtHum, Wrt.—II.

10C. World History III (4)

Lecture—3 hours; discussion—1 hour. Major topics from world history of the 19th and 20th centuries, emphasizing the rise and fall of Western colonial empires; Cold War and the superpowers; the spread of the nation-states; and process of globalization. GE credit: ArtHum, Wrt.—III. (III.)

15. Introduction to African History (4)

Lecture—3 hours; discussion—1 hour. Examination of the long-range historical context as background to current conditions in Africa. Includes the early development of African civilizations, the slave trade and its abolition, 20th century colonization, and African independent states. GE credit: ArtHum, Div, Wrt.—I. (I.)

17A. History of the United States (4)

Lecture—3 hours; discussion—1 hour. The experience of the American people from the Colonial Era to the Civil War. GE credit: ArtHum, Div, Wrt.—I, II. (I, II.)

17B. History of the United States (4)

Lecture—3 hours; discussion—1 hour. The experience of the American people from the Civil War to the end of the Cold War. Not open for credit to students who have completed course 17C. GE credit: ArtHum, Div, Wrt.—II, III. (II, III.)

72A. Social History of American Women and the Family (4)

Lecture—3 hours; discussion—1 hour. Social and cultural history of women, sex roles and the family from colonial America until the late nineteenth century emphasizing changes resulting from the secularization, commercialization, and industrialization of American society. GE credit: ArtHum, Div, Wrt.—I. (I.)

72B. Social History of American Women and the Family (4)

Lecture—3 hours; discussion—1 hour. Social and cultural history of women, sex roles, and the family in twentieth-century America, emphasizing female reformers and revolutionaries, working class women, consumerism, the role of media, the "feminine mystique," changes in family life, and the emergent women's movement. GE credit: ArtHum, Div, Wrt.—II. (II.)

85. Nature, Man, and the Machine in America (4)

Seminar—4 hours; term paper. Prerequisite: consent of instructor. History of the attitudes and behavior of Americans toward their natural environment and their technology, from colonial times to the present. No final examination. Limited enrollment. GE credit: ArtHum.

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)
(P/NP grading only.)**Upper Division Courses****101. Introduction to Historical Thought and Writing (5)**

Lecture/discussion—4 hours; term paper. Prerequisite: consent of instructor. Study of the history of historical thought and writing, analysis of critical and speculative philosophies of history and evaluation of modes of organization, interpretation, and style in historical writing.—III. (III.) Landau

102A-R, X. Undergraduate Proseminar in History (5)

Seminar—3 hours; term paper. Designed primarily for history majors. Intensive reading, discussion,

research, and writing in selected topics in the various fields of history. (A) Ancient; (B) Medieval; (D) Modern Europe to 1815; (E) Europe since 1815; (F) Russia; (G) China to 1800; (H) China since 1800; (I) Britain; (J) Latin America since 1810; (K) American History to 1787; (L) United States, 1787-1896; (M) United States since 1896; (N) Japan; (O) Africa; (P) Christianity and Culture in Europe, 50-1850; (Q) India; (R) Muslim Societies; (X) Comparative History, selected topics in cultural, political, economic, and social history that deal comparatively with more than one geographic field. May be repeated for credit. Limited enrollment.—I, II, III. (I, II, III.)

103. Topics in Historical Research (4)

Discussion—3 hours; individual consultation with instructor; term paper. Prerequisite: consent of instructor. Individual research resulting in a research paper on a specific topic in one of various fields of history. May be repeated for credit.

104A. Introduction to Historical Research and Interpretation (4)

Seminar—3 hours; term paper. Prerequisite: acceptance into History Department Honors Program. Directed reading and research aimed at preparing students to select appropriate topics and methodologies for a senior honors essay and to situate their topics within a meaningful, broad context of historical interpretations. Culminates in the submission of a full prospectus for an honors essay.—I. (I.) Brower

104B. Honors Thesis (4)

Tutorial—4 hours. Prerequisite: course 104A. Research in preparation of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.)—II.

104C. Honors Thesis (4)

Tutorial—4 hours. Prerequisite: course 104A and 104B. Completion of a senior honors thesis under the direction of a faculty adviser.—III.

110. Themes in World History (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; at least 8 units in history. Issues in world history from 1400 to the present. Topics will emphasize the interaction of diverse regions of the world as well as common patterns of historical change. Offered in alternate years. GE credit: ArtHum.

111A. Ancient History (4)

Lecture—3 hours; discussion or paper (student option). History of ancient empires of the Near East and of their historical legacy to the Western world. GE credit: ArtHum, Wrt.—II. (II.) Spyridakis

111B. Ancient History (4)

Lecture—3 hours; discussion or paper (student option). Political, cultural and intellectual study of the Greek world from Minoan-Mycenaean period to end of Hellenistic Age. GE credit: ArtHum, Wrt.—III. (III.) Spyridakis

111C. Ancient History (4)

Lecture—3 hours; discussion or paper (student option). Development of Rome from earliest times. Rise and fall of the Roman Republic; the Empire to 476 A.D. GE credit: ArtHum, Wrt.—II. (II.) Spyridakis

112A. Topics in Pre-Modern Jewish History (4)

Lecture—3 hours; term paper. Topics in the history of Jews from the Biblical era to the eras of Jewish emancipation. Topics can be framed chronologically (eg., medieval Jewry) or thematically (eg., trade and Jewish communities). May be repeated once for credit. GE credit: ArtHum, Div, Wrt.—I. (I.)

112B. Topics in Modern Jewish History (4)

Lecture—3 hours; term paper. Topics in the history of Jews from the era of Jewish emancipation to the present. Topics can be framed chronologically or thematically (eg. Zionism, assimilation, the post Holocaust Diaspora). May be repeated once for credit. GE credit: ArtHum, Div, Wrt.—III. (III.)

115A. History of West Africa (4)

Lecture—3 hours; written reports. Prerequisite: courses 4A, 4B, 4C recommended. Introductory survey of the history of West Africa and the Congo region from the earliest times to the present. GE credit: ArtHum, Div, Wrt.—I. (I.) Brantley

115B. History of East and Central Africa (4)

Lecture—3 hours; written reports. Prerequisite: course 115A recommended. Introductory survey of the history of east and central Africa from 1000 to the present. This course is a part of an interdisciplinary East African sequence which includes History 115B (winter) and Political Science 138. GE credit: ArtHum, Div, Wrt.—II. (II.) Brantley

115C. History of Southern Africa, Swaziland, Lesotho, and Botswana from 1500 to the Present (4)

Lecture—3 hours; written reports. Prerequisite: courses 115A and 115B recommended. Introductory survey of the history of Southern Africa, including South Africa, Swaziland, Lesotho, and Botswana from 1500 to the present. GE credit: ArtHum, Div, Wrt.—II. (II.) Brantley

115D. History and Legacy of Colonialism in Africa (4)

Lecture—3 hours; term paper. Prerequisite: course 115A, 115B or 115C recommended. History of the implementation, development, and legacy of European Colonialism in Africa. A comparison of British, Belgian, French, and Portuguese colonial efforts and impacts. GE credit: SocSci, Div, Wrt.—I. (I.) Brantley

116. African History: Special Themes (4)

Lecture—3 hours; term paper. Prerequisite: courses 115A and 115B recommended. Themes of African history, such as African states and empires, slave trade, relationship of Egypt to rest of Africa, Bantu origins and migrations, and French policy of Assimilation and Association. GE credit: ArtHum.—Brantley

121A. Medieval History (4)

Lecture/discussion and panel presentations—3 hours. European history from "the fall of the Roman Empire" to the eighth century. GE credit: ArtHum, Wrt.—I. (I.)

121B. Medieval History (4)

Lecture/discussion and panel presentations—3 hours. European history from Charlemagne to the twelfth century. GE credit: ArtHum, Wrt.—III. (III.)

121C. Medieval History (4)

Lecture/discussion and panel presentations—3 hours. European history from the Crusades to the Renaissance. GE credit: ArtHum, Wrt.—I. (I.) Cadden

122. Selected Themes in Medieval History (4)

Lecture—3 hours; term paper. Each offering will focus on single major theme, such as medieval agrarian history, feudalism, the family, medieval Italy, or the Crusades. Readings include original sources in English translation and modern works. May be repeated for credit. GE credit: ArtHum.—III. (III.) Cadden

125. Topics in Early Modern European History (4)

Laboratory/discussion—3 hours; term paper. Prerequisite: course 4B recommended. Social and cultural history, 1300-1800. Topics such as medieval and Renaissance Italy, early modern Italy, Ancien Regime France, family and sexuality, and material culture and daily life. May be repeated for credit. GE credit: ArtHum, Wrt.—III. (III.) Harkness

130A. Christianity and Culture in Europe: 50-1450 (4)

Lecture—3 hours; written report or research paper. A history of the ideas and institutions of Christianity and their impact on the late Roman Empire and medieval Europe in terms of outlook on life, art, politics and economics. GE credit: ArtHum, Div, Wrt.—II. (II.)

130B. Christianity and Culture in Europe: 1450-1600 (4)

Lecture—3 hours; written report or research paper. A history of the Lutheran, Zwinglian-Calvinist, Radical, Anglican, and Catholic Reformations as foundation stones of a new culture in Europe, with special attention to the interconnections between the revival of antiquity and the different reform movements. GE credit: ArtHum.—II. (II.)

130C. Christianity and Culture in Europe: 1600-1850 (4)

Lecture—3 hours; written report or research paper. A survey of the intellectual, cultural and political reori-

entation of European society in the aftermath of the Wars of Religion. "Secularization" will be discussed in the context of the Enlightenment and Romanticism. GE credit: ArtHum.

131A. Early Modern European History (4)

Lecture—3 hours; written reports. Prerequisite: courses 4A and 4B recommended. Western European history from about 1350 to about 1500. GE credit: ArtHum.—Stuart

131B. European History During the Renaissance and Reformation (4)

Lecture—3 hours; term paper. Survey of European society, politics, and culture from the late 15th through the early 17th centuries, with particular focus on the Italian and Northern Renaissance, on the Protestant Reformation, and the Catholic Counter Reformation. GE credit: ArtHum, Wrt.—II. (II.) Stuart

131C. The Old Regime: Absolutism, Enlightenment and Revolution in Europe (4)

Lecture—3 hours; term paper. Survey of European society, politics, and culture in the 17th and 18th centuries, focusing on religious warfare, absolutism, Scientific Revolution, Enlightenment and the growth of religious tolerance, the French Revolution and the collapse of the old regime. GE credit: ArtHum, Wrt.—II. (II.) Stuart

132. Crime and Punishment in Early Modern Europe (4)

Lecture—3 hours; term paper. Deviance and crime in early modern Europe, contrasting imaginary crimes, e.g. witchcraft, with "real" crimes such as highway robbery and infanticide. Examines impact of gender, sexual orientation, ethnicity, and class in processes of criminalization. GE credit: SocSci, Div, Wrt.—II. (II.) Stuart

133. The Age of Ideas (4)

Lecture—3 hours; written reports. The Enlightenment and its background in the seventeenth century. GE credit: ArtHum.

134A. The Age of Revolution (4)

Lecture—3 hours; written reports. Ideas and institutions during the French Revolution and the Napoleonic era. GE credit: ArtHum.—I. (I.) Margadant

135A. History of Science to the 18th Century (4)

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Survey of the historical development of science, technology, and medicine from the ancient world to the eighteenth century, with special emphasis on Isaac Newton as the culmination of the seventeenth century scientific revolution. GE credit: ArtHum.—Cadden, Harkness

135B. History of Science, 18th to 20th Centuries (4)

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Survey of the historical development of scientific thought in geology, biology, chemistry, physics, and cosmology from the eighteenth to the twentieth century, with special emphasis on emergence of broad explanatory principles that serve more than one science. GE credit: ArtHum.—I. (I.) Harkness

136. Scientific Revolution (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 135A or 135B recommended. History of science in Western Europe (1400-1750). Investigates the changing definitions of science in the age of Copernicus, Versalius, Harvey, Galileo and Newton. Considers the evolution of new ideas about nature, experiment, observation, and scientific theory. GE credit: ArtHum, Wrt.—III. (III.) Harkness

138A. Russian History: The Rise of the First Empire, 1500-1881 (4)

Lecture—3 hours; term paper. Prerequisite: courses 4B and 4C recommended. Expansion of the Russian state in Muscovite and imperial era. Emphasis on autocratic rule, the incorporation of non-Russian peoples, and emergence of Russia as a Great Power. Only two units of credit will be allowed to students who have completed former course 137B. GE credit: ArtHum, Wrt.—II. (II.) Brower

138B. Russian History: The Russian Revolution, 1880-1917 (4)

Lecture—3 hours; term paper. Prerequisite: courses 4B and 4C recommended. History of the fall of the Russian Empire and of the Revolution of 1917. Not open for credit to students who have received credit for former course 138. GE credit: ArtHum, Wrt.—I. (I.) Brower

138C. Russian History: The Rise and Fall of the Soviet Union, 1917 to the Present (4)

Lecture—3 hours; term paper. Prerequisite: courses 4B and 4C recommended. The emergence of the Soviet Union as a socialist system and a Great Power; the decline and collapse of the Soviet Union and the formation of independent nation states in its place. Not open for credit to students who have completed former course 137C. GE credit: ArtHum, Wrt.—III. (III.) Brower

139A. Medieval and Renaissance Medicine (4)

Laboratory/discussion—3 hours; term paper. The history of medicine, circa 1000-1700. Revival of ancient medicine; role of the universities; development of anatomy, chemistry and natural history; ideas about the body; cultural understanding of disease; hospital and the public health system. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt.—Cadden

139B. Medicine, Society, and Culture in Modern Europe (4)

Lecture—2 hours; discussion—1 hour; term paper. History of European medicine, 18th to 20th centuries, by examining the development of medical knowledge in epidemiology and anatomy; function of this knowledge, how it changed with technological breakthroughs and professionalization; and role of medicine in attitudes toward poverty, women, race, disease. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt.—(III.) Kudlick

140. The Rise of Capitalism in Europe (4)

Lecture—3 hours; term paper. Prerequisite: course 4B or 4C. Comparative analysis of major interpretations of the rise of merchant capitalism during the Middle Ages and Renaissance; European expansion overseas, 1450-1815; the transition to modern capitalism via industrial revolution. Interplay of social, political, cultural, and economic history. Offered in alternate years. GE credit: SocSci.—III. Hagen

141. France Since 1815 (4)

Lecture—3 hours; term paper. GE credit: ArtHum, Wrt.—II. (II.) Margadant

142A. History of the Holocaust (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Topics include comparative genocide, medieval and modern antisemitism, modern German history, the rise of Nazism, Jewish life in Europe before the Nazi period, and the fate of the Jewish communities and other persecuted groups in Europe from 1933-1945. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I. Biale

142B. The Memory of the Holocaust (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Examination of the literary, philosophical, theological and artistic responses to the Holocaust of the European Jews. Exploration of how memory is constructed, by whom and for what purposes. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Biale

143. History of Eastern Europe and the Balkans (4)

Lecture—3 hours; essays. History of the Baltic, Danubian, and Balkan lands since the Middle Ages. National cultures and conflicts in the Polish Commonwealth and the Habsburg and Ottoman Empires; nationalist movements, 1789-1914; the twentieth century, including an analysis of the contemporary scene. GE credit: ArtHum, Div, Wrt.—II. (II.) Hagen

144A. History of Germany, 1450 to 1789 (4)

Lecture—3 hours; extensive writing. Survey of early modern Germany, 1450 to 1789, covering the theology and social history of the Reformation, the Peasants War of 1525, religious warfare, state building and absolutism, the rise of Prussia, Austro-Prussian dualism, and the German Enlightenment.—III. (III.) Stuart

144B. History of Germany since 1789 (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 144A recommended. History of the German lands in the age of the French Revolution; 19th-century liberalism, nationalism, and industrialization; the World Wars, National Socialism, and the Holocaust; east and west Germany in the Cold War; the post-reunification scene. (Not open for credit to students who have completed former course 144.) GE credit: ArtHum, Div, Wrt.—II. (II.) Hagen

145. War and Revolution in Europe, 1789-1918 (4)

Lecture—3 hours; term paper. Survey of revolutionary movements, international crises, and wars in Europe from the French Revolution to World War I. GE credit: ArtHum, Wrt.—III. (III.) Margadant

146A. Europe in the Twentieth Century (4)

Lecture—3 hours; term paper. Survey of the history of Europe from 1919 to 1939. GE credit: ArtHum, Wrt.—II. (II.) von Henneberg

146B. Europe in the Twentieth Century (4)

Lecture—3 hours; term paper. Survey of the history of Europe since 1939. GE credit: ArtHum, Wrt.—III. (III.) von Henneberg

147A. European Intellectual History, 1800-1870 (4)

Lecture—3 hours; term paper. European thought in the early industrial era. Shifting cultural frameworks, from romanticism to scientism; liberal and socialist reactions to social change. Focus on the work of Goethe, Hegel, J.S. Mill, Marx, Darwin and Flaubert. GE credit: ArtHum or SocSci, Wrt.—II. (II.) Saler

147B. European Intellectual History, 1870-1920 (4)

Lecture—3 hours; term paper. Cultural and intellectual watershed of the late nineteenth and early twentieth centuries. Emergence of modern art and literature; psychoanalysis and the new social sciences. Focus on the work of Baudelaire, Wagner, Nietzsche, Freud, Weber and Kafka. GE credit: ArtHum or SocSci, Wrt.—II. (II.) Saler

147C. European Intellectual History, 1920-1970 (4)

Lecture—3 hours; term paper. European thought and culture since World War I. Coverage includes: literature and politics; Communism and Western Marxism; Fascism; Existentialism; Structuralism; Feminism. Particular attention to Lenin, Brecht, Hitler, Sartre, Camus, Beckett, Marcuse, Foucault, Woolf and de Beauvoir. GE credit: ArtHum or SocSci, Div, Wrt.—III. (III.) Saler

148A. Women and Society in Europe: 1500-1789 (4)

Lecture—3 hours; term paper. Prerequisite: course 4B recommended. Roles and perceptions of women from the Renaissance to the French Revolution. Emphasis on social and economic factors as well as on discussions of women in the writings of political theorists and social commentators. GE credit: ArtHum, Div, Wrt.—II. (II.) Harkness, Kudlick

148B. Women and Society in Europe: 1789-1920 (4)

Lecture—3 hours; term paper. Prerequisite: course 4C and 148A recommended. Roles and perceptions of women from the French Revolution to World War I, primarily in France and England. Emphasis on social and economic developments within a loosely chronological and comparative framework. GE credit: ArtHum, Div, Wrt.—II. (II.) Kudlick

Lecture—3 hours; term paper. Prerequisite: course 148B recommended. The history of 20th-century Europe from the perspective of women and the family, and of sexual and gender relations. Emphasis on the impact on women of major events and movements, such as World War I, fascism, Soviet communism, World War II, the welfare state, feminism, and mass culture. GE credit: ArtHum, Div, Wrt.—III. (III.)

149. Comparative Cultural History of Modern Britain and France, 1880-1914 (4)

Lecture—3 hours; term paper. Cultural comparison of the histories of Britain and France during the fin de

siecle. Addresses cultural debates of the period (including gender, race, class) and the practices of cultural history. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—II. Kudlick, Saler

151A. England: The Middle Ages (4)

Lecture—3 hours; term paper. Prerequisite: course 4A recommended. Origins of England to the accession of the Lancastrians. Survey includes: impact of Norman Conquest on Anglo-Saxon institutions; rise of the Church, common law, parliament, and the economy; thought, arts, and literature to the age of Chaucer and Wyclif. GE credit: ArtHum, Wrt.—III. (III.)

151B. England: The Early Modern Centuries (4)

Lecture—3 hours; term paper. Prerequisite: courses 4A, 4B; course 151A recommended. From Lancaster and York to the Glorious Revolution. Includes growth of the Church of England; beginnings of modern worldwide economy; rise of the gentry and parliament; thought, arts, and literature in the times of More, Shakespeare, Hobbes, Wren, and Newton. GE credit: ArtHum, Wrt.

151C. Eighteenth-Century England (4)

Lecture—3 hours; term paper. English history from the Glorious Revolution to the French Revolution. Examination of the transformation of one of Europe's most politically unstable kingdoms into the firmly established constitutional monarchy which provided an environment fit to engender the industrial revolution. GE credit: ArtHum, Wrt.—I. (I.) Landau

151D. Industrial England (4)

Lecture—3 hours; term paper. English history from Waterloo to the Battle of Britain; the rise and continuance of the first industrial nation, examining the transformation of landed to class society, oligarchy to democracy and bureaucracy. Bentham to Bloomsbury, empire to commonwealth. GE credit: ArtHum, Div, Wrt.—Landau

160. Spain and America in the 16th Century (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. The Atlantic world in the 16th century, particularly the transcultural and reciprocal social and economic relations between Spain and America in the course of colonization. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.) Bauer

161A. History of Colonial Spanish America (4)

Lecture/discussion—3 hours; written reports. Pre-Columbian civilizations of Middle America and the Andean region (mainly Aztec and Inca); the impact of European conquest and colonization; the formation of a hybrid culture. Extensive use of photographic slides. GE credit: ArtHum, Div, Wrt.—I. (I.) Bauer

161B. Latin American History (4)

Lecture/discussion—3 hours; written reports. Evolution of modern Latin America: export economies; oligarchic rule; reform and revolution; the difficulties of the twentieth century. Emphasis on Mexico, Cuba, the Andean region, Chile, and Argentina. Photographic slides. GE credit: ArtHum, Div, Wrt.—II. (II.) Bauer, C. Walker

162. History of the Andean Region (4)

Lecture/discussion—3 hours; written and/or oral reports. History of the Andean region, the area that now comprises modern Peru, Bolivia, and Chile, from the beginning of human settlement to the present. GE credit: ArtHum, Div, Wrt.—III. (III.) C. Walker

163A. History of Brazil (4)

Lecture—3 hours; written reports. The history of colonial and imperial Brazil from 1500 to 1889. Offered in alternate years. GE credit: ArtHum.—III.

163B. History of Brazil (4)

Lecture—3 hours; written reports. The history of the Brazilian republic from 1889 to the present. Offered in alternate years. GE credit: ArtHum.—III.

164. History of Chile (4)

Lecture—3 hours; term paper. Prerequisite: course 161A, 161B, 165, or 168 recommended. Emphasis on the history of Chilean political economy from 1930 to the present. Various strategies of development (modernization, Marxism, Neo-Liberalism); the rise of

mass politics; the course of foreign relations; and the richness of Chilean literature. Offered in alternate years. GE credit: ArtHum.—III. Bauer

165. Latin American Social Revolutions (4)

Lecture—3 hours; written reports. Major social upheavals since 1900 in selected Latin American nations; similarities and differences in cause, course, and consequence. GE credit: ArtHum.—II. (II.) Bauer

166A. History of Mexico to 1848 (4)

Lecture/discussion—3 hours; written and/or oral reports. Political, economic, and social development of pre-Columbian, colonial and national Mexico to 1848. Offered in alternate years. GE credit: ArtHum.—(III.) Resendez

166B. History of Mexico Since 1848 (4)

Lecture/discussion—3 hours; written and/or oral reports. History of Mexico from 1848 to the present. Offered in alternate years. GE credit: ArtHum.—I. (I.) Resendez

167. Modern Latin American Cultural and Intellectual History (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Introduction to the cultural and intellectual history of modern Latin America including architecture, cinema, painting, music, and literature. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Walker, Resendez

168. History of Inter-American Relations (4)

Lecture—3 hours; written reports. Diplomatic history of Latin America since independence, intra-Latin American relations, relations with the United States, participation in international organizations, and communism in Latin America. GE credit: ArtHum.—III. (III.)

169A. Mexican-American History (4)

Lecture/discussion—3 hours; written and/or oral reports. Economic, social, religious, cultural and political development of the Spanish-speaking population of the Southwestern United States from about 1800 to 1910. GE credit: ArtHum, Div, Wrt.—II. (II.) Oropeza

169B. Mexican-American History (4)

Lecture/discussion—3 hours; written and/or oral reports. Role of the Mexican and Mexican-American or Chicano in the economy, politics, religion, culture and society of the Southwestern United States since 1910. GE credit: ArtHum, Div, Wrt.—I. (I.)

170A. Colonial America (4)

Lecture—3 hours; term paper. Colonial society from 1607 to the American Revolution, with emphasis on European expansion, political, social and economic foundations, colonial thought and culture, and imperial rivalry. GE credit: ArtHum, Div, Wrt.—Smolenski, Taylor

170B. The American Revolution (4)

Lecture—3 hours; term paper. Analysis of the Revolutionary epoch with emphasis on the structure of British colonial policy, the rise of revolutionary movements, the War for Independence and its consequences, and the Confederation period. GE credit: ArtHum, Div, Wrt.—Smolenski, Taylor

170C. The Early National Period, 1789-1815 (4)

Lecture—3 hours. Political and social history of the American republic from the adoption of the Constitution through the War of 1812 and its consequences. GE credit: ArtHum.—III. (III.) Deyle

171A. Jacksonian America (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. The political and social history of the United States from the end of the War of 1812 to the Compromise of 1850. How the market revolution transformed American life, and led the nation towards war. GE credit: ArtHum, Div, Wrt.—II. (II.) Deyle

171B. Civil War and Reconstruction (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Examination of the political and social history of the United States from the Compromise of 1850 to the end of Reconstruction in 1876. Causes of the war, the war itself, and the problems of reconstruction after the war. GE credit: ArtHum, Div, Wrt.—III. (III.) Deyle

171BF. The Civil War in American Film (1)

Discussion—1 hour; film viewing. Prerequisite: course 171B concurrently. Viewing and discussion of films with short writing assignments. (P/NP grading only)—II, III. (II, III.) Deyle

171D. Selected Themes in 19th Century American History (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Interpretative overview of a single topic in the history of the United States in the 19th century. Sample topics include social history, the 1850s, and southern history. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Wrt.—III.

172. American Environmental History (4)

Lecture—3 hours; term paper. Prerequisite: course 17A. Examination of changing relations between people and nature in the area of the current United States from pre-Columbian times to the present. Topics include ecological change; perceptions of nature; social conflicts over "proper" uses of nature; environmental movement. Offered in alternate years. GE credit: ArtHum, Wrt.—III. Warren

173. Becoming an American: Immigration and American Culture (4)

Lecture—3 hours; term paper. Prerequisite: course 17B or 72B recommended. An introduction to the wide range of immigrant experiences and cycles of nativism that have shaped American culture in the twentieth century. From novels, memoirs and films, students will explore how external and internal immigration has created a multicultural society. Offered alternate years. GE credit: ArtHum, Div, Wrt.—(III.)

174A. The Gilded Age and Progressive Era: United States, 1876-1917 (4)

Lecture—3 hours; term paper. Prerequisite: course 17B. U.S. history and the construction of modern America from the end of Reconstruction to U.S. entry into World War I. Includes Southern redemption, Western incorporation, electoral corruption, labor movements, Populism, Progressivism, women's suffrage, U.S. imperial expansion, and immigration restriction. Offered in alternate years. GE credit: ArtHum, Wrt.—I.

174AD. Emergence of Modern America: Discussion (1)

Discussion—1 hour; short papers. Prerequisite: course 174A concurrently. Intensive discussion of topics and readings for course 174A. (P/NP grading only)—I. (I.)

174B. War, Prosperity, and Depression: United States, 1917-1945 (4)

Lecture—3 hours; term paper. Prerequisite: course 17B. America's emergence as a world power, the business culture of the 1920s, the New Deal and World War II. Emphasis on such issues as government regulation of the economy, welfare capitalism, and class, racial, ethnic, and gender conflicts. Offered in alternate years. GE credit: ArtHum, Wrt.—II. Olmsted

174BD. America in War, Prosperity and Depression: Discussion (1)

Discussion—1 hour; short papers. Prerequisite: course 174B concurrently. Intensive discussion of topics and readings for course 174B. (P/NP grading only)—II. (II.)

174C. The United States Since World War II, 1945 to the Present (4)

Lecture—3 hours; term paper. America's struggle to respond to new complexities in foreign relations, social tensions, family changes and media. Emphasis on such topics as: Cold War; anticommunist crusade; civil rights, feminist and environmentalist movement; New Left; counterculture; Vietnam; Watergate; and the moral majority. GE credit: ArtHum, Wrt.—III. (III.)

174CD. The United States Since World War II: Discussion (1)

Discussion—1 hour; short papers. Prerequisite: course 174C concurrently. Intensive discussion of topics and readings for course 174C. (P/NP grading only)—III. (III.)

174D. Selected Themes in 20th Century American History (4)

Lecture—3 hours; term paper. Prerequisite: course 17B or the equivalent. Interpretive overview of a single topic in the history of the United States in the 20th century with attention to the phases and processes of historical change. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(II.)

174DD. Selected Themes in 20th Century American History: Discussion (1)

Discussion—1 hour; short papers. Prerequisite: course 174D concurrently. Intensive discussion of topics and readings for course 174D. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

175. American Intellectual History (4)

Lecture—3 hours; term paper. Prerequisite: course 17B and upper division standing. Ideas that have shaped politics and society in the United States from colonial times to the present. Topics include American liberalism, republicanism, democracy, constitutionalism, communitarianism, utopianism, pragmatism, feminism, Darwinism, nationalism, conservatism, and economics. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Rauchway

176A. Cultural and Social History of the United States (4)

Lecture—3 hours; term paper. Study of social and cultural forces in American society in the nineteenth century with emphasis on social structure, work and leisure, socialization and the family, social reform movements and changes in cultural values. GE credit: ArtHum.—I. (I.) Halttunen

176B. Cultural and Social History of the United States (4)

Lecture—3 hours; term paper. Study of social and cultural forces in American society in the twentieth century with emphasis on social structure, work and leisure, socialization and the family, social reform movements and changes in cultural values. GE credit: ArtHum.—III. (III.) Halttunen

177A. History of Black People and American Race Relations (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 17A or 17B. History of black people in the United States from the African background to Reconstruction. GE credit: ArtHum, Div, Wrt.—I. (I.) C. Walker

177B. History of Black People and American Race Relations (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 17A or 17B. History of black people in the United States from the African background to Reconstruction. GE credit: ArtHum, Div, Wrt.—C. Walker

178. Race in America (5)

Lecture—4 hours; discussion—1 hour. Prerequisite: courses 17B, 177A, 177B recommended. Examination of the idea of race and how it has shaped American history and the interaction of blacks, whites, Latins, and Asians in the United States. Offered in alternate years. GE: ArtHum, Div, Wrt.—(II.) C. Walker

180AN. American Political History, 1789-1896 (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Growth of American politics from the birth of the republic to the end of the nineteenth century. Development of political parties, the expanding electorate, and how social issues such as slavery shaped the political process. Not open for credit to students who have completed course 180A. Offered in alternate years. GE credit: ArtHum, Wrt.—II. Deyle

180BN. American Political History, 1896-present (4)

Lecture—3 hours; term paper. Prerequisite: course 17B. Politics in the United States from 1896 to the present. Topics include race and partisan politics; communism and anti-communism; the New Deal and the centralization of government; and the rise of the imperial presidency. Not open for credit to students who have completed course 180A or 180C. GE credit: ArtHum, Wrt.—III. (III.) Rauchway, Olmsted

181. Religion in American History to 1890 (4)

Lecture—3 hours; term paper. Prerequisite: course 17A. American religious history from colonization through the Gilded Age. Topics include religious diversity in America; native American religion; Protestant evangelism; gender and religion; religion and bigotry; African American religion; religion in the Civil War; and religion's response to modernization. Offered in alternate years. GE credit: ArtHum, Wrt.—III. Smoleski

183A. The Frontier Experience: Trans-Mississippi West (4)

Lecture—3 hours; written and/or oral reports. The fur trade, western exploration and transportation, the Oregon Country, the Greater Southwest and the Mexican War, the Mormons, mining discovery, and the West during the Civil War. GE credit: ArtHum, Div, Wrt.—I. (I.) Taylor

183B. The Frontier Experience: Trans-Mississippi West (4)

Lecture—3 hours; written and/or oral reports. Spread of the mining kingdom, the range cattle industry, Indian-military affairs, settlement of the Great Plains and Rocky Mountain Regions and political organization of the West. GE credit: ArtHum, Div, Wrt.—II. (II.) Warren

185A. History of Science in America (4)

Lecture—3 hours; research paper. Survey of the European background. Study of American scientific institutions, ideas, personalities, creative processes in science, and of relationships between society and science from colonial times to present. GE credit: ArtHum, Wrt.

185B. History of Technology in America (4)

Lecture—3 hours; research paper. Study of American technology, emphasizing biographical approach to historical understanding of technological change, creative processes, institutions, ideas, and relationships between technology and society from colonial times to present. GE credit: ArtHum, Wrt.—Smith

189. California History (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. California history from the pre-colonial period to the present including dispossession of California's Indians, political economy of the Spanish and Mexican periods, Gold Rush effects, industrialization, Hollywood, water politics, World War II, Proposition 13, and the emergence of the Silicon Valley. Not open for credit to students who have completed two courses of course 189A, 189B, 189C. GE credit: ArtHum, Wrt.—II. Warren

191A. Classical China (4)

Lecture—3 hours; term paper. History of Chinese civilization from its origins through the establishment of city states and the flowering of classical philosophy, to the rise and fall of the First Empire. GE credit: ArtHum, Div, Wrt.—I, II. (I, II.) Price

191B. High Imperial China (4)

Lecture—3 hours; term paper. Political disunion and the influx of Buddhism; reunification under the great dynasties of T'ang, Sung, and Ming with analysis of society, culture and thought. GE credit: ArtHum, Div, Wrt.—II. (II.) Bossler

191C. Late Imperial China (4)

Lecture—2 hours; discussion—1 hour; two long papers. Prerequisite: course 9A or upper division standing. Patterns and problems of Chinese life traced through the Ming and Ch'ing dynasties (c. 1500–1800), prior to the confrontation with the West in the Opium War. Readings include primary sources and novels portraying elite ethos as well as popular culture. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I. Mann

191D. Nineteenth Century China: The Empire Confronts the West (4)

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: course 9A, or upper division standing. The decline and fall of the Chinese Empire, with particular attention to the social and political crises of the 19th century, and the response of government officials, intellectuals, and ordinary people to the increasing pressures of Western imperialism. GE credit: ArtHum, Div, Wrt.—I. (I.) Bossler

191E. The Chinese Revolution (4)

Lecture—2 hours; discussion—1 hour; extensive writing. Prerequisite: upper division standing. Analysis of China's cultural and political transformation from Confucian empire into Communist state. Emphasis on emergence and triumph of peasant revolutionary strategy (to 1949), with some attention to its implications for post-revolutionary culture and politics. GE credit: ArtHum, Div, Wrt.—II. (II.) Price

191F. History of the People's Republic of China (4)

Lecture—2 hours; discussion—1 hour; extensive writing. Prerequisite: upper division standing. Comprehensive analysis of recent Chinese history, including land reform, the Cultural Revolution, the post-Mao era, and the consequences of the new economic policies of the 1980s. Not open for credit to students who have completed course 190C. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.) Mann

192. Internship in History (1-12)

Prerequisite: enrollment dependent on availability of intern positions, with priority to History majors. Supervised internship and study as historian, archivist, curator, or in another history-related capacity, in an approved organization or institution. (P/NP grading only.)

194A. Aristocratic and Feudal Japan (4)

Lecture—3 hours; term paper and/or discussion. Broad survey of the cultural, social, religious, and political aspects of Japanese history from mythological times through the sixteenth century emphasizing comparison of the organizations, values, and beliefs associated with the aristocratic and feudal periods. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(II.) Borgen

194B. Early Modern Japan (4)

Lecture—3 hours; term paper and/or discussion. Survey of the cultural, social, economic, and political aspects of Japanese history from the seventeenth through the nineteenth centuries emphasizing the development of those patterns of thought and political organization with which Japan met the challenge of the nineteenth-century Western expansionism. GE credit: ArtHum, Div.—I. (I.) Kim

194C. Modern Japan (4)

Lecture—3 hours; term paper and/or discussion. Survey of the cultural, social, economic, and political aspects of Japanese history in the twentieth century emphasizing labor and social movements, militarism and the Pacific war, and the emergence of Japan as a major economic power. GE credit: ArtHum, Div.—III. (III.) Kim

194D. Business and Labor in Modern Japan (4)

Lecture—3 hours; term paper or papers. Survey of labor and management relations in Japan from the mid-eighteenth century to the present. Offered in alternate years. GE credit: ArtHum.—I.

194E. Education and Technology in Modern Japan (4)

Lecture—3 hours; term papers. Survey of education and technology in Japan from the mid-eighteenth century to the present. Offered in alternate years. GE credit: ArtHum.—I.

195B. History of Modern Korea (4)

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: upper division standing. History of Modern Korea, from Yi dynasty period to 1990s. Political and socioeconomic changes in 19th century, modernization under Japanese colonialism, postwar economic growth and effects of the Cold War. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Kim

196A. Medieval India (4)

Lecture—3 hours; discussion—1 hour; written reports. Survey of history of India in the millennium preceding arrival of British in the eighteenth century, focusing on interaction of the civilizations of Hinduism and Islam and on the changing nature of the state. GE credit: ArtHum, Div, Wrt.—I. (I.) Metcalf

196B. Modern India (4)

Lecture—3 hours; discussion—1 hour; written reports. Survey of cultural, social, economic, and

political aspects of South Asian history from arrival of the British in the eighteenth century to formation of new independent states—India, Bangladesh, and Pakistan—in the twentieth century. GE credit: SocSci, Div, Wrt.—Metcalfe

197T. Tutoring in History (2)

Discussion—1 hour; laboratory—3 hours. Prerequisite: enrolled as a History major with senior standing and consent of department chairperson. Tutoring of students in lower division courses. Weekly meeting with instructors in charge of courses. Written reports on methods and materials required. May be repeated once for credit. No final examination. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor; upper division standing. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

201A-T, X. Sources and General Literature of History (4)

Seminar—3 hours; term paper. Designed primarily for students preparing for higher degrees in history. **(A)** Ancient; **(B)** Medieval; **(C)** Renaissance and Reformation; **(D)** Early Modern Europe; **(E)** Europe since 1815; **(F)** China to 1880; **(G)** China since 1880; **(H)** Britain; **(I)** Latin America since 1810; **(J)** American History to 1787; **(K)** United States, 1787-1896; **(L)** United States since 1896; **(N)** Modern Japan; **(Q)** Cross-Cultural Women's History; **(S)** History of Science and Medicine; **(T)** Jewish History; **(X)** World History. May be repeated for credit when different subject area is studied.—I, II, III. (I, II, III.)

202A-I. Major Issues in Historical Interpretation (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. **(A)** Ancient; **(B)** Medieval Europe; **(C)** Modern Europe; **(D)** India; **(E)** Africa; **(F)** China; **(G)** Japan; **(H)** United States; **(I)** Latin America. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied.—I, II, III. (I, II, III.)

203. Seminar Research (4)

Seminar—3 hours. Prerequisite: consent of instructor. Designed primarily for students preparing for higher degrees in History. Individual research and analysis resulting in substantial research paper. May be repeated for credit.—II. (II.)

204. Historiography (4)

Seminar—3 hours; term paper. Major issues in the philosophy and methodology of history.—I. (I.)

221. Medieval History (4)

Seminar—3 hours. Prerequisite: courses 121A, 121B, 121C recommended. Topics in the history of medieval and early Renaissance Europe.

245. Modern European History (4)

Seminar—3 hours. Prerequisite: course 201E. Primary sources and research methodologies in the history of modern France and Germany. May be repeated once for credit.—III. (III.)

261. Latin American History (4)

Seminar—3 hours. Prerequisite: two courses in Latin American history; reading knowledge of Spanish or Portuguese.—I, II, III. (I, II, III.) Bauer

271A-271B. United States History (4-4)

Seminar—3 hours; term paper. Prerequisite: course 201J-L or 202H. Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. (Deferred grading only, pending completion of sequence.)—II-III. (II-III.)

291A. Chinese History (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Research on topics to be chosen by the students for the purpose of writing article-length papers. May be repeated for credit. (Deferred grad-

ing only, pending completion of sequence.)—Price, Mann, Bossler

291B. Chinese History (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Completion of article-length papers on topics chosen by students. May be repeated for credit. (Deferred grading only, pending completion of sequence.)—Price, Mann, Bossler

291C. Chinese History (4)

Seminar—2 hours; tutorial—1 hour. Prerequisite: reading knowledge of Chinese. Readings in Chinese historical materials. Training in the use of Chinese reference works. May be repeated once for credit.—Price, Mann, Bossler

292. College Teaching Internship (4)

Internship—4 hours. Prerequisite: course 300 (may be taken concurrently). Student prepares and teaches one lower division history course in a nearby community college under the supervision of a UC Davis instructor and a community college instructor. (S/U grading only.)

298. Group Study (1-5)

299. Research (1-12)

(S/U grading only.)

299D. Individual Study (1-12)

(S/U grading only.)

Professional Courses

389. Introductory Seminar for Teaching Assistants (1)

Seminar—1 hour. Prerequisite: must be enrolled in course 390. An introduction to the broad comparative and theoretical issues of teaching methods and techniques in history. (S/U grading only.)—I, II, III. (I, II, III.)

390. Teaching History in College (2)

Discussion—2 hours. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)—I, II, III. (I, II, III.)

History and Philosophy of Science

(College of Letters and Science)

James R. Griesemer, Ph.D., Program Director

Program Office, 1238 Social Sciences and Humanities Building (530-752-9621)

World Wide Web: <http://hpslab.ucdavis.edu>

Committee in Charge

Joan Cadden, Ph.D. (*History*)

Patrick E. Carroll, Ph.D. (*Sociology*)

James R. Griesemer, Ph.D. (*Philosophy*)

Kevin D. Hoover, D.Phil. (*Economics*)

Catherine J. Kudlick, Ph.D. (*History*)

Jay E. Mechling, Ph.D. (*American Studies*)

Benjamin S. Orlove, Ph.D. (*Environmental Science and Policy*)

Marcel Rejmanek, Ph.D. (*Evolution and Ecology*)

Paul Teller, Ph.D. (*Philosophy*)

Minor Program Requirements:

The interdisciplinary minor in the history and philosophy of science invites students to examine historical and contemporary problems in a variety of scientific disciplines, and to explore concepts and procedures basic to science and how they have evolved. The minor is sponsored by the Program in the History and Philosophy of Science.

UNITS

History and Philosophy of Science24
 Philosophy 304
 Five courses from those listed below. One course must be from each of three areas:
 (a) history, (b) philosophy, and (c) history and philosophy of science.....20

(a) History 102, 135A, 135B, 136, 139A, 139B, 185A, 185B, 188A, 188B;

(b) Philosophy 106, 107, 108, 109, 110, 111;

(c) History and Philosophy of Science 20, 130A, 130B, 131, 150, 180.

Minor adviser. J. Griesemer, 2297 Social Sciences and Humanities Building, 530-752-1068.

Courses in History and Philosophy of Science (HPS)

Upper Division Courses

130A. From Natural History to the History of Nature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: History 135A recommended. Evolution and demise of natural history as a discipline from Aristotle to Linnaeus. Considers ancient views of nature and its Renaissance rediscovery; the emergence of biology, botany, geology, and zoology; the history of taxonomy and classification. GE credit: ArtHum or SciEng, Wrt.

130B. History of Modern Biology (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 130A recommended. Development of modern biology from pre-Darwinian roots to the present. Considers emergence of modern biological specialities and consolidation of biological theory around evolutionary ideas. History of allied fields such as genetics, paleontology, embryology, ecology, systematics and molecular biology. GE credit: ArtHum or SciEng, Wrt.—II. (II.)

131. Darwin (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Students will explore the life and times of Charles Darwin and will trace the development of evolutionary thinking before and after the *Origin of Species* to appreciate its place in Victorian society and in the corpus of Darwin's thought. GE credit: ArtHum or SciEng, Wrt.—III. (III.) Griesemer

150. Gender and Science (4)

Lecture/discussion—3 hours; term paper. An interdisciplinary approach to the relations between gender and science. Topics include the biological and cultural construction of sexual difference, the role of women as practitioners of science, and feminist approaches to science. GE credit: SocSci, Div, Wrt.

180. Topics in History and Philosophy of Science (4)

Seminar—3 hours; term paper. Prerequisite: course in History and Philosophy of Science or other coursework relevant to topic. In depth treatment of selected topics in the history and philosophy of science. Possible topics include history of modern physics, history of molecular biology, science and society, science and power, scientific explanation, technology and culture, theory testing. May be repeated for credit with consent of instructor.—I, II, III.

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

250. History and Philosophy of Science (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary seminar in the history and philosophy of science. Focuses on issues such as historiography, methodology, and the conceptual foundations of science. May be repeated for credit with consent of instructor.

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Course**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Honors Challenge

Kenneth L. Verosub, Ph.D., Program Director
Program Office, 162 Kerr Hall (530-752-9797)
<http://www-honors.ucdavis.edu>

The Program of Study

The Davis Honors Challenge (DHC) is a program for highly motivated students interested in enhancing their education through special courses, closer contact with faculty, and dynamic interaction with academic peers. Interested students apply in the spring quarter for places the following year. First- and second-year students participating in the DHC take two honors courses and one problem oriented interdisciplinary seminar per academic year. Second-year students have the option to substitute an honors contract for an honors course. Third-year students are required to complete two honors contracts and one upper division honors seminar. Fourth-year students participate in a year-long team honors project. All students who successfully complete the program receive transcript notation for each year of participation.

Lower division departmental Honors courses, special DHC sections of regular courses, DHC seminars, and special studies opportunities constitute the course offerings of the Davis Honors Challenge. A complete list of these courses, with course registration numbers, is made available to admitted students through the Davis Honors Challenge Office.

Lower division seminars are offered each year during winter and spring quarters. The seminars are designed to foster critical thinking and analytic interpretation, improve oral and written communication skills, enhance research skills, provide experience with group dynamics and collaborative exploration of problems, and develop familiarity with electronic communication and visual presentations. Enrollment in each seminar is limited to 20 students. Updated program information is available at our web site.

Students not admitted to the program may not register for Davis Honors Challenge sections, seminars, or special study opportunities.

Courses in Davis Honors Challenge (HNR)

Lower Division Courses**90X. Honors Discussion Section (1)**

Discussion—1 hour. Prerequisite: open only to students in the Davis Honors Challenge. Examination of special topics in selected lower division courses through additional readings, discussions, term papers, collaborative work, or special activities, including projects, field and laboratory experiences, computer simulations, creative works. May be repeated for credit.

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

94. Honors Seminar (4)

Seminar—4 hours. Prerequisite: open only to students in the Davis Honors Challenge. Collaborative, multidisciplinary exploration of complex contemporary problem. Focus on critical thinking and analytical interpretation, on oral and written communication, and on the use of electronic media in gathering information. May be repeated for credit. GE credit: Wrt.

98. Directed Group Study (1-5)

Discussion—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Independent study—1-5 hours. Prerequisite: student in the Davis Honors Challenge. (P/NP grading only.)

Upper Division Courses**190X. Honors Contract (1)**

Independent study or discussion—3 hours. Prerequisite: open only to students in the Davis Honors Challenge. In-depth examination of material in an upper division course as defined in an Honors Contract Proposal submitted by the student. Contract must be approved by the instructor and the Honors Council of the Academic Senate. May be repeated for credit.

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

194. Honors Seminar (3)

Seminar—3 hours. Open only to students in the Davis Honors Challenge. Team-based work on actual problems drawn from the public or private sector. Focus on critical thinking and analytical interpretation, oral and written communication skills, and development of practical solutions to real-world problems. GE credit: Wrt.—II, III. (II, III.)

195. Honors Thesis/Honors Project (1-3)

Independent Study—3-9 hours. Prerequisite: Open only to students in the Davis Honors Challenge. Guided independent study of a selected topic leading to the presentation of an honors thesis/honors project. May be repeated for credit up to 9 units.

198. Directed Group Study (1-5)

Discussion—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Independent study—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

Patrick H. Brown, Ph.D., Associate Professor
(*Pomology*)
David W. Burger, Ph.D., Professor (*Environmental Horticulture*)
Marita Cantwell, Ph.D., Lecturer (*Vegetable Crops*)
Roger T. Chetelat, Ph.D., Lecturer (*Vegetable Crops*)

Carlos H. Crisosto, Ph.D., Lecturer (*Pomology*)
Abhaya M. Dandekar, Ph.D., Professor (*Pomology*)
Theodore M. DeJong, Ph.D., Professor (*Pomology*)
R. Ford Denison, Ph.D., Professor (*Agronomy and Range Science*)
Joseph M. DiTomaso, Ph.D., Lecturer (*Vegetable Crops*)
Nick K. Dokoozlian, Ph.D., Lecturer (*Viticulture and Enology*)
Jorge Dubcovsky, Ph.D., Associate Professor
(*Agronomy and Range Science*)
Don J. Durzan, Ph.D., Professor (*Environmental Horticulture*)
Jan Dvorak, Ph.D., Professor (*Agronomy and Range Science*)
Clyde L. Elmore, Ph.D., Lecturer (*Vegetable Crops*)
Richard Y. Evans, Ph.D., Lecturer (*Environmental Horticulture*)
Steven A. Fennimore, Ph.D., Lecturer (*Vegetable Crops*)
Louise Ferguson, Ph.D., Lecturer (*Pomology*)
Albert J. Fischer, Ph.D., Assistant Professor
(*Vegetable Crops*)
Theodore C. Foin, Jr., Ph.D., Professor (*Agronomy and Range Science*)
Mark Francis, M.L.A., Professor (*Landscape Architecture*)
Shu Geng, Ph.D., Professor (*Agronomy and Range Science*)
Paul L. Gepts, Ph.D., Professor (*Agronomy and Range Science*)
Sham S. Goyal, Ph.D., Lecturer (*Agronomy and Range Science*)
Thomas M. Gradziel, Ph.D., Associate Professor
(*Pomology*)
W. Douglas Gubler, Ph.D., Lecturer (*Plant Pathology*)
James A. Harding, Ph.D., Professor (*Environmental Horticulture*)
Timothy K. Hartz, Ph.D., Lecturer (*Vegetable Crops*)
James E. Hill, Ph.D., Lecturer (*Agronomy and Range Science*)
William Horwath, Ph.D., Assistant Professor (*Land, Air and Water Resources*)
Leland F. Jackson, Ph.D., Lecturer (*Agronomy and Range Science*)
Louise E. Jackson, Ph.D., Associate Professor
(*Vegetable Crops*)
Judy Jernestedt, Ph.D., Professor (*Agronomy and Range Science*)
R. Scott Johnson, Ph.D., Lecturer (*Pomology*)
Adel A. Kader, Ph.D., Professor (*Pomology*)
Stephen R. Kaffka, Ph.D., Lecturer (*Agronomy and Range Science*)
John M. Labavitch, Ph.D., Professor (*Pomology*)
Emilio A. Laca, Ph.D., Assistant Professor (*Agronomy and Range Science*)
Bruce Lampinen, Ph.D., Cooperative Extension Specialist (*Pomology*)
W. Thomas Lanini, Ph.D., Lecturer (*Vegetable Crops*)
J. Heinrich Lieth, Ph.D., Professor (*Environmental Horticulture*)
James D. MacDonald, Ph.D., Professor (*Plant Pathology*)
Mark A. Matthews, Ph.D., Professor (*Viticulture and Enology*)
Gale McGranahan, Ph.D., Lecturer (*Pomology*)
E. Greg McPherson, Ph.D., Lecturer (*Environmental Horticulture*)
Carole P. Meredith, Ph.D., Professor (*Viticulture and Enology*)
Richard W. Michelmore, Ph.D., Professor (*Vegetable Crops*)
Elizabeth J. Mitcham, Ph.D., Lecturer (*Pomology*)
Jeffrey P. Mitchell, Ph.D., Lecturer (*Vegetable Crops*)
Donald J. Nevins, Ph.D., Professor (*Vegetable Crops*)
Robert F. Norris, Ph.D., Associate Professor
(*Vegetable Crops*)
Dan E. Parfitt, Ph.D., Lecturer (*Pomology*)
Michael P. Parrella, Ph.D., Professor (*Entomology*)
Donald A. Phillips, Ph.D., Professor (*Agronomy and Range Science*)
Richard E. Plant, Ph.D., Professor (*Agronomy and Range Science*)
Vito S. Politto, Ph.D., Professor (*Pomology*)
Daniel Potter, Ph.D., Assistant Professor (*Pomology*)

Daniel H. Putnam, Ph.D., Lecturer (*Agronomy and Range Science*)
 Carlos F. Quiros, Ph.D., Professor (*Vegetable Crops*)
 D. William Rains, Ph.D., Professor (*Agronomy and Range Science*)
 Michael S. Reid, Ph.D., Professor (*Environmental Horticulture*)
 Kate M. Scow, Ph.D., Professor (*Soil Science*)
 Kenneth A. Shackel, Ph.D., Associate Professor (*Pomology*)
 Douglas V. Shaw, Ph.D., Professor (*Pomology*)
 David R. Smart, Ph.D., Assistant Professor (*Viticulture and Enology*)
 Stephen M. Southwick, Ph.D., Lecturer (*Pomology*)
 Dina St. Clair, Ph.D., Associate Professor (*Vegetable Crops*)
 Trevor V. Suslow, Ph.D., Lecturer (*Vegetable Crops*)
 Ellen G. Sutter, Ph.D., Professor (*Pomology*)
 Steve R. Temple, Ph.D., Lecturer (*Agronomy and Range Science*)
 Larry R. Teuber, Ph.D., Professor (*Agronomy and Range Science*)
 Robert L. Travis, Ph.D., Professor (*Agronomy and Range Science*)
 Mark Van Horn, M.S., Lecturer (*Pomology*)
 Chris van Kessel, Ph.D., Professor (*Agronomy and Range Science*)
 Ronald E. Voss, Ph.D., Lecturer (*Vegetable Crops*)
 M. Andrew Walker, Ph.D., Associate Professor (*Viticulture and Enology*)
 Steve Weinbaum, Ph.D., Professor (*Pomology*)
 Thea A. Wilkins, Ph.D., Associate Professor (*Agronomy and Range Science*)
 Larry E. Williams, Ph.D., Professor (*Viticulture and Enology*)
 James A. Wolpert, Ph.D., Cooperative Extension Specialist (*Viticulture and Enology*)
 Lin L. Wu, Ph.D., Professor (*Environmental Horticulture*)
 John I. Yoder, Ph.D., Professor (*Vegetable Crops*)
 Truman P. Young, Ph.D., Assistant Professor (*Environmental Horticulture*)

Graduate Study. The Graduate Group in Horticulture and Agronomy offers programs of study leading to the M.S. degree. The programs provide opportunities for specialized study in the production, management, and utilization of horticultural and agronomic plants and the postharvest handling of horticultural commodities. Options include agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science. Within an option, the student can specialize in one of a number of areas, including agroecology, biotechnology, breeding and crop improvement, crop physiology, crop production, mineral nutrition, modeling and quantitative horticulture, pest management, plant growth and development, postharvest physiology, revegetation/restoration, and water relations. Research may be conducted on an applied or basic problem having a physiological, genetic, or ecological emphasis.

Preparation. A level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, physics, statistics, genetics and introductory plant physiology. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail and may be obtained from the Group office.

Graduate Advisers. Consult the Group office.

Courses in Horticulture (HRT)

Graduate Courses

203. Research Perspectives in Horticulture (3)
 Lecture—1 hour; lecture/discussion—2 hours. Prerequisite: Plant Biology 111 and 112, or Environmental Horticulture 102 or the equivalent. Following lectures/discussions of scientific methodology, students develop research proposals aided by classroom discussions and individual interactions with instructors. Lectures and critiques of "classical papers" provide a sense of the evolution of the cur-

rent concepts in perennial plant biology. Offered in alternate years. —(I.) Weinbaum, DeJong

251. Modeling Horticultural Systems (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Plant Biology 142, calculus, or consent of instructor. Development and application of models. Primary emphasis on physiological and ecological models, with examples drawn from areas of interest to class participants. Applications to horticultural systems. Students will build models and implement them on computers.—(II.) Lieth

290. Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing at UC Davis. Seminars presented by invited speakers, students, or faculty on selected topics in horticulture. (S/U grading only).—(I.)

Faculty—International Agricultural Development

Faculty includes members from various departments across colleges.

Major Programs. See Community and Regional Development (formerly Applied Behavioral Sciences), Human Development, and International Agricultural Development.

Human Development

(College of Agricultural and Environmental Sciences)

Faculty. See Department of Human and Community Development.

The Major Program

Human development explores the developmental process in humans throughout the life cycle. Biological, cognitive, and personality/sociocultural aspects of development are studied.

The Program. Human development majors complete a group of preparatory courses in anthropology, general biology, genetics, history, philosophy, physiology, psychology, and statistics. Upper division students can design their programs in consultation with a faculty member to emphasize a particular interest. For instance, students can study the social and biological aspects of human development while emphasizing child or adult development.

Internships and Career Alternatives. At least one practicum course is required. A second practicum or supervised internship can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in schools, early childhood education or senior centers, hospitals, rehabilitation centers, probation offices, group foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development graduates fill a wide variety of positions in preschools, elementary and special educational settings, programs designed for parents, families, and the elderly, as well as governmental jobs related to social services for people of all ages. Students who emphasize biological aspects of human development can apply to medical school or pursue training for positions in the health sciences. Human development prepares students to pursue advanced degrees in behavioral and social sciences, education, social work, family law, or health sciences.

Preparatory Requirements. UC Davis students who wish to change their major to Human Development must complete the following courses with a combined grade point average of at least 2.50. All of the following courses must be taken for a letter grade:

Psychology 1
 Statistics 13 or Education 114 or Psychology 41 or Sociology 46A and 46B
 One course from Anthropology 1, 2 or 15

302 Human Development

One course from Biological Sciences 1A, 10, 101; Molecular and Cellular Biology 10; or Neurobiology, Physiology, and Behavior 10 or 101

B.S. Major Requirements:

	UNITS
English Composition Requirement12	
See College requirement.....8	
Choose from English 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 104A, 104B, 104C, 104D, 104E, 104F.....4	
Preparatory Subject Matter39-47	
Two courses from Anthropology 1, 2, or 15.....8-9	
Biological Sciences 1A, 10, Microbiology 10, or Neurobiology, Physiology, and Behavior 12.....3-5	
Molecular and Cellular Biology 10 or Biological Sciences 101†.....4	
History 17A, 17B, 72A, 72B, or Political Science 1.....4	
Two courses from Philosophy 5, 31, or 32...8	
Neurobiology, Physiology, and Behavior 10, 101, or Psychology 101.....4-5	
Psychology 1.....4	
Psychology 41 or Sociology 46A and 46B, or Statistics 10 or 13.....4-8	
Breadth/General Education24-32	
Satisfaction of General Education requirement.....16-24	
Depth Subject Matter52-53	
Human Development 100A, 100B, 100C...12	
Human Development 120 or 121.....4	
Biological Sciences 101†, Human Development 117, 180, Nutrition 101, or Psychology 121.....3-5	
Human Development 102, 110, 130, 160, or 162*.....4	
Human Development 101, 103, 132, or 163*.....4	
Human Development 140-140L, or 141 or 142 or 143*.....4-6	
Five additional upper division courses chosen from among the Human Development courses or from a list of restricted electives in consultation with faculty adviser.....19-20	
Unrestricted Electives42-63	
Total Units for the Degree180	

† Biological Sciences 101 cannot be used to satisfy both the Preparatory Subject Matter and the Depth Subject Matter Requirements.

* At least one course from among these groupings must focus on childhood/adolescence (101, 102, 103, 110, 130, 132) and one must focus on adulthood/aging (143, 160, 162, 163).

Major Adviser. K. Barton.

Minor Program Requirements:

The Department of Human and Community Development offers two minors.

	UNITS
Aging and Adult Development21-26	
Human Development 100C, 117, 143, 160, 162, or 163.....15-18	
Select two courses from the following:	
Human Development 110, 180; Community and Regional Development 173; Psychology 121, 123, 126, 155; Sociology 127.....6-8	
Minor Adviser. C. Aldwin, B. Ober.	
	UNITS
Human Development20	
Human Development 100A and 100B.....8	
Human Development 100C or 110.....4	

Two courses from Human Development 101, 102, 103, 130, 132, or 163.....8

Minor Adviser. L.V. Harper.

Related Major Program. See the major in Community and Regional Development.

Graduate Study. Graduate study is available through a Master of Science degree in child development, and a Ph.D. degree in human development. See the Child Development Graduate Group and Human Development Graduate Group. Refer also to the Graduate Studies chapter of this catalog.

Courses in Human Development (HDE)

Questions pertaining to the following courses should be directed to the instructor or to the Human and Community Development Advising Office, 1303 Hart Hall (530-752-2244).

Lower Division Courses

12. Human Sexuality (3)

Lecture—3 hours. Vocabulary, structure and function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing and maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction; cultural differences in attitudes towards sexuality. GE credit: Div.—I, II.

13. Parenting (4)

Lecture/discussion—4 hours. Provides the basis for understanding the nature of the parenting process. Consideration of aspects of parenting that begin before conception and develop throughout the life of the child and parent. GE credit: SocSci.

15. Family and the Life Cycle (4)

Lecture—4 hours. Prerequisite: Psychology 1, or 15 and 16. Socialization in families throughout the life cycle. Impact of alcoholism and abuse. Sources of strength and help. Not open for credit to students who have completed courses 100A, 100B, 110 and/or Psychology 112, 114, and 115. GE credit: SocSci.

92. Internship (1-6)

Internship—3-18 hours. Prerequisite: field work experience or at least one course (e.g. course 30, 100A, 100B, 140, 140L) related to the fieldwork assignment; consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

98. Directed Group Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5) (P/NP grading only.)

Upper Division Courses

100A. Infancy and Early Childhood (4)

Lecture—4 hours. Prerequisite: Psychology 1 or 15, Biological Sciences 1A or 10. Analysis of the biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six.—I, II, summer. (I, II.) Harper, Chen

100B. Middle Childhood and Adolescence (4)

Lecture—4 hours; three brief observations of school-age children. Prerequisite: course 100A or the equivalent; introductory biology. Analysis of the interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence.—II, III. (II, III.) Harper

100C. Adulthood and Aging (4)

Lecture—4 hours. Prerequisite: Psychology 1 or 15. Development during early, middle, and late adulthood; biological, cognitive, and psycho-social aspects of adult development. Emphasis on normative patterns of development which characterize "successful aging."—I, III. Aldwin

101. Cognitive Development (4)

Lecture—3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass 1 restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Psychology 141.) GE credit: Wrt.—I, II, III. (I, II, III.) Chen, Goodman, Lagattuta, Rivera

102. Social and Personality Development (4)

Lecture—3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass 1 open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Psychology 142.) GE credit: SocSci, Wrt.—I, II, III. (I, II, III.) Conger, Lagattuta, Rivera, Robins, Rodning

103. Cross-Cultural Study of Children (4)

Lecture—4 hours. Prerequisite: course 100A or consent of instructor. Cross-cultural studies of children in developing countries and among minority groups in the U.S. GE credit: Div.—III.

110. Contemporary American Family (4)

Lecture—4 hours. Prerequisite: introductory psychology. Factors currently influencing American families including changing economic conditions, changing sex roles, divorce, and parenthood; theories and research on family interaction.—II, III. K. Conger

117. Longevity (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of the life span; description of basic demographic techniques including life table methods. (Same course as Entomology 117.) GE credit: SciEng, Wrt.—I. Carey

120. Research Methods in Human Development (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100A or 100B, and Statistics 13 or Education 114 or Psychology 41 or Sociology 46A and 46B. Topics include scientific view of human development; origins of scientific inquiry; research strategies; preparation for conducting research; descriptive statistics and statistical inference (hypothesis testing); statistical analysis and understanding results. Major emphasis on experimentation, collecting data and analyzing results.—I, II, III. Acredelo, Barton

121. Psychological Assessment (4)

Lecture—4 hours. Prerequisite: courses 100A-100B; elementary statistics. Current issues and methodology related to the process of psychological assessment with children.—I. Barton

130. Emotionally Disturbed Children (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 100A and 100B or consent of instructor. Discussion of psychosis, neurosis, behavior disorders, and learning difficulties in children.—I, III. Bryant

132. Individual Differences in Giftedness (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 100A and 100B or consent of instructor. Conceptualization, identification and education of the intelligent, the creative, and the talented, gifted individual.—II, III. Acredelo, Kraft

140. Communication and Interaction with Young Children (2)

Lecture—2 hours. Prerequisite: courses 30, 100A, and 140L (concurrent enrollment recommended). Theory and practice in the area of effective interaction with young children. Humanistic, child-centered approaches; awareness of goals, beliefs, and values as these affect interactions. To enroll, students must sign up for laboratory time at the Child and Family Studies Center.—I, II, III. (I, II, III.) Young

140L. Laboratory in Early Childhood (3-6)

Discussion—3 hours; laboratory—6-15 hours. Prerequisite: course 140 (may be taken concurrently). Application of theories of learning and development to interaction with children six months to five years at Early Childhood Laboratory. Applied skills in communication, discipline and curriculum. May be repeated for credit for a total of 12 units. (P/NP grading only.)—I, II, III. (I, II, III.) Young

141. Field Studies with Children and Adolescents (4-6)

Discussion—2 hours, field study—6-12 hours. Prerequisite: course 100B or the equivalent and consent of instructor. Study of children's affective, cognitive and social development within the context of family/school environments, hospitals and foster group homes. May be repeated for credit for a total of 12 units following consultation with and consent of instructor.—I, II, III. Kraft, Ponzio

142. Field Studies with Exceptional Children (4-6)

Discussion—1.5 hours; field study—6-12 hours. Prerequisite: consent of instructor and one course from courses 130, 131, or 132 (may be taken concurrently). Field study with children who are identified as developmentally disabled, emotionally distressed, or intellectually gifted. May be repeated for credit for a total of 12 units following consultation with and consent of instructor.—I. Bryant

143. Field Studies of the Elderly (4-6)

Discussion—2 hours; field work—6-12 hours. Prerequisite: course 100C or 160 may be taken concurrently. To apply theory and research on adult development and aging, to work with older adults in a variety of settings, and to develop skills relevant to that application. Students will also develop a small research project.—II. Ober

151. Shared Child Care (4)

Lecture—4 hours. Prerequisite: course 100A or 110, Psychology 112, or Anthropology 131. Examines roles of caregivers other than parents in contemporary society, and the impact of grandparents, siblings, family day care providers, foster parents, church- and employer-sponsored child care on children's development. Reviews child care legislation and social policy issues. May be offered via UC Davis Washington Center.

160. Social Aspects of Aging (4)

Lecture—4 hours. Prerequisite: course 100C or Psychology 115. How the social context affects adult development and aging. Emphasis on demography, social policy, culture, and adaptation. Oral histories as class projects. Offered in alternate years. GE credit: Div.—II. Aldwin

162. Issues in Aging (3)

Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: course 100C or 160. Research and policy issues concerning the elderly and aging in contemporary society. Offered in alternate years.

163. Cognitive Neuropsychology in Adulthood and Aging (4)

Lecture/discussion—4 hours. Prerequisite: Psychology 1; course 100C recommended. Theories, methods, and findings concerning the relationship between cognitive processes and brain functioning. Readings, lectures, and in-class discussions cover research on normal younger and older adults, neuropsychological case studies, and selected patient groups (e.g., amnesia, schizophrenia, Alzheimer's disease).

180. Aging and Health (3)

Lecture—3 hours. Prerequisite: upper division standing; course 100C recommended. Changing nature and determinants of health and illness in the older population, including normal aging changes, chronic health problems, and disease prevention. Systems of formal and informal care for the elderly. One field trip required.

190C. Introductory Research Conference (1)

Discussion—1 hour. Prerequisite: involvement in ongoing research. Instructors lead discussions with undergraduate students who involve themselves in a research project. Research papers are reviewed and

aspects of project proposals developed out of class are presented and evaluated. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship off and on campus, in community, and institutional settings. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**200A. Early Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing; basic biology or physiology; one upper division course in psychology or a related field; one upper division or graduate course in developmental psychology (may be taken concurrently). Theory and research on the biological, social, cognitive, and cultural aspects of development from conception to the age of five years.—I. Rodning

200B. Middle Childhood and Adolescence (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing; basic biology or physiology, and at least two upper division or graduate-level courses in psychology or related fields. Theory and research on biological, cognitive, social, and cultural influences on behavioral development from age five years until late adolescence.—II. Bryant

200C. Development in Adulthood (4)

Lecture/discussion—4 hours. Prerequisite: courses 200A and 200B. Theory and research focusing on social, personality, cognitive, and biological development from early to late adulthood. Emphasis is on theory development and continuity and change.—III. Ober

201. Social-Emotional Development in Infancy (4)

Lecture/discussion—4 hours. Prerequisite: course 200A. Analysis of theory, methods, and research on social-emotional development in infancy. Emphasizes the development of primary and secondary emotions, and the development of attachment. Other possible topics include infant temperament, sex differences, compliance, and self-regulation. Offered in alternate years.

203. Adolescent Behavioral and Emotional Development (4)

Lecture/discussion—4 hours. Prerequisite: course 200B. Analysis of recent theories, research methods, and major findings on adolescent behavioral and emotional development, including contextual and genetic influences on adolescence, pubertal transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development. Offered in alternate years.

210. Theories of Behavioral Development (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: graduate standing in behavioral sciences. Consideration of enduring issues in theories of behavioral development; analysis of adequacy of major theoretical schools (e.g., social learning, Piagetian) as scientific theories. Offered in alternate years.—I. Harper

211. Physiological Correlates of Behavioral Development (3)

Seminar—3 hours. Prerequisite: consent of instructor. An overview of mechanisms of organismic development and the implications of developmental biology for the analysis of behavioral ontogeny; consideration of parallels between processes of organismic development and behavioral development in children and infra-human mammals.—I. Harper

212. Adaptation and Aging (3)

Lecture/discussion—3 hours. Prerequisite: course 200C. Interdisciplinary perspective of the ways biological, psychological, and sociocultural factors affect aging and adaptation in late life. Focus is on the ways in which stress, coping, and social support

affect health and the factors which contribute to optimal aging. Offered in alternate years.—II. Aldwin

213. Cross-Cultural Study of Children (3)

Lecture—2 hours; discussion—1 hour; field project or paper. Prerequisite: graduate standing in Human Development, Education, Anthropology, Psychology or Sociology. Current theory and research concerned with comparative child development. Introduction into the major issues and methods of cross-cultural research (e.g., biological, cognitive and social development of children in different cultures and subcultures in U.S.A.). Offered in alternate years.

217. Development of Cortical and Perceptual Laterality (3)

Seminar—3 hours. Prerequisite: graduate standing in child or human development or consent of instructor. Current theory and research regarding the development of human cortical and perceptual laterality—emphasizing the relationship of this development to thinking and behavior. Offered in alternate years.

220. Research Methods in Human Growth and Development (3)

Lecture—3 hours. Prerequisite: Statistics 13 or the equivalent and at least two upper division courses in human biology or developmental psychology. Theory and research methods in biological growth, and cognitive and social/emotional development from prenatal period to death.—II. Barton

221. Psychological Assessment of Children (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: course 121 or consent of instructor. Study of children's behavior through examination, analysis and evaluation of perceptual-motor, cognitive, affective and social development. Problems in assessment of exceptional children considered. Assignments focus on preparation of a comprehensive report on one child.

222. Applied Research and Program Evaluation (3)

Lecture/discussion—3 hours. Prerequisite: graduate standing and consent of instructor. Focuses on the design and conduct of applied research and evaluation studies, especially with regard to programs serving children and their families. Offered in alternate years.—III. Braverman

225. Behavioral Development and Food Intake (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing in Human Development (and related fields) and Nutrition. Multidisciplinary view covering key theoretical and research issues in basic human development processes related to food intake.

231. Issues in Cognitive and Linguistic Development (3)

Seminar—3 hours. Prerequisite: consent of instructor. Study and evaluation of key issues in the theoretical and empirical literature on cognitive and linguistic development.—III. Kraft

232. Cognition and Aging (3)

Lecture/discussion—3 hours. Prerequisite: course 200C. The manner in which cognitive processes are affected by aging as well as an understanding of the changes in the central nervous system occurring with aging. Offered in alternate years.

234. Children's Learning and Thinking (3)

Seminar—3 hours. Prerequisite: course 200A or Psychology 212 recommended. Analysis of theories, research methods, and major findings of children's higher order cognition, including origins of knowledge, development of problem solving skills, reasoning strategies, and scientific concepts, with an emphasis on the underlying mechanism involved in children's thinking and learning processes. Offered in alternate years.—III. Chen

237. Parent-Child Interaction (3)

Seminar—3 hours. Prerequisite: consent of instructor; upper division course on the family recommended. Current theory and research. Emphasis on parental behavior in other animals and other cultures, child-rearing practices, the child's perception of parents, the differential influence of each parent on the child's psychological well-being, sex-role development, and moral development. Offered in alternate years.

238. The Context of Individual Development (3)

Lecture/discussion—3 hours. Prerequisite: graduate standing in Human Development, Child Development, Education, Psychology, Anthropology, Sociology, or consent of instructor. Analysis of human development within the context of daily life. Contextualizing theories and methods of developmental psychology will be distinguished from contextual theories and methods. Developmental psychology models will be distinguished from child psychology models. Offered in alternate years.

241. Consultation Approaches to Child Development (3)

Lecture—1 hour; discussion—1 hour; laboratory—3 hours. Prerequisite: graduate standing; supervised field experience with children (e.g., course 140, 141, 142, may be taken concurrently); and consent of instructor. Analysis and application of theories and approaches of consultation and child development to facilitate delivery of child-related services (e.g., educational and mental health). Develop working knowledge of consultation skills for working with adults directly interacting with children and adolescents. Offered in alternate years.

242. Adolescent Health Behavior: Theory and Programs (2)

Lecture/discussion—2 hours. Prerequisite: graduate standing in child or human development, or consent of instructor; course 200B recommended. Theoretical conceptions relating to adolescent behaviors that have potential impact on health (e.g., use of tobacco, alcohol and other drugs; sexual behavior; accident prevention). Development and evaluation of programs that aim to influence adolescents' behaviors or attitudes in these areas. Offered in alternate years.

290. Seminar (3)

Seminar—3 hours. Discussion and evaluation of the-ories, research, and issues in human development. Different topics each quarter.—I, II, III. (I, II, III.)

290C. Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

291. Research Issues in Human Development (3)

Lecture—3 hours. Prerequisite: graduate standing in the behavioral sciences. In-depth presentations of research issues in particular areas of behavioral development.—I, II. Kraft, R. Conger

292. Graduate Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor and satisfactory completion of placement relevant courses (for example, Education 213, 216, course 222, 241, 242, Law 272, 273). Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. (S/U grading only.)—I, II, III.

298. Group Study (1-5)**299. Research (1-12)**

(S/U grading only.)

Professional Course**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Human Development (A Graduate Group)

Faculty

Curtis R. Acredolo, Ph.D., Adjunct Associate Professor (*Human and Community Development*)
Linda P. Acredolo, Ph.D., Professor (*Psychology*)
Carolyn M. Aldwin, Ph.D., Professor (*Human and Community Development*)
Thomas F. Anders, M.D., Professor (*Psychiatry*)
Marylynn S. Barkley, Ph.D., M.D., Associate Professor (*Neurobiology, Physiology, and Behavior*)
Keith Barton, Ph.D., Professor (*Human and Community Development*)
Marc Braverman, Ph.D., 4-H Specialist in Cooperative Extension (*Human and Community Development*)
Carol S. Bruch, J.D., Professor Emeritus
Brenda K. Bryant, Ph.D., Professor (*Human and Community Development*)
Zhe Chen, Ph.D., Associate Professor (*Human and Community Development*)
Katherine J. Conger, Ph.D., Assistant Professor (*Human and Community Development*)
Rand Conger, Ph.D., Professor (*Human and Community Development*)
George DeVos, Ph.D., Professor Emeritus
Kathryn G. Dewey, Ph.D., Professor (*Nutrition*)
Anne Driscoll, Dr.P.H., Assistant Child Development Researcher (*Human and Community Development*)
Dorothy Eichorn, Ph.D., Research Psychologist Emeritus
Robert A. Emmons, Ph.D., Professor (*Psychology*)
Frank Falkner, M.D., Professor Emeritus
Patricia Gandara, Ph.D., Associate Professor (*Education*)
Xiaojia Ge, Ph.D., Associate Professor (*Human and Community Development*)
Beth Goodlin-Jones, Ph.D., Assistant Adjunct Professor (*Psychiatry*)
Gail Goodman, Ph.D., Professor (*Psychology*)
Randi Hagerman, M.D., Director (*M.I.N.D. Institute*)
Robin L. Hansen, M.D., Associate Professor (*Pediatrics*)
Lawrence V. Harper, Ph.D., Professor (*Human and Community Development*)
Emily S. Harris, M.D., Assistant Professor (*Psychiatry*)
Glenn R. Hawkes, Ph.D., Professor Emeritus
Sud Joseph, Ph.D., Professor (*Anthropology, Women and Gender Studies*)
Penelope Knapp, M.D., Professor (*Psychiatry*)
Rosemarie H. Kraft, Ph.D., Lecturer (*Human and Community Development*)
Michael R. Levenson, Ph.D., Assistant Research Psychologist (*Human and Community Development*)
Seymour Levine, Ph.D., Adjunct Professor (*Psychiatry*)
Thomas L. Morrison, Ph.D., Professor (*Psychiatry*)
Beth A. Ober, Ph.D., Professor (*Human and Community Development*)
John Ogbu, Ph.D., Professor (*Anthropology, UC Berkeley*)
Ernesto Pollitt, Ph.D., Professor (*Pediatrics*)
Susan Rivera, Ph.D., Assistant Professor (*Psychology*)
Richard W. Robins, Ph.D., Assistant Professor (*Psychology*)
Carol J. Rodning, Ph.D., Associate Professor (*Human and Community Development*)
Michael Russell, Ph.D., Assistant Professor (*Anesthesiology*)
Stephen Russell, Ph.D., Associate Specialist in Cooperative Extension (*Human and Community Development*)
Jonathan H. Sandoval, Ph.D., Professor (*Education*)
Phillip Shaver, Ph.D., Professor (*Psychology*)
Karen Watson-Gegeo, Ph.D., Professor (*Education*)
Miriam J. Wells, Ph.D., Professor (*Human and Community Development*)
John Werner, Ph.D., Professor (*Ophthalmology, Neurobiology, Physiology, and Behavior*)
Keith Widaman, Ph.D., Professor (*Psychology*)

Graduate Study. The interdisciplinary and interdepartmental Graduate Group in Human Development offers a program of study leading to the Ph.D. degree. The program provides lifespan study of human behavioral development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, to conduct research, and to be actively involved in public service in human behavioral development. Applicants seeking consideration for early admission and fellowships must be submitted by December 1. The final application deadline is April 1.

Graduate Adviser. Contact the Group Office.

George Wilson, Ph.D. (*Philosophy*)
Michelle Yeh, Ph.D. (*East Asian Languages and Cultures*)

The Program of Study

The Humanities program offers courses in the Humanities proper and also sponsors minors in Film Studies, and Global and International Studies. Courses in the Humanities proper are interdisciplinary in scope and aim to develop critical thinking and writing skills (most courses fulfill partial or complete GE requirements) in three areas: major authors and texts, major periods, major themes in world culture.

Courses in Humanities (HUM)**Lower Division Courses****1. Humanities Forum (2)**

Lecture—2 hours. Reading and discussion of a single work representative of a particular culture, historical period, or genre and significant for its ongoing cultural impact in the humanities, sciences, social sciences, technology, and popular arenas. Attention to provocative implications for contemporary society. May be repeated once for credit if topic differs.

1D. Issues and Concepts in the Humanities (2)

Discussion—2 hours. Prerequisite: course 1 required concurrently. Small group discussions and preparation of short papers for course 1. May be repeated once for credit if topic differs. GE credit with concurrent enrollment in course 1: Wrt.

3. Medicine and Humanities (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: completion of Subject A requirement. Evolution of the "medical arts" into the "science of medicine." The culture of medicine in the context of society, medical ethics. GE credit: SocSci, Wrt.—III. (III.) Flynn

4. Animals and Human Culture (2)

Lecture—2 hours. The meaning of human relations with animals studied across a variety of historical periods and culture and from a variety of humanistic perspectives. Offered in alternate years.—III. Schiesari

4D. Animals and Human Culture Discussion (2)

Discussion—2 hours. Prerequisite: concurrent enrollment in course 4. Small group discussions and preparation of short papers for course 4. Offered in alternate years. GE credit with concurrent enrollment in course 4: ArtHum, Wrt.—III. Schiesari

5. Representation of the Law in Literature and Film (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: completion of Subject A requirement. The relationships among literature, film, and the law, from Greek tragedy to popular American fiction and films. Common themes in law and literature portraying human experience. GE credit: ArtHum or SocSci, Wrt.—I. (I.) Morrow

6. Wagner and Star Wars (4)

Lecture/discussion—3 hours; extensive writing. Wagner's *Ring* and Lucas' *Star Wars*, as examples of 19th and 20th centuries approaches to the arts and their relationship with the society. GE credit: ArtHum or SocSci, Wrt.—II. (II.) Ortiz

7. Travel and Travel Literature (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: Subject A requirement. History of travel from the age of exploration to the modern era. Contemporary trends in travel, including mass tourism, adventure travel, and ecotravel. Social, economic, and cultural issues related to modern trends in travel. Analysis of literary representations of travel. GE credit: ArtHum, Div, Wrt.—III. (III.)

8. Introduction to Perspectives on Narrative (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of Subject A requirement. Interdisciplinary approach to the use of story across time, culture, and discipline. How the telling and retelling of particular stories reflect the values, concerns, and assumptions of their original audiences and genres. GE credit: ArtHum or SocSci, Div, Wrt.—III. (III.)

9. Don Quixote and the Modern World (2)

Lecture—2 hours. Reading *Don Quixote* as emblem of modernity in the West. Issues of reality versus illusion, heroism, freedom and self-fulfillment, racial tolerance and love. *Don Quixote* in other cultural and popular media: film, dance, art, musical drama, and television. Offered in alternate years. GE credit with concurrent enrollment in course 9D: ArtHum, Wrt.—(II.) Martin

9D. Don Quixote and the Modern World Discussion (2)

Discussion—2 hours. Prerequisite: course 9 concurrently. Small group discussions and preparation of short papers for course 9. Offered in alternate years.—(II.) Martin

10. Introduction to Film Studies (4)

Lecture—2 hours; discussion—1 hour; film viewing—3 hours. Introduction to the study of cinema. Exploration of the analysis of film form and examination of a variety of issues in film studies, including spectatorship and cultural context. Emphasis on critical thinking and an analytical outlook on culture, generally. GE credit: ArtHum, Div, Wrt.—II, III. (II, III.) Projansky

11. Shakespeare in Performance (4)

Lecture/discussion—4 hours. Reading, viewing, and discussion of one or two Shakespeare plays with focus on the relationship between text and performance (on stage and on film); analysis of the relationship between presentation of Shakespeare and cultural world view, meaning, and aesthetics. GE credit: ArtHum, Wrt.—I. (I.) Boe

12. History of the Book (4)

Lecture/discussion—3 hours; extensive writing. The invention and impact of writing systems on cultures, including the invention of paper, the introduction of the codex, illustrations, the book-buying client, and the history of censorship and bookburning and their connection to the technology of the word. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt.—(I.)

15. Language and Identity (4)

Lecture/discussion—3 hours; extensive writing. Introduction to topics related to the construction of identity

through language use, including geographical and social factors affecting language groups. Language ideology affecting linguistic groups, including bilinguals and non-native speakers of English. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Arnett

40. Introduction to Computing in the Humanities (4)

Lecture—3 hours; laboratory—3 hours. Survey of current approaches to use of computers in such fields as language, literature, history, art, music, and drama. Laboratory in text creation and analysis.—(II.) Roddy

60. Narrative and Argumentative Approaches to Major Current Issues in the Media, Culture, and Society (4)

Lecture/discussion—3 hours; term paper. Prerequisite: English A or the equivalent. Interdisciplinary approach to contemporary issues (abortion, AIDS, civil rights, war and peace, welfare state) around which individuals, communities and institutions define themselves in American society, by applying principles of narrative theory to the narratives where those issues are embedded. GE credit: ArtHum or SocSci, Div, Wrt.—I. (I.)

Upper Division Courses**120. Italian-American Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 10. Broadly addresses the question of how American cinema has constructed images of race, ethnicity, gender and social class by historically examining the cinematic rendering of one ethnic group: Italian-Americans. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(I.) Heyer-Caput

124. Special Topics in U.S. Film History (4)

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 10. Topics in U.S. film history in terms of its cultural, technological, institutional, political, and representational development. GE credit: ArtHum, Wrt.—I. (I.)

125. Film Genres (4)

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 10. Genre theory, the historical specificity of particular genres, the structure of the film industry, and film's relationship to popular culture. GE credit: ArtHum, Wrt.—III. (III.)

140. Advanced Computing in the Humanities (4)

Lecture—3 hours; laboratory—3 hours; research project. Prerequisite: course 40 or consent of instructor. The computer as support for the humanities. Topics include advanced textual analysis, editing, vocabulary control, and data base management (design, application and evaluation, and search strategies)—III. (III.) Roddy

144. Marx, Nietzsche, Freud (4)

Lecture/discussion—3 hours; term paper. Study of major texts of these thinkers, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Finney

176. "From Caligari to Hitler": A Study of Classic Weimar Cinema (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 10. Following Siegfried Kra-cauer's famous study of classic Weimar cinema, this survey of German film of the 1920s critiques his teleological reading of Weimar film as the harbinger of German totalitarianism. Films include *The Cabinet of Dr. Caligari*, *The Joyless Street*, *M*, *Metropolis*, and *The Blue Angel*. Offered in alternate years. GE credit: ArtHum, Wrt.—(II.)

177. "From Hitler to Heimat": Coming to Terms with Nazism in Postwar German Film (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 10. Postwar German culture has been indelibly marked by the Nazi past. Course examines the contributions of New German Cinema to the project of *Vergangenheitsbewältigung*, or coming to terms with the Nazi past. Films by Fass-

binder, Syperberg, Kluge, Sander, Sanders-Brahmes, Reitz. Offered in alternate years. GE credit: ArtHum, Wrt.—(III.)

180. Topics in the Humanities (4)

Lecture/discussion—4 hours; term paper. Analysis of interdisciplinary issues in the humanities. Topics will vary. May be repeated once for credit. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.)

198. Directed Group Study (1-4)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-4)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses**250. Topics in the Humanities (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the humanities, selected by the instructor. May be repeated once for credit.—I, II, III. (I, II, III.)

299. Individual Research (1-4)

Individual research in the humanities resulting in a formal written research report. (S/U grading only.)

Hydrologic Sciences (A Graduate Group)

 Richard Snyder, Ph.D., Biometeorologist Specialist (*Land, Air and Water Resources*)
 Kenneth Tate, Extension Rangeland Specialist (*Agronomy and Range Science*)

Graduate Study. The Graduate Group in Hydrologic Sciences is an interdisciplinary program offering M.S. and Ph.D. degrees. Course work is available from many programs, including Hydrologic Sciences, Civil and Environmental Engineering, Geology, and Soil Science. Education in the group broadens the skills and knowledge of the physical science or engineering student interested in the occurrence, distribution, circulation and properties of water on earth. Because of water's ubiquity and importance to physical, chemical and biological processes, hydrologic sciences involve the geologic, atmospheric and oceanic sciences, as well as engineering and other applied physical sciences. Basic to the program are core courses in fluid dynamics, hydrologic phenomena, hydrobiology, hydrogeochemistry, hydrologic techniques, and hydrologic policy. Students can pursue specializations in hydrogeochemistry, surface hydrology, subsurface hydrology, irrigation and drainage, watershed hydrology and water resources management. The subsurface hydrology specialization includes hydrogeology and vadose-zone hydrology.

Preparation. Applicants to the program are expected to have completed or to be completing an

undergraduate degree in environmental or physical sciences, mathematics, or engineering. Undergraduate study must include one year each of calculus, of physics with calculus, and of chemistry. Additional courses in applied statistics, computer programming, and geology are recommended.

Specialization. Each student will pursue an individual program of advanced study under the direction of a group of faculty members with similar interests but diverse backgrounds. Course work in addition to the above is typically taken in the most appropriate departments.

Graduate Adviser. M.E. Grismer, J.W. Hopmans (*Land, Air and Water Resources*).

Courses in Hydrologic Sciences (HYD)

Graduate Courses

200. Survey of Hydrologic Sciences (1)

Seminar—1 hour; paper. Prerequisite: open to students in the Hydrologic Sciences program. Seminar course exposes students to the diversity of sciences involved in the program. Students prepare a paper and presentation in their area of research interest. May be repeated twice for credit. (S/U grading only.)—I, II, III. (I, II, III.) Grismer

210. Hydrologic Modeling of the Vadose Zone (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Soil Science 107, Mathematics 22B, Programming Language. Principles and modeling of soil water, solute transport, heat and water flow, root water and nutrient uptake. Numerical techniques to incorporate soil heterogeneity. Offered in alternate years.—III. Hopmans

212. Evapotranspiration (3)

Lecture—3 hours. Prerequisite: course 103. Review of lower atmosphere properties; introduction to similarity theory; surface roughness parameterization, calculation of energy fluxes, local advection and turbulence measurements will be studied in the field. Offered in alternate years.—III.

243. Water Resource Planning and Management (3)

Lecture—3 hours. Prerequisite: course 141 or Civil and Environmental Engineering 142. Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as Biological Systems Engineering 243.)—I. (I.) Marino

252. Hillslope Geomorphology and Sediment Budgets (4)

Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmental Engineering 142 or consent of instructor. Exploration of theoretical and empirical foundations of sediment production on hillslopes using computer models and field experiments to promote an understanding of how watersheds evolve naturally and with human impacts. Offered in alternate years.—III. Pasternack

256. Geomorphology of Estuaries and Deltas (4)

Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmental Engineering 42 or consent of instructor. Survey of the processes and landforms associated with sediment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Offered in alternate years.—III. Pasternack

264. Modeling of Hydrologic Processes (3)

Lecture—3 hours. Prerequisite: course 141 or the equivalent and Statistics 102 or the equivalent. Techniques used to model the spatio-temporal structure of rainfall and runoff are introduced. Procedures studied include those based on stochastic point processes, chaos theory, fractal geometry, and fractional noises. Offered in alternate years.—(III.) Puente

269. Numerical Modeling of Groundwater Systems (3)

Lecture—3 hours. Prerequisite: course 145A or Civil Engineering 144 and course 145B, Mathematics 22B. Finite difference and finite element techniques in modeling groundwater flow and transport. Fundamentals of constructing and calibrating models with hands-on applications. Methods and limitations of numerical solution of transport equations. Model interpretation and ethics.—III. (III.) Fogg

273. Introduction to Geostatistics (3)

Lecture—3 hours. Prerequisite: Statistics 130A and 130B, or the equivalent. Statistical treatment of spatial data with emphasis on hydrologic problems. Topics include theory of random functions, variogram analysis, Kriging, co-Kriging, indicator geostatistics, and stochastic simulation of spatial variability. Demonstration and use of interactive geostatistical software included. Offered in alternate years.—I. Fogg

275. Analysis of Spatial Processes (3)

Lecture—3 hours. Prerequisite: Statistics 102 or the equivalent; course 273 or Statistics 273A recommended. Characterization of homogeneous random fields; extremes and spectral parameters; geometry of excursions, local averaging; scale of fluctuation; non-Gaussian and irregular random fields; geostatistical applications. Offered in alternate years.—(III.) Puente

290. Seminar in Hydrologic Science (1)

Seminar—1 hour. Prerequisite: graduate standing and background in Hydrologic Science, consent of instructor. Seminars and critical review of problems, issues, and research in hydrologic sciences. Oral presentations of research. Topics will vary. May be repeated for credit. (S/U grading only.)—III. (III.)

298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Professional Courses

410. OSHA HAZWOPER Refresher Course (1)

Lecture—1 hour. Updates hazardous materials handling information for purposes of keeping certification current. Certification lapses until the refresher course is complete. (P/NP grading only.)—II. (II.) Grismer

440. Hazardous Waste Operations Training (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: upper division standing in College of Agricultural and Environmental Sciences. Forty-hour course designed to meet the requirements of Federal OSHA regulation CFR 1910.120. Covers the health, regulatory, processing and safe handling issues/problems associated with working with hazardous materials. (P/NP grading only.)—III. (III.) Grismer

Hydrology

(College of Agricultural and Environmental Sciences)
Faculty. See under Department of Land, Air and Water Resources, Hydrology Section.

The Major Program

Hydrology is the study of the occurrence, distribution, circulation, and behavior of water in the environment of Earth. It includes measurement and analysis of water phenomena in the subsurface, on the Earth's surface, and in the atmosphere, for the purpose of understanding and addressing problems

that affect sustainability of both water quantity and water quality.

The Program. Hydrologists generally need strong backgrounds in physics, mathematics, chemistry, biology, geology, field methods, and computer methods. Knowledge of biology and chemistry is important for understanding modulators of water quality. Geology is essential for those working in groundwater hydrology. Field methods are necessary for observing and measuring hydrologic phenomena, and computer methods and mathematics are routinely needed for collectively analyzing field data and forecasting future system behavior.

Contemporary hydrologic problems include more efficient use and development of groundwater and surface water resources; pollution of subsurface and surface waters from such sources as urban runoff, leaky underground storage tanks, and agricultural drainage; water quality criteria for drinking water and for fish and aquatic life; acidic precipitation and its impact on the environment; and the role of water in natural disasters such as flooding, landslides, and land subsidence. Other contemporary concerns include artificial recharge of groundwater, remote sensing for water resources, risk analysis in the operation of surface water reservoirs, and hydrologic prediction under uncertainty. The resolution of these problems demands hydrologic scientists with the comprehensive, multidisciplinary education embodied in this program.

Internships and Career Alternatives. Numerous opportunities for internships exist with state and federal agencies in the Greater Sacramento–Davis area. Career opportunities in hydrologic science are available in private consulting firms, environmental interest groups, and government agencies dealing with water resources, including the U.S. Geological Survey, U.S. Department of Agriculture (Fish and Wildlife, Agricultural Research, Forest Service, and Soil Conservation Service), Environmental Protection Agency, national research laboratories (Lawrence Livermore National Laboratory, Oak Ridge National Laboratory), and California Departments of Water Resources, Water Resources Control Board, Regional Water Quality Control Boards, Conservation, Fish and Game, and Toxic Substances. The major is excellent preparation for advanced degrees in hydrologic science and related fields.

B.S. Major Requirements:

	UNITS
Written/Oral Expression	0-8
See College requirement	
Preparatory Subject Matter	68
Biological Sciences 1A, 1B, 1C	15
Chemistry 2A, 2B, 2C	15
Physics 9A, 9B	8
Mathematics 21A, 21B, 21C, 21D, 22A, 22B	22
Geology 50, 50L	5
Engineering 5 or the equivalent	3
Breadth/General Education	18-24
Depth Subject Matter	44-54
Hydrologic Science 103, Engineering 103, or Chemical Engineering 150A and 150B, or Civil and Environmental Engineering 141 and 141L	6-8
Hydrologic Science 134, 141, 142, 143, 145, 146, 151A	34
Soil Science 107	4
Civil and Environmental Engineering 114 or Statistics 130A and 130B	4-6
Select one of Agricultural and Resource Economics 147, Environmental Science and Policy 161, 166	3-4
Restricted Electives	16-26
Students select an area of concentration in consultation with the Master Adviser, and then obtain prior approval from the Master Adviser for courses used to satisfy the student's area of concentration. Areas of concentration include:	

Surface hydrology (Atmospheric Science 115, 133, Environmental Science and Policy 155, Environmental Science and Policy /Geology 150A, Geology 135, Soil Science 118)

Hydrogeology (Geology 60, 60L, 100, 100L, 101, 101L, 103, 109, 109L, 161, Soil Science 120, Applied Science Engineering 115)

Remote sensing (Applied Biological Systems Technology 180, 181, Environmental and Resource Sciences 186)

Water management (irrigation and drainage) (Hydrologic Science 110, 115, 117, 124)

Water quality (Environmental and Resource Sciences 131, Environmental Toxicology 101, 112A, Environmental Science and Policy 151, Soil Science 111, Hydrologic Science 122, Chemistry 8A-8B-8C, 128)

Unrestricted Electives**6-20**
(Including units earned from 192 and 199 courses.)

Total Units for the Degree**180**
Major Adviser. C. E. Puente.

Minor Program Requirements:

The Hydrology Section of the Department of Land, Air and Water Resources offers the minor in Hydrology for environmental or natural science students who have an interest in water/environmental issues. The interested student should have completed preparatory course work in calculus (Mathematics 16B), chemistry (Chemistry 2A; Chemistry 2B recommended), physics (Physics 5A), and biology (Biological Sciences 1A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.

UNITS

Hydrology	19-21
Hydrologic Science 103 or Engineering 103A and Hydrologic Science 141; or Environmental and Resource Sciences 100 and 100L	6-7
Atmospheric Sciences 115, Environmental and Resource Sciences 131	6
Select two courses from Atmospheric Sciences 133, Environmental and Resource Sciences 110, 120, 180, Environmental Science and Policy 150A, 151, Geology 135, Hydrologic Science 115, 126, 145 and 146, Soil Science 107, 118	6-8

Graduate Study. See the Hydrologic Sciences Graduate Group.

Courses in Hydrologic Science (HYD)

Questions pertaining to the following courses should be directed to the instructor or to the Resource Sciences Teaching Center, 111A Veihtmeyer Hall or 122 Hoagland Hall (530-752-1669).

Lower Division Courses

10. Water and Power (3)

Lecture—2 hours; discussion—1 hour. Introduction to water resources issues, including both scientific and socio-political aspects. History of water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. GE credit: SciEng, Wrt.—III. (III.) Fogg

92. Hydrologic Science Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division student, consent of instructor. Work experience off and on campus in Hydrologic Science. Internship supervised by a member of the faculty. (P/NP grading only.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

103. Introduction to Fluid Mechanics (3)

Lecture—3 hours. Prerequisite: Physics 5A and Mathematics 16B; course 100 recommended; or consent of instructor. An introductory course in fluid properties, fluid statics, conservation of mass, momentum and energy. Dimensional analysis and boundary layer flow phenomena will also be considered. Not open for credit to students who have completed Water Science 142.—I. (I.) Parlange

110. Irrigation Principles and Practices (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Physics 5A; Soil Science 100 recommended. General course for agricultural and engineering students dealing with soil and plant aspects of irrigation and drainage. Soil-water movement and storage, plant responses to irrigation regimes, water use by crops; procedures for determining frequency and depth of irrigation, drainage. Not open for credit to students who have completed Water Science 110.—III. (III.) Schawankl

115. Irrigation and Drainage Systems (4)

Lecture—4 hours. Prerequisite: Engineering 103A or course 103. Engineering and scientific principles applied to the design of surface, sprinkle and micro irrigation systems and drainage systems within economic, biological, and environmental constraints. Interaction between irrigation and drainage will be emphasized. Not open for credit to students who have completed Water Science 145. (Same course as Biological Systems Engineering 145.)—II. (II.) Wallender, Grismer, Hills

117. Irrigation Water Management (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 110 or 124. Irrigation principles of soil-water and plant-water relations with irrigation system characteristics and other factors into an analytical framework for irrigation water management. Case studies discussed. Not open for credit to students who have completed Water Science 172.—III. (III.) Hopmans

122. Biology of Running Waters (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: introductory course in biology and junior standing. The study of lotic aquatic animals and plants in relation to their environment; various factors affecting the distribution of freshwater plants and animals is emphasized in a manner particularly suitable for students of freshwater ecology, soil and water science, and renewable natural resources. Not open for credit to students who have completed Water Science 122.—I. (I.)

122L. Biology of Running Waters Laboratory (2)

Laboratory—2 hours (including 2 or 3 weekend field trips). Prerequisite: introductory course in biology or consent of instructor and junior standing; course 122 (concurrently). Course allows interested students to obtain experience in sampling, processing, and synthesizing field data. Field trips will allow students to obtain an understanding of the structure and function of stream ecosystems. Not open for credit to students who have completed Water Science 122L.—I. (I.)

124. Plant-Water-Soil Relationships (4)

Lecture—3 hours; discussion—2 hours. Prerequisite: course 100; Soil Science 100 recommended, and one additional course in botany or plant physiology; or consent of instructor. Principles of plant interactions with soil and water environments and their applications in crop and environmental management. Includes nutrient and water uptake and transport; transpiration; soil processes affecting supplies; deficiencies and plant responses. Not open for credit to students who have completed Water Science 104.—III. (III.) Hsiao

134. Aqueous Geochemistry (6)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 2B. The chemistry of natural waters; dielectric properties of water; thermodynamic and

mass-action relations; metal hydrolysis; acid-base equilibria; metal-coordination chemistry; solubility calculations; electron-exchange reactions; and rate laws.—III. (III.) Casey

141. Physical Hydrology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 9B, Mathematics 21B; course 100 recommended. Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quantitative description of the following processes: precipitation, infiltration, evaporation, transpiration, surface runoff, and groundwater runoff.—I. (I.) Puentes

142. Systems Hydrology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 141 or Civil and Environmental Engineering 142. General course considering hydrologic processes from a systems or statistical model perspective. General probability concepts are applied to frequency, time series and spatial data analysis. Linear systems are also considered in conjunction with Kalman filter techniques.—II. (II.) Puentes

143. Hydrological Processes in Ecosystems (3)

Lecture—3 hours. Prerequisite: course 141 or Environmental and Resource Science 100. Movement and storage of water are integral parts of landscape and ecosystem functioning. Hydrological processes in individual ecosystems and the role of water linking the myriad components of the landscape.—(I.) Pasternack

144. Groundwater Hydrology (3)

Lecture—3 hours. Prerequisite: Mathematics 16B or 21A; Hydrologic Science 103 or Engineering 103 recommended. Fundamentals of groundwater hydrology—occurrence, movement and distribution of groundwater, well-flow systems—well construction, operation and maintenance; groundwater contamination—exploration and quality assessment. (Same course as Biological Systems Engineering 144.) Not open for credit to students who have completed course 145A.—I. (I.) Marino

146. Hydrogeology and Contaminant Transport (5)

Lecture—3 hours; laboratory—2 hours; term paper. Prerequisite: course 144 or Civil and Environmental Engineering 144 or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic examples. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as Geology 156.)—II. Fogg

150. Water Law (3)

Lecture—3 hours. Prerequisite: Environmental and Resource Sciences 100 or 121 or consent of instructor. Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal/state relations. Basic water quality acts, endangered species act, water transfers and current water issues.—II.

151. Field Methods in Hydrology (4)

Lecture—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Environmental and Resource Sciences 100 or course 141. Measurement methods and data analysis for evaluation of water storage, movement and contamination in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used.—II. (II.) Pasternack

182. Environmental Analysis with Geographical Information Systems (GIS) (5)

Lecture—2 hours; laboratory/discussion—6 hours. Prerequisite: Applied Biological Systems Technology 180; Applied Biological Systems Technology 181 recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment. Precision farming. Natural resource management. Spatial database structures. Remote sensing applications. Data qual-

ity and error analysis in GIS. (Same course as Applied Biological Systems Technology 182.)—I. (I.)

192. Hydrologic Science Internship (1-12)

Internship—3-40 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in water science. Internship supervised by a member of the faculty. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: senior standing. (P/NP grading only.)

Immunology (A Graduate Group)

Graduate Study. The Graduate Group in Immunology is a multidisciplinary group offering programs of study leading to the M.S. and Ph.D. degrees in various aspects of immunology. Possible areas of specialization include molecular immunology, immunochimistry, immunogenetics, cellular immunology, clinical immunology, tumor and developmental immunology, arthritis and inflammation, auto-immunity and virology.

Preparation. Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry, biochemistry, molecular and cellular biology or related biological and medical sciences.

For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (a) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (b) zoological specialties (cell biology, endocrinology, embryology, protozoology, histology, cytology, physiology); (c) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (d) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (e) genetic specialties (developmental genetics, population genetics, cytogenetics, molecular genetics).

Graduate Adviser. Contact the Group Office.

Courses in Immunology (IMM)

Additional courses are available and listed under the individual sponsoring departments. Contact the group office for information.

Graduate Courses

292. Immunotoxicology Seminar (2)

Seminar—2 hours. Prerequisite: graduate standing in Pharmacology/Toxicology, Immunology, Physiology, or Biochemistry. Seminar presentations dealing with principles of xenobiotic effects on immune system functions and specific examples of drugs and environmental chemicals exerting toxic effects on the immune system. Offered in alternate years. (S/U grading only.)—I. Golub

293. Current Concepts in Immunology (4)

Lecture/discussion—4 hours. Prerequisite: Pathology, Microbiology and Immunology 126 or consent of instructor. Innate and acquired immunity as defense mechanisms against disease. Mechanisms regulating the distinct cell types driving these responses and current concepts in the literature.—II. McKisic

295. Cytokines: An Expanding Class of Cell Regulatory Agents (2)

Lecture/discussion—2 hours. Prerequisite: undergraduate courses in immunology, cell biology and biochemistry. Lectures, discussion and presentations which examine the role of cytokines in immunity, inflammation tissue injury and disease. Current knowledge of their molecular structures, specific receptors, antagonists and signalling mechanisms will be discussed.—II. Benton, Erickson

296. Advanced Topics in Immunology (2)

Seminar—2 hours. Prerequisite: graduate standing or consent of instructor. Presentation, discussion, and analysis of faculty research topics in immunology. Required for Immunology Graduate Students every year until they have passed their qualifying exam. May be repeated for credit. (S/U grading only.)—I. (I.) Benton

Independent Study Program

Information:

Chairperson
Committee on Courses of Instruction
c/o Academic Senate Office (530-752-2220)

The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest.

A program qualifying as Independent Study will consist of one or more courses in the 190-199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.

The procedure for enrolling in an Independent Study Program is as follows:

1. develop, in general terms, a plan of study;
2. locate a faculty sponsor or panel of sponsors, and with their help and approval develop a detailed plan;
3. complete a project proposal form (obtained from the Academic Senate Office) and submit it to the Academic Senate Committee on Courses of Instruction.

The deadline for applications is the tenth day of instruction of the term before the term in which the project is to be undertaken. (See the Academic Calendar at the front of the catalog for specific dates.)

You must report the completion or termination of the project to the Committee on Courses of Instruction.

Individual Major

(College of Agricultural and Environmental Sciences and College of Letters and Science)

The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by faculty advisers and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

College of Agricultural and Environmental Sciences

Program Office, 150 Mrak Hall
(530-752-0610)

Student Proposal. An Individual Major may be organized by a student having a specific academic interest not represented by an established major. Each student wishing an Individual Major should submit a proposal to the Dean at least **four quarters** before graduation, for review by the Individual Major Committee. This proposal must include (1) a description of the special educational aims of the student, including a statement indicating why the educational objectives cannot be met by existing majors; (2) a list of planned courses; and (3) faculty adviser recommendations. It is critical that students contact a college counselor for consultation and development of the proposal.

UNITS

English Composition requirement0-8

See College requirement

Preparatory Subject Matter(variable)

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

Breadth/General Education18-24

Satisfaction of General Education requirement

Depth Subject Matter45-54

Upper division course work must include (a) interrelated courses of 45 upper division units from two or more areas of study; (b) at least one of the two or more areas of study must be within the College of Agricultural and Environmental Sciences; (c) at least 30 of the 45 upper division units that are required in the program must be taken from courses provided by the College of Agricultural and Environmental Sciences.

Unrestricted Electives(variable)

Total Units for the Degree180

Master Adviser. E. Caswell-Chen (*Environmental and Resource Sciences*).

College of Letters and Science

Program Office, 200 Social Sciences and Humanities Building (Dean's Office)

Committee in Charge

Christiana Drake, Ph.D., Chairperson (*Statistics*)
Max Byrd, Ph.D., (*English*)
JoAnn Cannon, Ph.D. (*French and Italian*)
Joel Johnson, Ph.D. (*Psychology*)
Jeanette Natzle, Ph.D. (*Molecular and Cellular Biology*)

Student Proposal. A student who wishes to propose an individual major must submit the proposal to the Faculty Committee on Individual Majors in the College of Letters and Science **prior to reaching 120 units. The proposal must be submitted by the end of the fourth week of the quarter.** This proposal will consist of (1) an essay, identifying the specific educational and professional objectives, including an indication of why the objectives cannot be met within existing majors, (2) a list of courses planned to complete the major, and (3) faculty adviser recommendations. The proposal will be reviewed and a decision provided the quarter of submittal. It is important for you to make arrangements to speak with a counselor in the college early in the development of your major.

A.B. and B.S. Major Requirements:

UNITS

Preparatory Subject Matter(variable)

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

Depth Subject Matter45-54

Upper division units must include:

- (a) interrelated and complementary courses from two or more departments which provide a unified pattern and focus; (b) at least 30 units from Letters and Science teaching departments or programs; (c) no more than 10 units in courses numbered 194H, 198 and 199; (d) for the A.B. degree, a maximum of 80 units toward the major; for the B.S. degree, a maximum of 110 units toward the major.

Total Units for Degree180

Major Advisers (selected by student). *Principal Adviser:* a faculty member in a teaching department or program in the College of Letters and Science in

major field of emphasis. *Secondary Adviser:* a faculty member from secondary area of interest.

Honors Program. By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see College section), may petition the Individual Majors Committee for tentative acceptance into an honors program.

Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty adviser. The prospectus must be presented to the Committee by the end of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to 3 units of independent study in the program during each of two quarters in the senior year as course options.

Kenneth A. Shackel, Ph.D., Associate Professor (*Pomology*)
S. Mani Tripathi, Ph.D., Professor (*Physics*)
Jessica Utts, Ph.D., Professor (*Statistics*)

The Program of Study

Integrated Studies is an invitational, first-year, residential honors program. Established in 1969, the program aims to help high-achieving students integrate knowledge gained from their study of the humanities, natural sciences, and social sciences and expand their learning experiences through interdisciplinary or multidisciplinary courses. Enrollment is limited to 25 students per class, and program membership is limited to the top 3% of the entering class. (In 2002-2003, 69 students will be admitted to the program.)

Students enroll in three Integrated Studies courses and two seminars during the year. **Students not admitted to the Program may not register for Integrated Studies courses or seminars.**

Courses in Integrated Studies (IST)

Lower Division Courses

8. Colloquium (1)

Discussion—1 hour. Lectures, films, and readings on the interrelation between the arts and sciences. May be repeated for credit. (P/NP grading only.)—I, II. (I, II.)

8A. Special Topics in Natural Science and Mathematics (4)

Lecture—3 hours; discussion—1 hour. Group study of a special topic in natural sciences and mathematics. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: SciEng, Wrt.—I, II, III. (I, II, III.)

8B. Special Topics in Humanities (4)

Lecture—3 hours; discussion—1 hour. Group study of a special topic in humanities. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.)

8C. Special Topics in the Social Sciences (4)

Lecture—3 hours; discussion—1 hour. Group study of a special topic in social sciences. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: SocSci, Wrt.—I, II, III. (I, II, III.)

9. Seminar (1)

Lecture—1 hour. Preparation of a research report. Normally taken with course 8. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

Upper Division Course

197T. Tutoring in Integrated Studies (1-4)

Prerequisite: consent of Director of Integrated Studies. Tutoring in lower division Integrated Studies courses, usually in small discussion groups. Weekly discussions with the instructor on the subject matter of the course being tutored and on the art and craft of teaching. (P/NP grading only.)—I, II. (I, II.)

International Agricultural Development

(College of Agricultural and Environmental Sciences) International Agricultural Development is an interdisciplinary major in the Human and Community Development department.

Faculty. Includes members from various departments across colleges.

The Major Program

The goal of international agricultural development is to improve food production, nutrition, marketing, and health in less technically advanced countries. Students in this major are trained in technical areas of agriculture that can be applied to the problems of world hunger and health.

The Program. Principle subjects of study within the major are Agricultural Production, Economic Development, Environmental Issues, Nutrition, Rural Communities, and Trade and Commodity Development. Courses are in social sciences, humanities, and economic environments in which agriculture operates in countries outside the United States.

Career Alternatives. The study of international agricultural development prepares a student for a variety

of careers. Some students choose service through the Peace Corps. Others seek employment in international trade, while others choose to work for a governmental or private agency in a foreign nation. Religious groups and organizations also employ university-trained individuals for agricultural work in conjunction with missions and other types of human service work overseas. The major is also preparation for further graduate work in agricultural development.

B.S. Major Requirements:

UNITS

English Composition Requirement0-8
See College requirement

International Agricultural Development Abroad0-20

A maximum of five courses abroad, selected with approval of an adviser, may be applied toward the 12 upper division courses in the major.

Preparatory Subject Matter47
Choose 47 units from either the Social Science or Natural Science core in consultation with adviser.

Social Sciences core:

Agricultural and Resource Economics 15; Agricultural Management and Rangeland Resources 1; Animal Science 41 and 41L or Agricultural Management and Rangeland Resources 2; Chemistry 10; Community and Regional Development 1 or 17; Economics 1A and 1B; International Agricultural Development 10; Mathematics 16A and 16B; Nutrition 10 or 20; Sociology 1 or Anthropology 2; Soil Science 10; Statistics 13 or Sociology 46B

Natural Science core:

Animal Science 41 and 41L or Agricultural Management and Rangeland Resources 2; Biological Sciences 1A and 1B or 1A and 1C; Chemistry 2A and 2B; Chemistry 8A and 8B or Physics 1A and 1B; Economics 1A or Agricultural and Resource Economics 15; International Agricultural Development 10; Mathematics 16A and 16B; Nutrition 10 or 20; Soil Science 10 or 100; Statistics 13

Breadth/General Education6-24
Satisfaction of General Education requirement

Depth Subject Matter36-37
Agricultural and Resource Economics 147 or Agricultural Management and Rangeland Resources 101 or Geography 1614

Economics 115A4
International Agricultural Development 142 or 1602

International Agricultural Development 103 and 1048
International Agricultural Development 110 or 1114

Sociology 1704
Agricultural Management and Rangeland Resources 110A or 110B or 135 or Plant Biology 1423-4

Political Science 123 or 124 or Sociology 145A4

Textiles and Clothing 1743

Foreign Language Requirement0-15
Students must complete 15-unit level in one language or pass the foreign language proficiency examination. A score of 5, 4, or 3 on a foreign language College Board Advanced Placement Examination (except Latin) or a score of 550 on the College Board SAT II: Subject Test will also satisfy this requirement.

Internship Requirement4-8
Students must complete at least 4 units of internship and may use up to 8 units toward major requirements. Internships

can be chosen in consultation with an adviser. Internship requirement waived for students enrolled in the UC Education Abroad Program.

Areas of Specialization30-35

Agricultural Production Option:

Agricultural and Resource Economics 140, Agricultural Management and Rangeland Resources 101 and 105, Plant Biology 152 or Animal Genetics 107

Additional 14-15 units of restricted electives in consultation with an adviser.

Economic Development Option:

Agricultural and Resource Economics 100A and 100B, Economics 115B
Agricultural and Resource Economics 120, 130, 140, 175 and International Agricultural Development 195A or 195B

Environmental Issues Option:

Environmental Science and Policy 100 or 110, 160, 171 and Plant Biology 151
Agricultural and Resource Economics 147, Agricultural Management and Rangeland Resources 101, Environmental Horticulture 150, Environmental Science and Policy 126, 161, 175 and International Agricultural Development 195A or 195B

Rural Communities Option:

Community and Regional Development 140, 151, 151L, 152, 154
Community and Regional Development 164 or 172 or 173 or 174, International Agricultural Development 195A or 195B, additional restricted electives chosen in consultation with an adviser

Trade and Development in Agricultural Commodities Option:

Agricultural and Resource Economics 100A, 113, 130, Plant Biology 172
Agricultural and Resource Economics 138, Economics 160A, 160B, Food Science and Technology 100A, 109, 160, International Agricultural Development 195A or 195B, Textiles and Clothing 162, 163

Total Units for the Degree180

Specialization Advisers

A listing of faculty in the various areas of specialization and with interests in International Agricultural Development is available from the Major Adviser.

Major Adviser. S.B. Brush (*Human and Community Development*).

Minor Program Requirements:

UNITS

International Agricultural Development22
International Agricultural Development 10 and 110 or 1118

Agricultural Management and Rangeland Resources 101 and 110A or 110B6

International Agricultural Development 103, 104, 195A or 195B, Agricultural and Resource Economics 115A8

Minor Adviser. S.B. Brush (1331 Hart Hall).

Graduate Study. A program of study and research leading to the M.S. degree is available in International Agricultural Development. Detailed information regarding graduate study may be obtained by writing to the Coordinator of Graduate Recruitment (I.A.D.), Graduate Studies, UC Davis.

Graduate Advisers. J. Hill (*Agronomy and Range Science*), F.W. Hirtz (*Human and Community Development*), L.S. Jarvis (*Agricultural and Resource Economics*), J.D. Momsen (*Human and Community Development*), D.E. Rains (*Agronomy and Range Science*).

Related Courses. See Agricultural and Resource Economics 148, 215C, Agricultural Management

and Rangeland Resources 111, Anthropology 221, Economics 115A-115B, 215A-215B-215C, Geography 142, Nutrition 20, Sociology 144.

Courses in International Agricultural Development (IAD)

Questions pertaining to the following courses should be directed to the instructor or to the Department of Human and Community Development Advising Center in 1303 Hart Hall (530-752-2244).

Lower Division Courses

10. Introduction to International Agricultural Development (4)

Lecture—3 hours; discussion—1 hour. Theories, practices and institutions relating to agricultural development; the interaction of changing social, cultural and economic organization through successive stages of economic development; impact of new agricultural technology on underdeveloped regions. GE credit: SocSci, Div, Wrt.—II. Brush

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

Upper Division Courses

103. Social Change and Agricultural Development (4)

Lecture/discussion—4 hours. Prerequisite: introductory social science course (Anthropology, Sociology, Economics, International Agricultural Development). How social and cultural factors influence technological change in agriculture; theories of diffusion of innovations; social impact analysis and technology assessment. GE credit: SocSci, Div.—I. Brush

104. Gender and Environment in the Developing World (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 recommended. Examines how environmental problems in the countries of Africa, Asia and Latin America affect men and women differently and the impact of structural adjustment on the environment in rural and urban areas.—III. (III.) Momsen

110. Agricultural Production Economics (4)

Lecture—4 hours. Prerequisite: upper division status and an introductory course in microeconomics (Economics 1A). Economic analysis of agricultural production in low income countries, from field-level data collection to national food policy. Emphasis on construction and use of farm models in project evaluation. Offered in alternate years.

111. Agricultural Marketing Systems (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division status and an introductory course in microeconomics recommended (Economics 1A). Economic analysis of agricultural marketing systems in low income countries, including the functions of transportation, storage, packaging, handling, grading and standardization, processing, and market news. Emphasis is given to evaluation of interventions in marketing systems to speed economic development.—II. (II.) Moore

142. Equipment and Technology for Small Farms (2)

Lecture—1 hour; laboratory—3 hours. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as Applied Biological Systems Technology 142.)

160. Agroforestry: Global and Local Perspectives (3)

Lecture/discussion—3 hours. Prerequisite: Agricultural Management and Rangeland Resources 2 or Biological Sciences 1C, Plant Biology 142 or a general ecology course (Environmental Science and Policy 100). Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices.

(Same course as Agricultural Management and Rangeland Resources 160.) Offered in alternate years.—I. Weinbaum

162. Field Course in Tropical Ecology and Sustainable Agricultural Development (11)

Lecture—15 hours; discussion—7.5 hours; fieldwork—30 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Students accepted based on academic merit, personal experience, and academic discipline to provide a multidisciplinary atmosphere. Course in Panama. Sustainable agricultural systems to protect tropical rainforest ecosystems, sustainable agriculture in the Panama Canal watershed, language and culture of Panama and the U.S.A. (Same course as Pomology 162.) GE credit: SciEng, Div, Wrt.—Potter, Brown

170. Program Development for International Agriculture (4)

Lecture/discussion—4 hours. Prerequisite: course 10. Principles of leadership and management for international agricultural development. Organizations and organizational behavior, and the implications for planning and administering organizations involved in the global development effort.—III. Marcotte

190. Proseminar in International Agricultural Development (1)

Seminar—1 hour. Presentation and discussion of current topics in international agricultural development by visiting lecturers, staff and students. May be repeated for credit. (P/NP grading only.)

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

195A. Field Study in Agricultural Development—California (3)

Lecture—2 hours total; seminar—8 hours total; fieldwork—four 2-day visits. Prerequisite: consent of instructor. Students will incur travel expenses. Observation of agricultural development strategies and effects on rural communities. Discussion with farmers, workers and organizational staff members. Study of farm commodities, institutions and experiences in dealing with agricultural development problems. International influence on U.S. agriculture. (P/NP grading only.)—III. (III.) Marcotte

195B. Field Study in Agricultural Development—Mexico (3)

Lecture—2 hours total; seminar—8 hours total; fieldwork—8-day trip to Mexico. Prerequisite: consent of instructor. Students will incur travel expenses. Observation of agricultural development strategies and effects on rural communities. Discussion with farmers, workers and organizational staff members. Study of farm commodities, institutions and experiences in dealing with agricultural development problems. International influence on U.S. agriculture. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

200N. Philosophy and Practice of Agricultural Development (5)

Lecture/discussion—5 hours; term paper. Introduction to key elements of the philosophy and practice of agricultural development in less developed countries. Introduction to the major paradigms of development, the historical context within which these paradigms have operated, and the various development techniques and initiatives that have emerged from agricultural production to institutional capacity building and management. Not open for credit to students who have completed former course 202.—I. (I.) Marcotte

201. The Economics of Small Farms and Farming Systems (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100A. Eco-

nomics perspective on small farm development. Establishes a basis for predicting farmers' responses to changes in the economic environment, and for proposing government policies to increase small farm production and improve farmer and national welfare.—II. (II.) Vosti

202N. Analysis and Determinants of Farming Systems (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural Management and Rangeland Resources 150 or the equivalent. The unifying concepts of cropping systems in temperate and tropical climatic zones; agroecosystems stability, diversity and sustainability; management strategies, resource use efficiency and their interactions; the role of animals, their impact on energy use efficiency, nutrient cycling, and providing food and power. Not open for credit to students who have completed former course 200.—III. (III.) Van Kessel, Pittroff

203N. Project Planning and Evaluation (4)

Discussion—1 hour; workshop—3 hours. Prerequisite: courses 200N (or former course 202), 201, 202N (or former course 200). Interdisciplinary setting for application of student skills and specialization to a "real world" development project. Focus on team-building and effective interdisciplinary problem-solving methods, with the objective of producing a project document and presentation within a specified deadline. Not open for credit to students who have completed former course 203.—III. Sainz, Rains

217. Conservation and Sustainable Development in Third World Nations (4)

Lecture/discussion—3 hours; fieldwork—2 hours. Prerequisite: at least one course from two of these three groups: a) Environmental Science and Policy 160, 161, 168A, 168B; b) Environmental Science and Policy 101, 133, International Agricultural Development 103, Geography 142; c) Anthropology 126, 131, Geography 141, Sociology 144, 145A, 145B. Examination of the patterns of resource ownership, control and management in agricultural lands, extractive zones (fisheries, forests) and wildlands, with emphases on conservation and sustainability. Comparison of industrial democracies and poorer nations. (Same course as Ecology 217.)

220. Food and Nutrition Strategies in Developing Countries (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100A. Identifies important topical problems in food and nutrition policy, develops theoretical frameworks suitable for their analysis, examines the empirical information relevant to the problems and, using theory data, draws appropriate policy implications. Offered in alternate years.—III. Jarvis

290. Seminar in International Agricultural Development (1-2)

Seminar—1-2 hours. Prerequisite: consent of instructor. Discussion and critical evaluation of advanced topics and issues in international agricultural development. May be repeated for credit. (S/U grading only.)—I, II. Rains, Van Horn

291. Topics in International Agricultural Development (1-3)

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content. May be repeated once for credit.

292. Graduate Internship (1-12)

Internship—3-36 hours. Prerequisite: participation in H. Humphrey Fellow Program or consent of instructor. Individually designed supervised internship, off or on campus, in community, business or institutional setting. Developed with advice of faculty mentor and Humphrey Coordinator. (S/U grading only.)

298. Directed Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Graduate Study. The International Agricultural Development M.S. degree program prepares students for careers in global agricultural and rural development, especially of developing and less-industrialized regions. This is an interdisciplinary program designed to provide students with knowledge and skills that will enable them to implement, facilitate, and manage programs that enhance agricultural development, resource management, and rural life.

Students are prepared to accomplish biological and technological improvement in agricultural and natural systems to facilitate social innovation. Training in International Agricultural Development includes both breadth and depth components. Breadth components, required of all M.S. students, aim to establish an understanding of the issues in international development as it relates to agriculture and the environment. These include the history and philosophy of development, leadership and management techniques, fundamentals of crop and livestock farming systems, and agricultural economics. Students acquire depth in their own areas of specialization within the agricultural and social sciences. The areas are agricultural and resource economics, agricultural engineering, agronomy, animal science, anthropology, aquaculture, avian science, community development, ecology, economics, entomology, environmental design, environmental toxicology, food science, gender, geography, horticulture, nutrition, plant pathology, plant biology, plant protection and pest management, political science, pomology, preventive veterinary medicine, range science, sociology, soil science, sustainable agriculture, vegetable crops, viticulture, and water science.

Practical and on-site experience with development issues is encouraged and facilitated by guidance from the group's approximately 80 faculty members, who possess a wide range of experience in international development.

Graduate Adviser. Contact the Group Office.

International Commercial Law

Courses in International Commercial Law (ICL)

201. Orientation in United States Law (7)

Lecture/discussion—20 hours. Prerequisite: law school education or the equivalent. Investigation of the Common Law System of the United States. Includes structure of the U.S. government, Constitutional law, contracts, torts, real property, consumer law, securities law, intellectual property, antitrust, taxation, labor law, environmental law, ethics, remedies, legal research and trial practice.—Johnson

204. International Joint Ventures (3)

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. International and U.S. business and legal transactions. Legal planning, problem solving, decision making and negotiations related to the break-up and dissolution of a major international joint venture. U.S. laws including finance, tax, bankruptcy, labor, antitrust, environmental, corporate structures and intellectual property. Offered in alternate years.—Smith

211. Negotiations and Alternative Dispute Resolution (1)

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Mechanisms for resolving disputes including the alternatives to litigation such as negotiation, mediation, and arbitration. Advantages and disadvantages of each approach. Offered in alternate years.—Smith

215. Business Associations (4)

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships. Offered in alternate years.—Joo

216. International Business Transactions (2)

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. Legal problems arising from international business transactions. Focus on international sales contracts, choice of law, forum selection clauses, letters of credit,

transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, foreign exchange problems, and national efforts to control imports. Offered in alternate years.—Chander

219. Advanced Writing Project (4)

Project. Prerequisite: course 201, law school education or the equivalent. The completion of a written research project under the active supervision of a faculty member in satisfaction of the research-writing requirement. (S/U grading only.)

220. United States Taxation of Multinational Investments (2)

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. An analysis of the United States taxation of multinational investments including jurisdiction of tax, the U.S. tax system, foreign tax credits, treaties, and transfer pricing. Offered in alternate years.—Simmons

236. United States Securities Law and Regulation (2)

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. Structural and jurisdictional issues associated with securities practice. Topics include the regulation of public offerings, transactions by corporate insiders, regulation of corporate disclosure and conduct, and the liabilities of corporations and individuals under anti-fraud provisions. Offered in alternate years.—Chander

242. Private International Law (1)

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. How law operates across state and national borders. Topics include choice of applicable law and transactions involving multiple international jurisdiction, recognition of foreign judgments, and jurisdiction. Analysis of problems practitioners frequently encounter in international commercial law. Offered in alternate years.—Wolff

247. Banking Law (1)

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Institutional features of international banking transactions, the structure of a large financial deal, and the mechanics of overseeing large loans. Emphasis on negotiable instruments such as bills of lading, letters of credit, standby letters of credit, and interbank transactions. Offered in alternate years.—Simmons

249. Comparative Law (1)

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Development of schools of legal thought, chiefly common law systems and civil law traditions. Historical reasons for their divergence. Contemporary approaches to succession, torts, and contracts. Cross-fertilization of laws and difficulties with importing foreign law. Offered in alternate years.—Johnson

250. International Trade Law (3)

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. An investigation of global trading systems including international trade in goods and services, e-commerce, international intellectual property, international tax planning and investment. Includes substantive and procedural provisions of the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA). Offered in alternate years.—Smith

251. United States Litigation Issues (1)

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Prevention and resolution of disputes in international commerce. Emphasis on preparing for a trial in the United States. Includes the study of pre-trial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies. Offered in alternate years.—Smith

262. Antitrust (1)

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Historical and institutional background of antitrust law in the United States. The statutory framework including

price fixing, limits on distribution, monopolization and mergers, and reporting requirements. Offered in alternate years.—Johnson

270. Financing International Transactions (3)

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. How capital is raised in international markets. Investment strategies for U.S. markets. Taxation of financial investments, international currency regulation, and assessing rates of return on international investments. Offered in alternate years.—Simmons

274. Intellectual Property (2)

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. An intensive study of intellectual property law. Areas covered include copyright, trademark and patent law and unfair competition. Offered in alternate years.—Kurtz

291C. International Commercial Law Seminar (4)

Seminar—20 hours. Prerequisite: course 201, law school education or the equivalent. Advanced seminar on a current topic in International Commercial Law. Offered at the University of Cologne in Cologne, Germany for two weeks each summer. The topic will change each year.

299. Advanced Research in Legal Problems (1-4)

Prerequisite: course 201, law school education or the equivalent. (S/U grading only.)

International Nutrition

Kenneth H. Brown, M.D., Program Director

Program Office, 3150 Meyer Hall (530-752-1992)

Fernando E. Viteri, M.D., Ph.D., Professor (*Nutrition Science, UC Berkeley*)

Graduate Study. The Program in International Nutrition, an organized research unit located in the Department of Nutrition, coordinates specialized course work and research leading to the *designated emphasis* in International Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional problems in low-income countries. Students enrolled in the designated emphasis are expected to (1) complete the course requirements already established by their respective graduate programs, (2) participate in a weekly advanced seminar in international nutrition, (3) complete additional core courses in international nutrition (Nutrition 219A, 219B, 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research

on a relevant topic under the supervision of a professor who is a member of the Program in International Nutrition.

Students accepted into the following doctoral programs are automatically eligible to participate in the designated emphasis: Nutrition, Agricultural Economics, Epidemiology, Anthropology, and Human Development. Students from other programs may also be accepted by special request to the Program Director. Upon graduation, students receive a Ph.D. in their major field, with specific recognition for the designated emphasis in international nutrition.

Graduate Adviser. Contact the Program Office.

International Relations

(College of Letters and Science)

Committee in Charge

Robert Blake, Ph.D. (*Spanish*)

Scott S. Gartner, Ph.D. (*Political Science*)

Emily O. Goldman, Ph.D. (*Political Science*)

Jack A. Goldstone, Ph.D. (*Sociology*)

David J. Kyle, Ph.D. (*Sociology*)

Miroslav Nincic, Ph.D. (*Political Science*)

Christopher A. Reynolds, Ph.D. (*Music, Education
Abroad Program*)

Suzana M. Sawyer, Ph.D. (*Anthropology*)

The Major Program

Problems of security, development, ethnic conflict, human rights, health, and the environment are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international relations is an exciting and highly relevant interdisciplinary major.

The Program. Graduation with a major in international relations requires completion of introductory courses in political science, economics, geography, and history. Upper division work is composed of twelve courses chosen from one of four tracks that encompass major topical areas in combination with an area studies emphasis: I. World Trade and Development; II. Peace and Security; III. Global Environment, Health, and Natural Resources; IV. Peoples and Nationalities. The major also requires fluency in English and a working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language.

Programs, Internships, and Career Alternatives.

One program of special interest to international relations majors is the Education Abroad Program, which provides insights into the life and culture of other countries. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center arranges internships and runs a full-credit academic program in Washington, D.C. with a full range of opportunities for International Relations majors (see also the UC Davis Washington Center listing). International relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations), foundations, and companies having interests in international business, trade, or finance. The stringent language requirement of the major program enhances career prospects in jobs which demand knowledge of the language and culture of other countries.

International Relations Abroad. International Relations strongly encourages students to participate in the UC Education Abroad Program. A maximum of

314 International Relations

five courses taken abroad may be applied toward the 12 upper division courses in the International Relations major. Courses are selected with the approval of an adviser for the International Relations program.

Preparatory requirements. Before declaring a major in International Relations, students must complete the following courses with a combined GPA of at least 2.50 at the University of California or other four-year school (at least 3.00 for similar courses taken at community college). All courses must be taken for a letter grade.

Economics 1B	5 units
Geography 10	3 units
History 4C or 10C	4 units
International Relations 1 or Political Science 3	4 units
Statistics 13 or Sociology 46B	4 units

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	20-50
Economics 1B	5
Geography 10	3
History 4C or 10C	4
International Relations 1 or Political Science 3	4
Statistics 13 or Sociology 46B	4
Note: Economics 1A, Mathematics 16A and 16B are prerequisites for some courses.	
Foreign language	0-30
One of the following series in a single language:	
Cantonese 1, 2, 3, 4, 5, and 6	24
Chinese 1, 2, 3, 4, 5, and 6	30
or Chinese 1CN, 2CN, 3CN	15
or Chinese 1BL, 2BL, 3BL	15
French 1, 2, 3, 21, 22	25
German 1, 2, 3, 20, 21	23
Italian 1, 2, 3, 4, 5	21
or Italian 1, 2, 3, 8A, 8B	21
Japanese 1, 2, 3, 4, 5, 6	30
or Japanese 8, 18, 28	15
Russian 1, 2, 3, 4, 5	23
Spanish 1, 2, 3, 21, 22	25
or Spanish 31, 32, 33	15
Note: The language curricula are subject to change; please check with an adviser for the major. A language not listed above may be substituted only with prior written approval of the International Relations Program Committee.	

Depth Subject Matter 47-50

Twelve upper division courses—choose one track below:

Track I: World Trade and Development

(Emphasizes contemporary economic relations of industrialized and developing countries)

For Advanced Industrialized Focus:

Economics 100 or 104; 101 or 105; 160A-160B, Political Science 123	20-22
Two courses selected from Group A	8
One course selected from Group B	4
Four courses to fulfill Area Studies Requirement	16

For Developing Countries Focus:

Economics 115A-115B, 162	12
Political Science 123, 124	8
One course selected from Group A	4
Two courses selected from Group B	8
Four courses to fulfill Area Studies Requirement	16

Group A courses (Advanced Industrialized Countries):

Anthropology 127, Community and Regional Development 118, 141, Economics 110B, 116, Geography 155, International Relations 104, Political Science 130, 140, Sociology 138, 139, 141, 143A, 183
--

Group B courses (Developing Countries):

Anthropology 122A, 122B, 123BN, 126A, 126B, 127, 135, Community and Regional Development 153, Geography 155, International Agricultural Development 103, International Relations 104, Political Science 124, 126, 178, Sociology 138, 141, 145A, 145B, 185
--

Track II: Peace and Security

(Focuses on political and security relationships among states and non-state actors, examining questions of war, peace, alliances, and diplomacy)

Economics 162	4
Political Science 123, 130, 132	12
Political Science 120 or 121	4
Three additional courses from at least two departments selected from Anthropology 123B, Comparative Literature 157, Economics 116, Geography 143, History 145, 146A, 146B, Philosophy 118, Physics 137, Political Science 112, 124, 126, 131, 140, Sociology 100, 118, 157, Women's Studies 102	12
Four courses to fulfill Area Studies Requirement	16

Track III: Global Environment, Health, and Natural Resources

(Familiarizes students with new sources of global interdependence such as biodiversity, natural resource conflicts, population growth, and world health)

Note: Some courses shown below have additional prerequisites

Economics 162	4
Anthropology 101	4
Anthropology 161 or Political Science 122	4
Political Science 123	4
Select two from Applied Biological Systems Technology 182, Anthropology 103, Agricultural and Resource Economics 147, 175, 176, Economics 115A, Environmental Science and Policy 164, Geography 161, Nature and Culture 120, Physics 160, Political Science 107, 175	7-8
Select two from the following groups	9-12
<i>Atmospheric and marine environments:</i> Atmospheric Science 116, 149, Environmental and Resource Sciences 121, 131, Geology 116, International Relations 131	

Land use and energy supply:

Agricultural Management and Rangeland Resources 101, 150, 160, Anthropology 104N, Community and Regional Development 142, Environmental and Resource Sciences 144, 173, Environmental Science and Policy 167, Geology 130, International Agricultural Development 104, 163, Political Science 171

Health and human populations:

Anthropology 133, Communication 160, Environmental Science and Policy 121, 126, Environmental Toxicology 101, 112A, Internal Medicine—Infectious Diseases 141, Nutrition 111, 118, 120B, Sociology 170; Epidemiology and Preventive Medicine 198 and 199 may be taken with the director's approval
--

Four courses to fulfill Area Studies Requirement 16

Track IV: Peoples and Nationalities

(Examines social and cultural foundations of national development and international relations)

Select two courses from Anthropology 130BN, International Relations 104, Political Science 124, Sociology 118	8
Select one course from Anthropology 130A, 133	4
Select one course from Community and Regional Development 176, Political Science 126	4

Select four courses from at least two departments	16
Anthropology 122B, 123AN, 123BN, 124, 126A, 126B, 135, Comparative Literature 151, Human Development 103, Philosophy 105, Political Science 178, Religious Studies 168, 170, Sociology 143A, 145B, 146, 156, 175, 181, 185, Women's Studies 102, 182	

Four courses to fulfill Area Studies Requirement 16

Area Studies Requirement

Four courses: three of the four must be selected within one region, and from at least two of three groups (History, Social Analysis, Culture and Literature); the fourth course may be selected from any region. Student who choose to take advantage of an Education Abroad experience may fulfill the Area Studies requirement by completing three courses approved by the International Relations program.

Africa and the Middle East

History: History 115A, 115B, 115C

Social Analysis: African American and African Studies 107C, 110, 111, 156, Anthropology 140A, 140B, 142, Political Science 134, 146, 149, Women's Studies 184

Culture and Literature: African American and African Studies 157, 162, Art History 150, Dramatic Art 155A, French 124

East and South Asia

History: History 191E, 191F, 194B, 194C, 194D, 194E, 195B, 196B

Social Analysis: African American and African Studies 107C, Anthropology 143A, 143B, 147, 148A, 148B, 148C, 149B, Economics 171, Geography 126, Political Science 148A, 148B, 148C, Sociology 147, 188

Culture and Literature: Art History 153, 163C, Chinese 104, 105, 110, Dramatic Art 154, East Asian Studies 113, Japanese 103, 104, 106, 107, 131, 132, 133, 135, 136

Latin and South America

History: History 161B, 162, 163B, 164, 165, 166B, 167, 168

Social Analysis: African American and African Studies 107A, Anthropology 144, 145, 146, Chicana/o Studies 130

Culture and Literature: African American and African Studies 163, Art History 151, Comparative Literature 152, Dramatic Art 155A, Spanish 149, 151N, 153, 154, 155, 156, 157, 170, 172

Russian and East/Central Europe

History: History 138B, 138C, 143

Social Analysis: Political Science 144

Culture and Literature: Russian 123, 129, 130, 131, 132, 143, 151

Western Europe

History: History 140, 141, 142A, 144B, 145, 146A, 146B, 147A, 147B, 147C, 151D

Social Analysis: African American and African Studies 107C, Geography 123, Political Science 137, 147

Culture and Literature: English 137, 155C, French 107N, 108, 120, 121, 133, German 115A, 115B, 118B, 118C, 118D, 118E, 120, 126, 141, 142C, 143, 150, 168, 185, Humanities 177, Italian 108, 120A, 120B, Spanish 137N, 139, 140N, 141, 142, 148, 157, 170

Total units for the major 67-100

Major Adviser. J. Money (Political Science).

Courses in International Relations (IRE)

Lower Division Courses

1. Global Interdependence (4)

Lecture—3 hours; discussion—1 hour. Development of the concept of global interdependence along its political, economic, demographic, cultural, technological, and environmental dimensions. Focus on the ways societies and states interact. Course provides the foundation for upper division multidisciplinary work in international relations.—I, III. (I, III.) Nincic, Goldman

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

104. The Political Economy of International Migration (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as Sociology 104.)—II. (II.) Kyle

131. Ocean Politics (4)

Lecture—3 hours; term paper. Prerequisite: course 1 or Political Science 3; Political Science 123 recommended. The political, economic, security and environmental aspects of the world's oceans. Focus on the international dimensions of ocean economic resources, and on the means—both cooperative and conflictual—by which these resources have been, and are likely to be, managed.—III. (III.) Goldman

190. Topics in International Relations (4)

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Selected topics in international relations. Variable content. May be repeated for credit when topic differs.—I, II, III. (I, II, III.)

192. International Relations Internship (1-12)

Internship—3-36 hours (to be arranged). Prerequisite: upper division standing and consent of instructor. Work experience in international relations, with term paper summarizing the practical experience of the student. (P/NP grading only.)

194HA-194HB. Special Study for Honors Students (4-4)

Seminar—2 hours; term paper. Prerequisite: open only to majors of senior standing who qualify for honors program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.)

198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

Internship

See Internship Program; UC Davis Washington Center

Internship Program

Albert A. Harrison, Ph.D., Director

The Internship and Career Center 2nd and 3rd Floors, South Hall (530-752-2855), Buehler Alumni and Visitors Center

Program Areas

Joe J. Stasulat, Program Manager (*Agricultural and Environmental Sciences, Graduate Student and Postdoctoral Career Services*)

Linda R. Hughes, Program Manager (*Engineering and Physical Sciences, Health and Biological Sciences, Liberal Arts and Business*)

Internship Experience

The Internship and Career Center facilitates a campuswide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports. The notation briefly describes the nature and location of the internship experience. Questions pertaining to academic credit and Transcript Notation may be directed to The Internship and Career Center.

Course Credit. Internship courses (numbered 92 and 192) are available for credit on a variable-unit and Passed/Not Passed grading basis. A maximum of 12 units of 92 and/or 192 courses may be counted toward the 180-unit minimum needed for graduation.

To qualify for the 192 course, students must have acquired 84 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by The Internship and Career Center Staff.

Italian

Margherita Heyer-Caput, Ph.D., Associate Professor
Juliana Schiesari, Ph.D., Professor (*Italian, Comparative Literature*)

The Major Program

The major in Italian provides a solid language background which will enable the student to develop an appreciation for Italian language and culture.

The Program. The Italian program is small and geared to the individual needs of the student. The use of Italian is stressed on all levels and a knowledge of the language is required for literature courses that are taught only in Italian. The Italian program actively participates in the Education Abroad Program, the International Internships Program, and the Summer Sessions International (Rome), all of which offer opportunities for travel and study in Italy.

Career Alternatives. Specific career opportunities for those students who have a background in foreign languages are abundant. In addition to the Foreign Service, jobs are available in business and education, both overseas and in the U.S. For example, those wishing to live (for brief or longer periods of time) and work in Italy have a choice of cities: Milan for business, Rome for international concerns in agri-

culture and nutrition in the F.A.O., and Florence for retail commerce and the arts, just to name a few. In the U.S., foreign-owned companies or American companies with interests in the foreign market need qualified people who are also fluent in a foreign language.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	0-24
Italian 1, 2, 3, 4, 5, and 9 (or the equivalent)	0-24
Depth Subject Matter	36
Italian 101 and 105	8
Upper division courses in literature, taught in the language	28
Must include at least one course from two of the following literary periods: (a) Early Italian, (b) Renaissance and Baroque, (c) Eighteenth through Twentieth Centuries. Upper division General Education courses in Italian may fulfill this requirement with approval of the major adviser.	
A total of 8 units in literature may be replaced by Italian 107 (highly recommended) and/or by courses in related fields such as history, art history, music, comparative literature, English, critical theory, classics, and linguistics.	
<i>Note: All upper division courses are to be chosen in consultation with the major adviser.</i>	
Total Units for the Major	36-60

Recommended

One year or one quarter of study abroad with the Education Abroad Program or college Latin or a Romance Language.

Major Adviser. M. Heyer-Caput.

Minor Program Requirements:

	UNITS
Italian	20
Italian 101 and 105	8
Three upper division courses in literature chosen in consultation with major adviser	12
One course chosen from two of the following three areas: (a) Early Italian Literature, (b) Renaissance and Baroque, and (c) Eighteenth through Twentieth Centuries. (One of the above courses may be replaced by course 107 or by a course of literature in translation offered by the Italian Program.)	

Honors and Honors Program. The honors program comprises two quarters of study under course 194H (3 units) and course 195H (3 units), which will include a research paper and a comprehensive examination. See also the Academic Information chapter of this catalog.

Education Abroad Program. Applicable courses taken on EAP are accepted for credit in the major or the minor programs.

Teaching Credential Subject Representative. See Major Adviser above and also the section on the Teacher Education Program in this catalog.

Prerequisite Credit. Credit will not normally be given for a course if it is a prerequisite of a course already successfully completed. Exceptions can be made only by the Program Director.

Short Term Language and Culture Program. The Italian program offers an exciting study abroad program of Italian language and culture at the University for Foreigners in Perugia. The spring quarter program is directed and taught in part by a faculty member of the Italian program. All students in good standing at UC Davis are eligible to apply. There is no language requirement to participate. Language and culture instruction is offered at all levels, and students are

able to earn up to 20 units of credit. The courses may be used for credit towards the Italian major or minor. For information, contact the director of the Italian program or the Education Abroad Center.

Courses in Italian (ITA)

Lower Division Courses

Students offering high school language preparation as a prerequisite must take a placement test.

1. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Italian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I, II, III. (I, II, III.)

1ST. Elementary Italian (5)

Discussion/laboratory—5 hours. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. This course is taught abroad. Not open for credit to students who have completed course 1.—III.

2. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1 in areas of grammar and basic language skills.—I, II, III. (I, II, III.)

2ST. Elementary Italian (5)

Discussion/laboratory—5 hours. Prerequisite: course 1. Continuation of course 1 in the area of grammar and basic language skills. This course is taught abroad. Not open for credit to students who have completed course 2.—III.

3. Elementary Italian (5)

Lecture/discussion—5 hours. Prerequisite: course 2. Continuation of grammar sequence, and practice of all language skills through cultural texts.—I, II, III. (I, II, III.)

3ST. Elementary Italian (5)

Lecture/discussion—5 hours. Prerequisite: course 2. Completion of grammar sequence and continuing practice of all language skills through cultural texts. This course is taught abroad. Not open for credit to students who have completed course 3.—III.

4. Intermediate Italian (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 3. Review of grammar and syntax through written exercises and short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes.—I, II, III.

4ST. Intermediate Italian (3)

Lecture/discussion—3 hours. Prerequisite: course 3 or the equivalent. Review of grammar and syntax through written exercises and readings of short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. This course is taught abroad. Not open for credit to students who have completed course 4.—III.

5. Intermediate Italian (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 4. Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian.—I, II, III.

5ST. Intermediate Italian (3)

Lecture/discussion—3 hours. Prerequisite: course 4. Preparation to read, understand, and discuss texts written in Italian. Transition between course 4 and 10. This course is taught abroad. Not open for credit to students who have completed course 5.—III.

8A. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 3 or the equivalent. Course designed to offer practice in speaking Italian. May be repeated once for credit. (P/NP grading only.)—I, III. (I, III.)

8AS. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 3 or the equivalent. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8. (P/NP grading only.)—III.

8B. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 8A. Course designed to offer practice in speaking Italian. (P/NP grading only.)—II. (II.)

8BS. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 8A. Practice in the speaking of Italian. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8B. (P/NP grading only.)—III.

9. Reading Italian (3)

Lecture/discussion—3 hours. Prerequisite: course 5. Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture, as well as a means of strengthening the student's command of the Italian language.—I, II, III. (I, II, III.)

9ST. Reading Italian (3)

Lecture/discussion—3 hours. Prerequisite: course 5. Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture as well as strengthening the student's command of the Italian language. This course is taught abroad. Not open for credit to students who have completed course 9.—III.

50. Studies in Italian Cinema (4)

Lecture—2 hours; discussion—1 hour; term paper. Introduction to Italian cinema through its genres. Focus is on cinema as a reflection of and a comment on modern Italian history. Film will be studied as an artistic medium and as a form of mass communication. GE credit: ArtHum, Wrt.—II. (II.)

90X. Lower Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Italian language or culture (such as Italian culture seen through film, Italian feminism, literature, or politics) through shared readings, discussions, written assignments, or special activities such as film screening or laboratory work.

98. Directed Group Study (1-5)

Primarily intended for lower division students. (P/NP grading only.)

Upper Division Courses

101. Advanced Conversation, Composition, and Grammar (4)

Lecture—3 hours; weekly essays. Prerequisite: course 9 or consent of instructor.—I. (I.) Heyer-Caput, Cannon

101S. Advanced Composition, Conversation and Grammar (4)

Lecture—3 hours; extensive writing. Prerequisite: course 9. Instruction and practice in expository writing in Italian, with emphasis on advanced grammar, organization, and vocabulary building. Course will be taught in Italy. Not open for credit to students who have completed course 101.—III.

104. Italian Translation and Style (4)

Lecture/discussion—3 hours; two research papers; term paper. Prerequisite: course 101 or consent of instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material.—III. (III.) Dutschke

104S. Translation and Style (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. Course will be taught abroad. Not open for credit to students who have completed course 104.—III.

105. Introduction to Italian Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance, and Early Modern periods in Italy. GE credit: ArtHum.—II. (II.) Schiesari

105ST. Introduction to Italian Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance and Early Modern periods in Italy. This course is taught abroad. Not open for credit to students who have completed course 105. GE credit: ArtHum, Div, Wrt.—III.

107. Survey of Italian Culture and Institutions (4)

Lecture—3 hours; term paper. Assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. GE credit: ArtHum.—III. (III.) Foscarini

107ST. Survey of Italian Culture and Institutions (4)

Lecture/discussion—3 hours; term paper. Assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis on achievements in literature, the arts, philosophy, and socio-political institutions. Taught in English. This course is taught abroad. Not open for credit to students who have completed course 107. GE credit: ArtHum.—III.

108. Contemporary Issues in Italian Culture and Society (4)

Lecture/discussion—3 hours; term paper. Analysis of cultural issues in contemporary Italy: Myth and reality of imagined Italies; Italian identities; immigration and race relations; the media and popular culture. Taught in English. GE credit: ArtHum, Div, Wrt.—I. (I.) Bassi

108ST. Contemporary Issues in Italian Culture and Society (4)

Lecture/discussion—3 hours; term paper. Analysis of cultural issues in contemporary Italy; myth and reality of imagined Italies; Italian identities; immigration and race relations; the media and popular culture. Taught in English. This course is taught abroad. Not open for credit to students who have completed course 108. GE credit: ArtHum, Div, Wrt.—III.

112. Medieval and Renaissance Poetry: St. Francis to Petrarch (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the origins of Italian religious and secular poetry of the 13th and 14th centuries. A diversified poetry is illustrated in works of St. Francis, Dante, Cavalcanti, Petrarch, the Sicilian School, the Sweet New Style Poets, and other authors. Offered in alternate years. GE credit: ArtHum.—(I.) Dutschke

113. Dante Alighieri, *Divina Commedia* (*Inferno, Purgatorio, Paradiso*) (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of Dante Alighieri's *Divina Commedia*, and its role in the development of Italian language and literature. Emphasis will be placed on reading the whole poem within the historical context of the Middle Ages. GE credit: ArtHum.—III. (III.) Dutschke

114. Boccaccio, *Decameron*, and the Renaissance *Novella* (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the development of the short story in Italy, as exemplified in Giovanni Boccaccio's *Decameron*, in his predecessors and Renaissance followers. Offered in alternate years. GE credit: ArtHum.—II. Dutschke

115A. Studies in the Cinquecento (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Analysis of key texts from the high moment of the Italian Renaissance. The political and aesthetic legacy of human-

ism will be foregrounded in relation to authors such as Ficino, Ariosto, Machiavelli, Aretno, Castiglione, and Tasso. Offered in alternate years. GE credit: ArtHum.—(III.) Schiesari

115B. Italian Literature of the Renaissance and the Baroque: From Cellini to Marino (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 115A. Continued examination into the loss of an ideal. Emphasis on the conflicts in Michelangelo and Tasso leading to Marino, with an excursus on Galileo's role in the formation of a modern literary standard. GE credit: ArtHum.—(III.) Schiesari

115C. Italian Drama from Machiavelli to the Enlightenment (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of comic and tragic forms as critical representations of their societal and historical contexts, i.e. Machiavelli and the logic of power, Baroque dramatists in the service of counter-reformation Italy, Goldoni's comedies and bourgeois social consciousness. Offered in alternate years. GE credit: ArtHum.—I. Schiesari

115D. Early Modern Italian Lyric (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Examination of the poetic tradition influenced by Petrarch. Consideration of the relation between gender and genre in such poets as Petrarch, Bembo, della Casa, Tasso, Marino, Gaspara Stampa, Veronica Franco, Isabella di Morra. Offered in alternate years. GE credit: ArtHum.—I. Schiesari

118. Italian Literature of the Eighteenth Century (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of modern Italian literature. Emphasis on the work of Goldoni, Bettinelli, Baretti, Parini, Alfieri and Vico. GE credit: ArtHum.—I. (I.)

119. Italian Literature of the Nineteenth Century (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Romanticism in Italy, including Manzoni, Verga, and *Verismo*. GE credit: ArtHum.—II. (II.) Heyer-Caput

120A. Italian Literature of the Twentieth Century: The Novel (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of the novel from Svevo to the present. Emphasis on the work of Svevo, Levi, Moravia, Pavese, and Vittorini. GE credit: ArtHum.—III. (III.) Cannon, Heyer-Caput

120B. Italian Literature of the Twentieth Century: Poetry and Drama (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Italian poetry with emphasis on Hermeticism; the theater of Luigi Pirandello and its role in the development of contemporary Italian drama. GE credit: ArtHum.—I. (I.) Cannon, Heyer-Caput

131. Autobiography in Italy (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. The development of representations of selfhood with particular attention to generic conditions, the confessional tradition and the problem of women's self-representation. Authors studied may include Petrarch, Tasso, Casanova, Alfieri, Zvevok, Sibilla Aleramo and Primo Levi. Offered in alternate years. GE credit: ArtHum.—III. Schiesari

139B. Italian Literature in English: Boccaccio, Petrarch and the Renaissance (4)

Lecture/discussion—3 hours; term paper. Petrarch and Boccaccio and their relations to the Middle Ages and the Renaissance; the Renaissance, with particular attention to the works of Lorenzo de' Medici, Leonardo da Vinci, Machiavelli, Ariosto, Michelangelo, and Tasso. GE credit: ArtHum.—II. (II.) Dutschke

140. Italian Literature in English Translation: Dante, *Divine Comedy* (4)

Lecture/discussion—3 hours; term paper. Prerequisite: any course from the GE Literature Preparation List. Reading of Dante Alighieri's *Divine Comedy*, through the otherworld realms of Inferno, Purgatory, and Paradise. GE credit: ArtHum, Wrt.—I. (I.) Dutschke

141. Culture, Gender and the Italian Renaissance (4)

Lecture/discussion—3 hours; term paper. Prerequisite: any course from the GE Literature Preparation List. Critical analysis of texts from the Italian Renaissance. Primary concern focuses on issues such as "the dignity of Man," education and gender politics; "high" and "low" culture and its relation to literary practices. GE credit: ArtHum, Div, Wrt.—II. (II.) Schiesari

142. Masterpieces of Modern Italian Narrative (4)

Lecture—1.5 hours; discussion—1.5 hours; term paper. Prerequisite: either English 3, Comparative Literature 2, or History 4C. Analysis of major works of Italian narrative fiction from unification of Italy to present. Students will learn to use representative methods and concepts which guide literary scholarship. Consideration of works within European social and cultural context. Offered in alternate years. GE credit: ArtHum, Wrt.—III. Cannon

145. Special Topics in Italian Literature (4)

Lecture/discussion—4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth century theater, fascism, futurism, women and literature, and the image of America, etc. May be repeated for credit when topic differs. GE credit: Wrt.—I, II, III. (I, II, III.)

145ST. Special Topics in Italian Literature (4)

Lecture/discussion—4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth-century theater, fascism, futurism, women and literature, the image of America, etc. This course is taught abroad. May be repeated for credit. Not open for credit to students who have completed course 145. GE credit: ArtHum, Wrt.—III.

150. Studies in Italian Cinema (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: Humanities 10 or consent of instructor. Introduction to Italian cinema through its genres. Focus on cinema as a reflection or a comment on modern Italian history. Film as an artistic medium and as a form of mass communication. GE credit: ArtHum, Div, Wrt.—II. (II.) Cannon

190X. Upper Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: upper division standing and consent of instructor. Examination of a special topic in Italian language or culture through shared readings, discussions, written assignments or special activities such as film screening or laboratory work. Limited enrollment. May not be repeated for credit.

192. Italian Internship (1-12)

Internship—3-36 hours. Prerequisite: upper division standing and consent of chairperson of Italian Department. Participation in government and business activities to gain work experience and to develop a better knowledge of Italian language and culture. (P/NP grading only.)

194H. Special Study for Honors Students (3)

Independent study—3 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Italian literature, civilization, or language studies. (P/NP grading only.)

195H. Honors Thesis (3)

Independent study—3 hours. Prerequisite: course 194H. Writing of an honors thesis on a topic in Italian literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.)

197T. Tutoring in Italian (1-4)

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of instructor. Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

197TC. Community Tutoring in Italian (1-5)

Discussion—1-2 hours; laboratory—2-4 hours. Prerequisite: consent of instructor. Field experience as Italian tutors or teacher's aides. May be repeated for credit for a total of 10 units. (P/NP grading only.)—Foscarini

198. Directed Group Study (1-4)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

297. Individual Study (1-5)

Prerequisite: graduate standing or consent of instructor.

298. Group Study (1-5)

Prerequisite: graduate standing or consent of instructor.

299. Research (1-12)

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

299D. Dissertation Research (1-12)

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

Jewish Studies

(College of Letters and Science)

David Biale, Ph.D., Program Director
Program Office, 2216 Social Sciences and Humanities Building

World Wide Web: <http://jewishstudies.ucdavis.edu>

Committee in Charge

David Biale, Ph.D. (*History*)
Naomi Janowitz, Ph.D. (*Religious Studies*)
Diane Wolf, Ph.D. (*Sociology*)

The Program of Study

The Program in Jewish Studies offers students the opportunity to explore Jewish history, communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction (Hebrew 1, 2, 3) as well as the study of classical and modern Jewish texts in translation.

The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature, primarily in the modern period. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relation between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world find themselves.

The Program in Jewish Studies will be of special interest to students in History, Religious Studies, Comparative Literature and Sociology as well as other fields in the Humanities and Social Sciences.

Minor Program Requirements

	UNITS
Jewish Studies	20
One course from Jewish Studies 10 or Religious Studies 23	4
4 upper division courses selected from the following list, with at least one course in each category	16
<i>(a) Religion:</i>	
English 171A; Religious Studies 122, 124, 125	
<i>(b) Representations, Languages, and Identity:</i>	
Comparative Literature 147; English 179; French 108; German 141; Hebrew 100, 101, 102; Jewish Studies 110, 111, 112, 120, 121; Russian 159; Sociology 130, 174	
<i>(c) Histories:</i>	
History 112A, 112B, 142, 143, 144A, 144B, 173	

Note: Students are encouraged to participate in the Education Abroad Program in Israel. Courses taken in EAP may, with an adviser's concurrence, be approved for credit in the minor.

Advising. Jewish Studies Program Office (530-754-5811)

Courses in Jewish Studies (JST)

Lower Division Courses

10. Introduction to Jewish Cultures (4)

Lecture—3 hours; term paper. Diverse Jewish cultures created over the past 2,000 years using examples from less-familiar communities such as India, China, and Ethiopia. Topics include the tensions between homeland/diaspora and questions of identity (race, nationality, culture, or religion). GE credit: SocSci, Div, Wrt.

Upper Division Courses

110. The Emergence of Modern Hebrew Literature (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: one lower division literature or Jewish studies course or consent of instructor. Hebrew literature in relation to religious and social changes in Jewish life in the modern period; the rise of Hebrew modernism and Jewish nationalism; Hebrew in relation to European national literary traditions; changing gender relations as reflected in Hebrew fiction. Hebrew not required. Not open for credit to students who have completed Humanities 118. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II.

111. Israeli Writing Since 1960 (4)

Lecture/laboratory—3 hours; extensive writing. Prerequisite: one course in American or European literature. Contemporary Hebrew literature, in translation, in relation to post-independence debates about religion, social, and political identity of the Jewish state; literary reflections of Israeli ethnic diversity and changing gender relations; modern Hebrew poetry and postmodern experiments in fiction. Not open for credit to students who have completed Humanities 119. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II.

112. Readings in Jewish Writing and Thought in German Culture (4)

Lecture/discussion—3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German speaking world; what it means to be "other" in the mainstream culture. May be repeated for credit twice when topic differs. Not open for credit to students who have completed Humanities 121. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I.

120. Cinema and the American Jewish Experience (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 10 recommended. Examination

of American cinema to reveal how Jewish identity is expressed and submerged, tracing the relations between religion, identity, race, politics, and art. Not open for credit to students who have completed Humanities 122. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I.

121. Oral History and Jewish Life (4)

Lecture/discussion—3 hours; term paper. Oral history methodologies and application to an in-depth oral history interview about Jewish life. Topics include oral history practices and ethics, immigration, migration, religious practice, ethnic relations, and community organization structures. Not open for credit to students who have completed Humanities 123. GE credit: SocSci, Wrt.—III.

Land, Air and Water Resources is a multidisciplinary department with faculty who specialize in atmospheric, plant, environmental resources, soil and water science, hydrology, and water engineering. Teaching and research focus on both agricultural and environmental science. The faculty contribute to

numerous other undergraduate and graduate programs in the Colleges of Letters and Science, Engineering, and Agricultural and Environmental Sciences.

Major Programs. Undergraduates in the department major in Atmospheric Science, Environmental and Resource Sciences, Hydrology, and Soil and Water Science.

Advising Center is located in 1152 Plant and Environmental Sciences Building (530-752-1669). See Diane Swindall (dgswindall@ucdavis.edu).

Graduate Study. Graduate work offered in the area of resource sciences is Atmospheric Science, Hydrologic Sciences, and Soil Science. Detailed information can be obtained from graduate advisers for these areas and the *Graduate Announcement*.

Courses. See courses listed under Atmospheric Science, Hydrologic Sciences, Hydrology, Environmental and Resource Sciences, and Soil Science.

Landscape Architecture

(College of Agricultural and Environmental Sciences)

Emeriti Faculty

Robert L. Thayer, Jr., M.A., Professor Emeritus

The Major Program

Landscape architecture is the planning and design of land areas where human use requires adaptation or conservation of the environment. Students who study landscape architecture are concerned about the welfare of the environment and the people who use it. They are capable of solving physical problems and are able to visualize and "think" in terms of spaces and three-dimensional concepts. The program is fully accredited by the American Society of Landscape Architects, which is the only organization professionally sanctioned to grant landscape architectural accreditations in the United States. The program was last reviewed in 2001.

The Program. The curriculum balances creativity and visual and spatial skills with technological expertise and a thorough background in physical, natural, and social sciences. Students develop proficiency at problem solving relating to design of parks, urban open spaces, energy-efficient neighborhoods, land reclamation projects, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and other sensitive land areas. The program stresses a process-oriented approach to design and emphasizes environmental and community values.

Preparatory Requirements. Students are admitted to the landscape architecture major only after submitting a portfolio for review and selection by the faculty. Contact the Environmental Design Advising Center or the Landscape Architecture major adviser for further information, 152 Walker Hall (530-752-1165).

Career Alternatives. Graduates may find jobs in private landscape architectural firms or public agencies and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and design-related fields.

B.S. Major Requirements:

	UNITS
English Composition Requirement	8
English 1, 3, 18, 19, 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 104A, 104B, 104C, 104D, or 104E	4
Communication 1	4
Preparatory Subject Matter	62-71
Biological Sciences 1A, 1C, or 10	4-5
Environmental Horticulture 6	4
One course from Mathematics 16A; Statistics 13; Computer Science 10	3-4
One course from Chemistry 2A, 10; Physics 1A, 10; Geology 1; Geography 1; or Soil Science 10	3-5
One course from Landscape Architecture 2, Geography 2, or 10	3-4
Two courses from Anthropology 2, 3, 20, 21, Economics 1A, 1B, Psychology 1, Political Science 1, 2, 3, 4, 5, 7, Sociology 1, 2, 3, 4, 5, or 25	8-10
Two courses from Art Studio 2, 5, 16, 142, Design 125, any course from History, Music, Dramatic Art, Philosophy, Art History, language or literature	8-10
Landscape Architecture 1, 21, 23, 30, 50, 60, 70	28
Breadth/General Education	0-24
See General Education requirement	
Depth Subject Matter	46-49
Landscape Architecture 160, 161, 170, 193A, 193B	27
Three studios from Landscape Architecture 180/181 or 191	14-15
Landscape Architecture 120 or 122	4
Landscape Architecture 190 (three quarters)	3
Internship (Landscape Architecture 192) recommended.	
Restricted Electives	32
Psychology 155	4
Two courses from Environmental Horticulture 105, 133; Evolution and Ecology 121; Plant Biology 102; Wildlife Fish, and Conservation Biology 156. (One course must be Environmental Horticulture 105 or Plant Biology 102.)	8
Select 20 units of upper division courses in consultation with adviser	20
Unrestricted Electives	0-32
Total Units for the Major	180

Major Adviser. S. McNiel

Advising Center is located in 152 Walker Hall (530-754-8628).

Graduate Study. Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. Currently we do not offer a graduate program in landscape architecture; however, department faculty are members of five different graduate groups: Environmental Horticulture, International Agricultural Development, Community Development, Geography, and Transportation Technology and Policy. Our faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, community participation in urban landscape design, landscape ecology, resource management, bioregionalism, and regenerative landscape systems.

Courses in Landscape Architecture (LDA)

Lower Division Courses

1. Landscape Meaning (4)

Lecture—3 hours; discussion—1 hour. Overview of the meaning of landscapes as manifested in designed and natural landscapes, everyday and sacred environments, parks, plazas, community gardens and found spaces. Introduction to the profession of landscape architecture and methods used to design, plan and manage landscapes. Not open for credit to students who have taken course 40. GE credit: ArtHum or SocSci, Wrt.—I. (I.) Francis

2. Place, Culture and Community (4)

Lecture—4 hours. Introduction to the relationship of social and spatial arrangements. Basic social-science concepts such as class, status, role, kinship, ritual, myth, alienation, etc., introduced through site-specific case studies of both historical and contemporary communities. GE credit: SocSci, Wrt.—II. (II.) MacCannell

21. Landscape Drafting and Visualization (4)

Studio—8 hours; two all-day field trips. Prerequisite: course in free-hand drawing recommended. Development of idea expression through graphic media and the use of drawing techniques for visual representation, including plan, section, and axonometric drawing. Includes an introduction to computerized drafting and drawing.—I. (I.)

23. Computer Graphics for Landscape Architecture (4)

Studio—8 hours; two all-day field trips. Prerequisite: course 21. Landscape architectural communications explored through the computer. Includes computerized drafting, drawing, rendering, desktop publishing, and photorealistic simulation.—II, III. (II, III.)

30. History of Landscape Architecture (4)

Lecture—3 hours; discussion—1 hour. Introduction to the history of landscape architecture, emphasizing landscape design as a product of cultural, political, social, and environmental factors. Topics include the history of gardens, parks, community design and environmental planning. Not open for credit to students who have taken course 140. GE credit: ArtHum, Wrt.—III. (II.) Schenker, McNiel

50. Site Ecology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A or 10 or an introductory course in biology, botany, or plant science. Priority given to Landscape Architecture majors. Introduction to ecological concepts, including nutrient dynamics, population regulation, community structure, ecosystem function. Principles will be applied to human activities such as biological conservation, ecological restoration, landscape planning, and management. Weekly laboratory devoted to field exercises in local ecosystems. Not open for credit to students who have taken course 153. GE credit: SciEng.—III. (III.) Greco

60. Technology I: Grading and Drainage (4)

Studio—8 hours. Prerequisite: courses 21 and 23 or consent of instructor. Priority given to Landscape Architecture majors. Topographic and grading problems in landscape engineering: drainage plans, grading plans, spot elevations, road alignment, sections and profiles and cut and fill calculations. Not open for credit to students who have taken course 132.—III. (III.) McCulley

70. Basic Landscape Design Studio (4)

Studio—8 hours; field trips. Prerequisite: courses 1, 21, 30 or consent of instructor. Priority given to Landscape Architecture majors. Introduction to basic aesthetic, functional, social, and environmental considerations in landscape design. Provides a broad foundation in landscape design methodologies and skills necessary to create environmentally and socially responsible landscape designs. Not open for credit to students who have taken course 11.—II. (II.) Owens

Upper Division Courses

Contact the Advising Office at (530) 754-8628 for scheduling of upper division courses for 2001-2002.

120. Advanced Computer Applications (4)

Studio—8 hours; two all-day field trips. Prerequisite: course 23; open to majors in Landscape Architecture only. Studio work using computer-aided design, geographic information systems, and other advanced computer programs.—(III.) McNiel

122. Advanced Communication in Landscape Architecture (4)

Studio—8 hours; field trips. Prerequisite: course 1, 30, 170 and junior standing in the Landscape Architecture major. Advanced concepts and methods of personal and group communication including group process, participatory methods, written and verbal presentation in landscape architecture.—(III.)

155. Plants in the Cultural Environment (3)

Lecture—3 hours. Prerequisite: Biological Sciences 10. Cultural parameters of selecting plants for use in environmental design and planning. Contemporary themes in climate, energy and resource conservation, low maintenance, aesthetics, edible landscapes, historic preservation, native plants, specialized gardens, and computerized plant selection.

160. Technology II: Construction Materials and Detailing (4)

Studio—8 hours. Prerequisite: courses 21, 23, and 60. Priority given to Landscape Architecture majors. Introduction to materials and methods in landscape construction, including properties of common construction materials (stone, concrete and wood), detailing, preparation of cost estimates and specifications, design of drainage systems, fountains and roof decks. Not open for credit to students who have taken course 133.—II. (II.) McCulley

161. Technology III: Professional Practice and Construction Documents (4)

Studio—8 hours. Prerequisite: course 160. Priority given to Landscape Architecture majors. Legal and professional aspects of landscape architecture, including the development of construction documents (drawings and specifications), proposal writing, fee calculations, project management, cost estimation and insurance. Not open for credit to students who have taken course 134.—I. (I.) McCulley

168. Mountain Landscapes and Life (3)

Lecture—3 hours. Prerequisite: an introductory course in cultural geography, cultural anthropology or landscape theory. Course provides knowledge of mountain landscapes, explains why different mountain societies exploit and reject resources available, examines myths about mountain landscapes that influence individual and collective behavior of residents and visitors. Examples from Himalayas, Andes, Alps, and Rockies. GE credit: ArtHum or SocSci, Wrt.—III. (III.) Allan

170. Field Studio in Landscape Architecture (14)

Lecture—6 hours; studio—12 hours; fieldwork—6 hours. Prerequisite: course 1, 30, 70, and junior standing in the landscape architecture major. Intensive study of current topics in landscape architecture, focus on relationships between environmental, social and cultural systems on the land. Comprehensive field study and problem solving experience. Topics and sites vary. Extended field trip (1–10 days) will be arranged.—I.

180A. Special Topics in Landscape Architecture: Postmodern Landscapes (2)

Lecture—2 hours. Prerequisite: upper division standing. Basic principles of critical theory and postmodern modes of analysis. Application to interpretation and change of designed environment. Offered in alternate years. Not open for credit to students who have taken course 185.—III. (III.) MacCannell

180B. Special Topics in Landscape Architecture: Poetics of Gardens (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority to Landscape Architecture majors. Review of theories and methods that have historically shaped gardens. Study of selected garden designers and their gardens. Cultural criticism of contemporary gar-

dens and garden design practices. Offered in alternate years.—I. Schenker

180C. Special Topics in Landscape Architecture: Art of the Environment (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture and Design majors. Introduction to environmental art. Encouragement of critical thinking about the intersection of art, landscape and environmental issues. Offered in alternate years.—(III.) Schenker

180D. Special Topics in Landscape Architecture: Advanced Technology (2)

Lecture—2 hours. Prerequisite: courses 60 and 160 or consent of instructor. Specialized areas of advanced technology related to site design and construction. Understanding of the concepts, resources and skills necessary to develop these areas in professional practice. Offered in alternate years.

180E. Special Topics in Landscape Architecture: Transit Facility Design (2)

Lecture—2 hours. Prerequisite: courses 1, 23 and 60 or consent of instructor. Specialized area of transit facility design. Concepts, skills and resources necessary to incorporate into professional practice. Offered in alternate years.

180F. Special Topics in Landscape Architecture: Landscape Ecology (2)

Lecture—2 hours. Prerequisite: course 50 or introductory course in ecology. Theories, major concepts and research methods of landscape ecology. Spatial structure, function and dynamics of various landscape types. Biological conservation, ecological restoration, and landscape planning, design, and management. Offered in alternate years. Not open for credit to students who have taken course 183.—Greco

180G. Special Topics in Landscape Architecture: Regional Land Planning (2)

Lecture—2 hours. Prerequisite: upper division standing. Theories, methods and resources used in large scaled landscape analyses for orderly settlement, preservation or management of the land. Integration of natural, cultural and experiential data into decision making. Offered in alternate years.—(II.) McNiel

180H. Special Topics in Landscape Architecture: The Bioregional Landscape (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture majors. Emerging concepts of bioregionalism and community-based ecological regional landscape planning. Extensive examples from within the Sacramento Valley Bioregion. Offered in alternate years.—(I.)

180I. Special Topics in Landscape Architecture: Regenerative Landscape Systems (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture majors. Theories, basic techniques and applications for various systems by which landscapes regenerate and sustain life (both human and non-human) and culture over time. Offered in alternate years.—(III.)

180J. Special Topics in Landscape Architecture: Community Participation in Design (2)

Lecture—2 hours. Prerequisite: upper division standing. History and role of community participation in landscape design; methods of community involvement, including workshop techniques. Introduction to design processes, including public participation. Offered in alternate years.—III. Owens

180K. Special Topics in Landscape Architecture: Social Factors in Landscape Architecture (2)

Lecture—2 hours. Prerequisite: Psychology 144 and upper division standing. Concepts in environmental psychology as they relate to landscape architecture. Discussion of needs of various user groups of a land area. Introduction to post occupancy evaluations. Offered in alternate years.—(III.) Owens

180L. Special Topics in Landscape Architecture: Public Open Space (2)

Lecture—2 hours. Prerequisite: upper division standing. Intensive study of public open spaces, including

parks, plazas, playgrounds, greenways and community gardens. Current issues associated with design and management of the public environment of cities. Offered in alternate years.—(II.) Francis

180M. Special Topics in Landscape Architecture: Urban and Community Design (2)

Lecture—2 hours. Prerequisite: upper division standing. Theories and methods of community and neighborhood design. Past and contemporary approaches including new urbanism, planned unit development, mixed use, pedestrian and transit-oriented development. Issues of open space and community form. Offered in alternate years.—Francis

180N. Special Topics in Landscape Architecture: Planting Design (2)

Lecture—2 hours. Prerequisite: upper division standing and Environmental Horticulture 6. Develop an understanding of the sensory, visual and functional importance of plants in the landscape. Visualization and design of planted landscapes. Development of planting plans. Offered in alternate years. Not open for credit to students who have taken course 156.—II.

180O. Special Topics in Landscape Architecture: Current Issues in Landscape Architecture (2)

Lecture—2 hours. Prerequisite: course 1 and 30. Priority will be given to Landscape Architecture and Design majors. Study of current issues in landscape architecture with emphasis on design and/or design history. Offered in alternate years.

181A. Postmodern Landscapes Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180A concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180A. Offered in alternate years.—III. MacCannell

181B. Poetics of Gardens Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170, course 180B concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with historic examples of garden design. Critical analysis of the "uses" of these precedents in contemporary landscape architecture. Offered in alternate years.—I. Schenker

181C. Art of the Environment Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180C concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180C. Offered in alternate years.—(III.) Schenker

181D. Advanced Technology Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180D concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180D. Offered in alternate years.

181E. Transit Facility Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180E concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180E. Offered in alternate years.

181F. Landscape Ecology Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180F concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180F. Offered in alternate years. Not open for credit to students who have taken course 183.

181G. Regional Land Planning Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180G concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with 180G. Offered in alternate years.—(II.) McNiel

181H. The Bioregional Landscape Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180H concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180H. Offered in alternate years.—(I.)

181I. Regenerative Landscape Systems Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180I concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180I. Offered in alternate years.—(III.)

181J. Community Participation in Design: Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180J concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180J. Offered in alternate years.—III. Owens

181K. Social Factors in Landscape Architecture Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170 and Psychology 144; course 180K concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180K. Offered in alternate years.—(III.) Owens

181L. Public Open Space Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180L concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180L. Offered in alternate years.—(II.) Francis

181M. Urban and Community Design: Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180M concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180M. Offered in alternate years.—(II.) Francis

181N. Planting Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170 and Environmental Horticulture 6; course 180N concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180N. Offered in alternate years.—II.

181O. Current Issues Design and Planning Studio (3)

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180O concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180O. Offered in alternate years.

190. Proseminar in Landscape Architecture (1)

Seminar—1 hour. Lectures and discussion of critical issues in landscape architecture. May be repeated three times for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

191. Workshop in Landscape Architecture (2-12)

Seminar—1 hour; workshop—3 hours. Prerequisite: courses 1, 70, and 170 or consent of instructor. Priority to Landscape Architecture majors. Faculty initiated workshops featuring advanced studies and

applications of original work in landscape architecture. May be repeated for up to 20 units of credit.—I, II, III.

192. Internship in Landscape Architecture (1-12)

Internship. Prerequisite: senior standing in Landscape Architecture. Professional field experience in landscape architecture. May be repeated for a total of 12 units. (P/NP grading only.)

193A. Senior Project in Landscape Architecture (3)

Studio—6 hours. Prerequisite: senior standing in Landscape Architecture. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only.)—II. (II.)

193B. Senior Project in Landscape Architecture (4)

Studio—8 hours. Prerequisite: course 193A and senior standing in Landscape Architecture. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only.)—III. (III.)

197T. Tutoring in Landscape Architecture (1-5)

Tutoring—3-15 hours. Prerequisite: consent of instructor. Tutoring in Landscape Architecture courses. (P/NP grading only.)

198. Directed Group Study in Landscape Architecture (1-5)

Prerequisite: consent of instructor. Directed group study. (P/NP grading only.)

199. Special Study for Advanced Undergraduates in Landscape Architecture (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

Contact the Advising Office at (530) 752-1165 for scheduling of graduate courses for 2001-2002

201. Theory and Philosophy of the Designed Environment (4)

Seminar—4 hours. Prerequisite: course 140 or the equivalent; graduate standing or consent of instructor. Examines the major theories of environmental design. Epistemology of design serves as framework to examine modern landscape architecture, architecture, urban design and planning. Normative theories of design are reviewed along with the social and environmental sciences. Offered in alternate years.—Francis

202. Methods in Design and Landscape Research (4)

Seminar—4 hours. Prerequisite: Statistics 102 or the equivalent; graduate standing or consent of instructor. Explores many of the research and advanced design and planning methods employed in landscape architecture. Exercises provide the student with a vehicle for designing independent landscape research and creative activities. Lectures provide an historical overview of research methodology. Offered in alternate years.—III. Owens

204. Case Studies in Landscape Design and Research (4)

Seminar—4 hours; field trip required. Prerequisite: graduate standing in Landscape Architecture, Ecology, Geography or Community Development or consent of instructor. Real-world designed environment situations where creative activity and/or basic research is the primary product. May be repeated for credit for a total of 12 units. Offered in alternate years.—(I, II, III.)

210. Advanced Landscape Architecture Studio (4)

Laboratory—8 hours. Prerequisite: course 113 or the equivalent; graduate standing or consent of instructor. Exposes students to real-world, designed-environment situations where creative activity and/or basic research is the primary product. Advanced

landscape problems will be utilized at the site, urban or rural scale. Offered in alternate years.

220. Public Space and Culture (3)

Seminar—3 hours. Prerequisite: course 182 or the equivalent; graduate standing or consent of instructor. Explores the public environment of cities including their streets, parks, and squares. Public life and culture of American cities is examined and design responses to this culture evaluated. Typology is used to identify spaces. Offered in alternate years.—Francis

230. Landscape and Memory (4)

Seminar—4 hours; term paper. Prerequisite: graduate standing or consent of instructor. Theories of memory from other fields (critical theory, psychoanalysis, history) applied to landscape design, especially heritage and tourist sites. The relationships between place, memorial, and event. Offered in alternate years.—MacCannell

240. Historic, Cultural Landscapes: Concept, Perception, Preservation (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Historic cultural landscapes, as defined by the National Register of Historic Places. Identification and analysis of aerial extent, structured makeup, integrity, and historical significance using common and emerging methods and tools. Offered in alternate years.—McNiel

250. Life-Place: Bioregional Theory and Principles (4)

Seminar—3 hours; tutorial—1 hour. Prerequisite: graduate standing or consent of instructor. The emerging concept of bioregionalism as a hypothesis for environmental quality; theoretical structures and practical methods by which individuals and groups identify with naturally-bounded "life-places" or "bioregions" and strive to live respectfully and reciprocally within them. Offered in alternate years.—Thayer

260. Landscape and Power (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. How various representations of landscape have historically worked as agents of cultural power. Course framework is interdisciplinary, including studies of landscape representation in literature, art, photography, cartography, cinema, and landscape architecture.—Schenker

270. Environment and Behavior (4)

Seminar—3 hours; tutorial—1 hour. Prerequisite: graduate standing or consent of instructor; Psychology 144 recommended. Factors that influence human's interaction with their surroundings and the mechanisms used for recognizing and addressing general and specific human needs in community design and development decisions. Offered in alternate years.—Owens

280. Landscape Conservation (3)

Seminar—3 hours. Prerequisite: contact department for prerequisite courses; graduate standing or consent of instructor. Focus is on land planning, design, and management techniques to further the goal of resource preservation. Examines current critical theory in the establishment and management of conservation areas. Offered in alternate years.

290. Graduate Seminar in Landscape Architecture (2)

Seminar—2 hours. Prerequisite: graduate standing and consent of instructor. Seminar on selected topics in landscape architecture research, analysis, planning, design, communication, or education. May be repeated for credit. (S/U grading only.)

297. Practicum in Landscape Architecture (1-10)

Independent study—1-10 hours. Prerequisite: graduate standing and consent of instructor. Opportunity for students to work directly in the field with academics at other institutions or with professionals in an office setting. Gives experience beyond the confines of campus and allows direct interaction with the community. (S/U grading only.)

298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

299. Directed Individual Research for Graduate Students (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Latin

See Classics

Landscape Restoration

(College of Agricultural and Environmental Sciences) This minor is of particular interest to students majoring in Wildlife, Fish, and Conservation Biology, Environmental Biology and Management, Environmental and Resource Sciences, Landscape Architecture, Biological Sciences, Evolution and Ecology and Plant Biology. Biological Sciences 1C is a prerequisite to some courses in the minor. The minor is sponsored by the Department of Environmental Horticulture.

Landscape Restoration17-22

- Select one of Environmental Horticulture 144/Environmental and Resource Sciences 144/Plant Biology 144, Environmental Science and Policy 155, Evolution and Ecology 121, Evolution and Ecology 117/Plant Biology 117, Plant Biology 102, 1473-5
- Select one of Environmental Horticulture 100, 130, 133, Plant Biology 119, 121, 1763-4
- Soil Science 10 or 1003-4
- Select two courses and a minimum of 5 units from Agricultural Management and Rangeland Resources 130, Environmental Horticulture 150, 160, Environmental Science and Policy 155L, Environmental Planning and Management 110, 134, Landscape Architecture 180H, 180I..5-8
- Environmental Horticulture 1923

Minor adviser. T.P. Young.

Courses of Instruction. The following courses for students enrolled in the School of Law are set up for the semester-system basis only. Instruction dates can be found at the end of the School of Law chapter of this catalog. For current schedule of classes, contact the School of Law.

Courses in Law (LAW)

Professional Curriculum

First Year Courses

200. Introduction to Law (1)

Discussion—1 hour. Introduction to basic concepts of the law, the historical roots of common law and equity, the precedent system in its practical operation, the modes of reasoning used by courts and attorneys, and the fundamentals of statutory interpretation. (S/U grading only.)

200A. Introduction to the Law of the United States (2)

Discussion—2 hours. History and fundamental principles of the United State's legal system. Important current legal issues, developments and trends. Required for LL.M. students who have not attended a U.S. law school. Fall semester only. (S/U grading only.)

201. Property (5)

Discussion—5 hours. Doctrines and concepts of property law with primary emphasis on real property. Topics include the estates in land system, the landlord-tenant relationship, conveyancing, and private and public land use control. (Same course as 201A-201B.)

201A-201B. Property (2-3)

Discussion—2-3 hours. Study of doctrines and concepts of property law with primary emphasis on real property. The estates in land system, the landlord-tenant relationship, conveyancing, and private and public land use control. (Deferred grading only, pending completion of sequence.)

202A-202B. Contracts (3-2)

Discussion—3-2 hours. Examines the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry into the means by which traditional doctrine adjusts—or fails to adjust—to changing social demands. (Deferred grading only, pending completion of sequence.)

203. Civil Procedure (5)

Discussion—5 hours. Fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes. Topics include the relation between federal and state courts; the power of courts over persons, property, and subject matter (jurisdiction); the scope of litigation (joinder of claims and parties); preparation for trial through pleadings, discovery, and pretrial; devices for resolving actions and issues before and during trial, function of judge and jury; and the finality of the trial court's decision. (Same course as 203A-203B.)

203A-203B. Civil Procedure (3-2)

Discussion—3-2 hours. Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes. Topics covered include the relation between federal and state courts; the power of courts over persons, property, and subject matter (jurisdiction); the scope of litigation (joinder of claims and parties); preparation for trial through pleadings, discovery, and pretrial; devices for resolving actions and issues before and during trial; functions of judge and jury; and the finality of the trial court's disposition. (Deferred grading only, pending completion of sequence.)

204A-204B. Torts (3-2)

Discussion—3-2 hours. Legal concepts which apply to actions brought by litigants who seek relief for injury. Intentional and unintentional invasions of person and property. Analysis of civil actions based upon wrongs such as assault, battery, false imprisonment, negligence, strict liability, defamation, invasion of privacy, and misrepresentation. (Deferred grading only, pending completion of sequence.)

205. Constitutional Law I (4)

Discussion—4 hours. The principles, doctrines, and controversies regarding the basic structure of, and division of powers in, American government. In particular, course treats judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers between branches of the federal government. It also begins an examination, continued in course 218, of procedural and substantive constitutional rights and the limits they place on governmental action. Economic substantive due process, procedural due process, and rights of privacy and personal autonomy will also be addressed.

206. Criminal Law (3)

Discussion—3 hours. Study of the bases and limits of criminal liability. Coverage of the constitutional, statutory, and case law rules which define, limit, and provide defenses to individual liability for the major criminal offenses.

207. Legal Research (1)

Discussion/laboratory—1 hour. Research related issues in the practice of law, including the use of sources of law and secondary authority, computer-assisted legal research, writing research memoranda, and basic citation form. Class discussions followed by research assignments.

208. Legal Writing (2)

Lecture—2 hours. Instruction in the form and substance of writing. A variety of law-related documents will be discussed and drafted. An experience in oral advocacy will be included. Graded on the basis of the writing and advocacy assignments. No final examination.

Second and Third Year Courses

The second- and third-year courses fall into subject areas as shown here

- (a) Advanced Law: 273
- (b) Business Law: 215, 215A, 228, 232, 236A, 236B, 242, 243, 253, 262, 266, 266A, 266B, 269A, 269B, 271, 271A, 271B, 284, 295
- (c) Constitutional Law: 218, 288
- (d) Criminal Law: 210, 213, 216, 227A, 227B, 245, 276
- (e) Environmental Law: 230, 256, 264, 265, 282, 285, 285A, 287, 289, 289A, 294
- (f) Estate Planning: 214, 221, 223
- (g) Family Law: 225, 242, 272, 272A, 272B
- (h) Health Law: 212, 241, 244, 286A, 286B
- (i) Human Rights and Civil Liberties Law: 222, 222A, 226, 231, 231A, 233, 234, 248B, 267, 267A, 267B, 268, 277, 408, 408A
- (j) Intellectual Property and Technology: 209, 209A, 217, 266A, 274, 274A, 274B, 274C, 296
- (k) International, Comparative and Foreign Law: 210, 213, 224, 230, 242, 248, 248A, 248B, 248C, 248D, 248E, 249, 252, 268, 270, 274A, 290, 291, 292
- (l) Labor and Employment Law: 251, 251A, 255, 260, 279
- (m) Legal Theories and Ethics: 237, 250, 258, 258A, 259, 284
- (n) Procedure and Jurisdiction: 242, 246, 275, 283
- (o) Public Law and Policy: 235, 240, 254, 257, 279, 281, 281A, 293, 293A, 408A
- (p) Skills and Litigation: 211, 219, 229, 239, 261, 263A, 263B, 267A, 278, 280, 297, 409, 410A, 410B, 410C, 412, 413, 414, 415
- (q) Taxation: 214, 220, 238, 247A, 247B, 255, 271, 271A, 271B
- (r) Clinical Programs: 420, 425, 430, 435, 440, 445, 450, 455, 460, 470, 480
- (s) Individual and Group Study: 411, 416, 417, 418, 419, 495, 498, 499

209. The Internet and the Law (2)

Discussion—2 hours. Is the internet redefining the law as we know it, or reconfirming traditional 19th- and 20th-century legal principles? How should the law adapt, if it should, to the internet era? Essential background on the internet. Students conduct internet research. Brief review of forms of governance and law that have emerged on the internet, survey of the current state of the law of the internet, covering common law and statutory developments in the following areas: contracts and business transactions (including digital signatures and “clickable” licenses); securities and antitrust; jurisdiction, trademarks and domain names; copyright and trade secrets; electronic databases; defamation and libel; decency and free speech; privacy; and public records. Problems faced by actual or private sector clients posed and resolved.

209A. Patent Law (2)

Discussion—2 hours. United States patent law. What kinds of things may be patented, the requirements for a patent, and the many ways that patent rights may be lost. Rudiments of drafting a patent claim and how the patent system is responding to the acceleration of technological change. No engineering or science background required.

210. Criminal Justice Administration Seminar (2)

Seminar—2 hours. American criminal procedure compared with that of other countries, particularly the differing roles of the prosecutor, defense counsel, and the judge, and the differing systems of sentencing. Class paper can be used to satisfy advanced writing requirement. Limited enrollment.

211. Negotiation (2)

Discussion—2 hours. Strategies and tactics of negotiation in settling controversies between parties. Role-playing exercises and simulations to develop negotiating skills. Limited enrollment.

212. Law and the Mental Health System (3)

Discussion—3 hours. Mental illness, the regulation of mental health professionals, the patient-professional relationship, mental health professionals as expert

witnesses, and deprivation of liberty and property based upon mental disorder. With the prior written approval of the instructor, the advanced legal writing requirement may be satisfied by the research paper required for this course.

213. International Criminal Law Seminar (2)

Seminar—2 hours. Prerequisite: courses 205 and 206. Issues that arise when crime acquires an international character; for example, when an offense occurs in or harms more than one nation or when a person accused in one nation is a citizen in another. Topics include the United States' role in investigating and prosecuting international offenses, and what law, domestic or international, U.S. courts should apply in such cases; the duty of a nation to extradite or prosecute persons accused of breaking the law of another nation; the prosecution of international war criminals in the post-World War II tribunals in Nuremberg and Tokyo and in the current Bosnia and Rwanda tribunals in the Hague; the Pinochet case; and the proposed permanent International Criminal Court. Students will be required to write a research paper that will satisfy the advanced legal writing requirement. Limited enrollment.

214. Estate and Gift Tax (3)

Discussion—3 hours. Prerequisite: course 220; course 221 recommended. Fundamentals of federal transfer taxation, including the estate tax, the gift tax, and the generation-skipping transfer tax. Introduction to the income taxation of trusts and estates.

215. Business Associations (4)

Discussion—4 hours. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms. Topics include the planning of business transactions, the process of incorporation, the financing of corporations, and role of management and shareholders, the federal securities laws, and social responsibility.

215A. The Law of Corporate Governance Seminar (2)

Seminar—2 hours. Prerequisite: course 215. Advanced issues in the governance of publicly held corporations. Separation of ownership and control and how the law has addressed this issue at the theoretical level and in the context of topics such as the duties of corporate directors, shareholder voting rights, and competition among states to attract corporate charters.

216. Criminal Process Reform Seminar (2)

Seminar—2 hours. Consideration of possible reform efforts in criminal justice administration. Guest lecturers. Class presentations by each student. May satisfy advanced legal writing requirement. Limited enrollment.

217. Telecommunications Law (3)

Discussion—3 hours. Economic and administrative regulation of telephony, radio and television broadcasting, and video technologies such as cable and direct broadcast satellites. Emphasis on the recently enacted Telecommunications Reform Act and the role of the Federal Communications Commission, as well as other sources of regulation such as related antitrust law and state public utility regulation.

218. Constitutional Law II (4)

Discussion—4 hours. The First Amendment and the Equal Protection Clause. Examination of freedom of speech and assembly, focusing on the various kinds of speech the courts have identified and their constitutional significance: political speech, commercial speech, offensive speech, obscenity, fighting words, and speech constituting a clear and present danger. Issues involving the forum in which speech occurs, prior restraint, overbreadth, and vagueness doctrine, and the protection provided symbolic expression. Suspect class doctrine, including discrimination on the basis of race, gender, alienage and other characteristics, affirmative action, and the problem of “invidious motive,” as well as state action and the extent to which the equal protection clause prevents government from burdening the exercise of fundamental rights. The Establishment Clause and the Free Exercise Clause.

219. Evidence (4)

Discussion—4 hours. The rules regarding the admissibility of testimonial and documentary proof during the trial of civil and criminal cases, including the concept of relevancy, the hearsay rule, the examination and impeachment of witnesses, the opinion rule, constitutional and statutory privileges.

220. Federal Income Taxation (4)

Discussion—4 hours. Introduction to basic principles of federal income taxation. Topics include identification of income subject to tax, gains and losses from property transactions, deductions from income, the timing of income and deductions (tax accounting), and the identity of persons subject to tax on particular items of income.

221. Trusts, Wills and Decedent's Estates (3)

Discussion—3 hours. The law of decedent's estates, wills and trusts. Topics include intestate succession; family protection and limits on the power of testation; execution, revocation and revival of wills; will substitutes; inter vivos and testamentary private trusts. Topics may include contracts to make wills; class gifts; powers of appointment; the Rule against Perpetuities; and introduction to the administration of estates and trusts, including powers, duties, rights, and liabilities of fiduciaries and the management of assets.

222. Law of Race Relations Seminar (2)

Seminar—2 hours. Prerequisite: courses 218 (may be taken concurrently), 267; course 260 recommended. Treatment of racial issues throughout American legal history as well as current debates over such issues. Various, and often conflicting, theoretical approaches to the often oversimplified issue of race. The seminar will place current legal issues into a historical context, to evaluate the strength of conflicting legal approaches and to apply legal reasoning to issues that are commonly addressed in political or emotional terms. The advanced legal writing requirement may be satisfied at the discretion of the instructor. Limited enrollment.

222A. Latinos and Latinas and the Law (2)

Seminar—2 hours. Legal issues of particular relevance to the Latino community in the United States, including racial identity, immigration, language regulation, national and transnational identity issues, affirmative action, and civil rights. Research in the social sciences and the humanities as well as legal sources. Limited enrollment.

223. Estate Planning Seminar (2)

Seminar—2 hours. Prerequisite: course 221. Selected topics in the estates and trusts area. Content varies with instructor. Satisfies the advanced legal writing requirement. Limited enrollment.

224. Law and Institutions of European Union (2)

Discussion—2 hours. Study of legal problems of European integration, including the transfer of powers to supranational institutions, their decision making, the role of the Courts of the Communities and discussion of selected areas of European Law.

225. Marital Property (2)

Discussion—2 hours. California community property system, including the rights of spouses and the treatment of their property during marriage, and the characterization, valuation, and division of property upon divorce. Creditor's rights, premarital agreements, non-marital relationships, and division of property upon death.

225A. Marital Property (3)

Discussion—3 hours. California community property system, including the rights of spouses and the treatment of their property during marriage, and the characterization, valuation, and division of property upon divorce. Topics may include creditor's rights, premarital agreements, non-marital relationships, and division of property upon death.

226. Disability Rights (2)

Discussion—2 hours. The Americans with Disabilities Act (A.D.A.) as it applies to employment, higher education, public accommodations, and government services and programs. Emphasis on the statutory definition of disability, entities subject to the A.D.A., the “otherwise qualified” requirement, forms of dis-

crimination, reasonable accommodation, and defenses.

227A. Criminal Procedure (3)

Discussion—3 hours. U.S. Constitutional constraints on the police function; in particular, on arrest, search and seizure, electronic surveillance, entrapment, police interrogation and confessions, lineups, and the exclusionary rule.

227B. Advanced Criminal Procedure Seminar (2)

Seminar—2 hours. Prerequisite: course 227A (may be taken concurrently). An overview of bail, prosecutorial discretion, plea bargaining, trial by jury, and sentencing as well as other selected areas. Attendance and participation required. Oral presentation and research paper required. Advanced writing requirement for second-year students only.

228. Business Planning and Drafting (2)

Discussion—3 hours. Prerequisite: course 215, 220. Transactions frequently encountered by lawyers representing business clients, including extended consideration of the tax aspects of such transactions. Business and tax strategies, techniques and issues relative to formation and financing of partnerships, limited liability companies, corporations, and other types of business entities. Includes significant work drafting a variety of legal documents.

229. Scientific Evidence (3)

Discussion—3 hours. Prerequisite: course 219. Examines evidence law governing the admission of scientific testimony, and considers trial advocacy in presenting and attacking such testimony. Each student is required to both make an oral class presentation and prepare a research paper dealing with a particular forensic technique. Limited enrollment.

230. International Environmental Law Seminar (2)

Seminar—2 hours. International law norms applicable to the protection of the global environment, including air and water resources, flora and fauna, and historical and cultural treasures of international interest. The institutions that make and enforce the norms. Special emphasis on implementation and compliance by the United States. Required seminar paper will satisfy the advanced legal writing requirement. Limited enrollment.

231. Sex Based Discrimination (3)

Discussion—3 hours. Issues raised by legal and social discrimination between men and women and exploration of potential remedies drawn from constitutional law, statutory enactments, and common law developments. Subject matter areas include sex-based discrimination in family law, reproductive rights, educational opportunity, criminal law, and employment.

231A. Sexual Orientation and the Law (2)

Discussion—2 hours. Legal and social regulation of sexual orientation, emphasizing both the legal subordination of lesbians and gay men and the ongoing struggles to end that subordination. Sexual orientation issues in criminal, employment, constitutional, and family law. Substantial research paper may meet the Advanced Writing Requirement at the discretion of the professor.

232. Real Estate Finance (3)

Discussion—3 hours. Examination of the problems involved in the acquisition, financing, and development of real estate, and of lender remedies and debtor protections in the event of debtor default. Stresses the practical application of California legal doctrines.

233. Refugee Law Seminar (2)

Seminar—2 hours. Prerequisite: course 292 recommended. Focus on the law concerning the admission of refugees into the United States. Detailed study of the Refugee Act of 1980, which is the major piece of legislation dealing with refugee admission, the international law that fueled the passage of the Act, and the various regulations promulgated by the Attorney General implementing the law. Analysis of the implementation of the Refugee Act and examination of some criticisms of the immigration bureaucracy's implementation of the law. Some topical issues of

refugee law, such as gender-based persecution, persecution based on the exercise of reproductive rights, and the persecution of lesbians and gay men. The advanced legal writing requirement may be satisfied at the discretion of the instructor. Limited enrollment.

234N. Seminar on Violence Against Women (2)

Seminar—2 hours. Issues of violence against women have gained increasing attention both in the United States and internationally in the past fifteen years, largely because of feminist efforts to address gender-based violence against females. The passage of the Federal Violence Against Women Act in 1994, the growth in international law targeting gender-based violence and trafficking in women, and the recent international prosecutions for rape as a war crime in the former Bosnia. Survey of issues raised by violence against women, and topics such as battering, rape, sexual harassment, prostitution, and pornography. Students will be required to do a research paper and to make in-class presentations. The paper will satisfy the advanced legal writing requirement.

235. Administrative Law (3)

Discussion—3 hours. Examination of how the U.S. Constitution and the federal Administrative Procedure Act constrain and regulate decision making by government agencies and officials. Topics include administrative due process, separation of powers, delegation of authority to agencies, procedural requirements for agency adjudication and rulemaking, and the extent and limits of judicial review. Course highly recommended for anyone intending to practice in any public law area or at the intersection of public/private law.

236A. Securities Regulation I (2)

Discussion—4 hours. Prerequisite: course 215 or consent of instructor. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms. Topics include the planning of business transactions, the process of incorporation, the financing of corporations, and role of management and shareholders, the federal securities laws, and social responsibility.

236B. Securities Regulation II (2)

Discussion—2 hours. Prerequisite: course 215 or consent of instructor; course 236A recommended. Securities Exchange Act of 1934 and the regulation of securities markets. Topics covered include regulation of securities markets and securities professionals, responsibilities of securities lawyers, continuous reporting, transnational securities fraud, and enforcement of the securities acts.

237. American Legal History (2)

Seminar—2 hours. A chronological overview of the legal ramifications of the major events of American history from the colonial era to the late Twentieth Century. The functioning of American legal institutions—courts, legislatures, executive and administrative agencies—in the context of the nation's social values.

238. Tax Strategies of Business (2)

Discussion—2 hours. Framework for analyzing how income taxes affect business decisions and company strategy. Applications include the role of taxes in management compensation, multinational decision making, corporate restructuring transactions, and succession planning. Tax planning concepts and their application. Intended to develop broad understanding of how taxes affect business decisions. Simple algebra to describe generic tax issues and work with computer spreadsheets.

239. Mediation: Theory and Practice (3)

Discussion—3 hours. The basic, practical knowledge necessary to begin a mediation practice. Those who do not choose to work as mediators will have a detailed understanding of the mediation process that will enable them to counsel clients knowledgeable about the mediation option and represent clients ably in mediation. All will gain communication skills valuable in working with clients and other attorneys, develop the ability to analyze dis-

putes and understand why negotiations succeed or fail, and understand the advantages and limitations of mediation as a method of resolving disputes. The stages of a mediation: contracting (establishing contact with the parties and explaining the process), developing the issues, working the conflict, resolving the conflict, and closure. Not open to students who have completed course 211 or 297.

240. Elections and Political Campaigns (2)

Discussion—2 hours. Constitutional and statutory aspects of federal and state elections, including laws relating to campaign finance, initiatives, term limits and reapportionment. Satisfies legal writing requirement. Limited enrollment.

241. Law and Psychiatry (2)

Seminar—2 hours. Prerequisite: course 212. Open to medical students who are participating in the program offered by the Forensic Center of Excellence at the UC Davis School of Medicine, and to law students at the UC Davis School of Law. Focus on forensic psychiatry for medical and legal professionals. Psychiatric trainees and forensic fellows are paired with law students to work in tandem as a forensic team. Each team is assigned to actual cases that have been adjudicated, although the teams will approach each client as if adjudication has not yet taken place. Each case is assessed from a psychiatric and a legal perspective so that both team members will confront the legal and psychiatric issues presented. Students prepare cases to provide a broad array of legal/psychiatric problems and raise specific critical issues around which psychiatrists and lawyers interact and at times collide. Course is graded on the basis of the students' participation in the seminar sessions and on the instructor's evaluation of the written assessment of the cases prepared by the team to which the student belongs.

242. Conflict of Laws (3)

Discussion—3 hours. How law operates across state and national borders. The topics covered include choice of applicable law in transactions involving multiple jurisdictions, recognition of judgments, jurisdiction, and such advanced applications as choice of law in class actions or other complex litigation. Problems practitioners frequently encounter in a wide variety of fields, from commercial law to personal injury and family law.

243. Commercial and Bankruptcy Law (4)

Discussion—4 hours. The business debtor who doesn't have enough money (or is unwilling) to pay his debts. Remedies available to creditors to force payment, along with devices that creditors may use to give themselves priority against limited assets. Examination of the role of bankruptcy. Bankruptcy both as a means for providing funds for creditors, and as a device for maximizing asset value.

244. Basic Human Physiology (2)

Discussion—2 hours. Several medical basic science faculty give lectures on the basic anatomy and physiology of the organ systems; basic word roots which underlie medical/scientific terminology. Clinical and law faculty give lectures on new technologies in medicine and associated legal problems. Limited enrollment. (S/U grading only)

245. White Collar Crime (3)

Discussion—3 hours. The law of conspiracy, mail and wire fraud, RICO, money laundering and other business and environmental crimes and associated defenses.

246. Federal Jurisdiction (3)

Discussion—3 hours. The subject-matter jurisdiction of federal courts. The constitutional and statutory authority of federal courts to adjudicate civil actions arising under federal law or between parties of diverse citizenship in contemporary detail, and from the perspective of history and the Constitution. Federal appellate jurisdiction, federal writs in the nature of habeas corpus, abstention, justiciability, and miscellaneous matters affecting attorneys' decisions to seek a federal forum. Careful study of the fine points of relevant legislation in light of its history and the constitutional themes of separation of powers and federalism as guides to understanding the Supreme

Court's leading opinions on the scope of federal jurisdiction.

247. Taxation of Partnerships (3)

Discussion—3 hours. Prerequisite: course 220. Most business that is not publicly traded is organized (or should be) under the partnership tax regime. Course examines the federal income taxation of business entities whose owners are taxed on the income, deductions and losses of the entity on a pass-through basis. This includes partnerships, limited liability companies and S corporations. Explores choice of entity issues, identification of entities eligible for pass-through tax treatment and the income tax impact of formation, operation and dissolution of pass-through business entities.

247A. Taxation of Business Organizations I (4)

Discussion—4 hours. Prerequisite: course 220. Federal income taxation of business entities whose owners are taxed on the income, deductions and losses of the entity on a pass-through basis. This includes partnerships, limited liability companies and S corporations. Entity issues, identification of entities eligible for pass-through tax treatment and the income tax impact of formation, operation and dissolution of pass-through business entities.

247B. Taxation of Business Organizations II (3)

Discussion—3 hours. Prerequisite: course 247A. Transfer of corporate stock or assets in the course of liquidations, sales mergers and divisions of corporations. Taxable and tax-free corporate reorganizations. Taxation of Subchapter S corporations, a pass-through tax regime for incorporated entities. Appropriate for students who will pursue a career advising clients in corporate restructuring and acquisitions.

248. International Law (3)

Discussion—3 hours. Basic international law concepts such as statehood and recognition; treaty law and customary international law; use of force; human rights and war crimes; expropriation; the relationships between international law and national law; and the jurisprudence of international law.

248A. Use of Force (2)

Seminar—2 hours. Emerging issues regarding use of force in international law, focusing on humanitarian intervention. Analysis of the history of military intervention; the development of the doctrine of the sovereign equality of states, and its use to counter interventionist claims; the origins and development of humanitarian norms that might serve as a basis for intervention; the doctrine of self-defense, and the extent to which the UN Charter prohibits armed intervention; intervention for democracy; intervention for self-determination; intervention and counter-intervention in civil wars; multi-lateral vs. unilateral intervention; intervention by regional organizations such as NATO; incidents since 1945 that may contribute to emerging interventionist norms at odds with the text of the Charter; and philosophical and foreign policy considerations underlying new interventionist justifications.

248B. International Human Rights (2)

Discussion—3 hours. Prerequisite: course 205. Laws, theories, and institutions relating to international human rights. The origins of the idea of human rights and the acceptance of that idea in the second half of the twentieth century; the debate between universalists and cultural relativists about the nature of rights; how international human rights are treated in national systems, with particular attention to the United States; the United Nations and other bodies that promote human rights; and how various systems treat civil and political rights, such as the right to speak freely, and economic and social rights, such as the right to education.

248C. Foreign Relations Law Seminar (2)

Seminar—2 hours. The war power, the treaty power and executive agreements, arms sales and military assistance, the recognition power, the negotiation power, the scope of the appropriations power as a check on executive activities, and other separation-of-powers issues generated by the intersection of international law and constitutional law. Class pre-

sentation and required seminar paper will satisfy advanced legal writing requirement. Limited enrollment.

248D. Globalization, Citizenship, and the Nation-State Seminar (2)

Seminar—2 hours. The globalization of people, capital, and information is transforming the world and our relationship to it. How are we to live in such a globalized world? What duties do we owe to our community and to the world at large? Can we still think of ourselves as citizens of a nation-state or must we reconstruct ourselves as citizens of the world? Can we reconcile globalization with our desire for a sense of rootedness. The basic elements in international law theory—the citizen, the nation, and the world. The rise of the nation-state, the conception of citizenship and an exploration of our contemporary situation. Satisfies advanced legal writing requirement.

248E. Law of the United Nations (2)

Discussion—2 hours. The law of the United Nations. Examination of the origins of the organization, its charter and status under international law, structure and membership including legal questions posed by competing regimes and States merging or breaking up (such as the former USSR and Yugoslavia). Its privileges and immunities, law-making activities and role in the peaceful settlement of international disputes. Measures which might be taken to enforce its decisions, including sanctions, peace-keeping operations, creation of international criminal tribunals, humanitarian interventions and use of force. The UN system of organizations.

249. Comparative Law (3)

Discussion—3 hours. The uses of comparative method, principal differences between common law and civil law and the styles of legal reasoning that prevail in these two great legal cultures. Topics include the evolution of the civil law, the phenomenon of codification, the structure of European civil codes and the interpretation of their provisions, the respective roles of counsel, judges and law teachers, civil law procedure, and the analysis of selected areas of substantive law.

250. Jurisprudence Seminar (2)

Seminar—2 hours. The question of how judges should decide "hard cases," where the content of the law is in doubt and competent arguments have or could be offered for mutually inconsistent decisions in favor of either party. Examination of the broader question of the relationship between justice and law, and hence of the still broader questions of the nature of "justice" and "law." To what extent should a judge's personal convictions about justice affect decisions about the legal rights of the parties to a lawsuit? Does it matter if the judge is dealing with a case in which the controversy concerns the proper interpretation of precedent rather than legislation? Is it any more appropriate for a judge to resolve doubtful cases by appeal to "the public interest" than by appeal to the judge's personal sense of right and wrong? Virtually every case in which the Supreme Court of the United States grants review on a question of constitutional law is a "hard case." Introductory readings of a general and synthetic nature followed by a study of the work of several leading philosophers of law and adjudication, with particular emphasis on the work of Ronald Dworkin. Previous study of philosophy is neither required nor discouraged. Limited enrollment.

251. Labor Law (2)

Discussion—2 hours. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law. Historical development of labor law, the scope of national legislation, union organization and recognition, the legality of strikes, picketing, and the negotiation of collective bargaining agreements.

251A. Individual Employment Rights (2)

Seminar—2 hours. Legal regulation of the relationship between employers and individual employees. Topics include hiring, wrongful termination, employees' duty of loyalty, restrictions on post-employment competition, workplace privacy and defamation, and

protection against harassment and other abusive conduct in the workplace. In addition to the substantive law, examination of prevailing assumptions about the nature of the employment relationship, the role of law in regulating the employment relationship, and whether common law approaches should be replaced or supplemented by statutory schemes.

252. International Litigation and Arbitration (3)

Discussion—3 hours. Current developments in international law, conflict of laws, civil procedure, arbitration and comparative law in the context of transactions and disputes that cut across national boundaries. Topics include jurisdiction, the enforcement of judgments, the relative merits of arbitration and adjudication, international discovery and international choice-of-law problems. Exercises in international arbitration and mediation.

253. Products Liability (3)

Discussion—3 hours. Civil action for harm to the consumer resulting from defective products. Includes manufacturing defects, warning defects and design defects.

254. Housing and Community Development Law (2)

Seminar—2 hours. Legal issues related to developing, securing, keeping, maintaining, and preserving decent, affordable, accessible housing and sustaining viable, diverse communities. Topics include landlord-tenant law, real property and contract issues, affirmative habitability/slumlord tort litigation, publicly subsidized housing or the government as landlord (constitutional and administrative law issues), employee housing (including the role of the government and interrelationship with employers and the agricultural industry), housing and community planning (including land use, housing element, general plan, growth management, environmental and agricultural preservation issues), and housing discrimination (e.g., race, national origin, type of housing and occupant, NIMBY, family, affirmatively furling fair housing requirements, federal and state law).

255. Pension and Employee Benefit Law (3)

Discussion—3 hours. The federal regulation and taxation of private pensions and employee benefits. The Employee Retirement Income Security Act (ERISA), including such topics as coverage, forfeitures, spousal rights, creditor access, fiduciary duties, pre-emption of state law, remedies, and other litigation issues. Internal Revenue Code issues such as discrimination in favor of the highly compensated, limitations on contributions and benefits, rollovers, IRAs, early distribution penalties, and minimum distribution rules. Problems surrounding plan terminations and mergers and acquisitions.

256. Land Use (2)

Discussion—2 hours. An assessment of the administrative and judicial applications of land planning and development. Topics include zoning, general plans, and related environmental and local government regulation. The role of the California Environmental Quality Act and its application to California land use law.

257. Legislative Process (2)

Discussion—2 hours. Fundamental elements of the legislative process, including legislative procedure; the legislature as an institution; lobbying; statutory interpretation, legislative-executive relations; and the legislature's constitutional powers and limitations.

258. Professional Responsibility (2)

Discussion—2 hours. The American Bar Association's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the Multistate Professional Responsibility Examination, and the California Rules of Professional Conduct, which are tested on the California Bar Examination. Issues affecting the legal profession, including lawyers' ethical duties and responsibilities to clients, the courts, third parties, and the legal system.

258A. Professional Responsibility (1)

Discussion—1 hour. Study of ethical duties and responsibilities under the American Bar Association Code of Professional Responsibility, the Model Rules of Professional Conduct, and the Code of Judicial

Conduct and the law of California. Required of all students for graduation. (S/U grading only.)

258B. Professional Responsibility (2)

Discussion—2 hours. The American Bar Association's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the Multistate Professional Responsibility Examination, and the California Rules of Professional Conduct, which are tested on the California Bar Examination. Current issues affecting the legal profession, including lawyer's ethical duties and responsibilities to clients, the courts, third parties, and the legal system.

259. Feminist Legal Theory Seminar (2)

Seminar—2 hours. Readings in feminist legal theory, examining the various strands that have developed including liberal, radical, cultural, and post-modern feminism. The relationship between theory and practice, looking at a number of junctures where the law intersects with women's lives (e.g., pornography, reproductive freedom, sexual harassment, rape). Each student will be required to lead class discussion on one of the selected topics. Research paper will satisfy the advanced legal writing requirement. Limited enrollment.

260. Employment Discrimination (3)

Discussion—3 hours. Examination of federal law prohibiting employment discrimination based upon race, color, religion, sex, national origin, age, and sexual orientation. Focus on Title VII of the Civil Rights Act of 1964, and will include coverage of Art. 1981, Art. 1983, the Equal Pay and Age Discrimination Acts. California fair employment laws.

261. Judicial Process Seminar (2)

Seminar—2 hours. Prerequisite: must be taken before or concurrently with the judicial externship (offered fall only). Required for all full-time judicial externs and recommended for part-time judicial externs. Examines a variety of issues concerning the judicial process. The judge's role in the legal process, the administration of justice, ethical issues, decision making, bias, and critical examination of the strengths and weaknesses in our current judicial system.

262. Antitrust (3)

Discussion—3 hours. Study of the federal antitrust laws including price fixing, limits on distribution, tying arrangements, monopolization, and mergers.

263A. Trial Practice (3)

Discussion—2 hours; laboratory—1 hour. Prerequisite: course 219 (may be taken concurrently). Introduction to the preparation and trial of cases, featuring lectures, videotapes, demonstrations, assigned readings and forensic drills. Limited enrollment. (S/U grading only.)

263B. Advanced Trial Practice (2)

Discussion—2 hours. Prerequisite: course 219 (may be taken concurrently). An advanced trial practice and litigation skills course featuring student preparation of and participation in mock trials with occasional class sessions. Limited enrollment. (S/U grading only.)

264. Water Law (3)

Discussion—3 hours. Property rights in surface waters, including riparianism, prior appropriation and federal reserved rights; water administration institutions, including the federal reclamation program; the law of interstate waters and property rights in ground water. Emphasis on California water law and policy.

265. Natural Resources Law Seminar (2)

Seminar—2 hours. Prerequisite: course 264 concurrently recommended. A consideration of the revolution in environmental law and water rights law over the past fifty years with regard to the protection of instream flows in California, i.e., those waters in rivers and lakes which support fish, recreation and other values associated with leaving water in place. Limited enrollment.

266. Commercial Law (2)

Discussion—2 hours. The law of sales. A functional approach towards the Uniform Commercial Code and Article 2 on sales. Discussion includes, among

other topics, the nature of a sales "bargain," the allocation of the risk between the parties, the legal significance of sales warranties and disclaimers, performance, nonperformance and breach. Exploration of the UCC evaluating different ways in which courts construe it and the legal significance of those differences. Application to topical issues in commercial law, not limited to sales.

266A. Law of E-Commerce (3)

Discussion—3 hours. The legal issues that are emerging as crucial to the conduct of business in cyberspace. Discussion of the evolution and current administration of the Internet and the World Wide Web. Brief foray into early claims that cyberspace should not be regulated at all and examination of how cyberspace is in fact regulated. A variety of issues relevant to business engaged in e-commerce, including jurisdiction, the domain name system, electronic contracting and signatures, intellectual property, privacy, taxation, and antitrust. Recent state and federal legislation dealing specifically with e-commerce, state law and secondary materials. Understanding of how to approach cyberspace issues.

267. Civil Rights Law (4)

Discussion—4 hours. Survey of federal civil rights litigation. Civil remedies for civil rights violations. Actions for constitutional violations under 42 USC § 1983, affirmative defenses, and abstention doctrines. Litigation under §§ 1981, 1982, and 1985, racial discrimination and interference with the exercise of constitutional rights.

267A. Civil Right Appeals Practicum (3)

Seminar—3 hours. Prerequisite: course 219, course 267 (may be taken concurrently). Advanced instruction in appellate advocacy, including the drafting of briefs and oral argument in pro bono civil rights cases in the Ninth Circuit Court of Appeals. Successful completion of course will satisfy the advanced legal writing requirement. Limited enrollment. (S/U grading only.)

267B. Civil Rights Seminar (2)

Seminar—2 hours. The social, political, legal and historical factors which led to the creation of the United States Commission on Civil Rights (USCCR) in 1957. The United States Commission on Civil Rights is a bipartisan, independent agency established by the Civil Rights Act. It is directed to investigate complaints alleging deprivations of the right to vote, and voter fraud; to study and collect information relating to discrimination and the denial of equal protection of the laws under the Constitution on the basis of race, color, religion, sex, age, disability, or national origin; and submit reports, findings and recommendations to the President and to Congress. The role that the USCCR has played and continues to play in American politics, legislative enactments and the national dialogue on equality, fairness and justice in the context of civil and human rights. Satisfies Advanced Legal Writing Requirement.

268. Jewish Law Seminar (2)

Seminar—2 hours. The term "Jewish Law" refers to those subjects that would normally be taught in an American law school as they have been approached by the Jewish legal system. This system is based primarily on the Talmud and on the commentaries and decisions that are derived from it. Jewish law is of interest to American law students not for its immediate practical value, but because it is a foreign legal system that is one of the oldest in the world, and one that has faced many of the problems now facing American law. Specifically, although Jewish law is purportedly based on immutable religious law, changing conditions over the centuries have encouraged methods of adaptation that are reminiscent of American constitutional law. Each student will be required to prepare and present a paper that would fulfill the advanced legal writing requirement. Neither a knowledge of foreign languages nor a previous exposure to Jewish law is necessary. Limited enrollment.

269A. Basic Finance (3)

Discussion—3 hours. Prerequisite: non-law finance course or consent of instructor. The basic techniques

of valuation that are part of the standard inventory in a good business school. Understanding and advising of clients and understanding of other business-related courses in the law school. May be taken in second or third year, but especially helpful to students just beginning their second year.

269B. Financial Information and the Law (3)

Discussion—3 hours. Prerequisite: students with more than two semesters of accounting will not be admitted except with permission of the instructor. Reading and evaluation of financial disclosure documents—balance sheets, income statements, etc., with the purpose of learning what they tell and fail to tell about the values of an enterprise. Mechanics of accounting and the role of the lawyer in helping clients to prepare and use these materials. Expectations and limitations of disclosure documents to investors and creditors. Responsibilities of clients and lawyers in furnishing these documents to regulators. Liability of lawyers for deficiencies in financial disclosure.

270. International Business Transactions (2)

Discussion—2 hours. Select legal problems arising from international business transactions. Topics include the international sales contract, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, and foreign exchange problems.

271. Nonprofit Organizations (3)

Discussion—3 hours. Prerequisite: course 215 (may be taken concurrently) or consent of instructor. The legal rules and concepts applicable to nonprofit organizations. Nonprofits from the state law perspective, covering organization, operation and dissolution of nonprofit corporations, charitable trusts and associations, including internal governance rules, fiduciary obligations of officers and directors, rights of members, regulation of charitable solicitation, and enforcement powers of the attorney general. Examination of the extensive federal tax laws applicable to nonprofits, including requirements for attaining tax-exempt status, the increment and private benefit concepts, intermediate sanctions, limitations on lobbying and political activities, special rules applicable to foundations versus public charities, the unrelated business income tax, and charitable deductions. Nonprofit accounting issues, local property tax and other local tax exemptions, and public/private partnerships.

271A. Nonprofit Organizations: State and Local Governance Issues (2)

Discussion—2 hours. Prerequisite: course 215 (may be taken concurrently) or consent of instructor. State and local laws applicable to nonprofit organizations, i.e., public interest, cultural, religious, educational, and other not-for-profit entities. Federal tax exemptions of nonprofits, state and local laws impacting nonprofits with respect to incorporation or charitable trust formation, operation and governance, dissolution, fiduciary obligations of trustees and officers and directors, management and investment obligations vis-à-vis trust assets, cy pres, rights of members of social clubs, trade associations and labor unions, enforcement of obligations and rights by the attorney general and others, and regulation of charitable solicitation. Topics may include local property tax and other tax exemptions, nonprofit accounting issues public/private partnerships and Federal antitrust and constitutional constraints.

271B. Nonprofit Organizations: Tax Exemptions and Taxation Focus (2)

Discussion—2 hours. Prerequisite: course 215 or consent of instructor; course 220 recommended. Conceptual basis and substantive law criteria for the federal and state income tax exemption of nonprofit organizations and those particular circumstances and activities which will result in income taxation or financial sanction, including qualifications for exempt status, the nondistribution constraint, the inurement and private benefit concepts, limitations on campaign activities, permissible lobbying expenditures, the unrelated business income tax, the deduction for charitable contributions, intermediate sanctions, the differences between private foundations and public charities, special excise taxes, the exemption appli-

cation process and reporting and disclosure requirements. Topics may include nonprofit accounting issues, local property tax and other local tax exemptions, and public/private partnerships.

272. Family Law (2)

Discussion—2 hours. Legal, social and emotional aspects of parent-child relationships, including issues concerning familial privacy, state intervention on behalf of endangered children, foster care, termination of parental rights, adoption, artificial insemination, surrogacy, paternity, emancipation of minors, child support and child custody. How attorneys, mental health professionals and the judicial process do and should deal with these issues (e.g., interviewing, counseling and medication).

272A. Current Issues in Family and Marital Property Law Seminar (2)

Seminar—2 hours. Prerequisite: course 225 or 272. Examination of important current issues in the fields of family and marital property law. Heavy emphasis on law reform, including study and direct observation of the legislative process. Each student will select one issue for development and presentation in the seminar. A research paper or draft bill and supporting analysis is required. A more lengthy paper with additional unit credit may be arranged with the consent of the instructor to satisfy the advanced legal writing requirement. Limited enrollment.

272B. Elder Law (2)

Discussion—2 hours. The legal practice and policy relating to aging individuals and an older society. Examination of the roots of legal ethics and the role of the lawyer as professional problem solver and advisor, and the uses of law in relationships between people over life's course. The traditional divisions of tort, contract and property and examination of issues such as age discrimination in employment, eligibility for public benefits, long-term care, housing options of the elderly, health care, guardianship, health care decision making for the incapacitated client, disability law issues, property management, euthanasia, elder abuse, neglect and crime, generational justice, the conflicting values of autonomy versus protections, and a host of other matters. Student-led discussions of interdisciplinary assigned readings and guest lecturers.

273N. Advanced Torts (3)

Discussion—3 hours. Torts not covered in the first-year torts course. Defamation, privacy, misrepresentation, misuse of legal procedure, and business torts. Nuisance and related environmental torts. The intersection between statutory remedies and common law torts.

274. Intellectual Property (3)

Discussion—3 hours. Broad survey of the field of intellectual property, including trademarks, unfair competition, copyright, and patents.

274A. International Intellectual Property (2)

Discussion—2 hours. Prerequisite: course 274 or 296 or 209A or consent of instructor. International aspects of copyright, patent and trademark law, including a look at basic international instruments such as the Paris Convention, the Berne Convention, and Trade Related Aspects of Intellectual Property Rights of the World Trade Organization. Topics include approaches to patent protection for pharmaceuticals and agricultural products in developing nations, and copyright protection in a digital world.

274B. Intellectual Property Rights in Culture (3)

Discussion—3 hours. Examines effects of a burgeoning intellectual property regime on cultural conflict and formation. Topics include the expansion of intellectual property rights and a comparison of economic and identity-based justifications for intellectual property rights; how culture is conceived; how intellectual property and cultural property may protect cultural groups against cultural appropriation; and the social and political implications of developing intellectual property rights in culture.

274C. Intellectual Property in Cyberspace Seminar (2)

Seminar—2 hours. Prerequisite: course 274. The recent expansion of IP laws emerging to meet the

growth of Internet and digital technologies that enhance human abilities to access, copy, store, manipulate, and transmit vast amounts of information.

275. Complex Litigation (2)

Discussion—2 hours. Issues that frequently arise in large complex litigation involving multiple parties and multiple claims. In depth topics introduced in the first-year civil procedure course, with an emphasis on cutting edge issues currently the topic of litigation. Class actions under Federal Rule 23, and current issues arising from mass tort (including asbestos and tobacco litigation), employment discrimination, and securities fraud class actions.

276. Juvenile Justice Seminar (2)

Seminar—2 hours. Legal and philosophical bases of a separate juvenile justice process for crimes committed by minors; police investigation, apprehension, and diversion; probation intake and detention; possible transfer to adult court; juvenile court hearing and disposition; juvenile corrections; and the role of counsel at each phase of the process. Student presentations of individually selected research paper topics. Guest speakers and a field trip possible.

277. Native American Law (2)

Seminar—2 hours. Legal relations between Native American tribes and the federal and state governments. Topics include the basic jurisdictional conflicts which dominate this area of law and cover specific areas such as land rights, hunting and fishing rights, water rights, domestic relations law, and environmental protection. Religious freedom, repatriation. Issues regarding terminated and non-recognized tribes are also addressed.

278. Pretrial Skills (2)

Discussion—2 hours. Role-playing exercises, videotaped simulations, and related projects to introduce students to lawyering skills basic to the practice of law, including client interviewing and counseling, fact investigation, and discovery. Limited enrollment.

279. Public Sector Labor Law (2)

Seminar—2 hours. Prerequisite: course 251 or consent of instructor. Application of private sector labor law doctrines to the public sector. Emphasis on the four California public sector statutes and the impact of constitutional law on public employees. Class presentation and seminar paper required. Satisfies advanced writing requirement. Limited enrollment.

280. Advanced Legal Writing Seminar (2)

Seminar—2 hours. How to write a variety of legal documents in plain English. Writing exercises and outside readings will be assigned weekly. Each student completes an individual writing project in lieu of final examination. The writing project will satisfy the law school's advanced legal writing requirements. Limited enrollment. (S/U grading only.)

281. Local Government Law (2)

Discussion—2 hours. Comprehensive course with some emphasis on California municipalities. Topics include organization, reorganization, and operation (including open meetings); intergovernment relationships (federal, state, and local, with emphasis on state and local); legislation (authority—including police power and citizen-initiated laws—and enforcement); finance; land use and environmental quality; redevelopment; eminent domain; and regional issues.

281A. Voting Rights and the Law of the Political Process (3)

Discussion—3 hours. Regulation of the right to vote and to participate in the political process afforded under the First and Fourteenth Amendments. Legislative apportionment, access to the ballot, the Voting Rights Act, and campaign finance jurisprudence.

282. Energy Law Seminar (2)

Seminar—2 hours. The history, law, and public policy of energy regulation in the United States with an emphasis on economic and environmental regulation. Competitive restructuring of the natural gas and electric utility industries emphasized. The basic regulatory schemes for other energy sources such as hydroelectric power, coal, oil, and nuclear power explored. Recommended to anyone who has an

interest in the energy sector, various models of economic regulation, or regulated industries.

283. Remedies (3)

Discussion—3 hours. Survey of modern American civil remedies law, in both private and public law contexts. Topics include equitable remedies, equitable defenses, contempt power, injunctive relief, restitution, and money damages.

284. Law and Economics (3)

Discussion—3 hours. The economic approach to law. Utilitarianism and its critics, efficiency, freedom of contract, the libertarian vision of the minimal state, the commodification of all parts of life, cost-benefit analysis, game theory, and behavioral law and economics. The economic approach to the law of property and intellectual property, as well as to anti-discrimination law is applied.

285. Environmental Law (3)

Discussion—3 hours. An introduction to federal and state environmental law, including coverage of historical development of environmental law; the role of courts, the legislature and the executive branch in the development and implementation of environmental policy; allocation of authority among different levels of government; the role of market forces in environmental decisions; the major regulatory strategies that have been applied to control environmental harm, and enforcement of environmental law. Major statutes considered include the National Environmental Policy Act, Endangered Species Act, Clean Air Act and Clean Water Act.

285A. Environmental Justice Law (2)

Discussion—2 hours. Introduction to the scope of current environmental justice work; who is affected by environmental hazards, what legal and political tools are available to address the problems, and the strategic issues confronting groups organizing for change. The role of lawyers and methods of lawyering in the environmental justice context.

286A. Health Law (3)

Discussion—3 hours. Identification and analysis of a variety of legal issues that arise in the dynamic field of health care. Topics drawn from four general themes relating to health care: quality, cost, access, and the personhood of the patient. Topics may include professional licensure; discipline and liability; institutional/corporate liability for the quality of health care; informed consent; professional relationships within health care enterprises; government health care programs; legal and ethical implications of the new reproductive technologies and medical genetics; advance directives and end-of-life care; the "right to die" and euthanasia.

286B. Advanced Health Law Seminar (2)

Seminar—2 hours. Prerequisite: course 286A or consent of instructor. Specific seminar topic will be drawn from those covered in course 286A. Reading and discussion of book on seminar topic and/or a set of selected readings. Students will select research project related to seminar topic and will facilitate the discussion of that topic. Written paper analyzing legal issue related to chosen research project.

287. Public Land Law (3)

Discussion—3 hours. Legal aspects of federal land management, including the history of public land law, authority over federal lands and specialized law dealing with particular natural resources and uses found on federal lands (minerals, timber, range, wildlife, recreation and preservation).

288. Advanced Constitutional Law Seminar (2)

Seminar—2 hours; paper. Explores in-depth selected topics or problems in constitutional law and theory. Initial topics may include the regulation of hate speech, the interpretation of the Establishment Clause, or the development of the Takings Clause doctrine. Other topics selected by the seminar group. Students will write papers and present them to the seminar. Satisfies advanced legal writing requirement. Limited enrollment.

289. Toxics Law and Policy (3)

Discussion—3 hours. Examination of the range of regulatory approaches dealing with toxic substances and hazardous wastes, including the federal Super-

fund, the federal hazardous waste management law, and other statutes controlling toxics in pesticides, the workplace, and other settings. The class will also cover risk assessment and risk management issues, alternatives to traditional regulation such as California's Proposition 65, and toxic torts.

289A. Biotechnology Law and Policy (2)
Seminar—2 hours. Topics may include regulating research, including restrictions on cloning and fetal stem cell research; regulating the products of biotechnology, including restrictions on use or distribution of genetically modified organisms; access to the natural resources that provide the starting materials for biotechnology; the availability and scope of intellectual property protection for biotechnology products; and commercialization of academic research. Students will play an active role in selection of reading materials and will lead class discussions. Enough background will be provided on the science and law that anyone with an interest in the topic should be comfortable in the class. A paper will be required, which with approval of the instructor may satisfy the writing requirement.

290. International Trade Dispute Seminar (2)
Seminar—2 hours. One of the great debates raging in international trade circles is between pragmatists and legalists. Pragmatists argue that informal, negotiation-based dispute resolution processes are the best, and perhaps the only workable, means of effectively settling trade controversies between disputing countries. Legalists believe that formal, litigation-style dispute resolution processes are superior and that "soft" pragmatic approaches to settling trade disputes inherently are doomed to failure. Introduction to the economic, political, and legal theories underlying the debate and, using actual disputes from NAFTA, MERCOSUR, and the WTO, attempts to determine which camp has the better argument. Grade based on paper and class presentation. Satisfies the advanced legal writing requirement. Limited enrollment.

290A. Nuclear Technology and the Law (2)
Seminar—2 hours. Examination of the international law governing the uses of nuclear technology: weapons, energy production, and other applications. Verification of non-proliferation obligations as well as legal aspects of nuclear safety, transport, waste disposal, terrorism and sabotage, liability for nuclear damage and establishment of an adequate legal infrastructure at the national level.

291. International Trade Law and Latin America (3)
Discussion—3 hours. Covers the role of the executive, legislative and judicial branches of the United States with respect to international trade policy. International topics include the World Trade Organization (WTO) and the General Agreement on Tariffs and Trade Agreements (GATT, 1947), the GATT, 1994, North American Free Trade Agreement (NAFTA) and economic integration in this Western Hemisphere. Students are encouraged to do supervised research on selected topics of trade law and Latin America. Satisfies the advanced legal writing requirement.

292. Immigration Law and Procedure (3)
Discussion—3 hours. Survey of a brief history of U.S. immigration and policy; federal agency interrelationship (Justice and State Department); entry of nonimmigrant (temporary) visitors and immigrants into the United States; the worldwide quota and preference systems; family and employment relationship critical to securing favored immigrant status; deportation procedures; discretionary relief available to persons otherwise subject to deportation; available defenses to deportation and exclusion proceedings; immigration consequences of criminal conviction; refugee and asylum law; administrative appeals; federal and state judicial relief; citizenship and naturalization.

293. Public Interest Law Seminar (2)
Seminar—2 hours. Examines the problems associated with providing legal services to those people and interests in American society traditionally unable to afford those services. The class will discuss selected readings that review various theoretical

issues and specific problems facing public interest lawyers. May satisfy advanced legal writing requirement. Limited enrollment.

293A. Comparative Public Service Strategies (1)
Discussion—1 hour. Prerequisite: course 460 concurrently. Classroom component to course 460, however it is open to all second and third-year students. Forum for students to critically discuss the strategies that various public service programs engage in to address similar issues. For example, how might attorneys working for legal services programs and government attorneys address issues related to low income housing or the environment? How might the strategies differ or be similar? What allies might attorneys from different perspectives have available? While the class provides a special opportunity for externship programs to discuss their placements in a group setting, other students will have the opportunity to participate from a critical or research perspective.

294. Environmental Law Seminar (2)
Seminar—2 hours. Endangered species and biodiversity law and policy covering domestic and international law. Topics may include justifications for biodiversity protection; species versus ecosystem focus; protecting biodiversity on public lands, on private lands, and in the oceans; habitat conservation planning; adaptive management; and endangered species recovery and delisting. The class is open to both law students and ecology graduate students. Students will be expected to lead a class discussion and write a research paper, which may satisfy the writing requirement. Limited enrollment.

295. Business Bankruptcy (2)
Discussion—2 hours. Prerequisite: course 243, or good business law background and consent of instructor. Techniques for solving problems of a business having trouble paying its debts. Matters of business planning and deal-structuring, mostly under the Bankruptcy Code.

296. Copyright (3)
Discussion—3 hours. The law of copyright, including its application to literature, music, films, television, art, computer programs, and the Internet. The subject matter of copyright, duration, ownership, formalities, exclusive rights, infringement, defenses, and international aspects of copyright.

297. Alternative Dispute Resolution (2)
Discussion—2 hours. History of alternative dispute resolution (ADR) and its increasing importance to practicing attorneys whether involved in litigation, transactions, drafting of legal documents, or advice and consultation. The most common forms of ADR (negotiation, arbitration and mediation) and more exotic forms of ADR such as mini-trials, early neutral evaluation and partnering.

Additional Professional Courses

408. Community Education Seminar (3)
Seminar/clinic—3 hours. Trains students to educate the community about basic legal rights and responsibilities. Students attend an initial four-hour orientation, followed by weekly seminars that will prepare students to teach in a local high school at least two times per week. Paper or journal required, to be determined by instructor. Limited enrollment. (S/U grading only.)

408A. Educational Policy and Law Seminar (2)
Seminar—2 hours. Examination of the interaction between policy and the law of various educational themes such as the "right" to an education, schooling and race, legalizing the curriculum, language and education, financial equalization, merit and testing, privatization of education, and educational access. Inquiry into the possibilities and limits of a model of social and economic regulation that can reduce or cement inequalities. Limited enrollment

409. Environmental Law Moot Court Competition (1)
During the first eight weeks of fall semester, students research and submit briefs as appellants, respondents, or third parties on a problem of environmental law that is prepared by the National Environmental

Law Moot Court Board. Students attend four to six classes (including guest lectures) on aspects of appellate advocacy, legal writing, and environmental law. Members of the spring environmental law moot court team will be selected on the basis of performance in class. (S/U grading only.)

410A. Moot Court (2)
Discussion/laboratory. Basic appellate practice and procedure. Beginning instruction in oral advocacy skills and an opportunity to practice these skills in front of a moot court. Students compete in two rounds of oral arguments which, combined with the second semester of the program, determine the rankings for selecting participants in the annual Neumiller Competition and other interschool competition teams. Both courses 410A and 410B must be taken in order to qualify for most interschool competitions. (S/U grading only.)

410B. Appellate Advocacy (Moot Court) (2)
Continuation of Course 410A. Focus on the development of effective appellate brief writing skills and the refinement of oral advocacy skills. Participants research and write two appellate briefs and argue the cases before a moot court. The first appellate brief and arguments will be judged for selection of interschool competition teams and participants in the annual Neumiller Competition. The second appellate brief, requiring independent individual research, is revised and edited under the supervision of the professor, and may satisfy the writing requirement. Limited enrollment. (S/U grading only.)

410C. Appellate Advocacy Seminar (2)
Seminar—2 hours. Appellate advocacy before state and federal courts, including writs and appeals in civil and criminal matters. The role, structure, and practices of appellate course. Students will participate in projects. Required papers will satisfy the Advanced Legal Writing Requirement.

411. Journal of International Law and Policy (1)
The Editor-in-Chief of the Journal receives one credit for each semester of service. Only one person may receive this credit in any one semester. (S/U grading only.)

411B. Journal of Juvenile Law and Policy (1)
The Editor-in-Chief of the Journal of Juvenile Law and Policy receives one credit for each semester of service. Only one person may receive this credit in any one semester. (S/U grading only.)

412. Carr Intraschool Trial Advocacy Competition (1)
Competition—1 hour. Named after the late Justice Frances Carr, this competition is open to second- and third-year students. A preliminary round is followed by quarter-finals, semi-finals, and a final round. Students participate in mock trials presided over by judges and critiqued by experienced litigators. Limited enrollment. (S/U grading only.)

413. Interschool Competition (1-3)
Prerequisite: consent of appropriate faculty adviser. Participation in interschool moot court and lawyering skills competitions. Enrollment is limited to students actually representing the School in the interschool competitions. Competition must be authorized by the appropriate faculty adviser. The faculty adviser may condition the award of academic credit for any particular competition on the performance of such additional work as may be reasonable to justify the credit. May satisfy advanced legal writing requirement. (S/U grading only.)

414. Moot Court Board (1)
Prerequisite: courses 410A-410B. Members of Moot Court Board may receive one credit for each semester of service on the board, up to maximum of two. Credit awarded only after certification by Moot Court Board and approval of the faculty advisers to Moot Court Board. Limited enrollment. (S/U grading only.)

415. Trial Practice Honors Board (1)
Members of the Trial Practice Honors Board administer the Frances Carr competition. Members are nominated by their individual Trial Practice I adjuncts. Students receive one credit for serving on the Board, awarded upon approval of the faculty adviser. (S/U grading only.)

416. Law Review Writer (1-2)

Writing of an editorship quality law review article under the editorial supervision of editors of the *Law Review*. Minimum of 40 hours contribution to the *Review's* publication is also required. Credit may be obtained only upon achieving status as a member of the *Law Review*, which requires that the student have made substantial progress toward completing an editorship article. Credit is awarded only after certification by the Editor-in-Chief of the *Law Review* and approval of the faculty advisers to the *Law Review*. One unit of credit is earned the first semester. Two units are earned the second semester upon completing an editorship draft. One unit is earned second semester if only a membership draft is completed. (S/U grading only.)

417. Law Review Editor (1-2)

Editors must have completed an editorship article and must perform editorial duties requiring a substantial time commitment. Credit awarded only after certification by the Editor-in-Chief of the *Law Review* and approval of the faculty advisers to the *Law Review*. Students may receive four credits over two semesters for service as an editor. [In exceptional cases, students may petition to participate for one semester only and receive two credits.] (S/U grading only. Deferred grading pending only, pending completion of sequence.)

418. Environs Editor (1)

The Editor-in-Chief of *Environs* receives one credit for each semester of service. Only one person may receive this credit in any one semester. (S/U grading only.)

419. Advanced Writing Project (1-4)

Completion of a writing project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. Writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten, double-spaced pages, excluding footnotes. Project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). Advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirement. Number of units for the writing project shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (Grading may be on S/U or letter-grade basis at the faculty supervisor's discretion.)

420. Civil Rights Clinical Program (2-6)

Clinical program. Prerequisite: prior or concurrent enrollment in course 267 and 219. Provides practical experience in providing legal services to indigent clients who have filed civil rights actions in the United States District Court for the Eastern District of California. Students will work on clinic cases under the supervision of the clinic director and supervising attorney. Limited enrollment. (S/U grading only.)

425. Judicial Clinical (2 to 6 or 12)

Clinical program. Prerequisite: course 261 required for full-time clinical students and recommended for part-time clinical students. Students may arrange judicial clerkship clinical programs with an approved list of state and federal judges through the Clinical Office and under the sponsorship of the faculty member in charge. All students must complete weekly time records and bi-weekly journals. Full-time clinical students must complete an evaluative final paper of approximately 10 pages. (S/U grading only.)

430. Clinical Program in Federal Taxation (2-6)

Clinical program. Prerequisite: course 220. Students will have the opportunity to work with the Internal Revenue Service or other governmental tax agency. Journals and attendance at group meetings are required. (S/U grading only.)

435. Family Protection Clinic (4)

Clinical activity. Prerequisite: course 219 (may be taken concurrently); evidence to qualify for state court certification. Students represent low income

persons in family law and related matters arising out of situations involving family violence. Students supervised by the staff attorney at the clinic's office located in Woodland at the Sexual Assault and Domestic Violence Center of Yolo County. Limited enrollment. Students must enroll for two semesters. (S/U grading only.)

440. Immigration Law Clinical (2 to 6 or 12)

Clinical program. Students may represent clients in administrative law hearings in San Francisco. Minimum units for the course are 4 and maximum is 12. Each unit assumes four hours work per week, including participation in the seminar, conference, and case research and development. Students who have completed course 292 may take the clinic for a minimum of 2 units. Limited enrollment. (S/U grading only.)

445. Legislative Process Externship (2-5)

Clinical activity. Prerequisite: course 240 (may be taken concurrently) or consent of instructor. Practical experience in the operation of the office of a legislator or a legislative committee. The major thrust of the program is to enable students to become familiar with the give and take realities of making laws, as contracted with their interpretation and enforcement. Journals are required. (S/U grading only.)

450. Environmental Law Externship (2-4)

Clinical activity. Prerequisite: course 285 or consent of instructor. Practical experience in environmental law. Students will work in an approved government, non-profit or private law office engaged in some form of environmental law work for a minimum of 8 hours per week. Students must prepare a journal describing and reflecting upon their clinical experience, and meet periodically with the instructor. (S/U grading only.)

455. Employment Relations (2 to 6)

Clinical program. Prerequisite: prior or concurrent enrollment in course 251 or 260. Practical experience in employment relations: private and public sector labor law, or employment discrimination. Students work under the direct supervision of a government or private lawyer and have the opportunity to participate in a range of activities associated with their specific office, with emphasis on observation and participation in actual investigation, interviewing, drafting of pleadings, and attendance at hearings. Journals and attendance at one or more small group meetings are required. Clinical students must complete an evaluative final paper of approximately 8 pages. (S/U grading only.)

460. Public Interest Law Clinical (2-6)

Clinical program. Prerequisite: prior or concurrent enrollment in course 293 recommended. Students work with a public interest practitioner in a nonprofit organization. Journals and attendance at two group meetings are required. Clinical students must complete an evaluative final paper of approximately 8 pages. Hours completed in public interest setting may be applied toward the practicum requirement for the Public Interest Law Program. (S/U grading only.)

465. Clinical Program in Administrative Law (2-6)

Clinical program. Prerequisite: course 235 (may be taken concurrently) or consent of instructor. For students interested in a work experience in an administrative law setting. Students will work under the direct supervision of an administrative law judge, hearing officer, or government attorney. Placement assistance will be provided by the instructor. A goal of this clinical will be a breadth of experience in the areas of formal adjudication, informal adjudication, rule-making, and judicial review. Students will be required to meet monthly as a group to share experiences and maintain observational journals. (S/U grading only.)

470. Administration of Criminal Justice Externship (2-6 or 12)

Clinical activity—2-12 hours. Prerequisite: course 206, courses 219 and 227 (may be taken concurrently); course 236A recommended. Students wishing to practice must qualify for certification by the

relevant state or federal jurisdiction. Opportunity to gain practical experience working full- or part-time in a District Attorney's or Public Defender's office in one of several surrounding counties or in a Federal Public Defender or U.S. Attorney's office. Activities associated with their specific office with emphasis on observation and participation in factual investigation, interviewing, counseling, negotiating, motion practice, and trials under State Bar rules. Limited enrollment. (S/U grading only.)

480. Clinical Program in Prison Law (2-6)

Clinical program. Provides practical experience in providing legal services to real clients who have various problems related to their incarceration in state prison. The services require analysis and application of Constitutional Law, state statutory law, agency regulations, and the rules of professional responsibility. Students will work under the direct supervision of the Prison Law clinical director and will be assigned a portion of the director's case load. Students will be required to follow the law office procedure of the clinic and employ skills such as interviewing, research, writing, negotiating, and possibly, the preparation of legal documents to be filed in court. (S/U grading only.)

495. Instruction in Legal Research and Legal Writing Skills (1-2)

Participants will assist in instructing legal research and writing for first-year students under the direction of the legal research and writing instructors. Approval of the research and writing instructors is required for enrollment. Participants may assist once in the legal research program and once in the legal writing program. One unit will be given in the fall semester for legal research instruction and two units in the spring for legal writing instruction. (S/U grading only.)

498. Group Study (1-4)

Groups of students (not fewer than 4 or more than 10) with common interest in studying a stated legal problem may plan and conduct their own research and seminar program, subject to the following regulations: (1) the program may extend over no more than two semesters; (2) the plan for the program and the list of members of the group must be submitted to Dean's Office at least 4 weeks prior to opening of the semester in which the program is to begin; (3) a three-member faculty board will be appointed for each group proposed and will have authority to approve or disapprove the program and the amount of credit sought; (4) changes in the program or in membership of the group must be approved by the faculty board and normally will be approved only prior to the semester involved; (5) group members must conduct a weekly seminar session to be arranged by them; (6) each member of the group must submit an individual paper or an approved alternative growing out of the seminar subject to the faculty board; (7) S/U grading only unless the entire group requests letter grades in advance.

499. Research in Legal Problems (1-4)

Students may receive credit for individual research projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member in advance of the semester in which it is to be undertaken; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; (5) each student must submit an individual paper or approved alternative to the supervising faculty member. (S/U grading only.) In exceptional cases, with prior approval of a professor and an associate dean, students may arrange for directed research in foreign and/or international legal problems by working abroad under the supervision of a UC Davis Law School faculty member and an attorney or faculty member at a foreign or international government agency or educational institution (4 up to 12 units). S/U grading only unless letter grading requested in advance.

The Major Program

Linguistics is the systematic study of human language. It focuses on theories of language structure, variation, and use, description of contemporary languages, and the examination of language change through time. Because of the pervasive influence of language in our everyday lives, work in linguistics interacts in important ways with studies carried out in many other fields, including psychology, anthropology, neuroscience, philosophy, computer science, sociology, literature, language teaching, communication and education.

The Program. An introductory lower division course provides students with basic concepts and some of the methods needed to analyze language in a systematic way. Upper division courses probe more deeply into specific aspects of language structure, language use, and the relationship of language to other realms of human activity.

Career Alternatives. Majors in linguistics find practical outlets for their linguistic training: for example, in the computer science industry; in teaching English as a second language; in foreign language teaching; in elementary and secondary level bilingual-bicultural programs; in missionary work; in bilingual-bicultural curriculum development (for example, in publishing houses); in legal work; in speech therapy; or as lexicographers (for dictionaries). All these types of employment share an interest in persons skilled in the analysis of language, spoken and/or written—linguistics equips its students with just such skills.

A.B. Major Requirements:

UNITS

Preparatory Subject Matter4-24

Linguistics 14
 Foreign language, one course beyond the 15-unit requirement of the College of Letters and Science in the same language used to fulfill the college requirement0-20

Depth Subject Matter44

Linguistics 103A, 103B, 111, 112, 121, 131, 141, 151, 15236

At least eight upper division units from the following courses8
 Any other Linguistics course not included in the 36-unit requirement above, African American and African Studies 156, Anthropology 112, 113, 117, 119, 120, Communication 105, Education 151, English 105B, French 160, 161, German 105, 106, 107, 108, Human Development 101, Native American Studies 107, Philosophy 137, Psychology 132, Russian 160, Spanish 111N, 112N, 113, 114N.

The student should note that a number of these courses have prerequisites. Since it is usual to select some emphasis within the Linguistics major (e.g., anthropology, a foreign language, etc.) such prerequisites should be completed as a matter of course.

Total Units for the Major48-68

Major Adviser. P. Farrell.

Minor Program Requirements:

The minor in Linguistics provides the student with a basic knowledge of linguistic analysis. It is appropriate for students interested in any aspect of language use.

UNITS

Linguistics24

Linguistics 1, 103A, 103B12
 One course from Linguistics 111, 112, 121, 131, 141, 151, 1524
 Additional units of upper division Linguistics courses, chosen in consultation with an adviser8

Minor Adviser. Same as Major adviser.

Grading Recommendation. Though not required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.

Honors and Honors Program. The honors program consists of six units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major adviser. For general information regarding graduation with honors and Dean's Honors Lists, please refer to the Academic Information section of this catalog.

Graduate Study. The Linguistics Graduate Group offers study and research leading to the M.A. degree. Detailed information may be obtained from the Graduate Adviser or from the Chairperson of the Linguistics Group.

Graduate Adviser. A.E. Ojeda.

Courses in Linguistics (LIN)

Lower Division Courses

1. Introduction to Linguistics (4)

Lecture—3 hours; discussion—1 hour. Introduction to the study of language; its nature, diversity, and structure. GE credit: ArtHum or SocSci, Wrt.—I, II, III. (I, II, III.)

4. Linguistics for Students of Literature (4)

Lecture—3 hours; term paper. Prerequisite: course 1 recommended. Introduction to basic linguistic concepts and models needed for the interpretation of literary texts. Topics include meaning in texts, lexical meaning, linguistic variation in texts, sound systems and poetry.—(III.) Manoliu

20. Oral English for Undergraduate ESL Students (3)

Lecture/discussion—3 hours. Prerequisite: consent of instructor; limited primarily to students who have fulfilled their Subject A requirement or have completed course 23. Intensive practice in oral English for undergraduate ESL students. Students will learn to identify and modify features of their pronunciation which limit their ability to communicate clearly. Stu-

dents will also learn and practice strategies for effective participation in academic tasks. May be repeated once for credit with consent of coordinator. (P/NP grading only.)—III. (III.)

21. Introduction to Reading and Composition for Non-Native Speakers (5)

Lecture/discussion—5 hours. Prerequisite: admission by placement examination only. Provides undergraduate students whose native language is not English with intensive work in reading and in writing organized, coherent, and grammatically correct paragraphs and short academic essays. (P/NP grading only.)—I. (I.)

22. Intermediate Reading and Writing for Non-Native Speakers (4)

Lecture/discussion—4 hours. Prerequisite: admission by placement examination, by successful completion of course 21, or by consent of instructor. Provides undergraduate students whose native language is not English with experience in writing essays in recognized rhetorical modes. Students will also read to develop fluency and critical thinking and will study grammar needed for academic writing. (P/NP grading only.)—I, II, III. (I, II, III.)

23. Advanced Reading and Composition for Non-Native Speakers (4)

Lecture/discussion—4 hours. Prerequisite: admission by placement examination, by successful completion of course 22, or by consent of instructor. Provides undergraduate students whose native language is not English with experience writing persuasive essays related to reading passages. Students will also read for tone, style, context, and assumptions and will study advanced grammar needed for persuasive essays. (P/NP grading only.)—I, II, III. (I, II, III.)

25. English for International/ESL Graduate Studies (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: open to international and ESL graduate students and limited status international undergraduates. Required if held for course by the English Entrance Exam for International Students. Improvement of English skills needed for study at the graduate level: writing clearly under time pressure, writing short papers and reports, summarizing accurately, giving effective oral presentations, increasing listening comprehension, and systematically expanding vocabulary. May be repeated for credit with consent of coordinator. (P/NP grading only.)—I. (I.)

26. Writing for International Graduate Students (3)

Lecture—3 hours. Prerequisite: satisfactory completion of course 25 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.)—II. (II.)

27. Academic Writing for ESL Students (4)

Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. Writing skills necessary for upper division courses, including skills crucial to writing lab and project reports, summaries, critiques, abstracts, and responses to exam questions. Includes practice with the syntax, grammar, and vocabulary characteristic of academic writing. (P/NP grading only.)—II, III.

28. Reading in Scientific and Technical Subjects for ESL Students (4)

Lecture/discussion—4 hours. Instruction and practice in reading scientific and technical texts. Techniques for comprehending and analyzing grammatical and organizational patterns. Notetaking skills, summarizing, vocabulary enrichment. (P/NP grading only.)—I. (I.)

50. Languages of the World (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 1 or Anthropology 4 recommended. Survey of the world's languages, their classification, distribution, and interrelationships;

structural similarities and differences; accounts of the origin of human language; sign languages, pidgin/creoles, "universal" languages, endangered languages, and languages of global significance. GE credit: ArtHum or SocSci, Wrt.—III. (III.) Benware

96. Directed Group Study in English as a Second Language (1-5)

Variable—1-5. Prerequisite: consent of instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.)—I, II, III. (I, II, III.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Intended for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. Intended for lower division students. (P/NP grading only.)

Upper Division Courses

103A. Linguistic Analysis I: Phonetics, Phonology, Morphology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 139.—I. (I.) Benware

103B. Linguistic Analysis II: Morphology, Syntax, Semantics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 140.—I. (I.) Farrell

105. Topics in Language and Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: course 1 and consent of instructor. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. Offered in alternate years.—(III.) Timm

106. English Grammar (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: English 1 or 3 or course 1 or consent of instructor. Survey of present day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers, their development, and their usefulness in describing the conventions of English. (Same course as English 106.) Not open for credit to students who have completed course 104. GE credit: ArtHum.—III.

111. Introduction to Phonological Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Introduction to contemporary phonological theory, with emphasis on autosegmental, metrical, and lexical theory.—I. (I.) Orgun

112. Phonetics (4)

Lecture—3 hours; term paper. Prerequisite: courses 103A, 103B. Detailed examination of articulatory and acoustic phonetics. Not open for credit to students who have completed course 109.—II. (II.) Orgun

121. Morphology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components.—III. (III.) Orgun, Aranovich

131. Introduction to Syntactic Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argu-

mentation, and problems of theory building in syntax.—III. (III.) Farrell, Aranovich

141. Semantics (4)

Lecture—3 hours; term paper. Prerequisite: courses 103A, 103B. Introduction to the linguistic study of the meanings of words and phrases. Survey of the meanings expressed by lexical items and derivational and inflectional morphology, as well as the contribution of argument structure, quantification, and coordination to meaning. GE credit: Wrt.—I. (I.) Ojeda

151. Historical Linguistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change.—II. (II.) Benware

152. Language Universals and Typology (4)

Lecture—3 hours; term paper. Prerequisite: courses 103A, 103B. Investigation into common features of all human languages and the classification of languages in terms of their structural features; theories of universal grammar; detailed discussion of non-Indo-European languages and comparison with English.—II. (II.) Farrell

160. American Voices (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4 or upper division standing recommended. Explores the forms of American English; traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation. The influence of language attitudes on perception of dialect speakers; dialect in media, education, and literature. GE credit: SocSci, Div, Wrt.—I, II. (I, II.)

163. Language, Gender, and Society (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4. Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed. GE credit: SocSci, Div, Wrt.—II. (II.) Timm

165. Introduction to Applied Linguistics (4)

Lecture—3 hours; discussion—1 hour. Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media.—II. Ramanathan

166. The Spanish Language in the United States (4)

Lecture—3 hours; term paper. Prerequisite: course 1 or Spanish 111N; and Spanish 23 or the equivalent. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: Div, Wrt.

171. Introduction to Psycholinguistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; courses 103A, 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. Offered in alternate years. GE credit: SocSci.

173. Language Development (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor; courses 103A, 103B recommended. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. GE credit: SocSci.

175. Biological Basis of Language (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Overview of issues

in the field of neurolinguistics and techniques used to explore representation of language in the human brain. GE credit: SciEng.—III. (III.) Dronkers

192. Internship in Linguistics (1-12)

Internship—3-36 hours; two written reports. Prerequisite: course 1 or the equivalent. Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of 4 units applicable toward major. (P/NP grading only.)

194H. Special Study for Honors Students (1-5)

Independent study—1-5 hours. Prerequisite: open only to linguistics majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis. May be repeated for credit for up to 6 units. (P/NP grading only.)

197T. Tutoring in Linguistics (1-4)

Discussion—1-4 hours. Prerequisite: upper division standing, consent of instructor, and consent of department chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

203A. Modern Linguistic Theory: Structuralism (4)

Lecture—3 hours; term paper. Prerequisite: courses 103A, 103B. History of thought in grammatical theory from de Saussure to 1950 with emphasis on critical examination of major theoretical problems in the field. Offered alternate years.—(II.) Manoliu

203B. Modern Linguistic Theory: Generative Grammar (4)

Lecture—3 hours; term paper. Prerequisite: courses 111, 131. History of thought in grammatical theory from 1950 to the present with emphasis on critical examination of major theoretical problems in the field. Offered in alternate years.—(I.) Farrell

205A-205B-205C-205D. Topics in Linguistic Theory and Methods (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs.—I, II. (I, II.) Manoliu, Ramanathan

211. Advanced Phonological Theory and Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 111. Critical examination of current phonological theories. Offered in alternate years.—(III.) Orgun

212. Advanced Phonetics (4)

Lecture—3 hours; term paper. Prerequisite: course 112. Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. Offered in alternate years.—I. Orgun

231. Advanced Syntactic Theory and Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 131. Critical survey of contemporary theories of syntax. Offered in alternate years.—III. Farrell, Aranovich

241. Advanced Semantic Theory and Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 141 or consent of instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Offered in alternate years.—II. Ojeda

251. Principles of Historical Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: course 151. Advanced analysis of the theory and methods of historical linguistics. Offered in alternate years.—II. Benware

252. Romance Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: course 151. Examination of the development of the

Romance languages from Proto-Romance to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. Offered in alternate years.—III. Manoliu

280. Theories of Second Language Acquisition (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning.—I. (I.) Ramanathan

281. Research Methods in TESOL/SLD (4)

Lecture—3 hours; term paper. Prerequisite: course 280. Research methods in second language research; evaluation of research designs and methods of analyses, formulation of research questions and hypotheses and design of study with thought to various kinds of data.—II. (II.) Ramanathan

282. Individual and Social Aspects of Bilingualism (4)

Lecture—3 hours; term paper. Broad overview of bi- and multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states.—III. (III.) Timm

289. Pedagogical Applications of Second Language Acquisition Theory (4)

Seminar—3 hours; term paper. Prerequisite: course 280. Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning.—III. (III.) Schleppegrell

297T. English as a Second Language Teaching/Tutoring (1-4)

Tutoring—1-4 hours. Prerequisite: course 300, 301, or 302 (may be taken concurrently). Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. (S/U grading only.)

298. Directed Group Study (1-5)

Prerequisite: graduate standing. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Courses

300. The Teaching of English as a Foreign Language (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: English 105A or course 109 or consent of instructor. Methods of teaching English to nonnative speakers, stressing particularly recent linguistic methodology and techniques.—I. (I.) Schleppegrell

301. Materials of TESOL (4)

Lecture—4 hours. Prerequisite: course 300 or consent of instructor. Designing and evaluating ESL curricula and proficiency assessment instruments in all areas of language acquisition (pronunciation, reading, listening comprehension, etc.). Developing lessons, teaching and tutoring in selected language acquisition areas in the UCD ESL clinic. Evaluating (and adapting) published ESL materials.—II. (II.)

302. Recent Research and Special Projects in TESOL (4)

Lecture—4 hours. Prerequisite: courses 300 and 301. Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UCD ESL clinic. Each student also designs and reports on a classroom research project.—III. (III.)

391. Oral English for ESL Students (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses

or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. (S/U grading only.)—II, III. (II, III.)

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Janet Lane, M.A., Lecturer
Ellen Lange, M.A., Lecturer
Mary Lowry, M.A., Lecturer
John Samsel, M.A., Lecturer
Kathleen Ward, Ph.D., Lecturer

Graduate Study. The Graduate Group in Linguistics offers a program of study leading to the M.A. degree. There are two tracks within the program, one concentrating on applied linguistics and TESOL, and the other on general linguistics. Within the general linguistics track, the following areas are emphasized: (a) grammatical analysis and theory in syntax, morphology, semantics, and phonology, (b) sociolinguistics, (c) psycholinguistics and neurolinguistics, and (d) linguistic description (contemporary or historical) of a particular language or group of languages.

In general, the M.A. in Linguistics at UC Davis serves

as preparation for advanced graduate work at the Ph.D. level, as a supplement to studies in related fields—especially anthropology, psychology, philosophy, the various languages—or as a major component in the training for a professional career (such as TESOL, speech therapy, and foreign language teaching). The program places considerable emphasis on interdisciplinary studies, thereby increasing the breadth of the candidate's knowledge, and providing a wider and more flexible variety of options to pursue thereafter.

Preparation. Applicants to the M.A. program who do not have a bachelor's degree in Linguistics must complete certain courses in Linguistics from the undergraduate program. Applicants to the *Applied Track* must complete 103A and 103B (introduction to linguistic analysis I and II), 141 (semantics), and 151 (historical linguistics). Applicants to the *General Track* must complete all of the above four courses, plus 111 (introduction to phonological theory), 112 (phonetics), and 131 (introduction to syntactic theory).

Requirements. The requirements for the two tracks differ. The track in general linguistics falls under the Plan I set of requirements. 38 units of upper division and graduate course work above and beyond the prerequisite courses listed under Preparation (above) must be completed, and a thesis is required. The track in applied linguistics and TESOL operates under either Plan I or Plan II. The Plan I requirements are the same as those listed above. Under Plan II, 42 units of upper division and graduate course work above and beyond the prerequisite courses are required, and at the end of the course work a student must pass a written comprehensive examination. Students in both tracks must pass a foreign language reading examination.

Graduate Adviser. A.E. Ojeda (*Linguistics*).

Literature in Translation

The following courses are open to students throughout the campus. The readings can be in English. Refer to departmental listing for the course description.

Chinese

10. Modern Chinese Literature (in English)
11. Great Books of China (in English)
50. Introduction to the Literature of China and Japan (in English)
104. Twentieth-Century Chinese Fiction (in English)
105. Western Influences on Twentieth-Century Chinese Literature (in English)
106. Chinese Poetry (in English)
107. Traditional Chinese Fiction (in English)
108. Poetry of China and Japan (in English)
- 109A-I. Topics in Chinese Literature (in English)
110. Great Writers of China: Texts and Context (in English)

Classics

140. Homer and Ancient Epic
141. Greek and Roman Comedy
142. Greek and Roman Novel
143. Greek Tragedy

Comparative Literature

1. Great Books of Western Culture: The Ancient World
2. Great Books of Western Culture: From the Middle Ages to the Enlightenment
3. Great Books of Western Culture: The Modern Crisis
4. Major Books of the Contemporary World
5. Fairy Tales, Fables and Parables
6. Myths and Legends
7. Literature of Fantasy and the Supernatural
8. Utopias and their Transformations
9. The Short Story and Novella

- 10A-N. Master Authors of World Literature
 12. Introduction to Women Writers
 13. Dramatic Literature
 14. Introduction to Poetry
 20. Man and the Natural World
 25. Ethnic Minority Writers in World Literature
 53A. Literature of China and Japan
 53B. Literature of India and Southeast Asia
 120. Writing Nature: 1750 to the Present
 135. Women Writers
 138. Gender and Interpretation
 139. Shakespeare and the Classical World
 140. Thematic and Structural Study of Literature
 141. Literary Theory and Criticism
 142. Critical Reading and Analysis
 144. The Grotesque
 145. Representations of the City
 146. Myth in Literature
 147. Modern Jewish Writers
 151. Colonial and Postcolonial Experience in Literature
 152. Literature of the Americas
 153. The Forms of Asian Literature
 154. African Literature
 157. War and Peace in Literature
 158. The Detective Story as Literature
 159A-G. Special Topics in Comparative Literature
 160A. The Modern Novel
 160B. The Modern Drama
 161A. Tragedy
 161B. Comedy
 163. Biography and Autobiography
 164A. The Middle Ages
 164B. The Renaissance
 164C. Baroque and Neoclassicism
 164D. The Enlightenment
 166A. The Epic
 166B. The Novel
 167. Comparative Study of Major Authors
 168A. Romanticism
 168B. Realism and Naturalism
 169. The Avant-Garde
 170. The Contemporary Novel
 180. Selected Topics in Comparative Literature
 194H. Special Study for Honors Students
 195. Senior Seminar

Dramatic Art

20. Introduction to Dramatic Art
 156A. History of Theatre and Dance: Ancient to 1650
 156B. History of Theatre and Dance: 1650-1900
 156C. History of Theatre and Dance: The Twentieth Century
 159. Contemporary Experimental Theatre and Drama

French

50. French Film
 51. Major Works of French
 52. France and the French-Speaking World

German

47. Erasmus and Christian Humanism
 48. Myth and Saga in the Germanic Cultures
 49. Freshman Colloquium
 111. Major Writers in Translation
 112. Topics in German Literature
 113. Goethe's *Faust*
 115. German Literature since 1945
 117. The Nibelungen Tradition: Medieval, Musical, and Modern
 118A. Fin-de-siècle Vienna (The Swan Song of the Habsburg Empire)
 118B. Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism
 118C. Germany under the Third Reich
 118D. Germany between 1949 and 1989: Division and Restoration
 118E. Contemporary German Culture
 118F. The German War Experience in Literature, Art, Film, and Music
 119. From German Fiction to German Film
 130. Modernity and its Discontents: The Tradition of German Cultural Critique

140. German Political Literature from the Middle Ages to the Present
 141. The Holocaust and its Literary Representation
 142. New German Cinema: From Oberhausen to the Present
 145. The Literature of Deviance: Mann, Hesse, Kafka

Italian

- 139B. Boccaccio, Petrarch and the Renaissance
 140. Italian Literature in English Translation: Dante, *Divine Comedy*

Japanese

10. Masterworks of Japanese Literature (in English)
 15. Introduction to Traditional Japanese Culture
 50. Introduction to the Literature of China and Japan
 101. Japanese Literature in Translation: The Early Period
 102. Japanese Literature in Translation: The Middle Period
 103. Japanese Literature in Translation: The Modern Period
 104. Modern Japanese Literature: War and Revolution
 105. Modern Japanese Literature: Hero and Anti-Hero
 106. Japanese Culture through Films
 107. Modern Japanese Autobiographics (in English)
 108. Poetry of China and Japan

Native American Studies

- 181A. Native American Literature (the novel and fiction)
 181B. Native American Literature (non-fiction works by Native authors)
 181C. Native American Literature (traditional and contemporary poetry)
 184. Contemporary Indigenous Literature of Mexico
 188. Special Topics in Native American Literary Studies

Russian

41. Survey of Nineteenth-Century Russian Literature
 42. Survey of Twentieth-Century Russian Literature
 44. Children's Literature in Russia
 121. Nineteenth-Century Russian Prose
 123. Twentieth-Century Russian Prose
 126. The Russian Theater

Courses in Management (MGT, MGP)

Lower Division Courses

11A. Elementary Accounting (4)

Lecture—3 hours; discussion—1 hour. Basic concepts of accounting; interpreting and using financial statements; understanding accounting principles.—I, II. (I, II.)

11B. Elementary Accounting (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A. Product costing; using accounting information for decision making; planning and performance evaluation.—III. (III.)

Upper Division Courses

100. Introduction to Financial Accounting (3)

Lecture—3 hours. Course is open to all upper division undergraduate and graduate students, except those in the Graduate School of Management. Introduction to the concepts, methods, and uses of accounting and financial reporting. Preparation of financial statements, including balance sheet and statements of income and cash flow, as well as their analysis by investors and managers.

120. Managing and Using Information Technology (4)

Lecture—4 hours. Prerequisite: courses in economics, accounting, mathematics and statistics for the technology management minor. Introduction to computer hardware, systems software and information systems. Emphasizes the management of information technology and the impact of information systems on modern management.

140. Marketing for the Technology Based Enterprise (4)

Lecture/discussion—4 hours. Prerequisite: courses in economics, accounting, mathematics, and statistics for the technology management minor. Addresses the marketing process in technology-based companies. Emphasizes understanding how cross-functional teams including scientists, engineers, and business people jointly develop, launch, and support products and service for consumers and other businesses.

150. Technology Management (4)

Lecture/discussion—4 hours. Prerequisite: courses in economics, accounting, mathematics, and statistics for the technology management minor. Introduction to the management of firms in high technology industries such as software development and biotechnology research. Uses cases, readings and exercises to understand the issues involved in motivating and managing knowledge workers, organizing for innovation, and decision making in a fast-paced business environment.

160. Financing New Business Ventures (4)

Lecture—4 hours. Prerequisite: courses in economics, accounting, mathematics, and statistics for the technology management minor. Concepts and methods used to evaluate, structure and finance new business ventures. Topics include the evaluation of new investment projects, raising venture capital, the role of the venture capitalist and the choice of organizational structure in new ventures.

170. Managing Costs and Quality (4)

Lecture—4 hours. Prerequisite: courses in economics, accounting, mathematics, and statistics for the technology management minor. Deals with designing cost systems in high technology organizations, and managing operations to maximize quality and minimize costs. Topics include activity based costing and management, managing quality and time to create value, ethical issues in cost assignment, and differential costing for decision making.

180. Supply Chain Planning and Management (4)

Lecture—4 hours. Prerequisite: courses in economics, accounting, mathematics, and statistics for the technology management minor. Quantitative techniques for analysis and management of modern supply chains for the production and delivery of goods and services.

Graduate Courses

(Core Courses)

200A. Financial Accounting (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.—I. (I.) Rangan

200B. Managerial Accounting (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations.—II. (II.) Maher

201A. The Individual and Group Dynamics (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.—I. (I.) Palmer

201B. Organizational Structure and Strategy (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Analysis of structural properties of organization including differentiation and vertical and horizontal integration. Alternative structural arrangements including functional, divisionalized, matrix, and hybrid structures. Relationship between environment, structure, and strategic objectives. Organization life cycle and changes.—II. (II.) Biggart, Swaminathan

202A. Markets and the Firm (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.—I. (I.)

202B. Business, Government, and the International Economy (3)

Lecture—3 hours. Prerequisite: course 202A. Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance.—II. (II.) Clark

203A. Data Analysis for Managers (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.—I. (I.) Tsai

203B. Forecasting and Managerial Research Methods (3)

Lecture—3 hours. Prerequisite: course 203A. Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy.—II. (II.) Tsai

204. Marketing Management (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.—III. (III.) Hagerty

205. Financial Theory and Policy (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.—III. (III.) Barber

206. Decision Making and Management Science (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment.—II. (II.) Topkis

207. Management Information Systems (3)

Lecture—3 hours. Prerequisite: graduate student or consent of instructor. Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security.—II. (II.) Woodruff

(Elective Courses)

Students must complete the Management core course requirement before enrolling in any of the following courses, or petition with consent of the instructor.

215. Business Law (3)

Lecture—3 hours. Prerequisite: completion of Administration core requirements or petition with consent of instructor. Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

216. Managing Professionals, Budgets, Controls and Ethics (3)

Lecture—3 hours. Prerequisite: graduate standing. Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants.—I. (I.) Suran

223. Power and Influence in Management (3)

Seminar—3 hours. Prerequisite: consent of instructor. Investigation of the bases of power in organizations

and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics. Palmer

224. Human Resources Management (3)

Lecture—3 hours. Problems of recruiting, training, motivating, compensating, and separating workers in contemporary organizations. Topics include design of incentive systems, career management, professionalization, alienation, worker burnout, organizational deviance, and current issues such as affirmative action and the unionization of public employees.

240. Management Policy and Strategy (3)

Lecture—3 hours. Prerequisite: first-year core courses of M.B.A. program. Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real "client" organizations, in the private and public sectors, are assigned to student teams as the subjects of study.—I. (I.) Suran, Hagerty

241. New Product Development (3)

Lecture/discussion—3 hours. Prerequisite: course 249 or consent of instructor. Open to students in the Graduate School of Management. State of the art concepts and methods to enhance the effectiveness of new product development activities. Focus on the understanding of managerial issues and acquiring the ability to solve problems.—III. Naik

242. Marketing Communications (3)

Lecture—3 hours. Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions.—Naik

244. New and Small Business Ventures (3)

Lecture—3 hours. Emphasizes starting a new business venture or managing a small, ongoing business during its formative stages. The business plan. Legal forms, financial considerations, the management team. The entrepreneur. Students develop a detailed business plan.—Dorf

246. Negotiation and Team Building (3)

Lecture—3 hours. Prerequisite: courses 202, 205. Teaches basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier.—III. (III.) Elsbach

247. Customer Service as a Marketing Tool (3)

Lecture—3 hours. Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement.—I. (I.) Gerstner

248. Marketing Strategies (3)

Lecture—3 hours. Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing. Gerstner

249. Marketing Research (3)

Lecture—3 hours. Course addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications.—Hagerty

250. Technology Management (3)

Lecture—3 hours. Management of the engineering and technology activity. Functions of design, planning, production, marketing, sales, and maintenance. Technological product life cycle. Research and development activity. Project planning and organization. Manufacturing issues. Case studies.

251. Management of Innovation (3)

Lecture—3 hours. Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.—Biggert

252. Production and Operations Management (3)

Lecture—3 hours. Explores methods of increasing operational efficiency in production and service organizations through planning and scheduling, materials management, inventory control, quality control, and distribution. Methodologies employed include such techniques as programming, simulation, systems analysis, queueing, and network models.—Woodruff

260. Financial Management (3)

Lecture—3 hours. Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure.—Castanais

261. Investment Analysis (3)

Lecture—3 hours. Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance.—Odean

262. Money and Security Markets (3)

Lecture—3 hours. Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets.

263. Options and Futures Markets (3)

Lecture—3 hours. Studies the behavior of options, futures, and other derivatives securities markets; how public agencies, businesses, others use those markets. Studies nature of various strategies involving options, swaps, and financial futures contracts. Price determination in options and futures markets is also examined.—Clark

264. Business Taxation (3)

Lecture—3 hours. Analysis of the impact of business taxation on investment, production, and finance decisions. Discussion of the relationship between business organization and tax liability. Course is not intended for tax specialists.—Griffin

266. International Finance (3)

Lecture—3 hours. Prerequisite: course 207 or the equivalent. Open economy macroeconomics, balance of payments theory, and financial decision making in multinational firms.—Castanais

268. Management Communications (3)

Lecture—3 hours. The theories, strategies, and skills necessary for effective communication in management. Students will learn to improve their business writing, and will deliver business presentations orally.—Kennedy

270. Corporate Financial Reporting (3)

Lecture—3 hours. Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers.—Griffin

271. Incentives and Controls (3)

Lecture/discussion—3 hours. Prerequisite: course 200B. Concepts and techniques of accounting and budgeting for management decision making in the private sector. Topics include strategy, organizational structure, market-based incentives, performance evaluation and ethical issues.—I. Maher

272. Evaluation of Financial Information (3)

Lecture—3 hours. Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a

variety of contexts. Where applicable, recent research in finance and economics is discussed.—Griffin

273. Accounting and Reporting for Government Nonprofit Entities (3)

Lecture—3 hours. Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies.

274. Auditing, Internal Control, and Public Accounting (3)

Lecture—3 hours. Concentrates on role of the independent public accountant as auditor and consultant, from the perspective of an enterprise manager. Auditing standards, auditing procedures, and auditing control techniques are discussed. Emphasis is also given to current issues confronting the accounting profession.

276. Real Estate, Finance and Development (3)

Lecture—3 hours. Prerequisite: course 201A and 207. Focus on single family, attached, detached, multi-family, and light commercial development. Students will study factors which make up successful real estate developments. Course will consider financial aspects involved in land acquisition, land development, construction, and project lending.

281. Systems Analysis and Design (3)

Lecture—3 hours. Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation.

284. Applied Linear Models for Management (3)

Lecture—3 hours. Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems.—Tsai

285. Time Series Analysis and Forecasting (3)

Lecture—3 hours. Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control.—Tsai

286. Telecommunications and Computer Networks (3)

Lecture—3 hours. Prerequisite: course 280. Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks.—Topkis

287. Database Systems (3)

Lecture—3 hours. Prerequisite: course 280. Hierarchical, network, and relational models for database systems. Design and implementation of models. Performance evaluation and benchmarking. Query structures and languages. Data security and integrity. Application to managerial decision making and decision support systems.

288. Special Topics in Management of Information Systems (3)

Lecture—3 hours. Managerial aspects of information systems. Topics stressing applications in organizations chosen from: economics of computers and information systems, decision support systems, management of computer-based information systems, office automation.—Topkis

291. Topics in Organizational Behavior (3)

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes. May be repeated for credit.—I. (I.)

292. Topics in Finance (3)

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques. May be repeated for credit.—I. (I.)

293. Topics in Marketing (3)

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hi-tech marketing, advertising, sales promotions, marketing through the Web. May be repeated for credit.—I. (I.)

294. Topics in Accounting (3)

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit.—I. (I.)

295. Topics in Information Technology (3)

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field. May be repeated for credit.—I. (I.)

296. Topics in Technology Management (3)

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes. May be repeated for credit.—I. (I.)

297. Topics in International Management (3)

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. The broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting. May be repeated for credit.—I. (I.)

298. Directed Group Study (1-5)

Prerequisite: consent of instructor.

299. Individual Study (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Managerial Economics

(College of Agricultural and Environmental Sciences)

The Major Program

The major in managerial economics (formerly agricultural and managerial economics) teaches students to apply economics and quantitative principles to problems in agricultural production, management, and marketing.

The Program. Each student must specialize in at least one of three options: agricultural economics, which focuses on topics related to the production and marketing of foods and fibers; environmental and resource economics, which focuses on issues related to use of resources and environmental qual-

ity; or managerial economics, which focuses on topics related to evaluating, financing, and managing business activities.

Internships and Career Alternatives. Students in managerial economics have opportunities to gain additional career information and preparation through internships in a variety of private business and governmental agencies. Graduates qualify for supervisory and management training positions in farm and ranch production, food and agricultural processing, agricultural sales and service, banking, finance, commodity and stock brokerages in the private sector, and a variety of agency career positions in local, state, and federal government. Students who desire additional training are well qualified to enter graduate programs in agricultural economics, economics, business administration, or law.

Major Entrance Requirements. Students may enter the Pre-Managerial Economics major while completing the major preparatory requirements. Acceptance into the pre-major does not guarantee automatic admission into the major. Before declaring a major in Managerial Economics, a student must complete the following courses with a combined grade point average (GPA) of at least 2.80. All courses must be taken for a letter grade. In determining admission to major status, the Department of Agricultural and Resource Economics counts only the first repeat of any pre-major course.

- Economics 1A and 1B.....10 units
- Statistics 134 units
- Mathematics 16A and 16B
or 21A and 21B6-8 units

B.S. Major Requirements:

UNITS

English Composition Requirement.....4-12

See College requirement0-8
Plus one from English 1, 3, 18, 19, 101,
104A, 104B, 104C, 104D, 104E, or 104F
.....4

Preparatory Subject Matter.....75-78

Management 11A-11B8
Agricultural Management and Rangeland
Resources 21, Computer Science Engineering 10, 15 or 30, Engineering 5...3-4
Economics 1A-1B.....10
Mathematics 16A-16B or 21A-21B6-8
Statistics 13, 1038
Social Science, Natural Science, Agricultural
Science40
(See undergraduate handbook in
Department Advising Office for complete
list of courses.)

Breadth/General Education.....6-24

Note: Approved General Education courses may be used to simultaneously satisfy Social, Natural, and Agricultural Science courses as defined in the Preparatory Subject Matter for the major and the campus General Education requirement.

Depth Subject Matter19-21

Students graduating with this major are required to attain at least a C average (2.0) in all upper division courses taken at the University in the depth subject matter.

- Agricultural and Resource Economics 100A,
100B, 106, 15516
- Economics 101 or 1054-5

Restricted Electives.....32

Choose at least one of the options below

Agricultural Economics option

Choose at least 15 units from Agricultural and Resource Economics 120, 130, 132, 138, 139, 140, 145, 150. Select the remaining 17 units from the aforementioned courses, Agricultural and Resource Economics 18, or upper division courses in Agricultural and Resource Economics and/or Economics

Environmental and Resource Economics option

Agricultural and Resource Economics 175,
1768

Choose at least 18 units from Agricultural and Resource Economics 15, 120, 138, 145, 146, 150, 156, Economics 123, 125, 130, Environmental Science and Policy 168A, 168B, 178. Select the remaining 6 units from the aforementioned courses or upper division courses in Agricultural and Resource Economics and/or Economics, Environmental Science and Policy 160, 161, 163, 165, 166, 167, 171, 172, 173, Environmental Toxicology 138

Managerial Economics option

Agricultural and Resource Economics 18...4
Choose at least 12 units from Agricultural and Resource Economics 112, 118, 136, 157, 171A, 171B. Select the remaining 16 units from the aforementioned courses or from Agricultural and Resource Economics 115A, 120, 130, 132, 138, 139, 140, 143, 144, 145, 146, 150, 156, 175, 176, 194HA-194HB, Economics 115A, 121A, 121B, 151A, 151B, 160A, 160B, Political Science 174

Unrestricted Electives37-48

Total Units for the Degree180

Advising Center for the major is in 1176 Social Sciences and Humanities Building (530-752-4932 or 530-752-6886).

Major Adviser. M. Caputo (*Agricultural and Resource Economics*).

Minor Program Requirements:

The Department of Agricultural and Resource Economics offers four minor emphases open to students majoring in other disciplines who wish to complement their study programs with a minor in Managerial Economics. Each emphasis requires Agricultural and Resource Economics 100A, which has prerequisites of Economics 1A-1B and Mathematics 16A-16B. For some courses, Statistics 13 and 103 may be required. Variable-unit courses are not accepted for any emphasis.

UNITS

Managerial Economics18

General emphasis

Agricultural and Resource Economics 100A or the equivalent4
Additional upper division courses in Agricultural and Resource Economics14

Agricultural Economics emphasis

Agricultural and Resource Economics 100A or the equivalent4

Additional upper division courses in Agricultural and Resource Economics14
Select 9 or more units from Agricultural and Resource Economics 120, 130, 132, 138, 139, 140, 145, 150.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

Environmental and Natural Resource Economics emphasis

Agricultural and Resource Economics 100A or the equivalent4

Additional upper division courses in Agricultural and Resource Economics14
Select 9 or more units from Agricultural and Resource Economics 175 and 176, and either 100B or 120.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

Managerial Economics emphasis

Agricultural and Resource Economics 100A or the equivalent4

Additional upper division courses in Agricultural and Resource Economics14
Select 9 or more units from Agricultural and Resource Economics 112, 118, 136, 157, 171A, 171B.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

Graduate Study. See the Graduate Studies section in this catalog.

Master of Education (M.Ed.) (A Graduate Group)

James Grieshop, Ph.D., Chairperson of the Group
Group Office, 1303 Hart Hall (530-752-1926)

Faculty

- Curt Acredolo, Ph.D., Adjunct Associate Professor (*Human and Community Development*)
- Rina Alcalay, Ph.D., Associate Professor (*Communication*)
- Robert A. Bell, Ph.D., Professor (*Communication*)
- Marc Braverman, Ph.D., 4-H Cooperative Extension Specialist (*Human and Community Development*)
- Isao Fujimoto, M.A., Sr. Lecturer Emeritus
- Barbara G. Goldman, Ph.D., Lecturer (*Education, Human and Community Development*)
- James I. Grieshop, Ph.D., Lecturer (*Human and Community Development*)
- Glenn Hawkes, Ph.D., Professor Emeritus
- Susan B. Kaiser, Ph.D., Professor (*Textiles and Clothing*)
- George C. Longfish, M.F.A., Professor (*Native American Studies*)
- E. Dean MacCannell, Ph.D., Professor (*Environmental Design*)
- Martha J. Macri, Ph.D., Associate Professor (*Native American Studies*)
- Margaret H. Rucker, Ph.D., Professor (*Textiles and Clothing*)
- Robert Sommer, Ph.D., Professor (*Psychology*)
- Orville E. Thompson, Ph.D., Professor Emeritus
- Karen A. Watson-Gegeo, Ph.D., Professor (*Education*)
- Joan Wright, Ph.D., Lecturer (*Human and Community Development*)
- Frank Zalom, Ph.D., Lecturer (*Entomology*)

Graduate Study. The Master of Education Graduate Group is housed in the Department of Human and Community Development. Master of Education (M.Ed.) degree students are preparing for leadership and professional roles in community and development education related to planning, organizational change, and evaluation. Areas of study include health education planning; community services planning and program management; community and non-formal education; international development education; program design and evaluation; organizational decisionmaking; leadership development; communication and change; extension education; environmental education; agricultural development education; and consumer behavior.

Requirements. The M.Ed. degree requires 36 units minimum of upper division and graduate courses. A minimum of 18 of these units must be graduate level courses; and at least eight units must be related to research methods and/or statistics. Students submit a required Program of Study Plan in the area of intended specialization by the end of the first quarter of graduate study. A research-based field project and comprehensive oral examination are required for completion of this degree.

Graduate Adviser. Contact Group office.

Maury Bramson, Ph.D. (*Mathematics*)
 David R. Britt, Ph.D. (*Chemistry*)
 John Hunter, Ph.D. (*Mathematics*)
 William M. Jackson, Ph.D. (*Chemistry*)
 Wesley O. Johnson, Ph.D. (*Statistics*)
 Louise H. Kellogg, Ph.D. (*Geology*)
 Richard Scalettar, Ph.D. (*Physics*)
 Dawn Sumner, Ph.D. (*Geology*)
 Jane-Ling Wang, Ph.D. (*Statistics*)

The Program of Study

The Division of Mathematical and Physical Sciences teaches students to use experimental studies and theoretical analyses to find solutions to real world problems. Students learn to address issues such as cleaning up the environment, preserving natural resources and creating innovative materials for the future. From the study of atoms to the examination of distant galaxies, from abstract number theory to the development of new chemical compounds, the division provides students with the skills to build the world of tomorrow.

The program in Mathematical and Physical Sciences provides an organizational structure within the College of Letters and Science for facilitating the development of innovative curricular initiatives across the mathematical and physical sciences, including offering broadly conceived, integrative undergraduate- and graduate-level courses. The program also may house resident faculty pursuing interdepartmental research and teaching in this area of inquiry.

Courses in Mathematical and Physical Sciences (MPS)

Lower Division Course

1. General Science: Science in the News (4)
 Lecture—3 hours; laboratory/discussion—1 hour.
 Prerequisite: lower division standing. Basic principles in science including numeracy, scale, energy, and time; the scientific method; good and bad science. Emphasis on science topics recently in the news. GE credit: SciEng.—III. Moores, Cowen

11A-11B. Mathematical and Physical Sciences Seminar (2-2)

Lecture—2 hours. Prerequisite: mentorship for undergraduate research participants in the physical and mathematical sciences. Research and writing in the mathematical and physical sciences. Presentations by various science faculty members.—II. (I-II.)

The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

The Program. Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus, students plan an upper division program in consultation with a faculty adviser. This individualized program can lead to graduate study in pure or applied mathematics, to elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

Career Alternatives. A degree in mathematics provides entry to many careers in addition to teaching. For instance, operations research, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	38-41
Mathematics 12 (or high school equivalent)	0-3
Mathematics 21A, 21B, 21C, 21D, 22A, 22B22
Computer Science Engineering 30 or Engineering 64
Additional non-Mathematics courses chosen from natural sciences12
Depth Subject Matter	38
Mathematics 1084
Mathematics 127A, 127B8
Mathematics 149A, 149B; or 150A, 150B8
Choose one Plan from the following two (up to 4 of these 18 units may be approved upper division applied courses outside of mathematics)18
Plan 1: Secondary Teaching	
Mathematics 1114
Mathematics 115A4
Mathematics 1414
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser6
Note: Students who wish to satisfy the single subject matter waiver for the teaching credential should see an adviser as early as possible.	
Plan 2: General Mathematics	
Additional upper division units selected in consultation with and subject to approval of an adviser18
Total Units for the Major	76-79

B.S. Major Requirements:

	UNITS
Preparatory Subject Matter	29-41
Mathematics 12 (or high school equivalent)	0-3
Mathematics 21A, 21B, 21C, 21D, 22A, 22B	22
Computer Science Engineering 30 (all plans) or Engineering 6 (Plans 1, 3, 4)	3-4
Physics 9A	4
Physics 9B-9C or Computer Science Engineering 40 (Plan 2)	4-8
Statistics 13, 32, or 102 (Plans 3 and 4 only)	3-8
Depth Subject Matter	48
Mathematics 108	4
Mathematics 127A, 127B	8
Choose one Plan from the following four (up to 4 of these 36 units for Plan 1, 3, 4, and up to 8 of these 36 units for Plan 2 may be approved upper division applied courses outside of mathematics)	36
Plan 1: Preparation for Graduate Study in Mathematics	
Mathematics 127C	4
Mathematics 150A, 150B, 150C	12
One course from Mathematics 131, 147, 167, 185A	4
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser	16
Recommended: Mathematics 114, 116, 118A, 118B, 118C, 119A, 119B, 131, 141, 145, 147, 167, 185A, 185B.	
Plan 2: Computational and Applied Mathematics	
Mathematics 149A or 150A	4
Mathematics 128A	4
Mathematics 167	4
Two courses from Mathematics 128B, 128C, Computer Science Engineering 110, 122A	8
Two courses from Mathematics 118A, 118B, 119A, 119B, 131, 132A, 145, 149B, 150B, 168	8
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser	8
Recommended: Mathematics 118A, 118B, 119A, 119B, 128A, 128B, 128C, 131, 132A, 145, 149B, 150B, 168, 185A, 185B	
Plan 3: Mathematics for Secondary Teaching	
Mathematics 115A	4
Mathematics 141	4
Mathematics 149A, 149B; or 150A, 150B	8
Mathematics 131, 132A; or Statistics 130A, 130B; or Statistics 131A, 131B	8
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser	12
Recommended: Mathematics 115B, 115C, 131, 132A, 145, 167, 168	
Plan 4: General Mathematics	
Mathematics 149A, 149B; or 150A, 150B	8
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser	28
Total Units for the Major	77-89
Recommended Language Preparation.	
Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.	
Major Advisers. C. Borges, A. Dad-Del, J.R. Diederich, D. Fuchs, J. Gravner, E.O. Milton, E.M. Silvia.	
Depth Subject Matter Requirements.	
Substitution of other mathematics courses or mathematically oriented courses given by other depart-	

ments may be admissible in partial satisfaction of the above mentioned 38-unit or 48-unit requirements with prior approval of the Undergraduate Program Committee. For the 190-level courses, (1) a maximum of one unit of 190, 192, 197TC, 198, and 199 courses may be counted towards mathematics major requirements; (2) up to 3 units of Mathematics 194H may be counted towards mathematics major requirements. No combination of (1) and (2) are to be allowed.

Statement of Objectives. As early as possible, but no later than the last quarter of the sophomore year, each prospective mathematics major should choose, in consultation with an adviser, one of the tracks as suggested by the adviser, prepare a statement of his or her mathematics objectives, and have a proposed program satisfying the requirements of the chosen track. The form to be used for this statement is available from the Department, and must be submitted in time to receive final approval prior to the last day of instruction of the first quarter of the junior year. Prospective mathematics majors transferring to the University at the upper division level should consult an adviser immediately upon arrival.

Information for Undergraduates. Assistance in planning an undergraduate major program in mathematics should be obtained from a major adviser. In addition, students seeking information pertaining to the application of mathematics to the biological or social sciences or computer science may contact the appropriate special area adviser.

Students preparing for an A.B. degree for secondary teaching or general mathematics, or a B.S. degree for graduate study, biological sciences, physical sciences, secondary teaching, or general mathematics should consult an undergraduate adviser.

Mathematics Placement Requirement. Students who wish to enroll in Mathematics 12, 16A, 21A, 21AH, and 36 must satisfy the mathematics placement requirement. See the Department of Mathematics Web page for details well in advance of enrolling. Students who do not satisfy the requirement will be administratively dropped from these courses. Dates and times for qualifying exams, one of the ways to meet this requirement, are posted on the Web site.

Minor Program Requirements:

	UNITS
Mathematics	20
Upper division units in mathematics (exclusive of Mathematics 192, 197TC, 198, 199)	20

Teaching Credential Subject Representative. E. Silvia. See also under Teacher Education Program.

Graduate Study. The Department offers programs of study and research leading to the M.A., M.A.T., and Ph.D. degrees in mathematics. Detailed information regarding graduate study may be obtained by writing to the Graduate Coordinator, Department of Mathematics.

Courses in Mathematics (MAT)

Lower Division Courses

B. Elementary Algebra (no credit)
Lecture—3 hours. Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.) (There is a fee of \$45.)—(I).

C. Trigonometry (no credit)
Lecture—2 hours. Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.) (There is a fee of \$30.)—(I, II, III).

D. Intermediate Algebra (no credit)
Lecture—3 hours. Basic concepts of algebra, designed to prepare the student for college work in mathematics, such as course 16A or 21A. Functions, equations, graphs, logarithms, and systems of equa-

tions. Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.) (There is a fee of \$15.)—(I, II).

12. Precalculus (3)
Lecture—3 hours. Prerequisite: Two years high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Qualifying Examination. Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic and trigonometric functions, sketching surfaces and solids. Not open for credit to students who have completed any of courses 16A, 16B, 16C, 21A, 21B, or 21C with a C– or better.—(I, II, III, IV).

(Note: Mathematics 16A, 16B, and 16C are intended for students who will take no more Mathematics courses.)

16A. Short Calculus (3)
Lecture—3 hours. Prerequisite: one and one half years of high school algebra, plane geometry, plane trigonometry, and satisfaction of the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed course 21A. GE credit: SciEng.—(I, II, III).

16B. Short Calculus (3)
Lecture—3 hours. Prerequisite: course 16A or 21A. Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not open for credit to students who have received credit for course 21B. GE credit: SciEng.—(I, II, III, IV).

16C. Short Calculus (3)
Lecture—3 hours. Prerequisite: course 16B or 21B. Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have received credit for course 21C. GE credit: SciEng.—(I, II, III, IV).

17A. Calculus for Biology and Medicine (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfaction of the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Only 2 units of credit to students who have completed course 21A.—(I).

17B. Calculus for Biology and Medicine (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 17A or 21A. Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Only 2 units of credit to students who have completed course 16B. Not open for credit to students who have completed course 21B.—(II).

17C. Calculus for Biology and Medicine (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 17B or 21B. Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Only 2 units of credit to students who have completed course 21C.—(III).

21A. Calculus (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytic geometry or course 12 and satisfaction of the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hospital's rule. Two units of credit to students who have completed course 16A. GE credit: SciEng.—(I, II, III).

21AH. Honors Calculus (4)

Lecture/discussion—4 hours. Prerequisite: a Precalculus Qualifying Examination score significantly higher than the minimum for course 21A is required. More intensive treatment of material covered in course 21A. GE credit: SciEng.—I. (I.)

21AL. Emerging Scholars Program Calculus Workshop (2)

Workshop—6 hours. Prerequisite: concurrent enrollment in course 21A. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials, L'Hopital's rule. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.)—I. (I.)

21B. Calculus (4)

Lecture—3 hours; discussion; 1 hour. Prerequisite: course 21A or 21AH. Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area volume, arc length, average of a function, improper integrals, surface of revolution. Only two units of credit will be allowed to students who have received credit for course 16B or 16C. GE credit: SciEng.—I, II, III. (I, II, III.)

21BH. Honors Calculus (4)

Lecture/discussion—4 hours. Prerequisite: a grade of B or better in course 21A or 21AH. More intensive treatment of material covered in course 21B. Students completing 21BH can continue with course 21CH or the regular 21C. GE credit: SciEng.—II. (II.)

21BL. Emerging Scholars Program Calculus Workshop (2)

Workshop—6 hours. Prerequisite: course 21A or 21AH, concurrent enrollment in course 21B. Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integrals, surface of revolution. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.)—II. (II.)

21C. Calculus (4)

Lecture—3 hours; discussion; 1 hour. Prerequisite: course 21B or 21BH. Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Definite integrals over plane and solid regions in various coordinate systems. Applications to physical systems. GE credit: SciEng.—I, II, III. (I, II, III.)

21CH. Honors Calculus (4)

Lecture/discussion—4 hours. Prerequisite: a grade of B or better in course 21B or 21BH. More intensive treatment of material covered in course 21C. GE credit: SciEng.—III. (III.)

21CL. Emerging Scholars Program Calculus Workshop (2)

Workshop—6 hours. Prerequisite: course 21B or 21BH, concurrent enrollment in course 21C. Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Definite integrals over plane and solid regions in various coordinate systems. Applications to physical systems. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.)—III. (III.)

21D. Vector Analysis (4)

Lecture—3 hours; discussion; 1 hour. Prerequisite: course 21C or 21CH. Continuation of course 21C. Vector algebra, vector calculus, scalar and vector fields. Line and surface integrals. Green's theorem, Stokes' theorem, divergence theorem.—I, II, III. (I, II, III.)

21M. Accelerated Calculus (5)

Lecture/discussion—4 hours; discussion/laboratory—1 hour. Prerequisite: grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB

exam, and obtaining the required score on the Precalculus Qualifying Examination and its trigonometric component. Accelerated treatment of material from courses 21A and 21B, with detailed presentation of theory, definitions, and proofs, and treatment of computational aspects of calculus at a condensed but sophisticated level. Not open for credit to students who have completed course 21A or 21B; only 3 units of credit will be allowed to students who have completed course 16A and only 2 units of credit will be allowed to students who have completed course 16B. GE credit: SciEng.—I. (I.)

22A. Linear Algebra (3)

Lecture—3 hours. Prerequisite: nine units of college mathematics and Engineering 6 or knowledge of Matlab or course 22AL (to be taken concurrently). Matrices and linear transformation, determinants, eigenvalues, eigenvectors, diagonalization, factorization.—I, II, III. (I, II, III.)

22AL. Linear Algebra Computer Laboratory (1)

Laboratory—2-3 hours. Prerequisite: nine units of college mathematics. Introduction to Matlab and its use in linear algebra. (P/NP grading only.)—I, II, III. (I, II, III.)

22B. Differential Equations (3)

Lecture—3 hours. Prerequisite: courses 21C, 22A. Solutions of elementary differential equations.—I, II, III. (I, II, III.)

36. Fundamentals of Mathematics (3)

Lecture—3 hours. Prerequisite: satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. Not open for credit to students who have completed course 108. GE credit: SciEng.—I.

71A-71B. Explorations in Elementary Mathematics (3-3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. (Deferred grading only, pending completion of sequence.)—I-II. (I-II.)

89. Elementary Problem Solving (1)

Lecture—1 hour. Prerequisite: high school mathematics through precalculus. Solve and present solutions to challenging and interesting problems in elementary mathematics. May be repeated once for credit. (P/NP grading only.)—I, II, III.

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses**108. Introduction to Abstract Mathematics (4)**

Lecture/discussion—4 hours. Prerequisite: course 21B or consent of instructor. Rigorous treatment of abstract mathematics with the emphasis on developing ability to understand and present mathematics arguments. GE credit: Wrt.—I, II, III. (I, II, III.)

111. History of Mathematics (4)

Lecture—3 hours; term paper. Prerequisite: 8 units of upper division mathematics including course 108. The history of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics.—II.

114. Convex Geometry (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 21C, 22A, 108, or consent of instructor. Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Offered in alternate years.—(II.)

115A. Number Theory (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 108. Divisibility and related topics, diophantine equations, selected topics from the theory of prime numbers.—I. (I.)

115B. Number Theory (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 108. Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. Offered in alternate years.—II.

115C. Number Theory (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 108. Continued fractions, partitions. Offered in alternate years.—III.

116. Differential Geometry (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 22A, 21D, or consent of instructor. Vector analysis, curves and surfaces in three dimensions. Offered in alternate years.—III.

118A. Partial Differential Equations: Elementary Methods (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 22A, 22B, 21D. Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace's equation; Fourier series; method of characteristics for the one-dimensional wave equation; solution of nonhomogeneous equations.—I. (I.)

118B. Partial Differential Equations: Eigenfunction Expansions (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 118A. Sturm-Liouville Theory; self-adjoint operators; mixed boundary conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains; nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations.—II. (II.)

118C. Partial Differential Equations: Green's Functions and Transforms (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 118B. Green's functions for one-dimensional problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace transform and solution of partial differential equations.—III. (III.)

119A-119B. Ordinary Differential Equations (4-4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 22A, 22B. Scalar and Planar Autonomous Systems—nonlinear systems and linearization. Phase plane analysis. Classification of singular points. Scalar and Planar maps. Bifurcations and the implicit function theorem. Notions of stability and Liapunov's method. Periodic orbits and their bifurcations. Poincare Bendixon theory.—II-III. (II-III.)

121. Advanced Analysis for the Sciences (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 21D, 22A, 22B. Introduction to Fourier series and Fourier transforms. Theory and solutions of basic partial differential equations, such as Laplace, heat and wave equations. Green's functions. Special functions of importance in physics and engineering.—I.

124. Mathematical Biology (4)

Lecture—3 hours; project—3 hours. Prerequisite: knowledge of a computer language or Matlab, course 22B or the equivalent. Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. Computer simulation methods as applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. Offered in alternate years.—III.

127A-127B-127C. Advanced Calculus (4-4-4)

Lecture/discussion—4 hours. Prerequisite: courses 21D, 22A, 108. Real number system, continuity, differentiation and integration on the real line; vector calculus and functions of several variables; theory of convergence.—I-II-III, II-III-I. (I-II-III, II-III-I.)

128A. Numerical Analysis (4)

Lecture—3 hours; term project. Prerequisite: course 21C; knowledge of a programming language such

as Pascal, FORTRAN or BASIC. Error analysis, approximation, interpolation, numerical differentiation and integration.—I. (I.)

128B. Numerical Analysis in Solution of Equations (4)

Lecture—3 hours; term project. Prerequisite: courses 21C and 22A; knowledge of a programming language such as Pascal, FORTRAN or BASIC. Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems.—II. (II.)

128C. Numerical Analysis in Differential Equations (4)

Lecture—3 hours; term project. Prerequisite: courses 22A, 22B, and a knowledge of a programming language such as Pascal, FORTRAN or BASIC. Difference equations, operators, numerical solution of ordinary and partial differential equations.—III. (III.)

131. Probability Theory (4)

Lecture—4 hours. Prerequisite: course 21C, 22A. Probability space, event, combinatorics; discrete, continuous distributions; random variables; joint marginal conditional densities; transformation; expectation; sums and moments; inequalities; laws of large numbers; central limit law; probability models via conditioning. Not open for credit to students who have completed Statistics 131A.—I, II, III. (I, II, III.)

132A-132B. Stochastic Processes (4-4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 131 or Statistics 131A. Markov chains, Poisson process, birth and death processes, renewal theory, queueing theory, Brownian motion, stationary processes. Course 132B is offered in alternate years.—II. (II-III.)

141. Euclidean Geometry (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 108. An axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries.—II. (II.)

145. Combinatorics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 108. Combinatorial methods using basic graph theory counting methods, generating functions, and recurrence relations.—III. (III.)

147. Topology (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 108, 127A. Basic notions of point-set and combinatorial topology. Offered in alternate years.—(III.)

149A-149B. Discrete Mathematics (4-4)

Lecture/discussion—4 hours. Prerequisite: courses 22A and 108. Coding theory and counting theory and the algebraic concepts needed in their development.—II-III. (II-III.)

150A-150B-150C. Modern Algebra (4-4-4)

Lecture/discussion—4 hours. Prerequisite: course 108. Basic concepts of groups, rings, and fields. Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, writing, and the ability to deal with abstraction.—I-II-III. (I-II-III.)

160. Mathematical Foundations of Database Theory, Design and Performance (4)

Lecture—3 hours; term project. Prerequisite: course 108 and familiarity with one high-level computer language. The relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies. Separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses: buffering; operating system contention; CPU intensive operations. Offered in alternate years.—(I.)

165. Mathematics and Computers (4)

Lecture—3 hours; project—3 hours. Prerequisite: Computer Science Engineering 30 or the equivalent, course 22B, 108. Computational mathematics and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers

play in mathematical conjecture and experimentation.—III.

167. Advanced Linear Algebra (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 22A. Introduction to linear algebra; linear equations, orthogonal projections, similarity transformations, quadratic forms, eigenvalues and eigenvectors. Applications to physics, engineering, economics, biology and statistics.—I, II, III. (I, II, III.)

168. Mathematical Programming (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 21C, and 22A or 167; knowledge of a programming language. Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization.—III. (III.)

180. Special Topics (3)

Lecture—3 hours. Prerequisite: course 22B or consent of instructor. Special topics from various fields of modern pure and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topic differs.—I, II, III. (I, II, III.)

185A. Complex Analysis with Applications (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 21D. Complex number systems, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory.—II. (II.)

185B. Complex Analysis with Applications (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 185A or consent of instructor. Analytic functions, elementary functions and their mapping properties, applications of Cauchy's integral theorem, conformal mapping and applications to heat flow and fluid mechanics. Offered in alternate years.—(III.)

189. Advanced Problem Solving (1)

Lecture—1 hour. Prerequisite: courses 21A-21B-21C-21D, 22A, 22B, or the equivalent. Introduction to advanced problem solving techniques outside the usual context of homework style problems. The problems only require a background in second year college mathematics. May be repeated once for credit. (P/NP grading only.)—I, II, III.

192. Internship in Applied Mathematics (1-3)

Internship; final report. Prerequisite: upper division standing; project approval by faculty sponsor prior to enrollment. Supervised work experience in applied mathematics. May be repeated for credit for a total of 10 units. (P/NP grading only.)

194. Undergraduate Thesis (3)

Prerequisite: consent of instructor. Independent research under supervision of a faculty member. Student will submit written report in thesis form. May be repeated with consent of Vice Chairperson. (P/NP grading only.)—I, II, III. (I, II, III.)

197TC. Tutoring Mathematics in the Community (1-5)

Seminar—1-2 hours; laboratory—2-6 hours. Prerequisite: upper division standing and consent of instructor. Special projects in mathematical education developing techniques for mathematics instruction and tutoring on an individual or small group basis. May be repeated once for credit. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

201A-201B-201C. Analysis (4-4-4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 127C or 203C or consent of instructor. Topological, metric, normed spaces. Stone-Weierstrass theorem. Contraction mapping theorem. Banach spaces. Bounded linear maps. Lebesgue measure. Fubini and Radon-Nikodym theorems. Lp spaces.

Distributions, Fourier transform. Linear operators on Hilbert spaces. Spectral theorem. Variational methods.—I-II-III. (I-II-III.)

202. Functional Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 201A-201B-201C. The theory of Fredholm operators. Examples of Fredholm operators (singular integral operators, elliptic operators in Sobolev spaces). Index theory for Fredholm operators. Unbounded self-adjoint operators. Schrodinger operators and other differential operators. The spectral theorem for these and for unitary operators. Offered in alternate years.—I.

203A-203B-203C. Modern Applied Analysis (4-4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded linear operators. Compact and linear differential operators. Green's functions. Distributions, Fourier transform. Measure theory. Lp and Sobolev spaces. Calculus of Variations.—I-II-III. (I-II-III.)

204. Applied Asymptotic Analysis (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Scaling and non-dimensionalization. Asymptotic expansions. Regular and singular perturbation methods. Applications to algebraic and ordinary and partial differential equations in the natural sciences and engineering. Offered in alternate years.—I.

205. Complex Analysis (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 185 or the equivalent or consent of instructor. Analytic continuation, Riemann mapping theorem, elliptic functions, modular forms, Riemann zeta function, Riemann surfaces. Offered in alternate years.—I.

210A. Topics in Geometry (3)

Lecture—3 hours. Prerequisite: bachelor's degree in mathematics or consent of instructor. Topics in advanced geometry related to curriculum at all levels. Required for M.A.T. degree program for prospective teachers. May be repeated for credit with prior consent of instructor.—I. (I.)

210AL. Topics in Geometry: Discussion (1)

Lecture/discussion—1 hour (to be arranged). Prerequisite: course 210A (concurrently); consent of instructor. Special topics related to course 210A which are of special interest to teachers and candidates for M.A.T. degree program. May be repeated for credit.—I. (I.)

210B. Topics in Algebra (3)

Lecture—3 hours. Prerequisite: bachelor's degree in mathematics or consent of instructor. Topics in advanced algebra related to curriculum at all levels. Required for M.A.T. degree program for prospective teachers. May be repeated for credit with prior consent of instructor.—II. (II.)

210BL. Topics in Algebra: Discussion (1)

Lecture/discussion—1 hour (to be arranged). Prerequisite: course 210B (concurrently); consent of instructor. Special topics related to course 210B which are of special interest to teachers and candidates for M.A.T. degree program. May be repeated for credit.—II. (II.)

210C. Topics in Analysis (3)

Lecture—3 hours. Prerequisite: bachelor's degree in mathematics or consent of instructor. Topics in advanced analysis related to curriculum at all levels. Required for M.A.T. degree program for prospective teachers. May be repeated for credit with prior consent of instructor.—III. (III.)

210CL. Topics in Analysis: Discussion (1)

Lecture/discussion—1 hour (to be arranged). Prerequisite: course 210C (concurrently); consent of instructor. Special topics related to course 210C which are of special interest to teachers and candidates for M.A.T. degree program. May be repeated for credit.—III. (III.)

215A-215B-215C. Topology (4-4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Offered in alternate years.—I-II-III.

218A-218B. Partial Differential Equations (4-4)

Lecture—3 hours; term paper or discussion. Prerequisite: courses 22A, 127C. Initial and boundary value problems for elliptic, parabolic and hyperbolic partial differential equations; existence, uniqueness and regularity for linear and nonlinear equations; maximum principles; weak solutions, Holder and Sobolev spaces, energy methods; Euler-Lagrange equations.—II-III. (II-III.)

219. Ordinary Differential Equations (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 22A, 22B, 127C or consent of instructor. Theory of ordinary differential equations. Dynamical systems. Geometric theory. Normal forms. Bifurcation theory. Chaotic systems. Offered in alternate years.—I.

221A. Mathematical Fluid Dynamics (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 118B or consent of instructor. Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves. Offered in alternate years.—I.

221B. Mathematical Fluid Dynamics (3)

Lecture—3 hours. Prerequisite: course 118B. Dynamics of fluid motion, perfect fluids, rotational and irrotational motion, two-dimensional and three-dimensional axisymmetric flows, compressible and incompressible viscous fluids. Offered in alternate years.—(II.)

222. Introduction to Biofluid Dynamics (3)

Lecture—3 hours. Prerequisite: Population Biology 231/Ecology 231 and Neurobiology, Physiology and Behavior 245 or consent of instructor. The basic principles of fluid dynamics are introduced in the first half of the course by describing various phenomena studies from a biofluids perspective. The equations of fluid motion associated with these phenomena are derived and studied in the second half.—III. (III.)

227. Mathematical Biology (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis. Offered in alternate years.—I.

228A-228B-228C. Numerical Solution of Differential Equations (4-4-4)

Lecture—3 hours; term paper or discussion. Prerequisite: course 128C. Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations. Offered in alternate years.—I-II-III.

229A-229B. Numerical Methods in Linear Algebra (4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 22A and 167 or the equivalent or consent of instructor. Computational methods for the solution of linear algebraic equations and matrix eigenvalue problems. Analysis of direct and iterative methods. Special methods for sparse matrices. Offered in alternate years.—II-III.

235A-235B-235C. Probability Theory (3-3-3)

Lecture—3 hours. Prerequisite: course 127C and Statistics 131A-131B or the equivalent. Measure theoretic foundations, abstract integrations, modes of convergence, limit theorems, independence, laws of large numbers, characteristic functions, central limit theorem, conditional expectations; topics from discrete time Markov and stationary processes, ergodic theory, Brownian motion, weak convergence, Wiener

and Poisson processes. (Same course as Statistics 235A-235B-235C.)—I-II-III. (I-II-III.)

236A-236B. Stochastic Dynamics and Applications (4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 201C or course/Statistics 235B; course/Statistics 235A-235B-235C recommended. Stochastic processes, Brownian motion, Stochastic integration, martingales, stochastic differential equations. Diffusions, connections with partial differential equations, mathematical finance. Offered in alternate years.—I-II.

240A-240B-240C. Differential Geometry (4-4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 116 or consent of instructor. Manifolds. Differentiable structures. Vector fields and tangent spaces. Bundles, tensors, forms, Grassman algebras. DeRham cohomology. Riemannian geometry. Connections, curvature, geodesics, submanifolds. Curves and surfaces. Positive and negative curvature; Morse Theory; homogeneous spaces; Hodge theory; applications. Offered in alternate years.—I-II-III.

250A-250B-250C. Algebra (4-4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in mathematics or consent of instructor. Group and rings. Sylow theorems, abelian groups, Jordan-Holder theorem. Rings, unique factorization. Algebras, and modules. Fields and vector spaces over fields. Field extensions. Commutative rings. Representation theory and its applications.—I-II-III. (I-II.)

258A. Numerical Optimization (4)

Lecture—3 hours; term paper or discussion. Prerequisite: courses 127A, 167. Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods; large-scale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems.—I. (I.)

258B. Variational Analysis (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 127A and 167 or consent of instructor. Foundations of optimization theory. The design of solution procedures for optimization problems. Modeling issues, and stability analysis. Offered in alternate years.—II. (II.)

261A-261B. Lie Groups and Their Representations (4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 215A, 240A, 250A-250B or the equivalent or consent of instructor. Lie groups and Lie algebras. Classification of semi-simple Lie groups. Classical and compact Lie groups. Representations of Lie groups and Lie algebras. Root systems, weights, Weil character formula. Kac-Moody and Virasoro algebras. Applications. Offered in alternate years.—II-III.

280. Topics in Pure and Applied Mathematics (3)

Lecture—3 hours. Prerequisite: graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs.—I, II, III. (I, II, III.)

290. Seminar (1-6)

Advanced study in various fields of mathematics, including the following: algebraic theory of semi-groups, control theory, mathematical logic, mathematical statistics, ordinary differential equations, partial differential equations, theory of distributions, and univalent functions. (S/U grading only.)—I, II, III. (I, II, III.)

298. Group Study (1-5)

299. Individual Study (1-12)

(S/U grading only.)

299D. Dissertation Research (1-12)

(S/U grading only.)

Professional Courses

301A-301B-301C. Mathematics Teaching Practicum (3-3-3)

Fieldwork—5 hours; discussion—1 hour. Prerequisite: course 302A-302B-302C and 303A-303B-303C concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated once for credit.—I-II-III.

302A-302B-302C. Curriculum Development in Mathematics (1-1-1)

Lecture/discussion—1 hour. Prerequisite: course 303A-303B-303C concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated once for credit.—I-II-III.

303A-303B-303C. Mathematics Pedagogy (1-1-1)

Lecture/discussion—1 hour. Prerequisite: course 302A-302B-302C or 210L concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated once for credit.—I-II-III.

390. Methods of Teaching Mathematics (3)

Lecture—1 hour; discussion—1 hour; laboratory—2 hours. Prerequisite: graduate standing. Practical experience in methods and problems of the teaching of mathematics at the university level. Includes discussion of lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and related topics. Required of departmental teaching assistants. May be repeated for credit. (S/U grading only.)—I. (I.)

399. Individual Study (2-4)

Independent study—2-3 hours; discussion—1 hour. Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Medical Informatics (A Graduate Group)

 Christine Hotz, D.V.M., Lecturer (*Pathology, Microbiology and Immunology*)
 Eric Liederman, M.D., M.P.H., Medical Director (*Clinical Information Systems*)
 Sivanarulselan Sachidanandam, M.D., Lecturer (*Computer Science Engineering*)
 James Self, M.S. Programmer/Analyst Supervisor (*Veterinary Medicine Computing Services*)
 Jie Zhou, M.D., General Surgery Resident (*Surgery*)

Graduate Study. The Group currently offers an M.S. degree in Medical Informatics. Aimed at doctors, veterinarians and other health professionals, the program provides basic training in computer uses in medicine, including an introduction to programming, clinical data acquisition, the electronic medical record, managing clinical data on the World Wide Web, and decision support systems. Participants have an opportunity to develop independent projects under faculty supervision in a wide range of life sciences applications. An effort is made to accommodate part-time students continuing with their own professional positions while completing the program.

Preparation. The Group encourages applications from health professionals who have had experience in the manipulation of clinical information. Basic qualifications include a degree in a health-related field or the equivalent in work experience. Background in a programming language is desirable but not required. Applicants with extensive computer background but little knowledge of clinical information would need to gain practical experience in dealing with clinical information to be competitive in applying to the program.

Graduate Advisors: J. Case (*Veterinary Medicine*), M. Gertz (*Computer Science*), T. Engel (*Anesthesiology and Pain Medicine*).

Courses in Medical Informatics (MDI)

Graduate Courses

202. Computer-Based Patient Records (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: consent of instructor. Conversion from paper-based to computer-based medical records,

advantages, disadvantages, barriers to conversion. Storage and representation of medical data to facilitate, interpretation. Review of current computer-based medical record models and standards in data storage and transmission.—III. (III.)

207. Decision Support System (4)

Lecture/discussion—2 hours; laboratory—2 hours; independent study—2 hours. Prerequisite: consent of instructor. Decision support system for medical application. Knowledge and computer representation, review of existing decision support system.—III. (III.)

208. Electronic Medical Data (4)

Lecture/discussion—2 hours; laboratory—4 hours. Prerequisite: consent of instructor. Electronic resources for medical practice, review of existing resources and development of materials.—II. (II.)

209. Data Acquisition in Medicine and Veterinary Medicine (4)

Lecture/discussion—2 hours; laboratory/discussion—6 hours. Prerequisite: basic proficiency in computer operation. Overview of the nature of medical/veterinary data, methods for capturing and storing data in electronic formats. Data validation, retrieval considerations.—I. (I.)

210. Introduction to Medical Informatics (2)

Lecture—2 hours. Introductory course in medical computing and bioinformatics. Topics include expert systems, computer-based medical record systems, ethics and confidentiality, controlled medical vocabulary systems and medical imaging and Telemedicine genetic analysis algorithms. (S/U grading only).—I. (I.) Hogarth

215. Beginning and Intermediate Programming in M (MUMPS) (3)

World Wide Web virtual lecture—10 hours. Project-oriented approach to fundamentals of programming in ANSI Standard M (MUMPS) language. Basic syntax, Hierarchical file structure; arrays and string subscripts, indirection and extrinsic functions. (S/U grading only).—I, II, III. (I, II, III.) Walters

289A-I. Special Topics in Medical Informatics (1-5)

Lecture, laboratory, or combination. Prerequisite: consent of instructor. Special topics in (A) Data Acquisition, (B) Electronic Medical Information, (C) Computer Based Patient Records, (D) Decision Support, (E) Medical Image Analysis, (F) Database Systems, (G) Biostatistics, (H) Modeling Biological Systems, (I) Coding Systems. May be repeated for credit when topic differs.—I, II, III. (I, II, III.)

290. Seminar in Medical Informatics (1)

Seminar—1 hour. Discussion of current graduate research and topics in Medical Informatics. Oral presentations of individual study. Limited enrollment. (S/U grading only).—I, II, III. (I, II, III.)

299. Research in Medical Informatics (1-12)

(S/U grading only)

 Thomas Nesbitt, M.D., Associate Professor (*Family and Community Medicine*)
 Thomas E. Nordahl, M.D., Ph.D., Associate Professor (*Psychiatry and Behavioral Sciences*)
 Robert H. Noth, M.D., Associate Professor (*Internal Medicine*)
 James Nuovo, M.D., Associate Professor (*Family and Community Medicine*)
 Martha O'Donnell, Ph.D., Professor (*Human Physiology*)
 Robert O'Donnell, M.D., Ph.D., Associate Professor (*Internal Medicine*)
 Francesca Ontell, M.D., Assistant Professor (*Radiology*)
 Robert Osnis, M.D., Assistant Professor (*Radiology*)
 James W. Overstreet, M.D., Ph.D., Professor (*Human Anatomy, Obstetrics and Gynecology*)
 John Owings, M.D., Associate Professor (*Surgery*)
 Sally Ozonoff, Ph.D., Associate Professor (*Psychiatry and Behavioral Sciences*)
 Michael Palchak, M.D., Associate Clinical Professor (*Internal Medicine*)
 Tina Pamieri, M.D., Assistant Professor (*Surgery*)
 Richard Pan, M.D., M.P.H., Assistant Professor (*Pediatrics*)
 Edward Panacek, M.D., Associate Professor (*Internal Medicine*)
 Demosthenes Pappagianis, M.D., Ph.D., Professor (*Medical Microbiology and Immunology*)
 Jeanny Park, M.D., Associate Professor (*Pediatrics*)
 Mark Parrish, M.D., Professor (*Pediatrics*)
 Gibbe H. Parsons, M.D., Professor (*Internal Medicine*)
 Debora Paterniti, Ph.D., Assistant Adjunct Professor (*Internal Medicine*)
 John Payne, Ph.D., Assistant Professor (*Human Physiology*)
 David Pearson, M.D., Assistant Adjunct Professor (*Surgery*)
 Richard Perez, M.D., Associate Professor (*Surgery*)
 William Pevec, M.D., Associate Professor (*Surgery*)
 Anthony Phillips, M.D., Professor (*Pediatrics*)
 James Picano, Ph.D., Assistant Professor (*Psychiatry and Behavioral Sciences*)
 Neville R. Pimstone, M.D., Professor (*Internal Medicine*)
 Stephen Pinney, M.D., Assistant Professor (*Orthopaedic Surgery*)
 Laura Poggel, M.D., Assistant Clinical Professor (*Pediatrics*)
 Richard Pollard, M.D., Professor (*Internal Medicine*)
 Ernesto Pollitt, Ph.D., Professor (*Pediatrics*)
 Francis Poulain, M.D., Associate Professor (*Pediatrics*)
 Jerry Powell, M.D., Professor (*Internal Medicine*)
 Pamela T. Prescott, M.D., Assistant Professor (*Internal Medicine*)
 Paul Primakoff, Ph.D., Professor (*Cell Biology and Human Anatomy*)
 Thomas P. Prindiville, M.D., Associate Professor (*Internal Medicine*)
 George T. Rab, M.D., Professor (*Orthopaedic Surgery*)
 Rajen Ramsamooj, M.D., Assistant Professor (*Pathology*)
 Shaista Rauf, M.D., Assistant Clinical Professor (*Neurology*)
 A. Hari Reddi, Ph.D., Professor (*Orthopaedic Surgery*)
 Bruce Reed, Ph.D., Assistant Adjunct Professor (*Neurology*)
 Gregory Reiber, M.D., Assistant Clinical Professor (*Pathology*)
 Michael P. Remler, M.D., Professor (*Neurology*)
 Gary Rhodes, Ph.D., Associate Adjunct Professor (*Pathology*)
 Ben Rich, J.D., Ph.D., Associate Professor (*Internal Medicine*)
 John Richards, M.D., Assistant Professor (*Internal Medicine*)
 Carol Richman, M.D., Associate Professor (*Internal Medicine*)
 David P. Richman, M.D., Professor (*Neurology*)
 Dick L. Robbins, M.D., Professor (*Internal Medicine*)
 John A. Robbins, M.D., Professor (*Internal Medicine*)
 Gary Roberts, M.D., Assistant Clinical Professor (*Internal Medicine*)
 Peter Roberts, M.D., Assistant Professor (*Surgery*)
 Lynn Robertson, Ph.D., Adjunct Professor (*Neurology*)
 David Roche, Ph.D., Professor (*Epidemiology and Preventive Medicine*)
 Juan J. Rodrigo, M.D., Professor (*Orthopaedic Surgery*)
 Patrick Romano, M.D., Associate Professor (*Internal Medicine*)
 Angela Rosas, M.D., Assistant Professor (*Pediatrics*)
 John Rose, M.D., Assistant Professor (*Internal Medicine*)
 Carl J. Rosenquist, M.D., Professor (*Radiology*)
 Lorenzo Rosaro, M.D., Associate Professor (*Internal Medicine*)
 Douglas Rudisill, M.D., Associate Clinical Professor (*Internal Medicine*)
 John Rutledge, M.D., Associate Professor (*Internal Medicine*)
 Janice Ryu, M.D., Associate Professor (*Radiation Oncology*)
 Mary Jane Sauve, D.N.Sc., Associate Adjunct Professor (*Internal Medicine*)
 Earl T. Sawai, Ph.D., Assistant Adjunct Professor (*Pathology*)
 Saul Schaefer, M.D., Professor (*Internal Medicine*)
 Marc B. Schenker, M.D., Professor (*Epidemiology and Preventive Medicine, Internal Medicine*)
 Lynette Scherer, M.D., Assistant Professor (*Surgery*)
 Allen Schnaser, M.D., Assistant Clinical Professor (*Orthopaedic Surgery*)
 Barbara Schneeman, Ph.D., Professor (*Internal Medicine*)
 Philip Schneider, M.D., Ph.D., Professor (*Surgery*)
 Ivan Schwab, M.D., Professor (*Ophthalmology*)
 Phillip Schwartzkroin, Ph.D., Professor (*Neurological Surgery*)
 Robert J. Scibienski, Ph.D., Senior Lecturer (*Medical Microbiology and Immunology*)
 Charles Scott, M.D., Assistant Clinical Professor (*Psychiatry and Behavioral Sciences*)
 Sidney A. Scudder, M.D., Associate Clinical Professor (*Internal Medicine*)
 Leigh Segel, Ph.D., Professor (*Surgery*)
 James A. Seibert, Ph.D., Professor (*Radiology*)
 Michael Seldin, M.D., Ph.D., Professor (*Biological Chemistry*)
 Craig W. Senders, M.D., Professor (*Otolaryngology*)
 Mark Servis, M.D., Associate Professor (*Psychiatry and Behavioral Sciences*)
 Masud Seyal, M.B.B.S., Ph.D., Professor (*Neurology*)
 David Shelton, M.D., Associate Professor (*Diagnostic Radiology*)
 Michael Sherman, M.D., Professor (*Pediatrics*)
 Craig Shoemaker, M.D., Professor (*Pediatrics*)
 David Siegel, M.D., M.P.H., Professor (*Internal Medicine*)
 Karen A. Sigvardt, Ph.D., Adjunct Professor (*Neurology*)
 Joseph Silva, M.D., Professor (*Internal Medicine*)
 Amrik Singh, M.D., Assistant Clinical Professor (*Anesthesiology and Pain Medicine*)
 Lloyd Smith, M.D., Professor (*Obstetrics and Gynecology*)
 Peter Sokolove, M.D., Assistant Professor (*Internal Medicine*)
 Bianca Solis, M.D., Assistant Clinical Professor (*Family and Community Medicine*)
 Jay Solnick, M.D., Assistant Professor (*Internal Medicine*)
 Malathi Srinivasan, M.D., Assistant Professor (*Internal Medicine*)
 Stanley Stead, M.D., Professor (*Anesthesiology and Pain Medicine*)
 Charles L. Stebbins, Ph.D., Professor (*Internal Medicine, Human Physiology*)
 Rebecca Stein-Wexler, M.D., Assistant Clinical Professor (*Radiology*)
 Judith Stern, Ph.D., Professor (*Internal Medicine*)
 Robin Stern, Ph.D., Associate Professor (*Radiation Oncology*)
 Frazier Stevenson, M.D., Assistant Professor (*Internal Medicine*)
 Thomas Stevenson, M.D., Professor (*Surgery*)
 Anthony R. Stone, M.D., Professor (*Urology*)
 E. Bradley Strong, M.D., Assistant Professor (*Otolaryngology*)

Dennis Styne, M.D., Professor (*Pediatrics*)
 Robert Suddath, M.D., Assistant Clinical Professor (*Psychiatry and Behavioral Sciences*)
 Stanley Sue, Ph.D., Professor (*Psychiatry and Behavioral Sciences*)
 Colleen Sweeney, Ph.D., Assistant Adjunct Professor (*Biological Chemistry*)
 Diane Swick, Ph.D., Associate Adjunct Professor (*Neurology*)
 Arthur Swislocki, M.D., Associate Professor (*Internal Medicine*)
 Jonathan Sykes, M.D., Professor (*Otolaryngology*)
 Michael Syvanen, Ph.D., Professor (*Medical Microbiology and Immunology*)
 Robert M. Szabo, M.D., Professor (*Orthopaedic Surgery*)
 Michael Tanaka, M.D., Assistant Clinical Professor (*Internal Medicine*)
 Alice Tarantal, Ph.D., Associate Adjunct Professor (*Pediatrics*)
 Timothy Tautz, M.D., Assistant Professor (*Anesthesiology and Pain Medicine*)
 Douglas Taylor, M.D., Assistant Professor (*Pediatrics*)
 Suzanne Teuber, M.D., Associate Professor (*Internal Medicine*)
 Barry Sharp, M.D., Professor (*Neurology*)
 R. Steven Tharratt, M.D., Professor (*Internal Medicine*)
 Jerold H. Theis, D.V.M., Ph.D., Professor (*Medical Microbiology and Immunology*)
 Charles Thirkil, Ph.D., Associate Adjunct Professor (*Ophthalmology*)
 Thomas Tinstman, M.D., Associate Clinical Professor (*Internal Medicine*)
 Jose Torres, Ph.D., Associate Professor (*Medical Microbiology and Immunology*)
 Dena Towner, M.D., Assistant Professor (*Obstetrics and Gynecology*)
 Christoph Troppmann, M.D., Associate Professor (*Surgery*)
 Frederic A. Troy II, Ph.D., Professor (*Biological Chemistry*)
 Richard Tucker, Ph.D., Associate Professor (*Cell Biology and Human Anatomy*)
 Judith L. Turgeon, Ph.D., Professor (*Human Physiology*)
 Samuel Turnipseed, M.D., Associate Clinical Professor (*Anesthesiology and Pain Medicine*)
 Kenneth Turteltaub, Ph.D., Adjunct Professor (*Urology*)
 Joseph Tuscano, M.D., Assistant Professor (*Internal Medicine*)
 Viviane Ugalde, M.D., Associate Professor (*Physical Medicine and Rehabilitation*)
 Shiro Urayama, M.D., Assistant Professor (*Internal Medicine*)
 A. Kimberley Usrey, Ph.D., Assistant Professor (*Neurology*)
 Richard Valente, M.D., Associate Clinical Professor (*Internal Medicine*)
 Cheryl Vance, M.D., Associate Clinical Professor (*Internal Medicine*)
 Albert van der Vliet, Ph.D., Associate Professor (*Internal Medicine*)
 Catherine Vandevoort, Ph.D., Associate Adjunct Professor (*Obstetrics and Gynecology*)
 Ana Vazquez, Ph.D., Assistant Adjunct Professor (*Otolaryngology*)
 Zakauddin Vera, M.D., Professor (*Internal Medicine*)
 Piero Verro, M.D., Assistant Professor (*Neurology*)
 Nazhiyath Vijayan, M.D., Clinical Professor (*Neurology*)
 Amparo Villablanca, M.D., Associate Professor (*Internal Medicine*)
 Philip J. Vogt, M.D., Associate Clinical Professor (*Pathology*)
 John Voss, Ph.D., Assistant Professor (*Biological Chemistry*)
 L. Elaine Waetjen, M.D., Assistant Professor (*Obstetrics and Gynecology*)
 Angela Wang, M.D., Assistant Professor (*Anesthesiology and Pain Medicine*)
 Lei Wang, Ph.D., Assistant Clinical Professor (*Radioation Oncology*)
 Samuel Wang, M.D., Assistant Professor (*Internal Medicine*)
 Craig Warden Ph.D., Associate Professor (*Pediatrics*)

Nancy Warden, M.D., Assistant Professor (*Pediatrics*)
 Zenja Watkins, M.D., Assistant Clinical Professor (*Obstetrics and Gynecology*)
 Joseph Watson, M.D., Assistant Professor (*Neurological Surgery*)
 Robert Weiss, M.D., Associate Professor (*Internal Medicine*)
 Steven Weiss, M.D., Associate Professor (*Internal Medicine*)
 Jeanna Welborn, M.D., Associate Professor (*Internal Medicine*)
 Wanda M. Wenman, M.D., Professor (*Pediatrics*)
 Hans Jurgen Wenzel, M.D., D.Sc., Adjunct Professor (*Neurological Surgery*)
 John Werner, Ph.D., Professor (*Ophthalmology*)
 Daniel C. West, M.D., Assistant Professor (*Pediatrics*)
 Jason Wexler, M.D., Assistant Professor (*Internal Medicine*)
 Vicki Wheelock, M.D., Assistant Clinical Professor (*Neurology*)
 Thomas P. Whetzel, M.D., Associate Professor (*Surgery*)
 Charles Whitcomb, M.D., Associate Clinical Professor (*Internal Medicine*)
 David A. White, M.D., Professor (*Anesthesiology and Pain Medicine*)
 Richard H. White, M.D., Professor (*Internal Medicine*)
 Jonathan Widdicombe, Ph.D., Professor (*Human Physiology*)
 Jean Wiedeman, M.D., Ph.D., Associate Professor (*Pediatrics*)
 Michael Wilkes, M.D., Ph.D., Professor (*Internal Medicine*)
 Barth Wilsey, M.D., Associate Clinical Professor (*Anesthesiology and Pain Medicine*)
 Sharon Wilson, M.D., Assistant Clinical Professor (*Internal Medicine*)
 Mark Wineinger, M.D., Associate Professor (*Physical Medicine and Rehabilitation*)
 Garen Wintemute, M.D., Professor (*Epidemiology and Preventive Medicine*)
 Ronald Wisdom, M.D., Associate Professor (*Internal Medicine*)
 Phyllis Wise, Ph.D., Professor (*Human Physiology*)
 David H. Wisner, M.D., Professor (*Surgery*)
 Erik Wisner, D.V.M., Associate Professor (*Radiology*)
 Heidi Wolf, M.D., Assistant Clinical Professor (*Pediatrics*)
 Bruce M. Wolfe, M.D., Professor (*Surgery*)
 Gail Wong, M.D., Assistant Adjunct Professor (*Internal Medicine*)
 Granger Wong, M.D., D.M.D., Assistant Professor (*Surgery*)
 David L. Woods, Ph.D., Adjunct Professor (*Neurology*)
 Jian Wu, M.D., Ph.D., Assistant Adjunct Professor (*Internal Medicine*)
 Mark Wu, M.D., Assistant Clinical Professor (*Pathology*)
 Reen Wu, Ph.D., Professor (*Internal Medicine*)
 Theodore Wun, M.D., Associate Professor (*Internal Medicine*)
 George Xakellis, Jr., M.D., M.B.A., Associate Professor (*Family and Community Medicine*)
 Sanjay Yadlapalli, M.B., B.S., Assistant Clinical Professor (*Internal Medicine*)
 Ebenezer Yamoah, M.D., Associate Professor (*Otolaryngology*)
 Shaqulta Yasmeen, M.D., Assistant Professor (*Obstetrics and Gynecology*)
 Jane Yeun, M.D., Assistant Professor (*Internal Medicine*)
 Ken Yoneda, M.D., Assistant Professor (*Internal Medicine*)
 J. Nilas Young, M.D., Professor (*Surgery*)
 Mark Zern, M.D., Professor (*Internal Medicine*)
 Vincent Ziboh, Ph.D., Professor (*Dermatology, Biological Chemistry*)
 Lin Zhang, M.D., Ph.D., Assistant Professor (*Neurology*)
 Edie Zusman, M.D., Assistant Professor (*Neurological Surgery*)
 Theodore Zwerdling, M.D., Associate Professor (*Pediatrics*)

Emeriti Faculty

Charles F. Abildgaard, M.D., Professor Emeritus
 Deborah Ablin, M.D., Professor Emeritus
 Neil C. Andrews, M.D., Professor Emeritus
 Len H. Andrus, M.D., Professor Emeritus
 C. Robert Ashmore, Ph.D., Professor Emeritus
 Alexander Barry, Ph.D., Professor Emeritus
 Charles J. Beauchamp, M.D., Ph.D., Professor Emeritus
 James Beaumont, Ph.D., Professor Emeritus
 Joseph Belber, M.D., Professor Emeritus
 John R. Benfield, M.D., Professor Emeritus
 William F. Benesek, Ph.D., Professor Emeritus
 Eli Benjamini, Ph.D., Professor Emeritus
 Edmund Bernauer, Ph.D., Professor Emeritus
 Kay H. Blacker, M.D., Professor Emeritus
 Robert J. Bolt, M.D., Professor Emeritus
 Marion A. Carnes, M.D., Professor Emeritus
 James Castles, M.D., Professor Emeritus
 Joseph Castro, M.D., Professor Emeritus
 Willard R. Centerwall, M.D., Professor Emeritus
 Robert S. Chang, M.D., D.Sc., Professor Emeritus
 Loring F. Chapman, Ph.D., Professor Emeritus
 Michael Chapman, M.D., Professor Emeritus
 Matthew Connors, M.D., Professor Emeritus
 Robert Davidson, M.D., M.P.H., Professor Emeritus
 Gerald L. DeNardo, M.D., Professor Emeritus
 Pierre M. Dreyfus, M.D., Professor Emeritus
 John H. Eisele, M.D., Professor Emeritus
 Allen C. Enders, Ph.D., Professor Emeritus
 Irwin Feinberg, M.D., Professor Emeritus
 William M. Fowler, Jr., M.D., Professor Emeritus
 Charles Frey, M.D., Professor Emeritus
 Andrew J. Gabor, M.D., Ph.D., Professor Emeritus
 Murray B. Gardner, M.D., Professor Emeritus
 Michael C. Geokas, M.D., Ph.D., Professor Emeritus
 Boyd Goetzman, M.D., Ph.D., Professor Emeritus
 Eli Gold, M.D., Professor Emeritus
 Elliot Goldstein, M.D., Professor Emeritus
 Edward C. Gomez, M.D., Ph.D., Professor Emeritus
 Jerry F. Green, Ph.D., Professor Emeritus
 Gerald A. Gronert, M.D., Professor Emeritus
 Paul F. Gulyassy, M.D., Professor Emeritus
 Crystalenia C. Halsted, M.D., Professor Emeritus
 Anthony J. Hance, Ph.D., Professor Emeritus
 Frederick W. Hanson, M.D., Professor Emeritus
 Paul G. Hattersley, M.D., Professor Emeritus
 Glenn Hawkes, Ph.D., Professor Emeritus
 Andrew Hendrickx, Ph.D., Professor Emeritus
 Paul D. Hoepflich, M.D., Professor Emeritus
 Manfred Hollinger, Ph.D., Professor Emeritus
 Robert L. Hunter, Ph.D., Professor Emeritus
 Edward J. Hurley, M.D., Professor Emeritus
 Gordon Jensen, M.D., Professor Emeritus
 E. Ralph Johnson, M.D., Professor Emeritus
 George W. Jordan, M.D., Professor Emeritus
 David Katz, Ph.D., Professor Emeritus
 Eva K. Killam, Ph.D., Professor Emerita
 Lindy F. Kumagai, M.D., Professor Emeritus
 Bo Lantz, M.D., Professor Emeritus
 Ruth Lawrence, M.D., Professor Emeritus
 Gerald Lazarus, M.D., Professor Emeritus

 Julian R. Youmans, M.D., Ph.D., Professor Emeritus

Admission Requirements and Professional Curriculum. Detailed information can be obtained from the School of Medicine. See also the School of Medicine chapter of this catalog.

Courses in the School of Medicine

Curriculum for the School of Medicine

The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a blend of basic science training and clinical experience with opportunities for research. While the first two years emphasize the basic science basis of medicine, the student is exposed even from the onset to questions of patient management, thus providing a natural transition from the predominantly preclinical training of the first two years into the clinical training of the final two years.

The first-year program is for three quarters, beginning in the fall. The basic sciences (anatomy, physiology, biochemistry, histology, endocrinology, neurosciences, immunology, genetics, reproduction, general pathology) are blended with social sciences (the behavioral aspects of medicine, ethics). A three quarter course in patient evaluation introduces students to the art of communicating with patients and covers basic techniques in physical diagnosis and emergency medical skills, through a combination of small group experiences and preceptorships.

The second-year program is for four quarters, but with the Summer Quarter abbreviated to six weeks. The basic sciences (microbiology, pharmacology, and systemic pathology) are integrated with the study of the pathophysiological basis of disease, from an organ system perspective (endocrine, hematopoietic/lymphoreticular, gastrointestinal, nutrition, musculoskeletal, neuromuscular, respiratory, nephrology). Students continue their training in physical diagnosis with didactic presentations, clinical rotations, and preceptorships. Second year courses in psychopathology, epidemiology/occupational medicine/geriatrics, human sexuality, and medical ethics/jurisprudence round out the program.

The third-year program is comprised of required clerkship rotations in the clinical specialties: eight weeks each of surgery, medicine, obstetrics/gynecology, pediatrics, ambulatory medicine (jointly

administered by Family Practice and Internal Medicine) and psychiatry. Students may elect to defer one of the required clerkships to the fourth year.

A longitudinal, case-based course, Application of Medical Principles, is presented throughout the first three years in parallel with the above courses and clerkships. This course is intended to foster independent learning and strengthen students' problem solving and information management skills. The cases are designed to help students integrate the basic and clinical sciences and appreciate the central role of psychosocial and ethical perspectives in patient care. The fourth year features built-in flexibility to allow students to begin to individualize their medical careers. All students are required to select 32 weeks of learning activities. Individual student programs are designed under the guidance of faculty advisors, and each student's fourth year program must be approved by a faculty oversight committee to ensure appropriate breadth and depth. The fourth-year curriculum also provides 12 weeks of undesignated time.

To satisfy the M.D. degree program, the student must successfully complete the required course work, clerkships, and fourth year elective program. Students who enter the program with advanced training in one of the areas required for the program are permitted to substitute required courses with electives of equal credit. In addition to the fourth-year elective program available, there is the opportunity for students to select from a variety of electives during the first two years. Examples include electives in medical economics, history of ethics and medicine, medical Spanish, insights in clinical research, and "doctoring," an elective designed to promote early clinical experience under the guidance of a faculty mentor. Many students also participate in one of several student-run, community clinics for elective credit during their first and second years.

Coordination with other Advanced Degree Programs

The curriculum for the M.D. degree provides flexibility and encourages coordination with other advanced degree programs (Ph.D., M.S., M.A., M.B.A., and M.P.H.). These programs offer a wide breadth of study areas and draw upon the considerable expertise of the entire campus faculty. In addition, the UC Berkeley School of Public Health offers an M.P.H. program in conjunction with the M.D. program. Beginning fall 2002, the School of Medicine's department of Epidemiology and Preventive Medicine will offer a M.P.H. This program will be restricted to professional students in the Schools of Veterinary Medicine and Medicine, health professionals and State Health Department employees.

School of Medicine administrators enthusiastically support students interested in pursuing advanced degree programs. The dual-degree program for the M.D./Ph.D. is targeted to train physicians to meet, respond to and solve the broad diversity of problems and dilemmas facing current and future health care. Students are encouraged to seek degrees in any of the campuswide Ph.D. programs, including those in social sciences and humanities. The UC Davis School of Medicine awards competitive fellowships each year to students enrolled in the M.D./Ph.D. program.

Required Curriculum for the M.D. Degree

The following listing is the typical sequencing of all courses required for earning the M.D. degree. Course descriptions are given under the individual departmental course offerings.

First-Year Required Courses

Quarter I: Fall

Biological Chemistry 410A, Molecular and Cell Biology
 Family Practice 400A, Introduction to Patient Evaluation
 Cell Biology and Human Anatomy 400, Developmental, Gross and Radiologic Anatomy

Medical Sciences 400A, Application of Medical Principles
 Psychiatry 401, Medicine and the Mind

Quarter II: Winter

Biological Chemistry 410B, Cell Biology and Metabolism
 Cell Biology and Human Anatomy 402, Human Microscopic Anatomy
 Human Physiology 400, Human Physiology
 Family Practice 400B, Introduction to Patient Evaluation
 Medical Sciences 400B, Application of Medical Principles

Quarter III: Spring

Biological Chemistry/Human Physiology 418, Mammalian Endocrinology and Homeostasis
 Cell Biology and Human Anatomy/Human Physiology 403, Neurobiology
 Medical Sciences 400C, Application of Medical Principles
 Medical Microbiology 480A, Medical Immunology
 Obstetrics and Gynecology 420, Genetics and Reproduction
 Pathology 410A, General Systemic Pathology
 Family Practice 400C, Introduction to Patient Evaluation

Second-Year Required Courses

Quarter IV: Summer

Pathology 410B, General Pathology
 Microbiology 480B
 Medical Pharmacology and Toxicology 400A
 Dermatology 420, Integumentary System
 Internal Medicine 400A, Physical Diagnosis
 Medical Sciences 400D, Application of Medical Principles

Quarter V: Fall

Medical Microbiology 480C, Pathogenic Microbiology
 Internal Medicine 420A, Hematopoietic and Lymphoreticular System
 Orthopaedic Surgery 420, Musculoskeletal System
 Medical Pharmacology and Toxicology 400B, Principles of Pharmacology
 Epidemiology and Preventive Medicine, Internal Medicine 421, Principles of Epidemiology and Preventive Medicine
 Internal Medicine 400B, Physical Diagnosis
 Pathology 410C, General Pathology
 Internal Medicine 420F, Metabolic Regulatory System
 Medical Sciences 400E, Application of Medical Principles

Quarter VI: Winter

Medical Pharmacology and Toxicology 400C, Principles of Pharmacology
 Internal Medicine 420C, Respiratory System
 Internal Medicine 420D, Cardiovascular System
 Neurology 420, Clinical Neurosciences
 Psychiatry 403, Fundamentals of Clinical Psychiatry
 Psychiatry 402, Human Sexuality
 Internal Medicine 400C, Physical Diagnosis
 Pathology 410D, General Pathology
 Medical Sciences 400F, Application of Medical Principles

Quarter VII: Spring

General Medicine 400F, Application of Medical Principles
 Internal Medicine 420B, Gastrointestinal System
 Internal Medicine/Biological Chemistry 419, Basic and Clinical Nutrition
 Internal Medicine 420E, Nephrology
 Pathology 410E, General Pathology

Third- and Fourth-Year Required Courses

Third-Year Clerkships

Internal Medicine 430, Medicine Clerkship8 weeks
Surgery 430, Surgery Clerkship8 weeks
Pediatrics 430, Pediatrics Clerkship8 weeks
Family Practice 430, Ambulatory Care Clerkship8 weeks

Third- or Fourth-Year Clerkships

Obstetrics and Gynecology 430, Obstetrics and Gynecology Clerkship8 weeks
Psychiatry 430, Psychiatry Clerkship8 weeks
Medical Sciences 430A-430B-430C-430D, Third Year Longitudinal Course	

Fourth-Year Requirements

32 weeks of learning experiences
Clinical experiences are chosen by the student in consultation with, and with approval of, the Fourth Year Oversight Committee.

The fourth-year curriculum also allows for 12 weeks of undesignated time (electives, interviews, free time).

Medical Sciences (MDS)

Lower Division Course

99. Special Study in Medicine for Undergraduates (1-5)

Independent study—3-15 hours. Prerequisite: consent of instructor. Participate in research projects relating to medicine with faculty in the School of Medicine. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Kumari

Upper Division Course

192. Medical Education Internship for Advanced Undergraduates (1-12)

Internship—3-36 hours. Prerequisite: competency with computers. Enrollment dependent on availability of intern positions. Participate in projects related to curriculum development in support of curriculum for M.D. degree. Gain work experience and appreciation for innovative approaches to learning in basic and clinical sciences of medical education. May be repeated for credit for up to 12 units. (P/ NP grading only.)—I, II, III, IV. (I, II, III, IV.) Kumari

Professional Courses

400. Application of Medical Principles (1)

Discussion—1.5 hours. Prerequisite: student in the School of Medicine. Application of multidisciplinary basic, social, and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—II, III. (II, III.)

400B-400C. Application of Medical Principles (1-1.5)

Discussion—2-3 hours. Prerequisite: approval of the Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—II-III. Stevenson

400E. Application of Medical Principles (1)

Discussion—1.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (P/F grading only.)—I. Stevenson

400F. Application of Medical Principles (1)

Discussion—1.5 hours. Prerequisite: second year medical student. Application of multidisciplinary

basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—IV.

400J. Application of Medical Principles (1)

Discussion—1.5 hours. Prerequisite: third year medical student. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—II. (II.)

400K. Application of Medical Principles (1)

Discussion—1.5 hours. Prerequisite: third year medical student. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—III. (III.)

401. Applications of Computers to Medical Practice (2)

Autotutorial—2 hours. Prerequisite: enrollment in medical school. Proficiency in computer applications relative to practice of medicine, with emphasis on e-mail, literature searching, file transfer, and hospital information services. Course given online, at home or in lab; time and place determined by student. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Huntley

413. Doctoring (1-2)

Fieldwork—1-2 hours; independent study—1-2 hours; discussion—0.25 hours. Prerequisite: medical clearance for patient contact and consent of instructor. Clinically oriented experiential learning combined with mentor-directed discussion and self-directed research on a selected medical topic. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine as well as in-depth, self-directed learning. (H/P/F grading only; deferred grading only pending completion of sequence.)—II, III. (II, III.)

430. Applications of Medical Principles (1)

Discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—I, II, III, IV. Stevenson

430A-430B-430C-430D. Applications of Medical Principles (1)

Discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—IV-I-II-III. Stevenson

440. Responsibilities of Medical Practice (3)

Lecture/discussion—60 hours total. Prerequisite: approval by Committee on Student Evaluation and Promotion. Students will address nonbiological components of the patient-physician relationship (medical ethics, medical jurisprudence, medical economics, alcoholism and drug abuse, etc.) and critically explore social, ethical and cultural issues arising in medical practice. (S/U grading only.)—II. (II.)

441. Combined Ophthalmology and Otolaryngology Clerkship (6)

Clinical activity—4 weeks. Prerequisite: approval by Committee on Student Promotion and Evaluation. Fundamental knowledge of ophthalmology and otolaryngology for the treatment of eye, ear, nose & throat problems at a level of training of general physicians, including when to refer patients to a specialist. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Brandt, Strong

450. Introduction to UCD Medical Center (1)

Seminar—20 hours total. Prerequisite: second-year medical student. Designed to assist medical student in transition from classroom to hospital setting. (H/P/F grading only.)—III. (III.)

480. Insights in Clinical Research (1)

Lecture—1 hour. Prerequisite: medical students in good standing. Clinical research presented by School of Medicine faculty; overview of pertinent issues, including medical ethics, human subjects protocols, case control methods, etc. May be repeated for credit when topic differs. (H/P/F grading only.)—II. (II.) Kumari

481. Insights into Clinical Specialties (1)

Lecture/discussion—1 hour. Prerequisite: medical student in good standing. Exposure to various medical specialties, their residency programs and ways in which medical students can prepare for and improve their candidacy for such programs. (H/P/F grading only.)—II. (II.) Kumari

482. Lecture Series in Reproductive Health (1)

Lecture—1 hour. Psychosocial and public health aspects of providing quality reproductive health care and application in student-run free clinics and in 3rd year clerkships. May be repeated twice for credit. (P/F grading only.)—II. (II.) Kumari

483. Insights in Political, Legal and Business Aspects of Medicine (1)

Lecture—1 hour. Prerequisite: medical students in good standing. The practical aspects of a medical career. May be repeated twice for credit. (P/F grading only.)—III. (III.) Kumari

489. Directed Studies (9)

Independent study—40 hours weekly. Prerequisite: individual directed studies in extended preparation for USMLE Part I, and/or as required by Promotion Board. Independent studies to review material from Years I and II in the curriculum in preparation for taking USMLE Part I in the fall, and for remediation course work directed by the Promotion Board. Students are expected to spend 8 to 12 hours per day on these studies. Faculty consultation and tutoring available on individual basis. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Lewis

495. Medicine Literature Review (1-9)

Discussion—3-27 hours. Prerequisite: medical student in good academic standing and permission of the Associate Dean of Curricular Affairs. Independent study: topics for selection include, but are not restricted to, medical ethics, economics and jurisprudence, culture and medicine, ethnicity and medicine, gender and medicine, history of medicine, health manpower, and medical education. A prepared paper on the selected topic will be required. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Kumari

499. Research in Medical Education and Curriculum Development (4-9)

Independent study—10-36 hours. Prerequisite: medical student in good standing and competency with computers. Research and development of an independent project related to expanding computer-assisted resources in support of the M.D. curriculum at UC Davis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Kumari

Departmental Courses:

Anesthesiology and Pain Medicine (ANE)

Upper Division Course

192. Internship in Anesthesiology (1-6)

Internship—3 to 18 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in anesthesia and related fields. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.)

Professional Courses

460. Anesthesiology Clinical Clerkship (3-18)

Full-time clinical activity (3 full days per unit). Prerequisite: medical student. In-depth exposure to anes-

thetia through informal lectures and mentoring by anesthesiologists. Emphasis on understanding and applying anesthetic principles in managing administration of general, regional, and specialized areas. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

462. Anesthesiology (3)

Clinical activity—full time. Prerequisite: medical student (geared toward second and third-year students). Exposure to anesthesiology through combination of informal lectures and mentoring by anesthesiologists. Anesthetic procedures, pharmacology, and basic anesthetic principles. (H/P/F grading only.)—I, II. (I, II.) Kantor

463. Multidisciplinary Pain Management (6)

Clinical Activity—30 hours; lecture/discussion—10 hours. Prerequisite: senior medical student in good standing. Senior clerkship to expose students to all facets of treating pain in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Fishman

480. Brief Introduction to Clinical Anesthesiology and Chronic Pain Management (3)

Clinical activity—25-30 hours (two weeks). Prerequisite: second-year medical student. Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthesia care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interaction with faculty anesthesiologists. (H/P/F grading only.)—II. (II.) Jahr, Kantor

498. Individual or Group Study (1-5)

Discussion—1-5 hours; laboratory—2-10 hours. Prerequisite: interns and residents with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Anesthesiology Research (4-18)

Laboratory—12-54 hours. Prerequisite: third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor. Problems in clinical and/or laboratory research. (H/P/F grading only for medical students.)—I, II, III, IV. (I, II, III, IV.)

Biological Chemistry (BCM)

Lower Division Course

92. Internship in Biological Chemistry (1-12)

Internship—3-36 hours; final report. Prerequisite: consent of instructor. Supervised work experience in biological chemistry and related fields. (P/NP grading only.)

Upper Division Courses

192. Internship in Biological Chemistry (1-12)

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to internship by preceptor. Supervised work experience in Biological Chemistry and related fields. (P/NP grading only.)

198. Group Study (1-5)

Prerequisite: consent of instructor. For undergraduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

209. Prostaglandins/Leukotrienes and Related Lipids (2)

Lecture—2 hours. Prerequisite: Biochemistry 101A-101B or Physiological Sciences 101A-101B or Physiology 100A-100B. Oxidative desaturation/elongation of polyunsaturated fatty acids. Biosynthesis of prostaglandins/leukotrienes from polyunsaturated fatty acids. Chemistry, biochemistry, and metabolism. Nutritional regulation. Physiological/

pathophysiological implications; pharmacological and clinical relevance. Offered in alternate years.—(II.) Ziboh

214. Molecular Medicine (1)

Discussion—1 hour. Prerequisite: course in molecular genetics, molecular and cellular biology, biochemistry or the equivalent. Series of lectures on current topics of molecular genetics related to medicine. Material stresses concepts derived from genetic research which have some potential clinical relevance. (Same course as course 414.) (S/U grading only.)—II. (II.) Seldin

217. Molecular Genetics of Fungi (3)

Lecture—3 hours. Prerequisite: graduate standing in a biological science; Biochemistry 101B; Genetics 100, 102A; Botany 119; Plant Pathology 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. Offered in alternate years. (Same course as Plant Pathology 217.)—II. Holland, Tyler

222. Mechanisms of Translational Control (2)

Lecture—1 hour; discussion—1 hour. Prerequisite: Biochemistry 201C or consent of instructor. Molecular mechanisms of protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. An advanced graduate-level treatment of topics of current interest, with readings and discussion of primary papers from the literature. Offered in alternate years.—II. Hershey

230. Practical NMR Spectroscopy and Imaging (1)

Lecture—1 hour. Prerequisite: Chemistry 107A-107B, Physics 5A-5B-5C or 9A-9B-9C, or consent of instructor. Basic theory, experimental methods, and instrumentation of NMR. Enables students to understand NMR spectroscopy and imaging experiments. (S/U grading only.)—I. (I.)

231. Biological Nuclear Magnetic Resonance (3)

Lecture—3 hours. Prerequisite: Molecular and Cellular Biology 221A or the equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as Biophysics 231.)—III. (III.) Jue

291. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)

Seminar—1 hour. Prerequisite: student in Genetics Graduate Group of consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 491.) (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

298. Group Study (1-5)

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Courses

410A. Molecular and Cell Biology (3.5)

Lecture—4 hours. Prerequisite: approval by Committee on Student Progress. Basic biochemistry of proteins and nucleic acids, molecular genetics, regulation of gene expression, enzymes and structural proteins. Applications to clinically relevant systems, particularly sickle cell anemia, thalassemias, immunoglobulins and monoclonal antibodies, oncogenes, cell proliferation control. (P/F grading only.)—I. Voss

410B. Cell Biology and Metabolism (3)

Lecture—3 hours. Prerequisite: approval of the Committee on Student Progress. Introduction to the transport of small molecules and ions across membranes followed by study of energy metabolism and biosynthetic processes in humans. Membrane receptors are considered as they regulate to basic metabolic processes. Correlations to human disease. (P/F grading only.)—II. Jue, Troy

414. Molecular Medicine (1)

Discussion—1 hour. Prerequisite: course in molecular genetics, molecular and cellular biology, biochemistry or the equivalent. Series of lectures on current topics of molecular genetics related to medicine. Material stresses concepts derived from genetic research which have some potential clinical relevance. (Same course as course 214.) (H/P/F grading only.)—II. (II.) Seldin

418. Mammalian Endocrinology and Homeostasis (4)

Lecture—3 hours; discussion—3 hours. Prerequisite: approval of Committee on Student Progress. Physiological and biochemical properties of the mammalian endocrine system both at the cellular and systemic level. Principles that regulate homeostasis, especially in organ-organ interrelationships, metabolites and minerals. Reproductive endocrinology. (Same course as Human Physiology 418.) (P/F grading only.)—III. (III.) Turgeon

419. Introduction to Clinical Nutrition (2.5)

Lecture—2 hours; lecture/discussion—2 hours. Prerequisite: approval of Committee on Student Progress. Basic and clinical concepts of human nutrition. Nutrient homeostasis and regulation and current perspectives on the role of nutrition in disease. (Same course as Internal Medicine 419.) (P/F grading only.)—Halsted

491. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)

Seminar—1 hour. Prerequisite: student in Genetics Graduate Group of consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 291.) (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

497T. Tutoring in Biological Chemistry (1-5)

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

498. Group Study (1-5)

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

499. Research (1-12)

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

Cell Biology and Human Anatomy (CHA)

Upper Division Courses

101. Human Gross Anatomy (4)

Lecture—4 hours. Prerequisite: Biological Sciences 1B; concurrent enrollment in course 101L strongly recommended. A detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. GE credit: Sci-Eng.—II. (II.) Gross

101L. Human Gross Anatomy (3)

Laboratory—6 hours; lecture/discussion—3 hours. Prerequisite: course 101 (may be taken concurrently). A detailed study of prosected human cadavers in small group format with extensive hands-on experience. GE credit with concurrent enrollment in 101: Wrt.—II. (II.) Gross

192. Internship in Morphology (1-12)

Internship—3-36 hours; final report. Prerequisite: upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship. Experience of supervised internship in research laboratories of members of the department. (P/NP grading only.)

197T. Tutoring in Cell Biology and Human Anatomy (1-5)

Discussion—1 hour; laboratory—6-9 hours. Prerequisite: completion of course 101 with a grade of B or better and consent of instructor. Provides laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor. (S/U grading only.)

198. Directed Group Study (1-5)

Discussion—1-10 hours. Prerequisite: consent of instructor. Directed reading, discussion, and/or laboratory experience on selected topics. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Tutoring: consent of instructor. (P/NP grading only.)

Graduate Courses

200. Gross Anatomy—Graduate Courses (9)

Lecture—6 hours; laboratory—12 hours. Prerequisite: approval by committee on student evaluation and promotion. Integrated presentation of developmental, gross, and radiologic anatomy. Four students assigned to cadaver and dissect entire body. Embryology and radiology are correlated with the dissections. Embryology is covered from implantation to birth.—I. (I.) Tucker

202. Human Microscopic Anatomy (5)

Lecture—3 hours; laboratory—6 hours. Examines the normal microscopic structure of the basic cells, tissues, and organs of the body. Lectures emphasize morphology and structure-function relationships. Accompanying laboratories involve analysis and identification of sectioned material at the light microscopic and ultrastructural levels.—II. (II.) Primakoff

203. Neurobiology (5)

Lecture—5 hours; laboratory—3 hours. Prerequisite: two upper division or one graduate course in Neurobiology; consent of instructor. Not open to undergraduate students. Gross and microscopic anatomy of the central nervous system; motor and sensory pathways; neurophysiology and cognitive functions.—III. (III.) Kumari

290. Seminar (1)

Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only.)—I, III. (I, III.)

290C. Research Group Conference (1)

Discussion—1 hour. Prerequisite: graduate student with research experience (may be taken concurrently); consent of instructor. Discussion of problems, progress and literature relevant to current research undertaken by laboratory groups in Human Anatomy. (S/U grading only.)—I, II, III. (I, II, III.)

292. Fertilization and Gamete Literature Critique (1)

Discussion—1 hour. Prerequisite: consent of instructor. Critical evaluation of current journal articles dealing with cell biology and biochemistry of gametes and fertilization. Selected papers will be presented and discussed in detail by students and faculty. May be repeated for credit. (S/U grading only.)—I, III. (I, III.) Meizel

298. Advanced Group Study (1-5)

Prerequisite: consent of instructor.

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Courses

400. Developmental, Gross, and Radiologic Anatomy (7.5)

Lecture—4 hours; laboratory—12 hours. Prerequisite: consent of Committee on Educational Progress.

An integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth. (P/F grading only.)—I. Tucker

402. Human Microscopic Anatomy (4.5)

Lecture—3 hours; laboratory—5 hours. Prerequisite: approval of the Committee on Student Progress. Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and identification of sectioned material at the light microscopic and ultrastructural levels. (P/F grading only.)—II. Primakoff

403. Neurobiology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: approval of Committee on Student Progress. Physiology and anatomy of the normal human nervous system. Gross and microscopic brain structure, functional neuroanatomy, and the physiology, biochemistry, and pharmacology of the nervous system. (Same course as Human Physiology 403.) (P/F grading only.)—III. (III.) Kumari, Carlsen

497T. Tutoring in Human Anatomy (1-5)

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine. (H/P/F grading only.)

498. Advanced Group Study (1-12)

Prerequisite: medical students, interns, and residents with consent of instructor. Directed reading and group discussion and/or laboratory experience on selected topics. (H/P/F grading only.)

499. Research (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

Clinical Psychology (CPS)

Graduate Course

299. Research (1-12)

Prerequisite: graduate student in Clinical Psychology or consent of instructor. Individual or group research on selected topics. (S/U grading only.)—Morrison

Dermatology (DER)

Upper Division Courses

192. Internship in Cutaneous Biology (1-4)

Internship—8-20 hours; final report. Prerequisite: upper division standing or consent of instructor. Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. (P/NP grading only.)—Isseroff

199. Special Study in Cutaneous Biology (1-4)

Prerequisite: advanced undergraduate standing and/or consent of instructor. Special study by individual arrangement of specialized topics in biology of skin. Work may be assigned readings, laboratory research or a combination. (P/NP grading only.)

Graduate Course

299. Research in Cutaneous Biology (1-12)

Laboratory—3-36 hours. Prerequisite: consent of instructor. Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology. (S/U grading only.)

Professional Courses

420. Integumentary System (2)

Lecture/discussion—4 hours (for 6 weeks). Prerequisite: approval by Committee on Student Evaluation and Promotion. Covers cell biology, pathology, and physical diagnosis of the skin and is designed to prepare medical students for clinical service. Recognition of normal variations, and common or important dermatoses is emphasized. Patient demonstrations of select conditions are included. (P/F grading only.)—IV.

460. Dermatology Clinical Clerkship (6)

Clinical activity (inpatient/outpatient service)—40 hours for four weeks. Prerequisite: completion of

three years of medical school; or consent of instructor. Observation and participation in dermatology clinics/practice and participation in Ward Rounds and Dermatology Clinics at UCD Medical Center, Kaiser, and private practitioner offices. Limited enrollment.—I, II, III, IV. (I, II, III, IV.) Lynch

480. Insights in Dermatology (1-3)

Clinical activity—3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Huntley

495. Wound Healing: From Bench to Bedside (6)

Clinical activity—12 hours; laboratory—8 hours; autotutorial—15 hours; term paper. Prerequisite: Medical students only. An integrated, multi-specialty approach to clinical soft tissue wound healing.—I, II, III, IV. Rivkah

498. Special Topics in Clinical Dermatology (1-6)

Independent study—3-18 hours. Prerequisite: medical students with consent of instructor. Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients. (H/P/F grading only.)

499. Research in Cutaneous Biology (1-12)

Laboratory—3-36 hours. Prerequisite: consent of instructor. Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty. (H/P/F grading only.)

Epidemiology and Preventive Medicine (EPP)

Lower Division Course

92. Internship in Community Health (1-12)

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Students apply theory and concepts learned in the classroom through field work in a community health agency. (P/NP grading only.)

Upper Division Courses

101. Perspectives in Community Health (3)

Lecture—3 hours. Prerequisite: undergraduate standing. Covers comprehensively the responsibilities, obligations, roles and professional activities of various health care disciplines in the community; provides students with perspectives on preventive medicine in society.—III. (III.) Cassidy

160. Introduction to Community Health Education and Promotion (1)

Lecture/discussion—1 hour. Introduction to community-based and peer health education/health promotion. Focus on health issues and behaviors affecting college-age young adults. (P/NP grading only.)—III. (III.) Lindsay, Belden, Lake

161. Campus Alcohol/Drug Abuse Prevention Program Peer Educator Training (4)

Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 (may be taken concurrently). Preparation for internship in campus and community substance abuse prevention and educational intervention. Addiction and other physiological responses to alcohol and other drugs. Harm-reduction strategies for individuals and target populations. High risk behaviors. Practice in peer counseling skills and outreach presentations to small and large groups. (P/NP grading only.)—III. (III.) Lake

162. Health Advocates Peer Educator Training (4)

Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 (may be taken concurrently). Preparation for internship in campus and community health promotion and risk reduction. Nutrition, stress management, physical fitness, body image and disordered eating, skin cancer prevention, and other general wellness/health promotion topics. (P/NP grading only.)—III. (III.) Belden, Gruhn

163. Peer Counselors in Sexuality Training (4)

Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 (may be taken concurrently). Preparation for internship in campus and community sexual health promotion. Reproductive anatomy and physiology, contraceptive options, safer sex and sexually transmitted disease prevention, healthy relationships and communication skills, gender roles/orientation/expression, culture and religion as influences on sexuality. Practice in peer counseling and outreach presentations to small and large groups. (P/NP grading only.)—III. (III.) Lindsay, Lake, Gruhn

164. Peer Counselors in Athletics Training (1)

Lecture/discussion—1 hour. Prerequisite: course 160 and Physical Education 40 (may be taken concurrently). Preparation for internship in athlete-to-athlete health promotion program. Peer health education in nutrition, body image, eating disorders, stress management, exercise and athletic training injury prevention, addictions and other physiological responses to alcohol/tobacco/performance enhancement and other drugs. Health risk issues unique to athletics. Practice in peer counseling and outreach presentations to small and large groups. May be repeated up to 5 units of credit. (P/NP grading only.)—I, II, III. (I, II, III.) Lake

188. Economics of Preventive Medicine (3)

Lecture—2 hours; discussion—1 hour. Assessment of the benefits and costs of proposals to improve aggregate health of groups of people and the health of individuals. Issues include cigarette taxes, hazardous wastes, diet, exercise, and breast cancer screening, among others.—III. (III.) Leigh

190C. Research Conference in Community and International Health (1)

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress, and techniques in Community and International Health. Critical discussion of recent journal articles. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Gold, Samuels, Haan

192. Internship in Community Health Practice (1-12)

Internship—3-36 hours. Prerequisite: upper division and graduate students; consent of instructor. The student, through fieldwork in a community health agency, learns to apply theory and concepts learned in the classroom. (P/NP grading only.)

198. Study in Community and International Health (1-5)

Prerequisite: undergraduate standing and consent of instructor. Study and experience for undergraduate students in any number of areas in community and international health. (P/NP grading only.)

199. Research in Community and International Health (1-5)

Prerequisite: undergraduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (P/NP grading only.)

Graduate Courses**222. Social and Behavioral Science Approaches to Public Health Issues (3)**

Lecture/discussion—3 hours. Prerequisite: Statistics 102 and 16 or the equivalent, graduate standing, consent of instructor. Concepts and methods of social and behavioral sciences relevant to the identification and solution of public health problems. Topics include nutrition, physical activity, smoking, socioeconomic status, gender, race/ethnicity, stress, social support, social marketing, media advocacy and behavioral theories of change.—II. Gibson

255. Human Reproductive Epidemiology (3)

Lecture—3 hours. Prerequisite: Preventative Veterinary Medicine 405, 406, Physics 220, Physiology 222 or equivalents, or consent of instructor. Human reproductive effects and risk of reproductive disorders, examined from macro- and micro-environmental

exposures in community and occupational settings, epidemiologic study designs and analyses. Offered in alternate years.—(I.) Gold

262. Principles of Environmental Health Science (3)

Lecture—3 hours. Prerequisite: consent of instructor. Principles, approaches and issues related to environmental health. Recognizing, assessing, understanding and controlling the impact of people on their environment and the impact of the environment on the public.—I. (I.) Lee

273. Health Services Administration (3)

Lecture—3 hours. Prerequisite: consent of instructor. Structure and function of public and private medical care. Topics include categories and trends in national medical spending, predictors of patient use, causes of death, managed care, HMOs, Medicare, Medicaid, costs of technology, and medical care in other countries.—II. (II.) Leigh

290. Topics in Public Health (1)

Seminar—1 hour. Prerequisite: open to students in Master of Public Health program or consent of instructor. Seminar on key issues and current topics in public health. May be repeated for credit up to 3 times. (S/U grading only.)—I, II. (I, II.) McCurdy, Schenker, Leistikow

297. Public Health Practicum (1-8)

Fieldwork—3-16 hours; term paper. Open to students in Master of Public Health. Practical fieldwork experience in public health. Placement site varies. May be repeated up to 8 units of credit. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III, IV. (I, II, III, IV.) McCurdy

298. Study in Community and International Health (1-5)

Prerequisite: graduate student in good academic standing and consent of instructor. Study and experience for graduate students in any number of areas in community and international health. (S/U grading only.)

299. Research in Community and International Health (1-12)

Prerequisite: graduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (S/U grading only for graduate students.)

Professional Courses**402. Introductory Medical Spanish (2)**

Lecture—2 hours. The vocabulary needed to conduct a basic history and physical examination in Spanish. (H/P/F grading only.)—III. (III.)

421. Principles of Epidemiology and Preventive Medicine (2.5)

Lecture—4 hours; discussion—3 hours. Prerequisite: consent of Committee on Student Progress. Preventive medicine principles and epidemiologic tools necessary for their application. Measurement of health of populations, fundamentals of study design, strengths and limitations of diagnostic tests, and critical review of medical literature. (P/F grading only.)—I. McCurdy

455. Multidisciplinary Clinical Preceptorship (4.5)

Clinical activity—full time (3 weeks). Prerequisite: second-year student in good academic standing. Students will be introduced to basic principals of geriatric health care and provided with opportunities for clinical observation and experience in a variety of facilities that serve older adults. Multidisciplinary nature of geriatrics will be emphasized. (H/P/F grading only.)—IV. (IV.)

461. Clerkship in Community Health Group Practice (3-9)

Clinical activity—full time (2-6 weeks). Prerequisite: third- or fourth-year medical student. Overview of local community health in group practice situations. Students participate in treatment at several clinic sites in Yolo County. Topics include primary care, environmental health, maternal and child health, jail

health, and preventive health care for the aged. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

465. Community Health Preceptorship (3-18)

Clinical activity—full time (2-12 weeks). Prerequisite: fourth-year medical student. Students participate at the California Department of Health Services in ongoing investigations into current public health problems, e.g., birth defects, cancer control, diabetes, hypertension, injury control, infectious diseases, aging, Alzheimer's disease, and smoking and tobacco use control. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

466. Occupational and Environmental Medicine Elective (6-12)

Clinical and laboratory experience—full time (4 to 8 weeks). Prerequisite: fourth-year medical student and consent of instructor. Participate in activities of Occupational and Environmental Health Unit. Major activity is involvement in an epidemiologic research project of the University. Also participate in Ambulatory Occupational and Environmental Medicine Clinic at UCDC Medical Center. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Schenker

470. Clinical Selective in Occupational and Environmental Medicine (3)

Clinical activity—full time. Prerequisite: fourth-year medical students in good academic standing, with consent of instructor. Outpatient clinical experience in Occupational and Environmental Medicine at UCDCMC and in local industries. Participants will gain experience in evaluating occupational and environmental medical conditions, use of medical literature resources, the worker's compensation system, and toxicological principles. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McCurdy

480. Insights in Occupational and Environmental Medicine (1-3)

Clinical activity—3-9 hours. Prerequisite: first- or second-year medical student in good academic standing; consent of instructor. Students will observe and participate in research and clinical activities in occupational and environmental medicine which include conferences, occupational and environmental medicine clinical activities and field visits. Students develop and present small individual research projects. (Former course Occupational and Environmental Health 480.) (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Schenker

481. Senior Partnership (1-3)

Clinical activity—3-9 hours. Prerequisite: first- or second-year medical student or consent of instructor. Introduction to concepts of geriatric health care. Students are matched with elderly patients from the community for a project on health and aging; field experiences in clinical geriatrics; attendance at SOM lectures concerning geriatrics or the elderly patient. (Former course 480.) (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Haan

495. International Health Care (1)

Lecture/discussion—1 hour. Prerequisite: medical student in good academic standing. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (H/P/F grading only.)—I. (I.) Schenker

498. Study in Community and International Health (1-5)

Prerequisite: medical student in good academic standing and consent of instructor. Study and experience for medical students in any number of areas in community and international health. (H/P/F grading only.)

499. Research in Community and International Health (1-9)

Prerequisite: medical students with consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (H/P/F grading only.)

Family and Community Medicine (FAP)

Lower Division Course

92C. Primary Care Clinics (2)

Clinical activity—6–8 hours; seminar—2 hours; lecture—1–2 hours. Prerequisite: consent of instructor, enrollment at the UC Davis campus, for freshman and sophomore students. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience exposes lower division students to health care delivery, patient histories, physical examinations, health promotion, disease prevention, diagnosis; treatment of episodic, acute, chronic illness; appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Arevalo

Upper Division Courses

192A. Internship in Family Practice (1-12)

Internship—3–36 hours. Prerequisite: upper division standing and consent of instructor. Work experience supervised in the Department of Family Community Medicine. Upper division students provided an opportunity to acquire research experience in a clinical laboratory setting. (P/NP grading only.)

192C. Primary Care Clinics (2)

Clinical activity—6–8 hours; seminar—2 hours; lecture—1–2 hours. Prerequisite: consent of instructor, enrollment at the UC Davis campus, upper division standing. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience introduces students to health care delivery; patient histories and physical examinations; health promotions and disease prevention; diagnosis and treatment of episodic, acute, and chronic illness; basic laboratory testing; appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Arevalo, Day

195. Health Care to Underserved Populations (1)

Lecture—1 hour. Prerequisite: sociology, political science, or applied behavioral science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations in California impacting their health; roles of family/interpersonal relationships in making health care decisions; and clinician's perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. (P/NP grading only.)—II. (II.) Nesbitt, Crichlow

Graduate Courses

The following courses are for students enrolled in the Family Nurse Practitioner/Physician Assistant (FNP/PA) program.

240A-240B-240C-240D-240E-240F. Clinical Preceptorship (1-13)

Clinical activity—9–36 hours. Prerequisite: enrollment in the Master's Track of the FNP Certificate Program, and successful completion of each preceding 240A-F section. Diagnosis and treatment of patients of all ages in an ambulatory care setting, under the supervision of a preceptor. May be repeated twice for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) DeAmicas

242A-242B. Clinical Role Seminar (1.5-1.5)

Seminar—1.5 hours. Prerequisite: course 240 concurrently and student in the Master's Track of the FNP certificate program. Accompanies course 240 and provides a small group forum for students to explore role development and clinical management issues based on nursing theories and research. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.) DeAmicas, Trollinger

252A. Professional Role Development (1.5)

Lecture/discussion—1.5 hours. Prerequisite: enrollment in the Master's Track of the FNP Certificate Program. Provides opportunity to discover strategies for promoting role development and role satisfaction via discussion of pertinent issues, theory, and research. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) DeAmicas

252B. Nurse Practitioner as Leader (1.5)

Lecture/discussion—1.5 hours. Prerequisite: course 252A and concurrent enrollment in Master's Track of the FNP Certificate Program. Study of advanced practice role of nurse practitioner. Overview of legal and regulatory issues, certification and malpractice liability issues. Includes critical analysis of theories, issues and research related to nurse practitioner role development and applied legislation through community involvement. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) DeAmicas

264. Psychosocial Concepts and Issues in Primary Care (2)

Lecture/discussion—2 hours. Prerequisite: B.S. degree in nursing and enrollment in the Master's Track of the FNP Certificate Program. Introduces the principles of effective communication in establishing the therapeutic provider-patient relationship. Provides an examination of relevant psychosocial concepts and issues related to primary care. Research and theory are emphasized.—I, II, III, IV. Trollinger, Hass

266A. Health Maintenance/Promotion (2)

Lecture—2 hours. Prerequisite: B.S. degree in nursing and enrollment in the Master's Track of the FNP Certificate Program. Focuses on the health and wellness of individuals throughout the lifespan. Critical analyses of nursing interventions in health promotion and maintenance based on nursing and other theoretical frameworks and research data are emphasized.—I. (I.) DeAmicas

266B. Family Nursing Theory (1)

Lecture—1 hour. Prerequisite: enrolled in master's track of the FNP Certificate Program or consent of instructor. Exploration of family theories as related to advanced primary care nursing practices.—I, II, III. (I, II, III.)

266C. Family Nursing Interventions (2)

Lecture—2 hours. Prerequisite: course 266B and enrollment in the Master's Track of the FNP Certificate Program. Course integrates family theoretical and therapeutic concepts to focus on nursing assessment and intervention strategies for family problems in health and illness.—III. (III.) Hass

266D. Community Assessment and Intervention (1)

Lecture—1 hour. Prerequisite: enrollment in the Master's Track of the FNP Certificate Program. The relationship between advanced primary care nursing practice and community is explored. Community assessment and intervention strategies appropriate for the family nurse practitioner are discussed. May be repeated twice for credit.—II. (II.) Trollinger

Professional Courses

The following courses are for students enrolled in the Family Nurse Practitioner/Physician Assistant (FNP/PA) Program.

300. Health Assessment for Advanced Practice (4.5)

Lecture/discussion—4.5 hours. Prerequisite: enrolled in the FNP/PA Certificate Program, or consent of instructor. Advanced concepts and skills in health and physical assessment essential to the clinical decision making and caring process for the FNP, PA or advance practice nurse. Emphasis on eliciting an accurate and thorough history and performing a physical examination.—I, II, III, IV. (I, II, III, IV.) White, Stewart, DeAmicas

331A. Scientific Basis of Diseases—A (4)

Independent study—3 hours; lecture/discussion—1 hour. Prerequisite: registered student in the FNP/PA Certificate Program or consent of instructor. Anatomy, physiology and concepts of pathophysiology.—I, II, III, IV. (I, II, III, IV.) Hoody, Fraser

331B. Scientific Basis of Disease—B (1)

Independent study—0.5 hours; lecture/discussion—0.5 hours. Prerequisite: course 331A, registered student in the FNP/PA Certificate Program or consent of instructor. Neurological and renal diseases and abnormalities of adrenal function. Builds on concepts covered in prior coursework; Web-enhanced course.—I, II, III, IV. (I, II, III, IV.) Fraser

340. Clinical Preceptorship for FNP/PA Students (22)

Clinical activity—15 hours. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Student spends 15 hours per week in an approved preceptorship in patient care developing clinical skills necessary to assess and manage patients with common problems seen in primary care. May be repeated twice for credit (P/NP grading only; deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.)

341. Advanced Clinical Preceptorship for FNP/PA Students (23)

Clinical activity—16 hours. Prerequisite: registered student in Family Nurse Practitioner/Physician Assistant Program and successful completion of course 340. Student spends 3–40 hours per week in an approved clinical preceptorship to build on clinical skills learned in course 340. Assessment and management of patients with complex medical problems. May be repeated twice for credit. (P/NP grading only; deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.)

344. Inpatient Surgical Experience for FNP/PA Students (3)

Clinical activity—9 hours. Prerequisite: Registration in the FNP/PA program. Course 340, 240A, 240B, 240C, 354A, 354B, 354C, or consent of instructor. Student clerkships in the inpatient setting in surgery at UCDCMC and/or affiliated institutions. Designed to expose the students to inpatient management of surgical patients; acquaint student with FNP/PA role in surgical setting. May be repeated twice for credit (Deferred grading only, pending completion of sequence.)—I, II, III, IV. Rios

346. Clinical Geriatrics (3)

Clinical activity—90 hours. Prerequisite: registered student in the FNP/PA program and successful completion of course 340A-340B-340C and 354A-354B-354C and 365A-365B-365C or consent of instructor. Application of principles of geriatric care in the outpatient, nursing home, acute hospitals and community settings that provide services for the elderly, including visits to patients' homes. (P/NP grading only; Deferred grading only, pending completion of sequence.)—II-III-IV. (II-III-IV.) Rios

347. Inpatient Medical Experience for FNP/PA Students (4)

Clinical activity—12 hours. Prerequisite: Registration in the FNP/PA program. Course 340, 240A, 240B, 240C, 354A, 354B, 354C, or consent of instructor. Student clerkships in the inpatient setting in Family Practice at UCDCMC and/or affiliated institutions. Designed to expose the students to inpatient management; acquaint student with FNP/PA role in the inpatient setting. May be repeated twice for credit. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. Rios

350. Ethics and Trends in Health Care for FNP/PA Students (2)

Lecture/discussion—2 hours. Prerequisite: registered student in the FNP/PA Program. Trends and ethical issues in health care, review of the process and policies for ethical decisionmaking in patient care. These issues, trends, and processes will be related to the role of the Family Nurse Practitioner/Physician Assistant.—III. (III.) Smith, Hass

353. Geriatric Medicine for FNP/PA Students (1)

Lecture—1 hour. Prerequisite: registered student in the FNP/PA Program. Introduction to advanced concepts in geriatric medicine. Comprehensive assessment, decision making, and management of selected medical problems encountered in primary care. Appropriate consultation and referral are discussed. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Trollinger, Rios

354A-354B-354C. Fundamentals of Primary Health Care for FNP/PA Students (4-5-4)

Lecture/discussion—4–5 hours. Prerequisite: registered student in FNP/PA Program. Study of anatomy and physiology, pathophysiology, diagnostic criteria, approaches to assess and manage common medical problems seen in primary health care. May be

repeated for credit.—I-II-III. (I-II-III.) Emblen, Hasselbach, Barakzai

355A. Advanced Principles of Health Care for FNP/PA Students (4)

Lecture/discussion—4 hours. Prerequisite: registered student in the FNP/PA Program; course 354A-354B-354C. Study of anatomy and physiology, pathophysiology, diagnostic criteria and approaches to assess and manage patients with complex and/or multiple health care problems in primary care settings, and to learn the management of patients in inpatient settings. May be repeated for credit.—I, II, III, IV. (I, II, III, IV.)

355B. Advanced Principles of Primary Health Care (5)

Lecture/discussion—5 hours. Prerequisite: registered student in the FNP/PA Program; successful completion of course 354A-354B-354C. Anatomy and physiology, pathophysiology, diagnostic criteria, approaches to assessment and management of patients with complex and/or multiple health care problems in primary care settings.—I, II, III, IV. (I, II, III, IV.)

355C. Advanced Principles of Health Care for FNP/PA Students (4)

Lecture/discussion—4 hours. Prerequisite: registered student in the FNP/PA Program; course 354A-354B-354C. Study of anatomy and physiology, pathophysiology, diagnostic criteria and approaches to assess and manage patients with complex and/or multiple health care problems in primary care settings, and to learn the management of patients in inpatient settings. May be repeated for credit.—I, II, III, IV. (I, II, III, IV.)

355D. Advanced Principles of Health Care for FNP/PA Students (4)

Lecture/discussion—4 hours. Prerequisite: registered student in the FNP/PA Program; course 354A-354B-354C. Study of anatomy and physiology, pathophysiology, diagnostic criteria and approaches to assess and manage patients with complex and/or multiple health care problems in primary care settings, and to learn the management of patients in inpatient settings. May be repeated for credit.—I. (I.)

358. Pharmacology (6)

Lecture/discussion—6 hours. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Core knowledge in pharmacokinetics and pharmacodynamics, and clinical therapeutics necessary to make rational and optimal therapeutic plans in ambulatory settings. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.)

361. Family Theory and Assessment (1)

Lecture—1 hour. Prerequisite: registered student in the FNP/PA Program. Examines the family using a family system framework within the context of its internal dynamics, relationship to community and cultural variations. May be repeated twice for credit.—II. (II.) Trolinger, Stewart

367A. Family Practice and Community Health for FNP/PA Students (2)

Lecture/discussion—2 hours. Prerequisite: registered student in the FNP/PA Program. Examines pediatric and adolescent concepts of growth and development as related to primary health care. Primary health care issues and needs will be assessed in relationship to family and community. Health promotion and disease concepts. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Barakzai, Trolinger

367B. Family Practice and Community Health for FNP/PA Students (1)

Lecture/discussion—1 hour. Prerequisite: registered student in the FNP/PA Program. Examines concepts of adult growth and development as related to primary health care. Issues and needs of the adult are examined in relationship to family and community, health promotion, disease prevention and wellness concepts. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Barakzai, Trolinger

367C. Family Practice and Community Health for FNP/PA Students (1)

Lecture/discussion—1 hour. Prerequisite: registered student in the FNP/PA Program. Examines concepts

of development in the elderly as related to primary health care. Health care issues and unique needs are presented with an emphasis on health promotion and disease prevention. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Barakzai, Trolinger

368A. Behavioral Science for FNP/PA Students (1)

Lecture/discussion—1 hour. Prerequisite: registered student in the FNP/PA Certificate Program or consent of instructor. Principles of effective communication in therapeutic provider-patient relationship. History taking techniques that foster empathy and respect. Biopsychosocial model of health care.—I, II, III, IV. (I, II, III, IV.) Stewart

368B. Behavioral Science (1)

Lecture/discussion—1 hour. Prerequisite: completion of course 368A and registered student in the Family Nurse Practitioner/Physician Assistant Program. Exploration into a variety of addictive behaviors within diverse populations. Utilization of clinical case studies to develop skills in the identification, interview and management of these patients and recognition of how these behaviors impact the family system.—I, II, III, IV. (I, II, III, IV.)

368C. Behavioral Science (1)

Lecture/discussion—1 hour. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Multicultural perspectives of health. Traditional health, beliefs and healing practices of several California cultures.—I, II, III, IV. (I, II, III, IV.)

368D. Behavioral Science for FNP/PA Students (1)

Lecture—1 hour. Prerequisite: registered student in the FNP/PA Program. Basic principles of assessment, counseling and treatment of individual patients, their families and support systems as they experience the effects of chronic illnesses, chronic pain, terminal diseases, death and grieving. Students are strongly encouraged to explore their coping styles. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Stewart

370A-370B-370C-370D-370E-370F. Clinical Case Seminars for FNP/PA Students (1.5-1.5-1.5-1.5-1.5)

Seminar—1.5 hours. Prerequisite: registered student in the FNP/PA Program. Designed to increase critical thinking by utilizing the development and processing of the differential diagnoses of several cases based on the topics covered in the medicine course (course 354, 355) taught the same quarter. May be repeated twice for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Trolinger, Stewart

372A. Professional Development for FNP/PA Students (1.5)

Lecture/discussion—1.5 hours. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Understanding the Family Nurse Practitioner (FNP) and Physician Assistant (PA) roles, history of the profession and impact of FNP and PA on health care systems; critical review of medical literature including introduction to evidence based medicine and statistics; managed care. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) Hasselbach

372B. Professional Development for FNP/PA Students (1.5)

Lecture/discussion—1.5 hours. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Roles of the Family Nurse Practitioner (FNP) and Physician Assistant (PA) including legal and regulatory issues affecting practice, licensing requirements, elements of negotiating a job, legislative and political awareness, and community involvement. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) DeAmicas, Hasselbach

390. Health Care of the Western Farmworkers (2)

Independent study—1.2 hours; clinical activity—2.4 hours. Prerequisite: Enrollment in the Family Nurse Practitioner/Physician Assistant Program. Basic concepts for providing primary health care to migrant

and seasonal agricultural workers. (P/NP grading only; deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.)

399. Special Study (1-12)

Prerequisite: enrolled in the FNP/PA Certificate Program or consent of instructor. Research and clinical interests to enhance education in family practice. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

Professional Courses

400A. Introduction to Patient Evaluation (2)

Discussion—2 hours; clinical activity—1 hour. Prerequisite: consent of Committee on Student Progress. Practice dealing with communication problems; continuity preceptorship and introduction to emergency medicine. (Deferred grading only, pending completion of sequence. P/F grading only.)—I. Jerant, Callahan

400B. Introduction to Patient Evaluation (2)

Discussion—2 hours; clinical activity—1 hour. Prerequisite: consent of Committee on Student Progress. Basic physical examination skills through small group interactions; continuity preceptorship. (P/F grading only.)—II. Jerant, Callahan

400C. Introduction to Patient Evaluation (2)

Lecture/discussion—2 hours; clinical activity—1 hour. Prerequisite: consent of Committee on Student Progress. Practice dealing with communication problems; continuity preceptorship. (P/F grading only.)—III. Jerant, Callahan

401. Introductory Preceptorship in Family Practice (3-9)

Clinical activity—20-40 hours. Prerequisite: completion of first year of medical training. Preceptorship in family practice offered as an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician's office, doing patient interviews, history-taking, and performing physical exams. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

407. Davis Community Clinic (3)

Clinical activity—8 hours. Prerequisite: second-year medical student in good academic standing. Students learn to diagnose and treat common medical problems as seen at a community clinic, under the direct supervision of a physician. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

421. Understanding the Healthcare System of the U.S.A. (1)

Seminar—2 hours (5 weeks). Prerequisite: medical student in good standing, graduate student or undergraduate with consent of instructor. Seminar series provides insight into the present structure of the health care system of the United States, including history development, health care economics, managed care, and the future of medical care delivery. (H/P/F grading only.)—I. (I.) Chapman

430. Primary Care Clerkship (12)

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week primary care clerkship for third year medical students. Four week primary care experience with an additional four weeks in Internal Medicine clinics. (H/P/F grading only.)—I, II, III, IV. Morgan

434. Primary Care Clinics (3-12)

Clinical activity—32-36 hours; seminar—0-2 hours; lecture—1-2 hours. Prerequisite: open to medical students in all four years of medical school. Medical students will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Arevalo, Day

440. Ambulatory Care Clerkship (3-12)

Clinical activity—40 hours. Prerequisite: third year primary care plus clerkship. Ambulatory medicine experience in a family practice setting. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an outpatient setting. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Morgan

460. Geriatrics in Community Health (3-6)

Fieldwork—24 hours; clinical activity—12 hours; lecture—4 hours. Prerequisite: course 430. Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and case management specialists. Observation and participation in MMSE's, patient-family conferences, interdisciplinary team meetings, neuropsychiatric testing and home visit evaluations. (H/P/F grading only.)—I, II, III, IV. Xakellis

462. Advanced Preceptorship in Family Medicine (3-18)

Clinical activity—full time. Prerequisite: completion of third year of medical school or medical student with consent of instructor. Preceptorships with primary care physicians in a variety of settings. Involvement in direct patient care and daily activities under supervision of physician-preceptor. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Morgan

463. Selected Readings in Family Practice (1-9)

Discussion—3-27 hours. Prerequisite: medical student in good academic standing. Increase understanding of family practice through assigned reading and thorough discussion with faculty member. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

468. International Preceptorship in Family Practice (6-18)

Clinical activity—40 hours (4-10 weeks). Prerequisite: completion of first year of medical school. Preceptorship with a family practitioner in a foreign country (arranged by student contact or with assistance of the Department of Family and Community Medicine). Participate in clinical activities, analyze and report characteristics of the practice. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

469. Clerkship in Family Practice Residency (6-18)

Clinical activity—40 hours (4-10 weeks). Prerequisite: completion of third year of medical school or consent of instructor. Comprehensive primary medical care of patients in a family practice hospital or residency. Usually includes inpatient and outpatient experience. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

480. Insights in Family Practice (1-3)

Clinical activity—3 to 9 hours; required readings. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Exposure to family practice in outpatient clinical setting. Three to nine hours per week spent with a community physician preceptor who is a member of the clinical faculty. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

482. Medical Issues for Older Adults (1)

Lecture/discussion—1 hour. Prerequisite: medical students only. The medical needs of geriatric patients. Topics include societal prejudices regarding aging, special nutritional and exercise needs, pharmacologic challenges, maintaining independence, and end of life. Course may be repeated for credit 3 times. (S/U grading only.)—III. Gibbs

498. Directed Group Study in Family Practice (1-9)

Discussion—3-27 hours. Prerequisite: medical students with consent of instructor. Directed study on selected topics relating to family medicine and primary health care delivery; visits to and written analysis of selected innovative health care programs. (H/P/F grading only.)

499. Research (1-12)

Prerequisite: medical students with consent of instructor. Research in various aspects of the health care delivery system. (H/P/F grading only.)

Human Physiology (HPH)**Upper Division Courses****192. Internship in Human Physiology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in physiology and related fields. (P/NP grading only.)

198. Directed Group Study (1-5)

To be arranged. Prerequisite: consent of instructor. Directed reading, discussion and/or laboratory experience on selected topics. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Laboratory—3-15 hours; undergraduate research project. Prerequisite: senior standing in biology, chemistry, physics, psychology, or engineering. (P/NP grading only.)

Graduate Courses**200. Human Physiology (6)**

Lecture—48 hours total; discussion—12 hours total. Prerequisite: graduate standing and consent of instructor. General cellular and organ system physiology, including neural, cardiovascular, respiratory, gastrointestinal and urinary systems in the human. Lectures concurrent with course 400; research/discussion and laboratory/demonstration sessions, and examinations separate.—II. (II.) Carlsen, O' Donnell

210A. Advanced Physiology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physiology Ph.D. program, or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as Physiology 210A.)—I. (I.) Cala, Payne

285. Peripheral Circulation (3)

Lecture—1 hour; discussion—2 hours. Prerequisite: Physiology 111A, 113; or course 200 and consent of instructor. Lectures and critical analysis of papers on peripheral vascular function, including: structure/function and pressure/flow relationships, innervation, receptor pharmacology, endothelial and smooth muscle interactions, signal transduction, ion transport, permeability, paracrine mediators and disease mechanisms. Offered in alternate years.—(III.) Gray, O'Donnell

298. Group Study (1-5)

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Courses**400. Human Physiology (6)**

Lecture—4 hours; laboratory—4 hours. Prerequisite: consent of Committee on Student Progress. General, cellular and systemic physiology of cardiovascular, respiratory, gastrointestinal and urinary systems. (P/F grading only.)—II. Carlsen, O'Donnell

403. Neurobiology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: approval of Committee on Student Progress. Physiology and anatomy of the normal human nervous system. Gross and microscopic brain structure, functional neuroanatomy, and the physiology, biochemistry, and pharmacology of the nervous system. (Same course as Cell Biology and Human Anatomy 403.) (P/F grading only.)—III. Kumari, Carlsen

418. Mammalian Endocrinology and Homeostasis (4)

Lecture—3 hours; discussion—2 hours. Prerequisite: approval of Committee on Student Progress. Physiological and biochemical properties of the mammalian endocrine system both at the cellular and systemic level. Principles that regulate homeostasis, especially in organ-organ interrelationships, metabolites and minerals. Reproductive endocrinology. (Same course as Biological Chemistry 418.) (P/F grading only.)—III. (III.) Turgeon

497T. Tutoring in Human Physiology (1-5)

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)—Cala

498. Directed Reading and Group Study (1-4)

Discussion—2-8 hours. Prerequisite: medical student. Directed reading and discussion on selected topics in human physiology. (H/P/F grading only.)

499. Research (1-6)

Prerequisite: medical students with consent of instructor. Laboratory investigation on selected topics. (H/P/F grading only.)

Internal Medicine (IMD)**Lower Division Courses****92. Internship (1-4)**

Internship—3-12 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship in internal medicine and related fields. (P/NP grading only.)—Last

98. Directed Group Study (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Directed group study in medicine and related fields. (P/NP grading only.)—Last

99. Undergraduate Research in Medicine: Molecular and Cell Biology (1-3)

Prerequisite: consent of instructor. (P/NP grading only.)—Last

Upper Division Courses**192. Internship in Internal Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing. Supervised work experience in internal medicine and related fields. (P/NP grading only.)

194. Practicum in Community Health Clinics (1-3)

Clinical activity—5-15 hours on Saturday mornings and during the week as necessary, excluding holidays. Prerequisite: consent of instructor. The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities. May be repeated for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Kumagai

198. Directed Group Study (1-2)

Seminar—1-2 hours. Prerequisite: consent of instructor. Directed group study in medicine and related fields. (P/NP grading only.)—Last

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

Graduate Course**214. Topics in Medical Ethics (1)**

Seminar—1 hour. The complex moral, legal, and ethical dilemmas that patients, families, and health care providers face in today's clinics. May be repeated once for credit. (S/U grading only.)—I. Loewy

220D. Cardiovascular System (2.5)

Lecture/discussion—5.5 hours. Prerequisite: Human Physiology 200, graduate student status and consent of instructor. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders.—II. (II.) Laslett

250. Medicine and the Law (3)

Lecture/discussion—2 hours; project—2 hours. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (S/U grading only.)—II. Rich

Professional Courses**401A-401B-401C-401D. Physical Diagnosis Practicum (1-1-1.5-4)**

Lecture/discussion; fieldwork. Prerequisite: consent of Committee on Student Progress. Overall framework for performance of a history and physical exam and with identification of abnormal physical findings. (Deferred grading only, pending completion of sequence. P/F grading only.)—IV. Fisher, McMillan

419. Introduction to Clinical Nutrition (2.5)

Lecture—2 hours; lecture/discussion—2 hours. Prerequisite: approval of Committee on Student Progress. Basic and clinical concepts of human nutrition. Nutrient homeostasis and regulation and current perspectives on the role of nutrition in disease. (Same course as Biological Chemistry 419.) (P/F grading only.)—III. (III.) Halsted

420A. Hematology (2)

Lecture/discussion—3 hours; laboratory—2 hours. Prerequisite: consent of Committee on Student Progress. Normal hematopoiesis and basic disorders of blood cells, leukemia and lymphoma, transfusion therapy, immunoglobulin disorders, thrombosis and hemostasis. Normal and abnormal blood cells and the interpretation of common laboratory tests. (P/F grading only.)—I. Powell

420B. Gastrointestinal System (2.5)

Lecture/discussion—6 hours. Prerequisite: approval of Committee on Student Progress. Basic pathophysiological principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiological basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management. (P/F grading only.)—III. (III.) Rosario

420C. Pulmonary and Critical Care Medicine (2.5)

Laboratory/discussion—5.5 hours. Prerequisite: approval of Committee on Student Progress. Clinical aspects of respiratory anatomy, physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases and disorders, and critical care medicine. (P/F grading only.)—II. Louie

420D. Cardiovascular System (2.5)

Lecture/discussion—5.5 hours. Prerequisite: approval of the School of Medicine Committee on Student Progress. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. (P/F grading only.)—II. Laslett

420E. Nephrology (2)

Lecture—2 hours; discussion—2 hours; laboratory—2 hours. Prerequisite: approval of Student Progress Committee. Fundamental aspects of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections. (P/F grading only.)—II. Stevenson

420F. Metabolic Regulatory System (2.5)

Lecture/discussion—5.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Basic understanding of pathophysiological processes in organs and tissues primarily involved in metabolic regulation and sufficient factual base so that clinical and laboratory findings, diagnosis, and elementary management of patients with endocrinological disorders can be rationalized. (P/F grading only.)—I. Wexler, Rutledge

430. Medicine Clerkship (12)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Clerkship is divided into two, four-week blocks, one each at UCDCM and at Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.)—I, II, III, IV. Prescott

450. Medicine and the Law (3)

Lecture/discussion—2 hours; project—2 hours. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (H/P/F grading only.)—II. Rich

459. Oncology: Research and Treatment of Cancer (2)

Lecture/discussion—2 hours. Prerequisite: second-, third-, or fourth-year medical student and/or consent of instructor. Comprehensive review of current treatment practices of cancer and state-of-the-art research impacting treatment and prevention of

cancer. Emphasis on epidemiology, molecular biology, and pharmacology. (H/P/F grading only.)—I. (I.) DeGreggio

460. Correctional Health Care Clerkship (1-4)

Clinical activity—full time. Prerequisite: fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Silva

462. Externship in Medicine (1-21)

Clinical Activity—40 hours. Prerequisite: Medical Sciences 431; demonstrated ability to accept responsibility; consent of instructor. Student assumes role of acting intern and will be primary physician on medical ward under direction of medical resident and staff. Responsibility for patients admitted to acting intern. Teams I–V take call every fifth night. Team VI students assume role of acting intern and will be primary physician on the medical hospitalist service under direct supervision of the hospitalist staff. Responsibility for patients admitted to acting intern with in-hospital daytime call. Emphasis on evidence-based inpatient care. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Meyers

463. Acting Internship in Medicine Intensive Care Unit (MICU) (9)

Clinical activity—full time. Prerequisite: completion of third year in medical school; consent of Director of MICU. At UCDCM, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU. On call in hospital every third night. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Albertson

494. Practicum in Community Health Clinics (1-3)

Clinical activity—15–40 hours. Prerequisite: medical student with consent of instructor. Students are assigned to clinical settings that demonstrate ethnic, urban/rural, or other related aspects of clinical community health. Through active participation in health care delivery, students are able to relate conceptual with practical aspects of primary health care. May be repeated for credit. (H/P/F grading only.)—I, II, III. (I, II, III.) Kumagai

498. Group Study in Internal Medicine (1-18)

Prerequisite: consent of instructor. Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care responsibility on campus, at UCDCM or off campus by specific arrangement. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

Internal Medicine—Cardiology (CAR)**Upper Division Courses****192. Internship in Cardiology (1-12)**

Internship—3–36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in cardiology. May be repeated for credit up to 12 units. (P/NP grading only.)

199. Cardiology Research (1-5)

Prerequisite: consent of instructor. Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions. (P/NP grading only.)

Graduate Courses**220. Basic Science in Cardiology (1)**

Lecture—1 hour. Prerequisite: graduate or medical student status. Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural control of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current information in their areas. Offered in alternate years. (S/U grading only.)—III. Kaufman

299. Cardiology Research (2-3.5)

Prerequisite: consent of instructor. Research or special studies. (S/U grading only.)—Bonham, Longhurst

Professional Courses**401. Clinical Cardiology Clerkship: Kaiser (3-18)**

Clinical activity (4 weeks)—8–12 hours (hospital); 1–5 hours (clinics). Prerequisite: third- and fourth-year medical students with advance approval by Division of Cardiology. Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CCU and elsewhere. The roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

460. Cardiology Clinical Clerkship (3-18)

Clinical activity—full time (2–12 weeks). Prerequisite: Internal Medicine 430, third- and fourth-year medical students in good academic standing with consent of instructor. Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiologic disorders. Two outpatient clinics per week. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV.

461. Management of Coronary Artery Disease: Coronary Care Unit (3-18)

Clinical activity (inpatient service)—full time (4 weeks). Prerequisite: completion of second year of medical school and advance approval by Division of Cardiology. Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment. Includes acute coronary care, hemodynamic monitoring, stress testing, cardiac catheterization, pathologic correlations and the modern approach to therapy, both medical and surgical, based on pathophysiological mechanisms. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

464. Preventive Cardiology (3-6)

Seminar—2 hours (for 2–4 weeks); clinical activity—full time (2–4 weeks). Prerequisite: completion of third year of medical school. Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery services. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Amsterdam

480. Insights in Cardiology (1-3)

Clinical activity—3–9 hours. Prerequisite: medical student in good academic standing and approval by Division of Cardiology. Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

498. Special Group Study: EKG Unit (1-12)

Special study—2-week sessions. Prerequisite: medical students with advance approval by monthly attending faculty. Special group study in cardiology for medical students in EKG unit. May include lectures, directed reading, and/or discussion groups. May be repeated for credit. Limited enrollment. (H/P/F grading only.)

499. Research (1-12)

Prerequisite: approval by Division of Cardiology. (H/P/F grading only.)

Internal Medicine—Clinical Nutrition and Metabolism (NCM)**Upper Division Course****192. Internship in Clinical Nutrition (1-12)**

Internship—3–36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in nutrition. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate Course**290C. Clinical Nutrition Research Conference (1)**

Seminar—1 hour. Weekly seminar presented by a graduate student, taking the form of research completed or in progress, topic review or journal review from current journal. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Halsted, Davis

Professional Courses**461. Nutrition Clinical Clerkship (3-18)**

Lecture—2 hours; clinical activity—full time (2 to 12 weeks). In-depth experience in assessment and monitoring of nutritional support of adult patients at UCD Medical Center whose illnesses are complicated by malnutrition, and of patients attending the Nutrition Clinic with problems in under-nutrition due to various illnesses.—I, II, III, IV. (I, II, III, IV.)

480. Insights in Clinical Nutrition (1-3)

Clinical activity—3-9 hours. Prerequisite: student in good standing; consent of instructor. Student will attend weekly clinical nutrition consult rounds (four evenings) and/or Nutrition Clinic (one day). Introduction to diagnosis and treatment of common nutritional problems. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Research in Nutrition (9-18)

Prerequisite: medical student in good standing; consent of instructor. Participation in ongoing clinical or basic nutrition research. Student may devise own project depending upon time commitments.—Halsted, Davis

Internal Medicine—Emergency Medicine (EMR)**Upper Division Courses****192. Emergency Medicine Clinical Research Internship (4)**

Internship—8 hours; lecture/discussion—1 hour. Prerequisite: undergraduate student in good academic standing. Clinical research by assisting in identifying and enrolling patients for clinical studies in the Emergency Department. Basic principles of clinical research from directed readings and selected didactic lectures. (P/NP grading only.)—I, II, III. Diercks

Professional Courses**401. Preceptorship in Emergency Medicine (1-4)**

Clinical activity—6 hours; tutorial—2 hours. Prerequisite: consent of instructor and completion of first year of medical school. Exposure to the specialty of Emergency Medicine and observation of a wide array of patients in the Emergency Department. A literature review of an Emergency Medicine topic of interest to the student must be performed and discussed. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Lee

430. Introduction to Medical Toxicology (3)

Independent study—24 hours; lecture/discussion—4 hours; fieldwork—12 hours. Prerequisite: fourth-year medical student with consent of instructor. Student will become familiar with the resources available to manage exposure and poison cases. Hands-on training in the use of Poisindex[®] computer database. Additional readings from medical literature required. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Bair

440. Emergency Medicine Required Clerkship (6)

Clinical activity—46 hours; lecture/discussion—8 hours. Prerequisite: satisfactory completion of Medicine, Surgery, and Pediatric Clerkship. Student will see patients primarily in the Emergency Department under the supervision of the Emergency Medicine Attending. Emphasis will be on the recognition and management of acute life threats, as well as the treatment of common medical and surgical conditions. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Lee

450. Ambulatory Care Clerkship (6)

Clinical activity—full time (4 weeks). Prerequisite: Medicine, Surgery, and one month of Emergency Medicine Clerkship. Ambulatory care experience in

the "fast track" area of the Emergency Department. Exposure to patients with minor illnesses and injuries. Emphasis on wound management and treatment of orthopaedic injuries. (Former course Internal Medicine 440.) (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Lee

465. Acting Internship in Emergency Medicine (6)

Clinical activity—36 hours; lecture/discussion—4 hours. Prerequisite: satisfactory completion of Medicine, Surgery, Pediatric and Emergency Medicine Clerkship. The student will function as an Acting Intern and treat a wide variety of patients and problems under the supervision of the Emergency Medicine Attending. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Lee

499. Research (2-18)

Laboratory—full time (1 to 12 weeks). Prerequisite: consent of instructor. Elective where topics may be selected in either basic or clinical research areas of Emergency and/or Critical Care Medicine. The goals will be tailored to each individual student. Enrollment requires prior discussion and consent of instructor. (H/P/F grading only.) Kupperman

Internal Medicine—Endocrinology and Metabolism (ENM)**Upper Division Course****192. Internship in Endocrinology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in endocrinology. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate Course**299. Research (1-12)**

Prerequisite: consent of instructor. Endocrinology research. (S/U grading only.)

Professional Courses**460. Endocrinology Clinical Clerkship (3-18)**

Clinical activity (inpatient-outpatient service)—full time (3 days per unit). Prerequisite: Internal Medicine 430 and/or consent of instructor. Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

480. Insights in Endocrinology (1-3)

Clinical activity—3-9 hours; oral presentation. Prerequisite: student in good academic standing and consent of instructor. First- or second-year students observe in morning Endocrine and Diabetes clinics and attend bi-weekly noon and afternoon endocrine conferences. They also give brief endocrine physiology oral presentation to the endocrine group. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Research (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

Internal Medicine—Gastroenterology (GAS)**Upper Division Course****192. Internship in Gastroenterology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in gastroenterology. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate Course**299. Research (1-12)**

Research in gastroenterology. (S/U grading only.)—Bowls

Professional Courses**460. Clinical Clerkship (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of third year of medical school. Work-

up, manage, and follow-up new patients on active inpatient consulting service. Gastroenterology/Hepatology patients. Daily rounds with attending physician. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

480. Insights in Gastroenterology (1-3)

Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. To gain insight in clinical activities of Gastroenterology Division through attendance at any of the following: endoscopic procedures, ward rounds, outpatient clinic, and G.I. grand rounds. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Leung, Hsu

499. Research (1-12)

Clinical activity—varied. Prerequisite: medical student status; consent of instructor. Part-time participation in active clinical and basic research projects. Some will involve both patient care and relevant laboratory procedures. Basic research includes liver metabolism, cancer markers, porphyrias diet and cancer, folate metabolism. May be repeated for credit. (H/P/F grading only.)—Leung, Bowlus, Pimstone, Prindiville

Internal Medicine—General Medicine (GMD)**Upper Division Course****192. Internship in General Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in general medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate Course**291. Seminars in Human Health Services Research and Clinical Epidemiology (1)**

Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as Epidemiology 291.) (S/U grading only.)—I, II, III. (I, II, III.)

Professional Courses**460. General Medicine Consults (1-18)**

Clinical activity (inpatient-outpatient service)—40 hours. Prerequisite: fourth-year medical students with consent of instructor; a general medicine clerkship. Supervised opportunity to see entire spectrum of medical problems encountered by a general internist. Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consultation Service is particularly concerned with medical evaluation of surgical patients. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

470. Health Care Ethics (3-9)

Discussion and conference—full time (2-6 weeks). Prerequisite: consent of instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Student participation in ethics rounds. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Loewy

480. Insights in General Medicine (1-3)

Clinical activity—one to nine 4-hour sessions; rounds—one to nine 2- to 4-hour sessions. Prerequisite: student in good academic standing and consent of instructor. Student will observe work-up, diagnostic evaluation and management of common general internal medicine problems in ambulatory and inpatient settings; be supervised by attending physician while attending General Medicine Clinic and/or Consult Rounds; and make brief presentations to consult service. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Robbins

485. Introduction to Health Care Ethics (1)

Lecture—10 weeks. Prerequisite: medical student in good standing. Introduction to concepts and methods of healthcare ethics. Emphasis on problems and methods. (H/P/F grading only.)—I. (I.) Loewy

499. General Medicine Research (1-18)

Discussion—3 hours; clinical research—8-40 hours. Prerequisite: consent of instructor. Student will be involved in a clinical research problem within the areas, interest and expertise of members of Division of General Internal Medicine. Alternatively, the research effort will be directed toward investigation of a clinical problem of general medical interest. May be repeated for credit. (H/P/F grading only.)

Internal Medicine—Hematology-Oncology (HON)**Upper Division Course****199. Research in Hematology-Oncology (1-5)**

Laboratory—hours variable. Prerequisite: upper division standing and consent of instructor. Experience in laboratory research. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.)

Graduate Courses**298. Topics in Hematology (1-4)**

Prerequisite: one year of graduate work and/or consent of instructor. Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics to be dictated by the interest and background of the students.

299. Research (1-12)

Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

Professional Courses**420. Oncology (1)**

Lecture—9 hours; discussion—9 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Cancer epidemiology, cancer genetics, and cancer pharmacology; the pathophysiologic principles of oncology as they relate to specific common cancers using both lectures and case discussions. (P/F grading only.)—IV. Wisdom, DeGregorio

460. Hematology-Oncology Acting Internship (6-18)

Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student in good academic standing. Acting intern on inpatient hematology/oncology ward service. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

461. Hematology-Oncology Consult Clerkship (6-12)

Clinical activity—full time (4-8 weeks). Prerequisite: fourth-year medical student in good academic standing. Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

462. Hematology-Oncology Ambulatory Clerkship (6-18)

Clinical activity (inpatient/outpatient service)—full time (4 weeks). Prerequisite: fourth-year medical student in good academic standing. Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

490. Practicum in Care for the Terminally III (3-6)

Clinical activity—full time (2-4 weeks); three 4-hour seminars included. Prerequisite: fourth-year medical student and an interview with Program Medical Director. Work with hospice interdisciplinary team. Direct experience in the care of patients with illnesses where no cure is possible. Emphasis on symptom relief, end of life issues, physician-assisted suicide. Fulfills the Ambulatory Care requirement. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Research (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

Internal Medicine—Infectious Diseases (IDI)**Upper Division Courses****141. Infectious Diseases of Humans (1)**

Lecture—1 hour. Prerequisite: introductory knowledge in biology and chemistry recommended. Course integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history. (P/NP grading only.)—I. (I.) Dandeker

192. Research Internship in Internal Medicine (1-12)

Internship—3-36 hours; final report. Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings. May be repeated for credit up to 12 units. (P/NP grading only.)

199. Infectious Diseases Research (1-5)

Prerequisite: chemistry through organic chemistry (in addition, physical and biochemistry preferred), biology through basic bacteriology (in addition, microbiology and immunology preferred); and consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presentation. (P/NP grading only.)

Graduate Courses**280. Molecular Pathobiology for Diagnosis and Therapy of Human and Animal Diseases (3)**

Lecture—3 hours. Prerequisite: graduate standing. Presentation of molecular pathobiology of human and animal viruses. Emphasis on molecular diagnostics at cellular/tissue level, and therapy including vaccines and gene transfer using recombinant DNA technology. Offered in alternate years.—(III.) Dandeker

299. Research in Infectious Diseases (1-12)

Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

Professional Courses**440. Introduction to AIDS and Related Disorders (2)**

Clinical activity—30 hours; discussion—10 hours. Prerequisite: first- and second-year medical students in good academic standing and consent of instructor. Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Students will interview patients, observe patient care and participate in ongoing clinic research as well as examine alternative life styles. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Flynn

450. Clinical and Social Care of the Injection Drug User (1-4)

Lecture—1 hour; clinical activity—3 hours. Prerequisite: first and second year medical students in good academic standing. Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users. May be repeated for credit up to 24 units. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

460. Infectious Diseases Clinical Clerkship (3-6)

Clinical activity. Prerequisite: successful completion of two years of study in an accredited medical school. Limited enrollment with priority to fourth-year medical students. Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Inclusion

in clinical microbiology and the proper use of the laboratory will be provided. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Research Topics in Infectious Disease (2-12)

Prerequisite: successful completion of the first year of study in School of Medicine, graduate students (approved for graduate credit), and/or consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presentation. (H/P/F grading only.)

Internal Medicine—Nephrology (NEP)**Upper Division Course****192. Internship in Nephrology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in nephrology. May be repeated for credit up to 12 units. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.)

Professional Courses**460. Nephrology and Fluid Balance (3-6)**

Clinical activity—full time. Prerequisite: completion of third year of medical school; consent of instructor. Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UCD Medical Center covering the field of nephrology and fluid-electrolyte disorders. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Research in Nephrology (3-18)

Prerequisite: individual arrangement and consent of instructor. Independent laboratory research on a specific problem related to biochemical or immunologic causes of renal disease and/or uremic disorders in humans or animals. (H/P/F grading only.)—Kaysen

Internal Medicine—Pulmonary Medicine (PUL)**Upper Division Course****192. Internship in Pulmonary Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in pulmonary medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

Graduate Courses**299. Pulmonary Disease Research (1-12)**

Laboratory. Prerequisite: by arrangement only. Pulmonary disease research activity with focus in inhalation toxicity, oxidants or lung biochemistry, and cell and molecular biology. (S/U grading only.)—Cross

Professional Courses**460. Pulmonary and Critical Care Medicine Clinical Clerkship (6-18)**

Clinical activity—full time (4-12 weeks). Prerequisite: Medical Sciences 431. At UCD Medical Center participating and rounding with Pulmonary/Critical Care Medicine fellows and consultation staff. Also includes pulmonary function test interpretation, outpatient assignments in outpatient clinic and preparation and presentation of material at weekly conferences. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

462. Pulmonary Clinical Clerkship (3-12)

Clinical activity—full time (2-8 weeks). Prerequisite: completion of second year of medical school and/or consent of instructor. Participation at the Sacramento VA clinic with members of the subspecialty service in initial clinical evaluation, workup, management, and follow-up of patients with pulmonary disorders. Includes experience in Pulmonary Function Laboratory, and pulmonary diagnostic processes. Limited

enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Bonekat

480. Pulmonary-Critical Care Medicine Insights (1-3)

Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. Student will attend respiratory outpatient clinics and in-patient pulmonary consultation rounds and medical intensive care rounds. Introduction to diagnosis and treatment of common pulmonary problems. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Albertson

499. Research (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

Internal Medicine— Rheumatology-Allergy (RAL)

Lower Division Course

99. Directed Research in Immunology (1-5)

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Gershwin

Upper Division Courses

192. Internship in Rheumatology-Allergy (1-12)

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in rheumatology-allergy. May be repeated for credit up to 12 units. (P/NP grading only.)

199. Directed Research in Immunology (1-5)

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.)—Gershwin

Graduate Courses

281. Clinical Immunology and Immunopathology (4)

Lecture—4 hours. Prerequisite: Medical Microbiology 107 or Veterinary Microbiology 270, or consent of instructor. Descriptive analysis of animal and human pathologic processes that interact with the immune system. Emphasis on infections, genetics, transplantation, allergy and autoimmunity. Offered in alternate years.—(III.) Gershwin, Leung

298. Topics in Rheumatology and Clinical Immunology (1-5)

Laboratory. Prerequisite: consent of instructor. Library and/or laboratory work as required. (S/U grading only.)—Gershwin

299. Research in Autoimmune Disease (1-12)

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, Sjögren's syndrome, polymyositis and drug hypersensitivity. (S/U grading only.)—Gershwin

Professional Courses

460. Rheumatology Clinical Clerkship (1-18)

Clinical activity (inpatient-outpatient service)—full time. Prerequisite: Medical Sciences 431 and consent of instructor. Participation with members of the subspecialty service in the diagnosis and therapeutic management of patients with rheumatologic diseases. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

461. Allergy Clinical Clerkship (3-18)

Clinical activity (inpatient-outpatient service)—full time (2 to 12 weeks). Prerequisite: completion of second year of medical school and consent of instructor. Student will work with practicing allergist in daily work with patients and participate in weekly allergy clinic and teaching conferences. Study of the literature. Will see patients with problems in clinical immunology, immunodeficiency, asthma, allergic rhinitis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

480. Insights in Rheumatology (1-3)

Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. Participation in rheumatology consultation rounds, rheumatic disease clinics and conferences with supervised readings in rheumatology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Leek

499. Research (1-12)

Prerequisite: medical student with consent of instructor. Part-time participation in active clinical and basic research projects which can involve both patient care and relevant laboratory procedures. Students can gain experience in clinical medicine and clinical investigation. (H/P/F grading only.)

Medical Microbiology (MMI)

Upper Division Courses

115. Ecological Parasitology (3)

Lecture—3 hours. Parasitism as a life style is explored from the ecological point of view, illustrating the way parasites utilize biotic habitats and the influence climate, geography, behavior, cultural change and alteration of habitat can have on the distribution and prevalence of parasites.—II. (II.) Theis

116. Parasitology for Wildlife Biologists (3)

Lecture—3 hours. Prerequisite: upper division standing or consent of instructor. Emphasis on the role infectious diseases play in wildlife dynamics. Lectures and demonstrations on techniques and methods for examining wild animals for evidence of infectious diseases, methods used in preserving and identifying parasites of wildlife, as well as what is known about their pathogenesis.—III. (III.) Theis

130. Medical Mycology (2)

Lecture—2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 430.)—II. Pappagianis

192. Internship in Medical Microbiology (1-12)

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in medical microbiology and related fields. (P/NP grading only.)

198. Group Study in Medical Microbiology (1-5)

Prerequisite: upper division standing and consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (P/NP grading only.)

199. Research in Medical Microbiology (1-5)

Prerequisite: upper division standing and consent of instructor. Individual research. (P/NP grading only.)

Graduate Courses

200D. Mechanisms for Microbial Interactions with Hosts (3)

Lecture/discussion—3 hours. Prerequisite: Microbiology 200A or consent of instructor. Study of mechanisms involved in microbial interactions within a host environment. The following principles are basic to understanding these interactions: host recognition, invasion, competition and growth, and host defense.—II. (II.) Beaman

209. Current Immunology (2)

Discussion—2 hours. Prerequisite: consent of instructor. Current developments in various aspects of immunology and their interrelationships. May be repeated for credit. (Same course as 409.) (S/U grading only.)—II, III. (I, II, III.) Van de Water

215. Medical Parasitology (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: graduate student with consent of instructor. Epidemiological, pathogenesis, diagnostic methods and laboratory studies of protozoa, helminths and arthropods of medical importance. Offered in alternate years. (Same course as 415.)—I. Theis

220. Current Concepts in Bacterial Ultrastructure (2)

Discussion—2 hours; student presentations; term paper. Prerequisite: Microbiology 105 or consent of instructor. Critical evaluation of current literature dealing with all aspects of bacterial ultrastructure. Discussion of selected and assigned reading and formal student presentations of assigned topics.—III. (III.) Beaman

298. Group Study in Medical Microbiology and Immunology (1-5)

Prerequisite: consent of instructor; open to graduate students. Directed reading and discussion and/or laboratory investigation on selected topics. (Sections 1, 2, 4, 5: S/U grading only.)

299. Research (1-12)

Prerequisite: consent of instructor; open to graduate students. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

Professional Courses

409. Current Immunology (2)

Discussion—2 hours. Prerequisite: consent of instructor. Current developments in various aspects of immunology and their interrelationships. (Same course as 209.) May be repeated for credit. (H/P/F grading only.)—II, III. (I, II, III.)

415. Medical Parasitology (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: medical student with consent of instructor. Approved for graduate degree credit. Epidemiological, pathogenesis, diagnostic methods and laboratory studies of protozoa, helminths and arthropods of medical importance. Offered in alternate years. (Same course as 215.) (H/P/F grading only.)—I. Theis

420. Current Concepts in Bacterial Ultrastructure (2)

Discussion—2 hours; formal presentation or term paper. Prerequisite: medical students with consent of instructor. Evaluation of current status of bacterial ultrastructure with an emphasis on host-parasite interactions through discussions and assigned readings. (H/P/F grading only.)—III. (III.) Beaman

430. Medical Mycology (2)

Lecture—2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 130.) (H/P/F grading only.)—II. Pappagianis

480A. Medical Immunology (2)

Lecture—4 hours. Prerequisite: approval of Committee on Student Progress. Structure and function of the molecules, cells and tissues involved in immunity, and their interactions in health and disease. (P/F grading only.)—III. (III.)

480B. Pathogenic Microbiology (3.5)

Lecture—22 hours; laboratory—20 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. The biology of pathogenic microorganisms with emphasis on their role in human disease. May be repeated for credit. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—IV. Beaman

480C. Pathogenic Microbiology (2)

Lecture/laboratory—5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. The biology of pathogenic microorganisms with emphasis on their role in human disease. (H/P/F grading only.)—I. Dandekar

497T. Tutoring in Medical Microbiology (1-5)

Tutoring—3-15 hours. Prerequisite: appropriate preparation in subject matter and consent of instructor. Assist instructor by tutoring medical students in one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

498. Group Study in Medical Microbiology and Immunology (1-5)

Prerequisite: medical students with consent of instructor. Directed reading and discussion and/or

laboratory investigation on selected topics. (H/P/F grading only.)

499. Research (1-12)

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

Medical Pharmacology and Toxicology (PHA)

Lower Division Courses

92. Internship in Pharmacology (1-12)

Internship—3-36 hours; final report. Prerequisite: lower division student with good academic standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: lower division standing. (P/NP grading only.)

Upper Division Courses

192. Internship in Pharmacology (1-12)

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

200A. Advanced General Pharmacology (3)

Lecture—3 hours. Prerequisite: upper division courses in biochemistry (101A-101B) and mammalian physiology (111A-111B and 112-113) or the equivalent (may be taken concurrently). Core course in human pharmacology designed for graduate and medical students. Principles in pharmacology, including pharmacokinetics and drug metabolism and the actions, use and toxicity of the major classes of drugs.—I. (I.)

200B. Advanced General Pharmacology (4)

Lecture—4 hours. Prerequisite: upper division courses in biochemistry (101A-101B) and mammalian physiology (111A-111B and 112-113) or the equivalent (may be taken concurrently). Core course in human pharmacology designed for graduate and medical students. The actions, use and toxicity of major classes of drugs. Continuation of course 200A.—II. (II.)

206. Pharmacokinetics (2)

Lecture—2 hours. Prerequisite: courses 200A, 200B. Physicochemical and physiological factors affecting absorption, distribution, metabolism and excretion of drugs. Mathematical and graphical methods for determining pharmacokinetic parameters. Calculation of dose regimens. Offered in alternate years.—(I.) Henderson

298. Group Study (1-5)

Prerequisite: consent of instructor.

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Courses

400A. Pharmacology (2)

Lecture—18 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (Deferred grading only, pending completion of sequence. P/F grading only.)—IV. Fischer

400B. Pharmacology (1.5)

Lecture—22 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Principles in pharmacology, including autonomic

pharmacology, endocrine pharmacology, general anesthetics, GI drugs, substance abuse and general toxicology. (Deferred grading only, pending completion of sequence. P/F grading only.)—I. Fischer

400C. Pharmacology (2.5)

Lecture—23 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (P/F grading only.)—II. Fischer, Albertson

445. Introduction to Integrative Medicine (1)

Lecture/discussion—1 hour. Prerequisite: medical student in good standing. Basic principles of alternative medical systems (e.g., traditional Chinese, Ayurvedic, Tibetan), alternative practices (e.g., chiropractic, osteopathy, naturopathy, homeopathy, herbalism, guided imagery/meditation, massage therapy), and mind/body connection are presented as introduction to integrating alternative treatments into traditional medicinal practice. (H/P/F grading only.)—II. (II.) Harkey

490. Seminar in Pharmacology for Medical Students (1)

Seminar—1 hour. Prerequisite: consent of instructor. Seminar in pharmacology for medical students. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

497T. Tutoring in Pharmacology (1-5)

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

498. Special Study for Medical Students (1-5)

Lecture, directed reading, and/or discussion groups—3-15 hours. Prerequisite: consent of instructor. Special study in pharmacology for medical students. (H/P/F grading only.)

499. Directed Research for Medical Students (1-12)

Laboratory—3-36 hours. Prerequisite: consent of instructor. Directed research in pharmacology for medical students. (H/P/F grading only.)

Nephrology (NEP)

Professional Courses

460. Nephrology and Fluid Balance (3-6)

Clinical activity—4 hours; lecture/discussion—10 hours. Prerequisite: completion of 3rd year medical school and medicine core clerkship, consent of instructor. Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UCD Medical Center covering the field of nephrology and fluid-electrolyte disorders. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. Kaysen

Neurology (NEU)

Upper Division Course

199. Individual Special Study and Research (1-4)

Prerequisite: consent of instructor. Individual special study in neurophysiology and biomedical engineering is offered to qualified students. Studies on psychophysics, single-unit electrophysiology and instrumentation are offered in Davis. (P/NP grading only.)

Graduate Courses

201. Human Behavioral Neurobiology (2)

Lecture/discussion—2 hours. Prerequisite: Cell Biology and Human Anatomy 203; Psychology 108 or 136. Neurobiology of normal and abnormal behavior of humans, based on specific neuroanatomical, neurophysiological, and cognitive parameters. Evaluation of these parameters will be, for example, by application of clinical neurologic, neuropsychologic, and neuroimaging tests.—(I.) Robertson

202. Visuomotor Neurobiology (2)

Seminar—2 hours. Prerequisite: course 201, Cell Biology and Human Anatomy 203. An overview of

neural mechanisms of visually guided behavior in humans will examine the integration of visual attention and eye movements. Performance of normal humans and neurologic patients in reflexive orienting, visual search, reading and reaching will be considered. Offered in alternate years.—(III.) Rafal

290. Seminar in Selected Topics (1)

Seminar—1 hour. Prerequisite: consent of instructor. Selected topics in Neuroscience will be offered. (S/U grading only.) Gorin

298. Group Study (1-5)

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (S/U grading only.)

299. Individual Special Study and Research (1-12)

Laboratory—3-36 hours. Prerequisite: consent of instructor. Individual special study and research in Neurophysiology and Biomedical engineering is offered at both Davis and Sacramento Medical Center. (S/U grading only.)

Professional Courses

420. Clinical Neurosciences (3)

Lecture/discussion—5 hours; lecture—4 hours. Prerequisite: approval of Committee on Student Progress. Pathophysiology underlying neurological disorders, including disorders of development, muscle, nerve, cerebral circulation, metabolism, myelin, cortical function, movement, cerebrospinal fluid, autonomic function and special senses. Anatomical basis of clinical testing, nervous system infection, neoplasia and trauma. (P/F grading only.)—II. Gorin

450. Clinical Neurology Clerkship (6)

Clinical activity—24 hours; conference—12 hours; seminar—4 hours; independent study—10 hours. Prerequisite: fourth-year medical student or third-year medical student with consent of instructor. Critical elements of neurological clinical skills (history & exam) and basic and clinical neurological concepts expected for general residency preparation. Active, didactic, experiential and independent learning to encourage maturation of general professional competencies. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Bowe

451. Clinical Neurology Clerkship (3-6)

Clinical activity—full time (2-4 weeks at Highland General Hospital, Oakland). Prerequisite: fourth-year medical student. Essentials of detailed neurological examination and principles of differential neurological diagnosis. Emphasis on common neurological disorders encountered in practice. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

452. Advanced Clinical Neurology (6)

Clinical activity—full time (4 weeks). Prerequisite: completion of four-week Neurology selective and consent of instructor. Extension of basic Neurology clerkship. Designed for students with special interest in medical disorders of nervous system. By arrangement with department, student may serve as an acting intern. Principles of neurological differential diagnosis and therapeutics emphasized. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

453. Advanced Clinical Neurology (6)

Clinical activity—full time (4 weeks at Highland General Hospital, Oakland). Prerequisite: completion of four-week Neurology selective and consent of instructor. Extension of basic Neurology clerkship. Designed for students with special interest in medical disorders of the nervous system. By arrangement with department, student may serve as an acting intern. Principles of neurological differential diagnosis and therapeutics emphasized. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

454. Electroencephalography and Evoked Potentials (3-18)

Clinical activity—full time (2-12 weeks) technique and interpretation. Prerequisite: four-week Neurology clerkship and consent of instructor. Principles of electroencephalographic diagnosis including technical basis of electroencephalography and evoked potentials. Emphasis placed on how these studies

are applied to neurological diagnosis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Gabor, Seyal

455. Child Neurology (6)

Clinical activity—full time (4 weeks). Prerequisite: satisfactory completion of Internal Medicine 430, Obstetrics and Gynecology 430, Pediatrics 430 and consent of instructor. Student exposed to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. This course satisfies the fourth year neuroscience requirement. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Gospe

456. Cortical Neurology (3-18)

Clinical neurological research—full time (12 weeks at Highland General Hospital, Oakland). Prerequisite: course 451 or the equivalent; consent of instructor. Student will pursue a small project in clinical neurologic research on higher cortical functions. The focus is on scientific analysis of behavior in disease states. Study may be arranged for from two weeks to twelve weeks, with units corresponding to length of course. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Remler, Knight

457. Special Topics in Neurology (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: course 450, 451 or consent of instructor. Students study areas of special interest in tutorial manner under supervision of member of faculty with expertise and interest in elected field. Students may elect tutorial clinical experience with member of staff. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

458. Introduction to Cognitive and Communication Disorders (3)

Lecture—3 hours; observations, individual projects. Prerequisite: consent of instructor. Introduction to cognitive and communication disorders. Includes a survey of disorders subsequent to brain damage; management by neurology, neuropsychology, and speech pathology; and current research on appraisal, diagnosis, and treatment. (H/P/F grading only.)—I. (I.) Dronkers

459. Independent Study in Neurogenic Communication Disorders (1-3)

Conference, observation and data collection—3-9 hours. Prerequisite: consent of instructor. Independent study of neurogenic communication disorders—aphasia, dementia, apraxia of speech, dysarthria. Designed for individual interest and includes discussion, directed reading, research design, data collection, and preparation of results. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Dronkers

464. Clinical Neurology (3-18)

Clinical activity—full time (minimum of one-half quarter). Prerequisite: fourth-year medical student or third-year medical student with completion of a medical clerkship; consent of Chairperson. Clerkship in neurology to be arranged at another institution with accredited residency programs in neurology under proper supervision. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Bowe

468. Special Clinical Elective in Neurology (6-18)

Clinical activity—full time (4 to 12 weeks). Prerequisite: fourth-year medical student or third-year medical student with clerkship in medicine and pediatrics. Emphasis will be on mastering the neurologic examination and on introduction to neurologic evaluation, diagnosis and therapy. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

480. Insights in Neurology (1-3)

Discussion—3 hours; clinical activity—3 to 9 hours. Prerequisite: student in good academic standing; consent of instructor. Attendance at neurology grand rounds and regular rounds following. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Research (1-12)

Laboratory—2-24 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Laboratory investigation on selected topics. (H/P/F grading only for graduate and medical students.)

Neurosurgery (NSU)

Upper Division Course

199. Special Study in Neurosurgery for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduate standing with consent of instructor. Students may participate in ongoing neurosurgical projects or may pursue and design independent projects. (P/NP grading only.)

Graduate Course

299. Neurosurgery Research (3-12)

Prerequisite: graduate student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. (S/U grading only.)

Professional Courses

451. Neurosurgical Critical Care Clerkship (3)

Clinical activity—full time (2 weeks). Prerequisite: third- or fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Students participate in the care of neurosurgical patients in the NSICU and in the admission and surgical management of patients admitted through the Emergency Room. (H/P/F grading only.)—I, II, III. (I, II, III.)

455. Clinical Pediatric Neurosurgery (6)

Clinical activity—full time (4 weeks). Prerequisite: third- or fourth-year medical students who have satisfactorily completed course 460; consent of instructor. Admission and follow-up of pediatric patients. Neurological history, examination, and diagnostic procedures are emphasized. Students will participate in surgical procedures and are required to attend all pediatric neurosurgery conferences. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Pang

460. Clinical Neurosurgery (6-18)

Clinical activity—full time (3 days per unit; 4 weeks minimum). Prerequisite: third- and fourth-year medical students; consent of instructor. Approved for graduate degree credit. Admission and follow-up of patients. Neurological history, examination and further diagnostic procedures emphasized. Students participate in meaningful aspects of surgical procedures and attend listed conferences, rounds, and seminars. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

464. Externship (6-18)

Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Clerkship in neurosurgery to be arranged at another institution with accredited residency program in neurosurgery under proper supervision. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

470. Advanced Clinical Neurosurgery (6-18)

Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student in good academic standing. Student will function as acting intern on neurosurgery service. Admission and management of patients. Neurological history, examination, diagnostic procedures, and surgical management are emphasized. Students participate in meaningful aspects of surgical procedures and attend required conferences and rounds. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

480. Insights in Neurosurgery (1-3)

Clinical activity—3 to 9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Observation of neurosurgical care in emergency room, operating room and hospital floors, including manner of treatment of a variety of chronic and acute neurological diseases. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Neurosurgery Research (1-18)

Prerequisite: medical student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. (H/P/F grading only.)

Obstetrics and Gynecology (OBG)

Upper Division Courses

190. Seminar in Early Mammalian Development (1)

Seminar—1 hour; short paper. Prerequisite: Zoology 100 or the equivalent. Each student will present paper from the recent scientific literature on various research topics in early mammalian development. Short paper will be required at the end of course.—I, II, III. (I, II, III.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

220. Genetics of Reproduction (3)

Lecture/discussion—3 hours. Introduction to genetics of mammalian reproduction for domestic species, species used in research, and the human. Mendelian and non-Mendelian modes of inheritance. Research paper. Offered in alternate years.—II. (II.) Wiley

290. Current Topics in Research (1)

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Selected topics in reproductive biology. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

291. Seminar in Early Mammalian Development (1)

Seminar—1 hour. Each student will be asked to present a paper from the recent scientific literature on various research topics in early mammalian development. Short paper will be required at the end of course.—I, II, III, IV. (I, II, III, IV.) Wiley

298. Group Study (1-5)

Prerequisite: graduate standing; consent of instructor.—Overstreet

299. Research (1-12)

Prerequisite: graduate standing; consent of instructor. (S/U grading only.)—Overstreet

Professional Courses

420. Genetics and Reproduction (2)

Lecture—20 hours; conference—4 hours. Prerequisite: Endocrinology. Introduction to medical genetics and the clinical consequences of genetic abnormalities. Aspects of reproduction including gametogenesis, development of the conceptus, maternal adaptation to pregnancy, labor and delivery and menopause. (P/F grading only.)—IV.

430. Obstetrics and Gynecology Clerkship (12)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCDMC and affiliated sites. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.)—I, II, III, IV. Ciotti

465. Elective Clerkship (4-18)

Clinical activity—full time (3 days per unit). Prerequisite: third- and fourth-year medical student; course 430 or the equivalent; consent of instructor. Active participation in inpatient and outpatient care. Attendance at specified conferences; student-faculty member informal conferences. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Birdsong

470. Acting Internship in Obstetrics and Gynecology (6-8)

Clinical activity—full time (4-6 weeks). Prerequisite: third- and fourth-year medical students who have completed course 430; consent of instructor. Student will perform as intern and expect the following experience: Obstetrics and Gynecology, 2 weeks each; perform inpatient care; be on call every third night;

attend scheduled conferences one half-day per week. Round daily with attending. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Leiserowitz

471. Ambulatory Gynecology and Obstetrics (6-8)

Clinical activity—full time (4-6 weeks). Prerequisite: third- and fourth-year medical students who have completed course 430; consent of instructor. Student to participate in following clinics each week: General Gynecology, New and Return Obstetrics, Post-Partum, High-Risk Obstetrics, Pre-Operative Clinic, other specialty clinics as assigned. Student will conduct examinations, present patients to staff and will be able to discuss treatment regimens. Night call in Labor and Delivery Suite every third night. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

480. The Birthing Process (1)

Lecture/discussion—1 hour. Open only to UC Davis medical students. Training to assist in the birthing process as a Doula. Topics not covered in the summer course. (S/U grading only.)—I. Towner

494. Shifa Clinic (1)

Clinical activity—8 hours. Prerequisite: medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated up to 3 times for credit. (H/P/F grading only.)—I, II, III, IV. Yasmeen

499. Research in Obstetrics and Gynecology (4-18)

Prerequisite: medical student with consent of instructor. Student will pursue a research problem of her/his own choosing, selected with help of the faculty. Integration with ongoing faculty research projects recommended. (H/P/F grading only.)

Ophthalmology (OPT)

Upper Division Courses

192. Research Internship (1-12)

Internship—3-36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in ophthalmology research. Research staff in Ophthalmology have programs in cell biology, electron microscopy, biochemistry, immunology and visual psychophysics. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Course

299. Basic Research in Visual Science (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Courses

440. Ophthalmology Required Clerkship (3)

Clinical activity—full time (2 weeks). Prerequisite: consent by Committee on Student Evaluation and Promotion. Fundamental knowledge of ophthalmic diagnosis and principles; basic ophthalmic instruments; understanding of treatment for eye problems manageable by a primary care physician; knowledge of what patients should be referred for ophthalmic care. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) J. Brandt

442. Introduction to Ophthalmology—Clerkship (3)

Clinical activity—40 hours. Prerequisite: fourth-year medical student or third-year medical student with consent of instructor and completed third-year clerkships in medicine and surgery. Ocular disease diagnosis and management relevant to the clinical practice of future primary care physicians and others. (H/P/F grading only.)—I, II, III, IV.

461. Basic Clinical Ophthalmology (4.5)

Clinical activity—to be arranged (2 weeks). Prerequisite: medical students who have completed either Medical Sciences 430 or course 440 (in third or fourth year); consent of instructor. Provides an

acquaintance with the fundamentals of routine clinical ophthalmology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) J. Brandt

465. Advanced Subspecialty Ophthalmology (6 or 9)

Clinical activity—to be arranged (4 weeks off campus or 6 weeks at UCD Medical Center). Prerequisite: medical students who have completed Internal Medicine 430 (in third or fourth year); consent of instructor. Participation in disciplines of neuro-ophthalmology/pediatric ophthalmology, diseases of the cornea and external eye, glaucoma and retina. Rotations at UCD Medical Center may be arranged in 6-week units of one service alone, or in combination, as arranged with instructors. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Mannis, Keltner, J. Brandt

480. Insights in Ophthalmology (1-3)

Clinical activity—3 to 9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Clinical exposure in ophthalmology including slide-tape program, patient exposure, and department conferences (i.e., grand rounds and subspecialty conference). (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

498. Group Study (1-3)

Prerequisite: medical students with consent of instructor. Directed reading and discussion. (H/P/F grading only.)

499. Research in Ophthalmology (1-12)

To be arranged—3-36 hours. Prerequisite: medical students with consent of instructor. Individual research on selected topics in optics and visual physiology, cornea and external disease. (H/P/F grading only.)

Orthopaedic Surgery (OSU)

Lower Division Course

99. Special Studies for Undergraduates (1-4)

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

Upper Division Course

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

Professional Courses

421. The Musculoskeletal System (2.5)

Lecture/discussion—6 hours. Prerequisite: consent of Committee on Student Progress. Basic and clinical science of orthopaedic surgery and rheumatology. (P/F grading only.)—I. Martin

428. Ambulatory and Emergency Room Orthopaedics (3-6)

Clinical activity—full time (2-4 weeks). Prerequisite: 4th-year medical student in good academic standing and consent of instructor. Introduction to general orthopaedic problems and trauma and their management in an outpatient environment, including the emergency room. Student will conduct orthopaedic examinations, present patients to staff rotating through trauma, hand, pediatrics, adult and foot clinics. Orthopaedic physical examination and interpretation of x-rays. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Moehring

462. Community Preceptorship (3-6)

Clinical activity—full time (2-4 weeks). Prerequisite: fourth-year medical student in good academic standing with consent of instructor. Acquaints student with private practice of orthopaedics in the community setting. Opportunity to observe and assist private practitioners in office, emergency room, operating room and inpatient environment. Student must provide own transportation. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Pinney

464. Acting Internship (6)

Clinical activity—full time (4 weeks). Prerequisite: fourth-year medical student in good academic standing and consent of instructor. Rotation designed to increase basic knowledge of musculoskeletal abnormalities at clinical level. Attention

focused on selective case material. For those students who demonstrate proficiency, responsibility will be similar to that of intern. Limited enrollment. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Pinney

480. Insights in Orthopaedic Surgery (1-3)

Clinical activity—3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Exposure to aims, methods and procedures in orthopaedic surgery via attendance at grand rounds, patient care conferences, and group discussions. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Szabo

481. History of Medicine for Medical Students (1.5)

Lecture/discussion—2.5 hours (for six weeks). Prerequisite: third- or fourth-year students in the School of Medicine or second-year students with consent of instructor. Overview of the history of medicine throughout the world to introduce medical students to landmark accomplishments and key figures in the development of health care and to provide an expanded philosophical perspective on the ever-changing field of modern medicine. (H/P/F grading only.)—I. (I.) Benson

499. Orthopaedics Research (1-12)

Clinical activity—3 hours to full time (to be arranged with individual faculty). Prerequisite: third- or fourth-year medical student in good academic standing; consent of instructor. Laboratory or clinical investigation on selected topics. May be repeated for credit. (H/P/F grading only.)

Otolaryngology (OTO)

Lower Division Courses

192. Internship in Otolaryngology (1-12)

Internship—3 to 36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in otolaryngology and related fields. Final project report. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study in Otolaryngology for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduate with consent of instructor. (P/NP grading only.)

Graduate Courses

290C. Research Conference in Otolaryngology (1)

Lecture/discussion—1 hour. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentation and discussion of faculty and student research in otolaryngology. (S/U grading only.)—I, II. (I, II.)

291. Principles of Speech, Hearing and Equilibrium (3)

Lecture/discussion—3 hours. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentations by faculty and guest lecturers on anatomy, physiology, and behaviors involved in speech production, hearing, and equilibrium. Each student will be expected to make one class presentation.—II. (II.)

298. Group Study (1-5)

(S/U grading only.)

299. Individual Study in Otolaryngology for Advanced Graduate Students (1-12)

Prerequisite: advanced graduate student with consent of instructor. (S/U grading only.)

Professional Courses

401. Clinical Examinations in Otolaryngology (1)

Lecture—1 hour; laboratory—1 hour; practical—1 hour total. Prerequisite: second-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Obtaining the history, applied anatomy of the regions, and the art of the examination. Head mirror required.—I, II, III, IV. (I, II, III, IV.) Kendall

402. Otolaryngology in Family Practice (1)

Lecture—10 hours total. Prerequisite: fourth-year medical students and family practitioners with consent of instructor; open to graduate students. Approved for graduate degree credit. Planned as a refresher course for those already possessing a background of knowledge in the specialty.—I, II, III, IV. (I, II, III, IV.)

403. Basic Principles of Reconstructive Surgery (1)

Lecture—four 2-hour sessions; laboratory—one 2-hour session (4 weeks). Prerequisite: third- or fourth-year medical student with consent of instructor. Formal presentations covering basic principles of reconstructive surgery, including wound healing, treatment of lacerations, skin and bone grafts, flaps, Z-plasties and revision of scars. Laboratory session utilizing animal tissues.—II. (II.) Donald

440. Otolaryngology Required Clerkship (3)

Clinical activity—full time (2 weeks). Prerequisite: consent by Committee on Student Evaluation and Promotion. To provide fundamental knowledge of otorhinolaryngologic diagnosis and principles, develop facility with basic ENT instruments, provide an understanding of treatment for ear, nose and throat problems and provide knowledge of what patients should be referred for otorhinolaryngologic care.—I, II, III, IV. (I, II, III, IV.) Strong

450. Fourth Year Otolaryngology Elective (6)

Clinical activity—35 hours; lecture—2 hours; film-viewing—0.25 hours; discussion—1 hour. Prerequisite: 3rd or 4th year medical student. Participation in Otolaryngology Clinic and operating room. Evaluation and management of common Otolaryngologic diseases. (P/F grading only.)—I, II, III, IV. Strong

460. Clinical Otolaryngology Elective (3-18)

Clinical activity—full time. Prerequisite: third- and fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Total involvement in clinical activities of the department. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Strong

480. Insights in Otolaryngology (1-3)

Clinical activity—3 to 9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Individualized activities (depending upon time available and previous exposure to Ear, Nose and Throat) including observing patient exams, ward rounds and attendance at lectures and grand rounds. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Strong

490. Journal Seminar (1)

Lecture/discussion—10 hours total (course given three times per quarter). Prerequisite: fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Monthly review of current otolaryngologic and related literature and recent advances. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Donald

498. Individual or Group Study (1-5)

Lecture/discussion—1-2 hours; laboratory—1-4 hours. Prerequisite: consent of instructor. Introduction to basic research in Otolaryngology. Lectures, discussion and laboratory study of sensory and motor systems. (H/P/F grading only.)

499. Research (1-12)

Prerequisite: medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Participation in ongoing projects. (H/P/F grading only.)

Pathology (PMD)**Upper Division Courses****192. Internship in Human Pathology (1-12)**

Internship—3-36 hours; final project report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in pathology and related fields. (P/NP grading only.)

199. Special Study in Pathology for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduates and consent of instructor. (P/NP grading only.)

Graduate Courses**210. Introduction to Human Pathology (4.5)**

Lecture/discussion—8 hours; laboratory—4 hours (5 weeks). Prerequisite: graduate or upper division students with background in gross and microscopic anatomy, physiology and biochemistry. Lectures, laboratory, and computer-assisted learning. Introduces basic human disease processes. Stresses mastery of pathophysiology and vocabulary. Examining gross and microscopic tissue sections is taught. (Course given second five weeks of spring and taken with first-year medical students enrolled in course 410A.) Course not intended for veterinary or medical students.—III. (III.) Gandour-Edwards

298. Advanced Group Study (1-5)

Prerequisite: consent of instructor.

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Courses**404. Forensic Pathology (2)**

Laboratory—3-10 hours. Prerequisite: medical student or consent of instructor. Systematic study of current forensic cases with emphasis on differential diagnosis, preservation of evidence, and medical-legal procedures. Introduction to histopathologic diagnosis, ballistics, and toxicology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Finkbeiner

405. Brain Cutting Conference (1-4)

Seminar—1-4 hours. Prerequisite: third- and fourth-year medical students or consent of instructor. Current specimens are sectioned, discussed, and clinical correlations proposed. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ellis

407. Advanced Neuropathology (1-12)

Discussion and laboratory. Prerequisite: consent of instructor. Study of pathologic reaction in human central and peripheral nervous systems and skeletal muscle by microscopic, light and electron microscopic examination of current and archival material. Discussions of clinical correlations and current medical literature. Individualized experience in neuropathologic techniques. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ellis

410A. General Pathology (2)

Lecture—4 hours; laboratory/discussion—4 hours. Prerequisite: approval of Committee on Student Progress. Pathophysiologic mechanisms of human disease. Gross organ and microscopic materials are utilized to illustrate morphology and concepts. (P/F grading only.)—III. (III.) Gandour-Edwards, Jensen

410B. Systemic Pathology (1.5)

Lecture—8 hours; laboratory/discussion—12 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Concepts of general pathologic processes, i.e., cell death, inflammation and neoplasia in the context of specific organ systems and human diseases in a clinical context. (Deferred grading only, pending completion of sequence. P/F grading only.)—IV. Gandour-Edwards, Jensen

410C. Systemic Pathology (2)

Lecture—1 hour; discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include hematopathology, gynecologic pathology, endocrine pathology, and musculoskeletal pathology. (Deferred grading only, pending completion of sequence. P/F grading only.)—I. Gandour-Edwards, Jensen

410D. Systemic Pathology (2.5)

Lecture—1 hour; discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Course content

closely parallels concurrent clinical courses with integration of lectures and discussions sections. Topics include gastrointestinal pathology, hepatopathology, nutritional pathology. (Deferred grading only, pending completion of sequence. P/F grading only.)—II. Gandour-Edwards, Jensen

410E. Systemic Pathology (1)

Lecture—1 hour; discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Course content closely parallels concurrent clinical courses with integration of lectures and discussion sections. Topics include molecular pathology, cardiac pathology, renal pathology, pulmonary pathology, neuropathology, pathology of the lower urinary tract. (P/F grading only.)—III. Gandour-Edwards, Jensen

464. Anatomic Pathology (6-12)

Clinical activity—full time (4-8 weeks). Prerequisite: third- or fourth-year medical student and consent of instructor. Experience in anatomic pathology with emphasis on surgical pathology and applications to clinical practice. Students participate in specimen grossing, frozen sections, microscopic sign-out and conferences. If desired, opportunities in autopsy and cytopathology are available. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ramsamooj

465. Applied Clinical Laboratory Medicine (6-9)

Clinical activity—full time (4-6 weeks). Prerequisite: consent of instructor. Emphasis upon laboratory techniques, procedures, and interpretation of laboratory results. Students will be expected to participate fully and in all laboratory operations including bench techniques, laboratory management and quality control. (H/P/F grading only.)—II, III, IV. (II, III, IV.) Kost

497T. Tutoring in Pathology (1-5)

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

498. Advanced Group Study (1-5)

Prerequisite: medical student and consent of instructor. Group study in variety of advanced topics in general, special, experimental, or comparative pathology. (H/P/F grading only.)

499. Research (1-18)

Prerequisite: medical student with consent of instructor. Research in experimental, molecular, comparative, and applied pathology. Limited enrollment. (H/P/F grading only.)

Pediatrics (PED)**Upper Division Course****199. Special Study in Pediatric Research (1-5)**

Prerequisite: undergraduate student with consent of instructor based upon adequate preparation as determined by instructor. (P/NP grading only.)

Graduate Course**299. Pediatric Research (1-12)**

Prerequisite: graduate students who are candidates for a degree in some area of biology or behavioral sciences; consent of instructor. (S/U grading only.)

Professional Courses**401. Preceptorship in Pediatrics (2)**

Preceptorship—half time. Prerequisite: second-year medical student or first-year medical student with consent of instructor. Opportunity to observe and participate in primary medical care in a practicing pediatrician's office. Participation in history-taking and physical examination will be at discretion of preceptor and dependent on student's experience. Evaluation by student. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

402. Clinical Experience in Private Practice (1-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: third- or fourth-year medical student; course 430;

consent of preceptor and Chairperson. Opportunity to participate in practice of preceptor, performing such tasks as history taking, physical examination, and patient management. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

430. Pediatric Clerkship (12)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCDCM and affiliated clinical sites. Rounds, conferences, student presentations ongoing. (H/P/F grading only.)—I, II, III, IV. Wold

460A. Acting Internship: General Inpatient Pediatric Clerkship (6-18)

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. The Ward Acting Intern functions in a manner similar to that of a pediatric intern. The Acting Intern takes admissions in the regular sequence and is expected to take night call. The Acting Intern can expect to manage between six and ten patients at a time. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Connors

460B. Acting Internship: Outpatient Pediatrics (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Supervised experience in pediatric care on outpatient service at UCDCM. Student functions as "Acting Intern" with appropriate supervision by residents and attending faculty. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

461. Elective in Hematology/Oncology (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of hematologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ducore

462. Elective in Pediatric Endocrinology (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of second-year study or the equivalent; consent of instructor. Inpatient and outpatient experience in diagnosis and management of endocrine disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

464. Acting Internship in Neonatology (6-18)

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Diagnostic and therapeutic aspect of the medical and surgical high-risk neonate. Student expected to take night call. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Merritt

465. Pediatric Specialty Clinic Elective (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Supervised experience in a variety of pediatric subspecialty clinics. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

466. Elective in Pediatric Cardiology (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430. Inpatient and outpatient experience in diagnosis and management of cardiologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Parrish

467. Elective in Pulmonary Medicine (3-18)

Clinical activity—full time (2 to 12 weeks); daily rounds, two weekly half-day clinics. Prerequisite: pediatric clerkship. Inpatient and outpatient management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic

fibrosis, asthma, and other forms of chronic pulmonary diseases as well as congenital abnormalities. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McDonald, Joad

468. Elective in Pediatric Nephrology (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of renal disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Makker

469. Elective in Pediatric Infectious Disease (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and treatment of infectious disease of infants and children. Laboratory and clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Wenman

470. Elective in Pediatric Neurology (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430, Internal Medicine 430, Obstetrics and Gynecology 430, and Pediatrics 430 and consent of instructor. Inpatient and outpatient experience in diagnosis and management of neurological disorders in children. Students will also participate in other pediatric subspecialty clinics which serve children with neurological disorders. This course does not satisfy the fourth year neurology requirement. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Gospe

471. Elective in Pediatric Gastroenterology (3-18)

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of gastroenterology disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

476. Acting Internship in Pediatric Intensive Care (6-18)

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of A or consent of instructor of record; letter of recommendation from Pediatrics faculty member. Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Dimand

499. Research Topics in Pediatrics (1-18)

Prerequisite: student in Medical School with consent of instructor. Individual research project in pediatric subspecialty areas (cardiology, endocrinology, hematology, metabolism, newborn physiology and others) may be arranged with faculty member. Independent research by student will be emphasized and long-term projects are possible. (H/P/F grading only.)

Physical Medicine and Rehabilitation (PMR)

Upper Division Courses

100. Research Approaches to Disability and Rehabilitation (2)

Lecture/discussion—2 hours. Discussion and evaluation of research approaches to medical rehabilitation, community integration, and quality of life of disabled persons, with a focus on the progressive disabilities associated with neuromuscular diseases. Intent is to encourage interest in professions that serve the disabled community and increase awareness of rehabilitation goals.—II. Devereaux

198. Directed Group Study (1-5)

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

Graduate Course

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Courses

440. Rehabilitation Medicine Clerkship (3)

Clinical activity—full time (2 weeks). Prerequisite: third- or fourth-year medical student; approval by Committee on Student Evaluation and Promotion. Rehabilitation medicine and geriatrics relating to comprehensive care of the physically disabled and the physical medicine management of neurologic and musculoskeletal disorders. Physiological effects, indications and contraindications of the therapeutic modalities and their application to common musculoskeletal disorders. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McDonald

461. Rehabilitation Medicine Clinical Elective (5-18)

Clinical activity—full time. Prerequisite: completion of third year in Medical School; Internal Medicine 430, Surgery 430. Intended for non-UC medical students. Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Fourth-year student may function as acting intern on Physical Medicine and Rehabilitation service. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Kilmer

462. Rehabilitation Medicine Clinical Elective (5-18)

Clinical activity—full time. Prerequisite: Internal Medicine 430, Surgery 430; completion of third year in Medical School. Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Physical Medicine and Rehabilitation at off-campus facility must be approved by Chairperson. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Kilmer

498. Advanced Group Study (1-5)

Prerequisite: consent of instructor. Study and experience for medical students in any of a number of areas in physical medicine and rehabilitation. (H/P/F grading only.)

499. Research for Medical Students (1-12)

Prerequisite: consent of instructor. Research on any of a variety of topics in physical medicine and rehabilitation. (H/P/F grading only.)

Plastic Surgery (PSU)

Professional Courses

460. Clinical Plastic Surgery Elective (1-18)

Clinical activity—full time (approximately 40 hours per week). Prerequisite: third- or fourth-year medical students; Surgery 430; consent of instructor. Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Stevenson

461. Dentistry for Future Physicians and Surgeons (6-8)

Discussion/seminar—3 hours; laboratory—2 hours; clinical activity—full time (4-6 weeks). Prerequisite: third- or fourth-year medical students. General practitioners must recognize dental-related problems, have the ability to alleviate potential pain, and be able to refer these problems for further definitive evaluation and treatment. Students will have basic knowledge of dentistry; recognize potential dental problems; provide emergency care; have knowledge of where to refer these problems. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Thaler

Psychiatry (PSY)

Upper Division Courses

198. Directed Group Study (1-5)

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

Graduate Courses

298. Directed Group Study For Graduate Students (1-5)

Prerequisite: graduate standing and consent of instructor.

299. Special Study for Graduate Students (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Professional Courses

401. Medicine and the Mind: An Introduction to Psychiatry (2)

Lecture/discussion—2.5 hours. Prerequisite: consent of Committee on Educational Progress. Concepts and clinical applications of psychiatry throughout the human life cycle. Biological, psychological, social, cultural and spiritual factors influencing health and illness. (P/F grading only.)—I. (I.) Servis

402. Human Sexuality (1)

Lecture—2 hours. Prerequisite: approval of Student Progress Committee. Normal and variant human sexuality. Understanding human sexual function in health and illness. (P/F grading only.)—III. (III.) Servis

403. Fundamentals of Clinical Psychiatry (3)

Discussion—2 hours; lecture—3 hours. Prerequisite: approval of Committee on Student Progress. Psychiatric interviewing, Mental Status Exam and diagnosis. Major child and adult disorders, including substance abuse and dependence. Weekly student interviews of psychiatric patients in small group format. (P/F grading only.)—I. Leamon

412. Psychiatry Grand Rounds (1)

Lecture—1 hour. Prerequisite: medical students or staff or other qualified mental health professionals with consent of instructor. Weekly conference at UCDMC for presentation of selected clinical cases, presentation of lecture and research reports. (H/P/F grading only.)—II, III, IV. (II, III, IV.)

413. Outpatient Psychiatry Clerkship (6-12)

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of coordinator. Experience in clinical management/treatment of adult outpatients with psychiatric and substance abuse disorders; crisis management/intervention, evaluation/development of diagnosis and treatment plan; emphasis on outpatient psychopharmacology/brief psychotherapy; observation of group therapy. Individual supervision by faculty/residents. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

414. Consultation-Liaison Clerkship (6-12)

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of instructor. Student functions as member of the team in evaluation, management, and psychiatric liaison with other medical specialties. Intensive supervision from senior staff and psychiatric residents. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

415. Substance Abuse: Diagnosis and Treatment (3)

Clinical activity—20 hours; independent study—15 hours; lecture/discussion—5 hours. Prerequisite: medical student with consent of instructor. Two-week selective offering supervised contact with patients addicted to alcohol, opioids, cannabis, or psychostimulants. Sites: Travis Air Force Base and regional Methadone and Alcohol Treatment Programs. Pharmacological, psychosocial, "12-step" and behavioral treatments will be demonstrated. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

416. Child Psychiatry Clerkship (6-12)

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of instructor. Didactic and clinical inpatient, outpatient, and consultation-liaison experiences with children, adolescents and families. Clinical observations, diagnostic assessment, and treatment will be undertaken with close supervision. Literature review and case conferences presented on a regular basis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

417. Jail Psychiatric Clerkship (6 or 12)

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of course coordinator. Students gain experience, under close faculty supervision, assessing acute and chronic mentally ill inmates in both inpatient and clinic settings. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

418. Off-Campus Clinical Experience (6 or 12)

Clinical activity—full time (4 or 8 weeks). Prerequisite: fourth-year medical students; consent of instructor. Clinical or research elective in off-campus medical school or mental health setting. To be arranged with advance approval of instructor and individual in charge of off-campus setting. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

420. Acting Internship in Psychiatry (6-12)

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of course coordinator. Acting intern position with close faculty supervision with emphasis on biological psychiatry, psychopharmacology and psychodynamic aspects appropriate to diagnostic and long-term patient management. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

422. Readings in Psychiatry (1-3)

Readings/discussion—3-9 hours. Independent reading of a selected topic in psychiatry. Supervision and discussion with a psychiatry faculty member. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

430. Psychiatry Clinical Clerkship (12)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Assigned to clinical settings, students build upon the skills gained in preclinical years; emphasis on diagnostic, therapeutic and interpersonal skills. Areas of focus include patient management, interviewing skills, mental status exam, differential diagnosis, basic psychopharmacology, crisis assessment, intervention and case referrals. (H/P/F grading only.)—I, II, III, IV. Cox

480. Insights in Psychiatry (1-3)

Clinical activity—3-9 hours. Prerequisite: first- or second-year medical student in good academic standing; consent of instructor. On individual basis, student provided with an opportunity for gaining insight into various clinical activities in the practice of psychiatry. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Cox

498. Directed Group Study (1-5)

Prerequisite: consent of instructor. Approved for graduate degree credit. Medical students desiring to explore particular topics in depth. (H/P/F grading only for graduate or medical students.)

499. Research (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. Individual research on selected topics or research projects. (H/P/F grading only for graduate or medical students.)

Radiation Oncology (RON)

Graduate Course

299. Independent Study and Research (1-12)

Clinical activity—full time (2-8 weeks). Prerequisite: enrollment with Biomedical Engineering Group for Ph.D. candidacy and consent of Group Advisor and Sponsor. Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. degree. (S/U grading only.)—Kubo

Professional Courses

463. Radiation Oncology Clerkship (3-9)

Clinical activity—full time (2-6 weeks). Prerequisite: completion of Medical Sciences 430, 431; third-year clinical clerkship, consent of instructor required. Introduction to radiation oncology. Students will participate in workup and treatment planning for radiation oncology patients and will be introduced to the concepts involved in clinical radiation oncology, radiation biology, and radiation physics. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ryu

498. Group Study in Therapeutic Radiology (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

499. Research in Radiobiology (3-12)

Clinical activity—full time (2-8 weeks). Prerequisite: consent of instructor. Laboratory investigation on selected topics involving response of biological molecules, cells, tissues or animals to ionizing radiation. (H/P/F grading only.) Leigh

Radiology—Diagnostic (RDI)

Professional Courses

413. Radiological Diagnosis II (Physics of Diagnostic Radiology) (5)

Lecture—49 hours total; laboratory—6 hours total. Prerequisite: consent of instructor. Physics of diagnostic imaging; x-ray production and interaction; image formation; modulation transfer function; fluoroscopy; cine fluoroscopy; stereoscopy; xeroradiography; computerized and geometrical tomography; magnetic resonance and ultrasound. Principles of radiation protection in imaging will be covered. (H/P/F grading only.)—I. (I.) Seibert, Boone

414. Medical Radiation Biology (3)

Lecture—27 hours total. Prerequisite: consent of instructor. Medical radiation biology; molecular cellular and organ system response to acute and chronic irradiation; radiation carcinogenesis and genetic effects; radiation risk assessment; diagnostic ultrasound and magnetic resonance imaging health effects. Medical/legal considerations of radiation exposure. Offered in alternate years. (H/P/F grading only.)—III. Bushberg

461. Clinical Clerkship in Diagnostic Radiology (1-18)

Clinical activity—full time (3 days per unit). Prerequisite: completion of third year of Medical School; consent of instructor. Student works with radiologists at UC Medical Center in film reading sessions and radiological procedures; includes fluoroscopy, vascular radiology and special investigations. Includes daily individual teaching sessions with faculty radiologists, radiology learning laboratory, and all radiology conferences and seminars. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McFall

462. Diagnostic Imaging of Acquired and Congenital Heart Disease (2)

Lecture/discussion—5 hours (for 3 weeks). Prerequisite: fourth-year medical student in good academic standing and course 461 (may be taken concurrently). Main emphasis on radiology of acquired and congenital heart disease, but also on magnetic resonance, nuclear medicine, and echocardiography of heart diseases. (H/P/F grading only.)—III. (III.) Bogren

498. Group Study in Diagnostic Radiology (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

499. Research in Diagnostic Radiology (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

Radiology—Nuclear Medicine (RNU)

Upper Division Courses

198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

Graduate Course

299. Research: Special Study for Graduate Students (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Professional Courses

401. Biomedical Radiochemistry (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: open to graduate and medical students; consent of instructor. Approved for graduate degree credit. Course is designed to combine basic nuclear physics, chemistry, and biology into a comprehensive and vigorous lecture-laboratory experience in biomedical nuclear chemistry. Subjects include choice and purification of appropriate gamma and beta radioisotopes, compounding biological pharmacodynamics and radioimmunoassay. (H/P/F grading only.)—III. (III.)

411. Radiological Physics I (Physics of Nuclear Medicine) (5)

Lecture—43 hours total; laboratory—12 hours total. Prerequisite: consent of instructor. Physics of diagnostic and therapeutic nuclear medicine, nuclear physics, radioactive decay; interaction of ionizing radiation; dosimeters; attenuation; internal and external dosimetry; health physics; radiation detection and imaging, scintillation cameras, computerized planar and tomographic imaging. Offered at UC Davis Medical Center. Offered in alternate years. (H/P/F grading only.)—(I.) Bushberg, Vera

463. Clinical Clerkship in Nuclear Medicine (3-8)

Clinical Activity—full time (2-6 weeks). Prerequisite: satisfactory completion of second-year medical school; Radiology—Diagnostic 461 recommended; consent of instructor. Clerkship correlates radioisotopic methods with clinical, pathophysiological, and other diagnostic aspects of the patient's care. Each patient reviewed with student by faculty member. Reading assignments, informal projects, and research techniques available. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Shelton

498. Group Study in Nuclear Medicine (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

499. Research in Nuclear Medicine (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

Surgery (SUR)

Upper Division Courses

192. Internship in General Surgery (1-12)

Internship—3-36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in general surgery and related fields. (P/NP grading only.)

199. Special Study in General Surgery for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduate student with consent of instructor. (P/NP grading only.)

Graduate Course

299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Professional Courses

430. Surgery Clerkship (12)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCDCMC. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.)—I, II, III, IV. Owings

460A. Clinical Surgical Elective (6-18)

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Rotation through Surgery Specialty Clinics: Vascular, GI, GU, Thoracic, Plastic, Radiotherapy. Student works up one new and two return visit patients. Presents consult to on-site faculty. Weekly review with preceptor and course director. Reading assignments to add perspective for in-depth discussions. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Follette

461. Surgery Burn Unit Clerkship (6 or 9)

Clinical activity—full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Externship in the eight-bed Burn Unit, and the 80 bed Shriners Hospital for Children. Principles of critical care, fluid and electrolyte resuscitation and management of surgical wounds in both adults and children. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

462. Surgery Trauma Service Clerkship (6 or 9)

Clinical activity—full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student works as an extern on one of the two general surgery Trauma teams, participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on, and 24 hours off. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

463. Surgery Intensive Care Unit (6 or 9)

Clinical activity—full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student participates in direct supervision of critically ill surgical patients in a twelve-bed surgery ICU. Each student is closely supervised. Provides in-depth experience with management of critically ill patients. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

464. General Surgery Clerkship: Kaiser Hospital (6 or 9)

Clinical activity—full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student participates with University residents on the teaching services at Kaiser Hospital, Sacramento. Opportunity to see larger number of practical, general surgical problems and participate in their care. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

467. Surgical Oncology (3-9)

Clinical activity—full time (2 to 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Students actively participate in management of patients requiring surgery for cancer, endocrine disease and selected general surgical problems. Cases include malignant melanoma, sarcomas, gastrointestinal cancer, head and neck pathology, and metastatic malignancies. Attending rounds daily. Four teaching conferences weekly. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

468. Cardiothoracic Surgery Clerkship (6-9)

Clinical activity—full time (4 to 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student works as an extern on the Cardiothoracic Surgical Service, participating in perioperative management and operations on the heart, lungs, mediastinum, and other thoracic structures. Regularly scheduled teaching conferences are conducted. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Benfield

469. Trauma Service: East Bay (6-9)

Clinical activity—full time. Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430 and Internal Medicine 430. Student works as an extern on the Trauma Service at Highland General Hospital (Oakland) participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on and 24 hours off. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

470. General Surgery: East Bay (6-9)

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Student will work as an extern on one of the two general surgery services and participate in the pre-operative evaluation, intra-operative management, and post-operative care of surgical patients. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Organ

471. Gastrointestinal Surgery (3-9)

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430. Student participates on the GI Surgery Service, working under the immediate supervision of the faculty and surgical housestaff, involving the full spectrum of gastrointestinal diseases performed by the medical student. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Wolfe

472. Vascular Surgery (3-9)

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430. Student participates on the vascular surgery service and in the management and operations of arterial and venous system, exclusive of diseases that require cardiopulmonary bypass for treatment. Includes patient care responsibilities with appropriate supervision. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

Holcroft

473. Surgical Intensive Care Unit—East Bay (6-9)

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430 and Internal Medicine 430. Externship on surgical ICU service, clinical management of critically ill patients in the SICU, ICU procedures with appropriate supervision. An eight-lecture didactic series. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Organ

474. Breast Disease (6)

Clinical activity—full time (4 weeks). Prerequisite: third-year surgery clerkship, Medical Sciences 430. Students focus on aspects of benign and malignant breast disease working in the surgical oncology clinics, observing needle localization procedures, following patients to the O.R., working with radiologists in mammography, working in hematology-oncology clinics, and with pathologists reviewing histology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Goodnight

475. Pediatric Surgery (6-9)

Clinical activity—full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Care of patients with neonatal congenital surgical problems. Fluid and electrolyte management in infants. General experience with acquired surgical diseases in children. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Marr, Clifford

476. Surgical Consult Service (6-9)

Clinical activity—full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Students function as acting interns working in parallel with the interns on the service. They consult on all non-trauma patients in the emergency room and on the wards and also participate in the operating room. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Blaisdell

477. Clinically Oriented Anatomy (3)

Clinical activity—40 hours. Prerequisite: completion of three years of medical school. Anatomy of

selected regions of the body using cadaver dissection, prosections and interactive CD-ROMs. Anatomical relationships relevant to common surgical procedures. Surgical and interventional radiology procedures. (H/P/F grading only.)—II. Khatri, Kumari

478. Surgical Preceptorship: Off Campus (6-18)

Clinical activity—full time. Prerequisite: fourth-year medical student and consent of instructor. Student participates in the preoperative, operative and postoperative care of surgical patients under the supervision of attending staff. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Holcroft

480. Insights in Surgery (1-3)

Clinical activity—3 to 9 hours. Prerequisite: medical student in good academic standing and consent of instructor. Individualized activities, including ward rounds, subspecialty clinics and conferences, grand rounds, and observation of a variety of surgical procedures. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

494H. Fourth-Year Surgical Honors Program (18)

Prerequisite: completion of third year of medical school with superior performance on course 430; consent of instructor. To provide intensive and comprehensive training in surgery to students interested in a postgraduate surgical career, that would enable them to succeed during the internship and residency training. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Holcroft

498. Group Study (1-5)

Prerequisite: medical student; consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

499. Laboratory Research (1-12)

Laboratory—3-36 hours. Prerequisite: completion of second year of medical school; consent of instructor. Laboratory research on surgically related problems. Participation in projects to include the following: burn, nutrition, oncology, transplant and others. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

Urology (URO)

Upper Division Course

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—deVere White

Professional Courses

400. Office Urology (1)

Clinical activity—4 hours in afternoons (6 weeks). Prerequisite: fourth-year medical students with consent of instructor. Introduction to ambulatory care of urologic patients including basic therapeutic and diagnostic procedures from case material referred to private clinic. Management of urinary tract infection will be emphasized. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) deVere White

460. Urology Clinical Clerkship (5-18)

Clinical activity—full time. Prerequisite: second-year medical student; physical diagnosis or the equivalent; consent of instructor. Clinical experience in diagnosis and treatment of urologic disease. Student will work closely with house staff, participate in conferences and surgery, and perform initial patient evaluation on new patients. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) deVere White

461. Externship in Urology (5-18)

Clinical activity—full time. Prerequisite: fourth-year medical students with consent of instructor. Under supervision, student acting as intern will assume full inpatient responsibility including admission history, physical examination, management of hospitalization, and participate in surgical procedures, outpatient clinic and learning diagnostic and therapeutic procedures. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) deVere White

499. Research in Urology (1-12)

Research—3-36 hours. Prerequisite: medical or veterinary medical students with consent of instructor. Research in oncology, male infertility, urodynamics, neurogenic bladder. Unique opportunity to apply recent technologies (nuclear medicine resonance, flow cytometry, recombinant DNA) in investigation, diagnosis and treatment of GU cancer, infectious disease, male infertility and development of genitourinary bioprosthesis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) deVere White

Courses in Medicine and Epidemiology (VME)

Upper Division Course

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

217. Evaluation of Diagnostic Tests (2)

Lecture/discussion—1.7 hours; laboratory—1 hour. Prerequisite: consent of instructor. Topics include sensitivity, specificity, predictive values, Bayes' Theorem, ROC curves, measuring agreement between tests, series and parallel testing strategies. Emphasis on rational interpretation and presentation of test results for individuals and aggregates. Offered in alternate years.—(III.) Gardner

294B. Conservation Biology and Veterinary Medicine (1)

Seminar—1 hour. Discussion of current topics in conservation biology as they relate to veterinary medicine; the emphasis is on wildlife. May be repeated for credit. (S/U grading only.)—II. (II.) Mazet

298. Group Study (1-5)

Prerequisite: student in School of Veterinary Medicine or consent of instructor. Group study in selected areas of the clinical sciences. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Course

397T. Tutoring in Veterinary Medicine and Epidemiology (1-5)

Lecture—1 hour; laboratory—3 hours; discussion—2 hours. For graduate or professional students who desire teaching experience, but are not teaching assistants. May be repeated for credit. (S/U grading only.)

Professional Courses

410. Husbandry, Feeding and Management of Captive Animals (2)

Lecture—20 sessions. Prerequisite: first year standing in the School of Veterinary Medicine. Introduction of management and husbandry dynamics as a prerequisite for preventive health programs in zoos, aquaria, vivaria, and other environments for exotic pets and wild animals.—III. Tell

411. Laboratory Animal Medicine (2)

Lecture—20 hours. Prerequisite: third-year standing in School of Veterinary Medicine or consent of instructor. Diagnostic, therapeutic and preventive methods for diseases of rabbits, guinea pigs, hamsters and certain related laboratory rodents will be presented to serve the needs of clinical and research veterinarians. Lecture demonstrations with subject species will be provided.—II. (II.) Eisele

412. Laboratory Animal Medicine (2)

Lecture—20 hours. Prerequisite: third-year standing in School of Veterinary Medicine or consent of instructor. Prevention, diagnosis and therapy of medical problems in rabbits, guinea pigs, hamsters, mice, rats and other laboratory species. Emphasis will be placed on animal colony health management technique, and concepts of preventive disease needed by veterinarians in charge of research facilities.—III. (III.)

413. Medical Primatology (2)

Lecture—20 hours. Prerequisite: third-year standing in School of Veterinary Medicine or consent of

instructor. Major diseases, medical management and husbandry of captive non-human primates. (S/U grading only.)—III. (III.) Roberts

414. Applications of Epidemiologic Methods to Herd Health (3)

Lecture—2 hours; fieldwork—2 hours. Prerequisite: Preventive Veterinary Medicine 405, 406, or the equivalent, or consent of instructor. Epidemiologic applications to health and production problems in animal populations. Topics include test interpretation, decision-tree analysis, time trend analysis, disease reporting, investigation of chronic diseases, microcomputer problems for herd health.—III. (III.) Gardner

415. Management and Diseases of Captive Wildlife (2)

Lecture—20 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Introduction to the roles of a zoological veterinarian and the most common topics encountered. Emphasis on taxonomy, husbandry, preventive medicine and the most common diseases seen in common captive wildlife species.—I. (I.) Wack

416. Fish Medicine (2.1)

Lecture—18 hours; laboratory—3 hours. Prerequisite: consent of instructor. Etiology, pathology, diagnosis, treatment and prevention of diseases of fish. Preventative management of diseases in aquaculture and aquaria. Field trips, if interest and time allows.—III. (III.) Hedrick

417. Companion Avian Medicine (2)

Lecture—20 hours. Prerequisite: third-year standing in School of Veterinary Medicine. Diseases, diagnostics, medical management and surgery of psittacine species. Avian nutrition, husbandry, and management.—II. (II.) Tell

419. Companion Exotic Small Animal Medicine and Surgery (3.4)

Lecture—17 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Provides fundamental understanding of the etiology, clinical presentation, diagnostic evaluation, treatment, prevention, and control of medical diseases of companion small exotic animals.—I. Tell

427. Introduction to Food Animal Herd Health Medicine (2)

Lecture—9 sessions; discussion—3 sessions; laboratory—7 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463A, and course 463B (concurrently). Current problem solving concepts, approaches, and issues addressed in subsequent food animal medicine courses; provide contexts for developing problem solving skills through on-site, field investigation of herd and flock health problems.—I. Thurmond

428. Food Animal Surgery (1.6)

Lecture—16 hours. Prerequisite: third-year standing in School of Veterinary Medicine. Selected topics in surgical diseases of food animals covered in detail. (S/U grading only.)—III. (III.) Smith

428L. Food Animal Surgery Laboratory (0.8)

Laboratory—8 three-hour sessions. Prerequisite: third-year standing in School of Veterinary Medicine; course 428 (concurrently). Representative surgeries of food animals performed by groups of students. Limited enrollment. (S/U grading only.)—III. (III.) Smith

429A. Sheep Herd Health (1)

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463A, 463B, 427, course 463C concurrently, or consent of instructor. The application of problem-solving and epidemiologic methods to sheep diseases and their control.—II. Lane

429B. Beef Herd Health (1)

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463A, 463B, 427, course 463C concurrently, or consent of instructor. The application of problem-solving methods to diseases of grazing beef cattle and their control.—II. Maas

429C. Swine Herd Health (1)

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463A, 463B, 427, course 463C concurrently, or consent of instructor. The application of problem-solving and epidemiologic methods to swine diseases and their control.—II. Gardner

430. Raptor Medicine and Rehabilitation (2)

Lecture—2 hours. Biology, behavior, parasites, diseases, toxins, iatrogenic conditions, diagnostics, treatments, nursing, housing, nutrition, rehabilitation and release techniques for eggs, orphans and adult native California raptors.—III. (III.) Brooks

432A-432B-432C. Raptor Clinics (1-1-1)

Laboratory—3 hours. Prerequisite: students in the School of Veterinary Medicine or consent of instructor. Serves as student treatment crew for the Raptor Center, providing hands-on experience with handling, restraint and treatment for ill and injured birds of prey with the goal of rehabilitation and release back into their native habitat. (S/U grading only.)—II-III. (II-III.) Tell

446. Small Animal Reproduction (1)

Lecture—7 hours; discussion—1 hour; laboratory—2 three-hour sessions. Prerequisite: second year standing in the School of Veterinary Medicine.

Approved for graduate degree credit. Provides a complete description (history, physical examination, laboratory abnormalities, etc.) of the common abnormalities associated with the genital tract of male and female dogs and cats.—III. (III.) Feldman

450. Small Animal Clinical Immunology (2.2)

Lecture—16 hours; laboratory—6 sessions. Prerequisite: basic immunology. Comprehensive discussion of the basic mechanisms of immunologic diseases in animals and description of common immunologic diseases, including clinical presentation, diagnosis and treatment. Emphasis on small animals and analogous disorders of humans. (S/U grading only.)—III. (III.) Pedersen

454. International Veterinary Medicine Baja California Fieldwork (2)

Fieldwork—40 hours. Students in the School of Veterinary Medicine or consent of instructor. Livestock diseases responsible for limiting trade across the U.S./Mexico border, how knowledge is extended to ranchers, and how veterinarians are educated in Mexico. Offered during Spring break. (S/U grading only.)—III. (III.) Hird

455. Beginning Veterinary Spanish (2)

Lecture/discussion—3 hours. Prerequisite: student in the School of Veterinary Medicine. Preparation to converse with clients (e.g., companion animal owners) and livestock managers in Spanish in clinical settings. (S/U grading only.)—II. Hird

456. Intermediate Veterinary Spanish (1)

Discussion—10 sessions. Prerequisite: student in the School of Veterinary Medicine. Presentations on veterinary-related topics in Spanish by native speakers and others followed by discussion to prepare students to converse with clients (e.g., companion animal owners and livestock managers) in Spanish. May be repeated for up to 2 units of credit. (S/U grading only.)—III. Hird

460. Equine Behavior and Natural Concepts of Horsemanship (1)

Lecture/laboratory—1 hour. Each session begins with orientation for day and practical equine handling methods follow, emphasizing horse's behavior and recognizing horse's natural reactions to painful, threatening or frightening stimuli. (S/U grading only.)—II. (II.) Spier

461A. Small Animal Medicine—Level I (3.4)

Lecture—34 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Fundamental principles, clinical manifestations, diagnostic methods and therapeutic approaches to the medical diseases of dogs and cats. Course is a core option for the professional veterinary curriculum and preparatory for advanced courses in small medical diagnoses and therapeutics.—III. Marks

461B. Small Animal Medicine—Level I (3.8)

Lecture—34 sessions; laboratory—4 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 461A (Small Animal Medicine core only), or consent of instructor. Continuation of fundamental principles, clinical manifestations, diagnostic methods, and therapeutic approaches to the medical diseases of dogs and cats.—I. Kittleson

461C. Small Animal Medicine—Level I (3.4)

Lecture—34 sessions. Prerequisite: course 461A, 461B or consent of instructor, third-year standing in the School of Veterinary Medicine. Continuation of fundamental principles, clinical manifestations, diagnostic methods and therapeutic approaches to the medical diseases of dogs and cats.—II. (II.) White

462. Small Animal Medicine—Level II (3.7)

Lecture—34 sessions; laboratory—3 sessions. Prerequisite: courses 461A, 461B, 461C, third-year standing in the School of Veterinary Medicine. The fundamental understanding of pathophysiology and clinical manifestations of organ damage and failure. "Signs and symptoms" as a method of teaching differential diagnosis. Infectious diseases and diseases of the skin, cardiovascular, respiratory, gastrointestinal, and urinary systems.—III. Ihrke

463A. Food Animal Medicine, Level I (3.4)

Lecture—34 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. The fundamentals of food animal medicine presented in a lecture format with integrated case discussion to illustrate the context and application of material presented and to promote development of problem-solving skills.—III. (III.) Smith

463B. Food Animal Medicine, Level I (3.4)

Lecture—34 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463A (Food Animal Medicine core only), or consent of instructor. Fundamentals of food animal medicine with integrated case discussions to illustrate the context and application of material presented and to promote development of problem-solving skills.—II. George

463C. Food Animal Medicine, Level I (3.5)

Lecture—31 sessions; laboratory—4 sessions. Prerequisite: course 463A, 463B or consent of instructor, third-year standing in the School of Veterinary Medicine. Continuation of the fundamentals of food animal medicine with integrated case discussions to illustrate the context and application of material presented and to promote development of problem-solving skills.—II. (II.) George

464A. Equine Medicine—Level I (3.4)

Lecture—33 sessions; laboratory—1 session. Prerequisite: second-year standing in the School of Veterinary Medicine. The etiology, pathophysiology, epidemiology, clinical presentation, diagnostic evaluation, treatment, presentation, and control of important infectious and non-infectious diseases of horses. Emphasis on problem-based approach to differential diagnosis.—III. Spier

464B. Equine Medicine, Level I (3.7)

Lecture—31 sessions; laboratory—6 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 464A (Equine Medicine core only), or consent of instructor. Instruction in the etiology, pathophysiology, epidemiology, clinical presentation, diagnostic evaluation, treatment, prevention, and control of important infectious and non-infectious diseases of horses. A problem-based approach to differential diagnosis.—I. Madigan

464C. Equine Medicine, Level I (3.4)

Lecture—31 sessions; laboratory—3 sessions. Prerequisite: course 464A, 464B or consent of instructor, third-year standing in the School of Veterinary Medicine. Continuation in instruction in the etiology, pathophysiology, epidemiology, clinical presentation, diagnostic evaluation, treatment, prevention and control of important infectious and non-infectious diseases of horses. A problem-based approach to differential diagnosis emphasized.—II. (II.) Wilson

465. Advanced Equine Medicine—Level II (3.6)

Lecture—36 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course

464C. Commonly encountered problems of horses held as individuals and farm settings. Development of problem solving skills related to the medical management of horses and their problems.—III. Madigan

465L. Advanced Equine Medicine Level II Laboratory (0.8)

Laboratory—8 sessions. Prerequisite: course 464A, 464B, 464C, 465 (may be taken concurrently), third-year standing in School of Veterinary Medicine. Clinical presentation and instruction in treatment of the medical aspects of equine practice. (S/U grading only.)—III. (III.) Madigan

481A-481B-481C. Clinic Rounds (1-1-1)

Discussion—1 hour. Prerequisite: first- or second-year standing in the School of Veterinary Medicine. Discussion of selected small and large animal cases from the Veterinary Medicine Teaching Hospital. May be repeated once for credit. (S/U grading only.)—I-II-III. (I-II-III.) Smith

486A. Equine Clinical Neonatology (1)

Discussion—1 hour. Prerequisite: first-year standing in the School of Veterinary Medicine or consent of instructor. Discussion of methods of equine neonatal intensive care and disease pathophysiology in a case format. (S/U grading only.)—II. (II.) Madigan

486B. Equine Clinical Neonatology (1)

Discussion—1 hour. Prerequisite: first-year standing in the School of Veterinary Medicine or consent of instructor. Discussion of methods of equine neonatal intensive care and disease pathophysiology in a case format. (S/U grading only.)—III. (III.) Madigan

487. Comparative Bio-Medical: Form and Function (2)

Lecture—20 sessions. Prerequisite: first-year standing in School of Veterinary Medicine or consent of instructor. Comparative biology approach and concepts for non-traditional animal species; alternative pets, zoos, rehabilitation centers, wildlife, aquaculture, laboratory animals, and non-human primates. (S/U grading only.)—II. (II.) Roberts

488. Nondomestic Pet Animal Medicine (2)

Discussion—2 hours. Prerequisite: second-year standing in the School of Veterinary Medicine. Discussion of practical medical and surgical management of common spontaneous and infectious diseases of nondomestic pets.—III. (III.)

493. Seminar In Veterinary Medicine (1)

Seminar—2 hours. Prerequisite: professional standing; resident in Veterinary Medical Teaching Hospital. Seminars given by the faculty of the School of Veterinary Medicine in topics relating directly to the practice of clinical medicine and surgery. Residents will assist in the presentation of seminar material. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

494. International Programs Seminar (1)

Seminar—10 sessions. Prerequisite: D.V.M, M.P.V.M. or consent of instructor. Discussion, by veterinarians around the world, of aspects of veterinary medicine in their countries and regions, ranging from livestock to wildlife medicine to companion animal practice. May be repeated twice for credit. (S/U grading only.)—II. Hird

The Major Program

The Major in Medieval Studies examines the intellectual, political, and cultural forces that shaped modern European civilization during the period from the end of Ancient Rome (fifth century) to the beginning of the Enlightenment (mid-eighteenth century). An interdisciplinary and interdepartmental program, the major includes studies in history, art, philosophy, literature, drama, music, national languages, religion, rhetoric, and political theory.

The Program. The major requires interdisciplinary work, while allowing the student to focus on the early Middle Ages, the High Middle Ages, the Renaissance, or the Baroque. The series of Medieval and Early Modern courses in the program provides the foundation for the major and prepares students for advanced work within the individual disciplines. On the upper-division level, students may choose course work in specific areas of History, Comparative Literature, English, French, German, Italian, Spanish, and Latin, philosophy and religion, arts and language, and political thought. In addition, each student may elect to complete a senior thesis on a selected aspect of Medieval and/or Early Modern culture.

Career Alternatives. The major in Medieval and Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	24
Medieval Studies 20A, 20B, 20C	12
Three additional courses chosen from: Art 1B, 1C; Comparative Literature 2, 10A, 10B, 10C, 10D, 10E; English 46A; German 47, 48; History 4A, 4B; Humanities 1*, 9; Philosophy 21, 22	12
Language proficiency is a desideratum. Courses in Latin and other European languages are strongly recommended, particularly for students planning to pursue graduate studies in the medieval or early modern field.	
Depth Subject Matter	44
In consultation with the undergraduate adviser, students select a total of eleven courses from the following disciplines with at least three courses each from the Medieval and Early Modern periods.	

- Art History 176A, 176B, 176C, 177A, 177B, 178A, 178B, 178C, 179B, 190B, 190C
- Classics 110
- Comparative Literature 139, 164A, 164B, 164C, 166A, 180*
- Dramatic Art 156A
- English 111, 113A, 113B, 115, 117A, 117B, 117C, 118, 122, 150A, 153*, 165*, 185A*, 188*, 189*
- French 115, 116, 117A, 118B, 141*

- German 101A, 112*, 117, 120, 121, 122A, 122B, 124*, 134*, 140, 160, 167
- History 102B, 102D, 121A, 121B, 121C, 122, 125, 130A, 130B, 131A, 131B, 132, 135, 136, 139A, 144A, 148A, 151A, 151B
- History of Science 130A
- Italian 105, 112, 113, 114, 115A, 115B, 115C, 115D, 118, 139B, 140, 141
- Latin 101, 102, 103, 104, 105, 106, 108, 109, 112, 114, 115, 116, 125
- Medieval Studies 120A, 120B, 120D, 120E, 130A, 130B, 190
- Music 121*, 124A, 124B
- Philosophy 105, 132, 145, 190*
- Political Science 115, 116, 118A
- Religious Studies 102, 115, 130*, 142
- Spanish 130, 132N, 133N, 134N, 142*

Total Units for the Major68

* Prior approval by Undergraduate Adviser necessary.

Major Adviser. K. Roddy.

Minor Program Requirements:

Medieval Studies24

The minor in Medieval Studies is a coherent program of interdisciplinary study. Medieval Studies units may be taken in one or more of the traditional fields of concentration, including art, history, literature, music, national languages, philosophy, political theory, and religious studies. Courses must be upper-division with at least two courses each from the Medieval and Early Modern periods. Students may also select a minor with a thematic emphasis.

Although there is no foreign language requirement for the minor, knowledge of Latin or a modern European language is recommended.

The minor must be designed in consultation with the Undergraduate Adviser.

Minor Adviser. K. Roddy.

Courses in Medieval Studies (MST)

Lower Division Courses

20A. Early Medieval Culture (4)

Lecture—3 hours; discussion—1 hour. Readings (in translation) in early medieval culture, such as the Codes of Justinian, the *Confessions* of Saint Augustine, *The Consolation of Philosophy* of Boethius, *Beowulf*, the *Nibelungenlied*, and the *Song of Roland*. GE credit: ArtHum, Wrt.—I. (I.) Roddy

20B. The Culture of the High Middle Ages (4)

Lecture—3 hours; discussion—1 hour. Readings (in translation) in the culture of the high Middle Ages, such as the *Summa Theologica* of Thomas Aquinas, the *Chronicles* of Froissart, *The Canterbury Tales* of Chaucer, and the *Divine Comedy* of Dante. GE credit: ArtHum, Wrt.—II. (II.) Roddy

20C. The Late Medieval and Early Modern Period (4)

Lecture—3 hours; discussion—1 hour. The great transformations that created the modern world: Constitutional Government, the Hundred Years' War, the Black Death, and the Peasants' Revolts, the Renaissance, Reformation and Counter-Reformation, and the Baroque. GE credit: ArtHum, Wrt.

98. Directed Group Study (1-5)

(P/NP grading only.)

99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

Upper Division Courses

120A-E. The Medieval World (4)

Lecture—3 hours; discussion—1 hour; term paper. Course deals with selected themes from the Middle Ages: the Fall of Rome to the beginning of the

Committee in Charge

Georges Van Den Abeele, Ph.D. (*French, Italian*)
 Joan Cadden, Ph.D. (*History*)
 Margaret W. Ferguson, Ph.D. (*English*)
 Adrienne Martin, Ph.D. (*Spanish*)
 Winder McConnell, Ph.D. (*German*)
 Marijane Osborn, Ph.D. (*English*)

Renaissance. Subjects will vary from year to year and cover such topics as

- (A) The Monastic Orders;
- (B) Origins of Universities;
- (D) Family and Society;
- (E) Chivalry.

GE credit for 120A or 120D or 120E: ArtHum, Wrt.—I, II, III. (I, II, III.)

121. Jewish/Christian/Islamic Relations 700–1400 (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; one course from the 20 series recommended. Examination of the relationships among Islam, Judaism, and Christianity between 700-1400. Topics include politics, geography and travel, architecture and art, philosophy, science, theology, mysticism, and literature. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.)

130A. Special Themes in Medieval Cultures (4)

Lecture—3 hours; discussion—1 hour. Each offering concentrates on an interdisciplinary aspect of medieval culture in the Middle East and Europe: the idea of the hero, mysticism, urban development. Extensive readings focused on medieval source material. May be repeated for credit. GE credit: ArtHum, Wrt.—III. (III.)

130B. Special Themes in Renaissance Culture (4)

Lecture—3 hours; discussion—1 hour. Each theme illuminates an interdisciplinary aspect of Renaissance culture in the eastern and western hemispheres: exploration, medical pathology, daily life, baroque culture. Immersion in source material from 1500-1650. May be repeated for credit. GE credit: ArtHum, Wrt.—(II.) Schleiner

190. Senior Thesis (4)

Seminar—4 hours. Prerequisite: senior standing and major in Medieval Studies. Preparation of a research paper dealing with a selected aspect of medieval culture, under supervision of three members of the Committee in Charge.—I, II, III. (I, II, III.)

197T. Tutoring in Medieval Studies (1-4)

Seminar—2 hours. Prerequisite: courses 20A and 20B; upper division standing; consent of instructor and chairperson of curriculum committee. Tutoring in Medieval Studies 20A and 20B, including leadership in small discussion groups affiliated with the course. May be repeated for credit for a total of 6 units. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Ellen E. Sparger, Ph.D., Adjunct Professor (*Medicine and Epidemiology*)

Graduate Study. The Graduate Group in Microbiology offers study and research leading to the M.S. and Ph.D. degrees. Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate adviser or the Chairperson of the Group.

Graduate Advisers. L.F. Bisson (*Viticulture and Enology*), R.B. LeFebvre (*Pathology, Microbiology and Immunology*), K. Shiozaki (*Microbiology*), K.M. Scow (*Land, Air and Water Resources*).

Courses in Microbiology (MIB)

Graduate Courses

290C. Advanced Research Conference (1)

Discussion/conference—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and critical discussion of staff research

activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

299. Research (1-12)

Research under the guidance of dissertation committee. (S/U grading only.)

Captain Todd E. Kramer, Assistant Professor

Program of Study

The Military Science Department offers hands-on training in management and leadership. The program stresses the following leadership dimensions: oral and written communications, oral presentations (formal briefings), initiative, sensitivity, influence, planning and organizing, delegation, administrative control, problem analysis, judgement, decisiveness, physical stamina, mission accomplishment, and followership. Also stressed are current events, national and international politics, military affairs, ethics training, and human relations with emphasis on eliminating racial and gender discrimination. Management and leadership are taught using the U.S. Army as a model. Military skills (such as drill and ceremonies, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. Students learn by doing. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The department offers two program tracks: (1) a purely academic track, and (2) a precommissioning track for those desiring a commission in the U.S. Army. The academic track entails no obligation to the military and is open to all students. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the precommissioning process. Activities for all students include the Ranger Club (a club designed for adventure activities such as rappelling, white-water rafting, orienteering, and patrolling) and intramural sports teams.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extra-curricular activities designed to enhance their leadership and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students participating in the upper division precommissioning program incur a military obligation. See below for details. Extra-curricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

Department Programs

Students are enrolled in military science under one of two programs.

Four-Year Program

Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis.

There is no military obligation associated with attendance in lower division courses. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately because of their military service experience, upon approval by the Department Chairperson.

Upper division students receive \$200 subsistence per month after executing a contract agreeing to complete the course and **accept a commission if offered.** During the course, all military science text books, uniforms and equipment are provided without cost. Students are given leadership development experience at summer camp (advanced camp) between their third and fourth years of the course. Emphasis is on individual participation, leadership development and the capability to function effectively in positions of significant responsibility.

Two-Year Program

The two-year program is for students who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer camp (basic camp) which is voluntary and carries no military obligation. Applicants are paid for camp attendance and transportation costs. Applications are accepted during the winter and spring terms of the year preceding enrollment in the two-year program. All other provisions explained above for the upper division course apply to the two-year program.

Scholarship Program

The U.S. Army offers four-, three-, and two-year Active Duty and two-year Reserve Forces Duty scholarships to students planning to attend or attending UC Davis. The U.S. Army ROTC scholarship package pays tuition and educational fees. Also included in all scholarships is a flat rate of \$510 per year for textbooks, up to \$400 per year for miscellaneous fees such as laboratory, student activity, transcript, and graduation fees, and a subsistence allowance of \$200 a month for 10 months for each year that the scholarship is in effect.

The Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. There are two cycles available for submission of the four-year scholarship application. High school juniors can compete for an Early Cycles scholarship by submitting their application complete and postmarked by July 15 between their junior and senior years. As high school seniors, students compete for the Regular Cycle scholarship by submitting their application complete and postmarked by December 1. Those applicants not selected in the Early Cycle are considered in the Regular Cycle competition. Interested applicants should apply online (www.monroe.army.mil) or contact UC Davis, Department of Military Science at (530) 752-7682.

The three-year Active Duty and two-year Reserve Forces Duty scholarships are awarded to college students who are already attending UC Davis or transferring from a junior college to UC Davis, and have three or two years remaining before graduating with a baccalaureate. Students interested in competing for these scholarships can submit their application beginning in November of each school year. The deadline for submission of an application is April 15 for the two-year scholarship and March 1 for the three-year scholarship. Students apply for and are awarded these Army scholarships through the Military Science Department.

Leadership Laboratory

During the course of the school year, several weekends and two hours per week are spent in the conduct of practical exercises. Classes emphasize adventure activities including offense, defense and

patrolling techniques, weapons familiarization, rappelling, rope bridging, obstacle courses, leadership reaction course, and land navigation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at the Army ROTC Advanced Camp, held at Fort Lewis, Washington.

Academic Credit

College of Letters and Science. The Bachelor of Arts degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.

College of Agricultural and Environmental Sciences. The Bachelor of Science degree in agriculture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.

College of Engineering. Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unrestricted elective units available in the curriculum being followed.

School of Veterinary Medicine. The number of Military Science units acceptable toward the Bachelor of Science degree in Veterinary Medicine is on an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree may apply for direct commission in the United States Army Veterinary Corps.

Courses in Military Science (MSC)

Lower Division Courses

11. Roles and Organization of the U.S. Army (1)

Lecture—1 hour. Prerequisite: lower division standing. Constitutional and legal basis of the Army, organization and strategic roles in times of war and peace, and "total Army" concept. Impact of civil-military relations and Soviet military power on role of Army studied in context of current problems.—I. (I.)

12. Introduction to Military Leadership (2)

Lecture—2 hours. Prerequisite: lower division standing, and consent of instructor. Introduction to leadership theories used in military organizations. Course surveys the duties and responsibilities of junior Army officers, the general environment in which they work, and leadership roles performed. Introduces military map reading skills.—I. (I.)

13. Introduction to Basic Military Operations (1)

Lecture—1 hour. Prerequisite: lower division standing. Basic military tactical theories and their application at the individual and squad level. Course introduces military tactical operations, and covers military first aid. Principles of war as introduced in course 11 are applied to offensive and defensive tactics.—III. (III.)

14A. Introduction to Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing and consent of instructor; completion of all previous laboratories. Personal and organizational leadership skills introduced in leadership laboratory. Extensive supervised leadership experiences conducted in a military environment. Basic military skills necessary to function in a leadership role are also covered. (P/NP grading only.)—I. (I.)

14B. Introduction to Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing and consent of instructor; completion of all previous laboratories. Development of leadership and military skills introduced in course 14A is continued with emphasis on the individual's role in the squad, the basic organizational element of the Army. As students gain capabilities, supervisory controls are reduced. (P/NP grading only.)—II. (II.)

14C. Introduction to Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing and consent of instructor; completion of all

previous laboratories. Students demonstrate skill levels required for promotion to non-commissioned officer level. Use of chain of command from company through individual levels emphasized. Interrelationship of squad and platoon organizations is explored. (P/NP grading only.)—III. (III.)

21. Military History (2)

Lecture—2 hours. Prerequisite: lower division standing; course 11 or consent of instructor. Survey of military history from 1900 to present, focusing on World War I, World War II, the Korean War, and the Vietnam War.—III. (III.)

22A. Intermediate Military Leadership and Operations I (2)

Lecture—2 hours. Prerequisite: lower division standing; course 12 or consent of instructor. Develops and exercises personal military leadership skills in extensive supervised leadership laboratories. Intermediate level military skills necessary for leadership roles as junior non-commissioned officers are developed. Students perform in role of junior non-commissioned officers.—I. (I.)

22B. Intermediate Military Leadership and Operations II (2)

Lecture—2 hours. Prerequisite: lower division standing; course 22A or consent of instructor. Continuation of course 22A. Individual leadership traits identified in course 22A are studied in more depth enabling each student to improve on targeted weaknesses. Instruction is presented in intermediate defensive tactics at the squad level.—II. (II.)

24A. Individual Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing; courses 14A, 14B, 14C and 21, or consent of instructor. Develops and exercises personal military leadership skills in extensive supervised leadership laboratories. Intermediate level military skills necessary for leadership roles as junior non-commissioned officers are developed. Students perform in role of junior non-commissioned officers. (P/NP grading only.)—I. (I.)

24B. Individual Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing; courses 14A, 14B, 14C and 21, or consent of instructor. Personal supervisory and leadership styles are developed in a supervised laboratory environment. Students are rotated through squad and team-level supervisory positions, given responsibility concomitant with positions. (P/NP grading only.)—II. (II.)

24C. Individual Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing; courses 14A, 14B, 14C and 21, or consent of instructor. Students are prepared for transition from junior leader to senior non-commissioned officer. Chain of command and hierarchical responsibilities and reporting requirements are demonstrated in a laboratory setting. (P/NP grading only.)—III. (III.)

Upper Division Courses

131. Advanced Military Leadership and Management (2)

Lecture—2 hours. Prerequisite: upper division standing; course 22A or consent of instructor. Course addresses different types of power and influence a military leader may use, reviews counseling techniques, and introduces basic management skills. Instruction provided on the various branches in which a commissioned officer may serve.—III. (III.)

132A. Advanced Military Operations (2)

Lecture—2 hours. Prerequisite: upper division standing; course 22B or consent of instructor. First phase of advanced military tactical operations. Advanced work on topographical maps, navigation, and orienteering techniques. Instruction is also provided on resource planning techniques and military intelligence.—I. (I.)

132B. Advanced Military Operations (2)

Lecture—2 hours. Prerequisite: upper division standing; course 132A or consent of instructor. Continuation of course 132A. Military tactical theories and their application in offense and defense are presented at the platoon and company level. Course

covers in-depth analysis of the principles of war related to offensive and defensive operations.—II. (II.)

134A. Military Organizational Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 24A-24B-24C or consent of instructor. Students develop interpersonal and management skills by practical application of leadership of military organizations in a supervised leadership laboratory. Advanced-level military skills presented. Students fulfill the roles of senior non-commissioned officers. (P/NP grading only.)—I. (I.)

134B. Military Organizational Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 24A-24B-24C or consent of instructor. As more complex material is presented in classroom, the laboratory environment becomes more challenging. Students serve as senior non-commissioned officers in squad, platoon and company levels, given appropriate authority and responsibility. (P/NP grading only.)—II. (II.)

134C. Military Organizational Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 24A-24B-24C or consent of instructor. Students prepared for advanced summer training experience by extensive requirements to plan, organize and conduct military operations in field environments; individual leadership potential is closely assessed in the laboratory environment. (P/NP grading only.)—III. (III.)

141. U.S. Army Management Systems (2)

Lecture—2 hours. Prerequisite: upper division standing and course 131. Army decision making, personnel and equipment management. Includes command and staff functions, training, intelligence gathering, techniques for the conduct of meetings, and logistics management procedures at unit level.—III. (III.)

142. Military Law (2)

Lecture—2 hours. Prerequisite: upper division standing and course 141. Analysis of the American Military Justice System, the Uniform Code of Military Justice, the Hague and Geneva Conventions, and customary law of war. Includes detailed study of selected procedures of military justice system.—II. (II.)

143. Military Ethics and Professionalism (2)

Lecture—2 hours. Prerequisite: upper division standing and course 142. Profession of arms, its characteristics, uniqueness, roles, and responsibilities. Discussion topics include the professional soldier's responsibilities to the Army and the Nation, and the need for ethical conduct. Case studies are used to develop ethical decision making skills.—I. (I.)

144A. Military Training Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 134A, 134B, 134C, and 141. Develops and exercises the leadership skills necessary to plan, coordinate and conduct a training program through practical application under supervision. Emphasis on analysis of objectives, instructor planning, media utilization and evaluation of learning. Students perform as cadet officers. (P/NP grading only.)—I. (I.)

144B. Military Training Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 134A, 134B, 134C, and 141. Requirements for training of all other levels of the cadet corps are given to students for conduct in laboratory environment (under supervision). Students placed in realistic role of junior officer with appropriate level of responsibility. Students perform as cadet staff officers. (P/NP grading only.)—II. (II.)

144C. Military Training Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 134A, 134B, 134C, 141. Final laboratory in military science sequence; students are prepared for final testing and certification prior to commissioning as officers. Students will demonstrate all leadership skills necessary to commissioned offi-

cers. Students perform leadership tasks at platoon, company, and battalion levels. (P/NP grading only.)—III. (III.)

191. Special Studies in Military Science (2)

Independent study—6 hours. Prerequisite: consent of department chair, and courses 131, 132A, 132B, 141, 142, 143. Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, principles of war, air-land battle imperatives, military strategy, the operational art and professional ethics. May be repeated twice for credit when topic differs. (P/NP grading only.)

Aerospace Studies (Air Force)

The Air Force Reserve Officer's Training Corps (AFROTC) is an educational program providing training in leadership, management, communications and military proficiency on college and university campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and enter the active duty forces after you complete a bachelor's or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.

The program is normally four years long, but a flexible design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participation. Until you accept a scholarship or enter your junior year of the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.

UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacramento campus.

Qualifications

Freshmen/Sophomore applicants must:

- be full-time college students in good academic standing
- have good moral character
- be in strong physical condition
- be at least 14 years old

Additionally, Juniors/Seniors/Scholarship recipients must:

- be United States citizens or in the process of applying for citizenship
- be 18 years old (or 17 years old with consent of parent or guardian)
- pass the Air Force Officer Qualifying Test
- pass a medical examination
- be under the age of 30 at time of graduation (may be waived)

Scholarships

Opportunities for four-year and three-year undergraduate scholarships are better than ever. Scholarships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes \$150 monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local AFROTC detachments for a scholarship application. Applications are also available from local Air Force recruiters or your high school guidance counselors.

All scholarships are merit-based and consider a variety of factors: cumulative GPA, class standing, SAT/ACT scores, academic awards/achievements, leadership ability, athletic involvement, extracurricular activities, community service and letters of recommendation. All scholarship recipients must graduate and be commissioned before their 27th birthday (may be waived for prior military personnel). A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registra-

tion. The program is available at more than 700 universities and colleges nationwide.

If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and two-year full tuition scholarships are available for all academic majors, especially scientific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for nontechnical majors are slightly higher. Applicants are primarily evaluated on their leadership ability and academic performance. Scholarship boards meet throughout the year for scientific and technical majors and in July for all academic majors. Scholarships also include a \$150 monthly stipend throughout the school year, required books and fees. Other loans and grants may be used towards room and board costs.

Challenging Careers

All commissioned officers enter the Air Force as second lieutenants for a 4-year active duty service commitment. Pilots and navigators serve longer commitments, based on training requirements. Once on active duty, you'll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 fighter, supervising 150 aircraft maintainers on the flightline, or caring for sick personnel in the emergency room, you will be rewarded knowing that you are making a difference.

AFROTC at UC Berkeley

AFROTC Detachment 85
176 Hearst Gym, Berkeley, CA, 94720-3610
(1-800-852-5747 or 510-642-3572);
e-mail: brown@uclink4.berkeley.edu
World Wide Web: <http://airforcerotc.berkeley.edu>

To receive hands-on leadership and management practice, freshmen and sophomores take a one-hour academic course and a two-hour Leadership Laboratory each week; juniors and seniors take a three-hour course plus the lab. All units can be used as elective credit towards graduation. See the Military Sciences course listings in the UC Berkeley catalog. Classes are held during the fall and spring semesters and the curriculum includes the history of airpower, leadership and management topics, communication skills, and national security issues.

Between the sophomore and junior years, cadets compete to attend a four- or six-week field training program at a designated Air Force base. This competitive program consists of physical conditioning, outdoor survival training, career and aircraft orientations and an evaluation of leadership potential. Additional optional training opportunities are available during the summer months and include the Royal Air Force Exchange Program, Pentagon Internships, Jump School and Glider Training at the Air Force Academy, and summer job shadowing. Students are also encouraged to participate in optional orientation flights, base visits, and community service projects throughout the school year.

AFROTC at CSU Sacramento

California State University Sacramento
Public Service Building, Room 208
6000 J Street
Sacramento, CA 95819-6094
(530-278-7315)

The CSUS Department of Aerospace Studies offers two-, three-, or four-year programs leading to a commission in the U.S. Air Force. About 30 percent of the corps commute to CSUS from UC Davis. All course work (12 or 16 semester units) is completed on the CSUS campus. Drills and courses are normally offered on Tuesdays, Wednesdays, and Thursdays. Field training is conducted at an active Air Force base during part of the summer, normally between the student's sophomore and junior years.

Upon completion of the program (integrated with UC Davis' quarter system) and all requirements for a bachelor's degree, cadets are commissioned as second lieutenants in the Air Force and serve a mini-

mum of four years on active duty. Graduates who are qualified and are selected may enter pilot or navigator training after graduation, or serve in a specialty consistent with their academic major, individual goals, and existing Air Force needs. Graduates may request a delay of entry to active duty to continue their education or may apply for Air Force sponsored graduate study to begin immediately upon entry to active duty. Due to firm scheduling requirements for the AFROTC program, students are encouraged to work closely with their academic advisers in planning their academic program.

AFROTC offers 3-year and 2-year scholarships to qualified students. Applications are accepted in any academic discipline. Express scholarships are currently available for qualified students majoring in electrical engineering and meteorology. Express scholarships pay up to \$15,000 annually in tuition and fees, \$480 per year in textbooks, and \$150 per month stipend.

Applications should normally be no later than the first quarter of a student's sophomore year. Juniors, seniors, and graduate students may also apply under certain conditions. Contact the Unit Admissions Officer in the Aerospace Studies Department at CSUS (916-278-7315) for information.

Naval ROTC

Berkeley program:
Department of Naval Science
152 Hearst Gymnasium, UC Berkeley
Berkeley, CA 94720-3640
(510-642-3551);
World Wide Web: <http://navyrotc.berkeley.edu>

UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student who satisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S. Marine Corps or an Ensign in the U.S. Navy.

Navy option students take the following courses:

Freshman year:

- NS 1 Introduction to Naval Science
- NS 2 Sea Power and Maritime Affairs

Sophomore:

- NS 3 Leadership and Management
- NS 10 Naval Ship Systems I

Junior:

- NS 12A Navigation and Naval Operations I
- NS 12B Navigation and Naval Operations II

Senior year:

- NS 401 Naval Ship Systems II
- NS 412 Leadership and Ethics

In lieu of NS401, NS10, NS12A and NS12B, Marine Corps students participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of Warfare (or a designated equivalent).

Scholarship students are required to complete a number of other courses at Davis, including one year each of calculus, physics, and English, and one quarter each of computer science, and military history or national security policy.

Interested students should contact the Department of Naval Science at UC Berkeley at the address above to obtain information and apply.

Courses in Molecular Biosciences (VMB)

Lower Division Course

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

Upper Division Courses

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

205A. Intermediary Metabolism of Animals (4)

Lecture—4 hours. Prerequisite: a course in biochemistry or physiological chemistry or consent of instructor; a course in physiology recommended. Biochemical data as related to metabolism of intact animals. Pathways and control in biosynthesis and degradation of carbohydrates and lipids; including hormonal, nutritional, and genetics effects. Dynamics of animal metabolism including pools and turnover rates. Offered in alternate years.—I.

205B. Intermediary Metabolism of Animals (3)

Lecture—3 hours. Prerequisite: course 205A or consent of instructor. Pathways and control in animals of the biosynthesis and degradation of amino acids, proteins, nucleotides and porphyrins; includes hormonal, nutritional, and genetic effects. Offered in alternate years.—(II.) Rogers, Hansen, Hershey, Rucker

247. Natural Toxicants (2)

Lecture—2 hours. Prerequisite: organic chemistry, Biological Sciences 102 and 103, or consent of instructor. Toxicity and metabolism of natural toxicants with emphasis on the toxic plants present in the western United States. General pathways of metabolism plus the relationship between chemical properties and biologic activity of natural toxicants are discussed. Offered in alternate years.—(III.) Segall

253. Metabolism of Toxicants and Drugs (2)

Lecture—2 hours. Prerequisite: Pharmacology and Toxicology 201, 202, 203, general biochemistry or consent of instructor. Significance/chemical pathways of toxicants and drug metabolism, enzymology and molecular aspects of P450 and flavin monooxygenases, hydrolases and phase 2 transferases and experimental approaches for metabolism studies. Offered in alternate years.—II. Buckpitt

254. Toxicology of the Respiratory System (3)

Lecture—27 hours; discussion—3 hours. Prerequisite: Pharmacology and Toxicology 201, 202, 203 or consent of instructor. Survey of structure and function of the respiratory system, the pathophysiology of major lung diseases, the interactions of toxicants with the lung and response of this organ to injury. Offered in alternate years.—II. Buckpitt

258. Receptor-Mediated Mechanisms (2)

Lecture—2 hours. Prerequisite: Pharmacology and Toxicology 201 or the equivalent. Survey of modern methods for studying physiological receptors including radioligand binding analysis, ion transport/flux measurements, receptor solubilization and purification strategies, and molecular cloning. Theoretical concepts of receptor-mediated signal transduction, information processing, and mechanisms of drug/toxicant interactions. Offered in alternate years.—III. Pessah

258L. Laboratory in Receptor Methods (1)

Laboratory—3 hours. Prerequisite: Molecular and Cellular Biology 120L, course 258 (may be taken concurrently). Design and practical application of receptor binding techniques including subcellular fractionation, equilibrium and kinetic radioligand binding studies, receptor activation/inhibition studies, isotopic ion flux measurements, and analysis of data. Limited to 12 students. Offered in alternate years.—III. Pessah

260. Toxicologic Pathology (3)

Lecture—3 hours. Prerequisite: Pharmacology and Toxicology 201, 202, and 203. Provide introduction to organ system pathology; provide understanding of pathogenesis and significance of chemically induced tissue injury in the various organs of the body. Offered in alternate years.—(II.) Wilson

265. Mass Spectrometric Methods in Pharmacology and Toxicology (3)

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 102, and Chemistry 128A or 128B or 128C. Intended to enable students in pharmacology, toxicology, and biological chemistry to evaluate and interpret mass spectrometric techniques and results. Emphasis on identification of metabolites and biological macromolecules and quantitative stable isotope methods.—II. (II.)

290. Seminar (1)

Seminar—1 hour. (S/U grading only.)—I, II, III. (I, II, III.)

297T. Tutoring in Veterinary Pharmacology and Toxicology (1-5)

Students assist in preparation and teaching of courses in Veterinary Pharmacology and Toxicology or other courses offered by the department under direct supervision of the instructor. Designed for graduate or professional students who desire teaching experience. May be repeated for credit up to 5 units. (S/U grading only.)

298. Group Study (1-5)

Prerequisite: consent of instructor. Group study in selected areas of Pharmacology and Toxicology. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Course

397T. Tutoring in Molecular Biosciences (1-5)

Prerequisite: graduate or professional student standing and consent of instructor. Designed for graduate or professional students who desire teaching experience, but are not teaching assistants. May be repeated for credit. (S/U grading only.)

Professional Courses

405. Veterinary Clinical Pharmacology (2)

Lecture—2 hours. Prerequisite: third-year standing in School of Veterinary Medicine or consent of instructor. Approved for graduate degree credit. Pharmacological basis of therapeutic use of drugs in domestic animals. Emphasis on selection of most appropriate drug, its dosage form, route of administration and dose for treatment of certain disease conditions. (S/U grading only.)—I. (I.) Vulliet

465. Taxonomy of Poisonous Plants (2.6)

Lecture—16 sessions; laboratory—7 sessions; fieldwork—3 sessions. First- or second-year professional students, students in the School of Veterinary Medicine, or consent of instructor. Taxonomy, botanical terms, and family characteristics of poisonous plants from 30 plant families. The clinical effects on livestock and pets of toxic substances from each family.—III. (III.) Mount

475. Diagnosis and Treatment of Food Animal and Equine Poisoning (2)

Lecture—20 hours. Prerequisite: third-year standing in the School of Veterinary Medicine. Clinical systematic approach to poisoning problems in livestock, horses and other ungulate stock emphasizing diagnosis and treatment. Poisonous plants are covered in this course.—III. (III.) Mount

480. Diagnosis and Treatment of Small Animal Poisoning (2)

Lecture—20 hours. Prerequisite: third-year standing in the School of Veterinary Medicine. Clinical systematic approach to poisoning problems in dogs, cats, and pet birds, emphasizing diagnosis and treatment.—II. (II.) Mount

485. Advanced Clinical Nutrition (2)

Lecture—14 sessions; laboratory—1 session; discussion—4 sessions; project. Prerequisite: third-year standing in the School of Veterinary Medicine or graduate students with consent of instructor. Advanced training in the principles and application of small animal clinical nutrition. (S/U grading only.)—II. Fascetti

The Major Program

The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks in the major: composition and theory, music history, or performance. Students in each of these tracks take a common core of courses before taking required specialized courses and choosing from a group of elective courses. Students following the track in Composition and Theory take advanced theory courses and/or seminars in composition; students following the track in Music History take specialized seminars in music history (recent topics include the music of Berlioz and Film Music); and students following the track in Performance take an increased number of lessons and performance ensemble courses as well as conducting. Music majors who intend to pursue graduate studies in music are encouraged to satisfy the requirements of one of the honors programs in music.

Study Abroad and the Music major. The department strongly encourages interested students to pursue a portion of their studies abroad. Within the constraints of the campus and college residence

Music

(College of Letters and Science)

Ross Bauer, Ph.D., Chairperson of the Department
Department Office, 112 Music Building
(530-752-5537; Fax: 752-0983)

World Wide Web: <http://music.ucdavis.edu>

requirements, it is possible for students to complete portions of the Music major at an international institution provided that the student consults with one of the undergraduate advisers and carefully plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Music majors have spent one quarter of a full year during their junior or senior years completing upper division coursework at EAP partner institutions in Italy, Germany, Australia, England, and France.

The Program. A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, history, criticism, and performance during the last two years of undergraduate work.

Career Alternatives. Many students who graduate with a degree in music continue on to careers in medicine, law, or business. According to the American Medical Association, the undergraduate major with the highest rate of acceptance into medical school is not chemistry or physics, but music. Students who graduate with a B.A. in music from UC Davis have gone on to graduate programs in music at major universities and conservatories in the country. Some have become professors at distinguished universities or have received teaching credentials to teach at primary or secondary schools; others have become editors or found employment in music advertising or record companies.

A.B. Major Requirements:

Preparatory Subject Matter UNITS 27-45

Music 2A, 2B, 2C, 6A, 6B, 6C, 16A, 16B,
16C, 24A, 24B, 24C* 18-30
Music 7A, 7B, 7C, 17A, 17B, 17C** 9-15

* Note: Students may pass out of one or more quarters of Music 2A-C, and 16A-C through examination

** Note: Students may pass out of one or more quarters of Music 17A-C through examination.

Depth Subject Matter 36-37

Choose upper division courses from one of the following tracks:

Track 1: Theory/Composition 36-37
Music 124A, 124B 6
At least 11 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 11
Music 101A, 101B 8
Music 103 or 199 (for composers); or Music 122 (for theorists)*** 3-4

At least 8 units selected from Music 102, 107A, 107B, 107C, 108A, 108B, 113, 114, 122, 198, 199 8
*** Note: Music 103 and 199 may be taken only once for credit toward the major.

Track 2: Music History 37
Music 124A, 124B 6

At least 11 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 11
Two quarters of Music 121 (on different subjects) 8
At least 12 units selected from Music 101A, 101B, 102, 107A, 107B, 107C, 108A, 108B, 113, 114, 121, 122, 198, 199 12

Track 3: Music Performance 37
Music 124A, 124B 6

At least 19 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 19
At least 12 units selected from Music 101A, 101B, 102, 107A, 107B, 107C, 108A, 108B, 113, 114, 121, 122, 198, 199 12

Total Units for the Major 63-82

Honors Programs. Students who wish to pursue particularly intensive studies in music should elect one of the following honors programs in place of one of the tracks above:

Theory/Composition Honors 45-49
Music 124A, 124B 6
At least 11 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 11
Music 101A, 101B 8
Two quarters of Music 194H for a total of at least 6 units resulting in a Senior composition or theory thesis 6
Select 14-18 units from Music 102, 107A, 107B, 107C, 108A, 108B, 113, 114, 122 14-18

Music History Honors 41-45
Music 124A, 124B 6
At least 11 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 11
Music 101A, 101B 8
Two quarters of Music 194H for a total of at least 6 units resulting in a Senior thesis 6
Select 10-14 units from Music 108A, 121, 122 10-14

Major Advisers. Y.H. Chang.

Minor Program Requirements:

Music UNITS 22

A minimum of 16 units of upper division
Music courses 16
Courses chosen from: Music 105, 106,
107, 110, 126, 129

A minimum of six units in upper division
music performance courses (Music 140,
141, 142, 143, 144, 145, 146, 147, 154)
may count toward the minor 6

Foreign Language Requirement. Students contemplating graduate study in music are advised to consider pursuing foreign language study beyond the elementary level.

Diagnostic Exams are given before admission into Music 6A-6B-6C (Music 3A-3B may be recommended as an alternative). Diagnostic exams are also given for Music 16A-16B-16C and 17A-17B-17C at the beginning of each year. Transfer students should take the advisory placement exams in theory and music history given during orientation week.

Beginning and transfer students are required to take Music 2A-2B-2C (Keyboard Competence) unless they can pass out of one or more of the classes by demonstrating proficiency through a diagnostic exam given at the beginning of each quarter. Students learn 1) four-part keyboard harmony in all major and minor keys; 2) moderate fluency with figured bass at the keyboard; 3) major and minor scales with proper fingering; ability to sight read simple piano music and Bach chorales.

Student Performing Activities. The Department of Music presents over 100 concerts each year, offering performance opportunities for both majors and non-majors in the UCD Symphony Orchestra, University Chorus, Concert Band, Early Music Ensemble, Baroque Chamber Orchestra, Chamber Singers, University Jazz Band, Gospel Choir, and numerous chamber ensembles. Also affiliated with the department is the California Aggie Marching Band.

The large groups regularly present three concerts each year, while chamber ensembles perform frequently in the weekly Thursday Noon Concerts. Performance groups have collaborated with the Department of Dramatic Art in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for talented non-majors.

Faculty and Facilities. The faculty is noted for its achievements in a variety of areas. The musicologists are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally. The journal, *19th Century Music*, is housed in the department. The regular faculty is joined during one quarter each year by a visiting Artist-in-Residence, a distinguished performer who gives public concerts and lectures and who works with students informally. The Empyrean Ensemble, a professional new music ensemble, is in residence at UC Davis. The American Bach Soloists, an ensemble of professional singers and instrumentalists specializing in music of the eighteenth and early nineteenth century, is affiliated with the Department of Music.

The department's facilities include a large collection of Renaissance, Baroque, and modern instruments, the Computer and Electronic Music Studio, practice and rehearsal rooms, and an excellent music library with some 20,000 recordings, CDs, laser discs and videos. In addition, the library houses the Jan Popper Collection of opera scores, books, and memorabilia.

Graduate Study. The Department of Music offers programs of study and research leading to the M.A. degree in composition/theory, musicology/criticism, and conducting, and the Ph.D. degree in composition/theory and musicology/criticism. Detailed information regarding graduate study may be obtained from the Graduate Adviser.

Graduate Adviser. D.A. Nutter.

Courses in Music (MUS)

Lower Division Courses

2A. Keyboard Competence, Part 1 (2)

Performance—2 hours. Prerequisite: course 6A and 16A concurrently. Training to meet the minimum piano requirements for the major in music. All music majors will be expected to perform scales and simple harmonic progressions in twelve keys, both major and minor. (P/NP grading only.)—I. Triest

2B. Keyboard Competence, Part 2 (2)

Performance—2 hours. Prerequisite: course 6B and 16B concurrently, course 2A or demonstration of required keyboard proficiency on diagnostic exam. Training to meet the minimum piano requirements for the major in music. The study of scales with both hands, harmonic progressions, and sight reading at the piano. (P/NP grading only.)—II. Triest

2C. Keyboard Competence, Part 3 (2)

Performance—2 hours. Prerequisite: course 6C and 16C concurrently, course 2B or demonstration of required keyboard proficiency on diagnostic exam. Training to meet the minimum piano requirements for the major in music. The study of chord progressions, figured bass, sight reading, and piano repertoire. (P/NP grading only.)—III. Triest

3A. Introduction to Music Theory (4)

Lecture—1 hour; recitation—3 hours. Fundamentals of music theory, ear-training, harmony, counterpoint, and analysis directed toward the development of listening and writing techniques. Intended for the general student.—I, II, III. (I, II, III.)

3B. Introduction to Music Theory (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 3A. Continuation of course 3A. Intended for the general student.—II, III. (II, III.)

6A. Elementary Theory, Part 1 (3)

Lecture—3 hours. Prerequisite: admission by examination given at beginning of fall quarter; course 2A or 16A concurrently or demonstration of required proficiency level on diagnostic exam. Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertory. Intended primarily for music majors. Not open for credit to students who have completed course 4A.—I. Chang

6B. Elementary Theory, Part 2 (3)

Lecture—3 hours. Prerequisite: course 6A; course 2B or 16B concurrently or demonstration of required proficiency level on diagnostic exam. Development

of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertory. Intended primarily for music majors. Not open for credit to students who have completed course 4B.—II. Chang

6C. Elementary Theory, Part 3 (3)

Lecture—3 hours. Prerequisite: course 6B; course 2C or 16C concurrently or demonstration of required proficiency level on diagnostic exam. Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertory. Intended primarily for music majors. Not open for credit to students who have completed course 4C.—III. Chang

7A. Intermediate Theory, Part 1 (3)

Lecture—3 hours. Prerequisite: course 6C. Homophonic music of the Classical era with a focus on analysis of music by Haydn, Mozart, and Beethoven. Composition of pieces in the homophonic forms such as Minuet and Trio, Theme and Variations, Rondo and Sonata. Intended for music majors. Not open for credit to students who have completed course 5B.—I. Bauer

7B. Intermediate Theory, Part 2 (3)

Lecture—3 hours. Prerequisite: course 7A. Nineteenth-century harmony and voice leading through the music of the Romantic era. Focus on analysis of music by Chopin, Schumann, Brahms, Wagner, and Wolf. Composition of character pieces and songs. Intended for music majors. Not open for credit to students who have completed course 5C.—II. Bauer

7C. Intermediate Theory, Part 3 (3)

Lecture—3 hours. Prerequisite: course 7B. The music of the first thirty years of the twentieth century and the various analytical tools pertaining to it. Works of Debussy, Stravinsky, Schoenberg, Berg, and others are discussed. Composition of small pieces for solo instruments, voice and piano. Intended for music majors. Not open for credit to students who have completed course 104A.—III. Bauer

10. Introduction to Musical Literature (4)

Lecture—3 hours; listening section—1 hour. An introduction to composers and major styles of Western music. Lectures, listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.) Elkus, Holoman, Nutter

16A. Elementary Musicianship, Part 1 (2)

Lecture/laboratory—2 hours. Prerequisite: course 6A concurrently, passing score on short diagnostic exam at the beginning of the quarter. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Recommended for those who intend to major in music.—I. Craig

16B. Elementary Musicianship, Part 2 (2)

Lecture/laboratory—2 hours. Prerequisite: course 6B concurrently, course 6A or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Recommended for those who intend to major in music.—II. Craig

16C. Elementary Musicianship, Part 3 (2)

Lecture/laboratory—2 hours. Prerequisite: course 6C concurrently, course 16B or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Recommended for those who intend to major in music.—III. Craig

17A. Intermediate Musicianship, Part 1 (2)

Lecture/laboratory—2 hours. Prerequisite: course 16C or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Intended for music majors.—I. Craig

17B. Intermediate Musicianship, Part 2 (2)

Lecture/laboratory—2 hours. Prerequisite: course 17A or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Intended for music majors.—II. Craig

17C. Intermediate Musicianship, Part 3 (2)

Lecture/laboratory—2 hours. Prerequisite: course 17B or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Intended for music majors.—III. Craig

24A. Introduction to the History of Music I (3)

Lecture—3 hours. Prerequisite: course 6A (may be taken concurrently). History of music from the late Baroque to Beethoven. Intended primarily for majors in music. GE credit: Wrt.—I. Busse Berger

24B. Introduction to the History of Music II (3)

Lecture—3 hours. Prerequisite: course 24A, course 6B (may be taken concurrently). The history of music from the Romantic Period to the nineteenth century. Intended primarily for majors in music. GE credit: Wrt.—II. Busse Berger

24C. Introduction to the History of Music III (3)

Lecture—3 hours. Prerequisite: course 24B, course 6C (may be taken concurrently). The history of music of the 20th century. Intended primarily for majors in music. GE credit: Wrt.—III. Busse Berger

28. Introduction to Afro-American Music (4)

Lecture—3 hours; listening and discussion—1 hour. A study of the Afro-American rhythm, field hollers, work songs, spirituals, blues, gospel, and jazz; the contrast between West African, Afro-Caribbean, and Afro-Cuban musical traditions. GE credit: Div, Wrt.

30A-U. Applied Study of Music: Intermediate (1)

Performance instruction—1 hour. Prerequisite: open to Music majors with ability to perform scales and short compositions from standard repertory; admission by audition and consent of instructor. Class instruction, arranged by section: (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (S) Lute; (T) Viola da gamba; (U) Recorder. May be repeated for credit. Offered as demand indicates.—I, II, III. (I, II, III.)

31A-U. Applied Study of Music: Intermediate (Individual) Performance Instruction (2)

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: open to Music majors only; admission by audition and consent of instructor. Individual instruction in (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (S) Lute; (T) Viola da gamba; (U) Recorder. May be repeated for credit.—I, II, III. (I, II, III.)

47. University Wind Ensemble (2)

Rehearsal—4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of a full variety of wind ensemble music; and to have students share their work in public performances. May be repeated for credit. (P/NP grading only.—I. (I.) Nowlen

54. University Gospel Choir (2)

Rehearsal—4 hours. Prerequisite: consent of instructor; open to any student in the university. Rehearsal, study, and performance of Gospel music. May be repeated for credit. (Same course as African American and African Studies 54.) (P/NP grading only.—I, II, III. (I, II, III.) Lymos

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

Upper Division Courses

101A. Advanced Theory, Part 1 (4)

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: course 7C. Twentieth century music from 1930 through 1950 and the various analytical tools pertaining to it. Works of Copland, Sessions, Schoenberg, Bartok, and Stravinsky are discussed. Composition of small pieces for piano and voice. For music majors. Not open for credit to students who have completed course 104B.—I. Frank

101B. Advanced Theory, Part 2 (4)

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: course 101A. Music from 1950 to the present and the various analytical tools pertaining to it. Works of Babbitt, Carter, Dallapiccola, Ligeti, Messiaen, Reich and others are discussed. Composition of small pieces for ensemble. Intended for music majors. Not open for credit to students who have completed course 104C.—II. Frank

102. Tonal Counterpoint (4)

Lecture—3 hours; practice—1 hour. Prerequisite: course 7A and 17A. Imitative tonal counterpoint with an analytical focus on the Two Part Inventions and Fugues (from the Well Tempered Klavier) of J.S. Bach. Composition of exercises and short pieces using contrapuntal techniques. Intended for music majors. Not open for credit to students who have completed course 5A.—II. Bauer

103. Workshop in Composition (3)

Workshop—3 hours. Prerequisite: course 4C. Workshop in musical composition for undergraduates who are interested in pursuing serious compositional studies. Course will allow students to explore the techniques and materials of musical composition. May be repeated for credit. (P/NP grading only.—I, II.) Ortiz

105. History and Analysis of Jazz (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3A or 10 or the equivalent. Jazz will be studied in its historical and cultural contexts; the evolution of jazz styles will be analyzed. Lectures, discussion/guided listening sections, and selected readings. Designed for non-majors. GE credit: ArtHum, Div, Wrt.—II. (II.) Bauer

106. History of Rock Music (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3A-3B or 10 or consent of instructor. Rock studied in its musical, historical, and cultural contexts; analysis of the evolution of rock styles. Includes guided listening sections and selected readings. Designed for non-majors. GE credit: ArtHum, Wrt.—III. (III.) Reynolds

107A. Computer and Electronic Music (3)

Lecture—3 hours; laboratory—1 hour. Prerequisite: consent of instructor. Studies in electronic and computer music composition. The principles and procedures of composition in various electronic media are explored through compositional exercises. Limited enrollment.—I. (I.) Ortiz

107B. Computer and Electronic Music (3)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 107A and consent of instructor. Continuation of course 107A. Limited enrollment.—(II.)

107C. Computer and Electronic Music (3)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 107B and consent of instructor. Continuation of course 107B. Limited enrollment.—(III.) Ortiz

108A-108B. Orchestration (2-2)

Lecture—2 hours. Prerequisite: course 5C. Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations.—II, III. (I, II.) Frank, Ortiz

109. Masterworks in Performance (2)

Lecture—2 hours. Prerequisite: course 10 recommended. Thorough score study of a single masterwork to be performed on campus during the quarter. Guided listening, selected readings, analysis and study of composer's milieu. Recommended especially for members of the performing ensembles scheduled to present the work.

110A. The Music of a Major Composer: Beethoven (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Beethoven will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.—III. (II.) Slawson

110B. The Music of a Major Composer: Stravinsky (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Stravinsky will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.—I. (I.) Frank

110C. The Music of a Major Composer: Bach (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Bach will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.

110D. The Music of a Major Composer: Mozart (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Mozart will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.—II. Busse Berger

110E. The Music of a Major Composer: Haydn (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Haydn in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt.

110F. American Masters (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. An overview of American concert music by master composers from Charles Ives to the present. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt.

113. Introduction to Conducting (2)

Lecture—1 hour; performance—1 hour. Prerequisite: course 6C. Principles and techniques of conducting as they apply to both choral and instrumental ensembles. Not open for credit to students who have completed course 111 or 112. Offered in alternate years.—II. Holoman, Thomas

114. Intermediate Conducting (2)

Lecture—1 hour; performance—1 hour. Prerequisite: course 113. Intermediate conducting with a continued focus on principles and techniques as they apply to both choral and instrumental ensembles. Offered in alternate years.—I. Holoman, Thomas

121. Topics in Music History and Criticism (4)

Seminar—4 hours (includes selected listening). Prerequisite: courses 4A-4B-4C, 24A-24B-24C, and consent of instructor. Sources and problems of a historical period or musical style selected by the instructor and announced in advance. May be repeated for credit. GE credit: Wrt.—II. (I, II.) Elkus

122. Topics in Analysis and Theory (4)

Seminar—4 hours (includes selected listening). Prerequisite: courses 5C and 25C. Analysis of works of a composer or musical style selected by the instructor and announced in advance. Consideration of the oretical issues. May be repeated for credit. GE credit: Wrt.—III. (III.) Bauer

124A. History of Western Music: Middle Ages to 1600 (3)

Lecture—3 hours. Prerequisite: course 6C and 24C. Historical survey of composers and musical styles from the Middle Ages to the beginning of the 17th century. GE credit: Wrt.—I. Nutter

124B. History of Western Music: 1600-1750 (3)

Lecture—3 hours. Prerequisite: course 124A. Historical survey of composers and musical styles from the

late 1500s to the mid-18th century. GE credit: Wrt.—II. Nutter

126. American Music (4)

Lecture—3 hours; listening—1 hour. Prerequisite: course 10 or 3A-3B or consent of instructor. Introductory survey of American musics, including Native American music, Hispanic polyphony, New England psalmody, and selected 20th-century composers and styles. Offered in alternate years. GE credit: Div, Wrt.—I. (I.) Reynolds

127. Music from Latin America (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Spanish 24 or 33. Examination of music from Latin America. Characteristic music (i.e., tango, bossa nova, salsa, musica nortena, musica andina) as well as its implications in other musical genres. Taught in Spanish. For non-majors. Offered in alternate years. (Former course 27.) (Same course as Spanish 171.)—III. (III.) Ortiz

129. World Music (4)

Lecture—3 hours; listening—1 hour; selected readings. Prerequisite: course 3A-3B or 10 recommended. Intended for non-majors. Studies in selected areas of non-western music, including appropriate instrumental and performing techniques, analysis of tonal systems, melody, rhythm and musical structures. Emphasis placed on cultural context of the music. GE credit: Div, Wrt.

130A-U. Applied Study of Music: Advanced (1)

Performance instruction—1 hour. Prerequisite: open to Music majors with ability to perform scales and short compositions from standard repertoire; admission by audition and consent of instructor. Class instruction, arranged by section: (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (S) Lute; (T) Viola da gamba; (U) Recorder. May be repeated for credit. Offered as demand indicates.—I, II, III. (I, II, III.)

131A-U. Applied Study of Music: Advanced (Individual) (2)

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: open to Music majors only; admission by audition and consent of instructor. Individual instruction in (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (S) Lute; (T) Viola da gamba; (U) Recorder. May be repeated for credit.—I, II, III. (I, II, III.)

132. Singing for Actors (1)

Performance—1 hour. Prerequisite: consent of instructor. The elements of basic singing techniques, through selected exercises, vocalises, and songs. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Freidman

140. University Jazz Band (2)

Rehearsal—4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of jazz band music and full variety of jazz band styles, including swing, be-bop, and contemporary jazz styles. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) McMullen

141. University Symphony (2)

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Sight-reading, rehearsal and performance of music from the orchestral literature. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Holoman

142. University Chamber Singers (2)

Rehearsal—3 hours, plus sectionals—at least 1 hour. Prerequisite: admission subject to audition before first class meeting. Rehearsal and performance of works for small choral group. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Thomas

143. University Concert Band (2)

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Rehearsal and performance of music for band. May be repeated for credit. (P/NP grading only.)—II, III. (II, III.) Elkus

144. University Chorus (2)

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University. Rehearsal and performance of choral music. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Thomas

145. Early Music Ensemble (2)

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Rehearsal and performance of Medieval, Renaissance, and Baroque music for vocal ensemble and historical instruments. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Nutter

146. Chamber Music Ensemble (1)

Rehearsal—2 hours; student practice—1 hour. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Study, rehearsal, and performance of ensemble music for strings, winds, voice, piano, harpsichord, and organ. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Granger

147. University Wind Ensemble (2)

Rehearsal—4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of a full variety of wind ensemble music; and to have students share their work in public performances. May be repeated for credit. (P/NP grading only.)—I. (I.) Nowlen

154. University Gospel Choir (2)

Rehearsal—4 hours. Prerequisite: consent of instructor; open to any student in the university. Rehearsal, study, and performance of Gospel music. May be repeated for credit. (Same course as African American and African Studies 154.) (P/NP grading only.)—I, II, III. (I, II, III.) Lymos

194HA-194HB. Special Study for Honors Students (2-4)

Independent study—6-12 hours. Prerequisite: course 7C, 124B. Open only to students who qualify for the honors program and admission to Music Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**200. Music Research (4)**

Seminar—3 hours; term paper. Introduction to problems and techniques of research; practical application of music bibliography to questions about significant issues in musicology, music theory, and performance practice.

202. Notation (4)

Seminar—3 hours; term paper. Study of musical notation; investigation of techniques for editing Medieval and Renaissance music.—I. Busse Berger

203. Music Composition (4)

Seminar—3 hours; term paper. Technical projects that explore compositional problems, the skill and techniques with which to solve them, and free composition. May be repeated for credit.—I, II, III. (I, II, III.) Bauer, Ortiz, Slawson

204. Advanced Conducting (3)

Tutorial—2 hours; practicum—2 hours. Prerequisite: courses 111, 112, or the equivalent; keyboard skills appropriate to graduate standing. Technical aspects of conducting and the broader issues in music his-

tory and analysis that conductors must face before leading a rehearsal or performance.

207. Advanced Electronic and Computer Music (4)

Seminar—2 hours; plus individual student/instructor meeting—2 hours. Prerequisite: courses 107A-107B-107C. Advanced composition of computer and electronic music with the Sun 3-based computer-music system and associated facilities.

210A. Proseminar in Music (Theory and Analysis) (4)

Seminar—3 hours; term paper. Voice-leading analysis of tonal music derived from Schenker and pitch-class set theory. Recent work on compositional design, generalizations of the concept of interval, psychologically oriented music theory, and theories of durational structure and timbre.

210B. Proseminar in Music (Musicology and Criticism) (4)

Seminar—3 hours; term paper. Issues and concepts of music history, including performance practice questions for specific repertoires and periods; principles, aims, and methods of archival study; historical theory; evolution of musical styles; philosophical debates about goals and aims of the discipline in general.—I. (II.) Reynolds

210C. Proseminar in Music (Ethnomusicology) (4)

Seminar—3 hours; term paper. Intensive examination of major trends in ethnomusicology as exemplified by scholars working in several non-Western cultures. Ethnomusicological theory, ranging from ethnographic description to metamusicological study (Seegar) to analysis of individual genres to sociological study.—(III.)

221. Topics in Music History (4)

Seminar—3 hours. Studies in selected areas of music history and theory. May be repeated for credit.—III. (II.) Holoman

222. Techniques of Analysis (4)

Seminar—3 hours. Analysis and analytical techniques as applied to music of all historical style periods. May be repeated for credit.—II. (III.) Ortiz

223. Ethnomusicology (Pacific Cultures) (4)

Seminar—3 hours; term paper. Court music, religious music, and popular forms of China, Japan, Korea, Melanesia, and Indochina. Issues concerning history, theoretical constructs, performance practice, and cultural settings of the music will be stressed. May be repeated for credit.

299. Individual Study (1-12)

(S/U grading only.)

Teaching Methods Courses

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Major Program

Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider issues of cultural diversity, sovereignty, and indigenous knowledge systems in preparation for living in a world of constantly increasing social and cultural complexity.

The Program. Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native experience in North America (north of Mexico). Plan II encourages interested students to focus upon Meso-America with, however, some course work integrating Meso-America with North America and South America. Plan III focuses upon South America, with some course work integrating that region with areas to the north.

Career Alternatives. Native American Studies is excellent preparation for a scholarly career or professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

A.B. Major Requirements:

UNITS

Preparatory Subject Matter20

Native American Studies 1, 10.....8

One or two courses from Native American Studies 32, 33, 46, 55.....4-8

One or two courses from African American and African Studies 12, 52, Anthropology 2, 3, Asian American Studies 1, Chicana/o Studies 10, History 17A.....4-8

Depth Subject Matter16

Native American Studies 130A, 157, 180...12

One course from Native American Studies 107, 115, 130B, 130C, 133, 156.....4

Note: If a course is counted for either Plans I, II, or III (below), it cannot also be counted as part of the 16 units of Depth Subject Matter.

Areas of Specialization (complete one plan)

Plan I—North American Emphasis28

Two courses from Native American Studies 107, 115, 116, 117, 118, 122, 130C, 156.....8

Two courses from Native American Studies 101, 181A, 181B, 181C.....8

Two courses from Anthropology 113, 136, 161A, 161B, 165, 166, 172, 173, 174, 175, 176, African American and African Studies 100, 101, 107, 120, 123, 133, 153, 160, American Studies 120, Asian American Studies 100, 101, 110, 111, 112, Chicana/o Studies 100, 110, 111, 154, 156, Sociology 128, Women's Studies 102.....8

One other upper division Native American Studies course, selected in consultation with adviser.....4

Plan II—Mexico-Central America Emphasis28

Native American Studies 107, 133.....8

Three courses from History 161A, 166A, 166B, Anthropology 134, 145, 146, 174, 175, Chicana/o Studies 130, Native American Studies 122.....12

Two courses from Spanish 155, 172, Art History 151, Native American Studies 101, 156, 181A, 181B, 181C, or, if student's work is specifically focused upon a Meso-American language or topic, from Native American Studies 188, 191.....8

Plan III—South American Emphasis.....28

Native American Studies 107, 120.....8

Two courses from History 161A, 161B, 162, 163A, 163B, 165.....8

Three courses from Anthropology 134, 144, 174, 175, Native American Studies 101, 122, 156, 181A, 181B, 181C, or, if student's work is specifically focused upon a South American language or topic, from Native American Studies 188, 191.....12

Total Units for the Major64

Major Adviser. S. Crum.

Minor Program Requirements:

The Native American Studies minor provides an introduction to the Native experience in the Americas by means of exposure to course work dealing with some of the major aspects of Indian life, including history, values, politics, literature, and art.

UNITS

Native American Studies24

Native American Studies 1 or 10.....4

Five upper division courses, at least one of which is chosen from each of the following groups.....20

Ethno-History:

Native American Studies 130A, 130B, 130C, or 133

Philosophy and values:

Native American Studies 156, 157, or 180

Politics and current affairs:

Native American Studies 115, 116, 117, 118, 120, 122

Art and literature:

Native American Studies 101, 181A, 181B, or 181C

One other upper division course selected in consultation with adviser.

Study Off Campus. Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student's plan must be approved by the student's adviser and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed; and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program, Short-Term Programs Abroad.

Graduate Study. The Department offers a program of study leading to the M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the department office and at Graduate Studies.

Graduate Adviser: S. Varese.

Courses in Native American Studies (NAS)

Lower Division Courses

1. Introduction to Native American Studies (4)

Lecture—3 hours; discussion—1 hour. Introduction to Native American Studies with emphasis upon basic concepts relating to Native American historical and political development. GE credit: SocSci, Div.—I, II, III. (I, II, III.) Montejo, Crum, Barker

5. Introduction to Native American Literature (4)

Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. Study of selected Native American texts. Intensive focus on analysis of these texts, with frequent writing assignments to develop critical thinking and composition skills. GE credit: ArtHum, Div, Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously).—I, II, III. (I, II, III.)

10. Native American Experience (4)

Lecture—3 hours; discussion—1 hour. Introduction to the diverse cultures of Native American peoples from North, Central, and South America. Emphasis on Native American voices in the expression of cultural views and in the experience of conflicting values. GE credit: ArtHum or SocSci, Div, Wrt.—I, II, III. (I, II, III.) Varese, Hernandez-Avila, Macri

32. Native American Music and Dance (4)

Lecture/discussion—4 hours. Introduction to the music and dance of the native peoples of the Americas. Students will study secular native music and dance from a cross-section of regions and tribes. GE credit: Div.—I. (I.) Mendoza

33. Native American Art in the U.S. (4)

Lecture—4 hours. Comprehensive survey of Indian art forms with emphasis upon design, media, and function. Intent is to familiarize the student with a wide range of styles and techniques. GE credit: ArtHum, Div.—I. (I.) Longfish

34. Native American Art Workshop (4)

Lecture—1 hour; laboratory—6 hours; 3 hours to be arranged. Prerequisite: consent of instructor; course 33 recommended. Studio projects in Native American art, design, and crafts. (P/NP grading only).—(II.) Longfish

46. Orientation to Research in Native American Studies (4)

Lecture/discussion—3 hours; term paper. Prerequisite: Native American Studies major or minor, or consent of instructor. Introduces students to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis is upon learning to use documentary resources or other collections of data. Students will carry out individual projects. Limited enrollment. GE credit: SocSci, Div, Wrt.

55. Americanisms: Native American Contributions to World Civilization (4)

Lecture/discussion—4 hours. Prerequisite: course 1 or 10 recommended. American indigenous people's contributions to the contemporary world, with attention to forced participation of Indian societies in the development of Western dominance and resulting appropriation of cultural creations. Responses and initiatives of indigenous peoples will be analyzed. GE credit: SocSci, Div, Wrt.

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses**101. Contemporary Indian Art (4)**

Lecture—4 hours. Prerequisite: course 33. Historical review of contemporary Indian art from 1900 to the present by looking at the two art centers of Oklahoma and Santa Fe. Social pressures that have influenced the imagery that exists today will be examined. GE credit: ArtHum, Div.—(II.) Longfish

107. Special Topics in Native American Languages (4)

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Investigation of various subjects in contemporary and historical Native American language studies. May be repeated for credit when a different topic is studied. GE credit: Div.—II. (III.) Macri

115. Native Americans in the Contemporary World (4)

Lecture/discussion—4 hours. Prerequisite: course 1, 10, or 55. The sociocultural development of American Indian populations in modern times with emphasis upon North America. Attention will be given to

contemporary Indian affairs and problems as well as to the background for present day conditions. Not open for credit to students who have completed Anthropology 141B. (Former course Anthropology 141B.) GE credit: SocSci, Div, Wrt.—II. Montejo

116. Native American Traditional Governments (4)

Lecture—4 hours. Prerequisite: course 1; Anthropology 2. Study of selected Native American Tribal Governments, confederations, leagues, and alliance systems. Offered in alternate years. GE credit: SocSci, Div.

117. Native American Governmental Decision Making (4)

Lecture—4 hours. Prerequisite: course 116, Political Science 2; Anthropology 123 recommended. Native American governmental and community decision making with emphasis on federal and state programs, tribal sovereignty, current political trends and funding for tribal services. Offered in alternate years. GE credit: SocSci, Div.

118. Native American Politics (4)

Lecture—4 hours. Prerequisite: course 117. Examination of the various interest groups and movements found among Native people and how they relate to the determination of Indian affairs. Study of political action available to Native groups, and local communities, along with relevant theory relating to underdevelopment. Offered in alternate years. GE credit: SocSci, Div.—II. Barker

120. Ethnopolitics of South American Indians (4)

Lecture/discussion—4 hours. Prerequisite: course 1, 10 or 55. Social, political, cultural movements of indigenous South Americans in response to establishment, expansion of European colonialism, post-colonial nation-states. Ethnopolitical processes developed through interactions between Indians, Euroamericans. Socioethnographic analysis of main indigenous areas and the development of national societies. GE credit: SocSci, Div, Wrt.—I. (I.) Varese

122. Native American Community Development (4)

Lecture—4 hours. Prerequisite: course 1, Community and Regional Development 151. Application of community development theory and techniques to the development problems of Native American communities. Offered in alternate years. (Former course 161.) GE credit: SocSci, Div, Wrt.—I. Varese

125. Performance and Culture Among Native Americans (4)

Lecture—3 hours; listening—3 hours. Prerequisite: upper division standing in division of humanities or social sciences or consent of instructor. Interdisciplinary study of public expressive forms among Native Americans. Comparative analysis of music, dances, rituals, and dramas from throughout the Americas in their social and cultural contexts. Offered in alternate years. Not open for credit to students who have completed Music 125.—III. (III.) Mendoza

130A. Native American Ethno-Historical Development (4)

Lecture—4 hours. Prerequisite: course 1 or 10; History 17A recommended. Study of Native American ethno-history in North America before 1770s. GE credit: SocSci, Div, Wrt.—I. (I.) Crum

130B. Native American Ethno-Historical Development (4)

Lecture—4 hours. Prerequisite: course 1; History 17A-17B recommended. Study of Native American ethno-history in North America, 1770-1890. GE credit: SocSci, Div, Wrt.—II. (II.) Crum

130C. Native American Ethno-Historical Development (4)

Lecture—4 hours. Prerequisite: course 1; History 17A-17B recommended. Study of Native American ethno-history in North America after 1890. GE credit: SocSci, Div, Wrt.—III. Crum

133. Ethnohistory of Native People of Mexico and Central America (4)

Lecture/discussion—4 hours. Prerequisite: course 1, 10 or 55. Ethnohistorical development of pre-colo-

nial, colonial, post-colonial Mexican and Central American indigenous people; the impact of economic and political factors on the process of cultural adaptation. Attention is given to the questions of nation-building, forced assimilation, indigenous resistance, organized political responses. GE credit: SocSci, Div.—III. (III.) Varese

134. Race and Sex: Race Mixture and Mixed Peoples (4)

Lecture—4 hours. Prerequisite: one course chosen from Anthropology 1 or 2, Native American Studies 10, Chicana/o Studies 110, African American and African Studies 100 or Asian American Studies 110. The phenomena of racial, ethnic and interreligious intermixture and marriage, and of multi-ethnic peoples. Emphases on the Americas and upon the sociocultural effects of intermixture and on the lives of bicultural and multi-ethnic persons. (Same course as Anthropology 134.) GE credit: SocSci, Div, Wrt.

156. Native American Ethics and Value Systems (4)

Lecture—4 hours. Prerequisite: upper division standing; course 1. Analysis of Native American systems of values and how these values translate into actual behavior; attention to the problem of implementing traditional values in the twentieth century and the possible impact of native values in modern societies. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Forbes

157. Native American Religion and Philosophy (4)

Lecture—4 hours. Prerequisite: upper division standing; course 1 or Anthropology 2. Religious and philosophical thinking of Native American people with emphasis upon North America. Offered in alternate years. GE credit: Div.—(II.) Hernandez-Avila

180. Native American Women (4)

Lecture/discussion—4 hours. Prerequisite: course 1 or 10 or Women's Studies 50. Social and cultural foundations of the Native American women's personality, including the development of the Indian girl and the life phases of mature womanhood. Autobiographical and biographical texts are utilized. GE credit: SocSci, Div, Wrt.—II. (II.)

181A-181B-181C. Native American Literature (4-4-4)

Lecture—4 hours. Prerequisite: English 3, Comparative Literature 1, 2, 3, or any course from the General Education Literature Preparation List. Analysis of works by or about Native Americans including novels and autobiographies, analysis of Native American poetry, oral literature, songs, and tales. (A), the novel and fiction; (B), nonfiction works by native authors; (C), traditional literature and poetry. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I, II. (I-II-III.) Hernandez-Avila, Montejo

184. Contemporary Indigenous Literature of Mexico (4)

Lecture—4 hours. Prerequisite: course 1 or 10; course 181A or 181C recommended. Reading knowledge of Spanish required. Contemporary indigenous literature of Mexico, with a focus on the genres (poetry, fiction, drama, essay); analysis of cultural, historical, and spiritual themes, imagery, styles and performances; biographies of and influences on the Native writers themselves. Offered in alternate years.—III. Hernandez-Avila

188. Special Topics in Native American Literary Studies (4)

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing and consent of instructor. Special topics drawn from Native American literature. May be repeated for credit when a different topic is studied. GE credit: Div, Wrt.—I, II. (II.) Hernandez-Avila, Montejo

190. Seminar in Native American Studies (2)

Discussion—2 hours. Prerequisite: senior standing. Seminar of critical issues faced by Native American people. (P/NP grading only).—II. (II.)

191. Topics in Native American Studies (4)

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing and consent of instructor. Selected topics in Native American ethno-history,

development, culture, and thought. May be repeated for credit when a different topic is studied. GE credit: ArtHum, Div.—I, II, (I.)

194HA-194HB. Special Studies for Honors Students (4-4)

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing culminating in the completion of a senior honors thesis or project under direction of faculty adviser. (Deferred grading only, pending completion of sequence.)

195. Field Experience in Native American Studies (12)

Field work—36 hours. Prerequisite: senior standing and major in Native American Studies, completion of lower division major requirements, and course 161. Field work with governmental and community groups, under supervision of faculty adviser and sponsor. Knowledge acquired in other courses to be applied in field work. (P/NP grading only.)—I, II, III. (I, II, III.)

196. Senior Project in Native American Studies (4)

Discussion—1 hour; independent study—3 hours. Prerequisite: senior standing and major in Native American Studies, course 195 (may be taken concurrently), and consent of instructor. Guided research project that enables student to apply the theory and research principles from major course work. Final product is to be a major senior project or thesis. (P/NP grading only.)—I, II, III. (I, II, III.)

197TC. Community Tutoring in Native American Studies (1-5)

Tutorial—3-15 hours. Prerequisite: consent of major committee; upper division standing with major in Native American Studies. Supervise tutoring in community. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

200. Basic Concepts in Native American Studies (4)

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Analysis of the characteristics of the discipline of Native American Studies. Concentration is on both traditional and contemporary native scholarship and thought as well as the theoretical and methodological consequences derived from application of these ideas. Offered in alternate years.—(I.) Hernández-Ávila

202. Advanced Topics in Native American Studies (4)

Seminar—4 hours. Prerequisite: graduate standing. Advanced study of selected topics or themes relevant to the field of Native American studies. Topics will be announced at the time of offering. May be repeated for credit when topic differs.—I, (I, III.) Hernández-Ávila, Montejó, Longfish, Macri, Barker

212. Community Development for Sovereignty and Autonomy (4)

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Examines a sample of contemporary indigenous communities from south, central and north America with the goal of understanding and evaluating the strategies adopted by Native American communities to develop and implement forms of sovereignty or autonomous self-management. Offered in alternate years.—II. Varese

213. Native Criminality and “Deviance” in Native Communities (4)

Seminar—4 hours. Prerequisite: graduate standing. Examination of “deviance” in Native communities with focus on Native criminality in North America. Analysis of the concept of deviance from several different world views. Readings from a range of theories to incorporate varying theoretical perspective on criminality and deviance.—Barker

220. Colonialism/Racism and Self-Determination (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing. Study of imperial/colonial systems and their psychosocial impacts upon oppressors and oppressed, of racism as the outgrowth of colonialism, and of nationalism, ethnic conflict and self-determination. Focus on indigenous peoples, but other groups will also be considered. Offered in alternate years.—(II.) Varese

224. Performance in the Americas (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing. Ethnomusical and anthropological approaches to study of public performance in the Americas. New ways of looking at music, dance, rituals and other forms of public expressive forms normally called “folklore” or “popular culture.” Offered in alternate years. Not open for credit to students who have completed Music 224. (Former course Music 224.)—(II.) Mendoza

250. Indigenous Critique of Classic Maya Ethnographies (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Construction of the Maya world through ethnographic writing during the present century. Deconstruction of ethnographies about the Mayans considering the modern theories and social/anthropological critiques of modern ethnographies. Offered in alternate years.—(II.) Montejó

280. Ethnohistorical Theory and Method (4)

Seminar—3 hours; term paper. Discussion of the ethnohistorical method; the utilization of diverse types of data, especially documentary sources, to reconstruct socio-cultural history. Particular attention to the applied area of ethnohistory in the solution of contemporary social problems. Offered in alternate years.—III. Crum

298. Group Study for Graduate Students (1-5)

Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

299. Special Study for Graduate Students (1-12)

Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Natural Sciences

(College of Letters and Science)

Advising Center, 174 Physics/Geology Building (530-752-9100)

Committee in Charge

Howard W. Day, Ph.D., Chairperson (*Geology*)
 Charles P. Nash, Ph.D. (*Chemistry*)
 J. Richard Pomeroy, Ph.D. (*Education*)
 Wendell H. Potter, Ph.D. (*Physics*)
 Thomas L. Rost, Ph.D. (*Plant Biology*)

The Major Program

Natural Sciences is an interdisciplinary major that provides significant breadth in biology, chemistry, earth sciences, physics and mathematics while offering additional depth in two of the natural sciences. It is especially designed to meet the needs of prospective science teachers, but will also serve students who wish to acquire training in more than one science. The major is sponsored by the Department of Geology.

The Program. The Natural Sciences curriculum offers an unusually broad training in science and mathematics. All students must complete a one year sequence in calculus, a course in statistics and one year sequences in chemistry, earth science, life sci-

ence and physics. Each student will complete depth courses in two of these sciences. Prospective teachers may use these depth courses as preparation for primary and supplementary teaching credentials in science.

Career Alternatives. The study of natural sciences prepares a student to meet the subject matter requirements for a science teaching credential in California as well as a variety of other careers. Students whose goals include business, journalism, law, or medicine may acquire a broad background in science through this curriculum.

B.S. Major Requirements:

	UNITS
Preparatory Subject Matter68	
Chemistry 2A, 2B, 2C.....	15
Biological Sciences 1A, 1B, 1C.....	15
Geology 3, 3L, 50, 50L, 60.....	13
Mathematics 16A, 16B, 16C.....	9
Physics 7A, 7B, 7C.....	12
Statistics 100 or 102.....	4
Depth Subject Matter42	
Concentration (choose from among the four fields of concentration listed below).....	27
Supplementary Field (choose from among the four fields listed below. May not include the same field as the concentration. The same course may not be used to fulfill the requirements for both a Concentration and a Supplementary field.).....	15
Total Units for the Major110	

Fields of Concentration:

<i>Chemistry</i>	27
Chemistry 105, 107A, 107B, 118A, 118B, 118C, 124A.....	25
Chemistry 197 or 199.....	2
<i>Earth Science</i>	27
Geology 62, 100, 100L, 105N, 108N, 109, 109L, 116.....	20
Soil Science 100.....	4
Geology 199.....	3
<i>Life Science</i>	27-34
Chemistry 8A, 8B or 118A, 118B, 118C.....	6-12
Biological Sciences 101.....	4
Evolution and Ecology 100, 101.....	8
Neurobiology, Physiology, and Behavior 101.....	5
Neurobiology, Physiology, and Behavior 101L or Molecular and Cellular Biology 160L.....	3-4
One 199 course from Biological Sciences, Evolution and Ecology, Molecular and Cellular Biology, or Neurobiology, Physiology, and Behavior.....	1
<i>Physics</i>	27
Chemistry 107A, 110A.....	7
Geology 161, 162N.....	6
Physics 108, 122.....	7
Physics 137 or 160.....	3
Physics 199.....	4

Supplementary Fields:

<i>Chemistry</i>	15
Chemistry 105, 107A, 118A, 124A.....	14
Approved elective.....	1
(Other Chemistry or related science courses may be substituted with the prior approval of the major adviser.)	
<i>Earth Science</i>	15
Geology 108, 109, 109L, 116, 138L.....	14
Approved elective.....	1
(Other Geology or related science courses may be substituted with the prior approval of the major adviser.)	
<i>Life Science</i>	15
Biological Sciences 101*.....	4

Evolution and Ecology 1004
 Neurobiology, Physiology, and Behavior
 1015
 Approved electives2
 (Other Biological Sciences or related sci-
 ence courses may be substituted with
 the prior approval of the major adviser.)

*Note: Students pursuing a concentra-
 tion in earth science or physics may not
 have had the necessary prerequisites in
 organic chemistry.

Physics15
 Physics 1223
 Chemistry 107A, 110A7
 Geology 1613
 Approved electives2
 (Other Physics or related science
 courses may be substituted with the
 prior approval of the major adviser.)

Major Advisers: C. P. Nash (*Chemistry*), H. W. Day
 (*Geology*), W. H. Potter (*Physics*), T.L. Rost (*Plant
 Biology*).

Daniel Cox, Ph.D., Professor (*Physics*)
 Laurie Glover, Ph.D., Lecturer (*English*)
 Susan Harrison, Ph.D., Associate Professor
 (*Environmental Science and Policy*)
 Scott McLean, Ph.D., Lecturer (*Comparative
 Literature*)
 David Robertson, Ph.D., Professor (*English*)
 Mark Wheelis, Ph.D., Senior Lecturer (*Microbiology*)

The Major Program

The Nature and Culture major is a coherent interdis-
 ciplinary set of studies that offers exploration of the
 complex relationships existing between human cul-
 tures and the natural world.

The Program. This program is the first of its kind in
 the country, providing a rigorous curriculum that
 interweaves courses in the natural sciences, the
 humanities, and the social sciences, supplemented
 by elective course work in these and other fields of
 study. There are at present three required core
 courses in Nature and Culture itself, a principal func-
 tion of which is to tie together knowledge and experi-
 ence gained in the various disciplines that students
 will work in as they progress through their studies.

Career Alternatives. Students completing an A.B.
 degree in Nature and Culture will be qualified to enter
 most professional schools, such as medicine and
 law, and many graduate programs in science and the
 humanities, especially those with an emphasis on
 interdisciplinary study. Students expecting to apply
 for highly specialized fields will need to plan their

elective work carefully. The degree program provides
 excellent preparation for careers in business and
 government, as well as for the credential program for
 K-12 teaching. When combined with courses in non-
 fiction writing, the Nature and Culture curriculum will
 prepare students for the burgeoning fields of environ-
 mental writing and environmental journalism.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter 38-41	
Nature and Culture 14	
Chemistry 2A-2B and Biological Sciences 1A; or Geology 3-3L and 50-50L and Geology 36 or Astronomy 213-15	
Biological Sciences 1B-1C10	
Environmental Science and Policy 30 or Anthropology 23-4	
Comparative Literature 1, 2, or 3, or English 34	
Comparative Literature 204	
Recommended: Statistics 13, 32, 102, or 103.	
Depth Subject Matter 40	
Nature and Culture 100 and 18012	
Nature and Culture 120 or 140, or American Studies 157, or Veterinary Medicine 1704	
Environmental Science and Policy 100, or Evolution and Ecology 101 or 1214	
Anthropology/Environmental Science and Policy 101 or 1334	
English 184 or Native American Studies 181A, 181B, or 181C, or Comparative Literature 1204	
Electives, a minimum of 16 units selected in consultation with an adviser from one or two thematic clusters. Possible clusters include Human Evolution and Ecology, Human Culture and Society, Indigenous Peoples, California and the Southwest, Art and Literature, Earth and Environ- ment, The Impact of Humans on the Envi- ronment, Environmental Law, Policy and Planning. A representative list of clusters and courses is available from advisers and from the Program Office.....16	
Total units for the major 78-81	

Major advisers: S. McLean, D. Robertson, L. Timm,
 M. Wheelis.

Minor Program Requirements:

	UNITS
Nature and Culture 24	
Nature and Culture 14	
Nature and Culture 100, 1208	
Environmental Science and Policy 100, Evo- lution and Ecology 100 or 1214	
Anthropology/Environmental Science and Policy 101 or Anthropology/Environmen- tal Science and Policy 1334	
English 184 or Native American Studies 181A, 181B, or 181C4	

Courses in Nature and Culture (NAC)

Lower Division Courses

1. Intersections of Nature and Culture (4)
 Lecture/discussion—3 hours; term paper. Prerequi-
 site: satisfaction of Subject A requirement; Compar-
 ative Literature 1, 2 or 3, or English 3 recommended.
 Nature and culture as human constructs, condi-
 tioned by both time and place; importance of nature
 in human thought, both scientific and spiritual; scien-
 tific and literary view of the relation between nature
 and culture, including forms of observation and
 methods of analysis. GE credit: ArtHum or SciEng,
 Wrt.—I. (I.) Moores, McLean

98. Directed Group Study (1-5)
 Prerequisite: consent of instructor. (P/NP grading
 only.)

99. Individual Study (1-5)
 Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

**100. The Culture of Nature: Theoretical
 Frameworks and Case Studies (4)**
 Lecture/discussion—3 hours; term paper. Prerequi-
 site: course 1. Problems in nature and culture, with
 particular attention to integrative theoretical frame-
 works available for the investigation of specific
 issues. Case studies will vary with instructor. May be
 repeated once for credit when topic and instructor
 differ. GE credit: ArtHum or SciEng, Wrt—II. (II.)
 McLean, Wheelis

120. Environmental Ethics (4)
 Lecture/discussion—3 hours; term paper. Prerequi-
 site: course 1. Ethical issues underlying environmen-
 tal/ecological controversies, including
 anthropocentrism vs. ecocentrism, wilderness and
 species preservation, human population growth, ani-
 mal rights, deep ecology, and ecofeminism. Empha-
 sis is on critical examination of issues from
 cross-cultural, theoretical, and applied perspectives.
 GE credit: ArtHum, Wrt.—III. McLean

140. Animal Rights (4)
 Lecture/discussion—3 hours; term paper. Prerequi-
 site: upper division standing. Issues surrounding ani-
 mal rights, including hunting, fishing, industrial
 husbandry and slaughter, experimentation, and pets.
 Emphasis on the complexities of human relations to
 other animals from historical, literary, and cross-cul-
 tural perspectives. Offered in alternate years. GE
 credit: ArtHum, Wrt.—(III.) McLean

180. Fieldwork in Nature and Culture (4)
 Discussion—1 hour; fieldwork—70 hours/quarter;
 term paper. Prerequisite: course 100 and consent of
 instructor. Fieldwork: one week prior to the beginning
 of the quarter, plus two weekends. Natural scientific,
 social scientific, and literary/artistic approaches to
 the study of nature and culture in one place, which
 will vary with instructor.—I. (I.) Moyle, Robertson
192. Internship in Nature and Culture (1-12)
 Internship—3-36 hours. Prerequisite: course 1.
 Internship in natural sciences, social sciences, or
 humanities on or off campus in which students use
 and improve their interdisciplinary skills and per-
 spectives gained through the Nature and Culture
 curriculum. Supervised by a faculty member. May be
 repeated for credit. (P/NP grading only.)

197T. Tutoring in Nature and Culture (1-5)
 Tutoring—3-15 hours. Prerequisite: consent of instruc-
 tor. Assist in field trips, lead study sessions with
 groups and individual students. (P/NP grading only.)

198. Directed Group Study (1-5)
 Prerequisite: consent of instructor. (P/NP grading only.)
199. Individual Study (1-5)
 Prerequisite: consent of instructor. (P/NP grading only.)

Nematology

(College of Agricultural and Environmental Sciences)
 Edward P. Caswell-Chen, Ph.D., Chairperson of the
 Department
 Department Office, 354 Hutchison Hall
 (530-752-7567/6905)
 World Wide Web: <http://ucdnema.ucdavis.edu>

Faculty

Edward P. Caswell-Chen, Ph.D., Professor
 Howard Ferris, Ph.D., Professor
 Bruce A. Jaffee, Ph.D., Professor
 Harry K. Kaya, Ph.D., Professor (*Entomology*)
 Steven Nadler, Ph.D., Professor
 Valerie M. Williamson, Ph.D., Professor

Emeriti Faculty

Armand R. Maggenti, Ph.D., Professor Emeritus
 Dewey J. Raski, Ph.D., Professor Emeritus

Affiliated Faculty

Becky B. Westerdahl, Ph.D., Associate Professor

Minor Program Requirements:

Nematology 18-20
 Nematology 100, 110, and Soil Science 100 10

Two or three courses from one of the following areas 8-10

(a) Plant Science:

Microbiology 102; Entomology 100, 135, 153, 156, 156L; Evolution and Ecology 112; Plant Pathology 120, 148; Plant Biology 121; Soil Science 111, 112

(b) Entomology:

One upper division Entomology course; Evolution and Ecology 112; Microbiology 102; Plant Biology 121; Plant Pathology 120, 148; Soil Science 102, 111, 112

Minor Adviser. S. A. Nadler

Graduate Study. Graduate degrees specializing in Nematology are offered through the Departments of Entomology and Plant Pathology, and through various Graduate Groups (Biochemistry, Ecology, Genetics, Plant Protection and Pest Management). Refer also to the Graduate Studies chapter of this catalog.

Courses in Nematology (NEM)**Upper Division Courses****100. General Plant Nematology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1B or 10. An introduction to the classification, morphology, biology, and control of the nematodes attacking cultivated crops.—I. (I.) Ferris

110. Introduction to Nematology (2)

Lecture—2 hours. Prerequisite: Biological Sciences 1B or the equivalent or consent of instructor. The relationship of nematodes to human environment. Classification, morphology, ecology, distribution, and importance of nematodes occurring in water and soil as parasites of plants and animals.—II. (II.) Caswell-Chen, Nadler

150. Revising Scientific Prose (4)

Lecture/discussion—3 hours; term paper. Prerequisite: one course in English composition, understanding of English grammar and parts of speech, upper division standing in a science major, or consent of instructor. Principles of detailed revision; close analysis of writing styles in research papers, popular scientific articles, and other scientific reports; use of verb-based and noun-based writing styles. GE credit: Wrt.—II. (II.) Jaffee

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses**201. Molecular and Physiological Plant Nematology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: Biological Sciences 101; Plant Pathology 120, course 100 or 110. Molecular biology and physiology of nematodes using *Caenorhabditis elegans* as a model, but with emphasis on plant-parasitic species. Plant responses to nematodes. Discussion of current literature emphasized. Offered in alternate years.—II. Williamson

203. Ecology of Parasitic Nematodes (2)

Lecture—1 hour; discussion—1 hour. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 101 or Plant Biology 117. Major concepts in population and community ecology of animal- and plant-parasitic nematodes. Current advances in techniques, theory, and basic information about nematode-host dynamics, and application to management of nematode diseases. Offered in alternate years.—(III.) Caswell-Chen

204. Management of Plant-Parasitic Nematodes (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or 110. Theory, foundation, principles and practices of nematode management. Techniques and equipment used to manage nematodes and methods used to analyze their effectiveness. Offered in alternate years.—III. Westerdahl

205. Insect Nematology and Biological Control (2)

Lecture—1 hour; discussion—1 hour. Prerequisite: courses 100 and 110, Entomology 100 or 110. The biology of insect-parasitic nematodes, their effect on the host, and their potential as biological control agents of insect and other invertebrate pests. Application of ecological theory in classical and augmentative biological control. Offered in alternate years.—(I.) Kaya

206. Nematode Systematics and Evolution (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 100 recommended. Nematode diversity as revealed by morphological and molecular evidence. Laboratory experience focuses on structural features used in taxonomy. Phylogenetic relationships based on morphological and molecular data used to consider patterns of character change among taxa. Offered in alternate years.—(I.) Nadler

210. Molecular Phylogenetic Analysis (3)

Lecture—2 hours; laboratory—3 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as Evolution and Ecology 210.) Offered in alternate years.—III. Nadler, Sanderson

245. Field Nematology (1)

Fieldwork—6 days. Prerequisite: course 100. Six-day demonstration and field study in applied nematology including diagnosis and prediction of nematode field problem strategies for control field plot design, and establishment in association with diverse California crops. (S/U grading only.)—I. (I.)

290. Seminar (1)

Seminar—1 hour. (S/U grading only.)—II, III. (II, III.)

290C. Advanced Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. (S/U grading only.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Graduate Study. The Graduate Group in Neuroscience offers programs of study leading to the Ph.D. degree. Neuroscience is a broad, interdepartmental program with faculty interests ranging from molecular biophysics of channels to cortical organization and cognition. A major goal of the program is to prepare students for careers as research scientists. Details of the program may be obtained from the Group office.

Graduate Advisers. R. Berman (*Neurological Surgery*), E. Carstens (*Neurobiology, Physiology, and Behavior*), B. Chapman (*Neurobiology, Physiology, and Behavior*), K. Sigvardt (*Center for Neuroscience*).

Courses in Neuroscience (NSC)**Upper Division Courses****160. Molecular and Cellular Neurobiology (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100, Biological Sciences 101 and consent of instructor.

Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intracellular signal transduction pathways, synaptic physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neuromodulation of synaptic circuitry. (Same course as Neurobiology, Physiology, and Behavior 160.)—III. (III.) Burns, Chen, Mulloney

Graduate Courses

200LA. Laboratory Methods in Neurobiology (6)

Laboratory—18 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated three times for credit. (S/U grading only.)—I, II, III. (I, II, III.)

200LB. Laboratory Methods in Neurobiology (3)

Laboratory—9 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

220. How to Give a Scientific Seminar (3)

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Presentation of effective seminars. Student presentations of selected neuroscience topics in seminar format. Must be taken in two consecutive quarters.—II-III. (II-III.) McAllister

221. Cellular and Molecular Neuroscience (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Advanced course dealing with the cellular and sub-cellular organization of the nervous system. Membrane channels, sensory transduction, synaptic transmission and cellular aspects of development and learning will be covered. (Same course as Neurobiology, Physiology and Behavior 221.)—I. (I.) Wilson

222. Systems Neuroscience (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as Neurobiology, Physiology, and Behavior 222.)—II. Usrey

223. Cognitive Neuroscience (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Psychology 261.)—III. (III.)

226. Molecular and Developmental Neurobiology (4)

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Introduction to molecular and developmental neurobiology. Topics range from neurulation to development of sensory systems and include modern molecular methods and their application in developmental neuroscience.—II. (II.) McAllister, L'Etoile

243. Topics in Cellular and Behavioral Neurobiology (2)

Discussion—1 hour; seminar—1 hour. Prerequisite: consent of instructor. An advanced examination of several current problems in neurobiology. Topics will vary in different years; may be repeated for credit. (S/U grading only.)—III. (III.) Ishida

250. Biology of Neuroglia (2)

Lecture/discussion—1.5 hours. Prerequisite: consent of instructor. The properties and functions of non-neuronal or neuroglial cells in the mammalian central nervous system with relevance to neuronal development, physiology and injury response. Offered in

alternate years. (Same course as Cell Biology and Human Anatomy 250.) (S/U grading only.)—III.

Kumari

261A. Topics in Vision (2)

Lecture/discussion—2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100 and 112 or the equivalent, graduate standing. Visual system functions and underlying mechanisms. Emphasis on recent research and pertinent aspects of anatomy, biochemistry, electrophysiology, psychophysics, development and genetics. Topics may vary each year. (Same course as Neurobiology, Physiology, and Behavior 261A and Physiology 261A.) (S/U grading only.)—I. Ishida

283. Neurobiological Literature (1)

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in neurobiology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Mulloney, Wilson

284. Development of Sensory Systems (1)

Seminar—1 hour. Prerequisite: consent of instructor. Presentation and discussion of recent literature on the development of sensory systems. May be repeated for credit. (S/U grading only.)—II, III. (II, III.) Chapman

290C. Research Conference in Neurobiology (1)

Discussion—1 hour. Prerequisite: graduate standing in Neuroscience or consent of instructor; course 299 (concurrently). Presentation and discussion of faculty and graduate student research in neurobiology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

292. Cortical Plasticity and Perception (2)

Lecture/discussion—2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100 or 112 or equivalent or consent of instructor. Examination of research articles on cortical plasticity and changes in perception. Examples drawn from studies of the somatosensory, visual, auditory, and motor cortex. (Same course as Neurobiology, Physiology, and Behavior 292.) Offered in alternate years. (S/U grading only.)—II.

298. Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Major Programs. See the majors in Clinical Nutrition and Nutrition Science.

Minor Program Requirements:

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Note: If the student's major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor. Each program below lists replacement courses to fulfill the minimum unit requirement.

	UNITS
Community Nutrition	24
Preparation: plan in advance to include the required course prerequisites.	
Nutrition 101 and 111	9
Nutrition 118, 192 (2 units)	6
Nutrition 120A or 120B	4
Neurobiology, Physiology, and Behavior 101	5
Replacement courses (see note above): Nutrition 114, 116A-116B, 116AL-116BL.	

	UNITS
Food Service Management	25
Preparation: plan in advance to include the required course prerequisites.	
Food Science and Technology 100A-100B, 101A-101B and 108	13
Food Service Management 120, 120L, 122	8
Agricultural and Resource Economics 112	4
Replacement courses (see note above): Nutrition 10, 101, 111, 114, 116A-116B, Economics 1A-1B.	

	UNITS
Nutrition and Food	24
Preparation: plan in advance to include the required course prerequisites.	
Nutrition 101, 111	9
Nutrition 120A or 120B	4
Food Science and Technology 100A, 100B	6
Neurobiology, Physiology, and Behavior 101	5
Replacement courses (see note above): Nutrition 114, 116A-116B, 116AL-116BL.	

	UNITS
Nutrition Science	20
Preparation: plan in advance to include the required course prerequisites.	
Animal Biology 102 and 103, or Biological Sciences 102 and 103 and Nutrition 101	8-11
Neurobiology, Physiology, and Behavior 101	5
Nutrition 111	4
Replacement courses (see note above): Nutrition 114, 115, 116A-116B, 117, 120A or 120B, 122, 123, 124, 201, 204.	

Minor Adviser. R.B. Rucker.

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the Nutrition Graduate Group.

Courses in Nutrition (NUT)

Lower Division Courses

10. Discoveries and Concepts in Nutrition (3)
Lecture—3 hours. Nutrition as a science, historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. GE credit: SciEng.—I, II, III. (I, II, III.) Applegate

11. Current Topics and Controversies in Nutrition (2)
Discussion—1.5 hours; oral reports, written reports, term paper. Prerequisite: course 10 (may be taken concurrently). Assigned readings and discussion of topics of current concern and broad interest in contemporary nutrition. Coordinated with course 10. Not open for credit to students who have taken an upper division course in nutrition. GE credit: SciEng, Wrt.—I, II, III. (I, II, III.) Applegate

20. Food and Culture: An Introduction to Culture, Diet, and Cuisine (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: Anthropology 2, Geography 2, and course 10 recommended. Historical and contemporary overview of culture, food habits, and diet; exploration of the major themes in food habit research; minority food habits; origins and development of dietary practices. GE credit: SciEng or SocSci.—II. (II.) Grivetti

99. Individual Study for Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

101. Introduction to Nutrition and Metabolism (5)
Lecture—4 hours; independent study—1 hour. Prerequisite: Chemistry 8B; Neurobiology, Physiology and Behavior 101 or the equivalent. Introduction to the metabolism of protein, fat and carbohydrate; the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status. Diet project. Not open for credit to students who have taken course 110 or 111.—I. (I.) Lönnerdal

111. Human Nutrition (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 101, Animal Biology 102, 103. Nutrition of humans; critical study of nutrient requirements at various phases of life cycle.—III. (III.) McDonald

112. Nutritional Assessment: Dietary, Anthropometric, and Clinical Measures (3)
Lecture—2 hours; laboratory—3 hours. Prerequisite: Animal Biology 102 and 103 or Nutrition 101, Nutrition 111 (may be taken concurrently), Statistics 13. Methods of human nutritional assessment, including dietary, anthropometric, biochemical and hematological techniques, and physical examination. Principles of precision, accuracy, and interpretation of results for individuals and populations.—III. (III.) Brown, Satre

114. Developmental Nutrition (4)
Lecture—4 hours. Prerequisite: Animal Biology 102 and 103 or course 101; course 111. Role of nutritional factors in embryonic and postnatal development. GE credit: SciEng, Wrt.—II. (II.) Keen, Satre

115. Animal Feeds and Nutrition (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 8B, Animal Science 41. Analyses and evaluation of feeds, influences of production, processing and storage methods on nutritive value of feeds. Animal nutrition. Diet formulation. GE credit: SciEng, Wrt.—II. (II.) DePeters

116A-116B. Clinical Nutrition (3-3)
Lecture—3 hours. Prerequisite: courses 111, 112 and Neurobiology, Physiology and Behavior 101 or the equivalent. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions.—I-II. (I-II.) Allen, Stern, Clifford

116AL. Clinical Nutrition Practicum (3)
Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: course 116A (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A.—I. (I.) Allen

116BL. Clinical Nutrition Practicum (3)
Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: courses 116AL, and 116B (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116B. Continuation of course 116AL.—II. (II.) Steinberg

117. Experimental Nutrition (6)
Lecture—3 hours; laboratory—6 hours; extensive writing. Prerequisite: courses 111, Biological Sciences 102 and 103, and a laboratory course in nutrition or biochemistry. Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: Wrt.—I. (I.) Clifford

118. Community Nutrition (4)
Lecture—4 hours. Prerequisite: course 101 or 111, and 116A. Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education.—II. (II.)

119A. International Community-Based Nutritional Assessment (1)
Lecture/discussion—1 hour. Prerequisite: course 112 (may be taken concurrently) and consent of instructor. Issues and problems related to community-based nutritional assessment in a low-income country, major nutritional problems in low-income countries; ethical issues in human investigation; survey design, data collection techniques, and data analysis; preparation for international travel; cross-cultural communication, health, and safety while living abroad.—III. (III.) Brown

119B. International Community-Based Nutritional Assessment (6)
Lecture—2 hours; fieldwork—12 hours. Prerequisite: course 119A and consent of instructor. A six-week summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection of the study sample, collection and verification of data, and analysis and interpretation of the results; the project will be carried out by paired participation of students and faculty members of UC Davis and the collaborating foreign institution.—summer. (summer.) Brown

120A. Nutritional Anthropology (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10; Anthropology 2 or Geography 2 recommended. Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications. Offered in alternate years. GE credit: SciEng or SocSci, Div.—(I.) Grivetti

120B. Nutritional Geography (4)
Lecture—3 hours; discussion—1 hour. Prerequisite: course 10; Geography 2 recommended. Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. Offered in alternate years. GE credit: SciEng or SocSci, Div.—I. Grivetti

122. Ruminant Nutrition and Digestive Physiology (4)
Lecture—3 hours; laboratory—3 hours. Prerequisite: upper division standing; Animal Biology 103 or consent of instructor; Neurobiology, Physiology and Behavior 101, Biological Sciences 1C, and Mathematics 16B recommended. Study of nutrient utilization as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises.—III. (III.) Fadel

123. Comparative Animal Nutrition (3)
Lecture—3 hours. Prerequisite: Animal Biology 103. Restricted to upper division or graduate students. Comparative nutrition of animals; including laboratory, companion, zoo, and wild animals. Digestion and metabolic adaptations required for animal species to consume diverse diets ranging from grasses and leaves to nectar to insects and meat. Relation of nutrition to metabolic adaptations and physiological states, including growth, reproduction, and diseases.—III. (III.) Klasing

123L. Comparative Animal Nutrition Laboratory (1)
Laboratory—3 hours. Prerequisite: Animal Biology 103, course 123 (may be taken concurrently). Laboratory exercises leading to written reports on establishment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals.—III. (III.) Klasing

124. Nutrition and Feeding of Finfishes (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103 and Wildlife, Fish and Conservation Biology 121. Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species.—I. (I.) Hung

127. Environmental Stress and Development in Marine Organisms (10)

Lecture—4 hours; laboratory—12 hours; discussion—2 hours. Prerequisite: Environmental Toxicology 101 or Biological Sciences 102 or 104 or the equivalent; Environmental Toxicology 114A or course 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress; including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as Environmental Toxicology 127.) GE credit: SciEng.—summer. Cherr

129. Journalistic Practicum in Nutrition (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 111; a course in written or oral expression or consent of instructor. Critical analysis and discussion of current, controversial issues in nutrition; the use of journalistic techniques to interpret scientific findings for the lay public. Students will be required to write several articles for campus media. Course may be repeated once for credit.—III. (III.) Stern

130. Experiments in Nutrition: Design and Execution (2)

Laboratory—6 hours. Prerequisite: consent of instructor; course 101, 110, 111, or 114 recommended. Experiments in current nutritional problems. Experimental design: students choose project and, independently or in groups of 2-3, design a protocol, complete the project, and report findings. May be repeated for credit up to six times (three times per instructor) with consent of instructor.—I, II, III, summer. (I, II, III, summer.)

190. Proseminar in Nutrition (1)

Seminar—1 hour. Prerequisite: senior standing; course 111. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic problems of community, national and international scope. May be repeated twice for credit with consent of instructor.—I, II, III. (I, II, III.) Zidenberg-Cherr

190C. Nutrition Research Conference (1)

Discussion—1 hour. Prerequisite: upper division standing in Nutrition or related biological science; consent of instructor. Introduction to research findings and methods in nutrition. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: one upper division course in nutrition and consent of instructor. Work experience on or off campus in practical application of nutrition, supervised by a faculty member. (P/NP grading only.)

197T. Tutoring in Nutrition (1-2)

Discussion/laboratory—3 or 6 hours. Prerequisite: Nutrition Science, Clinical Nutrition or related major. Completion of course 101. Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections, weekly conference with instructor in charge of course: written evaluations. May be repeated if tutoring a different course. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**201. Vitamin and Cofactor Metabolism (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division nutritional biochemistry and physiology course. Review of studies and relationships involving the metabolic functions of vitamins. Com-

parative nutritional aspects and the metabolism and chemistry of vitamins and vitamin-like compounds.—II. (II.) Rucker, Steinberg

202. Advanced Nutritional Energetics (2)

Lecture—2 hours. Prerequisite: Animal Biology 102, 103, Neurobiology, Physiology and Behavior 101 or the equivalent. History of nutritional energetics. Evaluation of energy transformations associated with food utilization. Energy expenditures at cellular, tissue, and animal levels as affected by diet and physiological state. Current and future feeding systems.—III. (III.) Sainz

203. Advanced Protein and Amino Acid Nutrition (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division nutritional biochemistry and physiology course. Nutritional significance of protein and amino acids, including studies of the influence of dietary protein on digestion, absorption, metabolism, resistance to disease, and food intake. Study of dietary requirements and interrelationships among amino acids.—III. (III.) Rogers

204. Mineral Metabolism (2)

Lecture—2 hours. Prerequisite: upper division nutrition or biochemistry course. Studies of metabolic functions and nutritional interrelationships involving minerals.—III. (III.) Lönnnerdal, Keen

219A. International Nutrition (3)

Lecture/discussion—3 hours. Prerequisite: upper division course in nutrition or consent of instructor. Epidemiology, etiology, and consequences of undernutrition in developing countries. Offered in alternate years.—II. Brown, Dewey, Pollitt

219B. International Nutrition (3)

Lecture/discussion—3 hours. Prerequisite: upper division course in nutrition or consent of instructor. Nutrition policies and programs in developing countries. Offered in alternate years.—III. Brown, Dewey, Pollitt

230. Experiments in Nutrition: Design and Execution (2)

Laboratory—6 hours. Prerequisite: consent of instructor; courses 201, 202, 203, 204, or the equivalent recommended. Student selected projects to enhance laboratory skills. Independently, or in groups of 2-3 students, design a protocol, carry out the project, analyze the results and report the findings. May be repeated for credit up to six times (limit of three times per instructor) with consent of instructor.—I, II, III. (I, II, III.)

250. Metabolic Homeostasis (3)

Lecture—2 hours; discussion—1.5 hours. Prerequisite: passing the Nutrition Graduate Group Preliminary Examination or consent of instructor. Preference given to students with advanced standing in the Nutrition Graduate Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition energy balance.—III. (III.) Walsh

251. Nutrition and Immunity (2)

Lecture/discussion—2 hours. Prerequisite: Pathology, Microbiology and Immunology 126, Medical Microbiology 107 or the equivalent, Animal Biology 102. Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer. Offered in alternate years.—(II.) Klasing, Erickson, Stephenson

252. Nutrition and Development (3)

Lecture—3 hours. Prerequisite: courses 201, 202, 203, 204. Relationship of nutrition to prenatal and early postnatal development.—II. (II.) Keen, Satre

253. Control of Food Intake (3)

Lecture—2 hours; discussion—1 hour; 2 or 3 laboratory demonstrations per quarter. Prerequisite: course 201 or 202 or consent of instructor. Comprehensive study of the biochemical, nutritional, behavioral, and

physiological mechanisms controlling food intake. Subject matter will be approached through lectures, laboratory demonstration and discussions where students and staff will critically evaluate the literature. Offered in alternate years.—(III.) Stern, Geitzzen

254. Applications of Systems Analysis in Nutrition (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 202, Physiological Sciences 205A-205B or the equivalent. Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research. Offered in alternate years.

257. Selected Topics in Nutritional and Hormonal Control of Nitrogen Metabolism (2)

Lecture—2 hours. Prerequisite: courses 201 through 204; Physiological Sciences 205A-205B or the equivalent. Quantitative and qualitative aspects of nitrogen metabolism; critical evaluation of dietary intake, hormones and diet-hormone interactions which affect nitrogen metabolism, including protein synthesis-degradation, amino acid synthesis-catabolism, nitrogen transport-excretion, depending on current literature. Offered in alternate years.—(I.) Klasing, Calvert

258. Field Research Methods in International Nutrition (3)

Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues. Offered in alternate years.—(II.) Brown, Dewey, Pollitt

259. Nutrition and Aging (2)

Lecture—2 hours. Prerequisite: three of courses 201, 202, 203 and 204. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging. Offered in alternate years.—(I.) McDonald

290. Beginning Nutrition Seminar (2)

Lecture/discussion—1 hour; seminar—1 hour. Prerequisite: first year graduate standing. Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics.—I. (I.) Satre

290C. Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style. (S/U grading only.)—I, II, III. (I, II, III.)

291. Advanced Nutrition Seminar (1)

Seminar—1 hour. Prerequisite: second-year graduate standing. Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

293A. Current Topics in Obesity, Food Intake and Energy Balance (3)

Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of instructor.—I. (I.) Stern

293B. Current Topics in Obesity, Food Intake, and Energy Balance with Special Topics (3)

Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor.—II. (II.) Stern

297T. Supervised Teaching in Nutrition (1-3)

Teaching under faculty supervision—3-9 hours. Prerequisite: graduate standing in nutrition or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. (S/U grading only.)

298. Group Study (1-5)**299. Research (1-12)**

(S/U grading only.)

Professional Course**492A. Professionalism: An Academic Perspective (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences.—I, II. (I, II.) Grivetti

492B. Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3)

Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing in Nutrition or consent of instructor. Scientific ethics in biomedical studies, especially nutrition. Students will present case studies in areas such as fraud, scientific integrity, misconduct and conflict of interest. Offered in alternate years.—(III.) Stern

492C. Grant Writing (3)

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: graduate standing in Nutrition or consent of instructor. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application. May be repeated once for credit with consent of instructor. Offered in alternate years.—III. Stern

Louis E. Grivetti, Ph.D., Professor (*Nutrition, Geography*)
 Jean-Xavier Guinard, Ph.D., Professor (*Food Science and Technology*)
 Charles H. Halsted, M.D., Professor (*Internal Medicine, Nutrition*)
 Robert J. Hansen, Ph.D., Professor (*Molecular Biosciences*)
 Silas S. O. Hung, Ph.D., Professor (*Animal Science*)
 Thomas Jue, Ph.D., Professor (*Biological Chemistry*)
 Sidika E. Kasim-Karakas, M.D., Associate Professor (*Internal Medicine*)
 George A. Kaysen, M.D., Ph.D., Professor (*Internal Medicine*)
 Carl L. Keen, Ph.D., Professor (*Nutrition, Internal Medicine*)
 Kirk C. Klasing, Ph.D., Professor (*Animal Science*)
 Bo L. Lönnerdal, Ph.D., Professor (*Nutrition, Internal Medicine*)
 Stanley L. Marks, B.V.Sc., Ph.D. Associate Professor (*Medicine and Epidemiology*)
 Roger B. McDonald, Ph.D., Professor (*Nutrition*)
 Alyson Mitchell, Ph.D., Assistant Professor (*Food Science and Technology*)
 Anthony F. Philipps, M.D., Professor (*Pediatrics*)
 Ernesto Pollitt, Ph.D., Professor (*Pediatrics*)
 Helen E. Raybould, Ph.D., Professor (*Anatomy, Physiology and Cell Biology*)
 Quinton R. Rogers, Ph.D., Professor (*Molecular Biosciences*)
 Robert B. Rucker, Ph.D., Professor (*Nutrition, Biological Chemistry*)
 Roberto D. Sainz, Ph.D., Associate Professor (*Animal Science*)
 Barbara O. Schneeman, Ph.D., Professor (*Nutrition, Food Science and Technology, Internal Medicine*)
 Francene M. Steinberg, Ph.D., R.D., Assistant Professor (*Nutrition*)
 Judith S. Stern, Sc.D., R.D., Professor (*Nutrition, Internal Medicine*)
 Suzanne Teuber, M.D., Associate Professor (*Internal Medicine*)
 Donal A. Walsh, Ph.D., Professor (*Biological Chemistry*)
 Craig H. Warden, Ph.D., Associate Professor (*Neurobiology, Physiology, and Behavior*)
 Bruce M. Wolfe, M.D., Professor (*Surgery*)
 Vincent A. Ziboh, Ph.D., Professor (*Dermatology, Biological Chemistry*)

Nancy L. Kein, Ph.D., R.D., Adjunct Professor (*Nutrition*)
 Darshan S. Kelley, Ph.D., Adjunct Professor (*Nutrition*)
 Janet C. King, Ph.D., Adjunct Professor (*Nutrition*)
 Mary J. Kretsch, Ph.D., R.D., Associate Adjunct Professor (*Nutrition*)
 Joshua W. Miller, Ph.D., Assistant Adjunct Professor (*Pathology*)
 James W. Oltjen, Ph.D., Management Systems Specialist (*Animal Science*)
 Peter H. Robinson, Ph.D., Associate Extension Specialist (*Animal Science*)
 Charles B. Stephensen, Ph.D., Adjunct Professor (*Nutrition*)
 Judith R. Turnlund, Ph.D., R.D., Adjunct Professor (*Nutrition*)
 Marta D. Van Loan, Ph.D., Adjunct Professor (*Nutrition*)
 Sheri A. Zidenberg-Cherr, Ph.D., Nutrition Science Specialist (*Nutrition*)

Graduate Study. The Graduate Group in Nutrition offers programs of study and research leading to the M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education.

Graduate Advisers. Consult the Nutrition Graduate Group Office.

See the Department of Nutrition

The Major Program

The study of nutrition encompasses all aspects of the consumption and utilization of food and its constituents. Key areas of study include the biochemical reactions important to utilization of nutrients and food constituents and to the impact of diet on health and disease, and nutrition-related policy and public health issues. The nutrition science major includes two options for studying these areas: *nutritional biochemistry and community nutrition*.

The Program. Nutrition as it is taught on the Davis campus is a biological science and requires a complete background in chemistry and biology, along with calculus and either physics (nutritional biochemistry option) or economics (community nutrition option). These courses are generally completed during the first two years, and along with biochemistry, must be completed before most nutrition classes can be taken. During their junior and senior years, students in the nutritional biochemistry option take additional course work in biochemistry, genetics, microbiology, physiology, immunology, and/or toxicology. Students in the community nutrition option take additional course work in social and health-related sciences.

Career Alternatives. Both options are excellent preparation for professional or graduate training in medicine, public health, or other health sciences. The nutritional biochemistry option also provides preparation for technical work in nutrition in the animal, food, and pharmaceutical industries. The com-

munity nutrition option prepares students for jobs in administrative, teaching, or public health/public service positions. Students who complete the additional academic requirements for an internship in dietetics are also qualified for careers in dietetics following completion of an internship.

B.S. Major Requirements:

	UNITS
English Composition Requirement	0-8
See College requirement	
Preparatory Subject Matter	60-66
Anthropology 2 or Geography 2 or Sociology 3	4
Biological Sciences 1A, 1B, 1C	15
Chemistry 2A-2B-2C and 8A-8B, or 118A-118B, or 128A-128B and 129A.....	21-23
Mathematics 16A-16B.....	6
Physics 1A-1B (Nutritional Biochemistry option) or Economics 1A-1B (Community Nutrition option)	6-10
Sociology 46A or Psychology 41	4
Statistics 13 or Agricultural Management and Rangeland Resources 120.....	4
Breadth/General Education	6-24
Satisfaction of General Education requirement	
Depth Subject Matter	56
Animal Biology 102, 103	10
Biological Sciences 101.....	4
Food Science and Technology 100A and 100B	8
Neurobiology, Physiology, and Behavior 101, 101L	8
Nutritional Biochemistry option: Nutrition 111, 112, 116A, 116B, 117, 190... Additional nutrition	20 6
Community Nutrition option: Nutrition 111, 112, 116A, 116B, 118, 190, 192 (2 units)	20 6
Restricted Electives	20
Select one of the two options.	
Nutritional Biochemistry option: Biochemistry laboratory (Molecular and Cellular Biology 120L or an alternative selected upon consultation and approval of the faculty adviser).....	6
Additional courses in genetics, biochemistry, microbial biology, physiology, immunology, or toxicology, chosen from the following list in consultation with the faculty adviser	14
Animal Genetics 111, Animal Science 123, 124, Anthropology 153, Biological Sciences 104, Environmental Toxicology 101, 112A, 112B, 114A, 114B, 128, Exercise Science 101, 102, 110, Food Science and Technology 100C, 104, 123-123L, 128, Neurobiology, Physiology, and Behavior 112, 113, 114, 121, 130, 161, Molecular and Cellular Biology 121, 122, 123, 141, 150-150L, 161, 162, 163, Microbiology 102, 160, Medical Microbiology 107, 130, Psychology 108, Population, Health, and Reproduction 150, Pathology, Microbiology, and Immunology 102, 126, 127, 128.	
Community Nutrition option: Economics 100, 101, or Agricultural and Resource Economics 100A, 100B....	8-10
Additional courses chosen from the following list in consultation with the faculty adviser	10-12
African American and African Studies 100, Agricultural and Resource Economics 15, 120, 130, Agricultural Management and Rangeland Resources 150, Anthropology 101, 122, 126, 131, 133, Asian American Studies 100, Chicana/o Studies 110, 140, Communication 145, Community and Regional Development	

2, 151, 152, 153, 172, 174, 175, 176, Consumer Science 100, Economics 115A, 115B, 123, 130, 151A, 151B, 162, Education 110, 153, Environmental Science and Policy 126, 165, Environmental Toxicology 101, 128, Epidemiology and Preventive Medicine 101, 160, 180, Exercise Science 101, 102, 110, 113, 117, Food Science and Technology 104, 140, Geography 170, Human Development 100A, 100B, 100C, International Agricultural Development 10, 103, 110, 111, 195, Native American Studies 115, Political Science 105, Psychology 1, 108, 112, 130, 145, 160, 168, Sociology 145A, 145B, 154, 170.

Unrestricted Electives.....**6-38**
Total Units for the Degree.....**180**

Major Adviser. B. L. Lonnerdal.

Advising Center for the major is located in 1202E Meyer Hall (530-752-2512).

Dietetics Internship. To fulfill the academic requirements for an internship in Dietetics, choose the following courses from the categories in which they appear above: English 1 or 3, Psychology 1, Communication 1, Sociology 1 or 3 or Anthropology 2, Economics 1A or 1B, Nutrition 116AL-BL, 118. The following courses must be added (some of which may meet restricted elective requirements): Agricultural and Resource Economics 112; Community and Regional Development 173 or Education 110; Food Science and Technology 101A, 101B, 108; Food Service Management 120, 120L, 122; Food Science and Technology 104, 104L or Microbiology 102, 102L. Students intending to apply for admission to a dietetic internship should contact the Advising Office no later than the first quarter of the junior year for information on procedures.

Graduate Study. The Department of Nutrition offers programs of study and research leading to the M.S. and Ph.D. degrees in Nutrition. For information on graduate study contact the graduate adviser. See also the Graduate Studies chapter of this catalog.

Courses in Pathology, Microbiology, and Immunology (PMI)

Lower Division Course

99. Special Study for Undergraduates (1-5)
 Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

101. Comparative Hematology (2)
 Lecture—2 hours. Prerequisite: Biological Sciences 1A, 1B, Neurobiology, Physiology, and Behavior 101, Biological Sciences 102; or consent of instructor. An overview of the production, function and morphology of vertebrate blood cells, their alteration in health and disease, and the basic principles of laboratory

testing in hematology. For students interested in medical technology or animal health. Offered in alternate years.—(III.) Zinkl

126. Fundamentals of Immunology (3)
 Lecture—3 hours. Prerequisite: Biological Sciences 102 or the equivalent or consent of instructor. Overview of immunology including components of the immune system, initiation and regulation of the immune response, infection and immunity, hypersensitivity and immune dysfunction. Clinical immunologic techniques, immunodeficiency and vaccinology.—I. (I.) Stott

126L. Immunology Laboratory (2)
 Laboratory—6 hours. Prerequisite: course 126 or Medical Microbiology 107 or equivalent (may be taken concurrently). Laboratory procedures in clinical immunology. Laboratory animal immunization/bleeding. Quantitative and qualitative characterization of the immune response. Cells of the immune system.—I. (I.) Stott

127. Medical Microbiology (5)
 Lecture—3 hours; laboratory—5 hours. Prerequisite: general microbiology (Microbiology 102 and 102L), basic immunology (course 126 or Medical Microbiology 107) and consent of instructor. An introduction to the bacterial and mycotic pathogens of man and animals, with emphasis on pathogenic mechanisms and ecologic aspects of infectious disease.—III. (III.) LeFebvre

128. Biology of Animal Viruses (3)
 Lecture—3 hours. Prerequisite: Biological Sciences 102. Fundamental physical and chemical properties of animal viruses; methods of propagation, purification and assay. Mechanisms of viral replication and pathogenesis of viral infections in man and animals. Immunity to virus diseases and oncogenic properties of animal viruses.—I. (I.) Miller

198. Directed Group Study (1-5)
 Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
 (P/NP grading only.)

Graduate Courses

270. Advanced Immunology (3)
 Lecture—3 hours. Prerequisite: course 126 or Veterinary Medicine 450 or consent of instructor. Immunoglobulin structure and function, antigenic determinants, complement. Biology of lymphocytes; cell-mediated immune reactions, immunogenetics, hypersensitivity. Pathogenetic mechanisms in immunological diseases, immunological unresponsiveness, cancer immunology. Dynamics of infection and resistance. Methods in immunochemistry and immunobiology. Offered in alternate years.—III. Stott

275. Comparative Pathology of Organ Systems (4)
 Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: graduate standing. Correlative alterations in structure and function of organ response to injury presented in context of major disease syndromes. Emphasis on general responses to disease in both humans and animals. Introductory material on the mechanisms of viral, bacterial and parasite pathogenesis.—I. (I.) Wilson

283. Comparative Avian Anatomy and Pathology (1-3)

Lecture—3 hours. Prerequisite: anatomy section—upper division undergraduates, graduates or veterinary students and consent of instructor; pathology section—third-year and fourth-year veterinary students or graduate students and consent of instructor. Ten lectures outline gross/microscopic functional anatomy of a wide range of avian species as appropriate for students interested in avian biology. The remaining 20 lectures encompass comparative aspects of avian pathology and disease manifestations for students interested in avian diseases.—I. (I.) Lowenstine

285. Cellular Basis of Disease (3)
 Lecture—3 hours. Prerequisite: Biological Sciences 104, and either Veterinary Medicine 452 or Medical Pathology 210. Application of cell biology, biochem-

istry and molecular biology to the understanding of the basic nature of disease. Cellular injury and mechanisms of adaptation, host-defense and vascular responses, and cellular transformation. Offered in alternate years.—(II.) Mohr, Wu

287. Comparative Pathology of Laboratory Animals (3)
 Lecture—3 hours. Prerequisite: general and systemic pathology; third- or fourth-year veterinary student or graduate student, or consent of instructor. Recognition of lesions and understanding of pathogenesis of diseases of animals commonly kept in laboratory settings. Species covered include rodents, lagomorphs, amphibians, nonhuman primates. Genetically manipulated animals and novel animal models. Offered in alternate years.—(III.) Lowenstine

290. Seminar (1)
 Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Topics in pathology, microbiology or immunology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

291A. Seminar in Immunology (1)
 Seminar—1 hour. Prerequisite: course 126 or the equivalent. Students choose topic for each quarter. Individual or pairs of students choose a paper for all to read and present a seminar based on the subject of the paper. All students participate in discussion. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Gershwin

291B. Histopathology Conference (1)
 Discussion—1 hour. Prerequisite: Graduate standing or final year Veterinary student; consent of instructor. Discussion of selected cases based on records and slides. Defense of diagnosis. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Wilson

292A. Seminar in Animal Virology (1)
 Seminar—1 hour. A discussion of the current topics in animal virology. May be repeated for credit. (Same course as Microbiology 296.) (S/U grading only.)—I, II, III. (I, II, III.) Marthas, Miller

292B. Surgical Pathology Conference (1)
 Discussion—1 hour. Prerequisite: graduate standing or final-year veterinary student; consent of instructor. Diagnosis and discussion of current surgical pathology cases based on clinical records and microscopic study. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

293A. Seminar in Infectious Diseases (1)
 Seminar—1 hour. Prerequisite: current enrollment in health sciences professional school or graduate student in Biological Sciences. Discussion of current topics and cases of infectious diseases. May be repeated for credit. (S/U grading only.)

293B. Necropsy and Surgical Pathology (2-4)
 Laboratory—6-12 hours. Prerequisite: graduate standing; consent of instructor. Responsible diagnostic casework. Performance of necropsies, slide reading, and case reporting. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

296. Microbiological Diagnosis (2-5)
 Laboratory—5-14 hours; discussion—1 hour. Prerequisite: laboratory course in veterinary or medical microbiology or the equivalent; consent of Chief of Microbiology, VM Teaching Hospital. Laboratory diagnosis of infectious diseases involving case work at the VM Teaching Hospital. (S/U grading only.)

298. Group Study (1-5)
 Group study. (S/U grading only.)

299. Research (1-12)
 (S/U grading only.)

Professional Courses

418. Wildlife Health and Disease (2)
 Lecture—17 sessions; discussion—3 sessions. Prerequisite: upper division undergraduate or graduate or veterinary student. Ecology and epidemiology of disease in free-ranging wildlife. Offered in alternate years. (S/U grading only.)—II. Boyce

418L. Wildlife Health Laboratory (2)
 Lecture—9 sessions; laboratory—10 sessions; discussion—1 session. Prerequisite: Medicine and Epidemiology 294B, first-, second- or third-year

standing in the School of Veterinary Medicine; wildlife biology majors may be admitted with consent of instructor. Introduction to the concepts and technical skills necessary to capture wild animals and conduct field studies of wildlife health and disease. (S/U grading only.)—III. (III.) Ziccardi

475. Diagnostic Medicine of Domestic Animals (2)

Discussion—2 hours. Prerequisite: second-year standing in the School of Veterinary Medicine or consent of instructor. An integrated, problem oriented, approach to diagnosis of animal infectious disease through the disciplines of microbiology, clinical pathology and anatomic pathology. Participants organize assigned cases for presentation to the class in a grand rounds format with presentations by small groups composed of individuals who act as either a moderator, microbiologist, clinical pathologist or pathologist. (S/U grading only.)—III. (III.) Wilson, Zinki, Hirsch

476. Comparative Pathology of Non-Mammalian Vertebrates (2)

Lecture—20 sessions. Prerequisite: Medicine and Epidemiology 410, 487. Mechanisms of disease in non-mammalian vertebrates (fish, amphibians, reptiles, and birds) that differ from mammalian species including tissue response to injury, repair and neoplasia. Gross lesions of common diseases affecting non-mammalian vertebrates.—III. (III.) Terio

Pharmacology and Toxicology (A Graduate Group)

Isaac N. Pessah, Ph.D., Chairperson of the Group
Group Office, 4117 Meyer Hall (Department of Environmental Toxicology, 530-752-4516)

World Wide Web: <http://www.envtox.ucdavis.edu/ptx>

Faculty. The 60 faculty in the graduate group are from more than 20 academic departments and organized research units within the College of Agricultural and Environmental Sciences, the School of Medicine and the School of Veterinary Medicine.

Graduate Study. The program of study and research leading to the Ph.D. degree emphasizes an interdisciplinary approach to graduate student training. Many speciality areas in pharmacology and toxicology are represented in the research interests of the faculty. Graduate students can study areas of pharmacology and toxicology which emphasize the effects of chemicals in the environment, on human health, and on ecosystems. Molecular and analytical approaches are used to study reproductive, genetic and developmental, respiratory and neurological systems, as well as metabolic fate and pharmacokinetics. Career

opportunities include teaching in professional schools and hospitals, laboratory research in academia, government, industry, environmental control, and agricultural and drug regulatory agencies. For detailed information on the program, contact the Group Office, appropriate graduate adviser, or the group chairperson.

Graduate Advisers. A.R. Buckpitt (*Molecular Biosciences*), J.A. Last (*Pulmonary Medicine*), M.G. Miller (*Environmental Toxicology*), K. Pinkerton (*Institute of Toxicology and Environmental Health*), R. Wu (*Pulmonary Medicine*).

Courses in Pharmacology and Toxicology (PTX)

Graduate Courses

201. Principles of Pharmacology and Toxicology I (5)

Lecture—5 hours. Prerequisite: Biological Sciences 102 and Neurobiology, Physiology and Behavior 101. First of three courses presenting fundamental principles of pharmacology and toxicology. Introductory overview of basic concepts in pharmacology/toxicology, followed by in-depth blocks on fate processes of chemicals in the body, fate processes in tissue selective responses, selective toxicity employed therapeutically.—I. (I.)

202. Principles of Pharmacology and Toxicology II (4)

Lecture—4 hours. Prerequisite: course 201. The second of three courses presenting fundamental principles of pharmacology and toxicology. Principles of pharmacodynamics and mechanisms of drug/toxicant actions.—II. (II.)

203. Principles of Pharmacology and Toxicology (4)

Lecture—4 hours. Prerequisite: courses 201 and 202. Integrated physiological systems, cardiovascular and nervous systems and how drugs and toxicants act to perturb function.—III. (III.)

230. Advanced Topics in Pharmacology and Toxicology (1-3)

Lecture/discussion/seminar—1 hour each (course format can vary at option of instructor). Prerequisite: course 201 and consent of instructor. In-depth coverage of selected topics for graduate students in Pharmacology-Toxicology and related disciplines. Topics determined by instructor in charge for each quarter.—I, II, III. (I, II, III.)

290. Seminar (1)

Current topics in pharmacology and toxicology. (S/U grading only.)—I, II, III. (I, II, III.)

John F. Malcolm, Ph.D., Professor Emeritus

The Major Program

Philosophy addresses problems and questions that arise in all areas of human thought and experience and in all disciplines. Recurring questions about the nature of value, the good life, right conduct, knowledge, truth, language, mind, and reality are central to philosophical study. Philosophy also investigates the methodologies and assumptions of the major disciplines in the university in order to deepen our understanding of the sciences, of mathematics, art, literature, and history, and of religion and morality. It leads us to address issues about the nature of these subjects, about the methods of reasoning characteristic of them, and about the contributions they make to our understanding of ourselves and our world.

Philosophy contributes to the liberal education of its students. The department emphasizes an analytic approach to philosophical questions, which trains students to understand and evaluate arguments and to think and write precisely and clearly. These skills are of immense value in a variety of careers.

The Program. The Department of Philosophy offers courses in such areas as the theory of knowledge, metaphysics, logic, ethics, and political philosophy. In addition, upper division courses are offered in moral and political philosophy, and aesthetics, and in the philosophy of religion, of mind, of language, of mathematics, of law, and of the natural, biological, and social sciences.

The problems of philosophy have important roots in past. The history of philosophy is important not only as part of the heritage of educated persons, but also because it is relevant to contemporary issues. For these reasons, the department places great emphasis on the history of philosophy, providing courses on the major figures and traditions of western philosophy.

Career Alternatives. Students of philosophy learn to understand and evaluate arguments and to think and write precisely and clearly. These analytical skills are assets in any career. Many of our majors have pursued graduate study in philosophy and have become philosophers in their own right. Others have pursued academic careers in related disciplines in the humanities and social sciences. Philosophy majors are well prepared for law, business, or other professional schools and have found careers in computer programming, government service, teaching, the ministry, and social work.

A.B. Major Requirements:

UNITS

Preparatory Subject Matter	16
One course from any three of the following areas	12
(a) General Philosophy: Philosophy 1	
(b) Ancient Philosophy: Philosophy 21	
(c) Seventeenth Century Philosophy: Philosophy 22	
(d) Eighteenth Century Philosophy: Philosophy 23	
(e) Ethics: Philosophy 14, 15 or 24	
(f) Philosophy of Science: Philosophy 30, 31, 32 or 38	
(g) Metaphysics: Philosophy 101	
(h) Theory of Knowledge: Philosophy 102	
Philosophy 12	4
Depth Subject Matter	36
Upper division units in Philosophy	36
Note: Philosophy 101 and 102 may not be counted toward both preparatory and depth subject matter units.	
Total Units for the Major	52
Major Adviser. G.J. Matthey.	

Minor Program Requirements:

Students wishing to minor in Philosophy may choose a general minor or a minor specializing in logic. There are no specific courses required for the general minor, so students may create a program to suit their own interests. The range of choice in the logic specialization is limited to the courses listed.

UNITS

Philosophy—General	20
Twenty upper division units in philosophy. At most, 4 units may be lower division if the student has taken two lower division philosophy courses, one of which is drawn from the following: Philosophy 12, 21, 22, 23.	
Philosophy—Logic	20
Philosophy 12 or Mathematics 108	4
Philosophy 112	4
Select units from Philosophy 113, 131, 132, 133, 134, 135	12

Minor Adviser. G.J. Matthey.

Honors Program. The department offers an honors program, which gives qualifying majors the opportunity to work closely with faculty and graduate students.

Courses for Non-Majors. Students majoring in most disciplines in the university will find courses relevant to their educational or career goals. Philosophy 1 is the introductory course for non-majors. Philosophy 5 teaches critical thinking. The following courses are recommended:

(i) *pre-law*: 12, 14, 24, 102, 104, 112, 115, 116, 118 and, especially, 119; (ii) *pre-medical*: 14, 104, 108, 114, 115, 116; (iii) *business*: 14, 102, 112, 114, 115, 116, 117, 118, 119; (iv) *social policy*: 14, 24, 101, 102, 114, 115, 116, 117, 118, 119; (v) *social sciences*: 12, 31, 32, 101, 102, 103, 104, 109, 118, 131; (vi) *physical sciences*: 12, 31, 32, 101, 102, 104, 106, 107, 112, 131; (vii) *biological sciences*: 31, 32, 101, 102, 104, 108, 110; (viii) *humanities and the arts*: 14, 21 through 24, 101, 102, 103, 105, 114, 116, 118, 123, 160 through 175; (ix) *agricultural and environmental science and policy*: 5, 14, 24, 31, 104, 114, 115, 116, 118.

Department Activities. The Philosophy department sponsors a lecture-seminar series of well-known philosophers who present papers in their fields of expertise. The department also operates ongoing faculty and graduate student colloquia. Undergraduate students are welcome to attend and join these discussions. Information can be obtained in the department office.

Graduate Study. The Department of Philosophy offers programs of study leading to the M.A. and Ph.D. degrees. In association with the Program on Economy, Justice and Society, the department also offers the Ph.D. in Philosophy with designated emphasis in Economy, Justice and Society. Detailed information may be obtained by writing to the Graduate Adviser.

Graduate Adviser. G. Wilson.

Courses in Philosophy (PHI)

Lower Division Courses

1. Introduction to Philosophy (4)

Lecture—3 hours; discussion—1 hour. Problems of philosophy through major writings from various periods. Problems are drawn from political, aesthetic, religious, metaphysical, and epistemological concerns of philosophy. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.) King, Cummins, Caston, Wedin

5. Critical Reasoning (4)

Lecture—3 hours; discussion—1 hour. Criteria of good reasoning in everyday life and in science. Topics to be covered may include basic principles of deduction and induction; fallacies in reasoning; techniques and aids to reasoning; principles of scientific investigation; aids to clarity. Not open to students who have completed course 6. GE credit: Wrt.

11. Philosophy East and West (4)

Lecture—3 hours; discussion—1 hour. Comparative treatment of select theories in Eastern and Western philosophy, e.g., of self, God, being, knowledge, enlightenment. Topics selected from the following philosophies: Eastern—Buddhist, Confucian, Hindu, Taoist; and Western—Platonist, Aristotelian, Medieval Christian, Modern Rationalist/Empiricist, Kantian, Hegelian, Existentialist. GE credit: ArtHum, Div, Wrt.

12. Introduction to Symbolic Logic (4)

Lecture—3 hours; discussion—1 hour. Sentence logic syntax and semantics. Truth tables. Transcription between sentence logic and English. Logical equivalence. Validity. Proof techniques.—I. (I.) Teller

13. Minds, Brains, and Computers (4)

Lecture—3 hours; discussion—1 hour. Contemporary theories of the nature of the mind. The mind as a brain process and as a computer process. Ways in which neuroscience, artificial intelligence and psychology seek to understand the mind. Offered in alternate years. GE credit: SciEng or SocSci, Wrt.—(I.) Cummins

14. Ethical and Social Problems in Contemporary Society (4)

Lecture—3 hours; discussion—1 hour. Philosophical issues and positions involved in contemporary moral and social problems. Possible topics include civil disobedience and revolution, racial and sex discrimination, environment, population control, technology and human values, sexual morality, freedom in society. GE credit: ArtHum, Div, Wrt.—II. Rosati

15. Bioethics (4)

Lecture—3 hours; discussion—1 hour. Critical analysis of normative issues raised by contemporary medicine and biology. Possible topics include euthanasia, abortion, reproductive technologies, genetic engineering, practitioner/patient relationships, allocation of medical resources, experimentation on human subjects. GE credit: ArtHum, Wrt.—III. Dworkin

21. History of Philosophy: Ancient (4)

Lecture—3 hours; discussion—1 hour. Survey of Greek philosophy with special attention to the Pre-Socratics, Plato, and Aristotle. GE credit: ArtHum, Wrt.—I. Wedin

22N. History of Philosophy: Early Modern (4)

Lecture—3 hours; discussion—1 hour. Survey of major figures in philosophy of the seventeenth and eighteenth centuries, with emphasis on Descartes, Hume, and Kant. Not open for credit to students who have completed former course 22 or 23. GE credit: ArtHum, Wrt.—II. Cummins, Matthey

24. Introduction to Ethics and Political Philosophy (4)

Lecture—3 hours; discussion—1 hour. Reading of historical and contemporary works highlighting central problems in ethical theory and political philosophy. Why should we be moral? What is moral behavior? What is justice, both for the individual and for society? Is there a right of rebellion? GE credit: ArtHum, Wrt.

30. Introduction to Philosophy of Science (4)

Lecture—3 hours; discussion—1 hour. Basic problems in the philosophy of science, common to the physical, biological, and social sciences. Analysis of explanation, confirmation theory, observational and theoretical terms, the nature of theories, operationalism and behaviorism, realism, reduction. Not open for credit to students who have taken course 104. GE credit: ArtHum or SciEng, Wrt.—III. Teller

31. Appraising Scientific Reasoning (4)

Lecture—3 hours; discussion—1 hour. Introduction to scientific hypotheses and the kinds of reasoning used to justify such hypotheses. Emphasis on adequate justification, criteria, and strategies for distinguishing scientific from pseudoscientific theories. Concrete historical and contemporary cases. GE credit: ArtHum or SciEng.—Griesemer

32. Understanding Scientific Change (4)

Lecture—3 hours; discussion—1 hour. Concepts of scientific change in historical and philosophical perspective. Survey of models of growth of knowledge, 17th century to present. Relationship between logic

of theories and theory choice. Kuhn's revolution model. Examples from various sciences. GE credit: ArtHum or SciEng, Wrt.—Griesemer

38. Introduction to Philosophy of Biology (4)

Lecture—3 hours; discussion—1 hour. Non-technical introduction to philosophical, social, and scientific ideas, methods and technologies in contemporary biological fields such as evolution, genetics, molecular biology, ecology, behavior. Philosophical consideration of determinism, reductionism, explanation, theory, modeling, observation, experimentation. Evaluation of scientific explanations of human nature. GE credit: ArtHum, Wrt.—II. Griesemer

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

(Certain upper division courses may not be offered every year.)

101. Metaphysics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Theories of being. Such topics as reality, substance, universals, space, time, causality, becoming, body, experience, persons, freedom, and determinism. Views of the nature and method of metaphysics. Anti-metaphysical arguments. GE credit: ArtHum, Wrt.—I. (I.) Jubien

102. Theory of Knowledge (4)

Lecture—3 hours; extensive writing or discussion. Prerequisite: one course in philosophy. Analysis of the concept of knowledge. The relation between knowledge, belief and truth. Development of foundationalist, coherentist and externalist theories of justified belief. Examination of skepticism. GE credit: ArtHum, Wrt.—I. Matthey

103. Philosophy of Mind (4)

Lecture/discussion—3 hours; term paper. The relation between mind and body, our knowledge of other minds, and the explanation of mental acts. Discussion of such concepts as action, intention, and causation. GE credit: ArtHum, Wrt.—II. Cummins

105. Philosophy of Religion (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Logical, metaphysical, epistemological, and existential aspects of selected religious concepts and problems. GE credit: ArtHum, Wrt.

107. Philosophy of the Physical Sciences (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one philosophy course or a science background recommended. Nature of testability and confirmation of scientific hypotheses; nature of scientific laws, theories, explanations, and models. Problems of causality, determinism, induction, and probability; the structure of scientific revolutions. GE credit: ArtHum or SciEng, Wrt.—Teller

108. Philosophy of the Biological Sciences (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in biology or one course in philosophy. Scientific method in biology. Nature of biological theories, explanations, and models. Problems of evolutionary theory, ecology, genetics, and sociobiology. Science and human values. GE credit: ArtHum or SciEng, Wrt.—II. Griesemer

109. Philosophy of the Social Sciences (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy or a social science recommended. The nature of the social sciences, their subject matter and methods. Similarities to and differences from natural and life sciences. Predicting and explaining human behavior. Behaviorism. Reduction, holism, and individualism. Related moral issues. The social sciences and philosophy. GE credit: ArtHum or SocSci, Wrt.—Teller

111. Philosophy of Space and Time (4)

Lecture/discussion—3 hours; term paper. Prerequisite: one upper division philosophy course. Philosophical problems of space and time. The philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may

include the nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory.—I. Teller

112. Intermediate Symbolic Logic (4)

Lecture/discussion—4 hours. Prerequisite: course 12 or consent of instructor. Predicate logic syntax and semantics. Transcription between predicate logic and English. Proof techniques. Identity, functions, and definite descriptions. Introduction to concepts of metatheory.—II. Matthey

113. Advanced Logic (4)

Lecture/discussion—4 hours. Prerequisite: course 112 or Mathematics 108 or the equivalent. Topics will vary between metalogic of First-Order logic through the Completeness and Löwenheim-Skolem theorems; and Zermelo-Fraenkel set theory typically axiomatized as a First-Order theory. May be repeated once when subject area differs.—Jubien

114. History of Ethics (4)

Lecture/discussion—4 hours. Prerequisite: one philosophy course. Study of some classic texts from the history of philosophical writing on central problems of ethics, taking the form either of a survey or concentrated examination of selected historical figures. Readings from such philosophers as Aristotle, Butler, Hume, Kant, Mill. GE credit: ArtHum, Wrt.

115. Problems in Normative Ethics (4)

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy. Moral philosophy studied through examination of moral problems and the moral principles and common sense intuitions that bear on them. Problems discussed may include: animal rights, fetal rights, euthanasia, justice and health care, war, nuclear deterrence, world hunger, environmental protection. GE credit: ArtHum, Wrt.

116. Ethical Theories (4)

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy; one course in ethics recommended. Study of fundamental concepts and problems in ethical theory through an examination of classical and contemporary philosophical theories of ethics. Among the theories that may be discussed are utilitarianism, virtue theory, theories of natural rights, Kantian ethical theory, and contractarianism.

117. Foundations of Ethics (4)

Lecture/discussion—3 hours; term paper. Prerequisite: one of courses 114, 115, 116, 101, or 137. Advanced investigation of questions about the nature and foundations of morality. Among the topics that may be discussed are moral realism and anti-realism, cognitivism and non-cognitivism, types of relativism, moral skepticism, normative language and normative belief.—III. Rosati

118. Political Philosophy (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy. Intensive examination of some central concepts of political thought such as the state, sovereignty, rights, obligation, freedom, law, authority, and responsibility. GE credit: SocSci, Div, Wrt.—Rosati

119. Philosophy of Law (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy or consent of instructor. Philosophical theories of the nature of law, legal obligation, the relation of law and morals. Problems for law involving liberty and justice: freedom of expression, privacy, rights, discrimination and fairness, responsibility, and punishment. GE credit: SocSci, Div, Wrt.—III. Rosati

121. Topics in Metaphysics (4)

Lecture/discussion—4 hours. Prerequisite: course 101. Examination of up to three topics in metaphysics, e.g., fatalism; necessity; identity; ontological categories; minds, bodies, and persons; space and time; freedom and determinism.—II. Jubien

122. Topics in Theory of Knowledge (4)

Lecture/discussion—4 hours. Prerequisite: course 102. Examination of one or more topics in theory of knowledge, such as belief, skepticism, justification. May be repeated for credit when topic differs.—III. Matthey

123. Aesthetics (4)

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy recommended. Nature of art, of artistic creation, of the work of art, and of aesthetic experience; nature and validity of criticism; relations of art to its environment. GE credit: ArtHum, Wrt.—Wilson

125. Theory of Action (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: one course in Philosophy. Survey of prominent contemporary approaches to leading problems in action theory. Problems include issues about the nature of intentional action and the conceptual character of explanations of actions in terms of the agent's reasons. Offered in alternate years. GE credit: ArtHum, Wrt.—II. Wilson

131. Philosophy of Logic and Mathematics (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 12 or one course for credit in mathematics. Nature of formal systems and mathematical theories. Selected topics include logical and semantical paradoxes; foundations of mathematics; set theory, type theory, and intuitionistic theory; philosophy of geometry; philosophical implications of Gödel's incompleteness results.—Jubien

133. Topics in Mathematical Logic (4)

Lecture/discussion—4 hours. Prerequisite: course 113 or Mathematics 125 or consent of instructor. Topics to be taken typically from the following: metalogic and model theory; axiomatic set theory and independence results; Gödel's incompleteness theorems; computability and recursion theory.—III. Jubien

134. Modal Logic (4)

Lecture/discussion—4 hours. Prerequisite: course 112 or Mathematics 108 or the equivalent. Survey of the main systems of modal logic, including Lewis systems S4 and S5. "Possible worlds" semantics and formal proofs. Applications to epistemology, ethics, or temporality.—Matthey

135. Alternative Logics (4)

Lecture/discussion—4 hours. Prerequisite: course 12, Mathematics 108, or the equivalent. Alternatives to standard truth-functional logic, including many-valued logics, intuitionist logics, relevance logics, and non-monotonic logics.—Matthey

137. Philosophy of Language (4)

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy or linguistics. Discussion of philosophical theories of how languages work and philosophical problems arising from thinking about language. Emphasis on modern (1879–present) philosophical views on language.—Wilson, King

143. Hellenistic and Neo-Platonic Philosophy (4)

Lecture/discussion—4 hours. Prerequisite: course 21. Greek philosophy after Aristotle, including Epicureanism, Stoicism, Skepticism and Neo-Platonism. GE: ArtHum, Wrt.—I. Caston

145. Medieval Philosophy (4)

Lecture/discussion—3 hours; written reports. Prerequisite: course 21. Study of major philosophers in the medieval period. GE credit: ArtHum, Wrt.—Caston

151. Philosophy of the Nineteenth Century (4)

Lecture/discussion—4 hours. Prerequisite: courses 21, 22, or 23 recommended. Idealism of Hegel, the pessimism of Schopenhauer, Marxism, the irrationalism of Kierkegaard, Nietzsche and Dostoevsky. GE credit: ArtHum, Wrt.—Matthey

156. Contemporary Analytic Philosophy (4)

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy. Consideration of central issues such as meaning/reference, analytic/synthetic, reductionism, formal and ordinary language, essential properties, ontological commitment, possible world semantics; influential works by philosophers such as Russell, Moore, Wittgenstein, Austin, Carnap, Quine, Putnam, Kripke, van Fraassen.—I. King

157. Twentieth Century European Philosophy (4)

Lecture/discussion—4 hours. Prerequisite: one course in Philosophy. Survey of the main movements

in twentieth century philosophy on the European continent, including phenomenology, existentialism, structuralism and post-modernism. Philosophers covered include Husserl, Heidegger, Sartre, Levi-Strauss, Foucault. Offered in alternate years. GE credit: ArtHum, Wrt.—Matthey

160. Pre-Socratics (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Study of the metaphysical views of such pre-Socratic figures as the Milesians, the Pythagoreans, Heraclitus, Parmenides, Empedocles, Anaxagoras, and the atomists.—II. Wedin

161. Plato (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Examines Plato's most important contributions in metaphysics, epistemology, psychology, cosmology, ethics and political philosophy. Dialogues will be selected from Plato's middle and later writings. Offered in alternate years.—III. Wedin

162. Aristotle (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. An overview of Aristotle's most central and influential writings. Topics selected from fields such as metaphysics, physics, ethics, logic, and psychology. Offered in alternate years.—I. Wedin, Caston

168. Descartes (4)

Lecture/discussion—4 hours. Prerequisite: course 22. Descartes' metaphysics, theory of knowledge, and philosophy of science. Readings from *Meditations on First Philosophy* and *Principles of Philosophy*. Offered in alternate years.—Matthey

170. Leibniz (4)

Lecture/discussion—4 hours. Prerequisite: course 22. Survey of the philosophical writings of G. W. Leibniz. Topics include Leibniz's logic, the existence of God, human freedom, substance, and the relation between science and metaphysics. Offered in alternate years.—Matthey

172. Locke and Berkeley (4)

Lecture—4 hours. Prerequisite: course 23. Examination of Locke's Essay Concerning Human Understanding and Berkeley's Principles of Human Knowledge and Three Dialogues. Topics include abstract ideas, existence of matter, primary and secondary qualities, the existence of God, and the nature of scientific knowledge.—Cummins

174. Hume (4)

Lecture/discussion—4 hours. Prerequisite: course 23. Examination of David Hume's *Treatise of Human Nature* and related writings. Topics include space and time, necessity, induction, skepticism concerning the external world and concerning personal identity. Offered in alternate years.—Matthey

175. Kant (4)

Lecture/discussion—4 hours. Prerequisite: course 23. Intensive examination of the *Critique of Pure Reason*. Topics include the extent and limitations of human cognition, space and time, substance and causality, freedom and determinism, and the existence of God. Offered in alternate years.—III. Matthey

190. Special Topics in the History of Philosophy (4)

Lecture—3 hours; term paper. Intensive study of special topic, problem, or authors in the history of philosophy. May be repeated for credit.

194HA-194HB. Honors Research Project (4-4)

Tutoring—3 hours; term paper. Prerequisite: consent of instructor; open to students who are members of the honors program in Philosophy. Completion of honors research project under direction of an instructor. Consult departmental major adviser for list of instructors available in a given quarter.

198. Directed Group Study (1-5)
(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses**201. Metaphysics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics vary from quarter to quarter and may include the following: What are things? Do names refer to things? If so, how? Do things have essential properties? What is the nature of necessity? May be repeated for credit when topic differs and with consent of instructor.—I. Jubien

202. Theory of Knowledge (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Topics vary from quarter to quarter. Sample topics include belief, skepticism, justification, externalism, naturalized epistemology. May be repeated for credit with consent of instructor. Not offered every year.—Mattey

203. Philosophy of Mind (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the philosophy of mind such as the mind-body problem, mental representation, consciousness, intentionality. May be repeated for credit with consent of instructor. Offered in alternate years.—III. Cummins

203P. Philosophy of Mind Practicum (4)

Practicum—12 hours. Prerequisite: consent of instructor. Specific research conducted and prepared for publication by advanced students in a team setting. Topics include knowledge representation and learning in neural networks, the nature and formal properties of mental representation. May be repeated for credit when topic differs and with consent of instructor. (S/U grading only.)—Cummins

207. Philosophy of Physics (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing in Philosophy or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of physics, such as foundations of spacetime theories, the interpretation of quantum mechanics, or foundations of statistical mechanics. May be repeated for credit when topic differs and with consent of instructor. Offered in alternate years.—Teller

208. Philosophy of Biology (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of biology, such as foundations of evolutionary theories, reductionism in biology, sociobiology and cultural evolution. May be repeated for credit when topic differs and with consent of instructor. Offered in alternate years.—III. Griesemer

210. Philosophy of Science (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Treatment of one or more general topics of current interest in philosophy of science. Topics may include scientific explanation, theories of confirmation, scientific realism, reduction in physics and biology. May be repeated for credit when topic differs and with consent of instructor. Offered in alternate years.—Teller

212. Philosophy of Logic and Mathematics (4)

Seminar—3 hours; term paper. Prerequisite: course 112 or 113 or Mathematics 108 or 125 or the equivalent. Philosophical issues in logic and math. Topics may include nature of logical and mathematical truth or knowledge, correctness of logical systems, foundations of mathematics, metaphysical and epistemological presuppositions, applications to philosophical problems and formalization of philosophical theories. May be repeated for credit when topic differs and with consent of instructor. Offered in alternate years.—King

214. Ethics (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Topics may include morality and motivation, objectivity in ethics, the relationship between the factual and the moral. Topics vary from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor. Offered in alternate years.—II. Dworkin, Rosati

217. Political Philosophy (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced studies in political philosophy. Topics vary but may include distributive justice, enforcement of morality by the state, equality, obligation to obey the law, social contract theory. May be repeated for credit when topic differs and with consent of instructor. Offered in alternate years.—I. Dworkin

237. Philosophy of Language (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of philosophical issues raised by language, such as the nature of semantic content, proper semantics for verbs of propositional attitude, feasibility and limitations of formal semantics and pragmatics for natural languages. May be repeated for credit when topic differs and with consent of instructor. Offered in alternate years.—King

261. Plato (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Plato's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor. Offered in alternate years.—Wedin

262. Aristotle (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Aristotle's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor. Offered in alternate years.—Wedin

275. Kant (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Intensive study of a topic in the philosophy of Kant, in such areas as metaphysics, theory of knowledge, ethics. May be repeated for credit with consent of instructor. Not offered every year.—Mattey

290. History of Philosophy (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the history of philosophy. Topics vary according to instructor from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor. Not offered every year.—I. Wedin, Mattey

298. Group Study (1-5)**299. Research (1-12)**

(S/U grading only.)

Professional Course**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Program of Study

The Program in Physical Education facilitates the development and offering of non-major courses related to physical activities and education, fitness and health, athletic training, and organized sport. The Program is available as part of a student's general educational experience to enhance and broaden the understanding and experience of physical activity in the maintenance of lifetime health and fitness.

The basic activities series includes Physical Education 1, fitness, lifetime, and sports skills, Physical Education 6 for students participating in intercollegiate athletics, and Physical Education 7 for students interested in a career in teaching/coaching or officiating sports.

Additional lower division courses include those in special skill areas, such as life-saving and water safety, scuba diving, and health and fitness. Upper division courses include advanced skills in scuba diving and a series of courses that meet the mandated requirements for students pursuing teacher preparation and certification.

Teaching Credential Subject Representative. S. Williams. See also the section on the Teacher Education Program.

Class and Recreational Use of Facilities. The incidental fee payable by all students at the time of registration entitles students to the use of the gymnasium, showers, towels, lockers, tennis courts, and athletic fields. Certain equipment for games and sports is available for exercise and recreation, either with or without instruction. Lockers must be turned in on the last day of class, i.e., before the final examination period. Fines are imposed for each formal transaction necessitated by failure of the student to comply with the regulations of the program.

Courses in Physical Education (PHE)**Lower Division Courses****1. Physical Activities (0.5)**

Laboratory—2 hours. Sections in: (a) sports skills, rules and strategy; (b) physical fitness and personal

health; (c) recreation; (d) aerobic dance. May be repeated along with course 6 for a combined total of 6 units. (P/NP grading only.)—I, II, III. (I, II, III.)

2. Principles of Basic Exercise Conditioning (2)

Lecture—1 hour; laboratory—2 hours. A survey of the basic concepts, facts, and accepted approaches current in selected exercise training regimens, e.g., theory of aerobic function and capacity, exercise and diet in weight control, muscular strength development and maintenance, and limitations of environment, age, and gender on fitness levels. (P/NP grading only.)—I. (I.)

6. Preparation and Participation in ICA Competition (1)

Discussion/laboratory—10-20 hours. Prerequisite: consent of instructor (coach). Preparation and participation in Intercollegiate Athletics. Development of fundamental and advanced individual and team skills. In-depth knowledge of rules and strategy. Advanced sports competition and Conference and NCAA levels. May be repeated along with course 1 for a combined total of 6 units. (P/NP grading only.)—I, II, III. (I, II, III.)

7. Professional Physical Education Activities: Men and Women (1)

Lecture—1 hour; or laboratory—2 hours. Fundamental skills for: (a) coaching competitive athletics; (b) classroom teaching and coaching, and (c) classroom teaching and officiating. May be repeated for a total of six units.—I, II. (I, II.)

15. Administration of Intramural Sports (2)

Lecture—2 hours. Planning and administering intramural sports programs at the high school and college level.—I. (I.) Colberg

25. Theory of Lifesaving and Water Safety (2)

Lecture—1 hour; laboratory—2 hours. Prerequisite: sound physical condition, and no physical handicap that would render student unable to perform the required skills and ability to pass preliminary swimming test. Provides the student with the knowledge, organizational procedures, and skill development necessary to provide for water safety and save his/her own life or the life of another in an aquatic emergency. (American Red Cross Advanced Lifesaving Certificate awarded upon successful completion of necessary requirements.)—I, II, III. (I, II, III.) Jahn

27. Training Course for Water Safety Instructors (2)

Lecture—1 hour; laboratory—2 hours. Prerequisite: advanced swimming (course 1) or consent of instructor; course 5 and current Advanced Life-Saving Certificate. Theoretical knowledge and practical experience necessary for the organization and teaching of swimming and lifesaving classes. (American Red Cross Water Safety Instructor's Certificate awarded upon successful completion of necessary requirements.)—III. (III.) Jahn

29. Basic Scuba (2)

Lecture—2 hours; laboratory—2 hours. Prerequisite: good physical condition, ability to pass preliminary swimming test. Introduction to basic knowledge required for scuba diving, function and maintenance of equipment, physics and physiology of diving, diver first aid and CPR, oceanography and marine life, and underwater communication. Pool and open water sessions available for certification. (P/NP grading only.)—I, III. (I, III.) Fastenau

40. Drugs and Society (2)

Lecture—2 hours; fieldwork—2 hours total; film-viewing—5 hours total. Pharmacology, methods of use, and effects of use of psychoactive and performance-enhancing drugs. Historical overview of drug use. Identification of behavior of "at-risk" and "user" populations. (P/NP grading only.)—I, III. (I, III.) Campbell

44. Principles of Healthful Living (2)

Lecture—2 hours. Application of scientific and empirical knowledge to personal, family, and community health problems. (P/NP grading only.)—I, II, III. (I, II, III.)

92. Physical Education Internship (1-5)

Internship—3-15 hours; written project proposal and evaluation. Prerequisite: consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Biology majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for credit once but no internship units will be counted toward Exercise Biology major. (P/NP grading only.)

97T. Tutoring in Physical Education (1-5)

Tutorial—1-5 hours. Prerequisite: lower division standing and consent of Program Director. Tutoring of students in lower division physical activity courses. Weekly meetings with instructor in charge of courses. Written reports on methods and materials required. May be repeated once for credit. (P/NP grading only.)

97TC. Tutoring in the Community (1-5)

Tutorial—2-15 hours; discussion—1 hour. Prerequisite: lower division standing and consent of Program Director. Tutoring in the community in physical activity related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated once for credit. (P/NP grading only.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor and Program Director. (P/NP grading only.)

Upper Division Courses

100. Field Experience in Teaching Physical Education (2)

Discussion—1 hour; fieldwork—4 hours. Prerequisite: upper division standing and appropriate course 1 or 7. Tutoring or teacher's aide in physical education activities, including athletic coaching, in public schools under the guidance of a regular teacher with supervision by a departmental faculty person. May be repeated once for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

128A. Intermediate Scuba Diving (4)

Lecture—3 hours; laboratory—3 hours; fieldwork—2 hours. Prerequisite: course 29 and consent of instructor. Lectures and practice in diver safety, rescue, accident management and patient care. Pool and open water sessions required for certification. (P/NP grading only.)—II. (II.) Fastenau

128B. Research Diving Techniques (4)

Lecture—3 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: course 128A; consent of instructor. Lectures and application on search and light salvage, night diving, research techniques, cold-water, low visibility diving, blue water, deep and altitude diving. Pool and open water sessions required for certification. (P/NP grading only.)—III. (III.) Fastenau

132. First Aid Leadership and Accident Management (3)

Lecture—2 hours; students assist in teaching course 5—1 hour to be arranged. Prerequisite: course 5 or American Red Cross Advanced First Aid Card. Administration, organization and supervision of safety and first aid programs in school and community sports, recreation and all types of group activities. The study and practice of first aid leadership skills. (The American Red Cross First Aid Instructor Card will be awarded upon successful completion of the course.)—I, II, III. (I, II, III.)

142. Physical Education in the Public Schools (3)

Lecture—3 hours. Analysis and study of the principles and methods basic to teaching physical education at the elementary and secondary levels.—II. (II.) S. Williams

143. Coaching Effectiveness (3)

Lecture—3 hours. Prerequisite: upper division standing; 3 units of courses 1 and 6 combined. Synthesis and application of basic components of sport psychology, sport pedagogy, and sport physiology and basic management and administration of athletics in public high schools. (P/NP grading only.)—II. (II.) Bronzan, King

144. Principles of Health Education (2)

Lecture—2 hours. Prerequisite: course 44 and upper division standing or consent of instructor. Principles of teaching health education in the public schools. (P/NP grading only.)—II. (II.)

145. Administration of Health/Fitness Programs (2)

Lecture—2 hours. Principles of organizing and directing health/fitness programs. Includes selection and training of personnel, methods of evaluating personnel and programs, and elements of planning.—III. (III.)

150. Recreation in the Community (3)

Lecture—2 hours; discussion—1 hour; two Saturday field trips—8 hours. The nature and scope of community recreation programs in California emphasizing low income, highly populated areas, and poor rural communities. Offered in alternate years.—(III.) Jahn

192. Physical Education Internship (1-12)

Internship—3-36 hours; written project proposal and evaluation. Prerequisite: upper division standing and consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Science majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for a total of 12 units (including course 92) but no internship units will be counted toward Exercise Science major. (P/NP grading only.)—I, II, III. (I, II, III.)

197T. Tutoring in Physical Education (1-5)

Tutorial—1-5 hours. Prerequisite: consent of chairperson. Tutoring of students in lower division physical activity courses. Written reports on methods and materials required. May be repeated once for credit. (P/NP grading only.)

197TC. Tutoring in the Community (1-5)

Tutorial—2-15 hours; discussion—1 hour. Prerequisite: upper division standing and consent of Department Chairperson. Tutoring in the community in physical education related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated once for credit. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Professional Courses

300. The Elementary Physical Education Program (2)

Lecture—1 hour; laboratory—2 hours; field trips to selected programs. Prerequisite: senior standing or credential student. Introduction to principles, theories, material, and practices of elementary school physical education program.—III. (III.) Goldbar

380. Methods of Teaching Physical Education (3)

Lecture—1 hour; laboratory—6 hours. Prerequisite: course 142 and six units of course 7; or consent of instructor. The methods of teaching group and individual activities for grades K-12; program planning, class management, organization, and evaluation. (P/NP grading only.)—III. (III.) S. Williams

The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe tick. Information learned from high-energy particle accelerators and nuclear reactors teaches us not only what holds

the nucleus and the atom together but also why stars shine and how radiation therapy fights cancer.

The Program. The Department of Physics offers three degree programs: the Bachelor of Arts in Physics, and the Bachelor of Science in Physics and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market on completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

Career Alternatives. Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

Physics

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	38
Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE	16
Mathematics 21A, 21B, 21C, 21D, 22A, 22B	22
Depth Subject Matter	41
Physics 104A, 105A, 105B, 110A, 110B, 112, 115A, 122	32
At least one course from 127, 140A, 129A, or 130A	4
At least one additional fixed-unit upper division Physics course excluding 137 and 160	4
Physics 105AL (1 unit) or an upper division computation course (e.g., Mathematics 128A or Applied Science Engineering 115)	1-3
Total Units for the Major	79

B.S. Major Requirements:

	UNITS
Preparatory Subject Matter	47
Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE	16
Mathematics 21A, 21B, 21C, 21D, 22A, 22B	22
Computer Science Engineering 30 (or equivalent programming course)	4
Chemistry 2A or 2HA (2B-2C or 2HB-2HC highly recommended)	5
Depth Subject Matter	59
Physics 104A, 105A, 105B, 110A, 110B, 110C, 112, 115A, 115B, 122	40
Two courses from Physics 140A, 127 and 129 or 130A. One additional course from 140A, 140B, 129A, 129B, 130A or 130B	12
At least two additional upper division Physics courses excluding 137 and 160. With prior departmental approval, one 3- or 4-unit course from mathematics, engineering, or natural science may be used to meet this requirement. May include only one course from 194H, 195, 198, 199	7-8

Physics 105AL (1 unit) or an upper division computation course (e.g., Mathematics 128A or Applied Science Engineering 115)

Total Units for the Major

Applied Physics

B.S. Major Requirements:

	UNITS
Preparatory Subject Matter	47
Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE	16
Mathematics 21A, 21B, 21C, 21D, 22A, 22B	22
Computer Science Engineering 30 (or equivalent programming course)	4
Chemistry 2A or 2HA (2B-2C or 2HB-2HC highly recommended)	5
Depth Subject Matter	59
Physics 104A, 105A, 105B, 110A, 110B, 112, 115A, 116A, 116B, 122	40
At least five courses from approved lists within one of the following concentrations chosen in consultation with a major adviser	19-20
Materials science, quantum optics, chemical physics, atmospheric physics, computational physics, geophysics, physical oceanography. (Lists of approved courses in each concentration with representative programs are available from the Physics Department.)	
Physics 105AL (1 unit) or an upper division computation course (e.g., Mathematics 128A or Applied Science Engineering 115)	0-1
Total Units for the Major	106

Recommended Electives

Astronomy: Astronomy 2
Computer and numerical analysis: Mathematics 128A or Applied Science Engineering 115
Statistics: Statistics 131A
Advanced mathematics: Mathematics 108, 118A-118B, 119A-119B, 121A-121B, 127A-127B-127C, 185A, 185B

Program Variance. Courses from other departments may be submitted for courses in the depth subject matter requirements by obtaining written permission from the Undergraduate Curriculum Committee Chairperson, as approved by the Department.

Major Advisers. Contact Departmental Undergraduate Majors Office, 225 Physics/Geology Building, for adviser assignment.

Minor Program Requirements:

Two distinct minor emphases are offered, all requiring prerequisites equivalent to Mathematics 21A-21B-21C-21D and 22A-22B and Physics 9A-9B-9C-9D. Students considering the possibility of earning a Physics minor should consult with a Physics major adviser before beginning work in one of these minor programs.

	UNITS
Classical Physics emphasis	24
Physics 104A, 105A, 105C, 108, 108L, 110A-110B,	24
(If the fall quarter courses, 104A, 105A, 110A, are taken in different years, 104A and 105A should be taken in the first year; course 105C does not require 105B.)	
Quantum Physics emphasis	24
Physics 104A, 105A, 105B, 112, 115A-115B	24
(Physics 104A and 105A-105B must precede 115A-115B. Physics 110A recommended.)	

Graduate Study. The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees and the Ph.D. degree with an

Applied Physics Research Specialty. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis 95616.

Astronomy. There is no major program leading to a degree in Astronomy. Introductory courses are offered in general astronomy and astrophysics. Students who wish to use the observatory or the portable telescopes may do so through the Astronomy Club. The graduate program in physics provides research opportunities in observational astrophysics.

Courses in Astronomy (AST)

Lower Division Courses

2. Introduction to Modern Astronomy and Astrophysics (4)

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: good facility in high school physics and mathematics (algebra and trigonometry). Description and interpretation of astronomical phenomena using the laws of modern physics. Modern astronomical instrumentation. Gravitation, relativity, electromagnetic radiation, atomic and nuclear processes in relation to the structure and evolution of stars, the solar system, galaxies, and the Universe. Not open to students who have received credit for course 10.—I, III. (I, III.) Becker, Erickson

10. General Astronomy (4)

Lecture—3 hours; laboratory/discussion—2 hours. A non-mathematical description of modern astronomy with emphasis on the structure and evolution of stars, galaxies, and the Universe. The Sun and the solar system. Optional topics include pulsars, black holes, quasars, and extra-terrestrial communications. Not open to students who have received credit for course 2 or any physics course (except 10, 137, 160). GE credit: SciEng, Wrt.—II, III. (II, III.) Albrecht, Becker, Erickson

Courses in Physics (PHY)

Physics 10 is primarily a concept-oriented one-quarter lecture/discussion course requiring relatively little mathematical background.

Physics 1 is a two-quarter sequence requiring some mathematics (trigonometry). Either 1A alone or both quarters may be taken. The sequence is not intended to satisfy entrance requirements of a year of physics for professional schools, but will satisfy requirements of 3 or 6 units of physics.

Physics 7 is a one-year (three-quarter) introductory physics course with laboratory intended for students majoring in the biological sciences. It has a calculus prerequisite. If you don't need a full year of introductory physics, you should take one or two quarters of Physics 1 instead. Read the following information carefully if you are using Physics 7 to complete an introductory course you have already begun.

The sequence of material in Physics 7 is different from that in most traditionally taught introductory physics courses. Physics 7B is most like the first quarter or semester of traditionally taught courses which treat classical mechanics. Physics 7C is most like the last quarter or semester which, in traditionally taught courses, treats optics, electricity and magnetism, and modern physics. The content and sequence of Physics 7A is unlike that of most other traditionally taught courses.

If you have completed one introductory quarter or semester of a traditionally taught physics course and want to continue with Physics 7, you should first take (and will receive full credit for) Physics 7A. Then, either skip 7B, but self-study the last three weeks of material, or take 7B and receive reduced credit. Next, take 7C for full credit.

If you have taken two quarters of a year-long introductory physics course and have not had extensive

work in optics, electricity and magnetism, and modern physics, you should take Physics 7C. In no case should you take Physics 7B without first taking Physics 7A. All other situations should be discussed directly with a Physics 7 instructor.

Students not intending to take the entire sequence should take Physics 1.

Physics 9 is a four-quarter sequence using calculus throughout and including laboratory work as an integral part. The course is primarily for students in the physical sciences and engineering.

Physics 9H is a five-quarter honors physics sequence, which may be taken instead of Physics 9. It is intended primarily for first-year students with a strong interest in physics and with advanced placement in mathematics. In course requirements and prerequisites, Physics 9HA–9HE can be substituted for Physics 9A–9D.

Lower Division Courses

1A. Principles of Physics (3)

Lecture—3 hours. Prerequisite: trigonometry or consent of instructor. Mechanics. Introduction to general principles and analytical methods used in physics with emphasis on applications in applied agricultural and biological sciences and in physical education. Not open to students who have received credit for course 5A, 7B, or 9A.—I. (I.)

1B. Principles of Physics (3)

Lecture—3 hours. Prerequisite: course 1A or 9A. Continuation of course 1A. Heat, optics, electricity, modern physics. Not open for credit to students who have received credit for course 5B, 5C, 7A, 7B, 7C, 9B, 9C, or 9D.—II. (II.)

7A. General Physics (4)

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: Mathematics 16B (may be taken concurrently). Introduction to general principles and analytical methods used in physics for students majoring in a biological science. Only two units of credit allowed to students who have completed course 9B, 5B, or 1B.—I, II, III. (I, II, III.)

7B. General Physics (4)

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: course 7A. Continuation of course 7A. Only two units of credit allowed to students who have completed course 9A, 5A, or 1A.—I, II, III. (I, II, III.)

7C. General Physics (4)

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: course 7B. Continuation of course 7B. Only two units of credit allowed to students who have completed course 9C or 5C.—I, II, III. (I, II, III.)

9A. Classical Physics (4)

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: Mathematics 21B. Mechanics. Introduction to general principles and analytical methods used in physics for physical science and engineering majors. Only two units of credit allowed for students who have completed course 1A or 7B. Not open for credit to students who have completed course 9HA.—III. (III.)

9B. Classical Physics (4)

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: course 9A, Mathematics 21C, 21D (may be taken concurrently). Continuation of course 9A. Fluid mechanics, thermodynamics, wave phenomena, optics. Only 2 units of credit to students who have completed course 7A. Not open for credit to students who have completed course 9HB, 9HC, or Engineering 105.—I. (I.)

9C. Classical Physics (4)

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: course 9B, Mathematics 21D, 22A (may be taken concurrently). Electricity and magnetism including circuits and Maxwell's equations. Only three units of credit allowed to students who have completed course 7C. Not open for credit to students who have completed course 9HD.—II. (II.)

9D. Modern Physics (4)

Lecture—3 hours; discussion—1.5 hours. Prerequisite: course 9C and Mathematics 22A; Mathematics

22B recommended (may be taken concurrently). Introduction to physics concepts developed since 1900. Special relativity, quantum mechanics, atoms, molecules, condensed matter, nuclear and particle physics. Not open for credit to students who have completed course 9HB, 9HC, or 9HE.—III. (III.)

9HA. Honors Physics (4)

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: Mathematics 21B (may be taken concurrently) or consent of instructor; high school physics highly recommended. Classical mechanics. Same material as course 9A in greater depth. For students in physical sciences, mathematics and engineering. Only two units of credit allowed to students who have completed course 7B. Not open for credit to students who have completed course 9A.—I. (I.)

9HB. Honors Physics (4)

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HA or 9A and Mathematics 21C (may be taken concurrently). Special relativity, thermal physics. Continuation of course 9HA. Only two units of credit allowed to students who have completed course 7A. Not open for credit to students who have completed course 9B or 9D.—II. (II.)

9HC. Honors Physics (4)

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HB and Mathematics 21D (may be taken concurrently). Waves, sound, optics, quantum physics. Continuation of course 9HB. Only two units of credit allowed to students who have completed course 7C. Not open for credit to students who have completed course 9B or 9D.—III. (III.)

9HD. Honors Physics (4)

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HC and Mathematics 21D. Electricity and magnetism. Continuation of course 9HC. Same material as in course 9C but in greater depth. Only two units of credit allowed to students who have completed course 7C. Not open for credit to students who have completed course 9C.—I. (I.)

9HE. Honors Physics (4)

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HD and Mathematics 21D (may be taken concurrently). Applications of quantum mechanics. Not open for credit to students who have completed course 9D.—II. (II.)

10. Topics in Physics for Nonscientists (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: high school algebra. Emphasis varies: survey of basic principles or a deeper exploration of some particular branch. Past topics included black holes, space time, and relativity; physics of music; history and philosophy; energy and the environment; and natural phenomena. Check with the department office for the current emphasis. No units of credit allowed if taken after any other physics course. GE credit: SciEng, Wrt.—I, II. (I, II.)

49. Supplementary Work in Lower Division Physics (1-3)

Students with partial credit in lower division physics courses may, with consent of instructor, complete the credit under this heading. May be repeated for credit.—I, II, III. (I, II, III.)

90X. Lower Division Seminar (2)

Seminar—2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Physics through shared readings, discussions, written assignments, or special activities such as laboratory work. May be repeated for credit. Limited enrollment.

98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

104A. Introductory Methods of Mathematical Physics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B with grade C- or better or consent of

instructor. Introduction to the mathematics used in upper-division physics courses, including applications of vector spaces, Fourier analysis, partial differential equations.—I. (I.)

104B. Computational Methods of Mathematical Physics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 104A with grade C- or better and course 105AL or consent of instructor. Introduction to the use of computational techniques to solve the mathematical problems that arise in advanced physics courses, complementing the analytical approaches emphasized in course 104A.—II. (II.)

104C. Intermediate Methods of Mathematical Physics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 104A with grade C- or better or consent of instructor. Applications of complex analysis, conditional probability, integral transformations and other advanced topics.—III. (III.)

105A-105B. Analytical Mechanics (4-4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B passed with grade C- or better; or consent of department; course 104A and 105A passed with a grade C- or better or consent of department required for 105B. Principles and applications of Newtonian mechanics; introduction to Lagrange's and Hamilton's equations.—I-II (I-II)

105AL. Computational Laboratory in Mechanics (1)

Laboratory—3 hours. Prerequisite: Engineering 5 or the equivalent; course 105A concurrently. Introduction to the application of computers to solving physics problems. Introduction to numerical and graphical methods in mechanics. (P/NP grading only).—I. (I.)

105BL. Computational Laboratory in Mechanics (1)

Laboratory—3 hours. Prerequisite: course 105AL; course 105B concurrently. Computer application of numerical and graphical methods in mechanics. (P/NP grading only).—II. (II.)

105C. Continuum Mechanics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 104B and 105A passed with a grade of C- or better, or consent of department. The continuum hypothesis and limitations. Tensor methods develop stress-strain relations for linear isotropic solids/fluids and field equations to study wave propagation in solids/fluids, heat flow, potential flow and ocean waves.—III. (III.)

108. Optics (3)

Lecture—3 hours. Prerequisite: course 9 or 7 sequence and Mathematics 21 sequence or consent of instructor. The phenomena of diffraction, interference, and polarization of light, with applications to current problems in astrophysics, material science, and atmospheric science. Study of modern optical instrumentation. Open to non-majors.—III. (III.)

108L. Optics Laboratory (1)

Laboratory—3 hours. Prerequisite: course 108 concurrently. The laboratory will consist of one major project pursued throughout the quarter, based on modern applications of optical techniques.—III. (III.)

110A-110B-110C. Electricity and Magnetism (4-4-4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B passed with grade C- or better, or consent of department; prerequisite for 110B is courses 110A and 104A passed with a grade of C- or better or consent of department; prerequisite for course 110C is courses 110B and 104B passed with a grade of C- or better, or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves.—II-III-I. (II-III-I.)

112. Thermodynamics and Statistical Mechanics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A or the equivalent. Introduction to

classical and quantum statistical mechanics and their connections with thermodynamics. The theory is developed for the ideal gas model and simple magnetic models and then extended to studies of solids, quantum fluids, and chemical equilibria.—I. (I.)

115A. Foundation of Quantum Mechanics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 104A and 105B with grade C- or better, or consent of instructor. Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics.—III. (III.)

115B. Applications of Quantum Mechanics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better, or consent of department. Angular momentum and spin; hydrogen atom and atomic spectra; perturbation theory; scattering theory.—I. (I.)

116A. Electronic Instrumentation (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 9C, Mathematics 22B. An experimental and theoretical study of important electronic circuits commonly used in physics.—I. (I.)

116B. Electronic Instrumentation (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 9D, 116A. Continuation of course 116A. Introduction to the use of digital electronics and microcomputers in experimental physics.—II. (II.)

121. Atomic Physics (4)

Lecture—3 hours; term paper. Prerequisite: course 9D. The phenomena of atomic physics including contemporary work: fine- and hyperfine-structure, quantum electrodynamics, laser spectroscopy, beam foil experiments and trapped atoms.—I. (I.)

122. Advanced Physics Laboratory (4)

Laboratory—8 hours; extensive problem solving. Prerequisite: course 9D with grade C- or better or consent of instructor. Experimental techniques and measurements in atomic, condensed matter, nuclear and high energy physics. Student performs three to six experiments depending on difficulty. Individual work is stressed. May be repeated for credit.—II. (II.)

127. Introduction to Astrophysics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 105A passed with grade C- or better, or consent of instructor. Celestial mechanics, radiation, astrophysical measurements, electromagnetic processes, the sun, binary and variable stars, stellar structure and evolution, galaxies, cosmology.—III. (III.)

129A. Introduction to Nuclear Physics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Survey of basic nuclear properties and concepts requiring introductory knowledge of quantum mechanics: nuclear models and forces, radioactive decay and detecting nuclear radiation and nuclear reaction products, alpha, beta and gamma decay.—III. (III.)

129B. Nuclear Physics, Extensions and Applications (4)

Lecture—3 hours; term paper. Prerequisite: course 129A. Continuation of course 129A. Nuclear reactions, neutrons, fission, fusion accelerators, introduction to meson and particle physics, nuclear astrophysics, and applications of nuclear physics and techniques to mass spectrometry, nuclear medicine, trace element analysis. Not offered every year.

130A-130B. Elementary Particle Physics (4-4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. Not offered every year.

137. Science and Technology of Nuclear Arms Effects and Control (3)

Lecture—3 hours. Prerequisite: upper division standing; one course from courses 1B, 7C, 9D, 10. Scientific and technical aspects of nuclear arms effects

and nuclear arms control including nuclear physics of atomic and hydrogen bombs, blast and radiation effects, radioactivity, electromagnetic pulse, ICBM accuracy, laser weapons, verification safeguards, biological and ecological effects. Emphasis on order of magnitude calculations. (Same course as Applied Science Engineering 137.) GE credit: SciEng or SocSci.—II. (II.)

140A-140B. Introduction to Solid State Physics (4-4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A or the equivalent passed with a grade of C- or better or consent of instructor. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity.—II-III. (II-III.)

160. Environmental Physics and Society (3)

Lecture—3 hours. Prerequisite: course 9D or 7C; or course 10 or 1B and Mathematics 16B or the equivalent. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. (Same course as Engineering 160.) GE credit: SciEng or SocSci.—III. (III.)

194HA-194HB. Special Study for Honors Students (4-4)

Independent study—12 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. (Deferred grading only, pending completion of sequence).

195. Senior Thesis (5)

Independent study—15 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors with senior standing. Preparation of a senior thesis on a topic selected by the student with approval of the department. May be repeated for a total of 15 units.—I, II, III. (I, II, III.)

197T. Tutoring in Physics and Astronomy (1-5)

Prerequisite: consent of instructor and department chairperson. Tutoring of students in lower division course. Weekly meetings with instructor. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

200A. Theory of Mechanics and Electromagnetics (4)

Lecture—3 hours; independent study—1 hour. Prerequisite: courses 104B, 105B, and 110C or the equivalent; course 204A concurrently. Theoretical approaches in classical mechanics including the use of generalized coordinates and virtual work; variational calculus; Lagrange equations; symmetries, conservation laws, and Noether theorem; Lagrangian density; Hamilton formalism; canonical transformations; Poisson brackets; and Hamilton-Jacobi equations.—I. (I.)

200B-200C. Theory of Mechanics and Electromagnetics (4-4)

Lecture—3 hours; independent study—1 hour. Prerequisite: course 200A, and course 204B concurrently. Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity.—II-III. (II-III.)

204A-204B. Methods of Mathematical Physics (4-4)

Lecture—3 hours; independent study—1 hour. Prerequisite: courses 104A and 104B or the equivalent. Linear vector spaces, operators and their spectral

analysis, complete sets of functions, complex variables, functional analysis, Green's functions, calculus of variations, introduction to numerical analysis.—I-II. (I-II.)

210. Computational Physics (3)

Lecture—3 hours. Prerequisite: knowledge of Fortran or C. Analytic techniques to solve differential equations and eigenvalue problems. Physics content of course will be self-contained, and adjusted according to background of students.—II. (II.)

215A-215B-215C. Quantum Mechanics (4-4-4)

Lecture—3 hours; independent study—1 hour. Prerequisite: course 115B or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation.—I-II-III. (I-II-III.)

219A. Statistical Mechanics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 215B or the equivalent. Foundations of thermodynamics and classical and quantum statistical mechanics with simple applications to properties of solids, real gases, nuclear matter, etc. and a brief introduction to phase transitions.—III. (III.)

219B. Statistical Mechanics (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 219A. Further applications of thermodynamics and classical and quantum statistical mechanics. The modern theory of fluctuations about the equilibrium state, phase transitions and critical phenomena.—I. (I.)

223A. Group Theoretical Methods of Physics—Condensed Matter (3)

Lecture—3 hours. Prerequisite: courses 215A, 215B (215C is corequisite) or consent of instructor. Theory of groups and their representations with applications in condensed matter. Not offered every year.—I. (I.)

223B. Group Theoretical Methods of Physics—Elementary Particles (3)

Lecture—3 hours. Prerequisite: courses 215A, 215B (215C is corequisite) or consent of instructor. Theory of groups and their representations with applications in elementary particle physics. Not offered every year.

224A. Nuclear Physics (3)

Lecture—3 hours. Prerequisite: course 215B. Comprehensive study of the nucleon-nucleon interaction including the deuteron, nucleon-nucleon scattering, polarization, determination of real parameters of S-matrix, and related topics. Not offered every year.

224B. Nuclear Physics (3)

Lecture—3 hours. Prerequisite: course 224A. Study of nuclear models, including shell model, collective model, unified model. Energy level spectra, static momenta, and electromagnetic transition rates. Not offered every year.

224C. Nuclear Physics (3)

Lecture—3 hours. Prerequisite: course 224B. Study of nuclear scattering and reactions including the optical model and direct interactions. Beta decay and an introduction to weak interactions. Not offered every year.

229A. Advanced Nuclear Theory (3)

Lecture—3 hours. Prerequisite: course 224C. Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for two-body scattering. Not offered every year.

229B. Advanced Nuclear Theory (3)

Lecture—3 hours. Prerequisite: course 229A. Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for three-body scattering. Not offered every year.

230A. Quantum Theory of Fields (3)

Lecture—3 hours. Prerequisite: course 215C. Relativistic quantum mechanics of particles; techniques and applications of second quantization; Feynman diagrams; renormalization.—I. (I.)

230B. Quantum Theory of Fields (3)

Lecture—3 hours. Prerequisite: course 230A. Continuation of 230A, with selected advanced topics, such

as S-matrix theory, dispersion relations, axiomatic formulations.—II. (II.)

240A-240B. Solid State Physics (3-3)

Lecture—3 hours. Prerequisite: courses 215A-215B-215C; courses 140A-140B recommended. Introduction to the phenomena and theory of the solid state. Periodic structures, lattice structures, electron states, static properties, electron-electron interaction, electron dynamics, transport properties, optical properties, the Fermi surface, magnetism, superconductivity.—III. (I-III.)

240C-240D. Solid State Physics (3-3)

Lecture—3 hours. Prerequisite: course 240A-240B or the equivalent. General introduction to many-body techniques as applied in solid state physics.—II-III. (II-III.)

241. Advanced Topics in Magnetism (3)

Lecture—3 hours. Prerequisite: courses 240A-240B, 240C-240D, or consent of instructor. Topics chosen from areas of current research interest. Not offered every year.

242. Advanced Topics in Superconductivity (3)

Lecture—3 hours. Prerequisite: courses 240A-240B, 240C-240D, or consent of instructor. Topics chosen from areas of current research interest. Not offered every year.

243A-243B-243C. Surface Physics of Materials (3-3-3)

Lecture—3 hours. Prerequisite: courses 140A-140B, 115A-115B or the equivalents; courses 215A, 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Not offered every year.—(I-II-III.)

245A. High-Energy Physics (3)

Lecture—3 hours. Prerequisite: course 230A. Phenomenology and systematics of strong, electromagnetic, and weak interactions of hadrons and leptons; determination of quantum numbers; quarks and quarkonia; deep inelastic scattering; the quark parton model; experiments at hadron colliders and electron-positron colliders.—II. (II.)

245B. High-Energy Physics (3)

Lecture—3 hours. Prerequisite: course 245A. Electroweak interactions; phenomenology of the Standard Model of SU(2)_cxU(1); weak interaction experiments; properties of and experiments with W and Z vector bosons; Glashow-Weinberg-Salam model and the Higgs boson; introduction to supersymmetry and other speculations.—III. (III.)

245C. High-Energy Physics (3)

Lecture—3 hours. Prerequisite: course 245A. Strong interaction: quantum chromodynamics phenomenology; jets and other experimental tests; quark and gluon distribution functions; quark and gluon scattering; applications of the renormalization group. Not offered every year.—III. (III.)

246. Supersymmetry: Theory and Phenomenology (3)

Lecture—3 hours. Prerequisite: courses 230A-230B, 245A-245B recommended, or consent of instructor. Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergravity. Collider phenomenology of supersymmetry. Dark matter phenomenology. Not offered every year.

250. Special Topics in Physics (3)

Lecture—3 hours. Prerequisite: consent of instructor. Topic varies. May be repeated for credit. Not offered every quarter.—I, II, III. (I, II, III.)

252A. Techniques of Experimental Physics (3)

Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from condensed matter research will be utilized. Not offered every year.

252B. Techniques of Experimental Physics (3)

Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments.

Problems and examples from nuclear and particle research will be utilized.—III. (III.)

260. Introduction to General Relativity (3)

Lecture—3 hours. Prerequisite: courses 200A, 200B. An introduction to general relativity. Differential geometry and curved spacetime; the Einstein field equations; gravitational fields of stars and black holes; weak fields and gravitational radiation; experimental tests; Big Bang cosmology. Offered in alternate years.—(I.)

290. Seminar in Physics (1)

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in physics. Topics will vary weekly and will cover a broad spectrum of the active fields of physics research at a level accessible to all physics graduate students. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

291. Seminar in Nuclear Physics (1)

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in nuclear physics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

292. Seminar in Elementary Particle Physics (1)

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in elementary particle physics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

293. Seminar in Condensed Matter Physics (1)

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in condensed matter physics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

294. Seminar in Cosmology (1)

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in Cosmology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

295. Introduction to Departmental Research (1)

Seminar—1 hour. Seminar to introduce first- and second-year physics graduate students to the fields of specialty and research of the Physics staff. (S/U grading only.)—II.

297. Research on the Teaching and Learning of Physics (3)

Seminar—3 hours. Prerequisite: graduate standing in Physics or consent of instructor. Discussion and analysis of recent research in how students construct understanding of physics and other science concepts and the implications of this research for instruction.—III. (III.) Potter

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Course

390. Methods of Teaching Physics (1)

Lecture/discussion—1 hour. Prerequisite: graduate standing in Physics; consent of instructor. Practical experience in methods and problems related to teaching physics laboratories at the university level, including discussion of teaching techniques, analysis of quizzes and laboratory reports and related topics. Required of all Physics Teaching Assistants. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

 Reen Wu, Ph.D., Professor (*Anatomy, Physiology and Cell Biology*)

Emeriti Faculty

Edmund M. Bernauer, Ph.D., Professor Emeritus
 Irwin Feinberg, Ph.D., Professor Emeritus
 John M. Horowitz, Ph.D., Professor Emeritus

Affiliated Faculty

Steven E. Anderson, Ph.D., Associate Researcher (*Human Physiology*)
 Chao-Yin Chen, Ph.D., Assistant Research Physiologist (*Internal Medicine*)
 Peter J. Havel, D.V.M., Ph.D., Research Assistant Professor (*Nutrition*)

Alice F. Tarantal, Ph.D., Associate Adjunct Professor (*Pediatrics*)
 Marta D. Van Loan, Ph.D., Associate Adjunct Professor (*Nutrition*)
 Catherine A. VandeVoort, Ph.D., Associate Adjunct Professor (*Obstetrics and Gynecology*)

Graduate Study. The Graduate Group in Physiology offers programs of study and research leading to the M.S. and Ph.D. degrees and participates in joint Ph.D./M.D. and Ph.D./D.V.M. programs. The programs emphasize broad training in the fundamental principles of cellular, molecular, and integrative physiology. For information regarding these programs, address the Program staff person at the group office.

Graduate Advisers. D. Gietzen (*Anatomy, Physiology and Cell Biology*), J. Goldberg (*Neurobiology, Physiology, and Behavior*), A. Oberbauer (*Animal Science*).

Courses in Physiology (PGG)

Graduate Courses

200L. Animal Cell Culture Laboratory (4)

Discussion—2 hours; laboratory—6 hours. Prerequisite: courses in undergraduate biochemistry, cell biology, or general physiology, or consent of instructor. Techniques of cell culture, with emphases on cell physiology and the actions of drugs and toxicants on cultured somatic cells. Design, performance and interpretation of experiments with animal cells in vitro.—II. (II.) B. Wilson, R. Wu

210A-210B-210C. Advanced Physiology (4-6-6)

Lecture—3 hours (210A) or 5 hours (210B and 210C); discussion—1 hour. Prerequisite: graduate student in the Physiology Graduate Group Ph.D. program, or consent of instructor. Advanced course on general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Physiology 210A is the same course as Human Physiology 210A.)—I-II-III. (I-II-III.)

214. Neurophysiology (4)

Lecture—4 hours. Prerequisite: Neurobiology, Physiology and Behavior 111B, 112; consent of instructor. Electrical activity of neurons and neuroeffector junctions; physiology of the nervous system as studied by its electrical activity.—II. (II.) Carstens

216. Neurophysiology Literature (3)

Lecture—1 hour; discussion—2 hours. Lectures covering experimental and theoretical methods in studying cell membrane ion channels and the resulting characterization of the physiological functions and structure/function relationships of some of the most important channel types. Discussion of classical and current original papers.—I. (I.) Pappone

217. The Vertebrate Eye (2)

Seminar—1 hour; lecture/discussion—1 hour. Prerequisite: graduate standing and a background in biology; Neurobiology, Physiology and Behavior 120F strongly recommended. Physiology, biochemistry, and biology of the vertebrate eye with emphasis on the retina, particularly photoreceptors. A comparative approach will be taken with adaptations in ocular function related to behavior and environment. May be repeated for credit with consent of instructor. Offered in alternate years.—II. Sillman

218. Topics in Circulatory Pathophysiology (3)

Lecture—1 hour; discussion—2 hours. Prerequisite: graduate standing. Selected topic in circulatory or cardiopulmonary physiology will be addressed each offering. Topics will include pathophysiology. Lecture and discussion based on current research literature in the field. May be repeated with consent of instructor. Offered in alternate years.—II. Weidner

219. Muscle Growth and Development (3)

Lecture—2 hours; seminar—1 hour. Prerequisite: Biological Sciences 103, Biological Sciences 104 or Molecular and Cellular Biology 150, or consent of instructor. Integration of growth and development of skeletal muscle; morphology, biochemistry, neural control mechanisms, circulatory and nutritional factors. Prenatal and neonatal differentiation of fiber types. Experimental and hereditary myopathies. Offered in alternate years.—(II.) Carlsen

220. General and Comparative Physiology of Reproduction (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology and Behavior 110, 110L; Biological Sciences 101, 103. Basic phenomena of sexual and asexual reproduction and comparisons of processes in a wide variety of animals; gamete formation, structure, and metabolism; fertilization; neuroendocrine mechanisms in maturation and reproductive cycles; behavioral aspects.—III. (III.) Anderson, Lasley

222. Mammalian Gametogenesis and Fertilization (3)

Lecture/discussion—3 hours. Prerequisite: Neurobiology, Physiology and Behavior 121 or the equivalent. Course will emphasize our current understanding of events in mammalian gametogenesis and the fertilization process. Published results, conclusions drawn from these results, and their contribution to our understanding will be discussed.—II. (II.) Berger

230. Advanced Endocrinology (2)

Lecture—2 hours. Prerequisite: Neurobiology, Physiology and Behavior 130 or the equivalent, and graduate standing. Focus on timely topic of endocrine research. Critical review of current literature and discussion of future research strategies in the area. May be repeated for credit when topic differs.—II. (II.)

231. Neuroendocrinology (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology and Behavior 110 or the equivalent course in systemic physiology; Neurobiology, Physiology and Behavior 130 or the equivalent course in endocrinology. Neural-endocrine interactions; neural regulation of the endocrine system, especially in relation to reproduction; the role of hormones and growth factors in sexual differentiation of the brain.—II. (II.)

234. Neurophysiological Basis of Neurotoxicology (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology and Behavior 110 or the equivalent; basic understanding of neurophysiology. Mechanisms of action at the cellular and systemic level of a number of different neurotoxins and toxicants. Examples of ways toxins may act on the nervous system and techniques for study of neurotoxicology. (Same course as Environmental Toxicology 234.)—III. (III.) Wooley

242. Biological Rhythms (3)

Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: Neurobiology, Physiology and Behavior 110 or the equivalent. General aspects and basic mechanisms of biological rhythms; the importance of rhythm desynchronization in areas of pharmacology and space medicine; telemetry; mathematical methods; chronometry; daily, reproductive, and annual periods; shift-work, jet lag and sleep disorders. Offered in alternate years.—(I.) Fuller

261A. Topics in Vision (2)

Lecture/discussion—2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100 and 112 or the equivalent, graduate standing. Visual system functions and underlying mechanisms. Emphasis on recent research and pertinent aspects of anatomy, biochemistry, electrophysiology, psychophysics, development and genetics. Topics may vary each year. (Same course as Neurobiology, Physiology, and Behavior 261A and Neuroscience 261A.) (S/U grading only.)—I. Ishida

275. Neurohumoral Regulatory Mechanisms of Thermogenesis (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Biological Sciences 104 or the equivalent; Biological Sciences 102 or the equivalent; consent of instructor. Designed for graduate and advanced undergraduate students, this course will examine thermogenic systems in homeotherms (primarily mammals) with respect to regulation (hormonal and central nervous control) and effector mechanisms (basis of heat generation at the target cell).—II. (II.) Horwitz, Horowitz

290. Seminar (1)

Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (S/U grading only.)—I, II, III. (I, II, III.)

290C. Research Conference in Physiology (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discussion of faculty and graduate student research in physiology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

291B. Seminar in Cellular Mechanisms of Adaptation (1)

Discussion—0.5 hour; seminar—0.5 hour. Prerequisite: Neurobiology, Physiology and Behavior 100B; Biological Sciences 103; consent of instructor. Review and evaluation of current literature and research in cellular adaptations to the environment. May be repeated for credit when topic differs. (S/U grading only.)—I, II, III. (I, II, III.) Horwitz

291D. Research Approaches in Physiology (2)

Seminar—2 hours. Prerequisite: graduate standing in Graduate Group in Physiology or consent of instructor. Current research in physiology. Overall design of experiments and particular research areas. (S/U grading only.)—I. (I.)

293. Current Progress in Physiology (1)

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by guest lecturers describing their current research activities. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

298. Group Study (1-5)**299. Research (1-12)**

(S/U grading only.)

Professional Courses**300A-300B. Pedagogical Aspects of Physiology in Higher Education (3-3)**

Lecture, discussion, or laboratory, or combination. Prerequisite: meet qualifications for teaching assistant in physiology. Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Course meets teaching requirements for Ph.D. program in Physiology. (S/U grading only.)—I, II, III. (I, II, III.)

390. The Teaching of Physiology (1)

Discussion—1 hour. Prerequisite: Teaching Assistant assignment to a physiology lecture course and consent of instructor. Practical experience in methods and problems of teaching physiology lecture courses. May include analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion sessions, and formulation of topics and questions for examinations under supervision of instructor. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Courses in Plant Biology (PLB)

Lower Division Courses

1. Plants for Garden, Orchard and Landscape (2)

Lecture—1 hour; laboratory—3 hours. For non-majors. Hands-on experience with plants cultivated for food, environmental enhancement and personal satisfaction. Topics include establishing a vegetable garden, pruning and propagating trees and vines, growing flowers and ornamental plants, and the role of plants in human health and well-being. Not open for credit to students who have completed Agricultural Systems and Environment 2 or Plant Science 1. (Former course Plant Science 1.) (P/NP grading.)—I, III. (I, III.) Marrush

11. Plants and the Biosphere (3)

Lecture—3 hours; one weekend field trip (half-day); term paper. Ethnobotanical and ecological themes are emphasized in examining our dependence on plants, the ecological roles of plants, and the development of botany as a contemporary science. Intended primarily for non-science majors. GE credit: SciEng, Wrt.—I. (I.) Potter

12. Plants and People (3)

Lecture—3 hours. Prerequisite: high school biology. Plants as a resource for food, recreation, and environmental enhancement. Emphasis on how our relationship to plants has changed through history and how the growth and development of plants affect their utility. Not open for credit to students who have completed Plant Science 10. (Former course Plant Science 10.) GE credit: SciEng, Div, Wrt.—I, II, III. (I, II, III.) Nevins, Michelmore, Fischer, Bradford

90X. Plant Science Seminar (1-4)

Prerequisite: consent of instructor. Examination of a special topic in a small group setting. Not open for credit to students who have completed course Plant Science 90X. (Former course Plant Science 90X.)

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology faculty. (P/NP grading only.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

For questions about courses numbered 102 through 125, see the *Plant Biology Section Office, 1002 Life Sciences Addition*. For questions concerning courses numbered 1, 12, 140 through 188 and 196, see the *Plant Science Advising Center, 1144 Plant and Environmental Sciences*.

102. California Floristics (5)

Lecture—2 hours; lecture/discussion—1 hour; laboratory—6 hours (includes three one-day, weekend field trips). Prerequisite: Biological Sciences 1A, 1B, 1C or the equivalent in plant science. Survey of the flora of California, with emphasis on field recognition and identification of important vascular plant families and genera characterizing the major floristic regions. Lectures review the taxonomic diversity, evolutionary relationships, and geographical patterns of California flora.—III. (III.) Potter, Dean

105. Developmental Plant Anatomy (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: introductory plant biology (for example, Biological Sciences 1C). Survey of vascular plant structure and development. Current ideas and experimental evidence for developmental concepts.—I. (I.) Canington

108. Systematics and Evolution of Angiosperms (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B and 1C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and mol

ecular evidence. (Same course as Evolution and Ecology 108.) GE credit: SciEng.—III. (III.) Doyle

111. Plant Physiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C; Chemistry 8B and Physics 7C (either may be taken concurrently); course 105 recommended. The plant cell as a functional unit. The processes of absorption, movement, and utilization of water and minerals. Water loss, translocation, photosynthesis, respiration.—I. (I.) Lucas, Stemler

111D. Problems in Plant Physiology (1)

Discussion—1 hour. Prerequisite: course 111 concurrently. Discussion of problems and applications relating to principles presented in course 111. Students will be assigned problems each week showing novel applications of principles described in course 111 and will prepare answers to be delivered orally during the class period. (P/NP grading only.)—I. (I.) Lucas, Stemler

111L. Introductory Plant Physiology Laboratory (5)

Lecture/discussion—1 hour; laboratory—9 hours; extensive writing. Prerequisite: course 111 (may be taken concurrently) or 112 or consent of instructor (both recommended). Introduction to basic experimental techniques and instruments used in the investigation of plant physiological processes, such as photosynthesis, water and solute transport, tissue cultures, and detection of hormones.—(III.) Murphy

112. Plant Growth and Development (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C, Chemistry 8B. Introduction to the mechanisms and control systems that govern plant growth and development and the responses of plants to the environment. Strong emphasis on vegetative development of flowering plants. GE credit: SciEng.—II. (II.)

112D. Problems in Plant Growth and Development (1)

Discussion—1 hour. Prerequisite: course 112 concurrently. Discussion of problems and applications relating to principles presented in course 112. Students will be assigned problems each week showing novel applications of the principles described in course 112 and will prepare answers to be delivered orally during class period. (P/NP grading only.)—II. (II.)

113. Molecular and Cellular Biology of Plants (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1C, 101; Biological Sciences 102 recommended. Molecular and cellular aspects of the growth and development of plants and their response to biological and environmental stresses. Primary focus on processes unique to plants. Experimental approaches will be emphasized.—III. (III.)

113D. Problems in Molecular and Cellular Biology of Plants (1)

Discussion—1 hour. Prerequisite: course 113 concurrently. Discussion of topics and applications related to principles presented in course 113. Assigned topics each week show novel applications of the principles described in course 113; discussion of topics during class period. (P/NP grading only.)—III. (III.)

116. Plant Morphology and Evolution (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: introductory plant biology (e.g., Biological Sciences 1C); plant anatomy recommended (e.g., course 105). Introduction to the form, development and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. GE credit: SciEng.—II. (II.) Jernstedt

117. Plant Ecology (4)

Lecture—3 hours; fieldwork—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C; course 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as Evolution and Ecology 117.)—I. (I.) Pearcy

118. Introductory Phycology and Bryology (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A and 1C. Comparative morphology, physiology, development and reproduction of cyanobacteria, the major algal groups, and the bryophytes. Focus on structure-function and evolutionary relationships. Ecological factors and commercial uses are considered. Laboratories include study of living organisms and identification exercises.—II. (II.) Canington

119. Population Biology of Weeds (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C; introductory statistics recommended. Origin and evolution of weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions of weeds and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. Not open for credit to students who have completed Plant Biology 121. (Same course as Evolution and Ecology 119.)—III. (III.) Rejmanek

123. Plant-Virus-Vector Interaction (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1C, 101; course 105, Plant Pathology 120, and Entomology 100 recommended. Analysis of the interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern experimental approaches to the interdiction of viral movement. Offered alternate years. (Same course as Entomology 123/Plant Pathology 123.)—(I.) Lucas, Gilbertson, Ullman

126. Plant Biochemistry (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C or the equivalent, and Biological Sciences 103. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as Molecular and Cellular Biology 126.)—(I.) Callis, Abel

140. Culinary and Medicinal Herbs (3)

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 1C. Growth, identification, cultivation, and use of common culinary and medicinal herbs; herbal plant families; effects of climate and soils on herbs; herbal medicine; ecology and geography of herbs; herb garden design; secondary chemistry of active compounds. (Same course as Environmental and Resource Sciences 140.)—III. (III.) Bledsoe

141. Principles and Methods of Ethnobotany (4)

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: Biological Sciences 1C or Agricultural Management and Rangeland Resources 2 or the equivalent; course 108 recommended. Examination of concepts, questions, and methods in ethnobotany, the study of human-plant interactions. Specific topics include traditional and scientific classification systems, uses of specific plants, plant evolution under domestication, and ethical issues related to ethnobotany. Offered in alternate years. GE credit: SciEng or SocSci, Wrt.—(II.) Potter

142. Ecology of Crop Systems (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural Management and Rangeland Resources 2 or Biological Sciences 1C; Mathematics 16A or Physics 1A, or consent of instructor. Ecological processes governing the structure and behavior of managed ecosystems. Emphasis on mechanistic and systems views of the physical environment, photosynthetic productivity, competition, adaptation, nutrient cycling, energy relations and contemporary issues such as climate change. GE credit: SciEng.—II. (II.) Denison

143. Evolution of Crop Plants (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C or the equivalent. Origins of crops and agriculture, including methodological approaches, center of origin and diversity, crop dissemination pathways, and differences between wild and cultivated plants. Group studies of individual crops are published on the Internet. Not open for credit to students who

have completed Plant Science 103. GE credit: Sci-Eng, Wrt.—III. (III.) Gepts

144. Trees and Forests (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1C. Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry. (Same course as Environmental Horticulture 144 and Environmental and Resource Sciences 144.)—I. (I.) Barbour, Berry, Bledsoe

145. Sierra Nevada Flora (3)

Lecture/laboratory—30 hours (total); fieldwork—50 hours (total). Prerequisite: course 102 or 108 or Evolution and Ecology 121 or Environmental Horticulture 105. An introduction to the flora of the Sierra Nevada. Basic plant identification, the principle plant communities and species of the Sierra Nevada. Class offered the first two weeks in July in the Sierra Nevada. Offered in alternate years.—summer

146. Rhizosphere Ecology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Agricultural Management and Rangeland Resources 2 or Biological Sciences 1C. Effects of plant-microbe interactions on plant growth, soil formation, and agricultural sustainability. Physical, chemical and biological processes that occur at the surface of plant roots. Evolution and modification of the biochemical and genetic bases of rhizosphere ecology. Offered in alternate years.—(III.) Phillips

147. Survey of Plant Communities of California (4)

Lecture/discussion—2 hours; fieldwork—3 hours; extensive writing. Prerequisite: Biological Sciences 1A or 1B or 1C or Molecular and Cellular Biology 10 recommended. Consent of instructor required quarter prior to course. Upper division standing required if enrollment must be limited. Selected plant communities analyzed for their structure and the relationship of their component species to the environment. Four weekend field trips required. GE credit: SciEng, Wrt.—III. (III.) Barbour, Jackson, Ronald

148. Introductory Mycology (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Pathology 148.)—I. (I.) MacDonald, Rizzo

152. Plant Genetics (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: Biological Sciences 1A or consent of instructor. Basic principles of transmission genetics, cytogenetics, population and quantitative genetics, and molecular genetics. Practical aspects of genetic crosses and analysis of segregating populations. Not open for credit to students who have completed Plant Science 105. (Former course Plant Science 105.)—I. (I.) Wilkins

153. Plant, Cell, Tissue and Organ Culture (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Agricultural Management and Rangeland Resources 2. Basic and applied aspects of plant tissue culture including media preparation, micropropagation, embryogenesis, anther culture, protoplast culture and transformation. Offered in alternate years. Not open for credit to students who have completed Plant Science 107. (Former course Plant Science 107.)—II. (II.) Sutter

154. Introduction to Plant Breeding (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 152, Biological Sciences 101 or consent of instructor. The principles, methods and applications of plant breeding and genetics to the improvement of crop plants. Illustration of how plant breeding is a dynamic, multidisciplinary, constantly-evolving science. Laboratory emphasizes hands-on experience in the basics of breeding through experiments. (Former course Plant Science 113.)—II. (II.) St. Clair

157. Physiology of Environmental Stresses in Plants (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: course 112 (may be taken concurrently) or the equivalent. Stress concepts and principles; physiological, developmental and morphological characteristics enabling plants to avoid or tolerate environmental stresses; mechanisms of acclimation common to many stresses; responses of wild and cultivated species to drought, flooding, nutrient deficiencies, salinity, toxic ions, extreme temperatures. Offered in alternate years.—(II.) Lauchli, Richards

158. Mineral Nutrition of Plants (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 111 or the equivalent. Evolution and scope of plant nutrition; essential and other elements; mechanisms of absorption and translocation; mineral metabolism; deficiencies and toxicities; genetic and ecological aspects of plant nutrition. Not open for credit to students who have completed Plant Biology/Plant Science 135. (Former course Plant Biology/Plant Science 135.)—III. (III.) Richards, Brown

160. Principles of Plant Biotechnology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A and 101. Principles and concepts of plant biotechnology including recombinant DNA technology, plant molecular biology, plant cell and tissue culture, and crop improvement. Not open for credit to students who have completed Plant Science 140. (Former course Plant Science 140.)—II. (II.) Dandekar

161A. Plant Genetics and Biotechnology Laboratory (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 152 and/or 160. Techniques of genetic analysis at the molecular and organismal levels, including segregation and linkage analysis, cytogenetics and recombinant DNA. Not open for credit to students who have completed Plant Science 141A. (Former course Plant Science 141A.)—I. (I.) Dandekar, Dubcovsky

161B. Plant Genetics and Biotechnology Laboratory (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 152 and/or 160. Advanced techniques of genetic analysis at the molecular and organismal levels, including transformation, gene expression, analysis of transgenic plants and QTL analysis. Not open for credit to students who have completed Plant Science 141B. (Former course Plant Science 141B.)—II. (II.)

171. Plant Propagation (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Agricultural Management and Rangeland Resources 2 or Biological Sciences 1C. Principles and practices of propagating plants covering anatomical, physiological, and practical aspects. Not open for credit to students who have completed Plant Science 109. (Former course Plant Science 109.)—III. (III.) Sutter

172. Postharvest Physiology and Handling of Horticultural Commodities (3)

Lecture—3 hours. Prerequisite: general plant science background recommended (e.g., Agricultural Management and Rangeland Resources 2, course 12 or Food Science and Technology 2); concurrent enrollment in course 172L recommended. Physiological processes related to the maturation and senescence of fruits, vegetables, and ornamentals; fundamentals involved in handling, transportation, storage, and marketing practices, e.g., temperature and humidity control, protective treatments, controlled atmospheres. Not open for credit to students who have completed Plant Science 112. (Former course Plant Science 112.)—I. (I.) Kader, Reid, Saltveit

172L. Postharvest Physiology and Handling Laboratory (2)

Discussion—1 hour; laboratory—3 hours. Prerequisite: course 172 (may be taken concurrently). Demonstrations and exercises following the subject matter of course 172. Not open for credit to students who have completed Plant Science 112L. (Former course Plant Science 112L.)

173. Biological Applications in Fruit Tree Management (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Agricultural Management and Rangeland Resources 2 or the equivalents. Physiology, growth, development and environmental requirements of fruit trees and cultural practices used to maintain them. Emphasis on the application of biological principles in the culture of commercially important temperate zone fruit tree species. Not open for credit to students who have completed Plant Science 115. (Former course Plant Science 115.)—II. (II.) DeJong

174. Biological Applications in Fruit Production (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Agricultural Management and Rangeland Resources 2; course 173 recommended. Reproductive biology of tree-crop species. Biological principles of fruit production, tree nutrition and orchard management. Laboratories emphasize hands-on work with orchard tree systems.—III. (III.) DeJong, Polito

175. Applied Plant Biology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 111, and Biological Sciences 101 or course 152. Advanced concepts of plant biology with reference to the uses of plants for food, fiber, and environmental enhancement. Current research, applications, and issues in crop improvement, production and biotechnology will be presented and discussed. Not open for credit to students who have completed Plant Science 145. (Former course Plant Science 145.)—II. (II.)

176. Introduction to Weed Science (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Agricultural Management and Rangeland Resources 2 or Biological Sciences 1C. Principles of weed science including mechanical, biological, and chemical control methods. Weed control in crop, pasture, range, brush, forests, aquatic, and non-crop situations. Types of herbicides. Application of herbicides. Sight identification of common weeds and demonstrations to illustrate the principles. Not open for credit to students who have completed former course 120.—II. (II.) Bayer

177. Action of Herbicides (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 176; Soil Science 100; courses 111, 111D recommended. Influence of plants and soils on the action of herbicides. Absorption, translocation, fate, mechanism of action and symptoms of herbicides in plants. Effects of herbicides on plant populations. Physical and molecular fate of herbicides in soils. Not open for credit to students who have completed former course 122. (Former course 122.)

178. Biology and Management of Freshwater Macrophytes (3)

Lecture—3 hours; two field trips. Prerequisite: Biological Sciences 1A, 1B, 1C, Chemistry 8B; course 111 or Hydrologic Science 122 recommended. Brief survey of common fresh water macrophytes, their reproductive modes, physiology, growth (photosynthesis, nutrient utilization), development (hormonal interactions), ecology and management. Offered in alternate years. Not open for credit to students who have completed former course 150. (Former course 150.)—(I.) Anderson

188. Undergraduate Research: Proposal (3)

Lecture/discussion—3 hours. Prerequisite: upper division standing and consent of instructor. Through lectures, class discussion and individual mentoring, students will define a problem, identify objectives, conduct a literature survey, generate testable hypotheses, design experiments, plan data analysis, prepare an outline, and write a scientific proposal. (Same course as Biotechnology 188.) (P/NP grading only.)—III. (III.) Yoder, Powell

189. Experiments in Plant Biology: Design and Execution (3)

Laboratory/discussion—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C or the equivalent courses in plant sciences, and consent of the

instructor. Provides an opportunity for undergraduate students to formulate experimental approaches to current questions in plant biology and to carry out their proposed experiments. May be repeated for credit for a total of 12 units. (P/NP grading only.)—I, II, III. (I, II, III.)

190C. Research Conference in Botany (1)

Discussion—1 hour. Prerequisite: upper division standing in botany or related discipline; consent of instructor. Introduction to research methods in botany. Design of field or laboratory research projects, survey of appropriate literature, and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: upper division standing; consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology Section faculty. (P/NP grading only.)

194H. Special Study for Honors Students (1-5)

Prerequisite: open only to majors of senior standing on honors list. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.)

196. Postharvest Technology of Horticultural Crops (3)

Lecture/discussion/demonstration—5 days; field trip—5 days. Prerequisite: upper division or graduate student standing. Intensive study of current procedures for postharvest handling of fruits, nuts, vegetables, and ornamentals in California. Scheduled first two weeks immediately following last day of spring quarter. Considered a spring course for pre-enrollment. Not open for credit to students who have completed Plant Science 196. (Former course Plant Science 196.) (P/NP grading only.)—III. (III.) Mitcham

197T. Tutoring in Botany (1-5)

Tutoring—1-5 hours. Prerequisite: upper division standing and consent of instructor. Designed for undergraduate students who desire teaching experience. Student contact will be primarily in laboratory or discussion sections. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Kent Bradford, Ph.D., Professor (*Vegetable Crops*)
 Anne Britt, Ph.D., Associate Professor (*Plant Biology*)
 Patrick Brown, Ph.D., Professor (*Pomology*)
 David Burger, Ph.D., Professor (*Environmental Horticulture*)
 Judy Callis, Ph.D., Associate Professor (*Molecular and Cellular Biology*)
 Doug Cook, Ph.D., Professor (*Plant Pathology*)
 John Crowe, Ph.D., Professor (*Molecular and Cellular Biology*)
 Abhaya Dandekar, Ph.D., Professor (*Pomology*)

Graduate Study. The Graduate Group in Plant Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at colleges and universities, government or industrial laboratories. The graduate curriculum involves both a broad overview of the discipline and in-depth study and research in one of four areas of specialization: cell and molecular biology; ecology, systematics, and evolution; integrative plant and crop physiology; and plant development and structure. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, cell biology, cytology, developmental biology, ecology, genetics, molecular biology, morphology, paleobotany, physiology, population biology, systematics, and weed science.

Preparation. For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisite to the advanced degrees in Plant Biology: inorganic chemistry, organic chemistry, introductory physics, genetics, structural botany, biochemistry, introductory plant physiology, introductory plant physiology laboratory, calculus, introductory statistics, plant ecology/systematics/evolution, genetics, and plant

cell/molecular biology. Limited deficiencies can be made up after admission. The graduate adviser, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Graduate Adviser. Contact the Group office.

Courses in Plant Biology (PBI)

Graduate Courses

201. Plant Senescence: Cellular and Molecular Aspects (4)

Lecture—4 hours. Prerequisite: Plant Biology 111, 112; Biological Sciences 102 and 103. Cellular and molecular phenomena associated with the senescence of plants and plant parts. Emphasis on principles and mechanisms. Offered in alternate years.—I. Labavitch, Reid

202. Advanced Physiology of Cultivated Plants (2)

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing, Plant Biology 111 or the equivalent. Physiological processes as they pertain to growth and partitioning in higher plants. Background lectures on source-sink concepts and current areas of investigation followed by weekly round-table discussion led by students on focused sub-topics in the source-sink area. Offered in alternate years. (S/U grading only).—I. Matthews, DeJong

203N. Research Tools in Plant Cell and Molecular Biology (4)

Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: Plant Biology 111 or Biological Sciences 104 or the equivalent. Theories of commonly employed approaches in plant cell and molecular biology, including antibodies, epitope-tagging, bioluminescence, protein identification, and protein localization. Breakthroughs on techniques used in plant biology. Offered in alternate years. (S/U grading only).—I. Liu

205B. Advanced Plant Physiology (3)

Lecture/discussion—3 hours. Prerequisite: Plant Biology 111, 112, and Biological Sciences 103. Photosynthesis, photophosphorylation, chloroplast metabolism and biology. Offered in alternate years.—II. Theg

205C. Advanced Plant Physiology/Biochemistry (3)

Lecture—3 hours. Prerequisite: Plant Biology 111, 112, Biological Sciences 103. Integrative studies that combine physiological, biochemical and molecular approaches to study of plant metabolism. Fundamentals of basic metabolic pathways extending to use of mutants and genetic engineering to dissect such pathways; how pathways are integrated and respond to signals. Offered in alternate years.—III.

208. Plant Hormones and Regulators (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Biology 112. Chemistry, biochemistry and physiological activity of major classes of natural plant growth regulators. Primary consideration given to concepts that are of current research interest. Growth regulators in agriculture. Offered in alternate years.—II. Abel

210. Plant Ecophysiology (3)

Lecture—3 hours. Prerequisite: Plant Biology 111, 112, 117. Study of the mechanisms of physiological adaptation of plants to their environment. Offered in alternate years.—(II.) Pearcy

211. Ecophysiological Methods (3)

Lecture—1 hour; laboratory—4 hours; individual project; one Saturday field trip to be arranged. Prerequisite: Plant Biology 111, 117, and consent of instructor. A laboratory and lecture course covering basic concepts underlying the research methods and instrumentation useful in plant ecophysiology. Offered in alternate years.—III. Pearcy

212. Physiology of Herbicidal Action (3)

Lecture—3 hours. Prerequisite: Plant Biology 112, 122. Study of the fundamental processes involved in the physiological action of herbicides. Detailed consideration of the fate of herbicides in plants. Offered in alternate years.—III.

214. Higher Plant Cell Walls (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 112, and a course in biochemistry. Lectures focus on the structure, analysis, synthesis, and development-related metabolism of cell walls. Discussions center on analysis of scientific papers related to lecture topics. Offered in alternate years.—I. Labavitch, Nevins

216. Advanced Topics in Mineral Nutrition (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Biology 135 or consent of instructor. Cellular compartmentation of mineral elements, new methods and results; selected topics in absorption, translocation, metabolism and function of mineral elements; nutrition and transport in plants adapted to special nutrient environments. Offered in alternate years.—III. Lachli

217. Membrane Biology of Plants (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 112 and Biological Sciences 103, or consent of instructor. Structure, biogenesis, and function of plant cell membranes. Emphasis will be placed on the molecular basis of plant membrane functions and on the role of membranes in selected physiological processes. Offered in alternate years.—(III.) Lucas

218A. Advanced Concepts in Plant Cell Biology: Cell Biogenesis (3)

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 102, 103. Survey of molecular mechanisms underlying structural and functional differentiation of plant cell subcellular compartments. Topics include membrane and protein biosynthesis, protein targeting and turnover, and regulation of nuclear and organellar gene expression as related to the biogenesis of plant cell organelles. Offered in alternate years.—(II.) Bennet, Theg

218B. Advanced Concepts in Plant Cell Biology: Signal Transduction and Intercellular Communication (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103 or consent of instructor. Intracellular signal transduction pathways in the plant cells as well as longer term, adaptive responses which involve signals transmitted between plant cells. Weekly lectures and student-led discussions on current literature. Offered in alternate years.—III. Lucas

219. Reproductive Biology of Flowering Plants (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 111 and Biological Sciences 101. Fundamental mechanisms of reproductive biology of flowering plants and their influence on genetic variation, evolution, and cultural practices. Offered in alternate years. (Former course Plant Science 270.)—(I.)

220. Plant Developmental Biology (4)

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: plant anatomy, physiology, and biochemistry. A survey of the concepts of plant development and organization. Examines plant cells, tissues, and organs with special emphasis on experimental evidence for mechanisms regulating developmental processes. Offered in alternate years.—Bowman, Sinha

223. Special Topics in Scientific Method (2)

Discussion—2 hours. Examine the historical and philosophical background of the scientific method. Analyze the rational, perceptual, causal, creative and social aspects of scientific knowledge. Clarify the roles of reason, experimentation and creativity in scientific research. (S/U grading only).—I. (I.) Bradford

224. Water in Physiology and Ecology of Plants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Hydrologic Science 124, or Plant Biology 111 and 117, or consent of instructor. Evapotranspiration and energy balance; water and component potentials; water transport to, within, and from plants; dynamics and regulation of water status; drought resistance; responses to water deficits and salinity; water use

efficiency; adaptation to aridity; productivity in relation to water. Offered every fourth quarter. (Former course Plant Science 224.)—II. Hsiao

225. Methods and Instrumentation for Crop and Soil Science (3)

Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: basic knowledge of plant physiology, soil science, chemistry and physics. Theory and practice of in situ sampling and instrumentation methods for crop science (broadly defined to include tree crops) and related aspects of soil science (e.g., moisture and fertility) and laboratory analysis. Offered in alternate years.—III.

227. Plant Molecular Biology (4)

Lecture/discussion—4 hours. Prerequisite: Molecular and Cellular Biology 121 or 161. Molecular aspects of higher plant biology with emphasis on gene expression. Plant nuclear and organelle genome organization, gene structure, mechanisms of gene regulation, gene transfer, and special topics related to development and response to biological and environmental stimuli.—(II.) Britt, Sinha

229. Molecular Biology of Plant Reproduction (3)

Lecture—3 hours. Molecular genetic basis of plant reproduction. Emphasis on understanding developmentally regulated gene expression as it relates to the major changes that occur during plant reproduction and on the genetic control of flowering. Offered in alternate years.

290A. Faculty Seminar (1)

Seminar—1 hour. Seminars presented by members of Plant Biology faculty describing their areas of research. Required of all beginning students in the Plant Biology Graduate Group. (S/U grading only).—I. (I.)

290B. Seminar (1)

Seminar—1 hour. Seminars presented by visiting scientists on research topics of current interest. (S/U grading only).—I, II, III. (I, II, III.)

290C. Research Conference in Botany (1)

Discussion—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and discussion by faculty and graduate students of research projects in botany. May be repeated for credit. (S/U grading only).—I, II, III. (I, II, III.)

291. Graduate Student Seminar in Plant Biology (1)

Seminar—1 hour. Prerequisite: graduate student standing. Student-given seminars on topics in plant biology, with critiques by instructor and peers. How to give a seminar, including preparation of visual and other teaching aids. Topic determined by instructor in charge. May be repeated for credit. (S/U grading only).—II, III. (II, III.)

292. Seminars in Plant Biology (1)

Seminar—1 hour. Prerequisite: consent of instructor. Review of current literature in botanical disciplines. Disciplines and special subjects to be announced quarterly. Students present and analyze assigned topics. May be repeated for credit. (S/U grading only).—II. (II.)

293. Seminar in Postharvest Biology (1)

Discussion—1 hour. Prerequisite: consent of instructor; open to advanced undergraduates. Intensive study of selected topics in the postharvest biology of fruits, vegetables, and ornamentals. May be repeated for credit. (S/U grading only).—I, II, III. (I, II, III.)

297T. Tutoring in Plant Biology (1-5)

Tutorial—3-15 hours. Offers graduate students, particularly those not serving as teaching assistants, the opportunity to gain teaching experience. (S/U grading only.)

298. Group Study (1-5)

May be repeated up to 4 times for credit. (S/U grading only.)

299. Research (1-12)

Prerequisite: graduate standing. (S/U grading only.)

Professional Course**390. The Teaching of Plant Biology (2)**

Discussion—2 hours. Prerequisite: graduate standing; concurrent appointment as a teaching assistant in Plant Biology. Consideration of the problems of teaching botany, especially of preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. (S/U grading only.)—I, II, III. (I, II, III.)

Graduate Study. The Department of Plant Pathology offers programs of study and research leading to the M.S. and Ph.D. degrees. Information can be obtained from the graduate adviser. See also the Graduate Studies section in this catalog.

Graduate Advisers. J.M. Duniway, L. Epstein, T.R. Gordon, P.C. Ronald.

Courses in Plant Pathology (PLP)**Lower Division Course****40. Edible Mushroom Cultivation (2)**

Lecture—1 hour; laboratory/discussion—3 hours. Prerequisite: Biological Sciences 10 or Microbiology 20 recommended. Principles and practices of growing edible mushrooms, including culture maintenance, basic mushroom substrate preparation, composting, spawn generation techniques, inoculation methods, harvesting, and pests and pest management.—II. (II.) Davis

Upper Division Courses**120. Introduction to Plant Pathology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1C; Microbiology 102 recommended. The nature, cause, and control of plant diseases.—I, III. (I, III.) Duniway, Falk, Gilbertson, Bostock

123. Plant-Virus-Vector Interaction (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1C, 101; Plant Biology 105, course 120, and Entomology 100 recommended. Analysis of the interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern experimental approaches to the interdiction of viral movement. Offered alternate years. (Same course as Entomology 123/Plant Biology 123.)—I. Lucas, Gilbertson, Ullman

130. Fungal Biotechnology and Biochemistry (3)

Lecture—3 hours. Prerequisite: Plant Biology 119, Biological Sciences 103. How fundamental physiological and biochemical activities of fungi impact the destructive and beneficial roles of these organisms in nature. Utilization and manipulation of fungi for biotechnological and industrial applications.—II. (II.) Gilchrist, Bostock

135. Field Identification of Mushrooms (1)

Field work; three-day mandatory field trip. Prerequisite: introductory course in biological sciences; course in mycology recommended. Collection and identification of mushrooms and other fleshy fungi based on macro and microscopic features. (P/NP grading only.)—II. (II.) Davis

140. Agricultural Biotechnology, Ethics and Public Policy (4)

Lecture—3 hours; term paper or discussion—1 hour. Examination of agricultural biotechnology within a moral/ethical framework. Public policy development and implementation. GE credit: Sci-Eng. Wrt.—III. (III.) Bruening

148. Introductory Mycology (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Biology 148.)—I. MacDonald, Rizzo

150. Fungal Ecology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C or equivalent. The ecological roles of fungi as saprobes, mutualists and parasites in native and managed ecosystems. Physiological and reproductive strategies associated with adaptations to diverse habitats.—II. (II.) Gordon

151A-151B. Fungal Biodiversity in Natural Environments (4-4)

Lecture—1 hour; laboratory—6 hours; field work—three or four one-day-long weekend field trips. Prerequisite: introductory course in mycology (e.g., Plant Biology 148/course 148); Plant Pathology 150 (may be taken concurrently). Fungal biodiversity within a natural habitat. Fungi collected on field trips will be identified during laboratory periods. The ecological roles of the various fungal taxa are emphasized. Offered in alternate years.—(II-III.) MacDonald

185. Advanced Mushroom Taxonomy (2)

Laboratory/discussion—3 hours; fieldwork—1 hour. Prerequisite: course 135 or 148, and Biological Sciences 101 or the equivalent. Microscopic and molecular methods used in the identification of mushroom species; molecular characterization including PCR-amplification of ribosomal nuclear DNA, digestion of the product with restriction enzymes, and DNA sequencing; a one-day field trip is required. Offered in alternate years.—I. Davis

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: course 120 and consent of instructor. Work experience off and on campus, supervised by a member of the faculty. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**205A-205B. Diseases of Vegetable and Field Crops (4-1)**

Lecture—2 hours; laboratory—3 hours; fieldwork—6 hours; research term paper. Prerequisite: course 120; Plant Biology 119 or course 125. Study of vegetable and field crops with emphasis on diagnosis, epidemiology, and control. Lectures on diagnostic techniques, seed pathology, disease assessment and crop loss, and integrated disease management. Field trips and laboratory exercises related to disease diagnosis. (Deferred grading only, pending completion of sequence.)—III-summer. (III-summer.)

206A-206B. Diseases of Fruit, Nut, and Vine Crops (3-1)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 120; Plant Biology 119. Course 205 may be taken concurrently. Clinical study of fruit, nut, and vine crops diseases with emphasis on etiology, epidemiology, diagnosis, and control. Offered in alternate years. (Deferred grading only, pending completion of sequence.)—III-summer. (III-summer.)

208. Ecology of Plant Pathogens and Epidemiology of Plant Diseases (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 120 or the equivalent. Interaction between higher plants, plant pathogens, and the environment which is important in the occurrence and severity of plant disease. Emphasis is placed on the population dynamics and ecology of plant pathogens in the aerial and soil environment. Offered in alternate years.—III. Duniway

209. Principles of Plant Disease Control (3)

Lecture—3 hours. Prerequisite: course 120 or the equivalent. Discussion of the underlying principles and methods used for the control of plant diseases. Emphasis placed on application of epidemiological principles, biological (including host resistance), and chemical strategies to achieve disease control. Offered in alternate years.—II.

210. Biochemistry and Molecular Biology of Plant-Microbe Interaction (4)

Lecture/discussion—4 hours. Prerequisite: Biological Sciences 101, 102, 103, and 104, or the equivalent. Discussion of plant-microbe interactions, focused on the underlying cellular, biochemical, and molecular events that determine the diseased state. Offered in alternate years.—I. Gilchrist, Bostock

215X. Genetics and Molecular Biology of Plant Pathogens (4)

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 120 and Biological Sciences 101. Genetic analysis of pathogenicity, cultivar-specificity, and host-specificity in plant pathogens, particularly fungi; application of molecular biology to the isolation and characterization of the genes involved; and to aspects of pathogen identification; emphasis on research techniques and problem-solving. Offered in alternate years.—(II.)

217. Molecular Genetics of Fungi (3)

Lecture—3 hours. Prerequisite: graduate standing in a biological science, Biological Sciences 101, 103, Molecular and Cellular Biology 161, Plant Biology 119, courses 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; plant pathogenesis; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. Offered in alternate years. (Same course as Biological Chemistry 217.)—II. Holland

222. Experimental Approaches in Plant Pathology (2)

Lecture—2 hours. Prerequisite: course 120 or the equivalent. Experimental approaches, methods of analysis and techniques used in current research in plant pathology, particularly with fungi. Avoiding common research pitfalls. Offered in alternate years.—II. Epstein

224. Advanced Mycology (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 148 or Plant Biology 148 or consent of instructor. Systematics, evolution, and ecology of the fungi. Topics include modern techniques and theories on classification of fungi, species concepts, sexual compatibility and vegetative compatibility. Laboratories emphasize various approaches to fungal identification. Offered in alternate years.—III. Rizzo

226. Plant Virology (5)

Lecture—2 hours; laboratory—9 hours. Prerequisite: consent of instructor. Viruses as causal agents of plant diseases; chemical and physical properties of viruses; methods of transmission; procedures for assay and diagnosis; multiplication of viruses; pathological cytology and anatomy; application of equipment and techniques used in research. Offered in alternate years.—II. Bruening, Falk, Gilbertson

228. Plant Bacteriology (5)

Lecture—2 hours; laboratory—9 hours. Prerequisite: course 120; Microbiology 2 or the equivalent; Biological Sciences 102, 103. Study of bacteria which have a saprophytic, symbiotic, or parasitic association with higher and lower plants. Clinical and molecular methods for identification and classification of these bacteria. Offered in alternate years.—(I.) Kirkpatrick, Gilbertson

290. Seminar (1)

Seminar—1 hour. Review and evaluation of current research in plant pathology. (S/U grading only.)—I, II, III. (I, II, III.)

290C. Advanced Research Conference (1)

Seminar—1 hour. Prerequisite: course 120 or consent of instructor. Presentation, evaluation, and critical discussions of research activities in the area of advanced plant pathology; primarily designed for graduate students. (S/U grading only.)—I, II, III. (I, II, III.)

291. Seminar in Molecular Plant Pathology (1)

Seminar—1 hour. Prerequisite: course 120 or consent of instructor. Review and evaluation of current literature and research in biochemistry and molecular biology of plant microbe interactions. May be repeated for credit. (S/U grading only.)—I, II. (I, II.) Bostock, Gilchrist, Cook, VanAlfen

293. Seminar on Soil Microbiology and Root Diseases (1)

Seminar—1 hour. Prerequisite: course 120. One of the students or faculty members introduces a topic based on one or more papers read by the students, and then leads the discussion on this topic. (S/U grading only.)—II. (II.) Duniway, Epstein

294. Seminar on Plant Epidemiology (1)

Seminar—1 hour. Prerequisite: course 120. One of the students or faculty members introduces a topic, based on one more papers on plant epidemiology read by the participants, and then leads the discussion on this topic. May be repeated for credit. (S/U grading only.)—I. (I.) Duniway

295. Seminar in Mycology (1)

Seminar—1 hour. Review and evaluation of current literature and research in mycology. May be repeated for credit. (S/U grading only.)—III. (III.) Rizzo

298. Special Group Study (1-5)

299. Research (1-12)
(S/U grading only.)

Plant Physiology

See Biological Sciences—Plant Biology; Plant Biology; and Plant Biology (A Graduate Group)

Plant Protection and Pest Management (A Graduate Group)

B.C. Kirkpatrick, Ph.D., Chairperson of the Group
Group Office, 367 Briggs Hall (530-752-0475)

Faculty. Includes faculty members from the Colleges of Agricultural and Environmental Sciences and Letters and Science.

Graduate Study. The Graduate Group in Plant Protection and Pest Management offers programs of study and research leading to the M.S. degree. Students may conduct independent research or participate in on-going projects on integrated crop management and sustainable agriculture. Weeds, insects, plant pathogens, nematodes, rodents, and other pests are treated as parts of complex ecosystems and not as isolated problems. Courses include concepts and systems of plant protection and pest management, diagnosis and control of plant pest problems, toxicology and legal ramifications, and equipment for pest control operations. Detailed information can be obtained from the Group Chairperson and the application for Graduate Admission and Fellowship.

Graduate Adviser. B.C. Kirkpatrick (*Plant Pathology*).

Courses in Plant Protection and Pest Management (PPP)

Graduate Courses

201. Concepts and Systems of Plant Protection and Pest Management (4)

Lecture—2 hours; discussion—1 hour; laboratory—2 hours. Prerequisite: Agricultural Systems and Environment 120, Entomology 110, Plant Pathology 120, Plant Biology 120 (may be taken concurrently), Nematology 100; Plant Biology 117 or Evolution and Ecology 101 recommended. Ecological perspectives of agricultural systems, the role of pests and pest management in these systems, and the monitoring and modeling of the systems. Offered in alternate years.—(II.) Webster

202A-202B. Diagnosis of Plant Pest Problems and the Control of Causal Agents (4-4)

Discussion—1 hour; fieldwork—9 hours. Prerequisite: Entomology 110, Plant Pathology 120, Plant Biology 120, Nematology 100 (may be taken concurrently). Problems and assessment of losses caused by insects, pathogens, weeds, nematodes, and other pests. Methods of determining infestation levels and establishing economic thresholds, and control of these pests with emphasis on integration of available management practices into programs.—I-III. (I-III.) Rosenheim

290. Seminar (1-2)

(S/U grading only.)

298. Group Study (1-5)

299. Research (1-12)

(S/U grading only.)

The Major Programs

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

The Program. The Department of Political Science offers two major programs: political science and political science–public service. The political science major aims to provide the student with a broad understanding of political concepts, political institutions, political behavior, and political processes. The political science–public service major is for students who desire opportunities for practical hands-on experience in their major. It differs in particular from the political science major in its internship requirement and its focus on the American political system.

Internships and Career Alternatives. Both the proximity of UC Davis to the state capitol and the programs offered by the UC Davis Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and

political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

Political Science

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	28
Political Science 1	4
Two courses from Political Science 2, 3, 4, 5, 7	8
(Course 7 may not be taken if course 5 is taken.)	
Statistics 13 (or equivalent)	4
Political Science 111	4
Two courses from History 3, 4A, 4B, 4C, 10, 11A, 11B, 11C, 121A, 121B, 121C, 131A, 131B, 131C, 133, 134A, 134B, 145, 146A, 146B, 147A, 147B, 147C, 151A, 151B, 151C, 151D	8
Depth Subject Matter	36
Select two courses in each of three fields, listed below. The fields must be chosen from at least two Groups, A, B, or C ...24	
Group A	
Field (1) <i>Political theory</i> : Political Science 112–119, 187	
Group B	
Field (2) <i>American government and institutions</i> : Political Science 100–109, 171, 174–175, 180–187, 195	
Field (3) <i>Parties and political behavior</i> : Political Science 160–170, 176	
Field (4) <i>Public law</i> : Political Science 150–155	
Group C	
Field (5) <i>Comparative government</i> : Political Science 126, 140–149, 178–179	
Field (6) <i>International relations</i> : Political Science 120–139	
Additional upper division units in political science to achieve a total of 36	12
Only 5 units of Political Science 192 (internship) may be counted towards the 36-unit requirement; and Political Science 192A, 192B, or 192W may not be counted toward a field requirement.	
Total Units for the Major	64

Political Science—Public Service

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	20
One course from Political Science 1, 5, or 7	4
Two courses from Political Science 2, 3, or 4	8
Statistics 13 (or equivalent)	4
Political Science 111	4
Recommended: Economics 1A-1B.	
Depth Subject Matter	45-50
Core program	12
Two courses chosen from Political Science 100, 104, 105, 106, 113, 180; and one course from Political Science 108, 109, 114.	
Internship, Political Science 192A, 192B, or 192W	7-10
Research paper, Political Science 193	2-4
Fields of concentration	24
Select six upper division courses from two or three fields of concentration listed below with at least two courses in each field selected; at least 16 of the units must be in political science. (Core Program courses may not be counted toward this requirement.)	

Fields of Concentration

Field (1) *Policy formulation*: Political Science 100, 104, 105, 106, 108, 109, 160, 161, 162, 163, 164, 165, 166, 168, 170, 171, 174, 175, 195; Economics 130

Field (2) *Policy implementation and evaluation*: Political Science 180, 183, 187; Economics 131

Field (3) *Policy interpretation—Substance and procedures (public/pre-law)*: Political Science 150, 151, 152, 153, 155

Field (4) *Policy areas*:

a) Urban policy and implementation: Political Science 100, 102, Environmental Horticulture 110, Environmental Science and Policy 173

b) Environmental policy and implementation: Political Science 107, Environmental Science and Policy 160, 161, 166, 168A-168B, 172, 179

c) Environmental policy and implementation: open field that might include courses relevant to health care, welfare, education, community development, transportation, science and technology, etc. (requires approval of Political Science—Public Service adviser)

Total Units for the Major

68

Major Advisers. Consult Department Office.

Minor Program Requirements:

Students electing a minor in Political Science may choose one of two plans.

UNITS

Political Science

24

Select one plan.

Plan I: upper division units in political science (may include 4 units of lower division course work) distributed among at least two of the three Groups, A, B, and C

Plan II: a 24-unit plan approved by a faculty adviser. Five units of internship may count toward the minor.

Public Affairs Internship Program. This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Intern Coordinator, Political Science Department, 1263 Social Sciences and Humanities Building, 752-3077.

Teacher Credential Subject Representative. Consult Departmental Office. See also the section on the Teacher Education Program.

Graduate Study. The Department of Political Science offers programs of graduate study and research leading to the M.A./J.D. and Ph.D. degrees. Students are admitted for the joint M.A./J.D. program in coordination with the UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator Office.

Graduate Adviser. Consult Graduate Program Coordinator Office.

American History and Institutions. This University requirement may be satisfied by passing any one of the following Political Science courses: 1, 5, 100, 101, 102, 103, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163. (See also under University requirements.)

Courses in Political Science (POL)

Lower Division Courses

1. American National Government (4)

Lecture—3 hours; discussion—1 hour. Survey of American national government, including the constitutional system, political culture, parties, elections, the presidency, Congress, and the courts. GE credit: SocSci, Wrt.—I, II, III. (I, II, III.)

2. Introduction to Comparative Politics (4)

Lecture—3 hours; discussion—1 hour. Introduction to basic concepts in political analysis and application of them in comparative studies of selected countries. Coverage is given to cultural and other informal dimensions of politics as well as to more formal political and governmental structures. GE credit: SocSci, Wrt.—I, III. (I, III.)

3. International Relations (4)

Lecture—3 hours; discussion—1 hour. International conflict and cooperation, including the Cold War, nuclear weapons, and new techniques for understanding international politics. GE credit: SocSci, Wrt.—I, II, III. (I, II, III.)

4. Basic Concepts in Political Theory (4)

Lecture—3 hours; discussion—1 hour. Analysis of such concepts as the individual, community, liberty, equality, justice, and natural law as developed in the works of the major political philosophers. GE credit: SocSci, Wrt.—I. (I.)

5. Contemporary Problems of the American Political System (4)

Lecture—3 hours; discussion—1 hour. In-depth treatment of selected problems and issues of American politics, governmental institutions, and policies. GE credit: SocSci, Wrt.—II. (II.)

7. Contemporary Issues in Law and Politics (4)

Seminar—4 hours. A seminar which focuses on the political dimensions of American law and institutions. Examines the role of courts in resolving contemporary issues of law and politics including abortion, capital punishment, and civil rights. Limited enrollment. Open to students having no more than 40.1 units. GE credit: SocSci, Wrt.—III.

90X. Lower Division Seminar (4)

Seminar—4 hours. Prerequisite: lower division standing and consent of instructor. Examines fundamental issues and concepts that shape the study and practice of politics. Students will read, discuss and write about some of the most significant texts in political science in order to develop a foundation for the study of politics. Limited enrollment.

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

100. Local Government and Politics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing or consent of instructor. Politics and government of local communities in the United States, including cities, counties, and special districts. Emphasizes sources and varieties of community conflict, legislative and executive patterns, expertise, decision making, and the politics of structure. Observation of local governing boards. GE credit: SocSci, Wrt.

102. Urban Public Policy (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing in Political Science or consent of instructor. Political and economic relationships among central cities, suburbs, and regional, state, and federal governments. Focuses upon policy areas such as poverty, transportation, welfare, and housing, and upon who governs and who benefits from the policies in these areas. GE credit: SocSci, Wrt.—I. (I.)

104. California State Government and Politics (4)

Lecture—3 hours; research paper. Prerequisite: course 1. The California political system. Political culture, constitution, elections and parties, direct democracy, legislature, governor, executive branch, courts, finances, state-local relations, and policy issues.

105. The Legislative Process (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Analysis of the legislative process with emphasis on the United States Congress; legislative organization and procedures, legislative leadership and policy making, legislators and constituents, relations between Congress and other agencies. GE credit: SocSci, Wrt.—II. (II.)

106. The Presidency (4)

Lecture—3 hours; discussion—1 hour; optional term paper. Prerequisite: course 1. The American presidency's origins and development; presidential power and influence as manifest in relationships with Congress, courts, parties, and the public in the formulation and administration of foreign and domestic policy; nominations, campaigns, and elections. GE credit: SocSci, Wrt.—II, III. (I, III.)

107. Environmental Politics and Administration (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Introduction to the environment as a political issue in the United States and to the development of administrative mechanisms for handling environmental problems. Changing role of Congress, the presidency, the bureaucracy, and the courts in environmental policy formulation and implementation. GE credit: SocSci, Wrt.—III. (II.)

108. Policy Making in the Public Sector (4)

Lecture—3 hours; research paper. Prerequisite: course 1. The theoretical rationale for governmental activity, program evaluation, PPBS, positive theories of policy making, the quantitative study of policy determinants, implementation, and proposals for improved decision making. GE credit: SocSci, Wrt.

109. Public Policy and the Governmental Process (4)

Lecture—3 hours; research paper. Prerequisite: course 1. The processes of formulating public policy, including individual and collective decision making, political exchange, competition, bargaining, coalition formation and the allocation of public goods, resources and opportunities. GE credit: SocSci, Wrt.—I.

111. Systematic Political Science (4)

Lecture/discussion—4 hours. Philosophical basis of modern political science; major specific approaches; selected concepts relevant to modern political concerns; and research design and execution.—I, III. (I, III.)

112. Contemporary Democratic Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4. Major contemporary attempts to reformulate traditional democratic theory; attempts to replace traditional theory by conceptual models derived from modern social science findings. Offered in alternate years. GE credit: SocSci, Wrt.

113. American Political Thought (4)

Lecture—3 hours; term paper. Prerequisite: course 4. Origins and nature of American political thought. Principles of American thought as they emerge from the founding period to the present. GE credit: SocSci, Wrt.

114. Quantitative Analysis of Political Data (4)

Lecture—3 hours; term paper. Logic and methods of analyzing quantitative political data. Topics covered include central tendency, probability, correlation, and non-parametric statistics. Particular emphasis will be placed on understanding the use of statistics in political science research. Offered in alternate years. GE credit: SocSci, Wrt.

115. Medieval Political Thought (4)

Lecture—3 hours; term paper. Prerequisite: course 118A. Examination of the ideas central to medieval political thinking. Emphasis will be upon the thoughts of the major political thinkers of the period, rather than upon political history. GE credit: SocSci, Wrt.

116. Foundations of Political Philosophy (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 4. Analysis and evaluation of the seminal works of a major political philosopher or of a major problem in political philosophy. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: SocSci, Wrt.

117. Marxism (4)

Lecture—3 hours; discussion—1 hour. Examination of the political and social philosophy of Karl Marx, with reference to the evolution of Marxism in the nineteenth and twentieth centuries.

118A. History of Political Theory (4)

Lecture—3 hours; term paper. Prerequisite: course 4. Critical analyses of the works of major political philosophers. Classical and medieval political philosophy—Plato, Aristotle, Cicero, St. Thomas. GE credit: SocSci, Wrt.—I. (I.)

118B. History of Political Theory (4)

Lecture—3 hours; special assignments. Prerequisite: course 4. Critical analyses of the works of major political philosophers. Modern political philosophy—Machiavelli, Hobbes, Locke, Rousseau, Burke. GE credit: SocSci, Wrt.—II. (II.)

118C. History of Political Theory (4)

Lecture—3 hours; term paper. Prerequisite: course 4. Critical analyses of the works of major political philosophers. Nineteenth and twentieth centuries: Hegel, Tocqueville, Mill, Marx, Nietzsche, Sartre. GE credit: SocSci, Wrt.—III. (III.)

119. Modern Political Thought (4)

Lecture—3 hours; term paper. Prerequisite: course 4. Study in depth of philosophers considered central to modern political thought, especially nineteenth and twentieth century political thought. Emphasis will be upon an individual philosopher or concept rather than upon a survey of modern political thought.

120. Theories of International Politics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3, upper division standing or consent of instructor. Major contemporary approaches to the study of international politics, including balance of power, game theory, Marxist-Leninist theory, systems theory, and decision-making analysis.

121. The Scientific Study of War (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3, course 111 or Statistics 13, upper division standing. Analysis of political processes involved in the initiation, conduct and termination of modern interstate warfare. GE credit: SocSci, Wrt.—II. (I.) Gartner

122. International Law (4)

Lecture—4 hours. Prerequisite: course 3. Selected topics in international law; territory, sovereign immunity, responsibility, the peaceful settlement or nonsettlement of international disputes. GE credit: SocSci, Wrt.—III. (III.)

123. The Politics of Interdependence (4)

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor. In the past several decades, growing economic interdependence has generated new problems in international relations. Course deals with difficulties in managing complex interdependence and its implications on national policies and politics. GE credit: SocSci, Wrt.—II, III. (II, III.)

124. The Politics of Global Inequality (4)

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing; course 123 recommended. Long-standing division of the global system into richer and poorer regions poses many important problems in international political economy. Course presents a theoretical background to North-South issues and analyses of current problems in economic and political relations. GE credit: SocSci, Div, Wrt.—I, III. (I.)

126. Ethnic Self-Determination and International Conflict (4)

Lecture—3 hours; individual meetings with students to discuss term papers. Prerequisite: course 3. Compares the claims of the state and ethnic peoples in countries undergoing internal conflicts, e.g., South Africa, Northern Ireland. Analyzes the role of the international community in facilitating the peaceful resolution of conflicts. GE credit: SocSci, Div, Wrt.—I. (I.)

129. Special Studies in International Politics (4)

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing. Intensive examination of one or more special problems in international politics. May be repeated once for credit when different topic is studied. GE credit: SocSci, Wrt.—II. (II.)

130. Recent U.S. Foreign Policy (4)

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor.

Broad survey of the development of U.S. foreign policy in twentieth century with emphasis on transformation of policy during and after World War II, and the introduction to analytic tools and concepts useful for understanding of current foreign policy issues. GE credit: SocSci, Wrt.—III. (III.)

131. Analysis of U.S. Foreign Policy (4)

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor. Detailed presentation and examination of the formulation of execution of U.S. foreign policy. Survey of numerous factors influencing policy outcomes and how such determinants vary according to policy issue areas. GE credit: SocSci, Wrt.

132. National Security Policy (4)

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing. Development of national security policies since 1945. Analysis of deterrence and assumptions upon which it is based. Effects of nuclear weapons upon conduct of war, alliance systems, and the international system. Prospects of security and stability through arms control. GE credit: SocSci, Wrt.—II. (II.)

134. Africa and U.S. Foreign Policy (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 or consent of instructor, upper division standing. Overview of American foreign policy toward Africa. Relationship to global adversaries. Legacies of colonialism. Challenge of national self-determination and white racism. Policies on non-alignment, producer cartels, multinational corporations, continental integration and trade and aid relations.—I. (I.) Rothchild

137. International Relations in Western Europe (4)

Lecture—4 hours. Prerequisite: course 3, upper division standing. Analysis of European unity, problems of the Atlantic alliance, Atlantic political economy, East-West relations, communism in Western Europe and the relationship between domestic politics and foreign policy.—I. (I.)

139. Special Studies in Foreign Policy (4)

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor. Extensive examination of one or more special problems in foreign policy. May be repeated once for credit when topic differs.

140. Comparative Public Policy (4)

Lecture—3 hours; term paper. Prerequisite: course 2. Ideological orientations, institutions, processes, and public policies of modern states. Emphasis on democratic, socialist, communist and fascist experience.

142. Politics and Inequality (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2. Examines the linkages between politics and the distribution of social and economic goods. Topics include the impact of civil rights legislation, the politics of welfare states, and the effects of political participation on the distribution of goods. GE credit: SocSci, Div.—(II.)

144. Russian Politics and Policy (4)

Lecture/discussion—4 hours. Prerequisite: upper division standing and course 2 or consent of instructor. Democratization, state-building and economic reform; creation of new institutions; impacts of Soviet rule.—II.

145. Government and Politics in Emergent Nations (4)

Lecture—4 hours. Prerequisite: course 2. Conceptual study of problems of political organization and procedure in the context of rapid change engendered by social revolution in "emergent countries" and liberation from colonial oppression. Offered in alternate years.

147. Politics and Policy in Western Europe (4)

Lecture—4 hours. Prerequisite: course 2. The evolution, politics, and contemporary problems of selected political systems of Western Europe.

148A. Government and Politics in East Asia: China (4)

Lecture—4 hours. Prerequisite: course 2 or consent of instructor. Evolution of political institutions and

political culture in China with emphasis on the post-1949 period. Primary attention to nationalism, modernization and political efficacy.—I. (I.)

148B. Government and Politics in East Asia: Pacific Rim (4)

Lecture—4 hours. Prerequisite: course 2 or consent of instructor. Establishment and evolution of political cultures and establishment of political institutions in selected countries of the Pacific Rim, namely Japan, Korea, Taiwan. Emphasis on post World War II.—III.

148C. Government and Politics in East Asia: Southeast Asia (4)

Lecture—3 hours; term paper. Prerequisite: course 2 or consent of instructor. Evolution of political culture, institutions, economy of selected nations in Southeast Asia including Vietnam plus two or three other examples. Emphasis on imperialist legacy, nation building in multi-ethnic communities, contrasts between socialist and non-socialist development models. Offered in alternate years.—III.

149. Politics of Development in Africa (4)

Lecture/discussion—4 hours. Prerequisite: course 2 or consent of instructor; course 134 recommended. Political and economic development within Sub-Saharan Africa. States and institutions, democracy, party systems, military coups/rule, bureaucracy/corruption, race/ethnicity, national/regional integrations, trade unions, economic development strategies, class formation, and women's roles and ideology.—Rothchild

150. Judicial Politics and Constitutional Interpretation (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing. Politics of judicial policymaking; issues surrounding constitutional interpretation and decision making; prerequisite for courses on the politics of constitutional law.—II. (I, II.)

151. The Constitutional Politics of the First Amendment and the Right to Privacy (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150. The constitutional politics surrounding such issues as the right to free expression, associational rights, the right to free exercise of religious beliefs, and the right to privacy. GE credit: SocSci, Wrt.—II. (II.)

152. The Constitutional Politics of Equality (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150. Constitutional politics of equality in the American political system; issues surrounding constitutional doctrine and judicial policymaking; special attention on racial and sexual equality. Offered in alternate years. GE credit: SocSci, Div, Wrt.—III. (III.)

153. The Constitutional Politics of the Justice System (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150. Constitutional politics of the American criminal justice system; the issues surrounding constitutional doctrine and judicial policymaking on issues such as search and seizure, arrest, trial, incarceration, and other issues of due process. Offered in alternate years.—III. (III.)

154. Legal Philosophy (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or 4, upper division standing. Analysis of the nature and functions of law; law as an instrument of social control and the relationship between law and morality. Offered in alternate years.

155. Judicial Process and Behavior (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing. Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decision-making bodies. Offered in alternate years. GE credit: SocSci, Wrt.—II. (II.)

160. American Political Parties (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Analysis of the structured operations of the party system in the United States; party functions and organizations, nomination processes, campaigns and elections, party trends and reforms. GE credit: SocSci, Wrt.—II. (II.)

161. Comparative Political Parties (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Organization, operation, governmental function and social bases of political parties especially in Great Britain and France but with some reference to other Western European countries.

162. Elections and Voting Behavior (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Analysis of American elections and partisan behavior; political socialization, political participation, partisanship and individual and group determinants of voting. GE credit: SocSci, Wrt.—I. (I.)

163. Group Politics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Groups, institutions, and individuals, especially in American politics. Historical and analytical treatment of group theories as applied to interest groups (especially labor, business, agriculture, science, military); to racial, ethnic, and sectional groups; to parties, public and legislative groups, bureaucracies. GE credit: SocSci, Wrt.—I. (I.)

164. Public Opinion (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing and course 1 or 5, or consent of instructor. Nature of public opinion in America as it is "supposed to be" and as it is. Distribution of opinions among different publics and the significance of that distribution for system stability and institutions. Opinion polling and its problems. GE credit: SocSci, Wrt.—II. (II.)

165. Mass Media and Politics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Organization of and decision making within the media; media audiences and the effect of the media on attitudes and behavior; the relationship of the government to the media (censorship, secrecy, freedom of the press, government regulation); the media in election campaigns. GE credit: SocSci, Wrt.—I.

166. Women in Politics (4)

Lecture—3 hours; discussion—1 hour or seminar—1 hour. Prerequisite: course 1. The role of women in American politics. Historical experiences; contemporary organizations and strategies; areas of legislative concern; the impact of differences in social class, race, and ethnicity upon the involvement of women in politics. GE credit: SocSci, Div.

168. Chicano Politics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Political aspects of Chicano life in America; examines the Chicano's political role as it has been historically defined by different groups in society and the Chicano's responses to his/her political environment. GE credit: SocSci, Div.

170. Political Psychology (4)

Seminar—3 hours; term paper. Prerequisite: course 1. Social psychological theories of how voters form political attitudes and to what extent such attitudes translate into behaviors.

171. The Politics of Energy (4)

Lecture/discussion—4 hours. Prerequisite: course 1, upper division standing. Analysis of nature and performance of political processes for making energy choices at the international, national and state levels. Emphasizes interaction of energy policy with other political goals and the ability of governmental institutions to overcome constraints on policy innovation.

172. American Political Development (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, some background in American politics is strongly recommended. Systematic analysis of contemporary issues in American political development: historical determinants of political change; the timing and character of institutional development; conditions for successful political action. Topics may include democratization, cultural change, party formation, state-building, constitutionalism, race relations.

174. Government and the Economy (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing in Political Science

or consent of instructor. Political basis of economic policy (taxation, spending and regulation); impact of prices, employment and growth on political demands; elite responses to economic conditions; policy alternatives and the public interest. GE credit: SocSci, Wrt.

175. Science, Technology, and Policy (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Analysis of policymaking for science and the use of scientific expertise for making decisions about technology. Topics include funding of basic research, relationship of science to technological development, science and military policy, technological risks, technology assessment and scientists and politics. GE credit: SocSci, Wrt.—III. (III.)

176. Racial Politics (4)

Seminar—3 hours; term paper. Prerequisite: Course 1. Race, racial attitudes and racial policies in the United States with a specific emphasis on African Americans. GE credit: SocSci, Div.

178. Political Development in Modernizing Societies (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Nature and sequence of political development; its economic and social concomitants; role of elites, military, bureaucracy, and party systems; social stratification and group politics; social mobilization and political participation; instability, violence, and the politics of integration.—I. (I.)

179. Special Studies in Comparative Politics (4)

Seminar—4 hours. Prerequisite: course 2, consent of instructor and upper division standing. Intensive examination of one or more special problems appropriate to comparative politics. May be repeated once for credit.

180. Bureaucracy in Modern Society (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or 2, upper division standing in Political Science or consent of instructor. Role of bureaucracy in a complex society, with emphasis upon changing relationships between government and the economy; consequences of rapid technological and social change for bureaucratic structures and processes; the problems of reconciling expertise and democracy and increasing the responsiveness of public bureaucracy. GE credit: SocSci, Wrt.

183. Administrative Behavior (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. The implications for American public administration of evolving concepts about behavior in organizations.

187. Administrative Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Historical and critical analysis of the principal theories of organization and management of public agencies in the light of such concepts as decision making, bureaucracy, authority and power, communication and control; an examination of the role of government bureaucracies in the total society. GE credit: SocSci, Wrt.—III. (III.)

190. International Relations (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: open to majors in International Relations, or consent of instructor. Analysis and evaluation of substantive issues in contemporary international relations. Readings drawn from current academic and non-academic periodicals.

192A. Internship in Public Affairs (5)

Prerequisite: enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science—Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: SocSci, Wrt.

192B. Internship in Public Affairs (5)

Prerequisite: course 192A; enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science—Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: SocSci, Wrt.

192W. Internship in the UC Davis Washington Center Program (7)

Internship—28 hours. Prerequisite: junior or senior standing, admission in the UC Davis Washington Center undergraduate program, course 193W concurrently. Internship in Washington, DC with associated, supervised research project. (Same course as UC Davis Washington Center 192.) (P/NP grading only.)—I, II, III. (I, II, III.) Blair

193. Research in Practical Politics (2)

Research project—6 hours. Prerequisite: courses 192A, 192B; open only to Political Science—Public Service majors, for whom it is required. Supervised preparation of an extensive paper relating internship experience to concepts, literature, and theory of political science.—I, II, III. (I, II, III.)

193W. Washington Center Research Seminar (4)

Lecture/discussion—1 hour; independent study—3 hours; tutorial—0.5 hour. Prerequisite: course 192W concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as UC Davis Washington Center 193.) GE credit: Wrt.—I, II, III. (I, II, III.) Blair

194HA-194HB. Special Study for Honors Students (4-4)

Seminar—2 hours; independent study—2 hours. Prerequisite: major in Political Science with upper division standing and a GPA of 3.5 in the major. Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence.)—I-II. (I-II.) Scott

195. Special Studies in American Politics (4)

Seminar—4 hours. Prerequisite: consent of instructor and upper division standing. Intensive examination of one or more special problems appropriate to American politics. May be repeated once for credit when topic differs.—I. (I.)

196A. Seminar in American Politics (4)

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in American politics. Topics may include Congress, the Presidency, the Supreme Court, federalism, voting behavior, interest groups, ethnic groups or other topics with a more specialized content than normal course offerings. May be repeated once for credit when topic differs.—I, II, III. (I, II, III.) Stone

196B. Seminar in Comparative Politics (4)

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in comparative politics. Topics may include one country or geographical area, political institutions or behavior across countries, political development, or other topics that are more specialized than normal course offerings. May be repeated once for credit when topic differs.—I, II, III. (I, II, III.) Stone

196C. Seminar in International Relations (4)

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in international relations including study of international political institutions (UN, EU, or NATO) or interstate relations (war, trade, immigration) and other topics with more specialized content than normal course offerings. May be repeated once for credit when topic differs.—I, II, III. (I, II, III.) Stone

196D. Seminar in Political Theory (4)

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in political theory. Topics may include study of a single political thinker, a group of related thinkers, development of political concepts, or other topics with more specialized content than normal course offerings. May be repeated once for credit when topic differs.—I, II, III. (I, II, III.) Stone

196E. Seminar in Research Methods (4)

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor.

Intensive reading, discussion, research, and writing in selected topics in research methods such as research design, statistics, game theory. May be repeated once for credit when topic differs.—I, II, III. (I, II, III.) Stone

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**201. Urban Government and Politics (4)**

Seminar—4 hours. Survey and analysis of the literature in the field of local government and politics in the United States. Approaches to the study of political reform, local autonomy, community power, representation, expertise, service delivery, policymaking and political change. Offered in alternate years.

202. American State Government and Politics (4)

Seminar—4 hours. Survey and analysis of the literature in the field of state government, politics, and policy. Approaches to the study of the American states as political systems, including their governing institutions and processes and their role in the Federal system. Offered in alternate years.

203A. American Government: The Presidency (4)

Seminar—4 hours. Thorough overview of the current research on political executives, with particular emphasis on the American presidency. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.—II. (II.)

203B. American Government: Congress (4)

Seminar—4 hours. Thorough overview of the current research on Congress, with particular emphasis on political representation. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.—III.

203C. American Government: Courts (4)

Seminar—4 hours. Survey and analysis of the literature in the field of American government with a focus on courts. Emphasis on the development and testing of theories of behavior and processes.

207. Environmental Public Policy (4)

Seminar—4 hours. Analysis of the interface between the world of academic reflection about ecological and environmental problems and the world of political action. Evaluation of alternative approaches to policy analysis and recommendation. Individual research, including field research, will parallel discussion of the literature.

208. Policy Analysis (4)

Seminar—4 hours. Social science techniques applied to public policy formation and evaluation.—II. (II.)

209. The American Political System (4)

Seminar—4 hours. Analysis of selected theoretical and empirical issues posed by contemporary research in American government and politics.—II. (II.)

211. Research Methods in Political Science (4)

Seminar—4 hours. Prerequisite: Statistics 13; graduate standing or permission of instructor. Introduction to philosophy of science, research design for experimental and quasi-experimental settings, and data analysis. Topics include: logic of empirical research, measurement problems, research design, sampling, descriptive statistics, tabular analysis, measures of association, and introduction to correlation and regression.—I. (I.)

212. Quantitative Analysis in Political Science (4)

Seminar—4 hours. Prerequisite: course 211. Topics usually covered in an introductory statistics course with an emphasis on applications in political science—descriptive statistics for samples, probability and probability distributions, hypothesis testing,

ANOVA, bivariate regression, and introduction to multiple regression.—II. (II.)

213. Quantitative Analysis in Political Science II (4)

Seminar—4 hours. Prerequisite: courses 211, 212. More advanced topics in the use of statistical methods, with emphasis on political applications. Topics include: properties of least squares estimates, problems in multiple regression, and advanced topics (probit analysis, simultaneous models, time-series analysis, etc.)—III. (III.)

214A-214B. Research in Political Science (2-2)

Seminar—2 hours. Prerequisite: courses 211, 212. Research seminar sequence required of all Ph.D. students. Design, execution and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)—II, III. (II, III.)

215. Introduction to Modeling Political Behavior (4)

Seminar—3 hours. Prerequisite: courses 211 and 212. Introduction to formal and game theoretic analyses of politics. Students will learn basic game theory and modeling skills. We examine the benefits of modeling, and look at examples of formal analysis in a variety of political science sub-fields. Offered in alternate years.—I. (I.)

216. Qualitative Research Methods (4)

Seminar—3 hours; term paper. Methodology for utilizing theoretically-oriented case studies and controlled comparison of a small number of cases to develop and test theories. Examination of how the case study method complements experimental, statistical and deductive modes of research. Offered in alternate years.

217. Social Choice Theory and Spatial Modeling (4)

Seminar—4 hours. Introduction to social choice theory and formal spatial modeling including Arrow's Theorem, the paradox of voting, cycling and agenda control. Focus on mastering modeling techniques as well as interpretation of classic works. Offered in alternate years.

218. Topics in Political Theory (4)

Seminar—3 hours; term paper. Topics will vary and may be the work of a single theorist, time period, or political concept, such as justice. Offered in alternate years.—II.

219A. Political Theory Sequence (4)

Seminar—3 hours; term paper. Survey of the great works in ancient and medieval political theory including such writers as Plato, Aristotle, Cicero, St. Augustine, Aquinas, Alfarabi and Marsilius. Discussion of various interpretations of these authors. Offered in alternate years.—II. (II.)

219B. Political Theory Sequence (4)

Seminar—3 hours; term paper. Survey of the great works in early modern to contemporary political theory including such writers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls. Discussion of various interpretations of these authors. Offered in alternate years.—I. (III.)

223. International Relations (4)

Seminar—3 hours; term paper.—I. (I.)

225. The International System (4)

Seminar—3 hours; term paper. Analysis of the international system by means of theory formulation and integration; critique of research designs; use of various techniques of data generation and analysis.—(III.)

226. Seminar in International Political Economy (4)

Seminar—4 hours. Research in international political economy. Structure of the global economy, as well as specific dimensions of international economic relations, including trade, capital flows, global production structures, and migration. Offered in alternate years.—III.

230. American Foreign Policy (4)

Seminar—3 hours; term paper.—III. (III.)

231. U.S. Political Culture and Foreign Relations (4)

Seminar—3 hours; term paper. Relates U.S. political culture to formulation of foreign policy. Analyzes American ideological preferences in historical perspective, contemporary public opinion, decision-making and implementation. Concludes by examining linkages between foreign policy behavior and democratic process. Offered in alternate years.—II. (II.)

241. Communist Political Systems (4)

Seminar—4 hours. Prerequisite: course 141 or the equivalent, or consent of instructor. Systematic analysis of selected topics dealing with the political process of communist political systems.

242. Seminar in Comparative Politics (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Systematic survey of theories and methods used in the study of comparative politics.

243. Comparative Institutional Change (4)

Seminar—4 hours. Comparison of institutional changes in countries of the former Soviet Union and Eastern Europe during the period of transition to democracy. Special attention to institutions of mass representation—electoral and party systems and national legislatures. Offered in alternate years.

246. Policymaking in Third-World Societies (4)

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. Included in an analysis of policymaking process in Third-World countries are such topics as political resources, institutional resources, decision making, resource allocations, planning, and budgeting, implementation, and distribution of world resources. Offered in alternate years.

250. Policy Development and Impact in U.S. Courts (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing. Thorough overview of the literature regarding courts as policymaking institutions of government, with emphasis on the formation and implementation of judicial policy. Differences and similarities across the judicial, congressional, and executive branch policy processes. Offered in alternate years.

260. Political Parties (4)

Seminar—3 hours; term paper. Survey of selected topics in American and comparative parties.

261. Political Behavior (4)

Seminar—3 hours; term paper. Survey of selected topics in political behavior and public opinion.—III. (III.)

274. Political Economy (4)

Seminar—4 hours. Politics of economic policy as reflected in taxation, spending and regulation; impact of prices, employment, and growth on political demands; government responses to economic conditions; electoral politics and the political business cycle. Offered in alternate years.—III. (III.)

283. Organizational Behavior (4)

Seminar—4 hours. Organizational behavior as it relates to public sector decision making.

290A. Research in American Government and Public Policy (4)

Seminar—4 hours. Special research seminar on selected problems and issues in the study of American government and public policy.—I, II, III. (I, II, III.)

290B. Research in Political Theory (4)

Seminar—4 hours. Special research seminar on selected problems and issues in the study of political theory.—I, II, III. (I, II, III.)

290C. Research in International Relations (4)

Seminar—4 hours. Special research seminar on selected problems and issues in the study of international relations.—I, II, III. (I, II, III.) Money

290D. Research in Judicial Politics (4)

Seminar—4 hours. Prerequisite: graduate standing in political science or consent of instructor. Contemporary research on judicial politics, judicial institutions, jurisprudence, and judicial behavior.—I, II, III. (I, II, III.)

290E. Research in Political Parties, Politics, and Political Behavior (4)

Seminar—4 hours. Special research seminar on selected problems and issues in the study of political parties, politics, and political behavior.—I, II, III. (I, II, III.)

290F. Research in Comparative Government and Policy (4)

Seminar—4 hours. Special research seminar on selected problems and issues in the study of comparative government and policy.—I, II, III. (I, II, III.)

297. Internships in Political Science (2)

Seminar—2 hours. Prerequisite: open only to persons who have internships or other positions in governmental agencies, political parties, etc.

Application and evaluation of theoretical concepts through work experience or systematic observation in public and political agencies. May be repeated for credit. (S/U grading only.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

299D. Directed Reading (1-12)

(S/U grading only.)

Professional Course**390. The Teaching of Political Science (1)**

Seminar—1 hour. Prerequisite: graduate student standing in Political Science. Methods and problems of teaching political science at the undergraduate level. (S/U grading only.)—I, II, III. (I, II, III.)

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Related Major Programs. See the majors in Plant Biology, Agricultural Systems and Environment, Crop Science and Management, and Biotechnology.

Related Courses. Pomology faculty also teach the following courses that contribute to majors and graduate programs in Agricultural Systems and Environment, Horticulture, and Plant Biology:

Agricultural Systems and Environment 1, 98, 107, 160, 170A, 170B, Biological Sciences 1C, Horticulture 203, Hydrologic Science 124, Integrated Studies 9, Plant Biology 119, 144, 151, 153, 158, 160, 161A, 171, 172, 172L, 173, 174, 175, 196, 201, 202, 208, 214, 290A, 291, 293, Science and Society 90C, 90X.

Graduate Study. For graduate study related to the field of pomology, see the M.S. degree program in Horticulture and Agronomy and the M.S. and Ph.D. degree programs in the graduate groups of Plant Biology, Ecology, and Genetics.

Courses in Pomology (POM)

Lower Division Courses**10. Fruits and Nuts of California and the World (3)**

Lecture—3 hours. Field trip on seventh Saturday of quarter (1/2 day). Biological and environmental principles of tree-crop agriculture emphasizing California production. Topics include temperate and subtropical species, biotechnology and genetic improvement, environmental physiology, plant and crop growth, pest and disease control, consumer issues. GE credit: SciEng.—II. Polito

92. Internship in Pomology (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on and/or off campus in the production and management of orchard crops or closely related enterprises. (P/NP grading only.)

Upper Division Courses**162. Field Course in Tropical Ecology and Sustainable Agricultural Development (11)**

Lecture—15 hours; discussion—7.5 hours; fieldwork—30 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Students accepted based on academic merit, personal experience, and academic discipline to provide a multidisciplinary atmosphere. Course in Panama. Sustainable agricultural systems to protect tropical rainforest ecosystems, sustainable agriculture in the Panama Canal watershed, language and culture of Panama and the U.S.A. (Same course as International Agricultural Development 162.) GE credit: SciEng, Div, Wrt.—Potter, Brown

192. Internship in Pomology (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on and off campus in the production and management of orchard crops or closely related enterprises. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**212. Postharvest Biology and Biotechnology of Fruits and Nuts (3)**

Lecture—3 hours. Prerequisite: Plant Science 112 or the equivalent. Review of postharvest biology of fruits and nuts in relation to biotechnological procedures used in handling, emphasizing research needs. Offered in alternate years.—(III.) Kader, Mitcham

290. Seminar (1)

Seminar—1 hour. (S/U grading only.)—I, II, III. (I, II, III.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Graduate Study. The Graduate Group in Population Biology emphasizes programs of study and research leading to the Ph.D. degree. The Group concentrates on population biology as the broad discipline that blends ecology, evolution, population genetics and systematics into a unified field. The course curriculum consists of first-year core courses offered by the Group faculty, seminars, and advanced courses in population biology, and related disciplines, chosen in consultation with a guiding committee.

Graduate Adviser. Consult the Population Biology Graduate Group Office.

Courses in Population Biology (PBG)

Graduate Courses

200A. Principles of Population Biology (5)

Lecture—3 hours; discussion—2 hours. Prerequisite: course 231 concurrently and consent of instructor. Principles of single-species ecology and evolution. Topics include ecology of individuals, population growth models, structured populations, life history strategies, stochastic populations, basic population genetics theory, deleterious alleles in natural populations, and molecular population genetics.—I. (I.)

200B. Principles of Population Biology (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: course 200A, 231. Principles of multi-species communities. Topics include competition, mutualism, metapopulations, food webs and trophic cascades, interactions between simple ecological communities, island biogeography, succession, and large-scale patterns.—II. (II.)

200C. Principles of Population Biology (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: course 200B. Principles of microevolution and macroevolution. Topics include evolutionary quantitative genetics, analysis of hybrid zones, speciation, the fossil record, biogeography, and phylogeny reconstruction.—III. (III.)

203. Advanced Evolution (3)

Lecture—1 hour; discussion—2 hours. Prerequisite: graduate standing. Adaptation and speciation, and biochemical and morphological evolution in plants and animals with emphasis on the appropriateness of different methods of analysis. Offered in alternate years.—(II.) Gottlieb

206. Ecology of Insect Parasitoids (4)

Lecture—3 hours; seminar—1 hour. Prerequisite: introductory animal ecology or behavior. Insect parasitoids will be investigated as model systems to address current topics in behavioral, population, and evolutionary ecology. Theory will be synthesized and critical empirical tests of ecological hypotheses emphasized. (Same course as Entomology 206.) Offered in alternate years.—Rosenheim

207. Plant Population Biology (3)

Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: advanced undergraduate ecology course (e.g., Environmental Science and Policy 100, Evolution and Ecology 101, Entomology 104, Plant Biology 117), and advanced undergraduate course in genetics and/or evolution (e.g., Biological Sciences 101 or Evolution and Ecology 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as Ecology 207.) Offered in alternate years.—II. Rice

212. Topics in Invertebrate Evolution (2)

Seminar—2 hours. Prerequisite: graduate standing or consent of instructor and Evolution and Ecology 112-112L; courses in evolutionary biology, systematics, and ecology highly recommended. Advanced seminar that critically examines problems relevant to evolutionary patterns among the invertebrates. May be repeated for credit when topic differs. (S/U grading only.)—III. (III.) Grosberg, Stachowicz

220. Spatio-Temporal Ecology (4)

Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: course 200B or Ecology 204 or Evolution and Ecology 104 or Environmental Science and Policy 121 or consent of instructor. Spatio-temporal ecological theory and its application to questions of population persistence and stability, predator-prey and host parasitoid interactions, species coexistence and diversity maintenance, including effects of environmental variation, spatial and temporal scale, life-history traits and nonlinear dynamics. Emphasis on recent research. (Same course as Ecology 220.) Offered in alternate years.—II. Chesson

221. Animal Behavior, Ecology and Evolution (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 102, Evolution and Ecology 100, 101 or the equivalent, graduate standing, and consent of instructor. The interface between animal behavior, ecology and evolution. New developments in behavioral ecology and development and testing of hypotheses in this discipline. (Same course as Animal Behavior 221.)—I. (I.) Stamps

224. Field Reconnaissance for Population Biologists (2)

Fieldwork—6 hours. Prerequisite: graduate student in Population Biology, or consent of instructor. Biweekly field trips to acquaint students with plant and animal communities, biodiversity, and ecological and evolutionary research opportunities in northern

and central California. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

225. Terrestrial Field Ecology (4)

Seminar—1 hour; field work—12 hours. Prerequisite: introductory ecology and introductory statistics, or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results will be stressed. (Same course as Ecology/Entomology 225.)—III. (III.) Karban

231. Mathematical Methods in Population Biology (3)

Lecture—3 hours. Prerequisite: Mathematics 16C or 21C or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as Ecology 231.)—I. (I.) Hastings

270. Research Conference in Evolutionary Biology (1)

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and evaluation of current literature and ongoing research in evolutionary biology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

287. Advanced Animal Behavior (2)

Seminar—2 hours. Prerequisite: graduate standing and consent of instructor, courses in animal behavior (Neurobiology, Physiology, and Behavior 102 or the equivalent), and either evolution (Evolution and Ecology 100 or the equivalent) or ecology (Evolution and Ecology 101 or the equivalent). Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. (Same course as Animal Behavior 287.) May be repeated twice for credit.—III. (III.) Stamps

290. Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by visiting lecturers, UCD graduate students and faculty. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

290C. Research Conference in Population Biology (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor; concurrent enrollment in course 299. Presentation and discussion of faculty and graduate student research in population biology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

292. Topics in Ecology and Evolution (1)

Seminar—1 hour. Prerequisite: graduate standing. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. (Same course as Ecology 296.) (S/U grading only.)—I, II, III. (I, II, III.)

296. Seminar in Geographical Ecology (2)

Seminar—2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. May be repeated for credit. (S/U grading only.)—III. (III.) Shapiro

298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Courses in Population Health and Reproduction (PHR)

Lower Division Course

92. Internship in Veterinary Science (1-4)

Discussion/laboratory—1-4 hours; clinic—3-36 hours; final report. Prerequisite: approval of project prior to period of internship by faculty sponsor. Supervised work experience in Reproduction. (P/NP grading only.)

Upper Division Courses

106. Human-Animal Interactions: Benefits and Issues (2)

Lecture—2 hours. Prerequisite: upper division standing or consent of instructor. The contributions of animals to human society, including historic, anthropologic, developmental, human health, and therapeutic perspectives, as well as effects of humans on animals.—II. (II.) Hart

111. Animal Hygiene (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A or consent of instructor. Causes, prevention, and control of animal diseases important in economic agriculture and in public health, with emphasis upon animal management factors in disease.—II. (II.) West

150. Food-Borne Infections and Intoxications (4)

Lecture—4 hours. Prerequisite: Food Science and Technology 104, Veterinary Microbiology and Immunology 127. Prevalence and characteristics of those diseases of man which are derived from food or food sources; access of disease agents to and distribution in food and food sources; exposure of man to these agents; prevention of food-borne diseases.—III. (III.) Cliver

192. Internship in Veterinary Science (1-12)

Discussion/laboratory—1-12 hours; clinic—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in Reproduction. May be repeated for credit. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

202. Sampling in Health-Related Research (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 403 or the equivalent; consent of instructor. A very thorough coverage of simple random sampling, stratified sampling, cluster sampling, systematic sampling and other sampling methods applied extensively in epidemiology and other health-related disciplines. Emphasis on application of the sampling methods. Offered in alternate years.—II. Farver

203. Multivariate Biostatistics (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 403 and 404, or the equivalent; consent of instructor. Multivariate procedures covered are principal component analysis, factor analysis, Two-group and k-group multivariate ANOVA, multivariate regression, Two-group and k-group discriminant analysis and repeated measures analysis, cluster analysis, and canonical analysis. Emphasis is on application of procedures. Offered in alternate years.—(II.) Farver

210A. Analytic Epidemiology I: Case Control Studies (3)

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Statistics 130B and Preventive Veterinary Medicine 406 or the equivalent or consent of instructor. Theory and practice of epidemiologic data analysis. Topics include confounding, stratification, matching, interaction, and logistic regression. (Same course as Epidemiology 210A.)—II. (II.) Kass

210B. Analytic Epidemiology II: Cohort Studies (3)

Lecture/discussion—3 hours. Prerequisite: course 210A. Theory and practice of epidemiologic data analysis. Topics include rates, rate standardization, cohort analysis, Poisson regression, and survival/fail-

ure-time methods. (Same course as Epidemiology 210B.)—III. (III.) Kass

212. Epidemiology of the Zoonoses (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: graduate standing or third-year standing in School of Veterinary Medicine, or consent of instructor. Epidemiological, biological, and ecological features of some major infections shared by humans and other animals. Wildlife and domestic animals zoonoses of major health and economic significance are presented to illustrate how knowledge of zoonoses epidemiology is essential for implementing control measures.—II. (II.) Chomel

213. Food Safety (1)

Lecture—10 sessions. Prerequisite: graduate standing or consent of instructor. Foodborne disease hazards from producer to consumer; types and causes of foodborne illness; measures for prevention of foodborne disease and enhancement of food safety.—III. (III.) Cliver

216A. Immunodiagnostic Techniques (2)

Lecture—10 sessions; laboratory—10 sessions. Prerequisite: MPVM student or consent of instructor. Applications of serologic techniques for diagnosis of animal diseases.—II. (II.) Lam

216B. Research Methods in Avian Immunology (2)

Discussion—1 hour; laboratory—3 hours. Prerequisite: laboratory immunology background or consent of instructor. Laboratory techniques used in the study of avian immune systems and pathogenesis of avian disease.—III. (III.) Lam

220. Advanced Avian Medicine (3)

Lecture—3 hours. Instruction on the methods of prevention of the major diseases of domestic poultry.—III. (III.) Wakenell

222. Avian Immunology (3)

Lecture—3 hours. Prerequisite: basic immunology course or consent of instructor. Normal structure of the avian immune system, quick review of basic immunology, comparison between mammalian and avian immune systems and generation of immune responses, immunodiagnostics and vaccination.—III. (III.) Wakenell

225. Preventive Avian Medical Practice (3)

Lecture—3 hours. Prerequisite: enrollment in avian medicine option of MPVM program, third- or fourth-year standing in School of Veterinary Medicine, or consent of instructor. Discussion of the economic structure of the broiler, commercial egg and turkey industries, and the delivery of preventive veterinary medical services within these industries. Specific prevention and eradication programs pertaining to diseases of economic importance are covered.—II. (II.) West, Wakenell

231. Pathophysiology of Mammalian Reproductive Processes (3)

Lecture—3 hours. Prerequisite: fourth-year standing in School of Veterinary Medicine or consent of instructor. Physiological and pathological aspects of reproductive failure in mammals concerning gonadal function, fertilization, implantation, prenatal mortality, neonatal mortality, environmental factors, anatomical and hereditary defects, intersexuality and behavior. Offered in alternate years.—III. Conley

232. Advanced Reproductive Biology (3)

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Neurobiology, Physiology and Behavior 121 and 130; graduate standing or consent of instructor. Examination of or challenge to established and emerging concepts at the molecular, cellular and organismal levels. Reproductive development, the male, the non-pregnant female and the pregnant or senescent female.—III. (III.) Conley

290A. Seminar (1)

Seminar—1 hour. Discussion of current topics in animal reproduction and medicine, as well as presentation of research findings by graduate students and faculty. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Liu

290B. Current Topics in Avian Medicine (1)

Seminar—1 hour. Prerequisite: consent of instructor. Topics from the current literature in avian medicine will be assigned to students for discussion and interpretation. May be repeated for credit.—I, II, III. (I, II, III.) Lam, Wakenell

292. Current Topics in Reproduction (1)

Seminar—1 hour. Prerequisite: consent of instructor. Discussion of current scientific literature in reproduction, as well as presentation of research findings by graduate students and faculty. (S/U grading only.)—Lasley

298. Group Study (1-5)

299. Research (1-12)
(S/U grading only.)

Professional Course

397T. Tutoring in Veterinary Population Health and Reproduction (1-5)

Lecture—1 hour; laboratory—3 hours; discussion—2 hours. Designed for graduate or professional students who desire teaching experience, but are not teaching assistants. May be repeated for credit. (S/U grading only.)

Professional Courses

406. Human-Animal Interaction in Veterinary Science (1)

Lecture—10 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. From the perspectives of veterinarians and their clients' needs. Human relationships with companion animals, and secondarily, on food, laboratory, and wild animals. Emphasis on the benefits of companion animals for human mental and physical well-being, the role of animals in the human life cycle, societal traditions in keeping animals, and types of specialized and more typical relationships with animals.—II. (II.) Hart

408. Behavior and Biology of Mice as Domestic Animals (1)

Lecture—10 sessions. Prerequisite: first-, second-, third-, or fourth-year standing in the School of Veterinary Medicine, graduate students in Veterinary Medicine, psychology, animal science, animal behavior, or consent of instructor. Background and current issues in laboratory mouse biology and welfare, including the development and purposes of specialized strains of mice, the constraints for their care and environmental enrichment, relevant legislation and regulation, and the human benefits of their use.—II. (II.) Hart

420. Zoonoses of Non-Human Primates (2)

Lecture—2 hours. Prerequisite: second-, third-, or fourth-year standing in the School of Veterinary Medicine or Medicine or consent of instructor. Epidemiological, clinical, and biological features of zoonoses of non-human primates. Emphasis given to major zoonoses which are threatening to human health and their treatment and prevention. Focus also on management of non-human primates in research, zoological gardens and in the wild. Offered in alternate years.—(II.) Chomel

429D. Dairy Herd Health Management (4)

Lecture—40 sessions. Prerequisite: Medicine and Epidemiology 427, 463A, 463B, 463C, third year standing in School of Veterinary Medicine, and consent of instructor. Practical systems for delivering veterinary services to dairy farms with emphasis on disease prevention and improved herd performance.—III. Moore

429DL. Dairy Herd Health Management Laboratory (0.6)

Laboratory—6 sessions. Prerequisite: course 429D concurrently. Practical systems for delivering veterinary services to dairy farms with emphasis on disease prevention and improved herd performance. Field trips and computer laboratories to practice skills in animal observations, facilities observations and use of the computer for nutrition services and dairy records analysis. (S/U grading only.)—III. Moore

429E. Dairy Goat Herd Health (1)

Lecture—10 sessions. Prerequisite: Medicine and Epidemiology 427, 463A, 463B, 463C, third year standing in School of Veterinary Medicine, and consent of instructor. The application of problem-solving and epidemiologic methods to dairy goat diseases and their control.—III. Rowe

430. Issues in Animal Production and Resource Utilization (2)

Lecture—10 sessions; discussion/laboratory—five 3-hour sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Introduction to interfaces of food animal production and environmental protection, wildlife preservation, animal well-being, food safety and human nutrition. Site visits to wildlife preserves, livestock production and processing facilities. (S/U grading only.)—I. (I.)

432. Reproductive Technology in Mammals and Birds (0.7)

Lecture—7 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine or consent of instructor. Introductory course in the application of technology to the reproductive process in mammals and birds. Emphasis on domestic animals, but birds and non-domestic mammals discussed to a limited extent. A goal is to expose students to some of the "sexier" aspects of population/reproductive management. (S/U grading only.)—III. (III.) BonDurant

432L. Reproductive Technology in Mammals and Birds, Laboratory (0.3)

Laboratory—3 sessions. Prerequisite: course 432 concurrently. Laboratory demonstrations and exercises in gamete freezing, thawing, and handling; artificial insemination of cattle; artificial insemination and other applications of reproductive technology in small ruminants. (S/U grading only.)—III. (III.) BonDurant

439. Beef Cattle Nutrition (1)

Lecture—10 hours. Prerequisite: third-year standing in the School of Veterinary Medicine or consent of instructor. Economically sound methods for meeting nutrient requirements of feedlot and pasture beef cattle (including computer-assisted methods). Strategies for presenting nutritional and ration-associated diseases of beef cattle.—III. (III.)

440. Ruminant Clinical Nutrition (1.9)

Lecture—19 sessions. Prerequisite: Veterinary Medicine 408, second or third year standing in the School of Veterinary Medicine or consent of instructor. Nutritional related disorders in ruminants with a herd basis approach. Nutritionally related disorders that affect modern cattle production. Emphasis on understanding the problem and preventing it through nutritional management.—III. (III.) Santos

442. Equine Theriogenology (2)

Lecture—2 hours. Prerequisite: third-year standing in School of Veterinary Medicine or consent of instructor. Discussions of abnormal conditions and physiologic function in equine reproduction with emphasis on methods of diagnosis and interpretation of clinical and laboratory findings associated with the abnormalities.—I. (I.) Liu

442L. Equine Theriogenology Laboratory (1)

Laboratory—3 hours. Prerequisite: third year standing in School of Veterinary Medicine or consent of instructor. Hands-on diagnosis and implementation of techniques related to reproductive examination of horses. Routine and current procedures performed on the farms. Designed to maximize the opportunity for assessment of the normal reproductive anatomy, the diagnosis and interpretations of physiologic conditions and for becoming comfortable in performing the various routine procedures.—I. (I.) Liu

445. Food Animal Theriogenology and Reproductive Performance (2)

Lecture—1 hours. Prerequisite: Veterinary Medicine 446 with a grade of C or better, or consent of instructor. Physiological, pathophysiological, and management factors affecting the reproductive health and performance of food animals, with emphasis on dairy and beef cattle, and sheep. Minor emphasis on swine and goats. Assessment of, and intervention strategies for, herd reproductive performance.—II. (II.) BonDurant

445L. Food Animal Theriogenology Laboratory (1)

Laboratory—3 hours. Prerequisite: course 445 concurrently. Obstetrical and gynecological diagnosis and treatment for food animals; breeding soundness examination of males; analysis and on-farm use of computerized reproductive records; embryo technology. (S/U grading only.)—II. (II.) BonDurant

446A. Food Animal Reproduction (1)

Lecture—6 hours; laboratory—4 three-hour sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Conditions affecting the reproductive system in the cow, sow, ewe, and goat, with emphasis on symptomatology, pathophysiology, treatment, control, prevention, and herd health applications.—III. (III.) Rowe

446B. Equine Reproduction (1)

Lecture—6 hours; laboratory—4 three-hour sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Discussion of special problems of equine reproduction with emphasis on methods of diagnosis and the interpretation of clinical and laboratory findings.—III. (III.) Liu

446C. Reproduction of Non-Domestic Animals (1)

Lecture—10 hours. Prerequisite: third-year standing in the School of Veterinary Medicine. Follows course 446A and provides information relating to reproduction in non-domestic mammals, birds, and reptile species. Concepts relating to the evaluation of reproductive status, diagnosis of infertility, assisted reproduction and contraception will be presented.—III. (III.) Lasley

450. HACCP and Risk Assessment in Pre- and Postharvest Food Safety (3)

Lecture/discussion—3 hours. Prerequisite: a first year course in microbiology or food science or consent of instructor. Application of the Hazard Analysis-Critical Control Point (HACCP) system in the food industry, for regulatory agencies; and in the preharvest area of food production. Development of HACCP plans. (S/U grading only.)—II. (II.) Cliver

452. On-Farm Food Safety (2)

Lecture/discussion—1.6 hours; laboratory—0.4 hours. Prerequisite: students in the Master's degree in Preventive Veterinary Medicine, first-year standing in School of Veterinary Medicine or consent of instructor. Daily management of the farm for animal health, public health and environmental quality, along with the necessary consumer, producer, veterinarian, and regulatory interactions necessary to accomplish these goals.—III. (III.) Cullor

457. Veterinary Business Management (2)

Lecture—10 sessions. Prerequisite: first, second, third, or fourth year student in School of Veterinary Medicine or consent of instructor. Information essential to the successful management of a veterinary practice. Topics include basic accounting, medical recordkeeping, money management, business and personal insurance, client relations and tax law. (S/U grading only.)—III. Klingborg

483. Pet Loss Support Rounds (1-2)

Discussion/laboratory—3-6 hours. Prerequisite: veterinary student status. Training and experience in responding to pet loss hotline callers who are experiencing grief associated with an animal's death. Students gain proficiency in supportive listening and referral to community resources and increase effectiveness in dealing with upset pet owners. (S/U grading only.)—I, II, III, summer. (I, II, III, summer.) Hart

489. Personal, Financial and Professional Development (1)

Lecture—10 sessions. Prerequisite: student in the School of Veterinary Medicine or consent of instructor. Tools necessary to be personally successful as veterinary students, including developing self-insight, team building skills, resume development, interview skills and understanding of personal insurance and wills, budgeting and personal finance (including fundamental investment and debt concepts). (S/U grading only.)—II. Klingborg

Precision Agriculture

(College of Agricultural and Environmental Sciences)
The Department of Biological and Agricultural Engineering offers a minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental concerns.

Minor Program Requirements:

This minor acquaints students with recent developments and their applications to agriculture, in geographic information systems (GIS), global positioning systems (GPS), variable rate technologies (VRT), crop and soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the "information age" in agriculture.

UNITS

Precision Agriculture	20
Applied Biological Systems Technology 145, 175, 180	10
Select 10 or more units from Agricultural Systems and Environment 120 or Statistics 100, Agricultural Systems and Environment 110A or Plant Biology 112, Environmental and Resource Sciences 186, Soil Science 109	10

Minor Advisers. S.K. Upadhyaya, D.K. Giles.

Preventive Veterinary Medicine (A Professional Program)

Director. David W. Hird (Medicine and Epidemiology).

Group Office, 125 Surge IV (530-752-1383)

World Wide Web:
<http://www.vetmed.ucdavis.edu.MPVM>

The School of Veterinary Medicine offers a program of study and research leading to the Master's degree in Preventive Veterinary Medicine (M.P.V.M.). Detailed information on this program may be obtained by writing the Director, Office of the Dean, School of Veterinary Medicine, One Shields Avenue, Davis, CA 95616.

Courses in Preventive Veterinary Medicine (MPM)

Professional Courses

402. Medical Statistics I (4)

Lecture—3 hours; laboratory—2 hours. Statistics in clinical, laboratory and population medicine: graphical and tabular presentation of data; probability; binomial, Poisson, normal, t, F-, and Chi-square distributions; elementary nonparametric methods; simple linear regression and correlation; life tables. Microcomputer applications of statistical procedures in population medicine.—IV. (IV.) Farver

403. Medical Statistics II (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 402 or the equivalent. Continuation of course 402. Analysis of variance in biomedical sciences; nonparametric methods; multiple regression; biomedical applications of statistical methods. Microcomputer applications to reinforce principles that are taught in lecture.—I. (I.) Farver

404. Medical Statistics III (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 403 or the equivalent, consent of instructor. Analysis of time dependent variation and trends, analysis of multiway frequency tables; logistic regression; survival analysis selecting the best regression equation; biomedical applications.—II. Farver

405. Principles of Epidemiology (4)

Lecture—4 hours. Prerequisite: course 402 or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Epidemiology 205A.)—I. (I.) Hird

405L. Epidemiology Laboratory (1)

Laboratory—10 hours. Prerequisite: course 405 (may be taken concurrently) with grade of C or better, course 412 with grade B- or better. A practical application of epidemiological methods using the micro-computer as a tool to solve problems. Utilizes spreadsheets and databases as tools to organize and analyze data. Emphasis on epidemiological methods introduced in course 405. Data sets provided.—I. Case

406A. Epidemiologic Study Design (3)

Lecture—1.5 hours; discussion—0.9 hours; laboratory—1.8 hours. Prerequisite: course 405/Epidemiology 205A, Epidemiology 205B. Builds on concepts presented in course 405. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in course 405 and covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Epidemiology 206.)—II. (II.) Hird

406B. Communication of Epidemiologic Study Results (1)

Lecture—0.6 hours; laboratory—1.2 hours. Prerequisite: course 405/Epidemiology 205A, Epidemiology 205B, course 406A/Epidemiology 206 (may be taken concurrently), and consent of instructor. Statistical methods pertinent to material from course 406A. Techniques for effective oral presentation of research results. Design and delivery of short presentation and discussion of effectiveness in communicating research results. (S/U grading only.)—II. Hird

408A. Veterinary Research: Planning and Reporting (2)

Lecture—16 sessions; laboratory—4 sessions. Prerequisite: course 402 or Statistics 102 (with grade B- or better), course 412 and 405 or the equivalent (may be taken concurrently), ability to use commercial software in statistical and graphical applications. Planning, critical analysis, ethics, and written and oral communication of veterinary research.—I. Thurmond

408B. Veterinary Research: Planning and Reporting (1)

Lecture—10 sessions. Prerequisite: course 408A. Planning, critical analysis, ethics, and written and oral communication of veterinary research.—II. Thurmond

412. Introduction to Information Management (3)

Lecture—1 hour; laboratory—6 hours. Basic knowledge and skills in microcomputer hardware, DOS commands, word processing, spreadsheets and communications packages. (S/U grading only.)—IV. (IV.) Sischo

426. Applied Epidemiologic Problem Solving (1)

Laboratory—3 hours. Prerequisite: grade of C or better in course 405L. Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation; descriptive statistical analysis using spreadsheets, database management, and Epi Info software. Builds on skills learned in courses 405L and 406.—II. (II.) Gardner

The Major Programs

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis: Developmental Psychology, which involves the study of changes in behavior and abilities that occur as development proceeds and includes such topics as imaging the developing brain, development of self esteem, problem solving, attachment theory, symbolic representation in infants

and children, development of children's understanding of mental states; Perception-Cognition, which involves the study of awareness and thought, and includes such topics as perception, learning, memory, and consciousness; Psychobiology, which involves the study of the biological correlates of behavior and includes such topics as physiological psychology, sensory processes, health psychology, and animal behavior; Social-Personality Psychology, which involves the study of the individual in his or her social environment and includes such topics as personality theory, abnormal psychology, individual differences, developmental psychology, and social psychology; and Quantitative which involves the study of linear models and psychometrics which includes topics, such as experimental design and the analysis of variance, regression analysis, and multivariate analysis.

The department offers the Bachelor of Arts (AB) program for students interested in the liberal arts and the Bachelor of Science (BS) program geared for students with an interest in either biology or mathematics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take specialty courses on such far-ranging topics as sex differences, genius and creativity, environmental awareness, and organization psychology. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden your experiences and understanding of the field of psychology.

Preparatory Requirements. Before declaring a major in psychology, students must complete the following courses with a combined grade point average of at least 2.50. All courses must be taken for a letter grade. (Students in the Bachelor of Science, Biology program must complete Biological Sciences 1A.):

- Psychology 1, 418 units
- Statistics 13 or 1024 units
- Biological Sciences 1A
- or
- Biological Sciences 10 and one course from Anthropology 1, Molecular and Cellular Biology 10, Neurobiology, Physiology, and Behavior 105 or 8 units
- Sociology or cultural anthropology4 units

Career Alternatives. A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, the ministry, teaching, business, and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and other professions.

A.B. Major Requirements:

UNITS

Preparatory Subject Matter21-25
 Psychology 1 or the equivalent4
 Psychology 414
 Statistics 13 or 1024
 (Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.)
 Biological Sciences 1A; or a combination of Biological Sciences 10 and one course from Anthropology 1, Molecular and Cellular Biology 10, or Neurobiology, Physiology, and Behavior 105-8
 One course in sociology or cultural anthropology (may be lower or upper division), minimum of 4 units4-5

Depth Subject Matter40

Two courses from two of the following four groups and one course from the remaining two groups23-24
 Group A: Psychology 100, 130, 131, 132, 135
 Group B: Psychology 101, 113, 121, 122, 123, 126, 127, 129
 Group C: Psychology 140 (or Human Development 100A or 100B), 151, 154, 162, 168
 Group D: Psychology 140 (or Human Development 100A or 100B), Psychology 141/Human Development 101, Psychology 142/Human Development 102
 Additional units to achieve a total of 40 upper division units in psychology16-17
 (A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.)

Total Units for the Major61-65

B.S. Major Requirements:

Biology Emphasis

UNITS

Preparatory Subject Matter52-61
 Psychology 1 or the equivalent4
 Psychology 414
 Statistics 13 or 1024
 (Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.)
 Mathematics 16A-16B or 17A-17B or 21A-21B6-8
 Physics 10 or 7A-7B4-8
 Biological Sciences 1A, 1B10
 Chemistry 2A, 2B10
 Chemistry 8A-8B or 118A-118B or 128A-128B6-8
 One course in sociology or cultural anthropology (may be lower or upper division), minimum of 4 units4-5

Depth Subject Matter49

Seven Psychology courses distributed as specified:
 Group A: two courses from Psychology 100, 130, 131, 132, 135, 1468
 Group B: three courses from Psychology 101, 113, 121, 122, 123, 126, 127, 12911-12
 Group C: one course from Psychology 151, 154, 162, 1684
 Group D: one course from Psychology 140 (or Human Development 100A or 100B), Psychology 141/Human Development 101, Psychology 142/Human Development 1024
 Additional units to achieve a total of 40 upper division units in psychology12-13
 (A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.)
 Biological Sciences 1014
 Neurobiology, Physiology, and Behavior 1015

Total Units for the Major (Biology Emphasis)101-110

Recommended

Psychology 180B, 199 (on a psychobiological topic), Anthropology 154A, Environmental Science and Policy 110, Evolution and Ecology 100, 101.

Mathematics Emphasis

UNITS

Preparatory Subject Matter44-58
 Psychology 1 or the equivalent4
 Psychology 414

Statistics 13 or 1024
 (Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.)
 Mathematics 21A, 21B, 21C,12
 Computer Science Engineering 30 or Engineering 53
 Chemistry 10 or 2A-2B or 2AH-2BH4-10
 Physics 10 or 7A-7B4-8
 Biological Sciences 1A; or a combination of Biological Sciences 10 and one course from Anthropology 1, Molecular and Cellular Biology 10, or Neurobiology, Physiology, and Behavior 105-8
 One course in sociology or cultural anthropology (may be lower or upper division), minimum of 4 units4-5

Depth Subject Matter48

Five Psychology courses, distributed as specified:
 Group A: two courses from 100, 130, 131, 132, 135, 1468
 Group B: two courses from Psychology 101, 113, 121, 122, 123, 126, 127, 1297-8
 Group C: one course from Psychology 151, 154, 162, 168
 or
 Group D: one course from Psychology 140 (or Human Development 100A or 100B), Psychology 141/Human Development 101, Psychology 142/Human Development 1024
 Additional units to achieve a total of 40 upper division units in psychology11-12
 (A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.)
 Psychology 103A5
 One course from Psychology 103B, 104, or the equivalent4
 One course sequence from Statistics 106-108, 130A-130B, 131A-131B8

Total Units for the Major (Mathematics Emphasis)92-106

Recommended for All Majors

Students who plan to do graduate work in any area of psychology are strongly encouraged to complete Statistics 13 and Psychology 103A or both Statistics 13 and 102. Psychology 41 is a prerequisite for most upper division courses. Psychology 41 and Statistics 13 or 102 should be completed in the first year.

Major Advisers. L.P. Acredolo, S. Blozis, J.P. Capitanio, R.G. Coss, R.A. Emmons, G.S. Goodman, A.A. Harrison, K.R. Henry, G.M. Herek, J.T. Johnson, N.E.A. Kroll, L.A. Krubitzer, K. Lagattuta, D.L. Long, S.P. Mendoza, B.A. Olshausen, D.H. Owings, T.E. Parks, R.B. Post, C. Ranganath, S. Rivera, R.W. Robins, P.R. Shaver, D.K. Simonton, R. Sommer, S. Sue, M. Traxler, K.F. Widaman, E. Wojciulik, A.P. Yonelinas, N.W. Zane.

Human Development course credit. Human Development 100A, 100B, 100C, 101, 102, 120, and 121 can be used toward satisfying the 40-unit upper division major requirement to a maximum of 12 units. Students who have completed Human Development 100A or 100B will receive 2 units of credit for Psychology 140.

Minor Program Requirements:

UNITS

Psychology24
 Psychology 1 or the equivalent4
 One course from each of the following four groups15-16
 Group A: Psychology 100, 130, 131, 132, 135
 Group B: Psychology 101, 113, 121, 122, 123, 126, 127, 129

Group C: Psychology 151, 154, 162, 168
Group D: Psychology 140, 141, 142

Additional units to achieve a total of 20 upper division units.....4-5
One course selected from Human Development 100A, 100B, 100C, 101, 102, 120, 121 can be used toward satisfying the minor upper division unit requirement.

Honors and Honors Program. In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria and complete a research project involving a minimum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Course 194HA-194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained by writing the Graduate Adviser, Department of Psychology.

Graduate Adviser. See *Class Schedule and Registration Guide*.

Courses in Psychology (PSC)

Lower Division Courses

1. General Psychology (4)

Lecture—4 hours. Introduction emphasizing empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior. Only 2 units of credit allowed for students who have completed course 15 or 16. Not open for credit to students who have completed course 15 and 16. GE credit: SocSci.—I, II, III. (I, II, III.) Shaver, Johnson, Capitanio

20. Freshman Psychology Seminar (4)

Seminar—4 hours. Prerequisite: freshman standing. Instructor will acquaint students with his or her program of research, the development of scientific questions from the literature, and the application of research methods to examine these questions. Critical thinking will be encouraged via expository writing and brief presentations.

41. Research Methods in Psychology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or the equivalent; Statistics 13 or 102 strongly recommended. Introduction to experimental design, interviews, questionnaires, field and observational methods, reliability, and statistical inference.—I, II, III. (I, II, III.) Schank, Sommer

90X. Lower Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Psychology through shared readings, discussions, written assignments, or special activities such as fieldwork or laboratory work. May not be repeated for credit. Limited enrollment.

98. Directed Group Study (1-5)

Primarily for lower division students. (P/NP grading only.)

99. Special Study for Lower Division Students (1-5)

(P/NP grading only.)

Upper Division Courses

100. Introduction to Cognitive Psychology (4)

Lecture—4 hours. Prerequisite: courses 1 and 41. Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former course 136.—I, II, III. (I, II, III.) Kroll, Long

101. Introduction to Psychobiology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Survey and integration of the relationships between

behavior and biological processes, including physiology, genes, development, ecology, and evolution.—I, II, III. (I, II, III.) Coss, Henry, Krubitzer, Owings, Schank

103A. Statistical Analysis of Psychological Data (5)

Lecture—4 hours; laboratory—2 hours; term paper. Prerequisite: course 1, 41 and Statistics 13 or 102. Pass 1 open to Psychology majors. Design and statistical analysis of psychological investigations and the interpretation of quantitative data in psychology. Not open for credit to students who have completed course 103.—I. (I.) Widaman, Blozis

103B. Statistical Analysis of Psychological Data (4)

Lecture—4 hours. Prerequisite: course 103A and Statistics 13 or 102. Pass 1 open to Psychology majors. Probability theory, sampling distributions, hypothesis testing, statistical inference, one-way and two-way analysis of variance, nonparametric statistics, with applications in psychology. Not open for credit to students who have completed course 105.—II. (II.) Widaman, Blozis

104. Applied Psychometrics: An Introduction to Measurement Theory (4)

Lecture—4 hours. Prerequisite: upper division standing in Psychology, courses 41 and 103, Statistics 13. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis and latent trait theory.—(II.)

109. Interactive Computer Programming for Psychological Experiments (4)

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 41 and one of course 100, 130, or 132 and consent of instructor. Instruction in programming with an emphasis on programming desktop computers as an interactive research tool. Not open for credit to students who have completed course 181. (Former course 181.)—Kroll

113. Developmental Psychobiology (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101. The biology of behavioral development; survey and integration of the organismic and environmental processes that regulate the development of behavior.—I, II, III. Mendoza, Schank, Owings

121. Physiological Psychology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 1, 41, 101. Pass 1 open to Psychology majors. Relationship of brain structure and function to behavior, motivation, emotion, language, and learning in humans and other animals. Methodology of physiological psychology and neuroscience. Not open for credit to students who have completed course 108. (Former course 108.)—I, II, III. (I, II, III.) Henry, Krubitzer, Mendoza

122. Advanced Animal Behavior (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 102. Pass 1 open to Psychology majors. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free living animals. (Same course as Neurobiology, Physiology, and Behavior 150.) Not open for credit to students who have completed course 150. (Former course 150.)—III. (II.) Owings, Scheib

123. Hormones and Behavior (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101 and either course 101 or Neurobiology, Physiology, and Behavior 102. Pass 1 open to Psychology majors. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Neurobiology, Physiology, and Behavior 152.) Not open for credit to students who have completed course 152. (Former course 152.)—III. (III.) Mendoza

124. Comparative Neuroanatomy (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101 or Neurobiology, Physiology and Behavior 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Neurobiology, Physiology and Behavior 124.)—(II.) Krubitzer, Recanzone

126. Health Psychology (4)

Lecture—4 hours. Prerequisite: course 1, 41, 101. Pass 1 open to Psychology majors only. Psychological factors influencing health and illness. Topics include stress and coping, personality and health, symptom perception and reporting, heart disease, cancer, compliance, and health maintenance and promotion. Not open for credit to students who have completed course 160.—II, III. Capitanio, Emmons

127. Animal Cognition (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 1, 41, 101. Pass 1 open to Psychology majors. Integrative review of the historical backdrop, theoretical issues, and scientific methods of studying animal cognition in a wide range of species. Emphasis on learning processes, pattern recognition, and the neurobiology of learning and memory. Not open for credit to students who have completed course 134. (Former course 134.)—II. (II.) Coss

128. Information Processing Models in Neuroscience and Psychology (4)

Lecture—3 hours; term paper. Prerequisite: Mathematics 16B, Physics 7B, course 101 or Neurobiology, Physiology, and Behavior 100. Pass 1 open to Psychology majors. Basic mathematical modeling techniques used in neuroscience and psychology. Specific topics include linear systems theory, Fourier transforms, neural networks, adaptive systems, probabilistic inference and information theory. Emphasis on understanding information processing in neural systems. (Same course as Neurobiology, Physiology, and Behavior 163.) Not open for credit to students who have completed course 163. (Former course 163.)—(II.) Olshausen

129. Sensory Processes (4)

Lecture—3 hours; term paper. Prerequisite: course 1, 41, 101. Pass 1 open to Psychology majors. Psychobiology of sensory systems in humans and other animals. The relationship of behavior to the physiology, structure, and function of the senses. GE credit: Wrt.—I, III. Henry, Krubitzer, Olshausen

130. Human Learning and Memory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1, 41, 100, and either Statistics 13 or 102; or consent of instructor. Consideration of major theories of human learning and memory with critical examination of relevant experimental data.—I, II, III. (I, II, III.) Parks, Goodman, Kroll, Yonelinas

131. Perception (4)

Lecture—3 hours; independent library work. Prerequisite: courses 1, 41. The cognitive organizations related to measurable physical energy changes mediated through sensory channels. The perception of objects, space, motion, events.—I, II, III. (I, II, III.) Parks, Post

132. Language and Cognition (4)

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, 100; or consent of instructor. Introduction to the cognitive processes involved in language comprehension and production. Topics include the biological foundations of language, speech perception, word recognition, syntax, reading ability, and pragmatics.—II, III. (II.) Long

135. Cognitive Neuroscience: The Biological Foundations of the Mind (4)

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, and 100; or consent of instructor; courses 108, 129, or 131 highly recommended. Neuroscientific foundations of higher mental processes including attention, memory, language, higher-level perceptual and motor processes and consciousness. Emphasis on the neural mechanisms which form the substrates

of human cognition, and the relationships of mind to brain.—II, III. (II, III.) Wojcikolik, Raganath

140. Developmental Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction. Two units of credit allowed to students who have completed Human Development 100A or 100B. Not open for credit to students who have completed course 112. (Former course 112.)—I, II, III. (I, II, III.) Acredolo, Goodman

141. Cognitive Development (4)

Lecture—3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass 1 restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Human Development 101.) GE credit: Wrt.—I, II, III. (I, II, III.) Chen, Goodman, Lagattuta, Rivera

142. Social and Personality Development (4)

Lecture—3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass 1 open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Human Development 102.) GE credit: SocSci, Wrt.—I, II, III. (I, II, III.) Conger, Lagattuta, Rivera, Robins, Rodning

146. The Development of Memory (4)

Lecture—3 hours; term paper. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Theory and research on memory development with focus on infancy and childhood. Not open for credit to students who have completed course 133. (Former course 133.)—III. (III.) Goodman, Rivera

151. Social Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction; group tensions, norm-development, attitudes, values, public opinion, status. Not open for credit to students who have completed course 145. (Former course 145.)—I, II, III. (I, II, III.) Simonton, Johnson, Robins, Shaver

153. Psychology and Law (4)

Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Current theoretical and empirical issues in the study of psychology and law. Topics include eyewitness testimony, child abuse, jury decision making, juvenile delinquency and criminology, prediction of violence, insanity defense, and memory for traumatic events. Not open for credit to students who have completed course 115. (Former course 115.) Offered in alternate years.—II. Goodman, Johnson

154. Psychology of Emotion (4)

Lecture—4 hours. Prerequisite: course 1, 41. Pass 1 open to Psychology majors. Introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge. Not open for credit to students who have completed course 143. (Former course 143.)—III. (III.) Shaver

155. Environmental Awareness (4)

Lecture—4 hours. Prerequisite: course 1. Pass 1 open to Psychology majors. Interactions of people and the environments they construct. Research methods for evaluating designed environments and reviews of current research in environmental psychology. Not open for credit to students who have completed course 144. (Former course 144.) GE credit: SocSci—I. (II.) Sommer, Coss

156. Organizational Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Survey of interrelationships among psychological processes, interpersonal

dynamics, and organizational forms. Topics include motivation, communication, decision making, leadership, personnel selection and training, stress and conflict, career development, organizational development, and organization-community relations. Not open for credit to students who have completed course 183. (Former course 183.)—III. (III.) Harrison

158. Sexual Orientation and Prejudice (4)

Lecture/discussion—4 hours. Prerequisite: course 1, 41. Pass 1 open to Psychology majors. Current scientific knowledge about sexual orientation and prejudice based on sexual orientation. Emphasis on learning the skills necessary for a critical understanding of science and public policy issues relevant to sexuality. GE credit: SocSci, Div, Wrt.—II, III. (II, III.) Herek

159. Gender and Human Reproduction (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Social psychology of human reproduction. Examines gender relations over the course of the individual's reproductive cycle. Not open for credit to students who have completed course 149. (Former course 149.)—III. (III.) Ericksen, Scheib

162. Personality Theory (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. The theories of Freud, Erikson, and other major twentieth-century contemporary approaches to personality. Not open for credit to students who have completed course 147. (Former course 147.) GE credit: SocSci, Wrt.—I, II, III. (I, II, III.) Elms, Emmons, Ericksen, Robins

162V. Personality Theory (4)

World Wide Web virtual lecture—4 hours. Prerequisite: course 1, 41. The theories of Freud, Erikson, and other major twentieth-century contemporary approaches to personality. Not open for credit to students who have completed former course 147. GE credit: SocSci, Wrt.—Ericksen

165. Introduction to Clinical Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41, 168, and either 112 or 145. Major theoretical formulations in the history of clinical psychology, from classical psychoanalysis to contemporary existentialism and behavior modification. A survey, based on lectures, films, and tapes, of what clinical psychologists do, including methods of appraisal, professional roles, and approaches to treatment.—I, II, III. (I, II, III.) Sue

168. Abnormal Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Descriptive and functional account of behavioral disorders, with primary consideration given to neurotic and psychotic behavior. GE credit: SocSci.—I, II, III. (I, II, III.) Emmons, Sommer, Zane

170. Psychology of Religion (4)

Lecture—4 hours. Prerequisite: courses 1 and 41. Major theories, issues, data, and research methodologies of the psychology of religion. Religious experience and expression; religious development in childhood, adolescence, and adulthood; conversion; religious influences on physical and mental health; cross-cultural perspectives. GE credit: Div, Wrt.—(II.) Emmons

175. Genius, Creativity, and Leadership (4)

Lecture—4 hours. Prerequisite: course 1 or 16; course 41. The phenomenon of genius is examined from a diversity of theoretical, methodological, and disciplinary perspectives, with an emphasis on outstanding creativity and leadership in art, music, literature, philosophy, science, war, and politics. GE credit: SocSci, Wrt.—I, III. (I, III.) Simonton

177. Psychobiography and Life History (4)

Lecture—4 hours. Prerequisite: course 1 or 16 or consent of instructor; course 41. Case-history research as a nonquantitative approach to studying personality. Psychological interpretation of life histories of outstanding individuals in the arts, politics, science and other areas. GE credit: SocSci, Wrt.—Elms

180A. Research in Cognitive and Perceptual Psychology (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 41, and four upper division Psychology

courses and consent of instructor. Empirical research on selected topics in general experimental psychology (general research design and analysis, perception, cognition, cognitive development, etc.). Specific content will vary from quarter to quarter. May be repeated once for credit when content differs.—I, III. (II, III.)

180B. Research in Psychobiology (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 101, three additional upper division courses in Psychology, and consent of instructor. Empirical research on selected topics in psychobiology (animal learning, animal behavior, physiological and sensory psychology, developmental psychobiology, computer modeling of neural systems). Content varies. May be repeated once for credit when content differs.—III. (III.)

180C. Research in Personality and Social Psychology (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in personality and social psychology (personality, social psychology, organizational psychology, etc.). Content will vary from quarter to quarter. May be repeated once for credit when specific content differs.—III. (III.)

185. History of Psychology (4)

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, upper division standing or consent of instructor. Pass 1 open to Psychology majors. Development of psychological thought and research in context of history of philosophy and science. Not open for credit to students who have completed course 120. (Former course 120.) GE credit: SocSci, Wrt.—II. (II.) Simonton

190. Seminar in Psychology (4)

Seminar—4 hours. Prerequisite: junior or senior standing; major in psychology or consent of instructor. Intensive treatment of a special topic or problem of psychological interest. May be repeated for credit in different subject area.—III. (I, III.)

190X. Upper Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Psychology. Emphasis on student participation in learning. May not be repeated for credit. Limited enrollment.

192. Fieldwork in Psychology (1-6)

Fieldwork—1-6 hours. Prerequisite: upper division standing in psychology and consent of instructor. Supervised internship off and on campus, in community and institutional settings. Maximum of four units may be used towards satisfaction of upper division major requirement. May be repeated once for credit. Limited enrollment (P/NP grading only.)—Harrison, Sommer

194HA-194HB. Special Study for Honors Students (3-3)

Independent study—9 hours. Prerequisite: senior standing in Psychology and qualifications for admission into college honors program, and consent of instructor; at least one course from 180A, 180B, 180C or 199 strongly recommended. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. (Deferred grading only, pending completion of sequence.)

197T. Tutoring in Psychology (1-3)

Tutoring—1-3 hours. Prerequisite: upper division standing and consent of instructor. Intended for advanced undergraduate students who will lead discussion sections in Psychology courses. May be repeated for credit for a total of 8 units. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

200. Proseminar in Psychology (3)

Seminar—2 hours; independent study—1 hour. Prerequisite: graduate standing in Psychology or consent of instructor. Introduces matriculating graduate students to research activities of departmental faculty. (S/U grading only.)—I. (I, I, III.)

201. Research Preceptorship (4)

Laboratory—3-4 hours; discussion—3-5 hours. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

202. Research Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing in psychology. Presentation of graduate research to program faculty and graduate students. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

204A. Statistical Analysis of Psychological Experiments (4)

Lecture—4 hours. Prerequisite: Statistics 102 or the equivalent and graduate standing in Psychology or consent of instructor. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Analysis of variance, factorial and repeated measures, and tests of trends. Not open for credit to students who have completed course 206.—I.

204B. Causal Modeling of Correlational Data (4)

Lecture—4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Examination of how to make causal inferences from correlational data in the behavioral sciences. Emphasis on testing rival causal models using correlations among observed variables. Beginning with multiple regression analysis, discussion advances to path analysis and related techniques. Not open for credit to students who have completed course 207A. (Former course 207A.) Offered in alternate years.—II. Simon-ton

204C. Applied Psychometrics and Measurement Theory (4)

Lecture—4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis, and latent trait theory. Not open for credit to students who have completed course 204. (Former course 204.) Offered in alternate years.—III. Widaman

204D. Advanced Statistical Inference from Psychological Experiments (4)

Lecture—4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Advanced topics in statistical inference, which may include probability theory, sampling distributions, statistical inference and hypothesis testing, nonparametric statistics, Bayesian approaches, and advanced issues in analysis of variance. Not open for credit to students who have completed course 205. (Former course 205.) Offered in alternate years.—III.

205A. Applied Multivariate Analysis of Psychological Data (4)

Lecture—4 hours. Prerequisite: three courses from 204A, 204B, 204C, 204D or the equivalents, or consent of instructor. Review of the major methods of multivariate data analysis for psychological data. Statistical routines using a linear algebra-based computing language. Topics include multivariate analysis of variance, discriminant analysis, canonical analysis factor analysis, and component analysis. Not open for credit to students who have completed course 207B. (Former course 207B.) Offered in alternate years.—II.

205B. Factor Analysis (4)

Lecture—4 hours. Prerequisite: graduate standing, course 204A and 204B or the equivalent or consent of instructor. Theory and methods of factor analysis, including exploratory factor analysis, confirmatory factor analysis, and principal component analysis. Offered in alternate years.—II. Widaman, Blozis

205C. Structural Equation Modeling (4)

Lecture—4 hours. Prerequisite: graduate standing, course 204A and 204B or the equivalent or consent of instructor. Theory and methods of structural equation modeling, including path analysis, confirmatory factor analysis, and multiple-group modeling. Offered in alternate years.—II. Widaman, Blozis

208. Physiological Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. A conceptual analysis of the contributions of neuroanatomy, neurophysiology and neurochemistry to an understanding of animal and human behavior.—Henry, Mendoza

212. Developmental Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. The original behavioral repertoire of the child and its subsequent development.—III. (III.) Acredolo, Goodman, Lagattuta, Rivera

220. History of Psychology (4)

Lecture—2 hours; seminar—2 hours. Prerequisite: graduate standing in psychology or consent of instructor. A lecture-seminar on the history of psychology and on the applicability of early psychological theory and research to contemporary investigations. Offered in alternate years.

230. Cognitive Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the mental processes by which knowledge is acquired, manipulated, stored, retrieved and used. Offered in alternate years.—I. Long

231. Sensation and Perception (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the role of sensory processes and perception in experience and their effects on behavior. Offered in alternate years.—III. Post

245. Social Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in social psychology.—I. (III.) Robins, Johnson

247. Personality (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in human personality.—II. (II.) Emmons, Robins

250. Comparative Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. The study of animal behavior in an evolutionary and comparative framework.—II. Owings

251. Topics in Genetic Correlates of Behavior (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and experiment in the genetic contributions to animal and human behavior. May be repeated for credit when topic differs. Offered in alternate years.

252. Topics in Psychobiology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Critical study in a selected area of psychobiology. May be repeated for credit when content differs. Offered in alternate years.—(I.)

261. Cognitive Neuroscience (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Neuroscience 223.)—III. (III.) Olshausen, Wojciulik, Ranganath

263. Topics in Cognitive Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Selected topics in language processing, memory, perception, problem solving, and thinking, with an emphasis on the common underlying cognitive processes. May be repeated for credit when content differs. Offered in

alternate years.—(I.) Acredolo, Goodman, Kroll, Long, Parks, Post, Yonelinas, Rivera, Lagattuta

264. Topics in Psycholinguistics (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Discussion of fundamental issues in the psychology of language. May be repeated for credit when content differs. Offered in alternate years.—Long, Traxler

265. Topics in Psychology of Consciousness (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in the psychology of consciousness. May be repeated for credit when content differs. Offered in alternate years.

270. Topics in Personality Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Critical study of a selected area of personality psychology. May be repeated for credit when content differs.—I. Emmons, Shaver

290. Seminar (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Seminar devoted to a highly specific research topic in any area of basic psychology. Special topic selected for a quarter will vary depending on interests of instructor and students.—I, II, III. (I, II, III.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (2-9)

(S/U grading only.)

299D. Dissertation Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Course

390A-390B. The Teaching of Psychology (6-4)

Discussion, lecture, practice. Prerequisite: advanced graduate standing in psychology or a closely related discipline and consent of instructor. Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evaluation. Practical experience in the preparation and presentation of material. (S/U grading only; deferred grading only, pending completion of sequence.)—II-III. (II-III.)

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Range and Wildlands Science

See Agronomy and Range Science; and Range Science

Range and Wildlands Science

(College of Agricultural and Environmental Sciences)
Admission into the Range and Wildlands Science major has been discontinued. Students interested in this area should refer to the Agricultural Management and Rangeland Resources major, Range and Natural Resources specialization.

The Major Program

Range and wildlands science is the study of the biological and physical components of land resources which are used mostly for grazing domestic livestock, but which also provide wildlife habitats, watersheds, recreation, and open space.

The Program. The major provides background in the biological, physical, and social sciences. Comprehensive study in the plant, animal, soil, and resource sciences supplements the core of range management courses. Integration of the knowledge of a variety of specialized fields is learned as a basis for land management oriented toward the multiple use concept and the maintenance of environmental quality.

Career Alternatives. Range and wildlands science graduates, especially those with some experience, may be employed as consultants, extension specialists, ranch managers, or ranchers. They may also qualify for the position of Range Conservationist in governmental agencies such as the Forest Service, Soil Conservation Service, and the Bureau of Land Management. If career work with such an agency is desired, it is recommended that trainee or apprenticeship experience with that agency be included in the major program of study as an internship. In addition, the training provided by this major should give an excellent background for natural resource management positions.

B.S. Major Requirements:

	UNITS
English Composition Requirement	0-8
See College requirement	
Preparatory Subject Matter	63-67
Animal Science 2	4
Biological Sciences 1A, 1B, 1C	15

Geography 106	4
Restricted Electives	6-8
Two upper division natural science or applied biological science courses in one or two of the following: animal science, botany, entomology, genetics, geography, mathematics, nematology, plant pathology, plant science, environmental and resource sciences, water science, or weed science.	
Unrestricted Electives	17-47
Total Units for the Major	180

Major Adviser. Contact department office.

Advising Center for the major is in 1144 Plant and Environmental Sciences.

Graduate Study. See the Ecology Graduate Group.

Range Science

(College of Agricultural and Environmental Sciences)

Faculty. See under the Department of Agronomy and Range Science.

Related Courses. See Agricultural Management and Rangeland Resources 101, 112, 130, 131, 134, 135, 137, Nutrition 115, Soil Science 105, 120, Wildlife, Fish, and Conservation Biology 151.

Courses in Range Science (RMT)

Questions pertaining to the following courses should be directed to the instructor or to the Advising Center, 1144 Plant and Environmental Sciences.

Lower Division Course

92. Range Science Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off or on campus in all subject areas pertaining to range management. Internships supervised by a member of the faculty. (P/NP grading only.)

Upper Division Courses

192. Range Science Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off or on campus in all subject areas pertaining to range management. Internships supervised by a member of the faculty. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: senior standing and consent of instructor. (P/NP grading only.)

Graduate Courses

298. Group Study (1-5)

299. Research (1-12)
(S/U grading only.)

The Major Program

Majoring in religious studies provides an opportunity to explore and analyze the great written and oral traditions of the world's religions: Hinduism, Buddhism, Judaism, Christianity, Islam, contemporary groups in the U.S., and African religions.

The Program. The major introduces students to the academic study of religion. The religious studies major offers a broad choice of courses, including history, philosophy, sociology, anthropology, American studies, classics, and medieval studies. For some students, religious studies is an appropriate second major and might combine well with anything from philosophy to international agricultural development, from history to international relations. The religious studies program has also designed four options for minor programs: religious studies, Asian religions, Judaism, and Christian studies.

Career Alternatives. The emphasis in religious studies courses on developing analytical thinking skills and clear written expression is an asset for many career goals. As a strong liberal arts program, the major can lead to research and/or teaching on all levels, as well as careers in related areas such as the ministry, counseling, social work, and other helping professions. Because the major integrates so many academic areas, it is also an excellent background for graduate programs, especially in the humanities, and for professional schools including law, business, and foreign service.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	24
At least one course from each of the following groups.....	
(a) Religious Studies 1, 2	20
(b) Religious Studies 21, 23, 40, 60, 70, 75	4
Anthropology 2 or, with approval from adviser, a lower division course related to religion from African American and African Studies, American Studies, Phi- losophy, Native American Studies, or other departments.....	4
Depth Subject Matter	40
Five upper division Religious Studies courses plus Religious Studies 100	
Two upper division History courses related to religion.....	8
Sociology, philosophy, anthropology.....	8
Two upper division courses related to religion in the above disciplines such as Philosophy 105, 145, Sociology 146, 149, Anthropology 124; or, with approval from adviser, in other disciplines such as Medieval Studies, Native American Studies, African American and African Studies, Classics, or other departments.	

Total Units for the Major

Recommended. A reading knowledge of a foreign language is highly recommended. Consult the major adviser for a complete list of recommended upper division courses.

Course Equivalents. The major advisers have a list of lower and upper division courses that can be substituted for courses suggested above.

Major Advisers. W.W. Lai, N. Janowitz, L. Hurst.

Minor Program Requirements:

The following four minor program options and others responsive to students' needs are subject to approval by the major adviser or the Curriculum Committee. The four areas of emphasis are Religious Studies, Asian Religions, Judaism, and Christian Studies.

UNITS

Religious Studies	20
Lower division course	4
Upper division courses	16
Religious Studies 100 required.	
Some substitutions from other departments or programs allowed with consent of adviser.	

Preministerial Adviser. L.D. Hurst.

Jewish Studies. Students interested in Jewish studies should contact N. Janowitz of Religious Studies or D. Biale of History.

Courses in Hebrew (HEB)

Lower Division Courses

1. Elementary Hebrew (5)

Lecture/discussion—4 hours; laboratory—1 hour. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew. (Students who have successfully completed, with a C- or better, Hebrew 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I. (I.)

2. Elementary Hebrew (5)

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 1 or the equivalent. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew.—II. (II.)

3. Elementary Hebrew (5)

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 2 or the equivalent. Speaking, listening comprehension, reading and writing fundamentals of modern Hebrew.—III. (III.)

Upper Division Courses

100. Introduction to Modern Literary Hebrew (4)

Lecture/discussion—4 hours. Prerequisite: course 3 or the equivalent. Advanced topics in Hebrew grammar and syntax, selected literary texts, and advanced work in modern spoken Hebrew.—I. (I.)

101. Biblical Hebrew Literature (4)

Lecture/discussion—4 hours. Prerequisite: course 100 or the equivalent. The major literary genres of the Hebrew Bible: narrative Psalms, wisdom, prophecy, and love poetry. Study of biblical Hebrew grammar. Modern Hebrew used in oral presentations and class discussion. GE credit: ArtHum, Wrt.—II.

102. Post-Biblical Hebrew Literature (4)

Lecture/discussion—4 hours. Prerequisite: course 100 or the equivalent. Rabbinic and medieval Hebrew literature, modern Hebrew prose and poetry. Oral presentations and class discussion in modern Hebrew. GE credit: ArtHum, Wrt.—III. (III.)

Courses in Religious Studies (RST)

Lower Division Courses

1. Survey of Religion (4)

Lecture—3 hours; discussion—1 hour. Basic concepts introduced through readings of the primary religious literature. Discussion of central ideas (creation, history, law, prophecy, suffering, mysticism, asceticism, karma, reincarnation, moksha, etc.); readings from the Bible, Bhagavad Gita, the Koran, selections from Plato and early Buddhist writings. GE credit: ArtHum, Div, Wrt.—II. (II.) Lai

2. Myth, Ritual, and Symbolism (4)

Lecture—3 hours, discussion—1 hour. Myths, rituals and religious symbols found in a variety of religious

traditions including examples from ancient and contemporary religious life. Variety of religious phenomena; validity of different approaches to the study of religion. GE credit: ArtHum, Div, Wrt.—I, III. (I, III.) Lai, Janowitz

3A-C. Topics in Comparative Religion (4)

Lecture—3 hours; discussion—1 hour. Introduction to the methods used in comparative religion, focusing on a particular theme in a number of religious traditions: (A) The Experiential Dimension: Pilgrimage; (B) The Mythic Dimension: Death and the After-life; (C) The Ritual Dimension: Sacrifice. May be repeated for credit in a different subject area. GE credit: ArtHum, Div, Wrt.—I. (I.)

10. Introduction to Religious Studies (2)

Lecture—2 hours. Topic of importance in more than one religious tradition as an illustration of the problems and methods of religious studies. May be repeated for credit in a different subject area.—II. (II.) Lai

21. Hebrew Scriptures (4)

Lecture—3 hours; term paper. Selected texts from the Hebrew Scriptures (Genesis—II Chronicles) and review of modern scholarship on the texts from a variety of perspectives (historical, literary, sociological, psychological). Course work is based on an English translation and no knowledge of Hebrew is required. GE credit: ArtHum, Div, Wrt.—I. (I.)

23. Introduction to Judaism (4)

Lecture/discussion—3 hours; term paper. Introduction to the study of religion using examples from the rituals, art and holy texts of Judaism. No prior knowledge of either Judaism or the study of religion is necessary. GE credit: ArtHum, Div, Wrt.—II. (II.)

40. New Testament (4)

Lecture—3 hours; discussion—1 hour. New Testament literature from critical, historical, and theological perspectives. GE credit: ArtHum, Wrt.—I. (I.) Hurst

60. Introduction to Islam (4)

Lecture/discussion—4 hours. Introduction to topics at core of Islamic tradition including Muhammad, the Qur'an, Islamic law, Sufism and sects as well as to selected topics including Islamic revival.—III. (III.)

65C. Scriptures of Islam (4)

Lecture/discussion—3 hours; term paper. Examination of the scriptures (in translation) of Islam, with attention to its role as literature, as religious iconography, and as devotion. Scriptural interpretation and methods and institutions of scriptural learning. Not offered every year. GE credit: ArtHum, Div, Wrt.—III.

75. Chinese Philosophy: An Introduction (3)

Lecture—2 hours; discussion—1 hour. Introduction to Chinese philosophy from classical to modern times: emphasis on basic metaphysics and its change over time, including Confucian humanism, Taoist cosmologies, the Han synthesis of Tao, Yin-yang and Five Elements; its impact on Buddhism, Sung new synthesis and conflict with the West. Offered in alternate years.—I. Lai

98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)

99. Special Study for Lower Division Undergraduates (1-5)

(P/NP grading only.)

Upper Division Courses

100. Study of Religion: Issues and Methods (4)

Lecture—3 hours; term paper. Principal issues and methods of Religious Studies and associated fields.—III. (III.)

102. Christian Origins (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 40; course 23 recommended. Beginning of the Christian faith seen in relation to milieu in which it originated. Offered in alternate years.—(I.) Hurst

110. Life, Meaning and Identity (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 1 or 2 or upper division standing. Study of religious lives, the quest for meaning and for personal identity; how religions frame the problems of life; how cultural and personal crises affect youthful

identity; the nature and structure of dreams, myths, and ideals. Offered in alternate years.—II. Lai

115. Mysticism (4)

Lecture—3 hours; term paper. Prerequisite: one lower division Religious Studies course (except 10, 98, or 99). Historical and descriptive analysis of selected key figures in mystical traditions and readings of representative mystical texts. Analytic term paper. Offered every 3-4 years. GE credit: ArtHum, Div, Wrt.—(III.)

122. Studies in Biblical Texts (4)

Lecture—3 hours; term paper. Prerequisite: course 21. Study of a book from the Prophets or writings from critical, historical, and religious perspectives. May be repeated once for credit in different subject area.—III. (III.) Janowitz

124. Topics in Judaism (4)

Lecture—3 hours; term paper. Prerequisite: course 23. Examination of selected aspects of Jewish life, religion, or literature. May be repeated once for credit in different subject area.—II. (II.)

125. Dead Sea Scrolls, Apocrypha, and Pseudepigrapha (4)

Lecture/discussion—4 hours. prerequisite: courses 21 or 40. Survey of the major apocryphal and pseudepigraphical writings of the ancient Near East and their historical, social, and religious importance. GE credit: Wrt.—III. (III.)

130. Topics in Religious Studies (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 1 or 2 or consent of instructor. Thematic study of a phenomenon in more than one religious tradition or of the relationship between religion and another cultural phenomenon; review of theory and method included. May be repeated twice for credit in different subject area.—II, III. (II, III.)

140. Christian Theology (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 40; course 102 recommended. Historical and systematic introduction to Christian doctrine, with attention to divergent traditions and the problem of orthodoxy and heresy.—I. (I.) Hurst

141A. New Testament Literature: Synoptic Gospels (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Synoptic Tradition—Matthew, Mark, Luke and Acts. Offered every third year to alternate with 141B, 141C. GE credit: ArtHum, Wrt.—Hurst

141B. New Testament Literature: John (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Johannine Tradition—the Gospel and letters of John. Offered every third year to alternate with 141A, 141C. GE credit: ArtHum, Wrt.—III. Hurst

141C. New Testament Literature: Paul (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Pauline tradition—the letters of Paul. Offered every third year to alternate with 141A, 141B. GE credit: ArtHum, Wrt.—(II.) Hurst

142. Tyndale and the Beginnings of the English Bible (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 40 recommended. Study of Tyndale's *New Testament* translation as a literary and cultural monument in the context of previous Biblical translation, the historical situation in the 16th century, and the influence of this version on the English language and its literature. Offered in alternate years. GE credit: ArtHum, Wrt.—(I.) Schaeffer

145. Contemporary American Religion (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40 and History 17B recommended. Examination of several major movements and phenomena in twentieth-century American religion. Offered in alternate years.—II.

150. Religious Ethics (4)

Lecture/discussion—4 hours. Prerequisite: course 4. Study of the religious bases to ethics through concentration on the ethical tracts of one major tradition,

or through a comparison of the attitudes of two or more traditions to a common ethical issue. Offered every three years.—(II.) Lai

168. Hinduism (4)

Lecture—3 hours; term paper. Prerequisite: course 4. Hindu tradition from ancient to modern times. Multiplicity of religious forms within Hinduism with mention of Jainism, Buddhism, and Sikhism and their relation to the mainstream of Hindu religion. Offered in alternate years.—I.

170. Buddhism (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 1 or 4. Study of Buddhism in its pan-Asian manifestations, from its beginning in India to its development in Sri Lanka and Southeast Asia, Central Asia, China and Japan; teachings and practices, socio-political and cultural impact. Offered in alternate years.—(III.) Lai

172. Ch'an (Zen) Buddhism (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 4 recommended. Doctrines and methods of the Patriarchs and great masters, both ancient and modern, in the framework of the orthodox Buddhist tradition. Doctrinal basis of meditative techniques.—II. (II.) Lai

178A-E. Undergraduate Proseminar in Religion and Culture (2)

Lecture/discussion—2 hours. Prerequisite: upper division standing and one course in religious studies or consent of instructor. Individual topics are discussed by lecturers from this campus and elsewhere. Each student writes a term paper in one of these areas. Content alternates among the following: (A) Idioms of Religion; (B) Cultural and Social Context of Religion; (C) Religion and Mind; (D) Religion and Visual Arts; (E) Religion, Music, and Drama. (P/NP grading only.)—II. (II.)

189. Senior Colloquium (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Primarily for seniors in Religious Studies. Discussion in depth of a problem in religion which requires the methods of several disciplines and is important in the encounter between religions.—II. (II.)

190. Seminar (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor; required of all Religious Studies majors. Allows majors to integrate their disciplined study of the field. Emphasis on current scholarly debate about the methods for analyzing and comparing diverse religious traditions. Offered in alternate years.—(I.)

194HA-194HB. Special Study for Honors Students (1-5)

Independent study. Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

The Major Program

The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.

The Program. The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions.

Internships and Career Alternatives. Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter4-31	
Russian 1 through 6 (or the equivalent)	
.....0-27	
Russian 41 or 42	4

	UNITS
Russian20	
Russian 101A, 101B, 101C	12
Other upper division Russian courses	8

Honors and Honors Program. The honors program comprises at least one quarter of study under course 194H, which will include a research paper. See also the University and College requirements.

Study Abroad. Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and year programs sponsored by CIEE and ACTR in St. Petersburg and Moscow.

Teaching Credential Subject Representative. D. Rancour-Laferriere. See also under Teacher Education Program.

Prerequisite credit. Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

Courses in Russian (RUS)

Lower Division Courses

Course Placement. Students who have learned Russian at home must consult the department for placement instructions. Students with two years of Russian in high school normally continue in Russian 2; those with three years, Russian 3; those with four years, Russian 4.

1. Elementary Russian (5)

Discussion—5 hours; laboratory—1 hour. Introduction to Russian grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Russian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I. (I.) Choate

2. Elementary Russian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of grammar and language skills developed in course 1.—II. (II.) Choate

3. Elementary Russian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Continuation of grammar and language skills developed in course 2.—III. (III.) Choate

4. Intermediate Russian (4)

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 3. Grammar review and conversational practice.—I. (I.) Choate

5. Intermediate Russian (4)

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 4. Grammar review. Introduction to literature. Conversational practice.—II. (II.) Choate

6. Intermediate Russian (4)

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 5. Grammar review. Intermediate conversation and continued reading of literature.—III. (III.) Choate

10. Elementary Conversation (2)

Discussion—2 hours. Prerequisite: course 1; course 2 or 3 (concurrently). Conversational practice to improve pronunciation and master spoken idioms. May be repeated for credit up to a maximum of 6 units.—II, III. (II, III.)

15. Russia Today and Tomorrow (4)

Lecture/discussion—4 hours. Examination of basic issues that pertain to the former totalitarian superpower which is in transition to democracy, the conflicts in Russia, its civilization and intellectual history up to including the present day and its tendencies for the future. GE credit: ArtHum, Div.—III. Druzhnikov

41. Survey of Nineteenth-Century Russian Literature (in English) (4)

Lecture—3 hours. Introduction to dominant literary trends, major literary figures and landmarks of Russian prose and poetry from the period of Sentimentalism through Romanticism and Realism to the beginnings of Modernism. Offered in alternate years. GE credit: ArtHum, Wrt.—II.

42. Survey of Twentieth-Century Russian Literature (in English) (4)

Lecture—3 hours. Introduction to major literary trends such as Symbolism, Acmeism, Futurism, Neo-realism, and Socialist Realism. Readings from representative writers such as Gorky, Bely, Pasternak, Solzhenitsyn, and Tertz. Offered in alternate years. GE credit: ArtHum, Wrt.—(II.) Rancour-Laferriere

44. Children's Literature in Russia (4)

Lecture—3 hours; term paper. Knowledge of Russian not required. History and theory of children's literature, with special reference to Russian and Soviet examples. Analysis of genres, technique, and folklore elements, contrasted with those of the West. Students will write their own literature for children. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

98. Directed Group Study (1-5)

Discussion—1-5 hours. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

Upper Division Courses**101A. Advanced Russian (4)**

Lecture—2 hours; discussion—1 hour; recitation—1 hour. Prerequisite: course 6. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversation exercises utilizing literary and colloquial variants of current Russian speech.—I.

101B. Advanced Russian (4)

Lecture—2 hours; discussion—1 hour; recitation—1 hour. Prerequisite: course 101A. Continuation of course 101A. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech.—II.

101C. Advanced Russian (4)

Lecture—2 hours; discussion—1 hour; recitation—1 hour. Prerequisite: course 101B. Continuation of course 101B. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech.—III.

102. Russian Composition (4)

Lecture/discussion—3 hours; tutorial—1 hour. Prerequisite: course 6 or consent of instructor. Practice in writing Russian. One composition on a different topic each week. Topics include history, geography, politics, and literature of Russia; comparison of Russian and American lifestyles; current events. Conducted in Russian. Offered in alternate years. GE credit: ArtHum.—II. Druzhnikov

103. Literary Translation (4)

Discussion—3 hours. Prerequisite: course 101C. Translation of Russian literary texts into stylistically equivalent idiomatic English. Offered in alternate years.—(III.) Choate

104. Scientific Translation (4)

Discussion—3 hours; individual translation projects—1 hour. Prerequisite: course 101A. Techniques of translating Russian scientific texts. Science students will select articles from their fields of interest; Russian students will work on materials assigned by instructor. Offered in alternate years.

105. Advanced Russian Conversation (4)

Conversation—3 hours; preparation of texts—1 hour. Prerequisite: course 6. Intensive conversational practice and discussion based on current events and contemporary texts. Offered in alternate years.—I. Druzhnikov

121. Nineteenth-Century Russian Prose (in English) (4)

Lecture—3 hours; term paper. Development of prose from Pushkin and Gogol, through Dostoevsky and Tolstoy, to Maxim Gorky. Other writers are selected sequentially: Turgenyev, Goncharov, Pisemsky, Saltykov, Chekhov. Romanticism, the Natural School, critical realism, and psychological realism are covered. Offered in alternate years. GE credit: ArtHum.—(I.) Druzhnikov

123. Twentieth-Century Russian Prose (in English) (4)

Lecture—3 hours; term paper. Examination of various trends including Acmeism, Symbolism, Neorealism, and Socialist Realism in development of prose. Readings from such writers as Gorky, Zamiatin, Sholokhov, Pasternak, and Solzhenitsyn. Offered in alternate years. GE credit: ArtHum, Wrt.—Druzhnikov

126. The Russian Theater (in English) (4)

Lecture—3 hours; discussion—1 hour. The main works of Russian dramatists from Gogol to the present, including Turgenyev, Tolstoy, Chekhov, Gorky, Mayakovsky, Bulgakov, Shvarts. Offered in alternate years. GE credit: ArtHum, Wrt.

127. Nineteenth-Century Russian Poetry (4)

Discussion—3 hours; term paper. Prerequisite: course 6. Introduction to the principles of Russian versification followed by historical and poetic analysis of the following figures: Derzhavin, Zhukovsky, Pushkin, Delvig, Baratynsky, Lermontov, Nekrasov, Tjutchev, and Fet. Conducted in Russian. Offered in alternate years. GE credit: ArtHum.

128. Twentieth-Century Russian Poetry (4)

Discussion—3 hours; term paper. Prerequisite: course 6. Introduction to principles of Russian versification followed by historical and poetic analysis of the following figures: Brjusov, Blok, Akhmatova, Mandelstam, Esenin, Mayakovsky, Khlebnikov, Pasternak, Evtushenko, Voznesensky, and Brodsky. Conducted in Russian. Offered in alternate years. GE credit: ArtHum.—III. Druzhnikov

129. Russian Film (4)

Lecture/discussion—3 hours; term paper; film viewing—3 hours. Prerequisite: completion of Subject A requirement. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet empire; gender and the nation in Russian film. In English; films with English subtitles. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Choate

130. Contemporary Russian Culture (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Current trends in Russian culture and the relationship between artists and the government. Topics include history of censorship, official and dissident art, recent changes in the cultural scene. Knowledge of Russian not required. Offered in alternate years. GE credit: ArtHum, Wrt.—(III.)

131. Literature of Revolution (4)

Lecture—3 hours; essays. Prerequisite: History 3 or 4C, and/or any introductory literature course. Study of impact of revolution on society and culture; the major artistic, political and historical works surrounding the Russian revolutions of 1905 and 1917. Offered in alternate years. GE credit: ArtHum, Wrt.

132. Nature and Culture in Russia (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: any introductory course in environmental studies. History of the environmental movement in Russia from the 1920's to the present, showing the influence of Stalinism on environmental ethics; concepts of society and nature in Russian literature and film; international implications of Russian environmental policy. Knowledge of Russian is not required. GE credit: ArtHum, Wrt.—(I.)

139. Pushkin (in English) (4)

Lecture/discussion—3 hours; term paper. The life and works of Pushkin, the most prominent poet of Russia. Evaluations of Pushkin by both Russian and Western scholars. Images of Pushkin and the official myths that surround him. No knowledge of Russian required. GE credit: ArtHum, Div, Wrt.—(I.) Druzhnikov

140. Dostoevsky (in English) (4)

Lecture—3 hours. Reading and analysis of Dostoevsky's principal works such as *Crime and Punishment*, *The Idiot*, *The Brothers Karamazov*, and *The Diary*. Study of social and political views as reflected in Dostoevsky's works. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.)

141. Tolstoy (in English) (4)

Lecture—3 hours. Study of Leo Tolstoy's literary evolution and moral quest. Readings include his *Confession*, a major novel such as *War and Peace* or *Anna Karenina*, and representative shorter fiction. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I. Rancour-Laferriere

142. Women's Autobiography (in English) (4)

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: any introductory course in literature. An examination of Russian women's autobiography from the 18th through the 20th centuries, emphasizing the way in which the genre of autobiography serves as a means of the writer's creation of herself, as opposed to her definition by others. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

143. Alexander Solzhenitsyn (4)

Lecture/discussion—3 hours; term paper. Prerequisite: any introductory literature course or consent of instructor. Examination of the literary and political writings of the major Russian dissident in the biographical context in which they were created. Knowledge of Russian not required. GE credit: ArtHum, Div, Wrt.—(II.) Rancour-Laferriere

144. Christ and Literature (4)

Lecture—3 hours; term paper. Consideration of the intersection of literature, culture, and (at times heretical/blasphemous) theology in Russia and elsewhere. Analysis of texts; discussion of historical contexts and related philosophical approaches to the New Testament. GE credit: ArtHum, Div, Wrt.—III. (III.)

150. Russian Culture (4)

Discussion—3 hours; term paper. Knowledge of Russian not required. Study of Russian culture in nineteenth and twentieth centuries. Brief introduction of the beginnings up to nineteenth century. Russian art, music, philosophy, church, traditions, and daily life. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. (II.) Rancour-Laferriere

151. Writers and Censorship in Russia and the Soviet Union (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: any introductory literature course or consent of instructor. Literature and censorship in Russia. Personal responsibility of the author vs. conformism to state morality. Russian myths and Russian realities. GE credit: ArtHum, Wrt.—I. Druzhnikov

154. Russian Folklore (4)

Lecture—3 hours; term paper. Knowledge of Russian not required. Russian folklore, rituals, and history will be analyzed and compared with folklore of other peoples. Sociological implications of attitudes toward family unit, children, etc. Influences of folklore on Russian literature and historiography. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. (II.) Rancour-Laferriere

159. Yiddish Literature in Translation (4)

Lecture/discussion—3 hours; term paper. Major writers of Yiddish in English translation; major genres of Yiddish literature from the mid-19th century to the present. GE credit: ArtHum, Div.—III.

166. Representations of Sexuality in Russian Literature (4)

Lecture—3 hours; term paper. Prerequisite: Women's Studies 50 or introductory psychology. Sexuality in Russian oral and written literature from a dual, feminist-psychoanalytic perspective. Monogamy, free love, sexism, homosexuality, incest, androgyny, and others as depicted by such writers as Pushkin, Gogol, Tolstoy, Dostoevsky, Akhmatova, Blok, Tolstaya, and others. GE credit: ArtHum, Div, Wrt.

192. Research Essay (2)

Prerequisite: a Russian literature course (may be taken concurrently). A research essay, based on primary and secondary sources, dealing in depth with a topic arising from or related to the prerequisite literature course. May be repeated for credit.

194H. Special Study for Honors Students (4)

Independent study—4 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Russian studies.

195H. Honors Thesis (4)

Independent study—4 hours. Prerequisite: course 194H. Writing an honors thesis, under the direction of a faculty member, on a topic in Russian studies.

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

The Program. Science and Society is an interdepartmental teaching program administered by the College of Agricultural and Environmental Sciences that offers students throughout the campus the opportunity to discover the connections that link the social, biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.

The Science and Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Science and Society courses, upper division courses from both the College of Agricultural and Environmental Sciences and the College of Letters and Science in the areas of history and philosophy of science, policy and decision making, communication of science, and culture, ethics and applications.

Minor Program Requirements:

	UNITS
Science and Society	22-27
Science and Society 1	4
Science and Society 2, 5, 15, 20, 30, 90A, 90B, 90C or 90X.....	2-4
One course from each of the four following areas:	
<i>History and Philosophy of Science:</i>	
Community and Regional Development 118, 162, History 185A, 185B, History and Philosophy of Science 150, Nature and Culture 100, Philosophy 107, 108, or 109	4
<i>Policy and Decision Making:</i>	
Agricultural and Resource Economics 120, 147, 150, Consumer Science 100, Environmental Science and Policy 160, 165, Political Science 175, Sociology 155, or 181.....	3-4
<i>Communication of Science:</i>	
Agricultural Education 172, Agricultural Management and Rangeland Resources 122, Anthropology 120, Communication 115, 130, 135, 138, 140, Community and Regional Development 174, Linguistics 163, Political Science 165	3-4
<i>Culture, Ethics and Applications:</i>	
Agricultural Management and Rangeland Resources 101, Community and Regional Development 142, Environmental Science and Policy 126, 164, Fiber and Polymer Science 110, International Agricultural Development 104, Plant Biology 151, Plant Pathology 140, or Sociology 144	3-4
Science and Society 120	3

Minor Adviser: R.B. MacDonald.

Related courses. See Agricultural and Resource Economics 120, 147, Agricultural Management and Rangeland Resources 1, 101, 122, Communication 115, 140, Community and Regional Development 118, 142, 162, 174, Avian Sciences 13, Environmental Science and Policy 126, 160, 164, 165, Fiber and Polymer Science 110, History 185A, 185B, History and Philosophy of Science 150, Nature and Culture 100, Plant Biology 12, Plant Pathology 140, Political Science 175, Wildlife, Fish, and Conservation Biology 10.

Courses in Science and Society (SAS)

Lower Division Courses

1. Critical Inquiry in Contemporary Issues (4)

Lecture/discussion—3 hours; discussion—1 hour. Contemporary issues, including global population trends, economic and environmental changes, cultural diversity and biodiversity, nutrition and food safety, fiber and textiles, changing consumer cultures. Inquiry processes emphasize ethics, multiple disciplines, and multiple perspectives. GE credit: SciEng, Wrt.—I. (I.) MacDonald, Winter

2. Feeding the Planet: Influences on the Global Food Supply (3)

Lecture/discussion—3 hours. Scientific principles and dynamic interactions involved in food production, food processing, nutrition, shelf life and marketing from differing viewpoints. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. GE credit: SciEng or SocSci, Wrt.—II. (II.) Reid

3. Science, Technology and Society (4)

Lecture—4 hours. Impact of developments in science and technology on the individual in society and how economics, politics, culture and values affect technological development. Not open for credit to students who have completed former course Applied Behavioral Sciences 18. GE credit: SciEng or SocSci, Wrt.—(III.)

5. Pathways to Discovery: Science and Society (3)

Lecture/discussion—3 hours. Highlights a current issue and/or controversy found in contemporary society and looks at how this problem impacts and is affected by the physical, social and biological sciences. Course varies with topic offered. May be repeated twice for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt.

15. AIDS and Society (4)

Lecture—3 hours; discussion—1 hour. Biology of HIV transmission and AIDS and how a biological agent acts on and influences the structure of contemporary society. Includes the psychology of risk and stigma, gender issues, changes in social relationships and public policy, global implications. GE credit: SciEng or SocSci, Div, Wrt.—III. (III.) Radke

20. Genetics and Society (3)

Lecture/discussion—3 hours; two field trips. Examination of basic concepts of genetics, modern methods of biotechnology, the process of scientific discovery and the public perception of the process. Presentation, evaluation and critical discussions of the present and future impact of genetics on society. GE credit: SciEng or SocSci, Wrt.—I, II. (I, II.) Cook Epstein, Ronald, Tyler

30. Mushrooms, Molds, and Society (3)

Lecture/discussion—3 hours. Fungi as organisms with which humans interact daily, societal issues arising from these interactions. Fungi in medicine, religion, agriculture, and industry, as well as cultural perceptions of fungi. GE credit: SciEng or SocSci, Wrt.—I. (I.) Gordon, Rizzo

90A. Issues in Environmental and Resource Sciences (2)

Seminar—2 hours; two Saturday field trips. Prerequisite: limited to lower division students. Discussion of historical and current issues in environmental and resource sciences. Lectures, reading and field trips will provide background for selected topics.—I, II. (I, II.) Stasulat

90B. Observing and Writing in Biology (2)

Seminar—1 hour; laboratory—1 hour; term paper. Students will observe the interactions between microscopic organisms, conduct simple laboratory experiments, describe and analyze observations and discuss scientific observations and writing.—Jaffee

90C. Herbal Medicine: Relevance for the 21st Century (2)

Seminar—2 hours. Medicinal usage of plants from biological, historical, and cultural perspectives. Broad contexts of holistic and scientific paradigms for understanding herbal medicine. Saturday field trip to teach herb identification.—II. (II.) Weinbaum

90D. Saving Endangered Plant Species: Problems and Prospects (2)

Seminar—2 hours. Endangered plant species illustrate the value of conservation biology. Topics include societal issues and plant germplasm conservation, comparisons to animal conservation issues, and the economics of and justification for preserving endangered plants.—I. (I.) Parfitt

90E. Biotechnology—a New Era, a New Struggle (2)

Seminar—2 hours. Animal biotechnology and its applications. Discussion topics include potential societal impacts of various technologies, factors shaping public opinion, and ethical and moral questions arising from new biotechnology applications.—I. (I.) Murray

90F. Food Distribution in a Hungry World (2)

Seminar—2 hours. The biological, technological, environmental, and socioeconomic factors related to food distribution systems at local, regional, national, and international levels. The potential for increasing world food supply by reducing losses between harvest and consumption.—I. (I.) Kader

90G. Science, Society and the Environment (2)

Seminar—2 hours. Contemporary environmental issues, scientific approaches to addressing these issues, and accompanying societal and ethical considerations.—I. (I.) Wilson

90X. Lower Division Seminar (1-4)

Seminar—1-4 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Science and Society through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May be repeated for credit. Limited enrollment.

91A. Explorations in Science and Society: Cultures and Identities (2)

Seminar—1 hour; extensive writing or discussion—1 hour. Prerequisite: participation in the summer Special Transitional Enrichment Program (STEP) or consent of instructor; course 1 concurrently. Exploration of linkages among identity and culture, multi-disciplinary inquiry, and agricultural and environmental science issues.—I. (I.) MacDonald

91B. Explorations in Science and Society: Leadership and Collaboration (2)

Seminar—1 hour; extensive writing or discussion—1 hour. Prerequisite: course 91A or consent of instructor. Extends understanding of culture and identity to issues of leadership, collaboration, and social action in science and society. Includes a mandatory two and half day retreat.—II. (II.) MacDonald

91C. Explorations in Science and Society: Engagement (2)

Seminar—1 hour; internship—3 hours. Prerequisite: course 91B or consent of instructor. Explorations of the concept of engagement in science and society from philosophical and practical perspectives. Exploration of the concept of engagement based on lectures, self reflection, discussions and three hours of K-12 school internships per week.—III. (III.) MacDonald

92. Internship in Science and Society (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship on and off campus, in the community, or in institutional settings. (P/NP grading only.)

97T. Tutoring in Science and Society (2-3)

Discussion/lecture—6-9 hours. Prerequisite: lower division standing; completion of course being tutored; consent of instructor. Tutoring in undergraduate Science and Society courses. Assisting with leading discussion groups under supervision of instructor(s) and teaching assistants. Acting as liaison between the students and course instructor(s) to foster effective communication and interaction. May not be repeated. (P/NP grading only.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Discussion—3-15 hours. Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

Upper Division Courses**105. Organismal Interactions in Everyday Life (3)**

Lecture—2 hours; discussion/laboratory—1 hour. Prerequisite: Biological Sciences 10 or 1A. Ecology and evolution of organismal interactions and the importance of these interactions to human health and welfare and a sustainable environment. Students will debate environmental issues on scientific, political, and ethical grounds. GE credit: SciEng, Wrt.

120. Science and Contemporary Societal Issues (3)

Lecture/discussion—3 hours. Prerequisite: upper division standing. Study of a contemporary societal issue/problem emphasizing critical thinking with information drawn from several disciplines. Multiple instructors illustrate the necessity of an interdisciplinary and cooperative approach in solving important issues. Topic will vary. May be repeated once for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt.—III. (III.) MacDonald

190X. Upper Division Seminar (1-4)

Seminar—1-4 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Science and Society. Emphasis upon student partici-

pation in learning. May be repeated for credit. Limited enrollment.

192. Internship in Science and Society (1-12)

Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship on or off campus, in the community, or in institutional settings. (P/NP grading only.)

197T. Tutoring in Science and Society (1-5)

Tutoring—3-15 hours. Prerequisite: upper division standing; completion of course being tutored or the equivalent. Tutoring of students in Science and Society courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another Science and Society course. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study in Science and Society (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

Graduate Courses**298. Group Study (1-5)**

Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only.)

299. Graduate Research (1-12)

Prerequisite: graduate student and consent of instructor. May be repeated for credit. (S/U grading only.)

Professional Course**390. Teaching Methods in Science and Society (1)**

Discussion—1 hour. Prerequisite: graduate level and consent of instructor. Practical experience in methods and problems related to teaching Science and Society courses. Discussion of critical pedagogies specific to teaching of science-societal issues, preparing for and conducting discussion sessions, analyses of texts and supporting material, formulation of assignments, exams. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Science and Technology Studies

(College of Letters and Science)

James R. Griesemer, Ph.D., Program Director

Program Office, 1238 Social Sciences and Humanities Building (530-752-9621)

Committee in Charge

Joan Cadden, Ph.D. (*History*)

Patrick Carroll, Ph.D. (*Sociology*)

James R. Griesemer, Ph.D. (*Philosophy*)

Kevin D. Hoover, D. Phil. (*Economics*)

Catherine J. Kudlick, Ph.D. (*History*)

Jay Mechling, Ph.D. (*American Studies*)

Benjamin S. Orlove, Ph.D. (*Environmental Science and Policy*)

Marcel Rejmanek, Ph.D. (*Evolution and Ecology*)

Paul Teller, Ph.D. (*Philosophy*)

The Program of Study

The program in Science and Technology Studies offers courses and undergraduate programs of study exploring the nature of science, technology, and medicine in relation to their economic, social, political, and cultural environments. The curriculum is oriented toward the analysis and synthesis of science, technology, and medicine in a way that actively creates connections between the varieties of perspectives and concerns in the humanities and the sciences.

The program will be of interest to undergraduate students who intend to pursue careers in which it will be useful to have a broad understanding of the nature and role of science, technology, and medicine; for example, careers in science teaching, medicine and other health care professions, technical writing and science journalism and science policy.

Courses in Science and Technology Studies (STS)

Lower Division Courses**1. Introduction to Science, Technology and Medicine Studies (4)**

Lecture—3 hours; discussion—1 hour. History, philosophy, sociology, politics, and cultural studies of science, technology, and medicine. Emphasis on a broad range of perspectives. GE credit: SciEng or SocSci.—I. (I.) Carroll-Burke

20. Methods in Science, Technology and Medicine Studies (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 recommended. Methodological issues concerning the historical, philosophical, sociological, ethical, and political analysis of science, technology, and medicine. Detailed case studies to illustrate different methods of analysis. GE credit: SciEng or SocSci, Wrt.—(III.) Carroll-Burke

Upper Division Course**190. Seminar in Science, Technology and Medicine Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: open to junior and senior Science and Technology Studies majors only. Intensive reading, discussion, research and writing by small groups in selected topics of science, technology, and medicine studies scholarship. Emphasis on individual research projects.—III. (III.)

Social and Ethnic Relations

(College of Letters and Science)

The interdisciplinary minor in Social and Ethnic Relations explores the racial, ethnic, class and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American and African Studies, Asian American Studies, Native American Studies, and Women's Studies.

Minor Program Requirements:

UNITS

Social and Ethnic Relations24

Select one course from each of the following six groups to total 24 units. Courses applied toward the satisfaction of a major may not also be offered in satisfaction of the minor. No more than four units (one course) may be lower division.

(a) African American and African Studies

100; Anthropology/Native American Studies 134; Women's Studies 102

(b) African American and African Studies

123, 133, 145A

(c) Asian American Studies 1, 2, 100,

110, 130

(d) Chicana/o Studies 130, 132

(e) Native American Studies 1, 10, 115,

119, 130A, 130B, 130C, 157, 180

(f) Women's Studies 103, 104, 180

Advising. Contact Asian American Studies, 3102 Hart Hall, 530-752-3625.

Social Sciences

(College of Letters and Science)

Gregory Clark, Ph.D., Program Director
Program Office, 108 Sproul Hall (530-752-4001)

Committee in Charge

Gregory Clark, Ph.D. (*Economics*)
Dennis J. Dingemans, Ph.D. (*Social Sciences*)
Jack Goldstone, Ph.D. (*Sociology*)
Hilary Hoynes, Ph.D. (*Economics*)
Mary Jackman, Ph.D. (*Sociology*)
Jeanette Money, Ph.D. (*Political Science*)
Marianne Page, Ph.D. (*Economics*)
Randolph Siverson, Ph.D. (*Political Science*)
William Skinner, Ph.D. (*Anthropology*)

Faculty

Dennis J. Dingemans, Ph.D., Senior Lecturer,
Academic Senate Distinguished Teaching Award

Emeriti Faculty

Howard F. Gregor, Ph.D., Professor Emeritus
Frederick J. Simoons, Ph.D., Professor Emeritus
Kenneth Thompson, Ph.D., Professor Emeritus

The Program of Study

The Program in Social Sciences promotes the development of innovative curricular initiatives across the social sciences, including offering broadly conceived, integrative undergraduate-level and graduate-level courses. Faculty affiliated with the program are often engaged in interdepartmental teaching and research.

Social Theory and Comparative History

John R. Hall, Ph.D., Program Director and Professor
(*Sociology*)

Program Office, Center for History, Society, and Culture, 2231 Social Sciences and Humanities Building (530-754-8328)

Graduate Study. The program comprises course work and research leading to the Ph.D. with a *designated emphasis* in Social Theory and Comparative History. The program provides theoretical training and interdisciplinary perspective to Ph.D. candidates in the eight participating departments and graduate groups (Anthropology, Comparative Literature, Economics, English, Geography, History, Political Science, Sociology). Students from other departments are also welcome. All students must fulfill all Ph.D. requirements of their home department. The additional requirements leading to the designated emphasis include: (1) four graduate courses (Social Theory and Comparative History 250, Sociology 242A, and two courses sponsored by the Social Theory and Comparative History program, one of which must be offered by a department other than the student's home department); (2) presentation of a Social Theory and Comparative History field as one area of specialization in the departmental Ph.D. qualifying examination; (3) an oral discussion, following passage of the Ph.D. qualifying examination, based on the student's dissertation prospectus; (4) completion of the dissertation to the satisfaction of the student's thesis committee, one of whose members will be a representative of the Social Theory and Comparative History program.

Graduate Adviser. Consult the Program Director, Program Office, or web site (<http://chsc.ucdavis.edu>) for advising and detailed information on application and requirements.

Courses in Social Theory and Comparative History (STH)

Graduate Courses

250. Research in Social Theory and Comparative History (4)

Seminar—3 hours; term paper. Prerequisite: admission to Social Theory and Comparative History Designated Emphasis. Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, and Culture faculty and visitors discussing current research.—III. (III.)

290. Advanced Topics in Social Theory and Comparative History (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor and History 204 or Sociology 242A. Interdisciplinary study of particular substantive problems in social theory and comparative history. Topics vary.—I, II, III. (I, II, III.)

295. Advanced Group Research in Social Theory and Comparative History (1)

Discussion—1 hour. Prerequisite: consent of instructor. Participation in research workshops sponsored by the Center for Comparative Research in History, Society, and Culture. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

296. Theory and Society Journal Editorial Workshop (1-4)

Workshop—1 hour; independent study—3 hours. Reading and offering workshop critiques of papers submitted for publication. Reading and discussion of other relevant work in history and the social sciences. May be repeated for credit up to 36 units or with consent of instructor. (S/U grading only.)—I, II, III. (I, II, III.) Gouldner

The Major Programs

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.

The Program. The Department of Sociology offers two major programs, Sociology and Sociology–Organizational Studies. Students selecting the Sociology major may choose from four options in the major. The *General Sociology* emphasis allows students to obtain a broad understanding of the concepts, methods, and theories of sociology. Students with a special interest in the areas of *Law and Society* or *Social Services* may choose a more specialized program of courses and practical experience within the sociology major. The *Comparative Studies and World Development* emphasis provides a sociological perspective on social and economic changes throughout the world, with a stress on relationships between “developed” and “underdeveloped” societies. Students are encouraged to consider the Education Abroad Program for their junior year, especially one in a developing country.

The Sociology–Organizational Studies major develops a broad understanding of the political, social, and economic organizations that comprise modern society. This major emphasizes a sociological perspective, but incorporates a multidisciplinary field of study. The major introduces students to a range of theories and methods that social scientists use in the analysis of organizations.

Career Opportunities. In the Sociology major, the *General* option is for students desiring a solid liberal arts education as well as those interested in graduate work in the social sciences. Options in *Law and Society* or *Social Service* prepare students for careers in such areas as law, corrections, social work or counseling. The *Comparative Studies and World Development* emphasis prepares students for graduate training leading to careers in international fields. Majors in Sociology–Organizational Studies will be prepared for a variety of career options, particularly in the field of management. The major specifically meets entry requirements for programs of professional training leading to a Masters degree in public or private management, and may also lead to further study in any of the disciplinary areas incorporated in the major.

Sociology

A.B. Degree Requirements:

General emphasis:

	UNITS
Preparatory Subject Matter	24-25
Sociology 1, 2, or 3; 46A and 46B (or the equivalents)	12-13
Anthropology 2 or 20	4
Select from History 4A, 4B, 4C, 8, 9A, 9B, 10, 15, 16, 17A, 17B	4
Select from Philosophy 5, 6, 14	4

Depth Subject Matter	44
A. Sociology 100	4
B. Select one course from each of the following four clusters	16
<i>Individual, Culture and Society:</i> Sociology 125, 126, 135	4
<i>Stratification and Social Differentiation:</i> Sociology 130, 132, 140	4
<i>Organizations and Institutions:</i> Sociology 118, 131, 146, 180A	4
<i>Social Dynamics:</i> Sociology 141, 143A, 170	4
C. Select three upper division courses from one of the following clusters (not counting courses taken to fulfill requirement B)	12
<i>Individual, Culture and Society:</i> Sociology 120, 122, 125, 126, 127, 128, 129, 131, 132, 134, 135, 143B, 148, 150, 152, 172, 173, 175, 176	
<i>Stratification and Social Differentiation:</i> Sociology 118, 128, 129, 130, 132, 133, 134, 140, 145A, 145B, 172, 185, and not more than one of the following courses: African American and African Studies 123, Asian American Studies 100, Chicana/o Studies 110, or Native American Studies 115	
<i>Organizations and Institutions:</i> Sociology 118, 124, 131, 133, 139, 144, 146, 149, 150, 154, 155, 159, 180A, 180B, 181, 182, 183, 185	
<i>Social Dynamics:</i> Sociology 123, 125, 138, 141, 143A, 145A, 145B, 147, 148, 156, 157, 170	
<i>Student-initiated thematic cluster</i> developed with a faculty adviser and approved by the Sociology Undergraduate Curriculum Committee	
D. Eight units of Sociology beyond courses taken to fulfill above requirements, and outside of the course cluster used to fulfill requirement C.	
E. One integrative course (prerequisite: senior standing and completion of requirement for Preparatory Subject Matter, Depth Subject Matter, requirement A, and at least two of the courses for requirement B). Choose from Sociology 190X, 191, 194HA-194HB.	
Total Units for the Major	68-69
Law and Society emphasis:	UNITS
Preparatory Subject Matter	29
Sociology 1, 3; 46A and 46B (or the equivalents)	17
Anthropology 2 or 20	4
Select from History 4A, 4B, 4C, 8, 9A, 9B, 10, 15, 17A, 17B	4
Philosophy 5 or 14	4
Depth Subject Matter	44
Sociology 100	4
Select from Sociology 125, 126, 135	4
Select from Sociology 130, 132, 140	4
Select from Sociology 118, 131, 146, 180A	4
Sociology 155	4
Select from Sociology 120, 150, 152	8
Select from Sociology 118, 148, 156, 157; no more than one of the following courses: Philosophy 119; Political Science 122, 154; Environmental Science and Policy 161; no more than one of the following courses: African American and African Studies 121, 145; Asian American Studies 155; Chicana/o Studies 130, 132; Native American Studies 117, 118	12
Select from Sociology 190X, 192, 194HA-194HB	4
(Required prerequisite: senior standing and completion of Sociology 100 and 8	

units from Sociology 118, 125, 126, 130, 131, 132, 135, 140, 146, 180A.)

Total Units for the Major

Social Services emphasis:

UNITS

Preparatory Subject Matter	28
Sociology 2, 3; 46A and 46B (or the equivalents)	16
Psychology 1	4
Select from African American and African Studies 10, 15; Asian American Studies 1, 2; Chicana/o Studies 10, 20; Native American Studies 10, 70	8
Depth Subject Matter	44
Sociology 131, 140, 185	12
Select units from upper division human psychology	4
Select seven courses distributed as specified	28
<i>Social Issues:</i> Sociology 120, 122, 124, 139, 143A, 144, 146, 150, 152, 154, 155, 170	8
<i>Social Interaction:</i> Sociology 126, 127, 128, 143B, 148, 157	4
<i>Race and Ethnicity:</i> African American and African Studies 100; Community and Regional Development 176; Asian American Studies 110, 111, 150; Chicana/o Studies 110; Native American Studies 112, 124; Sociology 129, 130 134	4
<i>Gender:</i> Sociology 132, 133, 145B, 172	4
<i>Organizational Behavior:</i> Sociology 180A, 180B, 181, 182, 183	4
<i>Methodology:</i> Sociology 103, 106 (or the equivalents), 192, 194HA, 194HB	4

Total Units for the Major

Comparative Studies and World Development emphasis:

UNITS

Preparatory Subject Matter	30-57
Sociology 1; 46A and 46B (or the equivalents)	13
Economics 1A, 1B	10
Anthropology 2	4
At least 4 units from Geography 2-2G, History 10, Political Science 2	4
Course work in language instruction in modern foreign language equivalent to 26 units at UC Davis	26
Depth Subject Matter	48
Sociology 100, 141, 145A, 170	16
Economics 115A and Anthropology 126	8
At least twelve units from Sociology 118, 130, 131, 143A, 144, 145B, 156	12
Regional focus, three courses from one of the following groups	12
(a) <i>Africa/Middle East:</i> Anthropology 140A, 140B, 142; Economics 175; Geography 125A, 125B, History 115A, 115B, 115C, 116; Political Science 134, 146	
(b) <i>Latin America/Pacific:</i> Anthropology 144, 147; Geography 122A, 122B; History 161A, 161B, 162, 165; Spanish 135, 136	
(c) <i>Asia:</i> Anthropology 149; Economics 171, 172, 173; Geography 126, 127; History 193, 194A, 194B, 194C; Political Science 138, 148A, 148B; Religious Studies 168, 172; Sociology 147	

Total Units for the Major

Sociology—Organizational Studies

A.B. Degree Requirements:

UNITS

Preparatory Subject Matter	27
Sociology 1, 2, 46A, 46B (or Statistics 13)	17
Economics 1A, 1B	10
Depth Subject Matter	44
Sociology 180A, 180B	8
Sociology 106	4
Select from Psychology 183, Communication 130, or 136	4
Select 16 units from one of the following two clusters and select 4 units from the other cluster	20
(1) <i>Public Administration</i> Community and Regional Development 158, 163, 168; Economics 151B; Political Science 107, 180, 181, 183, 187, 188; Sociology 103, 181	
(2) <i>Business and Society</i> Agricultural and Resource Economics 112; American Studies 125; Community and Regional Development 162, 164; Economics 116, 121A, 121B; History 187A, 187B, 194D; Sociology 138, 139, 159, 183	
Select from Sociology 128, 130, 132, 140, 145A, 145B, 172	4
Select from Sociology 190X, 192, 194HA-194HB	4
(Required prerequisite for 190X or 192: senior standing and completion of all major requirements other than 12 units of the cluster requirements.)	
Total Units for the Major	71
Major Advisers. Consult the Departmental Advising Office, 1282 Social Sciences and Humanities Building.	
Minor Program Requirements:	
Students in other disciplines may elect to minor in Sociology by choosing a sociological subject emphasis listed below. On transcripts, the minor will appear as a minor in Sociology.	
	UNITS
Sociology	20
Sociology—General emphasis Select from Sociology 100, 126, 140, 170, 180A	8
One course from three clusters (see cluster lists under Sociology Major—General Emphasis)	12
Sociology—Organizational Studies emphasis Sociology 180A and 180B	8
Select from Agricultural and Resource Economics 112; American Studies 125; Communication 134, 136; Community and Regional Development 162, 163, 164; Economics 100; Political Science 180, 181, 183, 187, 188; Psychology 183	8
Select from Anthropology 122; History 174A, 179, 187A, 187B, 194D; Sociology 118, 139, 141, 156, 159, 175, 181, 183	4
Sociology—Social Service emphasis Sociology 185, plus 4 units selected from Sociology 131, 132, 133, 145B	8
Select from Sociology 129, 130, 133, 134, 140, 172	4
Four units from Social Issues cluster and four units from Social Interaction cluster (See cluster lists under Sociology Major—Social Services emphasis)	8
Sociology—Law and Society emphasis Sociology 155, plus one of Sociology 120, 150, 152	8
One of Sociology 129, 130, 131, 132, 133, 134, or 172	4

One of Sociology 118, 139, 140, 141, 145A or 145B, 180A or 180B, or 1854
 One of Sociology 100, 122, 124, 126, 128, 143A or 143B, 156, 157, or 1914

Minor Advisers. Consult the departmental Advising Office, 1282 Social Sciences and Humanities Building.

Honors Program. An Honors Program is available to Sociology and Sociology–Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.5 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, the honors student writes an honors thesis and participates in a two-quarter honors seminar (course 194HA–194HB). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with Highest Honors or with High Honors.

Graduate Study. The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in sociology. Further information regarding graduate study may be obtained at the department office or on our Web site.

Graduate students in Sociology have the opportunity to pursue designated emphases in Critical Theory, Women's Studies, Social Theory and Comparative History, or Native American Studies. See these headings for further details on these interdisciplinary programs.

Graduate Advisers. Consult the Graduate Program Coordinator, 1287 Social Sciences and Humanities Building.

Courses in Sociology (SOC)

Lower Division Courses

1. Introduction to Sociology (5)

Lecture—4 hours; discussion—1 hour. Principles and basic concepts of sociology. The study of groups, culture, collective behavior, classes and caste, community and ecology, role, status, and personality. GE credit: SocSci.—I, II, III. (I, II, III.)

2. Self and Society (4)

Lecture—3 hours; discussion—1 hour. Principles and basic concepts of sociological social psychology. Includes the study of the character of the self, identity, roles, socialization, identity change, emotion and social interaction. GE credit: SocSci, Wrt.—I, II, III. (I, II, III.)

3. Social Problems (4)

Lecture—3 hours; discussion—1 hour. General sociological consideration of contemporary social problems in relation to sociocultural change and programs for improvement. GE credit: SocSci, Wrt.—I, II, III. (I, II, III.)

4. Immigration and Opportunity (4)

Lecture—3 hours; discussion—1 hour or term paper. Social and demographic analysis of immigration: motives and experiences of immigrants; immigration and social mobility; immigration, assimilation, and social change; multicultural societies. Detailed study of immigration into the U.S., with comparative studies of Europe, Australia, and other host countries. GE credit: SocSci, Div, Wrt.—I. (I.)

5. Global Social Change: An Introduction to Macrosociology (4)

Lecture—3 hours; discussion—1 hour. An introduction to change and diversity in world history, including the United States. Examines population and family, technological change and economic development, power and status, culture and identity. GE credit: SocSci, Div, Wrt.—I. (I.)

25. Sociology of Popular Culture (4)

Lecture—3 hours; discussion—1 hour. Social mechanisms that shape modern popular culture. High, folk, and mass culture: historical emergence of popular culture. Mass media, commercialization, ideology and cultural styles. Theories and methods for analyzing cultural expressions in pop music, street

art, film, television, and advertising. GE credit: SocSci, Wrt.—II, III. (I, II, III.)

30A. Intercultural Relations in Multicultural Societies (3)

Lecture—1.5 hours; discussion—1.5 hours. Macro-structural analysis of contemporary multicultural societies; immigration and assimilation in comparative perspective; social construction of racial and ethnic group identities; ethnicity and gender; group conflict and cooperation; controversies surrounding multiculturalism. First course in a 2-course Multicultural Immersion Program. GE credit: Div.—I. (I.)

30B. Intercultural Relations in Multicultural Societies (3)

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: course 30A. Social-psychological analysis of personal experiences living in a multicultural society; conforming to or rejecting group identity or stereotypes; managing and reducing conflict; cross-cultural communication; promises and problems of diversity at UCD. Second course in 2-course Multicultural Immersion Program.—II. (II.)

46A. Introduction to Social Research (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Examination of the methodological problems of social research. Selection and definition of problems of investigation, data-gathering techniques, and sampling.—I, II, III. (I, II, III.)

46B. Introduction to Social Research (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association.—II, III. (II, III.)

90X. Lower Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in sociology through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. *May not be repeated for credit.* Limited enrollment.

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily intended for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

100. Classical and Modern Sources of Sociological Theory (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Historical introduction of sociological thought, with special reference to its 19th-century origins and 20th-century lines of development. Consideration of theoretical texts may include works of Marx, Durkheim, Simmel, early critical theorists, Parsons, and the Chicago School. Not open for credit to students who have received credit for course 165A. GE credit: Wrt.—I, II, III. (I, II, III.)

102. Society and Culture of California (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: introductory course in Sociology recommended. California's distinctive society and culture; sociological analyses of topical issues concerning diversity, environment, cities.—II. (II.)

103. Evaluation Research Methods (4)

Lecture—3 hours; discussion—1 hour or field research (instructor's option). Prerequisite: course 46A and 46B, or Statistics 13 or the equivalent. Surveys applications of research methods to the evaluation of social programs, primarily emphasizing methodological issues, e.g., research design and data collection; uses of evaluation research are also discussed and placed in the theoretical context. I. Participation in an evaluation project.—I. (I.)

104. The Political Economy of International Migration (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration.

Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as International Relations 104).—II. (II.)

106. Intermediate Social Statistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 46B or Statistics 13 or the equivalent. Intermediate level course in statistical analysis of social data, emphasizing the logic and use of statistical measures, procedures, and mathematical models especially relevant to sociological analysis.—I, III. (I, III.)

118. Political Sociology (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Relation of social cleavages and social cohesion to the functioning of political institutions; the social bases of local and national power structures; social sources of political movement, analysis of concepts of alienation, revolution, ideology, ruling class, and elite.—I, III. (I, III.)

120. Deviance (4)

Lecture—3 hours; term paper or discussion. Social structural sources, institutional practices and micro-processes associated with illegality, evil, disease, immorality, disability, racial and class differences, citizenship, and the body. Special emphasis on expert knowledge and the production and management of social difference. GE credit: Wrt.—II, III. (I, II, III.)

122. Sociology of Adolescence (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Chronological age and social status; analysis of social processes bearing upon the socialization of children and adolescents. The emergence of "youth cultures." Generational succession as a cultural problem.—(III.)

123. American Society (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. The demographic and social structure of American society and population, with emphasis on ethnic and class groups as bases for political and economic interest. Attention to selected current social controversies.

124. Sociology of Education (4)

Lecture—3 hours; term paper or discussion—1 hour (instructor's option). Education and the social structure. Class size, curriculum, and economies of scale. Relations between families and schools in socialization; familial ascription and educational achievement. Education and industrialization. Organizational and occupational structure of schools. Discussion of selected controversies.—I.

125. Sociology of Culture (4)

Lecture/discussion—3 hours; term paper. Sociological approaches to study of historical and contemporary culture and mass media, and their structuring in relation to social actors, institutions, stratification, power, the production of culture, audiences, and the significance of culture in processes of change. GE credit: SocSci.—I, II. (I, II.)

126. Social Interaction (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 2. Everyday interaction in natural settings; ethnographic approaches to the understanding of social meanings, situations, personal identity and human relationships. Particular attention to the work of Erving Goffman and to principles of field observation and qualitative analysis. GE credit: Wrt.—I, III. (I, III.)

127. Sociology of Death (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Overview of attitudes toward, structural effects of, and methods of coping with death and death-related behaviors. Particular attention to social psychological aspects of death and dying, to death occupations, and to death rituals in various cultures. GE credit: Wrt.—(III.)

128. Interracial Interpersonal Dynamics (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: one course from courses 1, 2, 3, Afro-American Studies 10, Asian American Studies 1, 2, Chicano Studies

10, Native American Studies 1, 20. Analysis of the influences of cultural differences and racial stratification on interpersonal interaction in instrumental settings (e.g., work, education, political action) and intimate settings (e.g., friendship, love, marriage, family). Minority/majority relationships. GE credit: Div, Wrt.—II, III. (II, III.)

129. Sociology of Black Experience in America (4)

Lecture—3 hours; discussion—1 hour or research or term paper (instructor's option). Survey of historical and contemporary theoretical sociological perspectives on the Black experience in United States. Emphasis on comparisons of Black sociological perspectives and mainstream perspectives of specific sociologists. GE credit: Div.—II, III. (II, III.)

130. Race Relations (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Functions of the social definitions of race and racial groups. Analysis of racial conflict, oppression, and other forms of ethnic stratification. Models of ethnic interaction and social change. Emphasis on racial relationships within the U.S. GE credit: Div.—II, III. (I, III.)

131. The Family (4)

Lecture—3 hours; discussion—1 hour. Contemporary family life in historical and cross-cultural perspective. How different family forms arose, their significance today and prospects for further family change. Attention to power relations within and beyond the family and to the social implications of family transformation. GE credit: SocSci, Div, Wrt.—I, II, III. (I, II, III.)

132. The Sociology of Gender (4)

Lecture—3 hours; discussion—1 hour. Analysis of biological, psychological, cultural and structural conditions underlying the status and roles of men and women in contemporary society, drawing on a historical and comparative perspective. GE credit: SocSci, Div.—I, III.

133. Sexual Stratification and Politics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 132 or the equivalent or consent of instructor. Analysis of origins, dynamics, and social implications of sexual stratification. Examination of classical and contemporary theorists such as Engels, Freud, J.S. Mill, de Beauvoir, Juliet Mitchell, D. Dinnerstein. Attention to selected issues in social movements for and against sexual equality. GE credit: Div.

134. Sociology of Racial Ethnic Families (4)

Lecture—3 hours; discussion—1 hour or term paper. Asian American, Black, Chicano, and Native American family life in comparative historical perspective. Family structure and gender roles are considered in relation to socio-historical dynamics. Offered in alternate years. GE credit: Div, Wrt.

135. Social Relationships (4)

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1, 2 or 3, and upper division standing. Social and cultural factors influencing friendships and intimate relationships. Topics include relationship development, relationship maintenance, and relationship loss. GE credit: Div, Wrt.—(II.)

138. Economic Sociology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A or 1B and upper division standing in the social sciences. Overview of the rapidly growing field of economic sociology. Focus on variations in the ways that markets are organized. The relationship between individual and collective rationality will also be emphasized.—I, II. (I, III.)

139. Corporations and Society (4)

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 or 2 or 3, and upper division standing. The study of the history and power of the modern corporation; corporate organization; politics, the state, and the corporation; labor unions and the labor process; competition, regulation and international markets; the multinational and conglomerate corporation; and mass markets and consumerism.—II. (I, III.)

140. Social Stratification (4)

Lecture—3 hours; discussion—1 hour or term paper or research project (instructor's option). Systems of social ranking, theories of stratification; power, prestige, culture, and styles of life of various social classes; social mobility and its consequences for social structure.—I, II, III. (I, II, III.)

141. Industrialization and Social Change (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Selected technological and social factors. Preconditions of economic development and industrialization. Social, political, and cultural issues at various levels of economic development. Major historical differences and major current trends. Emphasis either on highly industrialized countries or on less developed countries. GE credit: Wrt.—I. (II.)

143A. Urban Society (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Theories of city origins. Analysis of the historic process of urbanization and of varying city types. Comparison of American and European experience of metropolitanization, counterurbanization, and neighborhood change. Consideration of competing theories of urban growth and change and competing visions of the urban future. Offered in alternate years.—II. (III.)

143B. Sociology of City Life (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent; course 143A recommended. Critical dissection of the "loss of community" issue. Analysis of the organization of primary ties in the city, of the culture of urban public life and of the learning of city skills. Offered in alternate years. GE credit: Wrt.—III.

144. Agriculture and Society (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: advanced standing in the social sciences or one year of course work in agricultural and environmental sciences. Development of agriculture as a major enterprise in modern society with the concomitant reduction in the labor force and family farms. Analysis of issues including mechanization, migrant labor, corporate farming, and public resource policy. Offered in alternate years.

145A. Sociology of Third World Development (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; upper division standing. Introduction to theories and contemporary issues in the sociology of development. Topics such as urbanization, rural/agrarian change, class, status groups, international division of labor, sectoral shifts, international capital, informal economy, gender, and political processes are analyzed within a comparative-historical framework. GE credit: Div, Wrt.—II. (II.)

145B. Gender and Rural Development in the Third World (4)

Seminar—4 hours. Prerequisite: course 1; upper division standing. Political-economic analysis of women and work during the process of socioeconomic change in the world with particular attention to the family/household context. Offered in alternate years. GE credit: Div, Wrt.—II.

146. Sociology of Religion (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Relationship between social structures and religions. The social setting of the major world religions. Religious innovators and institutionalization (churches, sects, cults). Secularization in the modern world and the rise of secular ideologies. Offered in alternate years. GE credit: SocSci, Div, Wrt.—(I.)

147. Sociological Perspectives on East Asia (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological theories and concepts applied toward understanding East Asian society. Emphasis on the political structure, stratification, and economy in China and Japan. Analysis of histor-

ical and contemporary similarities and differences. Offered in alternate years.—(III.)

148. Collective Behavior (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Study of behavior of human crowds and masses in extraordinary circumstances, including crowd panics, mass scares, collective protests, riots, revolutionary situations, ecstatic and revivalist gatherings, crazes, fads, and fashions.—III. (III.)

149. Religion and American Society (4)

Lecture—3 hours; class project. Historical, contemporary survey of religious traditions and organizations and their relation to U.S. social and cultural patterns. Civil religion, religious pluralism, minority and deviant communities, religious migration, U.S. religion as a social institution, and religion, politics, and social stratification. Offered in alternate years. GE credit: Div, Wrt.—I.

150. Criminology (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological analysis of criminal behavior in relation to social structure and the criminalization process.—I, III. (I, III.)

151. The Criminal Justice System (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 150 and upper division standing. Sociological analysis of the different components of the criminal justice system including the emergence and interpretation of criminal laws, the contemporary roles and functions of the police, criminal courts and correctional institutions.—II. (II.)

152. Juvenile Delinquency (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Study of juvenile delinquency in relation to the family, peer groups, community, and institutional structures. Consideration of processing of the delinquent by formal agencies of control.—I, II, III. (I, II, III.)

154. Sociology of Health Care (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Overview of sociological research in medicine and health care, with emphasis on the organizational, institutional, and social psychological aspects.—(II.)

155. Sociology of Law (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Law considered as social control; relation of legal institutions to society as affecting judicial decision making and administration of justice. Lawyers as an occupational group. Legal reform.—I, III. (I, III.)

156. Social Movements (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Analysis of several aspects of social movements: mobilization, forms of organization, ideology, recruitment, leadership, strategies and tactics, development, effects. Frequent use of sound and film materials. GE credit: SocSci.—I, III. (I, III.)

157. Social Conflict (4)

Lecture—3 hours; discussion—1 hour or term paper or project. Analysis of the causes, dynamics, and regulation of social conflict within and between various kinds of social groupings with particular reference to nonviolent methods of waging and regulating conflict.

159. Sociology of Occupations (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Natural history of occupations; the institutional matrix of occupations; colleague and client relationships; occupational social controls; career lines, and occupational-related self-definitions; occupational politics.—II, III. (II, III.)

170. Population (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Introduction to the study of human population, including theories and statistical measures; social causes and consequences of population trends; changes in population structure; geographical distribution, migration, socio-psychological factors affecting fertility. GE credit: SocSci.—III. (III.)

172. Ideology of Class, Race and Gender (4)

Lecture—4 hours. Examination of popular belief systems that accompany relations between social classes, whites and blacks, and men and women in the United States. How do dominant groups attempt to justify each relationship, and is there ideological conflict or consensus between groups. GE credit: Div, Wrt.—(II.)

173. Sociology Through Literature (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Introduction to analysis of literature as sociological data. Reading of numerous works on American and other societies by authors such as Steinbeck, Lewis, Dreiser, Schulberg, Orwell, etc. Offered in alternate years.—(II.)

174. Sociology of the Jewish Experience (4)

Seminar—3 hours; term paper. Prerequisite: upper division standing preferred. The sociology of Jewish life, analyzing challenges to Jewish identity and community in the diaspora. Diversity within the Jewish community, Americanization, women, new immigrants, post-Holocaust Jewish identity, and Black-Jewish relations. Offered in alternate years.—(I.)

175. Mass Communication (4)

Lecture—3 hours; term paper. Prerequisite: course 1 or 2. Examines the relationship between the media and social structures. History of media-state relations. Media as reflector and shaper of values. Emphasis on current European and Marxist and pluralist theories rather than on content analysis. Offered in alternate years.—I.

176. Sociology of Knowledge (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Critical analysis of the social foundations of knowledge in society. The history, problems and dilemmas in classical sociology of knowledge. Contemporary applications. Natural and social sciences as social systems. Sociology of personal knowledge in everyday life.—(I.)

180A. Complex Organizations (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 1; Economics 1A and 1B recommended. Develops a sociological approach to organizations theory. Designed to introduce sociological concepts, address the alternative psychological and economic models, and involve students in the practice of organizational analysis.—I, II, (I, II.)

180B. Complex Organizations (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 180A or consent of instructor. Builds on concepts and skills developed in course 180A. Deals with the issues of organizational decision making, design, and survival. Emphasis on relations between organizations and the effects of those relations in both the public and private sectors.—II, III, (II, III.)

181. Social Change Organizations (4)

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1. Analysis of organizations with social change and improvement goals and programs, emphasizing voluntary associations and grassroots citizen groups. Topics treated include formation, decision making and leadership, strategies and tactics, factionalism and coalitions, effectiveness. Offered in alternate years. GE credit: Wrt.—III.

182. Experimental and Utopian Communities (4)

Lecture—3 hours; discussion—1 hour. The social structure of intentional, experimental or Utopian settlements and communitarian movements, including comparison with other small settlement forms: villages, neighborhoods, monasteries, encampments and nonsettlement communities based on occupation, ethnicity, and religion.

183. Comparative Organizations (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 180A or 180B; upper division standing. Examination of economic and political organizations of major industrial nations. Discussion of historical, cultural, social, and political influences on industrial patterns and practices, alternative theoretical mod-

els for explaining differential development. Societies may include Sweden, Japan, Germany, Taiwan, and South Korea. Offered in alternate years.—(III.)

185. Sociology of Social Welfare (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological analysis of the evolution and current organization of welfare functions in modern societies.—I, II, (II, III.)

188. Social Stratification in China (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Social and political systems and patterns of social stratification in relation to change in state power and economic institutions in China since 1949. Offered in alternate years.—I.

189. Social Science Writing (4)

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 46A, upper division standing, and 12 units of social science. Improved analytic writing and methods for reporting social science research to a wider public. Sociological analysis of the conditions of good and bad writing.

190X. Seminar in Sociological Analysis (4)

Seminar—3 hours; term paper. Prerequisite: upper division standing and course 100 (former course 165A). In-depth examination at an upper division level of a special topic in Sociology. Emphasis on student participation in learning. May not be repeated for credit. Limited enrollment.

191. Workshop in Contemporary Sociological Theory (4)

Lecture—2 hours; workshop—1 hour; term paper. Prerequisite: course 100 (former 165A) and senior standing. Workshop in contemporary sociological theory that allows students to explore the uses of theory in empirical inquiry on problems of interest to students. Contemporary theory considered in relation to classical and modern influences, concept formation, theory construction, and explanation. Not open for credit to students who have received credit for course 165B.

192. Internship and Research Practicum (2-6)

Internship—6-18 hours. Prerequisite: course 46A, upper division standing, approval of proposed internship and course 193 concurrently or consent of instructor. Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience. May be repeated for credit with consent of instructor. Maximum of 4 units may be counted toward the major. (P/NP grading only.)—I, II, III, (I, II, III.)

193. Workshop in Field Research (2)

Lecture/discussion—2 hours. Prerequisite: course 46A, course 192 or 199 concurrently for 2-4 units, senior standing. Overview of the process of collecting, recording, analyzing, and reporting qualitative social data. Emphasis on application of principles; each participant completes an original research project. Not open for credit to students who have completed course 194HA.—I, II, III, (I, II, III.)

194HA-194HB. Special Study for Honors Students (4-4)

Seminar—3 hours; term paper. Prerequisite: senior standing and admission to the Honors Program. Directed reading, research and writing culminating in the preparation of a Senior Honors Thesis under direction of faculty adviser. (Deferred grading only pending completion of sequence.)

195. Special Topics in Sociological Analysis (4)

Seminar—3 hours; term paper. Prerequisite: upper division standing and consent of instructor. In-depth examination of topics in sociology. Emphasis on student research and writing. May be repeated for credit when topic differs.—I, II, III, (I, II, III.)

197T. Tutoring in Sociology (1-4)

Tutorial—3-12 hours. Prerequisite: upper division standing; completion of appropriate course with distinction. Activities vary depending on the nature of the course assignment. May include (but not limited to) tutoring on course material, advising on projects and papers, and leading discussion groups. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: open to seniors only. (P/NP grading only.)

Graduate Courses**201. Social Research (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing, or consent of instructor. Survey of sociological inquiry, taught as practicum. Philosophy of social science; values and research; research agendas and research problem formulation; research process; explanation vs. interpretation; study design; concept formation, measurement, sampling, data acquisition, inference; rhetoric and presentation of findings.—II, (III.)

206. Quantitative Analysis in Sociology (4)

Lecture—4 hours. Prerequisite: course 106. Survey of the statistical models and methods that serve as a foundation for quantitative research in sociology, with an emphasis on multivariate regression analysis, as well as measurement theory and time series analysis. (S/U grading only.)—III, (III.)

207A-207B. Methods of Quantitative Research (4-4)

Lecture—3 hours; paper. Prerequisite: course 106 or the equivalent. Principles of study design, examination of measurement, survey research methods and multivariate analysis. Course will stress actual practice of techniques. Students will carry out quantitative data analysis using packaged computer programs. (Deferred grading only, pending completion of sequence.)—(I-II.)

208. Topics in Advanced Quantitative Methods in Social Sciences (4)

Seminar—3 hours; term paper. Prerequisite: course 206 or the equivalent and graduate standing. Analysis of the logic and application of an advanced statistical model; the model chosen may vary. Emphasis on the model's assumptions, its strengths and weaknesses, its application for social science inquiry, and the relationship between methods and social theory. May be repeated for credit when topic differs. Offered in alternate years.—(II.)

215. Economy, Polity, and Society (4)

Seminar—3 hours; paper. Prerequisite: consent of instructor. Open to graduate students in sociology and related disciplines. Course introduces students to topics and selected issues in the related fields of economic and political sociology and political economy.—(II.)

220. Deviance, Law, and Social Control (4)

Seminar—3 hours; projects. Prerequisite: course 120 or consent of instructor. Report and discussions of literature on selected forms of deviance in relation to law and formal social control. Agency contacts and exploratory research projects.—(I.)

225. Cultural Sociology (4)

Seminar—3 hours, term paper. Explores the varied ways in which culture is understood in the social sciences and the research questions that follow from contrasting viewpoints. The approach is historically informed and focused on changing cultural forms in relation to industrialization and post-modernism. Offered in alternate years.—(I.)

226. Sociological Social Psychology (4)

Seminar—3 hours; seminar paper—1 hour. Prerequisite: graduate standing or consent of instructor. Advanced study of the varying approaches, methods, issues and topical concerns of sociological social psychology. Analysis of central and representative historical and contemporary works.—(I.)

227. Sociology of Reproduction (4)

Lecture—3 hours; discussion—1 hour. Recent social science scholarship in such areas as teenage pregnancy, family planning, abortion, adoption, AIDS, and new reproductive technologies; focus on the current situation in the United States. Offered in alternate years.—(II.)

230. Ethnic (Race) Relations (4)

Lecture—3 hours; paper. Advanced study of the determinants of ethnic groupings and their interrelationships. Major theme will be the patterns of ethnic stratification and causes of ethnic conflict. Specific focus upon dominance and resistance to dominance. Influence of social science research.—II.

233. Gender, Culture, and Local/Global Transformation (4)

Seminar—3 hours; term paper. Focus on critical approach to women and development; analyze local transformations with global connections within specific cultural contexts. Course covers theory, methodological issues, and relationship between theory and practice. Offered in alternate years.—(I.)

234. Gender, Family, and Society (4)

Seminar—3 hours; seminar paper. Prerequisite: graduate standing or consent of instructor. The major theoretical traditions and concerns in family sociology and sociology of gender. Analysis of selected classical and contemporary works representative of functionalist, Marxist, psychoanalytic, feminist and critical theoretical approaches to these subjects (e.g., Engels, Parsons, Freud, Horkheimer, Goode, Lasch, Mitchell). Emphasis on macro and historical questions.—(II.)

242A-242B. Comparative Methods in Historical Sociology (4-4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative approaches to major historical phenomena such as nationalism, bureaucratization, feudalism, and capitalism; the relevance of psychological and sociological theories to historical interpretation; the verifiability of historically grounded hypothesis; the meaning of analogy, correspondence and causality. (If taken as a sequence, deferred grading only, pending completion of sequence.)—II-III.

243. Urban Society (4)

Seminar—3 hours; paper. Broad overview of the issues and concerns of the field of urban sociology. Special emphasis on the human experience of urban living in contemporary, cross-cultural or historical settings.

245. Developing Societies (4)

Seminar—3 hours; term paper or project. Prerequisite: graduate student status or familiarity with problems of developing societies. Analysis of social and economic problems of developing societies from the standpoint of theory and research on modernization and underdevelopment. Nature of third world dependency and interdependence in the global political economy. Offered in alternate years.—I. (III.)

248. Social Movements (4)

Seminar—3 hours; paper. Analysis of current issues in and contributions to the study of collective behavior and social movements; particular focus upon the strategies and tactics of social movements.—(I.)

254. Sociological Issues in Health Care (4)

Seminar—3 hours; paper. Prerequisite: open to graduate or professional students. Sociological perspectives and methods directed to health care issues. Students select topics for supervised research. The course will have a theme (described in advance) each time it is offered. Paper on research will be required. (S/U grading only.)—(I.)

255. Sociology of Law (4)

Seminar—4 hours. Prerequisite: consent of instructor. Analysis of the nature of the legal process and its impact on social behavior. Will consider (1) nature and functions of law, (2) the organization and administration of law, and (3) the capacity of law to affect social behavior.—III.

265A. Classical Sociological Theory (4)

Lecture—3 hours; discussion—1 hour. Introduces graduate students to the work of the main classical thinkers in the tradition of social theory, such as Marx, Durkheim, Weber, Simmel, Freud, G.H. Mead, and Parsons, locating them within the historical, cultural, and philosophical milieu in which their ideas originated.—I. (I.)

265B. Theory in Contemporary Sociology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 265A. Explores the uses of theories in contemporary sociology by tracing their connections with classical sociological writings and their relations to broader theoretical concerns of contemporary social thought, with particular emphasis on relevance to the current historical, cultural and social milieu.—III. (II.)

270. Social Demography (4)

Seminar—4 hours. Prerequisite: course 170 or consent of instructor. How social institutions affect and are affected by the level and variation of mortality, migration, and fertility. Special emphases on the determinants of fertility-related attitudes and behavior, on less-developed countries, and on contemporary empirical studies.—(II.)

280. Organizations and Institutions (4)

Seminar—4 hours. Theory of formal organizations and bureaucracy. Methods of research in organizational and institutional studies. Historical and comparative analysis of political, religious, educational, military, and economic structure.—II.

290. Seminar (4)

Seminar—3 hours; term paper. (S/U grading only.)—(II.)

292A-292B. Field Research (4-4)

Seminar—3 hours; field trips. Prerequisite: graduate standing in Sociology or consent of instructor. The process of collecting, analyzing and reporting qualitative social data: techniques of intensive interviewing, participant-observation and document analysis; generating, developing, and evaluating analytic frameworks; recording, storing, retrieving, and writing up qualitative data. Emphasis on application of principles: each participant completes a fieldwork project. (Deferred grading only, pending completion of sequence.)—(I, II.)

293. Proseminar in Sociology (2)

Seminar—2 hours. Prerequisite: first-year Sociology graduate students only. Introduction to graduate training in sociology. A seminar designed to introduce students entering graduate work in the department to its ongoing research activities. (S/U grading only.)—I. (I.)

295. Special Topics Seminar. (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Research topics in Sociology. Specific topic will vary according to faculty interest and student demand. May be repeated for credit when topic differs.—I, III.

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

299. Individual Study (1-12)

(S/U grading only.)

Professional Courses**390A. The Teaching of Sociology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing; required for first-time teaching assistants. Practical instruction in teaching methods for qualitative and quantitative courses. Pedagogical issues involved in critical sociological analysis. (S/U grading only.)—I. (II.)

390B. The Teaching of Sociology (2)

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing. Practical instruction in devising course syllabi, lectures and assignments for Associate-Instructors and others interested in college teaching. Discussion of pedagogical methods of teaching qualitative and quantitative courses. (S/U grading only.)—I. (III.)

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Professional Course**466. Research Paper Workshop (2)**

Workshop—1.5 hours; discussion—0.5 hours. Prerequisite: Master of Arts standing. A workshop to

assist advanced graduate students in the preparation of an original research paper. Students present their research papers and discuss issues in theory, research design, data, empirical inference, and verbal and written presentation of a professional research paper. (S/U grading only.)

Soil Science

Soil Science

(College of Agricultural and Environmental Sciences)

Faculty

See under the Department of Land, Air and Water Resources.

Major Programs. See the major in Soil and Water Science.

Minor Program Requirements

The Department of Land, Air and Water Resources, Soils and Biogeochemistry Program, offers a minor program in soil science. The minor is especially geared toward students in the environmental sciences including Hydrologic Science, Environmental and Resource Sciences, Environmental Toxicology, Agricultural Systems and Environment, International Agricultural Development, Crop Science and Management, Environmental Biology and Management, Environmental Horticulture and Urban Forestry, Geology, and Plant Biology.

UNITS

Soil Science21
Soil Science 100.....5
Courses selected from Soil Science 102, 105,
107, 109, 111, 112, 118, 120, Plant Biol-
ogy 158, Hydrologic Science 124.....16

Minor Adviser. R.J. Southard.

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees in Soil Science are available. Information regarding these programs can be obtained from the graduate adviser and the *Graduate Announcement*. See also the Graduate Studies chapter of this catalog.

Graduate Adviser. C. van Kessel (*Agronomy and Range Science*)

Courses in Soil Science (SSC)

Questions pertaining to the following courses should be directed to the instructor or to the Resource Sciences Teaching Center, 148 Hoagland Hall (530-752-1669) or check the Soils and Biogeochemistry Web site at <http://lawr.ucdavis.edu/ssc>.

Lower Division Courses**10. Concepts of Soil Science (4)**

Lecture—3 hours; discussion—1 hour. The global ecosystem; soils as natural bodies formed by interactive environmental processes; the global ecosystem; soil response to use and management; conservation practices for sustainable use of soil resources; role of soils in current agricultural and environmental issues. GE credit: SciEng, Wrt.—I. (I.) Dahlgren

92. Soil Science Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.)

Upper Division Courses**100. Principles of Soil Science (5)**

Lecture—3 hours; laboratory—3 hours; term paper. Prerequisite: Chemistry 2A-2B, Physics 1A-1B, Biological Sciences 1A; Geology 50, Biological Sciences 1C recommended. Soil as part of natural and managed ecosystems and landscapes. Solid, liquid, and gas phases and their interactions in the soil. Water, gas and heat movement in soil. Soil biology. Plant nutrient acquisition and use. Soil development, management and use.—I. (I.) Singer

102. Soil and Water Chemistry (5)

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: course 100 or the equivalent. Soil solution and solid-phase chemistry of soils in relation to agricultural and environmental concerns. Interactions between soil solids, precipitates and solution phases: mineralogy, ion exchange, adsorption, weathering and buffering, soil colloidal behavior, models of solution and solid-phase interactions.—II. (II.) Zasoski

105. Field Studies of Soil Resources (8)

Fieldwork—daily for five weeks, off campus; lecture—1 week, on campus. Prerequisite: consent of instructor; course 120 recommended. Study of soils in the field throughout California. Emphasis on identification, description and classification of soils; relation of soils to geology, vegetation, climate and human activities; role of soils in land use and as components of California ecosystems.—summer. Dahlgren, Singer, Southard

107. Soil Physics (5)

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 100, Environmental and Resource Sciences 100, Mathematics 16A, or the equivalent. Physical properties of soil. Principles of water, gas, heat, and solute movement in soil with selected examples related to soil and water management. Influence of soil properties on transfer processes.—I. (I.) Rolston, Hopmans

109. Nutrient Cycling and Management (5)

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: course 100 or the equivalent. Plant nutrients in soil; effects of fertilizers, cover crops, compost and other amendments on plant productivity and soil quality; nutrient sustainability in alternative agricultural and natural ecosystems; soil fertility assays.—III. (III.) Horwath

111. Soil Microbiology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 1C and Biological Sciences 1C. Major groups of microorganisms in soil, their interrelationships, and their responses to environmental variables. Role of microorganisms in cycling of nutrients. Plant-microbe relationships. Transformations of organic and inorganic pollutants.—II. (II.) Scow

112. Soil Ecology (3)

Lecture—2 hours; laboratory/discussion—2 hours. Prerequisite: Biological Sciences 1B, 1C, course 100. The biology and ecology of soil communities, emphasizing the soil food web and litter decomposition. Role of specific biota, ranging from microorganisms to earthworms. Applications to restoration, remediation, ecosystem science, and agriculture. GE credit: Wrt.—I. (I.) Scoe, Jaffee

118. Soils in Land Use and the Environment (4)

Lecture—3 hours; discussion—1 hour; one one-day field trip. Prerequisite: course 100 or consent of instructor. Soils are considered as elements in land use planning and environmental quality. Topics include: soil survey reports, remote sensing, land capability classification, soil erosion/conservation, waste disposal on soils and soil reclamation.—III. (III.) Singer

120. Soil Genesis, Morphology, and Classification (5)

Lecture—4 hours; laboratory—3 hours (includes five one-day weekend field trips). Prerequisite: course 100; Geology 50 recommended. Recognition and description of soils; chemical, biological and physical processes of soil formation. Factors of soil formation. Interactions of soils with diverse ecosystems.

Introduction to soil classification. Practice using soil taxonomy. Practical experience describing soil properties in the field.—III. (III.) Southard

192. Soil Science Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses**202. Topics in Advanced Soil Chemistry (3)**

Lecture/discussion—3 hours. Prerequisite: undergraduate course in soil chemistry, water chemistry, or consent of instructor. Reviews of current research in soil chemistry. Topics include double layer theory; clay mineral and oxide surface chemistry; adsorption on soil surfaces; speciation and modeling of solution ions; solubility and mineral stability diagrams. Discussion of current journal articles. May be repeated once for credit when topic differs. Offered in alternate years.—III. Zasoski

207. Transport Processes in Soils (4)

Lecture—3 hours; discussion/computer laboratory—2 hours. Prerequisite: course 107 and Mathematics 22B; knowledge of a computer programming language. Physical and mathematical description of nonsteady transport processes in soil and the unsaturated zone. Emphasis on analytical and numerical solutions to water, gas, solute (contaminants), and heat transport processes and the chemical and biological reactions attenuating solute movement. Offered in alternate years.—(II.) Rolston, Hopmans

208. Soil-Plant Interrelationships (3)

Lecture—3 hours. Prerequisite: course 100, Plant Biology 111B, or consent of instructor. Plant needs, occurrence and reactions of water and mineral nutrients in soils; root systems and their growth in soils; mass flow and diffusion mechanisms in nutrient acquisition; models relating nutrient uptake to soil and plant characteristics; nutrient assimilation and crop quality. Offered in alternate years.—(II.) Richards

209. Physiology and Ecology of Mycorrhizal Symbioses (3)

Lecture/discussion—3 hours. Prerequisite: Plant Biology 111 or consent of instructor; course 100 recommended. Structure, function and evolutionary development of mycorrhizal fungi and the root-fungal symbiosis. Emphasis on regulation of carbon and nutrient exchanges between host and symbiont. Course integrates mycorrhizal physiology and ecology in an ecosystem context. Offered in alternate years.—(I.) Bledsoe

211. Advanced Soil Microbiology (3)

Lecture—3 hours. Prerequisite: Chemistry 8A-8B; course 111; Biological Sciences 102, 103 or an equivalent course recommended. Microbial metabolism of organic chemicals in soil, both natural and xenobiotic. Decomposition of organic matter. Kinetics of microbial processes in soil. Offered in alternate years.—(III.) Scow

216. Physical Geochemistry (3)

Lecture—3 hours. Prerequisite: course 102 or Chemistry 110A or Geology 115 and Mathematics 119. First half emphasizes equilibrium thermodynamics, including choices of standard states, ideal solutions, and use of the Gibbs-Duhem relation. Second half covers geochemical kinetics including simple rate laws, transition state theory, solute diffusion, and experimental methods.—I. (I.) Casey

218. Soil Erosion and Conservation (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: graduate standing; courses 118, 120. Processes of soil erosion by wind and water in agricultural areas, and methods of soil conservation will be discussed. Methods of predicting rates of soil erosion will be considered. Offered in alternate years.—(II.) Singer

219. Ecosystem Biogeochemistry (4)

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: introductory courses in ecology/biology and soils recommended; undergraduates accepted with consent of instructor. Multidisciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as Ecology 219.)—III. (III.) Dahlgren, Bledsoe

220. Pedology (3)

Lecture—3 hours. Prerequisite: consent of instructor; course 120 recommended. Topics selected from studies of soil-forming processes, soil-geomorphic relations, mineral weathering, new developments in soil classification, and development of pedologic theory. Topics vary from year to year. May be repeated once for credit. Offered in alternate years.—II. Southard

222. Organic Chemistry of Soil (3)

Lecture—3 hours. Prerequisite: Chemistry 8A, 8B, Mathematics 16A, 16B, course 100 or the equivalent. Structure and function of soil organic matter, biochemistry of humic substance formation, relationship of organic matter to nutrient cycling and sustainability in agricultural and natural ecosystems, reactions of organics with humic substances in soil and water, methods for characterization. Offered in alternate years.—II. Horwath

290. Special Topics in Soil Science (1)

Seminar—1 hour. Prerequisite: graduate standing. Oral presentation and discussion of scientific material and procedures for review and critique of publications. (S/U grading only.)—I, III. (I, III.)

298. Group Study (1-5)

Prerequisite: consent of instructor.

299. Research (1-12)

(S/U grading only.)

Professional Course**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Graduate Study. The Graduate Group in Soil Science offers programs of study and research leading to the M.S. and Ph.D. degrees. Soil science focuses on the physical, chemical and biological processes that govern the quality and distribution of soils in relation to landform evolution, geochemical environments, and ecosystems. Research in soil science includes the study of soil as a global natural resource, as a critical component of the environment, and as a resource to sustain agricultural, forest and wetland ecosystems. Students may specialize in environmental quality; soil physics; soil chemistry; soil genesis, morphology and classification; nutrient cycling and management; soil microbiology and biochemistry; soil-plant-water relationships; or general soil science. For detailed information regarding the programs, address the chairperson of the group.

Graduate Advisers. C.S. Bledsoe, R.J. Zasoski (*Land, Air and Water Resources*).

Graduate Admissions Officer. Chris van Kessel (*Agronomy and Range Science*), 530-752-4377, cvankessel@ucdavis.edu.

(College of Agricultural and Environmental Sciences)

The Major Program

Soil and water science is concerned with the use and protection of our land and water resources. The major teaches graduates sound scientific principles for managing soil and water resources to benefit both agriculture, forestry and the environment.

The Program. Major programs include land use, soil survey, soil management and conservation, plant nutrition, diagnostic technology, irrigation and drainage, water resources management, water quality, and related environmental problems. (For example, the emphasis on water quality would include more than the minimum number of units of physical and biological sciences, while an emphasis in resource allocation and land-use planning would include more courses in the social, political, and economic areas.)

Internships and Career Alternatives. Before they graduate, many students receive practical work experience through student internships with state

and federal agencies, soil and plant labs, and growers. Students also have the opportunity to work on research projects with faculty members and to develop individual research or study topics. Graduates are qualified for managerial and technical positions with environmental and agricultural businesses. They are also prepared for positions in advising, planning, land appraisal, and research and teaching with private, government, and international organizations involved with soil and water development, use, and conservation. Some graduates also continue in master's and doctoral programs in soil science, hydrologic science, ecology, and plant physiology.

B.S. Major Requirements:

	UNITS
English Composition Requirement	4-12
See College requirement	0-8
Communication 1	4
Preparatory Subject Matter	74
Biological Sciences 1A, 1B, 1C	15
Chemistry 2A-2B-2C and a more advanced course	18
Agricultural Management and Rangeland Resources 21 or Engineering 5 or one Ecology course with adviser's approval	3
Economics 1A, 1B	5
Geology 50	3
Mathematics 16A, 16B	6
Physics 7A-7B-7C	12
Statistics 13, 100 or Agricultural Management and Rangeland Resources 120 ...	4
Additional physical sciences, biological sciences, and/or mathematics with approval of adviser	8
Breadth/General Education	15-33
Satisfaction of General Education requirement	6-24
At least one upper division course from each of the following areas, with approval of adviser, (1) resource management, (2) environmental law, (3) environmental economics and decision making	9
Depth Subject Matter	30
Soil Science 100.....	4
Environmental and Resource Sciences 100, 100L	6
Additional upper division units in soil science and hydrologic science.....	20
Restricted Electives	27
To supplement or expand areas of student interest selected with approval of adviser	24
Special study or experience (192 or 199 course in the major area)	3
Unrestricted electives	4-30
Total Units for the Degree	180

Major Adviser. W. Horwath

Advising Center for the major is located in 148 Hoagland Hall (530-752-1669). See Diane Swindall (dgswindall@ucdavis.edu).

Graduate Study. Graduate programs are available in Soil Science as well as Hydrologic Sciences. Detailed information can be obtained from the Graduate Adviser and the *Graduate Announcement*. See also the Graduate Studies chapter of this catalog.

Courses. For specific courses of instruction in this major, see course listings under Atmospheric Science, Plant Science, Environmental and Resource Sciences, Soil Science, and Hydrologic Science.

Related Courses. See courses in Agricultural and Resource Economics, Agricultural Management and Rangeland Resources, Applied Biological Systems Technology, Chemistry, Biological and Agricultural Engineering, Civil and Environmental Engineering, Environmental Science and Policy, Environmental Toxicology, Geology, International Agricultural Development, Plant Biology, Vegetable Crops, and Viticulture and Enology.

The Major Program

The Spanish major program assures proficiency in all four language skills—speaking, understanding, reading, and writing—and acquaints students with the intellectual and cultural contributions of the Spanish-speaking world through a study of its language, literature, and traditions.

The Program. The department's lower division program gives students a solid foundation in the Spanish language, either through the traditional elementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. Linguistics 1 introduces students to a systematic study of language in general and serves as an introduction to upper division courses in Spanish linguistics. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary criticism and to the four areas of study represented in the department's curriculum: Spanish linguistics, Spanish literature, Spanish-American literature, and Hispanic literatures and cultures in the United States. Students are encouraged to work closely with the department's academic advisers in designing a program of studies tailored to their individual needs and interests. Many students combine the Spanish major with another major in the humanities or social sciences.

Career Alternatives. The program, alone or in combination with other major programs, may lead to advanced study of the language or literature of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, or business.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	4-37
Spanish 1, 2, 3, 21, 22, 23, and 24	0-33
or Spanish 31, 32, 33	0-15

Spanish 21, 22, and 23 may be taken in the EAP Taxco or Morelia programs. Course 23 may be substituted by an equivalent course taken on EAP.

Linguistics 14
In consultation with a departmental adviser and with the consent of the department chairperson, Linguistics 1 may be taken concurrently with upper division courses.

Depth Subject Matter45-48

One course in each of the following five areas19-20
Spanish 1004
Spanish 111N, 115, or 1163-4
Spanish 130, 131N, or 134N4
Spanish 150N, 151N, or 1574
Spanish 117, 174, or 1764
Students planning to take Spanish 110 should do so at the beginning of the upper division sequence or concurrently with Spanish 100.

Seven elective courses to be chosen in consultation with the student's major adviser26-28

No more than seven electives may be taken with EAP, preferably concentrated in two of the following areas. Other combinations are possible with the approval of the major adviser:
(a) Spanish literature,
(b) Spanish-American literature,
(c) Chicano/Latino literature,
(d) Spanish linguistics

Students may, with the approval of their adviser, take up to three elective courses outside the Spanish department in such programs as Anthropology (e.g., Anthropology 144, 146), Chicana/o Studies (e.g., Chicana/o Studies 154, 155, 156, 171), Comparative Literature, Education (e.g., Education 151), History (e.g., History 161A, 161B, 164, 165, 166A, 166B, 168, 169A, 169B), and Linguistics (e.g., Linguistics 166).

A maximum of six units of course 199 may be counted toward the major. Course 199 cannot be used to replace regular departmental courses.

Total Units for the Major49-85

Major Advisers. Consult department.

Advising. Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major adviser. This is especially important for students who intend to use their major as preparation for graduate study, for those who are planning a teaching career, and for those who wish to take advantage of our EAP options.

Minor Program Requirements:

	UNITS
Spanish	23-24
One course in each of the following five areas:	
Spanish 100	4
Spanish 111N, 115, or 116	3-4
Spanish 130, 131N, or 134N	4
Spanish 150N, 151N, or 157	4
Spanish 117, 174, or 176	4
One upper division elective in Spanish	4
Consult a departmental adviser if any of these courses are to be taken abroad.	

Honors Program. Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least six units of Spanish 194H distributed over two quarters. Nor-

mally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.5 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.

Education Abroad Program options. The department encourages its majors to consider study in a Spanish-speaking country with our Education Abroad Program (EAP). It is now possible for our students to complete significant portions of the Spanish major in the EAP centers at both the lower (Preparatory Subject Matter) and upper division levels through newly introduced options.

Short Term Language and Culture Programs. A Short Term Program Abroad is offered in Mendoza, Argentina and in Santander, Spain. These programs aim at providing students with opportunities to increase their knowledge of the Spanish language and the Latin American culture by experiencing the life-learning challenges of living and studying abroad.

Students will earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program has an upper division course taught by the UC Davis Program Director focusing on history, culture and society. For more information, contact C. Columbi; <http://shorttermabroad.ucdavis.edu>.

Teaching Credential Subject Representative. C. Colombi See also under Teacher Education Program.

Graduate Study. The Department offers courses leading to the M.A. degree in Spanish to students who have completed with distinction the A.B. degree in Spanish, or the equivalent. Candidates will be recommended for admission to graduate studies in Spanish provided they meet the requirements of the Graduate Studies Office and the Department of Spanish. The Department also offers programs of study and research leading to the Ph.D. degree. Detailed information may be obtained by writing to the Chairperson of the Spanish Department.

Graduate Adviser. Consult department.

Prerequisite credit. Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

Courses in Spanish (SPA)

Course placement: Students with two years of high school Spanish normally take Spanish 2, those with three years take Spanish 3, and those with four years take Spanish 21. It is recommended that transfer students who have successfully completed a two-year sequence at the junior college level continue their study by taking Spanish 24 or 100. Consult a departmental adviser.

Lower Division Courses

1. Elementary Spanish (5)

Discussion—5 hours; laboratory—1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Spanish 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I, II, III. (I, II, III.)

1S. Elementary Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 1.—III.

2. Elementary Spanish (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1 in the areas of grammar and basic language skills.—I, II, III. (I, II, III.)

2S. Elementary Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 1 or 1S. Continuation of Spanish 1 in the areas of grammar and basic language skills. Offered in a Spanish speaking country under the supervision of UC Davis faculty/lecturer. Not open for credit to students who have completed course 2.—III.

3. Elementary Spanish (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Completion of grammar sequence and continuing practice of all language skills through cultural texts.—I, II, III. (I, II, III.)

3S. Elementary Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Completion of grammar sequence and continuing practice of all language skills through cultural texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty/lecturer.—III.

8. Elementary Spanish Conversation (2)

Discussion—3 hours. Prerequisite: course 3; course 21 (concurrently) recommended. Designed to develop oral communication skills. Emphasis on increasing vocabulary, improving listening comprehension, pronunciation, accuracy and grammar control. Practice of everyday situations. Not open to native speakers or to upper division students.—I, II, III. (I, II, III.)

21. Intermediate Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 3. Designed to review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. It is recommended that students transferring from other institutions start the second-year program at this point. (Former course 4.)—I, II, III. (I, II, III.)

21S. Intermediate Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 3. Review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Students transferring from other institutions are recommended to start the second year program at this point.—III.

22. Intermediate Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 21. Continuation of Spanish 21. Focus on more difficult grammatical concepts and further practice in composition. Development of all language skills through exercises and reading of modern texts. (Former course 5.)—I, II, III. (I, II, III.)

22S. Intermediate Spanish Conversation (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 21 or the equivalent. Continuation of course 21. Focus on more difficult grammar concepts and further practice on composition. Development of all language skills through exercises and reading of modern texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty/lecturer.—III.

23. Spanish Composition I (4)

Lecture—3 hours; frequent writing assignments. Prerequisite: course 22. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects.—I, II, III. (I, II, III.) Colombi

23S. Spanish Composition I (4)

Lecture—3 hours; extensive writing. Prerequisite: course 22. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Course is taught in a Spanish speaking country. Not open for credit to students who have completed course 23.—III.

24. Spanish Composition II (4)

Lecture—3 hours; term paper. Prerequisite: course 23. Development of advanced level writing skills, with particular emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects.—I, II, III. (I, II, III.) Colombi

24S. Spanish Composition II (4)

Lecture—3 hours; extensive writing. Prerequisite: course 23. Development of advanced level writing skills, with particular emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. Course is taught in a Spanish speaking country. Not open for credit to students who have completed course 24.—III.

28. Intermediate Spanish Conversation (2)

Discussion—3 hours. Prerequisite: course 8 or 22. Continuation of course 8. Designed to develop oral communication skills at a more advanced level. Practice in more complex situations. (Former course 9.)—I, II, III. (I, II, III.)

31. Intermediate Spanish for Native Speakers I (5)

Lecture/discussion—3 hours; tutorial—1 hour; frequent writing assignments. Prerequisite: course 3 or the equivalent, or consent of instructor. First course of a three-quarter series designed to provide bilingual students whose native language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Intensive review of grammar and composition.—I. (I.)

32. Intermediate Spanish for Native Speakers II (5)

Lecture/discussion—3 hours; tutorial—1 hour; frequent writing assignments. Prerequisite: course 31 or consent of instructor. Continuation of intensive review of grammar and composition. Development of all language skills through reading of modern texts, presentation/discussion of major ideas, vocabulary expansion, and writing essays on topics discussed. Designed for students whose native language is Spanish. (Former course 7B.)—II. (II.)

33. Intermediate Spanish for Native Speakers III (5)

Lecture/discussion—3 hours; tutorial—1 hour; frequent writing assignments. Prerequisite: course 32 or consent of instructor. Development of writing skills, with emphasis on experimenting with various writing styles: analytical, argumentative, and creative. Analytical review of literary genres. Written essays will be assigned. Students will develop a research paper. Designed for students whose native language is Spanish. (Former course 7C.)—III. (III.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. Primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

Course 100 is prerequisite to all upper division literature courses.

100. Principles of Hispanic Literature and Criticism (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33. Principles of literary criticism applied to the study of fiction, drama, poetry and essay of major literary writers of the Hispanic world.—I, II, III. (I, II, III.) Altisent, Egan, Martin, Scari, Verani

100S. Principles of Hispanic Literature and Criticism (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33. Principles of literary criticism applied to the study of fiction, drama, poetry and essay of major literary writers of the Hispanic world. Offered in a Spanish speaking country

under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 100.—III.

110. Advanced Spanish Composition (4)

Lecture—3 hours; frequent writing assignments. Prerequisite: course 24 or 33. Practice in expository writing with emphasis on clarity and idiomatic expression. Practical application and review of selected grammar topics. (Part of former courses 110A and 110B.)—I, II, III. (I, II, III.) Scari

111N. The Structure of Spanish: Sounds and Words (3)

Lecture—3 hours. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor. A linguistic description of the sound patterns of Spanish and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. (Former course 132.)—I, II, III. (I, II, III.)

112N. The Structure of Spanish: Words and Phrases (3)

Lecture—3 hours. Prerequisite: course 111N. A study of Spanish word and phrase structure, with special emphasis on the constituent structure of noun and verb phrases. Theoretical and practical comparisons with English and with other Romance languages. (Former course 131.)—II, III. (II, III.) Blake, Ojeda

113. Spanish Pronunciation (3)

Lecture—3 hours. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor. The sound structure of modern Spanish; theoretical analysis of selected problems in pronunciation. Strongly recommended for prospective teachers. (Former course 133.)—I, II. (I, II.) Torreblanca

114N. Contrastive Analysis of English and Spanish (4)

Lecture—3 hours; extensive writing. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor; courses 111N and 112N recommended. Contrastive analysis of English and Spanish, error analysis, introduction to structuralist and transformational linguistics. Individual and group conferences. (Former course 137.)—III. (III.) Colombi, Ojeda

115. History of the Spanish Language (4)

Lecture—3 hours; extensive writing/discussion—1 hour. Prerequisite: course 24 or 33 and Linguistics 1 or consent of instructor. The Spanish language from its roots in spoken Latin to modernity. Emphasis on the class relationship between historical events and language change, and the role that literature plays in language standardization.—I, II. (I, II.) Blake, Torreblanca

116. Applied Spanish Linguistics (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor. Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. For students interested in teaching Spanish as a career.—I, II. (I, II.) Blake, Colombi

117. Teaching Spanish as a Native Tongue in the U.S.: Praxis and Theory (4)

Lecture—3 hours; extensive writing. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor; course 116 and Linguistics 116 recommended. Designed for students interested in teaching Spanish to native speakers. Focus on cultural diversity of the main Spanish-speaking populations in the U.S.; applied language teaching methodologies in the context of teaching Spanish to native speakers at different levels. Conducted primarily in Spanish.—I. (I.) Colombi, Alarcón

118. Topics in Spanish Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: courses 111 and 112. A study of specialized topics in Spanish linguistics, for example: language and use; text and context; language and society; bilingualism; Spanish dialectology; syntax and semantics. May be repeated once for credit when topic differs.—III. (III.)

123. Creative Writing in Spanish (4)

Discussion—4 hours. Prerequisite: course 24 or 33, or consent of instructor. Intensive writing of poetry or fiction in Spanish or in a bilingual (Spanish/English) format. Students will write both in prescribed forms and in experimental forms of their own choosing. Offered in alternate years.—(III.) Alarcón

130. Survey of Spanish Literature to 1700 (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Survey of Spanish literature (narrative, poetry and drama) to 1700, Emphasis on the multicultural birth of the Spanish culture, the formation and growth of the Spanish language and letters through its written records and the literature of the early period. (Part of former courses 103A and 103B.)—I. (I.) Armistead, Martin

131N. Survey of Spanish Literature: 1700 to Present (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100. Survey of modern Spanish literature, providing an overview of main literary movements (romanticism, realism, naturalism, modernism, avant-garde). Emphasis on the philosophical and historical background and on the European context for modern Spanish literature. (Part of former courses 104A and 104B.)—II. (II.) Altisent, Scari

132N. Medieval and Renaissance Spanish Literature (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Introduction to the study of the principal works and authors of Medieval and early 16th-century Spanish literature. (Part of former courses 112 and 103A.)—I. (I.) Armistead

133N. Golden Age Literature of Spain (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Introduction to the study of the principal authors and literary movements of 16th- and 17th-century Spain and Spanish American colonial literature. (Part of former courses 103B, 109 and 115.)—I. (I.) Martin

134N. Don Quijote (4)

Lecture—3 hours; term paper. Prerequisite: course 100. A critical reading of *Don Quijote* by Cervantes. Focused interpretations of important passages and characters in the context of the socio-cultural background of the period. *Don Quijote* as prototype for the modern novel. Offered in alternate years. (Former course 111.)—(II.) Martin

135N. Spanish Romanticism (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Romanticism as a philosophical concept, and as a literary movement in Spain, with emphasis on its distinctive, specific "Romantic" qualities and its literary expression in five leading authors of the early nineteenth century. (Former course 114.)—III. (III.) Scari

136N. The Spanish Novel of the 19th Century (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Literary realism in Spain, focusing on Leopoldo Alas (Clarín), Emilia Pardo Bazán and Benito Pérez Galdós. The unique characteristics of Spanish realism and its historical roots in Cervantes and the picaresque. (Former course 119.)—II. (II.) Scari

137N. Twentieth-Century Spanish Fiction (4)

Lecture—3 hours; term paper. Prerequisite: course 100 or 131. Study of the main literary trends and authors of the modern Spanish novel and short story. Selected works by Unamuno, Valle-Inclán, Sender, Cela, Matute, Ayala and others. (Former course 120A.)—III. (III.) Altisent

138N. Modern and Contemporary Spanish Poetry (4)

Lecture—3 hours; term paper. Prerequisite: course 100 or 131. Study of the main literary trends and authors of modern and contemporary Spanish poetry. Selected works by Machado, Juan Ramón Jiménez, García Lorca, Guillén, Aleixandre, Hernández Hierro and others. Offered in alternate years. (Former course 120C.)—(III.) Altisent

139. Modern Spanish Theater (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Study of the main dramatic trends and play-

434 Spanish

wrights of modern Spanish theater. Selected works by Valle Inclán, García-Lorca, Mihura, Buero-Vallejo, Arrabal and others. Offered in alternate years. (Former course 120B.) GE credit: ArtHum, Div.—(I.) Altisent

140N. Modern Spanish Essay (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Ortega, Unamuno and the modern Spanish essay. Their concept of Spain and their relations with other movements and thinkers.—II. (II.) Scari

141. Spanish Culture (4)

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 24 or 33. The development of Spanish culture(s) from the Romans to the present, focusing on important historical periods. Topics include art, history of ideas, and everyday cultural manifestations. (Former course 134.) Offered in alternate years. GE credit: ArtHum, Div.—(III.)

141S. Spanish Culture (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1S, 2S, 3S, or consent of instructor. The development of Spanish culture(s) from the Romans to the present, focusing on important historical periods. Topics include art, history of ideas, and everyday cultural manifestations. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 141. GE credit: ArtHum, Div.—III. (III.)

142. Special Topics in Spanish Cultural and Literary Studies (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Special topics in the study of Spanish literature and culture. May be repeated twice for credit when topic differs. (Part of former course 151.)—I, II, III. (I, II, III.)

143. Spanish Art (4)

Lecture—3 hours; term paper or discussion—1 hour. Spanish art and the different historical, sociological and political manifestations that frame it. History of art, including Paleolithic, Roman, Visigothic, Romanesque, Goth, Renaissance, Baroque, Neo-classic and Contemporary art. GE credit: ArtHum—summer. (summer.)

148. Cinema in the Spanish-Speaking World in Translation (4)

Lecture—3 hours; film viewing—3 hours. Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(I.) Altisent, Colombi, Larsen

148S. Cinema in the Spanish-Speaking World in Translation (4)

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 24 or 33. Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Not open for credit to students who have completed course 148. GE credit: ArtHum, Div.—III. (III.)

149. Latin-American Literature in Translation (4)

Lecture/discussion—3 hours; term paper. Prerequisite: English 3 or the equivalent. Reading, lectures and discussions in English of works by Borges, Cortázar, Fuentes, García Márquez, Paz and others. May not be counted toward the major in Spanish. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.) Egan, Larsen, Verani

150N. Survey of Spanish-American Literature to 1900 (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Spanish American literature from prehispanic texts and the Chronicles of the Conquest to Romanticism and Modernism. Reading selections include fiction, poetry, drama and essays. (Former course 105A.)—I. (I.) Egan, Larsen, Verani

151N. Survey of Spanish-American Literature 1900 to Present (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100. Spanish-American literature from Modernism to the present. Reading selections include fiction, poetry, drama, and essays. (Former course 105B.)—II. (II.) Egan, Larsen, Verani

153. Spanish-American Short Story (4)

Lecture—3 hours; term paper. Prerequisite: course 100. The evolution of the Spanish-American short story during the 19th and 20th centuries. Emphasis on the contemporary period. Offered in alternate years. (Former course 128.)—(I.) Egan, Larsen, Verani

154. Spanish-American Novel (4)

Lecture—3 hours; term paper. Prerequisite: course 100. The evolution of the Spanish-American novel during the 19th and 20th centuries. Emphasis on significant contemporary works. Offered in alternate years. (Part of former courses 108A and 108B.)—(II.) Egan, Larsen, Verani

155. Mexican Novel (4)

Lecture—3 hours; term paper. Prerequisite: course 100. The evolution of the Mexican novel during the 19th and 20th centuries. Emphasis on the narrative of the Revolution and significant contemporary works. (Former course 129.)—II. (II.) Egan, Larsen, Verani

156. Darío, Modernism and Its Legacy (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Modernism as an authentic expression of Latin American literature and its influence on 20th-century poetry and prose. In depth analysis of the works of Darío and other major Modernist writers. Offered in alternate years. (Former course 125.)—(II.) Egan, Larsen, Verani

157. 20th Century Masters in Spanish-American Literature (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Study of major 20th-century Spanish-American writers and their cultural and literary milieus. Offered in alternate years. (Part of former courses 127 and 138.)—(III.) Egan, Larsen, Verani

158. Spanish-American Poetry: From Vanguardism to Surrealism and Beyond (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Study of vanguardism, surrealism, and more recent movements of 20th-century poetry. An in-depth analysis of the works of such major poets as Neruda, Vallejo, and Octavio Paz. Offered in alternate years.—(II.) Verani

159. Special Topics in Spanish-American Literature and Culture (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Special topics in the study of Spanish-American literature and culture. May be repeated twice for credit when topic differs. Offered in alternate years.—(I, II, III.) Egan, Larsen, Verani

159S. Special Topics in Spanish American Literature and Culture (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Special topics in the study of Spanish-American literature and culture. Offered in a Spanish speaking country under the supervision of UC Davis faculty. May be repeated for credit twice when topic differs.—III. (III.)

170. Spanish-American Culture (4)

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 24 or 33. Major developments in the arts and social institutions of Spanish America and areas other than Mexico. Readings, lectures and discussions in Spanish. (Former course 136.) GE credit: ArtHum, Div.—III. (III.)

170S. Spanish American Culture (4)

Lecture—3 hours; term paper. Prerequisite: course 24 or 33. Major developments in the arts and social institutions of Spanish America and areas other than Mexico. Readings, lectures and discussions in Spanish. Offered in a Spanish speaking country under the supervision of UC Davis faculty/lecturer.—III.

171. Music from Latin America (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Spanish 24 or 33. Examination of music from Latin America. Characteristic music (i.e., tango, bossa nova, salsa, musica nortena, musica andina) as well as its implications in other musical genres. Taught in Spanish. For non-majors. Offered in alternate years. (Same course as Music 127.)—(I.) Ortiz

171S. Music from Latin America (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 24 or 33. Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in Spanish and in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 171 or Music 127.—II. (II.)

172. Mexican Culture (4)

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 24 or 33. The development of Mexican culture from the Aztec-Mayan era to the present. Study includes important periods such as the Conquest and Colonialism, the Independence movement, and changes from the Revolution to contemporary Mexico. Reading, lectures and discussions in Spanish. (Former course 135.) GE credit: ArtHum, Div.—III. (III.) Egan

174. Chicano Culture (4)

Lecture—3 hours; term paper/discussion—1 hour. Prerequisite: course 24 or 33. An interdisciplinary survey of Chicano culture. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. (Former course 124.) GE credit: ArtHum, Div.—II. (II.) Alarcón

176. Literature in Spanish Written in the United States (4)

Lecture—3 hours; term paper. Prerequisite: course 24 or 33. Survey of the literary and cultural contributions of the main Spanish-speaking populations present in the U.S.: Chicanos, Puerto Ricans, Cuban-Americans, Central Americans, and other Latinos. GE credit: ArtHum, Div.—III. (III.) Alarcón

192I. Internship in Spanish (1-12)

Independent study—3-36 hours. Prerequisite: course 23; junior standing; major in Spanish, Chicano Studies, or a related field. Internships in fields where Spanish language skills can be used and perfected (teaching, counseling, translating-interpreting). May be repeated for credit for a total of 8 units. Units will not count toward the Spanish major. (P/NP grading only.)

194H. Special Study for Honors Students (1-5)

Independent Study—3-15 hours. Prerequisite: Senior standing and qualification for the Spanish honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Spanish literature, civilization, or language studies. May be repeated for up to 8 units of credit. (P/NP grading only.)

197T. Tutoring in Spanish (1-4)

Tutorial—1-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

197TC. Tutoring in the Community (2-4)

Tutorial—2-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

May be repeated for up to 6 units of credit (P/NP grading only.)

Graduate Courses

201. Literary Theory I (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Basic theories and practical approaches to modern and contemporary Hispanic literature. Emphasis on formalism, post-structuralism, socio-cultural discourses, and ideologies.—II. (II.)

202. Literary Theory II (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major contemporary critical theories including recent, innovative approaches to Hispanic literature and culture. Readings from Semiotics and Deconstructionism to Psychological and Socio-ideological approaches. Emphasis on Postmodern and Neo-colonial discourse.—III. (III.)

205. Spanish Phonology (4)

Seminar—3 hours; term paper. Prerequisite: some knowledge of phonetics is required and consent of instructor; Linguistics 109 and 139 highly recommended. Analyzes the sound patterns of Spanish from both linear and non-linear perspectives. Students will develop a clear understanding of what phonology is and the nature of Spanish phonology, as defined by modern linguistic analysis.—II. (II.) Torreblanca

206. Spanish Syntax (4)

Seminar—3 hours; term paper. Prerequisite: Linguistics 140 and 165. An examination of Spanish word order within the framework of general linguistic theory. The student will investigate how to write a grammar of Spanish with particular attention to the structure of noun and verb clauses.—I. (I.) Blake, Ojeda

207. History of the Spanish Language (4)

Seminar—3 hours; term paper. Prerequisite: Latin 1. (Former course 220A.)—I, III. (I, III.) Blake, Torreblanca

208. Old Spanish Texts (4)

Seminar—3 hours; term paper. Prerequisite: course 207. An in-depth linguistic examination of Old Spanish texts from the 12th to the 15th centuries, with particular attention to the significance of orthographic changes.—II. (II.) Torreblanca, Blake

211. Hispanic Dialectology (4)

Seminar—3 hours; term paper. Prerequisite: course 220 or consent of instructor. Descriptive and historical study of the distinctive features of Peninsular and American Spanish dialects. (Former course 221.)—III. (III.) Torreblanca

212. Applied Linguistics (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing and courses 215 and 216 recommended. Focuses on the relevant linguistic aspects of teaching Spanish. Designed for graduate students who have an interest in second-language learning and teaching.—II. (II.) Colombi, Blake

215. Special Topics in Hispanic Linguistics (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor; courses 205, 206 recommended. Specialized topics in Hispanic linguistics (e.g., pragmatics, sociolinguistics, topics in syntax, semantics, or diachronic studies). May be repeated for credit when topic differs.—III. (III.)

222. Critical Approaches to Spanish Literature I: Prose and Essay (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. A review of the main critical approaches to Spanish narrative and the essay.—II. (II.) Altisent, Armistead, Martin, Scari

223. Critical Approaches to Spanish Literature II: Poetry and Drama (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. A review of the main critical approaches to Spanish poetry and drama.—II. (II.) Altisent, Armistead, Martin

224. Studies of a Major Writer, Period, or Genre in Spanish Literature (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Spanish writer and his/her

intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor.—III. (III.)

252. Medieval Spanish Literature: Prose (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of the major genres of Medieval Spanish prose from its origins to 1450.—I. (I.) Armistead

253. Medieval Spanish Literature: Epic (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Medieval Spanish epic narratives. Major theoretical perspectives on the genesis, diffusion, and character of the Medieval epic. Relationship of epic to ballad literature.—II. (II.) Armistead

254. Medieval Hispanic Lyric (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Analysis of the most representative lyric poetry in the various Peninsular languages and in provençal, troubadour poetry, *kharjas*, *villancicos*, *cantigas de amigo*, and courtly lyric.—II. (II.) Armistead

255. Spanish Literature of the Early Renaissance (4)

Seminar—3 hours; term paper. Spanish Literature, 1450-1550, with emphasis on *La Celestina*. (Former course 229.)—I. (I.) Armistead, Martin

256. Spanish Literature of the Renaissance and Golden Age: Poetry (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Extensive critical study of the main currents of Renaissance and Baroque Spanish poetry through its language structures, styles ("Culteranismo-Conceptismo"), rhetorical devices, myths, and themes (love, death, time).—I. (I.) Martin

257. Spanish Literature of the Renaissance and Golden Age: Drama (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of major 16th and 17th century literary and cultural developments through the study of selected dramas.—I. (I.) Martin

258. Spanish Literature of the Renaissance and Golden Age: Prose (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The origins and development of the Spanish novel during the Renaissance and the Spanish Golden Age.—I. (I.) Martin

259. Cervantes and the Novel (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The narrative works of Miguel de Cervantes with special emphasis on *Don Quijote*.—I. (I.) Martin, Armistead

260. Modern Spanish Literature (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics of Spanish literature, from 1700-1920.—I. (I.) Scari

261. Contemporary Spanish Literature: Poetry (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical analysis of modern Spanish poetry from a wide spectrum of poetic currents.—I. (I.) Altisent

262. Contemporary Spanish Literature: Narrative (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the 20th-century novel and short story, with emphasis on the avant-garde, existentialism, social realism, and postmodern trends.—I. (I.) Altisent

263. Contemporary Spanish Literature: Drama (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The Spanish theatrical production of the last 70 years.—I. (I.) Altisent

264. Contemporary Spanish Literature: Essay (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major thinkers from Ganiwet to Unamuno and Ortega y Gasset.

Emphasis will be placed on the relationships between Spanish thought and European philosophical currents. Offered in alternate years.—(III.) Scari

265. Women Writers of Spain (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Introduction to the development of a feminine consciousness in the Spanish contemporary literary scene. Selected texts represent particularly innovative typologies of feminine discourse in the realm of the historical, psycho-analytical, and metafictional, erotic, and allegorical fiction.—I. (I.) Altisent

272. Critical Approaches to Spanish-American Literature: Narrative (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing and consent of instructor. Extensive critical study of the development of Spanish-American literary periods and currents in narrative (novel, short story, and essay), from early Colonial times to the present.—I. (I.) Egan, Larsen, Verani

273. Critical Approaches to Spanish-American Literature: Poetry and Drama (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing and consent of instructor. Extensive critical study of the development of Spanish-American literary periods and currents in poetry and drama, from early Colonial times to the present.—I. (I.) Egan, Larsen, Verani

274. Studies of a Major Writer, Period, or Genre in Spanish-American Literature (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Spanish-American writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor.—I. (I.)

275. Colonial Literature (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing and consent of instructor. An examination of pre-Hispanic and Colonial narrative, poetry and theatre. Emphasis on historical, anthropological, and ethnographic approaches to Colonial discourse.—I. (I.) Egan

276. Twentieth-Century Spanish-American Drama (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Major Spanish-American dramatists from Florencio Sánchez to the present. Offered in alternate years. (Former course 240.)—(III.)

277. Spanish-American Novel, 1900-1950 (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends and key authors in Spanish America in the first half of the 20th century. Offered in alternate years. (Former course 241A.)—(I.) Egan, Larsen, Verani

278. New Trends in Spanish-American Fiction (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Recent developments in Spanish-American narrative. Emphasis on innovative language and structure. Offered in alternate years. (Former course 241B.)—(II.) Egan, Larsen, Verani

279. Mexican Narrative (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the evolution of Mexican narrative. Emphasis on the narrative of the Revolution and significant contemporary works. Offered in alternate years.—(III.) Egan, Larsen, Verani

280. Spanish-American Short Story (4)

Seminar—3 hours; term paper. Works by major writers with emphasis on 20th-century authors such as Quiroga, Borges, García Márquez, Cortázar, and Rulfo. (Former course 243.)—III. (III.) Egan, Larsen, Verani

281. Spanish-American Women Writers (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of feminist critical theories, gender construction, and

self-representation within the history of socio-cultural changes in Latin America.—I. (I.) Egan, Verani

282. Darío and Modernism (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of poetry and prose of Spanish-American Modernism (1880-1916). Offered in alternate years. (Former course 245.)—(I.) Egan, Larsen, Verani

283. New Directions in Spanish-American Poetry (4)

Seminar—3 hours; term paper. Offered in alternate years. (Former course 247.)—(III.) Egan, Larsen, Verani

284. The Spanish-American Essay (4)

Seminar—3 hours; term paper. Major Spanish-American essayists from Sarmiento to Octavio Paz. Offered in alternate years. (Former course 248.)—(II.) Egan, Larsen, Verani

285. Multicultural Approaches to Cuban Literature and Culture (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends in Cuban literature. Emphasis on historical, geographic, social and cultural context (including music and film). Course taught in English with some readings in Spanish.—III. (III.) Blanchard

298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. May be repeated for credit. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Courses

390. The Teaching of Spanish in College (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: graduate standing. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of graduate teaching assistants.—I. (I.) López-Burton

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Major Program

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

The Program. Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. The A.B. degree is very flexible, facilitating a double major or extensive elective course work in a field in which statistics is applied. The B.S. degree program has two options: one emphasizes mathematics and is especially recommended as preparation for graduate study in statistics; the other emphasizes computer science. All three programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications of statistics.

Preparatory Requirements. Before applying for either the A.B. or B.S. major in Statistics, students must ordinarily complete the following courses with at least C grades:
 Mathematics 21A, 21B, 21C
 Mathematics 22A, 22B
 Computer Science Engineering 30 or 40
 Statistics 32

In addition, due to space limitations in the B.S. major, students admitted to this major will normally be chosen from those having at least a 3.0 grade point average in the above courses. For further information, please contact a Statistics adviser.

Career Alternatives. Probability models and statistical methods are used in a great many fields, including the biological and social sciences, business and engineering. The wide applicability of statistics has created in both the public and private sectors a strong demand for graduates with statistical training. Current employment opportunities include state and federal government positions with a statistician designation, industrial positions (e.g., in the actuarial series within an insurance company, in the data management unit in a health science facility, or in the research units in pharmaceutical and biotechnology industries), and teaching positions.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	24-25
Mathematics 21A, 21B, 21C	12
Mathematics 22A, 22B	6
Computer Science Engineering 30 or Engineering 5 (or the equivalent).....	3-4
Statistics 32	3
Depth Subject Matter	41-44
Statistics 106, 108 or the equivalent	8
Statistics 131A, 131B, 131C	12
Three courses from Statistics 104, 135, 137, 138, 141, 142, 144, 145	12
Related elective courses	9-12
Three upper division courses approved by major adviser; they should be in mathematics, computer science or in quantitative aspects of a substantive discipline.	
Total Units for the Major	65-69

B.S. Major Requirements:

	UNITS
Preparatory Subject Matter	24-29
Mathematics 21A, 21B, 21C	12
Mathematics 22A, 22B	6
Computer science:	
<i>General option:</i> Computer Science Engineering 30 or Engineering 5 (or the equivalent)	3-4
<i>Computer Science option:</i> Computer Science Engineering 30 and 40	8
Statistics 32	3

Depth Subject Matter

Complete one of the two options below.

Statistics—General option	51-52
Statistics 106, 108 or the equivalent	8
Statistics 131A, 131B, 131C or the equivalent	12
Four courses selected from Statistics 104, 135, 137, 138, 141, 142, 144, 145	16
Three courses selected from Mathematics 108, 127A, 127B, 127C, 128A, 128B, 128C, 167, 168 (Mathematics 127 strongly recommended for students considering graduate work in Mathematics or Statistics.)	12
Related elective course	3-4
One upper division course approved by major adviser; it should be in mathematics, computer science or in quantitative aspects of a substantive discipline.	

Total Units for the Major

Statistics—Computer Science option	52
Statistics 106, 108 (or the equivalent)	8
Statistics 131A, 131B, 131C	12
Two courses from Statistics 104, 135, 137, 138, 141, 142, 144, 145	8
Computer Science Engineering 110, 165A	8
Two courses from Mathematics 128A, 128B, 132A, 132B, 167, 168	8
Two courses from Computer Science Engineering 122A, 124, 130, 175	8

Total Units for the Major

(Computer Science option)

Major Adviser. A.P. Fenech.
 Students are encouraged to meet with an adviser to plan a program as early as possible. Sometime before or during the first quarter of the junior year, students planning to major in Statistics should consult with a faculty adviser to plan the remainder of their undergraduate programs.

Minor Program Requirements:

The Department offers a minor program in Statistics that consists of a survey at the upper division level of the fundamentals of mathematical statistics and of the most widely used applied statistical methods.

	UNITS
Statistics	20
Statistics 106, 108, and 130A-130B or 131A-131B	16
One course in Statistics having Statistics 130B or 131B as a prerequisite	4
Preparation: Statistics 13 or 32.	

Graduate Study. The Graduate Group in Statistics offers study and research leading to the M.S. and Ph.D. degrees in Statistics, including a Ph.D. in Statistics with an emphasis in Biostatistics. Detailed information concerning these degree programs, as well as information on admissions and on financial support, is available from the Department of Statistics.

Graduate Adviser. W. Polonik
Statistical Consulting. The Department provides a consulting service for researchers on campus. For more information, call the Statistical Laboratory Office (530-752-6096).

Courses in Statistics (STA)

Lower Division Courses

10. Statistical Thinking (4)
 Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: two years of high school algebra. Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media; emphasis is on understanding polls, unemployment rates, health studies; understanding probability, risk and odds. GE credit: SciEng or SocSci, Wrt.—III. (III.)

12. Introduction to Discrete Probability (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: two years of high school algebra. Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; independence; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications in the social, biological, and engineering sciences. Offered in alternate years. GE credit: SciEng.

13. Elementary Statistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra or the equivalent in college. Measures of central tendency and dispersion; binomial, normal, Student-t, and chi-square distributions; testing hypotheses; confidence intervals, regression and correlation analysis. Not open for credit to students who have completed any statistics course numbered higher than 13, except for course 102. GE credit: SciEng.—I, II, III. (I, II, III.)

13V. Web Based Elementary Statistics (4)

Lecture—1.5 hours; World Wide Web virtual lecture—5 hours. Prerequisite: two years of high school algebra or the equivalent. Descriptive statistics, binomial, normal, Student's t and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit to students who have completed courses numbered higher than 13, except course 102. GE credit: SciEng.—II. (II.)

32. Basic Statistical Analysis Through Computers (3)

Lecture—3 hours. Prerequisite: Mathematics 16B or 21B; ability to program in a high-level computer language such as Pascal. Overview of probability modeling and statistical inference. Problem solution through mathematical analysis and computer simulation. Recommended as alternative to course 13 for students with some knowledge of calculus and computer programming. GE credit: SciEng.—II, III. (II, III.)

90X. Seminar (1-2)

Seminar—1-2 hours. Prerequisite: high school algebra and consent of instructor. Examination of a special topic in a small group setting.

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses
100. Applied Statistics for Biological Sciences (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: Mathematics 16B or the equivalent. Probability computation/modeling, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have taken course 13 or 32. Not open for credit to students who have taken course 102. GE credit: SciEng.—I, II, III. (I, II, III.)

102. Introduction to Probability Modeling and Statistical Inference (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra, and upper division standing. Introductory probability and statistics at a rigorous yet precalculus level. Rigorous precalculus introduction to probability and parametric/nonparametric statistical inference with computing; binomial, Poisson, geometric, normal, and sampling distributions; exploratory data analysis; regression analysis; ANOVA. Only two units of credit allowed to students who have taken course 32. Not open for credit to students who have taken course 100. GE credit: SciEng.—I, III. (I, III.)

103. Applied Statistics for Business and Economics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 13, 32, or 102; and Mathematics 16A, 16B. Descriptive statistics; probability; random variables;

expectation; binomial, normal, Poisson, other univariate distributions; joint distributions; sampling distributions; central limit theorem; properties of estimators; linear combinations of random variables; testing and estimation; Minitab computing package. GE credit: SciEng.—I, II, III. (I, II, III.)

104. Applied Statistical Methods: Nonparametric Statistics (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 13, 32, or 102. Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests. Offered in alternate years. GE credit: SciEng.—(II.)

106. Applied Statistical Methods: Analysis of Variance (4)

Lecture—4 hours. Prerequisite: course 13, 32, or 102. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design. Latin squares. Multiple comparisons procedures. One-way random effects model. GE credit: SciEng.—I, II. (I, II.)

108. Applied Statistical Methods: Regression Analysis (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 13, 32 or 102. Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: SciEng.—I, II, III. (I, II, III.)

120. Probability and Random Variables for Engineers (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21A, 21B, 21C, and 22A. Basic concepts of probability theory with applications to electrical engineering, discrete and continuous random variables, conditional probability, combinatorics, bivariate distributions, transformation of random variables, law of large numbers, central limit theorem, and approximations. No credit for students who have taken course 131A or Civil and Environmental Engineering 114. GE credit: SciEng.—I, III. (I, III.)

130A. Mathematical Statistics: Brief Course (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16B. Basic probability, densities and distributions, mean, variance, covariance, Chebyshev's inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes. Only 2 units of credit allowed to students who have taken course 131A.—I. (I.)

130B. Mathematical Statistics: Brief Course (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130A. Transformed random variables, large sample properties of estimates. Basic ideas of hypotheses testing, likelihood ratio tests, goodness-of-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics.—II. (II.)

131A. Introduction to Probability Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21A, 21B, 21C, and 22A. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have taken Mathematics 131.—I, II, III. (I, II, III.)

131B-131C. Introduction to Mathematical Statistics (4-4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131A, or Mathematics 22A and 131. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory, and nonparametric inference.—II-III. (II-III.)

133. Mathematical Statistics for Economists (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 103 and Mathematics 16B, or the equivalents; no credit will be given to students majoring in

Statistics. Probability, basic properties; discrete and continuous random variables (binomial, normal, t, chi-square); expectation and variance of a random variable; bivariate random variables (bivariate normal); sampling distributions; central limit theorem; estimation, maximum likelihood principle; basics of hypotheses testing (one-sample).—I. (I.)

135. Multivariate Data Analysis (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130B, and preferably course 131B. Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotelling's T²; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets.—III. (III.)

137. Applied Time Series Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 108 or the equivalent. Time series relationships, cyclical behavior, periodicity, spectral analysis, coherence, filtering, regression, ARIMA and state-space models; Applications to data from economics, engineering, medicine environment using time series software.—III. (III.)

138. Analysis of Categorical Data (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130B or 131B, or courses 106 and 108. Varieties of categorical data, cross-classifications, contingency tables, tests for independence. Multidimensional tables and log-linear models, maximum likelihood estimation; tests of goodness-of-fit. Logit models, linear logistic models. Analysis of incomplete tables. Packaged computer programs, analysis of real data. GE credit: SciEng.—I. (I.)

141. Statistical Computing (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 130A or 131A, and one of courses 13, 32, 100, 102, or the equivalent, and experience in computer programming; course 130B or 131B recommended. Use of computers in statistics. Numerical foundations of statistical procedures. Computation of probabilities and quantiles. Random numbers. Monte Carlo method and bootstrap. Methods for parametric statistical models. Graphical methods and exploratory data analysis.—II. (II.)

142. Reliability (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 130B or 131B or consent of instructor. Stochastic modeling and inference for reliability systems. Topics include coherent systems, statistical failure models, notions of aging, maintenance policies and their optimization. Offered in alternate years.

144. Sampling Theory of Surveys (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 130B or 131B. Simple random, stratified random, cluster, and systematic sampling plans; mean, proportion, total, ratio, and regression estimators for these plans; sample survey design, absolute and relative error, sample size selection, strata construction; sampling and nonsampling sources of error. Offered in alternate years. GE credit: SciEng.—(I.)

145. Bayesian Statistical Inference (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 130A and 130B, or 131A and 131B, or the equivalent. Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. Offered in alternate years.—(II.)

190X. Seminar (1-2)

Seminar—1-2 hours. Prerequisite: one of courses 13, 32, 100, 102, or 103. In-depth examination of a special topic in a small group setting.

192. Internship in Statistics (1-12)

Internship—3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Work experience in statistics. (P/NP grading only.)

194HA-194HB. Special Studies for Honors Students (4-4)

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses**205. Statistical Methods for Research (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 106 or the equivalent. Topics in design of experiments include factorial designs, balanced and unbalanced experiments, random and mixed effects models, response surface methodology, nested design, repeated measures, cross-over design, analysis of covariance. Applications in engineering, biological sciences, medicine and environmental research. Offered in alternate years.—(III.)

222. Biostatistics: Survival Analysis (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 131C or consent of instructor. Incomplete data; life tables; nonparametric methods; parametric models; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics.—I. (I.)

223. Biostatistics: Generalized Linear Models (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 131C or consent of instructor. Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response relations; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs.—II. (II.)

224. Biostatistics: Clinical Trials and Advanced Topics (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 223 or consent of instructor. Clinical trials; sequential design; covariate adjustment; meta-analysis; applications of generalized linear models; longitudinal studies; random effects models; advanced topics.—III. (III.)

231A. Mathematical Statistics I (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131A, 131B, 131C, Mathematics 127A, 127B or the equivalent. First part of 3-quarter sequence on mathematical statistics. Emphasizes foundations. Topics include basic concepts in asymptotic theory, decision theory (e.g. risk function, Bayes and minimax optimality, Bayes estimation), and an overview of methods of point estimation.—I. (I.)

231B. Mathematical Statistics II (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231A. Second part of a 3-quarter sequence on mathematical statistics. Emphasizes large sample theory, e.g. asymptotics of MLE, likelihood-ratio-test and Chi-square-test, CLT with applications in (generalized) linear models. Classical hypothesis testing, e.g. Neyman-Pearson theory, UMP (unbiased)-tests.—II. (II.)

231C. Mathematical Statistics III (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231A, 231B. Third part of 3-quarter sequence on mathematical statistics. Emphasizes large sample theory and their applications. Topics include statistical functionals (applications to L- and M-estimation); resampling methods (jackknife, bootstrap); curve estimation (density, regression, failure rate); rank tests, and one instructor-selected topic.—III. (III.)

232A. Applied Statistics I (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 106, 108, 131A, 131B, 131C, Mathematics 167. Estimation and testing for the general linear model, ANOVA design, model validation, variable

selection, and analyzing data with the linear model.—I. (I.)

232B. Applied Statistics II (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 232A. Estimation and testing for the general linear mixed model, Bayesian hierarchical modeling, nonparametric modeling, analyzing data and designing experiments with respect to these models.—II. (II.)

232C. Applied Statistics III (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 232B. Multivariate analysis: multivariate distributions, multivariate linear models, data analytic methods including principal component, factor, discriminant, cluster, and canonical correlation analyses, nonparametric methods, regression trees, and Bayesian methods.—III. (III.)

233. Design of Experiments (3)

Lecture—3 hours. Prerequisite: course 131C. Topics from balanced and partially balanced incomplete block designs, fractional factorials, and response surfaces. Offered in alternate years.

235A-235B-235C. Probability Theory (3-3-3)

Lecture—3 hours. Prerequisite: Mathematics 127C and courses 131A-131B or the equivalent. Measure theoretic foundations, abstract integration, modes of convergence, limit theorems, independence, laws of large numbers, characteristic functions, central limit theorem, conditional expectations; topics from discrete time, Markov and stationary processes, ergodic theory, Brownian motion, weak convergence, Wiener and Poisson processes. (Same course as Mathematics 235A-235B-235C.)—I-II-III. (I-II-III.)

237A-237B. Time Series Analysis (4-4)

Lecture—3 hours; term paper. Prerequisite: course 131B or the equivalent; course 237A is a prerequisite for course 237B. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering. Offered in alternate years.—(I-II)

238. Theory of Multivariate Analysis (4)

Lecture—3 hours; term paper. Prerequisite: courses 131B and 135. Multivariate normal and Wishart distributions, Hotelling's T-Squared, simultaneous inference, likelihood ratio and union intersection tests, Bayesian methods, discriminant analysis, principal component and factor analysis, multivariate clustering, multivariate regression and analysis of variance, application to data. Offered in alternate years.—II.

240A-240B. Nonparametric Inference (4-4)

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C recommended. Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology. Offered in alternate years.

241. Asymptotic Theory of Statistics (4)

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C desirable. Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference. Offered in alternate years.

250. Topics in Applied and Computational Statistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131A; course 232A recommended. Topics may include resampling methods, nonparametric and semiparametric methods, incomplete data analysis, diagnostics, multivariate and time series analysis, applied Bayesian methods, sequential analysis and quality control, categorical data analysis, spatial and image analysis, computational biology, functional data analysis, models for correlated data, learning theory. May be repeated for credit with consent of instructor. Not offered every year.—I, II, III.

251. Topics in Statistical Methods and Models (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231B or the equivalent. Topics may include Bayesian analysis, nonparametric and semiparametric regression, sequential analysis, bootstrap, statistical methods in high dimensions, reliability, spatial processes, inference for stochastic process, stochastic methods in finance, empirical processes, change-point problems, asymptotics for parametric, nonparametric and semiparametric models, nonlinear time series, robustness. May be repeated for credit with consent of instructor. Not offered every year.—II. (II.)

280. Orientation to Statistical Research (2)

Seminar—2 hours. Prerequisite: consent of instructor. Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member. May be repeated once for credit. (S/U grading only.)—III. (III.)

290. Seminar in Statistics (1-6)

Prerequisite: consent of instructor. Seminar on advanced topics in probability and statistics. (S/U grading only.)—I, II, III. (I, II, III.)

292. Graduate Group in Statistics Seminar (1-2)

Seminar—1-2 hours. Prerequisite: graduate standing. Advanced study in various fields of statistics with emphasis in applied topics, presented by members of the Graduate Group in Statistics and other guest speakers. (S/U grading only.)—III. (III.)

298. Group Study (1-5)**299. Individual Study (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

299D. Dissertation Research (1-12)

Prerequisite: candidate for Ph.D. degree. Research in statistics under the supervision of major professor. (S/U grading only.)

Professional Course**390. Methods of Teaching Statistics (2)**

Lecture/discussion—2 hours; workshop—1 hour. Prerequisite: graduate standing. Training in teaching methodology at the undergraduate level. Emphasis is on practical training exercises which are used to evaluate skills and improve these skills. Lecture exercises will be videotaped and critiqued. (S/U grading only.)—I. (I.)

Professional Course**401. Methods in Statistical Consulting (3)**

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: graduate standing in Statistics. Introduction to consulting; in-class consulting as a group; individual or team consulting under supervision. May be repeated for credit. (S/U grading only.)—II, III. (II, III.)

Rahman Azari, Ph.D., Lecturer (*Statistics*)

Graduate Study. The Graduate Group in Statistics offers programs of study and research leading to the M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Faculty in computer programming is essential for some of the course work. The supervised statistical consulting required of all M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for in-depth concurrent study in an applied field. A Ph.D. program with an emphasis in biostatistics is also offered and overseen by the Biostatistics Affinity Group, a subgroup of the Graduate Group in Statistics. For detailed information contact the Chairperson of the Group or the Graduate Adviser.

Preparation. For admission to the Ph.D. program, course work requirements for the master's degree,

and at least one semester/two quarters of advanced calculus must be completed.

Graduate Adviser. W. Polonik

Courses in Surgical and Radiological Sciences (VSR)

Lower Division Course

99. Special Study for Undergraduates (1-5)
(P/NP grading only.)

Upper Division Course

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.)

Graduate Courses

281. Comparative Vertebrate Exercise Physiology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: graduate student status or consent of instructor. Fundamental mechanisms of vertebrate exercise: Metabolism and energetics, muscle function, locomotor mechanics and oxygen transport and utilization. In addition, mechanisms specific to vertebrate taxa will be considered. Strong emphasis on allometric effects of body size on all of these functions. Offered in alternate years.—(II.) Jones

290. Clinical Neurology/Neuropathology Conference (1)

Seminar—1.5 hours. Prerequisite: third- or fourth-year standing in the School of Veterinary Medicine, Veterinary Medicine Teaching Hospital, or UCDCMC resident or graduate student in appropriate discipline. Discussion and review of neural and muscular pathology of selected cases from the Veterinary Medicine Teaching Hospital. (S/U grading only.)—I, II, III. (I, II, III.) Higgins, LeCouteur

292. Advanced Veterinary Neurology/Neurosurgery (2)

Seminar—4 hours; weekly reading assignments; regular examinations. Prerequisite: House Officer in VMTH, UCDCMC House Officers, graduate students in the School of Veterinary Medicine or School of Medicine, and 4th-year veterinary students with consent of instructor. Lectures/discussions/literature reviews

of diagnosis and medical/surgical treatment of neurological diseases of animals. Relevant neurologic and neurosurgical topics from human medicine will be addressed. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) LeCouteur

296. Small Animal Radiology Case Discussions (1)

Seminar—1 hour. Prerequisite: first or second year standing in the School of Veterinary Medicine or consent of instructor. The role of diagnostic radiology in the clinical setting and student interpretation of radiographs. May be repeated once for credit. (S/U grading only.)—I, II, III. (I, II, III.) Hornof

298. Group Study (1-5)
(S/U grading only.)

299. Research (1-12)
(S/U grading only.)

Professional Courses

401. Small Animal Radiology Case Discussions (1)

Discussion—1 hour. Prerequisite: first-, second-, or third-year standing in the School of Veterinary Medicine. Role of diagnostic radiology in the clinical setting and student interpretation of radiographs. May be repeated once for credit. (S/U grading only.)—I, II, III. Hornof

402. Large Animal Radiology Case Discussions (1)

Discussion—1 hour. Prerequisite: first-, second-, or third-year standing in the School of Veterinary Medicine. The role of diagnostic radiology in the clinical setting and student interpretation of radiographs. May be repeated once for credit. (S/U grading only.)—I, II, III. Hornof

404A. Small Animal Radiology (2.9)

Lecture—17 sessions; discussion—12 sessions. Prerequisite: second year standing in the School of Veterinary Medicine. Introduction to radiographic interpretation as it relates to musculoskeletal, thoracic, and abdominal disorders of small animals. Assignment of unknown cases as practice in interpreting radiographic patterns described in lecture. (Deferred grading only, pending completion of sequence.)—II, III. (II, III.) Nyland

404B. Large Animal Radiology (1.6)

Lecture—12 sessions; discussion—4 sessions. Prerequisite: second year standing in the School of Veterinary Medicine. Orthopedic diseases of the horse and radiographic manifestations of common clinical syndromes known to the lay horseman such as laminitis, navicular disease, bucked shins and spavin. Common radiographic abnormalities in non equine large animal patients. The pharynx and skull of equine patients. Common radiographic patterns seen in both equine and non equine patients seen in large animal practice. Pattern recognition, the most common patterns and their differential diagnosis.—II. (II.) Herrgesell

405. Advanced Small Animal Abdominal Ultrasound (2.2)

Lecture—12 sessions; discussion—6 sessions; laboratory—4 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 406. The use of ultrasound for the diagnosis of common clinical diseases in both the abdomen and thorax. Examination techniques of the thorax and the abdomen covered in the laboratory sessions and examples of the abnormal presented in discussion.—II. Herrgesell

406. Small Animal Diagnostic Ultrasound (1.1)

Lecture—7 sessions; discussion—1 session; laboratory—3 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Ultrasound imaging physics, artifacts, machine controls, techniques of abdominal scanning and basic ultrasonographic anatomy. Lab sessions reinforce topics covered in lecture and provide hands on ultrasound experience.—I. Herrgesell

407R. Comparative Dentistry and Oral Surgery (2)

Discussion—2 hours. Prerequisite: residents in the Veterinary Medical Teaching Hospital; graduate students, veterinarians enrolled in training programs leading to board-certification in veterinary dentistry, AVDC Diplomates and dentists with consent of instructor. Review of current literature pertaining to comparative oral biology, surgery and medicine and related basic sciences; half of sessions based on topics assigned by course leader while other half consist of critical reviews of recent papers chosen by the participants. May be repeated once for credit. (S/U grading only.)—I, II, III. Verstraete

408. Special Procedures Rounds (2)

Discussion—6 hours. Prerequisite: a DVM degree and consent of instructor. Approved for graduate degree credit. Review of selected radiology cases from previous day. Specific radiographic changes and differential diagnosis are discussed, with participants leading the discussions. Special procedures such as angiography; nuclear medicine and ultrasound examinations are reviewed. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

409. Known Case Conference (1.5)

Discussion/demonstration—1.5 hours. Prerequisite: DVM degree and consent of instructor. Approved for graduate degree credit. Film review of current VM Teaching Hospital proven cases. Intended for radiology residents and others with background in diagnostic radiology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

410. Current Topics in Radiological Sciences (1.5)

Lecture—1.5 hours. Prerequisite: DVM degree or consent of instructor. Fundamentals of radiological sciences for radiology residents. Topics will include series of in-depth lectures covering the broad spectrum of veterinary radiology/radiological sciences and related alternate imaging modalities. Clinically oriented but also including relevant research material. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

411R. Small Animal Orthopedics Conference (0.9)

Discussion—9 sessions. Prerequisite: house officers at the Veterinary Medical Teaching Hospital or completion of D.V.M. or equivalent. Graduate students with permission of instructor. Discussion of current cases and literature pertaining to small animal orthopedics. (S/U grading only.)—I, II, III. Schulz

413. Small Animal Dentistry (2.4)

Lecture—19 sessions; discussion—5 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Introduction to the principles of oral examination, pathophysiology and treatment of periodontitis, exodontics, basic oral soft tissue surgery dental emergencies, orthodontics, developmental and regressive dental conditions, endodontics, prosthodontics, advanced periodontal therapy, oral medicine and advanced oral surgery. (S/U grading only.)—I. (I.) Verstraete

415. Lameness in Dogs (1.3)

Lecture—13 hours. Prerequisite: third-year standing in the School of Veterinary Medicine. Discussion of lameness examination will be followed by detailed descriptions of the disorders that cause lameness in dogs and cats and methods to diagnose and treat them effectively. An important goal will be to distinguish those disorders that can be managed by the general practitioner from those that require referral to a specialist.—III. (III.) Vasseur

416. Equine Ultrasonology (1)

Lecture—8 sessions; discussion—2 sessions. Prerequisite: third year standing in the School of Veterinary Medicine. Familiarization with ultrasonographic diagnostic methodology and ultrasonologic features of common diseases of the major equine organ systems.—III. Whitcomb

416L. Equine Ultrasonology Lab (0.4)

Laboratory—4 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and course 416 (concurrently). Ultrasonographic diagnostic methodology and ultrasonologic features of

common diseases of the major equine organ systems.—III. Whitcomb

423. Comparative Ophthalmology (1.5)

Lecture—15 sessions. Prerequisite: Veterinary Medicine 422, third year standing in School of Veterinary Medicine or consent of instructor. The diagnosis and treatment of commonly encountered eye diseases of common domestic animals.—III. Maggs

424. Case Studies in Veterinary Oncology (1)

Lecture—10 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. The internal medicine subspecialty of oncology. Clinical considerations and basic tenets of tumor biology. (S/U grading only.)—I. Madewell

425R. Veterinary Cancer Biology: Clinical Applications (1)

Seminar—10 sessions. Prerequisite: resident in the Veterinary Medical Teaching Hospital or consent of instructor, course 433. Survey of contemporary literature regarding the clinical management of important tumors in domestic animals and focus on diagnosis and treatment. (S/U grading only.)—I. Madewell

426R. Veterinary Cancer Biology: Mechanisms of Disease (1)

Seminar—10 sessions. Prerequisite: resident in the Veterinary Medical Teaching Hospital or consent of instructor, course 433. Survey of contemporary literature regarding the biology of cancer with particular reference to mechanisms underlying tumorigenesis in domestic animals. (S/U grading only.)—III. Madewell

432R. Graduate Veterinary Neurosurgery Seminar (1.5)

Lecture/laboratory—15 sessions. Prerequisite: small animal surgery residency program or the neurology/neurosurgery residency program in the School of Veterinary Medicine. Graduate students and residents in other disciplines with consent of instructor. Overview of the diagnosis and treatment of neurological disease in small animals with an emphasis on neurosurgery. Laboratory sessions allow residents to develop familiarity with anatomical landmarks and the neurosurgical skills necessary to perform a variety of neurosurgical procedures. May be repeated for credit. (S/U grading only.)—II, III. LeCouteur

460. Emergency and Critical Patient Care (2)

Lecture—20 hours. Prerequisite: third-year standing in School of Veterinary Medicine. Introduction to the essential and practical concepts of care for emergency and critically ill patients.—III. (III.) Haskins

461. Management of Small Animal Musculoskeletal Trauma (1.6)

Lecture—16 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and Veterinary Medicine 460. Introduction to principles of small animal orthopedic surgery including: orthopedic anatomy and examination, orthopedic instrumentation, fracture management, traumatic joint disease and traumatic muscle and tendon disease.—II. (II.) Schulz

461L. Small Animal Orthopedic Surgery Laboratory (0.4)

Laboratory—4 hours. Prerequisite: third-year standing in the School of Veterinary Medicine and course 461 concurrently. Hands-on experience in application of external coaptation and basic principles of application of different types of fixation for fractures. (S/U grading only.)—II. (II.) Schulz

462. Radiographic and Ultrasonographic Diagnosis: Small Animal (1.1)

Lecture/discussion—1 hour. Prerequisite: third-year standing in the School of Veterinary Medicine and course 404A. Small radiographic and ultrasonographic case studies discussed in small group setting. Limited enrollment. (S/U grading only.)—III. (III.) Hornof

463. Surgical and Anesthetic Considerations in Small Animal Soft Tissue Surgery (2.2)

Lecture—22 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Pathophysiology and surgical treatment of selected soft tissue diseases.—III. (III.) Gregory

**463A. Soft Tissue Surgical Diseases
Alternative Laboratory (0.4)**

Laboratory—4 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463 (concurrently). Priority given to Small Animal Track students. Laboratory course designed for alternate students to replace course 463L. No anesthesia component. (S/U grading only.)—III. Gregory

463L. Small Animal Soft Tissue Surgery and Anesthesia Laboratory (0.6)

Laboratory—6 hours. Prerequisite: Veterinary Medicine 407, 407L, course 463 concurrently, third year standing in School of Veterinary Medicine. Priority given to Small Animal Track students. Applied surgical anatomy and physiology and operative surgical exercises which cover common emergency surgical procedures. (S/U grading only.)—III. Gregory

464R. Principles of Veterinary Radiation Oncology (2)

Lecture—2 hours. Prerequisite: house officers in the Veterinary Medical Teaching Hospital. Graduate students or veterinary students with consent of instructor. Principles and practice of veterinary radiation therapy. Topics include physical methods of radiation therapy, biological effects of therapeutic radiation and applications in veterinary patients. (S/U grading only.) Offered in alternate years.—I. Theon

465R. Biology and Practice of Veterinary Radiation Oncology (2)

Lecture—2 hours. Prerequisite: house officers in the Veterinary Medical Teaching Hospital. Graduate students or veterinary students with consent of instructor. Principles and practice of veterinary radiation therapy. Topics include physical methods of radiation therapy, biologic effects of therapeutic radiation and applications in veterinary patients. (S/U grading only.) Offered in alternate years.—II. Theon

466. Mixed-Species Applied Anesthesiology (1.5)

Lecture—15 sessions. Prerequisite: third-year standing in School of Veterinary Medicine or consent of instructor. Applied clinical anesthesiology. Special techniques and consideration for anesthetizing a variety of species including horses, swine, ruminants, large non-domestic species, cats and dogs.—II. (II.) Hildebrand

467. Small Animal Anesthesiology (1.5)

Lecture—15 hours. Prerequisite: third-year standing in School of Veterinary Medicine or consent of instructor. Approved for graduate degree credit. Presentation of material which is basic to safe clinical administration of anesthetic drugs to small animals. Clinical applications, indications and contraindications, and methods of use of common anesthetic drugs and techniques will be discussed.—II. (II.) Ilkiw

468. Equine Lameness and Radiology (4)

Lecture—40 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Principles for the clinical evaluation and radiographic interpretation of lameness disorders of the fore- and hindlimbs of horses. Methods used in large-animal radiography and the latest techniques for managing and treating equine lameness. Anatomy and pathology of some areas of the musculoskeletal system.—III. (III.) MacDonald, Galuppo

468L. Equine Lameness and Radiology Laboratory (1.1)

Laboratory—11 sessions. Prerequisite: course 468 concurrently, third-year standing in School of Veterinary Medicine. Focus on clinical gait evaluation, and various diagnostic strategies for localizing lameness disorders in the fore- and hindlimbs of horses. Radiographs from clinical cases. Clinical evaluation and treatment of various disorders of the foot. Equine chiropractic and acupuncture therapy.—III. (III.) Galuppo, MacDonald

469. Equine Surgery (3)

Lecture—30 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Appropriate methods of diagnosis for surgical diseases, an understanding of different treatment options, and development of a framework for establishing a prog-

nosis for the disease considering particular uses of horses.—II. (II.) Pascoe

469L. Equine Surgery Laboratory (1.4)

Laboratory—8 sessions; discussion—6 sessions. Prerequisite: course 469 concurrently, third-year standing in School of Veterinary Medicine. Common equine surgical procedures and other techniques useful in equine practice. (S/U grading only.)—II. (II.) Van Hoogmoed

481R. Clinical Soft Tissue Surgery Conference (1)

Discussion—1 hour. Prerequisite: open to students with D.V.M. or equivalent degree who are residents in specialty training. Graduate students in a related discipline with consent of instructor. Review current medical literature and discuss presentation, diagnosis and treatment of small animal surgical conditions, review the morbidity and mortality of clinical cases and provide mock examinations in preparation for ACVS specialty boards. May be repeated for credit. (S/U grading only.)—I, II, III. Kyles

485. Equine Exercise Physiology and Sports Medicine (1)

Lecture—10 sessions. Prerequisite: second-year standing in School of Veterinary Medicine. Physiologic basis of equine athletic performance including metabolism, muscle function, cardiopulmonary transport, locomotor mechanics as well as major disease processes associated with racing, e.g., orthopedic injuries. (S/U grading only.)—II. (II.) Jones

491. Anesthesia/Critical Care Basic Science Conference (1)

Discussion—1 hour. Prerequisite: postdoctoral, medical, or graduate student; consent of instructor. Advanced course in scientific foundations of animal anesthesia and critical care. Format is directed by discussion following reading of assigned material emphasizing foundations in pharmacology and physiology. (S/U grading only.)—I, II, III. (I, II, III.)

493. Anesthesia/Critical Care Case Management Conference (1)

Discussion—1 hour. Prerequisite: postdoctoral, medical or graduate student; consent of instructor. Discussion of Veterinary Medical Teaching Hospital case material to illustrate specific medical problems and their preventive and corrective management. (S/U grading only.)—I, II, III. (I, II, III.)

Blake Stimson, Ph.D. (*Art History*)
Kathryn Sylva, M.F.A. (*Design*)

The Program of Study

The Program in Technocultural Studies is an interdisciplinary initiative bridging the arts, humanities, technology and the sciences. The program integrates new research in cultural history and theory with innovative production in digital media and wherever performance, music, visual arts, writing and media engage science and technology.

Patricia A. Turner, Ph.D., Professor (*African American and African Studies*)

Graduate Study. The Graduate Group in Textiles offers a program of study and research leading to the M.S. degree. Students in the program can emphasize either the physical or behavioral science aspects of textiles. Research areas include chemical, physical, biochemical, and mechanical properties of fibers and polymers as well as fibrous assemblies, including composites, paper, and non-wovens; and psychological and sociological factors relating to perception and consumption of textiles and apparel. Extensive specialized fiber, polymer, and textiles research facilities and a behavioral research laboratory are available. For detailed information regarding the program, address the Chairperson of the Group.

Graduate Adviser. N. Pan (Textiles and Clothing).

The Major Program

The textiles and clothing major emphasizes the connections among (a) the physical characteristics of textile products, (b) human perceptions of and behavior toward these products, and (c) global economic trends affecting the textile/apparel marketplace. An integrative knowledge base links textile products with people and processes, to focus on the production, distribution, and consumer use of textiles and apparel. (See also Fiber and Polymer Science.)

The Program. The textiles and clothing major offers two options: textile science and marketing/economics. The *Textile Science* option provides students with a broad knowledge base in both the social and physical sciences. This base includes production, end-use applications and care of textiles and apparel, physical and chemical properties of textiles, and social-psychological and economic aspects of textiles and clothing. The *Marketing/Economics* option emphasizes social science and business course work, while also providing students with an awareness of the physical nature of textile products.

Internships and Career Alternatives. Textiles and clothing majors can pursue internships and careers in apparel production and merchandising, retail management, international marketing, textile testing and conservation, and textiles journalism. The majority of textiles and clothing graduates accept entry-level management and technical positions within the textile and apparel industry or in related fields, (e.g., merchandising and marketing, production, research and development, technical service and design). Students may also pursue graduate studies in textiles, business, and other areas depending on their specific selections of restricted elective course work.

B.S. Major Requirements:

	UNITS
English Composition Requirement	4-12
See College Requirement	0-8
Communication 1	4
Preparatory Subject Matter	43-45
Agricultural Management and Rangeland Resources 21 or Computer Science Engineering 15 or 30	3-4
Economics 1A-1B.....	10
Anthropology 2, Science and Society 1, Art History 1A, 1B, 1C, or 1D.....	4
Physics 1A or 10	3-4
Psychology 1	4
Sociology 2.....	4
Statistics 13	4
Textiles and Clothing 6, 7, 8.....	12

Breadth/General Education.....**6-24**
Satisfaction of General Education require-
ment

Select one of the following two options:

Marketing/Economics Option

**Additional Preparatory Subject Matter for the
option**.....**18-19**
Management 11A-11B

Chemistry 10 or 2A

Courses in Textiles and Clothing (TXC)

Questions pertaining to the following courses should be directed to the instructor or to the Division of Textiles and Clothing. See also courses in Fiber and Polymer Science.

Lower Division Courses

6. Introduction to Textiles (4)
Lecture—3 hours; laboratory—3 hours. Introduction to the structure and properties of textiles. Consumer use and fabric characteristics are emphasized. GE credit: SciEng.—I. (I.) Sun

7. Style and Cultural Studies (4)
Lecture/discussion—3 hours; discussion/labora-
tory—1 hour. The multiple and overlapping influ-
ences of gender, sexuality, ethnicity, and class on
constructions of identity and community are explored
through the study of style in popular culture and
everyday life. Continuity and change in clothing and
appearance styles are interpreted. GE credit: Soc-
Sci, Div, Wrt.—III. (III.) Kaiser, Chandler

8. The Textile and Apparel Industries (4)
Lecture—4 hours. Study of the textile and apparel
industries including fashion theory, production, distri-
bution, and consumption of textile goods. GE credit:
SocSci, Div.—II. (I.) Rucker

92. Internship in Textiles and Clothing (1-12)
Internship—3-36 hours. Prerequisite: consent of
instructor. Work experience off campus in a textiles
or clothing-related area. Supervision by a member of
the Textiles and Clothing faculty. (P/NP grading only.)

98. Directed Group Study (1-5)
Prerequisite: consent of instructor. (P/NP grading
only.)

**99. Special Study for Lower Division Students
(1-5)**
(P/NP grading only.)

Upper Division Courses

**107. Social and Psychological Aspects of
Clothing (4)**
Lecture—3 hours; discussion—1 hour. Prerequisite:
Sociology 2. Social and cognitive factors influencing
management and perception of personal appear-
ance in everyday life. Concepts and methods appro-
priate to the study of meaning of clothes in social
and cultural contexts. GE credit: SocSci, Div, Wrt.—I.
(I.) Kaiser, Chandler

162. Textile Fabrics (3)
Lecture—3 hours. Prerequisite: course 6. Properties
of fabrics as related to serviceability, comfort, and
appearance. GE credit: SciEng.—III. (III.) Pan

162L. Textile Fabrics Laboratory (1)
Laboratory—3 hours. Prerequisite: course 162 (may
be taken concurrently). Laboratory methods and pro-
cedures employed in studying properties of textile
fabrics as related to serviceability, comfort, and
appearance.—III. (III.) Pan

163. Textile Coloration and Finishing (3)
Lecture—3 hours. Prerequisite: course 6, Fiber and
Polymer Science 110, or Chemistry 8B. Basic princi-
ples of textile dyeing, printing, and finishing; color
theory; structure, properties, and application of dyes
and finishes; factors affecting application and fast-
ness; maintenance of dyed and finished textiles.—III.
(III.) Sun

163L. Textile Coloration and Finishing Laboratory (1)

Laboratory—3 hours. Prerequisite: course 163 (may be taken concurrently). Demonstrates various aspects of dyeing, printing, and finishing of textile substrates including the effect of fiber and finish type, and physical and chemical variables on dyeing and finishing processes and on the properties of the resultant textile.—III. (III.) Sun

164. Principles of Apparel Production (3)

Lecture—3 hours. Prerequisite: course 6 or 8. Overview of characteristics, technology, processes, and research in apparel manufacturing industries including study of government statistics, material utilization and fabrication, mechanization, management, and production engineering.—II. (II.) Chandler

165. Textile Processes (3)

Lecture/discussion—3 hours. Prerequisite: course 6. Physical processes involved in the production of textiles from the individual fiber to the finished fabric. Includes spinning, texturing, yarn formation, weaving preparation, weaving and knitting, tufting and fabric finishing.

171. Clothing Materials Science (4)

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 6, 8, and senior standing. The properties, characterization, and performance evaluation of clothing materials and structures for specific functional applications. Principles and methods related to wetting and transport properties, fabric hand and aesthetic properties, clothing comfort, and material and assembly technology.—(II.)

173. Principles of Fashion Marketing (3)

Lecture—3 hours. Prerequisite: course 8, Economics 1A, Agricultural and Resource Economics 113 or 136. Study of basic elements of fashion marketing including philosophy and objectives, organization, merchandising, pricing, promotion and personnel. Offered in alternate years.—II. Rucker

174. Introduction to World Trade in Textiles and Clothing (3)

Lecture—3 hours. Prerequisite: course 8. Structure of the global fiber/textile/apparel complex and its distribution patterns with an overview of political, economic, and technological factors that are changing these industries and their markets. Issues of race, ethnicity, and gender are highlighted throughout. Offered in alternate years. GE Credit: SocSci, Div.—(II.) Rucker

180A-180B. Introduction to Research in Textiles (2-2)

Laboratory—6 hours. Prerequisite: senior standing with textile-related major, and consent of instructor. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.)

192. Internship in Textiles and Clothing (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

197T. Tutoring in Textiles and Clothing (1-5)

Discussion/laboratory—3-15 hours. Prerequisite: upper division textiles-related major and consent of instructor. Tutoring of students in Textiles and Clothing courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another textiles course. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

230. Behavioral Science Concepts in Textiles (3)

Lecture—3 hours. Prerequisite: course 107, upper division or graduate course in statistics (e.g., Agricultural Management and Rangeland Resources

120) and one in a behavioral science (e.g., Psychology 145). Examination of theories and research concerning relationships between clothing and human behavior with emphasis on research techniques, including methods of measuring clothing variables. Offered in alternate years.—I. Kaiser

290. Seminar (1)

Seminar—1 hour. Critical review of selected topics of current interest in textiles. (S/U grading only.)—I, II. (I, II.)

290C. Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing; consent of instructor. Individual faculty members meet with their graduate students. Critical presentations of original research are made by graduate students. Research activities are planned. Discussions are led by major professors for their research groups. (S/U grading only.)—I, II, III. (I, II, III.)

293. Recent Advances in Textiles (3)

Lecture—3 hours. Prerequisite: two upper division courses in Textiles and Clothing or consent of instructor. Critical reading and evaluation on selected topics of current interest in textiles. Multidisciplinary aspects of the topics selected will be stressed. May be repeated for credit.—(II.)

298. Group Study (1-5)

299. Research (1-12)

(S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Major Program

The A.B. degree in Dramatic Art provides students with an appreciation for and understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theater, dance performance, and production. Students build significant skills in specific areas as well as achieving a broad knowledge of theatre, dance and film.

Productions and Facilities. Each year's schedule includes undergraduate festivals in theatre, dance, and film; opportunities to work with professional directors and choreographers in three main stage productions; and performance projects and established scripts developed by M.F.A students. These productions take place on our proscenium (Main), thrust (Wyatt), arena (University Club) stages as well as in the Mondavi Center's Studio Theatre and Jack-

son Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

Dramatic Art

A.B. Major Requirements:

Theatre Emphasis

UNITS

Preparatory Subject Matter	33
Dramatic Art 20, 24, 25, 26	14
Dramatic Art 21A or 14.....	4
Choose 4 units from Dramatic Art 21B, 40A, 40B, 41A, 41B, 98, 99, African American and African Studies 51 or courses in other departments with departmental approval	4
Dramatic Art 30	11
Participation in at least two of the following areas: acting/dance; directing/choreography/playwriting; stage management/dramaturgy; design/studio/technical production; and crew assignments for a minimum of two productions which may include stage management, fly crew, stage running crew, props, running crew, lighting board operator, follow spot operator, sound board operator, costume running crew, dresser, make-up	
Depth Subject Matter	45-47
Dramatic Art 156A, 156B, 156C	12
One course from Dramatic Art 124A, 124B, 124C, 124D	4
One course from Dramatic Art 150, 154, 155, 155A, 159	4
One course from Dramatic Art 121A, 121B, 122A, 122B, 141, 143	3-4
One course from Dramatic Art 126, 127A, 127B, 140A, 160A	3-4
A minimum of 10 units chosen from the following: Dramatic Art 121A, 121B, 122A, 122B, 124A, 124B, 124C, 124D, 125, 126, 127A, 127B, 130, 140A, 141, 143, 150, 154, 155A, 159, 160A, 160B, 170	10
Dramatic Art 180	9
Participation in University Theatre in at least two of the following areas: acting/dance; directing/choreography/playwriting/stage management/dramaturgy; design/studio/technical production; and crew assignments for a minimum of two productions which may include stage management, fly crew, stage running crew, props, running crew, lighting board operator, follow spot operator, sound board operator, costume running crew, dresser, make-up	
Total Units for the Major	78
Dance Emphasis	
	UNITS
Preparatory Subject Matter	28
Dramatic Art 14, 24, 26	11
Choose 10 units from Dramatic Art 21A, 40A, 40B, 41A, 41B, 42A, 42B, 44A, 44B, African American and African Studies 51	12
Dramatic Art 30 (crew)	4
Dramatic Art 30 (performance)	3
Depth Subject Matter	45
Dramatic Art 140A, 140B, 140C, 141, 145	19
Choose 19 units from African American and African Studies 155, Dramatic Art 142, 143, 154, 155, 156C, 159, Music 107A, Native American Studies 125	19
Dramatic Art 124C, 126	7
Total Units for the Major	73
Major Adviser.	

Minor Program Requirements:

	UNITS
Dramatic Art	22
One course from Dramatic Art 20, 21A, 24, 25, 26	3-4
Two courses chosen from Dramatic Art 156A, 156B, 156C	8
Two courses chosen from Dramatic Art 121A, 121B, 122A, 122B, 124A, 124B, 124C, 124D, 125, 126, 127A, 127B, 130, 140A, 141, 142, 143, 150, 154, 155, 155A, 159, 160A, 160B, 170	6
Dramatic Art 180	5
Participation in University Theatre in at least two of the following areas:	
acting/dance; directing/choreography/playwriting/stage management/dramaturgy; design/studio/technical production; and crew assignments for a minimum of one production which may include stage management, fly crew, stage running crew, props, running crew, lighting board operator, follow spot operator, sound board operator, costume running crew, dresser, make-up	

Transfer Students. As described above, all students completing a major in Dramatic Art must participate in dramatic productions, including work in at least three of the following four areas: acting/dance, design, studio (scenic, costume, lighting, painting, props, sound), directing/playwriting/stage management. Such experience gained prior to transfer to UC Davis may count toward partial satisfaction of this requirement; transfer students should see the major adviser for an evaluation of your previous experience. While in residence at UC Davis, transfer students are required to participate in a minimum of five dramatic productions and that participation must include work in at least three of the four areas specified above, as well as running crew.

Guest Artists. The Granada Visiting Artists Program brings distinguished professional artists to the campus each year, to be in residence for a quarter. These working professional artists interact closely with students in the classroom and rehearsal halls and provide them excellent pre-professional experiences of theater practice.

Graduate Study. The Department of Dramatic Art offers programs of study and research leading to the M.F.A. (acting, directing, design, choreography) and Ph.D. (performance and culture) degrees. Detailed information may be obtained by contacting the Graduate Adviser.

Graduate Advisers. _____.

Courses in Dramatic Art (DRA)

Lower Division Courses

1. Theatre, Performance and Culture (4)

Lecture—3 hours; discussion—1 hour. Introductory investigation of the nature of all performance, moving from performance theory to consideration of various manifestations of performance including theater, film and media, dance, sports, political rallies and demonstrations, religious celebrations, civic pageants and "occasions." Investigation of the border between ritual and performance. GE credit: ArtHum.—I, II, III. (I, II, III.)

10. Introduction to Acting (3)

Laboratory/discussion—4 hours; term paper. Fundamentals of movement, speech, theatre games, and improvisation. Selected reading and viewing of theatre productions. Intended for students not specializing in Dramatic Art.—I, II, III. (I, II, III.)

14. Introduction to Contemporary Dance (4)

Lecture—3 hours; laboratory—3 hours. Introduction to basic issues and methods in contemporary dance. Focus on preparing the student for dancing and dance-making through basic techniques of improvisation and composition. Consideration of

dance as a cultural practice.—I, II, III. (I, II, III.) Foster, Bolden

20. Introduction to Dramatic Art (4)

Lecture—3 hours; discussion—1 hour. Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts. GE credit: ArtHum.—I, II, III. (I, II, III.)

21A. Fundamentals of Acting (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 20. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of theatre productions. Limited to those planning to major in Dramatic Art.—I, II. (I, II.)

21B. Fundamentals of Acting (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 21A and consent of instructor. Theory and practice of acting with emphasis on character analysis, interpretation, and development. Acting in a student-directed project. Viewing of theatre productions. Limited to those planning to major in Dramatic Art.—II, III. (II, III.)

24. Visual Aspects of Dramatic Art (4)

Lecture—3 hours; laboratory—2 hours. Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup.—I. (I.)

25. Technical Aspects of Dramatic Production (3)

Lecture—3 hours. Technical principles of dramatic production emphasizing the three areas of scenic, costume and lighting studios. Subjects covered include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production.—II. (II.)

26. Performing Arts Production Management (3)

Lecture—3 hours. Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction, audience control, box office, promotion, safety, accommodations for persons with disabilities and emergency procedures.—I. (I.) Winn

30. Theatre Laboratory (1-5)

Prerequisite: course 25 or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit up to a total of 8 units.—I, II, III. (I, II, III.)

40A. Beginning Modern Dance (2)

Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated once for credit with consent of instructor.—I, II, III. (I, II, III.) Bolden

40B. Intermediate Modern Dance (2)

Laboratory/discussion—4 hours. Prerequisite: course 40A. Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history. May be repeated once for credit with consent of instructor.—I, II, III. (I, II, III.)

41A. Beginning Jazz Dance (2)

Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated once for credit with consent of instructor.—II, III. (II, III.) Bolden

41B. Intermediate Jazz Dance (2)

Laboratory/discussion—4 hours. Prerequisite: course 41A. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of

historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated once for credit with consent of instructor.—II, III. (II, III.) Bolden

42A. Beginning Ballet (2)

Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated once for credit with consent of instructor.—II. (II.)

42B. Intermediate Ballet (2)

Laboratory/discussion—4 hours. Prerequisite: course 42A or consent of instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated once for credit with consent of instructor.—II. (II.)

44A. Beginning Hip Hop Dance (2)

Laboratory/discussion—4 hours. Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated once for credit.—I. (I.)

44B. Intermediate Hip Hop Dance (2)

Laboratory/discussion—4 hours. Prerequisite: course 44A or consent of instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences. May be repeated once for credit.—III. (III.)

98. Directed Group Study (1-5)

Primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

Upper Division Courses

115. Advanced Study of Major Film Makers (4)

Lecture/discussion—3 hours; film viewing—2 hours. Prerequisite: course 15. Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films. May be repeated for credit when different film creator studied.

121A. Advanced Acting: Mask, Myth, and Tragedy (4)

Lecture/laboratory—6 hours. Prerequisite: course 21B and consent of instructor. Theory and practice of acting focused on the performance skills necessary to enact verse plays. Specific concentration on language as vocal and physical metaphor. Offered in alternate years.—(II.)

121B. Advanced Acting: Comedy from Farce to Manners (4)

Lecture/laboratory—6 hours. Prerequisite: courses 21B, 121A and consent of instructor. Theory and practice of acting in comic plays. Specific issues addressed will be comic characterization, physical mask, and timing. Offered in alternate years.—(III.)

122A. Advanced Acting: Realism (4)

Lecture/laboratory—6 hours. Prerequisite: course 21B and consent of instructor. The issues of Stanislavski realism are explored through selected plays. Script analysis using improvisation and emotional scoring. Offered in alternate years.—II.

122B. Advanced Acting: Non-Realism (4)

Lecture/laboratory—6 hours. Prerequisite: courses 21B, 122A and consent of instructor. Exploration of the acting techniques needed to perform a non-realistic script. Different avant-garde movements will be examined through performance of the scripts. Offered in alternate years.—III.

124A. Principles of Theatrical Design: Scenery (4)

Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Scene design processes, work-

ing drawings, sketching techniques, scale models, methods and materials of scenery construction.—I. (I.)

124B. Principles of Theatrical Design: Scenery (4)

Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays.—(III.)

124C. Principles of Theatrical Design: Lighting (4)

Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Theories of lighting the stage, equipment and control systems, execution of lighting plots.—II. (II.) Winn

124D. Principles of Theatrical Design: Costume (4)

Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern and period plays.—II. (II.)

125. Scenic Painting: Studio (4)

Lecture—2 hours; studio—3 hours; laboratory—3 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio, or Design; or course 24 or 25, or consent of instructor. Scene painting techniques, practices and materials. Course satisfies production requirement in studio category. May be repeated once with consent of instructor. Offered in alternate years.

126. Principles of Performing Arts Stage Management (3)

Lecture/discussion—2 hours; laboratory—3 hours. Prerequisite: course 20, 24, 25, 26 or the equivalent or consent of instructor. Stage management principles for theatre, dance, musical theatre, music, and concerts. The dynamical role of the stage manager in the performing arts, upper-management team.—II. (II.)

127A. Principles of Directing (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: courses 21A, 26; two of 156A, 156B, 156C; or consent of instructor. The director's creative approach to the play and to its staging.—I. (I.) Anderson

127B. Principles of Directing (4)

Lecture—2 hours; laboratory—4 hours; rehearsal. Prerequisite: course 127A and consent of instructor for non-majors. The director's creative approach to the actor.—III. (III.) Anderson

130. Approaches to Theatrical Design: Practice and Theory (4)

Seminar—2 hours; studio—4 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio or Design. Advanced scenic design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres. Course satisfies Dramatic Art production requirement in Design. Offered in alternate years.

140A. Dance Composition (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 40A, 41A, and 42A, or consent of instructor. Introduction to the craft of choreography. Students will compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy.—II. (II.) Bolden

140B. Dance Composition (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 140A. Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment.—III. (III.) Bolden

140C. Dance Composition (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 140A, 140B. Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it

through creation of short dance studies.—I. (I.) Bolden

141. Introduction to the Fundamentals of Movement (3)

Lecture/discussion—3 hours. Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of body mind specialists Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga.—I. (I.) Sellers-Young

142. History of Modern Dance (5)

Lecture—3 hours; laboratory—3 hours; extensive writing. The Modern Dance tradition in the U.S., focusing on its theorizations of individual and social identity. Students will write and choreograph analyses of principle dances in this tradition. Offered in alternate years.

143. Dance and Movement Studio (1-4)

Laboratory/discussion—2-8 hours. Prerequisite: course 14 or consent of instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions. May be repeated for credit for a total of 8 units.

145. Directed Choreography Projects (4)

Lecture/laboratory—6 hours. Prerequisite: courses 140A, 140B, 140C or consent of instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals.—III. (III.)

150. American Theatre and Drama (4)

Lecture—4 hours. The history of the theatre from Colonial times to the present. Readings of selected plays. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I.

154. Asian Theatre and Drama: Contexts and Forms (4)

Lecture/discussion—4 hours. Prerequisite: upper division standing. Selected Asian plays and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; intercultural performance—the fusion of Asian and Western traditions. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(II.) Sellers-Young

155. Representing Race in Performance (4)

Lecture—4 hours. Examination of how "race" is represented and performed in American culture. Course will feature different sub-headings such as "African American Theatre" or "Asian-Americans on Stage." May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II.

155A. African American Dance and Culture in the United States, Brazil and the Caribbean (4)

Lecture/discussion—4 hours. A comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as African American and African Studies 155A.) Offered in alternate years.—I. Bolden

156A. History of Theatre and Dance: Ancient to 1650 (4)

Lecture—4 hours. Overview of theatre and dance as it has come to be recognized in ancient societies through to 1650. Performance traditions studied include Greek, Indian, Aztec, Roman, Japanese (Noh), through the Renaissance. GE credit: ArtHum, Div, Wrt.—III. (III.)

156B. History of Theatre and Dance: 1650-1900 (4)

Lecture—4 hours. Overview of theatre and dance between 1650 and 1900. Dance and theatre are related to the specific social and political organizations of court society in 17th and 18th century France, Germany and England, and to Japanese society. GE credit: ArtHum, Div, Wrt.—I. (I.)

156C. History of Theatre and Dance: The Twentieth Century (4)

Lecture—4 hours. Overview of theatre and dance in the twentieth century. Although largely focused on Western theatrical practices, the relationship between East and West performance practices will be studied and contemporary Japanese theatre will be included. GE credit: ArtHum, Div, Wrt.—II. (II.)

159. Contemporary Experimental Theatre and Drama (4)

Lecture—4 hours. Examination and evaluation of the "New Theatre." Course includes attending theatre events. May be repeated once with consent of instructor.—II.

160A-160B. Principles of Playwriting (4-4)

Lecture/seminar—4 hours. Prerequisite: two courses in Dramatic Art or related courses in other departments; course 160A prerequisite for 160B or consent of instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays.

170. Media Theatre (3)

Lecture—1 hour; rehearsal—2 hours; performance—1 hour. Prerequisite: upper division standing in Dramatic Art, Music, Art Studio, Design, Computer Science, or Engineering; Computer Science, or consent of instructor. New media and application of theatre design and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation. May be repeated once for credit.

180. Theatre Laboratory (1-5)

Prerequisite: upper division standing and course 25, or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit.—I, II, III. (I, II, III.)

192. Internship in Dramatic Art (1-12)

Internship—3-36 hours. Prerequisite: upper division or graduate work in dramatic art; upper division course related to the project; consent of instructor and Department Chairperson. Internship outside the academic department enabling students to practice their skills. May be repeated for credit for a total of 12 units. (P/NP grading only.)

194HA-194HB. Special Study for Honors Students (3-3)

Independent study—9 hours. Prerequisite: qualification for Letters and Science Honors Program and admission to Dramatic Art Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Dramatic Art. (Deferred grading only, pending completion of sequence).

197T. Tutoring in Dramatic Art (1-5)

Tutoring—1-5 hours. Prerequisite: upper division or graduate standing with major in dramatic art; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

200. Methods and Materials in Theatre Research (4)

Seminar—3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.

211. Advanced Voice and Speech (2)

Laboratory—4 hours. Open to advanced undergraduates with consent of instructor. Voice production and speech related to specific acting problems in classical plays, particularly in verse. May be repeated for credit.—I, II, III. (I, II, III.)

212. Advanced Stage Movement (3)

Laboratory—6 hours. Prerequisite: graduate standing in the MFA Program. The application of modes of exploration, breath placement, and the use of imagery as well as Laban's effort/shape system as a method of analysis in classic and modern plays. Open to advanced undergraduates by consent of instructor. May be repeated for credit.—I, II, III. (I, II, III.)

221. Special Problems in Advanced Acting (4)

Seminar—2 hours; laboratory—4 hours. Prerequisite: consent of instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit.—I, II. (I, II.)

228. Seminar in Directing Theory: Non-Realism (4)

Seminar—3 hours; term paper. Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays—Greek to the present; emphasis on textual analysis. Offered in alternate years.

229. Special Problems in Directing (5)

Seminar—2 hours; laboratory—2 hours; rehearsal—4 hours. Prerequisite: consent of instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated for credit.—I, II, III. (I, II, III.)

250. Modern Theatre (4)

Seminar—3 hours; term paper. The theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced. Offered in alternate years.

251. Scoring and Scripting in Performance (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. The process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists' "scores" will layer and transform the "script" into performance for specific time, place, spectators. Offered in alternate years.—II.

252. Performance: Concepts of Space, Place, and Time (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Innovative theories of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consideration of various tempi from music and movement. Offered in alternate years.—I.

253. Approaches to Collaboration (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Exploration of different approaches to collaboration among artists in different media and their influence on the creative process. Offered in alternate years.

254. Performing Identities/Personae (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Historical and contemporary theories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual orientation. Offered in alternate years.

255. Composition in the Arts (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Examine manner in which specific elements utilized by actors, dancers, directors, choreographers, and designers are combined or related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products. May be repeated once for credit.—III.

259. Topics in Contemporary Theatre and Performance (4)

Seminar—3 hours; term paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship (e.g., "Brecht and After," "British The-

ater," "Race and Gender in Performance." May be repeated five times for credit.—I.

265A. Theory of Dramatic Art: Modes of Production (4)

Seminar—3 hours; term paper. Introduces students to literature of theatrical practice, cultural and aesthetic theory, as related to practical stage performance. Offered in alternate years.—I.

265B. Theory of Dramatic Art: Signification and the Body (4)

Seminar—3 hours; term paper. Introduce students to analysis of the body in performance, drawing on theoretical models from various fields. Offered in alternate years.—II.

265C. Theory of Dramatic Art: Technologies of Difference (4)

Seminar—3 hours; term paper. Introduce students to history, theory, practice of staging social and cultural difference. Offered in alternate years.

265D. Theory of Dramatic Art (4)

Seminar—3 hours; term paper. Theory and aesthetic principles of dramatic art as a fine art. Offered in alternate years. (Former course 265.)

280. Theatre Laboratory (1-12)

Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit.—I, II, III. (I, II, III.)

298. Group Study (1-5)

Prerequisite: consent of instructor.

299. Individual Study (1-12)

(S/U grading only.)

299D. Dissertation Research (1-12)

(S/U grading only.)

Professional Course**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Professional Course**413. Stage Make-up (1)**

Lecture/laboratory—2 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up.—II. (II.)

Transportation Technology and Policy (A Graduate Group)

Patricia L. Mokhtarian, Ph.D., Chairperson of the Group

Group Office, 2028 Academic Surge (530-752-0247)

World Wide Web: <http://www.its.ucdavis.edu>

Faculty

Ralph C. Aldredge, III, Ph.D., Associate Professor (Mechanical and Aeronautical Engineering)

Dan Chang, Ph.D., Professor (Civil and Environmental Engineering)

Y. Hossein Farzin, Ph.D., Associate Professor (Agricultural and Resource Economics)

Robert Feenstra, Ph.D., Professor (Economics)

Mark Francis, M.L.A., Professor (Landscape Architecture)

Andrew A. Frank, Ph.D., Professor (Mechanical and Aeronautical Engineering)

Joanna R. Groza, Ph.D., Professor (Chemical Engineering and Materials Science)

Susan Handy, Ph.D., Associate Professor (Environmental Science and Policy)

John T. Harvey, Ph.D., Assistant Professor (Civil and Environmental Engineering)

Robert A. Johnston, M.S., Professor (Environmental Science and Policy)

Ian Kennedy, Ph.D., Professor (Mechanical and Aeronautical Engineering)

Michael Kleeman, Ph.D., Assistant Professor (Civil and Environmental Engineering)

Emilio Laca, Ph.D., Assistant Professor (Agronomy and Range Science)

Patricia L. Mokhtarian, Ph.D., Professor (Civil and Environmental Engineering)

Janet Momsen, Ph.D., Professor (Human and Community Development)

Debbie A. Niemeier, Ph.D., Associate Professor (Civil and Environmental Engineering)

Ahmet Palazoglu, Ph.D., Professor (Chemical and Materials Science Engineering)

Bahram Ravani, Ph.D., Professor (Mechanical and Aeronautical Engineering)

David M. Rocke, Ph.D., Professor (Graduate School of Management)

Paul Sabatier, Ph.D., Professor (Environmental Science and Policy)

Seymour Schwartz, Ph.D., Professor (Environmental Science and Policy)

Daniel Sperling, Ph.D., Professor (Civil and Environmental Engineering, Environmental Science and Policy)

Pieter Stroeve, Sc.D., Professor (Chemical Engineering and Materials Science)

Steven Velinsky, Ph.D., Professor (Mechanical and Aeronautical Engineering)

Michael Zhang, Ph.D., Assistant Professor (Civil and Environmental Engineering)

Emeriti Faculty

Myron "Mike" Hoffman, Professor Emeritus

Affiliated Faculty

Rahman Azari, Ph.D., Lecturer (Statistics)

Andrew F. Burke, Ph.D., Research Engineer (Institute of Transportation Studies)

Mark A. Delucchi, Ph.D., Research Ecologist (Institute of Transportation Studies)

Ryuichi Kitamura, Ph.D., Research Engineer (Institute of Transportation Studies)

Kenneth S. Kurani, Ph.D., Research Engineer (Institute of Transportation Studies)

Robert Moore, Ph.D., Research Associate (Institute of Transportation Studies)

Tom Turrentine, Ph.D., Research Anthropologist (Institute of Transportation Studies)

Graduate Study. The Graduate Group in Transportation Technology and Policy offers the M.S. (Plan I—thesis; and Plan II—exam), and Ph.D. degrees in two areas of specialization: *Transportation Technology*; and *Transportation Planning and Policy*. The technology track is for students trained in engineering and the physical sciences and interested in systems-level planning, analysis, management and design of advanced technologies (emphasizing vehicle propulsion and "intelligent transportation system" technologies) focusing on energy and environmental issues. The planning and policy track is aimed at students from a wider range of disciplines interested in the broader public policy issues concerning transportation systems. The curriculum for both tracks includes courses in civil, mechanical, and environmental engineering, economics, policy sciences, statistics, travel behavior, management, technology assessment and environmental studies.

Preparation. Applicants will normally be expected to have completed two courses in calculus, one course in linear algebra, and one course each in calculus level statistics and microeconomics. Additionally, students entering the technology track will need either to have an appropriate technical background or make up a relatively large number of prerequisite courses in order to be able to take the approved courses in that track.

Program of Study. Students will have the option of following either a technology or policy/management track. The core courses are required of all students in both degrees and both tracks. M.S. students take between 15 and 20 units from a common set of core

courses, and Ph.D. students take 24–32 units from the same core. Master's degrees require a minimum of 36 quarter units and doctoral degrees require a minimum of 54 units (of which, 21 units beyond the core must be in the chosen track, and 9 must be in the other track). M.S. Plan I students may replace up to 6 units of regular course work with research (course 299) units. At least two thirds of all credits must be at the graduate level.

Graduate Adviser: P.L. Mokhtarian.

Curriculum

Core Courses. Students in each track are required to take courses in a common set of core competencies, as well as some courses in the other track.

Research Methods core courses: M.S. students take one of Transportation Technology and Policy 200, Environmental Science and Policy 278, Management 249; Policy Ph.D. students also take one of Civil and Environmental Engineering 254, Agricultural and Resource Economics 252, 256, Agronomy 206; Technology Ph.D. students also take one of Agronomy 205, Statistics 205, Biological Sciences Engineering 265.

Transportation Modeling/Analysis core courses: M.S. students take one of Civil and Environmental Engineering 251, 256; Ph.D. students take both.

Policy Analysis core courses: M.S. students and Technology Ph.D. students take one, and Policy Ph.D. students take two of Civil and Environmental Engineering 252, 262, Environmental Science and Policy 212A, 212B, Political Science 208.

Economics core courses: M.S. and Ph.D. students take one of Agricultural and Resource Economics 204, 275, 276, Civil and Environmental Engineering 268, Economics 145.

Technology core courses: To be announced.

In addition, students are expected to register for Transportation Technology and Policy 298 (or the approved equivalent in another department), a one-unit seminar course, each quarter it is offered. Transportation Technology and Policy 298 or the equivalent units will not count toward the required totals.

Planning and Policy Courses. Approved courses in this area include the following (additional courses may be added upon approval by the Chairperson):

Agricultural and Resource Economics 100A, 100B, 106, 136, 175, 176, 252, 253, 254, 255, 275
Agronomy 205, 206

Civil and Environmental Engineering 153, 165, 254, 262, 268

Civil and Environmental Engineering/Environmental Science and Policy 163

Community and Regional Development 240
Ecology 213

Economics 140, 145, 240A, 240B, 256

Environmental Science and Policy 168A, 168B, 171, 173, 178, 212A, 212B

Geography 155, 156

Landscape Architecture 201

Management 232, 240, 249, 250, 251, 252, 285

Mathematics 108, 227, 258A, 258B

Nutrition 492A

Psychology 207A, 207B

Statistics 106, 108, 110, 130A, 130B, 131A, 131B, 131C, 135, 137, 138, 140, 142, 144, 205, 222, 223

Transportation Technology and Policy 200, 292, 298

Technology Courses. Approved courses in this area include the following (additional courses may be added upon approval by the Chairperson):

Applied Biological Systems Technology 180, 181

Applied Science Engineering—Davis 115, 116, 132

Applied Science Engineering—Livermore 220A, 220B

Atmospheric Science 116, 270

Biological Systems Engineering 265

Civil and Environmental Engineering 149, 161, 162, 189, 242, 257

Computer Science Engineering 168,
Environmental and Resource Sciences 131, 186
Electrical and Computer Engineering 207
Mechanical Engineering 161, 163, 188, 217, 226,
234, 236

Courses in Transportation Technology and Policy (TTP)

Graduate Courses

200. Transportation Survey Methods (4)

Lecture—4 hours. Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have completed Civil and Environmental Engineering 255.—II. (II.) Mokhtarian

289A. Selected Topics in Transportation Technology and Policy (1-5)

Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out through lecture or laboratory, or a combination of both. May be repeated for credit.—I, II, III. (I, II, III.)

289B. Selected Topics in Transportation Technology and Policy (1-5)

Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out lecture or laboratory, or a combination of both. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

290C. Graduate Research Group Conference (1)

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in transportation. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

292. Internship in Transportation Technology and Policy (1-5)

Prerequisite: second year standing; approval of project prior to period of internship. Supervised work experience in transportation studies. May be repeated for credit if topic differs. (S/U grading only.)—I, II, III. (I, II, III.)

298. Group Study (1-5)

Discussion—1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12)

Discussion—1-12 hours. Prerequisite: consent of instructor. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

UC Davis Washington Center

Carole Blair, Ph.D., Director and Professor
UC Davis Washington Center,
1608 Rhode Island Avenue NW, Third Floor
Washington, D.C. 20036

Information:

UC Davis Washington Center On-Campus Office
Internship and Career Center
South Hall, 2nd Floor, 530-754-5718

World Wide Web: <http://www.ucdc.edu/ucdavis>

The UC Davis Washington Center began operations in the 1990-91 academic year. It provides students

and faculty new and expanded opportunities in the nation's capital to enrich their education and research. Its principal activities are an undergraduate academic internship program, fellowships and internships for graduate and professional school students, fellowships and research grants for faculty, and satellite interactive "telecourses." The University of California Washington Center now resides in a new 11-story, state of the art facility in downtown D.C. The center houses the academic and residential programs for undergraduate, faculty, and graduate students participating in the UC Davis Washington Center, as well as those from other UC campuses.

Undergraduate Academic Internship Program

The UC Davis Washington Center undergraduate program is open to students from all majors at UC Davis who have completed 89.9 units towards graduation. Students earn 15 units of academic credit, continue to be registered as full-time students, and fulfill university residency requirements. A GPA of approximately 3.0 is recommended for admission. Applicants are also evaluated based on a written statement, letters of recommendation and personal interviews.

The **Undergraduate Program** runs fall and spring quarters, on a 11 week "extended quarter" basis. The winter quarter is a 10 week program. It has two principal components:

- **Internships/Research Projects (11 units):** Students work three to four days per week as interns in Congress, federal agencies, interest groups, trade associations, research institutions, the media, museums or in other organizations related to policy, politics, science and culture and geared to the interests and objectives of individual students. Drawing on the internship experience, each student develops an independent research project, under the supervision of a member of the faculty.
- **Seminar Course (4 units):** Each student also enrolls in one upper division seminar course taught at the Washington Center. These courses vary each quarter, and are a mix of political science, international relations, other social sciences, history, and the arts and humanities. In addition to regular instruction, seminars often include guest speakers, observations of congressional committees and federal agencies, and other relevant Washington experiences.

Courses are taught by UC Davis faculty in residence, faculty from the UCLA, UC Santa Barbara, UC Santa Cruz, UC San Diego, UC Berkeley, UC Irvine and UC Riverside programs, or visiting faculty from the Washington area.

Financial aid eligibility is maintained, and the aid package can be adjusted to reflect the additional costs of the program. Some additional financial awards also are offered directly by the Washington Center, including the University of California President's Washington Scholarship and the Joyce and Norman Weil Scholarships.

Students reside at the UC Washington Center facility, convenient to public transportation. Arrangements are made to cover health services and other aspects of student life. The program also includes many educational, cultural and historical activities in the Washington area.

The UC Davis Washington Center also operates a **Summer Program**. The Summer Program has a credit or non-credit option. The credit option allows students to earn 5 units of academic credit, in addition to working at an internship. Students pay the summer sessions rate per credit hour plus an application fee. The non-credit internship has a program fee of \$200. Both options allow students to participate in many educational, cultural, historical and social activities. Some financial assistance is provided but is more limited than for the academic year programs.

The Washington Center also has positions during the academic year for graduate students as **Graduate Fellows** (combination of a predoctoral research fellowship and a teaching assistantship) and **Graduate Summer Internships**.

In partnership with faculty on campus, the Washington Center also conducts **satellite interactive "tele-courses"** in which students on the Davis campus participate in interviews and seminars with federal government officials and other experts from the nation's capital.

Courses in UC Davis Washington Center (WAS)

192. Internship in the UC Davis Washington Center Program (7)

Internship—28 hours. Prerequisite: junior or senior standing, admission in the UC Davis Washington Center undergraduate program, course 193 concurrently. Internship in Washington, DC with associated, supervised research project. (Same course as Political Science 192W.) (P/NP grading only.)—I, II, III. (I, II, III.) Blair

193. Washington Center Research Seminar (4)
Lecture/discussion—1 hour; independent study—3 hours; tutorial—0.5 hour. Prerequisite: course 192 concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as Political Science 193W.) GE credit: Wrt.—I, II, III. (I, II, III.) Blair

Graduate Study. A program of study is offered leading to the M.S. degree in Horticulture and Agronomy. Information can be obtained from the Advising Office at 140 Environmental Horticulture. Also see the Graduate Studies chapter of this catalog.

Graduate Adviser. C. Quiros

Related Courses. Vegetable Crops faculty also teach the following courses that contribute to majors and graduate programs in Agricultural Management and Rangeland Resources, Biological Sciences, Genetics, and Plant Biology:

Agricultural Management and Rangeland Resources 2, 110C, 118, 195, Biological Sciences 101, Biotechnology 171, Genetics 201D, 207L, 296, Plant Biology 1, 12, 154, 172, 172L, 176, 177, 188, 196, Plant Biology Graduate Group 201, 212, 214, 218A, 223, 293.

Courses in Vegetable Crops (VCR)

Questions pertaining to the following courses should be directed to the instructor or to the Vegetable Crops Office, 148 Asmundson Hall.

Lower Division Course

92. Internship in Vegetable Crops (1-6)

Internship—3-36 hours. Work experience off or on campus in all subject areas pertaining to vegetable crops. Internships supervised by a member of the faculty. Maximum of 12 units permitted in the Vegetable Crops 92-192 series. (P/NP grading only.)

Upper Division Courses

192. Internship in Vegetable Crops (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off or on campus in all subject areas pertaining to vegetable crops. Internships supervised by a member of the faculty. Maximum of 12 units permitted in the Vegetable Crops 92-192 series. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

212. Postharvest Physiology of Vegetables (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: Plant Biology 112 or 172. Comparative physiology of harvested vegetables; emphasis on maturation, senescence, compositional changes, physiological disorders and effects of environmental factors. Laboratories stress concepts and research procedures. Offered in alternate years.—(II.) Saltveit

216. Ecology and Agriculture (3)

Lecture/discussion—3 hours. Prerequisite: Plant Biology 142 or consent of instructor. Ecological principles and relationships as applied to agriculture.

Integration of ecological approaches into agricultural research to develop environmentally sound management practices. Topics include crop autecology, biotic interactions among crops and pests, and crops systems ecology. (Same course as Ecology 216.)—I. (I.) Jackson

220. Genomics and Biotechnology of Plant Improvement (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. (Same course as Genetics 220.)—II. (II.) Michelmore

221. Genomics and Breeding of Vegetable Crops (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101 or equivalent. Preview of genome structure, mapping, gene tagging and development of other genetic resources applied to improvement of major vegetables. For graduate students contemplating a career in modern vegetable breeding and biotechnology.—III. (III.) Quiros

290. Seminar (1)

Discussion—1 hour. (S/U grading only.)—I, II. (I, II.)

298. Group Study (1-5)

Prerequisite: consent of instructor.

299. Research (1-12)

(S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Courses in Veterinary Medicine (VMD)

Lower Division Course

92. Internship in Veterinary Science (1-12)

Discussion/laboratory—1-4 hours; clinical experience—3-36 hours. Prerequisite: approval of project by faculty sponsor prior to period of internship. Students in this program will be under the supervision of faculty in the School of Veterinary Medicine whose expertise is appropriate for the proposed project. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Pascoe

Upper Division Courses**170. Ethics of Animal Use (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: any basic course in composition or speech. Study of applied ethical methodology, tightly organized writing of critiques and policy statements in ethical use of animals. Learning respect for divergent views in professional and public treatment of animals through case histories and by discussion of consensus policies to protect animals and human values. GE credit: SocSci, Wrt.—III. (III.) Tannenbaum

192. Internship in Veterinary Science (1-12)

Discussion/laboratory and clinic—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in veterinary medicine. (P/NP grading only.) Pascoe

Graduate Courses**298. Group Study (1-5)**

(S/U grading only.)

299. Directed Independent Study (1-12)

(S/U grading only.)

Professional Courses**401A. Normal Anatomy of the Canine Locomotor System (2.8)**

Lecture—10 sessions; laboratory—18 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Normal canine anatomy with comparison to other species of bones, joints, muscles, ligaments, tendons, nerves, and vessels of the vertebral column and limbs.—I. (I.) Hyde

401B. Normal Anatomy of the Canine Head (1.4)

Lecture—6 sessions; laboratory—8 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Normal canine anatomy of bones, joints, muscles, ligaments, tendons, nerves and vessels of the head, including the eye and ear, with comparison to other species.—II. (II.) Plopper

402. Structure and Function of the Cardiovascular and Respiratory Systems (4.2)

Lecture—29 sessions; laboratory—13 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine of consent of instructor. Integrated view of cardiovascular and respiratory anatomy and physiology.—II. (II.) Jones

402D. Structure and Function of the Urinary System and Body Fluids (2.2)

Lecture—15 sessions; laboratory—7 sessions. Prerequisite: first-year standing in veterinary curriculum or consent of instructor. Basic understanding of the structure and function of the urinary system plus physiology of body fluids and acid-base balance. Structure and function are correlated.—III. (III.) Schelegle

403. Physiological Chemistry (6.1)

Lecture—52 sessions; laboratory—3 sessions; discussion—6 sessions. Prerequisite: first year standing in School of Veterinary Medicine. Biochemical principles used to analyze problems and to evaluate metabolic relationships important in animal health and pathophysiology. Integrative approach, emphasizing controls of major metabolic pathways, molecular basis of gene expression, tumorigenesis and signal transduction.—I. Hansen

405. Veterinary Parasitology (3.6)

Lecture—3 hours; laboratory—3 hours. Prerequisite: first-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Biological and clinical aspects of parasites and the diseases they cause in animals.—III. (III.) Conrad

406. Principles of Behavior (0.7)

Lecture—7 hours. Prerequisite: first year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Overview of animal behavior with relevance to veterinary medicine.—I. (I.) Hart

407. Principles and Techniques of Operative Surgery and Anesthesia (2.4)

Lecture—24 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine; course 426.

Introduction to operative and anesthetic skills and foundation in the importance of regional anatomy in the planning and conduct of surgical practice.—I. (I.) Gregory

407L. Principles and Techniques of Surgery and Anesthesia Laboratory (1.4)

Laboratory—14 sessions. Prerequisite: course 426, third year standing in School of Veterinary Medicine. Introduction to surgical anatomy, operative and anesthetic skills. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II. Gregory, Ilkiw

408. Nutrition and Nutritional Diseases in Animals (2.9)

Lecture—27 hours; laboratory—2 three-hour sessions. Prerequisite: first year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Principles of nutrition and their application to the solution of nutritional disorders of animals.—II. (II.) Rogers

409. Epidemiology (1.7)

Lecture—11 hours; discussion—6 hours. Prerequisite: first-year standing in School of Veterinary Medicine. Approved for graduate degree credit. Introduction to epidemiology and its applications in veterinary medicine.—III. (III.) Kass

412. Fundamentals of Zoonoses (1.1)

Lecture—11 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine or consent of instructor. Major zoonotic infections transmitted mainly by farm animals and pets. For each animal species and each infection, a short review of symptoms, diagnostic tests, epidemiology and control are presented. Specific lectures on regulatory medicine of major zoonoses: e.g., rabies, tuberculosis.—III. (III.) Chomel

413. Veterinary Food Safety (1.3)

Lecture—10 sessions; discussion—3 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. The food system and diseases transmitted by food. Topics include sources of contaminants, the function of processing in food safety, and the role of veterinarians in pre-harvest food safety and in food protection in general.—III. (III.) Cliver

414A. Principles of Veterinary Pharmacology and Toxicology (2.4)

Lecture—19 sessions; discussion—4 sessions; laboratory—1 session. Prerequisite: second year standing in the School of Veterinary Medicine. Introduction to the principles of pharmacology and toxicology. Pharmacology/toxicokinetics, pharmacology-toxicodynamics and chemotherapy of bacterial, neoplastic, fungal and viral diseases.—I. (I.) Vulliet

414B. Veterinary Pharmacology (2.4)

Lecture—22 sessions; discussion—2 sessions. Prerequisite: second year standing in the School of Veterinary Medicine; passing grade in course 414A. Basic principles for the use of drugs affecting the autonomic and central nervous systems as well as compounds affecting the cardiovascular system.—II. (II.) Giri

414C. Veterinary Toxicology (1.9)

Lecture—17 sessions; discussion—2 sessions. Prerequisite: second year standing in the School of Veterinary Medicine, passing grades in courses 414A and 414B. Toxicants of major importance in veterinary medicine. Basic principles and mechanism of action of toxicants.—III. (III.) Segall

419. Virology (2.7)

Lecture—19 sessions; laboratory—8 sessions. Prerequisite: second year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Introduction to the classification, morphology, and the strategy of replication of animal viruses, covering the molecular pathogenesis of animal viruses at the cellular level with emphasis on agents of infectious diseases of domestic animals.—I. (I.) Yilmaz

420. Immunology (3.0)

Lecture—21 sessions; laboratory—9 sessions. Prerequisite: first year standing in the School of Veterinary Medicine. Approved for graduate degree credit.

Concepts of immunology. Emphasis is on the principles of vaccination, responses to pathogenic agents, and the development of hypersensitivity and autoimmune reactions.—III. (III.) Gershwin

421. Principles of Neurosciences (2.7)

Lecture—22 hours; laboratory—5 three-hour sessions. Prerequisite: first year standing in the School of Veterinary Medicine. Approved for graduate degree credit. An integrated study of normal neurobiology, neuroanatomy, and neurophysiology, to enable students to engage in studies of neurologic disorders and clinical neurology.—II. (II.) Gietzen

422. Veterinary Ophthalmology (1.9)

Lecture—17 sessions; laboratory—2 sessions. Prerequisite: third year standing in School of Veterinary Medicine. The eye and related structures. Basic anatomy and physiology with clinically relevant aspects emphasized. Presentation of clinical appearance of common pathological changes. Specific diseases frequently encountered in general practice, including signs, causes, diagnostic approach, and treatment philosophy.—II. Hollingsworth

425. Veterinary Genetics (1.8)

Lecture—16 sessions; discussion—1 session; laboratory—1 session. Prerequisite: first-year standing in the School of Veterinary Medicine or consent of instructor. Introduction to veterinary genetics as preparation to recognize breeds; assess a pedigree; explain coat color inheritance; distinguish Mendelian from non-Mendelian patterns; interpret results of PCR; explain to a layperson how diseases or traits are attributed to a gene or gene defect.—II. BonDurant

426. Principles of Veterinary Anesthesiology and Critical Patient Care (1.7)

Lecture—15 hours; laboratory—2 three-hour sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Offers basic principles of veterinary anesthesiology including techniques of monitoring and management of animals under anesthesia.—III. (III.) Steffy

427. Cell and Tissue Structure and Function (3.3)

Lecture—24 sessions; laboratory—9 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Relationship between structure and function of animal tissues, emphasizing the molecular and cellular processes which integrate normal physiological activity. Mechanisms of cell division, differentiation and locomotion. Microscopic anatomy and organization of cells and extracellular molecules to form specialized differentiated tissues.—I. (I.) Tablin

430. Principles of Radiography and Radiologic Interpretation (3.5)

Lecture—24 sessions; laboratory—1 session; discussion—10 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Physical principles of x-ray production and x-ray matter interactions as they pertain to diagnostic medical imaging and radiation safety. Principles of radiologic interpretation. Principles of ultrasound physics and interpretation. (Deferred grading only, pending completion of sequence.)—I, II, III. Wisner

431. Endocrinology (1.8)

Lecture—17 sessions; laboratory—1 session. Prerequisite: first-year standing in the School of Veterinary Medicine. The structure and function of endocrine glands and how hormones and cytokines influence physiological processes.—III. Benton

432. Structure and Function of the Gastrointestinal and Mammary Systems (3)

Lecture—20 sessions; laboratory—10 sessions. Prerequisite: first-year standing in School of Veterinary Medicine or consent of instructor. Basic understanding and correlation of the structure and function of the gastrointestinal and mammary systems. Multiple species' differences examined.—II. (II.) Bruss

433. Veterinary Oncology (1.2)

Lecture—12 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Relationships between pathology, hematology, cytology,

450 Veterinary Medicine

immunology, and the clinical manifestations of neoplastic diseases in animals.—I. Madewell

434. Basic Veterinary Hematology (2)

Lecture—14 sessions; laboratory—6 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. The regulation of production of blood cells, the morphology of bone marrow and hematopoietic cells, the morphology and function of blood cells and the activities of hemostasis.—III. Zinkl

435. Veterinary Clinical Pathology (3.3)

Lecture—22 sessions; laboratory/discussion—11 sessions. Prerequisite: second year standing in School of Veterinary Medicine. The principles, selection, use, interpretation, and limitations of laboratory tests used for the diagnosis and monitoring of disease in animals.—II. Christopher

437A. Veterinary Ethics and Law (0.8)

Discussion—2 hours. Prerequisite: first year standing in the School of Veterinary Medicine. Ethical and legal issues critical to successful and ethical veterinary practice. Processes through which ethical and legal questions are approached and resolved. Background reading materials and discussions are supplemented with problem-based learning. Approved for graduate degree credit.—I. (I.) Tannenbaum

437B. Veterinary Ethics and Law (0.8)

Discussion—8 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Further consideration of ethical and legal issues critical to successful and ethical veterinary practice. Processes through which ethical and legal questions are approached and resolved. Background reading materials and discussions are supplemented with problem-based learning.—I. Tannenbaum

437C. Veterinary Ethics and Law (1.6)

Lecture—16 sessions. Prerequisite: third year standing in School of Veterinary Medicine or consent of instructor. Introduction to ethical and legal issues critical to successful and ethical veterinary practice. Processes through which ethical and legal questions are approached and resolved. Readings and discussions supplemented with problem based learning.—III. (III.) Tannenbaum

438. Animal Handling (1)

Laboratory—9 three-hour sessions; discussion—1 two-hour session. Prerequisite: first-year standing in School of Veterinary Medicine. Introduction and practice of methods of animal handling and restraint and selected techniques of diagnostic examination and therapy, as well as recognition of animal breeds, breed characteristics and purpose in animal species of veterinary importance. (S/U grading only.)—III. (III.) Watson

440. Veterinary Neurology (2.7)

Lecture—21 hours; laboratory—6 three-hour sessions. Prerequisite: third year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Integrated study of the relationship between neuroanatomy, neurophysiology, neuropathology, and the clinical manifestations of the diagnosis of neurological diseases and the use of the various neurodiagnostic aids.—I. (I.) LeCouteur

444. Clinical Endocrinology (1.5)

Lecture—12 sessions; discussion—3 sessions. Prerequisite: third-year standing in School of Veterinary Medicine or consent of instructor. A correlated review of common endocrinology disorders affecting the dog and cat.—II. (II.) Feldman

446. Veterinary Reproduction (4.2)

Lecture—32 sessions; laboratory—10 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Structural, functional, pathological, and clinical aspects of reproduction in animals.—II. (II.) Conley

451. Veterinary Bacteriology and Mycology (4.9)

Lecture—34 hours; laboratory—15 three-hour sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Introduction to the bacterial and fungal agents of animal diseases. Specifically, each

microorganism will be discussed with respect to overall significance to animal disease; structural and functional aspects including morphology, cellular composition, and products of medical interest.—I. (I.) LeFebvre

452. General Pathology (3.1)

Lecture—18 sessions; laboratory—13 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Basic principles of disease and in particular the fundamental mechanisms responsible for creating a disease situation. Illustrations of how the application of general pathological principles is used to determine disease pathogenesis and prognosis.—I. (I.) Mohr

459. Systemic Pathology (5.8)

Lecture—42 sessions; laboratory—16 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Basic understanding of the pathobiology of major organ systems relevant to a variety of animal species. Emphasis on mechanisms of injury, patterns of response to injury and on balance between damage and repair.—II. (II.) Higgins

460. Fundamentals of Clinical Orthopedics (1)

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Fundamental concepts of veterinary orthopedics, including mechanisms of bone healing, types of fractures, and principles of stabilization.—II. (II.) Schulz

470A-470B-470C. VMTH Techniques (3.4)

Clinical activity—34 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Clinical training in veterinary medicine with assignments in the medical and surgical services and clinical diagnostic facilities of the Veterinary Medical Teaching Hospital, discussions regarding client relations and experience with advanced techniques to prepare students for the senior clinical year. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

471A-471B-471C. Mixed Animal Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to mixed animal veterinary practice. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

472A-472B-472C. Small Animal Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to small animal veterinary practice. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

473A-473B-473C. Large Animal Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to large animal veterinary practice. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

474A-474B-474C. Equine Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to equine veterinary practice. (Deferred

grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

475A-475B-475C. Food Animal Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to food animal veterinary practice. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

476A-476B-476C. Zoological Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to zoological animal veterinary practice. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

477A-477B-477C. Small Animal/Equine Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to small animal/equine veterinary practice. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

478A-478B-478C. Small Animal/Food Animal Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to small and food animal practice. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

479A-479B-479C. Individual Practice Clinic (15-15-15)

Clinical activity—40 hours. Prerequisite: fourth-year standing in the School of Veterinary Medicine or consent of instructor. Clinical training in veterinary medicine; medical and surgical services and clinical diagnostic laboratories of the Veterinary Medical Teaching Hospital with emphasis on those services relating to individual areas of interest. (Deferred grading only, pending completion of sequence. S/U grading only.)—I-II-III. (I-II-III.) Smith

490A. Freshman Hospital Practices (2)

Laboratory—2 hours. Prerequisite: first-year standing in the School of Veterinary Medicine. Introduction to procedures and knowledge integral to working in a veterinary clinical practice and the VMTH. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III. (I, II, III.) Smith

490B. Sophomore Hospital Practices (2)

Laboratory—2 hours. Prerequisite: second-year standing in the School of Veterinary Medicine. Introduction to procedures and knowledge integral to working in a veterinary clinical practice and the VMTH. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III. (I, II, III.) Smith

490C. Junior Hospital Practices (2)

Laboratory—2 hours. Prerequisite: third-year standing in the School of Veterinary Medicine. Introduction to procedures and knowledge integral to working in a veterinary clinical practice and the VMTH. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III. (I, II, III.) Smith

The Major Program

The Viticulture and Enology major provides an interdisciplinary education in the biological and physical principles underlying grape and wine production as well as practical knowledge of grape growing (viticulture) and wine making (enology). This program provides the knowledge base for problem-solving and decision-making in commercial grape and wine production.

Preparatory Requirements. Before transferring into the Viticulture and Enology major, students must complete the following courses with a grade of C- or better and with a combined grade point average of at least 2.5 at the University of California (at least 3.0 for similar courses taken at community college) for these and all other preparatory courses. In addition, students' overall GPA must be 2.25 or higher. All courses must be taken for a letter grade.

Biological Sciences 1A.....5 units
Chemistry 2A, 2B, 2C, 8A.....17 units
Mathematics 16A.....3 units
Physics 1A, 1B or 7A.....4-6 units

Recommendations. Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into required upper division courses and may thus delay graduation. Some courses may be available at UC Davis during Summer Session.

Chemistry 8B.....4 units
Mathematics 16B.....3 units
Biological Sciences 1C.....5 units
Biological Sciences 102.....3 units

The Program. The curriculum builds upon a foundation of biology, chemistry, biochemistry and mathematics with specialized courses related to grape and wine production. To complete the program, students may choose to place particular emphasis on viticulture, enology or economics. Credit may also be earned for foreign language study and internships.

Career Alternatives. Graduates are qualified for a variety of vineyard and winery positions, including production management, quality control and research. Additionally they may work in related fields such as pest management, nursery production and analytical services.

B.S. Major Requirements

	UNITS
English Composition Requirement	0-8
See College requirement	0-8
Breadth/General Education	24
See General Education requirement	
Preparatory Subject Matter	41-51
Biological Sciences 1A, 1C.....	10
Chemistry 2A-2B-2C.....	15
Chemistry 8A, 8B	6
Agricultural Management and Rangeland Resources 21 or equivalent and adviser approval).....	0-3
Mathematics 16A-16B.....	6
Physics 1A, 1B or 7A	4-6
Viticulture and Enology 2, 3 or equivalent and adviser approval)	0-5
Depth Subject Matter	50-53
Biological Sciences 102, 103.....	6
Microbiology 102, 102L.....	6
Agricultural Management and Rangeland Resources 120 or Food Science and Technology 117 or Statistics 100 or 106	3-4
Viticulture and Enology 101A, 101B, 101C, 110, 118 and, in consultation with the adviser, choose one of Viticulture and Enology 115, 116. If both are taken, one will count as a restricted elective in Area A.	14-15
Viticulture and Enology 123, 124, 125, 126, 128, 135 and in consultation with the adviser, choose 3 of the following courses: 123L, 124L, 125L, 126L, 128L. If more than 3 are taken, the extra courses will count as restricted electives in Area B.	21-22
Restricted Electives	28
In consultation with adviser, choose 28 units from three of the following five areas. At least 12 units must be from one of the following areas: (A) Plant Science, (B) Food Science and Microbiology, or (C) Economics and Business.	
A. Plant Science Area The following lower division courses not listed among the prerequisites for the major are required or recommended for one or more of the restricted electives in this area: Agricultural Management and Rangeland Resources 2, Biological Sci- ences 1B, Food Science and Technology 2, Geology 50, Plant Biology 10A.	
Biological Sciences 101, Entomology 110, Hydrologic Science 110, 117, 124, Molecular and Cellular Biology 126, Nematology 100, Plant Biology 111, 112, 123, 142, 143, 146, 154, 157, 158, 160, 171, 172, 172L, 176, Plant Pathology 120, 125, Soil Science 100, 102, 109, Viticulture and Enology 111, one of 115, 116 (whichever was not used for depth)	
B. Food Science and Microbiology Area The following lower division courses not listed among the prerequisites for the major are required or recommended for one or more of the restricted electives in this area: Biological Sciences 1B, Physics 7B, 7C.	

Biological Sciences 101, Food Science
and Technology 102A, 102B, 104, 104L,
108, 109, 110A, 110B, Microbiology 140,
150, 155L, Viticulture and Enology 140,
190X. Viticulture and Enology 190X may
be taken a maximum of twice for
restricted elective credit.

C. Economics and Business Area
Agricultural and Resource Economics
100A, 112, 113, 118, 130, 140, 150, Eco-
nomics 1A, 1B, Management 11A, 11B,
Viticulture and Enology 111, 130

D. Language Area

Maximum 12 units, not counting course
1, of one of the following languages:
French, German, Italian, Portuguese or
Spanish. At least one course must be
Intermediate or Conversational (qualify-
ing Intermediate or Conversational
courses are listed below:)

French 8, 21, 22, 23, 38, German 6, 11,
20, 21, 22, Italian 4, 5, Spanish 8, 21, 22,
28, 31, 32, 33,

Courses taught in English will not count
as restricted electives in this major.

E. Internship Area

A maximum of 8 units of Viticulture and
Enology 190, 192, 198, 199, 290 or 298
may be counted as restricted electives
by prior arrangement with adviser. May
be increased to 12 units in exceptional
circumstances.

Unrestricted Electives

Total Units for the Degree

180

Major Adviser. C. Meredith

Related Major Programs. In addition to the Viticulture and Enology major, enology is a specialization under the Fermentation Science major, and viticulture is a specialization under the Agricultural Systems and Environment major.

Graduate Study. Several graduate groups offer programs of study leading to advanced degrees in the fields of viticulture and enology. For the M.S. or Ph.D. degree see Agricultural and Environmental Chemistry, Chemical Engineering, Ecology, Food Science, Genetics, Horticulture and Agronomy, Microbiology, Plant Biology, Plant Pathology, Soil Science, and Viticulture and Enology.

Courses in Viticulture and Enology (VEN)

Lower Division Courses

2. Introduction to Viticulture (2)

Lecture—2 hours. Fundamental principles of biology and culture of the grapevine including taxonomy, morphology, physiology, distribution, domestication, utilization, propagation, production systems, harvesting, and storage and processing of grapes. Successful completion of the course should prepare students for upper division courses in viticulture.—I. (I.) Williams

3. Introduction to Winemaking (3)

Lecture—3 hours. Overview of the history of wine, viticulture, fermentation, winery operations, the physiology of wine consumption, wines produced in California and other major wine-producing regions and the sensory evaluation of wine. GE credit: SciEng or SocSci.—I, II, III. (I, II, III.) Waterhouse, Adams

3W. Introduction to Winemaking: Writing Experience (1)

Term paper/discussion—1 hour. Prerequisite: course 3 (concurrent enrollment recommended). Preparation of a term paper on a subject covered in course 3. Introduction to searching the wine and grape literature in Shields Library. Papers graded on research quality, composition and critical thinking. GE credit with concurrent enrollment in course 3: Wrt.

90X. Lower Division Seminar (2)

Seminar—1 hour; term paper (required)/discussion. Prerequisite: lower division standing and consent of

452 Viticulture and Enology

instructor. Introduction to current issues surrounding wine and health as they relate to diet, nutrition, and toxicology. May not be repeated for credit. GE credit: Wrt.

99. Special Study for Undergraduates (1-5) (P/NP grading only.)

Upper Division Courses

101A. Viticultural Practices (2)

Discussion/laboratory—4 hours. Prerequisite: course 2. Provides the information required to identify the major wine, raisin, and table cultivars grown in California and elsewhere. Also provides experience in vineyard sampling techniques and vine disease identification.—I. (I.) Walker

101B. Viticultural Practices (2)

Discussion/laboratory—4 hours. Prerequisite: course 2. Field-oriented experience in the principles and practices of grapevine production, including pruning, propagation, weed identification and control, frost protection, and physical examination of soil profiles and root distribution patterns.—II. (II.) Walker

101C. Viticultural Practices (2)

Discussion/laboratory—4 hours. Prerequisite: course 2. Field-oriented experience in the principles and practices of grapevine production, including vineyard establishment, vine training, trellising, canopy management practices, irrigation and water management, and methods of crop adjustment for improvement of fruit quality.—III. (III.) Smart

110. Grapevine Growth and Physiology (3)

Lecture—3 hours. Prerequisite: course 2. Botanical aspects including morphology and domestication will precede lectures covering flower development and energy budget concepts. Impact of physiological variables such as photosynthesis translocation, mineral nutrition, and water relations on fruit ripening and composition will be covered.—II. (II.) Matthews

111. World Viticulture (3)

Lecture—3 hours. Prerequisite: upper division standing. Study of the diversity of viticulture, both geographical and historical. History of grape growing and its spread throughout the world will be covered, along with discussions of current viticultural practices in different parts of the world, including California.—III. (III.)

111L. Critical Evaluation of Wines of the World (1)

Laboratory/discussion—3 hours. Prerequisite: course 111 (must be taken concurrently), course 125 with a grade of C or better. Critical analysis of wines produced in different parts of the world with emphasis on the relationship between sensory properties of the wines and factors associated with their place of origin. (P/NP grading only.)

115. Raisin and Table Grape Production (2)

Lecture—2 hours. Prerequisite: course 2. Overview of the raisin and table grape industries in California and other production areas of the world. Cultural practices associated with raisin and table grape production will also be discussed.—I. (I.) Williams

116. Winegrape Production (3)

Lecture—3 hours. Prerequisite: course 2. Covers principles underlying cultural practices associated with winegrape production, including establishing and planting, training, summer and winter pruning, canopy management, irrigation, mineral nutrition, weed control, frost protection, crop regulation, and harvesting.

118. Grapevine Pests, Diseases and Disorders (3)

Lecture—3 hours. Prerequisite: course 2. Describes the various pests and diseases of vineyards throughout California. Pest/disease identification and control methods (to include sampling techniques) also will be discussed. Integrated management approach to pest control methods will be emphasized.—I. (I.) Williams

123. Analysis of Musts and Wines (2)

Lecture—2 hours. Prerequisite: Chemistry 2C and 8B or the equivalent. Students enrolled only in the lecture portion of this course are required to enroll in 1

unit of course 199 or 299. Restricted to upper division students majoring in fermentation science or viticulture and enology or graduate students in food science. Fundamental principles of analytical chemistry as they relate to specific methods used in wine-making.—I. (I.) Ebeler

123L. Analysis of Musts and Wines Laboratory (2)

Laboratory—3 hours; independent study—3 hours. Prerequisite: Chemistry 2C and 8B or the equivalent, course 123 concurrently. Restricted to upper division students majoring in fermentation science or viticulture and enology or graduate students in food science; others by consent of instructor. Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. Laboratory exercises demonstrating various chemical, physical and biochemical methods. GE credit: Wrt.—I. (I.) Ebeler

124. Wine Production (2)

Lecture—2 hours. Prerequisite: course 3, 123 (may be taken concurrently), Biological Sciences 102. Principles and practices of making standard types of wines, with special reference to grape varieties used and methods of vinification.—I. (I.) Bisson

124L. Wine Production Laboratory (3)

Laboratory—3 hours; independent study—3 hours; term paper. Prerequisite: course 124 (may be taken concurrently). Restricted to undergraduate students in fermentation science, viticulture and enology, biotechnology, microbiology, food science and applied plant biology or graduate students in food science, agricultural and environmental chemistry and horticulture. Current technologies used in production of California table wines; analysis and monitoring of impact of fermentation variables on microbial performance and product quality; student-designed independent research project.—I. (I.) Bisson

125. Wine Types and Sensory Evaluation (2)

Lecture—2 hours. Prerequisite: Agricultural Management and Rangeland Resources 120 or Food Science and Technology 117, course 124. Introduction to principles of sensory evaluation and application to wines. Investigations of factors influencing wine flavor, data from sensory analysis of model solutions.—II. (II.)

125L. Sensory Evaluation of Wine Laboratory (2)

Laboratory—3 hours; term paper. Prerequisite: course 125 (may be taken concurrently). Restricted to upper division majors in fermentation science or viticulture and enology or graduate students in food science. Sensory evaluation of wines and model systems using discrimination tests, ranking, descriptive analysis and time-intensity analysis. Data analyzed by appropriate statistical tests and results interpreted in extensive weekly lab reports.—II. (II.)

126. Wine Stability (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 124. Restricted to students in viticulture and enology, fermentation science, applied plant biology majors, or graduate students in food science, microbiology, horticulture, and horticulture and agronomy. Principles of equilibria and rates of physical and chemical reactions in wines; treatment of unstable components in wines by absorption, ion exchange, refrigeration, filtration, and membrane processes; and protein, polysaccharide, tartrate, oxidative, and color stabilities.—II. (II.) Boulton

126L. Wine Stability Laboratory (2)

Laboratory—3 hours; independent study—3 hours. Prerequisite: course 126 (may be taken concurrently). Restricted to upper division fermentation science, viticulture and enology majors, or graduate students in food science, agricultural and environmental chemistry, microbiology or by consent of instructor. Practical application of principles of equilibria and rates of physical and chemical reactions to wine stability.—II. (II.) Boulton

128. Wine Microbiology (2)

Lecture—2 hours. Prerequisite: courses 123 and 124; Microbiology 102 and 102L, or Food Science

and Technology 104 and 104L; courses 125 and 126 recommended. Nature, development, physiology, biochemistry, and control of yeasts and bacteria involved in the making, aging and spoilage of wine.—III. (III.) Mills

128L. Wine Microbiology Laboratory (2)

Laboratory—6 hours. Prerequisite: course 123, 124, and 128 (may be taken concurrently), Microbiology 102L or Food Science and Technology 104 and 104L; course 125 and 126 recommended. Restricted to upper division students in fermentation science, viticulture and enology or graduate students in food science. Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine.—III. (III.) Mills

129. Instrumental Analysis of Must and Wine (4)

Lecture—2 hours; laboratory/discussion—1 hour; laboratory—3 hours. Prerequisite: course 123 or Food Science and Technology 103 or consent of instructor. Theory and practice for analysis of musts and wine. Primary focus will be on capillary electrophoresis and high performance liquid chromatography with some attention to gas chromatography.—III. Ebeler

130. Management, Marketing, and Economics of the California Wine Industry (9)

Lecture—24 hours; lecture/discussion—4 hours; fieldwork—8 hours. Prerequisite: course 124. Introduction to management, marketing and economics of wine in the United States with particular emphasis on California. Reviews market segmentation and explores alternative strategies for grape acquisition, production, brand development, distribution, and social policy formation. GE credit: Wrt.—summer. (summer.)

135. Wine Technology and Winery Systems (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 124. Restricted to upper division majors in fermentation science, viticulture and enology, or graduate students in food science. Course includes three field trips. Process technologies and process systems that are used in modern commercial wineries. Overview of winemaking systems; winemaking operations and equipment; barrel aging and barrel management; membrane separation processes; specialized contacting systems; cleaning and sanitation systems; process control systems; refrigeration systems; air conditioning and humidity systems; electrical systems; waste water systems; solid waste handling; work place safety.—III. (III.) Boulton, Block

140. Distilled Beverage Technology (3)

Lecture—3 hours. Prerequisite: Chemistry 8B; Food Science and Technology 110A. Distillation principles and practices; production technology of brandy, whiskey, rum, vodka, gin, and other distilled beverages; characteristics of raw materials, fermentation, distillation, and aging. Offered in alternate years.—(III.) Boulton

181. Readings in Enology (1)

Discussion—1 hour. Prerequisite: course 3. Critical evaluation of selected monographs in enology. Discussion leadership rotates among the students. May be repeated three times for credit. (P/NP grading only.)—III. (III.) Matthews

186. Fermentation Science (3)

Lecture—3 hours. Prerequisite: Microbiology 102, Biological Sciences 101. Basic principles of fermentation science and biotechnology with emphasis on industrial fermentation processes that generate useful products including fermented food and beverages, pharmaceuticals, fine chemicals, and other gene products.

190X. Winemaking Seminar (1)

Seminar—1 hour; discussion—1 hour. Prerequisite: course 3. Open to Viticulture and Enology majors and graduate students. Outside speakers on a specific winemaking topic chosen for the quarter. Discussion with the speaker hosted by the faculty member(s) in charge. May be repeated for credit up to 3 times. (P/NP grading only.)—III. (III.) Butzke

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units. Work experience related to Fermentation Sci-

ence (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a member of the department or major faculty, but are arranged by the student. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

200. Introduction to Scientific Methods (2)

Lecture/discussion—1 hour; term paper. Prerequisite: graduate standing or consent of instructor. Processes involved in conducting scientific research. Topics include conducting literature review, formulating hypotheses, and analyzing and reporting results. Annotated bibliography and written and oral research proposal.—III. (III.)

210. Grape Development and Composition (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 102, 103. The anatomy, physiology and biochemistry of grape berry development, with emphasis on the development of grape composition relevant to winemaking. Offered in alternate years.—III. Adams, Polito

216. Vineyard Establishment and Development (4)

Lecture/discussion—3 hours; fieldwork—3 hours; term paper. Prerequisite: courses 101A, 101B, 101C, and one of courses 115 or 116, and course 118 or consent of instructor; course 110, Soil Science 100, Atmospheric Science 133 and Agricultural and Resource Economics 140 recommended. Application of plant, meteorological, soil, water, and economic sciences to vineyard establishment and development. Preparation of a comprehensive study to determine the viticultural and economic feasibility of a given site for raisin, table, or wine grape production.—I. (I.) Dokoozlian

219. Natural Products of Wine (3)

Lecture—3 hours. Prerequisite: courses 123 and 124, or natural products background and consent of instructor. Structure, occurrence, and changes due to wine production to the natural products found in wine. Chemicals with a sensory impact will be emphasized, including flavonoids and other phenolics, terpenes and norisoprenoids, pyrazines, oak volatiles and other wine constituents.—II. Waterhouse

220. Secondary Nutrients, Chemistry (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Chemistry 8B, Biological Sciences 102. Introduction to phytochemicals with possible health or nutritional effects, with a focus on chemical structure, reactivity and occurrence in foods, including phenolics, glucosylates, carotenoids and fiber. Students will give oral reports.

223. Instrumental Analysis of Must and Wine (4)

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 123 or Food Science and Technology 103; Biological Sciences 102, Chemistry 107B or 115 recommended. Open to upper division students in Fermentation Science, Viticulture and Enology, or graduate students in Food Science, Agricultural and Environmental Chemistry or Viticulture and Enology. Theory and practice of instrumental analysis of wines and musts. Emphasis on the principles of analytical techniques (e.g., CE, GC, HPLC, Mass Spectrometry) and factors determining correct choice of instrumental method.—III. (III.) Ebeler

224. Advances in the Science of Winemaking (3)

Lecture—3 hours. Prerequisite: course 125, 126 and graduate standing or consent of instructor. Selected topics in the science and technology of winemaking. Topics drawn from current research of participating faculty. Critical analysis of the technical content of published material.—III. (III.) Block

225. Advanced Sensory Analysis of Wines (3)

Lecture/discussion—2 hours; laboratory—4 hours. Prerequisite: courses 124 and 125 (or Food Science

and Technology 107) and Agricultural Management and Rangeland Resources 120 or the equivalent. Sensory descriptive analysis experiments will be designed and conducted using standard sensory science methods. Data will be analyzed by analyses of variance, principal component analyses and generalized Procrustes analysis to evaluate the judge's performance and interpret the significance of the results.

235. Winery Design and Economics (5)

Lecture—2 hours; discussion—1 hour; studio—6 hours. Prerequisite: courses 124, 135; Food Science and Technology 110A recommended. Design of wineries. Includes process calculations, equipment selection, process layout and building choice and siting. Project scheduling, capital costs and ten-year cash flow analysis for the winery. Grading based on design project. Offered in alternate years.—II. Boulton

270. Critical Evaluation of Scientific Literature (2)

Discussion—2 hours. Prerequisite: consent of instructor. Contemporary research topics in biological sciences. Discussion of recent research articles in a special topic area. Intended to develop skills in critical evaluation of scientific publications. May be repeated for credit. (S/U grading only.)—II, III. (II, III.) Bisson

290. Seminar (1)

Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only.)—I, III. (I, III.)

290C. Advanced Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

291. Advanced Viticulture (2)

Lecture/discussion—2 hours. Prerequisite: course 110, 116, 124, 125; course 210 recommended. Critical evaluation of scientific and popular literature on selected topics of current interest that relate viticulture to fruit or wine sensory attributes or quality. May be repeated once for credit. Offered in alternate years.—(II.) Matthews

297T. Tutoring in Viticulture and Enology (1-5)

Prerequisite: graduate standing and consent of instructor. Designed for graduate students who desire teaching experience, but are not teaching assistants. Student contact primarily in laboratory or discussion sections, and under direction of a faculty member. (S/U grading only.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Courses

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

Viticulture and Enology (A Graduate Group)

Roger B. Boulton, Ph.D., Chairperson of the Group
Group Office, 1023 Wickson Hall (530-752-0380;
Fax: 530-752-0382)

World Wide Web: <http://wineserver.ucdavis.edu>

Faculty. See under Department of Viticulture and Enology.

Graduate Study. The M.S. program offers advanced studies in viticulture and enology, ranging from the

genetics, physiology and biochemistry of grapevines to the chemistry, microbiology and sensory science of wines and the chemical engineering of winemaking. Graduate students will usually work on a project that requires at least two of these fields of science and may involve grapevines, grapes, and wine or wine distillates. Topics can vary; examples include the molecular biology of grapevines, bacteria or yeast, the grape and wine chemistry associated with fermentation and aging and the correlation of analytical and sensory analyses. All application material must be received in the group office by February 15. Ph.D. studies are offered through one of the following Graduate Groups: Agricultural and Environmental Chemistry, Chemical Engineering, Food Science, Horticulture and Agronomy, Genetics, Microbiology, and Plant Biology.

Preparation. Applicants to the program are required to have a level of competence equivalent to that of a strong science undergraduate program. This includes coursework in general chemistry, organic chemistry, calculus, statistics (analysis of variance), biochemistry, and microbiology. Specific requirements are outlined in detail and may be obtained from the group office or Web site.

Graduate Advisers. R.B. Boulton, S.E. Ebeler.

War-Peace Studies

(College of Letters and Science)

The interdisciplinary minor in War-Peace Studies examines the causes and dynamics of intra- and international wars and efforts to prevent and settle such conflicts.

Students in the minor are encouraged to participate in the educational activities of the Davis Program of the UC Institute on Global Conflict and Cooperation (IGCC).

The minor is sponsored by the International Relations Program.

Minor Program Requirements:

UNITS

War-Peace Studies.....19-20

One or two courses from each of the following areas:

Approaches:

Anthropology 123AN, 126B, Comparative Literature 157, Philosophy 115, 118, Physics 137/Applied Science Engineering 137, Political Science 121, 123, 124, 132, 176, Sociology 119, 157, Women's Studies 102

Northern and Western Regions:

History 134A, 138C, 142, 143, 144A, 144B, 145, 170B, 171B, 174B, Native American Studies 130B, Political Science 130, 131

Southern and Eastern Regions:

Anthropology 142, 143A, 143B, 144, History 165, 191F, 194C, Native American Studies 120, Political Science 126, 134, 145, 149, 178

Restriction: No more than two courses from a single department may be offered in satisfaction of the minor requirements.

Advising. International Relations Program, 752-3063.

Lisa C. Thompson, Ph.D., Assistant Specialist in Cooperative Extension
Desley A. Whisson, Ph.D., Associate Vertebrate Pest Ecology Specialist in Cooperative Extension.

The Major Program

The Wildlife, Fish, and Conservation Biology major deals with the relationships between the requirements of wildlife and the needs of people. Understanding these relationships is vital for the maintenance of ecological diversity, recreational resources, and food supplies.

The Program. The major emphasizes broad training in biological and physical sciences, with specialization in one of eight areas. The major is primarily for students interested in becoming professionals in wildlife, fish, and conservation biology, but its breadth of course requirements, when combined with electives, also make it suitable as a preparatory major for such areas as veterinary medicine and secondary school teaching. Certification by professional societies such as The Wildlife Society, American Fisheries Society, or the Ecological Society of America or preparation for specialized resource-related graduate studies may also be achieved by careful planning of electives with a faculty adviser.

Career Alternatives. Positions now held by graduates in this major include wildlife, fisheries, management of problem vertebrates, and resource biologists and managers with local, state and federal agencies. Some graduates are biologists or consultants with private industries such as commercial fishing businesses, electrical utilities, sportsman's clubs, aquaculture operations, and environmental consulting firms. Also, some are veterinarians, medical physicians, and professors/researchers who teach and/or conduct research in academic institutions.

B.S. Major Requirements:

	UNITS
Written/Oral Expression	8
English 1	4
Communication 1	4
Above requirements simultaneously satisfy the College requirements.	
Preparatory Subject Matter	50-56
Biological Sciences 1A, 1B, 1C	15
Chemistry 2A, 2B, 8A, 8B	16
Agricultural Management and Rangeland Resources 21	3
Mathematics 16A, 16B	6
Physics 1A, 1B or 7A, 7B, 7C	6-12
Statistics 100, 102 or Agricultural Systems and Environment 120	4
Breadth/General Education	6-24
Satisfaction of General Education requirement	
Depth Subject Matter	49-61
Students graduating with this major are required to attain at least a <i>C</i> average (2.0) in all courses taken at the university in depth subject matter.	
Environmental Science and Policy 100 or Evolution and Ecology 101	4
Evolution and Ecology 100	4
Biological Sciences 101	4
Neurobiology, Physiology, and Behavior 101	5
Anatomy, Physiology, and Cell Biology 100 or Evolution and Ecology 105	3-4
Choose three lecture courses and two (laboratory) courses. Wildlife, Fish, and Conservation Biology 110, (110L), 111, (111L), 120, (120L), or Evolution and Ecology 134, (134L)	
Wildlife, Fish, and Conservation Biology 122 and Neurobiology, Physiology, and Behavior 102, and either 121 or 130	11-12
Choose one course (two recommended) from Statistics 104, 106 or 108	
Wildlife, Fish, and Conservation Biology 100, or 101 and 101L, or 102 and 102L	3-7
Restricted Electives	9-34
Choose one from the eight Areas of Specialization shown below. Students must maintain a <i>C</i> average (2.0 GPA) and pass all course work in their chosen specialization.	
Areas of Specialization	
1. <i>Behavioral ecology</i> : Complete Wildlife, Fish, and Conservation Biology 141. Choose one course from each group:	
a. Entomology 104, Environmental Science and Policy 101, Animal Science 104, or Anthropology 154A.	
b. Agricultural Management and Rangeland Resources 135, Environmental Science and Policy 128, or Wildlife, Fish, and Conservation Biology 151.	
2. <i>Conservation biology</i> : Complete Wildlife, Fish, and Conservation Biology 154 and Environmental Horticulture 150. Choose one course from each group:	
a. Entomology 147, Evolution and Ecology 117, 138, 147, or Wildlife, Fish, and Conservation Biology 156;	
b. Environmental Science and Policy 161, 166, 170, Geography 161, or Wildlife, Fish, and Conservation Biology 157.	
3. <i>Ecotoxicology and disease ecology</i> : Complete Wildlife, Fish, and Conservation Biology 153. Biological Sciences 102, 103 or Animal Biology 102, 103. Choose two courses from <i>a</i> and one from <i>b</i> , or one from <i>a</i> and two from <i>b</i> :	

- a. Environmental Toxicology 101, 112A (112B recommended), 132 or 138; and
- b. Pathology, Microbiology, and Immunology 101, Medical Microbiology 115 or 116.
4. *Fisheries biology*: Complete Wildlife, Fish, and Conservation Biology 102, 102L, 120, 120L, 121. Biological Sciences 102, 103, or Animal Biology 102, 103 and:
- a. One course from Wildlife, Fish, and Conservation Biology 123, Entomology 116 or Evolution and Ecology 112-112L; and
- b. Two courses from Environmental Science and Policy 116 (or 150C), 151, Hydrologic Science 122, or Wildlife, Fish, and Conservation Biology 157.
5. *Physiological ecology*: Complete Wildlife, Fish, and Conservation Biology 121 and 130. Biological Sciences 102, 103 or Animal Biology 102, 103. Choose two courses from Neurobiology, Physiology, and Behavior 126, 127, 128, 129, 140 or 141.
6. *Wildlife damage management*: Complete Wildlife, Fish, and Conservation Biology 152, Agricultural Management and Rangeland Resources 105 and 110A, and choose one course from Entomology 153 or 156.
7. *Wildlife biology*: Complete Wildlife, Fish, and Conservation Biology 100 or 101-101L, Wildlife, Fish, and Conservation Biology 130 and 151, and two courses from Evolution and Ecology 134L or Wildlife, Fish, and Conservation Biology 110L or 111L, and:
- a. Choose two courses from Agricultural Management and Rangeland Resources 130, Plant Biology 102 (or 108), 117, 121, 144, 178, Evolution and Ecology 121, Environmental Science and Policy 155, Wildlife, Fish, and Conservation Biology 156.
- b. Choose one course from Wildlife, Fish, and Conservation Biology 131, 136, 152, 157, Agricultural Management and Rangeland Resources 135.
8. *Individualized*: Students may, with prior approval of their adviser and the curriculum committee, design their own individualized specialization within the major. The specialization will consist of 4-6 courses with a common theme.

Unrestricted Electives

Total Units for the Degree (minimum)

Major Adviser. J. Eadie

Students transferring to Davis from another institution or new students declaring the major of Wildlife, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. See the receptionist in 1088 Academic Surge Building or telephone 754-4323.

Graduate Study. See the Graduate Studies chapter in this catalog.

Courses in Wildlife, Fish and Conservation Biology (WFC)

Lower Division Courses

10. Wildlife Ecology and Conservation (4)

Lecture—3 hours; discussion—1 hour. Introduction to the ecology and conservation of vertebrates. Complexity and severity of world problems in conserving biological diversity. GE credit: SciEng, Div, Wrt.—I. (I.) Moyle, Kelt

92. Internship (1-6)

Internship—3-18 hours. Prerequisite: lower division standing and consent of instructor. Work experience

off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

Upper Division Courses

100. Field Methods in Wildlife, Fish, and Conservation Biology (4)

Lecture—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 and consent of instructor. Introduction to field methods for monitoring and studying wild vertebrates and their habitats, with an emphasis on ecology and conservation. Required weekend field trips.—III. Anderson, Eadie, Kelt, Van Vuren

101. Field Research in Wildlife Ecology (2)

Lecture/discussion—2 hours. Prerequisite: one upper division course in each of ecology, statistics, and ornithology, mammalogy, or herpetology and consent of instructor. Field research in ecology of wild vertebrates in terrestrial environments; formulation of testable hypotheses, study design, introduction to research methodology, oral and written presentation of results. Limited enrollment. Offered in alternate years. GE credit: Wrt.—I. Anderson, Eadie, Kelt, Van Vuren

101L. Field Research in Wildlife Ecology: Laboratory (4)

Lecture/discussion—2 hours; field work—15 hours. Prerequisite: consent of instructor, course 101 (may be taken concurrently), and one upper division course in each of ecology, statistics, and ornithology, mammalogy, or herpetology. Field research in ecology of wild vertebrates in terrestrial environments; testing ecological hypotheses through field research; application of research methodology, supervised independent research projects. Held between Labor Day and fall quarter. Limited enrollment. Offered in alternate years.—I. (I.) Anderson, Eadie, Kelt, Van Vuren

102. Field Studies in Fish Biology (1)

Lecture/discussion—1 hour. Prerequisite: upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Emphasis on theory of quantitative fish capture methods and design of individual research projects on ecology, behavior, physiology or population biology of fishes. Offered in alternate years.—(III.) Moyle, Cech

102L. Field Studies in Fish Biology: Laboratory (6)

Fieldwork—15 hours; laboratory—12 hours; discussion/laboratory—3 hours. Prerequisite: course 102, upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Field investigations of fish biology are emphasized including quantitative capture methods and individual research projects on ecology, behavior, physiology or population biology of fishes at the field site in relation to their habitats. Offered in alternate years. (Deferred grading only, pending completion of projects.) GE credit: SciEng, Wrt.—(III.) Moyle, Cech

110. Biology and Conservation of Wild Animals (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, Evolution and Ecology 101 or Environmental Science and Policy 100. Origins, evolution, diversification, and geographical and ecological distributions of mammals. Morphological, physiological, reproductive, and behavioral adaptations of mammals to their environment.—III. (III.) Kelt

110L. Laboratory in Biology and Conservation of Wild Mammals (2)

Laboratory—6 hours. Prerequisite: course 110 (may be taken concurrently) and consent of instructor. Laboratory exercises in the morphology, systematics, species identification, anatomy, and adaptations of wild mammals to different habitats. Limited enrollment.—III. (III.) Kelt

111. Biology and Conservation of Wild Birds (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, and Evolution and Ecology 101. Phylogeny, distribution, migration, reproduction, population dynamics, behavior and physiological ecology of wild birds. Emphasis on adaptations to environments, species interactions, management, and conservation.—I. (I.) Anderson, Eadie

111L. Laboratory in Biology and Conservation of Wild Birds (2)

Laboratory—6 hours. Prerequisite: course 111 (may be taken concurrently); consent of instructor. Laboratory exercises in bird species identification, anatomy, molts, age and sex, specialized adaptations, behavior, research, with emphasis on conservation of wild birds. Limited enrollment.—I. (I.) Anderson, Eadie

120. Biology and Conservation of Fishes (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1B. Evolution, ecology, and conservation of marine and freshwater fishes.—I. (I.) Moyle

120L. Laboratory in Biology and Conservation of Fishes (1)

Laboratory—3 hours. Prerequisite: course 120 (may be taken concurrently). Morphology, taxonomy, conservation, and identification of marine and freshwater fishes with emphasis on California species. Limited enrollment.—I. (I.) Moyle

121. Physiology of Fishes (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: upper division courses in nutrition and physiology or consent of instructor. Comparative physiology, growth, reproduction, behavior, and energy relations of fishes. GE credit: SciEng, Wrt.—II. (II.) Cech

122. Population Dynamics and Estimation (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mathematics 16A-16B; Statistics 13 or the equivalent; an upper division course in ecology. Description of bird, mammal and fish population dynamics, modeling philosophy, techniques for estimation of animal abundance (e.g., mark-recapture, change-in-ratio, etc.), mathematical models of populations (e.g., Leslie matrix, logistic, dynamic pool, stock-recruitment); case histories.—III. (III.) Botsford

123. Stream Ecology (4)

Lecture/discussion—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Biological Sciences 1A and 1B or the equivalent. Ecology of stream invertebrates and vertebrates with emphasis on life history, habitat, diversity, and behavior. Invertebrate monitoring to assess environmental impacts, ecology, and biology of streams. Two Saturday field trips required. Offered in alternate years.—III. Moyle

130. Physiological Ecology of Wildlife (4)

Lecture—4 hours. Prerequisite: course 110, 111, or 120; Neurobiology, Physiology and Behavior 101; and Evolution and Ecology 101. Animal functions, adaptations, and ecological energetics of wildlife. Nutrition, metabolism, and productivity are emphasized as a pattern of relationships for understanding the distribution and abundance of wild ectotherms and endotherms in time and space.—I. (II.)

136. Ecology of Waterfowl and Game Birds (3)

Lecture—2 hours; laboratory—3 hours; field trip. Prerequisite: courses 111 and 111L or the equivalent. Detailed examination of distribution, behavior, population dynamics, and management of waterfowl and upland game birds. Offered in alternate years.—(II.) Eadie

141. Behavioral Ecology (4)

Lecture—3 hours; film viewing—1 hour. Prerequisite: Evolution and Ecology 101. Basic theories underlying the functional and evolutionary significance of behavior, and the role of ecological constraints. Supporting empirical evidence taken mainly from studies of wild vertebrates. Offered in alternate years.—II. Caro

151. Wildlife Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences, 1A, 1B, 1C or the equivalents; course 110L or 111L recommended. Ecology of wild vertebrates, including habitat selection, spatial

organization, demography, population growth and regulation, competition, predation, and community dynamics, set in the context of human-caused degradation of environments in North America.—I. (I.) Van Vuren

152. Ecological Management of Problem Wildlife (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, and 1C, or the equivalent. Ecological approaches to managing wild vertebrates that cause problems for agriculture, public health, or conservation of biodiversity. Offered in alternate years.—II. Van Vuren

153. Wildlife Ecotoxicology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: introductory courses in organic chemistry, ecology, and physiology, or consent of instructor; Environmental Toxicology 101 recommended. Various forms of environmental pollution in relation to fish and wildlife, the effects and mechanisms of pollutants, effects on individuals and systems, laboratory and field ecotoxicology, examples/case histories, philosophical/management considerations. Offered in alternate years. GE credit: SciEng, Wrt.—II. Anderson

154. Conservation Biology (4)

Lecture—3 hours; term paper (will be one or more book reviews). Prerequisite: Evolution and Ecology 101 or Environmental Studies 100 or the equivalent. An introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats.—III. (III.) Caro

156. Plant Geography (4)

Lecture—3 hours; laboratory—3 hours; term paper. Field trips will be substituted for some in-lab activities. Prerequisite: Environmental Science and Policy 100 or Evolution and Ecology 101; Plant Biology 102 or 108 strongly recommended. Survey of the geographical distribution of vegetation types and habitats, with consideration of the environmental and historical factors that determine these patterns. Conservation and management approaches. Analytical field and lab techniques introduced. Offered in alternate years. GE credit: SciEng, Wrt.—II. Elliot-Fisk

157. Coastal Ecosystems (4)

Lecture—3 hours; laboratory/fieldwork—3 hours. Prerequisite: Environmental Studies 100 or Evolution and Ecology 101; course work in organismal biology, physical geography, and geology recommended. Overview of coastal ecosystems, physical and biological elements and processes, and coastal zone dynamics, including sandy, rocky and muddy shorelines, estuaries, dunes and coastal watersheds. Discussion of the role of historical factors and conservation, restoration, and management approaches. Offered in alternate years.—(II.) Elliot-Fisk

190. Departmental Research Seminar (1)

Seminar—1 hour. Prerequisite: upper division standing in the biological sciences. Reports and discussions of recent advances related to wildlife and fisheries biology. May be repeated for credit up to 3 times. (P/NP grading only.)—I, II, III.

191. Museum Science (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: upper division standing and consent of instructor. Principles and methods required to preserve and present biological specimens for research, teaching collections, and museums. Offered in alternate years. (P/NP grading only.)—II. Englis

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

195. Field and Laboratory Research (3)

Laboratory—6 hours; discussion—1 hour. Prerequisite: course 110L, 111L, or 120L; 121 or 130; Evolution and Ecology 101 or the equivalent; and consent of instructor. Critique and practice of research methods applied to field and/or laboratory environments of wild vertebrates. Students work independently or

in small groups to design experimental protocol, analyze data, and report their findings. May be repeated twice for credit.—I, II, III. (I, II, III.)

197T. Tutoring in Wildlife and Fisheries (1-5)
Prerequisite: major in Wildlife, Fish, and Conservation Biology and consent of instructor. Experience in teaching under guidance of faculty member. (P/NP grading only.)

198. Directed Group Study (1-5)
(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.)

Graduate Courses

222. Advanced Population Dynamics (3)
Lecture—3 hours. Prerequisite: graduate standing; advanced course in ecology (e.g., Evolution and Ecology 101), population dynamics (e.g., course 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended. Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research.—II. (II.) Botsford

290. Seminar (1-3)
Seminar—1-3 hours. Prerequisite: consent of instructor. Seminar devoted to a highly specific research topic in any area of wildlife or fisheries biology. Special topic selected for a quarter will vary depending on interests of instructor and students. (S/U grading only)—I, II, III. (I, II, III.)

290C. Research Group Conference (1)
Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress and techniques in wildlife and fishery sciences. May be repeated for credit. (S/U grading only)—I, II, III. (I, II, III.)

291. Seminar in Aquatic Ecology (2)
Seminar—2 hours. Prerequisite: graduate standing in biology. Presentation and analysis of assigned topics in aquatic ecology emphasizing fish, fisheries and aquatic conservation. Offered in alternate years. (S/U grading only.—III. (III.) Moyle

292. Physiology of Fishes Seminar (1)
Seminar—1 hour. Prerequisite: graduate standing and at least two courses in physiology; consent of instructor. Seminar devoted to current topics concerning the physiological functioning of fishes. May be repeated twice for credit. (S/U grading only.—I. (I.) Cech

293. Seminar in Wildlife Disease Ecology (2)
Seminar—2 hours. Prerequisite: graduate standing or advanced undergraduate in biology. Presentation and analysis of assigned research papers on disease ecology of wild vertebrates related to considerations of habitat quality, population regulation, wildlife management, and/or implications for human or domestic animal health. (S/U grading only.—II. (II.)

294. Behavioral Ecology of Predators and Prey (3)
Seminar—2 hours. Prerequisite: graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator prey interactions. May be repeated twice for credit. (Same course as Animal Behavior 294.) Offered in alternate years.—II. Caro

295. Seminar in Wildlife Ecotoxicology (3)
Seminar—2 hours; term paper. Prerequisite: graduate standing in biology. Presentation and analysis of assigned and searched research papers on transport, exposure, and effects of environmental contaminants on wildlife-associated ecosystem components, especially at individual/population levels. Specific subjects vary each offering. Offered in alternate years. (S/U grading only.—II. Anderson

297T. Supervised Teaching in Wildlife and Fisheries Biology (1-3)
Tutorial—3-9 hours. Prerequisite: meet qualifications for teaching assistant; graduate standing; and consent of instructor. Tutoring and teaching students in undergraduate courses in Wildlife, Fish, and Conservation Biology. Weekly conferences with instructor; evaluations of teaching; preparing for and conducting demonstrations, laboratories, and discussions; preparing and grading examinations. May be repeated for a total of 6 units when a different course is tutored. (S/U grading only.)

298. Group Study (1-5)

299. Research (1-12)
(S/U grading only.)

David Van Leer, Ph.D., Professor (*English*)
Sophie Volpp, Ph.D., Assistant Professor (*East Asian Languages and Cultures*)
Martha West, J.D., Professor (*Law*)
Diane Wolf, Ph.D., Associate Professor (*Sociology*)

The Major Program

Women's Studies is an interdisciplinary major founded on the premise that gender is a historically variable construction that centrally shapes the historical experience and everyday lives of women as well

as men. Women's Studies also assumes that gender, race, class, and sexual and national identities are constructed in relation to each other. The intersections of these categories of experience as well as the history of debate over what these categories mean is an important strand of the Women's Studies curriculum. Women's Studies at UC Davis is particularly rich in faculty doing comparative, cross-cultural work on women and gender. Among the faculty offering courses for the major are scholars working on women and gender in Africa, the Caribbean, the Americas, China, Europe, Japan, India, various countries of the Middle East, Southeast Asia, and the United States.

The Program. Students majoring in this field may take courses in African American and African studies, American studies, anthropology, comparative literature, English, history, linguistics, Chicana/o studies, political science, psychology, sociology, Asian American studies, Native American studies, French, German, Italian, Spanish, textiles and clothing, and other related disciplines. Depending on individual career goals, each student will design a program in consultation with an adviser.

Career Alternatives. The B.A. degree in Women's Studies provides excellent grounding for undergraduates with career aspirations in law, medicine, public administration, and social services. Students wishing to pursue doctoral work will also find that interdisciplinary training in Women's Studies equips them with theoretical and methodological strengths in most disciplines and applied research fields. Increasingly, specialists in Women's Studies are being used as consultants in industry, higher education, insurance companies, and personnel firms. State and federal government agencies require people who have special training in understanding gender relations. Finally, educational institutions need specialists to develop and administer women's studies programs, women's centers, and other institutional structures designed specifically to study and assist women.

Women's Studies

A.B. Major Requirements:

UNITS

Preparatory Subject Matter	20
Two courses from Women's Studies 20, 50, 60, 70	
Three courses selected from the following:	
African American and African Studies 10, 15, American Studies 1E, 1F, Anthropology 2, 20, 21, Art History 15, Asian American Studies 1, 2, Chicana/o Studies 10, 50, Classics 15, Comparative Literature 12, Dramatic Art 1, English 30A or 30B, 45, 46A or 46B or 46C, History 72A, 72B, Humanities 10, Native American Studies 1, 10, Nature and Culture 1, Political Science 7, Psychology 1, Science and Society 1, 15, Sociology 1, 2, 3, Textiles and Clothing 7, Women's Studies 80	
Depth Subject Matter	44
Women's Studies 103, 104, 190 and one additional upper division Women's Studies course	
Cross-Cultural Requirement	
Choose four courses (at least one from each category). Courses used to meet this requirement may not duplicate those used to meet other Women's Studies major requirements. The list that follows represents a partial list of options; other courses may be included with the consent of the Women's Studies Adviser.	
<i>Ethnic Studies: Women of Color in the United States</i>	
African American and African Studies 123, 133, Anthropology 139, Asian American Studies 112, Chicana/o Studies 111, 122, 131, Native American Studies 134, 180, Sociology 134, 172, Women's Studies 160, 180.	

Cultures Outside the United States
 Anthropology 130, 131, 148B, Comparative Literature 135, 138, 159, English 185A, 185B, French 133, German 112A, 128A, 129, History 102G, 102H, 148A, 148B, Italian 141, Russian 142, Sociology 145B, Women's Studies 102, 182, 184.

Historical Material Prior to 1900
 African American and African Studies 123, Asian American Studies 112, English 185A, History 148A, 148B, Italian 141, Native American Studies 180.

Gender-based Courses.....12
 Choose one of two tracks: *Disciplinary* or *Thematic*. Courses used to meet this requirement may not duplicate those used to meet other Women's Studies major requirements.

Disciplinary track
 Choose three courses from one of the following focus groups:
Anthropology focus:
 Anthropology 129, 130, 131, 134, 139, 148B, 158, Women's Studies 102, 182, 184.

History focus:
 African American and African Studies 123, Asian American Studies 112, English 185A, History 102H, 102G, 148A, 148B, Italian 141, Native American Studies 180.

Literature and Language focus:
 Comparative Literature 135, 138, 159, English 185A, 185B, French 133, German 112A, 128A, 129, Italian 141, Linguistics 163, Russian 142, Women's Studies 180.

Sociology and Psychology focus:
 Anthropology 129, Chicana/o Studies 122, Psychology 149, Sociology 131, 132, 134, 145B, 172, Women's Studies 187.

Thematic track
 In consultation with a Women's Studies adviser, choose three courses that form a thematic cluster (for example, Gender and Race in the United States; The Cultural Representations of Gender; Gender and Public Policy; Gender and Global Issues; Gender and Autobiography; The Body, Theory and Representation; Sexualities; Gender and Science). Other clusters may be developed in consultation with a Women's Studies adviser.

Total units for the major

Major Adviser. All Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

Minor Program Requirements:

UNITS

Women's Studies	24
Women's Studies 20, 50, 60, 70 or 80	
Choose one from African American and African Studies 123, 133, Anthropology 139, Asian American Studies 112, Chicana/o Studies 102, 111, 122, 131, Native American Studies 134, 180, Sociology 134, 172, Women's Studies 160, 180	
Choose one from Anthropology 130, 131, 148B, Comparative Literature 135, 138, 159, English 185A, 185B, French 133, German 112, 128A, 129, History 148A, 148B, Italian 141, Russian 142, Sociology 145B, Women's Studies 102, 182, 184 ...	
Additional Electives from approved list of upper division cross-listed and Women's Studies courses	
Note: With prior consultation with an adviser, other upper division courses	

may be accepted toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

Minor Adviser. All Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

Graduate Study. The Women's Studies Program offers a designated emphasis in Feminist Theory and Research for students enrolled in the Ph.D. programs of twelve other affiliated departments. See "Feminist Theory and Research."

Courses in Women's Studies (WMS)

Lower Division Courses

20. Cultural Representations of Gender (4)
 Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. Interdisciplinary investigation of how specific cultures represent gender difference. Examine a variety of cultural forms and phenomena including film, television, literature, music, popular movements, and institutions. GE credit: ArtHum, Div, Wrt.—III. (III.)

25. Gender and Global Cinema (4)
 Lecture—3 hours; film viewing—3 hours. The role gender plays in film history/culture in various geographical contexts and in aspects of contemporary globalization. Films from nations such as China, Colombia, Cuba, Ethiopia, India, Iran, Korea, New Zealand, and the U.S. GE credit: ArtHum, Div, Wrt.—II. (II.) Projansky

50. Introduction to Women's Studies (4)
 Lecture—3 hours; discussion—1 hour or term paper (instructor's option). Interdisciplinary introduction which will survey and integrate literary, anthropological, psychological, historical, sociological and biological perspectives on the study of sex roles. GE credit: ArtHum or SocSci, Div, Wrt.—I, II, III. (I, II, III.)

60. Feminist Perspectives on Western Social Thought (4)
 Lecture/discussion—4 hours. A critical introduction to major traditions of social thinking in the West from a feminist perspective. GE credit: ArtHum or SocSci, Div.—(I.)

70. Theory and History of Sexualities (4)
 Lecture/discussion—4 hours. Key issues in the social construction, organization, and reproduction of sexualities such as the intersection of sexual identity with gender, race, ethnicity, and class, and the relation between movements for sexual liberation and the regulation of the body. GE credit: ArtHum or SocSci, Div.—(I.)

80. Special Topics in Women's Studies (4)
 Lecture/discussion—4 hours. In-depth examination of a women's studies topic related to the research interest of the instructor. May be repeated for credit when topic differs. Limited enrollment.

90X. Lower Division Seminar (2)
 Seminar—2 hours. Examination of a special topic in Women's Studies through shared readings, discussions, and written assignments. Offered in alternate years.

98. Directed Group Study (1-5)
 Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)
 Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses

102. Colonialism, Nationalism, and Women (4)
 Lecture/discussion—4 hours. Prerequisite: one course specified for Women's Studies major. Explores key dimensions of women's relationship to colonialism and nationalism in one or more societies. GE credit: SocSci, Div.—I.

103. Introduction to Feminist Theory (4)
 Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major.

Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race, identity politics, and the social construction of women's experience.—I. (I.)

104. Feminist Approaches to Inquiry (4)

Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. Feminist applications and transformations of traditional disciplinary practices; current issues and methodologies in feminist interdisciplinary work.—II. (II.)

130. Feminism and the Politics of Family Change (4)

Lecture/discussion—4 hours. Prerequisite: any Women's Studies course or Sociology 131 or 132. An examination of contemporary conflicts over family values and the changing family from a feminist perspective. Offered in alternate years. GE credit: ArtHum or SocSci, Div.—(II.)

139. Feminist Cultural Studies (4)

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies or American Studies. The histories, theories, and practices of feminist traditions within Cultural Studies. (Same as course American Studies 139.) GE credit: SocSci, Div, Wrt.—(II.)

140. Gender and Law (4)

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies. Exploration of women's legal rights in historical and contemporary context, discussing a variety of legal issues and applicable feminist theories. Topics include constitutional equal protection, discrimination in employment and education, sexual orientation discrimination, and the regulation of abortion. GE credit: SocSci, Div.—III.

158. Contemporary Masculinities (4)

Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. A multicultural study of contemporary trends in masculinity and the economic, social and political forces that have shaped them. Topics may include men's movements, ethnic nationalist masculinities, and images of masculinity in popular culture. GE credit: ArtHum or SocSci, Div.—III.

160. Representations of Women of Color in Cinema (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 20 or another film course. The representations of women of color in commercial and independent films from a feminist perspective. GE credit: ArtHum, Div.—(III.)

162. Feminist Film Theory and Criticism (4)

Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. Contemporary issues in feminist film theory including representation, spectatorship, and cultural production. Film stars, women filmmakers and the intersection of gender, race, sexuality and class in films and their audiences. GE credit: ArtHum, Div.—(I.)

164. Topics in Gender and Cinematic Representation (4)

Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. Examines a specific topic within the broader rubric of "gender and cinema." Topics vary with instructor. May be repeated twice for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div.—II.

180. Women of Color Writing in the United States (4)

Lecture/discussion—4 hours. Prerequisite: course 20 or 50. Literature, especially novels, written by contemporary women of color in the United States, understood in their socio-economic, cultural and historical contexts. GE credit: ArtHum, Div.—II.

182. Globalization, Gender and Identity (4)

Lecture/discussion—4 hours. Prerequisite: course 50. Feminist theories on affects of gender on self and identity and cross cultural study as it intersects gender with race, class, ethnicity. Impact of globalization processes on gender and identity. Offered in alternate years. GE credit: SocSci, Div, Wrt.—III.

184. Gender in the Arab World (4)

Lecture/discussion—4 hours. Prerequisite: course 50. Examination of the history, culture, and social/political/economic dynamics of gender relations and gendering in the Arab world. GE credit: SocSci, Div, Wrt.—II.

187. Gender and Social Policy (4)

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing and a course in Women's Studies. The role of gender in the creation of social policies, especially with respect to issues brought into the policy arena by contemporary feminism. Offered in alternate years. GE credit: SocSci, Div.—(III.)

190. Senior Seminar (4)

Seminar—4 hours. Prerequisite: senior standing in Women's Studies. Capstone course for senior Women's Studies majors, which focuses on current issues on feminism as they impact theory, public policy, and practice.—III. (III.)

192. Internship in Women's Studies (1-12)

Internship—3-36 hours; written report. Prerequisite: completion of a minimum of 84 units and consent of instructor; enrollment dependent on availability of intern positions with priority to Women's Studies majors. Supervised internship and study in positions/institutional settings dealing with gender-related problems or issues, as for example, a women's center, affirmative action office, advertising agency, or social welfare agency. Final written report on internship experience. (P/NP grading only.)

194HA-194HB. Senior Honors Project in Women's Studies (4-6)

Independent study—12 hours. Prerequisite: senior standing, Women's Studies major, and adviser's approval. In consultation with an adviser, students complete a substantial research paper or significant creative project on a Women's Studies topic. (Deferred grading only, pending completion of sequence.)

195. Thematic Seminar in Women's Studies (4)

Seminar—4 hours. Prerequisite: two courses specified for women's studies major. Group study of a topic, issue or area in feminist theory and research involving intensive reading and writing. May be repeated for credit when topic differs. Limited enrollment. GE credit: ArtHum or SocSci, Div.—III.

197T. Tutoring in Women's Studies (1-4)

Tutoring—3-12 hours. Prerequisite: upper division standing and consent of director. Leading small, voluntary discussion groups affiliated with a Women's Studies course. May be repeated for credit for a total of 8 units. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

Graduate Courses

200A. Current Issues in Feminist Theory (4)

Seminar—4 hours. Current issues in feminist theory; techniques employed to build feminist theory in various fields.—I. (I.)

200B. Problems in Feminist Research (4)

Seminar—4 hours. Prerequisite: course 200A with a grade of B+ or better. Application of feminist theoretical perspectives to the interdisciplinary investigation of a problem or question chosen by the instructor(s). May be repeated for credit when subject area differs.—II. (II.)

201. Special Topics in Feminist Theory and Research (4)

Lecture/discussion—4 hours. Explores in depth a topic in feminist theory and research related to the research interests of the instructor. May be repeated for credit when topic differs. Limited enrollment.—(III.)

250. Cultural Study of Masculinities (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structures. (Same course as American Studies 250.)—Newton, Mechling

299. Special Study for Graduate Students (1-12)

(S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Social-Cultural Diversity

These courses satisfy the GE requirement for *social-cultural diversity*. Many of these courses also provide GE credit for *topical breadth* or *writing experience*. Refer to the *topical breadth* and *writing experience* course lists to determine if any additional GE credit applies.

African American and African Studies 12, 15, 16, 17, 50, 52, 80, 100, 107A, 107B, 107C, 110, 111, 123, 133, 145A, 145B, 150A, 150B, 152, 156, 157, 160, 162, 163, 165, 168, 169, 170, 171	Chicana/o Studies 10, 21, 30, 50, 70, 110, 120, 121, 130, 131, 154, 160	History 8, 9A, 9B, 15, 17A, 17B, 72A, 72B, 112A, 112B, 115A, 115B, 115C, 115D, 130A, 132, 142A, 142B, 143, 144B, 147C, 148A, 148B, 148C, 149, 151D, 160, 161A, 161B, 162, 169A, 169B, 170A, 170B, 171A, 171B, 173, 177A, 177B, 178, 183A, 183B, 191A, 191B, 191C, 191D, 191E, 191F, 194A, 194B, 194C, 195B, 196A, 196B	157, 180, 181A, 181B, 181C, 188, 191
Agricultural and Resource Economics 15, 115A, 150	Classics 15, 171, 175	History and Philosophy of Science 150	Nutrition 120A, 120B
American Studies 1A, 1B, 1C, 1E, 21, 30, 110, 120, 130, 132, 133, 139, 151, 152, 153, 154, 155, 156, 157	Communication 135	Human Development 12, 103, 160	Philosophy 11, 14, 118, 119
Anthropology 1, 2, 3, 4, 15, 15V, 20, 23, 104N, 113, 117, 120, 122A, 122B, 124, 125A, 125B, 126A, 126B, 127, 128A, 128B, 133, 135, 139AN, 139BN, 140A, 140B, 141A, 141B, 142, 143A, 143B, 144, 146, 147, 148A, 148B, 148C, 149A, 149B, 158, 170, 172, 173, 176, 178, 179	Community and Regional Development 1, 2, 17, 151, 154, 157, 176	International Agricultural Development 10, 103, 162	Plant Biology 12
Art History 1C, 1D, 5, 150, 151, 152, 153, 163A, 163B, 163C, 163D, 164, 175, 183B, 183C, 185, 186, 188A, 189	Comparative Literature 4, 5, 6, 7, 9, 12, 25, 53A, 53B, 135, 138, 147, 151, 152, 153, 154, 159, 165, 166	Italian 105ST, 108, 108ST, 141, 150	Political Science 124, 126, 142, 152, 166, 168, 176
Art Studio 30, 132B, 149	Consumer Sciences 100	Japanese 10, 50, 101, 102, 103, 104, 105, 106, 107, 108, 109	Pomology 162
Asian American Studies 1, 2, 3, 110, 111, 112, 120, 140, 150B, 150C	Dramatic Art 150, 154, 155, 156A, 156B, 156C	Jewish Studies 10, 110, 111, 112, 120	Psychology 158, 170
	East Asian Studies 88, 113	Linguistics 160, 163, 166	Religious Studies 1, 2, 3A, 3B, 3C, 21, 23, 65C, 115
	Economics 115A	Medieval Studies 121	Russian 15, 44, 129, 139, 140, 141, 142, 143, 144, 150, 154, 159, 166
	English 30A, 30B, 166, 167, 171A, 171B, 178, 179, 181A, 181B, 182, 185A, 185B, 186	Music 28, 105, 126, 129	Science and Society 15
	Environmental Science and Policy 101, 133	Native American Studies 1, 5, 10, 32, 33, 46, 55, 101, 107, 115, 116, 117, 118, 120, 122, 130A, 130B, 130C, 133, 134, 156,	Sociology 4, 5, 30A, 128, 129, 130, 131, 132, 133, 134, 135, 145A, 145B, 146, 149, 172
	Exercise Biology 120		Spanish 139, 141, 141S, 148, 148S, 149, 170, 172, 174, 176
	French 51, 52, 124, 133		Textiles and Clothing 7, 8, 107, 174
	German 47, 168		Wildlife, Fish, and Conservation Biology 10
			Women's Studies 20, 25, 50, 60, 70, 102, 130, 139, 140, 158, 160, 162, 164, 180, 182, 184, 187, 195

* This course may not be used to satisfy a college or university composition requirement and GE *writing experience* simultaneously.

† Also assigned to another area of *topical breadth*. ‡ Credit for *writing experience* allowed if co-course taken concurrently (see *Writing Experience* list).

Writing Experience

These courses satisfy the GE requirement for *writing experience*, provided you have previously satisfied the Subject A requirement. Many of these courses also provide GE credit for *topical breadth* or *social-cultural diversity*. Refer to the *topical breadth* and *social-cultural diversity* course lists to determine if any additional GE credit applies.

African American and African Studies 12, 15, 16, 17, 50, 52, 80, 107A, 107B, 107C, 111, 152, 157, 162, 163, 170	159, 160A, 160B, 161A, 161B, 163, 164A, 164B, 164C, 164D, 165, 166, 166A, 166B, 167, 168A, 168B, 169, 170, 180	concurrently), 110, 115, 116G (course 116 required concurrently), 134, 143, 145	Molecular and Cellular Biology 10, 162
Agricultural Management and Rangeland Resources 7, 121, 130	Consumer Sciences 100	German 47, 48, 111, 112, 113, 115, 117, 118A, 118B, 118C, 118E, 119, 130, 140, 141	Music 10, 24A, 24B, 24C, 28, 105, 106, 110A, 110B, 110C, 110D, 110E, 110F, 121, 122, 124A, 124B, 126, 129

* This course may not be used to satisfy a college or university composition requirement and GE *writing experience* simultaneously.

† Also assigned to another area of *topical breadth*. ‡ Credit for *writing experience* allowed if co-course taken concurrently (see *Writing Experience* list).

GENERAL EDUCATION THEME OPTIONS

General Education theme options are sets of GE courses sharing a common intellectual theme. These GE theme options are not a separate element of the GE requirement, but a way of selecting your GE courses so that you may benefit from a coherent focus of study while completing the GE requirement. Completion of a theme satisfies the GE requirement for students with majors assigned to the GE topical breadth area of Arts and Humanities. Students with majors assigned to the topical breadth area of either Science and Engineering or Social Science will need to complete additional GE courses in Arts and Humanities to satisfy the campus GE requirement.

Global Population and Environmental Issues

For centuries, there have been concerns and predictions about population growth and its potential effects on the environment and the quality of life. Perspectives on population and environmental issues often vary based on such factors as gender, social class, culture, nation, race/ethnicity, and religion. In this group of courses, students will learn about the complex interplay among environmental, economic, and ethical issues through the study of global population patterns. They will learn how science addresses the use of natural resources by humans, along with the fundamentals of environmental impacts such as global warming. This option group of courses explores diverse perspectives on global population and environmental issues by examining biological, physical, and social processes that influence the everyday lives of people around the world.

Topics might include the social, economic, and environmental challenges of population growth; and the ethics and dilemmas of natural resource use.

Global Population	
Atmospheric Science 5 [or 10]	SciEng, Wrt
Environmental and Resource Sciences 60	SciEng, Wrt
Human Development 117	SciEng, Wrt
Agricultural and Resource Economics 15	SocSci, Div, Wrt
Science and Society 1	SciEng or SocSci, Div, Wrt
[or Fiber and Polymer Science 110]	SciEng or SocSci, Wrt]
International Agricultural Development 10,	SocSci, Div, Wrt
[or Community & Regional Development 1	SocSci, Div, Wrt]

Biodiversity and Cultural Diversity

The nations with the greatest biodiversity often have tremendous ethnic and cultural diversity. This option examines diversity in many interrelated contexts: biological diversity and the impact of contemporary humans; values and cultural practices in regard to production and consumption; the clothes people wear; creation and use of social spaces; and the preservation of genetic resources for food, fiber, and pharmaceuticals

Topics might include conservation biology; integration of human and natural systems; cultural expression through clothing and appearance; and discussion of what are cultural and social rights.

Biodiversity and Cultural Diversity	
Wildlife, Fish and Conservation Biology 10	SciEng, Div, Wrt
Plant Biology 11	SciEng, Wrt
Science and Society 105	SciEng, Wrt
Textiles and Clothing 7	SocSci, Div, Wrt
Community and Regional Development 2	SocSci, Div, Wrt
Landscape Architecture 2	SocSci, Wrt

Food and Fiber

This option focuses on food and fiber systems, from their plant, animal, or synthetic sources to their ultimate use by humans for health, safety, communication, and pleasure. Understanding these systems enables students to see the connections between the food and clothes that are part of our everyday lives and the scientific, social, and cultural issues that make them so significant to society as a whole.

Topics might include food and clothing safety, quality, and availability; media and consumer perceptions; and cultural histories, values, and meanings.

Food and Fiber	
Animal Science 1	SciEng, Wrt
[or Plant Biology 12]	SciEng, Div, Wrt]
Nutrition 10	SciEng
and Nutrition 11	SciEng, Wrt
[or Nutrition 20]	SciEng or SocSci]
[or Food Science and Technology 2]	SciEng or SocSci]
Textiles and Clothing 6	SciEng
Textiles and Clothing 7 or 107	SocSci, Div, Wrt
Science and Society 1	SciEng or SocSci, Div, Wrt
Viticulture and Enology 3-3W concurrently	SciEng or SocSci, Wrt

Changing Agriculture

Changing demographics, environmental issues, and social-political trends in California all play a role in public perceptions and policies related to our food and fiber systems, natural resources, and community values. These perceptions, policies, and values need to be critically examined in the context of larger global economic trends and environmental health and safety. In this option group of courses, students can explore a range of challenging issues related to the complex interplay between rural and urban needs and values.

Topics might include holistic approaches to agriculture; international migration and agricultural development; and how plants and animals influence the course of history.

Changing Agriculture Theme Option	
Animal Science 1 [or 13]	SciEng, Wrt
Entomology 110 [or 111]	SciEng, Wrt
Plant Biology 12	SciEng, Div, Wrt
Agricultural and Resource Economics 15	SocSci, Div, Wrt
Environmental and Resource Sciences 10-10G concurrently	SocSci, Wrt
[or Environmental & Resource Sciences 121*]	SciEng, Wrt]
Science and Society 2	SciEng or SocSci, Wrt

*If Environmental & Resource Sciences 121 is substituted, you will require an additional SocSci course.

UC DAVIS

2002-2003
2003-2004

APPENDIX

RESIDENCE FOR TUITION INFORMATION

Tuition Fee for Nonresident Students

If you have not been living in California with intent to make it your permanent home for more than one year immediately before the residence determination date for each term in which you propose to attend the University, you must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Law Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of the Regents of the University of California. Under these rules, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Who is a Resident?

If you are an adult student (over 18 years of age) you may establish residence for tuition purposes in California if: (1) you are a U.S. citizen; (2) you are a permanent resident or other immigrant; or (3) you are a nonimmigrant who is not precluded from establishing a domicile in the U.S. Nonimmigrants who are not precluded from establishing a domicile in the U.S. include those who hold visas of the following types: A, E, G, H-1, H-4, I, K, L, N, NATO, O-1, O-3, R or V. **To establish residence you must be physically present in California for more than one year and you must have come here with the intent to make California your home as opposed to coming to this state to go to school.** Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of your stay. You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and establishing those ties with California. Evidence of intent must be dated one year before the term for which you seek resident classification. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for one full year. **Effective Fall 1993, if your parents are not residents of California or you were not previously enrolled as a UC student, you will be required to be financially independent in order to be a resident for tuition purposes. Your residence cannot be derived from your spouse or your parents.**

Requirement for Financial Independence

You will be considered "financially independent" if one or more of the following applies: (1) you are at least 24 years of age by December 31 of the calendar year for which you are requesting residence classification; (2) you are a veteran of the U.S. Armed Forces; (3) you are a ward of the court or both parents are deceased; (4) you have legal dependents other than a spouse; (5) you are married, or a graduate student or a professional student, and you were not claimed as an income tax deduction by your parents or any other individual for the tax year immediately preceding the term for which you are requesting resident classification; or (6) you are a single undergraduate student and you were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you are requesting resident classification, and you can demonstrate self-sufficiency for those years and the current year; (7) you are a graduate student instructor, graduate student teaching assistant, research assistant, junior specialist, post-graduate researcher, graduate student researcher or teaching associate who is employed 49% or more of full time or who has funding equivalent to employment that is 49% or more of full time for the term for which classification is sought.

Establishing Intent to Become a California Resident

Indications of your intent to make California your permanent residence can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver's license or, if you do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which you keep your personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which you claim residence can also serve as an indication of your intent. Documentary evidence is required and all relevant indications will be considered in determining your classification. **Your intent will be questioned if you return to your prior state of residence when the University is not in session.**

General Rules Applying to Minors

If you are an unmarried minor (age 18 or under), the residence of the parent with whom you live is considered to be your residence. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of your parent's right of control. If you lived with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa which precludes you from establishing domicile in the U.S., you may establish your own residence when both your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors

1. Divorced/Separated Parents

You may be able to derive California resident status from a California resident parent if you move to California to live with that parent on or before your 18th birthday. If you begin residing with your California parent after your 18th birthday, you will be treated like any other adult student coming to California to establish residence.

2. Parent of Minor Moves From California

You may be entitled to resident status if you are a minor U.S. citizen or eligible alien whose parent(s) was a resident of California who left that state within one year of the residence determination date if: (1) you remained in California after your parent(s) departed; (2) you enroll in a California public postsecondary institution within one year of the time your parent(s) depart and establish residence elsewhere; and (3) once enrolled, you maintain continuous attendance in that institution. Financial independence will not be required in this case.

3. Self-Support

You may be entitled to resident status if you are a U.S. citizen or eligible alien and either a minor or age 18 and can prove the following: (1) you lived in California for the entire year immediately preceding the residence determination date; (2) you have been self-supporting for that year; and (3) you intend to make California your permanent home.

4. Two-Year Care and Control

You may be entitled to resident status if you are a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exemptions from Nonresident Tuition

1. Member of the Military

If you are a member of the U.S. military stationed in California on active duty, unless you are assigned for educational purposes to a state-supported institution of higher education, you may be exempt from the nonresident tuition fee until you have lived in California long enough to become a resident. You must provide the residence deputy on campus with a statement from your commanding officer or personnel officer stating that your assignment to active duty in California is not for educational purposes. The letter must include the dates of your assignment to the state.

2. Spouse or Other Dependents of Military Personnel

You are exempt from payment of the nonresident tuition fee if you are a spouse or a natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until you have lived in California long enough to become a resident. If you are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the armed forces, or the member of the military retires from active duty immediately after having served in California on active duty, you may retain this exemption under the conditions listed above.

3. Child or Spouse of Faculty Member

To the extent funds are available, if you are an unmarried dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate, you may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

4. Child or Spouse of University Employee

You may be entitled to resident classification if you are the unmarried dependent child or the spouse of a full-time University employee whose assignment is outside of California (e.g., Los Alamos Scientific Laboratory and University of California Washington D.C. Center). Your parent's or spouse's employment status with the University must be ascertained each term.

5. Child of Deceased Public Law Enforcement or Fire Suppression Employee

You may be entitled to a waiver of the nonresident tuition fee if you are the child of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

6. Dependent of a California Resident

A student who has not been an adult resident of California for more than one year and who is the dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date may be entitled to resident classification until the student has resided in California for the minimum time necessary to become a resident so long as continuous attendance is maintained at an institution.

7. Native American Graduate of BIA School

You are eligible for an exemption from the nonresident fee if you are a graduate of a California school operated by the Federal Bureau of Indian Affairs and you enroll at one of the University of California campuses. Currently, Sherman Indian High School in Riverside is the only California high school operated by the BIA.

Temporary Absence

If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former home during non-instructional periods, your presence in the state will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. **(A student who is in the state solely for educational purposes will NOT be classified as a resident for tuition purposes regardless of the length of his or her stay.)** If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or your parents if you are a minor) to verify that you did nothing inconsistent with your claim of a continuing California residence during your absence. Steps that you (or your parents) should take to retain a California residence include:

1. Continue to use a California permanent address on all records—educational, employment, military, etc.
2. Satisfy California resident income tax obligations. (Note: If you are claiming California residence, you are liable for payment of income taxes on your total income from the date you establish California residence. This includes income earned in another state or country.)
3. Retain your California voter's registration and vote by absentee ballot.
4. Maintain a California driver's license and vehicle registration. If it is necessary to change your driver's license and/or vehicle registration while you are temporarily residing in another state, you must change them back to California within the time prescribed by law.
5. Maintain active bank accounts.

Classification to Resident Status

All changes of status must be initiated prior to the payment deadline for the term which you intend to be reclassified.

Incorrect Classification

If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all nonresident tuition fees not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the campus residence deputy.

Inquiries and Appeals

Inquiries regarding residence requirements, determination and/or recognized exceptions should be directed to the Residence Deputy, Office of the University Registrar, One Shields Avenue, Davis, California 95616, (530-752-4749). **NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.** You are cautioned that this summary is **not** a complete explanation of the law regarding residence. *Please note that changes may be made in the residence requirement between the publication of this statement and the relevant residence determination date.* Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst (Legal Analyst—Residence Matters, 1111 Franklin St., 8th Floor, Oakland, CA 94607-5200) within 45 days of notification of the residence deputy's final decision.

UNIVERSITY POLICY ON NONDISCRIMINATION, SEXUAL HARASSMENT, STUDENT RECORDS AND PRIVACY

Nondiscrimination. The University of California, in accordance with applicable Federal and State laws and University policy, does not discriminate on the basis of race, color, national origin, religion, sex, disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to Student Judicial Affairs, 3200 Dutton Hall, 530-752-1128.

Sexual Harassment. Sexual harassment of all persons who participate in University programs and activities is prohibited by law and by University regulation (Policy 380-12). Sexual harassment is unacceptable and will not be condoned on the UC Davis campus. The Sexual Harassment Education Program (752-2255) provides information and assists in resolving complaints of sexual harassment informally. Formal grievance procedures for student complaints charging legally impermissible discrimination (Policy 280-05) are available in the Office of Student Judicial Affairs and may be used to bring complaints of sexual harassment or other discrimination. Students may receive informal counseling and formal assistance by contacting any of the following offices: Vice Chancellors, Deans of the Schools and Colleges, the Office of Student Judicial Affairs, or the Sexual Harassment Education Program. In addition, the ASUCD Student Grievance Center, Counseling Center, and the Women's Resources and Research Center are available to provide referral service.

Disclosures from Student Records. In accordance with the Federal Family Educational Rights and Privacy Act of 1974 and campus procedures implementing the University of California Policies Applying to the Disclosure of Information from Student Records, students at the Davis campus of the University have the right:

- To inspect and review their own student records within 45 days of the date the University receives a written request for access.

Students should submit their requests in writing to the University Registrar, Dean, Department Chair, or other appropriate campus official for the office having custody of the requested records. The request must identify the record(s) they wish to inspect and review. The campus official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the official receiving the request, that official shall advise the student of the correct official and redirect the request.

- The right to request the amendment of their own student records if a student believes the records are inaccurate or misleading.

Students should submit a written request to amend a record that they believe is inaccurate or misleading to the campus official responsible for the record, clearly identifying the portion of the record they want changed, and specifying why it is believed to be inaccurate or misleading. If the University determines that the record should not be amended as requested by the student, the University will notify the student of the decision and advise him/her of the right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

- The right to consent to disclosures of personally identifiable information contained in their student records, except to the extent that law and policy authorize disclosure without consent.

One exception permitting disclosure without consent is disclosure to campus officials having a legitimate educational interest in the records. A campus official is any individual designated by the campus to perform an assigned function on behalf of the campus. Legitimate educational interest means a demonstrated need to know by officials who act in a student's educational interest. A campus official has a "legitimate educational interest" in a record if the official is performing a task (1) specified in his or her job description; (2) specifically related to the official's participation in the student's education; (3) specifically related to the discipline of a student; or (4) specifically related to providing a service or benefit associated with a student or student's family, such as health care, counseling, job placement, or financial aid.

Another exception permitting disclosure without consent is Public Information, defined as information contained in a student record that would not generally be considered harmful or an invasion of privacy if disclosed, unless the student has notified the Office of the University Registrar that such information is to be treated as confidential with respect to him/herself. UC Davis has designated as public the following categories of information regarding students: the student's name, address(es) and telephone number(s) (local and/or permanent addresses, including e-mail addresses); major field of study; dates of attendance; number of course units in which enrolled; degrees and honors received; most recent previous educational institution attended; participation in officially recognized activities, including intercollegiate athletics, and the name, weight, and height of participants on intercollegiate athletic teams.

Parents of a dependent student may obtain student records, including transcripts, upon request and production of the parents' most recent IRS 1040 tax form which reflects the student is claimed as a dependent.

Parental/guardian information is confidential. It is used by the University only for notification of events, ceremonies, awards, and development or in case of an emergency involving the student.

- The right to file a complaint with the U.S. Department of Education concerning alleged failures by UC Davis to comply with the requirements of the Federal Educational Rights and Privacy Act, addressed to the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC. 20202-4605

These rights are implemented on the Davis campus by UCD Policy and Procedure Manual, Section 320-21, "Disclosure of Information from Student Records." The web site is at <http://www-mrak.ucdavis.edu/web-mans/ppm/welcome.htm>.

Questions about these rights should be referred to Jeanne Wilson, Coordinator of Student Related Policy, 530-754-8933.

Students may request in writing by the tenth day of instruction that their addresses, including e-mail address, and telephone listings or all personally identifiable information from their records not be regarded as public information. Students who desire to withhold their addresses and telephone listings may so indicate on the Student Address Form included with registration materials. Students who wish to keep their e-mail addresses confidential should go to <http://mothra.ucdavis.edu/services> and select "Change your whois information" from the options.

If a student does not indicate that he or she wishes to keep his or her address and telephone number confidential, then the information may be released as a matter of public record and will be included in a campus Student Directory.

The decision to withhold address and phone number or all information can be reversed by filing a form with the Office of the University Registrar.

Students who desire to withhold all information from the category of public information must file a form in the Office of the University Registrar. Students availing themselves of this

right should understand what the consequences of such action may be. For example, if all information is designated non-public information, the campus cannot make public any Honors received by the student (e.g., the award of a Regents' Scholarship or election to Phi Beta Kappa) and cannot include the student's name and degree earned in the campus commencement program without the student's written consent. Similarly, the student's status as a student or any degrees earned cannot be verified for potential employers without the student's written consent.

Privacy Act. A student's Social Security number is used to verify personal identity in the UCD Student Records System. In accordance with the Federal Privacy Act of 1974, students are hereby notified that disclosure of their social security number is mandatory. This recordkeeping system was established prior to January 1, 1975 pursuant to the authority of The Regents of the University of California under Art. IX, Sec. 9, of the California Constitution.

CAMPUS SECURITY, CRIME AWARENESS, AND ALCOHOL AND DRUG ABUSE PREVENTION

In accordance with federal law, UC Davis annually provides students and employees with information regarding campus security, crime statistics, and alcohol and drug abuse prevention, pursuant to the Student Right to Know and Campus Security Act of 1990 and the Drug Free Schools Act of 1989. The UC Davis Police and Campus Administration make continual efforts to reduce crime on campus. A well-informed community is better served and safer.

For a copy of the complete UC Davis security and crime prevention report, including crime statistics, campus security measures and crime reporting procedures, applicants for admission or prospective employees may contact the UC Davis Campus Violence Prevention Office, located in the UC Davis Police Department, 530-752-3299, or e-mail jmbeeman@ucdavis.edu.

ACCREDITATION

The University of California, Davis is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges, 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

UC Davis is also accredited by the Association of American Law Schools, American Bar Association, American Dietetic Association, Association of American Medical Colleges, American Association for Accreditation of Laboratory Animal Care, Accreditation Council for Graduate Medical Education, Council on Education of the American Veterinary Medical Association, Engineering Accreditation Commission of the Accreditation Board of Engineering and Technology, Computing Science Accreditation Commission, American Chemical Society, American Assembly of Collegiate Schools of Business, American Society of Landscape Architects, the Commission on Teacher Credentialing, and the Joint Commission on Accreditation of Hospitals. Students interested in reviewing the accreditation documents may do so by scheduling an appointment with the Office of the Provost, Mrak Hall.

THE BOARD OF REGENTS

Governance of the university is entrusted to a corporation called The Board of Regents. Of the individuals composing the board, 18 are California citizens appointed by the governor; and seven, including the president of the university and the governor of California, serve *ex officio*. A student regent is selected each year from a list of names submitted to the board by the Student Body Presidents' Council.

The regents have delegated authority in academic matters to the Academic Senate of the faculty, which determines academic policy and supervises the instructional activities of the entire university. All of the permanent faculty, as well as key administrators, are members of the Senate.

The regents have delegated authority for the organization of the university to the president. Richard C. Atkinson is president and head of the universitywide administration. Authority for the administration of each campus has been delegated to a chancellor.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

Regents Ex Officio

Gray Davis
Governor of California and President of the Regents
Cruz Bustamante
Lieutenant Governor of California
Robert M. Hertzberg
Speaker of the Assembly
Delaine Eastin
State Superintendent of Public Instruction
Robert C. Morrison
President of the Alumni Associations of the University of California
Fred Sainick
Vice President of the Alumni Associations of the University of California
Richard C. Atkinson
President of the University

Appointed Regents

(Current term expires on March 1 of year indicated)

Ward Connerly	(2005)
John G. Davies	(2004)
Judith L. Hopkinson	(2009)

ADMINISTRATIVE OFFICERS OF THE UNIVERSITY

- Richard C. Atkinson
President of the University
- C. Judson King
Provost and Senior Vice President—Academic Affairs
- Joseph P. Mullinix
Senior Vice President—Business and Finance
- Bruce B. Darling
Senior Vice President—University and External Relations
- W.R. Gomes
Vice President—Agriculture and Natural Resources
- Lawrence C. Hershman
Vice President—Budget
- William H. Gurtner
Vice President—Clinical Services Development
- Winston C. Doby
Vice President—Educational Outreach
- Anne C. Broome
Vice President—Financial Management
- Michael V. Drake
Vice President—Health Affairs
- John P. McTague
Vice President—Laboratory Management
- Julius Zelmanowitz
Vice Provost—Academic Initiatives
- Larry Coleman
Vice Provost—Research

UNIVERSITY CHANCELLORS

- Robert M. Berdahl
Chancellor at Berkeley
- Larry N. Vanderhoef
Chancellor at Davis
- Ralph J. Cicerone
Chancellor at Irvine
- Albert Carnesale
Chancellor at Los Angeles
- Carol Tomlinson-Keasey
Chancellor at Merced
- David Warren
Interim Chancellor at Riverside
- Robert C. Dynes
Chancellor at San Diego
- J. Michael Bishop
Chancellor at San Francisco
- Henry T. Y. Yang
Chancellor at Santa Barbara
- M.R.C. Greenwood
Chancellor at Santa Cruz

ADMINISTRATIVE OFFICERS—UC DAVIS

Chancellor

Larry N. Vanderhoef, Ph.D.

Chancellors Emeritus

Theodore L. Hullar, Ph.D.
James H. Meyer, Ph.D.

Vice Chancellors

- Virginia S. Hinshaw, Ph.D.
Provost and Executive Vice Chancellor
- Janet C. Hamilton, B.S.
Vice Chancellor—Administration
- Barry M. Klein, Ph.D.
Vice Chancellor—Research
- John Meyer, M.P.A.
Vice Chancellor—Resource Management and Planning
- Judy K. Sakaki, Ph.D.
Vice Chancellor—Student Affairs
- Celeste E. Rose, J.D.
Vice Chancellor—University Relations

Vice Provosts

- Barbara A. Horwitz, Ph.D.
Vice Provost—Academic Personnel
- John L. Bruno, Ph.D.
Vice Provost—Information and Educational Technology
- Patricia A. Turner, Ph.D.
Vice Provost—Undergraduate Studies
- William B. Lacy, Ph.D.
Vice Provost—University Outreach and International Programs

Associate Chancellor

Sally P. Springer, Ph.D.

Associate/Assistant Vice Chancellors/Provost

- Rahim Reed, M.P.A., J.D.
Associate Executive Vice Chancellor—Campus Community Relations
- Jill M. Blackwelder, B.S.
Associate Vice Chancellor—Facilities
- J. Michael Allred, M.B.A.
Associate Vice Chancellor—Finance, Accounting Officer
- Dennis W. Shimek, B.S.
Associate Vice Chancellor—Human Resources and Risk Management
- Stan Nosek, M.S.
Associate Vice Chancellor—Management Analysis and Planning
- André Lauchli, Ph.D.
Associate Vice Chancellor—Research
- Lynne Chronister, M.P.S.
Associate Vice Chancellor—Research Administration
- Robert G. Franks, Ph.D., J.D.
Associate Vice Chancellor—Student Affairs (Administration and Student Life)
- Thomas Gelder, J.D.
Associate Vice Chancellor—University Relations
- Dennis J. Dutschke, Ph.D.
Associate Vice Provost—International Programs
- Barbara O. Schneeman, Ph.D.
Associate Vice Provost—University Outreach
- Robert I. Loessberg-Zahl, M.P.P.
Assistant Executive Vice Chancellor
- Beverly Sandeen, Ph.D.
Assistant Vice Chancellor—Alumni Relations/Executive Director—CAAA
- Kelly Ratliff, M.B.A.
Assistant Vice Chancellor—Budget Resource Management
- Robert Segar, M.L.A.
Assistant Vice Chancellor—Campus Planning
- Richard F. Keller, B.A.
Assistant Vice Chancellor—Capital Resource Management
- Marjorie M. Dickinson, B.A.
Assistant Vice Chancellor—Government and Community Relations
- Maril R. Stratton, M.A.
Assistant Vice Chancellor—Public Communications
- Yvonne L. Marsh, M.S.
Assistant Vice Chancellor—Student Affairs (Enrollment, Advising and Academic Support Services)
- Janet C. Gong, Ed.D.
Assistant Vice Chancellor—Student Affairs (Student Relations)

University Librarian

Lydia Howell, M.D., *Associate Dean—Academic Affairs*

Fitz-Roy E. Curry, Ph.D., *Associate Dean—Research and Basic Sciences*

Faith Fitzgerald, M.D., *Assistant Dean—Student Affairs*

Vijaya Kumari, M.B.B.S., Ph.D., *Assistant Dean—Curricular Affairs*

Michael Wilkes, Ph.D., *Associate Dean—Medical Education*

Brian O'Neill, M.D., *Assistant Dean—Veterans Affairs*

Thomas Nesbitt, M.D., *Associate Dean—Outreach Telehealth and Continuous Medical Education*

School of Veterinary Medicine

Bennie I. Osburn, D.V.M., Ph.D., *Dean*

John R. Pascoe, B.V.Sc., Ph.D., *Executive Associate Dean*

James S. Cullor, D.V.M., Ph.D., *Associate Dean—Veterinary Medicine Teaching and Research Center, Tulare*

Susan Hildebrand, D.V.M., *Associate Dean—Student Programs*

_____, *Associate Dean—Research and Graduate Education*

Bradford P. Smith, D.V.M., *Associate Dean—Clinical Programs and Director—Veterinary Medical Teaching Hospital*

Donald J. Klingborg, D.V.M., *Assistant Dean—Public Programs and Director—Veterinary Extension*

University Extension

Dennis Pendleton, Ph.D., *Dean*

PROPORTION OF UC DAVIS GRADUATES FINDING WORK IN THEIR FIELDS OF CHOICE¹

The percent of alumni whose full-time job is in the field of their choice is shown by field of study. Figures do not include the 13 percent of graduates who had not decided on a career field at the time of the survey.

Field of Study², Percentage finding work in field of choice	
Agricultural Sciences, 81	Humanities, Arts and Cultural Studies, 70
Biological Sciences, 72	Human Sciences, 82
Engineering, 92	Mathematical and Physical Sciences, 96
Environmental Sciences, 82	Social Sciences, 70
Total, 78	

¹Source: A 1997 survey of June 1996 graduates conducted by Student Affairs Research and Information.

²Fields of Study are groups of related undergraduate majors as organized into UC Davis colleges or divisions.

RETENTION DATA¹ AND GRADUATION RATES AT UC DAVIS**Freshmen**

(Retention and graduation rates through Spring 2000 for all undergraduates entering UC Davis as freshmen.)

Fall Quarter of Initial Enrollment:	Number of Students	Percent Enrolled 4 Quarters	*Percent Graduating in 12 Quarters	*Percent Graduating in 15 Quarters
1990	3,230	94%	39%	74%
1991	2,356	93%	37%	73%
1992	2,930	93%	38%	73%
1993	3,179	94%	35%	73%
1994	3,232	93%	35%	70%
1995	3,319	92%	36%	73%

Transfer Students

(Retention and graduation rates through Spring 2000 for all undergraduates transferring to UC Davis as juniors.)

Fall Quarter of Initial Enrollment:	Number of Students	Percent Enrolled 4 Quarters	*Percent Graduating in 6 Quarters	*Percent Graduating in 9 Quarters
1991	658	93%	42%	80%
1992	862	93%	44%	78%
1993	863	93%	38%	78%
1994	1,066	94%	38%	78%
1995	1,091	94%	35%	77%
1996	1,111	92%	38%	76%
1997	1,017	92%	41%	77%

*These are not necessarily quarters of continuous enrollment. Students may drop out or go on Planned Educational Leave for a quarter or longer, and then resume their studies. (There are three quarters in each academic year.)

¹Source: Student Affairs Research and Information, UC Davis (January 2002).

AVERAGE YEARLY SALARY OFFERED TO GRADUATES WITH BACHELOR'S, MASTER'S, AND DOCTORATE DEGREES¹

Field of Study:	Average Yearly Salary		
	Bachelor's	Master's	Doctorate
Engineering	\$46,874	\$56,557	\$69,485
Humanities/Social Sciences	\$30,388	\$32,925	\$41,083
Health Sciences/Life Sciences	\$34,721	\$45,249	\$41,989
Physical Sciences	\$42,331	\$51,686	\$58,363
