in Environmental Biology and Management and in Environmental Policy Analysis and Planning. Courses in Environmental Science and Policy also supplement major programs in a wide variety of established disciplines, although highly motivated undergraduates who find existing majors unsuited to their educational objectives are encouraged to contact the chairperson and faculty of the department regarding individual majors in the College of Agricultural and Environmental Sciences (see [Individual Major](#), on page 310).

**Current Information.** Through its continuing contacts with many other departments and teaching divisions on the campus, the department develops a variety of special courses and workshops each year that cannot be listed here. Check with the Department office and with the expanded course description handbook of the College of Agricultural and Environmental Sciences for up-to-date information about courses.

**Graduate Study.** The faculty of the department offers the M.S. and Ph.D. degree programs of the Graduate Group in Ecology, as well as instruction through the graduate programs of the disciplines with which they are associated, such as agricultural and resource economics, evolution and ecology, sociology, political science, civil engineering, and anthropology. Further information about graduate programs in ecology should be obtained from the chairperson of the Graduate Group in Ecology.

**Graduate Adviser.** Mark W. Schwartz (*Ecology*)

## Courses in Environmental Science and Policy (ESP)

**Lower Division Courses****1. Environmental Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: University Writing Program 1; Economics 1A, 1B, Biological Sciences 1A, Political Science 1, and University Writing Program 102 recommended. Analysis of the biological, physical, and social interactions which constitute environmental problems, such as food production, energy development and conservation, pollution, and the conservation of natural environments. Emphasis on analysis of problems and the consequences of proposed solutions.—II. (II.) Holyoak

**10. Current Issues in the Environment (3)**

Lecture—3 hours. Prerequisite: elementary biology recommended. The science behind environmental issues, and policies affecting our ability to solve domestic and international environmental problems. Resources, environmental quality, regulation, environmental perception and conservation. Integrative case studies. Not open for credit to students who have completed course 1. GE credit: SciEng.—I. (I.) Schwartz

**10D. Current Issues in the Environment—Discussion (1)**

Discussion—1 hour. Prerequisite: course 10 concurrently. Small group discussions and preparation of papers for course 10. GE credit with concurrent enrollment in course 10: Wrt.—I. (I.) Schwartz

**30. The Global Ecosystem (3)**

Lecture—3 hours; 1 one-day field trip. Prerequisite: Biological Sciences 10 or Geography 1 or Anthropology 2. The interaction of climate and biotic adaptation and the production of ecological systems. The limits and opportunities for human use of different natural environments, and human utilization of the earth's biotic resources. GE credit: SciEng.

**30G. The Global Ecosystem: Laboratory/Discussion (2)**

Laboratory/discussion—3 hours. Prerequisite: course 30 concurrently. Presents natural history skills in plant and animal identification, soils, and geology. Emphasis on the diverse organisms and habitats of Northern California. GE credit with concurrent enrollment in course 30: Wrt.

**92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internship supervised by member of the faculty. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**Upper Division Courses****100. General Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisites: Biological Sciences 1A, 1B, 1C, Mathematics 16A, 16B; Statistics 13 recommended. Theoretical and experimental analysis of the distribution, growth and regulation of species populations; predator-prey and competitive interactions; and the organization of natural communities. Application of evolutionary and ecological principles to selected environmental problems.—I, II. (I, II.) Cornell, Sih

**101. Ecology, Nature, and Society (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Anthropology 1 or 2 or course 30 or Evolution and Ecology 100 or Biological Sciences 101. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as Anthropology 101.) GE credit: SocSci, Div, Wrt.—I. (II.) Borg-erhoff Mulder

**102. Cultural Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one lower division course in the social sciences, upper division standing. Comparative survey of the interaction between diverse human cultural systems and the environment. Primary emphasis given to people in rural and relatively undeveloped environments as a basis for interpreting complex environments. Not open for credit to students who have completed course 133. (Former course 133.) [Same course as Anthropology 102.] GE credit: SocSci, Div, Wrt.—III. (III.) Orlove

**105. Evolution of Societies and Cultures (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Anthropology 1 or 2 or course 30 or Evolution and Ecology 100 or Biological Sciences 101. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only 2 units of credit to students who have completed course 101 or Anthropology 101 prior to fall 2004. (Same course as Anthropology 105.) GE credit: SocSci, Wrt.—III. (III.) McElreath, Richerson

**(a) Environmental Science****110. Principles of Environmental Science (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 1A or 7A, Mathematics 16B or 21B, and Biological Sciences 1A. Application of physical and chemical principles, ecological concepts, and systems approach to policy analysis of atmospheric environments, freshwater and marine environments, land use, energy supplies and technology, and other resources.—II. (II.) Richerson

**116. The Oceans (3)**

Lecture—3 hours. Introductory survey of the marine environment; oceanic physical phenomena, chemical constituents, geological history, the sea's biota, and utilization of marine resources. (Same course as Geology 116.) GE credit: SciEng.

**116G. The Oceans: Discussion (2)**

Discussion—2 hours. Prerequisite: course 116/Geology 116 concurrently. Scientific method applied to the discovery of the processes, biota, and history of the oceans. Group discussion and preparation of papers on related topics. (Same course as Geology 116G.) GE credit with concurrent enrollment in course 116: Wrt.

**(b) Ecological Analysis****121. Population Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1B, 1C, Mathematics 16A-16B. Development of exponential and logistic growth models for plant and animal populations, analysis of age structure and genetic structure, analysis of competition and predator-prey systems. Emphasis is on developing models and using them to make predictions and solve problems. Offered in alternate years. GE credit: SciEng, Wrt.—II. Hastings

**123. Introduction to Field and Laboratory Methods in Ecology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 100 or the equivalent, Statistics 102 or the equivalent. Introduces students to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis.—III. (III.) M. Schwartz

**124. Marine and Coastal Field Ecology (10)**

Lecture—6 hours; discussion—4 hours; seminar—1 hour; laboratory—18 hours (Summer Session I). Prerequisite: Biological Sciences 1A; Statistics 13; course 100. Full-time study at Bodega Marine Laboratory. Intensive lecture-laboratory-field study of current ecological theory and problems with emphasis on marine populations and communities; techniques and evaluation of quantitative field research.—IV.

**125A. Field Ecology (4)**

Lecture—15 hours; discussion—10 hours; field work—15 hours (for two-week period). Prerequisite: consent of instructor. Designed to instruct and demonstrate to students the value and approaches of experimental research using the hypothetico-deductive experimental approach. May be taken only as part of the White Mountain Research Supercourse.

**125B. Physiological Ecology (4)**

Lecture—15 hours; discussion—10 hours; laboratory—15 hours (for two-week period). Prerequisite: consent of instructor. An examination of the functional means by which animals and plants cope with their environments, the physiological limits that determine the boundary conditions of various ecological niches. Unifying principles that describe the regulatory features of all animals or plants emphasized. May be taken only as part of the White Mountain Research Supercourse.—Quinn

**125C. Applied Conservation Biology (4)**

Lecture—10 hours; discussion—10 hours; field work—15 hours (for two-week period). Prerequisite: consent of instructor. Designed to introduce students to the complexities, and realities, of natural resource exploitation and preservation, emphasizing the trade-offs between economic benefits and ecosystem stability and sustainability. May be taken only as part of the White Mountain Research Supercourse.

**126. Environmental and Occupational Epidemiology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: introductory course in statistics and upper division standing. Methods and contemporary issues in environmental and occupational epidemiology. Effects of carcinogens, reproductive hazards, lifestyle factors, air and water pollution, infectious agents, and other hazards on human populations. Discussion of epidemiologic study designs, biases, and risk assessment.

**(d) Aquatic Ecosystems Analysis****150A. Physical and Chemical Oceanography (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Environmental Science and Policy/Geology 116, Physics 9B, Mathematics 22C, Chemistry 1C; or upper division standing in a natural science and consent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as Geology 150A.)—I. (I.) McClain, Spero, Largier

**150B. Geological Oceanography (3)**

Lecture—3 hours. Prerequisite: Geology 50 or 116. Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as Geology 150B.)—II. (II.) McClain

**150C. Biological Oceanography (4)**

Lecture—3 hours; discussion—1 hour; fieldwork—one weekend field trip required. Prerequisite: Biological Sciences 1A and a course in general ecology or consent of instructor. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. (Same course as Geology 150C.)

**151. Limnology (4)**

Lecture—3 hours; discussion—1 hour; special project. Prerequisite: Biological Sciences 1A and junior standing. The biology and productivity of inland waters with emphasis on the physical and chemical environment.—III. (III.) C. Goldman

**151L. Limnology Laboratory (3)**

Laboratory—6 hours; two weekend field trips. Prerequisite: course 151 (may be taken concurrently); junior, senior, or graduate standing. Limnological studies of lakes, streams, and reservoirs with interpretation of aquatic ecology.—III. (III.) C. Goldman

**155. Wetland Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100 or Plant Biology 117 required; course 110 or 151 recommended. Introduction to wetland ecology. The structure and function of major wetland types and principles that are common to wetlands and that distinguish them from terrestrial and aquatic ecosystems.—I. (I.) Rejmankova

**155L. Wetland Ecology Laboratory (3)**

Lecture—1 hour; laboratory—6 hours; field-work—two 1-day weekend field trips. Prerequisite: course 155 required (may be taken concurrently). Modern and classic techniques in wetland field ecology. Emphasis on sampling procedures, vegetation analysis, laboratory analytical procedures, and examples of successful wetland restoration techniques.—I. (I.) Rejmankova

**(e) Environmental Policy Analysis****160. Environmental Decision Making (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Political Science 1, Economics 1A, intermediate statistics, course 1 and course 166 or Political Science 182; upper division standing or consent of instructor. Alternative models of environmental policymaking, and application to case studies of decision making in the U.S. and California.—II. (II.) Sabatier

**161. Environmental Law (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing and one course in environmental science (course 1, 10, 110, Biological Sciences 1A, Environmental Toxicology 10, or Resource Sciences 100); Political Science 1 and University Writing Program 1 recommended. Introduction for non-Law School students to some of the principal issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA. GE credit: SocSci, Wrt.—III. (III.)

**163. Energy and Environmental Aspects of Transportation (4)**

Lecture—3 hours; extensive writing. Prerequisite: Economics 1A and Civil and Environmental Engineering 162. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as Civil and Environmental Engineering 163.) Offered in alternate years. GE credit: Wrt.—I. Sperling

**164. Ethical Issues in Environmental Policy (3)**

Lecture—3 hours. Prerequisite: courses 160, 168A; seniors only in Environmental Policy Analysis and Planning or by consent of instructor. Basic modes of ethical reasoning and criteria of distributive justice applied to selected topics in environmental policymaking.—III. (III.) Sabatier

**165. Science, Experts and Public Policy (4)**

Lecture—4 hours. Prerequisite: upper division standing in the social or biological sciences; course 160 or Political Science 108 recommended. Analysis of factors affecting the influence of scientists, planners, and other experts in policymaking. Several cases and controversies will be examined.

**166. Policy Making in Natural Resource Agencies (4)**

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: Political Science 1. Analysis of factors that shape the behavior and performance of public agencies responsible for natural resource management and environmental protection. Internet resources and field work used to design and execute a research and writing project on a selected agency or inter-agency program. GE Credit: Wrt.

**167. Energy Policy (4)**

Lecture—4 hours. Prerequisite: Resource Sciences 3 or Engineering 160; course 160 or Political Science 101, 107, or 109. Overview of U.S. energy policy; policy analysis, philosophy and methods; major policy issues, such as renewable vs. nonrenewable;

and applied studies of power plants, solar residential, and state policy options. Offered in alternate years.—(III.) Ogden

#### **168A. Methods of Environmental Policy Evaluation (5)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: Statistics 13; Economics 100 or Agricultural and Resource Economics 100A; Mathematics 16B or 21B; course 1; upper division standing. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefit-cost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation.—I. (I.) Ogden

#### **168B. Methods of Environmental Policy Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 168A. Continuation of course 168A, with emphasis on examination of the literature for applications of research and evaluation techniques to problems of transportation, air and water pollution, land use, and energy policy. Students will apply the methods and concepts by means of a major project.

#### **169. Water Policy and Politics (3)**

Lecture—3 hours. Prerequisite: Economics 1A or Political Science 1. The governance of water, including issues of water pollution/quality and water supply. The politics of water decision-making and effectiveness of water policy. Broad focus on federal water policy, with case examples from nationally significant U.S. watersheds. GE credit: SocSci.—III. (III.) Lubell

#### **(f) Environmental Planning**

##### **170. Conservation Biology Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 and Economics 1A; Economics 100 or Agricultural and Resource Economics 100A recommended. Analysis of policies designed to conserve species and their habitats. Emphasis on how individual incentives affect the success of conservation policies. Valuation of endangered species and biodiversity. Criteria for deciding conservation priorities.

##### **171. Environmental Planning (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; a course in social science and a course in environmental science. Laws, institutions, design and analysis methods, and means of implementation of plans for land use, air and water quality, transportation, and energy are examined. Theoretical and practical readings are used. Political and technical problems common to all planning processes emphasized.—III. (III.) Handy

##### **172. Public Lands Management (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A. Investigation of alternative approaches to public lands management by Federal and state agencies. The role each agency's legislation plays in determining the range of resource allocations. GE credit: SocSci.—I. (I.) Lubell

##### **173. Land Use and Growth Controls (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Political Science 1, Economics 1A, intermediate statistics (Sociology 106 or Statistics 102 or the equivalent), and local government (Applied Behavioral Science 157, 158 or Political Science 100, 102 or 104.) Exposes students to the economic, political, and legal factors affecting land use and growth controls, and helps students critically evaluate written materials in terms of their arguments and supporting data.

##### **175. Natural Resource Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100B or Economics 100 or the equivalent. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as Agricultural and Resource Economics 175.) GE credit: SocSci.—I. (I.) Farzin

#### **178. Applied Research Methods (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Statistics 103 or Sociology 106 or the equivalent. Research methods for analysis of urban and regional land use, transportation, and environmental problems. Survey research and other data collection techniques; demographic analysis; basic forecasting, air quality, and transportation models. Collection, interpretation, and critical evaluation of data.—II. (II.) Handy

#### **179. Environmental Impact Reporting (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: upper division standing; Biological Sciences 1A; one course from the following: course 1, 10, 110, Environmental Toxicology 10, or Environmental and Resource Sciences 100. Methods of analysis used in environmental impact reporting. Emphasis on effective writing; review and management of impact reports in the context of rational democratic planning systems.—III. (III.) Quinn

#### **179L. Environmental Impact Reporting Using Geographic Information (2)**

Laboratory/discussion—2 hours; laboratory—4 hours. Prerequisite: course 179 concurrently. Introduction to Geographic Information Systems (GIS) by using ArcView for assessment and environmental planning. Not open for credit to students who have completed Applied Biological Systems Technology 180, 181 or Agricultural Systems and Environment 132.

#### **(g) Other Courses**

##### **190. Workshops on Environmental Problems (1-8)**

Laboratory—2-16 hours. Prerequisite: consent of instructor. Workshops featuring empirical analyses of contemporary environmental problems by multidisciplinary student teams. Guided by faculty and lay professionals, the teams seek to develop an integrated view of a problem and outline a series of alternative solutions. Open to all upper division and graduate students on application. (P/NP grading only.)—I, II, III. (I, II, III.)

##### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.)

##### **198. Directed Group Study (1-5)**

(P/NP grading only.)

##### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **Graduate Courses**

##### **212A. Environmental Policy Process (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course in public policy (e.g., Environmental Science and Policy 160); environmental law (e.g., Environmental Science and Policy 161); course in bureaucratic theory (e.g., Political Science 187 or Environmental Science and Policy 166); course in statistics (e.g., Sociology 106 or Agricultural and Resource Economics 106). Introduction to selected topics in the policy process, applications to the field of environmental policy. Develops critical reading skills, understanding of frameworks of the policy process and political behavior, and an ability to apply multiple frameworks to the same phenomena. Offered in alternate years. (Same course as Ecology 212A.)—III. Sabatier

##### **212B. Environmental Policy Evaluation (4)**

Lecture—1 hour; discussion—1 hour; seminar—2 hours. Prerequisite: intermediate microeconomics (e.g., Economics 100); Statistics 108 or Agricultural and Resource Economics 106; policy analysis (e.g., Environmental Science and Policy 168A or the equivalent); Agricultural and Resource Economics 176. Methods and practices of policy analysis; philosophical and intellectual bases of policy analysis and the political role of policy analysis. (Same course as Ecology 212B.) Offered in alternate years.—II.

and the political role of policy analysis. (Same course as Ecology 212B.) Offered in alternate years.—II.

#### **220. Tropical Ecology (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: advanced introductory ecology course—course 100, Evolution and Ecology 101, 117; Evolution and Ecology 138 recommended. Open to graduate and undergraduate students who meet requirement subject to consent of instructor. An overview of present status of knowledge on structure and processes of major tropical ecosystems. Differences and similarities among tropical and temperate systems stressed. Offered in alternate years.—(III.) Rejmankova

#### **228. Advanced Simulation Modeling (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 128-128L; Statistics 108 or Agricultural and Resource Economics 106. Advanced techniques in simulation modeling; optimization and simulation, dynamic parameter estimation, linear models, error propagation, and sensitivity testing. Latter half of course will introduce model evaluation in ecological and social system models.

#### **252. Sustainable Transportation Technology and Policy (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 160 or the equivalent. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as Civil and Environmental Engineering 252.)—III. Sperling

#### **275. Economic Analysis of Resource and Environmental Policies (4)**

Lecture/discussion—4 hours. Prerequisite: Agricultural and Resource Economics 204/Economics 204. Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as Agricultural and Resource Economics 275.)—III. (III.)

#### **278. Research Methods in Environmental Policy (3)**

Lecture/discussion—3 hours. Prerequisite: Agricultural and Resource Economics 106 or the equivalent. Introduction to scientific research in environmental policy. Major issues in the philosophy of the social sciences. How to design research that acknowledges theoretical assumptions and that is likely to produce evidence in an intersubjectively reliable fashion with explicit recognition of its uncertainties. Offered in alternate years.—(III.) Sabatier

#### **298. Directed Group Study (1-5)**

#### **299. Research (1-12)**

Prerequisite: graduate standing. (S/U grading only.)

## Environmental Sciences

See [Agricultural Management and Rangeland Resources, on page 124](#); [Atmospheric Science, on page 152](#); [Environmental and Resource Sciences, on page 260](#); [Environmental Biology and Management, on page 257](#); [Environmental Horticulture and Urban Forestry, on page 259](#); [Environmental Policy Analysis and Planning, on page 259](#); [Environmental Toxicology, on page](#)

265; **Hydrology**, on page 308; **Landscape Architecture**, on page 321; **Soil and Water Science**, on page 449; and **Wildlife, Fish, and Conservation Biology**, on page 483.

## Environmental Toxicology

(College of Agricultural and Environmental Sciences)  
Ronald S. Tjeerdema, Ph.D., Chairperson of the Department

**Department Office.** 4138 Meyer Hall  
(530) 752-1142; <http://www.envtox.ucdavis.edu>

### Faculty

Gary N. Cherr, Ph.D., Professor (*Nutrition*)  
Michael S. Denison, Ph.D., Professor  
Fumio Matsumura, Ph.D., Professor (*Entomology*)  
Marion G. Miller, Ph.D., Professor  
Patricia Oteiza, Ph.D., Associate Professor, (*Nutrition*)  
Robert H. Rice, Ph.D., Professor  
Takayuki Shibamoto, Ph.D., Professor  
Ronald S. Tjeerdema, Ph.D., Professor  
Barry W. Wilson, Ph.D., Professor (*Animal Science*)  
Matthew J. Wood, Ph.D., Assistant Professor

### Emeriti Faculty

Donald G. Crosby, Ph.D., Professor Emeritus  
Dennis P. H. Hsieh, Sc.D., Professor Emeritus  
James N. Seiber, Ph.D., Professor Emeritus  
Michael W. Stimmann, Ph.D., Lecturer Emeritus  
Dorothy E. Woolley, Ph.D., Professor Emeritus

### Affiliated Faculty

George V. Alexeeff, Ph.D., Associate Adjunct Professor  
Susan Anderson, Ph.D., Associate Adjunct Professor  
Deborah Bennett, Ph.D., Instructor, Assistant Adjunct Professor (*Public Health Sciences, School of Medicine*)  
Arthur Craigmill, Ph.D., Cooperative Extension Specialist  
Mari Golub, Ph.D., Adjunct Professor (*CNPRC*)  
Dirk Holstege, Ph.D., Assistant Adjunct Professor  
Mike Johnson, Ph.D., Instructor, Director (*Aquatic Ecosystems Analysis Laboratory*)  
Norman Kado, Ph.D., Associate Adjunct Professor  
John Knezovich, Ph.D., Adjunct Professor  
Keith Miles, Ph.D., Instructor (*USGS*)  
Alyson E. Mitchell, Ph.D., Associate Professor (*Food Science and Technology*)  
Ruby Reed, Ph.D., Lecturer  
Cecilia Von Beroldinge, Ph.D., Lecturer (*UC Davis Extension Forensics Program and Department of Justice*)

### The Major Program

Toxic agents found in the environment include pesticides, food additives, industrial waste, metals and chemicals produced by animals, plants, fungi and bacteria. Students in the Environmental Toxicology major learn about the potential for toxicants to produce adverse effects by understanding both their environmental fate and biological activity. They learn about monitoring concentrations and the distribution and persistence of agents found in water, soil, air and foods. Toxicity testing procedures and exposure assessment are used to help signal potential for harm to humans and other species. By understanding the cellular targets and biochemical mechanisms of perturbation by toxicants, toxicologists can better estimate adverse effects. Overall, students learn mechanisms by which toxic agents act, their origin and fate and how toxicologists evaluate the risk of adverse effects and balance them against the benefits of use.

**The Program.** Preparatory courses in biology, chemistry, mathematics, and physics are required to

provide the chemical and biological principles which underlie toxicology. Students in the major are expected to understand the environmental fate and biological activity of different classes of toxic substances, and the legislative issues which arise from chemical use. Opportunities are available to develop in-depth understanding in areas of emphasis through selection of electives.

**Internships and Career Alternatives.** Occupations that use environmental toxicology include risk assessment, pharmaceutical or food additive toxicity testing and research, managing regulatory compliance, residue or forensic analysis, pest control, monitoring and field sampling, industrial hygiene, and environmental health and safety. A substantial proportion of graduates elect to pursue advanced training in graduate or professional schools. Others with the B.S. degree have gone on to law, medical or pharmacy school, as well as to graduate degrees in pharmacology, toxicology, agricultural and environmental chemistry, or public health. During undergraduate study, optional internships or research projects are recommended to provide training and work experience to help students set future goals.

### B.S. Major Requirements:

UNITS  
**English Composition Requirement ..... 0-8**  
See College requirement.

### Preparatory Subject Matter..... 64-70

Biological Sciences 1A, 1B, 1C ..... 15  
Chemistry 2A-2B-2C or 2AH-2BH-2CH, and 118A-118B-118C or 128A-128B-128C, 129A ..... 27-28  
Agricultural Management and Rangeland Resources 21 ..... 3  
Environmental Toxicology 10, 20 or 30 .... 3  
Mathematics 16A-16B or 21A-21B ..... 6-8  
Physics 1A-1B or 7A-7B ..... 6-8  
Statistics 100 ..... 4

### Breadth/General Education..... 36

Satisfaction of the General Education requirement to include courses selected with adviser's approval to complement the major; courses in agricultural economics, environmental studies, political science, psychology, and sociology are particularly recommended. .... 24  
Additional breadth in humanities and social sciences ..... 12

### Depth Subject Matter ..... 34-35

Biological Sciences 101, 102 or 103 .... 6-7  
Environmental Toxicology 101, 102A-102B, 103A-103B, 138 and (128, 131, 135, or 146) ..... 23

### Restricted/Other Electives ..... 24

Electives selected for area of specialization with adviser's approval; see department Web page for details.

### Unrestricted Electives ..... 7-14

### Total Units for the Degree ..... 180

**Major Adviser.** Takayuki Shibamoto

**Advising Center** for the major is in 4111 Meyer Hall. Contact the Academic Program Adviser at (530) 752-1042.

### Minor Program Requirements:

UNITS  
**Environmental Toxicology ..... 18**  
Environmental Toxicology 101, 102A, 103A ..... 12  
Elective courses 6 units minimum, selected from Environmental Toxicology 10, 128, 131, 135, 138, 146, 190, 198 and 199; 4 units combined maximum of 190, 198 and 199 with adviser approval ..... 6

**Minor Adviser.** M.S. Denison

**Graduate Study.** Programs of study leading to M.S. and Ph.D. degrees are available through related Graduate Groups such as Pharmacology and Toxicology, Biochemistry and Molecular Biol-

ogy, and Agricultural and Environmental Chemistry. For information on graduate study, contact the Advising office or the appropriate graduate adviser; see *Graduate Studies*, on page 97 in this catalog.

**Graduate Advisers.** M.G. Miller (*Pharmacology and Toxicology*), T. Shibamoto (*Agricultural and Environmental Chemistry*)

### Courses in Environmental Toxicology (ETX)

#### Lower Division Courses

##### 10. Introduction to Environmental Toxicology (3)

Lecture—3 hours. Hazardous substances, their effects on humans and their actions and movement in the environment. Emphasis on substances of current concern. GE credit: SciEng.—I. (I.) Tjeerdema

##### 20. Introduction to Forensic Science (4)

Lecture—3 hours; discussion—1 hour. Basic principles of forensic science and the types of information on which investigations focus, how the information is obtained and how it is used in criminal investigations, types of scientific skills that are required to practice forensic science as a profession, guidance on future training. Real cases will be discussed, and demonstrations of certain methods provided. GE credit: SciEng. Wrt.—III. (III.) Howitt, Rice

##### 30. Chemical and Drug Use and Abuse (3)

Lecture—3 hours. An overview of chemical use and abuse in our society. The effects of chemicals (therapeutic drugs, pesticides, food additives, herbal remedies, environmental contaminants, and recreational drugs) on humans and other living systems. GE credit: SciEng.—II. (II.) Craigmill

##### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.)

##### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### Upper Division Courses

##### 101. Principles of Environmental Toxicology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, 118B, or 128B and Biological Sciences 1A. Principles of toxicology with a focus on environmental, industrial, and natural chemicals. Topics include fate and effects of chemicals in organisms and the environment, air pollutants, insecticides, aquatic toxicology, endocrine disruptors, biomarkers and bioassays, and risk assessment.—I. (I.) Denison

##### 102A. Environmental Fate of Toxicants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, 118B, 128B or consent of instructor. Properties of toxic chemicals influencing their distribution and transformations; action of environmental forces affecting toxicant breakdown, movement, and accumulation; sources and occurrence of major classes of environmental toxicants. Not open for credit to students who have completed course 112A.—II. (II.) Tjeerdema

##### 102B. Quantitative Analysis of Environmental Toxicants (5)

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 102A. Sample preparation methods for trace analysis of environmental toxicants. Concept and techniques of advanced analytical instrumentation. Interpretation and use of analytical data. Not open for credit to students who have completed course 112B.—III. (III.) Shibamoto

##### 103A. Biological Effects of Toxicants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 102; course 101 and Neurobiology, Physiology, and Behavior 101 recommended. Biological effects of toxic substances in living organisms. Metabolism, cellular and tissue targets, mecha-

nisms of action, and pathological effects. Not open for credit to students who have completed course 114A.—II. (II.) Rice

### 103B. Biological Effects of Toxicants: Experimental Approaches (5)

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 103A. Experimental approaches for assessing the biological effects of toxicants. Not open for credit to students who have completed course 114B.—III. (III.) Miller

### 104. Environmental and Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101; Biological Sciences 103 or Animal Biology 103. Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as Nutrition 104.)—III. (III.) Oteiza, Rucker

### 110. Toxic Tragedies and Their Impact on Society (2)

Lecture—2 hours. Prerequisite: Biological Sciences 10 or the equivalent or consent of instructor; Chemistry 118A recommended. Examination of toxic tragedies, their origins, consequences, and effects on toxic regulation. Offered in alternate years. GE credit: Wrt.—(II.) Rice

### 111. Introduction to Mass Spectrometry (3)

Lecture—3 hours. Prerequisite: Chemistry 118C. Introduction to mass spectrometry, including ionization techniques, mass analyzers, interpretation of mass spectra, and applications of mass spectrometry. Emphasis on fundamental concepts of mass spectrometry necessary to identify and quantify organic molecules.—II. (II.) Charles

### 120. Perspectives in Aquatic Toxicology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, 118B or 128B, Biological Sciences 1A, or consent of instructor. Toxic substances, their fate in marine and freshwater systems, and their effects on aquatic organisms, populations, and ecosystems. Emphasis on substances and issues of current concern. Offered in alternate years.—II. Cherr, Tjeerdema

### 127. Environmental Stress and Development in Marine Organisms (10)

Lecture—4 hours; laboratory—12 hours; discussion—2 hours. Prerequisite: course 101 or Biological Sciences 102 or 104 or the equivalent; course 114A or Nutrition 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as Nutrition 127.) GE credit: SciEng.—IV. Cherr

### 128. Food Toxicology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102 and 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as Food Science and Technology 128.) GE credit: SciEng.—III. (III.) Shibamoto, Mitchell

### 131. Environmental Toxicology of Air Pollutants (3)

Lecture—3 hours. Prerequisite: Chemistry 8B (may be taken concurrently) or the equivalent; Biological Sciences 102 recommended. Field trip required. Toxicology of air pollutants in the ambient, indoor, and occupational environments. Health effects, sources, environmental fates, pulmonary responses, sampling and analyses, and air-quality criteria and standards.—I. (I.) Kado

### 135. Health Risk Assessment of Toxicants (3)

Lecture—3 hours. Prerequisite: course 101; course 114A recommended. Current practices of health risk assessment of environmental chemicals using toxicological principles and their application to regulatory control of these chemicals. GE credit: SciEng.—I. (I.) Reed

### 138. Legal Aspects of Environmental Toxicology (3)

Lecture—3 hours. Prerequisite: course 10 or 101 recommended. Federal and California legislation concerning air and water pollution, pesticide use, food and feed additives, consumer protection, and occupational exposure to toxic substances; roles of federal regulatory agencies; alternatives to government control.—II. (II.) Alexeeff

### 146. Exposure and Dose Assessment (3)

Lecture—3 hours. Prerequisite: course 112A; course 135 recommended. The exposure component of risk assessment; specifically, the presence and/or formation of toxic substances in environmental media, their movement within and between contaminated media, and the contacts of human populations with those media. Offered in alternate years. GE credit: SciEng.—III. Bennett

### 190. Seminar (1)

Seminar—1 hour. Prerequisite: consent of instructor. Selected topics presented by students, faculty, or outside speakers covering current research and instructional activities within environmental toxicology. Reports and discussion concerning oral and written presentations, literature sources, and career opportunities. (P/NP grading only.)—I, II, III. (I, II, III.)

### 190C. Research Group Conference (1)

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference of advanced research methods and the interpretation of research results. (P/NP grading only.)—I, II, III. (I, II, III.)

### 190S. Environmental Toxicology Career Seminar (1)

Seminar—1 hour. Careers in environmental toxicology; discussions with graduates from the Department of Environmental Toxicology and other experts in the field. (P/NP grading only.)—I. (I.)

### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.)

### 194HA-194HB. Honors Research (3-3)

Discussion—1 hour; laboratory—6 hours. Prerequisite: senior standing, minimum GPA of 3.250, consent of instructor. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings. (P/NP grading only; deferred grading pending completion of sequence.)

### 194HC. Honors Research (3)

Laboratory—6-9 hours; discussion—1 hour. Prerequisite: senior standing, minimum GPA of 3.250, and consent of instructor. Continuation of course 194HA-194HB. (P/NP grading only.)

### 197T. Tutoring in Environmental Toxicology (1-5)

Hours and duties will vary depending upon course being tutored. Prerequisite: advanced standing in Environmental Toxicology, a related major, or the equivalent experience and consent of instructor. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit up to a total of 5 units. (P/NP grading only.)

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

## Graduate Courses

### 203. Environmental Toxicants (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 128C (or the equivalent), or Chemistry 8B and consent of instructor. Toxic chemicals: selected topics illustrating their occurrence, structure, and the reactions underlying detection, toxicity, fate, and ecological importance. Offered in alternate years.—II. Matsumura

### 214. Mechanisms of Toxic Action (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103, and consent of instructor. Chemical, biochemical, and molecular mechanisms underlying the adverse effects of toxic chemicals. Students are required to write a grant proposal and participate in a grant review panel. Offered in alternate years.—(III.) Denison, Hammock

### 220. Analysis of Toxicants (3)

Lecture—3 hours. Prerequisite: coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as Forensic Science 220.)—I. (I.) Wood

### 220L. Analysis of Toxicants Laboratory (2)

Laboratory—6 hours. Prerequisite: course 220 (may be taken concurrently) and consent of instructor. Laboratory techniques for microanalysis of toxicants. Separation, detection, and quantitative determination of toxicants using chemical and instrumental methods.—I. (I.)

### 228. Gas Chromatography/Mass Spectrometry of Toxic Chemicals (3)

Lecture—1 hour; discussion—1 hour; laboratory—3 hours. Prerequisite: course 220 and Chemistry 129C; or consent of instructor. Application of GC/MS techniques to investigate toxic chemicals. Mass spectral fragmentations and their application to the structural elucidation. Practical application of GC/MS in current research. Preference given to environmental toxicology graduate students.—II. (II.) Holstege

### 234. Neurophysiological Basis of Neurotoxicology (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101 or the equivalent; basic understanding of neurophysiology. Mechanisms of action at the cellular and systemic level of a number of different neurotoxins and toxicants. Examples of ways toxins may act on the nervous system and techniques for study of neurotoxicology. (Same course as Physiology 234.)—I. (I.) Woolley

### 240. Ecotoxicology (3)

Lecture—3 hours. Prerequisite: elementary course in toxicology and ecology or the equivalent, or consent of instructor. Principles of toxicology as applied to chemical action on natural populations, communities, and ecosystems. Physical, chemical, and biological characteristics which influence ecotoxic effects, modeling, and field research. Selected case histories are analyzed and presented in class.—III. (III.) Johnson, Miles

### 250. Reproductive Toxicology (3)

Lecture—1.5 hours; lecture/discussion—1.5 hours. Prerequisite: Physiology 220 or Pharmacology—Toxicology 203. Application of toxicological principles in reproductive studies. Effects of toxicants on the male, female, and developing embryo/fetus. Critical evaluation of reproductive toxicity studies and development of mechanistic approaches to understanding how chemical exposure can adversely affect reproduction. Offered in alternate years.—(II.) Miller, Golub

### 260. Immunotoxicology (3)

Lecture—3 hours. Prerequisite: undergraduate or graduate introduction to immunology coursework recommended, but not required; graduate standing or consent of instructor. Provides students with skills and knowledge for evaluating and applying research on the impact of environmental toxicants on immunological function in human and wildlife populations. Offered in alternate years.—(I.) Golub

**270. Toxicology of Pesticides (3)**

Lecture—3 hours. Prerequisite: one course each in (a) Organic Chemistry, (b) Biochemistry, (c) Toxicology (course 101 or equivalent), or consent of instructor; graduate standing. Classification and chemical properties of pesticides, their mode of action, metabolism and disposition, pesticide resistance, effects on human health and ecological health and methods of risk benefit analyses. Offered in alternate years.—(II.) Matsumura

**278. Molecular Techniques (3)**

Lecture—3 hours. Prerequisite: graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as Forensic Science 278.) Offered in alternate years.—Denison, Rice

**280. Forensic DNA Analysis (3)**

Lecture—3 hours. Prerequisite: coursework in genetics and molecular biology. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as Forensic Science 280.) Offered in alternate years.—Von Beroldingen

**290. Seminar (1)**

Seminar—1 hour. Current topics in environmental toxicology. (S/U grading only.)—I, II, III. (I, II, III.)

**290C. Advanced Research Conference (1)**

Lecture/discussion—1 hour. Prerequisite: consent of instructor. Presentation and critical discussion of advanced research methods and interpretation of research results. Designed primarily for graduate students. (S/U grading only.)—I, II, III. (I, II, III.)

**297T. Tutoring in Environmental Toxicology (1-5)**

Hours and duties will vary depending upon course being tutored. Prerequisite: graduate standing in Environmental Toxicology, a related major, or the equivalent experience, and consent of instructor. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit up to a total of 5 units. (S/U grading only.)

**298. Group Study (1-5)****299. Research (1-12)**

(S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Epidemiology

See **Epidemiology and Preventive Medicine (EPP)**, on page 355; and **Medicine and Epidemiology (VME)**, on page 473.

**Graduate Study.** The Graduate Group in Epidemiology offers programs of study and research leading to the M.S. and Ph.D. degrees. Areas of emphasis include environmental/occupational epidemiology; infectious disease epidemiology; epidemiologic methods and biostatistics; health services and economics; nutritional epidemiology, and wildlife epidemiology. For detailed information regarding the program, address the chairperson of the group or see the Web page.

**Graduate Advisers.** P. Kass (Population Health and Reproduction), Tim Carpenter (VM, Medicine & Epidemiology), Danielle Harvey (Public Health Sciences, Biostatistics)

**Required Courses for the Program**

**Prerequisite Courses.** Prerequisites may be taken concurrently with required courses below.

Mathematics 16A-16B or 21A-21B  
Statistics 102, 106, and 108, or Preventive  
Veterinary Medicine 402, 403

**Required Courses.** These courses are required of all students in the program; M.S. and Ph.D. degrees. These requirements cannot be waived and must be met before a student's Qualifying Examination.

Epidemiology 204, 205A, 205B, 206, 207,  
208 and 290  
Statistics 130A-130B  
One course from Population Health and  
Reproduction 202 or Statistics 144

**Related Courses.** For additional course work in Epidemiology, please see Medicine and Epidemiology, Preventive Veterinary Medicine, Population Health and Reproduction, Epidemiology and Preventive Medicine, and Statistics.

**Courses in Epidemiology (EPI)****Graduate Courses****204. Statistical Models, Methods, and Data Analysis for Scientists (4)**

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: Statistics 130B or 131B, or 133; Statistics 108 recommended. Development of broad statistical skills useful for the analysis of scientific data. Special emphasis given to determining factors associated with characteristics like disease and time-to-event. Analysis of data that can be modeled as generalized linear and generalized linear mixed models, parametric and non-parametric survival models, and models for correlated, clustered, longitudinal data.—III. Johnson

**205A. Principles of Epidemiology (4)**

Lecture—4 hours. Prerequisite: Preventive Veterinary Medicine 402 or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Preventive Veterinary Medicine 405.)—I. (I.)

### 205B. Integration of Epidemiologic Concepts (2)

Discussion—2 hours. Prerequisite: Preventive Veterinary Medicine 405/course 205A can be taken concurrently. In-depth analysis and integration of basic epidemiologic concepts and approaches to epidemiologic research presented in Preventive Veterinary Medicine 405/course 205A, with more mathematical and theoretical basis and examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of diagnostic tests, study design, and surveillance.—I. (I.)

### 206. Epidemiologic Study Design (3)

Lecture—1.5 hours; discussion—0.9 hours; laboratory—1.8 hours. Prerequisite: Preventive Veterinary Medicine 405/course 205A, course 205B. Builds on concepts presented in course 205A. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in course 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Preventive Veterinary Medicine 406A.)—II. (II.)

### 207. Advanced Concepts in Epidemiologic Study Design (4)

Lecture/discussion—4 hours. Prerequisite: course 205B and 206. In-depth integration of advanced concepts in study design, with theory and examples, including confounding, effect modification under additive and multiplicative models, internal and external validity, bias, misclassification, alternate designs, source populations, statistical power and sample size, causation, and genetic epidemiology.—III. Gold, Kass

### 208. Analysis and Interpretation of Epidemiologic Data (3)

Lecture—16 sessions; laboratory—21 sessions; project. Prerequisite: course 204 (may be taken concurrently) and 207, and either Statistics 144 or Population Health and Reproduction 202 and entry level skill in standard statistical software (e.g., SPSS, BMDP, SAS, Stata, MinTab, S-Plus). Application of theory and concepts of statistics and epidemiology to analysis and interpretation of data typically found in veterinary and human epidemiologic research.—III. Beckett

### 210A. Analytic Epidemiology I: Case-Control Studies (3)

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Statistics 130B and Preventive Veterinary Medicine 406 (or the equivalent), or consent of instructor. Theory and practice of epidemiologic data analysis. Topics include confounding, stratification, matching, interaction, and logistic regression. (Same course as Population Health and Reproduction 210A.)—II. (II.) Kass

### 210B. Analytic Epidemiology II: Cohort Studies (3)

Lecture—3 hours. Prerequisite: course 210A. Theory and practice of epidemiologic data analysis. Topics include rates, rate standardization, cohort analysis, Poisson regression, and survival/failure-time methods. (Same course as Population Health and Reproduction 210B.)—III. (III.) Kass

### 220. Problems in Epidemiologic Study Design (4)

Lecture—3 hours; term paper. Prerequisite: Preventive Veterinary Medicine 405 and 406 or the equivalent; Population Health and Reproduction 207 concurrently; Statistics 102 and 106 or the equivalent. Design and development of research protocols and funding applications for peer review. Application of research methods data collection and management and statistical analysis in research proposals. Methods of evaluating research proposals, mechanisms of funding, specifying human subjects considerations.—III. (III.) Gold

### 222. Epidemiological Modeling (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Preventive Veterinary Medicine 405. Techniques of model building and simulation of infectious diseases will be explored. Epidemiologic modeling philosophy, construction and validation will be emphasized. Offered in alternate years.—II. Carpenter

### 223. Spatial Epidemiology (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Preventive Veterinary-Medicine 405 or Environmental Studies 126 or Veterinary Medicine 409. Geographic Information Systems (GIS) and spatial statistics. Students are expected to complete a term project based on their graduate research. Offered in alternate years.—II. Carpenter

### 224. Health and Ecological Risk Analysis (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Preventive Veterinary Medicine 406 or consent of instructor; background in statistics, including multivariable techniques; a course in differential equations. A methodological approach to risk analysis for human and animal-related health and ecological issues. Basic principles of risk analysis, including perception, communication, assessment and management. Emphasis on the assessment of risk.—III. (III.) Carpenter

### 225. Advanced Topics in Epidemiology Methods (2)

Discussion—2 hours. Prerequisite: courses 205B, 206, and 207 (or equivalents, with consent of instructor). An in-depth study of topics in epidemiology theory and methods, selected from: causal inference, confounding, study design, or other related areas, with year to year variation. Readings are assigned and students are expected to lead discussions on them. May be repeated for credit when topic differs. Not offered every year.—II, III. (II, III.) Hertz-Picciotto

### 228. Quantitative Methods for Epidemiology (4)

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: Mathematics 16A-B or Mathematics 17A-B or Mathematics 21A-B or equivalent; basic knowledge of the principles of linear algebra, such as those taught in mathematics 22A or the equivalent, is assumed. The application of calculus and linear algebra techniques to epidemiological problems. Topics include applications of derivatives, integration, exponentials and logarithms, multivariable calculus, infinite series, and vector and matrix algebra, with examples and problems taken from epidemiology and related subjects.—I. (I.) Harvey

### 240. Principles of Injury Epidemiology (3)

Lecture/discussion—3 hours. Overview of the epidemiology of human injury, including general principles, surveillance methods, behavioral factors, environmental factors, treatment issues and engineering and legal interventions related to vehicular injuries, drownings, falls, fires and burns, poisonings, firearm injuries, and other intentional injuries.—I. (I.) Romano

### 250. Introduction to Clinical Research Design and Epidemiology (1)

Lecture—1 hour. Prerequisite: graduate standing or medical/nursing personnel. For medical personnel who are or will be involved in medical research. Review of basics of clinical study design and analysis of clinical data. (S/U grading only.)—I. (I.) McCurdy, Romano

### 251. Environmental Epidemiology (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary-Medicine 405 (may be taken concurrently); upper division undergraduates who have completed Environmental Studies 126; or the equivalent. Examination of the human health effects and the risk of disease from community, occupational, and personal exposure to toxic substances. Offered in alternate years.—I. Gold

### 260. Epidemiology of Chronic Diseases and Aging (3)

Lecture/discussion—3 hours. Overview of the epidemiology of chronic disease in old age. Topics include biology of aging, epidemiology of cardiovascular disease, neoplasms, osteoporosis and fractures, psychosocial factors and health in old age, dementias, functional status and prevention of disease.—II. (II.)

### 270. Research Methods in Occupational Epidemiology (3)

Laboratory/discussion—3 hours. Prerequisite: Environmental Studies 126 or Preventive Veterinary-Medicine 405; and Statistics 102 or Epidemiology and Preventive Medicine 402. Methods used in epidemiologic research on occupational hazards. Topics include design and analysis of cohort and case-control studies, sample size, measuring dose, choosing a control group, validation of employment and health data, interpreting negative studies, and analysis software. Offered in alternate years.—III. Beaumont

### 272. Cancer Epidemiology (2.0)

Recitation—1 hour; discussion—1 hour. Prerequisite: must have basic understanding of epidemiologic and statistical concepts that are covered in courses 205A, 205B, 206 (may be taken concurrently), and Statistics 102. We will cover the underlying concepts essential to understanding cancer epidemiology, such as trends in incidence and survival, epidemiologic methods used to assess cancer etiology, prevention and control, and an introduction to the cancerinitiation and progression multi-stage model.—II. (II.) Butler, Cress

### 290. Seminars in Epidemiology (1)

Seminar—1 hour. Students will actively participate in presentation and discussion of ongoing or published research projects in epidemiology. (S/U grading only.)—III. (III.)

### 291. Seminars in Human Health Services Research and Clinical Epidemiology (1)

Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as General Medicine 291.) (S/U grading only.)—I, II, III. (I, II, III.)

### 298. Group Study (1-5)

Seminar—1-5 hours. Group study in selected areas of epidemiology.

### 299. Research (1-12)

Research in selected areas of epidemiology. (S/U grading only.)

## Evolution and Ecology

(College of Biological Sciences)

Maureen Stanton, Ph.D., Chairperson of the Section

Section Office, 2320 Storer Hall

(530) 752-1272; <http://www.eve.ucdavis.edu>

### Faculty

David J. Begun, Ph.D., Professor

James A. Doyle, Ph.D., Professor

Jonathan A. Eisen, Ph.D., Professor

(Medical Microbiology and Immunology)

Brian P. Gaylord, Ph.D., Assistant Professor

Richard K. Grosberg, Ph.D., Professor,

Academic Senate Distinguished Teaching Award

Artyom V. Kopp, Ph.D., Assistant Professor

Charles H. Langley, Ph.D., Professor

Sergey V. Nuzhdin, Ph.D., Professor

Gail L. Patricelli, Ph.D., Assistant Professor

Bruce H. Rannala, Ph.D., Professor

Marcel Rejmanek, Ph.D., Professor

Michael J. Sanderson, Ph.D., Professor

Eric D. Sanford, Ph.D., Assistant Professor

Thomas W. Schoener, Ph.D., Professor

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

H. Bradley Shaffer, Ph.D., Professor  
 Arthur M. Shapiro, Ph.D., Professor,  
*Academic Senate Distinguished Teaching Award*  
 John J. Stachowicz, Ph.D., Associate Professor  
 Judy A. Stamps, Ph.D., Professor  
 Maureen L. Stanton, Ph.D., Professor, *UC Davis Prize for Teaching and Scholarly Achievement*  
 Sharon Y. Strauss, Ph.D., Professor  
 Donald R. Strong, Ph.D., Professor  
 Catherine A. Toff, Ph.D., Professor  
 Michael Turelli, Ph.D., Professor  
 Peter C. Wainwright, Ph.D., Professor  
 Susan Williams, Ph.D., Professor

**Emeriti Faculty**

John H. Gillespie, Ph.D., Professor Emeritus  
 Leslie D. Gottlieb, Ph.D., Professor Emeritus  
 Milton Hildebrand, Ph.D., Professor Emeritus,  
*Academic Senate Distinguished Teaching Award*  
 Everett W. Jameson, Ph.D., Professor Emeritus  
 Peter R. Marler, Ph.D., Professor Emeritus  
 Robert W. Pearcy, Ph.D., Professor Emeritus  
 Timothy Prout, Ph.D., Professor Emeritus  
 Kenneth E. F. Watt, Ph.D., LL.D, Professor Emeritus

**Affiliated Faculty**

Susan L. Keen, Ph.D., Lecturer  
 Peter L. Chesson, Ph.D., Adjunct Professor

**The Evolution, Ecology and Biodiversity Major Program**

The major in Evolution, Ecology and Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

**The Program.** The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology and Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

**Career Alternatives.** A degree in evolution, ecology and biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

**A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>41-43</b>
Biological Sciences 1A-1B-1C.....	15
Chemistry 2A-2B.....	10
Chemistry 8A-8B.....	6
Mathematics 16A-16B or Statistics 100 or 102.....	4-6
Physics 1A-1B.....	6
<b>Depth Subject Matter .....</b>	<b>36</b>
Biological Sciences 101.....	4
One course from Evolution and Ecology 100; Geology 107; Anthropology 151.....	3-4
One course from Evolution and Ecology 101; Environmental Science and Policy 100; Wildlife, Fish, and Conservation Biology 151.....	4

Additional upper division course work in biological science to achieve a total of 36 or more units.....24-25

Include at least one course from each of the areas of study below.

**Areas of Study:**

(1) *Biodiversity:* Entomology 103; Evolution and Ecology 105, 108, 112 and 112L, 134, 134L and 134F, 140; Microbiology 105; Nematology 110; Plant Biology 116, 118, 147, 148; Wildlife, Fish, and Conservation Biology 110, 111, 120 and 120L.

(2) *Advanced Evolution and Ecology:* Evolution and Ecology 102, 103, 104, 107, 115, 117, 119, 138, 141, 147, 149, 180A and 180B.

Note: A maximum of 4 units of variable-unit courses (numbered 192, 198, 199) may be applied to upper division elective requirements. Evolution, Ecology and Biodiversity majors may not substitute course 192 for the upper division laboratory requirement. Courses numbered 197T are not applicable to the upper division elective unit requirement.

**Total Units for the Major .....77-79**

**B.S. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>57-66</b>
Biological Sciences 1A-1B-1C.....	15
Chemistry 2A-2B-2C.....	15
Chemistry 8A-8B or 118A-118B-118C.....	6-12
Mathematics 16A-16B-16C or 21A-21B-21C.....	9-12
Physics 7A-7B-7C.....	12
<b>Depth Subject Matter .....</b>	<b>49</b>
Biological Sciences 101, 102, 103, 104.....	13
Evolution and Ecology 100, 101.....	8
Statistics 100, 102 or 130A-130B.....	4-8
Additional upper division course work in biological science to achieve a total of 49 or more units including at least 2 units (6 hours per week) of laboratory.....	20-24

Include at least one course from the Biodiversity and two courses from the Advanced Evolution and Ecology areas of study below.

**Areas of Study:**

(1) *Biodiversity:* Entomology 103; Evolution and Ecology 105, 108, 112 and 112L, 134, 134L and 134F, 140; Microbiology 105; Nematology 110; Plant Biology 116, 118, 147, 148; Wildlife, Fish, and Conservation Biology 110, 111, 120 and 120L.

(2) *Advanced Evolution and Ecology:* Evolution and Ecology 102, 103, 104, 107, 115, 117, 119, 138, 141, 147, 149, 180A and 180B.

Note: A maximum of 4 units of variable-unit courses (numbered 192, 198, 199) may be applied to upper division elective requirements. Evolution, Ecology and Biodiversity majors may not substitute course 192 for the upper division laboratory requirement. Courses numbered 197T are not applicable to the upper division elective unit requirement.

**Total Units for the Major .....106-115**

**Biological Sciences Electives**

The following courses are acceptable toward the fulfillment of the upper division biological sciences requirement in the A.B. and B.S. major programs and may be selected without adviser approval. Other elective courses are approved on an individual basis by petition through an adviser.

- Anatomy, Physiology and Cell Biology 100
- Anthropology 151, 152, 153, 154A, 154B, 155, 156
- Biological Sciences, all upper division courses
- Chemistry 107A, 107B

- Entomology, all upper division courses except 110
- Environmental Science and Policy 110, 116, 121, 123, 150C, 151, 151L
- Geology 107, 107L, 150C
- Microbiology, all upper division courses
- Molecular and Cellular Biology, all upper division courses
- Nematology 110
- Neurobiology, Physiology, and Behavior, all upper division courses
- Nutrition 101, 111
- Pathology, Microbiology, and Immunology 101, 126, 126L, 128
- Philosophy 108
- Plant Biology, all upper division courses
- Psychology 121, 122, 127, 129
- Wildlife, Fish, and Conservation Biology 120, 120L, 121

**Major Advisers.** Students transferring to Davis from another institution and majoring in evolution, ecology and biodiversity must consult an adviser immediately upon matriculation so that their transfer credits can be applied to the major requirements. All new students in the major should contact the Section of Evolution and Ecology office for adviser assignment. Substitutions of courses not on the above list for major requirements are arranged through the adviser.

**Advising Center** for the major is located in 2320 Storer Hall (530) 752-8523. Pre-professional students should establish contact with the Health Sciences Advising office in 111 South Hall, to learn what specific courses are required on their transcripts.

**Teaching Credential Subject Representative.** Students planning for a teaching career should consult the School of Education in regard to preparation for certification; see the Teaching Credential/M.A. Program on [page 102](#).

**Courses in Evolution and Ecology (EVE)**

**Lower Division Courses**

**2. Biodiversity (3)**

Lecture—2 hours; lecture/discussion—1 hour. Introduction to nature, scope and geographical distribution of biodiversity (the diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity—domestication, aesthetics, ethics and valuation. Species richness and “success.” Biodiversity through time; monitoring, evaluation and conservation. Biomes—global, continental and Californian. (Same course as Entomology 2.) GE credit: SciEng, Wrt.—I. (I.) Gullan, Cranston, Shaffer, Ward

**11. Principles of Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: elementary biology recommended. Ecological principles with emphasis on humans and their interactions with the environment; how humans affect and depend on natural ecosystems; the future of the Earth’s biosphere. GE credit: SciEng.—(II.) Toft

**12. Life in the Sea (3)**

Lecture—3 hours. Diversity of life in the sea; adaptations to physical/ chemical ocean environment; marine science research methods; utilization of living marine resources by humans; factors and processes that influence diversity of sea life, including humans. Limited enrollment. GE credit: SciEng, Wrt.—III. (III.) Williams

**92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the Section of Evolution and Ecology. Internships supervised by a member of the faculty. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Lower Division Students (1-5)**

(P/NP grading only.)

**Upper Division Courses****100. Introduction to Evolution (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C, 101; Mathematics 16A, 16B, 16C or the equivalent; Statistics 13 or 100 (Statistics 100 recommended). A general survey of the origins of biological diversity and evolutionary mechanisms.—I, II, III. (I, II, III.) Begun, Grosberg, Kopp, Nuzhdin

**101. Introduction to Ecology (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C; Mathematics 16A, 16B, 16C or the equivalent. A general survey of the principles of ecology.—I, II, III. (I, II, III.) Schoener, Strong, Stachowicz, Sanford, Gaylord, Shapiro, Toff

**102. Population and Quantitative Genetics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101, and Statistics 100 or 102, and course 100. Evolution as caused by random mating, genetic drift, natural selection, inbreeding, migration, and mutation in theory and actuality. The resemblance between relatives and consequences of selection for quantitative traits. Application of these ideas to topics such as the evolution of sex.—III. (III.) Langley

**103. Phylogeny and Macroevolution (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100. Patterns and processes of evolution above the species level. Homology, homoplasy, and character evolution. Adaptive radiation; modes and rates of diversification. Evolution of complexity, and macroevolution of the genome. Principles of phylogeny reconstruction and their application to macroevolutionary studies.—III. (II.) Turelli

**104. Community Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 101 or Environmental Science and Policy 100. Population growth and density dependence; predation; exploitative, interference and apparent competition; coexistence mechanisms; niches, spatial and temporal variation; stability, diversity, and productivity of food webs; applications to conservation and biological control. Emphasis on quantitative understanding through models, concepts, and empirical evidence.

**105. Phylogenetic Analysis of Vertebrate Structure (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B. The structure of the classes and subclasses of vertebrates is described and interpreted in terms of phylogeny.—(I.) Wainwright

**107. Animal Communication (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1B; Animal Behavior course (Neurobiology, Physiology, and Behavior 102, Psychology 101, Animal Science 104, Entomology 104, or equivalent). How animals use songs, dances, colors, chemicals, electricity and vibrations to communicate. Mechanisms of signal production and detection (sensory systems), theory of information transfer and signal design, and the role of natural selection in shaping communication.—I. (I.) Patricelli

**108. Systematics and Evolution of Angiosperms (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B and 1C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as Plant Biology 108.) GE credit: SciEng.—III. (III.) Doyle

**112. Biology of Invertebrates (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1B; courses in systematics, ecology, and evolution recommended. Survey of the invertebrate phyla, emphasizing aquatic forms, and focusing on morphology, development, natural history, ecology, and phylogenetic relationships.—(II.) Grosberg, Stachowicz, Sanford

**112L. Biology of Invertebrates Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 112 concurrently. Field and laboratory experience with representative members of the major invertebrate phyla discussed in course 112. Emphasis on comparative morphology, natural history, ecology, and behavior of living invertebrates. Two field trips required.—(II.) Grosberg, Stachowicz, Sanford

**115. Marine Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Environmental Science and Policy 100 or course 101 or consent of instructor. Processes affecting the distribution, abundance, and diversity of plant and animal life in the sea. Introduction to marine habitat diversity and human impacts on marine ecosystems.—I. Stachowicz

**117. Plant Ecology (4)**

Lecture—3 hours; fieldwork—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C; Plant Biology 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as Plant Biology 117.)—I. Rejmanek

**119. Population Biology of Weeds (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C; introductory statistics recommended. Origin and evolution of weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions of weeds and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. (Same course as Plant Biology 119.) Not open for credit to students who have completed Plant Biology 121.—(III.) Rejmanek

**134. Herpetology (3)**

Lecture—2 hours; term paper. Prerequisite: Biological Sciences 1A, 1B; Evolution and Ecology 100 recommended. The world-wide diversity of amphibians and reptiles with emphasis on behavior, ecology, functional morphology, and evolutionary history. Offered in alternate years.—III. Shaffer

**134F. Field Herpetology (2)**

Fieldwork—5 hours; lecture/discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, concurrent enrollment in course 134 and 134L. Multi-day field trips to major California habitats focus on identification of, and ecological experiments on, amphibian and reptile species. Students work in teams to plan experiments, collect and analyze data, write up results and give oral presentations to the class. Offered in alternate years.—III. Shaffer

**134L. Herpetology Laboratory (2)**

Laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, course 134 concurrently. The diagnostic characteristics and functional attributes of amphibians and reptiles, emphasizing ecological, biogeographic and phylogenetic patterns. Field experience with common species of reptiles and amphibians in the Davis area. Offered in alternate years.—III. Shaffer

**138. Ecology of Tropical Latitudes (5)**

Lecture—3 hours; discussion—1 hour; extensive writing. Prerequisite: one course in Biological Sciences, Entomology, Wildlife, Fish, and Conservation Biology, Geography, or tropical experience, or consent of instructor. Biological, physical, and human-related aspects of the ecology of low latitudes. Distribution, numbers, and relationships of tropical organisms. Problems of development and conservation in the context of ecological and evolutionary theory. Offered in alternate years. GE credit: SciEng, Wrt.—Shapiro

**140. Paleobotany (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Introduction to plant fossil record, beginning with invasion of land in the Silurian, emphasizing origin and evolution of major groups and adaptations and changing composition and distribution of floras in relation to plate tectonics and climatic change.—I. (I.) Doyle

**141. Principles of Systematics (3)**

Lecture—2 hours; biweekly research projects. Prerequisite: Biological Sciences 1B or 1C; course 100 recommended. Historical background, philosophical rationale, contemporary approaches, and working rules of biosystematics, including International Code of Zoological Nomenclature. Offered in alternate years. GE credit: SciEng, Wrt.—(III.) Shapiro

**147. Biogeography (4)**

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 1A, 1B. Movements of terrestrial organisms. The role of geologic, climatic, and biologic changes in the geographic distribution of organisms. Offered in alternate years.—(I.) Shapiro

**149. Evolution of Ecological Systems (4)**

Lecture—3 hours; term paper. Prerequisite: course 101 or Environmental Studies 100 (or the equivalent), and course 100 (or the equivalent). Evolution as an organizing force in natural communities. Coadaptation in trophic and competitive relationships. Ecology of polymorphisms, clines, and speciation. Offered in alternate years.—I. Shapiro

**150. Evolution of Animal Development (3)**

Lecture—3 hours. Prerequisite: molecular and cellular biology 150 or 163 or equivalent course in developmental biology; may be waived for graduate students with consent of instructor. Comparative analysis of animal development and the genetic basis of morphological diversification. Offered in alternate years.—II. Kopp

**175. Computational Genetics (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Biological Sciences 101 and Statistics 100 or 102. The use of computers to solve problems in genetics and evolution. Introduction to a general purpose computer language (Python), computational statistical methods, and applications such as QTL mapping, linkage detection, estimation of rates of evolution, and gene finding.

**180A-180B. Experimental Ecology and Evolution in the Field (4-4)**

Lecture/laboratory—3 hours; fieldwork—3 hours. Prerequisite: course 100; course 101 or Environmental Science and Policy 100. Experimental design in field ecology. Students will critique primary literature, design project, gather and analyze data. Students required to write original research paper based on field experiments. Offered in alternate years. (Deferred grading only pending completion of sequence.)—(II,III.) Strauss, Stanton

**189. Introduction to Biological Research (1)**

Discussion—1 hour. Prerequisite: upper division standing in Evolution and Ecology or related biological science; consent of instructor. Introduction to research methods in biology. Presentation and discussion of research by faculty, graduate, and undergraduate students. May be repeated for credit up to a total of 3 units. (P/NP grading only.)—I, II, III. (I, II, III.)

**190. Undergraduate Seminar (2)**

Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Shapiro

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the Section of Evolution and Ecology. Internships supervised by a member of the faculty. (P/NP grading only.)

**194HA-194HB-194HC. Research Honors**

Laboratory—6 hours. Prerequisite: Students who have completed 135 units and qualify for the honors program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty adviser. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. (Deferred grading only, pending completion of sequence.)

**197T. Tutoring in Biological Sciences 1B (1-2)**

Tutorial—3-6 hours. Prerequisite: Biological Sciences 1B with a grade of B or better. Assisting the instructor by tutoring students in Biological Sciences 1B laboratory. Tutoring is voluntary and is supervised by a Laboratory Teaching Assistant and the Laboratory Coordinator. May be repeated three times for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****210. Molecular Phylogenetic Analysis (3)**

Lecture—2 hours; laboratory—3 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as Nematology 210.) Offered in alternate years.—(III.) Nadler

**211. Applied Phylogenetics (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 103 or 210 or Population Biology 200C or the equivalent, graduate standing. Applications of phylogenetic methods to fields outside of systematics. Core lectures/labs in remedial phylogenetics, phylogeography, conservation and comparative morphology. Special topics vary yearly. May be repeated once for credit.—III. (III.) Shaffer, Wainwright

**220. Species and Speciation (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 100, Philosophy 108 or the equivalent; History and Philosophy of Science 130B recommended. Current status of species concepts, models of speciation, current research on speciation, and relevance of species to conservation biology. Offered in alternate years.—II. Shapiro

**231. Principles of Biological Data Analysis (3)**

Lecture—2 hours; laboratory—3 hours. Introduction to the principles of data analysis, experimental design, statistical modeling, inference, and hypothesis tests. Statistical methods of particular importance in biological applications will be emphasized. Examples will be presented from the fields of ecology and evolutionary genetics. (S/U grading only.)—II. (II.) Rannala

**240. Paleobotany and Angiosperm Evolution (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Plant Biology 108, 116, or course 140. Critical analysis of the plant fossil record as a source of evidence on origin, evolution, and phylogeny of the angiosperms, Cretaceous and Tertiary climates, geographic history of modern taxa, and origin of modern vegetation types. Offered in alternate years.—(II.) Doyle

**290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discussion of faculty and graduate student research in biology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**298. Group Study (1-5)**

(S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Professional Course****390. Methods of Teaching (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching. Includes analyses of texts and supporting material, discussion of teaching techniques and preparing and conducting of laboratory and discussion sections. May be repeated for credit for a maximum of 8 units. (S/U grading only.)—I, II, III. (I, II, III.)

**Exercise Biology**

See **Neurobiology, Physiology, and Behavior**, on page 392.

(*Anatomy, Physiology and Cell Biology*)  
Keith R. Williams, Ph.D., Associate Professor  
(*Neurobiology, Physiology & Behavior*)

**Graduate Study.** The Graduate Group in Exercise Science offers a program of study and research leading to an M.S. degree. Advanced training is provided in two areas of emphasis. The Exercise Physiology Area involves the study of functional, metabolic, nutritional, and regulatory aspects of the cardiovascular, respiratory, and skeletal muscle systems as they relate to movement and exercise. The Biomechanics Area includes the study of skeletal muscle mechanics, motor control, biomechanical analysis of human movement, tissue mechanics, motor control, and clinical biomechanics.

**Graduate Advisers.** M. Kaufman, C. Stebbins, K. Williams

**Courses in Exercise Science (EXS)****Graduate Courses****200. Introduction to Research in Exercise Science (3)**

Discussion—2 hours; seminar—1 hour. Prerequisite: graduate standing in Exercise Science or consent of instructor. Principles of scientific research in Exercise Science: scientific method, literature review, experimental design, hypotheses formulation, data collection, analysis, inferences, biases, human subject and animal protocols, ethics.—I. Jue

**201. Exercise Cardiorespiratory Physiology (3)**

Lecture/discussion—3 hours. Prerequisite: undergraduate course in systemic physiology, exercise physiology, and biochemistry (intermediary metabolism). Advanced course on integrated responses of the cardiovascular and respiratory systems to exercise. Includes hemodynamic, neurohormonal, and autonomic aspects of cardiac and vascular function, principles of myocardial metabolism, and mechanisms underlying changes in pulmonary function and gas transport.—I. Stebbins

**206. Exercise Metabolism (3)**

Lecture/discussion—3 hour. Prerequisite: undergraduate course in metabolism (Biological Sciences 103, Nutrition 101) or consent of instructor. The integrated metabolic response to exercise. Includes bioenergetics and metabolic regulation of skeletal muscle, and role of cardiovascular, respiratory, hemodynamic, and neurohormonal control.—III. Jue

**210. Introduction to Human Performance Testing (2)**

Discussion—1 hour; laboratory—3 hours. Introduction to human exercise testing and measurement. Safety procedures and measurement capabilities of the Human Performance Laboratory at UC Davis. Potential areas for graduate research.—I. (I.) Shafraht

**221. Anthropometry in Physical Activity (3)**

Lecture—2 hours; laboratory—five 3-hour sessions to alternate weekly with five 1-hour discussion sessions. Prerequisite: Exercise Biology 101 and 102. Consideration of physical constitution, body proportions, and body composition in man as they affect physical performance, and of body structural and compositional changes accompanying prolonged, systematic physical conditioning.

**222. Metabolic Functions in Exercise (4)**

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Exercise Biology 102, Neurobiology, Physiology, and Behavior 101. Review of the current research literature on the metabolic responses to exercise in man; a laboratory survey of respiratory response, metabolic and water balances, blood gas adjustments and acid-base balance with particular reference to the effect of environmental conditions.

**224. Exercise Electrocardiography (2)**

Lecture—2 hours. Prerequisite: Exercise Biology 112 or consent of instructor. Physiological bases and clinical implications of normal and abnormal exercise electrocardiograms (ECG) are treated in detail. Exercise prescription is considered as is the predictive significance of normal and abnormal ECG.

**225. Seminar in Cardiac Rehabilitation (2)**

Seminar—2 hours. Prerequisite: Exercise Biology 112 or graduate standing and consent of instructor. Critical examination of literature dealing with the causes, prevention and treatment of cardiovascular disease with particular emphasis on intervention through cardiac rehabilitation. Both the theoretical bases and practical approaches to cardiac rehabilitation will be examined.

**227. Research Techniques in Biomechanics (4)**

Lecture—2 hours; laboratory—4 hours; term paper/discussion—1 hour. Prerequisite: consent of instructor, Mathematics 22B; Exercise Biology 115 recom-

mended. Experimental techniques for biomechanical analysis of human movement are examined. Techniques evaluated include data acquisition and analysis by computer, force platform analysis, strength assessment, planar and three-dimensional videography, data reduction and smoothing, body segment parameter determination, electromyography, and biomechanical modeling. (Same course as Biomedical Engineering 227/Mechanical and Aeronautical Engineering 227.)—II. (II.) K. Williams

### 228. Skeletal Muscle Mechanics: Form, Function, Adaptability (4)

Lecture—4 hours. Prerequisite: basic background in biology, physiology, and engineering; Engineering 35 and 45, Mathematics 21D; and Neurobiology, Physiology, and Behavior 101 recommended. Basic structure and function of skeletal muscle examined at the microscopic and macroscopic level. Muscle adaptation in response to aging, disease, injury, exercise, and disuse. Analytic models of muscle function. (Same course as Biomedical Engineering 228.)—(I.) Hawkins

### 290. Seminar in Exercise Science (1)

Seminar—1 hour. Prerequisite: graduate standing; required of all first year students for first two quarters. Presentation and discussion of topics of interest, and the analysis of research in exercise science. Not open for credit to students who have taken Physical Education 290. (S/U grading only.)—(II, III.)

### 290C. Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing. Student presentations of research in Exercise Science and discussions among participating students and faculty. May be repeated for credit. (S/U grading only.)—I, II, III.

### 298. Group Study (1-5)

Prerequisite: graduate standing; consent of instructor.

### 299. Research (1-12)

Prerequisite: graduate standing; consent of instructor and Department Chairperson. (S/U grading only.)

### Professional Course

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Family and Community Medicine

See **Medicine, School of**, on page 345.

## Feminist Theory and Research

Anna K. Kuhn, Ph.D., Program Director

**Program Office.** 2222 Hart Hall  
(530) 752-4686;  
<http://wms.ucdavis.edu/wgssite/index.htm>

**Graduate Study.** The program in Women and Gender Studies offers courses leading to a designated emphasis in Feminist Theory and Research. The courses provide theoretical and interdisciplinary perspectives to students already preparing for the Ph.D. in one of 13 participating departments (Anthropology, Comparative Literature, Cultural Studies, Education, English, French and Italian, Geography, German, History, Native American Studies, Psychology, Spanish and Classics, Sociology and Theatre and Dance). Students complete all requirements for the Ph.D., including the dissertation, in one of the participating departments. The additional requirements leading to the designated

emphasis consist of two core courses (Women's Studies 200A and 200B) and two additional courses on gender, one of which must be in the student's home department. It is expected that an analysis of gender will be a central component of the student's doctoral examination and dissertation.

**Graduate Adviser.** Consult the Women and Gender Studies office (530) 752-4686.

## Fiber and Polymer Science

(College of Agricultural and Environmental Sciences)

**Faculty.** See under **Textiles and Clothing**, on page 460.

### The Major Program

The fiber and polymer science major is concerned with the physical, chemical, and structural properties of fibers and polymers and how these relate to fiber and polymer performance and end-use.

**The Program.** All students in this major take a common core of course work in chemistry, physics, and mathematics, and depth subject matter in fiber and polymer science, organic and physical chemistry, and technical writing. In the restricted electives, students select courses from areas such as computer science and mathematics, chemistry, marketing and management, material and advanced fiber and polymer science, and textiles.

**Career Alternatives.** The major prepares the student for a career in a wide range of industries in the areas of research and development, technical marketing and management, production, quality control, and science teaching (on completion of an additional year in the teaching credential program). The companies employing Fiber and Polymer Science graduates are in the fiber, polymer, industrial product, textile and/or chemical business. Graduates are prepared to enter the graduate program in textiles or agricultural and environmental chemistry with a specialization in fiber and polymer chemistry, and fiber and polymer science programs at other universities.

### B.S. Major Requirements:

	UNITS
<b>English Composition Requirement</b> .....	<b>7-12</b>
See College requirement .....	0-8
Communication 1 .....	4
University Writing Program 104A, 104B, 104C, 104D, 104E, or 104F .....	4
<b>Preparatory Subject Matter</b> .....	<b>52-55</b>
Chemistry 2A-2B-2C .....	15
Computer Science Engineering 15 or 30 .....	4
Mathematics 16A-16B-16C or 21A-21B-21C .....	9-12
Physics 7A-7B-7C or 9A-9B-9C .....	12
Statistics 13 or Agricultural Management and Rangeland Resources 120 .....	4
Textiles and Clothing 6 and 8 or Engineering 45 .....	8
<b>Breadth/General Education</b> .....	<b>6-24</b>
Satisfaction of General Education requirement; see Advising office for breadth requirement.	
<b>Depth Subject Matter</b> .....	<b>37</b>

Fiber and Polymer Science 100, 150, 161, 161L, 180A, 180B .....	14
Chemistry 128A, 128B, 128C, 129A, 129B, 110A and 110C or 107A and 107B .....	19
<b>Restricted Electives</b> .....	<b>30</b>
Select courses from the following:	
Computer Science and Mathematics:	
Agricultural Management and Rangeland Resources 21; Engineering 5; Applied Science Engineering 115, 116; Food	

Science and Technology 156; Mathematics 22A, 22B

Chemistry: Chemistry 108, 111, 115, 120, 121, 124A, 124B, 124C, 130, 131, 140  
Marketing/Management: Agricultural and Resource Economics 100A, 100B, 113, 136, 157, Economics 1A, 1B, Statistics 103

Material and Advanced Fiber/Polymer Science: Aeronautical Science Engineering 137, Engineering 104A, 104B, Textiles and Clothing 250A-F, 290, 293  
Textiles: Textiles and Clothing 162, 162L, 164, 165, 173, 174

**Unrestricted Electives** ..... **23-40**

**Total Units for the Degree** ..... **180**

**Major Adviser.** Y.-L. Hsieh (*Textiles and Clothing*)

**Advising Center** for the major is located in 129B Everson Hall (530) 752-4417.

### Minor Program Requirements:

UNITS

**Fiber and Polymer Science** ..... **18**

Textiles and Clothing 6 or Engineering 45 ..... 4  
Courses selected from the following:  
Fiber and Polymer Science 100, 150, 161, 161L, 180A and 180B; and Textiles and Clothing 163 and 163L

**Minor Adviser.** Y. L. Hsieh

### Courses in Fiber and Polymer Science (FPS)

#### Upper Division Courses

#### 100. Principles of Polymer Materials Science (3)

Lecture—3 hours. Prerequisite: Chemistry 2A-2B; Chemistry 8A-8B or Engineering 45; introductory physics. The basic principles of polymer science are presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as Materials Science Engineering 147.)—II. (II.) Pan

#### 110. Plastics in Society and the Environment (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 10 or introductory course in physical sciences. Basic concepts and methodologies in the study of plastics. Formation, classification, structure, properties, processing, and formulation. Their application to societal needs, and their impact on society and the environment. GE credit: SciEng or SocSci, Wrt.

#### 150. Polymer Syntheses and Reactions (3)

Lecture—3 hours. Prerequisite: Chemistry 128B or 8B, and Chemistry 107A. Organic and physical chemistry aspects of polymer syntheses and reactions including polymerization mechanisms, kinetics and thermodynamics for major types of organic high polymers.—III. (III.) Hsieh

#### 161. Structure and Properties of Fibers (3)

Lecture—3 hours. Prerequisite: Textiles and Clothing 6 and Chemistry 8B. The structure, properties and reactions of natural- and man-made fibers; the relations between molecular structure of fibers and their physical properties; interactions of fibers and detergents.—I. (I.) Hsieh

#### 161L. Textile Chemical Analysis Laboratory (1)

Laboratory—3 hours. Prerequisite: course 161 (may be taken concurrently). Laboratory methods and procedures employed in qualitative and quantitative analysis of textile fibers and auxiliaries.—I. (I.) Hsieh

#### 180A-180B. Introduction to Research in Fiber and Polymer Science (2)

Laboratory/discussion—6 hours. Prerequisite: senior standing in major related to Fiber and Polymer Science, and consent of instructor. Senior thesis on independent problems. Research begun in course

180A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.)

**192. Internship in Fiber and Polymer Science (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a fiber and polymer science related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

**197T. Tutoring in Fiber and Polymer Science (1-5)**

Tutorial—3-15 hours. Prerequisite: upper division fiber and polymer science related major and consent of instructor. Tutoring of students in Fiber and Polymer Science courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring in another Fiber and Polymer Science course. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

**Graduate Courses**

**250A-F. Special Topics in Polymer and Fiber Science (3)**

Lecture—3 hours. Prerequisite: Fiber and Polymer Science 100 or consent of instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as Materials Science and Engineering 250A-F.)—I, III. (I, III.) Hsieh, Pan, Sun

**299. Research (1-12)**

Independent study—3-36 hours. (S/U grading only.)

**Professional Course**

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**Film Studies**

(College of Letters and Science)

(*Chicana/Chicano Studies*)

Frances Dyson, Ph.D. (*Technocultural Studies*)

Jaimey Fisher, Ph.D. (*German and Russian*)

Sheldon Lu, Ph.D. (*Comparative Literature*)

Pablo Ortiz, Ph.D. (*Music*)

Scott Simmon, Ph.D. (*English*)

Eric Smoodin, Ph.D. (*American Studies*)

Georges van den Abbeele, Ph.D.

(*French and Italian*)

**The Major Program**

This interdisciplinary major takes one of the most influential art forms of the twentieth century and today—film—as its object of study. The field of Film Studies addresses the history, theory, and culture of this art form and asks questions about film texts themselves: modes of production (including everything from filmmakers' aesthetic choices to the role of the global economy); historical, national, and cultural contexts; and spectators and audiences. Questions of gender, race, sexuality, and nationality, in all of these areas, have been central to Film Studies almost since its inception and continue to shape much of the

work in the field. While the program emphasizes film history, criticism, and theory, students also have opportunities to explore film/video production.

**The Program.** Students majoring in Film Studies take upper-division courses in film history and film theory, as well as in at least three of five general areas of study. Students also develop a thematic emphasis, in consultation with an advisor, that draws on courses from at least two different departments/programs and that allows them to pursue their particular interests within the field of Film Studies. Students have the option of completing a senior thesis (either a written paper or an original film/video) within this emphasis.

**Career Alternatives.** The A.B. degree in Film Studies prepares students for a variety of careers in media industries: for example, local and national film and television production companies, local television newsrooms, community television stations, computer graphic companies, advertising and marketing companies, public relations departments, and film distribution companies. Students wishing to pursue graduate work will be prepared to go on in film studies, as well as a variety of other fields that draw on interdisciplinary study: for example, American studies, English, literatures and languages, drama, communication, computer science, cultural studies, women and gender studies, and ethnic studies programs. Many film students also choose to go on to law school, and the analytical skills, writing abilities, and familiarity with theoretical thought developed through the film major prepare them well for the study and practice of law.

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 20-40**

Film Studies 1 ..... 4  
A four-course sequence in a single language or equivalent ..... 0-20  
One course from African American and African Studies 15, 50; American Studies 1A, 21, 30; Art History 5; Art Studio 30; Chicana/o Studies 50, 60; Design 1; French 50; Humanities 60; Italian 50; Japanese 25; Native American Studies 32; Textiles and Clothing 7; Women's Studies 20, 25 ..... 4  
One course from African American and African Studies 10, 15, 50; Asian American Studies 1, 2; Chicana/o Studies 10, 50, 60; Native American Studies 1, 10, 32, 33; Women's Studies 20, 25, 50, 70, 80 ..... 4  
Two courses from Art History 1A, 1B, 1C, 1D; Asian American Studies 2; Chinese 10, 11; Classics 10; Comparative Literature 3, 4, 5, 6, 7; Dramatic Art 1, 20; English 43, 44;

German 48; History 4C, 10C, 17B, 72B; Humanities 5, 6; Japanese 10; Music 10, 28; Native American Studies 33; Russian 41, 42 ..... 8  
Note: One of these two courses may be from Design 15, 16 or Dramatic Art 10, 21A, 21B, 24.

**Depth Subject Matter ..... 36-40**

One course from English 161A, 161 B or Film Studies 124 ..... 4  
One course from English 162; Film Studies 127; Philosophy 127; Women and Gender Studies 162 ..... 4  
One course each from three of the following topic areas: Cinematic Traditions and Movements, Visual and Popular Culture, Gender/Sexuality/Class, Race/Ethnicity/Class, Production and Performance ..... 12  
A current list of approved classes is available from the Program office and from the faculty adviser.  
16-20 units in one of the two breadth areas not used to satisfy the breadth requirement, or development of a thematic area in consultation with a faculty adviser ..... 16-20  
Qualified students who complete 20 units and have an overall GPA of 3.500 may

choose the senior thesis option (194H-196H) for 8 of those 20 units.  
No course may be counted for more than one requirement for the major.

**Total Units for the Major ..... 56-80**

**Major Advisers.** E. Smoodin (*American Studies*)

**Minor Program Requirements:**

UNITS

**Film Studies ..... 24**

Film Studies 1 ..... 4  
Upper division courses selected from the following list, with no more than two courses from any one category ..... 20  
(a) *Problems and Themes in Cinema:* Anthropology 136, Classics 102, Dramatic Art 115, English 160, 161A, 161B, 162, Film Studies 124, 125, Women's Studies 162  
(b) *Cinema, Nation and Nationality:* German 119, 142, Film Studies 176A, 176B, Italian 150, Japanese 106, Russian 129, Spanish 148  
(c) *Film and Social Identities:* African American and African Studies 170, 171, Film Studies 120, Jewish Studies 120, Women's Studies 160, 164  
(d) *Film/Video Production:* Art Studio 116, 117, 150  
(e) *Popular and Visual Culture:* American Studies 130, 132, 133, 139, Art Studio 150, Communication 140, Political Science 165, Textiles and Clothing 107, Women's Studies 139

Restrictions: No more than two courses from a single department or program may be offered in satisfaction of the minor requirements.  
Note: With a minor advisor's prior approval, up to four units of internship (e.g., American Studies 192, Communication 192, or Women's Studies 192) in television/video/film production may be offered toward satisfying the requirements of the minor. Such courses will be considered part of the "Film/Video Production" category.

**Courses in Film Studies (FMS)**

**Lower Division Courses**

**1. Introduction to Film Studies (4)**

Lecture—2 hours; discussion—1 hour; film viewing—3 hours. Analysis of film form and narrative, including cinematography, editing, and sound. Issues in film studies, including authorship, stardom, race, gender, class, and cultural identity. Includes introduction to selected cinematic movements and national film traditions. Not open for credit to students who have completed Humanities 10. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.) Acham, Ghosh, Lu

**90X. Lower Division Seminar (4)**

Seminar—4 hours. Prerequisite: lower division standing and consent of instructor. Study of a special topic in film studies in a small class setting. May be repeated for credit if topic differs. (P/NP grading only.)—I, II, III. (I, II, III.)

**92. Internship (1-12)**

Internship—3-36 hours. Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.)

**98. Directed Group Study (1-5)**

(P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)

**Upper Division Courses**

**120. Italian-American Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1. Exploration of representations of Italian-American identity in American (U.S.) cinema. Analysis of both Hollywood and independently produced films, especially as they represent ethnicity, gender, and social class of Italian Americans.

Not open for credit to students who have completed Humanities 120. GE credit: ArtHum, Div, Wrt.—III. (III.) Heyer-Caput

#### 124. Topics in U.S. Film History (4)

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 1. Study of an aspect of American film history (such as the silent era; the studio system; U.S. avant-garde cinema), including the influences of technological, economic, regulatory, cultural, and artistic forces. Not open for credit to students who have completed Humanities 124 unless topic differs. May be repeated twice for credit if topic differs. GE credit: ArtHum, Wrt.—III. (III.) Simmon

#### 125. Topics in Film Genres (4)

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 1. A study of one or more of the film genres (such as the documentary, the musical, film noir, screwball comedy, or the western), including genre theory and the relationship of the genre(s) to culture, history, and film industry practices. Not open for credit to students who have completed Humanities 125 unless topic differs. May be repeated twice for credit if topic differs. GE credit: ArtHum, Wrt.—II. (II.) McConnell, Simmon

#### 127. Film Theory (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1 or consent of instructor. Survey of the conceptual frameworks used to study film (including semiotics, psychoanalysis, spectatorship, auteur, genre and narrative theories). Historical survey of major film theorists. (Same course as Philosophy 127.) GE credit: ArtHum, Wrt.—III. (III.) Wilson

#### 142. New German Cinema (4)

Lecture/discussion—3 hours. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorff, Kluge, Wenders. Knowledge of German not required. May be repeated for credit with consent of instructor. (Same course as German 142) GE credit: ArtHum, Wrt.—I. (I.) Fisher

#### 176A. Classic Weimar Cinema (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1. A study of classic Weimar cinema (ca. 1919-33, including films by Murnau, Pabst, and Lang), and its representations of German national myths, modern urban culture, and the nation's uncertain social and political order. Not open for credit to students who have completed Humanities 176. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Menges

#### 176B. Postwar German Cinema (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1. Exploration of German cinema from 1945 to 1980, when the Nazi past was a central theme. Includes study of postwar "rubble films," escapist "homeland films," and New German Cinema of the 1970s (including films by Fassbinder, Kluge, Syberberg, and Herzog). Not open for credit to students who have completed Humanities 177. Offered in alternate years. GE credit: ArtHum, Wrt.—II. Menges

#### 189. Special Topics in Film Studies (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 1, upper division standing, or consent of instructor. Group study of a special topic in film, focusing on a national tradition, a major filmmaker, or a specific era. May be repeated three times for credit. GE credit: Wrt.—I, III. (I, III.) Lu

#### 190X. Upper Division Seminar (4)

Seminar—4 hours. Prerequisite: upper division standing or consent of instructor. Study of a special topic in film studies in a small class setting. May be repeated for credit if topic differs. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 192. Internship (1-12)

Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.)

#### 194H. Special Study for Honors Students (1-5)

Variable—1.5 hours; independent study—3-15 hours. Prerequisite: senior standing; GPA of at least 3.500; consent of instructor. Guided research on a

topic in Film Studies in preparation for the writing of an honors thesis in course 195H or the creation of an honors project in course 196H. May be repeated twice for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 195H. Honors Thesis (1-5)

Independent study—3-15 hours. Prerequisite: course 194H and consent of instructor; GPA of at least 3.500; senior standing. Writing of an honors thesis on a topic in Film Studies under the direction of a faculty member. May be repeated twice for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 196H. Honors Project (1-5)

Project—3-15 hours. Prerequisite: course 194H and consent of instructor; GPA of at least 3.500; senior standing. Creation of an honors film, video, or mixed-media project under the direction of a faculty member. May be repeated twice for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 197T. Tutoring in Film Studies (1-5)

Tutorial—3-15 hours. Prerequisite: consent of program director. Leading of small voluntary discussion groups affiliated with one of the Program's regular courses. May be repeated for credit. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

(P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Professional Course

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit (S/U grading only.)

## Fisheries

See [Animal Science, on page 134](#); [Biological and Agricultural Engineering, on page 158](#); and [Wildlife, Fish, and Conservation Biology, on page 483](#).

## Food Science

College of Agricultural and Environmental Sciences)

### The Major Program

Food science applies chemical, physical, biological, engineering, and social sciences to processing, preservation, development, packaging, storage, evaluation, identity and utilization of foods.

**The Program.** Students majoring in food science spend the first two years of study developing the scientific and general background necessary for upper division study. The science courses include chemistry, biology, physics, and mathematics. General background is provided by courses in the social science/humanities area and by optional courses in introductory food science. At the upper division level, students take courses in nutrition, food microbiology, food chemistry, food analysis, food commodities, food processing, and food engineering, and may choose to specialize in one of seven career-oriented options. The major, including all seven options, is accredited by the Institute of Food Technologists. Students enrolled in the program are eligible for various scholarships, including scholarships from the Institute of Food Technologists.

**Career Alternatives.** Opportunities for employment include positions in the food and allied industries, local, state, and federal government agencies, and educational and research institutions. Graduate study for the food science student may lead to the

M.S. or Ph.D. degree in food science, or in related fields such as agricultural chemistry, biochemistry, engineering, microbiology, and nutrition.

### B.S. Major Requirements:

UNITS

#### English Composition Requirement ..... 0-8

See College requirement.

#### Preparatory Subject Matter..... 52-66

University Writing Program 102F, 104A, or 104E (if not already taken to satisfy college English requirement)..... 4  
Communication 1 (if not already taken to satisfy college English Requirement)..... 4  
Mathematics 16A-16B-16C..... 9  
Biological Sciences 1A, 1C..... 10  
Chemistry 2A-2B-2C..... 15  
Organic chemistry (see option for requirement)..... 12  
Physics 7A-7B-7C..... 12  
Food Science and Technology 1 and/or 10; both recommended, but not required..... 3-6  
Food Science and Technology 50 ..... 3  
Nutrition 10 (or approved substitute) ..... 3

#### Breadth/General Education..... 24

Satisfaction of General Education requirement plus social science and humanities electives to total 24 units

#### Depth Subject Matter ..... 50

Biological Sciences 102, 103 ..... 6  
Agricultural Management and Rangeland Resources 120..... 4  
Food Science and Technology 100A, 100B, 101A, 101B, 103, 104, 104L, 160, 190 ..... 28  
Food Science and Technology 110A-110B, Applied Biological Systems Technology 110L ..... 8  
Food Science and Technology 127 or 107 ..... 4

#### Select one of the following five options:

##### Food Technology Option

The Food Technology option provides a broad exposure to food chemistry, food microbiology, food engineering and food processing. Students find positions in quality assurance, product development, and food processing in the food industry.

#### Specific course requirements..... 11

Chemistry 8A-8B..... 6  
Food Science and Technology 108, 109 ..... 5

#### Selected additional courses..... 15

Select courses from a master list available from the department Advising Center.

##### Food Business and Management Option

The Food Business and Management option allows students to integrate study of the science and technology of food with that of business and economics in a unique program. Students prepare for positions of management in small food companies, and research-and-development oriented marketing or technical sales opportunities in corporate food industries.

#### Specific course requirements..... 24

Chemistry 8A-8B..... 6  
Economics 1A ..... 4  
Agricultural and Resource Economics 112, 113 ..... 8  
Management 100..... 3  
Food Science and Technology 109 ..... 3

#### Selected additional courses..... 10

Select courses from a master list available from the department Advising Center.

##### Consumer Food Science Option

The Consumer Food Science option prepares students for jobs in food product formulation, research-and-development oriented marketing and sensory analysis, quality assurance, extension service, creative writing, and community service. Students who fulfill the requirements for the teaching credential

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

teach elementary or secondary school home economics.

**Specific course requirements..... 19**

Chemistry 8A-8B.....	6
Food Science and Technology 47, 109, 159.....	6
Additional Food Science and Technology 107 or 127.....	4
Consumer Science 100.....	3

**Selected additional courses..... 10**

Select courses from a master list available from the department Advising Center.

**Brewing Science Option**

The Brewing Science option prepares students for careers in production or quality assurance within the brewing industry or other food fermentation industries (e.g., other alcoholic beverages, vinegar and cheese). The option also prepares students for graduate study in food science. The option exposes the students to a diversity of coursework, including chemistry, biochemistry, microbiology and engineering as they pertain to the malting and brewing processes. Issues of quality assurance, plant sanitation and packaging are also key. Of course, there is a thorough grounding in malting and brewing.

**Specific course requirements..... 26-29**

Chemistry 8A, 8B.....	6
Food Science and Technology 3 (recommended but not required).....	3
Food Science and Technology 102A, 102B, 108, 109, 123, 131.....	20

**Selected additional courses..... 9**

Select courses from a master list available from the department Advising Center

**Food Biology/Microbiology Option**

The Food Biology/Microbiology option is for students interested in research and development careers with food companies or government laboratories, in teaching and research at academic institutions, or in professional (medical, veterinary, pharmacy, optometry or dental) school. This option prepares students for graduate study and research in several areas, including food science, biochemistry, biotechnology, microbiology, and post-harvest biology.

**Specific course requirements..... 18-24**

Biological Sciences 1B.....	5
Chemistry 8A-8B or 118A-118B-118C.....	6-12
Microbiology 102, 102L.....	7

**Selected additional courses..... 10**

Select courses from a master list available from the department Advising Center.

**Food Biochemistry Option**

The Food Biochemistry option prepares students for graduate study and research in food science, biochemistry, biotechnology, microbiology, pharmacology, post-harvest biology, and commodity emphasis. The program is designed for students interested in graduate or professional school, leading to careers in research in universities, food companies or government laboratories or in teaching at academic institutions. The option can also serve to prepare students for professional schools such as pharmacy, optometry, dentistry, public health or medicine.

**Specific course requirements..... 31**

Biological Sciences 1B.....	5
Biological Sciences 104.....	3
Chemistry 118A-118B-118C.....	12
Chemistry 107A, 107B.....	6
Food Science and Technology 123, 123L.....	5

**Selected additional courses..... 9**

Select courses from a master list available from the department Advising Center

**Food Chemistry Option**

The Food Chemistry option prepares students for graduate study and research in such areas as flavor chemistry, food additive chemistry, biotechnology,

biochemistry and toxicology. This option is for students interested in research and development careers with food companies or government laboratories, in teaching and research at academic institutions, or in professional (medical, veterinary, or dental) school.

**Specific course requirements..... 20-21**

Chemistry 118A-118B-118C or 128A-128B-128C, 129A.....	11-12
Chemistry 107A-107B, 124A.....	9

**Selected additional courses..... 10**

Select courses from a master list available from the department Advising Center.

**Unrestricted Electives ..... varies by option**

**Total Units for the Degree ..... 180**

**Major Adviser.** G.F. Russell (*Food Science and Technology*)

**Advising Center** for the major is located in 111 Cruess Hall (530) 752-1468.

**Graduate Study.** A program of study and research leading to the M.S. and Ph.D. degrees in Food Science is available (see below). For further information on graduate study, contact the graduate adviser.

## Food Science (A Graduate Group)

Gary M. Smith, Ph.D., Chairperson of the Group

**Group Office.** 111 Cruess Hall (530) 752-1466; Fax (530) 752-4759; <http://www.foodscience.ucdavis.edu>

**Faculty.** Includes members from twelve departments in the Colleges of Agricultural and Environmental Sciences and Engineering, and the Schools of Medicine and Veterinary Medicine.

**Graduate Study.** The interdepartmental Graduate Group in Food Science offers programs of study leading to the M.S. degree and to the Ph.D. degree. Graduate studies stress the application of the biological, chemical, physical, and behavioral sciences to the processing, preservation, quality evaluation, public health aspects, and utilization of foods. For the M.S. degree, there are four areas of specialization: chemistry-biochemistry, microbiology, engineering-technology and sensory science. Individually designed programs are also acceptable. For the Ph.D., there are four areas of emphasis: biochemistry, chemistry, microbiology/fermentation, and sensory science. Detailed information regarding graduate study is available through the Group Chairperson or the Group office.

**Graduate Advisers.** Contact the Food Science Graduate Group office at [kjhunter@ucdavis.edu](mailto:kjhunter@ucdavis.edu).

## Food Science and Technology

(College of Agricultural and Environmental Sciences)

Charles W. Bamforth, Ph.D., D.Sc., Chairperson of the Department

**Department Office.** 126 Cruess Hall (530) 752-1465; <http://foodscience.ucdavis.edu>

**Faculty**

Charles W. Bamforth, Ph.D. D.Sc., Professor  
 Stephanie R. Dungan, Ph.D., Professor (*Food Science and Technology, Chemical Engineering*)  
 J. Bruce German, Ph.D., Professor  
 Jean-Xavier Guinard, Ph.D., Professor  
 John M. Krochta, Ph.D., Professor (*Food Science and Technology, Biological and Agricultural Engineering*)

Kathryn L. McCarthy, Ph.D., Professor (*Food Science and Technology, Biological and Agricultural Engineering*)

Michael J. McCarthy, Ph.D., Professor (*Food Science and Technology, Biological and Agricultural Engineering*)

Alyson Mitchell, Ph.D., Associate Professor

David M. Ogrzydzki, Ph.D., Professor

Michael A. O'Mahony, Ph.D., Professor

Robert Powell, Ph.D., Professor

Chester W. Price, Ph.D., Professor

David S. Reid, Ph.D., Professor

Moshe Rosenberg, Ph.D., Professor and Specialist in Cooperative Extension

Gerald F. Russell, Ph.D., Senior Lecturer

Barbara O. Schneeman, Ph.D., Professor (*Food Science and Technology, Internal Medicine, Nutrition*)

Charles F. Shoemaker, Ph.D., Professor

R. Paul Singh, Ph.D., Professor (*Food Science and Technology, Biological and Agricultural Engineering*)

Gary M. Smith, Ph.D., Professor

Glenn M. Young, Ph.D., Associate Professor

**Emeriti Faculty**

Everett Bandman, Ph.D., Professor Emeritus  
 Ericka L. Barrett, Ph.D., Professor Emeritus  
 Richard A. Bernhard, Ph.D., Professor Emeritus  
 Walter L. Dunkley, Ph.D., Professor Emeritus  
 Robert E. Feeney, Ph.D., Professor Emeritus  
 Dieter W. Gruenwedel, Ph.D., Professor Emeritus  
 Norman F. Haard, Ph.D., Professor Emeritus  
 Jerald M. Henderson, D.Eng., Professor Emeritus  
 Walter G. Jennings, Ph.D., Professor Emeritus  
 Michael J. Lewis, Ph.D., Professor Emeritus,

*Academic Senate Distinguished Teaching Award*

R. Larry Merson, Ph.D., Professor Emeritus

Thomas Richardson, Ph.D., Professor Emeritus

Howard G. Schutz, Ph.D., Professor Emeritus

Lloyd M. Smith, Ph.D., Professor Emeritus

Aloys L. Tappel, Ph.D., Professor Emeritus

John R. Whitaker, Ph.D., Professor Emeritus

**Affiliated Faculty**

Diane M. Barrett, Ph.D., Specialist in Cooperative Extension

Christine M. Bruhn, Ph.D., Specialist in Cooperative Extension

John C. Bruhn, Ph.D., Specialist in Cooperative Extension

Edwin N. Frankel, Ph.D., Adjunct Professor

Linda J. Harris, Ph.D., Specialist in Cooperative Extension

Carl K. Winter, Ph.D., Specialist in Cooperative Extension and Lecturer

**Major Program and Graduate Study.** See the major in *Food Science*, on page 274; and for graduate study, see *Graduate Studies*, on page 97 in this catalog.

**Related Courses.** See courses in Consumer Science, Engineering, Molecular and Cellular Biology, Nutrition, Viticulture and Enology; Environmental Toxicology, Population Health and Reproduction, and Plant Biology.

**Courses in Food Science and Technology (FST)**

**Lower Division Courses**

**1. Principles of Food Science (3)**

Lecture—2 hours; discussion—1 hour. Food science fundamentals. Fresh and processed food technologies; world food problems; food composition; food microbiological and toxicological safety; food laws; evaluation of acceptability and nutritional value. Not open for credit to students who have completed any Food Science and Technology course except course 10.—II. (II.) Reid

**3. Introduction to Brewing and Beer (3)**

Lecture—3 hours. Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics

of beer quality, including wholesomeness; role of scientist in brewing. GE credit: SciEng.—I, II, (I, II.) Bamforth

### 10. Food Science, Folklore and Health (3)

Lecture—3 hours. Ancient and modern food folklore in relation to health and well-being. Food safety, organic food, herbalism, food preservation, and nutritional enhancement. Not open for credit to students who have completed course 2. GE credit: SciEng or SocSci.—I, II, III. (I, II, III.) Russell

### 47. Food Product Development Field Study (1)

Discussion—6 hours; fieldwork—2 days (course given between winter and spring quarters). Prerequisite: advance enrollment required in winter quarter with instructor; background knowledge in foods from such courses as Food Science and Technology 1. Commercial aspects of the large-scale development, distribution, and evaluation of food products intended for human consumption. (Former course Consumer Science 47.) (P/NP grading only.)—III. (III.)

### 50. Introduction to Food Preservation (3)

Lecture—3 hours. Prerequisite: Chemistry 2A, Biological Sciences 1A. Introduction to fruit, vegetable, cereal, dairy, seafood and meat commodity groups. Overview of food preservation principles, including heat processing, refrigeration and freezing, dehydration, fermentation, high pressure processing, irradiation and packaging.—III. (III.) Krochta

### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

## Upper Division Courses

### 100A. Food Chemistry (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B; Biological Sciences 1A recommended. Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water.—I, (I.) Dungan

### 100B. Food Properties (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100A or consent of instructor. Sensory quality, chemical and microbial safety, and nutritional properties of foods. Effects of food processing and preparation on these properties. Selected properties of food commodities.—II, (II.) Guinard

### 101A. Food Chemistry Laboratory (2)

Lecture/laboratory—1 hour/3 hours. Prerequisite: course 100A (may be taken concurrently). Chemical aspects of food composition described in course 100A.—I, (I.) Reid

### 101B. Food Properties Laboratory (2)

Lecture/laboratory—1 hour/3 hours. Prerequisite: course 100B (may be taken concurrently). Study of properties of food described in course 100B.—II, (II.) Shoemaker

### 102A. Malting and Brewing Science (4)

Lecture—4 hours. Prerequisite: Biological Sciences 102, 103; senior standing recommended. The technology of the malting, brewing and fermentation processes is integrated with the chemistry, biochemistry and microbiology that determine industrial practices and product quality. Not open for credit to students who have taken course 102.—II, (II.) Bamforth

### 102B. Practical Malting and Brewing (4)

Lecture/discussion—2 hours; laboratory—6 hours. Prerequisite: course 102A and analytical experience beyond Chemistry 2C, such as Viticulture and Enology 123, Food Science and Technology 103, 123L, Molecular and Cellular Biology 120L. Open to seniors only in Fermentation Science or Food Science and Technology. Provides practical working knowledge of analytical methods used in malting and brewing and experience with brewing materials and processes, by analysis of samples that illustrate the range of values experienced in practice and pilot scale brewing.—III, (III.) Bamforth

### 103. Physical and Chemical Methods for Food Analysis (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Chemistry 2C, 8B, Biological Sciences or Animal Biology 102 (may be taken concurrently), courses 100A, 101A (may be taken concurrently). Theory and application of physical and chemical methods for determining the constituents of foods. Modern separation and instrumental analysis techniques are stressed.—I, (I.) Mitchell

### 104. Food Microbiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 102. Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry.—II, (II.) C. Price

### 104L. Food Microbiology Laboratory (4)

Lecture—1 hour; discussion—1 hour; laboratory—6 hours. Prerequisite: Biological Sciences 1A, course 104. Cultural and morphological characteristics of microorganisms involved in food spoilage, in food-borne disease, and food fermentation. Analysis of microbiological quality of foods.—III, (III.) Young

### 107. Food Sensory Science (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Agricultural Management and Rangeland Resources 120 or course 117 (may be taken concurrently). Critical examination of techniques and theories of sensory measurement of food; measures of consumer perception and acceptance. An introduction to the sensory and cognitive systems associated with the perception of food. Not open for credit to students who have completed course 107A.—I, (I.) O'Mahony

### 108. Food Processing Plant Sanitation (2)

Lecture—2 hours. Prerequisite: Chemistry 8B, Biological Sciences 1A, course 104 (may be taken concurrently) or consent of instructor. Sanitary control of food processing, including water treatment, chemical and physical sanitizing agents; principles of cleaning and hard surface detergency, metal corrosion, pest control, and waste disposal; role of regulatory agencies.

### 109. Principles of Quality Assurance in Food Processing (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Statistics 13 or Agricultural Management and Rangeland Resources 120. Quality assurance measurement techniques applied to selected food processed products emphasized. Rationale for establishing valid quality assurance programs including selection of samples at critical points. Statistical problems in quality assurance programs used by the food industry.—III, (III.) K. McCarthy

### 110A. Physical Principles in Food Processing (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: Physics 5A and 5B or 7A-7B-7C or the equivalent; calculus recommended. Not open for credit to students enrolled in College of Engineering. Applications of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, and problem solving.—I, (I.) M. McCarthy

### 110B. Heat and Mass Transfer in Food Processing (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: course 110A or the equivalent; Applied Biological Systems Technology 110L recommended (may be taken concurrently). Rate processes: conduction, convection, and radiation heat transfer; microwave heating, refrigeration, freezing, psychrometrics; mass transfer during drying and storage.—II, (II.) Singh

### 117. Design and Analysis for Sensory Food Science (3)

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Statistics 13 or consent of instructor. Methods of design and analysis for sensory food science. Relative merits and limitations of parametric

and nonparametric approaches. Use of human judges. Data analysis and computation. Modifications for quality assurance.—I, (I.) O'Mahony

### 119. Chemistry and Technology of Milk and Dairy Products (4)

Lecture—4 hours; demonstrations and a field trip. Prerequisite: Biological Sciences 1A and 102, or consent of instructor. Composition, structure and properties of milk and products derived from milk. Relates chemical, microbiological, and technological principles to commercial practices in processing of milk and its products.—III, Rosenberg

### 120. Principles of Meat Science (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A. Anatomical, physiological, developmental and biochemical aspects of muscle underlying the conversion of muscle to meat. Includes meat processing, preservation, microbiology and public health issues associated with meat products. (Same course as Animal Science 120.) GE credit: SciEng.—III, (III.) Lee

### 120L. Meat Science Laboratory (2)

Discussion—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1A; course 120 (may be taken concurrently). Laboratory exercises and student participation in transformation of live animal to carcass and meat, structural and biochemical changes related to meat quality, chemical and sensory evaluation of meat, and field trips to packing plant and processing plants. (Same course as Animal Science 120L.)—III, (III.) Lee

### 123. Introduction to Enzymology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103. Principles of physical, chemical and catalytic properties of enzymes and their importance. Purification, characterization, and quantitative evaluation of reaction conditions on activity are stressed. Specificity and mechanism of action illustrated by use of selected enzymes. (Former course Biochemistry and Biophysics 123.)—III, (III.) G. Smith

### 123L. Enzymology Laboratory (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 103, course 123 (concurrently). Laboratory procedures involved in detection, purification and characterization of enzymes. (Former course Biochemistry and Biophysics 123L.)—III, (III.) G. Smith

### 127. Sensory Evaluation of Foods (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Agricultural Management and Rangeland Resources 120 or course 117. A critical examination of methods of sensory measurement applied to food and beverage systems; descriptive analysis and consumer tests and their application to quality assurance, product development and optimization.—III, (III.) Guinard

### 128. Food Toxicology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as Environmental Toxicology 128.) GE credit: SciEng.—III, (III.) Mitchell, Shibamoto

### 131. Food Packaging (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Chemistry 8B, Biological Sciences 1A, Physics 7C. Principles of food packaging. Functions of packaging. Properties of metal, glass, paper and plastic materials and packages. Design, fabrication, and applications of food packaging. Packaging of fresh and processed foods, including fruits and vegetables, dairy foods, beer and wine.—I, (I.) Krochta

### 151. Food Freezing (1)

Discussion—1 hour; online lecture. Prerequisite: course 110A or the equivalent. Mechanisms of ice crystallization, interpretation of freezing diagrams, and modes of heat transfer. Food properties at sub-freezing temperatures, refrigeration requirements, and estimation of freezing times. Industrial systems used in freezing foods.—III, (III.) Singh

**159. New Food Product Ideas (2)**

Lecture/discussion—2 hours. Prerequisite: upper division standing with background course work in food science (course 50 or 100A), biological sciences (Biological Sciences 1A, 1B, 1C), or the physical sciences (Physics 5A, 5B, 5C or Chemistry 2A, 2B, 2C). Course will familiarize students with initial stages of food product development, including definition and articulation of a problem, generation of ideas to solve the problem, screening of ideas, and the formal presentation of a new product concept.

**160. Food Product Development (4)**

Lecture—1 hour; discussion—1 hour; laboratory—6 hours. Prerequisite: upper division standing with background course work in food science (course 50 or 100A), biological sciences (Biological Sciences 1A, 1B, 1C), or the physical sciences (Physics 5A, 5B, 5C or Chemistry 2A, 2B, 2C). Product implementation stage of food product development including preliminary product description, prototype development, product testing, and formal presentation of a new product development.—II. (II.) Shoemaker

**190. Senior Seminar (1)**

Seminar—1 hour. Prerequisite: senior standing or consent of instructor. Selected topics presented by students on recent advances in food science and technology. Reports and discussions concerning oral and written presentations, literature sources and career opportunities.—I. (I.) Russell

**192. Internship for Advanced Undergraduates (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in the practical application of food science. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****201. Food Chemistry and Biochemistry (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 103. Topics on enzymes, proteins, pigments, lipids, and vitamins. Biochemical principles and methods related to food composition, preservation, and processing. Research proposals and group problem solving.—I. (I.) G. Smith, Shoemaker, Frankel

**202. Chemical and Physical Changes in Food (4)**

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 103; Chemistry 107B. Fundamental principles of chemistry and physics are applied to a study of changes in water binding properties and activity, changes in proteins, nutrients, toxic constituents, and other compounds during storage, heating, freezing, dehydrating, and concentrating of food materials.—III. (III.) Dungan

**203. Food Processing (3)**

Lecture—3 hours. Prerequisite: course 110A, Physics 5C or 7C, Chemistry 107B, and one undergraduate food processing course. Principles of food engineering applied to food processing. Relationship of Newtonian and non-Newtonian fluid properties to heat and momentum transfer. Application of mass transfer in controlling kinetics and quality changes of foods.—II. (II.) K. McCarthy, M. McCarthy

**204. Advanced Food Microbiology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1C, 103, course 104 or a course in microbiology. Principles of and recent developments in food microbiology, including food pathogen virulence and detection, parameters of microbial growth in food, and the microbiology of food and beverage fermentations.—III. (III.) Price, Ogrydziak, Young

**205. Industrial Microbiology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 102, 103; Microbiology 130A-130B or Biological Sciences 101 recommended. Use of microorganisms for producing substances such as amino acids, peptides, enzymes, antibiotics and organic acids. Emphasis on metabolic regulation of pathways leading to fermentation products, on yeast fermentations, and on genetic manipulations (including recombinant DNA techniques) of industrial microorganisms. Offered in alternate years.—III. Ogrydziak

**207. Advanced Sensory-Instrumental Analyses (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 107 and consent of instructor. Basic principles of measurement of color, texture, and flavor of foods by sensory and instrumental methods. Advanced statistical analysis of relation of colorimetry, texturometry, and chemistry of volatile compounds to perception of appearance, texture, flavor. Offered in alternate years.

**210. Proteins: Functional Activities and Interactions (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 103. The relationships of structure of proteins to their biological functions. Structural proteins, complexing proteins, and catalytic proteins in plant and animal materials and products.

**211. Lipids: Chemistry and Nutrition (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 103, Chemistry 107B, 128B. Chemistry of lipids as it pertains to research in food and nutrition. Relations between lipid structure and their physical properties in tissues and foods. Regulation of absorption, transport, and metabolism of lipids. Implications of dietary fats and health.—II. (II.) German

**217. Advanced Food Sensory Science (2)**

Lecture—2 hours. Prerequisite: course 107A (may be taken concurrently). Advanced study of the techniques and theory of the sensory measurement of food as an analytical tool and as a measure of consumer perception and acceptance. Advanced examination of the sensory and cognitive systems associated with the perception of food.—I. (I.) O'Mahony

**227. Food Perception and the Chemical Senses (2)**

Lecture—2 hours. Prerequisite: course 107B (may be taken concurrently), or consent of instructor. Examination of the anatomy and physiology of the chemical senses (taste, smell, and the trigeminal senses) and how they are involved in the perception of food and food intake.—II. Guinard

**290. Seminar (1)**

Seminar—1 hour. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**290C. Advanced Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Critical presentation and evaluation of original research by graduate students. Planning of research programs and proposals. Discussion led by individual major instructors for their research group. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Advanced Food Science Seminar (1)**

Seminar—1 hour. Prerequisite: completion of at least one quarter of course 290. Oral presentation of student's original research, discussion, and critical evaluation. (S/U grading only.)—III. (III.)

**298. Group Study (1-5)****299. Research (1-12)**

Prerequisite: graduate standing. (S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

# Food Service Management

(College of Agricultural and Environmental Sciences)

**Faculty.** See under the Department of [Nutrition](#), on page 398.

The Major Program and Graduate Study. Food Service Management is incorporated within the major of Clinical Nutrition. If you are interested in preparing for a career in commercial organizations such as hotels, restaurants, industrial cafeterias, or contract food services, as well as in public or private institutions such as hospitals, correctional institutions, schools, or colleges, consult the Department of Nutrition.

**Related Courses.** See Food Science and Technology and Nutrition.

**Courses in Food Service Management (FSM)**

Questions pertaining to the following courses should be directed to the instructor or to the Nutrition Department Advising office in 3211 Meyer Hall (530) 752-2512.

**Upper Division Courses****120. Principles of Quantity Food Production (3)**

Lecture—3 hours. Prerequisite: Food Science and Technology 100B and 101B. Fundamental principles of food service management including quantity food preparation, institutional equipment, receiving and storage, service, menu planning, merchandising, and safety.—III. (III.) Hudson

**120L. Quantity Food Production Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 120. Laboratory experience in quantity food production and service.—I. (I.) Hudson

**122. Food Service Systems Management (3)**

Lecture—3 hours. Prerequisite: Agricultural and Resource Economics 112, courses 120, 120L, 121. Principles of quantity food production management: production schedules, portion control, financial management, layout and equipment planning, evaluation of alternative systems, and computer applications.—II. (II.) Hudson

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: one upper division course in Food Service Management and consent of instructor. Work experience on or off campus in practical aspects of food service management, supervised by a faculty member. (P/NP grading only.)—Steinberg

**197T. Tutoring in Food Service Management (1-2)**

Discussion/laboratory—3 or 6 hours. Prerequisite: Dietetics or related major; completion of the Food Service Management course in which tutoring is done. Tutoring of students in food service management, assistance with discussion groups or laboratory sections; weekly conference with instructor in charge of course; written evaluations. May be repeated if tutoring a different course. (P/NP grading only.)—Steinberg

**198. Directed Group Study (1-5)**

(P/NP grading only.)—Steinberg

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)—Steinberg

## Forensic Science (A Graduate Group)

David Howitt, Ph.D., Chairperson of the Group

**Group Office.** 1333 Research Park Drive,  
Davis, CA 95616  
(530-757-8699);  
<http://extension.ucdavis.edu/forensics>

### Faculty

Faculty members are listed on the Web site.

**Graduate Study.** The Forensic Science Graduate Group offers the degree of MS in Forensic Science. This program has two tracks enabling the student to take core courses emphasizing the physical or biological sciences. Each track requires the student to take five core courses. Tracks are the DNA and the Criminalistics. Students can take courses in a outside their area, but they must complete the courses required for their own track. The five core courses total 15 units, two elective courses for 6 units, two required seminar courses for 2 units and 9 units of research for a total of 32 units. The seminar course in the Fall quarter is required for new students and the Spring Seminar can be taken any time.

**Preparation.** Appropriate preparation is an undergraduate degree. Examples of an appropriate degree are: a degree in one of the physical or natural sciences such as Biochemistry, Chemistry, Molecular Biology, Biology, Genetics, Engineering or other closely related field with at least one year of general chemistry, organic chemistry, calculus and physics.

**Graduate Advisors.** Robert Rice (*Environmental Toxicology*), You-Lo Hsieh (*Fiber & Polymer Science*), Thomas Rost (*Biological Science*), Ed Imwinkelried (*School of Law*), Leslie Lyons, (*Population Health & Reproduction*)

### Courses in Forensic Science (FOR)

#### 200. Fundamental Concepts in Forensic Science (3)

Lecture—2 hours; fieldwork—0.25 hours; lecture/laboratory—0.25 hours; seminar—0.5 hours. Overview of forensic science. Problem definition, strategies for problem solving, analytical tools, and professional and ethical considerations.—Sensa- baugh

#### 205. Microscopy and Microanalytical Methods in Forensic Science (4)

Lecture—2.5 hours; seminar—1.5 hours. Examination of optics, interferometry and spectroscopy as they effect microscopy and microanalysis as utilized in forensic science. May be repeated for credit when topic differs. Offered in alternate years.—Howitt

#### 210. Personal Identification Methods in Forensic Science (3)

Lecture—3 hours. Prerequisite: restricted to students enrolled in the M.S. Forensic Science Program or consent of instructor. Methods for identifying individuals from evidence collected at crime scenes, suspects or victims, crime scene examination and analytical methods used to support such investigations. Topics include forensic anthropology and odontology; latent prints; shoe prints; facial reconstruction/ recognition; eyewitness identifications; biometric systems. Offered in alternate years. Howitt

#### 220. Analysis of Toxicants (3)

Lecture—3 hours. Prerequisite: coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as Environmental Toxicology 220.)—I. (I.)

#### 240. Homicide Crime Scene Investigation (3)

Lecture—2 hours; laboratory—3 hours. Processing and evaluating complex homicide scenes. Functions and activities of police agencies. Recognition, documentation, identification, and collection of evidence.

Event sequence reconstruction. Evidence collection, preservation, report writing. Courtroom presentation.—II. (II.)

#### 278. Molecular Techniques (3)

Lecture—3 hours. Prerequisite: graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as Environmental Toxicology 278.) Offered in alternate years.—Denison, Rice

#### 280. Forensic DNA Analysis (3)

Lecture—3 hours. Prerequisite: coursework in genetics and molecular biology. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as Environmental Toxicology 280.)—Von Beroldingen

#### 289. Survey in Forensic Science (3)

Lecture—3 hours. Analytical methods in contemporary forensic science. Clandestine laboratories in California, crime scene management, examination and analysis of human hair, forensic ballistics/trajec- tory reconstruction, shoe/tire print impressions, serial number restoration, forensic aspects of alcohol impairment, bloodstain pattern interpretation, microscopy of building materials, biological aspect of forensic science. May be repeated for credit when topic differs.—I, II, III. Howitt

#### 290. Seminar in Forensic Science (1)

Seminar—3 hours. Students will be exposed to topical areas in Forensic Science by presentations conducted by expert guest speakers. The seminar will also serve as a medium whereby the exiting students will present the research conducted as part of their thesis requirement. May be repeated for credit when topic differs. Restricted to students enrolled in the M.S. in Forensic Science Program. (S/U grading only.)—I, III. (I, III.)

#### 290C. Graduate Research Conference in Forensic Science (1)

Independent study—1 hour. Individual and/or group conference on problems, progress and techniques in forensic science and research. May be repeated for credit when topic differs. (S/U grading only.)—I, II, III.

#### 298. Group Study in Forensic Science (1-5)

(S/U grading only.)

#### 299. Research in Forensic Science (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## French

(College of Letters and Science)

Julia Simon, Ph.D., Chairperson of the Department

**Department Office.** 522 Sproul Hall  
(530) 752-1219; <http://french.ucdavis.edu>

### Faculty

Bruce Anderson, Ph.D., Assistant Professor  
Marc E. Blanchard, Agrégé de Lettres, Professor  
(*French, Comparative Literature*)  
Elizabeth Constable, Ph.D., Associate Professor  
Noah Guynn, Ph.D., Associate Professor  
Leslie Rabine, Ph.D., Professor  
(*Women and Gender Studies, French*)  
Eric Russell Webb, Ph.D., Assistant Professor  
Julia Simon, Ph.D., Professor  
Georges Van Den Abbeele, Ph.D., Professor

### Emeriti Faculty

Claude Abraham, Ph.D., Professor Emeritus  
Edward M. Bloomberg, Ph.D., Professor Emeritus  
Ruby Cohn, Ph.D., Professor Emerita  
Gerald Herman, Ph.D., Senior Lecturer Emeritus  
Margo R. Kaufman, M.A., Senior Lecturer Emerita  
Manfred Kusch, Ph.D., Senior Lecturer Emeritus  
(*French, Comparative Literature*)

Marshall Lindsay, Ph.D., Professor Emeritus  
Maria I. Manoliu, Ph.D., Professor Emerita  
Michèle Praeger, Ph.D., Professor Emerita  
Ruth B. York, Ph.D., Senior Lecturer Emerita

### Affiliated Faculty

Simone Clay, Ph.D., Lecturer

### The Major Program

The major program assures proficiency in all four of the language skills—speaking, understanding, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-speaking world through the study of its literature, traditions, and institutions.

**The Program.** The department encourages its students to work closely with the academic adviser in designing a major tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty. The department sponsors an active French Club and a chapter of Pi Delta Phi, the National French Honor Society. Each year, a substantial number of students with good preparation in French participate in the university's very popular Education Abroad Program, which maintains centers at seven French universities.

**Career Alternatives.** Foreign language teachers, a cardiologist, a veterinarian, a naval commander at the Pentagon, a professor of Political Science, lawyers, sales representatives, journalists, an anesthesiologist, a law professor, translators, a senior applications programmer, travel agents, independent business owners, a senior museum preparator, nurses, financial managers, stock brokers, and an industrial attaché for a French Trade Commission, all graduated with an A.B. in French from UC Davis and represent only a small fraction of the career choices documented in a recent survey of department graduates.

### A.B. Major Requirements:

	UNITS
<b>Preparatory Subject Matter</b> .....	<b>4-34</b>
French 1, 2, 3 (or the equivalent).....	0-15
French 21, 22, 23 .....	0-15
Linguistics 1 or 4 .....	4
<b>Depth Subject Matter</b> .....	<b>44</b>
French 100, 101, 102, 103, 104 .....	20
Two additional upper division French literature courses.....	8
Elective courses in French literature, language, or civilization to be chosen in consultation with undergraduate adviser .....	16
<b>Total Units for the Major</b> .....	<b>48-78</b>

### Recommended

French 101, 102, 103, 104, 107, and 160 plus other upper division courses for a total of 45 units for students interested in obtaining a "single subject" teaching credential in California.

**Major Adviser.** E. Russell Webb

### Minor Program Requirements:

	UNITS
<b>French</b> .....	<b>24</b>
French 100 .....	4
Two courses from French 101, 102 or 103 .....	8
Three elective courses in French language, literature, or civilization one of which must be either French 107 or 108 .....	12

**Honors Program.** Candidates for high or highest honors in French must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in French 194H (3 units) and French 195H (3 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligi-

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Socio-Cultural Diversity; Wrt=Writing Experience

ble for the honors program. The requirements for earning high and highest honors in French are in addition to the regular requirements for the major in French.

**Teaching Credential Subject Representative.** S. Clay; see the Teaching Credential/M.A. Program on page 102.

**Graduate Study.** The Department offers programs of study and research leading to the Ph.D. degree in French. Candidates for the Ph.D. have the option of enriching their degree program by preparing a designated emphasis in Critical Theory, Feminist Theory and Research, Classics, or Second Language Acquisition. Detailed information may be obtained from the graduate adviser or the department chairperson.

**Graduate Advisers.** N.D. Guynn

**Prerequisite Credit.** Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

## Courses in French (FRE)

Students offering high school language preparation as a prerequisite must take a placement test.

**Course Placement.** Students with two years of high school French normally take French 2, those with three years take French 3 and those with four years take French 21.

## Lower Division Courses

### 1. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Students who have successfully completed French 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.—I, II, III. (I, II, III.)

### 2. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1.—I, II, III. (I, II, III.)

### 3. Elementary French (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Continuation of course 2.—I, II, III. (I, II, III.)

### 21. Intermediate French (5)

Lecture/discussion—5 hours. Prerequisite: course 3. Grammar, oral practice, composition. Initiation to French institutions; reading and discussion of short literary texts.—I, II, III. (I, II, III.)

### 22. Intermediate French (5)

Lecture/discussion—5 hours. Prerequisite: course 21. Continuation of course 21. Grammar, oral practice, composition. Contemporary French culture; reading and discussion of a play.—I, II, III. (I, II, III.)

### 23. Intermediate French (5)

Lecture/discussion—5 hours. Prerequisite: course 22. Continuation of course 22. Grammar, oral practice, composition. Current topics in French politics and culture; reading and discussion of a novel.—I, II, III. (I, II, III.)

### 50. French Film (4)

Lecture—1 hour; discussion—2 hours; term paper. Introduction to the tradition of French cinema from its invention by Méliès and the Lumière brothers through New Wave (especially the works of Truffaut and Godard) and more recent developments in French and Francophone film. Taught in English. Offered in alternate years. GE credit: ArtHum, Wrt.—(I, II, III.) Constable, Van Den Abbeele

### 51. Major Works of French Literature in Translation (4)

Lecture—2 hours; discussion—1 hour; term paper. Readings in English translation of key works of French and Francophone literature from the Middle Ages to the present. Particular attention is given to the long-standing interest of French writers in issues of social, regional, gender, sexual, and ethnic identity. GE credit: ArtHum, Div, Wrt.—II. (II.) Guynn, Van Den Abbeele

### 52. France and the French-Speaking World (4)

Lecture—2 hours; discussion—1 hour; term paper. Taught in English. A survey of the history and culture of France and the French-speaking world, especially Canada, the Caribbean and Africa. Study of social, historical and cultural issues that occupy the French-speaking world, with particular attention to mass media. GE credit: ArtHum, Div, Wrt.—III. (III.) Van Den Abbeele

### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division Courses

### 100. Composition in French (4)

Lecture—3 hours; term paper. Prerequisite: course 23. Instruction and practice in expository writing in French, with emphasis on organization, correct syntax, and vocabulary building.—I, II, III. (I, II, III.) Clay

### 101. Introduction to French Poetry (4)

Lecture—3 hours; short papers. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of works representing the main types of French poetry. Study of French poetic conventions and versification. GE credit: ArtHum.—II. (I.) Constable

### 102. Introduction to French Drama (4)

Lecture—3 hours; short papers. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of plays representing the main types of French drama, with emphasis on dramatic structure and techniques. GE credit: ArtHum.—I. (II.) Guynn

### 103. Introduction to French Prose (4)

Lecture—3 hours; short papers. Prerequisite: course 100 or consent of instructor. Analysis and evaluation of works representing main types of French prose, with emphasis on narrative structure and techniques. GE credit: ArtHum.—III. (III.) Simon

### 104. Translation (4)

Lecture—3 hours; extensive writing. Prerequisite: course 100 or the equivalent. Practice in English-to-French and French-to-English translation using a variety of non-literary materials, illustrating different problems and styles.—III. (III.) Clay, Russell Webb

### 105. Advanced French Grammar (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 23 or the equivalent. Understanding of, and extensive practice with, various grammatical structures in French. Lexical-semantic, morphological, and syntactic analysis.—II. (II.) Anderson, Russell Webb

### 106. French in Business and the Professions (4)

Lecture—1 hour; discussion—2 hours; frequent written assignments. Prerequisite: course 100 or consent of instructor. The French language as used in the commercial sphere. Emphasis on proper style and form in letter-writing, and in non-literary composition. Technical terminology in such diverse fields as government and world business.—I. (I.) Clay

### 107. The Making of Modern France (4)

Lecture—3 hours; term paper. Prerequisite: course 100 or consent of instructor. Introduction to French culture through a historical approach to topics such as the citizen and the state (politics, justice, social security), the nation and centralization, the rise of public education, colonization, class and social relationships. Offered in alternate years. GE credit: ArtHum.—(I.) Anderson, Constable, Simon

### 108. Topics in Contemporary French Culture (4)

Lecture—3 hours; extensive writing. Prerequisite: course 100 or consent of instructor. Contemporary French culture through specific topics such as women and French culture, decolonization and modernization, the politics of education, immigration in France,

Francophone cultures. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(II.) Constable

### 109. French Phonetics (4)

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: course 23 or the equivalent. Introduction to the sound-inventory of French and practice in phonetic transcription, with a focus on ways in which phonetic contrasts signal grammatical contrasts; spoken forms and spelling; formal differences between the 'Standard' and other varieties across the French-speaking world. Offered in alternate years.—III. Anderson, Russell Webb

### 110. Stylistics and Creative Composition (4)

Lecture—3 hours; frequent papers. Prerequisite: course 100 or consent of instructor. Intensive course in creative composition using a variety of techniques and literary styles, patterned on Queneau's *Exercices de style*. Practice in such stylistic modifications as inversion, anathesis, changes in tense, mood, tonality, etc. The writing of poetry.—II. (II.) Anderson

### 115. Medieval French Literature and Society (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. The social and cultural life of medieval France as studied through its representation in such literary works as *La Chanson de Roland*, courtly love lyric, the Arthurian romances of Chrétien de Troyes, Aucassin et Nicolette, selected fabliaux and farces. Offered in alternate years. GE credit: ArtHum.—I. Guynn

### 116. The French Renaissance (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Overview of major works and writers with particular attention to the historical context of the turbulent 16th century. Writers to be read may include Rabelais, Marot, Ronsard, Du Bellay, Labé, Marguerite de Navarre, Montaigne, and D'Aubigné. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(III.) Van Den Abbeele

### 117A. Baroque and Preclassicism (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. The literature and intellectual culture of the period between the Renaissance and French classicism. Offered in alternate years. GE credit: ArtHum.—(II.) Van Den Abbeele

### 117B. The Classical Moment (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Literature, culture, and politics in the "Age of Louis XIV." May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(III.) Simon, Van Den Abbeele

### 118A. The Age of Reason and Revolution (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Literature and philosophy of the French Enlightenment. Readings from such authors as Bayle, Fontenelle, Montesquieu, Voltaire, Rousseau and Diderot. Offered in alternate years. GE credit: ArtHum.—(II.) Simon

### 118B. Private Lives and Public Secrets: The Early French Novel (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 103. History of the French roman from the Middle Ages to the Revolution with particular emphasis on the novels of the 18th century. Offered in alternate years. GE credit: ArtHum.—II. Simon

### 119A. The Romantic Imaginary (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Major concepts and themes of French Romanticism, such as dream and the supernatural, impossible love, exoticism, revolution, individualism, nature, the *mal du siècle*, Romantic irony, the creative imagination, the cult of ruin. Offered in alternate years. GE credit: ArtHum.—II. Constable

### 119B. Realism, History and the Novel (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Investigation of the narrative and historical codes of French realist fiction, with emphasis on the representation of history

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

in the realist novel, its depiction of social "realities" such as class and gender, and its relation to the historical situation of post-revolutionary society. Offered in alternate years. GE credit: ArtHum.—(III.) Constable

#### 119C. From Baudelaire to Surrealism (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101. Study of the main poets and poetic movements from the mid-19th to the early 20th century, including Baudelaire, the Symbolists, and the Surrealists. Offered in alternate years. GE credit: ArtHum.—(I.) Constable

#### 120. Modern French Thought (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Overview of post-Second World War French intellectual currents from existentialism to structuralism and deconstructionism. Readings will include Sartre and de Beauvoir, Camus, Lévi-Strauss, Lacan, Barthes, Foucault, Derrida, Kristeva, Sollers, Cixous, and Irigaray. Offered in alternate years. GE credit: ArtHum.—(I.)

#### 121. Twentieth Century French Novel (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 103. Novels and theories of the novel, from Proust to the Nouveau Roman and beyond. Readings from among Gide, Sartre, de Beauvoir, Camus, Breton, Beckett, Robbe-Grillet, Sarraute, Simon, Barthes, Duras, Tournier, Perec, Modiano, Guibert, Toussaint. Offered in alternate years. GE credit: ArtHum.—(II.)

#### 124. Post-Colonialist and Francophone Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Introduction to Post-Independence Black African and/or Caribbean and/or North African literatures written in French. Selected topics include: identity and subjectivity, the role of the intellectual, women's voices, languages and oral literatures, cultural syncretism, theories of post-colonialism. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div.—(III.) Adejunmobi

#### 125. French Literature and Other Arts (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. The relationship between French literature and other arts—painting, music, cinema, architecture, opera—from different periods. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—II. Clay, Guynn

#### 127. Paris: Modernity and Metropolitan Culture (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Study of the representation of Paris in 19th and 20th century texts and its importance in defining the experience and art of modernity. Offered in alternate years. GE credit: ArtHum.—(III.) Blanchard, Constable

#### 128. Topics in French Culture (4)

Lecture—3 hours; extensive writing. Prerequisite: course 100 or consent of instructor. In-depth study of a particular topic in French culture. Topics may include the Court of Louis XIV, the French Revolution and Immigration. May be repeated once for credit when topic differs. Offered in alternate years.—Constable, Guynn, Simon, Van Den Abbeele

#### 130. From Page to Stage: Theatre and Theatricality (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 102. French theater as literature and performance. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—I. Clay, Guynn

#### 133. Gender and Politics in French Literature and Culture (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101, 102, or 103. Examination of the thematic, theoretical and political tendencies in contemporary French fiction. Barthes, Foucault, Duras, Guibert, considered in terms of their writing on identity and gender. Offered in alternate years. GE credit: ArtHum, Div.—I.

#### 140. Study of a Major Writer (4)

Lecture—3 hours; term paper. Prerequisite: course 100 and course 101, 102, or 103 as appropriate to selected topic, or consent of instructor. Concentrated study of works of a single author. May be repeated once for credit as author-subject changes.—II. (II.)

#### 141. Selected Topics in French Literature (4)

Lecture—3 hours; term paper or short papers. Prerequisite: courses 100 and 101 or 102 or 103 as appropriate to the selected topic or consent of instructor. Subjects and themes such as satiric and didactic poetry of the Middle Ages, poetry of the Pléiade, theater in the eighteenth century, pre-romantic poetry, etc. May be repeated twice for credit when topic differs.—II. (II.)

#### 160. Topics in French Morphosyntax (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 100 and Linguistics 1. Analysis of controversial grammatical phenomena with emphasis on the semantic content and the pragmatic function of such categories as tense, mood and gender. Offered in alternate years.—III. Anderson, Russell Webb

#### 161. Modern French Syntax (4)

Lecture—3 hours; short papers. Prerequisite: course 160. Presentation of basic concepts of contemporary approaches to French syntax. Consideration of new explanations of so-called "irregular" phenomena in current language models.—III. (III.) Anderson, Russell Webb

#### 162. History of French Language (4)

Lecture—3 hours; term paper. Prerequisite: course 160. Main periods in development of the French language, from Latin to contemporary popular aspects, with emphasis on relationship between socio-cultural patterns and evolution of the language. GE credit: ArtHum.—II. (II.) Russell Webb

#### 192. Internship (1-12)

Internship—3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Practical application of the French language through work experience in government and/or business, culminating in an analytical term paper on a topic approved by the sponsoring instructor. (P/NP grading only.)

#### 194H. Special Study for Honors Students (4)

Independent study—4 hours. Prerequisite: open only to French majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in French literature, civilization, or language studies. (P/NP grading only.)

#### 195H. Honors Thesis (4)

Independent study—4 hours. Prerequisite: course 194H. Writing of an honors thesis on a topic in French literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 197T. Tutoring in French (1-4)

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of Chairperson. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

#### 197TC. Tutoring in the Community (2-4)

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of Chairperson. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

## Graduate Courses

#### 200. Literary Analysis (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing. Basic principles of applied literary theory. Concepts and methods of the critical analysis of literature and literary texts. Basic principles of bibliographic research will be covered at the beginning of the course.—I. (I.)

#### 201. History of French: Phonology and Morphosyntax (4)

Seminar—3 hours; term paper. Prerequisite: courses 159, 160, 250A, or consent of instructor. Presentation of the main changes in the phonematic and grammatical structures of French, from Latin to contemporary spoken aspects.—III. (III.) Russell Webb

#### 204. Topics in Medieval Literature (4)

Seminar—3 hours; term paper. Study of Medieval French literature, focusing on a particular period, milieu, literary movement, genre, or theoretical approach. May be repeated for credit when topic differs.—I. (I.) Guynn

#### 205A. Sixteenth-Century Literature: The Humanists (4)

Seminar—3 hours. French humanism in its most varied forms. Although at different times Rabelais and Montaigne will be primarily studied, other leading intellectuals and religious writers will also receive attention. May be repeated for credit when different topic is studied.—I. (I.) Van Den Abbeele

#### 206A. Seventeenth-Century Literature: Theater (4)

Seminar—3 hours. Works of Corneille, Racine, Molière, and minor dramatists. One or more authors may be covered. May be repeated for credit with consent of instructor when different topics are studied.—II. (II.) Van Den Abbeele

#### 206B. Seventeenth-Century Literature: Prose (4)

Seminar—3 hours; term paper and/or exposé. Works of authors such as Pascal, Descartes, Mme de Lafayette. One or more authors may be covered. May be repeated for credit with consent of instructor as different topics are studied from quarter to quarter.—I. (I.) Van Den Abbeele

#### 206C. Seventeenth-Century Literature: Poetry (4)

Seminar—3 hours; term paper and/or exposé. Studies of the works of one or more poets of the period. May be repeated for credit with consent of instructor.—III. (III.) Van Den Abbeele

#### 207A. Eighteenth-Century Literature: Philosophies (4)

Seminar—3 hours; term paper and/or exposé. Not a course in philosophy, but an examination of the role of philosophy in the design and context of literary works. Study of one or more authors. May be repeated for credit.—II. (II.) Simon

#### 207B. Eighteenth-Century Literature: Novel (4)

Seminar—3 hours. Rise of the novel. Study of narrative experiments in the context of the philosophical climate and new literary values. Course may treat one or more novelists of the period. May be repeated for credit when different topics are studied.—III. (III.) Simon

#### 208A. Nineteenth-Century Literature: Fiction (4)

Seminar—3 hours. Study of the works of one or several novelists and/or short-story writers of the period. May be repeated for credit with consent of instructor when different topics are studied.—I. (I.) Constable

#### 208B. Nineteenth-Century Literature: Poetry (4)

Seminar—3 hours. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor when different topics are studied.—III. (III.) Constable

**209A. Twentieth-Century: Prose (4)**

Seminar—3 hours; term paper and/or exposé. Study of the works of one or several writers of the period.—II. (II.)

**209B. Twentieth-Century: Theater (4)**

Seminar—3 hours; term paper and/or exposé. Study of the works of one or several dramatists of the period. May be repeated for credit with consent of instructor.—II. (II.)

**209C. Twentieth-Century: Poetry (4)**

Seminar—3 hours; term paper and/or exposé. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor.—III. (III.)

**210. Studies in Narrative Fiction (4)**

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—I. (I.)

**211. Studies in Criticism (4)**

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—II. (II.)

**212. Studies in the Theater (4)**

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—I. (I.)

**213. Studies in Poetry (4)**

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—II. (II.)

**214. Study of a Literary Movement (4)**

Seminar—3 hours. May be repeated for credit with consent of instructor when different topic is studied.—III. (III.)

**224. Francophone Literatures (4)**

Seminar—3 hours; term paper. Study of cultural productions (literature, film, visual arts) by Francophone peoples such as found in North Africa, West Africa, the Caribbean, South-East Asia, the Americas, and Metropolitan France. May be repeated for credit when topic differs and with consent of instructor.—Constable, Rabine, Van Den Abbeele, Adejunmobi

**250A. French Linguistics: Morphematics (4)**

Seminar—4 hours. Prerequisite: courses 159, 160, or consent of instructor. Theoretical approach to French grammar, with emphasis on morphematics, i.e., a semantic analysis of grammatical categories, as well as of their paradigmatic and syntactic relations.—I. (I.)

**250B. French Linguistics: Transformational Syntax (4)**

Seminar—4 hours. Prerequisite: course 250A or consent of instructor. Presentation of French syntax exemplified by a core of transformational rules (such as subjectivization, passivization, relativization) focusing on the most recent developments in the field (i.e., case grammars, generative semantics, trace theory).—I. (I.)

**251. Trends in French Contemporary Linguistics (4)**

Seminar—3 hours; term paper. Prerequisite: course 250A or 250B or consent of instructor. Issues in contemporary French linguistic thought and their relationship to the development of theoretical linguistics. Topics such as pragmatics, semantics, symbolic logic, speech acts, etc. Intended for students in French linguistics or those interested in applying linguistic models to literature. May be repeated once for credit with consent of instructor when topic differs.—I. (I.)

**261. Current Issues in Modern French Syntax (4)**

Seminar—3 hours; term paper. Prerequisite: course 161. Presentation of contemporary approaches to French syntax. Explanations of various less regular phenomena, with reference to on-going changes in modern spoken French. May be repeated for credit with consent of instructor when topic differs. Offered in alternate years.—II.

**297. Individual Study (1-5)**

(S/U grading only.)

**298. Group Study (1-5)**

Seminar—1-5 hours. May be repeated for credit with consent of instructor.

**299. Research (1-12)**

(S/U grading only.)

**299D. Dissertation Research (1-12)**

(S/U grading only.)

**Professional Courses****300. Teaching of a Modern Foreign Language (3)**

Lecture/discussion—3 hours. Prerequisite: senior or graduate standing; a major or minor in a modern foreign language.—III. (III.)

**390A. The Teaching of French in College (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. May be repeated for credit with consent of instructor. (S/U grading only.)—I. (I.) Anderson

**390B. The Teaching of French in College (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)—II. (II.) Anderson

**390C. The Teaching of French in College (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)—II. (II.) Anderson

**390D. Teaching Intermediate French (2)**

Lecture/discussion—2 hours. Prerequisite: course 390A, 390B, 390C. Focus on how to teach intermediate French grammar, literature, and composition. (P/NP grading only.)—I. (I.) Clay

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Freshman Seminar Program

Jon Wagner, Program Director

**Program Office.** 17 Wellman (Teaching Resources Center)  
(530) 752-3249; <http://trc.ucdavis.edu/trc>

**Committee in Charge**

John Boe, Ph.D. (*University Writing Program*)  
Annie King, Ph.D. (*College of Agricultural and Environmental Sciences*)

Jay Mechling, Ph.D. (*American Studies*)

Jon Wagner, Ph.D. (*School of Education*)

Fred Wood, Ph.D. (*Interim Vice Provost for Undergraduate Studies*)

**Courses in Freshman Seminar (FRS)**

Questions pertaining to the following course should be directed to the instructor or to the Teaching Resources Center.

**Lower Division Courses****1. Freshman Seminar (1)**

Seminar—1-1.5 hours. The investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities

(such as fieldwork, site visits, laboratory work, etc.). Emphasis is placed upon student participation in learning. Open only to students who have completed fewer than 45 quarter units. May be repeated for credit. May take more than one freshman seminar, but not more than one in any given quarter.—I, II, III.

**2. Freshman Seminar (2)**

Seminar—2-2.5 hours. The investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis is placed upon student participation in learning. Open only to students who have completed fewer than 45 quarter units. May be repeated for credit. May take more than one freshman seminar, but not more than one in any given quarter.—I, II, III.

**3. Freshman Seminar (1)**

Seminar—1-1.5 hours. The investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis is placed upon student participation in learning. Open only to students who have completed fewer than 45 quarter units. May be repeated for credit. May take more than one freshman seminar, but not more than one in any given quarter. (P/NP grading only.)—I, II, III.

**4. Freshman Seminar (2)**

Seminar—2-2.5 hours. The investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis is placed upon student participation in learning. Open only to students who have completed fewer than 45 quarter units. May be repeated for credit. May take more than one freshman seminar, but not more than one in any given quarter. (P/NP grading only.)—I, II, III.

## Fungal Biology and Ecology

(College of Agricultural and Environmental Sciences)

The minor in Fungal Biology and Ecology is open to all students interested in a concentrated exposure to and knowledge of the fungi and allied organisms.

The minor is sponsored by the Plant Pathology Department.

**Minor Program Requirements:**

UNITS

**Fungal Biology and Ecology ..... 18-20**

Plant Pathology 130, 148, 150..... 11  
Select 7-9 units from Food Science and Technology 104, Medical Microbiology and Immunology 130, Plant Biology 146, Plant Pathology 40, 135, 151, Science and Society 30, Soil Science 111, 112; Plant Pathology 224 (available to advanced students with consent of instructor) ..... 7-9

**Minor Adviser.** J. D. MacDonald

## Genetics

See **Molecular, Cellular, and Integrative Physiology (A Graduate Group)**, on page 382; and **Genetics**, below.

## Genetics (A Graduate Group)

James Murray, Ph.D., Chairperson of the Group

**Group Office.** 310 Life Sciences Addition  
(530) 752-4863;  
<http://biosci.ucdavis.edu/ggc/ggc>

### Faculty

Steffen Abel, Ph.D., Associate Professor  
(Vegetable Crops)  
Danika Bannasch, Ph.D. Assistant Professor  
(Vegetable Crops)  
Diane Beckles, Ph.D., Assistant Professor  
(Vegetable Crops)  
David Begun, Ph.D., Associate Professor  
(Evolution and Ecology)  
Craig Benham, Ph.D., Professor (Genome Center)  
Alan B. Bennett, Ph.D., Professor (Vegetable Crops)  
Linda F. Bisson, Ph.D., Professor  
(Viticulture and Enology)  
John Bowman, Ph.D., Associate Professor  
(Plant Biology)  
Anne Bagg Britt, Ph.D., Associate Professor  
(Plant Biology)  
Sean Burgess, Ph.D., Assistant Professor  
(Molecular and Cellular Biology)  
Kenneth C. Burtis, Ph.D., Professor  
(Molecular and Cellular Biology)  
Judy Callis, Ph.D., Professor  
(Molecular and Cellular Biology)  
Frederic Chedin, Ph.D., Assistant Professor  
(Molecular and Cellular Biology)  
Hongwu Chen, Ph.D., Assistant Professor  
(Cancer Center)  
Roger Chetelat, Ph.D., Associate Agronomist  
(Vegetable Crops)  
Douglas Cook, Ph.D., Professor (Plant Pathology)  
Gino A. Cortopassi, Ph.D., Professor  
(Molecular Biosciences)  
Michael E. Dahmus, Ph.D., Professor  
(Molecular and Cellular Biology)  
Abhaya Dandekar, Ph.D., Professor (Pomology)  
Mary Delany, Ph.D., Associate Professor  
(Animal Science)  
Jorge Dubcovsky, Ph.D., Professor  
(Agronomy and Range Science)  
Jan Dvorak, Ph.D., Professor  
(Agronomy and Range Science)  
JoAnne Engebrecht, Ph.D., Assistant Professor  
(Molecular and Cellular Biology)  
Holly Ernest, Ph.D., Assistant Research Geneticist  
(Population Health and Reproduction)  
Bryce W. Falk, Ph.D., Professor (Plant Pathology)  
Thomas R. Famula, Ph.D., Professor  
(Animal Science)  
Peggy Farnham, Ph.D., Professor  
(Pharmacology & Toxicology)  
Charles S. Gasser, Ph.D., Professor  
(Molecular and Cellular Biology)  
Paul Gepts, Ph.D., Professor  
(Agronomy and Range Science)  
Robert L. Gilbertson, Ph.D., Professor  
(Plant Pathology)  
David G. Gilchrist, Ph.D., Professor (CEPRAP)  
Thomas Gradziel, Ph.D., Professor (Pomology)  
Paul H. Gumerlock, Ph.D., Assistant Professor  
(Hematology and Oncology)  
Nobuko Hagiwara, Ph.D., Assistant Professor  
(Cardiovascular Medicine)  
John H. Harada, Ph.D., Professor (Plant Biology)  
James A. Harding, Ph.D., Professor  
(Environmental Horticulture)  
Stacey Harmer, Ph.D., Assistant Professor  
(Plant Biology)  
Wolf-Dietrich Heyer, Ph.D., Professor (Microbiology)  
Liping Huang, Ph.D., Assistant Adjunct Professor  
(Nutrition)  
Neil Hunter, Ph.D., Assistant Professor  
(Microbiology)  
Marie Jasieniuk, Ph.D., Assistant Professor  
(Vegetable Crops)

Clarence I. Kado, Ph.D., Professor (Plant Pathology)  
Sree Kanthaswamy, Ph.D., Assistant Research Geneticist (Veterinary Genetics, Forensics)  
Ken Kaplan, Ph.D., Assistant Professor  
(Molecular and Cellular Biology)  
Daniel Kliebenstein, Ph.D., Assistant Professor (Vegetable Crops)  
Artyom Kopp, Ph.D., Assistant Professor (Evolution and Ecology)  
Ian Korf, Ph.D., Assistant Professor  
(Computational Molecular Biology)  
Stephen C. Kowalczykowski, Ph.D., Professor  
(Microbiology)  
Dietmar Kueltz, Ph.D., Assistant Professor  
(Animal Science)  
Hsing-Jien Kung, Ph.D., Professor  
(Biological Chemistry)  
Kit Lam, Ph.D., Professor (Cancer Center)  
Charles Langley, Ph.D., Professor  
(Center for Population Biology)  
Janine LaSalle, Ph.D., Assistant Professor  
(Microbiology and Immunology)  
Tom Ledig, Ph.D., Adjunct Professor  
(Environmental Horticulture)  
Hongzhe Li, Ph.D., Assistant Professor  
(Biological Chemistry)  
Su-Ju Lin, Ph.D., Assistant Professor (Microbiology)  
William Lucas, Ph.D., Professor (Plant Biology)  
Leslie A. Lyons, Ph.D., Assistant Professor  
(Population Health and Reproduction)  
Julin Maloof, Ph.D., Assistant Professor  
(Plant Biology)  
Marta Marthas, Ph.D., Associate Adjunct Professor  
(Primate Center)  
Bernie May, Ph.D., Professor (Animal Science)  
Juan F. Medrano, Ph.D., Professor (Animal Science)  
Carole Meredith, Ph.D., Professor  
(Viticulture and Enology)  
Danika Metallinos-Bannasch, Ph.D., Assistant Professor (Population Health and Reproduction)  
Frederick J. Meyers, Ph.D., Professor  
(Hematology and Oncology)  
Richard Michelmore, Ph.D., Professor  
(Vegetable Crops)  
Maria Mudryj, Ph.D., Associate Professor  
(Microbiology and Immunology)  
James D. Murray, Ph.D., Professor (Animal Science)  
Jeanette E. Natzle, Ph.D., Associate Professor  
(Molecular and Cellular Biology)  
David Neale, Ph.D., Adjunct Professor  
(Environmental Horticulture)  
Sergey Nuzhdin, Ph.D., Associate Professor  
(Evolution and Ecology)  
Anita M. Oberbauer, Ph.D., Professor  
(Animal Science)  
Dan E. Parfitt, Ph.D., Pomologist (Pomology)  
Martin L. Privalsky, Ph.D., Professor (Microbiology)  
Carlos F. Quiros, Ph.D., Professor (Vegetable Crops)  
Kathryn L. Radke, Ph.D., Associate Professor  
(Animal Science)  
Pamela C. Ronald, Ph.D., Associate Professor  
(Plant Pathology)  
Lesilee Rose, Ph.D., Associate Professor  
(Molecular and Cellular Biology)  
John Roth, Ph.D., Professor, (Microbiology)  
Earl Sawai, Ph.D., Associate Adjunct Professor  
(Pathology)  
Carl W. Schmid, Ph.D., Professor  
(Molecular and Cellular Biology)  
Michael F. Seldin, Ph.D., Professor  
(Biological Chemistry)  
Frank Sharp, Ph.D., Professor (Neurology)  
Douglas Shaw, Ph.D., Professor (Pomology)  
Mitchell Singer, Ph.D., Associate Professor  
(Microbiology)  
Neelima Sinha, Ph.D., Professor (Plant Biology)  
Dina St. Clair, Ph.D., Associate Professor  
(Vegetable Crops)  
Daniel Starr, Ph.D., Assistant Professor  
(Molecular and Cellular Biology)  
Venkatesan Sundaresan, Ph.D., Professor  
(Plant Biology)  
Michael Syvanen, Ph.D., Professor  
(Microbiology and Immunology)

Thomas Tai, Ph.D., Associate in AES  
(Agronomy and Range Science)  
Larry R. Teuber, Ph.D., Professor  
(Agronomy and Range Science)  
Alison Van Eenennaam, Ph.D., Cooperative  
Extension Specialist (Animal Science)  
M. Andrew Walker, Ph.D., Professor  
(Viticulture and Enology)  
Craig H. Warden, Ph.D., Associate Professor  
(Rowe Program)  
Thea A. Wilkins, Ph.D., Professor  
(Agronomy and Range Science)  
Valerie M. Williamson, Ph.D., Professor  
(Nematology)  
Reen Wu, Ph.D., Professor (Pulmonary Medicine)  
John I. Yoder, Ph.D., Professor (Vegetable Crops)

**Graduate Study.** The Graduate Group in Genetics offers programs of study and research leading to the M.S. and Ph.D. degrees. To optimize the breadth available for student training and faculty interaction while still providing the opportunity for focused curricula, Focus Groups (FGs) were recently created within the graduate group. These focus groups consist of clusters of labs with similar research interests; faculty members belong to one or more focus groups (all faculty belong to the General Genomics section of graduate group). In addition, there are FGs in Animal Genomics, Chromosome Biology, Human Genetics, Model Plants, and Plant Breeding & Biodiversity (a FG in Bioinformatics is expected soon). Each of these groups provides broad training in genetics, combined with an emphasis specific to its area. Students choose their focus group affiliation based on their research interests and the membership of their major professor. For additional information regarding the program, contact the group administrative assistant (530) 752-4863.

**Graduate Adviser.** Consult Genetics Graduate Group office.

### Courses in Genetics (GGG)

#### Graduate Courses

##### 201A. Advanced Genetic Analysis (5)

Lecture/discussion—5 hours. Prerequisite: Biological Sciences 101, Statistics 100 or the equivalent, graduate standing. Fundamentals of genetic analysis and chromosome structure using model organisms including mutation, transmission, complementation, suppression, and enhancement as well as epigenetic phenomena at the whole organism and molecular levels.—III.

##### 201B. Genomics (5)

Lecture—3 hours; discussion—2 hours. Prerequisite: course 201A, 201C or the equivalent. Prokaryotic and eukaryotic genomes. Experimental strategies and analytical challenges of modern genomics research and the theory and mechanics of data analysis. Structural, functional, and comparative genomics. Related issues in bioinformatics.—III. (III.) Cook, Michelmore

##### 201C. Molecular Biology (4)

Lecture—4 hours. Prerequisite: Molecular and Cellular Biology 221A or the equivalent. Pass 1 restricted to graduate students in biochemistry and molecular biology, microbiology, or genetics. Structure and organization of DNA and chromatin; DNA replication, repair and recombination; transcription and RNA processing; protein biosynthesis and turnover; transcriptional and post-transcriptional control mechanisms; examples from eukaryotic and eubacterial cells, and viruses. (Same course as Molecular and Cellular Biology 221C.)—III. (III.)

##### 201D. Quantitative and Population Genetics (5)

Lecture—5 hours. Prerequisite: course 201A or consent of instructor. Basic concepts of quantitative and population genetics including gene and genotypic frequencies, multiple factor hypothesis, phenotypic and genotypic values, heritability, selection, genetic variation, the detection of quantitative trait loci and evolution in populations. Experimental and analytical methods.—II. (II.) Famula, Neale, Shaw

**205. Molecular Genetics Laboratory (5)**  
 Laboratory—15 hours. Prerequisite: Biological Sciences 101 (may be taken concurrently) or the equivalent, enrolled in Genetics Graduate Group. Students will conduct experiments in molecular genetics laboratories. Individual research problems will emphasize experimental design, experience with methodologies, and data interpretation. May be repeated up to three times for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**207L. Research Methods in Plant Genetics Laboratory (2-5)**  
 Laboratory—6-15 hours. Prerequisite: course 207 (may be taken concurrently). Working knowledge of contemporary methodologies in plant genetics is obtained by participating in research programs of the various Plant Genetics Affinity Group members. (S/U grading only.)—I, II, III. (I, II, III.)

**210. Horizontal Gene Transfer (3)**  
 Lecture/discussion—3 hours. Prerequisite: background in basic microbiology and genetics required; introductory course in molecular biology, biotechnology and microbial and animal/plant genetics recommended. Transfer of genes between unrelated organisms in nature. Dissemination of foreign DNA from genetically engineered organisms, including plants and animals. Mechanisms by which genes are transferred horizontally, and between kingdoms.—I. (I.) Kado

**211. Concepts in Human Genetics and Genomics (3)**  
 Lecture/discussion—3 hours. Prerequisite: course 201A or the equivalent; course 201B, 201C or the equivalent recommended. Human genomic organization; genetic structure of populations; positional cloning, application of linkage, association, and haplotypes; quantitative trait loci analyses; integrative genetic studies of gene expression; DNA repair mechanisms in genetic disease; mutation analyses; epigenetics; mitochondrial disease; gene manipulation and therapy.—II. (II.)

**220. Genomics and Biotechnology of Plant Improvement (3)**  
 Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. (Same course as Plant Sciences 220.)—II. Micheltore

**291. Seminar in History of Genetics (2)**  
 Seminar—2 hours. Prerequisite: Biological Sciences 101. The development of modern genetic theories beginning with Mendel.—II. (II.)

**293. Seminar in Animal Genetics (1-3)**  
 Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Emphasis on recent advances in the field of animal genetics, ranging from quantitative genetics to molecular biology as it relates to animals.—III. (III.)

**294. Seminar in Human Genetics (2)**  
 Seminar—2 hours. Prerequisite: course 201A and consent of instructor. May be repeated for credit up to five times if topic differs. Topics of current interest in human genetics and genomics. Offered in alternate years.—II. Seldin

**295. Seminar in Molecular Genetics (1-3)**  
 Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Topics of current interest related to the structure, modification and expression of genes.—I. (I.)

**296. Scientific Professionalism and Integrity (2)**  
 Lecture—1 hour; seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Review of basic skills required of contemporary scientists. Topics include scientific conduct, manuscript preparation, grant writing, seminar presentations, and time management. Emphasis on responsibilities of scientists to factually and thoughtfully communicate results. (S/U grading only.)—I. (I.) Yoder

**297. Seminar in Plant Genetics (1-3)**  
 Seminar—1-3 hours. Prerequisite: course 201A or consent of instructor. Current topics in plant genetics will be examined in student-conducted seminars and discussion format. The integration of molecular, organismal and population genetics to address questions in plant biology will be emphasized.

**298. Group Study (1-5)**  
 Prerequisite: consent of instructor. Group study of selected topics in genetics. (S/U grading only.)

**299. Research (1-12)**  
 (S/U grading only.)

**Professional Course**  
**300. Methods in Teaching Genetics (1-3)**  
 Lecture/discussion. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching genetics. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion or laboratory sections, formulating examinations under supervision of instructor. May be repeated for credit up to 3 times or 9 units if teaching in different genetics related course. (S/U grading only.)—I, II, III.

## Geographic Information Systems

(College of Agricultural and Environmental Sciences)  
 The Department of Biological and Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnics, archaeology, military exercises, and computer-aided design. Prerequisites include Mathematics 16A-16B, Statistics 13 or Plant Sciences 120 or Civil and Environmental Engineering 114, and Plant Sciences 21 or Computer Science Engineering 15

**Minor Program Requirements:** UNITS

<b>Geographic Information Systems .....</b>	<b>18</b>
Applied Biological Systems Technology 180, 185, Environmental and Resource Sciences 186, 186L .....	13
Select five or more units from Plant Sciences 121, Applied Biological Systems Technology 175, Applied Biological Systems Technology/Hydrologic Science 182, Environmental Science and Policy 179, 179L .....	5

**Minor Advisers.** R.E. Plant (*Plant Sciences*)

## Geographic Studies

(College of Agricultural and Environmental Sciences)  
 The interdepartmental minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the earth's surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the earth's surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college and also with graduate programs in geography.  
 The minor is sponsored by the Department of Environmental Design.

## Geography

See **Geography (A Graduate Group)**, below.

## Geography (A Graduate Group)

Janet D. Momsen, Ph.D., Chairperson of the Group  
**Group Office.** Carrie Armstrong-Ruport, Program Coordinator; 207 Walker Hall (530) 752-4119; [geography@ucdavis.edu](mailto:geography@ucdavis.edu)

- Faculty**
- Michael Barbour, Ph.D., Professor (*Environmental Horticulture*)
  - David Boyd, Ph.D., Associate Professor (*Anthropology*)
  - Cynthia Brantley, Ph.D., Professor (*History*)
  - Stephen Brush, Ph.D., Professor (*Human and Community Development*)
  - Deborah L. Elliott-Fisk, Ph.D., Professor (*Wildlife, Fish, and Conservation Biology*)
  - Mark Francis, M.L.A., Professor (*Landscape Architecture*)
  - Charles Goldman, Ph.D., Professor (*Environmental Science and Policy*)
  - Steven Greco, Ph.D., Assistant Professor (*Landscape Architecture*)
  - Louis Grivetti, Ph.D., Professor (*Nutrition*)
  - Lynette Hart, Ph.D., Professor (*Population Health and Reproduction*)
  - David Hird, D.V.M., Ph.D., Professor (*Veterinary Medicine*)
  - Frank Hirtz, L.L.D., Ph.D., Associate Professor (*Human and Community Development*)
  - Lovell (Tu) Jarvis, Ph.D., Professor (*Agricultural and Resource Economics*)
  - Robert Johnston, M.S., Professor (*Environmental Science and Policy*)
  - Suad Joseph, Ph.D., Professor (*Anthropology, Women and Gender Studies*)
  - Carl Keen, Ph.D., Professor (*Nutrition*)
  - Martin Kenney, Ph.D., Professor (*Human and Community Development*)
  - Nguyen Kien, Ph.D., Professor (*Anesthesiology*)
  - F. Thomas Ledig, Ph.D., Adjunct Professor (*Environmental Horticulture*)
  - Jeff D. Loux, Ph.D., Assistant Adjunct Professor (*Landscape Architecture*)
  - Jay R. Lund, Ph.D., Professor (*Civil and Environmental Engineering*)
  - Dean MacCannell, Ph.D., Professor (*Landscape Architecture*)
  - Roger McDonald, Ph.D., Professor (*Nutrition*)
  - Jay Mechling, Ph.D., Professor (*American Studies*)
  - Janet Momsen, Ph.D., Professor (*Human and Community Development*)
  - Debbie Niemeier, Ph.D., Associate Professor (*Civil and Environmental Engineering*)
  - Ben Orlove, Ph.D., Professor (*Environmental Science and Policy*)
  - Patsy Eubanks Owens, M.L.A., Professor (*Landscape Architecture*)
  - Richard Plant, Ph.D., Professor (*Agronomy and Range Science*)
  - James Quinn, Ph.D., Professor (*Environmental Science and Policy*)
  - David Robertson, Ph.D., Professor (*English*)
  - Lynn Roller, Ph.D., Professor (*Classics, Art History*)
  - Scott Rozelle, Ph.D., Professor (*Agricultural and Resource Economics*)
  - Margaret Rucker, Ph.D., Professor (*Textiles and Clothing*)
  - Heath Schenker, M.A., Professor (*Landscape Architecture*)
  - Art Shapiro, Ph.D., Professor (*Evolution and Ecology*)
  - Michael P. Smith, Ph.D., Professor (*Human and Community Development*)

Margaret Swain, Ph.D., Associate Adjunct Professor  
(*Anthropology*)  
Susan Ustin, Ph.D., Professor  
(*Land, Air, and Water Resources*)  
Stefano Varese, Ph.D., Professor  
(*Native American Studies*)  
Charles Walker, Ph.D., Associate Professor (*History*)  
Wesley W. Wallender, Ph.D., Professor  
(*Land, Air, and Water Resources*)  
Miriam J. Wells, Ph.D., Professor  
(*Human and Community Development*)  
Diane Wolf, Ph.D., Professor (*Sociology*)  
Truman Young, Ph.D., Professor  
(*Environmental Horticulture*)  
Minghua, Zhang, Ph.D., Associate Adjunct Professor  
(*Land Air and Water Resources*)

### Emeriti Faculty

Thomas A. Cahill, Ph.D., Professor Emeritus  
Dennis Dingemans, Ph.D., Associate Professor  
Emeritus (*Geography*)  
Jack Ives, Ph.D., Professor Emeritus  
Stephen Jett, Ph.D., Professor Emeritus  
Robert L. Thayer, Jr., M.A., Professor Emeritus  
Geoffrey Wandesforde-Smith, Ph.D., Associate Professor Emeritus

### Affiliated Faculty

James Grieshop, Ph.D., Specialist, Cooperative Extension (*Human and Community Development*)  
Eric Larsen, Ph.D., Assistant Research Scientist,  
(*Landscape Architecture*)  
Greg McPherson, Ph.D., Researcher/Lecturer  
(*Western Center for Urban Forest Research and Education*)  
Charlene Sailor, Ph.D., Associate Research Scientist  
Sheri Zidenberg-Cherr, Ph.D., Specialist  
(*Cooperative Extension Specialist in Nutrition*)

**Graduate Study.** The Graduate Group in Geography offers programs of study and research leading to the M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. Areas of thematic emphasis include biogeography, gender geography, agricultural geography, medical-nutritional geography, tourism, and environmental geography. Current research project locales include the Caribbean, eastern Europe and Russia, China, Japan, Africa, Latin America, and the United States (especially California).

**Preparation.** Most students considered for admission will have an undergraduate major in geography or in a closely related field. Generally, a student without an undergraduate degree in geography will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic methods, plus an additional 9 units of geographic coursework. The student's guidance committee must certify fulfillment of this requirement.

The wide faculty interests attract a diverse set of students in such areas as biogeography, urban forestry and related natural science and engineering fields, as well as human geography and related social science fields. A number of faculty members use and teach geographic information systems, remote sensing, and related geographic techniques, and many have a strong field orientation as well. The strengths of the Davis campus and its faculty enable the program to focus on several areas of emphasis where faculty expertise and student interest is greatest: biogeography, zoogeography, environmental and natural resource geography, gender and geography, tourism, agricultural geography and landscape architecture.

**Graduate Adviser.** S. Brush (*Human and Community Development*), D. MacCannell (*Landscape Architecture*).

### Courses in Geography (GEO)

#### Graduate Courses

##### 200A. Research Trends in Geography (1)

Seminar—1 hour. Major current research themes and trends in geography. (S/U grading only.)

##### 200B. Geographical Concepts (4)

Lecture—3 hours; term paper. Prerequisite: undergraduate course work in geography or consent of instructor; graduate standing. Survey of key concepts and thematic content of the discipline of geography, including the role of science and humanism, the classical context of the discipline, and process, structure and scale.—I. (I.) Dingemans

##### 200C. Theory and Practice of Geography (4)

Lecture—3 hours; term paper. Prerequisite: graduate standing. Development of geographical theory; key concepts and theories; their chronology, and application to the practice of geography. Analytical background to geographical theory; application of theory to geographical practice and research projects.—II. (II.) Momsen

##### 200D. Research Methods in Geography (4)

Lecture—3 hours; term paper. Prerequisite: graduate standing, courses 200B and 200C, or consent of instructor. Survey of research methods in geography, including the use of logic, theory and paradigms, research design, and analytical techniques, including statistics and modeling.—III. (III.)

##### 201. Sources and General Literature of Geography (4)

Discussion—4 hours. Prerequisite: graduate standing in geography; consent of instructor. Designed for students preparing for higher degrees in geography. May be repeated for credit in one or more of the following subfields: physical, cultural, economic, urban, historical, political, conservation, and regional geography.—I, II, III. (I, II, III.)

##### 210. Topics in Biogeography (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Evolution and Ecology 147 or Wildlife, Fish, and Conservation Biology 156 (may be taken concurrently) or equivalent; consent of instructor for undergraduates. Current topics in historical and ecological biogeography, including macroecology and areography, GIS and remote sensing, phylogeography, vegetation, plant and animal community and species geography. Systematics, climate change, and conservation will be addressed. Offered in alternate years.—II. Shapiro

##### 280. Field Studies in Geography (3)

Lecture—1 hour; fieldwork—6 hours. Prerequisite: undergraduate or graduate coursework in geography and consent of instructor. A topic or subdiscipline of geography will form the theme for the course in any given offering, with a focus on current research on this topic, field methodologies, and data analysis in human and physical geography. May be repeated two times for credit. Limited enrollment.—III. (III.) Elliott-Fisk

##### 290. Seminar: Selected Regions (4)

Seminar—3 hours. Region to be announced annually.—I, II, III. (I, II, III.)

##### 291. Seminar in Cultural Geography (4)

Seminar—3 hours.—I, II, III. (I, II, III.)

##### 292. Seminar in Plant Geography (4)

Seminar—3 hours; seminar paper. Prerequisite: graduate standing. Examination of that aspect of cultural plant geography dealing with human impacts and vegetation change in the earth's major biomes. Particular emphasis on the New World's savannas, deserts, and grasslands. Offered in alternate years.—I.

##### 293. Graduate Internship (1-12)

Prerequisite: consent of instructor. Individually designed, supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

##### 295. Seminar in Urban Geography (4)

Seminar—3 hours.—II. (II.)

##### 297. Graduate Group in Geography Seminar (2)

Lecture/discussion—1 hour; term paper. Prerequisite: graduate standing. Seminars by UC Davis faculty and prominent national and international

scholars; research presentations by Graduate Group in Geography Ph.D. candidates. May be repeated for credit. (S/U grading only.)

##### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

##### 299. Research (1-12)

(S/U grading only.)

##### 299D. Individual Study (1-12)

Prerequisite: graduate student status in Geography and consent of instructor. (S/U grading only.)

### Professional Course

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Geology

(College of Letters and Science)

Louise H. Kellogg, Ph.D., Chairperson of the Department

David A. Osleger, Ph.D., Vice-Chairperson of the Department

**Department Office.** 174 Physics/Geology Building  
(530) 752-0350; <http://www.geology.ucdavis.edu>

### Faculty

Magali I. Billen, Ph.D., Assistant Professor  
Sandra J. Carlson, Ph.D., Professor  
William H. Casey, Ph.D., Professor (*Chemistry*)  
Kari M. Cooper, Ph.D. Assistant Professor  
Eric S. Cowgill, Ph.D. Assistant Professor  
Howard W. Day, Ph.D., Professor  
John F. Dewey, Ph.D., Professor  
James A. Doyle, Ph.D., Professor  
(*Evolution and Ecology*)  
Graham E. Fogg, Ph.D., Professor  
(*Land, Air, and Water Resources*)  
Tessa M. Hill, Ph.D., Assistant Professor  
Louise H. Kellogg, Ph.D., Professor  
Charles E. Lesher, Ph.D., Professor  
James S. McClain, Ph.D., Professor,  
*Academic Senate Distinguished Teaching Award*  
Isabel P. Montañez, Ph.D., Professor  
Ryosuke Motani, Ph.D. Associate Professor  
Jeffrey F. Mount, Ph.D., Professor  
Alexandra Navrotsky, Ph.D., Professor  
(*Thermochemistry Facility, Chemistry*)  
David A. Osleger, Ph.D., Lecturer  
John B. Rundle, Ph.D., Professor (*Physics, Computational Science and Engineering*)  
James R. Rustad, Ph.D., Professor  
Peter Schiffman, Ph.D., Professor  
Howard J. Spero, Ph.D., Professor  
Dawn Y. Sumner, Ph.D., Professor  
Donald L. Turcotte, Ph.D., Professor  
Geerat J. Vermeij, Ph.D., Professor  
Kenneth L. Verosub, Ph.D., Professor,  
*Academic Senate Distinguished Teaching Award*  
Qing-zhu Yin, Ph.D., Assistant Professor  
Robert A. Zierenberg, Ph.D., Professor

### Emeriti Faculty

Richard Cowen, Ph.D., Senior Lecturer Emeritus,  
*Academic Senate Distinguished Teaching Award*  
Charles G. Higgins, Ph.D., Professor Emeritus  
Robert A. Matthews, Ph.D., Senior Lecturer Emeritus  
Eldridge M. Moores, Ph.D., Professor Emeritus  
Robert J. Twiss, Ph.D., Professor Emeritus

### The Major Programs

"Civilization exists by geological consent—subject to change without notice."—Will Durant

Geology is the study of the Earth, and in particular the history, the structure, the evolution of life, and the processes that have molded the Earth and its inhabitants. The coming of the space age has also extended the field to include the solid planets of the

solar system. Although often attracted to the study of geology by an aesthetic appreciation and enjoyment of the earth, geologists commonly approach their studies from an interest either in the academic or the applied aspects of the science.

The academic aspects include the study of the history of life, the Earth, and the planets, and of the processes that drive the historical evolution. The study of historical evolution through "deep time" is what fundamentally distinguishes geology from most of the other physical sciences. The study of the processes that drive this evolution can involve the application of any of the physical or life sciences to understanding the Earth. In this sense, geology is truly an interdisciplinary science.

The applied aspects of the science generally involve the interaction between humans and the earth. Applied studies include the study of mineral resources including oil and water; identification and mitigation of Earth hazards such as earthquakes, landslides, and volcanic eruptions; identification and mitigation of polluted ground water; and land use planning.

**The Program.** Students interested in becoming professional geologists or continuing their geological studies at the graduate level should elect the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. Both programs allow students to emphasize an aspect of the field of particular interest to them. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study. Transfer students should have completed as much as possible of the preparatory subject matter listed below. High school preparation for either program should include high school chemistry and four years of mathematics or the equivalent.

**Internships and Career Alternatives.** The largest employer of geologists has traditionally been the oil industry, although recently more opportunities have been available in environmental geology with consulting firms and government agencies. Government organizations and research laboratories also employ geologists in a variety of other capacities. There is a growing need for earth science teachers at all pre-college levels, and colleges and universities provide opportunities in teaching and research. Entry level positions are available with a Bachelor's degree. A Master's degree is the usual professional level degree, and a Ph.D. is generally required for research and academic positions. Internships during undergraduate training are a means of exploring potential career opportunities and can lead to positions after graduation. UC Davis students have interned at the California Division of Mines and Geology, the State Department of Water Resources, and various consulting firms.

**Education Abroad Options.** The department strongly encourages interested students to pursue a portion of their studies abroad. Within the constraints of the campus and College residence requirements, it is possible for students to complete significant portions of the Geology major at an international institution provided that the student consults with one of the undergraduate advisers and carefully plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Geology majors have spent their junior or senior years completing upper division coursework at EAP partner institutions including the University of Leeds, the University of Edinburgh, and the University of Auckland.

**A.B. Major Requirements:**

UNITS

<b>Preparatory Subject Matter.....</b>	<b>40-43</b>
Geology 3, 3L, 50, 50L, 60 .....	13
Mathematics 16A-16B or 21A-21B .....	6-8
Chemistry 2A-2B .....	10
Physics 7A-7B .....	8

Statistics 13 or 13AT or 32 or 102 .....	3-4
<b>Depth Subject Matter .....</b>	<b>36</b>
Geology 100, 100L, 101, 101L, 103, 107, 107L, 108, 109, 109L .....	24
Additional upper division electives chosen from upper division courses in geology.	
Upper division courses in related fields may satisfy this requirement if approved in advance by the major adviser .....	12

**Total Units for the Major .....76-79**

**Recommended.** Chemistry 2C or Hydrologic Science 134, Physics 7C.

**B.S. Major Requirements:**

UNITS

<b>Preparatory Subject Matter.....</b>	<b>57-59</b>
Geology 3, 3L, 50, 50L, 60, 62 .....	15
Mathematics 21A-21B-21C .....	12
Chemistry 2A-2B .....	10
Select one of the following three options:	

**General Geology option:**

Hydrologic Science 134 or Chemistry 2C .....	5-6
Statistics 32 or 102 .....	3-4
Physics 7A-7B-7C or 9A-9B-9C .....	12

**Geochemistry/Petrology option:**

Hydrologic Science 134 or Chemistry 2C .....	5-6
Statistics 32 or 102 .....	3-4
Mathematics 21D .....	4
Physics 9A-9B .....	8

**Quantitative/Geophysics option:**

Mathematics 21D and 22A .....	7
Physics 9A-9B-9C .....	12

**Depth Subject Matter ..... 52**

Geology 100, 100L, 101, 101L, 103, 105, 106, 107, 107L, 108, 109, 109L, 110 .....	40
Additional upper division electives chosen from Geology 130-190 courses, Hydrologic Science 144, 146 and related fields approved in advance by major adviser. No more than 3 units upper division elective credit for Geology 115-129 courses. Maximum of 6 units upper division elective credit for Geology 192 or 194A-194B or 194HA-194HB .....	12

**Total Units for the Major ..... 109-111**

**English Composition Requirement.** It is recommended that all majors complete the English composition requirement (University Writing Program 101 or 102 or 104 or the equivalent) before or concurrently with the following courses: Geology 100, 101, 105N, 106, 108, 109L, 110.

**Recommended.** For those who are intending to pursue a career in geology or who are planning to apply to graduate programs in the earth sciences, one or more of the following courses are recommended for any of the options or specifically to supplement the options as listed. Note that Mathematics 22A is not a necessary prerequisite to Physics 9C:

- General Geology option:* Mathematics 21D, 22A, 22B, Physics 9A-9B-9C instead of 7A-7B-7C, Statistics 104, 106, 108.
- Geochemistry/Petrology option:* Mathematics 22A, Physics 9C, Hydrology 134 and Chemistry 2C, Chemistry 110A.
- Quantitative/Geophysics option:* Mathematics 22B, Statistics 32 or 102, Hydrology 134 or Chemistry 2C.

**Major Advisers.** D. A. Osleger, D. Y. Sumner, R.A. Zierenberg

**Minor Program Requirements:**

Students in other disciplines may elect to complete a minor in Geology by choosing a geological subject emphasis listed below. On transcripts the minor will appear as a minor in Geology.

UNITS

**Geology .....19-24**

Select one of the five emphases below.

**General Geology emphasis ..... 19-20**

Geology 50 (or 1) and 50L .....	5-6
Geology 100, 101, 109 and either 107 or 108 .....	11
Geology 116 or 134 .....	3

**Minor Advisers.** D. A. Osleger, D. Y. Sumner, R.A. Zierenberg

**Engineering Geology emphasis ..... 19-22**

Geology 50 and 50L .....	5
Civil Engineering 171, 171L .....	5
Three courses chosen from Geology 134, 161, 162, Hydrologic Science 103, 144, 146, Soil Science 118, 120 .....	9-12

**Minor Adviser.** R.A. Zierenberg

**Geochemistry emphasis ..... 19-22**

Geology 60 and either 146 or 148 .....	7
Chemistry 110A and 110B, or Materials Science and Engineering 130 and 134 .....	6
Chemistry majors may substitute one of the elective courses for Chemistry 110B. Two elective courses chosen from Chemistry 110C, Geology 108, 146, 148, Hydrologic Science 134, Soil Science 102 .....	6-9
Chemistry 110C and Materials Science and Engineering 134 cannot both be counted toward the minor.	

**Minor Adviser.** R.A. Zierenberg

**Oceanography emphasis .....21-24**

Geology 108, 116, 150A, 150B, 150C .....	16
Two courses chosen from Environmental Science and Policy 100, 151, Geology 109, 152 .....	5-8

**Minor Adviser.** T. Hill, J.S. McClain

**Paleobiology emphasis .....20-21**

Geology 107 and 107L, 108 .....	8
Geology 152 .....	4
At least eight additional units from the following: Anthropology 151 or 152, Evolution and Ecology 100, 101, 102, 105, 112-112L, 140, 149, Geology 109, 150C .....	8-9

**Minor Advisers.** R. Motani or G. Vermeij

**Science Teaching Credential.** Students who might wish to become a teacher should consult an advisor at their first opportunity in order to combine the prerequisites for a credential program with General Education requirements. Students hoping to teach Earth and Planetary Science may prepare by satisfying the requirements for the B.S. degree in Natural Science (<http://naturalsciences.ucdavis.edu>) or the A.B. degree in Geology (77-79 units) and 36 additional units of science as outlined below. Students may also prepare for the science credential by taking the B.S. degree in Geology (108-111 units) and an additional 24 units as indicated by the asterisks below.

Biological Sciences 1A-1B-1C* .....	15
Chemistry 2C .....	5
Physics 7C .....	4
Mathematics 16C .....	3
Geology 36* .....	4
Geology 116-116G* .....	5

**Teaching Credential Subject Representative.**

H.W. Day. See also the Teaching Credential/M.A. Program on [page 102](#).

**Graduate Study.** The Department of Geology offers a program of study and research leading to the M.S. and Ph.D. degrees. For information regarding graduate study in geology, address the Graduate Adviser, Department of Geology.

**Graduate Advisers.** S.J. Carlson, C.E. Leshner, J. R. Rustad

**Courses in Geology (GEL)****Lower Division Courses****1. The Earth (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have completed course 50. Only 2 units of credit to students who have completed course 2. GE credit: SciEng.—I, II, III. (I, II, III.) Osleger, Verosub

**2. The Blue Planet: Introduction to Earth Science (3)**

Lecture—3 hours. Study of the solid and fluid earth and its place in the solar system. Holistic examination of how the solid earth interacts with the atmosphere, hydrosphere, biosphere, and extraterrestrial environment. Not open for credit to students who have completed course 50. Only 2 units of credit to students who have completed course 1. GE credit: SciEng.—I. (I.) Sumner

**2G. The Blue Planet: Introduction to Earth Science Discussion (1)**

Discussion—1 hour. Prerequisite: course 2 concurrently. Small group discussion and preparation of short papers for course 2. GE credit with concurrent enrollment in course 2: Wrt.—I. (I.) Sumner

**3. History of Life (3)**

Lecture—3 hours. Prerequisite: course 1 recommended. The history of life during the three and one-half billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains. GE credit: SciEng.—II. (II.) Motani

**3G. History of Life: Discussion (1)**

Discussion—1 hour. Prerequisite: course 3 concurrently. Small group discussion and preparation of short papers for course 3. GE credit with concurrent enrollment in course 3: Wrt.—II. (II.) Motani

**3L. History of Life Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 3 concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution.—II. (II.) Motani

**4. Evolution: Science and World View (3)**

Lecture—2 hours; discussion—1 hour. Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines. GE credit: SciEng.—I. (I.) Vermeij

**10. Modern and Ancient Global Environmental Change (3)**

Lecture—3 hours. Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of non-sustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history. GE credit: SciEng.—III. (III.) Montañez

**12. Evolution and Paleobiology of Dinosaurs (2)**

Lecture—2 hours. Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies.—II. (II.) Carlson

**17. Earthquakes and Other Earth Hazards (2)**

Lecture—2 hours. The impact of earthquakes, volcanoes, landslides and floods on Man, his structures and his environment. Discussion of the causes, effects, and solution of geologic problems in rural and urban settings.—I, III. (I, III.) Dewey

**16. The Oceans (3)**

Lecture—3 hours. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources. Not open for credit to students who have taken course 116. GE Credit: SciEng.—II. (II.) Hill

**16G. The Oceans: Discussion (2)**

Discussion/laboratory—2 hours; term paper or discussion. Prerequisite: course 16 (concurrent). Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper. Not open for credit to students who have taken course 116G. GE Credit: SocSci, Wri.—II. (II.) Hill

**20. Geology of California (2)**

Lecture—2 hours. The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape.—II. (II.) Osleger

**25. Geology of National Parks (2)**

Lecture—2 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Each park provides a visual focus for understanding a variety of geologic processes such as mountain building, volcanism, stream erosion, and glacial action.—I. (I.) Osleger

**32. Volcanoes (3)**

Lecture—3 hours. Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE: SciEng.—III. (III.) Cooper

**35. Rivers (3)**

Lecture—3 hours. Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips. GE credit: SciEng.—III. (III.) Mount

**36. The Solar System (4)**

Lecture—3 hours; discussion—1 hour. Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course 113-113G.) GE credit: SciEng, Wrt.—III. (III.) Osleger

**50. Physical Geology (3)**

Lecture—3 hours. Prerequisite: high school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for course 1 or the equivalent may receive only 2 units for course 50.—I, II. (I, II.) Rustad, McClain

**50L. Physical Geology Laboratory (2)**

Laboratory—6 hours; one or two one-day field trips. Prerequisite: course 50 (preferably taken concurrently). Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for course 1L or the equivalent may receive only 1 unit for course 50L.—I, II. (I, II.) Rustad, McClain

**60. Earth Materials: Introduction (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 2A; Mathematics 16A or 21A; course 1 or 50, 50L. Physical and chemical properties of rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations.—I. (I.) Rustad

**62. Optical Mineralogy (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 60 (may be taken concurrently); high school physics is strongly recommended. Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section.—I. (I.) Rustad, Day

**91. Geology of Campus Waterways (1)**

Lecture/discussion—1 hour; fieldwork—1 hour. Research characterizing geological processes in waterways on campus including links among hydrologic, atmospheric, physical, and human processes;

carbon cycling and interpreting processes from sediments; field research techniques; research project design and implementation; implications of results for society and environmental policy. May be repeated for credit three times. (P/NP grading only)—I, II, III. (I, II, III.) Osleger, Sumner

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor; lower division standing. (P/NP grading only.)

**Upper Division Courses****100. Earth Dynamics I: Extensional and Translational Processes (3)**

Lecture—3 hours. Prerequisite: course 50, 50L, Physics 7A or 9A (may be taken concurrently), or consent of instructor. Structural features of, and geophysical constraints on, regions of extensional and translational tectonics. Observation, formation, and tectonic environments of joints, fractures, normal faults, and strike-slip faults. GE credit: SciEng, Wrt.—I. (I.) Cowgill

**100L. Earth Dynamics I: Structure/Tectonics Laboratory (1)**

Laboratory—3 hours; two one-day field trips required. Prerequisite: course 50L and course 100 (may be taken concurrently); or consent of instructor. Introduction to three-dimensional analysis of geologic structures; introduction to field techniques; interpretation of topographic and geologic maps; tectonic analysis of extensional and strike-slip terranes.—I. (I.) Cowgill

**101. Earth Dynamics II: Convergent and Collisional Processes (3)**

Lecture—3 hours. Prerequisite: courses 50-50L, 100, Mathematics 21B or 16B (may be taken concurrently), Physics 5A or 7A or 9A (may be taken concurrently); or consent of instructor. Geophysical and structural signatures of convergent tectonics, subduction zones, plate collisions and mountain belts. Topics include ductile deformation, folds, seismic Benioff zones, gravity and isostasy. Examples of collisions and resulting mountain belts. Examples drawn from western North America. GE credit: SciEng, Wrt.—II. (II.) Billen

**101L. Earth Dynamics II: Structure/Tectonics Laboratory (2)**

Laboratory and fieldwork—6 hours; six days of field trips on four separate weekends required. Prerequisite: courses 50L, 100L, and 101 (may be taken concurrently); or consent of instructor. Continuation of Geology 100L. Analysis of three-dimensional geologic structures; introduction to field techniques; field-mapping projects; interpretation of topographic and geologic maps; tectonic analysis of convergent and collisional terranes.—II. (II.) Billen

**103. Field Geology (3)**

Fieldwork and laboratory—9 hours; 7-8 days on weekends during quarter. Prerequisite: course 101L or consent of instructor. Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports.—III. (III.) Leshner

**105. Earth Materials: Igneous Rocks (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: courses 60, 62; Mathematics 16A or 21A; Chemistry 2B (may be taken concurrently). Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Wrt.—II. (II.) Leshner

**106. Earth Materials: Metamorphic Rocks (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 105, Chemistry 2B, Mathematics 16A or 21A. Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Wrt.—III. (III.) Day

**107. Earth History: Paleobiology (3)**

Lecture—3 hours. Prerequisite: courses 3-3L or Biological Sciences 1B. The evolution and ecological structure of the biosphere from the origin of life to the present.—I, III, IV. (I, III, IV.) Motani, Carlson

**107L. Earth History: Paleobiology Laboratory (2)**

Laboratory—6 hours. Prerequisite: courses 3-3L or Biological Sciences 1B; course 107 (may be taken concurrently). Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory.—III. (III.) Motani, Carlson

**108. Earth History: Paleoclimates (3)**

Lecture—3 hours. Prerequisite: course 1 or Geology/Environmental Science and Policy 116; and Chemistry 2A; or consent of instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SciEng, Wrt.—III. (III.) Montañez

**109. Earth History: Sediments and Strata (2)**

Lecture—2 hours. Prerequisite: courses 50-50L. Principles of stratigraphic and sedimentologic analysis. Evaluation of historical and modern global changes in sedimentation within terrestrial and marine environments. Examination of the plate tectonic, climatic and oceanographic factors controlling the distribution and exploitation of economic fluids within sedimentary rocks. GE credit with concurrent enrollment in course 109L: SciEng.—II. (II.) Sumner

**109L. Earth History: Sediments and Strata Laboratory (2)**

Laboratory—6 hours (includes four 1-day field trips). Prerequisite: course 109 (may be taken concurrently). Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit with concurrent enrollment in course 109: Wrt.—II. (II.) Sumner

**110. Summer Field Geology (8)**

Fieldwork—8 hours/day, 6 days/week for six weeks. Prerequisite: courses 103, 109; course 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. GE credit: SciEng, Wrt.—IV. (IV.) McClain

**115. Earth Science, History, and People (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; course 1. Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: SciEng or SocSci, Wrt.—III. (III.) Verosub

**116. The Oceans (3)**

Lecture—3 hours. Prerequisite: upper division standing or consent of instructor. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents, geological history, and the sea's biota; and utilization of marine resources. (Same course as Environmental Science and Policy 116.) GE credit: SciEng.—II. (II.) Hill

**116G. The Oceans: Discussion (2)**

Discussion—2 hours. Prerequisite: course 116/Environmental Science and Policy 116 concurrently. Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of papers. (Same course as Environmental Science and Policy 116G.) GE credit with concurrent enrollment in course 116: Wrt.—II. (II.) Hill

**129. Sample Preparation and Techniques for Petrology (1)**

Laboratory—3 hours. Prerequisite: courses 60-60L. Introduction to petrographic laboratory techniques for petrographers. Topics covered may include thin and polished section preparation, rock crushing/grinding, mineral separation, staining, and photomicroscopy. (P/NP grading only.)—I. (I.) Winter

**130. Non-Renewable Natural Resources (3)**

Lecture—3 hours. Prerequisite: course 1. Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects. Offered in alternate years.—(II.) Zierenber

**131. Risk: Natural Hazards and Related Phenomena (3)**

Lecture—3 hours. Prerequisite: upper division standing. Risk, prediction, prevention and response for earthquakes, volcanic eruptions, landslides, floods, storms, fires, impacts, global warming. Offered in alternate years.—I. Turcotte

**134. Environmental Geology and Land Use Planning (3)**

Lecture—3 hours. Prerequisite: one course in Geology, preferably course 50 or 1, or consent of instructor. Geologic aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources. GE credit: SciEng, Wrt.—II. (II.) Rustad

**136. Ecogeomorphology of Rivers and Streams (5)**

Lecture—1 hour; discussion/laboratory—2 hours; fieldwork; term paper or discussion. Prerequisite: upper division or graduate standing in any physical science, biological science, or engineering, and consent of instructor. Integrative multidisciplinary field analysis of streams. Class project examines hydrology, geomorphology, water quality and aquatic and riparian ecology of degraded and pristine stream systems. Includes cooperative two-week field survey in remote wilderness settings with students from diverse scientific backgrounds. Restricted to advanced students in the physical sciences, biological sciences, or engineering. No repeat credit. (Deferred grading only, pending completion of sequence.)—III, IV. (III, IV.) Mount, Moyle

**138. Introductory Volcanology (4)**

Lecture—2 hours; fieldwork—6 hours. Prerequisite: upper division standing, course 60 and 109 or the equivalents, or consent of instructor. Principles of physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field component. GE credit: SciEng.—(IV.) Schiffman

**139. Fluvial Geomorphology (5)**

Lecture—3 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: courses 50, 50L; Mathematics 21B or 16B recommended. Advanced analysis of fluvial processes, including geomorphic evolution of rivers, floodplains and watersheds at various spatial and temporal scales, and in response to changing land use. Laboratory exercises examine methods of geomorphic analysis of rivers. Includes three weekend field trips.—(I.) Mount

**141. Evolutionary History of Vertebrates (3)**

Lecture—3 hours. Evolutionary history of vertebrates; fossil record and phylogeny; timing of major evolutionary events; appearance of major vertebrate groups; physical constraints in vertebrate evolution; paleobiogeography of vertebrates; effect of continental movement on vertebrate evolution; dinosaurs and other strange vertebrates. Offered in alternate years.—III. Motani

**141L. Evolutionary History of Vertebrates Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 141 (may be taken concurrently). Augments lecture course 141 through handling of specimens enabling in-person

examination of three dimensional features observed in vertebrate skeletons, both fossil and living.

Offered in alternate years.—I. Motani

**142. Basin Analysis (3)**

Laboratory—3 hours; lecture—2 hours. Prerequisite: courses 50, 50L, and 109. Analysis of sedimentary basins from initiation to maturity, including controls on sedimentary fill, subsidence analysis, sequence stratigraphy, core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered in alternate years.—I. Sumner

**143. Advanced Igneous Petrology (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 105, Mathematics 16C or 21C, Chemistry 2C. Physical and chemical properties of magmatic environments and processes of igneous rock formation. Laboratory study of representative igneous rocks. GE credit: SciEng, Wrt.

**144. Historical Geology (3)**

Lecture—3 hours. Prerequisite: upper division course in environmental science or ecology, or an introductory course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion, evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical perspective on the biosphere of future.—II. (II.) Vermeij

**145. Advanced Metamorphic Petrology (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: course 106; Hydrologic Science 134 or Chemistry 2C; Mathematics 16C or 21C. Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites. Offered in alternate years. GE credit: SciEng, Wrt.—(II.) Day

**146. Isotopic Geochemistry (3)**

Lecture—3 hours. Prerequisite: Chemistry 2C or consent of instructor. Principles and applications of nuclear chemistry to geology. Methods of determining geologic ages using K-Ar, Rb-Sr, Nd-Sm, and U-Pb isotopes. The interpretation of apparent ages determined by isotopic methods. The age and origin of the earth. Offered in alternate years.—(II.) Day

**147. Geology of Ore Deposits (4)**

Lecture—3 hours; laboratory—3 hours; optional one-weekend field trip. Prerequisite: Chemistry 2C or Hydrologic Science 134, courses 60, 62, and 105. Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered in alternate years.—(III.) Zierenberg

**148. Stable Isotopes and Geochemical Tracers (3)**

Lecture—3 hours. Prerequisite: Chemistry 2C or Hydrologic Science 134; courses 50, 50L, 60. Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered in alternate years.—III. Zierenberg

**150A. Physical and Chemical Oceanography (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 116/Environmental Science and Policy 116; Physics 9B; Mathematics 21D; Chemistry 2C; or upper division standing in a natural science and consent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as Environmental Science and Policy 150A.)—(I.) McClain, Spero

**150B. Geological Oceanography (3)**

Lecture—3 hours. Prerequisite: course 50 or 116. Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as Environmental Science and Policy 150B.)—II. (II.) Billen, McClain

**150C. Biological Oceanography (4)**

Lecture—3 hours; discussion—1 hour; fieldwork—one weekend field trip required. Prerequisite: Biological Sciences 1A and a course in general ecology or consent of instructor. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. (Same course as Environmental Science and Policy 150C.)—III. (III.) Hill

**152. Paleobiology of Protista (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: courses 107 or Biological Sciences 1A or consent of instructor. Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered in alternate years.—Hill

**156. Hydrogeology and Contaminant Transport (5)**

Lecture—3 hours; laboratory—3 hours; term paper. Prerequisite: Hydrologic Science 145, Civil and Environmental Engineering 144 or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as Hydrologic Science 146.)—II. Fogg

**160. Geological Data Analysis (3)**

Lecture/discussion—3 hours. Prerequisite: Mathematics 21A or the equivalent. Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. Use of computer in lectures and homework.—II. Rundle

**161. Exploration Geophysics and Seismology (3)**

Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 5C or 7C or 9C; or consent of instructor. Principles of exploration geophysics and seismology. Use of gravity, magnetic, electrical resistivity, electromagnetic, and seismic measurements to determine structure of the Earth's crust. Interpretation of data using computers. Survey of well-logging techniques. Seismology and earthquakes.—III. (III.) Billen

**162. Geophysics of the Solid Earth (3)**

Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 5C or 7C or 9C; or consent of instructor. Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered in alternate years.—(II.) Kellogg

**163. Planetary Geology and Geophysics (3)**

Lecture—3 hours. Prerequisite: Mathematics 21C, Physics 7C or 9C, and course 50 or 36 or Astronomy 10, or consent of instructor. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft.—II. Kellogg

**175. Advanced Field Geology (1-6)**

Fieldwork—2-12 hours; discussion—1-6 hours. Prerequisite: consent of instructor. Advanced field studies of selected geologic terrains, including making observations, interpreting these observations, and discussing variations in interpretations. May be repeated for up to 6 units of credit if topic differs. (P/NP grading only.)—I, II, III. (I, II, III.)

**182. Field Studies in Marine Geochemistry (2-8)**

Lecture—3 hours; laboratory—1-3 hours; fieldwork—6-40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going

to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected.—Hill

**190. Seminar in Geology (1)**

Discussion—1 hour; seminar—1 hour; written abstracts. Prerequisite: major in Geology. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**192. Internship in Geology (1-12)**

Internship. Prerequisite: upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated for credit for a total of 10 units. (P/NP grading only.)

**194A-194B. Senior Thesis (3-3)**

Prerequisite: open to Geology majors who have completed 135 units and who do not qualify for the honors program. Guided independent study of a selected topic, leading to the writing of a senior thesis. (Deferred grading only, pending completion of course sequence.)

**194HA-194HB. Senior Honors Project (3-3)**

Independent study—9 hours. Prerequisite: open to Geology majors who have completed 135 units and who qualify for the honors program. Guided independent study of a selected topic, leading to the writing of an honors thesis. (Deferred grading only, pending completion of sequence.)

**198. Directed Group Study (1-5)**

Prerequisite: senior standing in Geology or consent of instructor.

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****205. Advanced Field Stratigraphy (3)**

Lecture—1 hour; field work—2 hours. Prerequisite: courses 109 and 110 or consent of instructor; course 206 recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. May be repeated for credit.—(III.) Sumner

**206. Stratigraphic Analysis (3)**

Lecture—3 hours. Prerequisite: courses 109, 109L or consent of instructor; course 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. May be repeated for credit when topic differs.—II. Montañez

**214. Active Tectonics (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation.—(II.) Cowgill

**216. Tectonics (3)**

Lecture/discussion—3 hours. Prerequisite: course 101 or consent of instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth's deformed belts. Offered in alternate years.—(I.) Dewey

**217. Topics in Geophysics (3)**

Lecture—1 hour; seminar—2 hours. Prerequisite: consent of instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. May be repeated for credit.—(I.) Billen

**218. Analysis of Structures in Deformed Rocks (3)**

Seminar—3 hours. Prerequisite: courses 100, 100L, 101, 101L, 170; or consent of instructor. Recent advances in the understanding and analysis of structures in brittle and ductile deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered in alternate years.

**219. Fracture and Flow of Rocks (3)**

Lecture—3 hours. Prerequisite: courses 100, 101, Mathematics 21 or 16, Physics 7 or 9, or consent of instructor. Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered in alternate years.—(I.) Billen

**220. Mechanics of Geologic Structures (3)**

Lecture—3 hours. Prerequisite: course 170, Mathematics 21C, Physics 9A or 5A, or consent of instructor; Mathematics 21D and 22A recommended. Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic structures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered in alternate years.—(III.)

**226. Advanced Sedimentary Petrology (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 144 or consent of instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. May be repeated for credit when topic differs.—II. (II.) Sumner

**227. Stable Isotope Biogeochemistry (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: graduate standing and consent of instructor. Discussion and application of stable isotope techniques for scientific research problems. Course emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory will develop basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes.

**228. Topics in Paleoceanography (3)**

Lecture—3 hours. Prerequisite: courses 108, 150A or consent of instructor. Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the geologic record. Topics vary. May be repeated for credit.—Hill

**235. Surface Processes (3)**

Seminar—3 hours. Prerequisite: courses 50, 50L, 139; Mathematics 21B or 16B recommended. Recent advances in the analysis of landforms and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. May be repeated for credit when topic differs.—II. Mount

**236. Inverse Theory in Geology and Geophysics (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Inversion of data for model parameters. Evaluation of parameter uncertainties. Linear and nonlinear problems for discrete and continuous models. Bakus-Gilbert inversion. Offered in alternate years.—III. McClain

**238. Theoretical Seismology (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. Offered in alternate years. (P/NP grading only.)—(III.) McClain

**240. Geophysics of the Earth (3)**

Lecture—3 hours. Prerequisite: Earth Sciences and Resources 201, Physics 9B, Mathematics 22B. Physics of the earth's crust, mantle, and core. Laplace's equation and spherical harmonic expression of gravity and magnetic fields. Elastic wave equation in geologic media. Body and surface seismic waves. Equations of state, thermal structure of the earth. Offered in alternate years.—(II.) Turcotte

**241. Geomagnetism (3)**

Lecture—3 hours. Prerequisite: graduate standing. Nature and origin of the Earth's magnetic field. Present field and recent secular variation. Spherical harmonic analysis. Paleosecular variation. Polarity transitions and geomagnetic excursions. Statistics of polarity intervals. Dynamo theory. Planetary magnetism. Offered in alternate years.—(I.) Verosub

**242. Paleomagnetism (3)**

Lecture—3 hours. Prerequisite: graduate standing. Principles and applications of paleomagnetism. Physical basis of rock and mineral magnetism. Field and laboratory techniques. Instrumentation. Analysis of paleomagnetic data. Statistical methods. Rock magnetic properties. Geological and geophysical applications. Offered in alternate years.—I. Verosub

**246. Physical Chemistry of Metamorphic Processes (3)**

Lecture—3 hours. Prerequisite: course 145, Chemistry 110A, or consent of instructor. Physicochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered in alternate years.—II. Day

**247. Metamorphic Petrology Seminar (3)**

Seminar—3 hours. Prerequisite: course 145 or consent of instructor; course 246 recommended. Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). May be repeated for credit when topic differs. Offered in alternate years. (S/U grading only.)—(II.) Day

**250. Advanced Geochemistry Seminar (3)**

Seminar—3 hours. Prerequisite: course 146 or consent of instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geology, origin and chemistry of the oceans. Subject varies yearly depending on student interest. May be repeated for credit. Offered in alternate years.—(I.) Zierenberg

**253. Current Topics in Igneous Petrology (3)**

Seminar—3 hours. Prerequisite: graduate standing in Geology; course 143 or consent of instructor. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis. May be repeated for credit when topic differs. (S/U grading only.)

**254. Physical Chemistry of Igneous Processes (3)**

Lecture—3 hours. Prerequisite: course 143 or consent of instructor; Chemistry 110A required; Chemistry 110B and 110C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered in alternate years.

**255. Experimental Petrology (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 143 or consent of instructor. Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered in alternate years.

**260. Paleontology (3)**

Seminar—3 hours. Prerequisite: graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be

decided at an organizational meeting. May be repeated for credit when topic differs.—I, II, III. (I, II, III.) Carlson, Montani, Vermeij

**261. Paleobiology Graduate Seminar 1: Evolutionary aspects (3)**

Lecture—1 hour; seminar—2 hours. Prerequisite: graduate standing in Geology or a biological science; qualified undergraduates accepted on an exception-only basis. This course will treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction and phylogeny, phylogeny of major phyla, and the relation between taxonomy and phylogeny. May be repeated for credit when topic varies.—I, III. (I, II, III.) Carlson, Motani, Vermeij

**281. Instrumental Techniques for Earth Scientists (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Mathematics 21A, 21B, 21C, Physics 7A, 7B, 7C or 9A, 9B, 9C or consent of instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research.—I. Cooper, Yin

**285. Field Studies in Marine Geochemistry (2-8)**

Lecture—3 hours; laboratory—1-3 hours; field-work—6-40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected.—Hill

**290. Seminar in Geology (1)**

Seminar—1 hour; discussion—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Geology of the Sierra Nevada (1)**

Seminar—one day-long session. Prerequisite: consent of instructor. Short oral presentations by students and faculty concerning results of their past work and plans for future work in the Sierra. A written abstract is required following the format required at professional meetings. (S/U grading only.)—(III.) Day

**292. River Forum (1)**

Seminar—1 hour; optional field trips to evaluate local rivers. Prerequisite: graduate standing. Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. (S/U grading only.)—I, II, III. (I, II, III.) Mount

**293. Geologic Event of the Week (1)**

Discussion—.5 hours; seminar—.5 hours. Prerequisite: graduate standing. Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observations, the physical processes behind each event, the geological setting, and societal consequences. May be repeated for credit three times for up to three units. (S/U grading only.)—(I, II, III.) Kellogg

**294. Structure/Tectonics Forum (1)**

Seminar—1 hour. Prerequisite: graduate student in geology or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. (S/U grading only.)—I, II, III. (I, II, III.)

**295. Advanced Problems in Geodynamics (3)**

Seminar—3 hours. Prerequisite: courses 100 and 101 or consent of instructor. Seminar dealing with problems in geodynamics. Topics will vary (e.g., ductile deformation mechanisms, brittle fracture,

earthquake prediction, driving forces for plate tectonics, mantle convection). Emphasis on recent literature. May be repeated for credit when topic differs. Offered in alternate years. (S/U grading only.)

**296. Advanced Problems in Tectonics (3)**

Seminar—3 hours. Prerequisite: course 101 or consent of instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. May be repeated for credit. Offered in alternate years. (S/U grading only.)—(III.) Dewey

**298. Group Study (1-5)**

**299. Research (1-12)**

(S/U grading only.)

**Professional Courses**

**390. Methods of Teaching Geology (1)**

Discussion—1 hour. Prerequisite: graduate student standing in Geology. Discussion of methods and problems of teaching geology. Topics include departmental facilities, grading efficiency/effectiveness, Teaching Assistant/student interaction, and teaching techniques for lecturing, discussions, and labs. Participation in teaching program required for Ph.D. in Geology. (S/U grading only.)—I. (I.) Carlson

**391. Ethical Issues in Earth Sciences (1)**

Seminar—1 hour. Prerequisite: graduate standing in Geology or consent of instructor. Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. Offered in alternate years. (S/U grading only.)—(III.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**Geophysics**

(College of Letters and Science)

Geophysics is study of the physical properties and processes within and surrounding the Earth. Many problems in the Earth Sciences require geophysical techniques for study. The interdisciplinary minor in geophysics is for students with backgrounds in the physical sciences, engineering and other fields who are interested in pursuing a graduate or professional career in geophysics, or who require a significant knowledge in the field. The curriculum reflects the need for such students to have a firm foundation of geophysics classes, as well as courses from the vast diversity of subdisciplines from many departments that are included in geophysics.

The minor is sponsored by the Department of Geology in 174 Physics/Geology Building.

**Minor Program Requirements:**

UNITS

**Geophysics .....21-24**

Engineering 5 .....	3
Geology 161, 162 .....	6
Applied Structure Engineering 115 .....	3
One course sequence chosen from the following: .....	9-12
(a) Atmospheric Science 120, 121A, 121B;	
(b) Geology 100, 100L, 101, 101L;	
(c) Mathematics 118A, 118B, 118C;	
(d) Physics 104A, 104B, 105C.	

**Minor Adviser.** J.S. McClain, Department of Geology in 392 Physics/Geology (530) 752-7093

# German

(College of Letters and Science)

Winder McConnell, Ph.D., Chairperson of the Department

**Department Office.** (German and Russian), 622 Sproul Hall  
(530) 752-4999; <http://german.ucdavis.edu>

## Faculty

Carlee Arnett, Ph.D., Associate Professor  
Clifford A. Bernd, Dr.Phil., Professor  
Jaimey Fisher, Ph.D., Assistant Professor  
Gail Finney, Ph.D., Professor  
Elisabeth Krimmer, Ph.D., Associate Professor  
Winder McConnell, Ph.D., Professor  
Gerhard Richter, Ph.D., Associate Professor

## Emeriti Faculty

John F. Fetzer, Ph.D., Professor Emeritus  
Ingeborg Henderson, Ph.D., Lecturer Emerita,  
*Academic Senate Distinguished Teaching Award*  
Karl R. Menges, Dr.Phil., Professor Emeritus  
H. Guenther Nerjes, Ph.D., Professor Emeritus  
Fritz Sammern-Frankenege, Dr.Phil., Lecturer Emeritus

## The Major Program

The German major explores in depth the literature and language, the culture and commerce of the German-speaking world. Whereas the General Program accommodates specifically those students whose interest lies in literary studies, German Area Studies as well as the Culture and Commerce emphasis are two options that combine advanced language study with courses featuring the contributions of the German-speaking world to fields such as music, art, philosophy, history, and economics.

**The Program.** Two of the three major emphases reflect the department's primary emphasis on literary figures, movements and themes, and thus they share a common core of upper-division literature electives. The Culture and Commerce emphasis has as its goal functional language competency to enable students to live and work in a German-speaking environment. A key feature of this track is a work/study experience abroad. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper-division courses offered in German.

**Career Alternatives.** Completion of the major prepares students for graduate study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

## A.B. Major Requirements:

UNITS

### Preparatory Subject Matter ..... 16-27

German 1-2-3 (or the equivalent)..... 0-15  
German 20, 21, 22 ..... 12

### Depth Subject Matter ..... 44

#### General Program

German 101A, 101B, 103 ..... 12  
German 120 ..... 4  
Three courses chosen from upper division literature offerings taught in German..... 12  
Four additional upper division courses selected from 104-109 and 121-198, upon the explicit advance approval of the undergraduate major adviser..... 16  
The above category may be satisfied in part by one or more courses in Comparative Literature, in another national literature, or from German literature-in-translation offerings (111-119, 140-142) upon consultation with, and advance approval of, the undergraduate major adviser.

## German Culture and Commerce Emphasis

German 103, 104, 109A, 109B ..... 16  
German 118E or 120 ..... 4  
German 143, 192 ..... 12  
Three elective courses from at least two of the following subjects..... 12  
Economics 110B, 116, 160A, 160B, 162, History 144A, 144B, Political Science 123, 137  
*Recommended.* International Relations 1, German 101A, 101B

## German Area Studies Emphasis

German 101A, 101B, 103 ..... 12  
German 120 ..... 4  
Two courses chosen from upper division literature courses that are taught in German ..... 8  
History 144A or 144B..... 4  
Four elective courses in accordance with the student's interest chosen from at least two of the following three areas after consultation with and approval of the adviser..... 16  
*Humanities:* History 143, Philosophy 170, 175.  
*Social Sciences:* Geography 123, Political Science 117, 137.  
*Fine Arts:* Art 176C, 177A, 177B, Music 110A, 110C, 110D, 110E.  
Special consideration is also given to such courses in Comparative Literature as the 164 series, where pan-European movements influential upon German literature are at issue.

**Total Units for the Major ..... 60-71**

## Minor Program Requirements:

The Department offers a German Language and Literature minor. In addition, individualized minor programs may be designed upon consultation with the undergraduate adviser.

Students are particularly encouraged to consider a minor that combines a coherent group of courses to emphasize area studies in German (i.e., German philosophy, the arts, history, political science, as well as literature). The purpose of the minor is to provide students with the opportunity to augment their training in other fields by acquiring proficiency in the German language and exposure to German literature and culture.

UNITS

## German Language and/or

### Literature ..... 20-24

Choose courses numbered from German 101A through 109B and literature courses that are taught in German ..... 20-24

**Major Adviser.** E. Krimmer

**Honors and Honors Program.** The honors program comprises two quarters of study under course 194HA-194HB, which will include a research paper. See also the University and College requirements.

## Teaching Credential Subject Representative.

C. Arnett; see the Teaching Credential/M.A. program on [page 102](#).

**Graduate Study.** The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German Literature. Additional degree options for a designated emphasis are available through departmental affiliations with the programs in Social Theory and Comparative History, Critical Theory, Feminist Theory, and Second Language Acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Adviser.

**Graduate Adviser.** J. Fisher

**Prerequisite Credit.** Credit normally will not be given on the lower-division level for a course that is the prerequisite of a course already successfully completed.

## Courses in German (GER)

### Lower Division Courses

Course Placement: Students with two years of high school German normally continue in German 2; those with three years, German 3; those with four years, German 20.

#### 1. Elementary German (5)

Discussion—5 hours; laboratory—two 1/2-hour sessions. Introduction to German grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed German 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I, III. (I, III.)

#### 2. Elementary German (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1 in areas of grammar and basic language skills.—I, II. (I, II.)

#### 3. Elementary German (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Completion of grammar sequence and continuing practice of all language skills through cultural texts.—II, III. (II, III.)

#### 6. Conversational German (4)

Discussion—3 hours; term paper. Prerequisite: course 3. Course 6 may be taken concurrently with course 20. Designed to develop intermediate language skills with special emphasis on communication and grammatical accuracy.—II. Chair

#### 20. Intermediate German (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 3; may be taken concurrently with course 6. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts. Not open for credit to students who have completed course 4. (Former course 4.)—I, II. (I, II.)

#### 21. Intermediate German (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 20. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts.—I, II. (I, II.)

#### 22. Intermediate German (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 21. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts.—II, III. (II, III.)

#### 40. Great German Short Stories (in English) (4)

Lecture/discussion—3 hours; extensive writing. Major German short stories from Goethe at the end of the eighteenth century to Thomas Mann at the beginning of the twentieth century. Offered in alternate years. GE Credit: ArtHum, Div, Wrt.—III. Bernd

#### 48. Myth and Saga in the Germanic Cultures (4)

Lecture—3 hours; term paper. Knowledge of German not required. Reading in English translation from the Norse Eddas, the Volsung and Sigurd-Siegfried cycles, and the Gudrun lays; literary mythology in German Romanticism culminating in Wagner's "total art-work" concept and The Ring of the Nibelung cycle. May not be counted toward major in German. GE credit: ArtHum, Wrt.—I. (I.)

#### 49. Freshman Colloquium (2)

Seminar—2 hours. Prerequisite: open only to students who have completed 40 or fewer quarter units of transferable college-level work. Readings, discussion and written projects treating topics such as communist-capitalist tension in German literary culture; masculine "versus" feminine authorial consciousness; disintegration and reconstitution of language reflecting cultural transformation; exorcising post-holocaust national guilt and individual frustration—Germany's new European "mission."—II. (II.)

**92. Field Work in German (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing. Total immersion program in Germany or a German speaking setting in the U.S. to further develop students' proficiency in the German language. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**  
(P/NP grading only.)**Upper Division Courses****101A. Survey of German Literature, 800-1800 (4)**

Lecture/discussion—3 hours. Prerequisite: course 22. German literature from the Middle Ages to Classicism (800-1800) with an overview of major movements and authors. GE credit: ArtHum—I. (I.) Bernd

**101B. Survey of German Literature, 1800-Present (4)**

Lecture/discussion—3 hours. Prerequisite: course 22. German literature from the Age of Romanticism (1800) to the present with an overview of major movements and authors. GE credit: ArtHum—II. (II.) Bernd

**103. Writing Skills in German (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 22. Practice in different kinds of writing, such as abstracts, correspondence, lecture summaries, analysis of or response to short literary texts.

**104. Translation (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22. Exercises in German-to-English, English-to-German translation using texts from the areas of culture and commerce. Not open for credit to students who have completed course 104A. Offered in alternate years.

**105. The Modern German Language (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22. Introduction to the linguistic analysis of contemporary German, including its phonology, morphology, syntax and semantics, as well as sociolinguistic considerations. GE credit: ArtHum, Wrt.—I. (I.) Arnett

**109A. Business German (4)**

Lecture/discussion—3 hours; laboratory—1 hour. Prerequisite: course 22 or consent of instructor. Specialized language course using business-oriented information and publications as the basis for discussions, roleplay, reports, compositions and translations. Offered in alternate years.—II.

**109B. Advanced Business German (4)**

Lecture/discussion—3 hours; laboratory/discussion—1 hour. Prerequisite: course 22 or consent of instructor. Specialized advanced language course providing in-depth study of major business topics with the help of authentic texts and videos. Offered in alternate years.—(II.)

**112. Topics in German Literature (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: upper division standing or consent of instructor. Investigation of significant themes and issues within their European context. Knowledge of German is not required. May be repeated once for credit. Offered in alternate years. GE credit: ArtHum, Wrt.—III.

**113. Goethe's Faust (4)**

Discussion—3 hours; term paper. Knowledge of German not required. Intensive study of Goethe's Faust in its entirety. Discussions and readings in English; reading the text in the original is encouraged. (Same course as Humanities 113) Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II, III. Bernd

**115. German Literature Since 1945 (4)**

Lecture—3 hours; extensive writing. Knowledge of German not required. Major writers of the post-war generation of Austria, Switzerland and Germany: novelists, such as Böll, Grass, Johnson, Walsler, Handke; playwrights such as Frisch, Dürrenmatt and

Hochhuth; and poets, such as Celan, Enzensberger, and Aichinger. May be repeated for credit in different topic area. GE credit: ArtHum, Wrt.—I. (I.)

**118A. Vienna at the Turn of the Twentieth Century (The End of the Habsburg Empire) (4)**

Lecture—1 hour; discussion—2 hours; extensive writing. Knowledge of German not required. Cultural ferment in Vienna, capital of the multinational Habsburg empire, at the turn of the century, with consideration of innovations in literature, music, graphic arts, architecture, philosophy and psychology, heralding European modernism. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Finney

**118B. Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism (4)**

Lecture—1 hour; discussion—2 hours; extensive writing. Knowledge of German not required. Expressionism in graphic arts, literature, film, New Objectivity, Brecht and Bauhaus considered in the context of the failure of the German experiment in democracy, the Weimer Republic of 1919-33. Offered in alternate years. GE credit: ArtHum, Wrt.—III.

**118C. Germany Under the Third Reich (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: background in modern European history; course 118B recommended. No knowledge of German required. Interdisciplinary study of German society and culture during the Third Reich (1933-45); readings in aesthetics, history, and philosophy; study of Fascist culture in literature, film, architecture, and the graphic arts; focus on everyday life in Hitler's Germany. GE credit: ArtHum, Wrt.—I. McConnell

**118E. Contemporary German Culture (4)**

Lecture/discussion—3 hours. Prerequisite: course 22. The political, economic, social and cultural scene of Germany today. Offered in alternate years. GE credit: ArtHum, Wrt.—II.

**119. From German Fiction to German Film (4)**

Lecture—3 hours; discussion—1 hour; term paper. Examines a number of film adaptations of major German prose works and plays to ascertain the types of changes involved in the shift in medium and the positive and negative effects achieved by such transferences. GE credit: ArtHum, Wrt.—II. (II.)

**120. Survey of German Culture (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 22. Major developments in German arts, philosophical thought, social institutions, and political history. GE credit: ArtHum.—III. (III.) Bernd

**121. The Medieval Period in German Literature (4)**

Discussion—3 hours; extensive writing. Prerequisite: course 22. Literary-philosophical profile of the Mittel-hochdeutsche Blütezeit in terms of the significant epics, romances, and lyric poetry. Readings in German. Offered in alternate years. GE credit: ArtHum.—II. McConnell

**122. Reformation and Baroque (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 22. Exemplary literary works of the 16th and 17th centuries tracing the principal lines of development and showing the reflection in literature of the social, as well as religious, scenes. Offered in alternate years. GE credit: ArtHum.—I. Bernd

**123. Literature of the Classical Age (4)**

Discussion—3 hours; term paper. Prerequisite: course 22. A critical assessment of principal works of Goethe and Schiller within the historical and philosophical context of their times. Offered in alternate years. GE credit: ArtHum.—I. Bernd

**124. Major Movements in German Literature (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 22. Significant movements and schools in German literary history (e.g., the medieval troubadours, storm and stress, the romanticists, the George Circle, the expressionists), with emphasis on the broader cultural dynamics and ideologies as these

apply to individual literary works. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—II. Finney

**125. Short Fiction: 1880-1914 (4)**

Lecture—3 hours; term paper. Prerequisite: course 22. Reading of short German fiction from the fin-de-siècle period and representative of various prose styles and cultural currents. Offered in alternate years. GE credit: ArtHum.—III. Finney

**126. Modern German Literature (4)**

Discussion—3 hours; extensive writing. Prerequisite: course 22. Selections from significant works of major contemporary writers, such as Hesse, Mann, Kafka, Rilke, Brecht, Grass. May be repeated once for credit with consent of adviser. GE credit: ArtHum.—I. (I.) Finney

**127. Major Writers in German (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22. Examination of representative works by a major writer, set in the broader cultural context of the relevant period or movement. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—I, III.

**129. Postwar Women Writers (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 22. Major writers in both Germanies, Austria, and Switzerland since 1945. Topics include the concept of a feminist aesthetics, East vs. West German writers, and the status of minority women writers in Germany (Jewish, Turkish-German, Afro-German). GE credit: ArtHum, Div.—I. (I.) Finney

**131. German Lyric Poetry (4)**

Lecture—3 hours; term paper. Prerequisite: course 22. Study of the genre of lyric poetry from the late Middle Ages through Renaissance, Baroque, Classical, Romantic, and Modern periods in correlation with other literary forms and the social climate of each period. Offered in alternate years. GE credit: ArtHum.—I. Bernd

**132. The German Novelle (4)**

Lecture—3 hours; term paper. Prerequisite: course 22. Inquiry into the art of the "Novelle" through analysis of the materials and formal devices of representative authors from Goethe to Kafka. Offered in alternate years. GE credit: ArtHum.—I. Bernd

**133. The German Drama (4)**

Lecture—3 hours; term paper. Prerequisite: course 22. Readings in the works of Germany's leading dramatists from the eighteenth century to the present day, such as Lessing, Goethe, Schiller, Kleist, Büchner, Hauptmann, Brecht. Offered in alternate years. GE credit: ArtHum.—(III.) Bernd

**134. Topics in German Intellectual History (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Topics in German intellectual history with materials from a number of periods, genres, and disciplines. May be repeated twice for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(I, II, III.)

**141. The Holocaust and its Literary Representation (4)**

Lecture—2 hours; discussion—1 hour; term paper. Knowledge of German not required. Aesthetic representation and metaphorical transformation of the holocaust in its human and historical perspectives. Offered in alternate years. GE credit: ArtHum, Wrt.—(I.)

**142. New German Cinema (4)**

Lecture/discussion—3 hours. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorff, Kluge, Wenders. Knowledge of German not required. May be repeated for credit with consent of instructor. (Same course as German 142) GE credit: ArtHum, Wrt.—I. (I.) Fisher

**143. Language Through Media (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 22. Study of contemporary German-language news media (press, video, film, CD-ROM,

Internet) for insight into political and cultural developments in the German-speaking countries. Offered in alternate years. GE credit: ArtHum.—II. (II.) Arnett

#### 160. Love in the Middle Ages (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 22. Analysis of the phenomenon of love in selected medieval lyrical poems and romances of the twelfth and thirteenth century Blütezeit. Origins of courtly love, love and individualism, love and the Church, love and adultery. Not offered every year. GE credit: ArtHum.—I. McConnell

#### 168. Multiculturalism in German Literature (4)

Lecture/discussion—3 hours; term paper or discussion—1 hour. Prerequisite: course 22. Examples of German literature from the High Middle Ages to the present that explore the “encounter with the other” (people of color, different beliefs and cultures, and inner-German minorities). Offered in alternate years. GE credit: ArtHum, Div.—II. Arnett

#### 185. The Age of Bismarck (4)

Discussion—3 hours; term paper. Prerequisite: course 22. Notable literary repercussions of the zenith of Germany’s international status at the time of Bismarck’s Chancellorship. The poetry of Storm, the prose of Fontane, the drama of Hauptmann. Offered in alternate years. GE credit: ArtHum.—II. Bernd

#### 192. Field Work in German (1-12)

Internship—3-36 hours. Prerequisite: course 109A or consent of instructor. Total immersion program in Germany or a German speaking setting in the U.S. to further develop students proficiency in the German language. May be repeated twice or up to 12 units of credit with consent of instructor. (P/NP grading only.)

#### 194HA-194HB. Honors Program (3-3)

Independent study—2 hours; term paper. Prerequisite: open only to majors with a 3.500 minimum GPA in at least 135 graduation units. (A) Research of an integrative nature (in either “General” or “Area Studies Emphasis” fields of major), guided by thesis advisor chosen by student; (B) Writing of Honors Thesis on topic selected by student in consultation with thesis advisor. (P/NP grading only. Deferred grading only, pending completion of course sequence.)

#### 197I. Tutoring in German (1-4)

Tutorial—3-12 hours. Prerequisite: consent of German Program Director. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with department courses. May be repeated up to eight units of credit. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

(P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Graduate Courses

#### 202. Middle High German (4)

Discussion—3 hours; lecture—1 hour. Outline of grammar; selections from Middle High German epic, romance, and lyric poetry.—II. (II.) McConnell

#### 206. Cognitive Grammar for Applied Linguists (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Analysis of grammar and application of cognitive grammar to language instruction. Syntactical problems and analyses relevant to the language the student will teach. Not offered every year.—III. Arnett

#### 210. Techniques of Literary Scholarship (4)

Seminar—3 hours; term paper. The bibliographical, organizational, and methodological tools and resources for advanced, independent research.—I. (I.)

#### 211. Concepts in Literary Theory (4)

Seminar—3 hours; written reports. Advanced course in concepts of literary theory and criticism. Discussion of the emergence of theoretical concepts and

their impact on the understanding and appreciation of literary works. Discussion in German and English, readings in German.—II. (II.)

#### 212. Contemporary Approaches to Literary Theory (4)

Seminar—3 hours; term paper. Study of contemporary theoretical approaches such as structuralism, deconstruction, feminism, Marxism/Frankfurt School, and reception theory in conjunction with the works of major authors.—III. (III.) Finney

#### 239. Narrative and Narrative Theory (4)

Seminar—3 hours; term paper. Studies, in a theoretical and literary historical context, major elements of 19th- and 20th-century narrative, such as techniques of framing, refraction, and montage; narrative perspective; mimesis; and self-consciousness. Focuses on paradigmatic prose texts alongside a spectrum of critical approaches. Offered in alternate years.—I. Finney

#### 240. Forms of German Verse (4)

Seminar—3 hours; term paper. The development of German verse from the Middle Ages to the present, with special emphasis on different techniques of text analysis and interpretation. May be repeated for credit with consent of instructor. Offered in alternate years.—II. Bernd

#### 241. The German Drama (4)

Seminar—3 hours; term paper. The major forms of German drama from its origins to the middle of the twentieth century. May be repeated for credit with consent of instructor.—I. (I.) Finney

#### 242. The German Novelle (4)

Seminar—3 hours; term paper. The major German Novellisten, with particular emphasis on the flowering of this genre in the nineteenth century. May be repeated for credit with consent of instructor.—II. (II.) Bernd

#### 243. Fontane and the Rise of the Modern German Novel (4)

Seminar—3 hours; term paper. Fontane, the father of the modern German novel and the chief German representative of the European novel at its greatest, in the context of the nineteenth-century European political and social scene.—II. (II.) Bernd

#### 244. Gender and Comedy (4)

Seminar—3 hours; term paper. Studies of genre and gender in German-language comedy by male and female writers from the 18th century to the present. Authors treated include Lessing, Kleist, Büchner, Ebner-Eschenbach, Hauptmann, Hofmannsthal, Frisch, Langner, and Jelinek. Offered in alternate years.—III. Finney

#### 252. The Writings of Lessing (4)

Seminar—3 hours; term paper. Study of Lessing’s theory of literature with particular emphasis upon his critical attacks on French drama.—I. (I.) Bernd

#### 253. Goethe (4)

Seminar—3 hours; term paper. Study of the origins of Goethe’s thought in German Pietism, and his principal artistic, autobiographical, scientific, and philosophical works.—I. (I.) Bernd

#### 254. Schiller (4)

Seminar—3 hours; term paper. A critical analysis of Schiller’s major works and his impact on the intellectual climate in Germany during the late eighteenth and early nineteenth centuries.—III. (III.)

#### 255. Aesthetics in the Age of Goethe (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Emergence of aesthetic autonomy from eighteenth century normative poetics during the Age of Goethe. The shift from a model based on the imitation of nature (and the Ancients) to a new concept grounded in the individuality of aesthetic experience.—I.

#### 257. Heinrich von Kleist (4)

Seminar—3 hours; term paper. Kleist’s important dramatic and prose works; special attention will be given to the peculiar hermeneutic problems in modern German, French, and Anglo-American Kleist criticism.—III. (III.) Bernd

#### 258. The Novels of Thomas Mann (4)

Seminar—3 hours; term paper. Reading of selected novels with emphasis on aesthetic techniques, originality, ethical and political views, and influence on the contemporary literary scene in Germany.—II. (II.)

#### 259. Studies in Kafka (4)

Seminar—3 hours; term paper. Study of Kafka’s narrative techniques with special emphasis in the shorter works on the existential development from its roots in Expressionism.—II. (II.) Finney

#### 260. The Poetry of Rilke (4)

Seminar—3 hours; term paper. Study of the principal motifs, myths, images, and problems in the poetry of Rainer Maria Rilke.—I. (I.)

#### 261. Brecht and the Epic Theater (4)

Seminar—3 hours; term paper. A reading of Brecht’s works with emphasis on the ideas which impelled the development of new literary forms and concepts.—III. (III.)

#### 262. Studies in Turn-of-the-Century Culture (4)

Seminar—3 hours; term paper. Investigates literary currents in turn-of-the-century Germany and Austria against the background of contemporaneous developments in psychology, the visual arts, philosophy, and music. Authors treated include Hauptmann, Holz and Schlaf, Schnitzler, T. Mann, Wedekind, Musil, Hofmannsthal. Offered in alternate years.—II. (II.) Finney

#### 285. Middle High German Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: consent of instructor. Extensive reading of Middle High German texts in the original language. Examines linguistic and literary problems. May be repeated for credit when topic differs.—III. (III.) McConnell

#### 288. The Renaissance and Reformation in German Literature (4)

Seminar—3 hours; term paper. The parabolic and didactic style in Germany’s literature during the sixteenth century. May be repeated for credit with consent of instructor.—I. (I.)

#### 289. German Literature of the Baroque (4)

Seminar—3 hours; term paper. The “Elegantiadeal” and the varying methods used to portray it in seventeenth-century German literature. May be repeated for credit with consent of instructor.—I. (I.)

#### 290. The Enlightenment in German Literature (4)

Seminar—3 hours; term paper. Revolt against the concept of the “Elegantiadeal,” and evolution of a new literature based on reason and wit. May be repeated for credit with consent of instructor.—I. (I.)

#### 292. Sentimentality and Sturm und Drang in German Literature (4)

Seminar—3 hours; written reports. Reaction to over-emphasis on Reason: theories of Hamann and Herder and works of poets such as Lenz, Leisewitz, the early Goethe and Schiller. May be repeated for credit with consent of instructor.—III. (III.)

#### 293. The Classical Age of German Literature (4)

Seminar—3 hours; term paper. Inquiry into the aesthetic and humanistic qualities of Germany’s greatest literary epoch. May be repeated for credit with consent of instructor.—III. (III.) Bernd

#### 294. The Romantic Period in German Literature (4)

Seminar—3 hours; term paper. Survey of the works of early nineteenth-century authors in reaction against the age of classicism. May be repeated for credit with consent of instructor.—I. (I.)

#### 295. Poetic Realism in German Literature (4)

Seminar—3 hours; term paper. Outstanding figures in German literature between 1840 and 1890. Important phases in their developments will be treated. May be repeated for credit with consent of instructor.—I. (I.) Bernd

**296. Twentieth-Century German Literature (4)**

Seminar—3 hours; term paper. Considers the revolt of the Hauptmann generation, Symbolism, Expressionism, and the chief currents of the contemporary scene. May be repeated for credit with consent of instructor.—I. (I.) Finney

**297. Special Topics in German Literature (4)**

Seminar—3 hours; term paper. Various special topics in German literature, which may cut across the more usual period and genre rubrics. May be repeated for credit when topic differs.

**298. Group Study (1-5)****299. Individual Study (1-12)**

(S/U grading only.)

**299D. Special Study for the Doctoral Dissertation (1-12)**

(S/U grading only.)

**Professional Courses****390A. The Teaching of German (2)**

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—I. (I.) Arnett

**390B. The Teaching of German (2)**

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—II. (II.) Arnett

**390C. The Teaching of German (2)**

Lecture—2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)—III. (III.) Arnett

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Arnett

**Professional Course****400. Tutorial and Instructional Internship (1-3)**

Discussion—1-3 hours. Prerequisite: graduate standing. Apprenticeship training in ongoing undergraduate literature courses taught by regular staff, with supplementary weekly critique sessions; intern leadership of discussion sections under staff supervision. May be repeated for credit.—I, II, III. (I, II, III.)

## Global and International Studies

(College of Letters and Science)

The interdisciplinary minor in Global and International Studies will enable students not only to learn about global and international issues at UC Davis, but also to gain first-hand academic experience abroad. The minor is also designed to give recognition for upper division course work while studying abroad. However, the minor can also be completed with approved course work taken at UC Davis.

Students will be expected to work closely with an academic adviser in developing an intellectually coherent program of study. Each proposal must be approved by the Faculty Director of the Education Abroad Center,

The minor is sponsored by the Humanities Program. For information, contact the Faculty Director of the Education Abroad Center and see [http://eac.ucdavis.edu/students/degree/requirements/minor\\_gis/index.html](http://eac.ucdavis.edu/students/degree/requirements/minor_gis/index.html).

**Minor Program Requirements:**

UNITS

**Global and International Studies..... 24****Arts and Humanities Emphasis:**

One course from Anthropology 4, 20, International Relations 1, Political Science 3 or Sociology 5..... 4

One upper division UC Davis general course on global or international studies in the Arts and Humanities ..... 3-4

Course cluster requirement ..... 16-17  
The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies in the Arts and Humanities.

*Suggested course clusters include:*

(1) *Country or region-specific courses:*

Western Europe; Russian and East/Central Europe; Asia and the Pacific; Latin and South America; Africa and the Middle East; Jewish Studies; specific countries.

or

(2) *Courses clustered around a thematic field in global and international studies:*

people and nationalities; the individual and society, arts, language, literature and culture.

**Study abroad and international internships.**

The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in EAP or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Those students who are unable to study abroad or participate in an international internship may fulfill the requirement by taking approved global/international courses at UC Davis.

**Social Science Emphasis:**

One course from Anthropology 20, International Relations 1, Political Science 3, or Sociology 5..... 4

One upper division UC Davis general course on global or international studies in the Social Sciences ..... 3-4

Course cluster requirement ..... 16-17  
The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies in the Social Sciences.

*Suggested course clusters for the Social Science Emphasis:*

(1) *Country or region-specific courses in the Social Sciences:* Western Europe; Russian and East/Central Europe; Asia and the Pacific; Latin and South America; Africa and the Middle East; Jewish Studies; specific countries.

or

(2) *Courses clustered around a thematic field in global and international studies:* world trade and development; peace and security; global environment, health, and natural resources.

**Study abroad and international internships.**

The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in EAP or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Those students who are unable to study

abroad or participate in an international internship may fulfill the requirement by taking approved global/international courses at UC Davis.

**Restrictions.** No more than two courses from a single UC Davis department may be offered in satisfaction of the minor requirements.

**Foreign language study.** Students are strongly encouraged to study a foreign language, particularly the language of the country in which and about which they intend to study. However, only upper division course work may be used to fulfill requirements for the minor.

(Veterinary Medicine Computing Services)

**Graduate Study.** The Group currently offers an M.S. degree in Health Informatics. The program is aimed at health care professionals who hold advanced degrees, including, but not limited to, M.D., D.O., D.V.M., VMD, MPH, and RN with Bachelor's degree. The course of study provides research-oriented training that spans the use of computer systems in medicine today, including methods for clinical data acquisition, storage, and retrieval, the development, use and implementation of the electronic medical record, management of clinical data, and the use of medical decision support systems. A research project and thesis are mandatory degree requirements.

**Preparation.** The Group encourages applications from health professionals who have had experience in the manipulation of clinical information. Basic qualifications include an advanced degree in a health-related field or the equivalent in work experience. Background in a programming language is required. Applicants with extensive computer background but little knowledge of clinical information would need to gain considerable practical experience in dealing with clinical information to be competitive in applying to the program.

**Graduate Advisors.** M. Hogarth (Internal Medicine), C. Hotz (Health Informatics), R. Walters (Computer Science)

### Courses in Medical Informatics (MDI)

#### Graduate Courses

#### 202. Computer-Based Patient Records (4)

Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: current enrollment within the Health Informatics graduate program or consent of instructor. Introduction and overview of computer-based clinical record systems. Topics include data modeling, health system standards and terminologies; security, privacy and confidentiality; workflow modeling; data visualization; legal; decision support; public health; and evidence-based practice.—III. (III.) Turner, Hogarth

#### 207. Decision Support System (4)

Lecture/discussion—2 hours; laboratory—2 hours; independent study—2 hours. Prerequisite: consent of instructor. Decision support system for medical application. Knowledge and computer representation, review of existing decision support system.—II. (II.) Hotz, Christopher

#### 208. Electronic Medical Data (4)

Lecture/discussion—2 hours; laboratory—4 hours. Prerequisite: consent of instructor. Electronic resources for medical practice, review of existing resources and development of materials.—II. (II.) Lynch

#### 209. Data Acquisition in Medicine and Veterinary Medicine (4)

Lecture/discussion—2 hours; laboratory/discussion—6 hours. Prerequisite: basic proficiency in computer operation. Overview of the nature of medical/veterinary data, methods for capturing and storing data in electronic formats. Data validation, retrieval considerations.—I. (I.) Maly

#### 210. Introduction to Medical Informatics (4)

Lecture—3 hours; discussion—1 hour. Overview course to give the student a broad exposure to the field of Health Informatics. Topics covered include, but are not limited to, networking, information systems, coding, HL7, Security, and HIPAA.—I. (I.) Galvez, Hotz

#### 211. Telemedicine (4)

Web virtual lecture—3 hours; web electronic discussion—1 hour. Issues for the development and maintenance of a successful telemedicine program with focus on strategic planning, clinical applications, project management, risk management and legal issues; reimbursement and contracting; human resources and program sustainability.—I, II, III. (I, II, III.) Yellowlees, Hilly

#### 215. Beginning and Intermediate Programming in M (MUMPS) (3)

Online lecture—10 hours. Project-oriented approach to fundamentals of programming in ANSI Standard M (MUMPS) language. Basic syntax, Hierarchical file structure; arrays and string subscripts, indirection and extrinsic functions. (S/U grading only.)—I, II, III. (I, II, III.) Walters

#### 289A-I. Special Topics in Medical Informatics (1-5)

Lecture, laboratory, or combination. Prerequisite: consent of instructor. Special topics in (A) Data Acquisition, (B) Electronic Medical Information, (C) Computer Based Patient Records, (D) Decision Support, (E) Medical Image Analysis, (F) Database Systems, (G) Biostatistics, (H) Modeling Biological Systems, (I) Coding Systems. May be repeated for credit when topic differs.—I, II, III. (I, II, III.)

#### 290. Seminar in Medical Informatics (1)

Seminar—1 hour. Discussion of current graduate research and topics in Medical Informatics. Oral presentations of individual study. Limited enrollment. (S/U grading only.)—I, II, III. (I, II, III.)

#### 299. Research in Medical Informatics (1-12)

(S/U grading only)

Richard N. Schwab, Ph.D., Professor Emeritus  
Wilson Smith, Ph.D., Professor Emeritus  
F. Roy Willis, Ph.D., Professor Emeritus, UC Davis  
*Prize for Teaching and Scholarly Achievement*

### The Major Program

The history major develops critical intelligence and fosters an understanding of ourselves and our world through the study of the past—both remote and recent.

**The Program.** A student electing a major in History may complete Plan I or Plan II. Plan I enables students to receive a broad education in histories of several geographic areas. Plan II encourages interested students, including those preparing for graduate work in history, to enroll in a seminar, to undertake independent work, and to study the history of historical thought as part of the major. Students preferring more active engagement in research and writing are encouraged to follow Plan II.

**Career Alternatives.** A degree in history is excellent preparation for a professional career such as teaching, law, journalism, public administration, or business management. Professional schools in these and related fields are looking for students who can weigh conflicting evidence, evaluate alternative courses of action or divergent points of view, and express conclusions logically in everyday language. These analytical skills are stressed in history classes, and their mastery gives the history student a solid preparation for subsequent training in a specialized career.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter (Plan I or II) ..... 20

Five lower division courses, including at least two from each of two of the following fields ..... 20

- (a) *Western Civilization*: History 3, 4A, 4B, 4C, 10, 30  
(b) *Asian Civilization*: History 8, 9A, 9B  
(c) *United States and Latin America*: History 17A, 17B, 72A, 72B, 85, 86  
(d) *Africa*: History 15

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

**Depth Subject Matter—Plan I..... 40-41**

Four upper division courses from one of the fields of concentration listed below ..... 16  
 Three upper division courses from one of the other fields of concentration listed below ..... 12  
 Two upper division courses from a field or fields other than those chosen to satisfy the two preceding requirements ..... 8  
 One course from the following: History 101 or 102 or 103 (in field of concentration)..... 4-5

**Total Units for the Major, Plan I..... 60-61****Depth Subject Matter—Plan II..... 42**

Four upper division courses from one of the fields of concentration listed below. Include a two-quarter sequence of courses..... 16  
 Three upper division courses from one of the other fields listed ..... 12  
 History 101 ..... 5  
 History 102 in field of concentration (in exceptional circumstances, a student may, with the permission of an adviser, take the seminar in another field) ..... 5  
 History 103 in field of concentration ..... 4

**Total Units for the Major, Plan II..... 62****Fields of Concentration**

- (a) *Pre-Industrial Europe*: History 102A, 102B, 102C, 102D, 102P, 102X, 111A, 111B, 111C, 121A, 121B, 121C, 122, 125, 130A, 130B, 130C, 131A, 131B, 131C, 133, 135A, 136, 139A, 144A, 148A, 151A, 151B.  
 (b) *Modern Europe*: History 102E, 102F, 102I, 102X, 134A, 135B, 138A, 138B, 138C, 139B, 141, 142, 143, 144B, 145, 146A, 146B, 147A, 147B, 147C, 148B, 149A, 151C, 151D.  
 (c) *United States History*: History 102K, 102L, 102M, 102X, 169A, 169B, 170A, 170B, 170C, 171, 173, 174A, 174B, 174C, 174D, 175A, 175B, 175C, 176A, 176B, 177A, 177B, 178, 180A, 180B, 180C, 181, 183A, 183B, 185A, 185B, 187A, 187B, 188A, 188B, 189A, 189B, 189C.  
 (d) *Asian History*: History 102G, 102H, 102N, 102Q, 102R, 102X, 110, 191A, 191B, 191C, 191D, 191E, 191F, 194A, 194B, 194C, 194D, 194E, 196A, 196B.  
 (e) *African History*: History 102O, 102X, 110, 115A, 115B, 115C, 116.  
 (f) *Latin American History*: History 102J, 102X, 110, 161A, 161B, 162, 163A, 163B, 165, 166A, 166B, 168, 169A, 169B.  
 (g) Within broad fields, a student may wish to concentrate some of the courses on a particular area or period, such as China or Great Britain or Medieval Europe. Special approval is not required.

**Major Advisers.** See the department's Web site for updated information.

**History and Philosophy of Science.** Courses from the History and Philosophy of Science program may count toward the History major. History and Philosophy of Science 130A fulfills upper division requirements in the field of pre-industrial Europe. History and Philosophy of Science 130B, 150, and 180 fulfill upper division requirements in either the U.S. or Modern Europe field.

Students can create a field in the History of Science upon consultation with a faculty adviser. They may draw upon the relevant History courses (History 85, 135A, 135B, 139A, 139B, 185A, and 185B) as well as History and Philosophy of Science offerings to do so.

Consult the History and Philosophy of Science program for a more detailed description of course offerings in this area and the minor in History and Philosophy of Science.

**Minor Program Requirements:**

The minor in History consists of five upper division courses chosen so that at least three courses are in one field and at least one course is in another field. The two fields shall be chosen from among those defined in the catalog for the major. However, students may also, in consultation with and with the authorization of a faculty adviser, define other thematic fields.

**UNITS****History ..... 20**

At least 20 units of upper division history courses ..... 20  
 Examples of minor with thematic emphasis: Pre-Law (British and American Political and Constitutional Development); The Twentieth Century; The History of Ideas in Society.

**Minor Advisers.** Same as major advisers.

**Honors and Honors Program.** A student becomes eligible for graduation with honors by meeting the minimum GPA (usually 3.500) and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the History Department honors program with a GPA of 3.500 or above and write a thesis that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project, interviews, and faculty recommendations. Students admitted to the program must complete the History 104A, 104B, 104C sequence of honors courses, which requires the completion of a senior honors thesis. Students who anticipate seeking admission to the honors program are urged to complete at least one History 102 (undergraduate seminar) before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year. Students may follow either Plan I or Plan II described above, and may substitute History 104B and 104C for any courses in their program other than History 102.

Students who anticipate pursuing graduate work in history or a teaching credential, and who do not wish to opt for the research emphasis embodied in the honors program, are encouraged to select Plan II of the major.

**Study Abroad and the History Major.** The department strongly encourages interested students to pursue their studies abroad. While there are no specific required courses or prerequisites, students are urged to take at least one history course that touches upon the geographic area where they plan to study abroad before departing. To receive a history degree from UC Davis, students must complete at least 18 upper division units in the history major at UC Davis (which can also include History 101, 102, 103). The remaining major requirements can be fulfilled abroad provided that (a) the course should be evaluated as at least four UC Davis units, (b) the course should be considered upper division by the standards set forth by the Education Abroad Program, or (c) the student presents copies of the course work, syllabus, and writing assignments to the department's liaison person with the EAP office for approval.

Note: students who wish to receive credit for courses taken abroad under programs other than EAP may petition the Undergraduate Program Committee to do so.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program on page 102.

**Waiver Program for Single-Subject Teaching Credential in History.** The Department of History is currently working with the School of Education to develop a program of study to satisfy the California Teaching Commission's Subject Matter Competency requirement for the single subject credential in history/social science. For more informa-

tion, contact Nancy McTygue at the Area 3 History and Cultures Project, 175 Kerr Hall.

**Graduate Study.** The Department of History offers programs of study and research leading to the M.A. and Ph.D. degrees in history. Detailed information may be obtained by writing to the Graduate Adviser, Department of History.

**Graduate Advisers.** See the department's Web site for updated information.

**American History and Institutions.** This University requirement can be satisfied by passing any one of the following courses in History: 17A, 17B, 72A, 72B, 170A, 170B, 170C, 171A, 171B, 174A, 174B, 174C, 175A, 175B, 175C, 176A, 176B, 177A, 177B, 180A, 180B, 183A, 183B. The upper division courses may be used only with the consent of the instructor; see also under University requirements.

**Courses in History (HIS)****Lower Division Courses****3. Cities: A Survey of Western Civilization (4)**

Lecture—3 hours; discussion—1 hour. Survey of western civilization, focusing on nine cities, at the period of their greatest creativity: Athens, Rome, Constantinople, Paris, Florence, Amsterdam, London, Berlin, Moscow. Illustrated with slides, music, and optional films. GE credit: ArtHum.—II. (I.)

**4A. History of Western Civilization (4)**

Lecture—3 hours; discussion—1 hour. Growth of western civilization from late antiquity to the Renaissance. GE credit: ArtHum, Wrt.—I. (I.)

**4B. History of Western Civilization (4)**

Lecture—3 hours; discussion—1 hour. Development of western civilization from the Renaissance to the Eighteenth Century. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.)

**4C. History of Western Civilization (4)**

Lecture—3 hours; discussion—1 hour. Development of Western Civilization from the Eighteenth Century to the present. GE credit: ArtHum, Wrt.—I, II. (I, II.)

**6. Introduction to the Middle East (4)**

Lecture—3 hours; discussion—1 hour. Survey of the major social, economic, political and cultural transformations in the Middle East from the rise of Islam (c. 600 A.D.) to the present, emphasizing themes in religion and culture, politics and society. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—I. El Shakry, Teczan

**7A. History of Latin America to 1700 (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the history of Spanish and Portuguese America from the late pre-Columbian period through the initial phase and consolidation of a colonial regime (circa 1700). Topics include conquest, colonialism, racial mixture, gender, and labor systems. GE credit: ArtHum or SocSci, Div, Wrt.—I. (I.) Resendez

**7B. History of Latin America, 1700-1900 (4)**

Lecture—3 hours; discussion—1 hour. Latin America from colony to republic. The nature of Iberian colonialism, the causes for independence, the creation of nation states, the difficulties in consolidating these nations, and the rise of Liberalism and export economics in the nineteenth century. GE credit: ArtHum or SocSci, Div, Wrt.—II. (II.) Walker

**7C. History of Latin America, 1900-present (4)**

Lecture—3 hours; discussion—1 hour. Latin America since the beginning of the 20th century. Themes include export economies, oligarchic rule, crises of depression and war, corporatism, populism revolution and reform movements, cultural and ethnic issues, U.S.-Latin American relations, neo-liberal restructuring. GE credit: ArtHum or SocSci, Div, Wrt.—III. (III.) Holloway

**8. History of Indian Civilization (4)**

Lecture—3 hours; discussion—1 hour; written reports. Survey of Indian civilization from the rise of cities (ca. 2000 B.C.) to the present, emphasizing

themes in religion, social and political organization, and art and literature that reflect cultural interaction and change. GE credit: ArtHum, Div.—III. (III.)

#### 9A. History of East Asian Civilization (4)

Lecture—3 hours; discussion—1 hour. Surveys traditional Chinese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary China are provided. GE credit: ArtHum, Div.—II, III. (II, III.)

#### 9B. History of East Asian Civilization (4)

Lecture—3 hours; discussion—1 hour. Surveys traditional Japanese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary Japan are provided. GE credit: ArtHum, Div.—I. (I.)

#### 10A. World History to 1350 (4)

Lecture—3 hours; discussion—1 hour. Historical examination of the changing relationship of human societies to one another and to their natural settings through the year 1350, with particular attention to long-term trends and to periodic crises that reshaped the links of culture and nature on a global scale. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—I. Taylor, Resendez

#### 10B. World History, c. 1350-1850 (4)

Lecture—3 hours; discussion—1 hour. Major topics in world history from the 14th century to the beginning of the 19th century. Topics will vary but may include oceans as systems of human communication and conflict; the global consequences of "industrious revolutions" in Europe and Asia, etc. Offered in alternate years. GE credit: ArtHum, Wrt.—II. (II.)

#### 10C. World History III (4)

Lecture—3 hours; discussion—1 hour. Major topics from world history of the 19th and 20th centuries, emphasizing the rise and fall of Western colonial empires; Cold War and the superpowers; the spread of the nation-states; and process of globalization. GE credit: ArtHum, Wrt.—III. (III.)

#### 15. Introduction to African History (4)

Lecture—3 hours; discussion—1 hour. Examination of the long-range historical context as background to current conditions in Africa. Includes the early development of African civilizations, the slave trade and its abolition, 20th century colonization, and African independent states. GE credit: ArtHum, Div, Wrt.—I. (I.)

#### 17A. History of the United States (4)

Lecture—3 hours; discussion—1 hour. The experience of the American people from the Colonial Era to the Civil War. GE credit: ArtHum, Div, Wrt.—I, II. (I, II.)

#### 17B. History of the United States (4)

Lecture—3 hours; discussion—1 hour. The experience of the American people from the Civil War to the end of the Cold War. Not open for credit to students who have completed course 17C. GE credit: ArtHum, Div, Wrt.—II, III. (II, III.)

#### 72A. Social History of American Women and the Family (4)

Lecture—3 hours; discussion—1 hour. Social and cultural history of women, sex roles and the family from colonial America until the late nineteenth century emphasizing changes resulting from the secularization, commercialization, and industrialization of American society. GE credit: ArtHum, Div, Wrt.—I. (I.)

#### 72B. Social History of American Women and the Family (4)

Lecture—3 hours; discussion—1 hour. Social and cultural history of women, sex roles, and the family in twentieth-century America, emphasizing female reformers and revolutionaries, working class women, consumerism, the role of media, the "feminine mystique," changes in family life, and the emergent women's movement. GE credit: ArtHum, Div, Wrt.—II. (II.)

#### 85. Nature, Man, and the Machine in America (4)

Seminar—4 hours; term paper. Prerequisite: consent of instructor. History of the attitudes and behavior of Americans toward their natural environment and their technology, from colonial times to the present. No final examination. Limited enrollment. GE credit: ArtHum.

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division Courses

#### 101. Introduction to Historical Thought and Writing (5)

Lecture/discussion—4 hours; term paper. Prerequisite: consent of instructor. Study of the history of historical thought and writing, analysis of critical and speculative philosophies of history and evaluation of modes of organization, interpretation, and style in historical writing.—III. (III.) Landau

#### 102A-R. X. Undergraduate Proseminar in History (5)

Seminar—3 hours; term paper. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. (A) Ancient; (B) Medieval; (D) Modern Europe to 1815; (E) Europe since 1815; (F) Russia; (G) China to 1800; (H) China since 1800; (I) Britain; (J) Latin America since 1810; (K) American History to 1787; (L) United States, 1787-1896; (M) United States since 1896; (N) Japan; (O) Africa; (P) Christianity and Culture in Europe, 50-1850; (Q) India; (R) Muslim Societies; (X) Comparative History, selected topics in cultural, political, economic, and social history that deal comparatively with more than one geographic field. May be repeated for credit. Limited enrollment.—I, II, III. (I, II, III.)

#### 103. Topics in Historical Research (4)

Discussion—3 hours; individual consultation with instructor; term paper. Prerequisite: consent of instructor. Individual research resulting in a research paper on a specific topic in one of various fields of history. May be repeated for credit.

#### 104A. Introduction to Historical Research and Interpretation (4)

Seminar—3 hours; term paper. Prerequisite: acceptance into History Department Honors Program. Directed reading and research aimed at preparing students to select appropriate topics and methodologies for a senior honors essay and to situate their topics within a meaningful, broad context of historical interpretations. Culminates in the submission of a full prospectus for an honors essay.—I. (I.) Brower

#### 104B. Honors Thesis (4)

Tutorial—4 hours. Prerequisite: course 104A. Research in preparation of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.)—III.

#### 104C. Honors Thesis (4)

Tutorial—4 hours. Prerequisite: course 104A and 104B. Completion of a senior honors thesis under the direction of a faculty adviser.—III.

#### 110. Themes in World History (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; at least 8 units in history. Issues in world history from 1400 to the present. Topics will emphasize the interaction of diverse regions of the world as well as common patterns of historical change. Offered in alternate years. GE credit: ArtHum.

#### 111A. Ancient History (4)

Lecture—3 hours; discussion or paper (student option). History of ancient empires of the Near East and of their historical legacy to the Western world. GE credit: ArtHum, Wrt.—II. (II.) Spyridakis

#### 111B. Ancient History (4)

Lecture—3 hours; discussion or paper (student option). Political, cultural and intellectual study of the Greek world from Minoan-Mycenaean period to end of Hellenistic Age. GE credit: ArtHum, Wrt.—III. (III.) Spyridakis

#### 111C. Ancient History (4)

Lecture—3 hours; discussion or paper (student option). Development of Rome from earliest times. Rise and fall of the Roman Republic; the Empire to 476 A.D. GE credit: ArtHum, Wrt.—II. (II.) Spyridakis

#### 112A. Topics in Pre-Modern Jewish History (4)

Lecture—3 hours; term paper. Topics in the history of Jews from the Biblical era to the eras of Jewish emancipation. Topics can be framed chronologically (eg., medieval Jewry) or thematically (eg., trade and Jewish communities). May be repeated once for credit. GE credit: ArtHum, Div, Wrt.—I. (I.)

#### 112B. Topics in Modern Jewish History (4)

Lecture—3 hours; term paper. Topics in the history of Jews from the era of Jewish emancipation to the present. Topics can be framed chronologically or thematically (eg. Zionism, assimilation, the post Holocaust Diaspora). May be repeated once for credit. GE credit: ArtHum, Div, Wrt.—III. (III.)

#### 113. History of Modern Israel (4)

Lecture—3 hours; term paper. Topics include the rise and fall of utopian Zionism, the century-long struggle between Jews and Arabs, the development of modern Hebrew culture, the conflict between religious and secular Jews, and the nature of Israel's multicultural society. GE credit: ArtHum, Div, Wrt.—II. (II.) Biale, Ringelblum

#### 115A. History of West Africa (4)

Lecture—3 hours; written reports. Prerequisite: courses 4A, 4B, 4C recommended. Introductory survey of the history of West Africa and the Congo region from the earliest times to the present. GE credit: ArtHum, Div, Wrt.—I. (I.) Brantley

#### 115B. History of East and Central Africa (4)

Lecture—3 hours; written reports. Prerequisite: course 115A recommended. Introductory survey of the history of east and central Africa from 1000 to the present. This course is a part of an interdisciplinary East African sequence which includes History 115B (winter) and Political Science 138. GE credit: ArtHum, Div, Wrt.—II. (II.) Brantley

#### 115C. History of Southern Africa, Swaziland, Lesotho, and Botswana from 1500 to the Present (4)

Lecture—3 hours; written reports. Prerequisite: courses 115A and 115B recommended. Introductory survey of the history of Southern Africa, including South Africa, Swaziland, Lesotho, and Botswana from 1500 to the present. GE credit: ArtHum, Div, Wrt.—II. (II.) Brantley

#### 115D. History and Legacy of Colonialism in Africa (4)

Lecture—3 hours; term paper. Prerequisite: course 115A, 115B or 115C recommended. History of the implementation, development, and legacy of European Colonialism in Africa. A comparison of British, Belgian, French, and Portuguese colonial efforts and impacts. GE credit: SocSci, Div, Wrt.—I. (I.) Brantley

#### 115E. The African Slave Trade (4)

Lecture—3 hours; writing—1 hour. History of the African Slave trades, from the early Egyptian and Saharan trades in the pre-modern period to the trans-Atlantic trade (15th-19th century) and the contemporary trafficking of humans. GE credit: ArtHum, Div, Wrt.—III. (III.) Lawrence

#### 116. African History: Special Themes (4)

Lecture—3 hours; term paper. Prerequisite: courses 115A and 115B recommended. Themes of African history, such as African states and empires, slave trade, relationship of Egypt to rest of Africa, Bantu origins and migrations, and French policy of Assimilation and Association. GE credit: ArtHum.—Brantley

**121A. Medieval History (4)**

Lecture/discussion and panel presentations—3 hours. European history from “the fall of the Roman Empire” to the eighth century. GE credit: ArtHum, Wrt.—I. (I.)

**121B. Medieval History (4)**

Lecture/discussion and panel presentations—3 hours. European history from Charlemagne to the twelfth century. GE credit: ArtHum, Wrt.—III. (III.)

**121C. Medieval History (4)**

Lecture/discussion and panel presentations—3 hours. European history from the Crusades to the Renaissance. GE credit: ArtHum, Wrt.—I. (I.) Cadden

**122. Selected Themes in Medieval History (4)**

Lecture—3 hours; term paper. Each offering will focus on single major theme, such as medieval agrarian history, feudalism, the family, medieval Italy, or the Crusades. Readings include original sources in English translation and modern works. May be repeated for credit. GE credit: ArtHum.—III. (III.) Cadden

**125. Topics in Early Modern European History (4)**

Laboratory/discussion—3 hours; term paper. Prerequisite: course 4B recommended. Social and cultural history, 1300-1800. Topics such as medieval and Renaissance Italy, early modern Italy, Ancient Regime France, family and sexuality, and material culture and daily life. May be repeated for credit. GE credit: ArtHum, Wrt.—III. (III.) Harkness

**130A. Christianity and Culture in Europe: 50-1450 (4)**

Lecture—3 hours; written report or research paper. A history of the ideas and institutions of Christianity and their impact on the late Roman Empire and medieval Europe in terms of outlook on life, art, politics and economics. GE credit: ArtHum, Div, Wrt.—II. (II.)

**130B. Christianity and Culture in Europe: 1450-1600 (4)**

Lecture—3 hours; written report or research paper. A history of the Lutheran, Zwinglian-Calvinist, Radical, Anglican, and Catholic Reformations as foundation stones of a new culture in Europe, with special attention to the interconnections between the revival of antiquity and the different reform movements. GE credit: ArtHum.—II. (II.)

**130C. Christianity and Culture in Europe: 1600-1850 (4)**

Lecture—3 hours; written report or research paper. A survey of the intellectual, cultural and political reorientation of European society in the aftermath of the Wars of Religion. “Secularization” will be discussed in the context of the Enlightenment and Romanticism. GE credit: ArtHum.

**131A. Early Modern European History (4)**

Lecture—3 hours; written reports. Prerequisite: courses 4A and 4B recommended. Western European history from about 1350 to about 1500. GE credit: ArtHum.—Stuart

**131B. European History During the Renaissance and Reformation (4)**

Lecture—3 hours; term paper. Survey of European society, politics, and culture from the late 15th through the early 17th centuries, with particular focus on the Italian and Northern Renaissance, on the Protestant Reformation, and the Catholic Counter Reformation. GE credit: ArtHum, Wrt.—II. (II.) Stuart

**131C. The Old Regime: Absolutism, Enlightenment and Revolution in Europe (4)**

Lecture—3 hours; term paper. Survey of European society, politics, and culture in the 17th and 18th centuries, focusing on religious warfare, absolutism, Scientific Revolution, Enlightenment and the growth of religious tolerance, the French Revolution and the collapse of the old regime. GE credit: ArtHum, Wrt.—II. (II.) Stuart

**132. Crime and Punishment in Early Modern Europe (4)**

Lecture—3 hours; term paper. Deviance and crime in early modern Europe, contrasting imaginary crimes, e.g. witchcraft, with “real” crimes such as highway robbery and infanticide. Examines impact of gender, sexual orientation, ethnicity, and class in processes of criminalization. GE credit: SocSci, Div, Wrt.—II. (II.) Stuart

**133. The Age of Ideas (4)**

Lecture—3 hours; written reports. The Enlightenment and its background in the seventeenth century. GE credit: ArtHum.

**134A. The Age of Revolution (4)**

Lecture—3 hours; written reports. Ideas and institutions during the French Revolution and the Napoleonic era. GE credit: ArtHum.—I. (I.) Margadant

**135A. History of Science to the 18th Century (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Survey of the historical development of science, technology, and medicine from the ancient world to the eighteenth century, with special emphasis on Isaac Newton as the culmination of the seventeenth century scientific revolution. GE credit: ArtHum.—Cadden, Harkness

**135B. History of Science, 18th to 20th Centuries (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Survey of the historical development of scientific thought in geology, biology, chemistry, physics, and cosmology from the eighteenth to the twentieth century, with special emphasis on emergence of broad explanatory principles that serve more than one science. GE credit: ArtHum.—I. (I.) Harkness

**136. Scientific Revolution (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 135A or 135B recommended. History of science in Western Europe (1400-1750). Investigates the changing definitions of science in the age of Copernicus, Versalius, Harvey, Galileo and Newton. Considers the evolution of new ideas about nature, experiment, observation, and scientific theory. GE credit: ArtHum, Wrt.—III. (III.) Harkness

**138A. Russian History: The Rise of the First Empire, 1500-1881 (4)**

Lecture—3 hours; term paper. Prerequisite: courses 4B and 4C recommended. Expansion of the Russian state in Muscovite and imperial era. Emphasis on autocratic rule, the incorporation of non-Russian peoples, and emergence of Russia as a Great Power. Only two units of credit will be allowed to students who have completed former course 137B. GE credit: ArtHum, Wrt.—II. (II.) Brower

**138B. Russian History: The Russian Revolution, 1880-1917 (4)**

Lecture—3 hours; term paper. Prerequisite: courses 4B and 4C recommended. History of the fall of the Russian Empire and of the Revolution of 1917. Not open for credit to students who have received credit for former course 138. GE credit: ArtHum, Wrt.—I. (I.) Brower

**138C. Russian History: The Rise and Fall of the Soviet Union, 1917 to the Present (4)**

Lecture—3 hours; term paper. Prerequisite: courses 4B and 4C recommended. The emergence of the Soviet Union as a socialist system and a Great Power; the decline and collapse of the Soviet Union and the formation of independent nation states in its place. Not open for credit to students who have completed former course 137C. GE credit: ArtHum, Wrt.—III. (III.) Brower

**139A. Medieval and Renaissance Medicine (4)**

Laboratory/discussion—3 hours; term paper. The history of medicine, circa 1000-1700. Revival of ancient medicine; role of the universities; development of anatomy, chemistry and natural history; ideas about the body; cultural understanding of dis-

ease; hospital and the public health system. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt.—Cadden

**139B. Medicine, Society, and Culture in Modern Europe (4)**

Lecture—2 hours; discussion—1 hour; term paper. History of European medicine, 18th to 20th centuries, by examining the development of medical knowledge in epidemiology and anatomy; function of this knowledge, how it changed with technological breakthroughs and professionalization; and role of medicine in attitudes toward poverty, women, race, disease. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt.—III. (III.) Kudlick

**140. The Rise of Capitalism in Europe (4)**

Lecture—3 hours; term paper. Prerequisite: course 4B or 4C. Comparative analysis of major interpretations of the rise of merchant capitalism during the Middle Ages and Renaissance; European expansion overseas, 1450-1815; the transition to modern capitalism via industrial revolution. Interplay of social, political, cultural, and economic history. Offered in alternate years. GE credit: SocSci.—III. Hagen

**141. France Since 1815 (4)**

Lecture—3 hours; term paper. GE credit: ArtHum, Wrt.—II. (II.) Margadant

**142A. History of the Holocaust (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Topics include comparative genocide, medieval and modern antisemitism, modern German history, the rise of Nazism, Jewish life in Europe before the Nazi period, and the fate of the Jewish communities and other persecuted groups in Europe from 1933-1945. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I. Biale

**142B. The Memory of the Holocaust (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Examination of the literary, philosophical, theological and artistic responses to the Holocaust of the European Jews. Exploration of how memory is constructed, by whom and for what purposes. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Biale

**143. History of Eastern Europe and the Balkans (4)**

Lecture—3 hours; essays. History of the Baltic, Danubian, and Balkan lands since the Middle Ages. National cultures and conflicts in the Polish Commonwealth and the Habsburg and Ottoman Empires; nationalist movements, 1789-1914; the twentieth century, including an analysis of the contemporary scene. GE credit: ArtHum, Div, Wrt.—II. (II.) Hagen

**144A. History of Germany, 1450 to 1789 (4)**

Lecture—3 hours; extensive writing. Survey of early modern Germany, 1450 to 1789, covering the theology and social history of the Reformation, the Peasants War of 1525, religious warfare, state building and absolutism, the rise of Prussia, Austro-Prussian dualism, and the German Enlightenment.—III. (III.) Stuart

**144B. History of Germany since 1789 (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 144A recommended. History of the German lands in the age of the French Revolution; 19th-century liberalism, nationalism, and industrialization; the World Wars, National Socialism, and the Holocaust; east and west Germany in the Cold War; the post-reunification scene. (Not open for credit to students who have completed former course 144.) GE credit: ArtHum, Div, Wrt.—II. (II.) Hagen

**145. War and Revolution in Europe, 1789-1918 (4)**

Lecture—3 hours; term paper. Survey of revolutionary movements, international crises, and wars in Europe from the French Revolution to World War I. GE credit: ArtHum, Wrt.—III. (III.) Margadant

**146A. Europe in the Twentieth Century (4)**

Lecture—3 hours; term paper. Survey of the history of Europe from 1919 to 1939. GE credit: ArtHum, Wrt.—II. (II.) von Henneberg

**146B. Europe in the Twentieth Century (4)**

Lecture—3 hours; term paper. Survey of the history of Europe since 1939. GE credit: ArtHum, Wrt.—III. (III.) von Henneberg

**147A. European Intellectual History, 1800-1870 (4)**

Lecture—3 hours; term paper. European thought in the early industrial era. Shifting cultural frameworks, from romanticism to scientism; liberal and socialist reactions to social change. Focus on the work of Goethe, Hegel, J.S. Mill, Marx, Darwin and Flaubert. GE credit: ArtHum or SocSci, Wrt.—II. (II.) Saler

**147B. European Intellectual History, 1870-1920 (4)**

Lecture—3 hours; term paper. Cultural and intellectual watershed of the late nineteenth and early twentieth centuries. Emergence of modern art and literature; psychoanalysis and the new social sciences. Focus on the work of Baudelaire, Wagner, Nietzsche, Freud, Weber and Kafka. GE credit: ArtHum or SocSci, Wrt.—II. (II.) Saler

**147C. European Intellectual History, 1920-1970 (4)**

Lecture—3 hours; term paper. European thought and culture since World War I. Coverage includes: literature and politics; Communism and Western Marxism; Fascism; Existentialism; Structuralism; Feminism. Particular attention to Lenin, Brecht, Hitler, Sartre, Camus, Beckett, Marcuse, Foucault, Woolf and de Beauvoir. GE credit: ArtHum or SocSci, Div, Wrt.—III. (III.) Saler

**148A. Women and Society in Europe: 1500-1789 (4)**

Lecture—3 hours; term paper. Prerequisite: course 4B recommended. Roles and perceptions of women from the Renaissance to the French Revolution. Emphasis on social and economic factors as well as on discussions of women in the writings of political theorists and social commentators. GE credit: ArtHum, Div, Wrt.—II. (II.) Harkness, Kudlick

**148B. Women and Society in Europe: 1789-1920 (4)**

Lecture—3 hours; term paper. Prerequisite: course 4C and 148A recommended. Roles and perceptions of women from the French Revolution to World War I, primarily in France and England. Emphasis on social and economic developments within a loosely chronological and comparative framework. GE credit: ArtHum, Div, Wrt.—II. (II.) Kudlick

**148C. Women and Society in Europe: 1914-Present (4)**

Lecture—3 hours; term paper. Prerequisite: course 148B recommended. The history of 20th-century Europe from the perspective of women and the family, and of sexual and gender relations. Emphasis on the impact on women of major events and movements, such as World War I, fascism, Soviet communism, World War II, the welfare state, feminism, and mass culture. GE credit: ArtHum, Div, Wrt.—III. (III.)

**149. Comparative Cultural History of Modern Britain and France, 1880-1914 (4)**

Lecture—3 hours; term paper. Cultural comparison of the histories of Britain and France during the fin de siècle. Addresses cultural debates of the period (including gender, race, class) and the practices of cultural history. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—II. Kudlick, Saler

**151A. England: The Middle Ages (4)**

Lecture—3 hours; term paper. Prerequisite: course 4A recommended. Origins of England to the accession of the Lancastrians. Survey includes: impact of Norman Conquest on Anglo-Saxon institutions; rise of the Church, common law, parliament, and the economy; thought, arts, and literature to the age of Chaucer and Wyclif. GE credit: ArtHum, Wrt.—III. (III.)

**151B. England: The Early Modern Centuries (4)**

Lecture—3 hours; term paper. Prerequisite: courses 4A, 4B; course 151A recommended. From Lancaster and York to the Glorious Revolution. Includes growth of the Church of England; beginnings of

modern worldwide economy; rise of the gentry and parliament; thought, arts, and literature in the times of More, Shakespeare, Hobbes, Wren, and Newton. GE credit: ArtHum, Wrt.

**151C. Eighteenth-Century England (4)**

Lecture—3 hours; term paper. English history from the Glorious Revolution to the French Revolution. Examination of the transformation of one of Europe's most politically unstable kingdoms into the firmly established constitutional monarchy which provided an environment fit to engender the industrial revolution. GE credit: ArtHum, Wrt.—I. (I.) Landau

**151D. Industrial England (4)**

Lecture—3 hours; term paper. English history from Waterloo to the Battle of Britain; the rise and continuance of the first industrial nation, examining the transformation of landed to class society, oligarchy to democracy and bureaucracy, Bentham to Bloomsbury, empire to commonwealth. GE credit: ArtHum, Div, Wrt.—Landau

**159. Women and Gender in Latin American History (4)**

Lecture—3 hours; extensive writing. Prerequisite: one course either on Latin America or in women's history in another world area. Roles of women and men in the history of Latin America, with an emphasis on the intersection of gender with racial and class categories. Introduction to the theoretical premises of women's and gender history. GE credit: ArtHum, Div, Wrt.—III. (III.)

**160. Spain and America in the 16th Century (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. The Atlantic world in the 16th century, particularly the transcultural and reciprocal social and economic relations between Spain and America in the course of colonization. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.) Bauer

**161A. History of Colonial Spanish America (4)**

Lecture/discussion—3 hours; term paper. Pre-Columbian civilizations of Middle America and the Andean region (mainly Aztec and Inca); the impact of European conquest and colonization; the formation of a hybrid culture. Extensive use of photographic slides. GE credit: ArtHum, Div, Wrt.—I. (I.) Bauer

**161B. Latin American History (4)**

Lecture/discussion—3 hours; written reports. Evolution of modern Latin America: export economies; oligarchic rule; reform and revolution; the difficulties of the twentieth century. Emphasis on Mexico, Cuba, the Andean region, Chile, and Argentina. Photographic slides. GE credit: ArtHum, Div, Wrt.—II. (II.) Bauer, C. Walker

**162. History of the Andean Region (4)**

Lecture/discussion—3 hours; written and/or oral reports. History of the Andean region, the area that now comprises modern Peru, Bolivia, and Chile, from the beginning of human settlement to the present. GE credit: ArtHum, Div, Wrt.—III. (III.) C. Walker

**163A. History of Brazil (4)**

Lecture—3 hours; written reports. The history of colonial and imperial Brazil from 1500 to 1889. Offered in alternate years. GE credit: ArtHum.—III.

**163B. History of Brazil (4)**

Lecture—3 hours; written reports. The history of the Brazilian republic from 1889 to the present. Offered in alternate years. GE credit: ArtHum.—III.

**164. History of Chile (4)**

Lecture—3 hours; term paper. Prerequisite: course 161A, 161B, 165, or 168 recommended. Emphasis on the history of Chilean political economy from 1930 to the present. Various strategies of development (modernization, Marxism, Neo-Liberalism); the rise of mass politics; the course of foreign relations; and the richness of Chilean literature. Offered in alternate years. GE credit: ArtHum.—III. Bauer

**165. Latin American Social Revolutions (4)**

Lecture—3 hours; written reports. Major social upheavals since 1900 in selected Latin American nations; similarities and differences in cause, course, and consequence. GE credit: ArtHum.—II. (II.) Bauer

**166A. History of Mexico to 1848 (4)**

Lecture/discussion—3 hours; written and/or oral reports. Political, economic, and social development of pre-Columbian, colonial and national Mexico to 1848. Offered in alternate years. GE credit: ArtHum.—(III.) Resendez

**166B. History of Mexico Since 1848 (4)**

Lecture/discussion—3 hours; written and/or oral reports. History of Mexico from 1848 to the present. Offered in alternate years. GE credit: ArtHum.—I. (I.) Resendez

**167. Modern Latin American Cultural and Intellectual History (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Introduction to the cultural and intellectual history of modern Latin America including architecture, cinema, painting, music, and literature. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Walker, Resendez

**168. History of Inter-American Relations (4)**

Lecture—3 hours; written reports. Diplomatic history of Latin America since independence, intra-Latin American relations, relations with the United States, participation in international organizations, and communism in Latin America. GE credit: ArtHum.—III. (III.)

**169A. Mexican-American History (4)**

Lecture/discussion—3 hours; written and/or oral reports. Economic, social, religious, cultural and political development of the Spanish-speaking population of the Southwestern United States from about 1800 to 1910. GE credit: ArtHum, Div, Wrt.—II. (II.) Oropeza

**169B. Mexican-American History (4)**

Lecture/discussion—3 hours; written and/or oral reports. Role of the Mexican and Mexican-American or Chicano in the economy, politics, religion, culture and society of the Southwestern United States since 1910. GE credit: ArtHum, Div, Wrt.—I. (I.)

**170A. Colonial America (4)**

Lecture—3 hours; term paper. Colonial society from 1607 to the American Revolution, with emphasis on European expansion, political, social and economic foundations, colonial thought and culture, and imperial rivalry. GE credit: ArtHum, Div, Wrt.—Smolenski, Taylor

**170B. The American Revolution (4)**

Lecture—3 hours; term paper. Analysis of the Revolutionary epoch with emphasis on the structure of British colonial policy, the rise of revolutionary movements, the War for Independence and its consequences, and the Confederation period. GE credit: ArtHum, Div, Wrt.—Smolenski, Taylor

**170C. The Early National Period, 1789-1815 (4)**

Lecture—3 hours. Political and social history of the American republic from the adoption of the Constitution through the War of 1812 and its consequences. GE credit: ArtHum.—III. (III.) Deyle

**171A. Jacksonian America (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. The political and social history of the United States from the end of the War of 1812 to the Compromise of 1850. How the market revolution transformed American life, and led the nation towards war. GE credit: ArtHum, Div, Wrt.—II. (II.) Deyle

**171B. Civil War and Reconstruction (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Examination of the political and social history of the United States from the Compromise of 1850 to the end of Reconstruction in 1876. Causes of the war, the war itself, and the problems of reconstruction after the war. GE credit: ArtHum, Div, Wrt.—III. (III.) Deyle

**171BF. The Civil War in American Film (1)**

Discussion—1 hour; film viewing. Prerequisite: course 171B concurrently. Viewing and discussion of films with short writing assignments. (P/NP grading only.)—II, III, (III, III.) Deyle

**171D. Selected Themes in 19th Century American History (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Interpretative overview of a single topic in the history of the United States in the 19th century. Sample topics include social history, the 1850s, and southern history. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Wrt.—III.

**172. American Environmental History (4)**

Lecture—3 hours; term paper. Prerequisite: course 17A. Examination of changing relations between people and nature in the area of the current United States from pre-Columbian times to the present. Topics include ecological change; perceptions of nature; social conflicts over “proper” uses of nature; environmental movement. Offered in alternate years. GE credit: ArtHum, Wrt.—III. Warren

**173. Becoming an American: Immigration and American Culture (4)**

Lecture—3 hours; term paper. Prerequisite: course 17B or 72B recommended. An introduction to the wide range of immigrant experiences and cycles of nativism that have shaped American culture in the twentieth century. From novels, memoirs and films, students will explore how external and internal immigration has created a multicultural society. Offered alternate years. GE credit: ArtHum, Div, Wrt.—(III.)

**174A. The Gilded Age and Progressive Era: United States, 1876-1917 (4)**

Lecture—3 hours; term paper. Prerequisite: course 17B. U.S. history and the construction of modern America from the end of Reconstruction to U.S. entry into World War I. Includes Southern redemption, Western incorporation, electoral corruption, labor movements, Populism, Progressivism, women’s suffrage, U.S. imperial expansion, and immigration restriction. Offered in alternate years. GE credit: ArtHum, Wrt.—I.

**174AD. Emergence of Modern America: Discussion (1)**

Discussion—1 hour; short papers. Prerequisite: course 174A concurrently. Intensive discussion of topics and readings for course 174A. (P/NP grading only.)—I. (I.)

**174B. War, Prosperity, and Depression: United States, 1917-1945 (4)**

Lecture—3 hours; term paper. Prerequisite: course 17B. America’s emergence as a world power, the business culture of the 1920s, the New Deal and World War II. Emphasis on such issues as government regulation of the economy, welfare capitalism, and class, racial, ethnic, and gender conflicts. Offered in alternate years. GE credit: ArtHum, Wrt.—II. Olmsted

**174BD. America in War, Prosperity and Depression: Discussion (1)**

Discussion—1 hour; short papers. Prerequisite: course 174B concurrently. Intensive discussion of topics and readings for course 174B. (P/NP grading only.)—II. (II.)

**174C. The United States Since World War II, 1945 to the Present (4)**

Lecture—3 hours; term paper. America’s struggle to respond to new complexities in foreign relations, social tensions, family changes and media. Emphasis on such topics as: Cold War; anticommunist crusade; civil rights, feminist and environmentalist movement; New Left; counterculture; Vietnam; Watergate; and the moral majority. GE credit: ArtHum, Wrt.—III. (III.)

**174CD. The United States Since World War II: Discussion (1)**

Discussion—1 hour; short papers. Prerequisite: course 174C concurrently. Intensive discussion of topics and readings for course 174C. (P/NP grading only.)—III. (III.)

**174D. Selected Themes in 20th Century American History (4)**

Lecture—3 hours; term paper. Prerequisite: course 17B or the equivalent. Interpretive overview of a single topic in the history of the United States in the 20th century with attention to the phases and processes of historical change. May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum.—(II.)

**174DD. Selected Themes in 20th Century American History: Discussion (1)**

Discussion—1 hour; short papers. Prerequisite: course 174D concurrently. Intensive discussion of topics and readings for course 174D. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**175. American Intellectual History (4)**

Lecture—3 hours; term paper. Prerequisite: course 17B and upper division standing. Ideas that have shaped politics and society in the United States from colonial times to the present. Topics include American liberalism, republicanism, democracy, constitutionalism, communitarianism, utopianism, pragmatism, feminism, Darwinism, nationalism, conservatism, and economics. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Rauchway

**176A. Cultural and Social History of the United States (4)**

Lecture—3 hours; term paper. Study of social and cultural forces in American society in the nineteenth century with emphasis on social structure, work and leisure, socialization and the family, social reform movements and changes in cultural values. GE credit: ArtHum.—I. (I.) Halttunen

**176B. Cultural and Social History of the United States (4)**

Lecture—3 hours; term paper. Study of social and cultural forces in American society in the twentieth century with emphasis on social structure, work and leisure, socialization and the family, social reform movements and changes in cultural values. GE credit: ArtHum.—III. (III.) Halttunen

**177A. History of Black People and American Race Relations (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 17A or 17B. History of black people in the United States from the African background to Reconstruction. GE credit: ArtHum, Div, Wrt.—I. (I.) C. Walker

**177B. History of Black People and American Race Relations (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 17A or 17B. History of black people in the United States from the African background to Reconstruction. GE credit: ArtHum, Div, Wrt.—C. Walker

**178A. Race in America, 1492-1865 (4)**

Lecture—4 hours. Prerequisite: course 17A or 17B or 177A or 177B. Racial formation during the Age of Discovery, the Colonial Period, Early National and Antebellum periods up to the Civil War. Not open for credit to students who have completed course 178. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—III. Walker

**178B. Race in America 1865-present (4)**

Lecture/discussion—4 hours. Prerequisite: course 17A or 17B or 177A or 177B. Racial formation in the Post Civil War United States from 1860 to the present. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Walker

**180AN. American Political History, 1789-1896 (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Growth of American politics from the birth of the republic to the end of the nineteenth century. Development of political parties, the expanding electorate, and how social issues such as slavery shaped the political process. Not open for credit to students who have completed course 180A. Offered in alternate years. GE credit: ArtHum, Wrt.—II. Deyle

**180BN. American Political History, 1896-present (4)**

Lecture—3 hours; term paper. Prerequisite: course 17B. Politics in the United States from 1896 to the present. Topics include race and partisan politics; communism and anti-communism; the New Deal and the centralization of government; and the rise of the imperial presidency. Not open for credit to students who have completed course 180A or 180C. GE credit: ArtHum, Wrt.—III. (III.) Rauchway, Olmsted

**181. Religion in American History to 1890 (4)**

Lecture—3 hours; term paper. Prerequisite: course 17A. American religious history from colonization through the Gilded Age. Topics include religious diversity in America; native American religion; Protestant evangelism; gender and religion; religion and bigotry; African American religion; religion in the Civil War; and religion’s response to modernization. Offered in alternate years. GE credit: ArtHum, Wrt.—III. Smoleski

**183A. The Frontier Experience: Trans-Mississippi West (4)**

Lecture—3 hours; written and/or oral reports. The fur trade, western exploration and transportation, the Oregon Country, the Greater Southwest and the Mexican War, the Mormons, mining discovery, and the West during the Civil War. GE credit: ArtHum, Div, Wrt.—I. (I.) Taylor

**183B. The Frontier Experience: Trans-Mississippi West (4)**

Lecture—3 hours; written and/or oral reports. Spread of the mining kingdom, the range cattle industry, Indian-military affairs, settlement of the Great Plains and Rocky Mountain Regions and political organization of the West. GE credit: ArtHum, Div, Wrt.—II. (II.) Warren

**184. History of Sexuality in America (4)**

Lecture—3 hours; extensive writing. History of sexuality in America from pre-European through the late twentieth century. Topics include birth control, marriage, sexual violence, prostitution, inter-racial relationships, homosexuality and homosexuality, the feminist, gay, and lesbian liberation movements, AIDS, commercialization of sexuality. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I. Materson

**185A. History of Science in America (4)**

Lecture—3 hours; research paper. Survey of the European background. Study of American scientific institutions, ideas, personalities, creative processes in science, and of relationships between society and science from colonial times to present. GE credit: ArtHum, Wrt.

**185B. History of Technology in America (4)**

Lecture—3 hours; research paper. Study of American technology, emphasizing biographical approach to historical understanding of technological change, creative processes, institutions, ideas, and relationships between technology and society from colonial times to present. GE credit: ArtHum, Wrt.—Smith

**189. California History (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. California history from the pre-colonial period to the present including dispossession of California’s Indians, political economy of the Spanish and Mexican periods, Gold Rush effects, industrialization, Hollywood, water politics, World War II, Proposition 13, and the emergence of the Silicon Valley. Not open for credit to students who have completed two courses of course 189A, 189B, 189C. GE credit: ArtHum, Wrt.—II. Warren

**190A. Middle Eastern History I: The Rise of Islam, 600-1000 (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 6 recommended. Middle Eastern history from the rise of Islam to the disintegration of the Abbasid Caliphate; the formative centuries of a civilization. Politics and religion, conquest and conversion, arts and sciences, Christians, Jews and Muslims, gender

and sexuality, orthodoxy and heterodoxy. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—I. Tezcan

**190B. Middle Eastern History II: The Age of the Crusades, 1001-1400**

Lecture—3 hours; extensive writing. Prerequisite: course 6 recommended. Middle Eastern history during the age of the Crusades and Mongol invasions. The idea of holy war, the Crusades, the Mongols as the bearers of Chinese arts, nomads and sedentary life, feudalism, mysticism, slavery, women in the medieval Middle East. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—I. Tezcan

**190C. Middle Eastern History III: The Ottomans, 1401-1730 (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 6 recommended. Middle Eastern history from the foundation of the Ottoman Empire on the borderlands of Byzantine Anatolia through its expansion into Europe, Asia, and Africa, creating a new cultural synthesis including the Arab, Greek, Islamic, Mongol, Persian, Slavic, and Turkish traditions. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—II. Tezcan

**191A. Classical China (4)**

Lecture—3 hours; term paper. History of Chinese civilization from its origins through the establishment of city states and the flowering of classical philosophy, to the rise and fall of the First Empire. GE credit: ArtHum, Div, Wrt.—I, II. (I, II.) Price

**191B. High Imperial China (4)**

Lecture—3 hours; term paper. Political disunion and the influx of Buddhism; reunification under the great dynasties of T'ang, Sung, and Ming with analysis of society, culture and thought. GE credit: ArtHum, Div, Wrt.—II. (II.) Bossler

**191C. Late Imperial China (4)**

Lecture—2 hours; discussion—1 hour; two long papers. Prerequisite: course 9A or upper division standing. Patterns and problems of Chinese life traced through the Ming and Ch'ing dynasties (c. 1500-1800), prior to the confrontation with the West in the Opium War. Readings include primary sources and novels portraying elite ethos as well as popular culture. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I. Mann

**191D. Nineteenth Century China: The Empire Confronts the West (4)**

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: course 9A, or upper division standing. The decline and fall of the Chinese Empire, with particular attention to the social and political crises of the 19th century, and the response of government officials, intellectuals, and ordinary people to the increasing pressures of Western imperialism. GE credit: ArtHum, Div, Wrt.—I. (I.) Bossler

**191E. The Chinese Revolution (4)**

Lecture—2 hours; discussion—1 hour; extensive writing. Prerequisite: upper division standing. Analysis of China's cultural and political transformation from Confucian empire into Communist state. Emphasis on emergence and triumph of peasant revolutionary strategy (to 1949), with some attention to its implications for post-revolutionary culture and politics. GE credit: ArtHum, Div, Wrt.—II. (II.) Price

**191F. History of the People's Republic of China (4)**

Lecture—2 hours; discussion—1 hour; extensive writing. Prerequisite: upper division standing. Comprehensive analysis of recent Chinese history, including land reform, the Cultural Revolution, the post-Mao era, and the consequences of the new economic policies of the 1980s. Not open for credit to students who have completed course 190C. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.) Mann

**192. Internship in History (1-12)**

Prerequisite: enrollment dependent on availability of intern positions, with priority to History majors. Supervised internship and study as historian, archivist, curator, or in another history-related capacity, in an approved organization or institution. (P/NP grading only.)

**193A. History of the Modern Middle East, 1750-1914 (4)**

Lecture—3 hours; term paper. Prerequisite: course 6 recommended. Transformation of state and society within the Middle East from 1750 to 1914 under pressure of the changing world economy and European imperialism. Themes include colonialism, Orientalism, Arab intellectual renaissance, Islamic reform, state-formation, role of subaltern groups. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—II. El Shakry

**193B. History of the Modern Middle East from 1914 (4)**

Lecture—3 hours; term paper. Prerequisite: course 6 recommended. The Middle East from the turn of the 20th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, Palestine/Israel, Islamic revival, gender, revolutionary movements, politics of oil and war, cultural modernism, exile and diaspora. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—III. El Shakry

**194A. Aristocratic and Feudal Japan (4)**

Lecture—3 hours; term paper and/or discussion. Broad survey of the cultural, social, religious, and political aspects of Japanese history from mythological times through the sixteenth century emphasizing comparison of the organizations, values, and beliefs associated with the aristocratic and feudal periods. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(II.) Borgen

**194B. Early Modern Japan (4)**

Lecture—3 hours; term paper and/or discussion. Survey of the cultural, social, economic, and political aspects of Japanese history from the seventeenth through the nineteenth centuries emphasizing the development of those patterns of thought and political organization with which Japan met the challenge of the nineteenth-century Western expansionism. GE credit: ArtHum, Div.—I. (I.) Kim

**194C. Modern Japan (4)**

Lecture—3 hours; term paper and/or discussion. Survey of the cultural, social, economic, and political aspects of Japanese history in the twentieth century emphasizing labor and social movements, militarism and the Pacific war, and the emergence of Japan as a major economic power. GE credit: ArtHum, Div.—III. (III.) Kim

**194D. Business and Labor in Modern Japan (4)**

Lecture—3 hours; term paper or papers. Survey of labor and management relations in Japan from the mid-eighteenth century to the present. Offered in alternate years. GE credit: ArtHum.—I.

**194E. Education and Technology in Modern Japan (4)**

Lecture—3 hours; term papers. Survey of education and technology in Japan from the mid-eighteenth century to the present. Offered in alternate years. GE credit: ArtHum.—I.

**195B. History of Modern Korea (4)**

Lecture—3 hours; laboratory/discussion—1 hour. Prerequisite: upper division standing. History of Modern Korea, from Yi dynasty period to 1990s. Political and socioeconomic changes in 19th century, modernization under Japanese colonialism, postwar economic growth and effects of the Cold War. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Kim

**196A. Medieval India (4)**

Lecture—3 hours; discussion—1 hour; written reports. Survey of history of India in the millennium preceding arrival of British in the eighteenth century, focusing on interaction of the civilizations of Hinduism and Islam and on the changing nature of the state. GE credit: ArtHum, Div, Wrt.—I. (I.) Metcalf

**196B. Modern India (4)**

Lecture—3 hours; discussion—1 hour; written reports. Survey of cultural, social, economic, and political aspects of South Asian history from arrival of the British in the eighteenth century to formation of

new independent states—India, Bangladesh, and Pakistan—in the twentieth century. GE credit: SocSci, Div, Wrt.—Metcalf

**197T. Tutoring in History (2)**

Discussion—1 hour; laboratory—3 hours. Prerequisite: enrolled as a History major with senior standing and consent of department chairperson. Tutoring of students in lower division courses. Weekly meeting with instructors in charge of courses. Written reports on methods and materials required. May be repeated once for credit. No final examination. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor; upper division standing. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses**

**201A-L, N, P-Q, S-T, X. Sources and General Literature of History (4)**

Seminar—3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. (A) Ancient; (B) Medieval; (C) Renaissance and Reformation; (D) Early Modern Europe; (E) Europe since 1815; (F) China to 1880; (G) China since 1880; (H) Britain; (I) Latin America since 1810; (J) American History to 1787; (K) United States, 1787-1896 (L) United States since 1896; (N) Modern Japan; (P) African Historiography; (Q) Cross-Cultural Women's History; (S) History of Science and Medicine; (T) Jewish History; (X) World History. May be repeated for credit when different subject area is studied.

**202A-I. Major Issues in Historical Interpretation (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. (A) Ancient; (B) Medieval Europe; (C) Modern Europe; (D) India; (E) Africa; (F) China; (G) Japan; (H) United States; (I) Latin America. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied.—I, II, III. (I, II, III.)

**203A. Research Seminar (4)**

Seminar—3 hours; tutorial—1 hour. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year.—I. Bossler, Haltunen, Hagen

**203B-203C. Research Seminar (4-4)**

Seminar—3 hours; tutorial—1 hour. Prerequisite: course 203A. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. (Deferred grading only, pending completion of sequence.)—II, III. Bossler, Haltunen, Hagen

**204. Historiography (4)**

Seminar—3 hours; term paper. Major issues in the philosophy and methodology of history.—I. (I.)

**221. Medieval History (4)**

Seminar—3 hours. Prerequisite: courses 121A, 121B, 121C recommended. Topics in the history of medieval and early Renaissance Europe.

**245. Modern European History (4)**

Seminar—3 hours. Prerequisite: course 201E. Primary sources and research methodologies in the history of modern France and Germany. May be repeated once for credit.—III. (III.)

**261. Latin American History (4)**

Seminar—3 hours. Prerequisite: two courses in Latin American history; reading knowledge of Spanish or Portuguese.—I, II, III. (I, II, III.) Bauer

**271A-271B. United States History (4-4)**

Seminar—3 hours; term paper. Prerequisite: course 201JL or 202H. Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. (Deferred grading only, pending completion of sequence.)—II,III. (II,III.)

**291A. Chinese History (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Research on topics to be chosen by the students for the purpose of writing article-length papers. May be repeated for credit. (Deferred grading only, pending completion of sequence.)—Price, Mann, Bossler

**291B. Chinese History (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Completion of article-length papers on topics chosen by students. May be repeated for credit. (Deferred grading only, pending completion of sequence.)—Price, Mann, Bossler

**291C. Chinese History (4)**

Seminar—2 hours; tutorial—1 hour. Prerequisite: reading knowledge of Chinese. Readings in Chinese historical materials. Training in the use of Chinese reference works. May be repeated once for credit.—Price, Mann, Bossler

**292. College Teaching Internship (4)**

Internship—4 hours. Prerequisite: course 300 (may be taken concurrently). Student prepares and teaches one lower division history course in a nearby community college under the supervision of a UC Davis instructor and a community college instructor. (S/U grading only.)

**298. Group Study (1-5)****299. Research (1-12)**

(S/U grading only.)

**299D. Individual Study (1-12)**

(S/U grading only.)

**Professional Courses****389. Introductory Seminar for Teaching Assistants (1)**

Seminar—1 hour. Prerequisite: must be enrolled in course 390. An introduction to the broad comparative and theoretical issues of teaching methods and techniques in history. (S/U grading only.)—I, II, III. (I, II, III.)

**390. Teaching History in College (2)**

Discussion—2 hours. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.)—I, II, III. (I, II, III.)

## History and Philosophy of Science

(College of Letters and Science)

Joseph Dumit, Ph.D., Program Director

**Program Office.** 1241 Social Sciences and Humanities Building  
(530) 752-9621

**Committee in Charge**

Thomas Beamish, Ph.D. (*Sociology*)

Joan Cadden, Ph.D. (*History*)

Marisol de la Cadena, Ph.D. (*Anthropology*)

Patrick E. Carroll, Ph.D. (*Sociology*)

Carolyn de la Pena, Ph.D. (*American Studies*)

Joseph Dumit, Ph.D.

(*Anthropology, Science & Technology Studies*)

James Griesemer, Ph.D. (*Philosophy*)

Catherine J. Kudlick, Ph.D. (*History*)

Colin Milburn, Ph.D. (*English*)

Benjamin S. Orlove, Ph.D.

(*Environmental Science and Policy*)

**Minor Program Requirements:**

The interdisciplinary minor in the history and philosophy of science invites students to examine historical and contemporary problems in a variety of scientific disciplines, and to explore concepts and procedures basic to science and how they have evolved. The minor is sponsored by the Program in Science and Technology Studies.

UNITS

**History and Philosophy of Science ..... 24**

Philosophy 30 ..... 4

Five courses from those listed below. One

course must be from each of three areas: (a)

history, (b) philosophy, and (c) science and

technology studies..... 20

(a) History 102, 135A, 135B, 136, 139A,

139B, 185A, 185B, 188A, 188B;

(b) Philosophy 106, 107, 108, 109, 110,

111;

(c) Science and Technology Studies 20,

130A, 130B, 131, 150, 180.

**Minor Adviser:** P. Carroll in 2272 Social Sciences and Humanities Building (530) 752-5388

## Honors Challenge

Lolita Nelson-Adkins, Program Manager

**Program Office.** 167 Kerr Hall  
(530) 752-2335; <http://www.honors.ucdavis.edu>

**The Program of Study**

The Davis Honors Challenge (DHC) is a program for highly motivated students interested in enhancing their education through special courses, closer contact with faculty, and dynamic interaction with academic peers. Interested students apply in the spring quarter for places the following year. First- and second-year students participating in the DHC take two honors courses and one problem oriented interdisciplinary seminar per academic year. Second-year students have the option to substitute an honors contract for an honors course. Third-year students are required to complete two honors contracts and one upper division honors seminar. Fourth-year students participate in a year-long team project. All students who successfully complete the program receive transcript notation for each year of participation.

Lower division departmental Honors courses, special DHC sections of regular courses, DHC seminars, and special studies opportunities constitute the course offerings of the Davis Honors Challenge. A complete list of these courses, with course registration numbers, is made available to admitted students through the Davis Honors Challenge office.

Lower division seminars are offered each year during winter and spring quarters. The seminars are designed to foster critical thinking and analytic interpretation, improve oral and written and technical communication skills, enhance research skills, provide experience with group dynamics and collaborative exploration of problems. Enrollment in each seminar is limited to 20 students. Updated program information is available at our Web site.

Students not admitted to the program may not register for Davis Honors Challenge sections, seminars, or special study opportunities.

**Courses in Davis Honors Challenge (HNR)****Lower Division Courses****90X. Honors Discussion Section (1)**

Discussion—1 hour. Prerequisite: open only to students in the Davis Honors Challenge. Examination of special topics in selected lower division courses through additional readings, discussions, term papers, collaborative work, or special activities, including projects, field and laboratory experiences, computer simulations, creative works. May be repeated for credit.

**92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**94. Honors Seminar (4)**

Seminar—4 hours. Prerequisite: open only to students in the Davis Honors Challenge. Collaborative, multidisciplinary exploration of complex contemporary problem. Focus on critical thinking and analytical interpretation, on oral and written communication, and on the use of electronic media in gathering information. May be repeated for credit. GE credit: Wrt.

**98. Directed Group Study (1-5)**

Discussion—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Independent study—1-5 hours. Prerequisite: student in the Davis Honors Challenge. (P/NP grading only.)

**Upper Division Courses****190X. Honors Contract (1)**

Independent study or discussion—3 hours. Prerequisite: open only to students in the Davis Honors Challenge. In-depth examination of material in an upper division course as defined in an Honors Contract Proposal submitted by the student. Contract must be approved by the instructor and the Honors Council of the Academic Senate. May be repeated for credit.

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

**194. Honors Seminar (3)**

Seminar—3 hours. Open only to students in the Davis Honors Challenge. Team-based work on actual problems drawn from the public or private sector. Focus on critical thinking and analytical interpretation, oral and written communication skills, and development of practical solutions to real-world problems. GE credit: Wrt.—II, III. (II, III.)

**195. Honors Thesis/Honors Project (1-3)**

Independent Study—3-9 hours. Prerequisite: Open only to students in the Davis Honors Challenge. Guided independent study of a selected topic leading to the presentation of an honors thesis/honors project. May be repeated for credit up to 9 units.

**198. Directed Group Study (1-5)**

Discussion—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Independent study—1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

## Horticulture and Agronomy (A Graduate Group)

M. Andrew Walker, Ph.D., Chairperson of the Group

**Group Office.** 1224 Plant and Environmental Sciences Building  
(530) 752-7738; <http://ggha.ucdavis.edu>

**Faculty**

Douglas O. Adams, Ph.D., Associate Professor  
(*Viticulture and Enology*)

Lars W. J. Anderson, Ph.D., Research Leader, USDA  
(*Plant Sciences*)

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

Shane Ball, Ph.D., Cooperative Extension Specialist (*Plant Sciences*)  
 Michael G. Barbour, Ph.D., Professor, *Academic Senate Distinguished Teaching Award* (*Plant Sciences*)  
 Kendra Baumgartner, Ph.D., Lecturer (*Plant Pathology*)  
 Alison M. Berry, Ph.D., Professor (*Plant Sciences*)  
 Arnold J. Bloom, Ph.D., Professor (*Plant Sciences*)  
 Kent J. Bradford, Ph.D., Professor (*Plant Sciences*)  
 Patrick H. Brown, Ph.D., Professor (*Plant Sciences*)  
 David W. Burger, Ph.D., Professor (*Plant Sciences*)  
 Marita Cantwell, Ph.D., Lecturer (*Plant Sciences*)  
 Roger T. Chetelat, Ph.D., Lecturer (*Plant Sciences*)  
 Carlos H. Crisosto, Ph.D., Lecturer (*Plant Sciences*)  
 Abhaya M. Dandekar, Ph.D., Professor (*Plant Sciences*)  
 Theodore M. DeJong, Ph.D., Professor (*Plant Sciences*)  
 Joseph M. DiTomaso, Ph.D., Lecturer (*Plant Sciences*)  
 Jorge Dubcovsky, Ph.D., Professor (*Plant Sciences*)  
 Don J. Durzan, Ph.D., Professor (*Plant Sciences*)  
 Jan Dvorak, Ph.D., Professor (*Plant Sciences*)  
 Richard Y. Evans, Ph.D., Lecturer (*Plant Sciences*)  
 Steven A. Fennimore, Ph.D., Lecturer (*Plant Sciences*)  
 Louise Ferguson, Ph.D., Lecturer (*Plant Sciences*)  
 Matthew W. Fidelibus, Ph.D., Extension Viticulturist (*Viticulture & Enology*)  
 Albert J. Fischer, Ph.D., Associate Professor (*Plant Sciences*)  
 Theodore C. Foin, Jr., Ph.D., Professor (*Plant Sciences*)  
 Mark Francis, M.L.A., Professor (Landscape Architecture)  
 Shu Geng, Ph.D., Professor (*Plant Sciences*)  
 Paul L. Gepts, Ph.D., Professor (*Plant Sciences*)  
 Sham S. Goyal, Ph.D., Lecturer (*Plant Sciences*)  
 Thomas M. Gradziel, Ph.D., Professor (*Plant Sciences*)  
 W. Douglas Gubler, Ph.D., Lecturer (*Plant Pathology*)  
 James A. Harding, Ph.D., Professor (*Plant Sciences*)  
 Timothy K. Hartz, Ph.D., Lecturer (*Plant Sciences*)  
 James E. Hill, Ph.D., Lecturer (*Plant Sciences*)  
 William Horwath, Ph.D., Associate Professor (*Land, Air, and Water Resources*)  
 Leland F. Jackson, Ph.D., Lecturer (*Plant Sciences*)  
 Louise E. Jackson, Ph.D., Professor (*Plant Sciences*)  
 Marie A. Jasieniuk, Ph.D., Assistant Professor (*Plant Sciences*)  
 Judy Jernstedt, Ph.D., Professor (*Plant Sciences*)  
 R. Scott Johnson, Ph.D., Lecturer (*Plant Sciences*)  
 Adel A. Kader, Ph.D., Professor (*Plant Sciences*)  
 Stephen R. Kaffka, Ph.D., Lecturer (*Plant Sciences*)  
 John M. Labavitch, Ph.D., Professor (*Plant Sciences*)  
 Emilio A. Laca, Ph.D., Associate Professor (*Plant Sciences*)  
 Bruce Lampinen, Ph.D., Cooperative Extension Specialist (*Plant Sciences*)  
 W. Thomas Lanini, Ph.D., Lecturer (*Plant Sciences*)  
 J. Heinrich Lieth, Ph.D., Professor (*Plant Sciences*)  
 James D. MacDonald, Ph.D., Professor (*Plant Pathology*)  
 Mark A. Matthews, Ph.D., Professor (*Viticulture and Enology*)  
 Gale McGranahan, Ph.D., Lecturer (*Plant Sciences*)  
 E. Greg McPherson, Ph.D., Lecturer (*Plant Sciences*)  
 Richard W. Michelmore, Ph.D., Professor (*Plant Sciences*)  
 Elizabeth J. Mitcham, Ph.D., Lecturer (*Plant Sciences*)  
 Jeffrey P. Mitchell, Ph.D., Lecturer (*Plant Sciences*)  
 Donald J. Nevins, Ph.D., Professor (*Plant Sciences*)  
 Lorence R. Oki, Ph.D., Lecturer (*Plant Sciences*)  
 Dan E. Parfitt, Ph.D., Lecturer (*Plant Sciences*)  
 Michael P. Parrella, Ph.D., Professor (*Entomology*)  
 Donald A. Phillips, Ph.D., Professor (*Plant Sciences*)  
 Richard E. Plant, Ph.D., Professor (*Plant Sciences*)  
 Vito S. Polito, Ph.D., Professor (*Plant Sciences*)  
 Daniel Potter, Ph.D., Associate Professor (*Plant Sciences*)  
 Daniel H. Putnam, Ph.D., Lecturer (*Plant Sciences*)  
 Carlos F. Quiros, Ph.D., Professor (*Plant Sciences*)  
 Michael S. Reid, Ph.D., Professor (*Plant Sciences*)  
 Kate M. Scow, Ph.D., Professor (*Land, Air, and Water Resources*)  
 Kenneth A. Shackel, Ph.D., Professor (*Plant Sciences*)  
 Douglas V. Shaw, Ph.D., Professor (*Plant Sciences*)

Johan W. Six, Ph.D., Assistant Professor (*Plant Sciences*)  
 David R. Smart, Ph.D., Assistant Professor (*Viticulture and Enology*)  
 Dina St. Clair, Ph.D., Associate Professor (*Plant Sciences*)  
 Trevor V. Suslow, Ph.D., Lecturer (*Plant Sciences*)  
 Kenneth W. Tate, Ph.D., Assistant Rangeland Specialist (*Plant Sciences*)  
 Steve R. Temple, Ph.D., Lecturer (*Plant Sciences*)  
 Larry R. Teuber, Ph.D., Professor (*Plant Sciences*)  
 Allen E. Van Deynze, Ph.D., Biotechnology Specialist (*Plant Sciences*)  
 Mark Van Horn, M.S., Lecturer (*Plant Sciences*)  
 Chris van Kessel, Ph.D., Professor (*Plant Sciences*)  
 Ronald E. Voss, Ph.D., Lecturer (*Plant Sciences*)  
 M. Andrew Walker, Ph.D., Professor (*Viticulture and Enology*)  
 Steve Weinbaum, Ph.D., Professor (*Plant Sciences*)  
 Larry E. Williams, Ph.D., Professor (*Viticulture and Enology*)  
 James A. Wolpert, Ph.D., Cooperative Extension Specialist (*Viticulture and Enology*)  
 John I. Yoder, Ph.D., Professor (*Plant Sciences*)  
 Truman P. Young, Ph.D., Professor (*Plant Sciences*)

**Graduate Study.** The Graduate Group in Horticulture and Agronomy offers programs of study leading to the M.S. degree. The programs provide opportunities for specialized study in the production, management, and utilization of horticultural and agronomic plants and the postharvest handling of horticultural commodities. Options include agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science. Within an option, the student can specialize in one of a number of areas, including agroecology, biotechnology, breeding and crop improvement, crop physiology, crop production, mineral nutrition, modeling and quantitative horticulture, pest management, plant growth and development, postharvest physiology, revegetation/restoration, and water relations. Research may be conducted on an applied or basic problem having a physiological, genetic, or ecological emphasis.

**Preparation.** A level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, physics, statistics, genetics and introductory plant physiology. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail and may be obtained from the Group office.

**Graduate Advisers.** Consult the Group office.

## Courses in Horticulture (HRT)

### Graduate Courses

#### 203. Research Perspectives in Horticulture (3)

Lecture—1 hour; lecture/discussion—2 hours. Prerequisite: Plant Biology 111 and 112, or Environmental Horticulture 102 or the equivalent. Following lectures/discussions of scientific methodology, students develop research proposals aided by classroom discussions and individual interactions with instructors. Lectures and critiques of "classical papers" provide a sense of the evolution of the current concepts in perennial plant biology. Offered in alternate years.—(I.) DeJong

#### 251. Modeling Horticultural Systems (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Plant Biology 142, calculus, or consent of instructor. Development and application of models. Emphasis on physiological and ecological models, with examples from areas of interest to class participants. Applications to horticultural systems.—II. (II.) Lieth

#### 290. Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing at UCD. Seminars presented by invited speakers, students, or faculty on selected topics in horticulture. (S/U grading only).—I. (I.)

## Human Anatomy

See Courses in Cell Biology and Human Anatomy (CHA), on page 354.

## Human and Community Development

(College of Agricultural and Environmental Sciences)

Beth A. Ober, Ph.D., Chairperson of the Department  
 Michael P. Smith, Ph.D., Associate Chairperson of the Department

Community Studies and Development, Human Development and Family Studies, and International Agricultural Development

**Department Advising Office.** 1303 Hart Hall (530) 752-2244, 752-1805; <http://hcd.ucdavis.edu>

### Faculty—Community Studies and Development

Ted Bradshaw, Ph.D., Professor  
 Stephen B. Brush, Ph.D., Professor  
 Luis E. Guarnizo, Ph.D., Associate Professor  
 Frank Hirtz, Ph.D., Associate Professor  
 Martin F. Kenney, Ph.D., Professor  
 William Lacy, Ph.D., Professor  
 Janet Mosen, Ph.D., Professor  
 Michael P. Smith, Ph.D., Professor  
 Miriam J. Wells, Ph.D., Professor

### Emeriti Faculty

Isao Fujimoto, M.A., Lecturer SOE Emeritus  
 Alvin D. Sokolow, Ph.D., Extension Specialist Emeritus

Orville E. Thompson, Ph.D., Professor Emeritus  
 Joan Wright, Ph.D., Extension Specialist Emeritus

### Affiliated Faculty

David Campbell, Ph.D., Associate Extension Specialist  
 Jim Grieshop, Ph.D., Extension Specialist  
 Laurie Lippin, Ph.D., Lecturer  
 Bernadette Tarallo, Ph.D., Lecturer  
 Paul Marcotte, Ph.D., Lecturer  
 Robert Wiener, Ph.D., Lecturer

### Faculty—Human Development and Family Studies

Brenda K. Bryant, Ph.D., Professor  
 Zhe Chen, Ph.D., Professor  
 Katherine Conger, Ph.D., Assistant Professor  
 Rand Conger, Ph.D., Professor  
 Xiaojia Ge, Ph.D., Professor  
 Lawrence V. Harper, Ph.D., Professor  
 Rosemarie Kraft, Ph.D., Lecturer SOE  
 Katherine Masyn, Ph.D., Assistant Professor  
 Lisa Miller, Ph.D., Assistant Professor  
 Adrienne Nishina, Ph.D., Assistant Professor  
 Beth A. Ober, Ph.D., Professor

### Emeriti Faculty

Keith Barton, Ph.D., Professor Emeritus  
 Emmy E. Werner, Ph.D., Professor Emeritus

### Affiliated Faculty

Julie Law, Ph.D., Child Development Demonstration Lecturer  
 Cindy Linhares, Child Development Demonstration Lecturer  
 Ann Mastergeorge, Ph.D., Assistant Adjunct Professor  
 Lenna Ontai-Grzebik, Ph.D., Assistant Extension Specialist  
 Richard Ponzio, Ph.D., Extension Specialist

Janet Thompson, Child Development Demonstration  
Lecturer  
Kelly Twibell, Child Development Demonstration  
Lecturer

## Faculty—International Agricultural Development

Faculty includes members from various departments across colleges.

**Major Programs.** See [Community and Regional Development](#), on page 177, [Human Development](#), on page 303, and [International Agricultural Development \(A Graduate Group\)](#), on page 313.

## Human Development

(College of Agricultural and Environmental Sciences)

**Faculty.** See Department of [Human and Community Development](#), on page 302.

### The Major Program

Human development explores the developmental process in humans throughout the life cycle. Biological, cognitive, and personality/sociocultural aspects of development are studied.

**The Program.** Human development majors complete a group of preparatory courses in anthropology, general biology, genetics, history, philosophy, physiology, psychology, and statistics. Upper division students can design their programs in consultation with a faculty member to emphasize a particular interest. For instance, students can study the social and biological aspects of human development while emphasizing child or adult development.

**Internships and Career Alternatives.** At least one practicum course is required. A second practicum or supervised internship can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in schools, early childhood education or senior centers, hospitals, rehabilitation centers, probation offices, group foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development graduates fill a wide variety of positions in preschools, elementary and special educational settings, programs designed for parents, families, and the elderly, as well as governmental jobs related to social services for people of all ages. Students who emphasize biological aspects of human development can apply to medical school or pursue training for positions in the health sciences. Human development prepares students to pursue advanced degrees in behavioral and social sciences, education, social work, family law, or health sciences.

**Preparatory Requirements.** UC Davis students who wish to change their major to Human Development must complete the following courses with a combined grade point average of at least 2.500. All of the following courses must be taken for a letter grade:

Psychology 1  
Statistics 10 or 13 or Psychology 41 or  
Sociology 46A and 46B  
One course from Anthropology 1, 2 or 15  
One course from Biological Sciences 1A, 10,  
101; Microbiology 10; Molecular and  
Cellular Biology 10; or Neurobiology,  
Physiology, and Behavior 10, 12 or 101

### B.S. Major Requirements:

UNITS

#### English Composition Requirement ..... 12

See College requirement ..... 0-8  
Choose from University Writing Program  
101, 102A, 102B, 102C, 102D, 102E,  
102F, 102G, 104A, 104B, 104C, 104D,  
104E, 104F ..... 4

#### Preparatory Subject Matter.....39-47

One course from: Biological Sciences 1A, 10,  
Microbiology 10, or Neurobiology,  
Physiology, and Behavior 12 .....3-5  
One course from: Molecular and Cellular  
Biology 10 or Biological Sciences 101† ... 4  
One course from: History 17A, 17B, 72A,  
72B, or Political Science 1 ..... 4  
Two courses from Philosophy 5, 30, 31, 32,  
or 38 ..... 8  
One course from Neurobiology, Physiology,  
and Behavior 10, 101, or Psychology  
101 .....4-5  
Psychology 1 ..... 4  
One course from: Psychology 41 or  
Sociology 46A and 46B, or Statistics 10  
or 13 .....4-8

#### Breadth/General Education..... 16-24

Satisfaction of General Education  
requirement ..... 12

#### Depth Subject Matter .....50-55

Human Development 100A, 100B,  
100C ..... 12  
Human Development 120 or 121 ..... 4  
One course from: Biological Sciences 101†,  
Human Development 117, 180, Nutrition  
111 AV, or Psychology 121 .....3-5  
One course from: Human Development 102,  
110, 130, 160, or 162\* ..... 4  
One course from: Human Development 101,  
103, 132, or 163\* ..... 4  
One course from: Human Development  
140-140L, or 141 or 142 or 143\* .....4-6

#### Restricted Electives ..... 19-20

Five additional upper division courses  
chosen from among Human Development  
courses or from a list of restricted electives  
in consultation with faculty adviser. May  
include only one practicum course.

#### Unrestricted Electives .....54-67

#### Total Units for the Degree ..... 180

† Biological Sciences 101 cannot be used to  
satisfy both the Preparatory Subject Matter  
and the Depth Subject Matter Requirements.

\* At least one course from among these  
groupings must focus on childhood/  
adolescence (101, 102, 103, 110, 130,  
132) and one must focus on adulthood/aging  
(117, 143, 160, 162, 163).

**Major Adviser.** L. Harper

### Minor Program Requirements:

The Department of Human and Community Development offers two minors.

UNITS

#### Aging and Adult Development ..... 21-26

Human Development 100C, 117, 143, 160,  
162, or 163 ..... 15-18  
Select two courses from the following: Human  
Development 110, 180; Community and  
Regional Development 173; Psychology 121,  
123, 126, 155; Sociology 127 .....6-8

**Minor Adviser.** C. Aldwin, B. Ober

UNITS

#### Human Development ..... 20

Human Development 100A and 100B..... 8  
Human Development 100C or 110 ..... 4  
Two courses from Human Development 101,  
102, 103, 130, 132, or 163 ..... 8

**Minor Adviser.** B.A. Ober, L.S. Miller

**Related Major Program.** See the major in [Community and Regional Development](#), on page 177.

**Graduate Study.** Graduate study is available through a Master of Science degree in child development, and a Ph.D. degree in human development. See [Child Development \(A Graduate Group\)](#), on page 171 and [Human Development \(A Graduate Group\)](#), on page 305. See also [Graduate Studies](#), on page 97 in this catalog.

## Courses in Human Development (HDE)

Questions pertaining to the following courses should be directed to the instructor or to the Human and Community Development Advising office in 1303 Hart Hall (530) 752-2244.

### Lower Division Courses

#### 12. Human Sexuality (3)

Lecture—3 hours. Vocabulary, structure and function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing and maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction; cultural differences in attitudes towards sexuality. GE credit: Div.—I, II. (I, II) Staff

#### 13. Parenting (4)

Lecture/discussion—4 hours. Provides the basis for understanding the nature of the parenting process. Consideration of aspects of parenting that begin before conception and develop throughout the life of the child and parent. GE credit: SocSci.—Bryant

#### 92. Internship (1-6)

Internship—3-18 hours. Prerequisite: field work experience or at least one course (e.g. course 30, 100A, 100B, 140, 140L) related to the fieldwork assignment; consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

#### 98. Directed Group Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division Courses

#### 100A. Infancy and Early Childhood (4)

Lecture—4 hours. Prerequisite: Psychology 1 or 15, Biological Sciences 1A or 10. Analysis of the biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six.—I, II, IV. (I, II.) Harper, Chen

#### 100B. Middle Childhood and Adolescence (4)

Lecture—4 hours; three brief observations of school-age children. Prerequisite: course 100A or the equivalent; introductory biology. Analysis of the interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence.—II, III. (II, III.) Ge

#### 100C. Adulthood and Aging (4)

Lecture—4 hours. Prerequisite: Psychology 1 or 15. Development during early, middle, and late adulthood; biological, cognitive, and psycho-social aspects of adult development. Emphasis on normative patterns of development which characterize "successful aging."—I, III. Miller, Ober

#### 101. Cognitive Development (4)

Lecture—3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass 1 restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Psychology 141.) GE credit: Wrt.—I, II, III. (I, II, III.) Chen, Goodman, Lagattuta, Rivera

#### 102. Social and Personality Development (4)

Lecture—3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass 1 open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biolog-

ical and social factors. (Same course as Psychology 142.) GE credit: SocSci, Wrt.—I, II, III. (I, II, III.) Conger, Lagattuta, Rivera, Robins

### 103. Cross-Cultural Study of Children (4)

Lecture—4 hours. Prerequisite: course 100A or consent of instructor. Cross-cultural studies of children in developing countries and among minority groups in the U.S. GE credit: Div.—III.

### 110. Contemporary American Family (4)

Lecture—4 hours. Prerequisite: introductory psychology. Factors currently influencing American families including changing economic conditions, changing sex roles, divorce, and parenthood; theories and research on family interaction.—II, III. K. Conger

### 117. Longevity (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of the life span; description of basic demographic techniques including life table methods. (Same course as Entomology 117.) GE credit: SciEng, Wrt.—I. Carey

### 120. Research Methods in Human Development (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 100A or 100B, and Statistics 13 or Education 114 or Psychology 41 or Sociology 46A and 46B. Topics include scientific view of human development; origins of scientific inquiry; research strategies; preparation for conducting research; descriptive statistics and statistical inference (hypothesis testing); statistical analysis and understanding results. Major emphasis on experimentation, collecting data and analyzing results.—I, III. Masyn, Nishina

### 121. Psychological Assessment (4)

Lecture—4 hours. Prerequisite: courses 100A-100B; elementary statistics. Current issues and methodology related to the process of psychological assessment with children.—I. Nishina

### 130. Emotionally Disturbed Children (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 100A and 100B or consent of instructor. Discussion of psychosis, neurosis, behavior disorders, and learning difficulties in children.—I, III. Bryant, Mastergeorge

### 132. Individual and Group Differences in Cognition (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100B or consent of instructor. Neurodevelopmental substrates and educational implications for individual and group differences in cognition which impact learning disabilities, memory, intelligence, genius and creativity. Group differences in cognition as well as individual case studies will be discussed.—II, III. (II, III.) Kraft

### 140. Communication and Interaction with Young Children (2)

Lecture—2 hours. Prerequisite: courses 30, 100A, and 140L (concurrent enrollment recommended). Theory and practice in the area of effective interaction with young children. Humanistic, child-centered approaches; awareness of goals, beliefs, and values as these affect interactions. *To enroll, students must sign up for laboratory time at the Child and Family Studies Center.*—I, II, III. (I, II, III.) Thompson

### 140L. Laboratory in Early Childhood (3-6)

Discussion—3 hours; laboratory—6-15 hours. Prerequisite: course 140 (may be taken concurrently). Application of theories of learning and development to interaction with children six months to five years at Early Childhood Laboratory. Applied skills in communication, discipline and curriculum. May be repeated for credit for a total of 12 units. (P/NP grading only.)—I, II, III. (I, II, III.) Thompson

### 141. Field Studies with Children and Adolescents (4-6)

Discussion—2 hours, field study—6-12 hours. Prerequisite: course 100B or the equivalent and consent of instructor. Study of children's affective, cognitive and social development within the context of family/

school environments, hospitals and foster group homes. May be repeated for credit for a total of 12 units following consultation with and consent of instructor.—I, II, III. Kraft, Ponzio

### 142. Field Studies with Exceptional Children (4-6)

Discussion—1.5 hours; field study—6-12 hours. Prerequisite: consent of instructor and one course from courses 130, 131, or 132 (may be taken concurrently). Field study with children who are identified as developmentally disabled, emotionally distressed, or intellectually gifted. May be repeated for credit for a total of 12 units following consultation with and consent of instructor.—I. Bryant

### 143. Field Studies of the Elderly (4-6)

Discussion—2 hours; field work—6-12 hours. Prerequisite: course 100C or 160 may be taken concurrently. To apply theory and research on adult development and aging, to work with older adults in a variety of settings, and to develop skills relevant to that application. Students will also develop a small research project.—I. Ober

### 160. Social Aspects of Aging (4)

Lecture—4 hours. Prerequisite: course 100C or Psychology 115. How the social context affects adult development and aging. Emphasis on demography, social policy, culture, and adaptation. Oral histories as class projects. Offered in alternate years. GE credit: Div.—II.

### 162. Issues in Aging (3)

Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: course 100C or 160. Research and policy issues concerning the elderly and aging in contemporary society. Offered in alternate years.

### 163. Cognitive Neuropsychology in Adulthood and Aging (4)

Lecture/discussion—4 hours. Prerequisite: Psychology 1; course 100C recommended. Theories, methods, and findings concerning the relationship between cognitive processes and brain functioning. Readings, lectures, and in-class discussions cover research on normal younger and older adults, neuropsychological case studies, and selected patient groups (e.g., amnesia, schizophrenia, Alzheimer's disease). Ober

### 180. Aging and Health (3)

Lecture—3 hours. Prerequisite: upper division standing; course 100C recommended. Changing nature and determinants of health and illness in the older population, including normal aging changes, chronic health problems, and disease prevention. Systems of formal and informal care for the elderly. One field trip required.

### 190C. Introductory Research Conference (1)

Discussion—1 hour. Prerequisite: involvement in ongoing research. Instructors lead discussions with undergraduate students who involve themselves in a research project. Research papers are reviewed and aspects of project proposals developed out of class are presented and evaluated. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship off and on campus, in community, and institutional settings. (P/NP grading only.)

### 198. Directed Group Study (1-5)

(P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

## Graduate Courses

### 200A. Early Development (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing; basic biology or physiology; one upper division course in psychology or a related field; one upper division or graduate course in developmental psychology (may be taken concurrently). Theory and research on the biological, social, cognitive, and cultural aspects of development from conception to the age of five years.—I. Chen, Harper

### 200B. Middle Childhood and Adolescence (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing; basic biology or physiology, and at least two upper division or graduate-level courses in psychology or related fields. Theory and research on biological, cognitive, social, and cultural influences on behavioral development from age five years until late adolescence.—II. Bryant, Ge

### 200C. Development in Adulthood (4)

Lecture/discussion—4 hours. Prerequisite: courses 200A and 200B. Theory and research focusing on social, personality, cognitive, and biological development from early to late adulthood. Emphasis is on theory development and continuity and change.—III. Ober, Miller

### 201. Social-Emotional Development in Infancy (4)

Lecture/discussion—4 hours. Prerequisite: course 200A. Analysis of theory, methods, and research on social-emotional development in infancy. Emphasizes the development of primary and secondary emotions, and the development of attachment. Other possible topics include infant temperament, sex differences, compliance, and self-regulation. Offered in alternate years.

### 203. Adolescent Behavioral and Emotional Development (4)

Lecture/discussion—4 hours. Prerequisite: course 200B. Analysis of recent theories, research methods, and major findings on adolescent behavioral and emotional development, including contextual and genetic influences on adolescence, pubertal transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development. Offered in alternate years. Ge

### 210. Theories of Behavioral Development (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: graduate standing in behavioral sciences. Consideration of enduring issues in theories of behavioral development; analysis of adequacy of major theoretical schools (e.g., social learning, Piagetian) as scientific theories. Offered in alternate years. Harper

### 211. Physiological Correlates of Behavioral Development (3)

Seminar—3 hours. Prerequisite: consent of instructor. An overview of mechanisms of organismic development and the implications of developmental biology for the analysis of behavioral ontogeny; consideration of parallels between processes of organismic development and behavioral development in children and infra-human mammals.—I. Harper

### 212. Adaptation and Aging (3)

Lecture/discussion—3 hours. Prerequisite: course 200C. Interdisciplinary perspective of the ways biological, psychological, and sociocultural factors affect aging and adaptation in late life. Focus is on the ways in which stress, coping, and social support affect health and the factors which contribute to optimal aging. Offered in alternate years.—II.

### 213. Cross-Cultural Study of Children (3)

Lecture—2 hours; discussion—1 hour; field project or paper. Prerequisite: graduate standing in Human Development, Education, Anthropology, Psychology or Sociology. Current theory and research concerned with comparative child development. Introduction into the major issues and methods of cross-cultural research (e.g., biological, cognitive and social development of children in different cultures and subcultures in U.S.A.). Offered in alternate years.

### 217. Development of Cortical and Perceptual Laterality (3)

Seminar—3 hours. Prerequisite: graduate standing in child or human development or consent of instructor. Current theory and research regarding the development of human cortical and perceptual laterality—emphasizing the relationship of this development to thinking and behavior. Offered in alternate years. Kraft

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

**220. Research Methods in Human Growth and Development (4)**

Lecture—4 hours. Prerequisite: Statistics 13 or the equivalent and at least two upper division courses in Human Biology or Developmental Psychology. Overview of qualitative and quantitative approaches to empirical inquiry in the social sciences, with a focus on theory and research methods in biological growth and cognitive and social/emotional development from prenatal period to death.—II. (II.) Masyn

**221. Psychological Assessment of Children (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: course 121 or consent of instructor. Study of children's behavior through examination, analysis and evaluation of perceptual-motor, cognitive, affective and social development. Problems in assessment of exceptional children considered. Assignments focus on preparation of a comprehensive report on one child.

**222. Applied Research and Program Evaluation (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing and consent of instructor. Focuses on the design and conduct of applied research and evaluation studies, especially with regard to programs serving children and their families. Offered in alternate years.—III. Braverman

**231. Issues in Cognitive and Linguistic Development (3)**

Seminar—3 hours. Prerequisite: consent of instructor. Study and evaluation of key issues in the theoretical and empirical literature on cognitive and linguistic development.—III. Kraft

**232. Cognition and Aging (3)**

Lecture/discussion—3 hours. Prerequisite: course 200C. The manner in which cognitive processes are affected by aging as well as an understanding of the changes in the central nervous system occurring with aging. Offered in alternate years. Ober

**234. Children's Learning and Thinking (3)**

Seminar—3 hours. Prerequisite: course 200A or Psychology 212 recommended. Analysis of theories, research methods, and major findings of children's higher order cognition, including origins of knowledge, development of problem solving skills, reasoning strategies, and scientific concepts, with an emphasis on the underlying mechanism involved in children's thinking and learning processes. Offered in alternate years.—III. Chen

**237. Parent-Child Interaction (3)**

Seminar—3 hours. Prerequisite: consent of instructor; upper division course on the family recommended. Current theory and research. Emphasis on parental behavior in other animals and other cultures, childrearing practices, the child's perception of parents, the differential influence of each parent on the child's psychological well-being, sex-role development, and moral development. Offered in alternate years.

**238. The Context of Individual Development (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing in Human Development, Child Development, Education, Psychology, Anthropology, Sociology, or consent of instructor. Analysis of human development within the context of daily life. Contextualizing theories and methods of developmental psychology will be distinguished from contextual theories and methods. Developmental psychology models will be distinguished from child psychology models. Offered in alternate years. Bryant

**242. Adolescent Health Behavior: Theory and Programs (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing in child or human development, or consent of instructor; course 200B recommended. Theoretical conceptions relating to adolescent behaviors that have potential impact on health (e.g., use of tobacco, alcohol and other drugs; sexual behavior; accident prevention). Development and evaluation

of programs that aim to influence adolescents' behaviors or attitudes in these areas. Offered in alternate years.

**290. Seminar (3)**

Seminar—3 hours. Discussion and evaluation of theories, research, and issues in human development. Different topics each quarter.—I, II, III. (I, II, III.)

**290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Research Issues in Human Development (4)**

Seminar—4 hours. Prerequisite: graduate standing in the Behavioral Sciences. In-depth presentations of research issues in particular areas of behavioral development.—I, II. (I, II.) R. Conger, Kraft

**292. Graduate Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor and satisfactory completion of placement relevant courses (for example, Education 213, 216, course 222, 241, 242, Law 272, 273). Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. (S/U grading only.)—I, II, III.

**298. Group Study (1-5)****299. Research (1-12)**

(S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Human Development (A Graduate Group)

Lawrence V. Harper, Ph.D., Group Chairperson

Anthony Urquiza, Ph.D., (*Pediatrics*)  
Karen Watson-Gege, Ph.D., Professor (*Education*)  
Miriam J. Wells, Ph.D., Professor  
(*Human and Community Development*)  
John Werner, Ph.D., Professor (*Ophthalmology, Neurobiology, Physiology, and Behavior*)  
Keith Widaman, Ph.D., Professor (*Psychology*)

**Affiliated Faculty**

Kristin Alexander, Ph.D.  
(*Human and Community Development*)  
Joanne Deocampo, Ph.D., Academic Administrator  
(*Human and Community Development*)  
Ann Driscoll, Ph.D., Researchers  
(*Human and Community Development*)  
Ann Mastergeorge, Ph.D., Assistant Adjunct Professor  
(*Human and Community Development*)  
Lenna Ontai-Grzebik, Ph.D. Assistant Extension  
Specialist (*Human and Community Development*)

**Graduate Study.** The interdisciplinary and inter-departmental Graduate Group in Human Development offers a program of study leading to the Ph.D. degree. The program provides lifespan study of human behavioral development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, to conduct research, and to be actively involved in public service in human behavioral development.

Applicants seeking consideration for admissions and fellowships must submit all materials by January 1.

**Graduate Adviser.** Contact the Group office.

## The Program of Study

The Humanities program offers courses in the Humanities proper and also sponsors the minor in Global and International Studies. Courses in the Humanities proper are interdisciplinary in scope and aim to develop critical thinking and writing skills (most courses fulfill partial or complete GE requirements) in three areas: major authors and texts, major periods, major themes in world culture.

## Courses in Humanities (HUM)

### Lower Division Courses

#### 1. Humanities Forum (2)

Lecture—2 hours. Reading and discussion of a single work representative of a particular culture, historical period, or genre and significant for its ongoing cultural impact in the humanities, sciences, social sciences, technology, and popular arenas. Attention to provocative implications for contemporary society. May be repeated one time for credit if topic differs. GE credit with concurrent enrollment in HUM 1D.—I, II, III. (I, II, III.)

#### 1D. Issues and Concepts in the Humanities (2)

Discussion—2 hours. Prerequisite: course 1 concurrently. Small group discussions and preparation of short papers for course 1. May be repeated once for credit if topic differs. GE credit with concurrent enrollment in course 1: ArtHum, Wrt.

#### 3. Medicine and Humanities (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: completion of Subject A requirement. Evolution of the "medical arts" into the "science of medicine." The culture of medicine in the context of society, medical ethics. GE credit: SocSci, Wrt.—III. Flores-Ortiz

#### 4. Animals and Human Culture (2)

Lecture—2 hours. The meaning of human relations with animals studied across a variety of historical periods and culture and from a variety of humanistic perspectives. Offered in alternate years.—I. Schiesari

#### 4D. Animals and Human Culture Discussion (2)

Discussion—2 hours. Prerequisite: concurrent enrollment in course 4. Small group discussions and preparation of short papers for course 4. Offered in alternate years. GE credit with concurrent enrollment in course 4: ArtHum, Wrt.—I. Schiesari

#### 5. Representation of the Law in Literature and Film (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: completion of Subject A requirement. The relationships among literature, film, and the law, from Greek tragedy to popular American fiction and films. Common themes in law and literature portraying human experience. GE credit: ArtHum or SocSci, Wrt.

#### 6. Wagner and Star Wars (4)

Lecture/discussion—3 hours; extensive writing. Wagner's Ring and Lucas' Star Wars, as examples of 19th and 20th centuries approaches to the arts and their relationship with the society. GE credit: ArtHum or SocSci, Wrt.—Ortiz

#### 7. Travel and Travel Literature (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: Subject A requirement. History of travel from the age of exploration to the modern era. Contemporary trends in travel, including mass tourism, adventure travel, and ecotravel. Social, economic, and cultural issues related to modern trends in travel. Analysis of literary representations of travel. GE credit: ArtHum, Div, Wrt.—II. Van Den Abbeele

#### 8. Introduction to Perspectives on Narrative (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of Subject A requirement. Interdisciplinary approach to the use of story across time, culture, and discipline. How the telling and retelling of particular stories reflect the values, concerns, and assumptions of their original audiences and genres. GE credit: ArtHum or SocSci, Div, Wrt.

#### 9. Don Quixote and the Modern World (2)

Lecture—2 hours. Reading Don Quixote as emblem of modernity in the West. Issues of reality versus illusion, heroism, freedom and self-fulfillment, racial tolerance and love. Don Quixote in other cultural and popular media: film, dance, art, musical drama, and television. Offered in alternate years. GE credit with concurrent enrollment in course 9D: ArtHum, Wrt.—Martin

#### 9D. Don Quixote and the Modern World Discussion (2)

Discussion—2 hours. Prerequisite: course 9 concurrently. Small group discussions and preparation of short papers for course 9. Offered in alternate years.—Martin

#### 11. Shakespeare in Performance (4)

Lecture/discussion—4 hours. Reading, viewing, and discussion of one or two Shakespeare plays with focus on the relationship between text and performance (on stage and on film); analysis of the relationship between presentation of Shakespeare and cultural world view, meaning, and aesthetics. GE credit: ArtHum, Wrt.—Dolan

#### 12. History of the Book (4)

Lecture/discussion—3 hours; extensive writing. The invention and impact of writing systems on cultures, including the invention of paper, the introduction of the codex, illustrations, the book-buying client, and the history of censorship and book burning and their connection to the technology of the word. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt.

#### 13. Witches: Myth and Historical Reality (4)

Lecture—3 hours; extensive writing. This course examines the historical construction of the witch. The four areas covered are: European pagan religions and the spread of christianity; the "Burning" Times" in early modern Europe; 17th-century New England and the Salem witch trials; and fairytales. GE Credit: ArtHum, Div, Wri.—III. (III.) Krimmer

#### 15. Language and Identity (4)

Lecture/discussion—3 hours; extensive writing. Introduction to topics related to the construction of identity through language use, including geographical and social factors affecting language groups. Language ideology affecting linguistic groups, including bilinguals and non-native speakers of English. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Arnett

#### 40. Introduction to Computing in the Humanities (4)

Lecture—3 hours; laboratory—3 hours. Survey of current approaches to use of computers in such fields as language, literature, history, art, music, and drama. Laboratory in text creation and analysis.—Roddy

#### 60. Narrative and Argumentative Approaches to Major Current Issues in the Media, Culture, and Society (4)

Lecture/discussion—3 hours; term paper. Prerequisite: English A or the equivalent. Interdisciplinary approach to contemporary issues (abortion, AIDS, civil rights, war and peace, welfare state) around which individuals, communities and institutions define themselves in American society, by applying principles of narrative theory to the narratives where those issues are embedded. GE credit: ArtHum or SocSci, Div, Wrt.

#### 92. Internship (1-12)

Internship—3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.)

### Upper Division Courses

#### 113. Goethe's Faust (4)

Discussion—3 hours; term paper. Knowledge of German not required. Intensive study of Goethe's Faust in its entirety. Discussions and readings in English; reading the text in the original is encouraged. (Same course as German 113) Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.) Bernd

#### 140. Advanced Computing in the Humanities (4)

Lecture—3 hours; laboratory—3 hours; research project. Prerequisite: course 40 or consent of instructor. The computer as support for the humanities. Topics include advanced textual analysis, editing, vocabulary control, and data base management (design, application and evaluation, and search strategies).

#### 144. Marx, Nietzsche, Freud (4)

Lecture/discussion—3 hours; term paper. Study of major texts of these thinkers, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. Offered in alternate years. GE credit: ArtHum, Wrt.—Finney

#### 145. The Literature of Deviance: Mann, Hesse, Kafka (4)

Lecture—3 hours; term paper. Close study of selected prose works of Mann, Hesse, and Kafka as representative of modernism's fascination with social, sexual, and psychological alienation. Attention to the nuanced portrayal of deviance through formal innovations in fiction. Offered in alternate years.

#### 180. Topics in the Humanities (4)

Lecture/discussion—3 hours; term paper. Analysis of interdisciplinary issues in the Humanities. Topics will vary. May be repeated one time for credit. GE credit: ArtHum, Wrt.

#### 192. Internship (1-12)

Internship—3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.)

#### 198. Directed Group Study (1-4)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-4)

Prerequisite: consent of instructor. (P/NP grading only.)

### Graduate Courses

#### 250. Topics in the Humanities (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the humanities, selected by the instructor. May be repeated once for credit.—I, II, III. (I, II, III.)

#### 292. Graduate Internship (1-15)

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: consent of instructor required. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit up to 15 units. (S/U grading only.)

#### 298. Directed Group Study (1-5)

(S/U grading only.)

#### 299. Individual Research (1-4)

Individual research in the humanities resulting in a formal written research report. (S/U grading only.)

### Professional Course

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. (S/U grading only.)

## Hydrologic Sciences (A Graduate Group)

Mark Grismer, Ph.D., Chairperson of the Group

**Group Office.** 113 Veihmeyer Hall or 1152 Plant and Environmental Sciences Building; (530) 752-1669;

**Faculty**

William Casey, Ph.D., Professor (Chemistry)  
 Randy Dahlgren, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Jeanie Darby, Ph.D., Professor  
 (Civil and Environmental Engineering)  
 Harrison Dunning, LL.B., Professor (School of Law)  
 Graham Fogg, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Timothy Ginn, Ph.D., Professor  
 (Civil and Environmental Engineering)  
 Mark Grismer, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 David Hinton, Professor  
 (Anatomy, Physiology and Cell Biology)  
 Britt Holmen, Assistant Researcher  
 (Crocketer Nuclear Laboratory)  
 Jan Hopmans, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 William Horwath, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Alan Jackman, Ph.D., Professor  
 (Chemical Engineering and Materials Science)  
 Michael Johnson, Ph.D., Director  
 (Aquatic Ecosystem Analysis Laboratory)  
 M. Levent Kavvas, Ph.D., Professor  
 (Civil and Environmental Engineering)  
 Bruce Kutter, Ph.D., Professor  
 (Civil and Environmental Engineering)  
 Bruce Larock, Ph.D., Professor  
 (Civil and Environmental Engineering)  
 Jay Lund, Ph.D., Professor  
 (Civil and Environmental Engineering)  
 Miguel Marino, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Jeffrey Mount, Ph.D., Professor (Geology)  
 Alexandra Navrotsky, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Gregory Pasternack, Ph.D., Associate Professor  
 (Land, Air, and Water Resources)  
 Kyaw Tha Paw U, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Carlos Puente, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Eliska Rejmankova, Ph.D., Professor  
 (Environmental Science and Policy)  
 Paul Sabatier, Ph.D., Professor  
 (Environmental Science and Policy)  
 Geoffrey Schladow, Ph.D., Professor  
 (Civil and Environmental Engineering)  
 Kate Scow, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Susan Ustin, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Wesley Wallender, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Bryan Weare, Ph.D., Professor  
 (Land, Air, and Water Resources)  
 Tom Young, Associate Professor  
 (Civil and Environmental Engineering)  
 Minghua Zhang, Ph.D., Associate Adjunct Professor  
 (Land, Air, and Water Resources)

**Emeriti Faculty**

Charles Goldman, Ph.D., Professor Emeritus  
 Theodore Hsiao, Ph.D., Professor Emeritus  
 Dennis Rolston, Ph.D., Professor Emeritus  
 Roger Shaw, Ph.D., Professor Emeritus  
 Marlyn Shelton, Ph.D., Professor Emeritus  
 Kenneth Tanji, Sc.D., Professor Emeritus  
 Stephen Whitaker, Ph.D., Professor Emeritus

**Affiliated Faculty**

David Goldhamer, Ph.D., Irrigation Specialist  
 (Land, Air, and Water Resources)  
 Stephen Grattan, Ph.D., Water Relations Specialist  
 (Land, Air, and Water Resources)  
 Blaine Hanson, Ph.D., Irrigation Specialist  
 (Land, Air, and Water Resources)  
 Thomas Harter, Ph.D., Cooperative Extension  
 Specialist (Land, Air, and Water Resources)  
 Terry Prichard, M.S., Water Management Specialist  
 (Land, Air, and Water Resources)

Lawrence Schwankl, Ph.D., Irrigation Specialist  
 (Land, Air, and Water Resources)  
 Richard Snyder, Ph.D., Biometeorologist Specialist  
 (Land, Air, and Water Resources)  
 Kenneth Tate, Extension Rangeland Specialist  
 (Agronomy and Range Science)

**Graduate Study.** The Graduate Group in Hydrologic Sciences is an interdisciplinary program offering M.S. and Ph.D. degrees. Course work is available from many programs, including Hydrologic Sciences, Civil and Environmental Engineering, Geology, and Soil Science. Education in the group broadens the skills and knowledge of the physical science or engineering student interested in the occurrence, distribution, circulation and properties of water on earth. Because of water's ubiquity and importance to physical, chemical and biological processes, hydrologic sciences involve the geologic, atmospheric and oceanic sciences, as well as engineering and other applied physical sciences. Basic to the program are core courses in fluid dynamics, hydrologic phenomena, hydrobiology, hydrogeochemistry, hydrologic techniques, and hydrologic policy. Students can pursue specializations in hydrogeology, irrigation and drainage, watershed hydrology and water resources management. The subsurface hydrology specialization includes hydrogeology and vadose-zone hydrology.

**Preparation.** Applicants to the program are expected to have completed or to be completing an undergraduate degree in environmental or physical sciences, mathematics, or engineering. Undergraduate study must include one year each of calculus, of physics with calculus, and of chemistry. A second year of vector calculus, linear algebra and differential equations is recommended and will be required, before completion of graduate work. Additional courses in applied statistics, computer programming, and geology are recommended.

**Specialization.** Each student will pursue an individual program of advanced study under the direction of a group of faculty members with similar interests but diverse backgrounds. Course work in addition to the above is typically taken in the most appropriate departments.

**Graduate Adviser.** Mark E. Grismer (Land, Air, and Water Resources)

**Courses in Hydrologic Sciences (HYD)****Graduate Courses****200. Survey of Hydrologic Sciences (1)**

Seminar—1 hour; term paper. Prerequisite: open to students in the Hydrologic Sciences program. Seminar course exposes students to the diversity of sciences involved in the program. Students prepare a paper and presentation in their area of research interest. May be repeated twice for credit. (S/U grading only.)—I, II, III. (I, II, III.) Grismer

**205. Continuum Mechanics of Natural Systems (4)**

Lecture/discussion—4 hours. Prerequisite: Mathematics 21D and 22B, Physics 9B. Continuum mechanics of static and dynamic air, water, earth and biological systems using hydraulic, heat and electrical conductivity; diffusivity; dispersion; strain; stress; deformation gradient; velocity gradient; stretch and spin tensors. (Same course as Biological Systems Engineering 205.)—I. Wallender

**210. Vadose Zone Transport Processes and Modeling (3)**

Lecture/discussion—3 hours. Prerequisite: Soil Science 107, Mathematics 22B, programming language, or consent of instructor. Principles and modeling of water flow and chemical transport in the vadose zone, with specific applications to soils. Topics include hydraulic properties, finite difference application to unsaturated water flow, parameter optimization, diffusive and convective transport in gaseous and liquid phases. Offered in alternate years.—(III.) Hopmans

**243. Water Resource Planning and Management (3)**

Lecture—3 hours. Prerequisite: course 141 or Civil and Environmental Engineering 142. Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as Biological Systems Engineering 243.)—I. (I.) Marino

**252. Hillslope Geomorphology and Sediment Budgets (4)**

Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmental Engineering 142 or consent of instructor. Exploration of theoretical and empirical foundations of sediment production on hillslopes using computer models and field experiments to promote an understanding of how watersheds evolve naturally and with human impacts. Offered in alternate years.—III. Pasternack

**256. Geomorphology of Estuaries and Deltas (4)**

Lecture—3 hours; fieldwork—3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmental Engineering 42 or consent of instructor. Survey of the processes and landforms associated with sediment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Offered in alternate years.—III. Pasternack

**264. Modeling of Hydrologic Processes (3)**

Lecture—3 hours. Prerequisite: course 141 or the equivalent and Statistics 102 or the equivalent. Techniques used to model the spatio-temporal structure of rainfall and runoff are introduced. Procedures studied include those based on stochastic point processes, chaos theory, fractal geometry, and fractional noises. Offered in alternate years.—(III.) Puente

**269. Numerical Modeling of Groundwater Systems (3)**

Lecture—3 hours. Prerequisite: course 145A or Civil Engineering 144 and course 145B, Mathematics 22B. Finite difference and finite element techniques in modeling groundwater flow and transport. Fundamentals of constructing and calibrating models with hands-on applications. Methods and limitations of numerical solution of transport equations. Model interpretation and ethics.—III. (III.) Fogg

**273. Introduction to Geostatistics (3)**

Lecture—3 hours. Prerequisite: Statistics 130A and 130B, or the equivalent. Statistical treatment of spatial data with emphasis on hydrologic problems. Topics include theory of random functions, variogram analysis, Kriging, co-Kriging, indicator geostatistics, and stochastic simulation of spatial variability. Demonstration and use of interactive geostatistical software included. Offered in alternate years.—I. Fogg

**275. Analysis of Spatial Processes (3)**

Lecture—3 hours. Prerequisite: Statistics 102 or the equivalent; course 273 or Statistics 273A recommended. Characterization of homogeneous random fields; extremes and spectral parameters; geometry of excursions, local averaging; scale of fluctuation; non-Gaussian and irregular random fields; geostatistical applications. Offered in alternate years.—(III.) Puente

**286. Selected Topics in Environmental Remote Sensing (3)**

Discussion—2 hours; lecture—1 hour; project. Prerequisite: Environmental and Resource Sciences 186 or the equivalent; Environmental and Resource Sciences 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. Not offered every year.—Ustin

**290. Seminar in Hydrologic Science (1)**

Seminar—1 hour. Prerequisite: graduate standing and background in Hydrologic Science, consent of instructor. Seminars and critical review of problems,

issues, and research in hydrologic sciences. Oral presentations of research. Topics will vary. May be repeated for credit. (S/U grading only.)—III. (III.)

**298. Group Study (1-5)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**299. Research (1-12)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**Professional Course**

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**Professional Courses**

**410. OSHA HAZWOPER Refresher Course (1)**

Lecture—1 hour. Updates hazardous materials handling information for purposes of keeping certification current. Certification lapses until the refresher course is complete. (P/NP grading only.)—II. (II.) Grismer

**440. Hazardous Waste Operations Training (3)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: upper division standing in College of Agricultural and Environmental Sciences. Forty-hour course designed to meet the requirements of Federal OSHA regulation CFR 1910.120. Covers the health, regulatory, processing and safe handling issues/problems associated with working with hazardous materials. (P/NP grading only.)—III. (III.) Grismer

**Hydrology**

(College of Agricultural and Environmental Sciences)

**Faculty.** See under Department of [Land, Air, and Water Resources](#), on page 320, Hydrology Section.

**The Major Program**

Hydrology is the study of the occurrence, distribution, circulation, and behavior of water and waterborne materials in the environment of Earth. It includes practical measurement and technical analysis of water phenomena underground, on the Earth's surface, and in the atmosphere. Contemporary hydrologic problems costing society \$10-100 billion per year include environmental restoration, sustainability of groundwater and surface water resources, water pollution, and natural disasters such as floods, droughts, landslides, avalanches, and land subsidence. The management of these problems demands hydrologic scientists with the comprehensive, interdisciplinary education embodied in this program. Beyond its societal utility, hydrology can be an exciting science for the curious-minded. Hydrologists explore natural phenomena such as climate change, waterfalls, health of coral reefs, biogeochemical cycles, and aquifers.

**The Program.** A hydrologist needs a strong background across the basic sciences of physics, mathematics, chemistry, and biology. Breadth of understanding comes from exposure to ecology, geology, engineering, policy, and law. Depth of experience is provided by core hydrology courses, internship opportunities, and practical outdoor training. Students choose electives to match their interests and career goals. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

**Internships and Career Alternatives.** Job opportunities in hydrology exceed the available supply of trained hydrologists. Students commonly obtain internships and jobs with state and federal agencies, private consulting firms, environmental interest groups, irrigation districts, and utility companies. Federal agencies hiring hydrologists include the U.S. Geological Survey, U.S. Department of

Agriculture (Fish and Wildlife, Agricultural Research, Forest Service, and National Resource Conservation Service), Environmental Protection Agency, and national research laboratories (Lawrence Livermore National Laboratory, Oak Ridge National Laboratory). State and local agency employers include California's Departments of Water Resources, Conservation, Fish and Game, and Toxic Substances as well as the Water Resources Control Board and Regional Water Quality Control Boards. To obtain higher levels of responsibility and salary, hydrologists often seek advanced degrees, and the hydrology major is designed to provide students with a highly competitive education to get into graduate school.

**B.S. Major Requirements:**

**Written/Oral Expression**..... UNITS  
**0-8**

See College requirement.

**Preparatory Subject Matter** ..... **67**

- Biological Sciences 1A, 1C..... 10
- Chemistry 2A, 2B, 2C..... 15
- Physics 9A, 9B..... 8
- Mathematics 21A, 21B, 21C, 21D, 22A, 22B..... 22
- Geology 50, 50L..... 5
- Hydrologic Science 10..... 3
- Engineering 6 or the equivalent..... 4

**Breadth/General Education** ..... **18-24**

**Depth Subject Matter** ..... **46-53**

- Engineering 103 or the equivalent..... 4
- Civil and Environmental Engineering 114 or Statistics 130A and 130B..... 4-6
- Hydrologic Science 134, 141, 142, 144, 151..... 21
- Soil Science 107..... 5
- Select one of Hydrologic Science 150, Agricultural and Resource Economics 147, Environmental Science and Policy 161, 166..... 3-4
- Select three of Hydrologic Science 110, 115, 124, 143, 146; Civil and Environmental Engineering 141 and 141L..... 9-13

**Restricted Electives** ..... **16-26**

To supplement or expand areas of student interest selected with approval of adviser

**Unrestricted Electives** ..... **6-20**

Including units earned from 192 and 199 courses

**Total Units for the Degree** ..... **180**

**Major Adviser.** Greg Pasternak ([Land, Air, and Water Resources](#))

**Minor Program Requirements:**

The Hydrology Section of the Department of Land, Air, and Water Resources offers the minor in Hydrology for environmental or natural science students who have an interest in water/environmental issues. The interested student should have completed preparatory course work in calculus (Mathematics 16B), chemistry (Chemistry 2A; Chemistry 2B recommended), physics (Physics 5A), and biology (Biological Sciences 1A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.

UNITS  
**Hydrology**..... **19-24**

- Engineering 103 and Hydrologic Science 141; or Environmental and Resource Sciences 100 and 100L..... 8-10
- Hydrologic Science 144 and Soil Science 107..... 8
- Environmental and Resource Sciences 136 or Hydrologic Science 134..... 3-6

**Graduate Study.** See [Hydrologic Sciences \(A Graduate Group\)](#), on page 306.

**Courses in Hydrologic Science (HYD)**

Questions pertaining to the following courses should be directed to the instructor or to the Resource Sciences Teaching Center in 113 Veihmeyer Hall or in 1152 Plant and Environmental Sciences Building, (530) 752-1669.

**Lower Division Courses**

**10. Water and Power and Society (3)**

Lecture—2 hours; discussion—1 hour. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as Science and Society 10.) GE credit: SciEng, SocSci, Wrt.—III. (III.) Fogg

**47. Watershed Processes and Water Quality in the Tahoe Basin (2)**

Lecture/laboratory—21 hours; fieldwork—9 hours; discussion—3 hours; term paper. Prerequisite: basic knowledge of environmental, soil, or hydrologic sciences. Course involves 3 days of instruction in Tahoe City. Watershed processes, runoff water quality management, and restoration in the Lake Tahoe Basin. Soils, precipitation-runoff, revegetation and adaptive management related to erosion control, effective solutions, and development of restoration strategies. Students develop and initiate field restoration. (Same course as Environmental and Resource Sciences 47.)—Grismer

**92. Hydrologic Science Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division student, consent of instructor. Work experience off and on campus in Hydrologic Science. Internship supervised by a member of the faculty. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**103N. Fluid Mechanics Fundamentals (4)**

Lecture—4 hours. Prerequisite: Physics 9B. Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as Biological Systems Engineering 103.)—I. Wallender

**110. Irrigation Principles and Practices (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Physics 5A; Soil Science 100 recommended. General course for agricultural and engineering students dealing with soil and plant aspects of irrigation and drainage. Soil-water movement and storage, plant responses to irrigation regimes, water use by crops; procedures for determining frequency and depth of irrigation, drainage. Not open for credit to students who have completed Water Science 110.—III. (III.) Schawankl, Grattan, Goldhamer

**115. Irrigation and Drainage Systems (4)**

Lecture—4 hours. Prerequisite: Engineering 103A or course 103. Engineering and scientific principles applied to the design of surface, sprinkle and micro irrigation systems and drainage systems within economic, biological, and environmental constraints. Interaction between irrigation and drainage will be emphasized. Not open for credit to students who have completed Water Science 145. (Same course as Biological Systems Engineering 145.)—II. (II.) Wallender, Grismer, Hills

**122. Biology of Running Waters (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: introductory course in biology and junior standing. The study of lotic aquatic animals and plants in relation to their environment; various factors affecting the distribution of freshwater plants and animals is emphasized in a manner particularly suitable for students of freshwater ecology, soil and water science,

and renewable natural resources. Not open for credit to students who have completed Water Science 122.—I. (I.)

### 122L. Biology of Running Waters Laboratory (2)

Laboratory—2 hours (including 2 or 3 weekend field trips). Prerequisite: introductory course in biology or consent of instructor and junior standing; course 122 (concurrently). Course allows interested students to obtain experience in sampling, processing, and synthesizing field data. Field trips will allow students to obtain an understanding of the structure and function of stream ecosystems. Not open for credit to students who have completed Water Science 122L.—I. (I.)

### 124. Plant-Water-Soil Relationships (4)

Lecture—3 hours; discussion—2 hours. Prerequisite: course 100; Soil Science 100 recommended, and one additional course in botany or plant physiology; or consent of instructor. Principles of plant interactions with soil and water environments and their applications in crop and environmental management. Includes nutrient and water uptake and transport; transpiration; soil processes affecting supplies; deficiencies and plant responses. Not open for credit to students who have completed Water Science 104.—III. (III.) Shackel

### 134. Aqueous Geochemistry (6)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 2B. The chemistry of natural waters; dielectric properties of water; thermodynamic and mass-action relations; metal hydrolysis; acid-base equilibria; metal-coordination chemistry; solubility calculations; electron-exchange reactions; and rate laws.—III. (III.) Hernes

### 141. Physical Hydrology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physics 9B, Mathematics 21B; course 100 recommended. Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quantitative description of the following processes: precipitation, infiltration, evaporation, transpiration, surface runoff, and groundwater runoff.—I. (I.) Puente

### 142. Systems Hydrology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 141 or Civil and Environmental Engineering 142. General course considering hydrologic processes from a systems or statistical model perspective. General probability concepts are applied to frequency, time series and spatial data analysis. Linear systems are also considered in conjunction with Kalman filter techniques.—II. (II.) Puente

### 143. Hydrological Processes in Ecosystems (3)

Lecture—3 hours. Prerequisite: course 141 or Environmental and Resource Science 100. Movement and storage of water are integral parts of landscape and ecosystem functioning. Hydrological processes in individual ecosystems and the role of water linking the myriad components of the landscape.—(I.) Pasternack

### 144. Groundwater Hydrology (4)

Lecture—4 hours. Prerequisite: Mathematics 16B or 21A; course 103 or Engineering 103 recommended. Fundamentals of groundwater flow and contaminant hydrology. Occurrence, distribution, and movement of groundwater. Well-flow systems. Aquifer tests. Well construction operation and maintenance. Groundwater exploration and quality assessment. Agricultural threats to groundwater quality: fertilizers, pesticides, and salts. Same course as Hydrologic Science 144.—I. (I.) Marino

### 146. Hydrogeology and Contaminant Transport (5)

Lecture—3 hours; laboratory—2 hours; term paper. Prerequisite: course 144 or Civil and Environmental Engineering 144 or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic examples. Groundwater geology and chemistry. Fundamentals of groundwater flow and

transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as Geology 156.)—II. Fogg

### 147. Runoff, Erosion and Water Quality Management in the Tahoe Basin (3)

Lecture/laboratory—30 hours; fieldwork—15 hours; discussion—10 hours; term paper. Prerequisite: Physics 7B or 9B, Mathematics 16C or 21C, Civil and Environmental Engineering 142 or course 141 or Environmental and Resource Sciences 100. 5 days of instruction in Tahoe City. Practical hydrology and runoff water quality management from Tahoe Basin slopes. Development of hillslope and riparian restoration concepts, modeling and applications from physical science perspectives including precipitation-runoff relationships, sediment transport, and detention ponds. (Same course as Biological Systems Engineering 147.)—Grismer

### 150. Water Law (3)

Lecture—3 hours. Prerequisite: Environmental and Resource Sciences 100 or 121 or consent of instructor. Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal/state relations. Basic water quality acts, endangered species act, water transfers and current water issues.—II.

### 151. Field Methods in Hydrology (4)

Lecture—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Environmental and Resource Sciences 100 or course 141. Measurement methods and data analysis for evaluation of water storage, movement and contamination in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used.—II. (II.) Pasternack

### 182. Environmental Analysis using GIS (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: Applied Biological Systems Technology 180 or the equivalent GIS experience and skills; general biology and/or ecology courses recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. (Same course as Applied Biological Systems Technology 182.) Offered in alternate years.—III. Zhang

### 192. Hydrologic Science Internship (1-12)

Internship—3-40 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in water science. Internship supervised by a member of the faculty. (P/NP grading only.)

### 198. Directed Group Study (1-5)

(P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: senior standing. (P/NP grading only.)

## Immunology (A Graduate Group)

Hilary P. Benton, Ph.D., Chairperson of the Group  
**Group Office.** 1321 Haring Hall  
 (530) 752-8551

### Faculty

Kristina Abel, Ph.D., Assistant Researcher  
*(California National Primate Research Centre)*  
 Paul Ashwood, Ph.D., Assistant Professor  
*(Medical Microbiology, and Immunology)*  
 Nicole Baumgarth, D.V.M., Ph.D., Assistant Professor  
*(Pathology, Microbiology, and Immunology)*  
 Andreas Baumler, Ph.D., Professor  
*(Medical Microbiology, and Immunology)*

Hilary Benton, Ph.D., Associate Professor  
*(Anatomy, Physiology and Cell Biology)*  
 Charles Bevins, M.D., Ph.D., Professor  
*(Medical Microbiology, and Immunology)*  
 Christopher L. Bowlus, M.D., Assistant Professor  
*(Gastroenterology)*  
 Anthony T. W. Cheung, Ph.D., Professor  
*(Pathology)*  
 Kiho Cho, Ph.D., Assistant Adjunct Professor  
*(Surgery)*  
 Satya Dandekar, Ph.D., Professor  
*(Medical Microbiology, and Immunology)*  
 Kent L. Erickson, Ph.D., Professor  
*(Cell Biology and Human Anatomy)*  
 Ursula Esser, Ph.D., Assistant Adjunct Professor  
*(Pathology)*  
 Laurel J. Gershwin, D.V.M., Ph.D., Professor  
*(Pathology, Microbiology, and Immunology)*  
 M. Eric Gershwin, M.D., Professor  
*(Rheumatology, Allergy and Clinical Immunology)*  
 Tzipora Goldkorn, Ph.D., Professor  
*(Pulmonary and Critical Care Medicine)*  
 Daniel Hwang, Ph.D., Adjunct Professor  
*(Nutrition)*  
 Kirk C. Klasing, Ph.D., Professor  
*(Animal Science)*  
 Kit S. Lam, M.D., Ph.D., Professor  
*(Hematology and Oncology)*  
 Patrick S.C. Leung, Associate Adjunct Professor  
*(Rheumatology, Allergy and Clinical Immunology)*  
 Fu-Tong Liu, M.D., Ph.D., Professor  
*(Dermatology)*  
 Grace A. Loreda, Assistant Adjunct Professor  
*(Sacramento VA Medical Center)*  
 Shirley Luckhart, Ph.D., Associate Professor  
*(Medical Microbiology, and Immunology)*  
 Melinda H. MacDonald, D.V.M., Ph.D., Assistant Professor  
*(Surgical and Radiological Sciences)*  
 Lisa Miller, Ph.D., Assistant Researcher  
*(Anatomy, Physiology and Cell Biology)*  
 Robert T. O'Donnell, M.D., Ph.D., Assistant Professor  
*(Hematology and Oncology)*  
 Kent E. Pinkerton, Ph.D., Professor-In-Residence  
*(Anatomy, Physiology and Cell Biology)*  
 Subhadip Raychaudhuri, Ph.D., Assistant Professor  
*(Biomedical Engineering)*  
 Gary Rhodes, Ph.D., Associate Adjunct Professor  
*(Pathology)*  
 Dick L. Robbins, M.D., Professor  
*(Rheumatology, Allergy and Clinical Immunology)*  
 Grace L. Rosenquist, Ph.D., Assistant Adjunct Professor  
*(Neurobiology, Physiology, and Behavior)*  
 Barbara Shacklett, Ph.D., Assistant Professor  
*(Medical Microbiology, and Immunology)*  
 Scott I. Simon, Ph.D., Professor  
*(Biomedical Engineering)*  
 Ellen E. Sparger, D.V.M., Ph.D., Associate Adjunct Professor  
*(Medicine and Epidemiology)*  
 Charles B. Stephensen, Ph.D., Associate Adjunct Professor  
*(Nutrition)*  
 Jeffrey L. Stott, Ph.D., Professor  
*(Pathology, Microbiology, and Immunology)*  
 Yoshikazu S. Takada, M.D., Ph.D., Professor  
*(Dermatology)*  
 Suzanne S. Teuber, M.D., Associate Professor  
*(Rheumatology, Allergy and Clinical Immunology)*  
 Jose V. Torres, Ph.D., Professor  
*(Medical Microbiology, and Immunology)*  
 Alfonso Tramontano, Ph.D., Adjunct Professor  
*(Nephrology)*  
 Renee M. Tsois, Ph.D., Assistant Professor  
*(Medical Microbiology, and Immunology)*  
 Joseph M. Tuscano, M.D., Associate Professor  
*(Hematology and Oncology)*  
 Judy Van de Water, Ph.D., Associate Adjunct Professor  
*(Rheumatology, Allergy and Clinical Immunology)*  
 Robert H. Weiss, M.D., Associate Professor  
*(Nephrology)*  
 Jean Wiedeman, Associate Professor  
*(Pediatrics)*  
 Reen Wu, Ph.D., Professor  
*(Anatomy, Physiology and Cell Biology)*  
 Heike Wulff, Ph.D., Assistant Professor  
*(Pharmacology)*  
 Tilahun D. Yilma, D.V.M., Ph.D., Professor  
*(Pathology, Microbiology, and Immunology)*

**Graduate Study.** The Graduate Group in Immunology is a multidisciplinary group offering programs of study leading to the M.S. and Ph.D. degrees in various aspects of immunology. Possible

areas of specialization include molecular immunology, immunochemistry, immunogenetics, cellular immunology, clinical immunology, tumor and developmental immunology, arthritis and inflammation, auto-immunity and virology.

**Preparation.** Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry, biochemistry, molecular and cellular biology or related biological and medical sciences.

For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (a) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (b) zoological specialties (cell biology, endocrinology, embryology, protozoology, histology, cytology, physiology); (c) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (d) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (e) genetic specialties (developmental genetics, population genetics, cytogenetics, molecular genetics).

**Graduate Adviser.** Contact the Group office.

### Courses in Immunology (IMM)

Additional courses are available and listed under the individual sponsoring departments. Contact the Group office for information.

### Graduate Courses

#### 201. Introductory Immunology (4)

Lecture—4 hours. Prerequisite: graduate standing. Comprehensive introduction to the principles of immunology. Limited enrollment. — I. (I.) Miller

#### 292. Immunotoxicology Seminar (2)

Seminar—2 hours. Prerequisite: graduate standing in Pharmacology/Toxicology, Immunology, Physiology, or Biochemistry. Seminar presentations dealing with principles of xenobiotic effects on immune system functions and specific examples of drugs and environmental chemicals exerting toxic effects on the immune system. Offered in alternate years. (S/U grading only.)—I. Golub

#### 293. Current Concepts in Immunology (4)

Lecture/discussion—4 hours. Prerequisite: Pathology, Microbiology, and Immunology 126 or consent of instructor. Innate and acquired immunity as defense mechanisms against disease. Mechanisms regulating the distinct cell types driving these responses and current concepts in the literature.—II. Baumgarth

#### 294. Comparative Clinical Immunology (4)

Lecture/discussion—4 hours. Prerequisite: Pathology, Microbiology, and Immunology 126 or consent of instructor. Clinical immunology in animals and man. Pathogenesis of representative infectious diseases, hypersensitive reactions, and autoimmunity. Emphasis on specific and nonspecific immune effector mechanisms to combat infections or mediate pathology. Not open for credit to students who have completed course 294A. Offered in alternate years.—Abel

#### 295. Cytokines (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 293 or consent of instructor. Cytokines and their involvement in human and animal physiology/disease, molecular mechanisms and receptor signaling. Immune and non-immune actions. Overlapping/redundant functions (referred to as the "cytokine network").—III. Benton

#### 296. Advanced Topics in Immunology (2)

Seminar—2 hours. Prerequisite: graduate standing or consent of instructor. Presentation, discussion, and analysis of faculty research topics in immunology. Required for Immunology Graduate Students every year until they have passed their qualifying exam. May be repeated for credit. (S/U grading only.)—I. (I.) Esser

## Independent Study Program

**Information.** Chairperson, Committee on Courses of Instruction, c/o Academic Senate Office (530) 752-2220

The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest.

A program qualifying as Independent Study will consist of one or more courses in the 190–199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.

The procedure for enrolling in an Independent Study Program is as follows:

1. Develop, in general terms, a plan of study;
2. Locate a faculty sponsor or panel of sponsors and with their help and approval develop a detailed plan;
3. Complete a project proposal form (obtained from the Academic Senate office) and submit it to the Academic Senate Committee on Courses of Instruction.

The deadline for applications is the tenth day of instruction of the term before; see the [Academic Calendar, on page 1](#), for specific dates.

You must report the completion or termination of the project to the Committee on Courses of Instruction.

## Individual Major

(College of Agricultural and Environmental Sciences, College of Biological Sciences, and College of Letters and Science)

### The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by faculty advisers and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

### College of Agricultural and Environmental Sciences

**Program Office.** 150 Mrak Hall (530) 752-4491

**Student Proposal.** An Individual Major may be organized by a student having a specific academic interest not represented by an established major. Each student wishing an Individual Major should submit a proposal to the Dean at least four quarters before graduation, for review by the Individual Major Subcommittee. This proposal must include (1) an essay describing the special educational aims of the student, including a statement indicating why the educational objectives cannot be met by existing majors; (2) a list of planned courses; and (3) faculty adviser recommendations. It is critical that students contact a college counselor for consultation and development of the proposal.

UNITS

**English Composition requirement..... 4-8**

See College requirement.

### Preparatory Subject Matter..... (variable)

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

### Breadth/General Education..... 18-24

Satisfaction of General Education requirement

### Depth Subject Matter ..... 45-54

Upper division course work must include:  
(a) interrelated courses of 45 upper division units from two or more areas of study;  
(b) at least one of the two or more areas of study must be within the College of Agricultural and Environmental Sciences;  
(c) at least 30 of the 45 upper division units that are required in the program must be taken from courses provided by the College of Agricultural and Environmental Sciences.

### Unrestricted Electives ..... (variable)

### Total Units for the Degree ..... 180

**Master Adviser.** Thomas Gordon, Ph.D. (*Plant Pathology*)

### College of Biological Sciences

**Program Office.** 202 Life Sciences (530) 752-0410

**Student Proposal.** A student who wishes to propose an individual major must submit the proposal to the Committee on Undergraduate Student Petitions prior to reaching 120 units. It is important for the student to make arrangements to speak with a counselor in the college early in the development of his/her major as no individual major will be approved after a student has completed 120 units.

### A.B. and B.S. Major Requirements: UNITS

#### Preparatory Subject Matter..... (variable)

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements as determined by the Committee on Undergraduate Student Petitions.

#### Depth Subject Matter .... 45 units minimum

Upper division course work must include:  
(a) at least 30 units from courses offered by sections in the College of Biological Sciences;  
(b) additional requirements as determined by the Committee on Undergraduate Student Petitions. See the Dean's Office for details.  
(c) for the B.A. degree, a maximum of 80 units toward the major; for the B.S. degree, a maximum of 110 units toward the major.

#### All University, General Education, and College of Biological Sciences Bachelor's degree requirements.....(variable)

#### Total Units for the Degree ..... 180

#### Principal Adviser (selected by student).

A faculty member in a section or program in the College of Biological Sciences.

### College of Letters and Science

**Program Office.** 200 Social Sciences and Humanities Building (Dean's office)  
<http://www.ls.ucdavis.edu/students>

### Committee in Charge

JoAnn Cannon, Ph.D., Chairperson  
(*French and Italian*)  
Yuri Druzhnikov, Ph.D. (*Russian*)  
Gail S. Goodman, Ph.D. (*Psychology*)  
Jeanette Natzle, Ph.D.  
(*Molecular and Cellular Biology*)  
G. Thomas Sallee, Ph.D. (*Mathematics*)  
Raymond Waddington, Ph.D. (*English*)

**Student Proposal.** A student who wishes to propose an individual major must submit the proposal to the Faculty Committee on Individual Majors in the College of Letters and Science prior to reaching 120 units. The proposal must be submitted by the end of the fourth week of the quarter. This proposal will consist of (1) an essay, identifying the specific educa-

tional and professional objectives, including an indication of why the objectives cannot be met within existing majors, (2) a list of courses planned to complete the major, and (3) faculty adviser recommendations. The proposal will be reviewed and a decision provided the quarter of submittal. It is important for you to make arrangements to speak with a counselor in the college early in the development of your major.

### A.B. and B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter..... (variable)

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

#### Depth Subject Matter ..... 45-54

Upper division units must include:

- interrelated and complementary courses from two or more departments which provide a unified pattern and focus;
- at least 30 units from Letters and Science teaching departments or programs;
- no more than 10 units in courses numbered 194H, 198 and 199;
- for the A.B. degree, a maximum of 80 units toward the major; for the B.S. degree, a maximum of 110 units toward the major.

#### Total Units for Degree ..... 180

**Major Advisers (selected by student).** Principal Adviser: a faculty member in a teaching department or program in the College of Letters and Science in major field of emphasis. Secondary Adviser: a faculty member from secondary area of interest.

**Honors Program.** By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see College section), may petition the Individual Majors Committee for tentative acceptance into an honors program.

Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty adviser. The prospectus must be presented to the Committee by the end of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to 3 units of independent study in the program during each of two quarters in the senior year as course options.

## Integrated Pest Management (A Graduate Group)

Howard Ferris, Ph.D., Chairperson of the Group

**Group Office.** 367 Briggs Hall (530) 752-0475

**Faculty.** Includes faculty members from the Colleges of Agricultural and Environmental Sciences and Letters and Science.

**Graduate Study.** The Graduate Group in Integrated Pest Management offers programs of study and research leading to the M.S. degree. Students may conduct independent research or participate in on-going projects on integrated crop management and sustainable agriculture. Weeds, insects, plant pathogens, nematodes, rodents, and other pests are treated as parts of complex ecosystems and not as isolated problems. Courses include concepts and systems of plant protection and pest management, diagnosis and control of plant pest problems, toxicology and legal ramifications, and equipment for pest

control operations. Detailed information can be obtained from the Group Chairperson and the application for Graduate Admission and Fellowship.

**Graduate Adviser.** Jay Rosenheim (*Entomology*)

### Courses in Integrated Pest Management (IPM)

#### Graduate Courses

#### 201. Concepts and Systems of Plant Protection and Pest Management (4)

Lecture—2 hours; discussion—1 hour; laboratory—2 hours. Prerequisite: Agricultural Systems and Environment 120, Entomology 110, Plant Pathology 120, Plant Biology 120 (may be taken concurrently), Nematology 100; Plant Biology 117 or Evolution and Ecology 101 recommended. Ecological perspectives of agricultural systems, the role of pests and pest management in these systems, and the monitoring and modeling of the systems. Offered in alternate years.—(II.)

#### 202A-202B. Diagnosis of Plant Pest Problems and the Control of Causal Agents (4-4)

Discussion—1 hour; fieldwork—9 hours. Prerequisite: Entomology 110, Plant Pathology 120, Plant Biology 120, Nematology 100 (may be taken concurrently). Problems and assessment of losses caused by in-sects, pathogens, weeds, nematodes, and other pests. Methods of determining infestation levels and establishing economic thresholds, and control of these pests with emphasis on integration of available management practices into programs.—(III.) (I-III.) Rosenheim

#### 290. Seminar (1-2)

(S/U grading only.)

#### 298. Group Study (1-5)

#### 299. Research (1-12)

(S/U grading only.)

## Integrated Studies Honors Program

James F. Shackelford, Ph.D., Program Director

**Program Office.** 162 Everson Hall (530) 752-9760;

<http://integratedstudies.ucdavis.edu>

#### Committee in Charge

John Boe, Ph.D., Lecturer (*English*)

Robin Hill, B.F.A., Associate Professor

(*Art and Art History*)

Naomi Janowitz, Ph.D., Professor (*Religious Studies*)

Alessa Johns, Ph.D., Associate Professor (*English*)

Peter Lindert, Ph.D., Professor (*Economics*)

Winder McConnell, Ph.D., Professor

(*German and Russian*)

Jay Mechling, Ph.D., Professor (*American Studies*)

Terence Murphy, Ph.D., Professor (*Plant Biology*)

Hearne Pardee, M.F.A., Assistant Professor

(*Art and Art History*)

Christopher A. Reynolds, Ph.D., Professor (*Music*)

Eric J. Schroeder, Ph.D., Lecturer (*English*)

Kenneth A. Shackel, Ph.D., Professor (*Pomology*)

Gina Werfel, M.F.A., Professor (*Art and Art History*)

#### Affiliated Faculty

Evan Fletcher, Ph.D., Lecturer

(*Center for Neuroscience*)

Martina Newell-McGloughlin, D.Sc., Lecturer

(*UC Systemwide Biotechnology Research and Education Program*)

Marco Molinaro, Ph.D., Lecturer

(*Center for Biophotonics*)

#### The Program of Study

The Integrated Studies Honors Program is an invitation, first-year, residential honors program. Estab-

lished in 1969, the program aims to help high-achieving students integrate knowledge gained from their study of the humanities, natural sciences, and social sciences and expand their learning experiences through interdisciplinary or multidisciplinary courses. Enrollment is limited to 25 students per class, and program membership is limited to the top 3% of the entering class.

Students enroll in three Integrated Studies Honors Program courses and two seminars during the year. Students not admitted to the Program may not register for Integrated Studies Honors Program courses or seminars.

### Courses in Integrated Studies (IST)

#### Lower Division Courses

#### 8. Colloquium (1)

Discussion—1 hour. Lectures, films, and readings on the interrelation between the arts and sciences. May be repeated for credit. (P/NP grading only.)—I, II, (I, II.)

#### 8A. Special Topics in Natural Science and Mathematics (4)

Lecture—3 hours; discussion—1 hour. Group study of a special topic in natural sciences and mathematics. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: SciEng, Wrt.—I, II, III, (I, II, III.)

#### 8B. Special Topics in Humanities (4)

Lecture—3 hours; discussion—1 hour. Group study of a special topic in humanities. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: ArtHum, Wrt.—I, II, III, (I, II, III.)

#### 8C. Special Topics in the Social Sciences (4)

Lecture—3 hours; discussion—1 hour. Group study of a special topic in social sciences. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: SocSci, Wrt.—I, II, III, (I, II, III.)

#### 9. Seminar (1)

Lecture—1 hour. Preparation of a research report. Normally taken with course 8. May be repeated for credit. (P/NP grading only.)—I, II, III, (I, II, III.)

### Upper Division Courses

#### 190. Topics in Integrated Studies (1)

Seminar—1 hour. Prerequisite: course 9. Discussion of the integration of the arts and sciences, focusing on a special topic. May be repeated three times for credit when topic differs. (P/NP grading only.) Not offered every year.

#### 194HA. Special Study for Honors Students (4)

Independent study—3 hours; seminar—1 hour. Prerequisite: course 9, consent of instructor and completion of 90 units with a minimum GPA of 3.500. A program of research culminating in the writing of a junior honors thesis under the direction of a faculty adviser. May be repeated one time for credit. (Deferred grading only, pending completion of sequence.)—III, (II.)

#### 194HB. Special Study for Honors Students (4)

Independent study—3 hours; seminar—1 hour. Prerequisite: course 9, consent of instructor and completion of 90 units with a minimum GPA of 3.500. A program of research culminating in the writing of a junior honors thesis under the direction of a faculty adviser. May be repeated one time for credit. (Deferred grading only, pending completion of sequence.)—II, (II.)

#### 197T. Tutoring in Integrated Studies (1-4)

Tutorial—1 hour. Prerequisite: consent of Director of Integrated Studies Honors Program. Tutoring in Integrated Studies courses, usually in small discussion groups. Weekly discussions with the instructor on the subject matter of the course being tutored and on the art and craft of teaching. May be repeated eight times for credit. (P/NP grading only.)—I, II, III, (I, II, III.)

## Interior Design

See **Design**, on page 189.

## Internal Medicine

See **Medicine, School of**, on page 345.

## International Agricultural Development

(College of Agricultural and Environmental Sciences)  
International Agricultural Development is an interdisciplinary major in the Human and Community Development department.

**Faculty.** Includes members from various departments across colleges.

### The Major Program

The goal of international agricultural development is to improve food production, nutrition, marketing, and health in less technically advanced countries. Students in this major are trained in technical areas of agriculture that can be applied to the problems of world hunger and health.

**The Program.** Principle subjects of study within the major are Agricultural Production, Economic Development, Environmental Issues, Nutrition, Rural Communities, and Trade and Commodity Development. Courses are in social sciences, humanities, and economic environments in which agriculture operates in countries outside the United States.

**Career Alternatives.** The study of international agricultural development prepares a student for a variety of careers. Some students choose service through the Peace Corps. Others seek employment in international trade, while others choose to work for a governmental or private agency in a foreign nation. Religious groups and organizations also employ university-trained individuals for agricultural work in conjunction with missions and other types of human service work overseas. The major is also preparation for further graduate work in agricultural development.

### B.S. Major Requirements:

UNITS

#### English Composition Requirement ..... 0-8

See College requirement.

#### International Agricultural Development Abroad ..... 0-20

A maximum of five courses abroad, selected with approval of an adviser, may be applied toward the 12 upper division courses in the major.

#### Preparatory Subject Matter ..... 47

Choose 47 units from either the Social Science or Natural Science core in consultation with adviser.

**Social Sciences core:**

Agricultural and Resource Economics 15; Agricultural Management and Rangeland Resources 1; Animal Science 41 and 41L or Agricultural Management and Rangeland Resources 2; Chemistry 10; Community and Regional Development 1 or 17; Economics 1A and 1B; International Agricultural Development 10; Mathematics 16A and 16B; Nutrition 10 or 20; Sociology 1 or Anthropology 2; Soil Science 10; Statistics 13 or Sociology 46B

**Natural Science core:**

Animal Science 41 and 41L or Agricultural Management and Rangeland Resources 2; Biological Sciences 1A and 1B or 1A and 1C; Chemistry 2A and 2B; Chemistry 8A and 8B or Physics 1A and 1B; Economics 1A or Agricultural and Resource Economics 15; International Agricultural Development 10; Mathematics 16A and 16B; Nutrition 10 or 20; Soil Science 10 or 100; Statistics 13.

#### Breadth/General Education ..... 6-24

Satisfaction of General Education requirement

#### Depth Subject Matter ..... 36-37

Agricultural and Resource Economics 147 or Agricultural Management and Rangeland Resources 101 or Geography 161 ..... 4  
Economics 115A ..... 4  
International Agricultural Development 142 or 160 ..... 2  
International Agricultural Development 103 and 104 ..... 8  
International Agricultural Development 170 ..... 4  
Sociology 170 ..... 4  
Agricultural Management and Rangeland Resources 110A or 110B or 135 or Plant Biology 142 ..... 3-4  
Political Science 123 or 124 or Sociology 145A ..... 4  
Textiles and Clothing 174 ..... 3

#### Foreign Language Requirement ..... 0-15

Students must complete 15-unit level in one language or pass the foreign language proficiency examination. A score of 5, 4, or 3 on a foreign language College Board Advanced Placement Examination (except Latin) or a score of 550 on the College Board SAT II: Subject Test will also satisfy this requirement.

#### Internship Requirement ..... 4-8

Students must complete at least 4 units of internship and may use up to 8 units toward major requirements. Internships can be chosen in consultation with an adviser. Internship requirement waived for students enrolled in the UC Education Abroad Program.

#### Areas of Specialization ..... 30-35

##### Agricultural Production Option:

Agricultural and Resource Economics 140, Agricultural Management and Rangeland Resources 101 and 105, Plant Biology 152 or Animal Genetics 107  
Additional 14-15 units of restricted electives in consultation with an adviser.

##### Economic Development Option:

Agricultural and Resource Economics 100A and 100B, Economics 115B  
Agricultural and Resource Economics 120, 130, 140, 175 and International Agricultural Development 195A or 195B

##### Environmental Issues Option:

Environmental Science and Policy 100 or 110, 160, 171 and Plant Biology 151  
Agricultural and Resource Economics 147, Agricultural Management and Rangeland Resources 101, Environmental Horticulture 150, Environmental Science and Policy 126, 161, 175 and International Agricultural Development 195A or 195B

##### Rural Communities Option:

Community and Regional Development 140, 151, 151L, 152, 154  
Community and Regional Development 164 or 172 or 173 or 174, International Agricultural Development 195A or 195B, additional restricted electives chosen in consultation with an adviser

##### Trade and Development in Agricultural

### Commodities Option:

Agricultural and Resource Economics 100A, 113, 130, Plant Biology 172  
Agricultural and Resource Economics 138, Economics 160A, 160B, Food Science and Technology 100A, 109, 160, International Agricultural Development 195A or 195B, Textiles and Clothing 162, 163

#### Total Units for the Degree ..... 180

#### Specialization Advisers

A listing of faculty in the various areas of specialization and with interests in International Agricultural Development is available from the Major Adviser.

**Major Adviser.** S.B. Brush (*Human and Community Development*)

### Minor Program Requirements:

UNITS

#### International Agricultural Development ..... 22

International Agricultural Development 10 and Agricultural and Resource Economics 115A ..... 8  
Agricultural Management and Rangeland Resources 101 and 110A or 110B ..... 6  
International Agricultural Development 103, 104, 195A or 195B, Agricultural and Resource Economics 115A, Sociology 145A ..... 8

**Minor Adviser.** S.B. Brush in 1331 Hart Hall.

**Graduate Study.** A program of study and research leading to the M.S. degree is available in International Agricultural Development. Detailed information regarding graduate study may be obtained by writing to the Coordinator of Graduate Recruitment (I.A.D.), Graduate Studies, UC Davis.

**Graduate Advisers.** J. Hill (*Agronomy and Range Science*), F.W. Hirtz (*Human and Community Development*), L.S. Jarvis (*Agricultural and Resource Economics*), J.D. Momsen (*Human and Community Development*), D.E. Rains (*Agronomy and Range Science*)

**Related Courses.** See Agricultural and Resource Economics 148, 215C, Agricultural Management and Rangeland Resources 111, Anthropology 221, Economics 115A-115B, 215A-215B-215C, Geography 142, Nutrition 20, Sociology 144.

### Courses in International Agricultural Development (IAD)

Questions pertaining to the following courses should be directed to the instructor or to the Department of Human and Community Development Advising Center in 1303 Hart Hall (530) 752-2244.

### Lower Division Courses

#### 10. Introduction to International Agricultural Development (4)

Lecture—3 hours; discussion—1 hour. Theories, practices and institutions relating to agricultural development; the interaction of changing social, cultural and economic organization through successive stages of economic development; impact of new agricultural technology on underdeveloped regions. GE credit: SocSci, Div, Wrt.—II. Brush

#### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

### Upper Division Courses

#### 103. Social Change and Agricultural Development (4)

Lecture/discussion—4 hours. Prerequisite: introductory social science course (Anthropology, Sociology, Economics, International Agricultural Development). How social and cultural factors influence technological change in agriculture; theories of diffusion of innovations; social impact analysis and technology assessment. GE credit: SocSci, Div.—I. Brush

**104. Gender and Environment in the Developing World (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 recommended. Examines how environmental problems in the countries of Africa, Asia and Latin America affect men and women differently and the impact of structural adjustment on the environment in rural and urban areas.—III. (III.) Momsen

**142. Equipment and Technology for Small Farms (2)**

Lecture—1 hour; laboratory—3 hours. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as Applied Biological Systems Technology 142.)

**160. Agroforestry: Global and Local Perspectives (3)**

Lecture/discussion—3 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C, Plant Biology 142 or a general ecology course (Environmental Science and Policy 100). Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. (Same course as Plant Sciences 160.) Offered in alternate years.—I. Gradziel

**162. Field Course in Tropical Ecology and Sustainable Agricultural Development (8)**

Lecture—20 hours; discussion—10 hours; field work—30 hours. Prerequisite: consent of the instructor; Biological Sciences 1C required; course 10 or Biological Sciences 1A or 1B recommended; limited enrollment, acceptance based on academic merit, personal experience, and academic discipline in order to provide a multidisciplinary atmosphere. Course in Panama. Tropical Ecology of various ecosystems; Agricultural systems in Panama; Sustainable agriculture—uniting ecology and agriculture in Panama, language and culture of Panama, trips to Barro Colorado Island (BCI) and ecotourism field trip. GE credit: SciEng, Div, Wrt. (Same course as Plant Sciences 162.)—IV. (IV.) Kraft

**170. Program Development for International Agriculture (4)**

Lecture/discussion—4 hours. Prerequisite: course 10. Principles of leadership and management for international agricultural development. Organizations and organizational behavior, and the implications for planning and administering organizations involved in the global development effort.—II. Marcotte

**190. Proseminar in International Agricultural Development (1)**

Seminar—1 hour. Presentation and discussion of current topics in international agricultural development by visiting lecturers, staff and students. May be repeated for credit. (P/NP grading only.)

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.)

**195A. Field Study in Agricultural Development—California (3)**

Lecture—2 hours total; seminar—8 hours total; fieldwork—four 2-day visits. Prerequisite: consent of instructor. Students will incur travel expenses. Observation of agricultural development strategies and effects on rural communities. Discussion with farmers, workers and organizational staff members. Study of farm commodities, institutions and experiences in dealing with agricultural development problems. International influence on U.S. agriculture. (P/NP grading only.)—III. (III.) Marcotte

**195B. Field Study in Agricultural Development—Mexico (3)**

Lecture—2 hours total; seminar—8 hours total; fieldwork—8-day trip to Mexico. Prerequisite: consent of instructor. Students will incur travel expenses. Observation of agricultural development strategies and effects on rural communities. Discussion with farm-

ers, workers and organizational staff members. Study of farm commodities, institutions and experiences in dealing with agricultural development problems. International influence on U.S. agriculture. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****200N. Philosophy and Practice of Agricultural Development (5)**

Lecture/discussion—5 hours; term paper. Introduction to key elements of the philosophy and practice of agricultural development in less developed countries. Introduction to the major paradigms of development, the historical context within which these paradigms have operated, and the various development techniques and initiatives that have emerged from agricultural production to institutional capacity building and management. Not open for credit to students who have completed former course 202.—I. (I.) Marcotte

**201. The Economics of Small Farms and Farming Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100A. Economic perspective on small farm development. Establishes a basis for predicting farmers' responses to changes in the economic environment, and for proposing government policies to increase small farm production and improve farmer and national welfare.—II. (II.) Vosti

**202N. Analysis and Determinants of Farming Systems (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Sciences 150 or the equivalent. The unifying concepts of cropping systems in temperate and tropical climatic zones; agroecosystems stability, diversity and sustainability; management strategies, resource use efficiency and their interactions; the role of animals, their impact on energy use efficiency, nutrient cycling, and providing food and power. Not open for credit to students who have completed former course 200.—III. (III.) Van Kessel, Pittroff

**203N. Project Planning and Evaluation (4)**

Discussion—1 hour; workshop—3 hours. Prerequisite: courses 200N (or former course 202), 201, 202N (or former course 200). Interdisciplinary setting for application of student skills and specialization to a "real world" development project. Focus on team-building and effective interdisciplinary problem-solving methods, with the objective of producing a project document and presentation within a specified deadline. Not open for credit to students who have completed former course 203.—III. (III.) Brown, Gepts, Piedrahita

**217. Conservation and Sustainable Development in Third World Nations (4)**

Lecture/discussion—3 hours; fieldwork—2 hours. Prerequisite: at least one course from two of these three groups: a) Environmental Science and Policy 160, 161, 168A, 168B; b) Environmental Science and Policy 101, 133, International Agricultural Development 103, Geography 142; c) Anthropology 126, 131, Geography 141, Sociology 144, 145A, 145B. Examination of the patterns of resource ownership, control and management in agricultural lands, extractive zones (fisheries, forests) and wildlands, with emphases on conservation and sustainability. Comparison of industrial democracies and poorer nations. (Same course as Ecology 217.) Offered in alternate years.—Orlove

**220. Food and Nutrition Strategies in Developing Countries (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Agricultural and Resource Economics 100A. Identifies important topical problems in food and nutrition policy, develops theoretical frameworks suitable for their analysis, examines the empirical information

relevant to the problems and, using theory data, draws appropriate policy implications. Offered in alternate years.—III. Jarvis

**290. Seminar in International Agricultural Development (1-2)**

Seminar—1-2 hours. Prerequisite: consent of instructor. Discussion and critical evaluation of advanced topics and issues in international agricultural development. May be repeated for credit. (S/U grading only.)—III. Brown, Van Horn

**291. Topics in International Agricultural Development (1-3)**

Lecture/discussion—1-3 hours. Prerequisite: consent of instructor. Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content. May be repeated once for credit.

**292. Graduate Internship (1-12)**

Internship—3-36 hours. Prerequisite: participation in H. Humphrey Fellow Program or consent of instructor. Individually designed supervised internship, off or on campus, in community, business or institutional setting. Developed with advice of faculty mentor and Humphrey Coordinator. (S/U grading only.)

**298. Directed Group Study (1-5)**

(S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## International Agricultural Development (A Graduate Group)

Patrick H. Brown, Chairperson of the Group

**Faculty**

Lindsay Allen, Ph.D., Professor (*Nutrition*)  
Michael Barbour, Ph.D., Professor (*Plant Sciences*)  
Diane M. Barrett, Ph.D., Specialist in Cooperative Extension (*Food Science and Technology*)  
Stephen Boucher, Ph.D., Assistant Professor (*Agricultural and Resource Economics*)  
David Boyd, Ph.D., Associate Professor (*Anthropology*)  
Ted Bradshaw, Ph.D., Associate Professor (*Human and Community Development*)  
Kenneth H. Brown, Ph.D., Professor (*Nutrition*)  
Patrick H. Brown, Ph.D., Professor (*Plant Sciences*)  
Stephen B. Brush, Ph.D., Professor (*Human and Community Development*)  
Marita Cantwell, Ph.D., Lecturer (*Plant Sciences Extension*)  
Tim E. Carpenter, Ph.D., Professor (*Medicine and Epidemiology*)  
Colin A. Carter, Ph.D., Professor (*Agricultural and Resource Economics*)  
Douglas Conklin, Ph.D., Associate Professor (*Animal Science*)  
Patricia A. Conrad, D.V.M., Ph.D., Professor (*Pathology, Microbiology, and Immunology*)  
Montague W. Demment, Ph.D., Professor (*Plant Sciences*)  
Johannes J. DeVries, Ph.D., Lecturer (*Civil and Environmental Engineering*)  
Kathryn G. Dewey, Ph.D., Professor (*Nutrition*)  
Serge I. Doroshov, Ph.D., Professor (*Animal Science*)  
James Fadel, Ph.D., Professor (*Animal Science*)  
Howard Ferris, Ph.D., Professor (*Nematology*)

Albert Fischer, Ph.D., Associate Professor  
(*Plant Sciences*)

Theodore C. Foin, Ph.D., Professor (*Plant Sciences*)

Isao Fujimoto, M.A., Lecturer Emeritus

Shu Geng, Ph.D., Professor (*Plant Sciences*)

Paul L. Gepts, Ph.D., Professor (*Plant Sciences*)

Robert Gilbertson, Ph.D., Professor (*Plant Pathology*)

Barbara G. Goldman, Ph.D., Lecturer  
(*Education, Human and Community Development*)

Thomas Gradziel, Ph.D., Associate Professor  
(*Plant Sciences*)

Richard D. Green, Ph.D., Professor  
(*Agricultural and Resource Economics*)

James I. Grieshop, Ph.D., Specialist in Cooperative  
Extension (*Human and Community Development*)

Louis E. Grivetti, Ph.D., Professor (*Nutrition*)

Luis Guarnizo, Ph.D., Associate Professor  
(*Human and Community Development*)

Bruce R. Hartsough, Ph.D., Professor  
(*Biological and Agricultural Engineering*)

Timothy K. Hartz, Ph.D., Lecturer  
(*Plant Sciences Extension*)

James Hill, Ph.D., Agronomist and Director of Inter-  
national Programs (*Plant Sciences*)

David W. Hird, D.V.M., Ph.D., Professor  
(*Medicine and Epidemiology*)

Frank W. Hirtz, Ph.D., Associate Professor  
(*Human and Community Development*)

Theodore C. Hsiao, Ph.D., Professor Emeritus  
(*Land, Air, and Water Resources*)

Silas S. O. Hung, Ph.D., Professor (*Animal Science*)

Lovell S. Jarvis, Ph.D., Professor  
(*Agricultural and Resource Economics*)

Bryan M. Jenkins, Ph.D., Professor  
(*Biological and Agricultural Engineering*)

Marion Jenkins, Ph.D., Research Engineer  
(*Civil and Environmental Engineering*)

Desmond A. Jolly, Ph.D., Lecturer  
(*Agricultural and Resource Economics*)

Suad Joseph, Ph.D., Professor  
(*Anthropology, Women and Gender Studies*)

Lucia Kaiser, Ph.D., Associate Specialist in Cooper-  
ative Extension (*Nutrition*)

Emilio A. Laca, Ph.D., Assistant Professor  
(*Plant Sciences*)

W. Thomas Lanini, Ph.D., Lecturer (*Plant Sciences*)

Jay Lund, Ph.D., Professor  
(*Civil and Environmental Engineering*)

E. Dean MacCannell, Ph.D., Professor  
(*Environmental Design*)

Paul Marcotte, Ph.D., Lecturer  
(*Human and Community Development*)

Miguel A. Marino, Ph.D., Professor  
(*Land, Air, and Water Resources, Civil and Envi-  
ronmental Engineering*)

Philip E. Martin, Ph.D., Professor  
(*Agricultural and Resource Economics*)

Mark A. Matthews, Ph.D., Professor  
(*Viticulture and Enology*)

Gale McGranahan, Ph.D., Lecturer (*Plant Sciences*)

Albert Medvitz, Ph.D., Lecturer (*Animal Science*)

Jeffrey P. Mitchell, Ph.D., Lecturer  
(*Plant Sciences Extension*)

Janet D. Momsen, Ph.D., Professor  
(*Human and Community Development*)

Donald Nevins, Ph.D., Professor (*Plant Sciences*)

Benjamin Orlove, Ph.D., Professor  
(*Environmental Science and Policy*)

Raul H. Piedrahita, Ph.D., Professor  
(*Biological and Agricultural Engineering*)

Wolfgang Pittroff, Ph.D., Assistant Professor  
(*Animal Science*)

Dan Potter, Ph.D., Assistant Professor (*Plant Sciences*)

D. William Rains, Ph.D., Professor Emeritus  
(*Plant Sciences*)

Michael S. Reid, Ph.D., Professor (*Plant Sciences*)

Eliska Rejmankova, Ph.D., Professor  
(*Environmental Science and Policy*)

Pete Richerson, Ph.D., Professor

(*Animal Science*)

Richard Sexton, Ph.D., Professor  
(*Agricultural and Resource Economics*)

Michael J. Singer, Ph.D., Professor  
(*Land, Air, and Water Resources*)

R. Paul Singh, Ph.D., Professor  
(*Biological and Agricultural Engineering*)

Johan Six, Ph.D., Assistant Professor (*Plant Sciences*)

Michael P. Smith, Ph.D., Professor  
(*Human and Community Development*)

Alvin D. Sokolow, Ph.D., Specialist in Cooperative  
Extension (*Human and Community Development*)

Randal Southard, Ph.D., Professor  
(*Land, Air, and Water Resources*)

Daniel A. Sumner, Ph.D., Professor  
(*Agricultural and Resource Economics*)

J. Edward Taylor, Ph.D., Professor  
(*Agricultural and Resource Economics*)

Steven R. Temple, Ph.D., Lecturer (*Plant Sciences*)

Larry R. Teuber, Ph.D., Professor (*Plant Sciences*)

Orville E. Thompson, Ph.D., Professor Emeritus

Cary Trexler, Ph.D., Assistant Professor  
(*School of Education*)

Mark Van Horn, M.Sci., Lecturer (*Plant Sciences*)

Chris van Kessel, Ph.D., Professor (*Plant Sciences*)

Ronald E. Voss, Ph.D., Lecturer Emeritus  
(*Plant Sciences Extension*)

Stephen Vosti, Ph.D., Assistant Adjunct Professor  
(*Agricultural and Resource Economics*)

Karen Watson-Gegeo, Ph.D., Professor  
(*School of Education*)

Steven Weinbaum, Ph.D., Professor (*Plant Sciences*)

Miriam J. Wells, Ph.D., Professor  
(*Human and Community Development*)

Diane L. Wolf, Ph.D., Associate Professor  
(*Sociology*)

Lin Wu, Ph.D., Professor Emeritus (*Plant Sciences*)

Aram A. Yengoyan, Ph.D., Professor (*Anthropology*)

Tilahun D. Yilma, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)

Frank G. Zalom, Ph.D., Lecturer (*Entomology*)

Minghua Zhang, Ph.D., Associate Adjunct Professor  
(*Land, Air, and Water Resources*)

Ruihong Zhang, Ph.D., Professor  
(*Biological and Agricultural Engineering*)

Richard A. Zinn, Ph.D., Professor (*Animal Science*)

**Graduate Study.** The International Agricultural Development M.S. degree program prepares students for careers in global agricultural and rural development, especially of developing and less-industrialized regions. This is an interdisciplinary program designed to provide students with knowledge and skills that will enable them to implement, facilitate, and manage programs that enhance agricultural development, resource management, and rural life.

Students are prepared to accomplish biological and technological improvement in agricultural and natural systems to facilitate social innovation. Training in International Agricultural Development includes both breadth and depth components. Breadth components, required of all M.S. students, aim to establish an understanding of the issues in international development as it relates to agriculture and the environment. These include the history and philosophy of development, leadership and management techniques, fundamentals of crop and livestock farming systems, and agricultural economics. Students acquire depth in their own areas of specialization within the agricultural and social sciences. The areas are agricultural and resource economics, agricultural engineering, agronomy, animal science, anthropology, aquaculture, avian science, community development, ecology, economics, entomology, environmental design, environmental toxicology, food science, gender, geography, horticulture, nutrition, plant pathology, plant biology, plant protection and pest management, political science, pomology, preventive veterinary medicine, range science, sociology, soil science, sustainable agriculture, vegetable crops, viticulture, and water science.

Practical and on-site experience with development issues is encouraged and facilitated by guidance from the group's approximately 80 faculty members,

who possess a wide range of experience in international development.

**Graduate Adviser.** Contact the Group office.

## International Commercial Law (A Graduate Group)

Daniel L. Simmons, J.D., Chairperson of the Group  
Beth Greenwood, J.D., Director, International Programs, UC Davis School of Law

**Group Office.** International Law Programs, School of Law & UC Davis Extension, 1333 Research Park Drive, Davis, CA 95616; (530) 757-8569; <http://www.law.ucdavis.edu/internprogram/MICL.shtml>

### Faculty

Courses are taught by School of Law faculty from the UC Davis and other University of California law schools, the Graduate School of Management, Departments of Economics and Agricultural and Resource Economics. Additionally, outstanding practitioners from private practice and government—lawyers, economists, bankers, businessmen—have acted as adjunct faculty to provide an applied perspective through lectures, simulations and case studies.

### Graduate Study

The Graduate Group in International Commercial Law offers a program of study and research leading to the M.A. degree through a Summer only program. Students are required to take 36 quarter units of study over three, four, or five summers. Thirty of the units must be UC Davis courses. Six units may be completed in another country with the approval of the Director of the ICL program. The classes are taught in an intensive format of 20 hours per week or four hours per day, two hours of lecture in the morning, two hours in the afternoon. Students complete four core courses, starting with the Orientation to U.S.A. Law and followed by three specialized core courses in international commercial law. Elective courses then provide in-depth study in focused topics such as private international law, conflicts of laws, intellectual property, business associations, antitrust, tax, securities and finance and the like. Students also complete a research paper.

### Preparation

Foreign applicants must present satisfactory evidence of the completion of legal academic training at an accredited educational institution. Domestic applicants must have completed at least six years of resident study at accredited colleges and law schools and must hold a professional degree from a law school approved by the American Bar Association.

**Graduate Advisors.** Beth Greenwood (*International Programs, School of Law*), Dan Simmons (*School of Law*)

### Courses in International Commercial Law (ICL)

ICL courses are taught in an intensive format during the summer quarter. For more information, contact the International Law Programs at (530) 757-8569 or e-mail at [lawinfo@unexmail.ucdavis.edu](mailto:lawinfo@unexmail.ucdavis.edu).

#### 201. Orientation in United States Law (7)

Lecture/discussion—20 hours. Prerequisite: law school education or the equivalent. Investigation of the Common Law System of the United States. Includes structure of the U.S. government, Constitutional law, contracts, torts, real property, consumer law, securities law, intellectual property, antitrust, taxation, labor law, environmental law, ethics, remedies, legal research and trial practice.—Johnson

**204. International Joint Ventures (3)**

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. International and U.S. business and legal transactions. Legal planning, problem solving, decision making and negotiations related to the break-up and dissolution of a major international joint venture. U.S. laws including finance, tax, bankruptcy, labor, antitrust, environmental, corporate structures and intellectual property. Offered every three years.—Smith

**211. Negotiations and Alternative Dispute Resolution (1)**

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Mechanisms for resolving disputes including the alternatives to litigation such as negotiation, mediation, and arbitration. Advantages and disadvantages of each approach. Offered in alternate years.—Smith

**215. Business Associations (4)**

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships. Offered in alternate years.—Joo

**216. International Business Transactions (2)**

Lecture/discussion—20 hours. Prerequisite: course 201 and law school education or the equivalent. Legal problems arising from international business transactions. Focus on international sales contracts, choice of law, forum selection clauses, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, foreign exchange problems, and national efforts to control imports. Offered in alternate years.—Chander

**219. Advanced Writing Project (4)**

Project. Prerequisite: course 201, law school education or the equivalent. The completion of a written research project under the active supervision of a faculty member in satisfaction of the research-writing requirement. (S/U grading only.)

**220. United States Taxation of Multinational Investments (2)**

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. An analysis of the United States taxation of multinational investments including jurisdiction of tax, the U.S. tax system, foreign tax credits, treaties, and transfer pricing. Offered in alternate years.—Simmons

**236. United States Securities Law and Regulation (2)**

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. Structural and jurisdictional issues associated with securities practice. Topics include the regulation of public offerings, transactions by corporate insiders, regulation of corporate disclosure and conduct, and the liabilities of corporations and individuals under anti-fraud provisions. Offered in alternate years.—Chander

**242. Private International Law (2)**

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or equivalent. How law operates across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, enforcement of judgments, choice of forum, service of process, taking of evidence, foreign sovereign immunity, extra-territorial regulation of antitrust, securities and other national laws. Offered in alternate years.—Bjorklund

**247. Banking Law (1)**

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Institutional features of international banking transactions, the structure of a large financial deal, and the mechanics of overseeing large loans. Emphasis on negotiable instruments such as bills of lading, letters of credit, standby letters of credit, and interbank transactions. Offered in alternate years.—Simmons

**249. Comparative Law (1)**

Lecture/discussion—10 hours. Prerequisite: course 201 and law school education or the equivalent. A comparative study of the development of schools of legal thought, chiefly Common law systems and Civil law traditions. Attention to the historical reasons for their divergence, contemporary approaches to universal problems such as succession, torts, and contracts, the cross-fertilization of laws and difficulties commonly associated with importing foreign law into new territory. Offered in alternate years.—Johnson

**250. International Trade Law (3)**

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. An investigation of global trading systems including international trade in goods and services, e-commerce, international intellectual property, international tax planning and investment. Includes substantive and procedural provisions of the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA). Offered every three years.—Smith

**251. United States Litigation Issues (1)**

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Prevention and resolution of disputes in international commerce. Emphasis on preparing for a trial in the United States. Includes the study of pre-trial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies. Offered in alternate years.—Smith

**262. Antitrust (1)**

Lecture/discussion—10 hours. Prerequisite: course 201, law school education or the equivalent. Historical and institutional background of antitrust law in the United States. The statutory framework including price fixing, limits on distribution, monopolization and mergers, and reporting requirements. Offered in alternate years.—Johnson

**270. Financing International Transactions (3)**

Lecture/discussion—20 hours. Prerequisite: course 201 and law school education or the equivalent. How capital is raised in international markets. Investment strategies for U.S. markets. Taxation of financial investments, international currency regulation, and assessing rates of return on international investments. Offered every three years.—Simmons

**274. Intellectual Property (2)**

Lecture/discussion—20 hours. Prerequisite: course 201, law school education or the equivalent. An intensive study of intellectual property law. Areas covered include copyright, trademark and patent law and unfair competition. Offered in alternate years.—Kurtz

**290. American Legal System Research Seminar (1)**

Seminar—5 hours. Prerequisite: course 201, law school education or equivalent. The American legal system and its structure. Legal research methodologies and presentation with attention to analysis, synthesis, organization, and editing techniques common to legal writing. (S/U grading only.)—Simmons

**291C. International Commercial Law Seminar (4)**

Seminar—20 hours. Prerequisite: course 201, law school education or the equivalent. Advanced seminar on a current topic in International Commercial Law. Offered at the University of Cologne in Cologne, Germany for two weeks each summer. The topic will change each year.

**299. Advanced Research in Legal Problems (1-4)**

Prerequisite: course 201, law school education or the equivalent. Student individualized research projects under faculty supervision. (S/U grading only.)

(*Nutrition*)  
Steven A. Vosti, Ph.D., Assistant Adjunct Professor  
(*Agricultural and Resource Economics*)

**Graduate Study.** The Program in International Nutrition, an organized research unit located in the Department of Nutrition, coordinates specialized course work and research leading to the designated emphasis in International Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional problems in low-income countries and in disadvantaged ethnic minority groups in the United States. Students enrolled in the designated emphasis are expected to (1) complete the course requirements already established by their respective graduate programs, (2) participate in a weekly advanced seminar in international nutrition, (3) complete additional core courses in international nutrition (Nutrition 219A, 219B, 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research on a relevant topic under the supervision of a professor who is a member of the Program in International Nutrition.

Students accepted into the following doctoral programs are automatically eligible to participate in the designated emphasis: Nutrition, Agricultural and Resource Economics, Epidemiology, Anthropology, and Human Development. Students from other programs may also be accepted by special request to the Program Director. Upon graduation, students receive a Ph.D. in their major field, with specific rec-

ognition for the designated emphasis in international nutrition.

**Graduate Adviser.** Contact the Program office.

### The Major Program

Problems of security, development, ethnic conflict, human rights, health, and the environment are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international relations is an exciting and highly relevant interdisciplinary major.

**The Program.** Graduation with a major in international relations requires completion of introductory courses in political science, economics, statistics, and history. The major also requires fluency in English and a working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language. Students choose one of four tracks that encompass major topical areas in combination with an area studies emphasis:

(I) World Trade and Development;

(II) Peace and Security;

(III) Global Environment, Health, and Natural Resources;

(IV) Peoples and Nationalities. *Upper division course work for Tracks I, II and III is composed of twelve courses. Students choosing Track IV, Peoples and Nationalities, are required to study or work abroad for a minimum of one quarter; upper division course work is reduced to nine classes in recognition of the experience gained through education abroad.*

### Programs, Internships, and Career Alternatives.

One program of special interest to international relations majors is the Education Abroad Program, which provides insights into the life and culture of other countries. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center arranges internships and runs a full-credit academic program in Washington, D.C. with a full range of opportunities for International Relations majors (see also [UC Davis Washington Center, on page 467](#)). International relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations), foundations, and companies having interests in international business, trade, or finance. The stringent language requirement of the major program enhances career prospects in jobs which demand knowledge of the language and culture of other countries.

**International Relations Abroad.** International Relations strongly encourages all students to participate in the UC Education Abroad Program; those who choose to study Track IV, Peoples and Nationalities, must study or work abroad for a minimum of

one quarter. A maximum of five courses taken abroad may be applied toward the 12 upper division courses in Tracks I, II, and III of the International Relations major. In Track IV, the four Area Studies courses may be done abroad. Courses are selected with the approval of an adviser for the International Relations program.

**Preparatory Requirements.** Before declaring a major in International Relations, students must complete the following courses with a combined GPA of at least 2.500 at the University of California or other four-year school (at least 3.000 for similar courses taken at community college). All courses must be taken for a letter grade.

Economics 1A or Anthropology 2	4 units
Economics 1B	4 units
History 4C or 10C	4 units
International Relations 1 or Political Science 3	4 units
Statistics 13 or Sociology 46B	4 units

### A.B. Major Requirements:

#### Preparatory Subject Matter ..... 23-54

Economics 1A or Anthropology 2	4
Economics 1B	4
History 4C or 10C	4
International Relations 1 or Political Science 3	4
Statistics 13 or Sociology 46B	4
Plus one course from:	3-4
Anthropology 2	4
Environmental Science and Policy 10	3
Environmental Science and Policy 30	3
International Agricultural Development 10	4
Political Science 2	4
Science and Society 2	4
Sociology 4	4
Sociology 5	4
Note: Economics 1A, Mathematics 16A and 16B are prerequisites for some courses. Anthropology 2 may be used only once in satisfaction of lower division major requirements.	

#### Foreign language ..... 0-30

One of the following series in a single language, or certified fluency at the highest level required below:

Chinese 1, 2, 3, 4, 5, 6	30
or Chinese 1A, 4, 5, 6	30
or Chinese 1CN, 2CN, 3CN	15
or Chinese 1BL, 2BL, 3BL	15
French 1, 2, 3, 21, 22	25
German 1, 2, 3, 20, 21	23
Hebrew 1, 2, 3, 21, 22, 23	30
Italian 1, 2, 3, 4, 5	21
or Italian 1, 2, 3, 8A, 8B	21
Japanese 1, 2, 3, 4, 5, 6	30
or Japanese 1A, 4, 5, 6	30
Russian 1, 2, 3, 4, 5	23
Spanish 1, 2, 3, 21, 22	25
or Spanish 31, 32, 33	15
Note: The language curricula are subject to change; please check with an adviser for the major. A language not listed above may be substituted only with prior written approval of the International Relations Program Committee.	

#### Depth Subject Matter ..... 36-48

*Tracks I, II and III:* Twelve upper division courses

*Track IV:* Nine upper division courses

Choose one track below:

#### Track I: World Trade and Development

Emphasizes contemporary economic relations of industrialized and developing countries.

*For Advanced Industrialized Focus:*

Economics 100; 101; 160A-160B, Political Science 123	20
Two courses selected from Group A	8
One course selected from Group B	4

Four courses to fulfill Area Studies Requirement ..... 16  
*For Developing Countries Focus:*  
 Economics 115A-115B, 162 ..... 12  
 Political Science 123, 124 ..... 8  
 One course selected from Group A ..... 4  
 Two courses selected from Group B ..... 8  
 Four courses to fulfill Area Studies Requirement ..... 16  
*Group A courses (Advanced Industrialized Countries):*

Agricultural and Resource Economics 138, Anthropology 127, Community and Regional Development 118, 141, Economics 102, 110B, 116, International Relations 104, Political Science 130, 140, Sociology 138, 139, 141, 183

*Group B courses (Developing Countries):*

Anthropology 122A, 122B, 123BN, 126A, 126B, 127, 135, Community and Regional Development 153A, 153B, Economics 110B, International Agricultural Development 103, International Relations 104, Political Science 124, 126, 178, Sociology 138, 141, 145A, 145

#### Track II: Peace and Security

Focuses on political and security relationships among states and non-state actors, examining questions of war, peace, alliances, and diplomacy.

Economics 162 ..... 4  
 Political Science 123, 130, 132 ..... 12  
 Three additional courses from at least two departments selected from Anthropology 123BN, Comparative Literature 157, Economics 116, 122, History 145, 146A, 146B, Philosophy 118, Physics 137, Political Science 112, 124, 126, 131, 140, 145, Sociology 100, 118, 157, Women's Studies 102 ..... 12  
 Four courses to fulfill Area Studies Requirement ..... 16

#### Track III: Global Environment, Health, and Natural Resources

Familiarizes students with new sources of global interdependence such as biodiversity, natural resource conflicts, population growth, and world health.

Note: Some courses shown below have additional prerequisites.

Economics 162 ..... 4  
 Anthropology 101 ..... 4  
 Political Science 123 ..... 4  
 Environmental Science and Policy 161 or Political Science 122 ..... 4  
 Select two from Agricultural and Resource Economics 147, 175, 176, Anthropology 103, Applied Biological Systems Technology 182, Economics 115A, Environmental Science and Policy 164, International Agricultural Development 170, Nature and Culture 120, Physics 160, Political Science 107, 175 ..... 7-8  
 Select two from one of the following groups ..... 9-12

*Atmospheric and marine environments:*

Atmospheric Science 116, 149, Environmental and Resource Sciences 121, 131, Geology 116, International Relations 131

*Land use and energy supply:* Agricultural Management and Rangeland Resources 101, 150, 160, Anthropology 104N, Community and Regional Development 142, Environmental and Resource Sciences 144, Environmental Science and Policy 167, Geology 130, International Agricultural Development 104, Political Science 171

*Health and human populations:*

Anthropology 102, Environmental Science and Policy 121, 126, Environmental Toxicology 101, Internal Medicine-Infectious Diseases 141, Nutrition 111AV, 111B, 118, Sociology 170; Epidemiology and Preventive Medicine 198 and 199

may be taken with the director's prior approval  
Four courses to fulfill Area Studies Requirement ..... 16

#### Track IV: Peoples and Nationalities

Examines social and cultural foundations of national development and international relations.

Select one course from Anthropology 123AN, Sociology 118, 156, 181 ..... 4  
Select one course from Anthropology 130A, 102 ..... 4  
Select one course each from three of the following four groups ..... 12

*The Mixing of Peoples:* Anthropology 123BN, 130BN; Community and Regional Development 176; International Relations 104; Political Science 126  
*Women:* Anthropology 126B; Human Development 103; Sociology 145B; Women's Studies 102, 182  
*Religion:* Anthropology 124; Philosophy 105; Religious Studies 170; Sociology 146  
*Development and its Impact on Social Cleavages:* Anthropology 122B, 126A, 126B; Political Science 124, 178; Sociology 145B

Four courses to fulfill Area Studies Requirement ..... 16  
Education/Internship Abroad for a minimum of one quarter

#### Area Studies Requirement

Four courses: Courses must incorporate at least two of three groups (History, Social Analysis, Culture and Literature); we encourage students to take all four courses from one region, but will accept a minimum of three from one region and one from a different region if course offerings within the region of choice are insufficient. Tracks I, II and III students who choose to take advantage of an Education Abroad experience may fulfill the Area Studies requirement by completing three courses instead of four; all three courses must be from one region.

#### Africa and the Middle East

*History:* History 113, 115A, 115B, 115C, 115D

*Social Analysis:* African American and African Studies 107C, 110, 111, 156, Anthropology 140A, 140B, 142, Political Science 134, 149, Women's Studies 184  
*Culture and Literature:* African American and African Studies 157, 162, Art History 150, Comparative Literature 147, 166, Dramatic Art 155A, French 124

*Culture and Literature:* African American and African Studies 157, 162, Art History 150, Comparative Literature 147, 166, Dramatic Art 155A, French 124

#### East and South Asia

*History:* History 191E, 191F, 194C, 194D, 194E, 195B, 196B

*Social Analysis:* African American and African Studies 107C, Anthropology 143A, 143B, 147, 148A, 148B, 148C, 149B, Economics 171, Political Science 148A, 148B, 148C, Sociology 147, 188  
*Culture and Literature:* Anthropology 145, Art History 153, 163C, Chinese 101, 104, 105, 110, Dramatic Art 154, East Asian Studies 113, Japanese 103, 104, 106, 107, 131, 132, 133, 135, 136

#### Latin America

*History:* 162, 163B, 164, 165, 166B, 167, 168

*Social Analysis:* African American and African Studies 107A, 180, Anthropology 144, 146, Chicana/o Studies 130, Native American Studies 120, 133, Political Science 143

*Culture and Literature:* African American and African Studies 163, Art History 151, Comparative Literature 152, 165, Dramatic

Art 155A, Spanish 149, 151N, 153, 154, 155, 156, 157, 158, 170, 172

#### Russian and East/Central Europe

*History:* History 138B, 138C, 143  
*Social Analysis:* Political Science 144  
*Culture and Literature:* Russian 123, 129, 130, 131, 132, 143, 151

#### Western Europe

*History:* History 140, 141, 142A, 144B, 145, 146A, 146B, 147B, 147C, 151D  
*Social Analysis:* African American and African Studies 107C, Political Science 137, 147, 161

*Culture and Literature:* Film Studies 176A, 176B, French 107, 108, 120, 121, 133, German 115, 118B, 118C, 118E, 120, 126, 141, 142, 143, 168, 185, Italian 108, 120A, 120B, Spanish 137N, 138N, 139, 140N, 141, 142, 148, 157, 170

Total units for the major ..... 59-102

Major Adviser. R. M. Siverson (*Political Science*)

### Courses in International Relations (IRE)

#### Lower Division Courses

##### 1. Global Interdependence (4)

Lecture—3 hours; discussion—1 hour. Development of the concept of global interdependence along its political, economic, demographic, cultural, technological, and environmental dimensions. Focus on the ways societies and states interact. Course provides the foundation for upper division multidisciplinary work in international relations.—II. (II.)

##### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

##### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### Upper Division Courses

##### 104. The Political Economy of International Migration (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as Sociology 104.)

##### 131. Ocean Politics (4)

Lecture—3 hours; term paper. Prerequisite: course 1 or Political Science 3; Political Science 123 recommended. The political, economic, security and environmental aspects of the world's oceans. Focus on the international dimensions of ocean economic resources, and on the means—both cooperative and conflictual—by which these resources have been, and are likely to be, managed.

##### 190. Topics in International Relations (4)

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Selected topics in international relations. Variable content. May be repeated for credit when topic differs.

##### 192. International Relations Internship (1-12)

Internship—3-36 hours (to be arranged). Prerequisite: upper division standing and consent of instructor. Work experience in international relations, with term paper summarizing the practical experience of the student. (P/NP grading only.)

##### 194HA-194HB. Special Study for Honors Students (4-4)

Seminar—2 hours; term paper. Prerequisite: open only to majors of senior standing who qualify for honors program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.)—I, II. (I, II.)

### 198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

## Internship

See **Internship Program**, below; and **UC Davis Washington Center**, on page 467.

## Internship Program

Subhash H. Risbud, Ph.D., Director

Jeanne B. Shelby, Associate Director

The Internship and Career Center 2nd and 3rd Floors, South Hall  
(530) 752-2855,  
Buehler Alumni and Visitors Center  
(530) 752-2286

### Program Areas

Linda R. Hughes, Program Manager

(*Agricultural and Environmental Sciences, Engineering and Physical Sciences, Graduate Student and Postdoctoral Career Services, Health and Biological Sciences and Liberal Arts and Business*)

### Internship Experience

The Internship and Career Center facilitates a campuswide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports. The notation briefly describes the nature and location of the internship experience. Questions pertaining to academic credit and Transcript Notation may be directed to The Internship and Career Center.

**Course Credit.** Internship courses (numbered 92 and 192) are available for credit on a variable-unit and Passed/Not Passed grading basis. A maximum of 12 units of 92 and/or 192 courses may be counted toward the 180-unit minimum needed for graduation. To qualify for the 192 course, students must have acquired 84 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by The Internship and Career Center Staff.

## Italian

(College of Letters and Science)

Julia Simon, Ph.D., Chairperson of the Department

JoAnn Cannon, Ph.D., Professor

Dennis J. Dutschke, Ph.D., Professor

Gustavo Foscarini, M.A., Senior Lecturer

Margherita Heyer-Caput, Ph.D., Associate Professor

Juliana Schiesari, Ph.D., Professor  
(*Italian, Comparative Literature*)

### Affiliated Faculty

Antonella Bassi, M.A., Lecturer

## The Major Program

The major in Italian provides a solid language background which will enable the student to develop an appreciation for Italian language and culture.

**The Program.** The Italian program is small and geared to the individual needs of the student. The use of Italian is stressed on all levels and a knowledge of the language is required for literature courses that are taught only in Italian. The Italian program actively participates in the Education Abroad Program, the Short Term Program Abroad, the International Internships Program, and the Summer Sessions International (Rome), all of which offer opportunities for travel and study in Italy.

**Career Alternatives.** Specific career opportunities for those students who have a background in foreign languages are abundant. In addition to the Foreign Service, jobs are available in business and education, both overseas and in the U.S. For example, those wishing to live (for brief or longer periods of time) and work in Italy have a choice of cities: Milan for business, Rome for international concerns in agriculture and nutrition in the F.A.O., and Florence for retail commerce and the arts, just to name a few. In the U.S., foreign-owned companies or American companies with interests in the foreign market need qualified people who are also fluent in a foreign language.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 0-24

Italian 1, 2, 3, 4, 5, and 9 (or the equivalent)..... 0-24

#### Depth Subject Matter ..... 36

Italian 101 and 105..... 8  
Upper division courses in literature, taught in the language ..... 28

Must include at least one course from two of the following literary periods:  
(a) Early Italian  
(b) Renaissance and Baroque  
(c) Eighteenth through Twentieth Centuries  
Upper division General Education courses in Italian may fulfill this requirement with approval of the major adviser.

A total of 8 units in literature may be replaced by Italian 107 (highly recommended) and/or by courses in related fields such as history, art history, music, comparative literature, English, critical theory, classics, and linguistics.

Note: All upper division courses are to be chosen in consultation with the major adviser.

#### Total Units for the Major ..... 36-60 Recommended

One year or one quarter of study abroad with the Education Abroad Program or college Latin or a Romance Language.

**Major Adviser.** M. Heyer-Caput

### Minor Program Requirements:

UNITS

#### Italian ..... 20

Italian 101 and 105..... 8  
Three upper division courses in literature chosen in consultation with major adviser..... 12

One course chosen from two of the following three areas:  
(a) Early Italian Literature  
(b) Renaissance and Baroque  
(c) Eighteenth through Twentieth Centuries  
(One of the above courses may be replaced by course 107 or by a course of literature in translation offered by the Italian Program).

**Honors and Honors Program.** The honors program comprises two quarters of study under course 194H (3 units) and course 195H (3 units), which will

include a research paper and a comprehensive examination. See also [Academic Information, on page 62](#) in this catalog.

**Education Abroad Program.** Applicable courses taken on EAP are accepted for credit in the major or the minor programs.

**Teaching Credential Subject Representative.** See Major Adviser above; see the Teaching Credential/M.A. Program on [page 102](#).

**Prerequisite Credit.** Credit will not normally be given for a course if it is a prerequisite of a course already successfully completed. Exceptions can be made only by the Program Director.

#### Short Term Language and Culture Program.

The Italian program offers an exciting study abroad program of Italian language and culture at the University for Foreigners in Perugia. The spring quarter program is directed and taught in part by a faculty member of the Italian program. All students in good standing at UC Davis are eligible to apply. There is no language requirement to participate. Language and culture instruction is offered at all levels, and students are able to earn up to 20 units of credit. The courses may be used for credit towards the Italian major or minor. For information, contact the director of the Italian program or the Education Abroad Center.

### Courses in Italian (ITA)

#### Lower Division Courses

Students offering high school language preparation as a prerequisite must take a placement test.

##### 1. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Italian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I, II, (I, II.)

##### 1S. Elementary Italian (5)

Discussion/laboratory—5 hours. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. This course is taught abroad. Not open for credit to students who have completed course 1.—III.

##### 2. Elementary Italian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of course 1 in areas of grammar and basic language skills.—II, III. (II, III.)

##### 2S. Elementary Italian (5)

Discussion/laboratory—5 hours. Prerequisite: course 1. Continuation of course 1 in the area of grammar and basic language skills. This course is taught abroad. Not open for credit to students who have completed course 2.—III.

##### 3. Elementary Italian (5)

Lecture/discussion—5 hours. Prerequisite: course 2. Continuation of grammar sequence, and practice of all language skills through cultural texts.—I, II, III. (I, II, III.)

##### 3S. Elementary Italian (5)

Lecture/discussion—5 hours. Prerequisite: course 2. Completion of grammar sequence and continuing practice of all language skills through cultural texts. This course is taught abroad. Not open for credit to students who have completed course 3.—III.

##### 4. Intermediate Italian (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 3. Review of grammar and syntax through written exercises and short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes.—I, II, III. (I, II, III.)

##### 4S. Intermediate Italian (3)

Lecture/discussion—3 hours. Prerequisite: course 3 or the equivalent. Review of grammar and syntax through written exercises and readings of short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. This course is taught abroad. Not open for credit to students who have completed course 4.—III.

##### 5. Intermediate Italian (4)

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 4. Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian.—I, II, III. (I, II, III.)

##### 5S. Intermediate Italian (3)

Lecture/discussion—3 hours. Prerequisite: course 4. Preparation to read, understand, and discuss texts written in Italian. Transition between course 4 and 10. This course is taught abroad. Not open for credit to students who have completed course 5.—III.

##### 8A. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 3 or the equivalent. Course designed to offer practice in speaking Italian. May be repeated once for credit. (P/NP grading only.)—I, III. (I, III.)

##### 8AS. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 3 or the equivalent. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8. (P/NP grading only.)—III.

##### 8B. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 8A. Course designed to offer practice in speaking Italian. (P/NP grading only.)—II. (II.)

##### 8BS. Italian Conversation (3)

Discussion—3 hours. Prerequisite: course 8A. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8B. (P/NP grading only.)—III.

##### 9. Reading Italian (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 5. Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture. Strengthening the student's command of the Italian language.—I, II, III. (I, II, III.) Cannon

##### 9S. Reading Italian (3)

Lecture/discussion—3 hours. Prerequisite: course 5. Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture as well as strengthening the student's command of the Italian language. This course is taught abroad. Not open for credit to students who have completed course 9.—III.

##### 50. Studies in Italian Cinema (4)

Lecture—2 hours; discussion—1 hour; term paper. Introduction to Italian cinema through its genres. Focus is on cinema as a reflection of and a comment on modern Italian history. Film will be studied as an artistic medium and as a form of mass communication. GE credit: ArtHum, Wrt.—II. (II.)

##### 90X. Lower Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Italian language or culture (such as Italian culture seen through film, Italian feminism, literature, or politics) through shared readings, discussions, written assignments, or special activities such as film screening or laboratory work.

##### 98. Directed Group Study (1-5)

Primarily intended for lower division students. (P/NP grading only.)

## Upper Division Courses

### 101. Advanced Conversation, Composition, and Grammar (4)

Lecture—3 hours; weekly essays. Prerequisite: course 9 or consent of instructor.—I. (I.) Heyer-Caput, Cannon

### 101S. Advanced Composition, Conversation and Grammar (4)

Lecture—3 hours; extensive writing. Prerequisite: course 9. Instruction and practice in expository writing in Italian, with emphasis on advanced grammar, organization, and vocabulary building. Course will be taught in Italy. Not open for credit to students who have completed course 101.—III.

### 104. Italian Translation and Style (4)

Lecture/discussion—3 hours; two research papers; term paper. Prerequisite: course 101 or consent of instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material.—III. (III.) Cannon

### 104S. Translation and Style (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. Course will be taught abroad. Not open for credit to students who have completed course 104.—III.

### 105. Introduction to Italian Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance, and Early Modern periods in Italy. GE credit: ArtHum.—II. (II.) Schiesari

### 105S. Introduction to Italian Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101 or consent of instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance and Early Modern periods in Italy. This course is taught abroad. Not open for credit to students who have completed course 105. GE credit: ArtHum, Div, Wrt.—III.

### 107. Survey of Italian Culture and Institutions (4)

Lecture—3 hours; term paper. Assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. GE credit: ArtHum.—III. (III.) Foscarini

### 107S. Survey of Italian Culture and Institutions (4)

Lecture/discussion—3 hours; term paper. Assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis on achievements in literature, the arts, philosophy, and socio-political institutions. Taught in English. This course is taught abroad. Not open for credit to students who have completed course 107. GE credit: ArtHum.—III.

### 108. Contemporary Issues in Italian Culture and Society (4)

Lecture/discussion—3 hours; term paper. Analysis of cultural issues in contemporary Italy: Myth and reality of imagined Italies, Italian identities; immigration and race relations; the media and popular culture. Taught in English. GE credit: ArtHum, Div, Wrt.—I. (I.) Bassi

### 108S. Contemporary Issues in Italian Culture and Society (4)

Lecture/discussion—3 hours; term paper. Analysis of cultural issues in contemporary Italy; myth and reality of imagined Italies; Italian identities; immigration and race relations; the media and popular culture.

Taught in English. This course is taught abroad. Not open for credit to students who have completed course 108. GE credit: ArtHum, Div, Wrt.—III.

### 112. Medieval and Renaissance Poetry: St. Francis to Petrarch (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the origins of Italian religious and secular poetry of the 13th and 14th centuries. A diversified poetry is illustrated in works of St. Francis, Dante, Cavalcanti, Petrarch, the Sicilian School, the Sweet New Style Poets, and other authors. Offered in alternate years. GE credit: ArtHum.—(I.) Dutschke

### 113. Dante Alighieri, Divina Commedia (Inferno, Purgatorio, Paradiso) (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of Dante Alighieri's Divina Commedia, and its role in the development of Italian language and literature. Emphasis will be placed on reading the whole poem within the historical context of the Middle Ages. GE credit: ArtHum.—III. (III.) Dutschke

### 114. Boccaccio, Decameron, and the Renaissance Novella (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the development of the short story in Italy, as exemplified in Giovanni Boccaccio's Decameron, in his predecessors and Renaissance followers. Offered in alternate years. GE credit: ArtHum.—II. Dutschke

### 115A. Studies in the Cinquecento (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Analysis of key texts from the high moment of the Italian Renaissance. The political and aesthetic legacy of humanism will be foregrounded in relation to authors such as Ficino, Ariosto, Machiavelli, Aretino, Castiglione, and Tasso. Offered in alternate years. GE credit: ArtHum.—(III.) Schiesari

### 115B. Italian Literature of the Renaissance and the Baroque: From Cellini to Marino (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 115A. Continued examination into the loss of an ideal. Emphasis on the conflicts in Michelangelo and Tasso leading to Marino, with an excursus on Galileo's role in the formation of a modern literary standard. GE credit: ArtHum.—III. (III.) Schiesari

### 115C. Italian Drama from Machiavelli to the Enlightenment (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of comic and tragic forms as critical representations of their societal and historical contexts, i.e. Machiavelli and the logic of power, Baroque dramatists in the service of counter-reformation Italy, Goldoni's comedies and bourgeois social consciousness. Offered in alternate years. GE credit: ArtHum.—I. Schiesari

### 115D. Early Modern Italian Lyric (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Examination of the poetic tradition influenced by Petrarch. Consideration of the relation between gender and genre in such poets as Petrarch, Bembo, della Casa, Tasso, Marino, Gaspara Stampa, Veronica Franco, Isabella di Morra. Offered in alternate years. GE credit: ArtHum.—I. Schiesari

### 118. Italian Literature of the Eighteenth Century (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of modern Italian literature. Emphasis on the work of Goldoni, Bettinelli, Baretti, Parini, Alfieri and Vico. GE credit: ArtHum.—I. (I.)

### 119. Italian Literature of the Nineteenth Century (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Romanticism in Italy, including Manzoni, Verga, and Verismo. GE credit: ArtHum.—II. (II.) Heyer-Caput

### 120A. Italian Literature of the Twentieth Century: The Novel (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of the novel from Svevo to the present. Emphasis on the work of Svevo, Levi, Moravia, Pavese, and Vittorini. GE credit: ArtHum.—III. (III.) Cannon, Heyer-Caput

### 120B. Italian Literature of the Twentieth Century: Poetry and Drama (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. Italian poetry with emphasis on Hermeticism; the theater of Luigi Pirandello and its role in the development of contemporary Italian drama. GE credit: ArtHum.—I. (I.) Cannon, Heyer-Caput

### 131. Autobiography in Italy (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 9 or consent of instructor. The development of representations of selfhood with particular attention to generic conditions, the confessional tradition and the problem of women's self-representation. Authors studied may include Petrarch, Tasso, Casanova, Alfieri, Zvevok, Sibilla Aleramo and Primo Levi. Offered in alternate years. GE credit: ArtHum.—III. Heyer-Caput, Schiesari

### 139B. Italian Literature in English: Boccaccio, Petrarch and the Renaissance (4)

Lecture/discussion—3 hours; term paper. Petrarch and Boccaccio and their relations to the Middle Ages and the Renaissance; the Renaissance, with particular attention to the works of Lorenzo de' Medici, Leonardo da Vinci, Machiavelli, Ariosto, Michelangelo, and Tasso. GE credit: ArtHum.—II. (II.) Dutschke

### 140. Italian Literature in English Translation: Dante, Divine Comedy (4)

Lecture/discussion—3 hours; term paper. Prerequisite: any course from the GE Literature Preparation List. Reading of Dante Alighieri's Divine Comedy, through the otherworld realms of Inferno, Purgatory, and Paradise. GE credit: ArtHum, Wrt.—I. (I.) Dutschke

### 141. Culture, Gender and the Italian Renaissance (4)

Lecture/discussion—3 hours; term paper. Prerequisite: any course from the GE Literature Preparation List. Critical analysis of texts from the Italian Renaissance. Primary concern focuses on issues such as "the dignity of Man;" education and gender politics; "high" and "low" culture and its relation to literary practices. GE credit: ArtHum, Div, Wrt.—II. (II.) Schiesari

### 142. Masterpieces of Modern Italian Narrative (4)

Lecture—1.5 hours; discussion—1.5 hours; term paper. Prerequisite: either English 3, Comparative Literature 2, or History 4C. Analysis of major works of Italian narrative fiction from unification of Italy to present. Students will learn to use representative methods and concepts which guide literary scholarship. Consideration of works within European social and cultural context. Offered in alternate years. GE credit: ArtHum, Wrt.—III. Cannon

### 145. Special Topics in Italian Literature (4)

Lecture/discussion—4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth century theater, fascism, futurism, women and literature, and the image of America, etc. May be repeated for credit when topic differs. GE credit: Wrt.—I, II, III. (I, II, III.)

### 145S. Special Topics in Italian Literature (4)

Lecture/discussion—4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth-century theater, fascism, futurism, women and literature, the image of America, etc. This course is taught abroad. May be repeated for credit. Not open for credit to students who have completed course 145. GE credit: ArtHum, Wrt.—III.

**150. Studies in Italian Cinema (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: Humanities 10 or consent of instructor. Introduction to Italian cinema through its genres. Focus on cinema as a reflection or a comment on modern Italian history. Film as an artistic medium and as a form of mass communication. GE credit: ArtHum, Div, Wrt.—II. (II.) Cannon

**190X. Upper Division Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: upper division standing and consent of instructor. Examination of a special topic in Italian language or culture through shared readings, discussions, written assignments or special activities such as film screening or laboratory work. Limited enrollment. May not be repeated for credit.

**192. Italian Internship (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing and consent of chairperson of Italian Department. Participation in government and business activities to gain work experience and to develop a better knowledge of Italian language and culture. (P/NP grading only.)

**194H. Special Study for Honors Students (3)**

Independent study—3 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Italian literature, civilization, or language studies. (P/NP grading only.)

**195H. Honors Thesis (3)**

Independent study—3 hours. Prerequisite: course 194H. Writing of an honors thesis on a topic in Italian literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.)

**197T. Tutoring in Italian (1-4)**

Seminar—1-2 hours; laboratory—1-2 hours. Prerequisite: upper division standing and consent of instructor. Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

**197TC. Community Tutoring in Italian (1-5)**

Discussion—1-2 hours; laboratory—2-4 hours. Prerequisite: consent of instructor. Field experience as Italian tutors or teacher's aides. May be repeated for credit for a total of 10 units. (P/NP grading only.)—Foscarini

**198. Directed Group Study (1-4)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****297. Individual Study (1-5)**

Prerequisite: graduate standing or consent of instructor.

**298. Group Study (1-5)**

Prerequisite: graduate standing or consent of instructor.

**299. Research (1-12)**

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

**299D. Dissertation Research (1-12)**

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)

## Japanese

See East Asian Languages and Cultures, on page 192.

## Jewish Studies

(College of Letters and Science)

David Biale, Ph.D., Program Director

**Program Office.** 2216 Social Sciences and Humanities Building  
<http://jewishstudies.ucdavis.edu>

**Committee in Charge**

Carlee Arnett, Ph.D. (*German*)

David Biale, Ph.D. (*History*)

Alisa Braun, Ph.D. (*Jewish Studies*)

Naomi Janowitz, Ph.D. (*Religious Studies*)

Lisa Materson, Ph.D. (*History*)

Diane Wolf, Ph.D. (*Sociology*)

**The Program of Study**

The Program in Jewish Studies offers students the opportunity to explore Jewish history, communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction as well as the study of classical and modern Jewish texts in translation.

The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relation between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world have lived.

The Program in Jewish Studies will be of special interest to students in History, Religious Studies, Comparative Literature and Sociology as well as other fields in the Humanities and Social Sciences.

**Minor Program Requirements:**

	UNITS
<b>Jewish Studies</b> .....	<b>20</b>
One course from Jewish Studies 10 or Religious Studies 23 .....	4
4 upper division courses selected from the following list, with at least one course in each category .....	16
(a) <i>Religion</i> : English 171A; Religious Studies 122, 124, 125	
(b) <i>Representations, Languages, and Identity</i> : Comparative Literature 147; English 179; French 108; German 141; Hebrew 100A, 100B, 100C; Jewish Studies 101, 110, 111, 112, 120, 121; Russian 159; Sociology, 174	
(c) <i>Histories</i> : History 112A, 112B, 113, 142A, 142B	

**Advising.** Jewish Studies Program office (530) 752-1640 or 754-7007

**Courses in Jewish Studies (JST)****Lower Division Course****10. Introduction to Jewish Cultures (4)**

Lecture—3 hours; term paper. Diverse Jewish cultures created over the past 2,000 years using examples from less-familiar communities such as India, China, and Ethiopia. Topics include the tensions between homeland/diaspora and questions of identity (race, nationality, culture, or religion). GE credit: SocSci, Div, Wrt.

**Upper Division Courses****101. Topics in Jewish Thought (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 10 or Religious Studies 23 or consent of instructor. Selected themes in Jewish thought in historical and social perspective. This course traces the historical development of topics in Jewish thought such as Messianism, or focuses on one specific historical period, such as modern Jewish thought. May be repeated for credit when topic differs. GE credit: ArtHum, Div, Wrt.—II. (II.)

**110. Selected Topics in Jewish Literature (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one lower division literature or Jewish Studies course or consent of instructor. Literature written about the Jewish experience, treated in its historical and social context. Examines literature written in one language, such as English, Hebrew, or Yiddish, or a theme, such as gender or modern identities, as expressed in different literary traditions. May be repeated for credit when topic differs. GE credit: ArtHum, Div, Wrt.—II. (II.)

**111. Israeli Writing Since 1960 (4)**

Lecture/laboratory—3 hours; extensive writing. Prerequisite: one course in American or European literature. Contemporary Hebrew literature, in translation, in relation to post-independence debates about religious, social, and political identity of the Jewish state; literary reflections of Israeli ethnic diversity and changing gender relations; modern Hebrew poetry and postmodern experiments in fiction. Not open for credit to students who have completed Humanities 119. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II.

**112. Readings in Jewish Writing and Thought in German Culture (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German speaking world; what it means to be "other" in the mainstream culture. May be repeated for credit twice when topic differs. Not open for credit to students who have completed Humanities 121. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I.

**120. Cinema and the American Jewish Experience (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 10 recommended. Examination of American cinema to reveal how Jewish identity is expressed and submerged, tracing the relations between religion, identity, race, politics, and art. Not open for credit to students who have completed Humanities 122. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I.

**121. Oral History and Jewish Life (4)**

Lecture/discussion—3 hours; term paper. Oral history methodologies and application to an in-depth oral history interview about Jewish life. Topics include oral history practices and ethics, immigration, migration, religious practice, ethnic relations, and community organization structures. Not open for credit to students who have completed Humanities 123. GE credit: SocSci, Wrt.—III.

## Land, Air, and Water Resources

(College of Agricultural and Environmental Sciences)  
Jan W. Hopmans, Ph.D., Chairperson of the Department

James H. Richards, Ph.D., Vice Chairperson, Soils and Biogeochemistry

Terrence R. Nathan, Ph.D., Vice Chairperson, Atmospheric Science

**Department Office.** 1110 Plant and Environmental Sciences Building (530) 752-1406;  
<http://lawr.ucdavis.edu>

**Faculty—Soils and Biogeochemistry**

**Office.** 1110 Plant and Environmental Sciences Building (530) 752-1406

Caroline S. Bledsoe, Ph.D., Professor (*Soil Science*)

Randy A. Dahlgren, Ph.D., Professor

(*Soil Biogeochemistry*)

William R. Horwath, Ph.D. Professor

(*Soil Biogeochemistry*)

Louise Jackson, Ph.D. Professor and Extension Specialist (*Soil Science*)

Alexandra Navrotsky, Ph.D., Professor  
(*Chemical Engineering and Materials Science*)  
James H. Richards, Ph.D., Professor (*Plant Nutrition*)  
Kate M. Scow, Ph.D., Professor (*Soil Science*)  
Wendy K. Silk, Ph.D., Professor (*Hydrologic Science*)  
Michael J. Singer, Ph.D., Professor (*Soil Science*)  
Randal J. Southard, Ph.D., Professor  
(*Soil Genesis/Morphology*)

### Emeriti Faculty

Conrad J. Bahre, Ph.D., Professor Emeritus  
Francis E. Broadbent, Ph.D., Professor Emeritus  
Richard G. Burau, Ph.D., Professor Emeritus  
Emanuel Epstein, Ph.D., Professor Emeritus  
André E. Läuchli, Ph.D., Professor Emeritus  
Roland D. Meyer, Ph.D., Specialist in Cooperative Extension Emeritus  
H. Michael Reisenauer, Ph.D., Professor Emeritus  
Victor V. Rendig, Ph.D., Professor Emeritus  
Dennis E. Rolston, Ph.D., Professor Emeritus  
Harry O. Walker, Ed.D., Senior Lecturer Emeritus  
Robert J. Zasoski, Ph.D., Professor Emeritus

### Affiliated Faculty

A. Toby O'Geen, Ph.D. Assistant Specialist in Cooperative Extension  
G. Stuart Pettygrove, Ph.D., Specialist in Cooperative Extension

### Faculty—Atmospheric Science

**Office.** 141 Hoagland Hall, 1110 Plant and Envi-Cort Anastasio, Ph.D., Associate Professor (Tropospheric Chemistry)  
Shu-hua Chen, Ph.D., Assistant Professor  
(*Regional Scale Meteorologist*)  
Ian Faloon, Ph.D., Assistant Professor  
(*Atmospheric Science*)  
Robert G. Flocchini, Ph.D., Professor  
(*Environmental and Resource Sciences*)  
Richard D. Grotjahn, Ph.D., Professor  
(*Atmospheric Science*)  
Terrence R. Nathan, Ph.D., Professor  
(*Atmospheric Science*)  
Kyaw Tha Paw U, Ph.D., Professor  
(*Atmospheric Science*)  
Ruth Reck, Ph.D., Professor (*Atmospheric Science*)  
Bryan C. Weare, Ph.D., Professor  
(*Atmospheric Science*)

### Emeriti Faculty

Thomas A. Cahill, Ph.D., Professor Emeritus  
John J. Carroll, III, Ph.D., Professor Emeritus  
Roger H. Shaw, Ph.D., Professor Emeritus  
Marilyn L. Shelton, Ph.D., Professor Emeritus  
Su-Tzai Soong, Ph.D., Professor Emeritus

### Affiliated Faculty

Richard L. Snyder, Ph.D., Lecturer (*Atmospheric Science*) and Specialist in Cooperative Extension

### Faculty—Hydrology

**Office.** 1110 Plant and Environmental Sciences (530) 752-1406  
Graham E. Fogg, Ph.D., Professor (*Hydrogeology*)  
Mark E. Grismer, Ph.D., Professor (*Hydrologic Science, Biological and Agricultural Engineering*)  
Peter J. Hernes, Ph.D., Assistant Professor  
(*Hydrologic Science*)  
Jan W. Hopmans, Ph.D., Professor  
(*Vadose Zone Hydrology*)  
Doug Mackay, Ph.D. Adjunct Professor  
(*Hydrologic Science*)  
Miguel A. Mariño, Ph.D., Professor Hydrologic Science, Civil and Environmental Engineering  
Gregory B. Pasternack, Ph.D., Associate Professor  
(*Watershed Hydrology*)  
Carlos E. Puentes, Ph.D., Professor (*Hydrology*)  
Susan Ustin, Ph.D., Professor  
(*Environmental and Resource Sciences*)  
Wesley W. Wallender, Ph.D., Professor (*Hydrologic Science, Biological and Agricultural Engineering*)  
Minghua Zhang, Ph.D., Adjunct Professor  
(*Hydrologic Science*)

### Emeriti Faculty

James W. Biggar, Ph.D., Professor Emeritus

Robert H. Burgy, M.S., Professor Emeritus  
Donald W. Grimes, Ph.D., Lecturer Emeritus  
Delbert W. Henderson, Ph.D., Professor Emeritus  
Theodore C. Hsiao, Ph.D., Professor Emeritus  
Allen W. Knight, Ph.D., Professor Emeritus  
Donald R. Nielsen, Ph.D., Professor Emeritus  
William O. Pruitt, Jr., Ph.D., Lecturer Emeritus  
Frank E. Robinson, Ph.D., Lecturer Emeritus  
Verne H. Scott, Ph.D., Professor Emeritus  
Kenneth K. Tanji, Sc.D., Professor Emeritus

### Affiliated Faculty

David A. Goldhamer, Ph.D., Lecturer (*Hydrologic Science*) and Specialist in Cooperative Extension  
Stephen Grattan, Ph.D., Lecturer (*Hydrologic Science*) and Specialist in Cooperative Extension  
Blaine R. Hanson, Ph.D., Lecturer (*Hydrologic Science*) and Specialist in Cooperative Extension  
Thomas Harter, Ph.D., Specialist in Cooperative Extension  
Terry L. Prichard, M.S., Lecturer (*Hydrologic Science*) and Specialist in Cooperative Extension  
Lawrence J. Schwankl, Ph.D., Lecturer (*Hydrologic Science*) and Specialist in Cooperative Extension

Land, Air, and Water Resources is a multidisciplinary department with faculty who specialize in atmospheric, plant, environmental resource, soil, and water sciences, hydrology, and water engineering. Teaching and research focus on both agricultural and environmental science. The faculty contribute to numerous other undergraduate and graduate programs in the Colleges of Letters and Science, Engineering, and Agricultural and Environmental Sciences.

**Major Programs.** Undergraduates in the department major in Atmospheric Science, Environmental and Resource Sciences, Hydrology, and Soil and Water Science; see [http://lawr.ucdavis.edu/academic\\_programs.htm](http://lawr.ucdavis.edu/academic_programs.htm).

**Advising Center** is located in 1152 Plant and Environmental Sciences Building (530) 752-1669.

**Graduate Study.** Graduate work offered in the area of resource sciences is Atmospheric Science, Hydrologic Sciences, and Soils and Biogeochemistry. Detailed information can be obtained from graduate advisers for these areas, from the Graduate Announcement, and at [http://lawr.ucdavis.edu/academic\\_programs.htm](http://lawr.ucdavis.edu/academic_programs.htm).

**Courses.** See courses listed under Atmospheric Science, Hydrologic Sciences, Hydrology, Environmental and Resource Sciences, and Soil Science. See also the Web sites listed above.

## Landscape Architecture

(College of Agricultural and Environmental Sciences)

Heath Schenker, MA, Chairperson, Landscape Architecture Program

**Department Office.** 142 Walker Hall (530) 752-3907; <http://lda.ucdavis.edu>

### Faculty

Mark Francis, M.L.A., Professor  
Steven E. Greco, Ph.D., Assistant Professor  
Dean MacCannell, Ph.D., Professor  
E. Byron McCulley, B.S.L.A., Lecturer  
Edward S. McNiel, M.L.A., Lecturer  
Patsy Eubanks Owens, M.L.A., Associate Professor  
Heath Schenker, M.A., Associate Professor  
Jeff Loux, Ph.D., Assistant Adjunct Professor  
Eric Larsen, Ph.D., Assistant Research Scientist  
Lorence Oki, Ph.D., Cooperative Extension Specialist

### Emeriti Faculty

Robert L. Thayer, Jr., M.A., Professor Emeritus  
Nigel J.R. Allan, Ph.D., Professor Emeritus

## The Major Program

Landscape architecture is the planning and design of land areas where human use requires adaptation or conservation of the environment. Students who study landscape architecture are concerned about the welfare of the environment and the people who use it. They are capable of solving physical problems and are able to visualize and "think" in terms of spaces and three-dimensional concepts. The program is fully accredited by the American Society of Landscape Architects, which is the only organization professionally sanctioned to grant landscape architectural accreditations in the United States. The program was last reviewed in 2006.

**The Program.** The curriculum balances creativity and visual and spatial skills with technological expertise and a thorough background in physical, natural, and social sciences. Students develop proficiency at problem solving relating to design of parks, urban open spaces, energy-efficient neighborhoods, land reclamation projects, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and other sensitive land areas. The program stresses a process-oriented approach to design and emphasizes environmental and community values.

**Preparatory Requirements.** Students are admitted to the landscape architecture major only after submitting a portfolio for review and selection by the faculty. Contact the Landscape Architecture Advising Office for further information, 201 Walker Hall (530) 754-8628.

**Career Alternatives.** Graduates may find jobs in private landscape architectural firms or public agencies and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and design-related fields.

## B.S. Major Requirements:

	UNITS
<b>English Composition Requirement .....</b>	<b>8</b>
English 3, University Writing Program 1, 18, 19, 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 104A, 104B, 104C, 104D, or 104E .....	4
Communication 1 .....	4
<b>Preparatory Subject Matter .....</b>	<b>61-70</b>
Environmental Horticulture 6 .....	4
One course from Mathematics 16A; Statistics 13; Computer Science 10 .....	3-4
One course from Chemistry 2A, 10; Physics 1A, 10; Geology 1; Geography 1; or Soil Science 10 .....	3-5
One course from Landscape Architecture 2, Geography 2, or 10 .....	3-4
Two courses from Anthropology 2, 3, 20, Economics 1A, 1B, Psychology 1, Political Science 1, 2, 3, 4, 5, 7, Sociology 1, 2, 3, 4, 5, or 25 .....	8-10
Two courses from Art Studio 2, 5, 16, 142, Design 125, any course from History, Music, Dramatic Art, Philosophy, Art History, language or literature .....	8-10
Landscape Architecture 1, 21, 23, 30, 50, 60, 70 .....	28
<b>Breadth/General Education .....</b>	<b>0-24</b>
See General Education requirement.	
<b>Depth Subject Matter .....</b>	<b>44-47</b>
Landscape Architecture 160, 161, 170, 193A, 193B .....	20
Four studios from Landscape Architecture 180/181 or 191 .....	17-20
Landscape Architecture 120 or equivalent .....	4
Landscape Architecture 190 (three quarters) .....	3
Internship (Landscape Architecture 192) recommended.	
<b>Restricted Electives .....</b>	<b>32</b>
Psychology 155 .....	4

**Quarter Offered:** I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

**General Education (GE) credit:** ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

Psychology 155 ..... 4  
Two courses from Environmental Horticulture 105, 133; Plant Biology 147; Plant Biology 102; Wildlife Fish, and Conservation Biology 156. (One course must be Environmental Horticulture 105 or Plant Biology 102.)..... 8  
Select 20 units of upper division courses in consultation with adviser ..... 20

**Unrestricted Electives..... 0-32**

**Total Units for the Major..... 180**

**Major Adviser.** P. Owens

**Advising Center** is located in 201 Walker Hall (530) 754-8628.

**Graduate Study.** Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. Department faculty are active members of various graduate groups: Community Development, Geography, Transportation Technology and Policy and Ecology. Faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, community participation in urban landscape design, landscape ecology, resource management, bioregionalism, and regenerative landscape systems. Graduate students pursue more focused interests, expanding their professional expertise and/or conducting advanced research in landscape architecture or related disciplines.

## Courses in Landscape Architecture (LDA)

### Lower Division Courses

#### 1. Landscape Meaning (4)

Lecture—3 hours; discussion—1 hour. Overview of the meaning of landscapes as manifested in designed and natural landscapes, everyday and sacred environments, parks, plazas, community gardens and found spaces. Introduction to the profession of landscape architecture and methods used to design, plan and manage landscapes. Not open for credit to students who have taken course 40. GE credit: ArtHum or SocSci, Wrt.—I. (I.)

#### 2. Place, Culture and Community (4)

Lecture—4 hours. Introduction to the relationship of social and spatial arrangements. Basic social-science concepts such as class, status, role, kinship, ritual, myth, alienation, etc., introduced through site-specific case studies of both historical and contemporary communities. GE credit: SocSci, Wrt.—III. (III.) MacCannell

#### 21. Landscape Drafting and Visualization (4)

Studio—8 hours; two all-day field trips. Prerequisite: course in free-hand drawing recommended. Development of idea expression through graphic media and the use of drawing techniques for visual representation, including plan, section, and axonometric drawing. Includes an introduction to computerized drafting and drawing.—I. (I.)

#### 23. Computer Graphics for Landscape Architecture (4)

Studio—8 hours; two all-day field trips. Prerequisite: course 21. Landscape architectural communications explored through the computer. Includes computerized drafting, drawing, rendering, desktop publishing, and photorealistic simulation.—II, III. (II, III.)

#### 30. History of Landscape Architecture (4)

Lecture—3 hours; discussion—1 hour. Introduction to the history of landscape architecture, emphasizing landscape design as a product of cultural, political, social, and environmental factors. Topics include the history of gardens, parks, community design and environmental planning. Not open for credit to students who have taken course 140. GE credit: ArtHum, Wrt.—II. (II.) Schenker, McNiel

#### 50. Site Ecology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A or 10 or an introductory course in biology, botany, or plant science. Priority

given to Landscape Architecture majors. Introduction to ecological concepts, including nutrient dynamics, population regulation, community structure, ecosystem function. Principles will be applied to human activities such as biological conservation, ecological restoration, landscape planning, and management. Weekly laboratory devoted to field exercises in local ecosystems. Not open for credit to students who have taken course 153. GE credit: SciEng.—III. (III.) Greco

#### 60. Technology I: Grading and Drainage (4)

Studio—8 hours. Prerequisite: courses 21 and 23 or consent of instructor. Priority given to Landscape Architecture majors. Topographic and grading problems in landscape engineering: drainage plans, grading plans, spot elevations, road alignment, sections and profiles and cut and fill calculations. Not open for credit to students who have taken course 132.—III. (III.) McCulley

#### 70. Basic Landscape Design Studio (4)

Studio—8 hours; field trips. Prerequisite: courses 1, 21, 30 or consent of instructor. Priority given to Landscape Architecture majors. Introduction to basic aesthetic, functional, social, and environmental considerations in landscape design. Provides a broad foundation in landscape design methodologies and skills necessary to create environmentally and socially responsible landscape designs. Not open for credit to students who have taken course 11.—II. (II.) Owens

### Upper Division Courses

#### 120. Advanced Computer Applications (4)

Studio—8 hours; two all-day field trips. Prerequisite: course 23; open to majors in Landscape Architecture only. Studio work using computer-aided design, geographic information systems, and other advanced computer programs.—(III.) McNiel

#### 160. Technology 2: Construction Materials and Detailing (4)

Studio—8 hours. Prerequisite: courses 21, 23, and 60. Priority given to Landscape Architecture majors. Introduction to materials and methods in landscape construction, including properties of common construction materials (stone, concrete and wood), detailing, preparation of cost estimates and specifications, design of drainage systems, fountains and roof decks. Not open for credit to students who have taken course 133.—I. (I.) McCulley

#### 161. Technology 3: Professional Practice and Construction Documents (4)

Studio—8 hours. Prerequisite: courses 21, 23, 60 and 160. Legal and professional aspects of landscape architecture, including the development of construction documents (drawings and specifications), proposal writing, fee calculations, project management, cost estimation, and insurance.—II. (II.) McCulley

#### 168. Mountain Landscapes and Life (3)

Lecture—3 hours. Prerequisite: an introductory course in cultural geography, cultural anthropology or landscape theory. Course provides knowledge of mountain landscapes, explains why different mountain societies exploit and reject resources available, examines myths about mountain landscapes that influence individual and collective behavior of residents and visitors. Examples from Himalayas, Andes, Alps, and Rockies. GE credit: ArtHum or SocSci, Wrt.—III. (III.) Allan

#### 170. Field Studio in Landscape Architecture (5)

Lecture—2 hours; workshop—6 hours. Prerequisite: courses 1, 21, 23, 30, 50, 60 and 70 or consent of instructor. Field study and problem solving experience for juniors in the landscape architecture major. Analysis of complex landscape design and planning problems. Two all-day, weekend field trips required.—I.

#### 180A. Special Topics in Landscape Architecture: Postmodern Landscapes (2)

Lecture—2 hours. Prerequisite: upper division standing. Basic principles of critical theory and postmodern modes of analysis. Application to interpretation

and change of designed environment. Offered in alternate years. Not open for credit to students who have taken course 185.—MacCannell

#### 180C. Special Topics in Landscape Architecture: Art of the Environment (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture and Design majors. Introduction to environmental art. Encouragement of critical thinking about the intersection of art, landscape and environmental issues. Offered in alternate years.—Schenker

#### 180G. Special Topics in Landscape Architecture: Landscape and Regional Land Planning (2)

Lecture—2 hours. Prerequisite: upper division standing. Theories, laws, and practices of community planning. Creation of livable and sustainable communities and natural landscapes, Smart growth, new urbanism, neo-traditional town planning, transit-oriented, and sustainable communities. Traditional master planning vs. participatory planning and design approaches. Offered in alternate years.

#### 180H. Special Topics in Landscape Architecture: The Bioregional Landscape (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture majors. Emerging concepts of bioregionalism and community-based ecological regional landscape planning. Extensive examples from within the Sacramento Valley Bioregion. Offered in alternate years.

#### 180I. Special Topics in Landscape Architecture: Regenerative Landscape Systems (2)

Lecture—2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture majors. Theories, basic techniques and applications for various systems by which landscapes regenerate and sustain life (both human and non-human) and culture over time. Offered in alternate years.—(III.)

#### 180J. Special Topics in Landscape Architecture: Community Participation in Design (2)

Lecture—2 hours. Prerequisite: upper division standing. History and role of community participation in landscape design; methods of community involvement, including workshop techniques. Introduction to design processes, including public participation. Offered in alternate years.—Owens

#### 180K. Special Topics in Landscape Architecture: Social Factors in Landscape Architecture (2)

Lecture—2 hours. Prerequisite: Psychology 144 and upper division standing. Concepts in environmental psychology as they relate to landscape architecture. Discussion of needs of various user groups of a land area. Introduction to post occupancy evaluations. Offered in alternate years.—Owens

#### 180L. Special Topics in Landscape Architecture: Public Open Space (2)

Lecture—2 hours. Prerequisite: upper division standing. Intensive study of public open spaces, including parks, plazas, playgrounds, greenways and community gardens. Current issues associated with design and management of the public environment of cities. Offered in alternate years.—(II.) Francis

#### 180M. Special Topics in Landscape Architecture: Urban and Community Design (2)

Lecture—2 hours. Prerequisite: upper division standing. Theories and methods of community and neighborhood design. Past and contemporary approaches including new urbanism, planned unit development, mixed use, pedestrian and transit-oriented development. Issues of open space and community form. Offered in alternate years.—Francis

#### 180N. Special Topics in Landscape Architecture: Planting Design (2)

Lecture—2 hours. Prerequisite: upper division standing and Environmental Horticulture 6. Develop an understanding of the sensory, visual and functional importance of plants in the landscape. Visualization

and design of planted landscapes. Development of planting plans. Offered in alternate years. Not open for credit to students who have taken course 156.

**180O. Special Topics in Landscape Architecture: Current Issues in Landscape Architecture (2)**

Lecture—2 hours. Prerequisite: course 1 and 30. Priority will be given to Landscape Architecture and Design majors. Study of current issues in landscape architecture with emphasis on design and/or design history. Offered in alternate years.

**180Q. Special Topics in Landscape Architecture: Historic Preservation (2)**

Lecture—2 hours. Prerequisite: upper division standing. Roots and present focus of historic preservation movement; current philosophies and laws governing preservation, restoration, and revitalization as they affect landscape architects. Offered in alternate years.—McNiel

**181A. Postmodern Landscapes Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180A concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180A. Offered in alternate years.—MacCannell

**181C. Art of the Environment Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180C concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180C. Offered in alternate years.—Schenker

**181F. Landscape Ecology and Design Planning Studio (3)**

Studio—6 hours. Prerequisite: courses 21, 23, 50, 60, and 170, 180F concurrently. Design theory and methods to real-world projects in ecology. Ecological principles and their application in biological conservation, ecological restoration, and landscape planning, design, and management. Field trip required. Offered in alternate years.—Il. Greco

**181G. Special Topics in Landscape Architecture: Landscape and Regional Land Planning Studio (3)**

Studio—6 hours. Prerequisite: course 170, course 181G concurrently. Applications of recent models and practices of urban planning and design to create livable and sustainable cities, towns, villages, rural, and natural landscapes. Testing of models by creating plans and designs for new communities, and for urban infill, restoration or redevelopment projects. Field trip required. Offered in alternate years.—McNiel, Loux

**181H. The Bioregional Landscape Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180H concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180H. Offered in alternate years.

**181I. Regenerative Landscape Systems Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180I concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180I. Offered in alternate years.

**181J. Community Participation in Design: Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180J concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180J. Offered in alternate years.—Owens

**181K. Social Factors in Landscape Architecture Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170 and Psychology 144; course 180K concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180K. Offered in alternate years.—Owens

**181L. Public Open Space Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180L concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180L. Offered in alternate years.—Francis

**181M. Urban and Community Design: Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180M concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180M. Offered in alternate years.—Francis

**181N. Planting Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170 and Environmental Horticulture 6; course 180N concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180N. Offered in alternate years.

**181O. Current Issues Design and Planning Studio (3)**

Studio—6 hours; one field trip required. Prerequisite: course 170; course 180O concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180O. Offered in alternate years.

**185. Concepts and Methods in Geographic Information Systems (4)**

Lecture/laboratory—8 hours. Prerequisite: Applied Biological System Technology 180 or Agricultural Management and Rangeland Resources 180 or course 50 or consent of instructor. Major concepts and methods in representation and analysis of data in geographic information systems (GIS). Methods to create spatial data sets from analog and digital data sources such as aerial photography and maps; data structures, data management, database design, georeferencing, georectification, surface models, analysis, and visualization of spatial data. (Same course as Applied Biological System Technology 185.)—Greco

**190. Proseminar in Landscape Architecture (1)**

Seminar—1 hour. Lectures and discussion of critical issues in landscape architecture. May be repeated three times for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**191. Workshop in Landscape Architecture (2-12)**

Seminar—1 hour; workshop—3 hours. Prerequisite: courses 1, 70, and 170 or consent of instructor. Priority to Landscape Architecture majors. Faculty initiated workshops featuring advanced studies and applications of original work in landscape architecture. May be repeated for up to 20 units of credit.—I, II, III.

**192. Internship in Landscape Architecture (1-12)**

Internship. Prerequisite: senior standing in Landscape Architecture. Professional field experience in landscape architecture. May be repeated for a total of 12 units. (P/NP grading only.)

**193A. Senior Project in Landscape Architecture (3)**

Studio—6 hours. Prerequisite: senior standing in Landscape Architecture. Projects will focus on a critical area of landscape architectural design, plan-

ning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only.)—II. (II.)

**193B. Senior Project in Landscape Architecture (4)**

Studio—8 hours. Prerequisite: course 193A and senior standing in Landscape Architecture. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only.)—III. (III.)

**197T. Tutoring in Landscape Architecture (1-5)**

Tutoring—3-15 hours. Prerequisite: consent of instructor. Tutoring in Landscape Architecture courses. (P/NP grading only.)

**198. Directed Group Study in Landscape Architecture (1-5)**

Prerequisite: consent of instructor. Directed group study. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates in Landscape Architecture (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses**

**201. Theory and Philosophy of the Designed Environment (4)**

Seminar—4 hours. Prerequisite: course 140 or the equivalent; graduate standing or consent of instructor. Examines the major theories of environmental design. Epistemology of design serves as framework to examine modern landscape architecture, architecture, urban design and planning. Normative theories of design are reviewed along with the social and environmental sciences. Offered in alternate years.—Francis

**202. Methods in Design and Landscape Research (4)**

Seminar—4 hours. Prerequisite: Statistics 102 or the equivalent; graduate standing or consent of instructor. Explores many of the research and advanced design and planning methods employed in landscape architecture. Exercises provide the student with a vehicle for designing independent landscape research and creative activities. Lectures provide an historical overview of research methodology. Offered in alternate years.—Owens

**204. Case Studies in Landscape Design and Research (4)**

Seminar—4 hours; field trip required. Prerequisite: graduate standing in Landscape Architecture, Ecology, Geography or Community Development or consent of instructor. Real-world designed environment situations where creative activity and/or basic research is the primary product. May be repeated for credit for a total of 12 units. Offered in alternate years.—(I, II, III.)

**210. Advanced Landscape Architecture Studio (4)**

Laboratory—8 hours. Prerequisite: course 113 or the equivalent; graduate standing or consent of instructor. Exposes students to real-world, designed-environment situations where creative activity and/or basic research is the primary product. Advanced landscape problems will be utilized at the site, urban or rural scale. Offered in alternate years.

**220. Public Space and Culture (3)**

Seminar—3 hours. Prerequisite: course 182 or the equivalent; graduate standing or consent of instructor. Explores the public environment of cities including their streets, parks, and squares. Public life and culture of American cities is examined and design responses to this culture evaluated. Typology is used to identify spaces. Offered in alternate years.—Francis

**230. Landscape and Memory (4)**

Seminar—4 hours; term paper. Prerequisite: graduate standing or consent of instructor. Theories of memory from other fields (critical theory, psychoanalysis, history) applied to landscape design, espe-

cially heritage and tourist sites. The relationships between place, memorial, and event. Offered in alternate years.—MacCannell

#### 240. Historic, Cultural Landscapes: Concept, Perception, Preservation (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Historic cultural landscapes, as defined by the National Register of Historic Places. Identification and analysis of aerial extent, structured makeup, integrity, and historical significance using common and emerging methods and tools. Offered in alternate years.—McNiel

#### 250. Life-Place: Bioregional Theory and Principles (4)

Seminar—3 hours; tutorial—1 hour. Prerequisite: graduate standing or consent of instructor. The emerging concept of bioregionalism as a hypothesis for environmental quality; theoretical structures and practical methods by which individuals and groups identify with naturally-bounded "life-places" or "bioregions" and strive to live respectfully and reciprocally within them. Offered in alternate years.

#### 260. Landscape and Power (4)

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. How various representations of landscape have historically worked as agents of cultural power. Course framework is interdisciplinary, including studies of landscape representation in literature, art, photography, cartography, cinema, and landscape architecture.—Schenker

#### 270. Environment and Behavior (4)

Seminar—3 hours; tutorial—1 hour. Prerequisite: graduate standing or consent of instructor; Psychology 144 recommended. Factors that influence human's interaction with their surroundings and the mechanisms used for recognizing and addressing general and specific human needs in community design and development decisions. Offered in alternate years.—Owens

#### 280. Landscape Conservation (3)

Seminar—3 hours. Prerequisite: contact department for prerequisite courses; graduate standing or consent of instructor. Focus is on land planning, design, and management techniques to further the goal of resource preservation. Examines current critical theory in the establishment and management of conservation areas. Offered in alternate years.—Greco

#### 290. Graduate Seminar in Landscape Architecture (2)

Seminar—2 hours. Prerequisite: graduate standing and consent of instructor. Seminar on selected topics in landscape architecture research, analysis, planning, design, communication, or education. May be repeated for credit. (S/U grading only.)

#### 297. Practicum in Landscape Architecture (1-10)

Independent study—1-10 hours. Prerequisite: graduate standing and consent of instructor. Opportunity for students to work directly in the field with academics at other institutions or with professionals in an office setting. Gives experience beyond the confines of campus and allows direct interaction with the community. (S/U grading only.)

#### 298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

#### 299. Directed Individual Research for Graduate Students (1-12)

Requires consent of instructor. May be repeated for credit. (S/U grading only.)

### Professional Course

#### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Landscape Restoration

(College of Agricultural and Environmental Sciences)

This minor is of particular interest to students majoring in Wildlife, Fish, and Conservation Biology, Environmental Biology and Management, Environmental and Resource Sciences, Landscape Architecture, Biological Sciences, Evolution and Ecology and Plant Biology. Biological Sciences 1C is a prerequisite to some courses in the minor. The minor is sponsored by the Department of Plant Sciences.

#### Landscape Restoration..... 19-25

Select one of Environmental Horticulture 144/ Environmental and Resource Sciences 144/ Plant Biology 144, Environmental Science and Policy 155, Evolution and Ecology 121, Evolution and Ecology 117/Plant Biology 117, Plant Biology 102, 147 ..... 4-5  
Select one of Environmental Horticulture 100, 130, 133, Plant Biology 119, 176..... 3-4  
Soil Science 10 or 100..... 3-5  
Environmental Horticulture 160 and 160L ..... 4  
Select one of Plant Sciences 130, Environmental Horticulture 150, Environmental Science and Policy 155L, Landscape Architecture 180F, 180H, 180I, Wildlife, Fish, and Conservation Biology 155..... 2-4  
Plant Sciences 192..... 3

**Minor Adviser.** T.P. Young (*Plant Sciences*)

**Advising Center** is located in 1224 Plant and Environmental Sciences (530) 752-7738.

## Latin

See **Classics**, on page 171.

## Latin American and Hemispheric Studies

(College of Letters and Science)

The minor in Latin American and Hemispheric Studies offers students the opportunity to explore connections throughout the Western Hemisphere from an array of perspectives across multiple academic fields.

The minor is made up of six courses, arranged in three tiers: Basic (one lower division course on the history of Latin America); Core (two introductory upper division courses chosen from a designated list of fields other than History); and Elective (three additional upper division courses from a designated list of courses that focus primarily on Latin American and/or Hemispheric issues). Students are strongly encouraged to develop proficiency in Spanish, either through course work (such as completion of Spanish 24 or 33), or through life experience.

### Minor Program Requirements

UNITS

#### Latin American and Hemispheric Studies ..... 24

Basic Courses ..... 4  
One course from History 7A, 7B, 7C  
Core Courses ..... 8  
One course each from two of the following categories:  
(a) Anthropology 144;  
(b) Native American Studies 115;  
(c) Spanish 150 or 151;  
(d) Political Science 143

Elective Courses..... 12

Three courses selected from the following list to achieve a total of 24 units: African and African American Studies 107A, 155, 163; Anthropology 130C, 146; Art History 151; Chicana/o Studies 130; Comparative Literature 151, 152, 165; Native American Studies 120, 125, 133, 181A, 181B, 181C, 184; History 160, 162, 163A, 163B, 164, 165, 166A, 166B, 167, 168, 169A, 169B; Spanish 117, 149, 153, 154, 155, 156, 157, 158, 159, 170, 171, 172, 174, 176

**Minor Adviser.** T. Holloway in 5211 Social Sciences and Humanities Building (530) 752-3046

## Law, School of

Rex R. Perschbacher, J.D., Dean

Kevin Johnson, J.D., Associate Dean (Academic Affairs and Research)

Hollis L. Kulwin, J.D., Assistant Dean (Student Affairs)

Mary A. Grivna, B.A., Assistant Dean (Administration)

George S. Grossman, LL.B., M.S.L.S., Director (Law Library)

**Dean's Office.** 1011 Martin Luther King, Jr. Hall (530) 752-0243; <http://www.law.ucdavis.edu>

### Faculty

Michelle Alexander, J.D., Acting Professor

Diane M. Amann, J.D., Acting Professor

Antonia E. Bernhard, J.D., Lecturer

Andrea K. Bjorklund, J.D., Acting Professor

Alan E. Brownstein, J.D., Professor

Jennifer M. Chacón, J.D., Acting Professor

Anupam Chander, J.D., Professor

Joel C. Dobris, LL.B., Professor

Holly G. Doremus, J.D., Professor

Christopher S. Elmendorf, J.D., Acting Professor

Floyd F. Feeney, LL.B., Professor

Arturo Gándara, J.D., Professor

Joan Gerbasi, M.D., Assistant Clinical Professor

(School of Medicine)

George S. Grossman, LL.B., M.S.L.S., Professor

Robert W. Hillman, J.D., Professor

Bill Ong Hing, J.D., Professor

Edward J. Imwinkelried, J.D., Professor

Elizabeth E. Joh, J.D., Acting Professor

Margaret Z. Johns, J.D., Senior Lecturer

Kevin R. Johnson, J.D., Professor

Thomas W. Joo, J.D., Professor

Leslie A. Knight, J.D., Lecturer

Hollis L. Kulwin, J.D.

Leslie A. Kurtz, J.D., Professor

Evelyn A. Lewis, J.D., Professor

Carlton Larson, J.D., Acting Professor

Albert C. Lin, J.D., Acting Professor

Robert Merges, J.D., LL.M., J.S.D., Professor

Robert Mikos, J.D., Acting Professor

Millard Murphy, J.D., Lecturer

John B. Oakley, J.D., Professor

Angela I. Onwuachi-Willig, J.D., Acting Professor

Amagda Perez, J.D., Lecturer

Rex R. Perschbacher, J.D., Professor

John W. Poulos, J.D., Professor

Lisa R. Pruitt, J.D., Acting Professor

Cruz Reynoso, LL.B., Professor

Ben A. Rich, J.D., Ph.D., Professor

Charles L. Scott, M.D., Professor

(School of Medicine)

Daniel L. Simmons, J.D., Professor

James F. Smith, J.D., Senior Lecturer

Madhavi Sunder, J.D., Professor

Jerrold Tannenbaum, J.D. Professor

(School of Veterinary Medicine)

Martha S. West, J.D., Professor

Carter C. White, J.D., Lecturer

Tobias B. Wolff, J.D., Acting Professor

Bruce A. Wolk, J.D., Professor

**Emeriti Faculty**

John D. Ayer, J.D., LL.M., Professor Emeritus  
 Edward L. Barrett, Jr., J.D., Professor Emeritus  
 Florian Bartosic, B.C.L., LL.M., Professor Emeritus  
 Carol S. Bruch, J.D., Professor Emeritus  
 Harrison C. Dunning, LL.B., Professor Emeritus  
 Daniel Wm. Fessler, J.D., S.J.D., Professor Emeritus  
 Gary S. Goodpaster, J.D., Professor Emeritus  
 James E. Hogan, LL.B., Professor Emeritus  
 Raymond I. Parnas, J.D., LL.M., S.J.D., Professor Emeritus  
 Edward H. Rabin, LL.B., Professor Emeritus  
 Mortimer D. Schwartz, J.D., LL.M., Professor Emeritus  
 Richard C. Wydick, LL.B., Professor Emeritus

**Courses of Instruction.** The following courses for students enrolled in the School of Law are set up for the semester-system basis only. Instruction dates can be found at the end of the School of Law chapter of this catalog. For current schedule of classes, contact the School of Law.

**Courses in Law (LAW)****Professional Curriculum****First Year Courses****200. Introduction to Law (1)**

Discussion—1 hour. Introduction to basic concepts of the law, the historical roots of common law and equity, the precedent system in its practical operation, the modes of reasoning used by courts and attorneys, and the fundamentals of statutory interpretation. (S/U grading only.)

**200A. Introduction to the Law of the United States (2)**

Discussion—2 hours. History and fundamental principles of the United State's legal system. Important current legal issues, developments and trends. Required for LL.M. students who have not attended a U.S. law school. Fall semester only. (S/U grading only.)

**201. Property (4)**

Discussion—5 hours. A study of doctrines and concepts of property law with primary emphasis on real property. Course coverage includes: the estates in land system; the landlord-tenant relationship, conveyancing, and private and public land use control.

**202. Contracts (5)**

Discussion—5 hours. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and non-commercial transactions. Inquiry is made into the means by which traditional doctrine adjusts or fails to adjust to changing social demands.

**203. Civil Procedure (5)**

Discussion—5 hours. A study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

**204. Torts (5)**

Discussion—5 hours. Familiarizes students with legal rules, concepts and approaches pertinent to the recovery for personal injuries, property damages and harm done to intangible interests.

**205. Constitutional Law I (4)**

Discussion—4 hours. The principles, doctrines and controversies regarding the basic structure of and division of powers in American government. Specific topics include judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among the branches of the federal government.

**206. Criminal Law (3)**

Discussion—3 hours. Study of the bases and limits of criminal liability. Coverage of the constitutional, statutory, and case law rules which define, limit, and provide defenses to individual liability for the major criminal offenses.

**207. Legal Research (1)**

Discussion/laboratory—1 hour. Research related issues in the practice of law, including the use of sources of law and secondary authority, computer-

assisted legal research, writing research memoranda, and basic citation form. Class discussions followed by research assignments.

**208. Legal Writing (2)**

Lecture—2 hours. Instruction in the form and substance of writing. A variety of law-related documents will be discussed and drafted. An experience in oral advocacy will be included. Graded on the basis of the writing and advocacy assignments. No final examination.

**Second and Third Year Courses**

- (a) General/Topical Survey Courses: 273, 285C, 285T, 224
- (b) Business Law: 215, 215A, 220, 228, 232, 236A, 236B, 242, 243, 247, 253, 255, 266A, 269A, 269C, 271A, 271B, 284, 286D, 291A, 291B
- (c) Constitutional Law: 216A, 218, 240, 288, 288A
- (d) Criminal Law: 210, 210A, 213, 213A, 227A, 245, 245T, 276, 286D
- (e) Estate Planning: 214, 223, 221
- (f) Environmental Law: 235, 235A, 256, 264, 264A, 265, 282, 285, 285A, 285B, 285C, 285T, 289A, 409, 450
- (g) Family Law: 225, 242, 272, 435
- (h) Human Rights and Social Justice: 213A, 218, 222, 222A, 226, 231, 231A, 248B, 250, 259, 260, 267, 267B, 268, 277, 285T, 286D, 288, 292, 408, 408A
- (i) Intellectual Property and Technology: 209A, 217, 248A, 266A, 274, 274C, 274D, 285C, 289A, 295A, 296, 296A, 296T
- (j) International, Comparative and Foreign Law: 210, 213, 213A, 224, 248, 248B, 248F, 249, 242, 252, 268, 270, 274B, 290 291A, 291B, 292, 440
- (k) Labor and Employment Law: 248F, 251, 255, 260, 279, 285C
- (l) Legal Theories and Ethics: 237, 250, 258, 259, 284, 286C, 286D
- (m) Medicine and Mental Health Law: 212, 241, 286, 286A, 286B, 286C
- (n) Procedure and Jurisdiction: 242, 246, 283
- (o) Public Law and Policy 235, 240, 240A, 248, 254, 257, 257A, 257B, 279, 287T, 293, 408A
- (p) Skills and Litigation: 211, 219, 229, 239, 261, 263A, 278, 280, 297, 409, 410A, 410B, 410C, 412, 413, 414, 415
- (q) Taxation: 214, 220, 247B, 255, 271, 271A, 271B
- (r) Clinical Programs- Externships: 425, 430, 445, 450, 455, 460, 470
- (s) Clinical Programs - In-House Clinicals: 420, 435, 440, 480
- (f) Individual and Group Study: 411, 411B, 416, 417, 418, 419, 495, 499

**209A. Patent Law (3)**

Discussion—3 hours. Prerequisite: course 274 or consent of instructor. This course covers all essential aspects of patent law: patentable subject matter, novelty, utility, nonobviousness, enablement, prosecution, infringement, and remedies.

**210. Criminal Justice Administration Seminar (2)**

Seminar—2 hours. This course compares U.S. criminal procedure with that of other countries, particularly the differing roles of the prosecutor, defense counsel, and the judge. Limited enrollment.

**210A. Privatization of Criminal Justice Seminar (2)**

Seminar—2 hours. Prerequisite: Prior social theory or criminal procedure knowledge not required; completion of course 227A strongly recommended. Analyze the legal, historical, and sociological aspects of the growing private sector provision of criminal justice services traditionally assumed by government, including prisons, policing, and adjudication. Limited enrollment.

**211. Negotiation (2)**

Discussion—2 hours. Theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes. Limited enrollment.

**212. Law and the Mental Health System (3)**

Discussion—3 hours. Mental illness, the regulation of mental health professionals, the patient-professional relationship, mental health professionals as expert witnesses, and deprivation of liberty and property based upon mental disorder. With the prior written approval of the instructor, the advanced legal writing requirement may be satisfied by the research paper required for this course.

**213A. Transnational Criminal Law (3)**

Discussion—3 hours. Prerequisite: course 205; course 206. Will examine the laws responses to a particular aspect of globalization, transnational crime. The course will explore the phenomenon of transnationality and how it affects the power of nationstates, acting alone or together, to prosecute certain crimes.

**214. Estate and Gift Tax (3)**

Discussion—3 hours. Prerequisite: course 220; course 221 recommended. Fundamentals of federal transfer taxation, including the estate tax, the gift tax, and the generation-skipping transfer tax.

**215. Business Associations (4)**

Discussion—4 hours. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms.

**215A. The Law of Corporate Governance Seminar (2)**

Seminar—2 hours. Prerequisite: course 215. Advanced issues in the governance of publicly held corporations. Separation of ownership and control and how the law has addressed this issue at the theoretical level and in the context of topics such as the duties of corporate directors, shareholder voting rights, and competition among states to attract corporate charters.

**215S. Special Session Business Associations (4)**

Discussion—4 hours. This course provides a broad survey of the legal rules and concepts applicable to business associations, both public and closely held. Principal attention is given the corporate form of organization, although partnerships are also treated briefly. Topics surveyed include the planning of business transactions, the process of incorporation, the financing of corporations, and role of managements and shareholders, the federal securities laws, and social responsibility.

**216A. Law and Religion (2)**

Discussion—2 hours. Federal constitutional law relating to religion. Interpretation and application of the Free Exercise Clause and the Establishment Clause of the First Amendment. State constitutional law. Federal and state statutes relating to religion.

**217. Telecommunications Law (3)**

Discussion—3 hours. Economic and administrative regulation of telephony, radio and television broadcasting, and video technologies such as cable and direct broadcast satellites. Emphasis on the recently enacted Telecommunications Reform Act and the role of the Federal Communications Commission, as well as other sources of regulation such as related anti-trust law and state public utility regulation.

**218. Constitutional Law II (4)**

Discussion—4 hours. This course principally covers the First Amendment and the Equal Protection Clause.

**219. Evidence (4)**

Discussion—4 hours. Covers rules regarding the admissibility of testimonial and documentary proof during the trial of civil and criminal cases, including rules governing relevancy, hearsay, the examination and impeachment of witnesses, expert opinion, and constitutional and statutory privileges.

**220. Federal Income Taxation (4)**

Discussion—4 hours. Introduction to basic principles of federal income taxation. Topics include identification of income subject to tax, gains and losses from property transactions, deductions from income, the timing of income and deductions (tax accounting), and the identity of persons subject to tax on particular items of income.

**220S. Special Session Federal Income Taxation (2)**

Discussion—2 hours. Introduction to the basic principles of federal income taxation using the American federal tax model. Topics include identification of income subject to taxation, gains and losses from property transactions, the timing of income and deductions and the identity of people subject to tax on particular items of income.

**221. Trusts, Wills and Decedent's Estates (3)**

Discussion—3 hours. The law of decedent's estates, wills and trusts. Topics include intestate succession; family protection and limits on the power of testation; execution, revocation and revival of wills; will substitutes; intervivos and testamentary private trusts. Topics may include contracts to make wills; class gifts; powers of appointment; the Rule against Perpetuities; and introduction to the administration of estates and trusts, including powers, duties, rights, and liabilities of fiduciaries and the management of assets.

**222. Critical Race Theory Seminar (3)**

Discussion—3 hours. Race relations and racial discrimination in America through the perspectives of proponents of the Critical Race Theory movement ("CRT"), a collection of legal scholars who challenge both conservative and liberal political orthodoxies.

**222A. Latinos and Latinas and the Law (2)**

Seminar—2 hours. Seminar analyzes some of the legal issues of particular relevance to the Latino community in the United States, including racial identity, immigration, language regulation, national and transnational identity issues, affirmative action, and civil rights.

**223. Estate Planning Seminar (2)**

Seminar—2 hours. Prerequisite: course 221. Selected topics in the estates and trusts area. Content varies with instructor. Satisfies the advanced legal writing requirement. Limited enrollment.

**224. Animal Law Seminar (2)**

Seminar—2 hours. An introduction to legal principles affecting animals and their use.

**225. Marital Property (2)**

Discussion—2 hours. The California community property system, including the rights of marital and domestic partners during the ongoing relationship, and upon the end of the relationship by death or divorce.

**226. Disability Rights (2)**

Discussion—2 hours. The Americans with Disabilities Act (A.D.A.) as it applies to employment, higher education, public accommodations, and government services and programs. Emphasis on the statutory definition of disability, entities subject to the A.D.A., the "otherwise qualified" requirement, forms of discrimination, reasonable accommodation, and defenses.

**227A. Criminal Procedure (3)**

Discussion—3 hours. Federal constitutional limits on government authority to gather evidence and investigate crime. Topics include Fourth Amendment limits on search, seizure, and arrest; the Fifth Amendment privilege against self-incrimination; and the Sixth Amendment right to counsel.

**228. Business Planning and Drafting (3)**

Discussion—3 hours. Prerequisite: course 215 instructor consent; course 220 or instructor consent. Acquaints students with a range of transactions frequently encountered by lawyers representing business clients and individual of moderate or large wealth, emphasizing the tax aspects of such transactions. Limited enrollment.

**229. Scientific Evidence (3)**

Discussion—3 hours. Prerequisite: course 219. In addition to examining the evidence law governing the admission of scientific testimony, this course considers trial advocacy in presenting and attacking such testimony. Each student is required to both make an oral class presentation and prepare a research paper dealing with a particular forensic technique. Limited enrollment.

**231. Sex Based Discrimination (3)**

Discussion—3 hours. Issues raised by legal and social distinctions between men and women. Explores potential remedies for discrimination drawn from constitutional law, statutory enactments, and common law developments. Subject matter areas include sex-based discrimination in constitutional law, family law, reproductive rights, educational opportunity, criminal law, and employment.

**231A. Sexual Orientation and the Law (2)**

Discussion—2 hours. Legal and social regulation of sexual orientation, emphasizing both the legal subordination of lesbians and gay men and the ongoing struggles to end that subordination. Sexual orientation issues in criminal, employment, constitutional, and family law. Substantial research paper may meet the Advanced Writing Requirement at the discretion of the professor.

**232. Real Estate Finance (2)**

Discussion—2 hours. An examination of the problems involved in the acquisition, financing, and development of real estate, and of lender remedies and debtor protections in the event of debtor default. The practical application of California legal doctrines.

**233. Refugee Law Seminar (2)**

Seminar—2 hours. Prerequisite: course 292 recommended. Focus on the law concerning the admission of refugees into the United States. Detailed study of the Refugee Act of 1980, which is the major piece of legislation dealing with refugee admission, the international law that fueled the passage of the Act, and the various regulations promulgated by the Attorney General implementing the law. Analysis of the implementation of the Refugee Act and examination of some criticisms of the immigration bureaucracy's implementation of the law. Some topical issues of refugee law, such as gender-based persecution, persecution based on the exercise of reproductive rights, and the persecution of lesbians and gay men. The advanced legal writing requirement may be satisfied at the discretion of the instructor. Limited enrollment.

**235. Administrative Law & Policy Seminar (3)**

Seminar—3 hours. Provides in-depth coverage of one or more topical issues in administrative law and policy, such as the relationship between public participation and expert oversight in guiding administrative agency decision making. Enrollment limited.

**235A. Seminar in Administrative Law (2)**

Seminar—2 hours. Prerequisite(s): One environmental or administrative law course; administrative law strongly recommended. Provides in-depth coverage of one or more topical issues in administrative law and policy, such as the relationship between public participation and expert oversight in guiding administrative agency decision making. Limited enrollment.

**236A. Securities Regulation I (2)**

Discussion—4 hours. Prerequisite: course 215 or consent of instructor. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms. Topics include the planning of business transactions, the process of incorporation, the financing of corporations, and role of management and shareholders, the federal securities laws, and social responsibility.

**236B. Securities Regulation II (2)**

Discussion—2 hours. Prerequisite: course 215 or consent of instructor; course 236A recommended. Securities Exchange Act of 1934 and the regulation of securities markets. Topics covered include regulation of securities markets and securities profession-

als, responsibilities of securities lawyers, continuous reporting, transnational securities fraud, and enforcement of the securities acts.

**237. Legal History (2)**

Discussion—2 hours. A survey of Anglo-American legal history from the origins of the common law in medieval England through the twentieth-century. The course will focus on the development of legal institutions, such as courts and juries, as well as on doctrines of substantive law.

**238. Tax Strategies of Business (2)**

Discussion—2 hours. Framework for analyzing how income taxes affect business decisions and company strategy. Applications include the role of taxes in management compensation, multinational decision-making, corporate restructuring transactions, and succession planning. Tax planning concepts and their application. Intended to develop broad understanding of how taxes affect business decisions. Simple algebra to describe generic tax issues and work with computer spreadsheets.

**239. Mediation: Theory and Practice (3)**

Discussion—3 hours. Prerequisite: course 211, 297. The basic, practical knowledge necessary to begin a mediation practice. Detailed understanding of the mediation process to counsel clients knowledgeably about the mediation option and represent clients ably in mediation. Communication skills, development of the ability to analyze disputes to understand why negotiations succeed or fail, and understanding of the advantages and limitations of mediation as a method of resolving disputes. The stages of a mediation: contracting (establishing contact with the parties and explaining the process), developing the issues, working the conflict, resolving the conflict, and closure. Limited enrollment.

**240. Elections and Political Campaigns (2)**

Discussion—2 hours. Covers selected constitutional and statutory aspects of federal and state elections, including campaign finance, initiatives, and other topical issues. Limited enrollment.

**240A. Law of the Political Process (3)**

Discussion—3 hours. Covers many of the foundational issues in the "law of democracy," as that body of statutory and constitutional law has developed in the United States.

**241. Law and Psychiatry (2)**

Seminar—2 hours. Prerequisite: course 212. Open to medical students who are participating in the program offered by the Forensic Center of Excellence at the UC Davis School of Medicine, and to law students at the UC Davis School of Law. Focus on forensic psychiatry for medical and legal professionals. Psychiatric trainees and forensic fellows are paired with law students to work in tandem as a forensic team. Each team is assigned to actual cases that have been adjudicated, although the teams will approach each client as if adjudication has not yet taken place. Each case is assessed from a psychiatric and a legal perspective so that both team members will confront the legal and psychiatric issues presented. Students prepare cases to provide a broad array of legal/psychiatric problems and raise specific critical issues around which psychiatrists and lawyers interact and at times collide. Course is graded on the basis of the students' participation in the seminar sessions and on the instructor's evaluation of the written assessment of the cases prepared by the team to which the student belongs.

**242. Conflict of Laws (3)**

Discussion—3 hours. How law operates across state and national borders. The topics covered include choice of applicable law in transactions involving multiple jurisdictions, recognition of judgments, jurisdiction, and such advanced applications as choice of law in class actions or other complex litigation. Problems practitioners frequently encounter in a wide variety of fields, from commercial law to personal injury and family law.

**242S. Special Session Conflict of Laws (2)**

Discussion—2 hours. Study of transactions with multi-state and international contracts. Topics include jurisdiction, recognition of foreign judgments, and

choice of applicable law. Addresses problems that international lawyers encounter in a wide variety of deals with the emphasis on international commercial deals.

**243. Commercial and Bankruptcy Law (4)**

Discussion—4 hours. The business debtor who doesn't have enough money (or is unwilling) to pay his debts. Remedies available to creditors to force payment, along with devices that creditors may use to give themselves priority against limited assets. Examination of the role of bankruptcy. Bankruptcy both as a means for providing funds for creditors, and as a device for maximizing asset value.

**245. White Collar Crime (3)**

Discussion—3 hours. The law of conspiracy, mail and wire fraud, RICO, money laundering and other business and environmental crimes and associated defenses.

**245B. Death Penalty Seminar (2)**

Seminar—2 hours. Offers overview of the constitutional law governing the death penalty in the United States. Limited enrollment.

**246. Federal Jurisdiction (3)**

Discussion—3 hours. Prerequisite: course 205. A study of subject-matter jurisdiction of federal courts.

**247. Taxation of Partnerships and LLCs (2)**

Discussion—2 hours. Prerequisite: course 220. The federal income taxation of business entities whose owners are taxed on the income, deductions and losses of the entity on a pass-through basis.

**247B. Corporate Tax (4)**

Discussion/laboratory—4 hours; discussion. Federal income tax relationship between corporations and federal income tax relationship between corporations' owners. Transfer of funds into a corporation on formation and the re-transfer of money and property from the corporation to shareholders. Taxable and non-taxable corporate restructuring in the form of sales, mergers, acquisitions, and divisions of corporations. Subchapter S corporations.

**248. Public International Law (4)**

Discussion—4 hours. Prerequisite: course 205. Introductory course covers basic international law concepts and the law-making process.

**248A. Jurisdiction in Cyberspace Seminar (2)**

Seminar—2 hours. Review concepts in international law, conflicts of law, cyberlaw, and federal jurisdiction to address the growing multi-jurisdictional conflicts created by the Internet. Examine European efforts at crafting intra-Europe jurisdictional rules, as well as other international jurisdiction treaty projects such as those at the Hague. Limited enrollment. GE Credit: Wri.

**248B. International Human Rights (3)**

Discussion—3 hours. Prerequisite: course 205. This course examines laws, theories, and institutions relating to international human rights.

**248F. Labor and Global Economy Seminar (2)**

Law, labor studies, and the social sciences to examine the problem of whether and how core labor standards are developed in the global economy, and to assess the application of the standards in current or proposed national, international and private sector settings.

**248T. Is International Law Democratic? (2)**

Seminar—2 hours. We will examine the international law-making legal process, theories of democracy, and the relationship of international and national tribunals. Limited enrollment.

**249. Comparative Law (3)**

Discussion—3 hours. The uses of comparative method, principal differences between common law and civil law and the styles of legal reasoning that prevail in these two great legal cultures. Topics include the evolution of the civil law, the phenomenon of codification, the structure of European civil codes and the interpretation of their provisions, the respective roles of counsel, judges and law teachers,

civil law procedure, and the analysis of selected areas of substantive law. Knowledge of a foreign language is not required.

**249S. Special Session Comparative Law (1)**

Discussion—1 hour. This course will provide a comparative perspective for students of American law. After an initial look at the uses of the comparative method, discussions will be centered around the main differences between common law and civil law and the different styles of legal thinking. Topics to be covered will be the evolution of the civil law and the idea of codification, the structure of European civil codes and the interpretation of their provisions, the personnel of the law and procedure in civil law countries, and the analysis of selected problems of substantive law. Knowledge of a foreign language will not be required.

**250. Jurisprudence Seminar (2)**

Seminar—2 hours. This is a seminar about theories of constitutional adjudication. Limited enrollment.

**251. Labor Law (2)**

Discussion—2 hours. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law. Historical development of labor law, the scope of national legislation, union organization and recognition, the legality of strikes, picketing, and the negotiation of collective bargaining agreements.

**252. International Litigation and Arbitration (3)**

Discussion—3 hours. Current developments in international law, conflict of laws, civil procedure, arbitration, and comparative law in the context of transactions and disputes that cut across national boundaries.

**253. Products Liability (3)**

Discussion—3 hours. Civil action for harm to the consumer resulting from defective products. Includes manufacturing defects, warning defects and design defects.

**254. Housing Law (2)**

Discussion—2 hours. This survey course covers legal and policy issues related to developing, protecting and preserving affordable, safe and accessible housing and sustaining viable, diverse communities.

**255. Pension and Employee Benefit Law (3)**

Discussion—3 hours. Prerequisite: course 220. The federal regulation and taxation of private pensions and employee benefits. The Employee Retirement Income Security Act (ERISA), including such topics as coverage, forfeitures, spousal rights, creditor access, fiduciary duties, preemption of state law, remedies, and other litigation issues. Internal Revenue Code issues such as discrimination in favor of the highly compensated, limitations on contributions and benefits, rollovers, IRAs, early distribution penalties, and minimum distribution rules.

**256. Land Use (2)**

Discussion—2 hours. Local agencies, developers, environmental interest groups, and others who regularly deal with the administrative and legislative applications of land use planning and development laws. Topics include zoning, general plans, local government land use regulation, and related areas of litigation. The expanding role of the California Environmental Quality Act.

**257. Legislative Process (2)**

Discussion—2 hours. Fundamental elements of the legislative process, including legislative procedure; the legislature as an institution; lobbying; statutory interpretation, legislative-executive relations; and the legislature's constitutional powers and limitations.

**257A. Legislative Intent Seminar (2)**

Seminar—2 hours. Theories and principles of statutory and constitutional interpretation. Original intent vs. living constitution; permissible kinds of evidence for determining legislative intent; canons of construction; extent to which initiatives should be interpreted similarly to legislative enactments.

**257B. Statutory Interpretation (2)**

Seminar—2 hours. This course addresses the process of statutory interpretation, commercial and public interest, and construction of public instruments. The course covers legal and political science theories, and the practicalities of the legislative process, which bear on interpretation of statutes and regulations.

**258. Professional Responsibility (2)**

Discussion—2 hours. The American Bar Association's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the Multistate Professional Responsibility Examination, and the California Rules of Professional Conduct, which are tested on the California Bar Examination. Issues affecting the legal profession, including lawyers' ethical duties and responsibilities to clients, the courts, third parties, and the legal system.

**259. Feminist Legal Theory (3)**

Discussion—3 hours. Women's legal history and feminist theory, including liberal, radical, cultural, antiessentialist, and post-modern feminism. Consider relationship between theory and practice by looking at number of issues that arise when the law intersects with women's lives: pornography, prostitution, rape, sexual harassment, divorce.

**260. Employment Discrimination (3)**

Discussion—3 hours. Examination of federal law prohibiting employment discrimination based upon race, color, religion, sex, national origin, age, and sexual orientation.

**261. Judicial Process Seminar (2)**

Seminar—2 hours. Prerequisite: must be taken before or concurrently with the judicial externship (offered fall only). Required for all full-time judicial externs and recommended for part-time judicial externs. Examines a variety of issues concerning the judicial process. The judge's role in the legal process, the administration of justice, ethical issues, decision making, bias, and critical examination of the strengths and weaknesses in our current judicial system.

**262. Antitrust (3)**

Discussion—3 hours. Study of the federal antitrust laws including price fixing, limits on distribution, tying arrangements, monopolization, and mergers.

**262S. Special Session Antitrust (1)**

Discussion—1 hour. A study of the federal antitrust laws including price fixing, limits on distribution, tying arrangements, monopolization and mergers.

**263A. Trial Practice (3)**

Discussion—2 hours; laboratory—1 hour. Prerequisite: course 219 (may be taken concurrently). Introduction to the preparation and trial of cases, featuring lectures, videotapes, demonstrations, assigned readings and forensic drills. Limited enrollment. (S/U grading only.)

**264. Water Law (3)**

Discussion—3 hours. Property rights in surface waters, including riparianism, prior appropriation and federal reserved rights; water administration institutions, including the federal reclamation program; the law of interstate waters and property rights in ground water. Emphasis on California water law and policy.

**264A. Ocean and Coastal Law (2)**

Discussion—2 hours. An introduction to the coastal and ocean environment.

**265. Natural Resources Law Seminar (2)**

Seminar—2 hours. Prerequisite: course 256 or course 285 useful but not required. In-depth coverage of a specific topic in natural resources law. The topic varies from year to year. Limited enrollment.

**266A. Law of E-Commerce (3)**

Discussion—3 hours. The legal issues that are emerging as crucial to the conduct of business in cyberspace. Discussion of the evolution and current administration of the Internet and the World Wide Web. Brief foray into early claims that cyberspace should not be regulated at all and examination of how cyberspace is in fact regulated. A variety of issues relevant to business engaged in e-commerce,

including jurisdiction, the domain name system, electronic contracting and signatures, intellectual property, privacy, taxation, and antitrust. Recent state and federal legislation dealing specifically with e-commerce, state law and secondary materials. Understanding of how to approach cyberspace issues.

### 267. Civil Rights Law

Discussion—4 hours. Civil remedies for civil rights violations under the primary United States civil rights statute. Specifically, covers actions for constitutional and statutory violations under 42 USC §1983, affirmative defenses, and abstention doctrines. The history of civil rights movement.

### 267B. Civil Rights Seminar (2)

Seminar—2 hours. The social, political, legal and historical factors which led to the creation of the United States Commission on Civil Rights (USCCR) in 1957. The United States Commission on Civil Rights is a bipartisan, independent agency established by the Civil Rights Act. It is directed to investigate complaints alleging deprivations of the right to vote, and voter fraud; to study and collect information relating to discrimination and the denial of equal protection of the laws under the Constitution on the basis of race, color, religion, sex, age, disability, or national origin; and submit reports, findings and recommendations to the President and to Congress. The role that the USCCR has played and continues to play in American politics, legislative enactments and the national dialogue on equality, fairness and justice in the context of civil and human rights. Satisfies Advanced Legal Writing Requirement. Limited enrollment.

### 268. Jewish Law Seminar (2)

Seminar—2 hours. The term "Jewish Law" refers to those subjects that would normally be taught in an American law school as they have been approached by the Jewish legal system. This system is based primarily on the Talmud and on the commentaries and decisions that are derived from it. Jewish law is of interest to American law students not for its immediate practical value, but because it is a foreign legal system that is one of the oldest in the world, and one that has faced many of the problems now facing American law. Specifically, although Jewish law is purportedly based on immutable religious law, changing conditions over the centuries have encouraged methods of adaptation that are reminiscent of American constitutional law. Each student will be required to prepare and present a paper that would fulfill the advanced legal writing requirement. Neither a knowledge of foreign languages nor a previous exposure to Jewish law is necessary. Limited enrollment.

### 269A. Basic Finance (3)

Discussion—3 hours. Students with a non-law basic finance course must have instructor's permission. Basic techniques of analysis that are part of the core curriculum in a good business school are studied. Purpose is to give you background necessary for understanding and advising clients and for understanding other business-related law courses.

### 269C. Corporate Finance (3)

Discussion—3 hours. How corporations raise money, i.e., stocks and bonds, IPOs, how deals are structured (or restructured, under Chapter 11 of the Bankruptcy Code). Intended for those who intend to practice in a firm where clients raise money in securities markets or invest in deals.

### 270. International Business Transactions (2)

Discussion—2 hours. Select legal problems arising from international business transactions. Topics include the international sales contract, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, and foreign exchange problems.

### 270S. Special Session International Business Transactions (2)

Discussion—2 hours. A consideration of select legal problems arising from international business transactions. Topics include the international sales contract,

letters of credit, transfers of technology, regulation of bribery, repatriation of profits, and national efforts to control imports.

### 271. Nonprofit Organizations (4)

Discussion—4 hours. Prerequisite: course 215 or consent of instructor. The legal rules and concepts applicable to nonprofit organizations. Limited enrollment.

### 271A. Nonprofit Organizations: State and Local Governance Issues (2)

Discussion—2 hours. Prerequisite: course 215 (may be taken concurrently) or consent of instructor. State and local laws applicable to nonprofit organizations, i.e., public interest, cultural, religious, educational, and other not-for-profit entities. Federal tax exemptions of nonprofits, state and local laws impacting nonprofits with respect to incorporation or charitable trust formation, operation and governance, dissolution, fiduciary obligations of trustees and officers and directors, management and investment obligations vis-à-vis trust assets, cy pres, rights of members of social clubs, trade associations and labor unions, enforcement of obligations and rights by the attorney general and others, and regulation of charitable solicitation. Topics may include local property tax and other tax exemptions, nonprofit accounting issues public/private partnerships and Federal antitrust and constitutional constraints.

### 271B. Nonprofit Organizations: Tax Exemptions and Taxation Focus (2)

Discussion—2 hours. Prerequisite: course 215 or consent of instructor; course 220 recommended. Conceptual basis and substantive law criteria for the federal and state income tax exemption of nonprofit organizations and those particular circumstances and activities which will result in income taxation or financial sanction, including qualifications for exempt status, the nondistribution constraint, the inurement and private benefit concepts, limitations on campaign activities, permissible lobbying expenditures, the unrelated business income tax, the deduction for charitable contributions, intermediate sanctions, the differences between private foundations and public charities, special excise taxes, the exemption application process and reporting and disclosure requirements. Topics may include nonprofit accounting issues, local property tax and other local tax exemptions, and public/private partnerships.

### 272. Family Law (2)

Discussion—3 hours. Emphasizes the legal, social, and emotional aspects of relationships within the family. How has the law constructed "families"? What are the common law, statutory, and constitutional principles that affect the formation and dissolution of families?

### 272B. Elder Law (2)

Discussion—2 hours. The legal practice and policy relating to aging individuals and an older society. Examination of the roots of legal ethics and the role of the lawyer as professional problem solver and advisor, and the uses of law in relationships between people over life's course. The traditional divisions of tort, contract and property and examination of issues such as age discrimination in employment, eligibility for public benefits, long-term care, housing options of the elderly, health care, guardianship, health care decision making for the incapacitated client, disability law issues, property management, euthanasia, elder abuse, neglect and crime, generational justice, the conflicting values of autonomy versus protections, and a host of other matters. Student-led discussions of interdisciplinary assigned readings and guest lecturers.

### 273N. Advanced Torts (3)

Discussion—3 hours. Torts not covered in the first-year torts course. Defamation, privacy, misrepresentation, misuse of legal procedure, and business torts. Nuisance and related environmental torts. The intersection between statutory remedies and common law torts.

### 274. Intellectual Property (3)

Discussion—3 hours. Broad survey of the field of intellectual property, including trademarks, unfair competition, copyright, and patents.

### 274A. International Intellectual Property (2)

Discussion—2 hours. Prerequisite: course 274 or 296 or 209A or consent of instructor. International aspects of copyright, patent and trademark law, including a look at basic international instruments such as the Paris Convention, the Berne Convention, and Trade Related Aspects of Intellectual Property Rights of the World Trade Organization. Topics include approaches to patent protection for pharmaceuticals and agricultural products in developing nations, and copyright protection in a digital world.

### 274AS. Summer Session Intellectual Property (2)

Discussion—2 hours This course provides a broad survey of the field of intellectual property. Areas covered will include trademarks, patents, trade secrets, idea protection, unfair competition, and copyright.

### 274C. Intellectual Property in Cyberspace Seminar (2)

Seminar—2 hours. Prerequisite: course 274. The recent expansion of IP laws emerging to meet the growth of Internet and digital technologies that enhance human abilities to access, copy, store, manipulate, and transmit vast amounts of information.

### 274D. Intellectual Property in Historical Context Seminar (2)

Seminar—2 hours. How the legal system has adapted to earlier periods of rapid change by creating, delimiting, and expanding intellectual property rights (IPRs). Required paper satisfies advanced writing requirement.

### 276. Juvenile Justice Seminar (2)

Seminar—2 hours. Legal and philosophical bases of a separate juvenile justice process for crimes committed by minors; police investigation, apprehension, and diversion; probation intake and detention; juvenile court hearing and disposition; juvenile corrections. The role of counsel at each phase of the process is examined.

### 277. Native American Law (2)

Seminar—2 hours. Legal relations between Native American tribes and the federal and state governments. Topics include the basic jurisdictional conflicts, which dominate this area of law and cover specific areas such as land rights, hunting and fishing rights, water rights, domestic relations law, and environmental protection. Religious freedom, repatriation. Issues regarding terminated and non-recognized tribes are also addressed.

### 278. Pretrial Skills (2)

Discussion—2 hours. This course uses role-playing exercises, videotaped simulations, and related projects to introduce students to lawyering skills basic to the practice of law, including client interviewing, witness interviewing and discovery, including depositions. Limited enrollment.

### 279. Public Sector Labor Law (2)

Seminar—2 hours. Prerequisite: course 251 or consent of instructor. Application of private sector labor law doctrines to the public sector. Emphasis on the four California public sector statutes and the impact of constitutional law on public employees. Class presentation and seminar paper required. Satisfies advanced writing requirement. Limited enrollment.

### 280. Advanced Legal Writing Seminar (2)

Seminar—2 hours. How to write a variety of legal documents in plain English. Writing exercises and outside readings will be assigned weekly. Each student completes an individual writing project in lieu of final examination. The writing project will satisfy the law school's advanced legal writing requirements. Limited enrollment. (S/U grading only.)

**281. Local Government Law (3)**

Discussion—2 hours. Explores the structure of state and local government through the lens of the virtues and flaws of the ideas of Madison and DeToqueville, i.e., centralized federal government vs. decentralized local government.

**282. Energy Law Seminar (2)**

Seminar—2 hours. The history, law, and public policy of energy regulation in the United States with an emphasis on economic and environmental regulation. Competitive restructuring of the natural gas and electric utility industries emphasized. The basic regulatory schemes for other energy sources such as hydroelectric power, coal, oil, and nuclear power explored. Recommended to anyone who has an interest in the energy sector, various models of economic regulation, or regulated industries.

**283. Remedies (3)**

Discussion—3 hours. Survey of modern American civil remedies law in both private and public law contexts. Topics addressed include equitable remedies, equitable defenses, contempt power, injunctive relief, restitution, and money damages in torts and contracts.

**284. Law and Economics (3)**

Discussion—3 hours. Introduces students to the economic analysis of law. We will explore several economic methods and concepts, including rational choice theory, behavioral economics, and utilitarianism. We will apply these tools to illuminate and critique familiar areas of law, including property, contracts, torts, criminal law, and civil procedure. Prior study of economics is not required.

**284A. Law and Economic Development (2)**

Discussion—2 hours. The relationship between law and economic development in transition economies. Western assumptions about whether the role of law and legal institutions in economic development hold true for the non-Western developing nations of Asia and Africa.

**285. Environmental Law (3)**

Discussion—4 hours. An introduction to federal and state environmental law, including coverage of historical development of environmental law; the role of courts, the legislature and the executive branch in the development and implementation of environmental policy; allocation of authority among different levels of government; the role of market forces in environmental decisions; the major regulatory strategies that have been applied to control environmental harm, and enforcement of environmental law. Major statutes considered include the National Environmental Policy Act, Endangered Species Act, Clean Air Act and Clean Water Act.

**285A. Environmental Justice Law (2)**

Discussion—2 hours. Introduction to the scope of current environmental justice work; who is affected by environmental hazards, what legal and political tools are available to address the problems, and the strategic issues confronting groups organizing for change. The role of lawyers and methods of lawyering in the environmental justice context.

**285B. Environmental Practice (3)**

Discussion—3 hours. Prerequisite: course 285 recommended. Examines underlying theory and practice in securing compliance with our major environmental laws.

**285C. Agricultural Law and Policy (3)**

Discussion—3 hours. An introduction to agricultural law, focusing on legal principles and issues at the forefront of contemporary debates about agriculture in society.

**285T. Farmworkers and the Law (2)**

Discussion—2 hours. Provides an overview of California and federal laws impacting farmworkers and how such laws have been applied to regulate working conditions in agriculture.

**286. Public Health Law (2)**

Seminar—2 hours. Public health law as the government's power and responsibility to ensure the conditions for the population's health. The use of this power and the individual's interests in liberty and property.

**286A. Topical Issues in Health Law (2)**

Seminar—2 hours. The course focuses on four-six issues at the interface of law, medicine, bioethics, and health policy that are currently the subject of major litigation, legislation, and/or contentious debate in the domains of bioethics and public policy. Limited enrollment.

**286B. Advanced Health Law Seminar (2)**

Seminar—2 hours. Prerequisite: course 286A or consent of instructor. Specific seminar topic will be drawn from those covered in course 286A. Reading and discussion of book on seminar topic and/or a set of selected readings. Students will select research project related to seminar topic and will facilitate the discussion of that topic. Written paper analyzing legal issue related to chosen research project.

**286C. Bioethics Seminar (2)**

Seminar—2 hours. Course examines the ethical and legal issues that arise from biomedical research and use of medical technologies. Limited enrollment. GE Credit: Wri.

**286D. Legal Psychology Seminar (2)**

Seminar—2 hours. Examines how psychological theory and research can be used to shape laws and policies to make them better reflect what we know empirically about how individuals process information, make decisions and behave.

**287. Public Land Law (3)**

Discussion—3 hours. Legal aspects of federal land management, including the history of public land law, authority over federal lands and specialized law dealing with particular natural resources and uses found on federal lands (minerals, timber, range, wildlife, recreation and preservation).

**287A. Public Benefits Law (2)**

Seminar—2 hours. Will explore the theory and practice of law pertaining to the enactment and administration of public benefits programs for poor and other disadvantaged persons in our society. Limited enrollment.

**287T. Law and Society Seminar (2)**

Seminar—2 hours. Study of law and society challenges traditional legal scholarship by exploring multiple ways in which law both shapes and is shaped by societies and social interactions. Seminar will introduce students to important literature and debates in the field. Limited enrollment.

**288. Advanced Constitutional Law Seminar (2)**

Seminar—2 hours. Prerequisite: course 218A. In-depth selected topics or problems in constitutional law and theory. Initial topics may include the regulation of hate speech, the interpretation of the Establishment Clause, or the development of Takings Clause doctrine.

**288. Advanced Constitutional Law Seminar (2)**

Seminar—2 hours. Prerequisite: course 218 or 218A (may be taken concurrently). Explores in-depth selected topics or problems in constitutional law and theory. The current focus is on the interpretation and application of the religion clauses of the First Amendment. Limited enrollment.

**288A. Comparative Constitutional Law Seminar (2)**

Seminar—2 hours. Prerequisite: course 205. Understanding of constitutionalism and of the Constitution of the United States. Constitutional protection of individual rights and the structure of constitutions.

**289A. Biotechnology Law and Policy (2)**

Seminar—2 hours. Coverage includes the regulation of biotechnology research, including restrictions on cloning and fetal stem cell research; regulation of the products of biotechnology to protect human health or the environment, including restrictions on use or distribution of genetically modified organisms; the

availability and scope of intellectual property protection for biotechnology products, including genes and engineered organisms; and the international law governing access to the natural resources that provide the starting materials for biotechnology and trade in bioengineered organisms or their products. Limited enrollment.

**290. International Trade Dispute Seminar (2)**

Seminar—2 hours. The economic, political, and legal theories underlying the establishment of NAFTA and WTO.

**291A. International Finance (3)**

Discussion—3 hours. How a framework of national and international laws and institutions regulates and fails to regulate the flow of money around the world.

**291B. International Investment Dispute Seminar (2)**

Seminar—2 hours. This seminar will examine the law of investor-State dispute resolution.

**292. Immigration Law and Procedure (3)**

Discussion—3 hours. Surveys the history of U.S. immigration law and policy.

**293. Public Interest Law Seminar (2)**

Seminar—2 hours. This class will examine the issues and problems associated with providing civil legal services to persons and interests in American society that typically have been unable to afford or otherwise obtain representation from the private bar.

**294A. Law and Popular Culture (2)**

Seminar—2 hours. This course examines works of popular culture, films, and legal texts. Each session will focus on a particular film and its cultural implications, particular problem or problems of law, law practice, legal ethics, traditional ethics, or public policy.—I. (I.)

**295A. Trademark and Unfair Competition Law (2)**

Discussion—2 hours. Prerequisite: course 274 recommended. We will take an intensive look at selected issues in Trademark Law, including the concepts of trademarks and unfair competition, acquisition and loss of trademark rights, infringement, authors and performers rights, trademarks as speech, and international aspects of trademark protection.

**296. Copyright (3)**

Discussion—3 hours. Thorough examination of the law of copyright, including its application to literature, music, films, television, art, computer programs, and the Internet. Issues addressed include copyright protection, the copyright owner's rights, the term of protection, copyright ownership and transfer, infringement, and defenses to infringement.

**296A. Advanced Copyright and Related Doctrines (2)**

Discussion/laboratory—2 hours. Prerequisite: course 296 or 274 or consent of instructor. Intensive look at selected issues in copyright, including the fair use doctrine, the application of copyright principles in the context of the Internet and digital technology, and international aspects of copyright law. Examination of some doctrines related to copyright, as well as to entertainment law, including protection for fictional characters and titles, and the right of publicity.

**296T. Right of Publicity and Related Doctrines (2)**

Discussion—2 hours. Intensive look at the right of publicity, which, generally, involves the right of an individual, especially a celebrity, to control the commercial value and exploitation of his or her name, likeness or other indicia of identity.

**297. Alternative Dispute Resolution (3)**

Discussion—3 hours. Will introduce students to a wide variety of alternative dispute resolution processes, with an emphasis on negotiation, mediation and arbitration. Limited enrollment.

**298. Sociology of the Legal Profession Seminar (2)**

Seminar—2 hours. Comprehensive look at the organization, operation, and ideology of the legal profession. Limited enrollment.

## Professional Courses

### 408. Community Education Seminar (3)

Seminar/clinic—3 hours. Trains students to educate the community about basic legal rights and responsibilities. Students attend an initial four-hour orientation, followed by weekly seminars that will prepare students to teach in a local high school at least two times per week. Paper or journal required, to be determined by instructor. Limited enrollment. (S/U grading only.)

### 408A. Education Law (2)

Seminar—2 hours. An introduction to the field of "school law," focusing on public education from kindergarten through high school. Topics range from constitutional law, first amendment and due process issues for both faculty and students, to federal and state law on special education. Equitable funding of public schools and labor relations under public sector state statutes.

### 409. Environmental Law Moot Court Competition (1)

During the first eight weeks of fall semester, students research and submit briefs as appellants, respondents, or third parties on a problem of environmental law that is prepared by the National Environmental Law Moot Court Board. Students attend four to six classes (including guest lectures) on aspects of appellate advocacy, legal writing, and environmental law. Members of the spring environmental law moot court team will be selected on the basis of performance in class. (S/U grading only.)

### 410A. Moot Court (2)

Discussion/laboratory—2 hours. Basic appellate practice and procedure. Beginning instruction in oral advocacy skills and an opportunity to practice these skills in front of a moot court. Students compete in two rounds of oral arguments which, combined with the second semester of the program, determine the rankings for selecting participants in the annual Neumiller Competition and other interschool competition teams and for membership on the Moot Court Board. Both courses 410A and 410B must be taken in order to qualify for most interschool competitions. Limited enrollment. (S/U grading only)

### 410B. Appellate Advocacy (Moot Court) (2)

Practice—2 hours. Continuation of course 410A. Focuses on the development of effective appellate brief writing skills and the refinement of oral advocacy skills. Limited enrollment. (S/U grading only.)

### 410C. Appellate Advocacy Seminar (2)

Seminar—2 hours. Appellate advocacy before state and federal courts, including writs and appeals in civil and criminal matters. The role, structure, and practices of appellate course. Students will participate in projects. Required papers will satisfy the Advanced Legal Writing Requirement. Limited enrollment.

### 411. Journal of International Law and Policy (1-2)

The Journal is a biannual journal produced by King Hall students with an interest in international law. The editor-in-chief of the journal receives two units of credit each semester. The managing editor receives one unit of credit each semester. (S/U grading only.)

### 411A. International Law Journal (1-2)

The Editor in Chief of the Journal of International Law and Immigration receives two credits for each semester of service. Only one person may receive this credit in any one semester as editor in chief. Managing and executive editors receive one unit. (S/U grading only.)

### 411B. Journal of Juvenile Law and Policy (1-2)

A biannual publication of the UC Davis School of Law that addresses the unique concerns of children in the American legal system. The editor-in-chief of the journal receives two credits each semester. Managing editors receive two credit each semester. (S/U grading only.)

### 412. Carr Intraschool Trial Advocacy Competition (1)

Competition—1 hour. Named after the late Justice Frances Carr, this competition is open to second- and third-year students. A preliminary round is followed by quarter-finals, semi-finals, and a final round. Students participate in mock trials presided over by judges and critiqued by experienced litigators. Limited enrollment. (S/U grading only.)

### 413. Interschool Competition (1-3)

Prerequisite: consent of appropriate faculty adviser. Participation in interschool moot court and lawyering skills competitions. Enrollment is limited to students actually representing the School in the interschool competitions. Competition must be authorized by the appropriate faculty adviser. The faculty adviser may condition the award of academic credit for any particular competition on the performance of such additional work as may be reasonable to justify the credit. May satisfy advanced legal writing requirement. (S/U grading only.)

### 414. Moot Court Board (1)

Prerequisite: courses 410A-410B. Members of Moot Court Board may receive one credit for each semester of service on the board, up to maximum of two. Credit awarded only after certification by Moot Court Board and approval of the faculty advisers to Moot Court Board. Limited enrollment. (S/U grading only.)

### 415. Trial Practice Honors Board (1)

Members of the Trial Practice Honors Board administer the Frances Carr competition. Members are nominated by their individual Trial Practice I adjuncts. Students receive one credit for serving on the Board, awarded upon approval of the faculty adviser. (S/U grading only.)

### 416. Law Review Writer (1-2)

Writing of an editorship quality law review article under the editorial supervision of editors of the Law Review. Minimum of 40 hours contribution to the Review's publication is also required. Credit may be obtained only upon achieving status as a member of the Law Review, which requires that the student have made substantial progress toward completing an editorship article. Credit is awarded only after certification by the editor-in-chief of the Law Review and approval of the faculty advisers to the Law Review. One unit of credit is earned the first semester. Two units are earned the second semester upon completing an editorship draft. One unit is earned second semester if only a membership draft is completed. (S/U grading only.)

### 417. Law Review Editor (1-2)

Editors must have completed an editorship article and must perform editorial duties requiring a substantial time commitment. Credit awarded only after certification by the editor-in-chief of the Law Review and approval of the faculty advisers to the Law Review. Students may receive four credits over two semesters for service as an editor. [In exceptional cases, students may petition to participate for one semester only and receive two credits.] (S/U grading only. Deferred grading pending only, pending completion of sequence.)

### 418. Environs Journal (1-2)

Units will be distributed as follows: The editor in chief will receive two units of credit per semester, for a total of four units over the course of the academic year. The co-editor in chief will continue to split credit, with each taking credit for one semester, or alternative with each receiving one unit per semester, for a total of two units each over the course of the academic year. The managing editors will be awarded one unit of credit per semester for a total of two units of the course of the academic year. (S/U grading only.)

### 419. Advanced Writing Project (1-4)

The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms,

for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.)

### 419A. Advanced Writing Project (1-4)

The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.)

### 419S. Special Session Advanced Writing Project (1-4)

The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.)

### 420. Civil Rights Clinical Program (2-6)

Clinical program. Prerequisite: prior or concurrent enrollment in course 267 and 219. Provides practical experience in providing legal services to indigent clients who have filed civil rights actions in the United States District Court for the Eastern District of California. Students will work on clinic cases under the supervision of the clinic director and supervising attorney. Limited enrollment. (S/U grading only.)

### 425. Judicial Clinical (2 to 6 or 12)

Clinical program. Prerequisite: course 261 required for full-time clinical students and recommended for part-time clinical students. Students may arrange judicial clerkship clinical programs with an approved list of state and federal judges through the Clinical office and under the sponsorship of the faculty member in charge. All students must complete weekly time records and bi-weekly journals. Full-time clinical students must complete an evaluative final paper of approximately 10 pages. (S/U grading only.)

### 430. Clinical Program in Federal Taxation (2-6)

Clinical program. Prerequisite: course 220. Students will have the opportunity to work with the Internal Revenue Service or other governmental tax agency. Journals and attendance at group meetings are required. (S/U grading only.)

### 435. Family Protection Clinic (4)

Clinical activity. Prerequisite: course 219 (may be taken concurrently). Representation of low-income persons in family law and related matters arising out of situations involving family violence. Students are supervised by the staff attorney at the clinic's office located in Woodland at the Sexual Assault and Domestic Violence Center of Yolo County. (S/U grading only.)

**440. Immigration Law Clinical (2 to 6 or 12)**

Clinical program. Students may represent clients in administrative law hearings in San Francisco. Minimum units for the course are 4 and maximum is 12. Each unit assumes four hours work per week, including participation in the seminar, conference, and case research and development. Students who have completed course 292 may take the clinic for a minimum of 2 units. Limited enrollment. (S/U grading only.)

**445. Legislative Process Externship (2-5)**

Clinical activity. Prerequisite: course 240 (may be taken concurrently) or consent of instructor. Practical experience in the operation of the office of a legislator or a legislative committee. The major thrust of the program is to enable students to become familiar with the give and take realities of making laws, as contracted with their interpretation and enforcement. Journals are required. (S/U grading only.)

**450. Environmental Law Externship (2-6)**

Clinical activity—2-6 hours. Prerequisite: course 285 or consent of instructor. Practical experience in environmental law. Students will work in an approved government, non-profit or private law office engaged in some form of environmental law work for a minimum of 8 hours per week. Students must prepare a journal describing and reflecting upon their clinical experience, and meet periodically with the instructor.

**455. Employment Relations Externship (2-6)**

Clinical activity. Prerequisite: course 251 or 260 (may be taken concurrently). Practical experience in employment relations, including employment discrimination and public sector labor law. Work under the direct supervision of a government lawyer. Opportunity to participate in a range of with emphasis on observation and participation in actual investigation, interviewing, drafting pleadings, and attendance at hearings. (S/U grading only.)

**460. Public Interest Law Clinical (2-6)**

Clinical activity. Prerequisite: prior or concurrent enrollment in course 293 recommended. Students work with a public interest practitioner in a nonprofit organization. Journals and attendance at two group meetings are required. Clinical students must complete an evaluative final paper of approximately 8 pages. Hours completed in public interest setting may be applied toward the practicum requirement for the Public Interest Law Program. (S/U grading only.)

**465. Clinical Program in Administrative Law (2-6)**

Clinical activity—2-6 hours. Prerequisite: course 235 (may be taken concurrently) or consent of instructor. For students interested in a work experience in an administrative law setting. Students will work under the direct supervision of an administrative law judge, hearing officer, or government attorney. Placement assistance will be provided by the instructor. A goal of this clinical will be a breadth of experience in the areas of formal adjudication, informal adjudication, rulemaking, and judicial review. Students will be required to meet monthly as a group to share experiences and maintain observational journals. (S/U grading only.)

**470. Administration of Criminal Justice Externship (2-6 or 12)**

Clinical activity—2-12 hours. Prerequisite: Completion of, or concurrent enrollment, in courses 219 and 227; course 263A recommended. Gain practical experience working full or part time in a District Attorney's or Public Defender's office in one of several surrounding counties or in a federal Public Defender or U.S. Attorney's office. Students participate in the many activities associated with the office for which they extern: observation, interviewing, research, counseling, motion practice, and trials under State Bar rules. Limited enrollment. (S/U grading only.)

**480. Clinical Program in Prison Law (2-6)**

Clinical program. Provides practical experience in providing legal services to real clients who have various problems related to their incarceration in state

prison. The services require analysis and application of Constitutional Law, state statutory law, agency regulations, and the rules of professional responsibility. Students will work under the direct supervision of the Prison Law clinical director and will be assigned a portion of the director's caseload. Students will be required to follow the law office procedure of the clinic and employ skills such as interviewing, research, writing, negotiating, and possibly, the preparation of legal documents to be filed in court. (S/U grading only.)

**495. Instruction in Legal Research and Legal Writing Skills (1-2)**

Participants will assist in instructing legal research and writing for first-year students under the direction of the legal research and writing instructors. Approval of the research and writing instructors is required for enrollment. Participants may assist once in the legal research program and once in the legal writing program. One unit will be given in the fall semester for legal research instruction and two units in the spring for legal writing instruction. (S/U grading only.)

**498. Group Study (1-4)**

Groups of students (not fewer than 4 or more than 10) with common interest in studying a stated legal problem may plan and conduct their own research and seminar program, subject to the following regulations: (1) the program may extend over no more than two semesters; (2) the plan for the program and the list of members of the group must be submitted to Dean's office at least 4 weeks prior to opening of the semester in which the program is to begin; (3) a three-member faculty board will be appointed for each group proposed and will have authority to approve or disapprove the program and the amount of credit sought; (4) changes in the program or in membership of the group must be approved by the faculty board and normally will be approved only prior to the semester involved; (5) group members must conduct a weekly seminar session to be arranged by them; (6) each member of the group must submit an individual paper or an approved alternative growing out of the seminar subject to the faculty board; (7) S/U grading only unless the entire group requests letter grades in advance.

**499. Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. (S/U grading only.)

**499A. Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. Grading is on a Satisfactory/Unsatisfactory basis unless a request for letter grading has been made in advance.

**499S. Special Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individ-

ual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member.

**499SA. Special Session Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. (Deferred grading only, pending completion of sequence.)

**499SB. Special Session Independent Research Project (1-4)**

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member.

### The Major Program

Linguistics is the systematic study of human language. It focuses on theories of language structure, variation, and use, description of contemporary languages, and the examination of language change through time. Because of the pervasive influence of language in our everyday lives, work in linguistics interacts in important ways with studies carried out in many other fields, including psychology, anthropology, neuroscience, philosophy, computer science, sociology, literature, language teaching, communication and education.

**The Program.** An introductory lower division course provides students with basic concepts and

**Quarter Offered:** I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

**General Education (GE) credit:** ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

some of the methods needed to analyze language in a systematic way. Upper division courses probe more deeply into specific aspects of language structure, language use, and the relationship of language to other realms of human activity.

**Career Alternatives.** Majors in linguistics find practical outlets for their linguistic training in a variety of fields: the computer science industry (software development); teaching English as a second language; foreign language teaching; elementary and secondary level bilingual-bicultural programs; language-oriented missionary work; bilingual-bicultural curriculum development (e.g., for publishing houses); legal work; speech therapy; lexicography (preparation of dictionaries). All these types of employment share an interest in persons skilled in the analysis of language, spoken and/or written—linguistics equips students with just such skills.

### A.B. Major Requirements:

	UNITS
<b>Preparatory Subject Matter</b> .....	<b>4-24</b>
Linguistics 1 .....	4
Foreign language, one course beyond the 15-unit requirement of the College of Letters and Science in the same language used to fulfill the college requirement .....	0-20
<b>Depth Subject Matter</b> .....	<b>44</b>
Linguistics 103A, 103B, 111, 112, 121, 131, 141, 151, 152 .....	36
At least eight upper division units from the following courses .....	8
Any other Linguistics course not included in the 36-unit requirement above, African American and African Studies 156, Anthropology 112, 113, 117, 119, 120, Communication 105, Education 151, English 105B, 106 French 160, 161, German 105, Human Development 101, Native American Studies 107, Philosophy 137, Psychology 132, Spanish 111N, 112N, 113, 114N, 115, 116, 117, 118. The student should note that a number of these courses have prerequisites. Since it is usual to select some emphasis within the Linguistics major (e.g., anthropology, a foreign language, etc.) such prerequisites should be completed as a matter of course.	
<b>Total Units for the Major</b> .....	<b>48-68</b>
<b>Major Adviser.</b> R. Aranovich	
<b>Minor Program Requirements:</b>	
Linguistics offers two minor programs:	
(1) <i>General linguistics</i> , which provides the student with basic knowledge of language structure and linguistic analysis;	
(2) <i>Linguistics for language teachers</i> , which especially complements the major in English with the Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.	
	UNITS
<b>General Linguistics</b> .....	<b>24</b>
Linguistics 1, 103A, 103B .....	12
One course from Linguistics 111, 112, 121, 131, 141, 151, 152 .....	4
Additional units selected from upper division Linguistics courses and other upper division courses listed in the major requirements in consultation with an adviser .....	8
	UNITS
<b>Linguistics for Language Teachers</b> .....	<b>24</b>
Linguistics 1, 106, 165 .....	12
English 105 .....	4
Linguistics 160 or 163 .....	4
Linguistics 173 or Education 151 .....	4
<b>Minor Adviser.</b> Same as Major adviser	
<b>Grading Recommendation.</b> Though not required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.	

**Honors and Honors Program.** The honors program consists of six units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major adviser. For general information regarding graduation with honors and Dean's Honors Lists, please see [Academic Information](#), on page 62 in this catalog.

**Graduate Study.** The Linguistics Graduate Group offers study and research leading to the M.A. and Ph.D. degrees. Please see [Linguistics \(A Graduate Group\)](#), on page 334; more detailed information may be obtained from the Graduate Adviser or from the Chairperson of the Linguistics Group.

**Graduate Adviser.** A.E. Ojeda

### Courses in Linguistics (LIN)

#### Lower Division Courses

##### 1. Introduction to Linguistics (4)

Lecture—3 hours; discussion—1 hour. Introduction to the study of language; its nature, diversity, and structure. GE credit: ArtHum or SocSci, Wrt.—I, II, III. (I, II, III.)

##### 4. Linguistics for Students of Literature (4)

Lecture—3 hours; term paper. Prerequisite: course 1 recommended. Introduction to basic linguistic concepts and models needed for the interpretation of literary texts. Topics include meaning in texts, lexical meaning, linguistic variation in texts, sound systems and poetry.

##### 20. Oral English for Undergraduate ESL Students (3)

Lecture/discussion—3 hours. Prerequisite: consent of instructor; limited primarily to students who have fulfilled their Subject A requirement or have completed course 23. Intensive practice in oral English for undergraduate ESL students. Students will learn to identify and modify features of their pronunciation which limit their ability to communicate clearly. Students will also learn and practice strategies for effective participation in academic tasks. May be repeated once for credit with consent of coordinator. (P/NP grading only.)

##### 21. Introduction to Reading and Composition for Non-Native Speakers (5)

Lecture/discussion—5 hours. Prerequisite: admission by placement examination only. Provides undergraduate students whose native language is not English with intensive work in reading and in writing organized, coherent, and grammatically correct paragraphs and short academic essays. (P/NP grading only.)—I. (I.)

##### 22. Intermediate Reading and Writing for Non-Native Speakers (4)

Lecture/discussion—4 hours. Prerequisite: admission by placement examination, by successful completion of course 21, or by consent of instructor. Provides undergraduate students whose native language is not English with experience in writing essays in recognized rhetorical modes. Students will also read to develop fluency and critical thinking and will study grammar needed for academic writing. (P/NP grading only.)—I, II, III. (I, II, III.)

##### 23. Advanced Reading and Composition for Non-Native Speakers (4)

Lecture/discussion—4 hours. Prerequisite: admission by placement examination, by successful completion of course 22, or by consent of instructor. Provides undergraduate students whose native language is not English with experience writing persuasive essays related to reading passages. Students will also read for tone, style, context, and assumptions and will study advanced grammar needed for persuasive essays. (P/NP grading only.)—I, II, III. (I, II, III.)

##### 25. English for International/ESL Graduate Students (4)

Lecture/discussion—4 hours. Prerequisite: admission by placement examination or consent of instructor. Open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants).

A multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.)—I. Lane

##### 26. Writing for International Graduate Students (3)

Lecture—3 hours. Prerequisite: satisfactory completion of course 25 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.)

##### 27. Academic Writing for ESL Students (4)

Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. Writing skills necessary for upper division courses, including skills crucial to writing lab and project reports, summaries, critiques, abstracts, and responses to exam questions. Includes practice with the syntax, grammar, and vocabulary characteristic of academic writing. (P/NP grading only.)

##### 28. Reading in Scientific and Technical Subjects for ESL Students (4)

Lecture/discussion—4 hours. Instruction and practice in reading scientific and technical texts. Techniques for comprehending and analyzing grammatical and organizational patterns. Notetaking skills, summarizing, vocabulary enrichment. (P/NP grading only.)

##### 96. Directed Group Study in English as a Second Language (1-5)

Variable—1-5 hours. Prerequisite: consent of instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.)—I, II, III. (I, II, III.)

##### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Intended for lower division students. (P/NP grading only.)

##### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. Intended for lower division students. (P/NP grading only.)

### Upper Division Courses

#### 103A. Linguistic Analysis I: Phonetics, Phonology, Morphology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 139.—I. Orgun

#### 103B. Linguistic Analysis II: Morphology, Syntax, Semantics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 140.—II. Farrell, Aranovich

#### 105. Topics in Language and Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: course 1 and consent of instructor. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. Offered in alternate years.

#### 106. English Grammar (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or English 3 or University Writing Program 1 or consent of instructor. Survey of present day English grammar as informed by contemporary lin-

guistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers, their development, and their usefulness in describing the conventions of English. (Same course as English 106.) Not open for credit to students who have completed course 104. GE credit: ArtHum.—I. Ward

#### 111. Introduction to Phonological Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Introduction to contemporary phonological theory, with emphasis on autosegmental, metrical, and lexical theory.—III. Orgun

#### 112. Phonetics (4)

Lecture—3 hours; term paper. Prerequisite: courses 103A, 103B. Detailed examination of articulatory and acoustic phonetics. Not open for credit to students who have completed course 109.—I. Orgun

#### 121. Morphology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components.—III. Aranovich

#### 131. Introduction to Syntactic Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argumentation, and problems of theory building in syntax.—I. Farrell, Aranovich

#### 141. Semantics (4)

Lecture—3 hours; term paper. Prerequisite: courses 103A, 103B. Introduction to the linguistic study of the meanings of words and phrases. Survey of the meanings expressed by lexical items and derivational and inflectional morphology, as well as the contribution of argument structure, quantification, and coordination to meaning. GE credit: Wrt.—I. Ojeda

#### 150. Languages of the World (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4. Survey of the world's languages, their geographical distribution and classification, both genetic and typological. Illustrative descriptions of several major languages from different geographical areas; pidgins and creoles, *lingua francas* and other languages of widespread use. Not open for credit to students who have completed course 50. GE credit: ArtHum or SocSci, Wrt.—III.

#### 151. Historical Linguistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 103A, 103B. Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change.—II. Benware

#### 152. Language Universals and Typology (4)

Lecture—3 hours; term paper. Prerequisite: courses 103A, 103B. Investigation into common features of all human languages and the classification of languages in terms of their structural features; theories of universal grammar; detailed discussion of non-Indo-European languages and comparison with English. GE credit: Wrt.—III.

#### 160. American Voices (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4 or upper division standing recommended. Explores the forms of American English; traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation. The influence of language attitudes on perception of dialect speakers; dialect in media, education, and literature. GE credit: SocSci, Div, Wrt.—III. Ward

#### 163. Language, Gender, and Society (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or Anthropology 4. Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological conse-

quences of such differences. Focus is on English, but other languages are also discussed. GE credit: SocSci, Div, Wrt.—II. Timm, Menard-Warwick

#### 165. Introduction to Applied Linguistics (4)

Lecture—3 hours; discussion—1 hour. Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media.—Ramanathan

#### 166. The Spanish Language in the United States (4)

Lecture—3 hours; term paper. Prerequisite: course 1 or Spanish 111N; and Spanish 23 or the equivalent. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: Div, Wrt.

#### 171. Introduction to Psycholinguistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; courses 103A, 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. Offered in alternate years. GE credit: SocSci.—Corina

#### 173. Language Development (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor; courses 103A, 103B recommended. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. GE credit: SocSci.

#### 175. Biological Basis of Language (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Overview of issues in the field of neurolinguistics and techniques used to explore representation of language in the human brain. GE credit: SciEng.—I. Corina

#### 177. Computational Linguistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition and computer representations of cognitive processing. Not open for credit to students who have completed course 7. GE credit: SocSci.—II. Ojeda

#### 182. Multilingualism (4)

Lecture/discussion—4 hours. Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals. Limited enrollment. GE credit: ArtHum, SocSci, Div, Wrt.—III. (III.) Ramanathan, Timm

#### 192. Internship in Linguistics (1-12)

Internship—3-36 hours; two written reports. Prerequisite: course 1 or the equivalent. Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of 4 units applicable toward major. (P/NP grading only.)

#### 194H. Special Study for Honors Students (1-5)

Independent study—1-5 hours. Prerequisite: open only to linguistics majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis. May be repeated for credit for up to 6 units. (P/NP grading only.)

#### 197T. Tutoring in Linguistics (1-4)

Discussion—1-4 hours. Prerequisite: upper division standing, consent of instructor, and consent of department chairperson. Leading of small voluntary

discussion groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Graduate Courses

#### 200A. Foundations of Linguistics I (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by pre-generative linguistics in the twentieth century, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed course 203A.

#### 200B. Foundations of Linguistics II (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by orthodox generative linguistics, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed course 203B.

#### 200C. Foundations of Linguistics III (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics.

#### 205A-205B-205C-205D. Topics in Linguistic Theory and Methods (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs.—I, II.

#### 211. Advanced Phonological Theory and Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 111. Critical examination of current phonological theories. Offered in alternate years.—Orgun

#### 212. Advanced Phonetics (4)

Lecture—3 hours; term paper. Prerequisite: course 112. Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. Offered in alternate years.—II. Orgun

#### 231. Advanced Syntactic Theory and Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 131. Critical survey of contemporary theories of syntax. Offered in alternate years.—III. Aranovich

#### 241. Advanced Semantic Theory and Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 141 or consent of instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Offered in alternate years.—II. Ojeda

#### 251. Principles of Historical Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: course 151. Advanced analysis of the theory and methods of historical linguistics. Offered in alternate years.—III.

#### 252. Romance Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: course 151. Examination of the development of the Romance languages from Proto-Romance to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. Offered in alternate years.—III.

#### 260. Variation in Speech Communities (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 281 or consent of instructor. Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation; issues and methods in the quantitative analysis of variation. Speech community, quantitative analytic methods, and the scope of sociolinguistic competence.—I. Bayley

**263. Discourse Analysis: Text in Context (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing. Introduction to and application of leading theoretical approaches to the analysis of discourse. Approaches to the analysis of (spoken and written) text in context, tools for analyzing different types of texts (narration, conversation, etc.). Theme/rheme, given/new, anaphora, discourse markers, and other lexical/grammatical features.—II.

**264. Current Issues in Language and Gender (4)**

Seminar—3 hours; term paper; project. Prerequisite: graduate standing; prior coursework in Linguistics, Gender Studies, or Cultural Studies is desirable; no expectation of bilingual proficiency. Exploration of the construction and performance of gender through language in cross-cultural perspective and in a variety of contexts: informal conversations, narratives, workplaces, schools, households, the mass media. Special topics may include: language acquisition; multilingualism; ecofeminism; queer theory. May be repeated for credit one time when topic differs. Offered in alternate years—(I.) Menard-Warwick, Timm

**265. Language, Performance, and Power (4)**

Seminar—3 hours; term paper. Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as Anthropology 265.) Offered in alternate years.—III. Smith

**280. Theories of Second Language Acquisition (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning.—I. Ramanathan

**281. Research Methods in TESOL/SLD (4)**

Lecture—3 hours; term paper. Prerequisite: course 280. Research methods in second language research; evaluation of research designs and methods of analyses, formulation of research questions and hypotheses and design of study with thought to various kinds of data.—II. Menard-Warwick, Bayley

**282. Individual and Social Aspects of Bilingualism (4)**

Lecture—3 hours; term paper. Broad overview of bi- and multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states.—III. Timm

**283. Politics of Bi and Multilingual Literacies (4)**

Lecture/discussion—3 hours; term paper. Anthropological, psycho-social, political, and educational perspectives on bi and multilingualism. Power, colonialism, "native/non-native" speakers, and varieties and the unequal distribution of social goods. Analysis of how competing factors keep peoples disenfranchised.—II. Ramanathan

**289. Pedagogical Applications of Second Language Acquisition Theory (4)**

Seminar—3 hours; term paper. Prerequisite: course 280. Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning.—III.

**297T. English as a Second Language Teaching/Tutoring (1-4)**

Tutoring—1-4 hours. Prerequisite: course 300, 301, or 302 (may be taken concurrently). Teaching classes for ESL graduate students. Aiding the ESL

undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. (S/U grading only.)

**298. Directed Group Study (1-5)**

Prerequisite: graduate standing. (S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Professional Courses****300. The Teaching of English as a Foreign Language (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: English 105A or course 109 or consent of instructor. Methods of teaching English to nonnative speakers, stressing particularly recent linguistic methodology and techniques.—I.

**301. Materials of TESOL (4)**

Lecture—4 hours. Prerequisite: course 300 or consent of instructor. Designing and evaluating ESL curricula and proficiency assessment instruments in all areas of language acquisition (pronunciation, reading, listening comprehension, etc.). Developing lessons, teaching and tutoring in selected language acquisition areas in the UCD ESL clinic. Evaluating (and adapting) published ESL materials.—II.

**302. Recent Research and Special Projects in TESOL (4)**

Lecture—4 hours. Prerequisite: courses 300 and 301. Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UCD ESL clinic. Each student also designs and reports on a classroom research project.

**391. Oral English for ESL Students (3)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. (S/U grading only.)—II, III.

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III.

## Linguistics (A Graduate Group)

Cecilia Colombi, Ph.D., Chairperson of the Group

**Group Office.** 108 Sproul Hall  
(530) 752-9933

**Faculty**

Moradewun Adejunmobi, Ph.D., Associate Professor  
(*African American and African Studies*)

Raul Aranovich, Ph.D., Assistant Professor  
(*Linguistics*)

Carlee Arnett, Ph.D., Assistant Professor (*German*)

Wilbur A. Benware, Ph.D., Professor (*Linguistics*)

Robert Blake, Ph.D., Professor (*Spanish*)

Travis Bradley, Ph.D., Assistant Professor (*Spanish*)

Cecilia Colombi, Ph.D., Professor (*Spanish*)

David Corina, Ph.D., Professor (*Linguistics*)

Patrick Farrell, Ph.D., Professor (*Linguistics*)

Michael Glanzberg, Ph.D., Associate Professor  
(*Philosophy*)

Debra L. Long, Ph.D., Associate Professor  
(*Psychology*)

Martha Macri, Ph.D., Professor

(*Anthropology, Native American Studies*)

Julia Menard-Warwick, Ph.D., Assistant Professor  
(*Linguistics*)

Barbara Merino, Ph.D., Professor (*Education*)

Almerindo E. Ojeda, Ph.D., Professor (*Linguistics*)

C. Orhan Orgun, Ph.D., Associate Professor  
(*Linguistics*)

Vai Ramanathan, Ph.D., Professor (*Linguistics*)

Winfried Schleiner, Ph.D., Professor (*English*)

Janet S. Smith, Ph.D., Professor (*Anthropology*)

Lenora A. Timm, Ph.D., Professor (*Linguistics*)

Karen A. Watson-Gege, Ph.D., Professor  
(*Education*)

Eric Russell Webb, Ph.D., Assistant Professor  
(*French*)

Aram Yengoyan, Ph.D., Professor (*Anthropology*)

**Emeriti Faculty**

David L. Omsted, Ph.D. Professor Emeritus

Benjamin E. Wallacker, Ph.D., Professor Emeritus

Mary Schleppegrell, Ph.D., Professor Emerita

Gwendolyn Schwabe, M.A., Senior Lecturer Emerita

Maximo Torreblanca, Ph.D., Professor Emeritus

**Affiliated Faculty**

Nina F. Dronkers, Ph.D., Associate Adjunct Professor

Janet Lane, M.A., Lecturer

Ellen Lange, M.A., Lecturer

John Samsel, M.A., Lecturer

Kathleen Ward, Ph.D., Lecturer

**Graduate Study.** The Graduate Group in Linguistics offers a program of study leading to the M.A. and the Ph.D. degree. The M.A. places emphasis on applied linguistics, especially TESOL. The program offers a strong foundation in linguistics and in the linking of the theory with practice. Students have the choice of pursuing one of two sets of degree requirements. Plan I requires a total of 38 units of course work plus a thesis. Plan II requires 42 units of course work and an examination consisting of two papers.

The Ph.D. degree offers advanced training and research in linguistic theories and methods. Second language acquisition and development is a particular emphasis of the program. Detailed information on both the M.A. and the Ph.D. degrees can be obtained from the graduate advisor, from the chair of the Graduate Group or the departmental chair.

**Graduate Adviser.** A.E. Ojeda (*Linguistics*)

## Literature in Translation

The following courses are open to students throughout the campus. The readings can be in English. See departmental listing for the course description.

**Chinese**

- |         |   |
|---------|---|
| 10.     | Modern Chinese Literature (in English)                                  |
| 11.     | Great Books of China (in English)                                       |
| 50.     | Introduction to the Literature of China and Japan (in English)          |
| 104.    | Twentieth-Century Chinese Fiction (in English)                          |
| 105.    | Western Influences on Twentieth-Century Chinese Literature (in English) |
| 106.    | Chinese Poetry (in English)   |
| 107.    | Traditional Chinese Fiction (in English)                                |
| 108.    | Poetry of China and Japan (in English)                                  |
| 109A-I. | Topics in Chinese Literature (in English)                               |
| 110.    | Great Writers of China: Texts and Context (in English)                  |

**Classics**

- |      |                        |
|------|------------------------|
| 140. | Homer and Ancient Epic |
| 141. | Greek and Roman Comedy |
| 142. | Greek and Roman Novel  |
| 143. | Greek Tragedy          |

**Comparative Literature**

- |    |   |
|----|---|
| 1. | Great Books of Western Culture: The Ancient World                         |
| 2. | Great Books of Western Culture: From the Middle Ages to the Enlightenment |

# Management, Graduate School of

Nicole W. Biggart, Ph.D., Dean  
Richard P. Castanias, Ph.D., Associate Dean  
James Stevens, M.B.A., Assistant Dean

## Faculty

Brad M. Barber, Ph.D., Professor  
Beth Bechky, Ph.D., Assistant Professor  
Hemant Bhargava, Ph.D., Professor  
Eyal Bialogorsky, Ph.D., Associate Professor  
David S. Bunch, Ph.D., Professor  
Katrina Ellis, Ph.D., Assistant Professor  
Kimberly D. Elsbach, Ph.D., Professor  
William R. Gebhardt, Ph.D., Assistant Professor  
Eitan Gerstner, Ph.D., Professor  
Paul A. Griffin, Ph.D., Professor  
Michael R. Hagerty, Ph.D., Professor  
Andrew Hargadon, Ph.D., Associate Professor  
Greta Hsu, Ph.D., Assistant Professor  
Michael Maher, Ph.D., Professor  
Prasad Naik, Ph.D., Professor  
Donald A. Palmer, Ph.D., Professor  
Robert H. Smiley, Ph.D., Professor  
Anand Swaminathan, Ph.D., Professor  
Chih-Ling Tsai, Ph.D., Professor  
David Woodruff, Ph.D., Professor  
Yinghui Yang, Ph.D., Assistant Professor  
Michelle Yetman, Ph.D., Assistant Professor  
Robert Yetman, Ph.D., Assistant Professor  
Ning Zhu, Ph.D., Assistant Professor

## Emeriti Faculty

Peter K. Clark, Ph.D., Professor Emeritus  
Richard C. Dorf, Ph.D., Professor Emeritus  
Jerome J. Suran, B.S., Ph.D. (hon.), Senior Lecturer Emeritus  
Donald Topkis, Ph.D., Professor Emeritus

The Graduate School of Management offers a minor in Technology Management to undergraduate students with majors in engineering, agricultural, biological and physical sciences. This minor complements students' undergraduate studies with courses in the ways in which engineering and science-based industrial enterprises manage and use knowledge from science, engineering and technology. The minor also provides students with business and management skills that should enable them to use their engineering and science education more effectively in a technology environment.

Due to limited enrollment, students need to apply to the program. The primary admission process will be conducted in the spring quarter before student registration for fall courses. Subsequent admissions processes will be held as needed for students to enter the minor in winter and spring quarters.

## Minor Prerequisites

Students must take these courses for a letter grade of C- or better.

Management 11A .....	4 units
Mathematics 16A-16B, 17A-17B or 21A-21B .....	6-8 units
Statistics any 100 level course or above.....	4 units

## Minor Program Requirements:

**Technology Management .....20**  
Choose five courses from Management 120, 140, 150, 160, 170, 180 .....20

- 3. Great Books of Western Culture: The Modern Crisis
- 4. Major Books of the Contemporary World
- 5. Fairy Tales, Fables and Parables
- 6. Myths and Legends
- 7. Literature of Fantasy and the Supernatural
- 8. Utopias and their Transformations
- 9. The Short Story and Novella
- 10A-N. Master Authors of World Literature
- 12. Introduction to Women Writers
- 13. Dramatic Literature
- 14. Introduction to -Poetry
- 20. Man and the Natural World
- 25. Ethnic Minority Writers in World Literature
- 53A. Literature of China and Japan
- 53B. Literature of India and Southeast Asia
- 120. Writing Nature: 1750 to the Present
- 135. Women Writers
- 138. Gender and Interpretation
- 139. Shakespeare and the Classical World
- 140. Thematic and Structural Study of Literature
- 141. Introduction to Critical Theoretical Approaches to Literature and Culture
- 142. Critical Reading and Analysis
- 144. The Grotesque
- 145. Representations of the City
- 146. Myth in Literature
- 147. Modern Jewish Writers
- 151. Colonial and Postcolonial Experience in Literature
- 152. Literature of the Americas
- 153. The Forms of Asian Literature
- 154. African Literature
- 157. War and Peace in Literature
- 158. The Detective Story as Literature
- 159. Women in Literature
- 160A. The Modern Novel
- 160B. The Modern Drama
- 161A. Tragedy
- 161B. Comedy
- 163. Biography and Autobiography
- 164A. The Middle Ages
- 164B. The Renaissance
- 164C. Baroque and Neoclassicism
- 164D. The Enlightenment
- 166A. The Epic
- 166B. The Novel
- 167. Comparative Study of Major Authors
- 168A. Romanticism
- 168B. Realism and Naturalism
- 169. The Avant-Garde
- 170. The Contemporary Novel
- 180. Selected Topics in Comparative Literature
- 194H. Special Study for Honors Students
- 195. Seminar in Comparative Literature

## Dramatic Art

- 20. Introduction to Dramatic Art
- 156B. History of Theatre and Dance: 1650-1900
- 156C. History of Theatre and Dance: The Twentieth Century
- 159. Contemporary Experimental Theatre and Drama

## French

- 50. French Film
- 51. Major Works of French
- 52. France and the French-Speaking World

## German

- 48. Myth and Saga in the Germanic Cultures
- 49. Freshman Colloquium
- 112. Topics in German Literature
- 113. Goethe's Faust
- 115. German Literature since 1945
- 118A. Fin-de-siècle Vienna (The Swan Song of the Habsburg Empire)

- 118B. Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism
- 118C. Germany under the Third Reich
- 119. From German Fiction to German Film
- 141. The Holocaust and its Literary Representation
- 142. New German Cinema: From Oberhausen to the Present

## Italian

- 50. Studies in Italian Cinema
- 107. Survey of Italian Culture and Institutions
- 108. Contemporary Issues in Italian Culture and Society
- 139B. Boccaccio, Petrarch and the Renaissance
- 140. Italian Literature in English Translation: Dante, Divine Comedy
- 141. Culture, Gender and the Italian Renaissance
- 142. Masterpieces of Modern Italian Narrative
- 150. Studies in Italian Cinema

## Japanese

- 10. Masterworks of Japanese Literature (in English)
- 15. Introduction to Traditional Japanese Culture
- 50. Introduction to the Literature of China and Japan
- 101. Japanese Literature in Translation: The Early Period
- 102. Japanese Literature in Translation: The Middle Period
- 103. Japanese Literature in Translation: The Modern Period
- 104. Modern Japanese Literature: War and Revolution
- 105. Modern Japanese Literature: Hero and Anti-Hero
- 106. Japanese Culture through Films
- 107. Modern Japanese Autobiographics (in English)
- 108. Poetry of China and Japan

## Native American Studies

- 181A. Native American Literature (the novel and fiction)
- 181B. Native American Literature (non-fiction works by Native authors)
- 181C. Native American Literature (traditional and contemporary poetry)
- 184. Contemporary Indigenous Literature of Mexico
- 188. Special Topics in Native American Literary Studies

## Russian

- 41. Survey of Nineteenth-Century Russian Literature
- 42. Survey of Twentieth-Century Russian Literature
- 44. Children's Literature in Russia
- 45. Russian Fantasy
- 121. Nineteenth-Century Russian Prose
- 123. Twentieth-Century Russian Prose
- 126. The Russian Theater
- 130. Contemporary Soviet Culture
- 131. Literature of Revolution
- 132. Nature and Culture in the Soviet Union
- 140. Dostoevsky
- 141. Tolstoy
- 144. Christ and Literature
- 150. Russian Culture
- 151. Soviet Writers and Censorship
- 154. Russian Folklore
- 166. Representations of Sexuality in Russian Literature

## Spanish

- 149. Latin-American Literature in Translation

## Courses in Management (MGT/MGP)

### Lower Division Courses

#### 11A. Elementary Accounting (4)

Lecture—3 hours; discussion—1 hour. Basic concepts of accounting; interpreting and using financial statements; understanding accounting principles.—I, II, (I, II.)

#### 11B. Elementary Accounting (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A. Product costing; using accounting information for decision making; planning and performance evaluation.—III. (III.)

### Upper Division Courses

#### 100. Introduction to Financial Accounting (3)

Lecture—3 hours. Course is open to all upper division undergraduate and graduate students, except those in the Graduate School of Management. Introduction to the concepts, methods, and uses of accounting and financial reporting. Preparation of financial statements, including balance sheet and statements of income and cash flow, as well as their analysis by investors and managers.

#### 120. Managing and Using Information Technology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Introduction to computer hardware, systems software, and information systems. Management of information technology and the impact of information systems on modern management.—III. Bhargava

#### 140. Marketing for the Technology-Based Enterprise (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Marketing in technology-based companies, with emphasis on how scientists, engineers, and business people interact to develop and market products and services.—II. Hagerly

#### 150. Technology Management (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Management of firms in high technology industries such as software development and biotechnology research. Motivating and managing workers, organizing for innovation, and making decisions.—III.

#### 160. Financing New Business Ventures (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Concepts and methods used to structure and finance new business ventures. Topics include the evaluation of new investment projects, raising venture capital, the role of the venture capitalist, and the choice of organizational structure in new ventures.—II. Castanias

#### 170. Managing Costs and Quality (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Designing cost systems in high technology organizations and managing operations to maximize quality and minimize costs. Topics include activity based costing and management, managing quality and time to create value, ethical issues in cost assignment, and differential costing for decision making.—I. Maher

#### 180. Supply Chain Planning and Management (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Quantitative techniques for analysis and management of modern supply chains for the production and delivery of goods and services.—I. Woodruff

## Graduate Courses—Core Courses

#### 200A. Financial Accounting (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.—I. (I.) Rangan

#### 200B. Managerial Accounting (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations.—II. (II.) Maher

#### 201A. The Individual and Group Dynamics (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.—I. (I.) Palmer

#### 201B. Organizational Structure and Strategy (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Analysis of structural properties of organization including differentiation and vertical and horizontal integration. Alternative structural arrangements including functional, divisionalized, matrix, and hybrid structures. Relationship between environment, structure, and strategic objectives. Organization life cycle and changes.—II. (II.) Biggart, Swaminathan

#### 202A. Markets and the Firm (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied.—I. (I.)

#### 202B. Business, Government, and the International Economy (3)

Lecture—3 hours. Prerequisite: course 202A. Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance.—II. (II.) Clark

#### 203A. Data Analysis for Managers (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.—I. (I.) Tsai

#### 203B. Forecasting and Managerial Research Methods (3)

Lecture—3 hours. Prerequisite: course 203A. Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy.—II. (II.) Tsai

#### 204. Marketing Management (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Con-

sumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales.—III. (III.) Hagerly

#### 205. Financial Theory and Policy (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management. Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging.—III. (III.) Barber

#### 206. Decision Making and Management Science (3)

Lecture—3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment.—II. (II.) Topkis

#### 207. Management Information Systems (3)

Lecture—3 hours. Prerequisite: graduate student or consent of instructor. Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security.—II. (II.) Woodruff

## Elective Courses

Students must complete the Management core course requirement before enrolling in any of the following courses, or petition with consent of the instructor.

#### 215. Business Law (3)

Lecture—3 hours. Prerequisite: completion of Administration core requirements or petition with consent of instructor. Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law.

#### 216. Managing Professionals, Budgets, Controls and Ethics (3)

Lecture—3 hours. Prerequisite: graduate standing. Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants.—I. (I.) Suran

#### 220. Management of Social Networks (3)

Lecture/discussion—3 hours. Prerequisite: course 201A. Principles and applications of social network theory: coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, Web-based diagnostic tools, and practical applications.—I. (I.) Swaminathan

#### 223. Power and Influence in Management (3)

Seminar—3 hours. Prerequisite: consent of instructor. Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.—Palmer

#### 224. Managing People in Modern Organizations (3)

Lecture/discussion—3 hours. Modern systems for managing people. Examination of the changing workforce and workplace, emphasizing high-technology and knowledge-intensive organizations. The impact of firms' environment (competition, product market, regulations) on choices for managing people. The consequences of these choices for firms and managers.—II. (II.) Bechky

**240. Management Policy and Strategy (3)**

Lecture—3 hours. Prerequisite: first-year core courses of M.B.A. program. Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real “client” organizations, in the private and public sectors, are assigned to student teams as the subjects of study.—I. (I.) Suran, Hagerty

**241. New Product Development (3)**

Lecture/discussion—3 hours. Prerequisite: course 249 or consent of instructor. Open to students in the Graduate School of Management. State of the art concepts and methods to enhance the effectiveness of new product development activities. Focus on the understanding of managerial issues and acquiring the ability to solve problems.—III. Naik

**242. Marketing Communications (3)**

Lecture—3 hours. Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions.—Naik

**244. New and Small Business Ventures (3)**

Lecture—3 hours. Emphasizes starting a new business venture or managing a small, ongoing business during its formative stages. The business plan. Legal forms, financial considerations, the management team. The entrepreneur. Students develop a detailed business plan.—Dorf

**246. Negotiation and Team Building (3)**

Lecture—3 hours. Prerequisite: courses 202, 205. Teaches basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier.—III. (III.) Elsbach

**247. Customer Service as a Marketing Tool (3)**

Lecture—3 hours. Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement.—I. (I.) Gerstner

**248. Marketing Strategies (3)**

Lecture—3 hours. Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.—Gerstner

**249. Marketing Research (3)**

Lecture—3 hours. Course addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications.—Hagerty

**250. Technology Management (3)**

Lecture—3 hours. Management of the engineering and technology activity. Functions of design, planning, production, marketing, sales, and maintenance. Technological product life cycle. Research and development activity. Project planning and organization. Manufacturing issues. Case studies.

**251. Management of Innovation (3)**

Lecture—3 hours. Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.—Biggert

**252. Production and Operations Management (3)**

Lecture—3 hours. Explores methods of increasing operational efficiency in production and service organizations through planning and scheduling, materials management, inventory control, quality

control, and distribution. Methodologies employed include such techniques as programming, simulation, systems analysis, queuing, and network models.—Woodruff

**260. Financial Management (3)**

Lecture—3 hours. Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure.—Castanais

**261. Investment Analysis (3)**

Lecture—3 hours. Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance.—Odean

**262. Money and Security Markets (3)**

Lecture—3 hours. Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets.

**263. Derivative Securities (3)**

Lecture/discussion—3 hours. The behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods.—III. Clark

**264. Business Taxation (3)**

Lecture—3 hours. Analysis of the impact of business taxation on investment, production, and finance decisions. Discussion of the relationship between business organization and tax liability. Course is not intended for tax specialists.—Griffin

**266. International Finance (3)**

Lecture—3 hours. Prerequisite: course 207 or the equivalent. Open economy macroeconomics, balance of payments theory, and financial decision making in multinational firms.—Castanais

**268. Management Communications (3)**

Lecture—3 hours. The theories, strategies, and skills necessary for effective communication in management. Students will learn to improve their business writing, and will deliver business presentations orally.—Kennedy

**270. Corporate Financial Reporting (3)**

Lecture—3 hours. Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers.—Griffin

**271. Incentives and Controls (3)**

Lecture/discussion—3 hours. Prerequisite: course 200B. Concepts and techniques of accounting and budgeting for management decision making in the private sector. Topics include strategy, organizational structure, market-based incentives, performance evaluation and ethical issues.—I. Maher

**272. Evaluation of Financial Information (3)**

Lecture—3 hours. Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed.—Griffin

**273. Accounting and Reporting for Government Nonprofit Entities (3)**

Lecture—3 hours. Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies.

**274. Auditing, Internal Control, and Public Accounting (3)**

Lecture—3 hours. Concentrates on role of the independent public accountant as auditor and consultant, from the perspective of an enterprise manager. Auditing standards, auditing procedures, and auditing control techniques are discussed. Emphasis is also given to current issues confronting the accounting profession.

**276. Real Estate, Finance and Development (3)**

Lecture—3 hours. Prerequisite: course 201A and 207. Focus on single family, attached, detached, multi-family, and light commercial development. Students will study factors which make up successful real estate developments. Course will consider financial aspects involved in land acquisition, land development, construction, and project lending.

**281. Systems Analysis and Design (3)**

Lecture—3 hours. Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation.

**284. Applied Linear Models for Management (3)**

Lecture—3 hours. Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems.—Tsai

**285. Time Series Analysis and Forecasting (3)**

Lecture—3 hours. Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control.—Tsai

**286. Telecommunications and Computer Networks (3)**

Lecture—3 hours. Prerequisite: course 280. Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks.—Topkis

**287. Database Systems (3)**

Lecture—3 hours. Prerequisite: course 280. Hierarchical, network, and relational models for database systems. Design and implementation of models. Performance evaluation and benchmarking. Query structures and languages. Data security and integrity. Application to managerial decision making and decision support systems.

**288. Special Topics in Management of Information Systems (3)**

Lecture—3 hours. Managerial aspects of information systems. Topics stressing applications in organizations chosen from: economics of computers and information systems, decision support systems, management of computer-based information systems, office automation.—Topkis

**291. Topics in Organizational Behavior (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes. May be repeated for credit.—I. (I.)

**292. Topics in Finance (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques. May be repeated for credit.—I. (I.)

**293. Topics in Marketing (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hi-tech marketing, advertising, sales promotions, marketing through the Web. May be repeated for credit.—I. (I.)

**294. Topics in Accounting (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit.—I. (I.)

**295. Topics in Information Technology (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field. May be repeated for credit.—I. (I.)

**296. Topics in Technology Management (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes. May be repeated for credit.—I. (I.)

**297. Topics in International Management (3)**

Seminar—3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. The broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting. May be repeated for credit.—I. (I.)

**298. Directed Group Study (1-5)**

Prerequisite: consent of instructor.

**299. Individual Study (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

# Managerial Economics

(College of Agricultural and Environmental Sciences)

**The Major Program**

The major in managerial economics (formerly agricultural and managerial economics) teaches students to apply economics and quantitative principles to problems in agricultural production, management, marketing, finance, trade, futures and options, environment and development.

**The Program.** Each student must specialize in at least one of three options: agricultural economics, which focuses on topics related to the production and marketing of foods and fibers; environmental and resource economics, which focuses on issues related to use of resources and environmental quality; or managerial economics, which focuses on topics related to evaluating, financing, and managing business activities.

**Internships and Career Alternatives.** Students in managerial economics have opportunities to gain additional career information and preparation through internships in a variety of private business and governmental agencies. Graduates qualify for supervisory and management training positions in

farm and ranch production, food and agricultural processing, agricultural sales and service, banking, finance, commodity and stock brokerages in the private sector, and a variety of agency career positions in local, state, and federal government. Students who desire additional training are well qualified to enter graduate programs in agricultural and resource economics, economics, business administration, or law. For more information, see <http://icc.ucdavis.edu>.

**Major Entrance Requirements.** Students may enter the Pre-Managerial Economics major while completing the major preparatory requirements.

Acceptance into the pre-major does not guarantee automatic admission into the major. Before declaring a major in Managerial Economics, a student must complete the following courses with a combined grade point average (GPA) of at least 2.800. All of these courses must be taken for a letter grade. In determining admission to major status, the Department of Agricultural and Resource Economics counts only the first repeat of any pre-major course.

- Economics 1A and 1B ..... 8 units
  - Statistics 13 ..... 4 units
  - Mathematics 16A and 16B or 21A and 21B ..... 6-8 units
- If a student has taken Agricultural and Resource Economics (ARE) 100A and/or Economics (ECN)101 before applying for admission to our major, ARE 100A will take the place of ECN 1A and ECN 101 will take the place of ECN 1B for calculation of the student's entrance GPA.

**B.S. Major Requirements:**

UNITS

**English Composition Requirement ..... 4-12**

- At least 8 units from the following list:
- English 3, University Writing Program 1, 18, 19, 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 104A, 104F
- Remaining 4 units from above list or from Comparative Literature 1, 2, 3, 4, Native American Studies 5, Communication 1

**Preparatory Subject Matter ..... 72-75**

- Management 11A-11B ..... 8
  - Agricultural Management and Rangeland Resources 21, Computer Science Engineering 10, 15 or 30 ..... 3-4
  - Economics 1A-1B ..... 8
  - Mathematics 16A-16B-16C or 21A-21B ..... 8-9
  - Statistics 13, 103 ..... 8
  - Social Science, Natural Science, Agricultural Science ..... 37-38
- See major breadth requirement checklist in department Advising office or at <http://www.agecon.ucdavis.edu> for a complete list of courses.

**Breadth/General Education ..... 6-24**

Note: Approved General Education courses may be used to simultaneously satisfy Social, Natural, and Agricultural Science courses as defined in the Preparatory Subject Matter for the major and the campus General Education requirement.

**Depth Subject Matter ..... 20**

Students graduating with this major are required to attain at least a C average (2.000) in all upper division courses taken at the University in the depth subject matter.

- Agricultural and Resource Economics 100A, 100B, 106, 155 ..... 16
- Economics 101 ..... 4

**Restricted Electives ..... 32**

Choose at least one of the options below:

**Agricultural Economics option**

Choose at least 15 units from Agricultural and Resource Economics 120, 130, 132, 138, 139, 140, 145, 150. Select the remaining 17 units from the aforementioned courses, Agricultural and Resource Economics 18, or

upper division courses in Agricultural and Resource Economics and/or Economics

**Environmental and Resource Economics option**

Agricultural and Resource Economics 175, 176 ..... 8

Choose at least 18 units from Agricultural and Resource Economics 15, 120, 138, 145, 146, 150, 156, Economics 123, 125, 130, Environmental Science and Policy 168A, 168B, 178. Select the remaining 6 units from the aforementioned courses or upper division courses in Agricultural and Resource Economics and/or Economics, Environmental Science and Policy 160, 161, 163, 165, 166, 167, 171, 172, 173, Environmental Toxicology 138

**Managerial Economics option**

Agricultural and Resource Economics 18 ..... 4

Choose at least 12 units from Agricultural and Resource Economics 112, 118, 136, 157, 171A, 171B. Select the remaining 16 units from the aforementioned courses or from Agricultural and Resource Economics 115A, 120, 130, 132, 138, 139, 140, 143, 144, 145, 146, 150, 156, 175, 176, 194HA-194HB, Economics 115A, 121A, 121B, 151A, 151B, 160A, 160B

**Unrestricted Electives ..... 41-44**

**Total Units for the Degree ..... 180**

**Advising Center** for the major is in 1176 Social Sciences and Humanities Building (530) 754-9536.

**Major Adviser.** Hoy F. Carman (*Agricultural and Resource Economics*)

**Minor Program Requirements:**

Before declaring a minor in Managerial Economics, a student must complete the following courses with a combined grade point average (GPA) of at least 2.800. All of these courses must be taken for a letter grade. In determining admission to minor status, the Department of Agricultural and Resource Economics counts only the first repeat of any pre-minor course.

- Economics 1A and 1B ..... 8 units
- Mathematics 16A-16B or 21A-21B 6-8 units
- Statistics 13 ..... 4 units

The Department of Agricultural and Resource Economics offers four minor emphases open to students majoring in other disciplines who wish to complement their study programs with a minor in Managerial Economics. Each emphasis requires Agricultural and Resource Economics 100A, which has prerequisites of Economics 1A-1B and Mathematics 16A-16B. For some courses, Statistics 13 and 103 may be required. Variable-unit courses and lower division courses are not accepted for any emphasis.

UNITS

**Managerial Economics ..... 18**

**General emphasis**

Agricultural and Resource Economics 100A or the equivalent ..... 4

Additional upper division courses in Agricultural and Resource Economics ..... 14

**Agricultural Economics emphasis**

Agricultural and Resource Economics 100A or the equivalent ..... 4

Additional upper division courses in Agricultural and Resource Economics ..... 14

Select 9 or more units from Agricultural and Resource Economics 120, 130, 132, 138, 139, 140, 145, 150.

Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

**Environmental and Natural Resource Economics emphasis**

Agricultural and Resource Economics 100A or the equivalent ..... 4

Additional upper division courses in Agricultural and Resource Economics..... 14  
 Select 9 or more units from Agricultural and Resource Economics 175 and 176, and either 100B or 120.  
 Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

#### Managerial Economics emphasis

Agricultural and Resource Economics 100A or the equivalent ..... 4  
 Additional upper division courses in Agricultural and Resource Economics..... 14  
 Select 9 or more units from Agricultural and Resource Economics 112, 118, 136, 157, 171A, 171B.  
 Select additional upper division Agricultural and Resource Economics courses to complete the 18-unit total for the minor.

**Graduate Study.** See *Graduate Studies*, on page 97, in this catalog.

## Master of Education (M.Ed.) (A Graduate Group)

The Master of Education (M.Ed.) program is no longer admitting students; admissions are suspended.

## Maternal and Child Nutrition (Department of Nutrition)

Carl L. Keen, Ph.D., Chairperson of the Department

**Department Office.** 3135 Meyer Hall (530) 752-4630; <http://www.extension.ucdavis.edu/macnutrition/>

#### Faculty

Faculty members are listed on the Web site.

**Graduate Study.** The Nutrition Department offers the degree of M.A.S. in Maternal and Child Nutrition. This program consist of three required six-unit core courses (Nutrition During Pregnancy, Lactation and Infant Nutrition, and Child and Adolescent Nutrition), six to eight units of special topics seminars, four to six units of electives, and a six-unit student project (produced in consultation with a three-member guidance committee) for a total of 36 units. Each of the core courses will comprise 10 weeks of in-class instruction twice per week for two-and-a-half hours per meeting. Classes will also include online discussion of related material and readings.

Each student will be assigned a three-member guidance committee consisting of two members of the teaching faculty and an additional qualified faculty member to advise the student in choosing electives and identifying a student project.

**Preparation.** Admission to the program requires a bachelor's degree with prior course work that includes (or is comparable to): one year of general chemistry, two quarters of organic chemistry, a course in statistics, one course in general physiology, and two quarters of the biochemistry of nutrition. A limited number of deficiencies in preparatory courses may be made up after admission to the program, though the courses will not count toward graduate unit requirements.

**Graduate Advisors.** Kathryn G. Dewey, Ph.D., Professor (*Nutrition*), Jane Heinig, Ph.D., Academic Administrator (*Nutrition*)

**Courses in Maternal and Child Nutrition.** See courses under *Nutrition*, on page 398.

## Mathematical and Physical Sciences

(College of Letters and Science)

Louise H. Kellogg, Ph.D. (*Geology*), Program Director

**Program Office.** 1201 Social Sciences and Humanities Building

#### Committee in Charge

Andreas J. Albrecht, Ph.D. (*Physics*)  
 Rudolph Beran, Ph.D. (*Statistics*)  
 R. David Britt, Ph.D. (*Chemistry*)  
 Shirley Chiang, Ph.D. (*Physics*)  
 Mark J. Kurth, Ph.D. (*Chemistry*)  
 Isabel P. Montañez, Ph.D. (*Geology*)  
 Motohico Mulase, Ph.D. (*Mathematics*)  
 Bruno L. Nachtergaele, Ph.D. (*Mathematics*)  
 Robert H. Shumway, Ph.D. (*Statistics*)

#### The Program of Study

The Division of Mathematical and Physical Sciences teaches students to use experimental studies and theoretical analyses to find solutions to real world problems. Students learn to address issues such as cleaning up the environment, preserving natural resources and creating innovative materials for the future. From the study of atoms to the examination of distant galaxies, from abstract number theory to the development of new chemical compounds, the division provides students with the skills to build the world of tomorrow.

The program in Mathematical and Physical Sciences provides an organizational structure within the College of Letters and Science for facilitating the development of innovative curricular initiatives across the mathematical and physical sciences, including offering broadly conceived, integrative undergraduate- and graduate-level courses. The program also may house resident faculty pursuing interdepartmental research and teaching in this area of inquiry.

#### Courses in Mathematical and Physical Sciences (MPS)

##### Lower Division Course

##### 1. General Science: Science in the News (4)

Lecture—3 hours; laboratory/discussion—1 hour.  
 Prerequisite: lower division standing. Basic principles in science including numeracy, scale, energy, and time; the scientific method; good and bad science. Emphasis on science topics recently in the news. GE credit: SciEng.—III. Rustad

##### 11A-11B. Mathematical and Physical Sciences Seminar (2-2)

Lecture—2 hours. Prerequisite: mentorship for undergraduate research participants in the physical and mathematical sciences. Research and writing in the mathematical and physical sciences. Presentations by various science faculty members.—II. (II-I)

## Mathematics

See *Mathematics*; and *Applied Mathematics (A Graduate Group)*, on page 145.

 Duane Kouba, Ph.D., Lecturer

Lawrence Marx, Ph.D., Lecturer

**The Major Programs**

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

**The Program.** Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty adviser. The upper division course offering is grouped into entry level, core, and enrichment courses. Entry level courses are designed to serve as a bridge between the concrete mathematics of the lower division and the more abstract concepts taught in upper division courses. The core classes are intended to provide the basic mathematical techniques, whereas the enrichment choices allow students to further their mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, to elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

**Career Alternatives.** A degree in mathematics provides entry to many careers in addition to teaching. For instance, operations research, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

**A.B. Major Requirements:**

**Preparatory Subject Matter ..... 43-46**

Mathematics 12 (or high school equivalent).....	0-3
Mathematics 21A, 21B, 21C, 21D, 22B.....	19
Mathematics 25, 67.....	8
Computer Science Engineering 30 or Engineering 6.....	4
Additional non-Mathematics courses chosen from natural sciences.....	12

**Depth Subject Matter ..... 34-38**

A. <i>Entry Level (Optional)</i> .....	0-4
(Suggested choices: one course from Mathematics 108, 114, 115A, 141, 145)	
B. <i>Core</i> .....	16
Mathematics 125AB.....	8
Mathematics 135A.....	4
Mathematics 150A.....	4
C. <i>Choose one Plan from the following two: (up to 4 of these 18 units may be approved upper division courses outside of the Department of Mathematics with extensive use of mathematics)</i> .....	18

**Plan 1: General Mathematics**

Additional upper division mathematics units selected in consultation with and subject to approval of an adviser..... 18

**Plan 2: Secondary Teaching**

Mathematics 111.....	4
Mathematics 115A.....	4
Mathematics 141.....	4
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser.....	6

Note: Students who wish to satisfy the single subject matter waiver for the teaching credential should see an adviser as early as possible.

**Total Units for the Major ..... 77-84**

**Applied Mathematics**

**B.S. Major Requirements:**

**Preparatory Subject Matter ..... 42-48**

Mathematics 12 (or high school equivalent).....	0-3
Mathematics 21A, 21B, 21C, 21D, 22B.....	19
Mathematics 25, 67.....	8
Computer Science Engineering 30, 40.....	8
One two-quarter sequence from Physics 9A-9B; Biological Sciences 1A-1B; Chemistry 2A-2B; Economics 1A-1B; Statistics 32, 102; or other applied preparatory courses approved by your adviser.....	7-10

**Depth Subject Matter ..... 48-52**

A. <i>Entry Level (Optional)</i> .....	0-4
(Suggested choices: one course from Mathematics 108, 114, 115A, 141, 145)	
B. <i>Core</i> .....	32
Mathematics 150A.....	4
Mathematics 135A.....	4
Mathematics 125AB.....	8
Mathematics 119A.....	4
Mathematics 128AB.....	8
Mathematics 185A.....	4
C. <i>Enrichment Courses</i> .....	16
1. Choice of two courses from Mathematics 118ABC, 119B, 124, 128C, 129, 133, 167, 168.....	8
2. Choice of one course from Mathematics 111, 114, 115A, 116, 135B, 141, 145, 146, 147, 148, 150B, 165, 185B.....	4
3. One approved upper division course outside the Department of Mathematics with extensive use of mathematics.....	4

**Total Units for the Major ..... 90-100**

**Mathematics**

**B.S. Major Requirements:**

**Preparatory Subject Matter ..... 34-38**

Mathematics 12 (or high school equivalent).....	0-3
Mathematics 21A, 21B, 21C, 21D, 22B.....	19
Mathematics 25, 67.....	8
Computer Science Engineering 30 or Engineering 6.....	4
Physics 9A (Plans 1 and 2) or one course from Physics 7A, Statistics 13, 32, 100 or 102 (Plan 2).....	3-4

**Depth Subject Matter ..... 48-52**

**Choose one plan from the following two:**

**Plan 1: General Mathematics**

A. <i>Entry Level (Optional)</i> .....	0-4
(Suggested choices: one course from Mathematics 108, 114, 115A, 141, 145)	
B. <i>Core</i> .....	28
Mathematics 150ABC.....	12
Mathematics 135A.....	4
Mathematics 125AB.....	8
Mathematics 185A.....	4
C. <i>Enrichment</i> .....	20

1. Choice of four courses from Mathematics 111, 114, 115AB, 116, 135B, 141, 145, 146, 147, 148, 165, 185B..... 16

2. Choice of one course from Mathematics 119A, 124, 128A, 128B, 129, 133, 167, 168 or one approved upper division course outside the Department of Mathematics with extensive use of mathematics..... 4

**Plan 2: Mathematics for Secondary Teaching**

A. <i>Entry Level (Optional)</i> .....	0-4
(Suggested choices: one course from Mathematics 108, 114, 145)	

B. <i>Core</i> .....	28
Mathematics 150A.....	4
Mathematics 135A.....	4
Mathematics 125AB.....	8
Mathematics 111.....	4
Mathematics 115A.....	4
Mathematics 141.....	4
C. <i>Enrichment</i> .....	20
1. Choice of four courses from Mathematics 114, 116, 118A, 119AB, 128A, 129, 133, 135B, 145, 147, 148, 165, 167, 168, 185AB. Up to four units can be approved upper division units outside the Department of Mathematics with extensive use of mathematics.....	16
2. Choice of one course from Mathematics 115B, 146, 150B.....	4

**Total Units for the Major ..... 82-90**

**Mathematical and Scientific Computation**

**B.S. Major Requirements:**

**Preparatory Subject Matter ..... 35-38**

Mathematics 12 (or high school equivalent).....	0-3
Mathematics 21ABC or Mathematics 17ABC, 21D, 22B.....	19
Mathematics 25,67.....	8
Computer Science Engineering 30, 40.....	8

**Depth Subject Matter ..... 48-52**

A. <i>Entry Level (Optional)</i> .....	0-4
(Suggested choices: one course from Mathematics 108, 114, 115A, 141, 145)	
B. <i>Core</i> .....	28
Mathematics 150A.....	4
Mathematics 135A.....	4
Mathematics 125AB.....	8
Mathematics 128ABC.....	12
C. <i>Enrichment</i> .....	12
1. Choice of two courses from Mathematics 118ABC, 119AB, 129, 133, 167, 185A.....	8
2. Choice of one course from Mathematics 111, 114, 115A, 116, 135B, 141, 145, 146, 147, 148, 150B, 165.....	4
D. <i>Choose one Emphasis from the following two</i> .....	8

**Computational and Mathematical Biology Emphasis**

Mathematics 124.....	4
One approved upper division course in Biology.....	4

**Computational and Mathematics Emphasis**

Mathematics 168.....	4
One approved upper division course involving extensive computation or theory of computation.....	4

**Total Units for the Major ..... 83-90**

**Recommended Language Preparation.** Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.

**Major Advisers.** For a current list of advisers, contact the Student Services office at [studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu), or our Web site.

**Depth Subject Matter Requirements.** Certain mathematically oriented courses given by other departments are admissible in partial satisfaction of the depth subject matter requirements with prior departmental approval. For Mathematics 189 and 190-level courses, (1) a maximum of one unit may be counted in partial satisfaction of the depth subject matter requirements excluding Mathematics 194; (2) up to 3 units of Mathematics 194 may be counted in partial satisfaction of the depth subject matter requirements. No combination of (1) and (2) is allowed.

**Statement of Objectives.** As early as possible, but no later than the last quarter of the sophomore year or no later than the beginning of the first quarter of the junior year for transfer students, each prospective mathematics major, in consultation with an adviser, should file a formal program of study in one of the majors offered in mathematics. Forms to be used for this are available on our Web site or from the Department office. Failure to file a formal program could lead to a delay in graduation.

**Information for Undergraduates.** Assistance in planning an undergraduate major program in mathematics is available on our Web site, as well as by consulting an adviser.

**Mathematics Placement Requirement.** Students who wish to enroll in Mathematics 12, 16A, 17A, 21A, 21AH, 36 and 67 must satisfy the mathematics placement requirement. See the Department of Mathematics Web page for details well in advance of enrolling. Students who do not satisfy the requirement will be administratively dropped from these courses. Dates and times for the Precalculus Diagnostic Exam, one of the ways to meet this requirement, are posted on the Learning Skills Center Web page. The Center also provides review materials, review workshops, and other recommended remedial math courses.

Beginning with the 2006-2007 academic year, the Mathematics Placement Requirement is waived when one of the following conditions is met: (a) Advanced Placement Mathematics AB exam score of 4 or 5; (b) Advanced Placement Mathematics BC exam score of 3, 4, or 5; (c) SAT Math score of 700 and above.

**Minor Program Requirements:**

	UNITS
<b>Mathematics.....</b>	<b>20</b>
Upper division units in mathematics (exclusive of Mathematics 192, 197TC, 198, 199).....	20

**Teaching Credential Subject Representative.**  
Ali Dad-del

**Graduate Study.** The Department offers programs of study and research leading to the M.A., M.A.T., and Ph.D. degrees in mathematics. Information regarding graduate study may be obtained by consulting our Web site, and by sending an e-mail to [studentservices@math.ucdavis.edu](mailto:studentservices@math.ucdavis.edu).

**Courses in Mathematics (MAT)**

**Lower Division Courses**

**B. Elementary Algebra (no credit)**

Lecture—3 hours. Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.) (There is a fee of \$45.)—I. (I.)

**C. Trigonometry (no credit)**

Lecture—2 hours. Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.) (There is a fee of \$30.)—I, II. (I, II.)

**D. Intermediate Algebra (no credit)**

Lecture—3 hours. Basic concepts of algebra, designed to prepare the student for college work in mathematics, such as course 16A or 21A. Functions, equations, graphs, logarithms, and systems of equations. Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.) (There is a fee of \$15.)—I, II. (I, II.)

**12. Precalculus (3)**

Lecture—3 hours. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Diagnostic Examination. Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic

and trigonometric functions, sketching surfaces and solids. Not open for credit to students who have completed any of courses 16A, 16B, 16C, 17A, 17B, 17C, 21A, 21B, or 21C with a C- or better.—I, II, III. (I, II, III.)

**Note:** Mathematics 16A, 16B, and 16C are intended for students who will take no more Mathematics courses. Mathematics 17A, 17B, and 17C have the same level of rigor as 16A, 16B, and 16C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology students who do not wish to take more rigorous Mathematics courses.

**16A. Short Calculus (3)**

Lecture—3 hours. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have received credit for Mathematics 17B, 17C, 21A, 21B, or 21C. Only 2 units of credit to students who have completed course 17A. GE credit: SciEng.—I, II, III. (I, II, III.)

**16B. Short Calculus (3)**

Lecture—3 hours. Prerequisite: course 16A, 17A, or 21A. Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not open for credit to students who have completed courses 17C, 21B, or 21C. Only 2 units of credit to students who have completed course 17B. GE credit: SciEng.—I, II, III. (I, II, III.)

**16C. Short Calculus (3)**

Lecture—3 hours. Prerequisite: course 16B, 17B, or 21B. Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have completed course 21C. Only two units of credit to students who have completed course 17C. GE credit: SciEng.—I, II, III. (I, II, III.)

**Note:** Mathematics 16A, 16B, and 16C are intended for students who will take no more Mathematics courses. Mathematics 17A, 17B, and 17C have the same level of rigor as 16A, 16B, and 16C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology students who do not wish to take more rigorous Mathematics courses.

**17A. Calculus for Biology and Medicine (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Not open for credit to students who have completed course 16B, 16C, 21A, 21B, or 21C. Only 2 units of credit to students who have completed course 16A. GE credit: SciEng.—I. (I.)

**17B. Calculus for Biology and Medicine (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 16A, 17A, or 21A. Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Not open for credit to students who have completed course 16C, 21B, or 21C. Only 2 units of credit for students who have completed course 16B. GE credit: SciEng.—II.(II.)

**17C. Calculus for Biology and Medicine (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 16B, 17B, or 21B. Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Not open for credit to students who

have completed course 21C. Only 2 units of credit to students who have completed course 16C. GE credit: SciEng.—III. (III.)

**21A. Calculus (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytic geometry, and satisfying the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hopital's rule. Not open for credit to students who have completed course 16B, 16C, 17B, or 17C. Only 2 units of credit to students who have completed course 16A or 17A. GE credit: SciEng.—I, II, III. (I, II, III.)

**21AH. Honors Calculus (4)**

Lecture/discussion—4 hours. Prerequisite: a Precalculus Diagnostic Examination score significantly higher than the minimum for course 21A is required. More intensive treatment of material covered in course 21A. GE credit: SciEng. Offered irregularly.

**21AL. Emerging Scholars Program Calculus Workshop (2)**

Workshop—6 hours. Prerequisite: concurrent enrollment in course 21A. Functions, limits, continuity. Slope and derivative. Same course content as course 21A. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) Not offered every year.—I.

**21B. Calculus (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21A or 21AH. Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface of revolution. Only 2 units of credit to students who have completed course 16B, 16C, 17B, or 17C. GE credit: SciEng.—I, II, III. (I, II, III.)

**21BH. Honors Calculus (4)**

Lecture/discussion—4 hours. Prerequisite: a grade of B or better in course 21A or 21AH. More intensive treatment of material covered in course 21B. Students completing 21BH can continue with course 21CH or the regular 21C. GE credit: SciEng.

**21BL. Emerging Scholars Program Calculus Workshop (2)**

Workshop—6 hours. Prerequisite: course 21A or 21AH; concurrent enrollment in 21B. Continuation of course 21A. Same course content as 21B. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) Not offered every year.—II.

**21C. Calculus (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 16C, 17C, 21B, or 21BH. Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Vector algebra, vector calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Applications to physical systems. GE credit: SciEng.—I, II, III. (I, II, III.)

**21CH. Honors Calculus (4)**

Lecture/discussion—4 hours. Prerequisite: a grade of B or better in course 21B or 21BH. More intensive treatment of material covered in course 21C. GE credit: SciEng. Offered infrequently.

**21CL. Emerging Scholars Program Calculus Workshop (2)**

Workshop—6 hours. Prerequisite: course 21B or 21BH; concurrent enrollment in 21C. Continuation of course 21B. Same course content as course 21C. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) Not offered every year.—III.

**21D. Vector Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 21C or 21CH. Continuation of course 21C. Definite integrals over plane and solid regions in var-

ious coordinate systems. Line and surface integrals. Green's theorem, Stoke's theorem, divergence theorem.—I, II, III. (I, II, III.)

#### 21M. Accelerated Calculus (5)

Lecture/discussion—4 hours; discussion/laboratory—1 hour. Prerequisite: grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB exam, and obtaining the required score on the Precalculus Diagnostic Examination and its trigonometric component. Accelerated treatment of material from courses 21A and 21B, with detailed presentation of theory, definitions, and proofs, and treatment of computational aspects of calculus at a condensed but sophisticated level. Not open for credit to students who have completed course 21A or 21B; only 3 units of credit will be allowed to students who have completed course 16A and only 2 units of credit will be allowed to students who have completed course 16B. GE credit: SciEng. Offered irregularly.

#### 22A. Linear Algebra (3)

Lecture—3 hours. Prerequisite: nine units of college mathematics and Engineering 6 or knowledge of Matlab or course 22AL (to be taken concurrently). Matrices and linear transformation, determinants, eigenvalues, eigenvectors, diagonalization, factorization.—I, II, III. (I, II, III.)

#### 22AL. Linear Algebra Computer Laboratory (1)

Laboratory—2-3 hours. Prerequisite: nine units of college mathematics. Introduction to Matlab and its use in linear algebra. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 22B. Differential Equations (3)

Lecture—3 hours. Prerequisite: courses 21C; 22A or 67. Solutions of elementary differential equations.—I, II, III. (I, II, III.)

#### 25. Advanced Calculus (4)

Lecture/discussion—4 hours. Prerequisite: course 21B. Introduction to the rigorous treatment of abstract mathematical analysis. Proofs in mathematics, induction, sets, cardinality; real number system, theory of convergence of sequences. Not open for credit to students who have completed former course 127A.—I, III. (I, III.)

#### 36. Fundamentals of Mathematics (3)

Lecture—3 hours. Prerequisite: satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. Not open for credit to students who have completed course 108. GE credit: SciEng.—I.

#### 67. Advanced Linear Algebra (4)

Lecture/discussion—4 hours. Prerequisite: satisfaction of Math Placement Requirement or course 21A. Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition, positive definiteness, and Jordan forms.—I, II. (I, II.)

#### 71A-71B. Explorations in Elementary Mathematics (3-3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. (Deferred grading only, pending completion of sequence.) Offered irregularly.

#### 89. Elementary Problem Solving (1)

Lecture—1 hour. Prerequisite: high school mathematics through precalculus. Solve and present solutions to challenging and interesting problems in elementary mathematics. May be repeated once for credit. (P/NP grading only.) Offered irregularly.

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### Upper Division Courses

##### 108. Introduction to Abstract Mathematics (4)

Lecture/discussion—4 hours. Prerequisite: course 21B. A rigorous treatment of mathematical concepts with emphasis on developing the ability to understand abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses.—I, II. (I, II.)

##### 111. History of Mathematics (4)

Lecture—3 hours; term paper. Prerequisite: eight units of upper division Math; one of the following courses: 25, 67, 108, 114, 115A, 141, or 145. The history of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese, and other cultures. Selected topics from the history of modern mathematics.—II. (II.)

##### 114. Convex Geometry (4)

Lecture/discussion—4 hours. Prerequisite: courses 21C; 22A or 67. Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper-division courses.—II.

##### 115A. Number Theory (4)

Lecture/discussion—4 hours. Prerequisite: course 21B. Divisibility and related topics, diophantine equations, selected topics from the theory of prime numbers. Designed to serve as preparation for the more rigorous upper division courses.—I. (I.)

##### 115B. Number Theory (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 67, 115A. Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. Offered in alternate years.—II.

##### 116. Differential Geometry (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 125A. Vector analysis, curves, and surfaces in three dimensions. Offered in alternate years.—III.

##### 118A. Partial Differential Equations: Elementary Methods (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 21D; 22B; 22A or 67. Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace's equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonhomogeneous equations.—I. (I.)

##### 118B. Partial Differential Equations: Eigenfunction Expansions (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 118A. Sturm-Liouville Theory; self-adjoint operators; mixed boundary conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains; nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations.—II. (II.)

##### 118C. Partial Differential Equations: Green's Functions and Transforms (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 118B. Green's functions for one-dimensional problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace transform and solution of partial differential equations.—III. (III.)

##### 119A. Ordinary Differential Equations (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 21D; 22B; 22A or 67. Scalar and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Liapunov's method; limit cycles; Poincare Bendixon theory.—II. (II.)

##### 119B. Ordinary Differential Equations (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 119A. Lorentz equations; Poincare maps; center manifolds and normal forms; scalar and planar maps; phase space analysis for iterated maps; period-doubling bifurcation; Lyapunov exponent; chaos and symbolic dynamics; strange attractors; fractals.—III. (III.)

##### 124. Mathematical Biology (4)

Lecture—3 hours; project. Prerequisite: courses 22A or 67; 22B. Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. Computer simulation methods applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB programming required. Offered in alternate years.—III.

##### 125A. Real Analysis (4)

Lecture/discussion—4 hours. Prerequisite: course 25. Functions, limits of functions, continuity and uniform continuity, sequences of functions, series of real numbers, series of functions, power series. Not open for credit to students who have completed former course 127B.—I, II. (I, II.)

##### 125B. Real Analysis (4)

Lecture/discussion—4 hours. Prerequisite: course 67 and 125A. Theory of the derivative, Taylor series, integration, partial derivatives, Implicit Function Theorem. Not open for credit to students who have completed former course 127C.—II, III. (II, III.)

##### 128A. Numerical Analysis (4)

Lecture—3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; course 21C; Error analysis, approximation, interpolation, numerical differentiation and integration. Programming in language such as Pascal, Fortran, or BASIC required.—I. (I.)

##### 128B. Numerical Analysis in Solution of Equations (4)

Lecture—3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; courses 21C; 22A or 67. Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming. Programming in language such as Pascal, Fortran, or BASIC required.—II. (II.)

##### 128C. Numerical Analysis in Differential Equations (4)

Lecture—3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; courses 22A or 67; 22B. Difference equations, operators, numerical solutions of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required.—III. (III.)

##### 129. Fourier Analysis (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 21D; 22A or 67; 22B; 25 or consent of instructor. Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and differential equations.—I. (I.)

##### 133. Mathematical Finance (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 67; 135A. Analysis and evaluation of deterministic and random cash flow streams, yield and pricing of basic financial instruments, interest rate theory, mean-variance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required. Offered in alternate years.—III.

##### 135A. Probability (4)

Lecture/discussion—4 hours. Prerequisite: course 125A. Probability space; discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal density functions; expectation, moments, variance, Chebyshev inequality; sums of random

variables, random walk, large number law, central limit theorem. Not open for credit to students who have completed former course 131.—I, II. (I, II.)

#### 135B. Stochastic Processes (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 135A; 22A or 67. Generating functions, branching processes, characteristic function; Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queueing theory, martingales. Not open for credit to students who have completed former course 132A.—III. (III.)

#### 141. Euclidean Geometry (4)

Lecture/discussion—4 hours. Prerequisite: courses 21B; 22A or 67. An axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries. Designed to serve as preparation for the more rigorous upper division courses.—III. (III.)

#### 145. Combinatorics (4)

Lecture/discussion—4 hours. Prerequisite: course 21B. Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses.—II. (II.)

#### 146. Algebraic Combinatorics (4)

Lecture/discussion—4 hours. Prerequisite: courses 25; 22A or 67; 145. Enumeration, Pólya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former course 149A.—III. (III.)

#### 147. Topology (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 67, 125A. Basic notions of point-set and combinatorial topology.—III. (III.)

#### 148. Discrete Mathematics (4)

Lecture/discussion—4 hours. Prerequisite: course 67; or courses 22A and 25. Coding theory, error correcting codes, finite fields and the algebraic concepts needed in their development. Not open for credit to students who have completed former course 149B.—II. (II.)

#### 150A. Modern Algebra (4)

Lecture/discussion—4 hours. Prerequisite: course 67. Basic concepts of groups, symmetries of the plane. Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction.—I, II. (I, II.)

#### 150B. Modern Algebra (4)

Lecture/discussion—4 hours. Prerequisite: course 150A. Bilinear forms, rings, factorization, modules.—II. (II.)

#### 150C. Modern Algebra (4)

Lecture/discussion—4 hours. Prerequisite: course 150B. Group representations, fields, Galois theory.—III. (III.)

#### 160. Mathematical Foundations of Database Theory, Design and Performance (4)

Lecture—3 hours; project. Prerequisite: course 22A or 67; one of the following courses: 25, 108, 114, 115A, 141, or 145. Relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies. Separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; buffering; operating system contention; CPU intensive operations. Not offered every year.

#### 165. Mathematics and Computers (4)

Lecture—3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; course 22B and one of the following courses: 25, 67, 108, 114, 115A, 141 or 145. Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern com-

putational questions and the role that computers play in mathematical conjecture and experimentation.—I. (I.)

#### 167. Applied Linear Algebra (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 22A or 67. Linear algebra; linear equations; orthogonal projections, similarity transformations, quadratic forms, eigenvalues and eigenvectors. Applications to physics, engineering, economics, biology and statistics.—I, II, III. (I, II, III.)

#### 168. Optimization (4)

Lecture—3 hours; extensive problem solving. Prerequisite: Computer Science: Engineering 30 or equivalent; courses 21C or 25; 22A or 67. Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required.—III. (III.)

#### 180. Special Topics (3)

Lecture—3 hours. Prerequisite: courses 25 and 67, or consent of instructor. Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topic differs. Not offered every year.—I, II, III. (I, II, III.)

#### 185A. Complex Analysis (4)

Lecture—3 hours; extensive problem solving. Prerequisite: courses 67, 125A. Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory.—II. (II.)

#### 185B. Complex Analysis (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 185A. Analytical functions, elementary functions and their mapping properties, applications of Cauchy's integral theorem, conformal mapping and applications to heat flow and fluid mechanics. Offered in alternate years.—(III.)

#### 189. Advanced Problem Solving (3)

Lecture—3 hours. Prerequisite: courses 21D; 22A or 67; 25. Introduction to advanced problem solving techniques. Solve and present interesting and challenging problems of all areas of mathematics. Not offered every year.—II.

#### 192. Internship in Applied Mathematics (1-3)

Internship; final report. Prerequisite: upper division standing; project approval by faculty sponsor prior to enrollment. Supervised work experience in applied mathematics. May be repeated for credit for a total of 10 units. (P/NP grading only.)

#### 194. Undergraduate Thesis (3)

Prerequisite: consent of instructor. Independent research under supervision of a faculty member. Student will submit written report in thesis form. May be repeated with consent of Vice Chairperson. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 197TC. Tutoring Mathematics in the Community (1-5)

Seminar—1-2 hours; laboratory—2-6 hours. Prerequisite: upper division standing and consent of instructor. Special projects in mathematical education developing techniques for mathematics instruction and tutoring on an individual or small group basis. May be repeated once for credit. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Graduate Courses

#### 201A-201B-201C. Analysis (4-4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in Mathematics or Applied Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded and compact linear operators.

Linear differential operators and Green's functions. Distributions. Fourier transform. Measure theory.  $L_p$  and Sobolev spaces. Differential calculus and variational methods.—I-III. (I-III.)

#### 202. Functional Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 201A-201B-201C. The theory of Fredholm operators. Examples of Fredholm operators (singular integral operators, elliptic operators in Sobolev spaces). Index theory for Fredholm operators. Unbounded self-adjoint operators. Schrödinger operators and other differential operators. The spectral theorem for these and for unitary operators. Offered in alternate years.—II.

#### 204. Applied Asymptotic Analysis (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Scaling and non-dimensionalization. Asymptotic expansions. Regular and singular perturbation methods. Applications to algebraic and ordinary and partial differential equations in the natural sciences and engineering. Offered in alternate years.—(I.)

#### 205. Complex Analysis (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 185 or the equivalent or consent of instructor. Analytic continuation, Riemann mapping theorem, elliptic functions, modular forms, Riemann zeta function, Riemann surfaces.—I. (I.)

#### 206. Measure Theory (4)

Lecture—3 hours; extensive problem solving. Prerequisite: course 127C. Introduction to measure theory. The study of lengths, surface areas, and volumes in general spaces, as related to integration theory. Offered in alternate years.—III.

#### 210A. Topics in Geometry (3)

Lecture—3 hours. Prerequisite: bachelor's degree in mathematics or consent of instructor. Topics in advanced geometry related to curriculum at all levels. Required for M.A.T. degree program for prospective teachers. May be repeated for credit with prior consent of instructor.—I. (I.)

#### 210AL. Topics in Geometry: Discussion (1)

Lecture/discussion—1 hour (to be arranged). Prerequisite: course 210A (concurrently); consent of instructor. Special topics related to course 210A which are of special interest to teachers and candidates for M.A.T. degree program. May be repeated for credit. Offered irregularly.

#### 210B. Topics in Algebra (3)

Lecture—3 hours. Prerequisite: bachelor's degree in mathematics or consent of instructor. Topics in advanced algebra related to curriculum at all levels. Required for M.A.T. degree program for prospective teachers. May be repeated for credit with prior consent of instructor.—II. (II.)

#### 210BL. Topics in Algebra: Discussion (1)

Lecture/discussion—1 hour (to be arranged). Prerequisite: course 210B (concurrently); consent of instructor. Special topics related to course 210B which are of special interest to teachers and candidates for M.A.T. degree program. May be repeated for credit. Offered irregularly.

#### 210C. Topics in Analysis (3)

Lecture—3 hours. Prerequisite: bachelor's degree in mathematics or consent of instructor. Topics in advanced analysis related to curriculum at all levels. Required for M.A.T. degree program for prospective teachers. May be repeated for credit with prior consent of instructor.—III. (III.)

#### 210CL. Topics in Analysis: Discussion (1)

Lecture/discussion—1 hour (to be arranged). Prerequisite: course 210C (concurrently); consent of instructor. Special topics related to course 210C which are of special interest to teachers and candidates for M.A.T. degree program. May be repeated for credit. Offered irregularly.

#### 215A-215B-215C. Topology (4-4-4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Fundamental group and covering space theory.

Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Offered in alternate years.—(II-III.)

**218A-218B. Partial Differential Equations (4-4)**

Lecture—3 hours; term paper or discussion. Prerequisite: courses 22A, 127C. Initial and boundary value problems for elliptic, parabolic and hyperbolic partial differential equations; existence, uniqueness and regularity for linear and nonlinear equations; maximum principles; weak solutions, Holder and Sobolev spaces, energy methods; Euler-Lagrange equations. Offered in alternate years.—II-III. (II-III.)

**219. Ordinary Differential Equations (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 22A, 22B, 127C or consent of instructor. Theory of ordinary differential equations. Dynamical systems. Geometric theory. Normal forms. Bifurcation theory. Chaotic systems. Offered in alternate years.—I.

**221A. Mathematical Fluid Dynamics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 118B or consent of instructor. Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves. Offered in alternate years.—(I.)

**221B. Mathematical Fluid Dynamics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 118B or consent of instructor. Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves.—(II.)

**222. Introduction to Biofluid Dynamics (3)**

Lecture—3 hours. Prerequisite: Population Biology 231/Ecology 231 and Neurobiology, Physiology and Behavior 245 or consent of instructor. The basic principles of fluid dynamics are introduced in the first half of the course by describing various phenomena studies from a biofluids perspective. The equations of fluid motion associated with these phenomena are derived and studied in the second half. Offered irregularly.

**227. Mathematical Biology (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis. Offered in alternate years.—I.

**228A-228B-228C. Numerical Solution of Differential Equations (4-4-4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 128C. Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations. Offered in alternate years.—II-III.

**229A-229B. Numerical Methods in Linear Algebra (4-4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 22A and 167 or the equivalent or consent of instructor. Computational methods for the solution of linear algebraic equations and matrix eigenvalue problems. Analysis of direct and iterative methods. Special methods for sparse matrices. Offered in alternate years.—II-III.

**235A-235B-235C. Probability Theory (4-4-4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 127C and 131 or Statistics 131A or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Con-

ditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Statistics 235A-235B-235C.)—II-III.

**236A-236B. Stochastic Dynamics and Applications (4-4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 201C or course/Statistics 235B; course/Statistics 235A-235B-235C recommended. Stochastic processes, Brownian motion, Stochastic integration, martingales, stochastic differential equations. Diffusions, connections with partial differential equations, mathematical finance. Offered in alternate years.—II.

**240A-240B-240C. Differential Geometry (4-4-4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 116 or consent of instructor. Manifolds. Differentiable structures. Vector fields and tangent spaces. Bundles, tensors, forms, Grassman algebras. DeRham cohomology. Riemannian geometry. Connections, curvature, geodesics, submanifolds. Curves and surfaces. Positive and negative curvature; Morse Theory; homogeneous spaces; Hodge theory; applications.—II-III. (II-III.)

**245. Enumerative Combinatorics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 145, 150 or the equivalent, or consent of instructor. Introduction to modern combinatorics and its applications. Emphasis on enumerative aspects of combinatorial theory. Offered in alternate years.—I.

**246. Algebraic Combinatorics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 245 or consent of instructor. Algebraic and geometric aspects of combinatorics. The use of structures such as groups, polytopes, rings, and simplicial complexes to solve combinatorial problems. Offered in alternate years.—II.

**250A-250B-250C. Algebra (4-4-4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: graduate standing in mathematics or consent of instructor. Group and rings. Sylow theorems, abelian groups, Jordan-Holder theorem. Rings, unique factorization. Algebras, and modules. Fields and vector spaces over fields. Field extensions. Commutative rings. Representation theory and its applications.—II-III. (II-III.)

**258A. Numerical Optimization (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 127A, 167. Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods; large-scale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems.—I. (I.)

**258B. Variational Analysis (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 127A and 167 or consent of instructor. Foundations of optimization theory. The design of solution procedures for optimization problems. Modeling issues, and stability analysis. Offered in alternate years.—II. (II.)

**261A-261B. Lie Groups and Their Representations (4-4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 215A, 240A, 250A-250B or the equivalent or consent of instructor. Lie groups and Lie algebras. Classification of semi-simple Lie groups. Classical and compact Lie groups. Representations of Lie groups and Lie algebras. Root systems, weights, Weil character formula. Kac-Moody and Virasoro algebras. Applications. Offered in alternate years.—(II-III.)

**265. Mathematical Quantum Mechanics (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 201 or consent of instructor. Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral

theory and perturbation theory. Applications to atoms and molecules. The Dirac equation. Offered in alternate years.—I.

**266. Mathematical Statistical Mechanics and Quantum Field Theory (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 265 or consent of instructor. Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamentals of quantum field theory. Offered in alternate years.—(II.)

**271. Applied and Computational Harmonic Analysis (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 121, 127C, 128A, 128B, 167, 201C, or the equivalent, or consent of instructor. Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds. Offered in alternate years.—(II.)

**280. Topics in Pure and Applied Mathematics (3)**

Lecture—3 hours. Prerequisite: graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs.—I, II, III. (I, II, III.)

**290. Seminar (1-6)**

Seminar—1-6 hours. Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology. May be repeated for credit. (S/U grading only.)—I, II, III.

**298. Group Study (1-5)**

**299. Individual Study (1-12)**

(S/U grading only.)

**299D. Dissertation Research (1-12)**

(S/U grading only.)

**Professional Courses**

**301A-301B-301C. Mathematics Teaching Practicum (3-3-3)**

Fieldwork—5 hours; discussion—1 hour. Prerequisite: course 302A-302B-302C and 303A-303B-303C concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated once for credit.—II-III.

**302A-302B-302C. Curriculum Development in Mathematics (1-1-1)**

Lecture/discussion—1 hour. Prerequisite: course 303A-303B-303C concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated once for credit.—II-III.

**303A-303B-303C. Mathematics Pedagogy (1-1-1)**

Lecture/discussion—1 hour. Prerequisite: course 302A-302B-302C or 210L concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated once for credit.—II-III.

**390. Methods of Teaching Mathematics (3)**

Lecture—1 hour; discussion—1 hour; laboratory—2 hours. Prerequisite: graduate standing. Practical experience in methods and problems of the teaching of mathematics at the university level. Includes discussion of lecturing techniques, analysis of tests and

supporting material, preparation and grading of examinations, and related topics. Required of departmental teaching assistants. May be repeated for credit. (S/U grading only.)—I. (I.)

### 399. Individual Study (2-4)

Independent study—2-3 hours; discussion—1 hour. Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics. May be repeated once for credit. (S/U grading only.)—I, II, III. (I, II, III.)

### Faculty

Kristina Abel, Ph.D., Asst Adjunct Professor  
(Internal Medicine)

Alaa Afify, M.D., Asst Professor  
(Pathology & Laboratory Medicine)

Mark Agius, M.D., Professor (Neurology)

Sergio Aguilar-Gaxiola, M.D. Ph.D., Professor  
(Internal Medicine)

Joanna Albala, Ph.D., Assoc Adjunct Professor  
(Otolaryngology)

Timothy Albertson, M.D. Ph.D., Professor (Internal  
Medicine, Pharmacology and Toxicology, Anes-  
thesiology and Pain Medicine)

Mohamed Ali, M.D., Asst Professor (Surgery)

Robert Allen, M.D., Asst Clinical Professor  
(Orthopaedic Surgery)

Roblee Allen, M.D., Professor (Internal Medicine)

David Amaral, Ph.D., Professor  
(Psychiatry and Behavioral Sciences)

Ezra Amsterdam, M.D., Professor (Internal Medicine)

John Anderson, M.D., Assoc Professor (Surgery)

Emily Andrada-Brown, M.D., Asst Clinical Professor  
(Emergency Medicine)

Joseph Antognini, M.D., Professor  
(Anesthesiology and Pain Medicine)

Thomas Aoki, M.D., Professor (Internal Medicine)

Nancy Aranda, M.D., Asst Clinical Professor  
(Anesthesiology and Pain Medicine)

Michael Ascher, M.D., Adjunct Professor  
(Internal Medicine)

Paul Ashwood, Ph.D., Asst Professor  
(Medical Microbiology and Immunology)

David Asmuth, M.D., Asst Professor  
(Internal Medicine)

David August, M.D., Asst Clinical Professor  
(Anesthesiology and Pain Medicine)

Mark Avdalovic, M.D., Asst Clinical Professor  
(Internal Medicine)

Anthony Azakie, M.D., Asst Professor (Surgery)

Huong Bach, M.D., Clinical Professor  
(Internal Medicine)

Ramsey Badawi, Ph.D., Asst Professor (Radiology)

Aaron Bair, M.D., Asst Professor  
(Emergency Medicine)

Thomas Balsbaugh, M.D., Asst Clinical Professor  
(Family and Community Medicine)

Peter Barry, Ph.D., Assoc Professor  
(Pathology & Laboratory Medicine)

Stephen Barthold, Ph.D., Professor  
(Pathology & Laboratory Medicine)

Sue Barton, Ph.D. PsyD, Clinical Professor  
(Family and Community Medicine)

Felix Battistella, M.D., Professor (Surgery)

Andreas J Baumlmer, Ph.D., Professor  
(Medical Microbiology and Immunology)

Kathleen Baynes, Ph.D., Professor (Neurology)

Blaine Beaman, Ph.D., Professor  
(Medical Microbiology and Immunology)

Carol Beatty, M.D., Clinical Professor (Radiology)

Kenneth Beck, Ph.D., Assoc Professor  
(Cell Biology and Human Anatomy)

Laurel Beckett, Ph.D., Professor  
(Public Health Sciences)

Peter Belafsky, M.D., Asst Professor  
(Otolaryngology)

Deborah Bennett, Ph.D., Asst Professor  
(Public Health Sciences)

Daniel Benson, M.D., Professor  
(Orthopaedic Surgery)

Amerish Bera, M.D., Clinical Professor  
(Internal Medicine)

Lars Berglund, M.D. Ph.D., Professor  
(Internal Medicine)

Robert Berman, Ph.D., Professor  
(Neurological Surgery)

Klea Bertakis, M.D., Professor  
(Family and Community Medicine)

Charles Bevins, M.D. Ph.D., Professor  
(Medical Microbiology and Immunology)

Dean Blumberg, M.D., Assoc Professor (Pediatrics)

Sue Bodine, Ph.D., Professor

(Physiology and Membrane Biology)

Nina Boe, M.D., Assoc Clinical Professor

(Obstetrics and Gynecology)

James Boggan, M.D., Professor

(Neurological Surgery)

Christian Bohringer, MBBS, Asst Clinical Professor

(Anesthesiology and Pain Medicine)

Richard Bold, M.D., Assoc Professor (Surgery)

William Bommer, M.D., Professor (Internal Medicine)

H. William Bonekat, M.D., Professor

(Internal Medicine, Neurology)

Ann Bonham, Ph.D., Professor (Pharmacology and  
Toxicology, Internal Medicine)

John Boone, Ph.D., Professor (Radiology)

Eric Boren, M.D., Asst Clinical Professor  
(Internal Medicine)

Alexander Borowsky, M.D., Asst Professor  
(Pathology & Laboratory Medicine)

James Bourgeois, M.D., Assoc Professor  
(Psychiatry and Behavioral Sciences)

Christopher Bowlus, M.D., Assoc Professor  
(Internal Medicine)

Stephen Boyers, M.D., Clinical Professor

(Obstetrics and Gynecology)

James Brandt, M.D., Professor

(Ophthalmology and Visual Sciences)

Hilary Brodie, M.D. Ph.D., Professor

(Otolaryngology)

Richard Brunader, M.D., Assoc Clinical Professor  
(Family and Community Medicine)

James Brunberg, M.D., Professor (Radiology)

Alan Buckpitt, Ph.D., Professor  
(Public Health Sciences)

Michael Buonocore, M.D. Ph.D., Professor  
(Radiology)

Marie Burns, Ph.D., Assoc Professor

(Psychiatry and Behavioral Sciences)

Lavjay Butani, M.D., Assoc Professor (Pediatrics)

Lesley Butler, Ph.D., Asst Adjunct Professor  
(Public Health Sciences)

Robert Byrd, M.D. MPH, Assoc Professor (Pediatrics)

Ru Ya Cai, M.D., Asst Clinical Professor  
(Internal Medicine)

Peter Cala, Ph.D., Professor

(Physiology and Membrane Biology)

Royce Calhoun, M.D., Asst Professor (Surgery)

Edward Callahan, Ph.D., Professor

(Family and Community Medicine)

Christopher Camilleri, DO MS, Asst Clinical  
Professor (Internal Medicine)

Gary Caputo, M.D., Professor (Radiology)

Robert Cardiff, M.D. Ph.D., Professor

(Pathology & Laboratory Medicine)

Kermit Carraway, Ph.D., Assoc Professor

(Biochemistry and Molecular Medicine)

Cameron Carter, MBBS, Professor

(Psychiatry and Behavioral Sciences)

Jeffrey Caspar, M.D., Assoc Clinical Professor

(Ophthalmology and Visual Sciences)

Diana Cassidy, DrPH, Asst Adjunct Professor

(Public Health Sciences)

Leo Chalupa, Ph.D., Professor

(Ophthalmology and Visual Sciences)

Andrew Chan, M.D., Assoc Professor

(Internal Medicine)

Celia Chang, M.D., Asst Clinical Professor

(Neurology)

Dongwoo (John) Chang, M.D. FRCS, Asst Professor

(Neurological Surgery)

Caroline Chantry, M.D., Assoc Professor (Pediatrics)

Gurtej S. Cheema, M.D., Asst Clinical Professor

(Internal Medicine)

Allan Yi-Nan Chen, M.D. Ph.D., Asst Professor

(Radiation Oncology)

Chao-Yin Chen, Ph.D., Asst Adjunct Professor

(Pharmacology and Toxicology)

Hongwu Chen, D.V.M. Ph.D., Assoc Professor

(Biochemistry and Molecular Medicine)

Jyuhn-Ming (Jimmy) Chen, M.D., Asst Clinical Pro-  
fessor (Pathology & Laboratory Medicine)

Moon Chen, Ph.D. MPH, Professor

(Public Health Sciences)

Tsung-Yu Chen, Ph.D., Assoc Professor (Neurology)

Hwai-Jong Cheng, M.D., Asst Professor

(Pathology & Laboratory Medicine)

- Simon Cherry, Ph.D., Professor  
(Physiology and Membrane Biology)
- Anthony Cheung, Ph.D., Professor  
(Pathology & Laboratory Medicine)
- Helen Chew, M.D., Asst Professor  
(Internal Medicine)
- Nipavan Chiamvimonvat, M.D., Professor  
(Internal Medicine)
- Andrew I Chin, M.D., Asst Professor  
(Internal Medicine)
- Sufen Chiu, M.D. Ph.D., Asst Professor  
(Psychiatry and Behavioral Sciences)
- Kiho Cho, D.V.M. Ph.D., Asst Adjunct Professor  
(Surgery)
- Deborah Chong, M.D., Asst Clinical Professor  
(Obstetrics and Gynecology)
- Phillip Choo, M.D., Assoc Professor  
(Ophthalmology and Visual Sciences)
- Prabhakara Choudary, Ph.D., Adjunct Professor  
(Psychiatry and Behavioral Sciences)
- Michael Choy, M.D., Clinical Professor (Pediatrics)
- Scott Christensen, M.D., Assoc Clinical Professor  
(Internal Medicine)
- Youngran Chung, M.D. Ph.D., Asst Adjunct Professor  
(Biochemistry and Molecular Medicine)
- Mary Ciotti, M.D., Assoc Professor  
(Obstetrics and Gynecology)
- Terry Coates, M.D., Assoc Clinical Professor  
(Radiology)
- Stuart Cohen, M.D., Professor (Internal Medicine)
- Blythe Corbett, Ph.D., Asst Clinical Professor  
(Psychiatry and Behavioral Sciences)
- Kevin Coulter, M.D., Clinical Professor (Pediatrics)
- Paul Cox, M.D., Assoc Clinical Professor  
(Psychiatry and Behavioral Sciences)
- Rosemary Cress, DrPH MPH, Asst Adjunct Professor  
(Public Health Sciences)
- Carroll Cross, M.D., Professor (Internal Medicine,  
Physiology and Membrane Biology)
- Fitz-Roy Curry, Ph.D., Professor  
(Physiology and Membrane Biology)
- John Dalrymple, M.D., Assoc Clinical Professor  
(Obstetrics and Gynecology)
- Satya Dandekar, Ph.D., Professor (Medical Microbi-  
ology and Immunology, Internal Medicine)
- Stacy D'Andre, M.D., Asst Clinical Professor  
(Internal Medicine)
- Angela Davies, M.D. FRCPC, Asst Professor  
(Internal Medicine)
- Brian Davis, M.D., Asst Professor  
(Physical Medicine and Rehabilitation)
- David Dawson, M.D., Assoc Professor (Surgery)
- Adela de la Torre, Ph.D., Adjunct Professor  
(Family and Community Medicine)
- Charles DeCarli, M.D., Professor (Neurology)
- Michael DeGregorio, Pharm., Professor  
(Internal Medicine)
- Stavros Demos, Ph.D., Assoc Adjunct Professor  
(Urology)
- Sally DeNardo, M.D., Professor  
(Internal Medicine, Radiology)
- Colleen Denny-Garamendi, DrPH MPH, Asst Adjunct  
Professor (Public Health Sciences)
- Thomas Depner, M.D., Professor (Internal Medicine)
- Kathryn DeRiemer, Ph.D. MPH, Asst Adjunct  
Professor (Public Health Sciences)
- Robert Derlet, M.D., Professor  
(Emergency Medicine)
- Sridevi Devaraj, Ph.D., Assoc Adjunct Professor  
(Pathology & Laboratory Medicine)
- Ralph deVere White, M.D., Professor (Urology)
- Elva Diaz, Ph.D., Asst Professor  
(Pharmacology and Toxicology)
- Deborah Diercks, M.D., Assoc Professor  
(Emergency Medicine)
- Elizabeth Disbrow, Ph.D., Asst Adjunct Professor  
(Neurology)
- Burl Don, M.D., Professor (Internal Medicine)
- Paul Donald, M.D., Professor (Otolaryngology)
- Rakesh Donthineni-Rao, M.D., Asst Professor  
(Orthopaedic Surgery)
- Raymond Dougherty, M.D., Assoc Clinical Professor  
(Radiology)
- Gordon Douglas, Ph.D., Adjunct Professor  
(Cell Biology and Human Anatomy)
- Karen Doyle, M.D. Ph.D., Professor  
(Otolaryngology)
- Nina Dronkers, Ph.D., Adjunct Professor (Neurology)
- Arthur Dublin, M.D. MBA, Clinical Professor  
(Radiology)
- Jonathan Ducore, M.D., Assoc Professor (Pediatrics)
- Jamie Eberling, Ph.D., Assoc Adjunct Professor  
(Neurology)
- Wetona Suzanne Eidson-Ton, M.D., Asst Clinical  
Professor (Family and Community Medicine,  
Obstetrics & Gynecology)
- Daniel Eisen, M.D., Asst Professor (Dermatology)
- Jonathan Eisen, Ph.D., Professor (Medical Microbiol-  
ogy and Immunology)
- Jason Eiserich, Ph.D., Assoc Professor (Internal Medi-  
cine, Physiology and Membrane Biology)
- Robert Eison, M.D., Asst Clinical Professor  
(Internal Medicine)
- Willard Ellis, M.D. Ph.D., Asst Clinical Professor  
(Internal Medicine)
- William Ellis, M.D., Professor (Pathology & Labora-  
tory Medicine, Neurology)
- Lars Ellison, M.D., Asst Professor (Urology)
- Danny Enepekides, M.D., Asst Professor  
(Otolaryngology)
- Thomas Engel, M.D., Assoc Professor  
(Anesthesiology and Pain Medicine)
- Kent Erickson, Ph.D., Professor  
(Cell Biology and Human Anatomy)
- Eva Escobedo, M.D., Clinical Professor (Radiology)
- Ursula Esser, Ph.D., Asst Adjunct Professor  
(Pathology & Laboratory Medicine)
- Christopher Evans, M.D., Assoc Professor (Urology)
- Robert Fairclough, Ph.D., Assoc Professor  
(Neurology)
- Tonya Fancher, M.D., Asst Professor  
(Internal Medicine)
- Peggy Farnham, Ph.D., Professor  
(Pharmacology and Toxicology)
- D Gregory Farwell, M.D., Asst Professor  
(Otolaryngology)
- Nasim Fazel, M.D. DDS, Asst Clinical Professor  
(Dermatology)
- Irwin Feinberg, M.D., Professor  
(Psychiatry and Behavioral Sciences)
- Vahid Feiz, M.D., Asst Professor  
(Ophthalmology and Visual Sciences)
- Joshua Fenton, M.D. MPH, Asst Clinical Professor  
(Family and Community Medicine)
- Tania Ferguson, M.D., Asst Professor  
(Orthopaedic Surgery)
- Michael Ferns, Ph.D., Assoc Professor  
(Anesthesiology and Pain Medicine, Physiology  
and Membrane Biology)
- Nancy Field, M.D., Clinical Professor  
(Obstetrics and Gynecology)
- Clifford Fisher, M.D., Asst Clinical Professor  
(Internal Medicine)
- Scott Fishman, M.D., Professor  
(Anesthesiology and Pain Medicine)
- Faith Fitzgerald, M.D., Professor (Internal Medicine)
- Paul FitzGerald, Ph.D., Professor  
(Cell Biology and Human Anatomy)
- Neal Fleming, M.D. Ph.D., Professor  
(Anesthesiology and Pain Medicine)
- Candace Floyd, Ph.D., Asst Professor  
(Neurological Surgery)
- Neil Flynn, M.D., Professor (Internal Medicine)
- Maria Luisa Fogata, M.D., Asst Professor  
(Radiology)
- David Follette, M.D., Professor (Surgery)
- Alla Fomina, Ph.D., Asst Professor  
(Physiology and Membrane Biology)
- Peter Franks, MBBS, Professor  
(Family and Community Medicine)
- William Fuller, Asst Professor (Surgery)
- Maxwell Fung, M.D., Asst Professor  
(Dermatology, Pathology)
- Kenneth Furukawa, M.D., Assoc Clinical Professor  
(Anesthesiology and Pain Medicine)
- David Fyhrie, Ph.D., Professor  
(Orthopaedic Surgery)
- Brian Gallay, M.D. Ph.D., Asst Professor  
(Internal Medicine)
- Jose Galvez, M.D., Asst Adjunct Professor  
(Pathology & Laboratory Medicine)
- David Gandara, M.D., Professor (Internal Medicine)
- Mehul Gandhi, MBBS, Asst Clinical Professor  
(Internal Medicine)
- Regina Gandour-Edwards, M.D., Assoc Professor  
(Pathology & Laboratory Medicine, Urology)
- Jorge Garcia, M.D., Assoc Professor  
(Internal Medicine)
- Juan Carlos Garcia, M.D., Asst Clinical Professor  
(Internal Medicine)
- Francisco Garcia-Ferrer, M.D., Assoc Clinical  
Professor (Ophthalmology and Visual Sciences)
- Angela Gelli, Ph.D., Asst Professor  
(Pharmacology and Toxicology)
- Eugene Gerscovich, M.D., Professor (Radiology)
- M. Eric Gershwin, M.D., Professor  
(Internal Medicine)
- Paramita M Ghosh, Ph.D., Asst Adjunct Professor  
(Urology)
- Raminder Gill, M.D., Asst Clinical Professor  
(Internal Medicine)
- Marijo Gillen, M.D. Ph.D., Asst Professor  
(Radiology)
- Nicole Glaser, M.D., Assoc Professor (Pediatrics)
- Kathryn Glatter, M.D., Assoc Professor  
(Internal Medicine)
- Glenna Gobar, D.V.M. MPVM, Asst Adjunct  
Professor (Anesthesiology and Pain Medicine)
- Ellen Gold, Ph.D., Professor (Public Health Sciences)
- Zelanna Goldberg, M.D., Assoc Professor  
(Radiation Oncology)
- Tzipora Goldkorn, Ph.D., Professor  
(Internal Medicine)
- Qizhi Gong, Ph.D., Asst Professor  
(Cell Biology and Human Anatomy)
- Beth Goodlin-Jones, Ph.D., Assoc Professor  
(Psychiatry and Behavioral Sciences)
- James Goodnight, M.D. Ph.D., Professor (Surgery)
- Sandra W Gorges, M.D., Assoc Professor  
(Radiology)
- Fredric Gorin, M.D., Professor (Neurology)
- Sergei Grando, M.D. Ph.D., Professor (Dermatology)
- Richard Graves, M.D., Clinical Professor  
(Obstetrics and Gynecology)
- Ralph Green, M.D., Professor (Pathology & Labora-  
tory Medicine, Internal Medicine)

Professor (Radiation Oncology)
- Danielle Harvey, Ph.D., Asst Adjunct Professor  
(Public Health Sciences)
- Virginia Harvey, M.D. MS, Assoc Clinical Professor  
(Anesthesiology and Pain Medicine)
- Shawn Hayes, Ph.D., Asst Adjunct Professor  
(Internal Medicine)

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

- Scott Hazelwood, Ph.D., Asst Professor  
(*Orthopaedic Surgery*)
- Xiaosong He, Ph.D., Assoc Adjunct Professor  
(*Internal Medicine*)
- Karen Heiden, M.D., Asst Clinical Professor  
(*Orthopaedic Surgery*)
- Gerhard Heinrich, M.D., Assoc Professor  
(*Internal Medicine*)
- Mark Henderson, M.D., Assoc Professor  
(*Internal Medicine*)
- Robert Hendren, DO, Professor  
(*Psychiatry and Behavioral Sciences*)
- Irva Hertz-Picciotto, Ph.D., Professor  
(*Public Health Sciences*)
- David Hessel, Ph.D., Asst Clinical Professor  
(*Psychiatry and Behavioral Sciences*)
- Donald Hilty, M.D., Assoc Professor  
(*Psychiatry and Behavioral Sciences*)
- Virginia Hinshaw, D.V.M., Professor  
(*Internal Medicine*)
- W Ladson Hinton, M.D., Assoc Professor  
(*Psychiatry and Behavioral Sciences*)
- Calvin Hirsch, M.D.M.D., Professor (*Internal Medicine, Epidemiology & Preventive Medicine*)
- Leonard Hjelmeland, Ph.D., Professor  
(*Ophthalmology and Visual Sciences*)
- Hung Ho, M.D., Assoc Professor (*Surgery*)
- Michael Hogarth, M.D., Assoc Professor (*Pathology & Laboratory Medicine, Internal Medicine*)
- James Holcroft, M.D., Professor (*Surgery*)
- Michael Holland, Ph.D., Professor  
(*Biochemistry and Molecular Medicine*)
- James Holmes, M.D., Assoc Professor  
(*Emergency Medicine*)
- Barbara Horwitz, Ph.D., Professor  
(*Physiology and Membrane Biology*)
- Christine S. Hotz, D.V.M. MS, Asst Adjunct Professor  
(*Anesthesiology and Pain Medicine*)
- Lydia Howell, M.D., Professor  
(*Pathology & Laboratory Medicine*)
- Scott Hundahl, M.D., Professor (*Surgery*)
- John C Hunter, M.D., Clinical Professor (*Radiology*)
- Thomas R Huser, Ph.D., Assoc Professor  
(*Internal Medicine*)
- Judith Hwang, M.D. MBA, Assoc Clinical Professor  
(*Anesthesiology and Pain Medicine*)
- Dianne Hyson, Ph.D., Asst Adjunct Professor  
(*Internal Medicine*)
- Roslyn Rivkah Isseroff, M.D., Professor  
(*Dermatology*)
- Takayuki Ito, M.D. Ph.D., Assoc Adjunct Professor  
(*Neurology*)
- Robert Jacoby, M.D., Asst Professor (*Surgery*)
- Kiran Jain, M.D., Professor (*Radiology*)
- Amir Jamali, M.D., Asst Professor  
(*Orthopaedic Surgery*)
- Kim Janatpour, M.D., Asst Professor  
(*Pathology & Laboratory Medicine*)
- Javid Javidan-Nejad, M.D., Asst Professor (*Urology*)
- Hanne Jensen, M.D., Professor  
(*Pathology & Laboratory Medicine*)
- Anthony Jerant, M.D., Assoc Professor  
(*Family and Community Medicine*)
- Sanjay Jhavar, M.D., Asst Clinical Professor  
(*Pediatrics*)
- Cheng Ji, M.D., Asst Professor (*Radiology*)
- Ishwarlal Jialal, M.D. Ph.D., Professor (*Pathology & Laboratory Medicine, Internal Medicine*)
- Lee-Way Jin, M.D., Assoc Professor  
(*Pathology & Laboratory Medicine*)
- Steven Jinks, Ph.D., Asst Adjunct Professor  
(*Anesthesiology and Pain Medicine*)
- Jesse Joad, M.D., Professor (*Pediatrics*)
- Karnjit Johl, M.D., Asst Clinical Professor  
(*Internal Medicine*)
- Edward Jones, M.D. Ph.D., Professor  
(*Psychiatry and Behavioral Sciences*)
- Jill G Joseph, M.D. Ph.D., Professor (*Pediatrics*)
- Thomas Jue, Ph.D., Professor  
(*Biochemistry and Molecular Medicine*)
- Donna Kalauokalani, M.D. MPH, Asst Professor  
(*Anesthesiology and Pain Medicine*)
- Chulani Kappagoda, M.D., Professor  
(*Internal Medicine*)
- Siddika Karakas, M.D., Professor (*Internal Medicine*)
- Tom Karl, M.D., Professor (*Surgery*)
- Philip Kass, D.V.M. Ph.D., Professor  
(*Public Health Sciences*)
- Richard Katzberg, M.D., Professor (*Radiology*)
- Marc Kaufman, Ph.D., Professor (*Internal Medicine, Physiology and Membrane Biology*)
- Ravi Kaul, Ph.D., Assoc Adjunct Professor  
(*Pediatrics*)
- George Kaysen, M.D. Ph.D., Professor  
(*Internal Medicine*)
- Carl Keen, Ph.D., Professor (*Internal Medicine*)
- Craig Keenan, M.D., Asst Professor  
(*Internal Medicine*)
- John Keltner, M.D., Professor (*Ophthalmology and Visual Sciences, Neurology*)
- Nicholas Kenyon, M.D., Asst Professor  
(*Internal Medicine*)
- Vijay Khatri, M.D., Assoc Professor (*Surgery*)
- David Kilmer, M.D., Professor

- Philip Wolinsky, M.D., Professor  
(Orthopaedic Surgery)
- Michael S Wong, M.D., Asst Professor (Surgery)
- David Woods, Ph.D., Adjunct Professor (Neurology)
- Michael Wright, Ph.D., Asst Professor  
(Pharmacology and Toxicology)
- Jian Wu, M.D. Ph.D., Assoc Adjunct Professor  
(Internal Medicine)
- Mack Wu, M.D., Assoc Adjunct Professor (Surgery)
- Reen Wu, Ph.D., Professor (Internal Medicine)
- Heike Wulff, Ph.D., Asst Professor  
(Pharmacology and Toxicology)
- Theodore Wun, M.D., Professor (Internal Medicine)
- Ping Xia, M.D. Ph.D., Assoc Professor  
(Obstetrics and Gynecology)
- Ebenezer Yamoah, M.D., Professor  
(Otolaryngology)
- Chunli Yang, Ph.D., Asst Professor  
(Radiation Oncology)
- Xiaowei Yang, Ph.D., Asst Adjunct Professor  
(Public Health Sciences)

Wei Yao, Ph.D., Asst Adjunct Professor  
(Internal Medicine)  
Shaguffa Yasmeen, M.D., Asst Professor  
(Obstetrics and Gynecology, Internal Medicine)  
Peter Yellowlees, MBBS, Professor  
(Psychiatry and Behavioral Sciences)  
Jane Yeun, M.D., Assoc Professor (Internal Medicine)  
Ken Yoneda, M.D., Assoc Professor  
(Internal Medicine)  
Jong Yoon, M.D., Asst Professor  
(Psychiatry and Behavioral Sciences)  
Yinlee Yoong, M.D., Asst Clinical Professor  
(Internal Medicine)  
Zongbing You, M.D. Ph.D., Asst Adjunct Professor  
(Orthopaedic Surgery)  
J Nilas Young, M.D., Professor (Surgery)  
Sarah Yuan, M.D. Ph.D., Professor (Surgery)  
Mark Zern, M.D., Professor (Internal Medicine)  
Lin Zhang, M.D. Ph.D., Asst Professor (Neurology)  
Holly Zhao, M.D. Ph.D., Asst Professor  
(Physical Medicine and Rehabilitation)  
Jie Zheng, Ph.D., Asst Professor  
(Physiology and Membrane Biology)  
Chengji Zhou, Ph.D. M Sci, Asst Professor  
(Cell Biology and Human Anatomy)  
Vincent Ziboh, Ph.D., Professor  
(Dermatology, Biological Chemistry)  
Edie Zusman, M.D., Asst Adjunct Professor  
(Neurological Surgery)  
Theodore Zwerdling, M.D., Assoc Clinical Professor  
(Pediatrics)

### Emeriti Faculty

Charles Abildgaard, M.D., Professor Emeritus  
Deborah Ablin, M.D., Professor Emeritus  
Thomas Anders, M.D., Professor Emeritus  
Neil Andrews, M.D., Professor Emeritus  
Len Andrus, M.D., Professor Emeritus  
Charles Ashmore, Ph.D., Professor Emeritus  
Charles Beauchamp, M.D., Professor Emeritus  
James Beaumont, Ph.D., Professor Emeritus  
Joseph Belber, M.D., Professor Emeritus  
John Benfield, M.D., Professor Emeritus  
William Benisek, Ph.D., Professor Emeritus  
Eleazar Benjamini, Ph.D., Professor Emeritus  
Herbert Berkoff, M.D., Professor Emeritus  
Edmund Bernauer, Ph.D., Professor Emeritus  
Kay Blacker, M.D., Professor Emeritus  
F. William Blaisdell, M.D., Professor Emeritus  
Hugo Bogren, M.D., Professor Emeritus  
Robert Bolt, M.D., Professor Emeritus  
Constance Bowe, M.D., Professor Emeritus  
Edwin Bradbury, Ph.D., Professor Emeritus  
George Cardinet, Ph.D., Professor Emeritus  
Richard Carlsen, Ph.D., Professor Emeritus  
James Carlson, Ph.D., Professor Emeritus  
Marion Carnes, M.D., Professor Emeritus  
James Castles, M.D., Professor Emeritus  
Willard Centerwall, M.D., Professor Emeritus  
Robert S. Chang, M.D., DSc, Professor Emeritus  
Michael Chapman, M.D., Professor Emeritus  
Ronald Chuang, Ph.D., Professor Emeritus  
Matthew Connors, M.D., Professor Emeritus  
Sakti Das, M.D., Professor Emeritus  
Robert Davidson, M.D., MPH, Professor Emeritus  
Gerald DeNardo, M.D., Professor Emeritus  
Pierre Dreyfus, M.D., Professor Emeritus  
John Eisele, M.D., Professor Emeritus  
Allen Enders, Ph.D., Professor Emeritus  
William Fowler, M.D., Professor Emeritus  
Charles Frey, M.D., Professor Emeritus  
Dennis Fung, M.D., Professor Emeritus  
Andrew Gabor, M.D., Professor Emeritus  
Murray Gardner, M.D., Professor Emeritus  
Michael Geokas, M.D., Professor Emeritus  
David Gibson, Ph.D., Professor Emeritus  
Boyd Goetzman, M.D., Ph.D., Professor Emeritus  
Elliott Goldstein, M.D., Professor Emeritus  
Edward Gomez, M.D., Ph.D., Professor Emeritus  
Sarah Gray, Ph.D., Professor Emeritus  
Jon Green, M.D., Ph.D., Professor Emeritus  
Jerry Green, Ph.D., Professor Emeritus  
Adam Greenspan, M.D., Professor Emeritus  
Gerald Gronert, M.D., Professor Emeritus  
Paul Gulyassy, M.D., Professor Emeritus  
Charles Halsted, M.D., Professor Emeritus

Crystie Halsted, M.D., Professor Emeritus  
Anthony Hance, Ph.D., Professor Emeritus  
Leland Hanowell, M.D., Professor Emeritus  
Fredrick Hanson, M.D., Professor Emeritus  
Paul Hattersley, M.D., Professor Emeritus  
Glen Hawkes, Ph.D., Professor Emeritus  
Gary Henderson, Ph.D., Professor Emeritus  
Andrew Hendrickx, Ph.D., Professor Emeritus  
John Hershey, Ph.D., Professor Emeritus  
Paul Hoeprich, M.D., Professor Emeritus  
Mannfred Hollinger, Ph.D., Professor Emeritus  
Robert Hunter, Ph.D., Professor Emeritus  
Edward Hurley, M.D., Professor Emeritus  
Gordon Jensen, M.D., Professor Emeritus  
E Ralph Johnson, M.D., Professor Emeritus  
George Jordan, M.D., Professor Emeritus  
David Katz, Ph.D., Professor Emeritus  
Eva Killam, Ph.D., Professor Emeritus  
Penelope Knapp, M.D., Professor Emeritus  
Lindy Kumagai, M.D., Professor Emeritus  
Bo Lantz, M.D., Professor Emeritus  
Edward Larkin, M.D., Professor Emeritus  
Lawrence Laslett, M.D., Professor Emeritus  
Ruth Lawrence, M.D., Professor Emeritus  
Gerald Lazarus, M.D., Professor Emeritus  
Alvin Lewis, M.D., Professor Emeritus  
Ernest Lewis, M.D., Professor Emeritus  
Jerry Lewis, M.D., Professor Emeritus  
Glen Lillington, M.D., Professor Emeritus  
Paul Lipscomb, M.D., Professor Emeritus  
Erich Loewy, M.D., Professor Emeritus  
George Lowrey, M.D., Professor Emeritus  
Peter Lynch, M.D., Professor Emeritus  
Malcolm MacKenzie, M.D., Professor Emeritus  
Harry Matthews, Ph.D., Professor Emeritus  
Janet Mentink, RN, Sr Lecturer Emeritus  
Thurman Merritt, M.D., Professor Emeritus  
Claramae Miller, Ph.D., Professor Emeritus  
Marlene Mirassou, M.D., Professor Emeritus  
Thomas Morrison, Ph.D., Professor Emeritus  
Kenneth Niswander, M.D., Professor Emeritus  
Lois O'Grady, M.D., Professor Emeritus  
Richard Oi, M.D., Professor Emeritus  
Ronan O'Rahilly, Ph.D., Professor Emeritus  
James Overstreet, M.D., Ph.D., Professor Emeritus  
John Palmer, M.D., Professor Emeritus  
Philip Palmer, FRCR, Professor Emeritus  
Neville Pimstone, M.D., Professor Emeritus  
Ernest Pollitt, Ph.D., Professor Emeritus  
Lawrence Rabinowitz, Ph.D., Professor Emeritus  
John Reitan, M.D., Professor Emeritus  
Eugene Renkin, Ph.D., Professor Emeritus  
Dick Robbins, M.D., Professor Emeritus  
Juan J Rodrigo, M.D., Professor Emeritus  
C John Rosenquist, M.D., Professor Emeritus  
Alan Roth, M.D., Professor Emeritus  
Boris Ruebner, M.D., Professor Emeritus  
Amira Safwat, MBBS, Professor Emeritus  
Ethel Sassenrath, Ph.D., Professor Emeritus  
Robert Scibienski, Ph.D., Sr Lecturer Emeritus  
Robert Scobey, Ph.D., Professor Emeritus  
Michael Sherman, M.D., Professor Emeritus  
Robert Smith, Ph.D., Professor Emeritus  
Elizabeth Smithwick, M.D., Professor Emeritus  
J Stuart Soeldner, M.D., Professor Emeritus  
Robert Stadalnik, M.D., Professor Emeritus  
Larry Stark, Ph.D., Professor Emeritus  
Margaret Steward, Ph.D., Professor Emeritus  
Robert Stowell, M.D., Ph.D., Professor Emeritus  
Raymond Teplitz, M.D., Professor Emeritus  
Henry Tesluk, M.D., Professor Emeritus  
W E Toreson, M.D., Ph.D., Professor Emeritus  
Duane Townsend, M.D., Professor Emeritus  
Robert Traut, Ph.D., Professor Emeritus  
John Trelford, M.D., Professor Emeritus  
Fredrick Troy, Ph.D., Professor Emeritus  
Joe Tupin, M.D., Professor Emeritus  
Zakauddin Vera, M.D., Professor Emeritus  
Franklin Wagner, M.D., Professor Emeritus  
Richard F Walters, Ph.D., Professor Emeritus  
George Waring, Ph.D., Professor Emeritus  
John Watson-Williams, M.D., Professor Emeritus  
Sefton Wellings, M.D., Ph.D., Professor Emeritus  
Wanda Wenman, M.D., Professor Emeritus  
Richard Wennberg, M.D., Professor Emeritus  
Theodore West, Ph.D., Professor Emeritus

Hibbard Williams, M.D., Professor Emeritus  
Lowell Wilson, M.D., Professor Emeritus  
Wallace Winters, M.D., Ph.D., Professor Emeritus  
Hanspeter Witschi, D.V.M., Professor Emeritus  
Bruce Wolfe, M.D., Professor Emeritus  
Earl Wolfman, M.D., Professor Emeritus  
Hiroshi Yamauchi, M.D., Professor Emeritus  
Richard Yarvis, M.D., MPH, Professor Emeritus  
Julian Youmans, M.D., Professor Emeritus

**Admission Requirements and Professional Curriculum.** Detailed information can be obtained from the School of Medicine. See also [School of Medicine, on page 113](#), in this catalog.

### Courses in the School of Medicine Curriculum for the School of Medicine

The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a blend of basic science training and clinical experience with opportunities for research. The first-year program is for three quarters, beginning in the fall. Basic science courses (anatomy, physiology, biochemistry, histology, endocrinology, neurosciences, immunology, genetics, reproduction, general pathology) provide a firm foundation in normal structure and function needed for further study of pathophysiology of disease in the second year. These courses also provide abundant clinical correlation to help students appreciate the contribution of these sciences to the care of patients. Doctoring 1, the first course in the three-year Doctoring series, begins in fall quarter and runs parallel to the basic science courses. Students are introduced to the art and science of communicating with patients, physical diagnosis, and clinical problem solving through a combination of longitudinal small group experiences and preceptorships. Didactic sessions and cases are designed to help students integrate the basic and clinical sciences, and appreciate the central role of psychosocial, cultural and ethical perspectives in patient care.

The second-year program is for four quarters, but with the Summer Quarter abbreviated to six weeks. The applied basic sciences (microbiology, pharmacology, and systemic pathology) are integrated with the study of the pathophysiological basis of disease (dermatology, oncology, hematology, endocrinology, orthopedics, cardiology, pulmonary, psychiatry, neurology, nephrology, nutrition, gastroenterology). The Doctoring program continues with a combination of longitudinal small groups, didactic presentations, clinical rotations, apprenticeships, and preceptorships. Major themes of the program include intermediate-level instruction in patient evaluation and physical diagnosis, clinical reasoning, biostatistics and epidemiology, human sexuality, geriatrics, and medical ethics, and critical review of the biomedical literature.

The third-year program includes six required clerkship rotations in the clinical specialties: eight weeks each of surgery, medicine, obstetrics/gynecology, pediatrics, ambulatory medicine (jointly administered by Family Practice and Internal Medicine) and psychiatry. Students may elect to defer one of the required clerkships to the fourth year. The third year Doctoring program consists of longitudinal small groups led by faculty members who remain with their group throughout the year as the students rotate through their clerkships. Doctoring 3 themes include advanced interviewing techniques, clinical reasoning, clinical epidemiology, evidence-based medicine, and ethics/jurisprudence.

The fourth year features built-in flexibility to allow students to begin to individualize their medical careers. All students are required to select 32 weeks of learning activities. Individual student programs are designed under the guidance of faculty advisors, and each student's fourth year program must be approved by a faculty oversight committee to ensure appropriate breadth and depth. The fourth-year cur-

riculum also provides 12 weeks of undesignated time.

To satisfy the M.D. degree program, the student must successfully complete the required course work, clerkships, and fourth year elective program. Students who enter the program with advanced training in one of the areas required for the program are permitted to substitute required courses with electives of equal credit. In addition to the fourth-year elective program available, there is the opportunity for students to select from a variety of electives during the first two years. Examples include electives in medical economics, history of ethics and medicine, medical Spanish, insights in clinical research. Most students also participate in one of several student-run, community clinics for elective credit during their first and second years.

**Coordination with other Advanced Degree Programs**

The curriculum for the M.D. degree provides flexibility and encourages coordination with other advanced degree programs (Ph.D., M.S., M.A., M.B.A., and M.P.H.). These programs offer a wide breadth of study areas and draw upon the considerable expertise of the entire campus faculty. In addition, the UC Berkeley School of Public Health offers an M.P.H. program in conjunction with the M.D. program. The School of Medicine's department of Epidemiology and Preventive Medicine also offers a M.P.H. This program is restricted to professional students in the Schools of Veterinary Medicine and Medicine, health professionals and State Health Department employees.

School of Medicine administrators enthusiastically support students interested in pursuing advanced degree programs. The dual-degree program for the M.D./Ph.D. is targeted to train physicians to meet, respond to and solve the broad diversity of problems and dilemmas facing current and future health care. Students are encouraged to seek degrees in any of the campuswide Ph.D. programs, including those in social sciences and humanities. The UC Davis School of Medicine awards competitive fellowships each year to students enrolled in the M.D./Ph.D. program.

**Required Curriculum for the M.D. Degree**

The following listing is the typical sequencing of all courses required for earning the M.D. degree. Course descriptions are given under the individual departmental course offerings.

**First-Year Required Courses**

**Quarter I: Fall**

- Biological Chemistry 410A, Molecular and Cell Biology
- Cell Biology and Human Anatomy 400, Developmental, Gross and Radiologic Anatomy
- Psychiatry 401, Medicine and the Mind\*
- Family Practice 400A, Introduction to Patient Evaluation\*
- Medical Sciences 400A, Application of Medical Principles\*

**Quarter II: Winter**

- Biological Chemistry 410B, Cell Biology and Metabolism
- Cell Biology and Human Anatomy 402, Human Microscopic Anatomy
- Human Physiology 400, Human Physiology
- Family Practice 400B, Introduction to Patient Evaluation\*
- Medical Sciences 400B, Application of Medical Principles\*

**Quarter III: Spring**

- Biological Chemistry/Human Physiology 418, Mammalian Endocrinology and Homeostasis
- Cell Biology and Human Anatomy/Human Physiology 403, Neurobiology

- Medical Microbiology 480A, Medical Immunology
- Obstetrics and Gynecology 420, Genetics and Reproduction
- Pathology 410A, General Systemic Pathology
- Family Practice 400C, Introduction to Patient Evaluation\*
- Medical Sciences 400C, Application of Medical Principles\*
- \*These courses will be integrated into a single, three quarter course (Doctoring I, described above) in Fall 2004.

**Second-Year Required Courses**

**Quarter IV: Summer**

- Pathology 410B, General Pathology
- Microbiology 480B
- Medical Pharmacology and Toxicology 400A
- Dermatology 420, Integumentary System
- Hematology-Oncology 420: Oncology
- Medical Sciences 421A

**Quarter V: Fall**

- Medical Microbiology 480C, Pathogenic Microbiology
- Internal Medicine 420A, Hematopoietic and Lymphoreticular System
- Orthopaedic Surgery 420, Musculoskeletal System
- Medical Pharmacology and Toxicology 400B, Principles of Pharmacology
- Internal Medicine 420 F, Metabolic Regulatory System
- Pathology 410C, General Pathology
- Internal Medicine 420F, Metabolic Regulatory System
- Medical Sciences 421A, Doctoring 2

**Quarter VI: Winter**

- Medical Pharmacology and Toxicology 400C, Principles of Pharmacology
- Internal Medicine 420C, Respiratory System
- Internal Medicine 420D, Cardiovascular System
- Neurology 420, Clinical Neurosciences
- Psychiatry 403, Fundamentals of Clinical Psychiatry
- Pathology 410D, General Pathology
- Medical Sciences 421A, Doctoring 2

**Quarter VII: Spring**

- Internal Medicine 420B, Gastrointestinal System
- Internal Medicine/Biological Chemistry 419, Basic and Clinical Nutrition
- Internal Medicine 420E, Nephrology
- Pathology 410E, General Pathology
- Medical Sciences 421A, Doctoring 2

**Third- and Fourth-Year Required Courses**

**Third-Year Clerkships**

- Internal Medicine 430, Medicine
- Clerkship .....8 weeks
- Surgery 430, Surgery Clerkship .....8 weeks
- Pediatrics 430, Pediatrics
- Clerkship .....8 weeks
- Family Practice 430, Ambulatory Care
- Clerkship .....8 weeks

**Third- or Fourth-Year Clerkships**

- Obstetrics and Gynecology 430, Obstetrics and Gynecology Clerkship .....8 weeks
- Psychiatry 430, Psychiatry
- Clerkship .....8 weeks
- Medical Sciences 430A-430B-430C-430D, Doctoring 3

**Fourth-Year Requirements**

- 32 weeks of learning experiences.
- Clinical experiences are chosen by the student in consultation with, and with approval of, the Fourth Year Oversight Committee.

The fourth-year curriculum also allows for 12 weeks of undesignated time (electives, interviews, free time).

**Medical Sciences (MDS)**

**Lower Division Course**

**99. Special Study in Medicine for Undergraduates (1-5)**

Independent study—3-15 hours. Prerequisite: consent of instructor. Participate in research projects relating to medicine with faculty in the School of Medicine. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Kumari

**Upper Division Course**

**192. Medical Education Internship for Advanced Undergraduates (1-12)**

Internship—3-36 hours. Prerequisite: competency with computers. Enrollment dependent on availability of intern positions. Participate in projects related to curriculum development in support of curriculum for M.D. degree. Gain work experience and appreciation for innovative approaches to learning in basic and clinical sciences of medical education. May be repeated for credit for up to 12 units. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Kumari

**Professional Courses**

**400. Application of Medical Principles (1)**

Discussion—1.5 hours. Prerequisite: student in the School of Medicine. Application of multidisciplinary basic, social, and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—II, III. (II, III.)

**400B-400C. Application of Medical Principles (1-1.5)**

Discussion—2-3 hours. Prerequisite: approval of the Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—II-III. Stevenson

**400D. Application of Medical Principles (1)**

Discussion—1.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. P/F grading only.)—IV. Stevenson

**400F. Application of Medical Principles (1)**

Discussion—1.5 hours. Prerequisite: second year medical student. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—IV.

**400J. Application of Medical Principles (1)**

Discussion—1.5 hours. Prerequisite: third year medical student. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—II. (II.)

**400K. Application of Medical Principles (1)**

Discussion—1.5 hours. Prerequisite: third year medical student. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—III. (III.)

**401. Applications of Computers to Medical Practice (2)**

Autotutorial—2 hours. Prerequisite: enrollment in medical school. Proficiency in computer applications relative to practice of medicine, with emphasis on e-mail, literature searching, file transfer, and hospital information services. Course given online, at home or in lab; time and place determined by student. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Huntley

**411A-411B-411C. Doctoring 1 (4-3.5-3)**

Discussion—2-3 hours; clinical activity—1 hour; lecture/discussion—2-2.5 hours. Prerequisite: approval of committee on student progress. Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bioethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentations.

(Deferred grading only, pending completion of sequence. P/F grading only.)—I, II, III. (I, II, III.) Jernert, Callahan

**413. Doctoring (1-2)**

Fieldwork—1-2 hours; independent study—1-2 hours; discussion—0.25 hours. Prerequisite: medical clearance for patient contact and consent of instructor. Clinically oriented experiential learning combined with mentor-directed discussion and self-directed research on a selected medical topic. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine as well as in-depth, self-directed learning. (H/P/F grading only; deferred grading only pending completion of sequence.)—II, III. (II, III.)

**421A. Doctoring 2 (2)**

Discussion—2 hours; lecture/discussion—2 hours; internship—1 hour. Prerequisite: approval of School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions. History and physical examination with M.D. preceptors. Didactics in epidemiology, ethics, sexuality, economics, and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.

(Deferred grading only, pending completion of sequence. P/F grading only.)—IV. (IV.) Stevenson

**421B. Doctoring 2 (4.5)**

Discussion—2 hours; lecture/discussion—2 hours; internship—1 hour. Prerequisite: approval by the School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions. History and physical examination with M.D. preceptors. Didactics in epidemiology, ethics, sexuality, economics, and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.

(Deferred grading only, pending completion of sequence. P/F grading only.)—I. Stevenson

**421C-421D. Doctoring 2 (3.5-2.5)**

Discussion—2 hours; lecture/discussion—2 hours; internship—1 hour. Prerequisite: approval of the Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine.

(Deferred grading only, pending completion of sequence. P/F grading only.)—II, III. Stevenson

**430. Applications of Medical Principles (1)**

Discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.)—I, II, III, IV. Stevenson

**430A. Doctoring 3 (2)**

Discussion—3 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and

clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—IV. (IV.) Wilkes

**430B-430C-430D. Doctoring 3 (2-2-2)**

Discussion—2 hours. Prerequisite: approval of School of Medicine Committee on Student Progress. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—I, II, III. Wilkes

**440A-440B-440C. Doctoring 4 Teaching Fellowship (9)**

Discussion—1.5 hours; seminar—0.5 hours. Prerequisite: courses 430A, B, C, and D; consent of instructor; medical students only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—440B-I, 440C-II, 440A-IV. (440B-I, 440C-II, 440A-IV.) Stevenson

**440D. Doctoring 4 Teaching Fellowship (3)**

Discussion—1.5 hours; seminar—0.5 hours. Prerequisite: courses 430A, B, C, and D; consent of instructor; medical students only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—III. (III.) Stevenson

**441. Combined Ophthalmology and Otolaryngology Clerkship (6)**

Clinical activity—4 weeks. Prerequisite: approval by Committee on Student Promotion and Evaluation. Fundamental knowledge of ophthalmology and otolaryngology for the treatment of eye, ear, nose and throat problems at a level of training of general physicians, including when to refer patients to a specialist. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Brandt, Strong

**444. Medical Education for Senior Students (3)**

Discussion—1.5 hours; seminar—0.5 hours. Prerequisite: courses 430A, 430B, 430C, 430D. Teaching and learning theory and practice, and practical experience in facilitating small group learning for first, second, or third year medical students. Mentored practice in lecture technique. (Deferred grading only, pending completion of sequence. H/P/F grading only.)—I, II, III, IV. Stevenson

**450. Introduction to UCD Medical Center (1)**

Seminar—20 hours total. Prerequisite: second-year medical student. Designed to assist medical student in transition from classroom to hospital setting. (H/P/F grading only.)—III. (III.)

**460CR. Introduction to Clinical Research (3)**

Lecture—3 hours; independent study. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing, acceptance into Clinical Research Graduate Group K30 program. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (P/F grading only.)—Meyers, Pomeroy

**461CR. Strategies for Grant Writing (2)**

Discussion—2 hours; lecture—1 hour. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing, acceptance into Clinical Research Graduate Group K30 program. Practical skills and strategies to create successful grant proposals in the NIH style and format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (P/F grading only.)—Rutledge

**462CR. Introduction to Clinical Epidemiology and Study Design (3)**

Lecture—25 hours; discussion—10 hours. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing, acceptance into Clinical Research Graduate Group K30 program. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (P/F grading only.)—McCurdy, Romano

**463CR. Methods in Clinical Research (4)**

Lecture—3 hours; discussion—1.5 hours. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing, acceptance into Clinical Research Graduate Group K30 program. Overview of major approaches to clinical research, including health services research techniques, informatics, using the GCRC, and preclinical methodologies available to enhance clinical projects. Overview of the clinical research support infrastructure available at UC Davis. Range of methodologies that can be applied to clinical research and multidisciplinary perspective about clinical research. (P/F grading only.)—Lloyd, Kravitz, Berglund

**464CR. Responsible Conduct of Research (3)**

Lecture—3 hours. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing, acceptance into Clinical Research Graduate Group K30 program. The nine NIH-mandated modules: Data Acquisition and Reporting, Mentor Training, Publication Practices and Authorship, Peer Review/Grant Process, Collaborative Science, Human Subjects, Research with Animals, Conflict of Interest, Research Misconduct, and Entrepreneurship/ Industry Collaborations/Intellectual Property/Technology Transfer. (P/F grading only.)—Wun

**465CR. Introduction to Medical Statistics (4)**

Lecture—36 hours; laboratory—12 hours. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing, acceptance into Clinical Research Graduate Group K30 program. Biomedical applications of statistical methods. Statistics in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t, F, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Microcomputer applications of statistical procedures in population medicine. (P/F grading only.)—Wegelin

**480. Insights in Clinical Research (1)**

Lecture—1 hour. Prerequisite: medical student in good standing. Seminars on research presented by Medical School faculty; overview of pertinent issues, including medical ethics, human subjects protocols, case control methods, etc. (P/F grading only.)—III. (III.) Kumari

**481. Insights into Clinical Specialties (1)**

Lecture/discussion—1 hour. Prerequisite: medical student in good standing. Exposure to various medical specialties, their residency programs and ways in which medical students can prepare for and improve their candidacy for such programs. (H/P/F grading only.)—II. (II.) Kumari

**482. Lecture Series in Reproductive Health (1)**

Lecture—1 hour. Psychosocial and public health aspects of providing quality reproductive health care and application in student-run free clinics and in 3rd year clerkships. May be repeated twice for credit. (P/F grading only.)—II. (II.) Paik

**483. Insights in Political, Legal and Business Aspects of Medicine (1)**

Lecture—1 hour. Prerequisite: medical students in good standing. The practical aspects of a medical career. May be repeated twice for credit. (P/F grading only.)—III. (III.) Kumari

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

**487. History and Ethics of Medicine (1)**

Lecture—1.25 hours. Introduction to ethical problems and events in health care in both modern and historical contexts. Historical topics in medicine and medical ethics. (P/F grading only.)—II. (II.) Fitzgerald

**489. Directed Studies (9)**

Independent study—40 hours weekly. Prerequisite: individual directed studies in extended preparation for USMLE Part I, and/or as required by Promotion Board. Independent studies to review material from Years I and II in the curriculum in preparation for taking USMLE Part I in the fall, and for remediation course work directed by the Promotion Board. Students are expected to spend 8 to 12 hours per day on these studies. Faculty consultation and tutoring available on individual basis. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**495. Medicine Literature Review (1-9)**

Discussion—3-27 hours. Prerequisite: medical student in good academic standing and permission of the Associate Dean of Curricular Affairs. Independent study: topics for selection include, but are not restricted to, medical ethics, economics and jurisprudence, culture and medicine, ethnicity and medicine, gender and medicine, history of medicine, health manpower, and medical education. A prepared paper on the selected topic will be required. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Kumari

**499. Research in Medical Education and Curriculum Development (4-9)**

Independent study—10-36 hours. Prerequisite: medical student in good standing and competency with computers. Research and development of an independent project related to expanding computer-assisted resources in support of the MD curriculum at UC Davis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Kumari

**Departmental Courses:****Anesthesiology and Pain Medicine (ANE)****Upper Division Course****192. Internship in Anesthesiology (1-6)**

Internship—3 to 18 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in anesthesia and related fields. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.)

**Professional Courses****460. Anesthesiology Clinical Clerkship (3-18)**

Full-time clinical activity (3 full days per unit). Prerequisite: medical student. In-depth exposure to anesthesia through informal lectures and mentoring by anesthesiologists. Emphasis on understanding and applying anesthetic principles in managing administration of general, regional, and specialized areas. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**462. Anesthesiology (3)**

Clinical activity—full time. Prerequisite: medical student (geared toward second and third-year students). Exposure to anesthesiology through combination of informal lectures and mentoring by anesthesiologists. Anesthetic procedures, pharmacology, and basic anesthetic principles. (H/P/F grading only.)—I, II. (I, II.) Kantor

**463. Multidisciplinary Pain Management (6)**

Clinical Activity—30 hours; lecture/discussion—10 hours. Prerequisite: senior medical student in good standing. Senior clerkship to expose students to all facets of treating pain in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Fishman

**480. Brief Introduction to Clinical Anesthesiology and Chronic Pain Management (3)**

Clinical activity—25-30 hours (two weeks). Prerequisite: second-year medical student. Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthesia care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interaction with faculty anesthesiologists. (H/P/F grading only.)—II. (II.) Jahr, Kantor

**498. Individual or Group Study (1-5)**

Discussion—1-5 hours; laboratory—2-10 hours. Prerequisite: interns and residents with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**499. Anesthesiology Research (4-18)**

Laboratory—12-54 hours. Prerequisite: third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor. Problems in clinical and/or laboratory research. (H/P/F grading only for medical students.)—I, II, III, IV. (I, II, III, IV.)

**Biological Chemistry (BCM)****Lower Division Course****92. Internship in Biological Chemistry (1-12)**

Internship—3-36 hours; final report. Prerequisite: consent of instructor. Supervised work experience in biological chemistry and related fields. (P/NP grading only.)

**Upper Division Courses****192. Internship in Biological Chemistry (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to internship by preceptor. Supervised work experience in Biological Chemistry and related fields. (P/NP grading only.)

**198. Group Study (1-5)**

Prerequisite: consent of instructor. For undergraduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****209. Prostaglandins/Leukotrienes and Related Lipids (2)**

Lecture—2 hours. Prerequisite: Biochemistry 101A-101B or Physiological Sciences 101A-101B or Physiology 100A-100B. Oxidative desaturation/elongation of polyunsaturated fatty acids. Biosynthesis of prostaglandins/leukotrienes from polyunsaturated fatty acids. Chemistry, biochemistry, and metabolism. Nutritional regulation. Physiological/pathophysiological implications; pharmacological and clinical relevance. Offered in alternate years.—(II.) Ziboh

**214. Molecular Medicine (1)**

Discussion—1 hour. Prerequisite: course in molecular genetics, molecular and cellular biology, biochemistry or the equivalent. Series of lectures on current topics of molecular genetics related to medicine. Material stresses concepts derived from genetic research which have some potential clinical relevance. (Same course as course 414.) (S/U grading only.)—II. (II.) Seldin

**217. Molecular Genetics of Fungi (3)**

Lecture—3 hours. Prerequisite: graduate standing in a biological science; Biochemistry 101B; Genetics 100, 102A; Botany 119; Plant Pathology 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; molecular evolution; transformation;

and gene manipulation. Offered in alternate years. (Same course as Plant Pathology 217.)—II. Holland, Tyler

**222. Mechanisms of Translational Control (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: Biochemistry 201C or consent of instructor. Molecular mechanisms of protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. An advanced graduate-level treatment of topics of current interest, with readings and discussion of primary papers from the literature. Offered in alternate years.—II. Hershey

**230. Practical NMR Spectroscopy and Imaging (1)**

Lecture—1 hour. Prerequisite: Chemistry 107A-107B, Physics 5A-5B-5C or 9A-9B-9C, or consent of instructor. Basic theory, experimental methods, and instrumentation of NMR. Enables students to understand NMR spectroscopy and imaging experiments. (S/U grading only.)—I. (I.)

**231. Biological Nuclear Magnetic Resonance (3)**

Lecture—3 hours. Prerequisite: Molecular and Cellular Biology 221A or the equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as Biophysics 231.)—III. (III.) Jue

**291. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)**

Seminar—1 hour. Prerequisite: student in Genetics Graduate Group of consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 491.) (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

**298. Group Study (1-5)**

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

**299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional Courses****410A. Molecular and Cell Biology (3.5)**

Lecture—4 hours. Prerequisite: approval by Committee on Student Evaluation and Promotion. Basic biochemistry of proteins and nucleic acids, molecular genetics, regulation of gene expression, biomembranes and structural proteins. Applications to clinically relevant systems, particularly cystic fibrosis, synaptic conductance, muscular dystrophy, and oncogenes and cell proliferation control. (P/F grading only.)—I. Voss

**410B. Cell Biology and Metabolism (3)**

Lecture—3 hours. Prerequisite: approval of the Committee on Student Progress. Introduction to the transport of small molecules and ions across membranes followed by study of energy metabolism and biosynthetic processes in humans. Membrane receptors are considered as they regulate to basic metabolic processes. Correlations to human disease. (P/F grading only.)—II. Jue, Troy

**414. Molecular Medicine (1)**

Discussion—1 hour. Prerequisite: course in molecular genetics, molecular and cellular biology, biochemistry or the equivalent. Series of lectures on current topics of molecular genetics related to medicine. Material stresses concepts derived from genetic research which have some potential clinical relevance. (Same course as course 214.) (H/P/F grading only.)—II. (II.) Seldin

**418. Mammalian Endocrinology and Homeostasis (3)**

Lecture—3 hours; discussion—1 hour. Prerequisite: approval of Committee on Student Progress. Physiological and biochemical properties of the mammalian endocrine system both at the cellular and systemic level. Principles that regulate homeostasis, especially in organ-organ interrelationships, metabolites and minerals. Reproductive endocrinology. (Same course as Human Physiology 418.) (P/F grading only.)—III. Widdicombe

**491. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)**

Seminar—1 hour. Prerequisite: student in Genetics Graduate Group of consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 291.) (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**497T. Tutoring in Biological Chemistry (1-5)**

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

**498. Group Study (1-5)**

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

**499. Research (1-12)**

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

**Courses in Cell Biology and Human Anatomy (CHA)****Upper Division Courses****101. Human Gross Anatomy (4)**

Lecture—4 hours. Prerequisite: Biological Sciences 1B; concurrent enrollment in course 101L strongly recommended. A detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. GE credit: SciEng.—II. (II.) Gross

**101L. Human Gross Anatomy (3)**

Laboratory—6 hours; lecture/discussion—3 hours. Prerequisite: course 101 (may be taken concurrently). A detailed study of prosected human cadavers in small group format with extensive hands-on experience. GE credit with concurrent enrollment in 101: Wrt.—II. (II.) Gross

**192. Internship in Morphology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship. Experience of supervised internship in research laboratories of members of the department. (P/NP grading only.)

**197T. Tutoring in Cell Biology and Human Anatomy (1-5)**

Discussion—1 hour; laboratory—6-9 hours. Prerequisite: completion of course 101 with a grade of B or better and consent of instructor. Provides laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor. (S/U grading only.)

**198. Directed Group Study (1-5)**

Discussion—1-10 hours. Prerequisite: consent of instructor. Directed reading, discussion, and/or laboratory experience on selected topics. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****200. Gross Anatomy—Graduate Courses (9)**

Lecture—6 hours; laboratory—12 hours. Prerequisite: approval by committee on student evaluation and promotion. Integrated presentation of developmental, gross, and radiologic anatomy. Four students assigned to cadaver and dissect entire body. Embryology and radiology are correlated with the dissections. Embryology is covered from implantation to birth.—I. (I.) Tucker

**202. Human Microscopic Anatomy (5)**

Lecture—3 hours; laboratory—6 hours. Examines the normal microscopic structure of the basic cells, tissues, and organs of the body. Lectures emphasize morphology and structure-function relationships. Accompanying laboratories involve analysis and identification of sectioned material at the light microscopic and ultrastructural levels.—II. (II.) Primakoff

**203. Neurobiology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: two upper division or one graduate course in Neurobiology, consent of instructor. Physiology and anatomy of the normal human nervous system in an integrated format.—III. (III.) Kumari

**290. Seminar (1)**

Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only.)—I, III. (I, III.)

**290C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: graduate student with research experience (may be taken concurrently); consent of instructor. Discussion of problems, progress and literature relevant to current research undertaken by laboratory groups in Human Anatomy. (S/U grading only.)—I, II, III. (I, II, III.)

**292. Fertilization and Gamete Literature Critique (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Critical evaluation of current journal articles dealing with cell biology and biochemistry of gametes and fertilization. Selected papers will be presented and discussed in detail by students and faculty. May be repeated for credit. (S/U grading only.)—I, III. (I, III.) Meizel

**298. Advanced Group Study (1-5)**

Prerequisite: consent of instructor.

**299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional Courses****400. Developmental, Gross, and Radiologic Anatomy (7-5)**

Lecture—4 hours; laboratory—12 hours. Prerequisite: consent of Committee on Educational Progress. An integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth. (P/F grading only.)—I. Tucker

**402. Human Microscopic Anatomy (4.5)**

Lecture—3 hours; laboratory—5 hours. Prerequisite: approval of the Committee on Student Progress. Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and identification of sectioned material at the light microscopic and ultrastructural levels. (P/F grading only.)—II. Primakoff

**403. Neurobiology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: approval of Committee on Student Progress. Physiology and anatomy of the normal human nervous system. Gross and microscopic brain structure, functional neuroanatomy, and the physiology, biochemistry, and pharmacology of the nervous system. (Same course as Human Physiology 403.) (P/F grading only.)—III. (III.) Kumari, Carlsen

**497T. Tutoring in Human Anatomy (1-5)**

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the

departmental courses that is a component of the required curriculum for the School of Medicine. (H/P/F grading only.)

**498. Advanced Group Study (1-12)**

Prerequisite: medical students, interns, and residents with consent of instructor. Directed reading and group discussion and/or laboratory experience on selected topics. (H/P/F grading only.)

**499. Research (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

**Clinical Psychology (CPS)****Graduate Course****299. Research (1-12)**

Prerequisite: graduate student in Clinical Psychology or consent of instructor. Individual or group research on selected topics. (S/U grading only.)—Morrison

**Dermatology (DER)****Upper Division Courses****192. Internship in Cutaneous Biology (1-4)**

Internship—8-20 hours; final report. Prerequisite: upper division standing or consent of instructor. Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. (P/NP grading only.)—Isseroff

**199. Special Study in Cutaneous Biology (1-4)**

Prerequisite: advanced undergraduate standing and/or consent of instructor. Special study by individual arrangement of specialized topics in biology of skin. Work may be assigned readings, laboratory research or a combination. (P/NP grading only.)

**Graduate Course****299. Research in Cutaneous Biology (1-12)**

Laboratory—3-36 hours. Prerequisite: consent of instructor. Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology. (S/U grading only.)

**Professional Courses****420. Integumentary System (2)**

Lecture/discussion—4 hours. Prerequisite: approval of School of Medicine Committee on Student Progress. Cell biology, pathology, and physical diagnosis of the skin. Recognition of normal variations, and common or important dermatoses. Patient demonstrations of select conditions. (P/F grading only.)—IV. Isseroff

**460. Dermatology Clinical Clerkship (6)**

Clinical activity (inpatient/outpatient service)—40 hours for four weeks. Prerequisite: completion of three years of medical school; or consent of instructor. Observation and participation in dermatology clinics/practice and participation in Ward Rounds and Dermatology Clinics at UCSD Medical Center, Kaiser, and private practitioner offices. Limited enrollment.—I, II, III, IV. (I, II, III, IV.) Lynch

**480. Insights in Dermatology (1-3)**

Clinical activity—3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Huntley

**495. Wound Healing: From Bench to Bedside (6)**

Clinical activity—12 hours; laboratory—8 hours; autotutorial—15 hours; term paper. Prerequisite: Medical students only. An integrated, multi-specialty approach to clinical soft tissue wound healing.—I, II, III, IV. Rivkah

**498. Special Topics in Clinical Dermatology (1-6)**

Independent study—3-18 hours. Prerequisite: medical students with consent of instructor. Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients. (H/P/F grading only.)

**499. Research in Cutaneous Biology (1-12)**  
Laboratory—3-36 hours. Prerequisite: consent of instructor. Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty. (H/P/F grading only.)

## Epidemiology and Preventive Medicine (EPP)

### Lower Division Course

**92. Internship in Community Health (1-12)**  
Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Students apply theory and concepts learned in the classroom through field work in a community health agency. (P/NP grading only.)

### Upper Division Courses

**101. Perspectives in Community Health (3)**  
Lecture—3 hours. Prerequisite: undergraduate standing. Covers comprehensively the responsibilities, obligations, roles and professional activities of various health care disciplines in the community; provides students with perspectives on preventive medicine in society.—III. (III.) Chen

### 160. General Health Education and Prevention (5)

Lecture—4 hours; discussion—1 hour. Topics include addiction, substance abuse/prevention, nutrition, stress management, physical fitness, body image, reproductive anatomy and physiology, contraceptive options, safer sex, sexual health, healthy relationships, and other general wellness/health promotion topics. Practice in peer counseling and outreach presentations. (P/NP grading only.)—I. (I.) Lake, Ferguson

### 161. Campus Alcohol/Drug Abuse Prevention Program Peer Educator Training (4)

Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 (may be taken concurrently). Preparation for internship in campus and community substance abuse prevention and educational intervention. Addiction and other physiological responses to alcohol and other drugs. Harm-reduction strategies for individuals and target populations. High risk behaviors. Practice in peer counseling skills and outreach presentations to small and large groups. (P/NP grading only.)—III. (III.) Lake

### 162. Health Advocates Peer Educator Training (4)

Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 (may be taken concurrently). Preparation for internship in campus and community health promotion and risk reduction. Nutrition, stress management, physical fitness, body image and disordered eating, skin cancer prevention, and other general wellness/health promotion topics. (P/NP grading only.)—III. (III.) Belden, Gruhn

### 163. Peer Counselors in Sexuality Training (4)

Lecture/discussion—3 hours; practice—1 hour. Prerequisite: course 160 (may be taken concurrently). Preparation for internship in campus and community sexual health promotion. Reproductive anatomy and physiology, contraceptive options, safer sex and sexually transmitted disease prevention, healthy relationships and communication skills, gender roles/orientation/expression, culture and religion as influences on sexuality. Practice in peer counseling and outreach presentations to small and large groups. (P/NP grading only.)—III. (III.) Lindsay, Lake, Gruhn

### 164. Peer Counselors in Athletics Training (1)

Lecture/discussion—1 hour. Prerequisite: course 160 and Physical Education 40 (may be taken concurrently). Preparation for internship in athlete-to-athlete health promotion program. Peer health education in nutrition, body image, eating disorders, stress management, exercise and athletic training injury prevention, addictions and other physiological responses to alcohol/tobacco/performance enhancement and other drugs. Health risk issues unique to athletics. Practice in peer counseling and

outreach presentations to small and large groups. May be repeated up to 5 units of credit. (P/NP grading only.)—I, II, III. (I, II, III.) Lake

**175W. Health Policy and Health Politics (4)**  
Seminar—3 hours; extensive writing or discussion—1 hour. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of model policies to address them. (Same course as UC Davis Washington Center 175.) GE credit: SocSci, Wrt.—III. Wintemute

**188. Economics of Preventive Medicine (3)**  
Lecture—2 hours; discussion—1 hour. Assessment of the benefits and costs of proposals to improve aggregate health of groups of people and the health of individuals. Issues include cigarette taxes, hazardous wastes, diet, exercise, and breast cancer screening, among others.—III. (III.) Leigh

### 190C. Research Conference in Community and International Health (1)

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress, and techniques in Community and International Health. Critical discussion of recent journal articles. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Gold

### 192. Internship in Community Health Practice (1-12)

Internship—3-36 hours. Prerequisite: upper division and graduate students; consent of instructor. The student, through fieldwork in a community health agency, learns to apply theory and concepts learned in the classroom. (P/NP grading only.)

### 198. Study in Community and International Health (1-5)

Prerequisite: undergraduate standing and consent of instructor. Study and experience for undergraduate students in any number of areas in community and international health. (P/NP grading only.)

### 199. Research in Community and International Health (1-5)

Prerequisite: undergraduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (P/NP grading only.)

## Graduate Courses

### 222. Social and Behavioral Aspects of Public Health (3)

Lecture/discussion—3 hours. Prerequisite: Statistics 102 and 106 or the equivalent, graduate standing, consent of instructor. Concepts and methods of social and behavioral sciences relevant to the identification and solution of public health problems. Topics include nutrition, physical activity, smoking, socioeconomic status, gender, race/ethnicity, stress, social support, social marketing, media advocacy and behavioral theories of change.—II. Gibson

### 244. Introduction to Medical Statistics (4)

Lecture—6 hours; laboratory/discussion—3 hours. Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal,  $t$ ,  $F$ , and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only one unit of credit for students who have completed Statistics 100 or Preventive Veterinary Medicine 402.—IV. (IV.) Beckett, Wegelin

### 245. Statistical Analysis of Laboratory Data (4)

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: course 244 or equivalent; consent of Instructor. The analysis of data and design of experiments for laboratory data with an emphasis on gene expression arrays and other high-throughput biological assay technologies. For students in the K30 training program in the School of Medicine. Additional

class capacity will be available for students in other programs, but it is essential that the K30 students be accommodated first.—I. (I.) Locke

**255. Human Reproductive Epidemiology (3)**  
Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 405, 406, Physics 220, Physiology 222 or equivalents, or consent of instructor. Human reproductive effects and risk of reproductive disorders, examined from macro- and micro-environmental exposures in community and occupational settings, epidemiologic study designs and analyses. Offered in alternate years.—(I.) Gold

### 262. Principles of Environmental Health Science (3)

Lecture—3 hours. Prerequisite: consent of instructor. Principles, approaches and issues related to environmental health. Recognizing, assessing, understanding and controlling the impact of people on their environment and the impact of the environment on the public.—I. (I.) Bennett

### 273. Health Services Administration (3)

Lecture—3 hours. Prerequisite: consent of instructor. Structure and function of public and private medical care. Topics include categories and trends in national medical spending, predictors of patient use, causes of death, managed care, HMOs, Medicare, Medicaid, costs of technology, and medical care in other countries.—II. (II.) Leigh

### 290. Topics in Public Health (1)

Seminar—1 hour. Prerequisite: open to students in Master of Public Health program or consent of instructor. Seminar on key issues and current topics in public health. May be repeated for credit up to 3 times. (S/U grading only.)—I, II, IV. (I, II, IV.) Schenker, Leistikow, McCurdy

### 295. International Health (1)

Lecture/discussion—1 hour. Prerequisite: graduate standing. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. Evening seminars begin in Fall quarter and continue through Spring quarter. (Deferred grading only, pending completion of sequence. S/U grading only.)—I. (I.) Schenker

### 297. Public Health Practicum (1-8)

Fieldwork—3-16 hours; term paper. Open to students in Master of Public Health. Practical fieldwork experience in public health. Placement site varies. May be repeated up to 8 units of credit. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III, IV. (I, II, III, IV.) McCurdy

### 298. Study in Community and International Health (1-5)

Prerequisite: graduate student in good academic standing and consent of instructor. Study and experience for graduate students in any number of areas in community and international health. (S/U grading only.)

### 299. Research in Community and International Health (1-12)

Prerequisite: graduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (S/U grading only for graduate students.)

## Professional Courses

### 402. Introductory Medical Spanish (2)

Lecture—2 hours. Prerequisite: medical student or consent of instructor. The vocabulary needed to conduct a basic history and physical examination in Spanish. (H/P/F grading only.)—III. (III.) Meizel

### 455. Multidisciplinary Clinical Preceptorship (4.5)

Clinical activity—full time (3 weeks). Prerequisite: second-year student in good academic standing. Students will be introduced to basic principals of geriatric health care and provided with opportunities for clinical observation and experience in a variety of

facilities that serve older adults. Multidisciplinary nature of geriatrics will be emphasized. (H/P/F grading only.)—IV. (IV.)

#### **461. Clerkship in Community Health Group Practice (3-9)**

Clinical activity—full time (2-6 weeks). Prerequisite: third- or fourth-year medical student. Overview of local community health in group practice situations. Students participate in treatment at several clinic sites in Yolo County. Topics include primary care, environmental health, maternal and child health, jail health, and preventive health care for the aged. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### **465. Community Health Preceptorship (3-18)**

Clinical activity—full time (2-12 weeks). Prerequisite: fourth-year medical student. Students participate at the California Department of Health Services in ongoing investigations into current public health problems, e.g., birth defects, cancer control, diabetes, hypertension, injury control, infectious diseases, aging, Alzheimer's disease, and smoking and tobacco use control. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### **466. Occupational and Environmental Medicine Elective (6-12)**

Clinical and laboratory experience—full time (4 to 8 weeks). Prerequisite: fourth-year medical student and consent of instructor. Participate in activities of Occupational and Environmental Health Unit. Major activity is involvement in an epidemiologic research project of the University. Also participate in Ambulatory Occupational and Environmental Medicine Clinic at UCD Medical Center. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Schenker

#### **470. Clinical Selective in Occupational and Environmental Medicine (3)**

Clinical activity—full time. Prerequisite: fourth-year medical students in good academic standing, with consent of instructor. Outpatient clinical experience in Occupational and Environmental Medicine at UCDCMC and in local industries. Participants will gain experience in evaluating occupational and environmental medical conditions, use of medical literature resources, the worker's compensation system, and toxicological principles. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McCurdy

#### **471. Health Issues Confronting Asian Americans and Pacific Islanders (4)**

Lecture/discussion—4 hours. Exploration of health issues confronting Asian Americans and Pacific Islanders. A framework for understanding health issues facing Asian Americans and Pacific Islanders. (H/P/F grading only.)—II. (II.) Chen

#### **480. Insights in Occupational and Environmental Medicine (1-3)**

Clinical activity—3-9 hours. Prerequisite: first- or second-year medical student in good academic standing; consent of instructor. Students will observe and participate in research and clinical activities in occupational and environmental medicine which include conferences, occupational and environmental medicine clinical activities and field visits. Students develop and present small individual research projects. (Former course Occupational and Environmental Health 480.) (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Schenker

#### **495. International Health (1)**

Lecture/discussion—1 hour. Prerequisite: medical student in good standing. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (Deferred grading only, pending completion of sequence. P/F grading only.)—I. (I.) Schenker

#### **496. Current Issues in Public Health (1)**

Lecture/discussion—1 hour. Topical issues in public health. Speakers from the local public health community address issues such as disease control programs, access to care. May be repeated up to three times for credit. (P/F grading only.)—III. McCurdy

#### **498. Study in Community and International Health (1-6)**

Prerequisite: medical student in good standing and consent of instructor. Study and experience for medical students in areas in community and international health. May be repeated for credit. (H/P/F grading only.)

#### **499. Research in Community and International Health (1-9)**

Prerequisite: medical students with consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (H/P/F grading only.)

### **Family and Community Medicine (FAP)**

#### **Lower Division Course**

##### **92C. Primary Care Clinics (2)**

Clinical activity—6-8 hours; seminar—2 hours; lecture—1-2 hours. Prerequisite: consent of instructor, enrollment at the UC Davis campus, for freshman and sophomore students. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience exposes lower division students to health care delivery, patient histories, physical examinations, health promotion, disease prevention, diagnosis; treatment of episodic, acute, chronic illness; appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Solis, Smith

#### **Upper Division Courses**

##### **192C. Primary Care Clinics (1-2)**

Clinical activity—6-8 hours; seminar—2 hours; lecture—1-2 hours. Prerequisite: consent of instructor, enrollment at the UC Davis campus, upper-division standing. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience introduces students to health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Smith, Solis

##### **195. Health Care to Underserved Populations (1)**

Lecture—1 hour. Prerequisite: sociology, political science, or applied behavioral science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations in California impacting their health; roles of family/interpersonal relationships in making health care decisions; and clinician's perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. (P/NP grading only.)—II. (II.) Nesbitt

#### **Graduate Courses**

The following courses are for students enrolled in the Family Nurse Practitioner/Physician Assistant (FNP/PA) program.

##### **240A-240B-240C-240D-240E-240F. Clinical Preceptorship (1-13)**

Clinical activity—9-36 hours. Prerequisite: enrollment in the Master's Track of the FNP Certificate Program, and successful completion of each preceding 240A-F section. Diagnosis and treatment of patients of all ages in an ambulatory care setting, under the supervision of a preceptor. May be repeated twice for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) DeAmicis

##### **242A-242B. Clinical Role Seminar (1.5-1.5)**

Seminar—1.5 hours. Prerequisite: course 240 concurrently and student in the Master's Track of the FNP certificate program. Accompanies course 240 and provides a small group forum for students to explore role development and clinical management

issues based on nursing theories and research. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.) DeAmicis, Fraser

##### **252A. Professional Role Development (1.5)**

Lecture/discussion—1.5 hours. Prerequisite: enrollment in the Master's Track of the FNP Certificate Program. Provides opportunity to discover strategies for promoting role development and role satisfaction via discussion of pertinent issues, theory, and research. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) Hass

##### **252B. Nurse Practitioner as Leader (1.5)**

Lecture/discussion—1.5 hours. Prerequisite: course 252A and concurrent enrollment in Master's Track of the FNP Certificate Program. Study of advanced practice role of nurse practitioner. Overview of legal and regulatory issues, certification and malpractice liability issues. Includes critical analysis of theories, issues and research related to nurse practitioner role development and applied legislation through community involvement. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) Hass

##### **264. Psychosocial Concepts and Issues in Primary Care (2)**

Lecture/discussion—2 hours. Prerequisite: B.S. degree in nursing and enrollment in the Master's Track of the FNP Certificate Program. Introduces the principles of effective communication in establishing the therapeutic provider-patient relationship. Provides an examination of relevant psychosocial concepts and issues related to primary care. Research and theory are emphasized.—I, II, III, IV. Hass

##### **266A. Health Maintenance/Promotion (2)**

Lecture—2 hours. Prerequisite: B.S. degree in nursing and enrollment in the Master's Track of the FNP Certificate Program. Focuses on the health and wellness of individuals throughout the lifespan. Critical analyses of nursing interventions in health promotion and maintenance based on nursing and other theoretical frameworks and research data are emphasized.—I. (I.) DeAmicis

##### **266B. Family Nursing Theory (1)**

Lecture—1 hour. Prerequisite: enrolled in master's track of the FNP Certificate Program or consent of instructor. Exploration of family theories as related to advanced primary care nursing practices.—I, II, III. (I, II, III.) Stewart

##### **266C. Family Nursing Interventions (2)**

Lecture—2 hours. Prerequisite: course 266B and enrollment in the Master's Track of the FNP Certificate Program. Course integrates family theoretical and therapeutic concepts to focus on nursing assessment and intervention strategies for family problems in health and illness.—III. (III.) Stewart

##### **266D. Community Assessment and Intervention (1)**

Lecture—1 hour. Prerequisite: enrollment in the Master's Track of the FNP Certificate Program. The relationship between advanced primary care nursing practice and community is explored. Community assessment and intervention strategies appropriate for the family nurse practitioner are discussed. May be repeated twice for credit.—II. (II.) Stewart

### **Professional Courses**

The following courses are for students enrolled in the Family Nurse Practitioner/Physician Assistant (FNP/PA) Program.

##### **300. Health Assessment for Advanced Practice (4.5)**

Lecture/discussion—4.5 hours. Prerequisite: enrolled in the FNP/PA Certificate Program, or consent of instructor. Advanced concepts and skills in health and physical assessment essential to the clinical decision making and caring process for the FNP, PA or advance practice nurse. Emphasis on eliciting an accurate and thorough history and performing a physical examination.—I, II, III, IV. (I, II, III, IV.) Stewart

**331A. Scientific Basis of Diseases—A (4)**

Independent study—3 hours; lecture/discussion—1 hour. Prerequisite: registered student in the FNP/PA Certificate Program or consent of instructor. Anatomy, physiology and concepts of pathophysiology.—I, II, III, IV. (I, II, III, IV.) Fraser

**331B. Scientific Basis of Disease—B (1)**

Independent study—0.5 hours; lecture/discussion—0.5 hours. Prerequisite: course 331A, registered student in the FNP/PA Certificate Program or consent of instructor. Neurological and renal diseases and abnormalities of adrenal function. Builds on concepts covered in prior coursework; Web-enhanced course.—I, II, III, IV. (I, II, III, IV.) Fraser

**340. Clinical Preceptorship for FNP/PA Students (19)**

Clinical activity—13 hours. Prerequisite: student in the Family Nurse Practitioner/Physician Assistant Program. Hands-on clinical experience including supervised patient care, development of clinical skills, assessment and management of patients in the medical ambulatory care setting. May be repeated twice for credit with consent of instructor. (Deferred grading only, pending completion of sequence. P/F grading only.)—I, II, III, IV. Stewart

**341. Advanced Clinical Preceptorship for FNP/PA Students (26)**

Clinical activity—26 hours. Prerequisite: registered students in the Family Nurse Practitioner/Physician Assistant Program, course 340. Development of skills learned in course 340 through an approved clinical preceptorship. May be repeated twice for credit. (Deferred grading only, pending completion of sequence. P/NP grading only.)—I, II, III. (I, II, III.) Stewart

**344. Inpatient Surgical Experience for FNP/PA Students (3)**

Clinical activity—9 hours. Prerequisite: Registration in the FNP/PA program. Course 340, 240A, 240B, 240C, 354A, 354B, 354C, or consent of instructor. Student clerkships in the inpatient setting in surgery at UCDCM and/or affiliated institutions. Designed to expose the students to inpatient management of surgical patients; acquaint student with FNP/PA role in surgical setting. May be repeated twice for credit (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III, IV. Rios, Stewart

**346. Clinical Geriatrics (3)**

Clinical activity—90 hours. Prerequisite: registered student in the FNP/PA program and successful completion of course 340A-340B-340C and 354A-354B-354C and 365A-365B-365C or consent of instructor. Application of principles of geriatric care in the outpatient, nursing home, acute hospitals and community settings that provide services for the elderly, including visits to patients' homes. (P/NP grading only; Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) Fraser, Stewart

**347. Inpatient Medical Experience for FNP/PA Students (4)**

Clinical activity—12 hours. Prerequisite: Registration in the FNP/PA program. Course 340, 240A, 240B, 240C, 354A, 354B, 354C, or consent of instructor. Student clerkships in the inpatient setting in Family Practice at UCDCM and/or affiliated institutions. Designed to expose the students to inpatient management; acquaint student with FNP/PA role in the inpatient setting. May be repeated twice for credit. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III, IV. Rios, Stewart

**350. Ethics and Trends in Health Care for FNP/PA Students (2)**

Lecture/discussion—2 hours. Prerequisite: registered student in the FNP/PA Program. Trends and ethical issues in health care, review of the process and policies for ethical decisionmaking in patient care. These issues, trends, and processes will be related to the role of the Family Nurse Practitioner/Physician Assistant.—III. (III.) Hass

**353. Geriatric Medicine for FNP/PA Students (1)**

Lecture—1 hour. Prerequisite: registered student in the FNP/PA Program. Introduction to advanced concepts in geriatric medicine. Comprehensive assessment, decision making, and management of selected medical problems encountered in primary care. Appropriate consultation and referral are discussed. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Fraser

**354A. Fundamentals of Primary Health Care for FNP/PAs (5)**

Lecture/discussion—5 hours. Prerequisite: enrollment in the Family Nurse Practitioner/Physician Assistant Program. Anatomy and physiology, pathophysiology, diagnostic criteria, approaches to assess and manage medical problems common in primary care. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Hass, Hasselbach

**354B-354C. Fundamentals of Primary Health Care for FNP/PA Students (6-4)**

Lecture/discussion—4-6 hours. Prerequisite: registered student in FNP/PA Program. Study of anatomy and physiology, pathophysiology, diagnostic criteria, approaches to assess and manage common medical problems seen in primary health care. May be repeated for credit.—I-II-III. (I-II-III.) Hasselbach, Barakzai, Milton, Dean

**355A. Advanced Principles of Family Health Care (5)**

Lecture/discussion—5 hours. Prerequisite: enrollment in the Family Nurse Practitioner/Physician Assistant Program. Advanced concepts in the management of cardiac, respiratory, gastrointestinal, renal, and endocrine problems in primary health care. Emphasis on comprehensive assessment, appropriate clinical decision making and management of selected medical problems commonly encountered in primary care settings, appropriate consultation and referral. May be repeated twice for credit.—I, II, III. (I, II, III.) Fraser

**355B. Advanced Principles of Primary Health Care (5)**

Lecture/discussion—5 hours. Prerequisite: registered student in the FNP/PA Program; successful completion of course 354A-354B-354C. Anatomy and physiology, pathophysiology, diagnostic criteria, approaches to assessment and management of patients with complex and/or multiple health care problems in primary care settings.—I, II, III, IV. (I, II, III, IV.) Rios

**355C. Advanced Principles of Health Care for FNP/PA Students (4)**

Lecture/discussion—4 hours. Prerequisite: registered student in the FNP/PA Program; course 354A-354B-354C. Study of anatomy and physiology, pathophysiology, diagnostic criteria and approaches to assess and manage patients with complex and/or multiple health care problems in primary care settings, and to learn the management of patients in inpatient settings. May be repeated for credit.—I, II, III, IV. (I, II, III, IV.) Barakzai, DeAmicis

**355D. Advanced Principles of Health Care for FNP/PA Students (4)**

Lecture/discussion—4 hours. Prerequisite: registered student in the FNP/PA Program; course 354A-354B-354C. Study of anatomy and physiology, pathophysiology, diagnostic criteria and approaches to assess and manage patients with complex and/or multiple health care problems in primary care settings, and to learn the management of patients in inpatient settings. May be repeated for credit.—I. (I.)

**358. Pharmacology (6)**

Lecture/discussion—6 hours. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Core knowledge in pharmacokinetics and pharmacodynamics, and clinical therapeutics necessary to make rational and optimal therapeutic plans in ambulatory settings. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) Hasselbach

**361. Family Theory and Assessment (1)**

Lecture—1 hour. Prerequisite: registered student in the FNP/PA Program. Examines the family using a family system framework within the context of its internal dynamics, relationship to community and cultural variations. May be repeated twice for credit.—II. (II.) Stewart

**367A. Family Practice and Community Health for FNP/PA Students (2)**

Lecture/discussion—2 hours. Prerequisite: registered student in the FNP/PA Program. Examines pediatric and adolescent concepts of growth and development as related to primary health care. Primary health care issues and needs will be assessed in relationship to family and community. Health promotion and disease concepts. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Barakzai

**367B. Family Practice and Community Health for FNP/PA Students (1)**

Lecture/discussion—1 hour. Prerequisite: registered student in the FNP/PA Program. Examines concepts of adult growth and development as related to primary health care. Issues and needs of the adult are examined in relationship to family and community, health promotion, disease prevention and wellness concepts. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Barakzai

**367C. Family Practice and Community Health for FNP/PA Students (1)**

Lecture/discussion—1 hour. Prerequisite: registered student in the FNP/PA Program. Examines concepts of development in the elderly as related to primary health care. Health care issues and unique needs are presented with an emphasis on health promotion and disease prevention. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Fraser

**368A. Behavioral Science for FNP/PA Students (1)**

Lecture/discussion—1 hour. Prerequisite: registered student in the FNP/PA Certificate Program or consent of instructor. Principles of effective communication in therapeutic provider-patient relationship. History taking techniques that foster empathy and respect. Biopsychosocial model of health care.—I, II, III, IV. (I, II, III, IV.) Stewart

**368B. Behavioral Science (1)**

Lecture/discussion—1 hour. Prerequisite: completion of course 368A and registered student in the Family Nurse Practitioner/Physician Assistant Program. Exploration into a variety of addictive behaviors within diverse populations. Utilization of clinical case studies to develop skills in the identification, interview and management of these patients and recognition of how these behaviors impact the family system.—I, II, III, IV. (I, II, III, IV.) Hass

**368C. Behavioral Science (1)**

Lecture/discussion—1 hour. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Multicultural perspectives of health. Traditional health, beliefs and healing practices of several California cultures.—I, II, III, IV. (I, II, III, IV.) Barakzai, Hass

**368D. Behavioral Science for FNP/PA Students (1)**

Lecture—1 hours. Prerequisite: registered student in the FNP/PA Program. Basic principles of assessment, counseling and treatment of individual patients, their families and support systems as they experience the effects of chronic illnesses, chronic pain, terminal diseases, death and grieving. Students are strongly encouraged to explore their coping styles. May be repeated twice for credit.—I, II, III, IV. (I, II, III, IV.) Stewart, Hass

**370A-370B-370C-370D-370E-370F. Clinical Case Seminars for FNP/PA Students (1.5-1.5-1.5-1.5-1.5-1.5)**

Seminar—1.5 hours. Prerequisite: registered student in the FNP/PA Program. Designed to increase critical thinking by utilizing the development and processing of the differential diagnoses of several cases based on the topics covered in the medicine course

(course 354, 355) taught the same quarter. May be repeated twice for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Ingell, Milton

### 372A. Professional Development for FNP/PA Students (1.5)

Lecture/discussion—1.5 hours. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Understanding the Family Nurse Practitioner (FNP) and Physician Assistant (PA) roles, history of the profession and impact of FNP and PA on health care systems; critical review of medical literature including introduction to evidence based medicine and statistics; managed care. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) Hass

### 372B. Professional Development for FNP/PA Students (1.5)

Lecture/discussion—1.5 hours. Prerequisite: registered student in the Family Nurse Practitioner/Physician Assistant Program. Roles of the Family Nurse Practitioner (FNP) and Physician Assistant (PA) including legal and regulatory issues affecting practice, licensing requirements, elements of negotiating a job, legislative and political awareness, and community involvement. (Deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) Hass

### 390. Health Care of the Western Farmworkers (2)

Independent study—1.2 hours; clinical activity—2.4 hours. Prerequisite: Enrollment in the Family Nurse Practitioner/Physician Assistant Program. Basic concepts for providing primary health care to migrant and seasonal agricultural workers. (P/NP grading only; deferred grading only, pending completion of sequence.)—I, II, III, IV. (I, II, III, IV.) DeAmicis

### 399. Special Study (1-12)

Prerequisite: enrolled in the FNP/PA Certificate Program or consent of instructor. Research and clinical interests to enhance education in family practice. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Ingell

## Professional Courses

### 400A. Introduction to Patient Evaluation (2)

Discussion—2 hours; clinical activity—1 hour. Prerequisite: consent of Committee on Student Progress. Practice dealing with communication problems; continuity preceptorship and introduction to emergency medicine. (Deferred grading only, pending completion of sequence. P/F grading only.)—I. Jerant, Callahan

### 400B. Introduction to Patient Evaluation (2)

Discussion—2 hours; clinical activity—1 hour. Prerequisite: consent of committee on student progress. Basic physical examination skills through small group interactions; continuity preceptorship. (Deferred grading only, pending completion of sequence. P/F grading only.)—II. Jerant, Callahan

### 400C. Introduction to Patient Evaluation (2)

Lecture/discussion—2 hours; clinical activity—1 hour. Prerequisite: consent of Committee on Student Progress. Practice dealing with communication problems; continuity preceptorship. (P/F grading only.)—III. Jerant, Callahan

### 401. Introductory Preceptorship in Family Practice (3-9)

Clinical activity—20-40 hours. Prerequisite: completion of first year of medical training. Preceptorship in family practice offered as an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician's office, doing patient interviews, history-taking, and performing physical exams. (H/P/F grading only.)—IV. (IV.) Morgan

### 407. Davis Community Clinic (3)

Clinical activity—8 hours. Prerequisite: second-year medical student in good academic standing. Students learn to diagnose and treat common medical problems as seen at a community clinic, under the direct supervision of a physician. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

### 411. Selected Studies of Systems for Chronic Illness Care (3)

Clinical activity—4 hours; discussion—4 hours. Prerequisite: course 400A, 400B, 400C, medical students with consent of instructor. Understanding of chronic illness, particularly diabetes, participation in patient care, alternative techniques. May be repeated once for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Balsbaugh

### 430. Primary Care Clerkship (12)

Clinical activity—45 hours; lecture—2 hours; workshop—2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week primary care clerkship for third year medical students. Four week primary care experience with an additional four weeks in Internal Medicine clinics. (H/P/F grading only.)—I, II, III, IV. Morgan

### 434. Primary Care Clinics (3-12)

Clinical activity—32-36 hours; seminar—0-2 hours; lecture—1-2 hours. Prerequisite: open to medical students in all four years of medical school. Medical students will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Solis, Smith

### 444. Advanced Preceptorship in Family Medicine (3-18)

Clinical activity—40 hours. Prerequisite: completion of third-year primary care plus clerkship or consent of instructor. Preceptorships with primary care physicians in a variety of settings. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an out patient setting. May be repeated up to 18 units of credit. (H/P/F grading only.)—I, II, III, IV. Morgan

### 460. Geriatrics in Community Health (3-6)

Fieldwork—24 hours; clinical activity—12 hours; lecture—4 hours. Prerequisite: course 430. Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and case management specialists. Observation and participation in MMSE's, patient-family conferences, interdisciplinary team meetings, neuropsychiatric testing and home visit evaluations. (H/P/F grading only.)—I, II, III, IV. Xakellis

### 468. International Preceptorship (3-12)

Clinical activity—40 hours. Prerequisite: medical student with consent of instructor. Preceptorship with a family practitioner in a foreign country (arranged by student contact or with assistance of the Family and Community Medicine Department.) Participate in clinical activities, analyze and report characteristics of the practice. May be repeated up to 12 units of credit. (H/P/F grading only.)—I, II, III, IV.

### 469. Clerkship in Family Practice Residency (3-12)

Clinical activity—40 hours. Prerequisite: completion of third year of medical school or consent of instructor. Comprehensive primary medical care of patients in a family practice hospital or residency. Usually includes inpatient and outpatient experience. May be repeated up to 12 units of credit. (H/P/F grading only.)—I, II, III, IV.

### 488. Selected Studies in Family Practice (1-9)

Prerequisite: medical students with consent of instructor. Assigned readings in family practice to increase understanding on selected topics relating to family medicine and primary health care delivery; visits to and written analysis of selected health care programs; and/or exposure to family practice with a community physician preceptor who is a member of the clinical faculty. May be repeated up to 9 units of credit.—I, II, III, IV.

### 498. Directed Group Study (1-5)

Variable—3-15 hours. Explore in-depth various topics in primary care. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Morgan, Hirsch

### 499. Research (1-12)

Prerequisite: medical students with consent of instructor. Research in various aspects of the health care delivery system. (H/P/F grading only.)

## Human Physiology (HPH)

### Lower Division Course

### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division Courses

### 192. Internship in Human Physiology (1-12)

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in physiology and related fields. (P/NP grading only.)

### 198. Directed Group Study (1-5)

To be arranged. Prerequisite: consent of instructor. Directed reading, discussion and/or laboratory experience on selected topics. (P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

Laboratory—3-15 hours; undergraduate research project. Prerequisite: senior standing in biology, chemistry, physics, psychology, or engineering. (P/NP grading only.)

## Graduate Courses

### 200. Human Physiology (6)

Lecture—48 hours total; discussion—12 hours total. Prerequisite: graduate standing and consent of instructor. General cellular and organ system physiology, including neural, cardiovascular, respiratory, gastrointestinal and urinary systems in the human. Lectures concurrent with course 400; research/discussion and laboratory/demonstration sessions, and examinations separate.—II. (II.) Carlsen, O' Donnell

### 210A. Advanced Physiology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Physiology Ph.D. program, or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as Physiology 210A.)—I. (I.) Cala, Payne

### 285. Peripheral Circulation (3)

Lecture—1 hour; discussion—2 hours. Prerequisite: Physiology 111A, 113; or course 200 and consent of instructor. Lectures and critical analysis of papers on peripheral vascular function, including: structure/function and pressure/flow relationships, innervation, receptor pharmacology, endothelial and smooth muscle interactions, signal transduction, ion transport, permeability, paracrine mediators and disease mechanisms. Offered in alternate years.—(III.) Gray, O'Donnell

### 298. Group Study (1-5)

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional Courses

### 400. Human Physiology (6)

Lecture—4 hours; laboratory—4 hours. Prerequisite: consent of Committee on Student Progress. General, cellular and systemic physiology of cardiovascular, respiratory, gastrointestinal and urinary systems. (P/F grading only.)—II. Carlsen, O'Donnell

**403. Neurobiology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: approval of Committee on Student Progress. Physiology and anatomy of the normal human nervous system. Gross and microscopic brain structure, functional neuroanatomy, and the physiology, biochemistry, and pharmacology of the nervous system. (Same course as Cell Biology and Human Anatomy 403.) (P/F grading only.)—III. Kumari, Carlsen

**418. Mammalian Endocrinology and Homeostasis (3)**

Lecture—3 hours; discussion—1 hour. Prerequisite: approval of Committee on Student Progress. Physiological and biochemical properties of the mammalian endocrine system both at the cellular and systemic level. Principles that regulate homeostasis, especially in organ-organ interrelationships, metabolites and minerals. Reproductive endocrinology. (Same course as Biological Chemistry 418.) (P/F grading only.)—III. Widdicombe

**497T. Tutoring in Human Physiology (1-5)**

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)—Cala

**498. Directed Reading and Group Study (1-4)**

Discussion—2-8 hours. Prerequisite: medical student. Directed reading and discussion on selected topics in human physiology. (H/P/F grading only.)

**499. Research (1-6)**

Prerequisite: medical students with consent of instructor. Laboratory investigation on selected topics. (H/P/F grading only.)

**Internal Medicine (IMD)****Lower Division Courses****92. Internship (1-4)**

Internship—3-12 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship in internal medicine and related fields. (P/NP grading only.)—Last

**98. Directed Group Study (1-2)**

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Directed group study in medicine and related fields. (P/NP grading only.)—Last

**99. Undergraduate Research in Medicine: Molecular and Cell Biology (1-3)**

Prerequisite: consent of instructor. (P/NP grading only.)—Last

**Upper Division Courses****192. Internship in Internal Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing. Supervised work experience in internal medicine and related fields. (P/NP grading only.)

**194. Practicum in Community Health Clinics (1-3)**

Clinical activity—5-15 hours on Saturday mornings and during the week as necessary, excluding holidays. Prerequisite: consent of instructor. The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities. May be repeated for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Kumagai

**198. Directed Group Study (1-2)**

Seminar—1-2 hours. Prerequisite: consent of instructor. Directed group study in medicine and related fields. (P/NP grading only.)—Last

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

**Graduate Courses****214. Topics in Medical Ethics (1)**

Seminar—1 hour. The complex moral, legal, and ethical dilemmas that patients, families, and health care providers face in today's clinics. May be repeated once for credit. (S/U grading only.)—I.

**220D. Cardiovascular System (2.5)**

Lecture/discussion—5.5 hours. Prerequisite: Human Physiology 200, graduate student status and consent of instructor. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders.—II. (II.) Laslett

**250. Medicine and the Law (3)**

Lecture/discussion—2 hours; project—2 hours. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (S/U grading only.)—II. Rich

**Professional Courses****419. Introduction to Clinical Nutrition (2.5)**

Lecture—2 hours; lecture/discussion—2 hours. Prerequisite: approval of Committee on Student Progress. Basic and clinical concepts of human nutrition. Nutrient homeostasis and regulation and current perspectives on the role of nutrition in disease. (P/F grading only.)—III. Halsted

**420A. Hematology (2)**

Lecture/discussion—3 hours; laboratory—2 hours. Prerequisite: consent of Committee on Student Progress. Normal hematopoiesis and basic disorders of blood cells, leukemia and lymphoma, transfusion therapy, immunoglobulin disorders, thrombosis and hemostasis. Normal and abnormal blood cells and the interpretation of common laboratory tests. (P/F grading only.)—Wisdom

**420B. Gastrointestinal System (2.5)**

Lecture/discussion—6 hours. Prerequisite: approval of Committee on Student Progress. Basic pathophysiologic principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiologic basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management. (P/F grading only.)—III. (III.) Rossaro

**420C. Pulmonary and Critical Care Medicine (2.5)**

Laboratory/discussion—5.5 hours. Prerequisite: approval of Committee on Student Progress. Clinical aspects of respiratory anatomy, physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases and disorders, and critical care medicine. (P/F grading only.)—II. Louie

**420D. Cardiovascular System (2.5)**

Lecture/discussion—5.5 hours. Prerequisite: approval of the School of Medicine Committee on Student Progress. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. (P/F grading only.)—II. Laslett

**420E. Nephrology (2)**

Lecture—2 hours; discussion—2 hours; laboratory—2 hours. Prerequisite: approval of Student Progress Committee. Fundamental aspects of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections. (P/F grading only.)—II. Stevenson

**420F. Pathophysiology of the Endocrine System (2.5)**

Lecture/discussion—5.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Open to medical students only. Students will develop an understanding of the fundamental aspects of hormone physiology, regulation and action. Students will understand the etiology,

pathophysiology, diagnosis, and management of the major diseases of the endocrine system. (P/F grading only.)—I. (I.) Kulkarni-Date

**430. Medicine Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Clerkship is divided into two, four-week blocks, one each at UCDCMC and at Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.)—I, II, III, IV. Prescott

**450. Medicine and the Law (1-3)**

Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. Not offered every year. (H/P/F grading only.)—I, II, III, IV. Rich

**459. Oncology: Research and Treatment of Cancer (2)**

Lecture/discussion—2 hours. Prerequisite: second-, third-, or fourth-year medical student and/or consent of instructor. Comprehensive review of current treatment practices of cancer and state-of-the-art research impacting treatment and prevention of cancer. Emphasis on epidemiology, molecular biology, and pharmacology. (H/P/F grading only.)—I. (I.) DeGreggio

**460. Correctional Health Care Clerkship (1-4)**

Clinical activity—full time. Prerequisite: fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Silva

**462. Externship in Medicine (1-21)**

Clinical activity—40 hours. Prerequisite: Medical Sciences 431; demonstrated ability to accept responsibility; consent of instructor. Student assumes role of acting intern and will be primary physician on medical ward under direction of medical resident and staff. Responsibility for patients admitted to acting intern. Teams I-V take call every fifth night. Team VI students assume role of acting intern and will be primary physician on the medical hospitalist service under direct supervision of the hospitalist staff. Responsibility for patients admitted to acting intern with in-hospital daytime call. Emphasis on evidence-based inpatient care. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Henderson

**463. Acting Internship in Medicine Intensive Care Unit (MICU) (9)**

Clinical activity—full time. Prerequisite: completion of third year in medical school; consent of Director of MICU. At UCDCMC, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU. On call in hospital every third night. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Albertson

**470. Landmark Clinical Trials and Evidence-Based Medicine (3)**

Lecture/discussion—10 hours; clinical activity—8 hours. Prerequisite: fourth-year medical student. Ten landmark clinical trials from a historical, clinical, and epidemiological/research perspective. Principles of evidence-based medicine. (H/P/F grading only.)—III. Kravitz, Amsterdam

**480. Person Centered Assessment (1)**

Lecture—1 hour. Prerequisite: medical student. Person-centered assessment modalities and diagnostic approaches with regards to Internal Medicine and its different subspecialties. (P/F grading only.)—I. Fitzgerald

**494. Practicum in Community Health Clinics (1-3)**

Clinical activity—15-40 hours. Prerequisite: medical student with consent of instructor. Students are assigned to clinical settings that demonstrate ethnic, urban/rural, or other related aspects of clinical com-

munity health. Through active participation in health care delivery, students are able to relate conceptual with practical aspects of primary health care. May be repeated for credit. (H/P/F grading only.)—I, II, III. (I, II, III.) Kumagai

#### **497. Medicine, Bioethics and the Holocaust (3)**

Lecture/discussion—10 hours. Prerequisite: medical students only, consent of instructor. The concept of “evil” and the role of collaborators, bystanders and participants exemplified by the holocaust and compared to problems physicians face in practice today. Demonstration that evil emerges incrementally until taken for granted. (P/F grading only.) Not offered every year.—I, II, III.

#### **498. Group Study in Internal Medicine (1-18)**

Prerequisite: consent of instructor. Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care responsibility on campus, at UCDCM or off campus by specific arrangement. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

### **Internal Medicine—Cardiology (CAR)**

#### **Upper Division Courses**

##### **192. Internship in Cardiology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in cardiology. May be repeated for credit up to 12 units. (P/NP grading only.)

##### **199. Cardiology Research (1-5)**

Prerequisite: consent of instructor. Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions. (P/NP grading only.)

#### **Graduate Courses**

##### **220. Basic Science in Cardiology (1)**

Lecture—1 hour. Prerequisite: graduate or medical student status. Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural control of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current information in their areas. Offered in alternate years. (S/U grading only.)—III. Kaufman

##### **299. Cardiology Research (2-3.5)**

Prerequisite: consent of instructor. Research or special studies. (S/U grading only.)—Bonham, Longhurst

#### **Professional Courses**

##### **401. Clinical Cardiology Clerkship: Kaiser (3-18)**

Clinical activity (4 weeks)—8-12 hours (hospital); 1-5 hours (clinics). Prerequisite: third- and fourth-year medical students with advance approval by Division of Cardiology. Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CCU and elsewhere. The roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **460. Cardiology Clinical Clerkship (3-18)**

Clinical activity—full time (2-12 weeks). Prerequisite: Internal Medicine 430, third- and fourth-year medical students in good academic standing with consent of instructor. Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiologic disorders. Two outpatient clinics per week. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV.

##### **461. Management of Coronary Artery Disease: Coronary Care Unit (3-18)**

Clinical activity (inpatient service)—full time (4 weeks). Prerequisite: completion of second year of medical school and advance approval by Division of Cardiology. Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment. Includes acute coronary care, hemodynamic monitoring, stress testing, cardiac catheterization, pathologic correlations and the modern approach to therapy, both medical and surgical, based on pathophysiologic mechanisms. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **464. Preventive Cardiology (3-6)**

Seminar—2 hours (for 2-4 weeks); clinical activity—full time (2-4 weeks). Prerequisite: completion of third year of medical school. Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery services. (H/P/F grading only.)—II, III, IV. (II, III, IV.) Amsterdam

##### **480. Insights in Cardiology (1-3)**

Clinical activity—3-9 hours. Prerequisite: medical student in good academic standing and approval by Division of Cardiology. Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **498. Special Group Study: EKG Unit (1-12)**

Special study—2-week sessions. Prerequisite: medical students with advance approval by monthly attending faculty. Special group study in cardiology for medical students in EKG unit. May include lectures, directed reading, and/or discussion groups. May be repeated for credit. Limited enrollment. (H/P/F grading only.)

##### **499. Research (1-12)**

Prerequisite: approval by Division of Cardiology. (H/P/F grading only.)

### **Internal Medicine—Clinical Nutrition and Metabolism (NCM)**

#### **Upper Division Course**

##### **192. Internship in Clinical Nutrition (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in nutrition. May be repeated for credit up to 12 units. (P/NP grading only.)

#### **Graduate Course**

##### **290C. Clinical Nutrition Research Conference (1)**

Seminar—1 hour. Weekly seminar presented by a graduate student, taking the form of research completed or in progress, topic review or journal review from current journal. (S/U grading only.)—I, II, III. (I, II, III.) Davis

#### **Professional Courses**

##### **461. Nutrition Clinical Clerkship (3-18)**

Lecture—2 hours; clinical activity—full time (2 to 12 weeks). In-depth experience in assessment and monitoring of nutritional support of adult patients at UCD Medical Center whose illnesses are complicated by malnutrition, and of patients attending the Nutrition Clinic with problems in under-nutrition due to various illnesses.—I, II, III, IV. (I, II, III, IV.)

##### **480. Insights in Clinical Nutrition (1-3)**

Clinical activity—3-9 hours. Prerequisite: student in good standing; consent of instructor. Student will attend weekly clinical nutrition consult rounds (four evenings) and/or Nutrition Clinic (one day). Introduction to diagnosis and treatment of common nutritional problems. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **499. Research in Nutrition (9-18)**

Prerequisite: medical student in good standing; consent of instructor. Participation in ongoing clinical or basic nutrition research. Student may devise own project depending upon time commitments.—Halsted, Davis

### **Internal Medicine—Emergency Medicine (EMR)**

#### **Upper Division Course**

##### **192. Emergency Medicine Clinical Research Internship (4)**

Internship—8 hours; lecture/discussion—1 hour. Prerequisite: undergraduate student in good academic standing. Clinical research by assisting in identifying and enrolling patients for clinical studies in the Emergency Department. Basic principles of clinical research from directed readings and selected didactic lectures. (P/NP grading only.)—I, II, III.

#### **Professional Courses**

##### **401. Preceptorship in Emergency Medicine (1-4)**

Clinical activity—6 hours; tutorial—2 hours. Prerequisite: consent of instructor and completion of first year of medical school. Exposure to the specialty of Emergency Medicine and observation of a wide array of patients in the Emergency Department. A literature review of an Emergency Medicine topic of interest to the student must be performed and discussed. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **430. Introduction to Medical Toxicology (3)**

Independent study—24 hours; lecture/discussion—4 hours; fieldwork—12 hours. Prerequisite: fourth-year medical student with consent of instructor. Student will become familiar with the resources available to manage exposure and poison cases. Hands-on training in the use of Poisindex® computer database. Additional readings from medical literature required. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **440. Emergency Medicine Required Clerkship (6)**

Clinical activity—46 hours; lecture/discussion—8 hours. Prerequisite: satisfactory completion of Medicine, Surgery, and Pediatric Clerkship. Student will see patients primarily in the Emergency Department under the supervision of an Emergency Medicine Attending. Emphasis will be on the recognition and management of acute life threats, as well as the treatment of common medical and surgical conditions. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Laurin

##### **450. Ambulatory Care Clerkship (6)**

Clinical activity—full time (4 weeks). Prerequisite: Medicine, Surgery, and one month of Emergency Medicine Clerkship. Ambulatory care experience in the “fast track” area of the Emergency Department. Exposure to patients with minor illnesses and injuries. Emphasis on wound management and treatment of orthopaedic injuries. (Former course Internal Medicine 440.) (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Lee

##### **465. Acting Internship in Emergency Medicine (6)**

Clinical activity—36 hours; lecture/discussion—4 hours. Prerequisite: satisfactory completion of Medicine, Surgery, Pediatric and Emergency Medicine Clerkship. The student will function as an Acting Intern and treat a wide variety of patients and problems under the supervision of the Emergency Medicine Attending. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Laurin

##### **499. Research (2-18)**

Laboratory—full time (1 to 12 weeks). Prerequisite: consent of instructor. Elective where topics may be selected in either basic or clinical research areas of Emergency and/or Critical Care Medicine. The goals will be tailored to each individual student. Enrollment requires prior discussion and consent of instructor. (H/P/F grading only.)

**Internal Medicine—Endocrinology and Metabolism (ENM)****Upper Division Course****192. Internship in Endocrinology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in endocrinology. May be repeated for credit up to 12 units. (P/NP grading only.)

**Graduate Course****299. Research (1-12)**

Prerequisite: consent of instructor. Endocrinology research. (S/U grading only.)

**Professional Courses****460. Endocrinology Clinical Clerkship (3-18)**

Clinical activity (inpatient-outpatient service)—full time (3 days per unit). Prerequisite: Internal Medicine 430 and/or consent of instructor. Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**480. Insights in Endocrinology (1-3)**

Clinical activity—3-9 hours; oral presentation. Prerequisite: student in good academic standing and consent of instructor. First- or second-year students observe in morning Endocrine and Diabetes clinics and attend bi-weekly noon and afternoon endocrine conferences. They also give brief endocrine physiology oral presentation to the endocrine group. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**499. Research (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

**Internal Medicine—Gastroenterology (GAS)****Upper Division Course****192. Internship in Gastroenterology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in gastroenterology. May be repeated for credit up to 12 units. (P/NP grading only.)

**Graduate Course****299. Research (1-12)**

Research in gastroenterology. (S/U grading only.)—Bowlus

**Professional Courses****460. Clinical Clerkship (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of third year of medical school. Work-up, manage, and follow-up new patients on active inpatient consulting service. Gastroenterology/Hepatology patients. Daily rounds with attending physician. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**480. Insights in Gastroenterology (1-3)**

Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. To gain insight in clinical activities of Gastroenterology Division through attendance at any of the following: endoscopic procedures, ward rounds, outpatient clinic, and G.I. grand rounds. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Leung, Hsu

**499. Research (1-12)**

Clinical activity—varied. Prerequisite: medical student status; consent of instructor. Part-time participation in active clinical and basic research projects. Some will involve both patient care and relevant laboratory procedures. Basic research includes liver metabolism, cancer markers, porphyrias diet and cancer, folate metabolism. May be repeated for credit. (H/P/F grading only.)—Leung, Bowlus, Pimstone, Prindiville

**Internal Medicine—General Medicine (GMD)****Upper Division Course****192. Internship in General Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in general medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

**Graduate Course****291. Seminars in Human Health Services Research and Clinical Epidemiology (1)**

Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as Epidemiology 291.) (S/U grading only.)—I, II, III. (I, II, III.)

**Professional Courses****460. General Medicine Consults (1-18)**

Clinical activity (inpatient-outpatient service)—40 hours. Prerequisite: fourth-year medical students with consent of instructor; a general medicine clerkship. Supervised opportunity to see entire spectrum of medical problems encountered by a general internist. Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consultation Service is particularly concerned with medical evaluation of surgical patients. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) White, Robbins, Hirsch, Kravitz, Bach, Hogarth, Melenderes, Fancher, Garcia, Mitchell, Keenan, Newell, Romano

**470. Health Care Ethics (3-9)**

Discussion and conference—full time (2-6 weeks). Prerequisite: consent of instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Student participation in ethics rounds. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Loewy

**480. Insights in General Medicine (1-3)**

Clinical activity—one to nine 4-hour sessions; rounds—one to nine 2- to 4-hour sessions. Prerequisite: student in good academic standing and consent of instructor. Student will observe work-up, diagnostic evaluation and management of common general internal medicine problems in ambulatory and inpatient settings; be supervised by attending physician while attending General Medicine Clinic and/or Consult Rounds; and make brief presentations to consult service. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Robbins

**485. Introduction to Health Care Ethics (1)**

Lecture—10 weeks. Prerequisite: medical student in good standing. Introduction to concepts and methods of healthcare ethics. Emphasis on problems and methods. (H/P/F grading only.)—I. (I.) Loewy

**499. General Medicine Research (1-18)**

Discussion—3 hours; clinical research—8-40 hours. Prerequisite: consent of instructor. Student will be involved in a clinical research problem within the areas, interest and expertise of members of Division of General Internal Medicine. Alternatively, the research effort will be directed toward investigation of a clinical problem of general medical interest. May be repeated for credit. (H/P/F grading only.)

**Internal Medicine—Hematology-Oncology (HON)****Upper Division Course****199. Research in Hematology-Oncology (1-5)**

Laboratory—hours variable. Prerequisite: upper division standing and consent of instructor. Experience in laboratory research. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.)

**Graduate Courses****298. Topics in Hematology (1-4)**

Prerequisite: one year of graduate work and/or consent of instructor. Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics to be dictated by the interest and background of the students.

**299. Research (1-12)**

Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

**Professional Courses****420. Oncology (1)**

Lecture—9 hours; discussion—9 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Cancer epidemiology, cancer genetics, and cancer pharmacology; the pathophysiologic principles of oncology as they relate to specific common cancers using both lectures and case discussions. (P/F grading only.)—IV. Wisdom, DeGregorio

**460. Hematology-Oncology Acting Internship (6-18)**

Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student in good academic standing. Acting intern on inpatient hematology/oncology ward service. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**461. Hematology-Oncology Consult Clerkship (6-12)**

Clinical activity—full time (4-8 weeks). Prerequisite: fourth-year medical student in good academic standing. Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**462. Hematology-Oncology Ambulatory Clerkship (6-18)**

Clinical activity (inpatient/outpatient service)—full time (4 weeks). Prerequisite: fourth-year medical student in good academic standing. Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**490. Practicum in Care for the Terminally Ill (3-6)**

Clinical activity—full time (2-4 weeks); three 4-hour seminars included. Prerequisite: fourth-year medical student and an interview with Program Medical Director. Work with hospice interdisciplinary team. Direct experience in the care of patients with illnesses where no cure is possible. Emphasis on symptom relief, end of life issues, physician-assisted suicide. Fulfills the Ambulatory Care requirement. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**499. Research (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

**Internal Medicine—Infectious Diseases (IDI)****Upper Division Courses****141. Infectious Diseases of Humans (1)**

Lecture—1 hour. Prerequisite: introductory knowledge in biology and chemistry recommended. Course integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history. (P/NP grading only.)—I. (I.) Danekar

**192. Research Internship in Internal Medicine (1-12)**

Internship—3-36 hours; final report. Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings. May be repeated for credit up to 12 units. (P/NP grading only.)

**199. Infectious Diseases Research (1-5)**

Prerequisite: chemistry through organic chemistry (in addition, physical and biochemistry preferred), biology through basic bacteriology (in addition, microbiology and immunology preferred); and consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presentation. (P/NP grading only.)

**Graduate Courses****211. Epidemiology and Prevention of Infectious Diseases (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Epidemiology 205B, 207 or Internal Medicine 421. Infectious disease epidemiology and prevention, with equal emphasis on human and veterinary diseases. Major categories of infectious diseases by mode of transmission.—III. Flynn, Gibson

**299. Research in Infectious Diseases (1-12)**

Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

**Professional Courses****440. Introduction to AIDS and Related Disorders (1.5-6)**

Clinical Activity—30 hours; discussion—10 hours. Prerequisite: first and second year medical students must be in good academic standing and have consent from the instructor. Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Students will interview patients, observe patient care and participate in ongoing clinic research as well as examine alternative lifestyles. May be repeated for credit. (H/P/F grading only)—I, II, IV. Flynn

**450. Clinical and Social Care of the Injection Drug User (1-4)**

Lecture—1 hour; clinical activity—3 hours. Prerequisite: first and second year medical students in good academic standing. Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users. May be repeated for credit up to 24 units. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV.) Flynn

**460. Infectious Diseases Clinical Clerkship (3-6)**

Clinical activity. Prerequisite: successful completion of two years of study in an accredited medical school. Limited enrollment with priority to fourth-year medical students. Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Instruction in clinical microbiology and the proper use of the laboratory will be provided. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV.) Cohen

**499. Research Topics in Infectious Disease (2-12)**

Prerequisite: successful completion of the first year of study in School of Medicine, graduate students (approved for graduate credit), and/or consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presentation. (H/P/F grading only.)

**Internal Medicine—Nephrology (NEP)****Upper Division Course****192. Internship in Nephrology (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in nephrology. May be repeated for credit up to 12 units. (P/NP grading only)—I, II, III, IV. (I, II, III, IV.)

**Graduate Course****299. Nephrology Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional Courses****460. Nephrology and Fluid Balance (3-6)**

Clinical activity—full time. Prerequisite: completion of third year of medical school; consent of instructor. Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UCD Medical Center covering the field of nephrology and fluid-electrolyte disorders. Limited enrollment. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV.)

**499. Research in Nephrology (3-18)**

Prerequisite: individual arrangement and consent of instructor. Independent laboratory research on a specific problem related to biochemical or immunologic causes of renal disease and/or uremic disorders in humans or animals. (H/P/F grading only.)—Kaysen

**Internal Medicine—Pulmonary Medicine (PUL)****Upper Division Course****192. Internship in Pulmonary Medicine (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in pulmonary medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

**Graduate Course****299. Pulmonary Disease Research (1-12)**

Laboratory. Prerequisite: by arrangement only. Pulmonary disease research activity with focus in inhalation toxicity, oxidants or lung biochemistry, and cell and molecular biology. (S/U grading only.)—Cross

**Professional Courses****460. Pulmonary and Critical Care Medicine Clinical Clerkship (6-18)**

Clinical activity—full time (4-12 weeks). Prerequisite: Medical Sciences 431. At UCD Medical Center participating and rounding with Pulmonary/Critical Care Medicine fellows and consultation staff. Also includes pulmonary function test interpretation, outpatient assignments in outpatient clinic and preparation and presentation of material at weekly conferences. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV.)

**462. Pulmonary Clinical Clerkship (3-12)**

Clinical activity—full time (2-8 weeks). Prerequisite: completion of second year of medical school and/or consent of instructor. Participation at the Sacramento VA clinic with members of the subspecialty service in initial clinical evaluation, workup, management, and follow-up of patients with pulmonary disorders. Includes experience in Pulmonary Function Laboratory, and pulmonary diagnostic processes. Limited enrollment. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV.) Bonekat

**480. Pulmonary-Critical Care Medicine Insights (1-3)**

Clinical activity—3-9 hours. Prerequisite: student in good academic standing and consent of instructor. Student will attend respiratory outpatient clinics and

in-patient pulmonary consultation rounds and medical intensive care rounds. Introduction to diagnosis and treatment of common pulmonary problems. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV.) Albertson

**499. Research (1-12)**

Prerequisite: consent of instructor. (H/P/F grading only.)

**Internal Medicine—Rheumatology-Allergy (RAL)****Lower Division Course****99. Directed Research in Immunology (1-5)**

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only)—I, II, III, IV. (I, II, III, IV.) Gershwin

**Upper Division Courses****192. Internship in Rheumatology-Allergy (1-12)**

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in rheumatology-allergy. May be repeated for credit up to 12 units. (P/NP grading only.)

**199. Directed Research in Immunology (1-5)**

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.)—Gershwin

**Graduate Courses****209. Current Topics in Immunology (2)**

Discussion—2 hours. Prerequisite: basic immunology course and consent of instructor. Current developments in various aspects of immunology and their interrelationships. Focus on areas of immunology not currently covered in the basic and advanced immunology courses. May be repeated for credit if topic differs. (S/U grading only)—II, III. (II, III.) Van de Water

**298. Topics in Rheumatology and Clinical Immunology (1-5)**

Laboratory. Prerequisite: consent of instructor. Library and/or laboratory work as required. (S/U grading only.)—Gershwin

**299. Research in Autoimmune Disease (1-12)**

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, Sjögren's syndrome, polymyositis and drug hypersensitivity. (S/U grading only.)—Gershwin

**Professional Courses****460. Rheumatology Clinical Clerkship (1-18)**

Clinical activity (inpatient-outpatient service)—full time. Prerequisite: Medical Sciences 431 and consent of instructor. Participation with members of the subspecialty service in the diagnosis and therapeutic management of patients with rheumatologic diseases. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV.)

**461. Allergy Clinical Clerkship (3-18)**

Clinical activity (inpatient-outpatient service)—full time (2 to 12 weeks). Prerequisite: completion of second year of medical school and consent of instructor. Student will work with practicing allergist in daily work with patients and participate in weekly allergy clinic and teaching conferences. Study of the literature. Will see patients with problems in clinical immunology, immunodeficiency, asthma, allergic rhinitis. (H/P/F grading only)—I, II, III, IV. (I, II, III, IV.)

**480. Insights in Rheumatology (1-3)**

Clinical activity—3–9 hours. Prerequisite: student in good academic standing and consent of instructor. Participation in rheumatology consultation rounds, rheumatic disease clinics and conferences with supervised readings in rheumatology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Leek

**499. Research (1-12)**

Prerequisite: medical student with consent of instructor. Part-time participation in active clinical and basic research projects which can involve both patient care and relevant laboratory procedures. Students can gain experience in clinical medicine and clinical investigation. (H/P/F grading only.)

**Medical Microbiology (MMI)****Lower Division Courses****10. Parasitic Disease in Humans (2)**

Lecture—2 hours. Introduction to parasitic diseases in humans, including relationships between humans and parasites, symptoms, diagnosis, geographical distribution, treatment and prevention of parasitic disease. Not offered every year.—III. This

**Upper Division Courses****115. Ecological Parasitology (3)**

Lecture—3 hours. Parasitism as a life style is explored from the ecological point of view, illustrating the way parasites utilize biotic habitats and the influence climate, geography, behavior, cultural change and alteration of habitat can have on the distribution and prevalence of parasites.—II. (II.) This

**116. Parasitology for Wildlife Biologists (3)**

Lecture—3 hours. Prerequisite: upper division standing or consent of instructor. Emphasis on the role infectious diseases play in wildlife dynamics. Lectures and demonstrations on techniques and methods for examining wild animals for evidence of infectious diseases, methods used in preserving and identifying parasites of wildlife, as well as what is known about their pathogenesis.—III. (III.) This

**130. Medical Mycology (2)**

Lecture—2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 430.)—II. Pappagianis

**188. Human Immunology (3)**

Lecture—3 hours. Prerequisite: undergraduate level introductory biology course. Human immune system and mechanisms of immunity. Basic components and function of immune system. Molecular basis of immune response; basic cellular and molecular mechanisms. Interactions between cells of immune system producing immune responses; regulating molecules.—III. (III.) Torres

**192. Internship in Medical Microbiology (1-12)**

Internship—3–36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in medical microbiology and related fields. (P/NP grading only.)

**194H. Senior Honors Project in Medical Microbiology and Immunology (5)**

Independent study—15 hours. Prerequisite: course 199 and consent of instructor. Project in research related to immunology of medically important viruses. Development of a hypothesis-driven project, performance of experimental protocols and preparation of graphical representation of original data. Requires oral and written presentation of research results. May be repeated three times for credit with consent of instructor. (P/NP grading only.)—I, II, III. (I, II, III.) Torres

**198. Group Study in Medical Microbiology (1-5)**

Prerequisite: upper division standing and consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (P/NP grading only.)

**199. Research in Medical Microbiology (1-5)**

Prerequisite: upper division standing and consent of instructor. Individual research. (P/NP grading only.)

**Graduate Courses****200D. Mechanisms for Microbial Interactions with Hosts (3)**

Lecture/discussion—3 hours. Prerequisite: Microbiology 200A or consent of instructor. Study of mechanisms involved in microbial interactions within a host environment. The following principles are basic to understanding these interactions: host recognition, invasion, competition and growth, and host defense.—II. (II.) Beaman

**208. Seminars in Microbiology and Immunology (1)**

Seminar—1 hour. Research seminars on current topics in microbiology and immunology. May be repeated for credit if topic differs. (S/U grading only.)—I, II, III. (I, II, III.) Dandekar, Luckhart

**210. Physician Scientist Molecular Medicine Journal Club (1)**

Lecture/discussion—1 hour. Research articles in current literature. Topics/articles to include a broad range of frontiers in biomedical literature. May be repeated for credit if topic differs. (S/U grading only.)—I. (I.) Bevins

**215. Medical Parasitology (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: graduate student with consent of instructor. Epidemiological, pathogenesis, diagnostic methods and laboratory studies of protozoa, helminths and arthropods of medical importance. Offered in alternate years. (Same course as 415.)—I. This

**220. Current Concepts in Bacterial Ultrastructure (2)**

Discussion—2 hours; student presentations; term paper. Prerequisite: Microbiology 105 or consent of instructor. Critical evaluation of current literature dealing with all aspects of bacterial ultrastructure. Discussion of selected and assigned reading and formal student presentations of assigned topics.—III. (III.) Beaman

**280. Molecular Pathobiology for Diagnosis and Therapy of Human and Animal Diseases (3)**

Lecture—3 hours. Prerequisite: graduate standing. Molecular pathobiology of phenotypes caused by human hereditary diseases and viruses. Emphasis on molecular diagnostics at cellular/tissue level, and therapy including vaccines and gene transfer using recombinant DNA technology. Not open for credit to students who have completed Internal Medicine: Infectious Diseases 280. Offered in alternate years.—(III.) Dandekar

**298. Group Study in Medical Microbiology and Immunology (1-5)**

Prerequisite: consent of instructor; open to graduate students. Directed reading and discussion and/or laboratory investigation on selected topics. (Sections 1, 2, 4, 5: S/U grading only.)

**299. Research (1-12)**

Prerequisite: consent of instructor; open to graduate students. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

**Professional Courses****410. Physician Scientist Molecular Medicine Journal Club (1)**

Lecture—1 hour. Weekly seminars by students on research articles in current literature. Topics/articles to be selected by instructors to include a broad range of frontiers in biomedical literature. May be repeated for credit. (H/P/F grading only.)—I. (I.) Bevins

**415. Medical Parasitology (5)**

Lecture—3 hours; laboratory—6 hours. Prerequisite: medical student with consent of instructor. Approved for graduate degree credit. Epidemiological, pathogenesis, diagnostic methods and laboratory studies of protozoa, helminths and arthropods of medical importance. Offered in alternate years. (Same course as 215.) (H/P/F grading only.)—I. This

**420. Current Concepts in Bacterial Ultrastructure (2)**

Discussion—2 hours; formal presentation or term paper. Prerequisite: medical students with consent of instructor. Evaluation of current status of bacterial ultrastructure with an emphasis on host-parasite interactions through discussions and assigned readings. (H/P/F grading only.)—III. (III.) Beaman

**430. Medical Mycology (2)**

Lecture—2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 130.) (H/P/F grading only.)—II. Pappagianis

**480A. Medical Immunology (2)**

Lecture—4 hours. Prerequisite: approval of Committee on Student Progress. Structure and function of the molecules, cells and tissues involved in immunity, and their interactions in health and disease. (P/F grading only.)—III. (III.)

**480B. Pathogenic Microbiology (3.5)**

Lecture—4 hours; laboratory—3 hours. Prerequisite: approval of the School of Medicine Committee on Student Progress. The biology of pathogenic microorganisms with emphasis on their role in human disease. May be repeated for credit. (P/F grading only.)—IV. Beaman

**480C. Pathogenic Microbiology (2)**

Lecture/laboratory—5 hours. Prerequisite: approval of the School of Medicine Committee on Student Progress. The biology of pathogenic microorganisms with emphasis on their role in human disease. (P/F grading only.)—I. Dandekar

**497T. Tutoring in Medical Microbiology (1-5)**

Tutoring—3–15 hours. Prerequisite: appropriate preparation in subject matter and consent of instructor. Assist instructor by tutoring medical students in one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

**498. Group Study in Medical Microbiology and Immunology (1-5)**

Prerequisite: medical students with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)

**499. Research (1-12)**

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

**Master of Public Health (MPH)****Graduate Course****210. Public Health Informatics (1)**

Lecture—2 hours. Collection, verification, and utilization of data related to populations; infrastructure, functions, and tools used to generate public health knowledge supporting public health practices and policy development/dissemination. (S/U grading only.)—Hogarth, Doebbert

**266. Applied Analytic Epidemiology (3)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as Population Health and Reproduction 266.)—III. (III.) Kass

## Medical Pharmacology and Toxicology (PHA)

### Lower Division Courses

#### 92. Internship in Pharmacology (1-12)

Internship—3-36 hours; final report. Prerequisite: lower division student with good academic standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: lower division standing. (P/NP grading only.)

### Upper Division Courses

#### 192. Internship in Pharmacology (1-12)

Internship—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### Graduate Courses

#### 200A. Advanced General Pharmacology (3)

Lecture—3 hours. Prerequisite: upper division courses in biochemistry (101A-101B) and mammalian physiology (111A-111B and 112-113) or the equivalent (may be taken concurrently). Core course in human pharmacology designed for graduate and medical students. Principles in pharmacology, including pharmacokinetics and drug metabolism and the actions, use and toxicity of the major classes of drugs.—I. (I.)

#### 200B. Advanced General Pharmacology (4)

Lecture—4 hours. Prerequisite: upper division courses in biochemistry (101A-101B) and mammalian physiology (111A-111B and 112-113) or the equivalent (may be taken concurrently). Core course in human pharmacology designed for graduate and medical students. The actions, use and toxicity of major classes of drugs. Continuation of course 200A.—II. (II.)

#### 206. Pharmacokinetics (2)

Lecture—2 hours. Prerequisite: courses 200A, 200B. Physicochemical and physiological factors affecting absorption, distribution, metabolism and excretion of drugs. Mathematical and graphical methods for determining pharmacokinetic parameters. Calculation of dose regimens. Offered in alternate years.—(I.) Henderson

#### 298. Group Study (1-5)

Prerequisite: consent of instructor.

#### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

### Professional Courses

#### 400A. Pharmacology (2)

Lecture—18 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (Deferred grading only, pending completion of sequence. P/F grading only.)—IV. Fischer

#### 400B. Pharmacology (1.5)

Lecture—22 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Principles in pharmacology, including autonomic pharmacology, endocrine pharmacology, general anesthetics, GI drugs, substance abuse and general toxicology. (Deferred grading only, pending completion of sequence. P/F grading only.)—I. Fischer

#### 400C. Pharmacology (2.5)

Lecture—23 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (P/F grading only.)—II. Fischer, Albertson

#### 445. Introduction to Integrative Medicine (1)

Lecture/discussion—1 hour. Prerequisite: medical student in good standing. Basic principles of alternative medical systems (e.g., traditional Chinese, Ayurvedic, Tibetan), alternative practices (e.g., chiropractic, osteopathy, naturopathy, homeopathy, herbalism, guided imagery/meditation, massage therapy), and mind/body connection are presented as introduction to integrating alternative treatments into traditional medicinal practice. (H/P/F grading only.)—II. (II.) Harkey

#### 490. Seminar in Pharmacology for Medical Students (1)

Seminar—1 hour. Prerequisite: consent of instructor. Seminar in pharmacology for medical students. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### 497T. Tutoring in Pharmacology (1-5)

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

#### 498. Special Study for Medical Students (1-5)

Lecture, directed reading, and/or discussion groups—3-15 hours. Prerequisite: consent of instructor. Special study in pharmacology for medical students. (H/P/F grading only.)

#### 499. Directed Research for Medical Students (1-12)

Laboratory—3-36 hours. Prerequisite: consent of instructor. Directed research in pharmacology for medical students. (H/P/F grading only.)

### Nephrology (NEP)

#### Professional Course

#### 460. Nephrology and Fluid Balance (3-6)

Clinical activity—4 hours; lecture/discussion—10 hours. Prerequisite: completion of 3rd year medical school and medicine core clerkship, consent of instructor. Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UCD Medical Center covering the field of nephrology and fluid-electrolyte disorders. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. Kaysen

### Neurology (NEU)

#### Upper Division Course

#### 199. Individual Special Study and Research (1-4)

Prerequisite: consent of instructor. Individual special study in neurophysiology and biomedical engineering is offered to qualified students. Studies on psychophysics, single-unit electrophysiology and instrumentation are offered in Davis. (P/NP grading only.)

### Graduate Courses

#### 201. Human Behavioral Neurobiology (2)

Lecture/discussion—2 hours. Prerequisite: Cell Biology and Human Anatomy 203; Psychology 108 or 136. Neurobiology of normal and abnormal behavior of humans, based on specific neuroanatomical, neurophysiological, and cognitive parameters. Evaluation of these parameters will be, for example, by application of clinical neurologic, neuropsychologic, and neuroimaging tests.—I. (I.)

#### 202. Visuomotor Neurobiology (2)

Seminar—2 hours. Prerequisite: course 201, Cell Biology and Human Anatomy 203. An overview of neural mechanisms of visually guided behavior in

humans will examine the integration of visual attention and eye movements. Performance of normal humans and neurologic patients in reflexive orienting, visual search, reading and reaching will be considered. Offered in alternate years.—(III.)

#### 290. Seminar in Selected Topics (1)

Seminar—1 hour. Prerequisite: consent of instructor. Selected topics in Neuroscience will be offered. (S/U grading only.)—Gorin

#### 298. Group Study (1-5)

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (S/U grading only.)

#### 299. Individual Special Study and Research (1-12)

Laboratory—3-36 hours. Prerequisite: consent of instructor. Individual special study and research in Neurophysiology and Biomedical engineering is offered at both Davis and Sacramento Medical Center. (S/U grading only.)

### Professional Courses

#### 420. Clinical Neurosciences (3)

Lecture/discussion—5 hours; lecture—4 hours. Prerequisite: approval of Committee on Student Progress. Pathophysiology underlying neurological disorders, including disorders of development, muscle, nerve, cerebral circulation, metabolism, myelin, cortical function, movement, cerebrospinal fluid, autonomic function and special senses. Anatomical basis of clinical testing, nervous system infection, neoplasia and trauma. (P/F grading only.)—II.

#### 450. Clinical Neurology Clerkship (6)

Clinical activity—24 hours; conference—12 hours; seminar—4 hours; independent study—10 hours. Prerequisite: fourth-year medical student or third-year medical student with consent of instructor. Critical elements of neurological clinical skills (history & exam) and basic and clinical neurological concepts expected for general residency preparation. Active, didactic, experiential and independent learning to encourage maturation of general professional competencies. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Bowe

#### 451. Clinical Neurology Clerkship (3-6)

Clinical activity—full time (2-4 weeks at Highland General Hospital, Oakland). Prerequisite: fourth-year medical student. Essentials of detailed neurological examination and principles of differential neurological diagnosis. Emphasis on common neurological disorders encountered in practice. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Wheelock

#### 452. Advanced Clinical Neurology (6)

Clinical activity—full time (4 weeks). Prerequisite: completion of four-week Neurology selective and consent of instructor. Extension of basic Neurology clerkship. Designed for students with special interest in medical disorders of nervous system. By arrangement with department, student may serve as an acting intern. Principles of neurological differential diagnosis and therapeutics emphasized. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### 453. Advanced Clinical Neurology (6)

Clinical activity—full time (4 weeks at Highland General Hospital, Oakland). Prerequisite: completion of four-week Neurology selective and consent of instructor. Extension of basic Neurology clerkship. Designed for students with special interest in medical disorders of the nervous system. By arrangement with department, student may serve as an acting intern. Principles of neurological differential diagnosis and therapeutics emphasized. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### 454. Electroencephalography and Evoked Potentials (3-18)

Clinical activity—full time (2-12 weeks) technique and interpretation. Prerequisite: four-week Neurology clerkship and consent of instructor. Principles of electroencephalographic diagnosis including technical basis of electroencephalography and evoked

potentials. Emphasis placed on how these studies are applied to neurological diagnosis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Gabor, Seyal

#### **455. Child Neurology (6)**

Clinical activity—full time (4 weeks). Prerequisite: satisfactory completion of Internal Medicine 430, Obstetrics and Gynecology 430, Pediatrics 430 and consent of instructor. Student exposed to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. This course satisfies the fourth year neuroscience requirement. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### **456. Cortical Neurology (3-18)**

Clinical neurological research—full time (12 weeks at Highland General Hospital, Oakland). Prerequisite: course 451 or the equivalent; consent of instructor. Student will pursue a small project in clinical neurologic research on higher cortical functions. The focus is on scientific analysis of behavior in disease states. Study may be arranged for from two weeks to twelve weeks, with units corresponding to length of course. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Remler

#### **457. Special Topics in Neurology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: course 450, 451 or consent of instructor. Students study areas of special interest in tutorial manner under supervision of member of faculty with expertise and interest in elected field. Students may elect tutorial clinical experience with member of staff. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### **458. Introduction to Cognitive and Communication Disorders (3)**

Lecture—3 hours; observations, individual projects. Prerequisite: consent of instructor. Introduction to cognitive and communication disorders. Includes a survey of disorders subsequent to brain damage; management by neurology, neuropsychology, and speech pathology; and current research on appraisal, diagnosis, and treatment. (H/P/F grading only.)—I. (I.) Dronkers

#### **459. Independent Study in Neurogenic Communication Disorders (1-3)**

Conference, observation and data collection—3-9 hours. Prerequisite: consent of instructor. Independent study of neurogenic communication disorders—aphasia, dementia, apraxia of speech, dysarthria. Designed for individual interest and includes discussion, directed reading, research design, data collection, and preparation of results. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Dronkers

#### **464. Clinical Neurology (3-18)**

Clinical activity—full time (minimum of one-half quarter). Prerequisite: fourth-year medical student or third-year medical student with completion of a medical clerkship; consent of Chairperson. Clerkship in neurology to be arranged at another institution with accredited residency programs in neurology under proper supervision. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Wheelock

#### **468. Special Clinical Elective in Neurology (6-18)**

Clinical activity—full time (4 to 12 weeks). Prerequisite: fourth-year medical student or third-year medical student with clerkship in medicine and pediatrics. Emphasis will be on mastering the neurologic examination and on introduction to neurologic evaluation, diagnosis and therapy. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### **480. Insights in Neurology (1-3)**

Discussion—3 hours; clinical activity—3 to 9 hours. Prerequisite: student in good academic standing; consent of instructor. Attendance at neurology grand rounds and regular rounds following. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### **498NE. Group Study in Neurology (1-6)**

Prerequisite: medical students with consent of instructor. Directed readings and discussions with a comprehensive written examination at the end of course. (P/F grading only.)—I, II, III, IV.

#### **499. Research (1-12)**

Laboratory—2-24 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Laboratory investigation on selected topics. (H/P/F grading only for graduate and medical students.)

### **Neurosurgery (NSU)**

#### **Upper Division Course**

##### **199. Special Study in Neurosurgery for Advanced Undergraduates (1-5)**

Prerequisite: advanced undergraduate standing with consent of instructor. Students may participate in ongoing neurosurgical projects or may pursue and design independent projects. (P/NP grading only.)

#### **Graduate Course**

##### **299. Neurosurgery Research (3-12)**

Prerequisite: graduate student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. (S/U grading only.)

### **Professional Courses**

##### **451. Neurosurgical Critical Care Clerkship (3)**

Clinical activity—full time (2 weeks). Prerequisite: third- or fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Students participate in the care of neurosurgical patients in the NSICU and in the admission and surgical management of patients admitted through the Emergency Room. (H/P/F grading only.)—I, II, III. (I, II, III.)

##### **455. Clinical Pediatric Neurosurgery (6)**

Clinical activity—full time (4 weeks). Prerequisite: third- or fourth-year medical students who have satisfactorily completed course 460; consent of instructor. Admission and follow-up of pediatric patients. Neurological history, examination, and diagnostic procedures are emphasized. Students will participate in surgical procedures and are required to attend all pediatric neurosurgery conferences. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Pang

##### **460. Clinical Neurosurgery (6-18)**

Clinical activity—full time (3 days per unit; 4 weeks minimum). Prerequisite: third- and fourth-year medical students; consent of instructor. Approved for graduate degree credit. Admission and follow-up of patients. Neurological history, examination and further diagnostic procedures emphasized. Students participate in meaningful aspects of surgical procedures and attend listed conferences, rounds, and seminars. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **464. Externship (6-18)**

Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Clerkship in neurosurgery to be arranged at another institution with accredited residency program in neurosurgery under proper supervision. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **470. Advanced Clinical Neurosurgery (6-18)**

Clinical activity—full time (4-12 weeks). Prerequisite: fourth-year medical student in good academic standing. Student will function as acting intern on neurosurgery service. Admission and management of patients. Neurological history, examination, diagnostic procedures, and surgical management are emphasized. Students participate in meaningful aspects of surgical procedures and attend required conferences and rounds. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **480. Insights in Neurosurgery (1-3)**

Clinical activity—3 to 9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Observation of neurosurgical care in emergency room, operating room and hospital floors, including manner of treatment of a variety of chronic and acute neurological diseases. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### **499. Neurosurgery Research (1-18)**

Prerequisite: medical student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. (H/P/F grading only.)

### **Obstetrics and Gynecology (OBG)**

#### **Upper Division Courses**

##### **190. Seminar in Early Mammalian Development (1)**

Seminar—1 hour; short paper. Prerequisite: Zoology 100 or the equivalent. Each student will present paper from the recent scientific literature on various research topics in early mammalian development. Short paper will be required at the end of course.—I, II, III. (I, II, III.)

##### **192. Shifa Clinic/Student Volunteer (1)**

Conference—2 hours; clinical activity—6-8 hours; discussion—1-2 hours. Supervised work experience in obstetrics and gynecology. May be repeated up to 3 times for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Yasmeen

##### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

##### **199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

### **Graduate Courses**

##### **220. Genetics of Reproduction (3)**

Lecture/discussion—3 hours. Introduction to genetics of mammalian reproduction for domestic species, species used in research, and the human. Mendelian and non-Mendelian modes of inheritance. Research paper. Offered in alternate years.—II. (II.)

##### **290. Current Topics in Research (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Selected topics in reproductive biology. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

##### **291. Seminar in Early Mammalian Development (1)**

Seminar—1 hour. Each student will be asked to present a paper from the recent scientific literature on various research topics in early mammalian development. Short paper will be required at the end of course.—I, II, III, IV. (I, II, III, IV.)

##### **298. Group Study (1-5)**

Prerequisite: graduate standing; consent of instructor.

##### **299. Research (1-12)**

Prerequisite: graduate standing; consent of instructor. (S/U grading only.)

### **Professional Courses**

##### **420. Genetics and Reproduction (2)**

Lecture—20 hours; conference—4 hours. Prerequisite: Endocrinology. Introduction to medical genetics and the clinical consequences of genetic abnormalities. Aspects of reproduction including gametogenesis, development of the conceptus, maternal adaptation to pregnancy, labor and delivery and menopause. (P/F grading only.)—IV.

##### **430. Obstetrics and Gynecology Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCDMC and affiliated sites. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.)—I, II, III, IV. Dalrymple

##### **465. Elective Clerkship (4-18)**

Clinical activity—full time (3 days per unit). Prerequisite: third- and fourth-year medical student; course 430 or the equivalent; consent of instructor. Active participation in inpatient and outpatient care. Attendance at specified conferences; student-faculty mem-

ber informal conferences. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Dalrymple

#### 470. Acting Internship in Obstetrics and Gynecology (6-8)

Clinical activity—full time (4-6 weeks). Prerequisite: third- and fourth-year medical students who have completed course 430; consent of instructor. Student will perform as intern and expect the following experience: Obstetrics and Gynecology, 2 weeks each; perform inpatient care; be on call every third night; attend scheduled conferences one half-day per week. Round daily with attending. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Dalrymple

#### 471. Ambulatory Gynecology and Obstetrics (6-8)

Clinical activity—full time (4-6 weeks). Prerequisite: third- and fourth-year medical students who have completed course 430; consent of instructor. Student to participate in following clinics each week: General Gynecology, New and Return Obstetrics, Post-Partum, High-Risk Obstetrics, Pre-Operative Clinic, other specialty clinics as assigned. Student will conduct examinations, present patients to staff and will be able to discuss treatment regimens. Night call in Labor and Delivery Suite every third night. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### 480. The Birthing Process (1)

Lecture/discussion—1 hour. Open only to UC Davis medical students. Training to assist in the birthing process as a Doula. Topics not covered in the summer course. (S/U grading only.)—I. Dalrymple

#### 494. Shifa Clinic (1-6)

Clinical activity—8 hours; lecture—1-2 hours; project—1-2 hours; discussion—1 hour. Prerequisite: medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated up to 3 times for credit. (P/F grading only.)—I, II, III, IV. Yasmeen

#### 498. Group Study (1-5)

Prerequisite: consent of instructor. Explore particular topics in-depth in Obstetrics and Gynecology. Extensive contact with and oversight by instructor. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

#### 499. Research in Obstetrics and Gynecology (4-18)

Prerequisite: medical student with consent of instructor. Student will pursue a research problem of her/his own choosing, selected with help of the faculty. Integration with ongoing faculty research projects recommended. (H/P/F grading only.)

### Ophthalmology (OPT)

#### Upper Division Courses

##### 192. Research Internship (1-12)

Internship—3-36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in ophthalmology research. Research staff in Ophthalmology have programs in cell biology, electron microscopy, biochemistry, immunology and visual psychophysics. (P/NP grading only.)

##### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### Graduate Course

##### 299. Basic Research in Visual Science (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

#### Professional Courses

##### 440. Ophthalmology Required Clerkship (3)

Clinical activity—full time (2 weeks). Prerequisite: consent by Committee on Student Evaluation and Promotion. Fundamental knowledge of ophthalmic diagnosis and principles; basic ophthalmic instru-

ments; understanding of treatment for eye problems manageable by a primary care physician; knowledge of what patients should be referred for ophthalmic care. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) J. Brandt

##### 442. Ophthalmology Clerkship (3)

Clinical activity—40 hours. Prerequisite: fourth-year medical student or third-year medical student with completed clerkships in medicine and surgery and consent of instructor and adviser. Ocular disease diagnosis and management relevant to the clinical practice of future primary care physicians and others. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### 461. Basic Clinical Ophthalmology (4.5)

Clinical activity—to be arranged (2 weeks). Prerequisite: medical students who have completed either Medical Sciences 430 or course 440 (in third or fourth year); consent of instructor. Provides an acquaintance with the fundamentals of routine clinical ophthalmology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) J. Brandt

##### 465. Advanced Subspecialty Ophthalmology (6-9)

Clinical activity—to be arranged (4 weeks off campus or 6 weeks at UCD Medical Center). Prerequisite: medical students who have completed Internal Medicine 430 (in third or fourth year); consent of instructor. Participation in disciplines of neuro-ophthalmology/pediatric ophthalmology, diseases of the cornea and external eye, glaucoma and retina. Rotations at UCD Medical Center may be arranged in 6-week units of one service alone, or in combination, as arranged with instructors. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Mannis, Keltner, J. Brandt

##### 480. Insights in Ophthalmology (1-3)

Clinical activity—3 to 9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Clinical exposure in ophthalmology including slide-tape program, patient exposure, and department conferences (i.e., grand rounds and subspecialty conference). (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### 498. Group Study (1-3)

Prerequisite: medical students with consent of instructor. Directed reading and discussion. (H/P/F grading only.)

##### 499. Research in Ophthalmology (1-12)

To be arranged—3-36 hours. Prerequisite: medical students with consent of instructor. Individual research on selected topics in optics and visual physiology, cornea and external disease. (H/P/F grading only.)

### Orthopaedic Surgery (OSU)

#### Lower Division Course

##### 99. Special Studies for Undergraduates (1-4)

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

#### Upper Division Course

##### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

#### Professional Courses

##### 421. The Musculoskeletal System (2.5)

Lecture/discussion—6 hours. Prerequisite: consent of Committee on Student Progress. Basic and clinical science of orthopaedic surgery and rheumatology. (P/F grading only.)—I. Martin

##### 428. Ambulatory and Emergency Room Orthopaedics (3-6)

Clinical activity—full time (2-4 weeks). Prerequisite: 4th-year medical student in good academic standing and consent of instructor. Introduction to general orthopaedic problems and trauma and their management in an outpatient environment, including the emergency room. Student will conduct orthopaedic examinations, present patients to staff rotating through trauma, hand, pediatrics, adult and foot clin-

ics. Orthopaedic physical examination and interpretation of x-rays. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### 462. Community Preceptorship (3-6)

Clinical activity—full time (2-4 weeks). Prerequisite: fourth-year medical student in good academic standing with consent of instructor. Acquaints student with private practice of orthopaedics in the community setting. Opportunity to observe and assist private practitioners in office, emergency room, operating room and inpatient environment. Student must provide own transportation. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### 464. Acting Internship (6)

Clinical activity—full time (4 weeks). Prerequisite: fourth-year medical student in good academic standing and consent of instructor. Rotation designed to increase basic knowledge of musculoskeletal abnormalities at clinical level. Attention focused on selective case material. For those students who demonstrate proficiency, responsibility will be similar to that of intern. Limited enrollment. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

##### 480. Insights in Orthopaedic Surgery (1-3)

Clinical activity—3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Exposure to aims, methods and procedures in orthopaedic surgery via attendance at grand rounds, patient care conferences, and group discussions. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Szabo

##### 481. History of Medicine for Medical Students (1.5)

Lecture/discussion—2.5 hours (for six weeks). Prerequisite: third- or fourth-year students in the School of Medicine or second-year students with consent of instructor. Overview of the history of medicine throughout the world to introduce medical students to landmark accomplishments and key figures in the development of health care and to provide an expanded philosophical perspective on the ever-changing field of modern medicine. (H/P/F grading only.)—I. (I.) Benson

##### 499. Orthopaedics Research (1-12)

Clinical activity—3 hours to full time (to be arranged with individual faculty). Prerequisite: third- or fourth-year medical student in good academic standing; consent of instructor. Laboratory or clinical investigation on selected topics. May be repeated for credit. (H/P/F grading only.)

### Otolaryngology (OTO)

#### Lower Division Courses

##### 192. Internship in Otolaryngology (1-12)

Internship—3 to 36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in otolaryngology and related fields. Final project report. (P/NP grading only.)

##### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

##### 199. Special Study in Otolaryngology for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduate with consent of instructor. (P/NP grading only.)—I, II, III, IV. Brodie

#### Graduate Courses

##### 290C. Research Conference in Otolaryngology (1)

Lecture/discussion—1 hour. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentation and discussion of faculty and student research in otolaryngology. (S/U grading only.)—I, II. (I, II.)

##### 291. Principles of Speech, Hearing and Equilibrium (3)

Lecture/discussion—3 hours. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentations by fac-

ulty and guest lecturers on anatomy, physiology, and behaviors involved in speech production, hearing, and equilibrium. Each student will be expected to make one class presentation.—(I, II, III, IV.) Yamoah

### 298. Group Study (1-5)

(S/U grading only.)

### 299. Individual Study in Otolaryngology for Advanced Graduate Students (1-12)

Prerequisite: advanced graduate student with consent of instructor. (S/U grading only.)

## Professional Courses

### 401. Clinical Examinations in Otolaryngology (1)

Lecture—1 hour; laboratory—1 hour; practical—1 hour total. Prerequisite: second-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Obtaining the history, applied anatomy of the regions, and the art of the examination. Head mirror required.—I, II, III, IV. (I, II, III, IV.) Enepekides

### 402. Otolaryngology in Family Practice (1)

Lecture—10 hours total. Prerequisite: fourth-year medical students and family practitioners with consent of instructor; open to graduate students. Approved for graduate degree credit. Planned as a refresher course for those already possessing a background of knowledge in the specialty.—I. (I, II, III, IV.) Enepekides

### 403. Basic Principles of Reconstructive Surgery (1)

Lecture—four 2-hour sessions; laboratory—one 2-hour session (4 weeks). Prerequisite: third- or fourth-year medical student with consent of instructor. Formal presentations covering basic principles of reconstructive surgery, including wound healing, treatment of lacerations, skin and bone grafts, flaps, Z-plasties and revision of scars. Laboratory session utilizing animal tissues.—II. (II.) Donald

### 440. Otolaryngology Required Clerkship (3)

Clinical activity—full time (2 weeks). Prerequisite: consent by Committee on Student Evaluation and Promotion. To provide fundamental knowledge of otorhinolaryngologic diagnosis and principles, develop facility with basic ENT instruments, provide an understanding of treatment for ear, nose and throat problems and provide knowledge of what patients should be referred for otorhinolaryngologic care.—I. (I, II, III, IV.) Enepekides

### 450. Fourth Year Otolaryngology Elective (6)

Clinical activity—35 hours; lecture—2 hours; film-viewing—0.25 hours; discussion—1 hour. Prerequisite: third- or fourth-year medical student; consent of instructor. Participation in Otolaryngology Clinic and operating room. Evaluation and management of common Otolaryngologic diseases. (H/P/F grading only.)—(I, II, III, IV.) Enepekides

### 460. Clinical Otolaryngology Elective (3-18)

Clinical activity—full time. Prerequisite: third- and fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Total involvement in clinical activities of the department. (H/P/F grading only.)—(I, II, III, IV.) Enepekides

### 480. Insights in Otolaryngology (1-3)

Clinical activity—3 to 9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Individualized activities (depending upon time available and previous exposure to Ear, Nose and Throat) including observing patient exams, ward rounds and attendance at lectures and grand rounds. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Strong

### 490. Journal Seminar (1)

Lecture/discussion—10 hours total (course given three times per quarter). Prerequisite: fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree

credit. Monthly review of current otolaryngologic and related literature and recent advances. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Donald

### 498. Individual or Group Study (1-5)

Lecture/discussion—1-2 hours; laboratory—1-4 hours. Prerequisite: consent of instructor. Introduction to basic research in Otolaryngology. Lectures, discussion and laboratory study of sensory and motor systems. (H/P/F grading only.)

### 499. Research (1-12)

Prerequisite: medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Participation in ongoing projects. (H/P/F grading only.)—Brodie

## Pathology (PMD)

### Upper Division Courses

#### 192. Internship in Human Pathology (1-12)

Internship—3-36 hours; final project report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in pathology and related fields. (P/NP grading only.)

#### 199. Special Study in Pathology for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduates and consent of instructor. (P/NP grading only.)

## Graduate Courses

### 210. Introduction to Human Pathology (4.5)

Lecture/discussion—8 hours; laboratory—4 hours (5 weeks). Prerequisite: graduate or upper division students with background in gross and microscopic anatomy, physiology and biochemistry. Lectures, laboratory, and computer-assisted learning. Introduces basic human disease processes. Stresses mastery of pathophysiology and vocabulary. Examining gross and microscopic tissue sections is taught. (Course given second five weeks of spring and taken with first-year medical students enrolled in course 410A.) Course not intended for veterinary or medical students.—III. (III.)

### 298. Advanced Group Study (1-5)

Prerequisite: consent of instructor.

### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional Courses

### 404. Forensic Pathology (2)

Laboratory—3-10 hours. Prerequisite: medical student or consent of instructor. Systematic study of current forensic cases with emphasis on differential diagnosis, preservation of evidence, and medical-legal procedures. Introduction to histopathologic diagnosis, ballistics, and toxicology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

### 405. Brain Cutting Conference (1-4)

Seminar—1-4 hours. Prerequisite: third- and fourth-year medical students or consent of instructor. Current specimens are sectioned, discussed, and clinical correlations proposed. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ellis

### 407. Advanced Neuropathology (1-12)

Discussion and laboratory. Prerequisite: consent of instructor. Study of pathologic reaction in human central and peripheral nervous systems and skeletal muscle by microscopic, light and electron microscopic examination of current and archival material. Discussions of clinical correlations and current medical literature. Individualized experience in neuropathologic techniques. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ellis

### 410A. General Pathology (2)

Lecture—4 hours; laboratory/discussion—4 hours. Prerequisite: approval of Committee on Student Progress. Pathophysiologic mechanisms of human disease. Gross organ and microscopic materials are utilized to illustrate morphology and concepts. (P/F grading only.)—III. (III.) Gandour-Edwards, Jensen

### 410B. Systemic Pathology (1.5)

Lecture—8 hours; laboratory/discussion—12 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Concepts of general pathologic processes, i.e., cell death, inflammation and neoplasia in the context of specific organ systems and human diseases in a clinical context. (Deferred grading only, pending completion of sequence. P/F grading only.)—IV. Gandour-Edwards, Jensen

### 410C. Systemic Pathology (2)

Lecture—1 hour; discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include hematopathology, gynecologic pathology, endocrine pathology, and musculoskeletal pathology. (Deferred grading only, pending completion of sequence. P/F grading only.)—I. Gandour-Edwards, Jensen

### 410D. Systemic Pathology (2.5)

Lecture—1 hour; discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Course content closely parallels concurrent clinical courses with integration of lectures and discussions sections. Topics include gastrointestinal pathology, hepatopathology, nutritional pathology. (Deferred grading only, pending completion of sequence. P/F grading only.)—II. Gandour-Edwards, Jensen

### 410E. Systemic Pathology (1)

Lecture—1 hour; discussion—2 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Course content closely parallels concurrent clinical courses with integration of lectures and discussion sections. Topics include molecular pathology, cardiac pathology, renal pathology, pulmonary pathology, neuropathology, pathology of the lower urinary tract. (P/F grading only.)—III. Gandour-Edwards, Jensen

### 464. Anatomic Pathology (3-12)

Clinical activity—40 hours. Prerequisite: third- or fourth-year medical student or consent of instructor. Anatomic pathology with an emphasis in surgical pathology and application to clinical practice. Specimen grossing, frozen sections, microscopic sign-out and conferences. Exposure to autopsy, cytopathology, hematopathology, and clinical pathology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ramsamooj

### 465. Applied Clinical Laboratory Medicine (6-9)

Clinical activity—full time (4-6 weeks). Prerequisite: consent of instructor. Emphasis upon laboratory techniques, procedures, and interpretation of laboratory results. Students will be expected to participate fully and in all laboratory operations including bench techniques, laboratory management and quality control. (H/P/F grading only.)—II, III, IV. (II, III, IV.) Kost

### 497T. Tutoring in Pathology (1-5)

Tutoring—3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)

### 498. Advanced Group Study (1-5)

Prerequisite: medical student and consent of instructor. Group study in variety of advanced topics in general, special, experimental, or comparative pathology. (H/P/F grading only.)

### 499. Research (1-18)

Prerequisite: medical student with consent of instructor. Research in experimental, molecular, comparative, and applied pathology. Limited enrollment. (H/P/F grading only.)

**Pediatrics (PED)****Upper Division Course****199. Special Study in Pediatric Research (1-5)**

Prerequisite: undergraduate student with consent of instructor based upon adequate preparation as determined by instructor. (P/NP grading only.)

**Graduate Course****299. Pediatric Research (1-12)**

Prerequisite: graduate students who are candidates for a degree in some area of biology or behavioral sciences; consent of instructor. (S/U grading only.)

**Professional Courses****401. Preceptorship in Pediatrics (2)**

Preceptorship—half time. Prerequisite: second-year medical student or first-year medical student with consent of instructor. Opportunity to observe and participate in primary medical care in a practicing pediatrician's office. Participation in history-taking and physical examination will be at discretion of preceptor and dependent on student's experience. Evaluation by student. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**402. Clinical Experience in Private Practice (1-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: third- or fourth-year medical student; course 430; consent of preceptor and Chairperson. Opportunity to participate in practice of preceptor, performing such tasks as history taking, physical examination, and patient management. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**430. Pediatric Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCDCMC and affiliated clinical sites. Rounds, conferences, student presentations ongoing. (H/P/F grading only.)—I, II, III, IV. Wold

**460A. Acting Internship: General Inpatient Pediatric Clerkship (6-18)**

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. The Ward Acting Intern functions in a manner similar to that of a pediatric intern. The Acting Intern takes admissions in the regular sequence and is expected to take night call. The Acting Intern can expect to manage between six and ten patients at a time. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Connors

**460B. Acting Internship: Outpatient Pediatrics (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Supervised experience in pediatric care on outpatient service at UCDCMC. Student functions as "Acting Intern" with appropriate supervision by residents and attending faculty. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**461. Elective in Hematology/Oncology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of hematologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ducore

**462. Elective in Pediatric Endocrinology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: completion of second-year study or the equivalent; consent of instructor. Inpatient and outpatient experience in diagnosis and management of endo-

crine disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**464. Acting Internship in Neonatology (6-18)**

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Diagnostic and therapeutic aspect of the medical and surgical high-risk neonate. Student expected to take night call. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Merritt

**465. Pediatric Specialty Clinic Elective (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Supervised experience in a variety of pediatric subspecialty clinics. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**466. Elective in Pediatric Cardiology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430. Inpatient and outpatient experience in diagnosis and management of cardiologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Parrish

**467. Elective in Pulmonary Medicine (3-18)**

Clinical activity—full time (2 to 12 weeks); daily rounds, two weekly half-day clinics. Prerequisite: pediatric clerkship. Inpatient and outpatient management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other forms of chronic pulmonary diseases as well as congenital abnormalities. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McDonald, Joad

**468. Elective in Pediatric Nephrology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of renal disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Makker

**469. Elective in Pediatric Infectious Disease (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and treatment of infectious disease of infants and children. Laboratory and clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Wenman

**470. Elective in Pediatric Neurology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430, Internal Medicine 430, Obstetrics and Gynecology 430, and Pediatrics 430 and consent of instructor. Inpatient and outpatient experience in diagnosis and management of neurological disorders in children. Students will also participate in other pediatric subspecialty clinics which serve children with neurological disorders. This course does not satisfy the fourth year neurology requirement. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Gospe

**471. Elective in Pediatric Gastroenterology (3-18)**

Clinical activity—full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of gastroenterology disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**472. Clinical Rotation in Adolescent Medicine (6)**

Clinical activity—39 hours; lecture—1 hour. Prerequisite: consent of instructor; fourth-year medical student. Under supervision, students will see patients in

the UCD clinic and at a number of community-based sites. Emphasis on the socially-mediated problems that face adolescents, including substance abuse, STD's, pregnancy, depression and suicide. One hour of lecture each week. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Wilkes

**476. Acting Internship in Pediatric Intensive Care (6-18)**

Clinical activity—full time (4 to 12 weeks). Prerequisite: completion of course 430 with grade of A or consent of instructor of record; letter of recommendation from Pediatrics faculty member. Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Dimand

**498. Directed Group Study (1-5)**

Variable—3-15 hours. Explore in-depth various topics in Pediatrics. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Li

**499. Research Topics in Pediatrics (1-18)**

Prerequisite: student in Medical School with consent of instructor. Individual research project in pediatric subspecialty areas (cardiology, endocrinology, hematology, metabolism, newborn physiology and others) may be arranged with faculty member. Independent research by student will be emphasized and long-term projects are possible. (H/P/F grading only.)

**Physical Medicine and Rehabilitation (PMR)****Upper Division Courses****100. Research Approaches to Disability and Rehabilitation (2)**

Lecture/discussion—2 hours. Discussion and evaluation of research approaches to medical rehabilitation, community integration, and quality of life of disabled persons, with a focus on the progressive disabilities associated with neuromuscular diseases. Intent is to encourage interest in professions that serve the disabled community and increase awareness of rehabilitation goals.—II. Devereaux

**198. Directed Group Study (1-5)**

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

**Graduate Course****299. Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**Professional Courses****440. Rehabilitation Medicine Clerkship (3)**

Clinical activity—full time (2 weeks). Prerequisite: third- or fourth-year medical student; approval by Committee on Student Evaluation and Promotion. Rehabilitation medicine and geriatrics relating to comprehensive care of the physically disabled and the physical medicine management of neurologic and musculoskeletal disorders. Physiological effects, indications and contraindications of the therapeutic modalities and their application to common musculoskeletal disorders. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McDonald

**461. Rehabilitation Medicine Clinical Elective (5-18)**

Clinical activity—full time. Prerequisite: completion of third year in Medical School; Internal Medicine 430, Surgery 430. Intended for non-UC medical students. Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Fourth-year student may function as acting intern on Physical Medicine and Rehabilitation service. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Kilmer

**462. Rehabilitation Medicine Clinical Elective (5-18)**

Clinical activity—full time. Prerequisite: Internal Medicine 430, Surgery 430; completion of third year in Medical School. Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Physical Medicine and Rehabilitation at off-campus facility must be approved by Chairperson. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Kilmer

**498. Advanced Group Study (1-5)**

Prerequisite: consent of instructor. Study and experience for medical students in any of a number of areas in physical medicine and rehabilitation. (H/P/F grading only.)

**499. Research for Medical Students (1-12)**

Prerequisite: consent of instructor. Research on any of a variety of topics in physical medicine and rehabilitation. (H/P/F grading only.)

**Plastic Surgery (PSU)****Professional Courses****460. Clinical Plastic Surgery Elective (1-18)**

Clinical activity—full time (approximately 40 hours per week). Prerequisite: third- or fourth-year medical students; Surgery 430; consent of instructor. Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Stevenson

**461. Dentistry for Future Physicians and Surgeons (6-8)**

Discussion/seminar—3 hours; laboratory—2 hours; clinical activity—full time (4-6 weeks). Prerequisite: third- or fourth-year medical students. General practitioners must recognize dental-related problems, have the ability to alleviate potential pain, and be able to refer these problems for further definitive evaluation and treatment. Students will have basic knowledge of dentistry; recognize potential dental problems; provide emergency care; have knowledge of where to refer these problems. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Thailer

**Psychiatry (PSY)****Upper Division Courses****198. Directed Group Study (1-5)**

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

**Graduate Courses****298. Directed Group Study For Graduate Students (1-5)**

Prerequisite: graduate standing and consent of instructor.

**299. Special Study for Graduate Students (1-12)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**Professional Courses****401. Medicine and the Mind: An Introduction to Psychiatry (2)**

Lecture/discussion—2.5 hours. Prerequisite: consent of Committee on Educational Progress. Concepts and clinical applications of psychiatry throughout the human life cycle. Biological, psychological, social, cultural and spiritual factors influencing health and illness. (P/F grading only.)—I. (I.) Servis

**403. Fundamentals of Clinical Psychiatry (3)**

Discussion—2 hours; lecture—3 hours. Prerequisite: approval of Committee on Student Progress. Psychiatric interviewing, Mental Status Exam and diagno-

sis. Major child and adult disorders, including substance abuse and dependence. Weekly student interviews of psychiatric patients in small group format. (P/F grading only.)—II. Leamon

**412. Psychiatry Grand Rounds (1)**

Lecture—1 hour. Prerequisite: medical students or staff or other qualified mental health professionals with consent of instructor. Weekly conference at UCDMC for presentation of selected clinical cases, presentation of lecture and research reports. (H/P/F grading only.)—II, III, IV. (II, III, IV.)

**413. Outpatient Psychiatry Clerkship (6-12)**

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of coordinator. Experience in clinical management/treatment of adult outpatients with psychiatric and substance abuse disorders; crisis management/intervention, evaluation/development of diagnosis and treatment plan; emphasis on outpatient psychopharmacology/brief psychotherapy; observation of group therapy. Individual supervision by faculty/residents. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**414. Psychosomatic Medicine Service (3-6)**

Clinical activity—32 hours; discussion—8 hours. Prerequisite: Psychiatry Clerkship or consent of instructor; for Medical Students only. A large university hospital service in which the student functions as a member of the team in evaluation, management and psychiatric liaison with other medical specialties. Intensive supervision from senior staff and psychiatric residents. May be repeated for credit two times. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Bourgeois, Ton

**415. Substance Abuse: Diagnosis and Treatment (3)**

Clinical activity—20 hours; independent study—15 hours; lecture/discussion—5 hours. Prerequisite: medical student with consent of instructor. Two-week selective offering supervised contact with patients addicted to alcohol, opioids, cannabis, or psychostimulants. Sites: Travis Air Force Base and regional Methadone and Alcohol Treatment Programs. Pharmacological, psychosocial, "12-step" and behavioral treatments will be demonstrated. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**416. Child Psychiatry Clerkship (6-12)**

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of instructor. Didactic and clinical inpatient, outpatient, and consultation-liaison experiences with children, adolescents and families. Clinical observations, diagnostic assessment, and treatment will be undertaken with close supervision. Literature review and case conferences presented on a regular basis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**417. Jail Psychiatric Clerkship (6-12)**

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of course coordinator. Students gain experience, under close faculty supervision, assessing acute and chronic mentally ill inmates in both inpatient and clinic settings. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**418. Off-Campus Clinical Experience (6 or 12)**

Clinical activity—full time (4 or 8 weeks). Prerequisite: fourth-year medical students; consent of instructor. Clinical or research elective in off-campus medical school or mental health setting. To be arranged with advance approval of instructor and individual in charge of off-campus setting. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**419. Group Psychotherapy (6)**

Clinical Activity—32 hours; discussion—8 hours. Prerequisite: psychiatry clerkship or consent of instructor of record. Senior medical students will rotate through a community mental health clinic with an extensive group psychotherapy program. Students will have opportunity to see patients individually, but the main emphasis will be to participate in

cutting edge group therapies. May be repeated two times for credit. For medical students only. (H/P/F grading only.)—I, II, III, IV. Ton

**420. Acting Internship in Psychiatry (6-12)**

Clinical activity—full time (4 to 8 weeks). Prerequisite: course 430 (Psychiatry Core Clerkship) and/or consent of course coordinator. Acting intern position with close faculty supervision with emphasis on biological psychiatry, psychopharmacology and psychodynamic aspects appropriate to diagnostic and long-term patient management. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**421. Combined Medicine-Psychiatry Clerkship (3-6)**

Clinical activity—32 hours; discussion—8 hours. Prerequisite: Psychiatry Clerkship or consent of instructor; for Medical Students only. Students will rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Internal Medicine/Family Practice Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients. May be repeated for credit two times. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McCarron, Onate, Ton

**422. Readings in Psychiatry (1-3)**

Readings/discussion—3-9 hours. Independent reading of a selected topic in psychiatry. Supervision and discussion with a psychiatry faculty member. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**430. Psychiatry Clinical Clerkship (12)**

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Assigned to clinical settings, students build upon the skills gained in preclinical years; emphasis on diagnostic, therapeutic and interpersonal skills. Areas of focus include patient management, interviewing skills, mental status exam, differential diagnosis, basic psychopharmacology, crisis assessment, intervention and case referrals. (H/P/F grading only.)—I, II, III, IV. Cox

**480. Insights in Psychiatry (1-3)**

Clinical activity—3-9 hours. Prerequisite: first- or second-year medical student in good academic standing; consent of instructor. On individual basis, student provided with an opportunity for gaining insight into various clinical activities in the practice of psychiatry. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Cox

**498. Directed Group Study (1-5)**

Prerequisite: consent of instructor. Approved for graduate degree credit. Medical students desiring to explore particular topics in depth. (H/P/F grading only for graduate or medical students.)

**499. Research (1-12)**

Prerequisite: consent of instructor. Approved for graduate degree credit. Individual research on selected topics or research projects. (H/P/F grading only for graduate or medical students.)

**Radiation Oncology (RON)****Upper Division Courses****190. Molecular and Cellular Radiation Biology Seminar (1)**

Lecture—1 hour. Topics in radiation biology and physics given by senior scientists. Focus on cellular response to ionizing radiation, radiation risk assessment, DNA damage and repair, and radiation dosimetry and imaging. May be repeated for credit when topic differs. (P/NP grading only.)—I, II, III. (I, II, III.) Lui, Vijayakumar

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Course****299. Independent Study and Research (1-12)**

Clinical activity—full time (2-8 weeks). Prerequisite: enrollment with Biomedical Engineering Group for Ph.D. candidacy and consent of Group Advisor and Sponsor. Research under supervision of Radiation

Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. degree. (S/U grading only.)—Kubo

## Professional Courses

### 420. Fundamentals of Radiobiology (1)

Lecture—3-4.5 hours; term paper. Prerequisite: Biological Sciences 1A, Mathematics 12, Physics 1A. Major topics in radiation biology. The experimental basis of our current understanding of therapeutic radiation to cancer and normal tissue; and the translation of basic radiobiologic knowledge into clinical usage. May be repeated twice for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Chen, Thelen

### 463. Radiation Oncology Clerkship (3-9)

Clinical activity—full time (2-6 weeks). Prerequisite: completion of Medical Sciences 430, 431; third-year clinical clerkship, consent of instructor required. Introduction to radiation oncology. Students will participate in workup and treatment planning for radiation oncology patients and will be introduced to the concepts involved in clinical radiation oncology, radiation biology, and radiation physics. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Ryu

### 498. Group Study in Therapeutic Radiology (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

### 499. Research in Radiobiology (3-12)

Clinical activity—full time (2-8 weeks). Prerequisite: consent of instructor. Laboratory investigation on selected topics involving response of biological molecules, cells, tissues or animals to ionizing radiation. (H/P/F grading only.)—Leigh

## Radiology—Diagnostic (RDI)

## Professional Courses

### 413. Radiological Diagnosis II (Physics of Diagnostic Radiology) (5)

Lecture—49 hours total; laboratory—6 hours total. Prerequisite: consent of instructor. Physics of diagnostic imaging; x-ray production and interaction; image formation; modulation transfer function; fluoroscopy; cine fluoroscopy; stereoscopy; xeroradiography; computerized and geometrical tomography; magnetic resonance and ultrasound. Principles of radiation protection in imaging will be covered. (H/P/F grading only.)—I. (I.) Seibert, Boone

### 414. Medical Radiation Biology (3)

Lecture—27 hours total. Prerequisite: consent of instructor. Medical radiation biology; molecular cellular and organ system response to acute and chronic irradiation; radiation carcinogenesis and genetic effects; radiation risk assessment; diagnostic ultrasound and magnetic resonance imaging health effects. Medical/legal considerations of radiation exposure. Offered in alternate years. (H/P/F grading only.)—III. Bushberg

### 461. Clinical Clerkship in Diagnostic Radiology (1-18)

Clinical activity—full time (3 days per unit). Prerequisite: completion of third year of Medical School; consent of instructor. Student works with radiologists at UC Medical Center in film reading sessions and radiological procedures; includes fluoroscopy, vascular radiology and special investigations. Includes daily individual teaching sessions with faculty radiologists, radiology learning laboratory, and all radiology conferences and seminars. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) McFall

### 462. Diagnostic Imaging of Acquired and Congenital Heart Disease (2)

Lecture/discussion—5 hours (for 3 weeks). Prerequisite: fourth-year medical student in good academic standing and course 461 (may be taken concurrently). Main emphasis on radiology of acquired and congenital heart disease, but also on magnetic

resonance, nuclear medicine, and echocardiography of heart diseases. (H/P/F grading only.)—III. (III.) Bogren

### 498. Group Study in Diagnostic Radiology (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

### 499. Research in Diagnostic Radiology (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

## Radiology—Nuclear Medicine (RNU)

## Upper Division Courses

### 198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

## Graduate Course

### 299. Research: Special Study for Graduate Students (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Professional Courses

### 401. Biomedical Radiochemistry (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: open to graduate and medical students; consent of instructor. Approved for graduate degree credit. Course is designed to combine basic nuclear physics, chemistry, and biology into a comprehensive and vigorous lecture-laboratory experience in biomedical nuclear chemistry. Subjects include choice and purification of appropriate gamma and beta radioisotopes, compounding biological pharmacodynamics and radioimmunoassay. (H/P/F grading only.)—III. (III.)

### 411. Radiological Physics I (Physics of Nuclear Medicine) (5)

Lecture—43 hours total; laboratory—12 hours total. Prerequisite: consent of instructor. Physics of diagnostic and therapeutic nuclear medicine, nuclear physics, radioactive decay; interaction of ionizing radiation; dosimeters; attenuation; internal and external dosimetry; health physics; radiation detection and imaging, scintillation cameras, computerized planar and tomographic imaging. Offered at UC Davis Medical Center. Offered in alternate years. (H/P/F grading only.)—(I.) Bushberg, Vera

### 463. Clinical Clerkship in Nuclear Medicine (3-8)

Clinical Activity—full time (2-6 weeks). Prerequisite: satisfactory completion of second-year medical school; Radiology—Diagnostic 461 recommended; consent of instructor. Clerkship correlates radioisotopic methods with clinical, pathophysiological, and other diagnostic aspects of the patient's care. Each patient reviewed with student by faculty member. Reading assignments, informal projects, and research techniques available. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Shelton

### 498. Group Study in Nuclear Medicine (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

### 499. Research in Nuclear Medicine (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

## Surgery (SUR)

## Upper Division Courses

### 192. Internship in General Surgery (1-12)

Internship—3-36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in general surgery and related fields. (P/NP grading only.)

### 199. Special Study in General Surgery for Advanced Undergraduates (1-5)

Prerequisite: advanced undergraduate student with consent of instructor. (P/NP grading only.)

## Graduate Course

### 299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Professional Courses

### 430. Surgery Clerkship (12)

Clinical activity—45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCDCMC. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.)—I, II, III, IV. Owings

### 460A. Clinical Surgical Elective (6-18)

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Rotation through Surgery Specialty Clinics: Vascular, GI, GU, Thoracic, Plastic, Radiotherapy. Student works up one new and two return visit patients. Presents consult to on-site faculty. Weekly review with preceptor and course director. Reading assignments to add perspective for in-depth discussions. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Follette

### 461. Surgery Burn Unit Clerkship (6 or 9)

Clinical activity—full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Externship in the eight-bed Burn Unit, and the 80 bed Shriners Hospital for Children. Principles of critical care, fluid and electrolyte resuscitation and management of surgical wounds in both adults and children. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

### 462. Surgery Trauma Service Clerkship (6 or 9)

Clinical activity—full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student works as an extern on one of the two general surgery Trauma teams, participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on, and 24 hours off. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

### 463. Surgery Intensive Care Unit (6 or 9)

Clinical activity—full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student participates in direct supervision of critically ill surgical patients in a twelve-bed surgery ICU. Each student is closely supervised. Provides in-depth experience with management of critically ill patients. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

### 464. General Surgery Clerkship: Kaiser Hospital (6 or 9)

Clinical activity—full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student participates with University residents on the teaching services at Kaiser Hospital, Sacramento. Opportunity to see larger number of practical, general surgical problems and participate in their care. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**467. Surgical Oncology (3-9)**

Clinical activity—full time (2 to 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Students actively participate in management of patients requiring surgery for cancer, endocrine disease and selected general surgical problems. Cases include malignant melanoma, sarcomas, gastrointestinal cancer, head and neck pathology, and metastatic malignancies. Attending rounds daily. Four teaching conferences weekly. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**468. Cardiothoracic Surgery Clerkship (6-9)**

Clinical activity—full time (4 to 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student works as an extern on the Cardiothoracic Surgical Service, participating in perioperative management and operations on the heart, lungs, mediastinum, and other thoracic structures. Regularly scheduled teaching conferences are conducted. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Benfield

**469. Trauma Service: East Bay (6-9)**

Clinical activity—full time. Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430 and Internal Medicine 430. Student works as an extern on the Trauma Service at Highland General Hospital (Oakland) participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on and 24 hours off. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**470. General Surgery: East Bay (6-9)**

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Student will work as an extern on one of the two general surgery services and participate in the pre-operative evaluation, intra-operative management, and post-operative care of surgical patients. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Organ

**471. Gastrointestinal Surgery (3-9)**

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430. Student participates on the GI Surgery Service, working under the immediate supervision of the faculty and surgical housestaff, involving the full spectrum of gastrointestinal diseases performed by the medical student. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Wolfe

**472. Vascular Surgery (3-9)**

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430. Student participates on the vascular surgery service and in the management and operations of arterial and venous system, exclusive of diseases that require cardiopulmonary bypass for treatment. Includes patient care responsibilities with appropriate supervision. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Holcroft

**473. Surgical Intensive Care Unit—East Bay (6-9)**

Clinical activity—full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430 and Internal Medicine 430. Externship on surgical ICU service, clinical management of critically ill patients in the SICU, ICU procedures with appropriate supervision. An eight-lecture didactic series. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Organ

**474. Breast Disease (6)**

Clinical activity—full time (4 weeks). Prerequisite: third-year surgery clerkship, Medical Sciences 430. Students focus on aspects of benign and malignant breast disease working in the surgical oncology clinics, observing needle localization procedures, following patients to the O.R., working with radiologists in mammography, working in hematology-oncology clinics, and with pathologists review-

ing histology. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Goodnight

**475. Pediatric Surgery (6-9)**

Clinical activity—full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Care of patients with neonatal congenital surgical problems. Fluid and electrolyte management in infants. General experience with acquired surgical diseases in children. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Marr, Clifford

**476. Surgical Consult Service (6-9)**

Clinical activity—full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Students function as acting interns working in parallel with the interns on the service. They consult on all non-trauma patients in the emergency room and on the wards and also participate in the operating room. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Blaisdell

**477. Clinically Oriented Anatomy (3)**

Clinical activity—40 hours. Prerequisite: completion of three years of medical school. Anatomy of selected regions of the body using cadaver dissection, prosections and interactive CD-ROMs. Anatomical relationships relevant to common surgical procedures. Surgical and interventional radiology procedures. (H/P/F grading only.)—II. Khatri, Kumari

**478. Surgical Preceptorship: Off Campus (6-18)**

Clinical activity—full time. Prerequisite: fourth-year medical student and consent of instructor. Student participates in the preoperative, operative and post-operative care of surgical patients under the supervision of attending staff. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Holcroft

**480. Insights in Surgery (1-3)**

Clinical activity—3 to 9 hours. Prerequisite: medical student in good academic standing and consent of instructor. Individualized activities, including ward rounds, subspecialty clinics and conferences, grand rounds, and observation of a variety of surgical procedures. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**494H. Fourth-Year Surgical Honors Program (18)**

Prerequisite: completion of third year of medical school with superior performance on course 430; consent of instructor. To provide intensive and comprehensive training in surgery to students interested in a postgraduate surgical career, that would enable them to succeed during the internship and residency training. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Holcroft

**498. Group Study (1-5)**

Prerequisite: medical student; consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**499. Laboratory Research (1-12)**

Laboratory—3-36 hours. Prerequisite: completion of second year of medical school; consent of instructor. Laboratory research on surgically related problems. Participation in projects to include the following: burn, nutrition, oncology, transplant and others. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.)

**Urology (URO)**

**Upper Division Course**

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)—deVere White

**Professional Courses**

**400. Office Urology (1)**

Clinical activity—4 hours in afternoons (6 weeks). Prerequisite: fourth-year medical students with consent of instructor. Introduction to ambulatory care of

urologic patients including basic therapeutic and diagnostic procedures from case material referred to private clinic. Management of urinary tract infection will be emphasized. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Low

**460. Urology Clinical Clerkship (5-18)**

Clinical activity—full time. Prerequisite: second-year medical student; physical diagnosis or the equivalent; consent of instructor. Clinical experience in diagnosis and treatment of urologic disease. Student will work closely with house staff, participate in conferences and surgery, and perform initial patient evaluation on new patients. May be repeated for credit. Limited enrollment. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Low

**461. Externship in Urology (5-18)**

Clinical activity—full time. Prerequisite: fourth-year medical students with consent of instructor. Under supervision, student acting as intern will assume full inpatient responsibility including admission history, physical examination, management of hospitalization, and participate in surgical procedures, outpatient clinic and learning diagnostic and therapeutic procedures. May be repeated for credit. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Low

**499. Research in Urology (1-12)**

Research—3-36 hours. Prerequisite: medical or veterinary medical students with consent of instructor. Research in oncology, male infertility, urodynamic, neurogenic bladder. Unique opportunity to apply recent technologies (nuclear medicine resonance, flow cytometry, recombinant DNA) in investigation, diagnosis and treatment of GU cancer, infectious disease, male infertility and development of genitourinary bioprosthesis. (H/P/F grading only.)—I, II, III, IV. (I, II, III, IV.) Low

## The Major Program

The Major in Medieval and Early Modern Studies examines the intellectual, political, and cultural forces that shaped modern European civilization during the period from the end of Ancient Rome (fifth century) to the beginning of the Enlightenment (mid-eighteenth century). An interdisciplinary and interdepartmental program, the major includes studies in history, art, philosophy, literature, drama, music, national languages, religion, rhetoric, and political theory.

**The Program.** The major requires interdisciplinary work, while allowing the student to focus on the early Middle Ages, the High Middle Ages, the Renaissance, or the Baroque. The series of Medieval and Early Modern courses in the program provides the foundation for the major and prepares students for advanced work within the individual disciplines. On the upper-division level, students may choose course work in specific areas of History, Comparative Literature, English, French, German, Italian, Spanish, and Latin, philosophy and religion, arts and language, and political thought. In addition, each student may elect to complete a senior thesis on a selected aspect of Medieval and/or Early Modern culture.

**Career Alternatives.** The major in Medieval and Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

## Medieval and Early Modern Studies

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter ..... 24

Medieval Studies 20A, 20B, 20C ..... 12  
Three additional courses chosen from: Art 1B, 1C; Comparative Literature 2, 10A, 10B, 10C, 10D, 10E; English 46A; German 47, 48; History 4A, 4B; Humanities 1\*, 9; Philosophy 21, 22 ..... 12  
Language proficiency is a desideratum.  
Courses in Latin and other European languages are strongly recommended, particularly for students planning to pursue graduate studies in the medieval or early modern field.

#### Depth Subject Matter ..... 44

In consultation with the undergraduate adviser, students select a total of eleven courses from the following disciplines with at least three courses each from the Medieval and Early Modern periods.  
Art History 178A, 178B, 178C, 179B, 190B, 190C  
Classics 110  
Comparative Literature 139, 164A, 164B, 164C, 166A, 180\*  
Dramatic Art 156A  
English 111, 113A, 113B, 115, 117A, 117B, 117C, 118, 122, 150A, 153\*, 165\*, 185A\*, 188\*, 189\*  
French 115, 116, 117A, 118B, 141\*  
German 101A, 112\*, 117, 120, 121, 122A, 122B, 124\*, 131, 134\*, 140, 160, 165, 166, 167  
History 102B, 102D, 121A, 121B, 121C, 122, 125, 130A, 130B, 131A, 131B, 132, 135, 136, 139A, 144A, 148A, 151A, 151B  
History and Philosophy of Science 130A  
Italian 105, 112, 113, 114, 115A, 115B, 115C, 115D, 118, 139B, 140, 141  
Latin 101, 102, 103, 104, 105, 106, 108, 109, 112, 114, 115, 116, 125  
Medieval Studies 120A, 120B, 120D, 120E, 130A, 130B, 190  
Music 121\*, 124A, 124B  
Philosophy 105, 132, 145, 190\*  
Political Science 115, 116, 118A  
Religious Studies 102, 115, 130\*, 142  
Spanish 130, 132N, 133N, 134N, 142\*  
Dramatic Art 156A

### Total Units for the Major ..... 68

\* Prior approval by Undergraduate Adviser necessary.

**Major Adviser.** K. Roddy

### Minor Program Requirements:

#### Medieval and Early Modern Studies..... 24

The minor in Medieval and Early Modern Studies is a coherent program of interdisciplinary study. Medieval Studies units may be taken in one or more of the traditional fields of concentration, including art, history, literature, music, national languages, philosophy, political theory, and religious studies. Courses must be upper-division with at least two courses each from the Medieval and Early Modern periods. Students may also select a minor with a thematic emphasis.

Although there is no foreign language requirement for the minor, knowledge of Latin or a modern European language is recommended.

The minor must be designed in consultation with the Undergraduate Adviser.

**Minor Adviser.** K. Roddy

### Courses in Medieval Studies (MST)

#### Lower Division Courses

##### 20A. Early Medieval Culture (4)

Lecture—3 hours; discussion—1 hour. Readings (in translation) in early medieval culture, such as the *Codes of Justinian*, the *Confessions of Saint Augustine*, *The Consolation of Philosophy* of Boethius, *Beowulf*, the *Nibelungenlied*, and *The Song of Roland*. GE credit: ArtHum, Wrt.—I. (I.) Roddy

##### 20B. The Culture of the High Middle Ages (4)

Lecture—3 hours; discussion—1 hour. Readings (in translation) in the culture of the high Middle Ages, such as the *Summa Theologica* of Thomas Aquinas, *The Chronicles of Froissart*, *The Canterbury Tales* of Chaucer, and *The Divine Comedy* of Dante. GE credit: ArtHum, Wrt.—(II.) Roddy

##### 20C. The Late Medieval and Early Modern Period (4)

Lecture—3 hours; discussion—1 hour. The great transformations that created the modern world: Constitutional Government, the Hundred Years' War, the Black Death, and the Peasants' Revolts, the Renaissance, Reformation and Counter-Reformation, and the Baroque. GE credit: ArtHum, Wrt.—II

##### 98. Directed Group Study (1-5)

(P/NP grading only.)

##### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division Courses

#### 120A-E. The Medieval World (4)

Lecture—3 hours; discussion—1 hour; term paper. Course deals with selected themes from the Middle Ages: the Fall of Rome to the beginning of the Renaissance. Subjects will vary from year to year and cover such topics as (A) The Monastic Orders; (B) Origins of Universities; (D) Family and Society; (E) Chivalry. GE credit for 120A or 120D or 120E: ArtHum, Wrt.—III.

#### 121. Jewish/Christian/Islamic Relations 700-1400 (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing; one course from the 20 series recommended. Examination of the relationships among Islam, Judaism, and Christianity between 700-1400. Topics include politics, geography and travel, architecture and art, philosophy, science, theology, mysticism, and literature. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

#### 130A. Special Themes in Medieval Cultures (4)

Lecture—3 hours; discussion—1 hour. Each offering concentrates on an interdisciplinary aspect of medieval culture in the Middle East and Europe: the idea

of the hero, mysticism, urban development. Extensive readings focused on medieval source material. May be repeated for credit. GE credit: ArtHum, Wrt.

#### 130B. Special Themes in Renaissance Culture (4)

Lecture—3 hours; discussion—1 hour. Each theme illuminates an interdisciplinary aspect of Renaissance culture in the eastern and western hemispheres: exploration, medical pathology, daily life, baroque culture. Immersion in source material from 1500-1650. May be repeated for credit. GE credit: ArtHum, Wrt.

#### 190. Senior Thesis (4)

Seminar—4 hours. Prerequisite: senior standing and major in Medieval Studies. Preparation of a research paper dealing with a selected aspect of medieval culture, under supervision of three members of the Committee in Charge.—I, II, III. (I, II, III.)

#### 197T. Tutoring in Medieval Studies (1-4)

Seminar—2 hours. Prerequisite: courses 20A and 20B; upper division standing; consent of instructor and chairperson of curriculum committee. Tutoring in Medieval Studies 20A and 20B, including leadership in small discussion groups affiliated with the course. May be repeated for credit for a total of 6 units. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

(P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Faculty

#### Primary Section Members

Stanley W. Artz, Ph.D., Professor  
Wolf-Dietrich Heyer, Ph.D., Professor  
Neil Hunter, Ph.D., Assistant Professor  
Michele M. Igo, Ph.D., Associate Professor  
Stephen C. Kowalczykowski, Ph.D., Distinguished Professor  
Su-Ju Lin, Ph.D., Assistant Professor  
John C. Meeks, Ph.D., Professor  
Douglas C. Nelson, Ph.D., Professor  
Rebecca Parales, Ph.D., Associate Professor  
Martin L. Privalsky, Ph.D., Professor  
John R. Roth, Ph.D., Distinguished Professor  
Kazuhiro Shiozaki, Ph.D., Associate Professor  
Mitchell H. Singer, Ph.D., Associate Professor  
Valley J. Stewart, Ph.D., Professor  
Mark L. Wheelis, Ph.D., Senior Lecture

#### Secondary Section Members

Sean Burgess, Ph.D., Assistant Professor  
Jodi Nunnari, Ph.D., Associate Professor

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Socio-Cultural Diversity; Wrt=Writing Experience

Ted Powers, Ph.D., Assistant Professor  
 Irwin H. Segel, Ph.D., Professor

### Emeriti Faculty

Paul Baumann, Ph.D., Professor Emeritus  
 Robert E. Hungate, Ph.D., Professor Emeritus  
 John L. Ingraham, Ph.D., Professor Emeritus  
 JaRue S. Manning, Ph.D., Professor Emeritus  
 Allen G. Marr, Ph.D., Professor Emeritus  
 David Pratt, Ph.D., Professor Emeritus  
 Merna R. Villarejo, Ph.D., Professor Emerita

### Affiliated Faculty

Karen L. Gerhart, Ph.D., Lecturer  
 Eric D. Mann, Ph.D., Lecturer

### The Major Program

Microbiology is the branch of biology that deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology and molecular genetics, and spawned the new industry of biotechnology.

**The Program.** Both undergraduate major programs provide a balance of studies in microbiology, with appropriate courses in mathematics and physical sciences. The A.B. degree program emphasizes the biology of bacteria, while the B.S. degree program includes more biochemistry and related course work. Either program, with judicious course selection, is appropriate for students contemplating a career in medicine or various allied health professions including medical technology, or teaching. The B.S. program is especially well suited for students who want a professional career in microbiology, or who wish to pursue graduate education in a biological science discipline. The choice of a major program and its suitability for particular career options should be discussed with a major adviser.

**Career Alternatives.** A bachelor's degree in microbiology is excellent preparation for a career in biotechnology, pharmacology, agriculture, and the food industry. It also provides a strong background for students wishing to continue on to professional studies in medicine and the other health sciences.

### A.B. Major Requirements:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>43-57</b>
Biological Sciences 1A-1B-1C.....	15
Chemistry 2A-2B.....	10
Chemistry 8A-8B or 118A-118B-118C.....	6-12
Mathematics 16A-16B, 17A-17B or 21A-21B.....	6-8
Physics 1A-1B or 7A-7B-7C.....	6-12

### Depth Subject Matter ..... 37-45

Biological Sciences 101, 102, 103.....	10
Microbiology 102, 102L, 105, 105L, 140.....	16
Microbiology 162 or Pathology, Microbiology, and Immunology 128.....	3-4
Three additional courses from Food Science and Technology 104; Medical Microbiology 115, 116, 130; Microbiology 100, 120, 150, 155L, 160, 170; Molecular and Cellular Biology 120L; Pathology, Microbiology, and Immunology 127; Plant Pathology 120, 130, 148, 150; Soil Science 111; Statistics 100, 102.....	8-15

### Total Units for the Major ..... 80-102

### B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>60-70</b>

Biological Sciences 1A-1B-1C.....	15
Chemistry 2A-2B-2C.....	15
Chemistry 8A-8B or 118A-118B-118C.....	6-12
Mathematics 16A-16B-16C or 17A-17B-17C.....	9-12
Physics 7A-7B-7C.....	12
Statistics 13, 32, 100 or 102.....	3-4

### Depth Subject Matter ..... 47-51

Biological Sciences 101, 102, 103, 104.....	13
Molecular and Cellular Biology 120L.....	6
Microbiology 102, 102L, 105, 105L.....	13
Two courses from Microbiology 140, 150, or 170.....	6
Microbiology 162 or Pathology, Microbiology, and Immunology 128.....	3-4
Two courses from Food Science and Technology 104; Microbiology 120, 140, 150, 155L, 160, 170, Pathology, Microbiology, and Immunology 127; Soil Science 111.....	6-9

### Total Units for the Major ..... 107-121

**Master Adviser.** M.L. Wheelis in 2033D Sciences Lab Building

**Honors and Honors Program.** M.L. Wheelis

**Teaching Credential Subject Representative.** M.L. Wheelis, see the Teaching Credential/M.A. Program on page 102.

**Graduate Study.** The Graduate Group in Microbiology offers programs of study and research leading to the M.S. and Ph.D. degrees.

Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate adviser or the Chairperson of the Group.

**Related Courses.** The offerings of the Section of Microbiology are augmented by courses and faculty of Evolution and Ecology; Food Science and Technology; Land, Air, and Water Resources; Medical Microbiology; Medicine and Epidemiology; Molecular and Cellular Biology; Pathology, Microbiology, and Immunology; Plant Biology; Plant Pathology; Viticulture and Enology.

Faculty of the Section of Microbiology also teach or participate in the following courses: Biological Sciences 1A, 10, 101 and 104.

### Courses in Microbiology (MIC)

#### Lower Division Courses

##### 10. Natural History of Infectious Diseases (3)

Lecture—3 hours. Topics in the natural history of infectious diseases principally affecting humans. Introduction to infectious microbial agents, ecology, epidemiology, and induction of disease. Focus on diseases of a contemporary nature. For students not majoring in the biological sciences. GE credit: Sci-Eng.—II. (II.)

##### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

##### 99. Special Study for Undergraduates (1-5) (P/NP grading only.)

#### Upper Division Courses

##### 100. Chemical and Biological Weapons (3)

Lecture/discussion—3 hours. Prerequisite: upper division standing. Ancient and modern history of chemical and biological weapons; mechanism of action; tactical and strategic uses; riot-control agents; international legal constraints; disarmament and nonproliferation; genomics and the future. GE credit: SciEng or SocSci.—II. (II.) Wheelis

##### 102. General Bacteriology (4)

Lecture—4 hours. Prerequisite: Biological Sciences 1A and Chemistry 8B or Chemistry 118B (may be taken concurrently). Survey of the biology of bacteria and viruses, including bacterial structure, metabolism, physiology, genetics, and evolution; viral structure and replication; the role of bacteria in global element cycles; and the role of microbes in infectious disease.—I, II, III. (I, II, III.)

##### 102L. General Bacteriology Laboratory (3)

Lecture/laboratory—7 hours. Prerequisite: course 102 (may be taken concurrently) and consent of instructor. Introduction to principles and laboratory methods employed in working with microorganisms. For students planning to continue the study of microbiology or to use microorganisms as tools for the study of genetics and biochemistry.—I, II, III.

##### 105. Bacterial Diversity (3)

Lecture—3 hours. Prerequisite: consent of instructor; courses 102 and 102L; Biological Sciences 102; Biological Sciences 103 recommended. Survey of the major groups of bacteria emphasizing diversity of energy metabolism, morphology and natural history. Not open for credit to students who completed course 105 in 2005 or earlier.—II. (II.) Parales, Wheelis

##### 105L. Bacterial Diversity Laboratory (3)

Laboratory—9 hours. Prerequisite: consent of instructor; courses 102 and 102L; course 105 (may be taken concurrently); Biological Sciences 102; Biological Sciences 103 recommended. Laboratory—nine hours (eight hours scheduled lab periods; one hour during open laboratory). Isolation and characterization of bacterial strains from various habitats. Includes methods for determination of evolutionary relationships among groups. Not open for credit to students who completed course 105 in 2005 or earlier.—II. (II.) Nelson, Parales

##### 120. Microbial Ecology (3)

Lecture—3 hours. Prerequisite: course 105, Biological Sciences 102. Interactions between non-pathogenic microorganisms and their environment, emphasizing physiological and metabolic characteristics of various groups and their adaptation to and modification of specific habitats.—III. (III.) Wheelis

##### 120L. Microbial Ecology Laboratory (2)

Laboratory—6 hours; one optional overnight weekend field trip. Prerequisite: course 120 (may be taken concurrently); consent of instructor. Study of prokaryotic microorganisms from certain habitats. One-half of laboratory effort will consist of organized experiments on ecologically important microbial activities. For remaining one-half, research projects will be done on student selected specific habitats of microorganisms. Limited enrollment. Not offered every year.

##### 140. Bacterial Physiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103 (may be taken concurrently); course 102 recommended (may be taken concurrently). Fundamentals of bacterial growth and bacterial responses to environmental stresses. Topics will include carbon and nitrogen regulation, growth rate control, post-exponential growth, and motility and chemotaxis. Not open for credit to students who have completed course 130A.—I. (I.) Singer, Meeks

##### 150. Bacterial Genetics (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, Biological Sciences 103 or course 140; course 102 recommended (may be taken concurrently). Molecular genetics of enterobacteria and their viruses. Isolation of mutants; genetic exchange and mapping; complementation; suppression; transposons; gene expression and regulation; and genomics. Examples illustrate applications to molecular cloning of recombinant DNA, and to the study of bacterial pathogenesis.—II. Roth, Stewart

##### 155L. Bacterial Physiology Lab (4)

Lecture/discussion—1 hour; laboratory—8 hours. Prerequisite: course 140 or 150, 102L, consent of instructor. Physiology and genetics of bacteria. Isolation and characterization of mutant strains. Mapping

of mutations by conjugation and transduction studies of control of enzyme synthesis by induction, repression, and catabolite repression.—III. Singer

**160. Bacterial Regulatory Mechanisms (3)**

Lecture—3 hours. Prerequisite: course 140 or 150 recommended. Fundamentals of bacterial regulatory mechanisms. Topics will include control of DNA, RNA, and protein synthesis, global regulatory mechanisms, recombination, DNA repair systems, and cell cycle control with emphasis on bacterial systems. Not open for credit to students who have taken course 130B. (Former course 130B.) Not offered every year.

**162. General Virology (4)**

Lecture—4 hours. Prerequisite: Biological Sciences 1A, 102. Integrated presentation of the nature of animal, bacterial, and plant viruses, including their structure, replication and genetics.—II. (II.) Manning, Falk

**170. Yeast Molecular Genetics (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101 and 102; course 102 or 140 (may be taken concurrently) strongly recommended. Survey of the genetics, cell biology and technologies in yeasts and related lower eukaryotes. Topics include diversity of yeasts; cell structure; metabolism; cell cycle; genetic approaches and genomics; gene expression; yeasts as models to study higher eukaryotes; and contemporary techniques.—III. (III.) Shiozaki

**190C. Undergraduate Research Conference (1)**

Discussion—1 hour. Prerequisite: upper division standing and consent of instructor, course 199 concurrently. Presentation and critical discussion of staff research activities: designed for advanced undergraduate students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**192. Internship (1-12)**

Internship—3-36 hours. Technical and/or professional experience on or off campus. Supervised by a member of the Microbiology Section faculty. (P/NP grading only.)

**194H. Microbiology Honors Research (2)**

Independent study—6 hours. Prerequisite: senior standing; eligibility for college honors; completion of six units of 199 in microbiology; consent of section. Continuation of an individual microbiological research project culminating in writing of a senior thesis under a faculty director. (P/NP grading only.)

**197T. Tutoring in Microbiology (1-12)**

Prerequisite: upper division standing and consent of instructor. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****200A. Biology of Prokaryotes (3)**

Lecture—3 hours. Prerequisite: course 102 or the equivalent. Intended for first year graduate students in microbiology and closely related fields. Overview of prokaryotic biology, with emphasis on phylogeny, physiology, and diversity of bacteria.—I. (I.)

**200B. Advanced Bacteriology (3)**

Lecture—3 hours. Prerequisite: course 200A. Intended for first year graduate students in microbiology and closely related fields. Advanced topics in phylogeny, physiology, and diversity of bacteria. Not offered every year.—II.

**201L. Advanced Microbiology Laboratory Rotations (5)**

Laboratory—15 hours. Prerequisite: course 200A (may be taken concurrently). Two five-week assignments in microbiology research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated twice for credit.—I, II. (I, II.)

**210. Molecular Mechanisms in Microbial Pathogenesis (3)**

Lecture—3 hours. Prerequisite: course 105 or Veterinary Microbiology 127 and course 162 or Veterinary Microbiology 128 or the equivalent. Study of the molecular mechanisms involved in cytopathogenesis of higher eukaryotic organisms. Emphasis on the alteration or inhibition of cellular metabolism and function by bacteria and animal viruses. Not offered every year.

**215. Recombinant DNA (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103 or the equivalent. Application of recombinant DNA technology to modern problems in biology, biochemistry, and genetics, emphasizing molecular cloning strategies, choice of vectors, preparation of insert DNA, and selection procedures.—I. (I.) Privalsky

**250. Biology of Yeasts (5)**

Lecture—3 hours; discussion—2 hours. Prerequisite: Biological Sciences 102, 103; course 102, 102L; course 215 recommended. Survey of the genetics, physiology, metabolism, regulatory mechanisms, structure, cell biology, ecology and diversity of yeasts and related organisms. Offered in alternate years.—II. (II.) Bisson

**260. Bacterial Genetic Regulatory Mechanisms (3)**

Lecture/discussion—3 hours. Prerequisite: general knowledge of nucleic acid biochemistry and bacterial genetics. Analysis at the molecular level of genetic regulation in selected bacterial systems. Specific systems discussed will include the following types of regulation: control of transcription initiation and termination; translational controls; tRNA modification effects; autoregulation; control circuits in bacterial viruses; supercontrols. Not offered every year.

**262. Advanced General and Molecular Virology (3)**

Lecture—3 hours. Prerequisite: graduate standing. Advanced integrated presentation of animal, bacterial, and plant viruses, including their structure, modes of regulation, expression and replication, and effects on host cells and organisms.—(III.) Bruening

**263. Principles of Protein-Nucleic Acid Interactions (3)**

Lecture—3 hours. Prerequisite: advanced graduate standing and completion of one year of basic graduate course work in biochemistry, biophysics, chemistry, genetics, microbiology, or molecular biology. Physical basis of protein-nucleic acid interaction. Topics include nucleic acid recognition by proteins, thermodynamics of protein-nucleic acid stability, and kinetics of binding process for both non-specific and sequence-specific nucleic acid binding proteins. Emphasis on systems that represent paradigms in protein-nucleic acid interactions. Not offered every year.

**274. Seminar in Genetic Recombination (1)**

Seminar—1 hour. Prerequisite: graduate standing; consent of instructor. Biochemical and genetic aspects of genetic recombination in prokaryotes and eukaryotes. Mechanisms of recombination and biochemical and genetic characteristics of recombination proteins. Proteins include DNA strand exchange, DNA helicases, and Holliday junction resolving proteins. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Kowalczykowski

**275. Seminar in DNA Repair and Recombination (1)**

Seminar—1 hour. Prerequisite: consent of instructor; graduate standing in Microbiology or closely related field. Review and discussion of current research and

literature in DNA repair and recombination with presentations by individual students and invited speakers. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Heyer

**290C. Advanced Research Conference (1)**

Discussion/conference—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Selected Topics in Microbiology (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Current progress in microbiology and cellular and molecular biology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**292. Seminar in Bacterial Physiology and Genetics (1)**

Seminar—1 hour. Prerequisite: consent of instructor, graduate standing in microbiology or closely related field. Review and discussion of current research and literature in bacterial physiology and genetics, with presentations by individual students. (S/U grading only.)—I, II, III. (I, II, III.)

**296. Seminar in Animal Virology (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Discussion of current topics in animal virology. (Same course as Pathology, Microbiology, and Immunology 292A.) May be repeated for credit. (S/U grading only.)—II. Manning

**298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Microbiology (A Graduate Group)

Linda F. Bisson, Ph.D., Chairperson of the Group

**Group Office.** 3143 Tupper Hall (Medical Microbiology and Immunology)  
(530) 752-0262

**Faculty**

Stanley W. Artz, Ph.D., Professor (*Microbiology*)

Enoch P. Baldwin, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)

Peter A. Barry, Ph.D., Assistant Professor  
(*Comparative Medicine*)

Stephen W. Barthold, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)

Nicole Baumgarth, Ph.D., Associate Professor  
(*Center for Comparative Medicine*)

Andreas Baumber, Ph.D., Professor,  
(*Medical Microbiology and Immunology*)

Blaine L. Beaman, Ph.D., Professor  
(*Medical Microbiology and Immunology*)

Charles L. Bevins, Ph.D., Professor  
(*Medical Microbiology and Immunology*)

Linda F. Bisson, Ph.D., Professor  
(*Viticulture and Enology*)

Aaron Brault, Ph.D., Assistant Professor  
(*Pathology, Microbiology, and Immunology*)

George E. Bruening, Ph.D., Professor  
(*Plant Pathology*)

Sean M. Burgess, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)

Barbara A. Byrne, Ph.D., Assistant Professor  
(*Pathology, Microbiology, and Immunology*)

Robert D. Cardiff, Ph.D., Professor  
(*Medical Pathology*)

Carol Cardona, Ph.D., Assistant Professor  
(*Veterinary Medicine*)  
R. Holland Cheng, Ph.D., Professor  
(*Molecular and Cellular Biology*)  
Anthony T. W. Cheung, Ph.D., Professor  
(*Medical Pathology*)  
Bruno B. Chomel, Ph.D., Professor  
(*Population Health and Reproduction*)  
Ronald Y. Chuang, Ph.D., Professor  
(*Medical Pharmacology and Toxicology*)  
Dean O. Cliver, Ph.D., Professor  
(*Population Health and Reproduction*)  
Patricia A. Conrad, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
James S. Cullor, Ph.D., Associate Professor  
(*Population Health and Reproduction*)  
Michael E. Dahmus, Ph.D., Professor  
(*Molecular and Cellular Biology*)  
Satya Dandekar, Ph.D., Professor  
(*Medical Microbiology and Immunology*)  
Angela Gelli, Ph.D., Assistant Professor  
(*Pharmacology and Toxicology*)  
Laurel J. Gershwin, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
M. Eric Gershwin, Ph.D., Professor (*Rheumatology*)  
Ronald P. Hedrick, Ph.D., Professor  
(*Medicine and Epidemiology*)  
John W. B. Hershey, Ph.D., Professor  
(*Biological Chemistry*)  
Wolf-Dietrich Heyer, Ph.D., Professor (*Microbiology*)  
Michael J. Holland, Ph.D., Professor  
(*Biological Chemistry*)  
Neil Hunter, Ph.D., Assistant Professor  
(*Microbiology*)  
Michele M. Igo, Ph.D., Associate Professor  
(*Microbiology*)  
Kenneth B. Kaplan, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)  
Stephen C. Kowalczykowski, Ph.D., Professor  
(*Microbiology*)  
Hsing-Jien Kung, Ph.D., Professor  
(*Biological Chemistry*)  
Rance B. Lefebvre, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Patrick S. C. Leung, Ph.D., Associate Adjunct  
Professor (*Internal Medicine*)  
Su-Ju Lin, Ph.D., Assistant Professor (*Microbiology*)  
Paul Luciw, Ph.D., Associate Professor  
(*Medical Pathology*)  
Shirley Luckhart, Ph.D., Associate Professor  
(*Medical Microbiology and Immunology*)  
JaRue S. Manning, Ph.D., Professor (*Microbiology*)  
Karen A. McDonald, Ph.D., Professor  
(*Chemical Engineering and Material Science*)  
John C. Meeks, Ph.D., Professor (*Microbiology*)  
Christopher J. Miller, Ph.D., Associate Professor  
(*Pathology, Microbiology, and Immunology*)  
David A. Mills, Ph.D., Assistant Professor  
(*Viticulture and Enology*)  
Douglas C. Nelson, Ph.D., Professor (*Microbiology*)  
Thomas W. North, Ph.D., Professor  
(*Center for Comparative Medicine*)  
Jodi Nunnari, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)  
David M. Ogrzydziak, Ph.D., Professor  
(*Food Science and Technology*)  
Bennie I. Osburn, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Demosthenes Pappagianis, Ph.D., Professor  
(*Medical Microbiology and Immunology*)  
Rebecca E. Parales, Ph.D., Assistant Professor  
(*Microbiology*)  
Niels C. Pedersen, Ph.D., Professor  
(*Medicine and Epidemiology*)  
Claire Pomeroy, Ph.D., Professor  
(*Medicine and Infectious Diseases*)  
Edmund R. Powers, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)  
Martin L. Privalsky, Ph.D., Professor (*Microbiology*)  
Kathryn Radke, Ph.D., Associate Professor  
(*Animal Science*)  
Gary H. Rhodes, Ph.D., Associate Adjunct Professor  
(*Pathology*)  
John R. Roth, Ph.D., Professor (*Microbiology*)  
Dewey D. Y. Ryu, Ph.D., Professor  
(*Chemical Engineering and Material Science*)

Michael A. Savageau, Ph.D., Professor  
(*Biomedical Engineering*)  
Jonathan Scholey, Ph.D., Professor  
(*Molecular and Cellular Biology*)  
Kate M. Scow, Ph.D., Associate Professor  
(*Land, Air, and Water Resources*)  
Irwin H. Segel, Ph.D., Professor  
(*Molecular and Cellular Biology*)  
Barbara L. Shacklett, Ph.D., Assistant Professor  
(*Medical Microbiology and Immunology*)  
Kazuhiro Shiozaki, Ph.D., Assistant Professor  
(*Microbiology*)  
Mitchell H. Singer, Ph.D., Associate Professor  
(*Microbiology*)  
Jay V. Solnick, Ph.D., Assistant Professor  
(*Internal Medicine*)  
Henning Stahlberg, Ph.D., Assistant Professor  
(*Molecular and Cellular Biology*)  
Jeffrey L. Stott, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Michael Syvanen, Ph.D., Professor  
(*Medical Microbiology and Immunology*)  
Jose V. Torres, Ph.D., Assistant Professor  
(*Medical Microbiology and Immunology*)  
Renee Tsois, Ph.D., Assistant Professor  
(*Medical Microbiology and Immunology*)  
Stefan Wuerz, Ph.D., Professor  
(*Civil and Environmental Engineering*)  
Tilahun D. Yilma, Ph.D., Professor  
(*Pathology, Microbiology, and Immunology*)  
Glenn M. Young, Ph.D., Assistant Professor  
(*Food Science and Technology*)

### Affiliated Faculty

Marta L. Marthas, Ph.D., Assistant Adjunct Professor  
(*California Regional Primate Research Center*)  
Earl T. Sawai, Ph.D., Assistant Adjunct Professor  
(*Medical Pathology*)  
Ellen E. Sparger, Ph.D., Adjunct Professor (*Medicine  
and Epidemiology*)

**Graduate Study.** The Graduate Group in Microbiology offers study and research leading to the M.S. and Ph.D. degrees. Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate adviser or the Chairperson of the Group.

**Graduate Advisers.** P. Barry (*Center for Comparative Medicine*), L.F. Bisson (*Viticulture and Enology*), K.L. Radke (*Animal Science*), R.E. Parales (*Microbiology*), K. Shiozaki (*Microbiology*), E.E. Sparger (*Vet Med: Medicine*)

### Courses in Microbiology (MIB)

#### Graduate Courses

**290C. Advanced Research Conference (1)**  
Discussion/conference—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**299. Research (1-12)**  
Research under the guidance of dissertation committee. (S/U grading only.)

## Middle East/South Asia Studies

(College of Letters and Science)

The Program in Middle East/South Asia Studies takes an interdisciplinary approach to the study of this important world area. Participating faculty are drawn from a variety of departments and programs, including Anthropology, Asian American Studies,

Comparative Literature, English, History, Religious Studies and Women and Gender Studies.

The minor in Middle East/South Asia Studies offers students a unique opportunity to study exchanges, complementarities, and correspondences in the region in religion, family structures, gender relations, media, literature and film, history, anthropology, law, political economy, international relations, development, diasporas, urbanism, and other themes.

### Minor Program Requirements:

UNITS

#### Middle East/South Asia Studies .....20-24

Middle East and South Asian Studies  
100 ..... 4  
Choose one course from Anthropology 142;  
Comparative Literature 166; History 190A,  
190B, 190C, 193A, 193B; Religious Studies  
160, 162; Women's Studies 178A,  
184 ..... 4  
Choose one course from Anthropology 145;  
History 102Q, 196A, 196B; Geography  
126; Religious Studies 168, 170; Women's  
Studies 178B ..... 4  
Additional Electives from Core Course list  
(below) ..... 8-12  
Core Course List: Anthropology 142, 145;  
Comparative Literature 166; History 102Q,  
190A, 190B, 190C, 193A, 193B, 196A,  
196B; Geography 126; Middle East and  
South Asian Studies 180, 192, 198, 199;  
Religious Studies 160, 162, 168, 170;  
Women's Studies 178A, 178B, 184

Note: With prior consultation with an adviser, students can petition the Program Committee in advance to accept other elective courses toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

Note: With prior consultation with an adviser, students can petition the Program Committee to accept more than four units of Middle East and South Asian Studies 192, 198, and/or 199 towards the minor program.

**Minor Adviser.** Consult the Department of Anthropology in 330 Young Hall, (530) 752-0745 or 0746.

### Courses in Arabic (ARB)

#### Lower Division Courses

##### 2. Elementary Arabic 2 (5)

Lecture/discussion—5 hours. Prerequisite: course 1 or with instructor's consent after student takes all components of the course 1 final exam. Continues introduction to basic Arabic from course 1. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic and limited use of spoken Egyptian and/or one other colloquial dialect.—II. (II.) Sharlet

##### 3. Elementary Arabic 3 (5)

Lecture/discussion—5 hours. Prerequisite: course 1 and 2 or with consent of instructor after taking all components of the final exam for course 1 and 2. Continues introduction to basic Arabic from courses 1 and 2. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic with limited use of spoken Egyptian and/or one other colloquial dialect.—III. (III.) Sharlet

##### 21. Intermediate Arabic 21 (5)

Lecture/discussion—5 hours. Prerequisite: course 1, 2, 3 or with consent of instructor after taking all parts of course 3 final exam. Builds on courses 1, 2, and 3. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect.—I. (I.) Sharlet

**22. Intermediate Arabic 22 (5)**

Lecture/discussion—5 hours. Prerequisite: course 21 or with consent of instructor after taking all parts of course final 21 exam. Continues from course 21. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect.—II. (II.) Sharlet

**23. Intermediate Arabic 23 (5)**

Lecture/discussion—5 hours. Prerequisite: course 22 or with consent of instructor after completing all parts of the final exams for courses 21 and 22. Continues from courses 21 and 22. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect.—III. (III.) Sharlet

**Courses in Hindi (HIN)****Lower Division Courses****1. Elementary Hindi/Urdu I (5)**

Lecture/discussion—5 hours. An introduction to Hindi and Urdu in which students will learn vocabulary and grammar in both Devanagari and Urdu scripts, and will practice skills in reading, writing, speaking and listening.—I. (I.)

**2. Elementary Hindi/Urdu II (5)**

Lecture/discussion—5 hours. Prerequisite: course 1. An introduction to Hindi and Urdu in which students will learn vocabulary and grammar in both Devanagari and Urdu scripts, and will practice skills in reading, writing, speaking and listening.—II. (II.)

**3. Elementary Hindi/Urdu III (5)**

Lecture/discussion—5 hours. Prerequisite: course 2. An introduction to Hindi and Urdu in which students will learn vocabulary and grammar in both Devanagari and Urdu scripts, and will practice skills in reading, writing, speaking and listening.—III. (III.)

**21. Intermediate Hindi/Urdu (5)**

Lecture/discussion—5 hours. Prerequisite: course 3. An intermediate level course for students who have completed Elementary Hindi/Urdu or the equivalent. Students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu.—I. (I.)

**22. Intermediate Hindi/Urdu II (5)**

Lecture/discussion—5 hours. Prerequisite: course 21. An intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu.—II. (II.)

**23. Intermediate Hindi/Urdu III (5)**

Lecture/discussion—5 hours. Prerequisite: course 22. An intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu.—III. (III.)

**Courses in Middle East and South Asian Studies (MSA)****Upper Division Courses****100. Middle East and South Asia: Comparative Perspectives (4)**

Lecture—3 hours; extensive writing. Ethnographic and historical points of intersection and divergence in various aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies. Anthropological, historical, and theoretical debates surrounding the region. GE credit: ArtHum, Div, Wrt.—I, II, III. (I, II, III.)

**180. Topics in Middle East and South Asian Studies (4)**

Lecture—3 hours; extensive writing. Comparative perspective on the Middle East and South Asia. Topics may include modernity, religious traditions, colonialism, subalternity and social movements, gender and sexuality, history and memory, science and development, ritual and performance, public culture, diasporas. May be repeated one time for credit. GE credit: ArtHum, Div, Wrt.—I, II, III. (I, II, III.)

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: course 100. Supervised internship on and off campus in the area of Middle East and South Asia Studies. May be repeated for up to 12 units of credit. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: course 100. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: course 100. (P/NP grading only.)

## Military Science

(College of Letters and Science)

**Reserve Officers' Training Corps (ROTC), Army**

Mark W. Connelly, Lt. Col., Chairperson of the Department, Professor of Military Science

**Department Office.** 125 Hickey Gymnasium (530) 752-5211

**Faculty**

Major Mark VavRosky, Associate Professor  
Major Russell Meyer, Assistant Professor  
Captain Jason D. Hioco, Assistant Professor

**Program of Study**

The Military Science Department offers hands-on training in management and leadership. The program stresses the following Army Values: loyalty, duty, respect, selfless-service, honor, integrity, and personal courage. The program also stresses leadership dimensions as taught in the classes. Also stressed are current events, national and international politics, military affairs, ethics training, and human relations with emphasis on eliminating racial and gender discrimination. Management and leadership are taught using the U.S. Army as a model. Military skills (such as drill and ceremonies, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. Students learn by doing. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The department offers two program tracks: (1) a purely academic track; (2) a pre-commissioning track for those desiring a commission in the U.S. Army. The academic track entails no obligation to the military and is open to all students. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the pre-commissioning process. Activities for all students include the Ranger Club (a club designed for adventure activities such as rappelling, white-water rafting, orienteering, and patrolling) and intramural sports teams.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extra-curricular activities designed to enhance their leadership and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students participating in the upper division pre-commissioning program incur a military obligation. See below for details. Extra-curricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

**Department Programs**

Students are enrolled in Military Science under one of two programs.

**Four-Year Program**

There is no military obligation associated with attendance in lower division courses. Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately because of their military service experience, upon approval by the Department Chairperson.

Juniors receive \$450 subsistence per month, and Seniors \$500 per month, after executing a contract agreeing to complete the courses. During the course, all Military Science text books, uniforms and equipment are provided without cost. Students are given leadership development experience at Leader Development and Assessment Course (Operation Warrior Forge) between their third and fourth years of the course. Emphasis is on individual participation, leadership development and the capability to function effectively in positions of significant responsibility.

**Two-Year Program**

The two-year program is for students, including graduate students, who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer program, Leaders Training Course (LTC) which is voluntary and carries no military obligation. Applicants are paid and transportation costs covered. Applications are accepted at anytime prior to the student's junior year; graduate students are also accepted. All other provisions explained above for the upper division course apply to the two-year program.

**Scholarship Program**

The U.S. Army offers four-, three-, and two-year Active Duty scholarships, two-year Reserve Forces Duty, and two-year Dedicated National Guard scholarships to students planning to attend or attending UC Davis. The U.S. Army ROTC scholarship package pays tuition and educational fees. Also included in all scholarships is a flat rate of \$900 per year for textbooks.

The Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. There are three cycles available for submission of the four-year scholarship application. As high school seniors, students compete for the Regular Cycle scholarship by submitting their complete application. Interested applicants should apply at <http://www.monroe.army.mil> or contact UC Davis, Department of Military Science at (530) 752-7682.

The three-year Active Duty and two-year Reserve Forces Duty scholarships are awarded to college students who are already attending UC Davis or transferring from a junior college to UC Davis. Students apply for and are awarded these Army scholarships through the Military Science Department.

**Leadership Laboratory**

During the course of the school year, two hours per week are spent conducting practical exercises. Classes emphasize adventure activities including offense, defense and patrolling techniques, weapons familiarization, rappelling, rope bridging, obstacle courses, leadership reaction course, and land navigation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at Warrior Forge, held at Fort Lewis, Washington.

**Academic Credit**

**College of Agricultural and Environmental Sciences.** The Bachelor of Science degree in agriculture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.

**College of Engineering.** Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unre-

stricted elective units available in the curriculum being followed.

**College of Letters and Science.** The Bachelor of Arts degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.

**School of Veterinary Medicine.** The number of Military Science units acceptable toward the Bachelor of Science degree in Veterinary Medicine is on an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree may apply for direct commission in the United States Army Veterinary Corps.

## Courses in Military Science (MSC)

### Lower Division Courses

#### 11. Roles and Organization of the U.S. Army (1)

Lecture—1 hour. Prerequisite: lower division standing. Constitutional and legal basis of the Army, organization and strategic roles in times of war and peace, and "total Army" concept. Impact of civil-military relations and Soviet military power on role of Army studied in context of current problems.—I. (I.)

#### 12. Introduction to Military Leadership (2)

Lecture—2 hours. Prerequisite: lower division standing, and consent of instructor. Introduction to leadership theories used in military organizations. Course surveys the duties and responsibilities of junior Army officers, the general environment in which they work, and leadership roles performed. Introduces military map reading skills.—I. (I.)

#### 13. Introduction to Basic Military Operations (1)

Lecture—1 hour. Prerequisite: lower division standing. Basic military tactical theories and their application at the individual and squad level. Course introduces military tactical operations, and covers military first aid. Principles of war as introduced in course 11 are applied to offensive and defensive tactics.—III. (III.)

#### 14A. Introduction to Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing and consent of instructor; completion of all previous laboratories. Personal and organizational leadership skills introduced in leadership laboratory. Extensive supervised leadership experiences conducted in a military environment. Basic military skills necessary to function in a leadership role are also covered. (P/NP grading only.)—I. (I.)

#### 14B. Introduction to Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing and consent of instructor; completion of all previous laboratories. Development of leadership and military skills introduced in course 14A is continued with emphasis on the individual's role in the squad, the basic organizational element of the Army. As students gain capabilities, supervisory controls are reduced. (P/NP grading only.)—II. (II.)

#### 14C. Introduction to Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing and consent of instructor; completion of all previous laboratories. Students demonstrate skill levels required for promotion to non-commissioned officer level. Use of chain of command from company through individual levels emphasized. Interrelationship of squad and platoon organizations is explored. (P/NP grading only.)—III. (III.)

#### 21. Military History (2)

Lecture—2 hours. Prerequisite: lower division standing; course 11 or consent of instructor. Survey of military history from 1900 to present, focusing on World War I, World War II, the Korean War, and the Vietnam War.—III. (III.)

#### 22A. Intermediate Military Leadership and Operations I (2)

Lecture—2 hours. Prerequisite: lower division standing; course 12 or consent of instructor. Develops and exercises personal military leadership skills in exten-

sive supervised leadership laboratories. Intermediate level military skills necessary for leadership roles as junior non-commissioned officers are developed. Students perform in role of junior non-commissioned officers.—I. (I.)

#### 22B. Intermediate Military Leadership and Operations II (2)

Lecture—2 hours. Prerequisite: lower division standing; course 22A or consent of instructor. Continuation of course 22A. Individual leadership traits identified in course 22A are studied in more depth enabling each student to improve on targeted weaknesses. Instruction is presented in intermediate defensive tactics at the squad level.—II. (II.)

#### 24A. Individual Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing; courses 14A, 14B, 14C and 21, or consent of instructor. Develops and exercises personal military leadership skills in extensive supervised leadership laboratories. Intermediate level military skills necessary for leadership roles as junior non-commissioned officers are developed. Students perform in role of junior non-commissioned officers. (P/NP grading only.)—I. (I.)

#### 24B. Individual Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing; courses 14A, 14B, 14C and 21, or consent of instructor. Personal supervisory and leadership styles are developed in a supervised laboratory environment. Students are rotated through squad and team-level supervisory positions, given responsibility concomitant with positions. (P/NP grading only.)—II. (II.)

#### 24C. Individual Military Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: lower division standing; courses 14A, 14B, 14C and 21, or consent of instructor. Students are prepared for transition from junior leader to senior non-commissioned officer. Chain of command and hierarchical responsibilities and reporting requirements are demonstrated in a laboratory setting. (P/NP grading only.)—III. (III.)

### Upper Division Courses

#### 131. Advanced Military Leadership and Management (2)

Lecture—2 hours. Prerequisite: upper division standing; course 22A or consent of instructor. Course addresses different types of power and influence a military leader may use, reviews counseling techniques, and introduces basic management skills. Instruction provided on the various branches in which a commissioned officer may serve.—III. (III.)

#### 132A. Advanced Military Operations (2)

Lecture—2 hours. Prerequisite: upper division standing; course 22B or consent of instructor. First phase of advanced military tactical operations. Advanced work on topographical maps, navigation, and orienteering techniques. Instruction is also provided on resource planning techniques and military intelligence.—I. (I.)

#### 132B. Advanced Military Operations (2)

Lecture—2 hours. Prerequisite: upper division standing; course 132A or consent of instructor. Continuation of course 132A. Military tactical theories and their application in offense and defense are presented at the platoon and company level. Course covers in-depth analysis of the principles of war related to offensive and defensive operations.—II. (II.)

#### 134A. Military Organizational Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 24A-24B-24C or consent of instructor. Students develop interpersonal and management skills by practical application of leadership of military organizations in a supervised leadership laboratory. Advanced-level military skills presented. Students fulfill the roles of senior non-commissioned officers. (P/NP grading only.)—I. (I.)

#### 134B. Military Organizational Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 24A-24B-24C or consent of instructor. As more complex material is presented in classroom, the laboratory environment becomes more challenging. Students serve as senior non-commissioned officers in squad, platoon and company levels, given appropriate authority and responsibility. (P/NP grading only.)—II. (II.)

#### 134C. Military Organizational Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 24A-24B-24C or consent of instructor. Students prepared for advanced summer training experience by extensive requirements to plan, organize and conduct military operations in field environments; individual leadership potential is closely assessed in the laboratory environment. (P/NP grading only.)—III. (III.)

#### 141. U.S. Army Management Systems (2)

Lecture—2 hours. Prerequisite: upper division standing and course 131. Army decision making, personnel and equipment management. Includes command and staff functions, training, intelligence gathering, techniques for the conduct of meetings, and logistics management procedures at unit level.—III. (III.)

#### 142. Military Law (2)

Lecture—2 hours. Prerequisite: upper division standing and course 141. Analysis of the American Military Justice System, the Uniform Code of Military Justice, the Hague and Geneva Conventions, and customary law of war. Includes detailed study of selected procedures of military justice system.—II. (II.)

#### 143. Military Ethics and Professionalism (2)

Lecture—2 hours. Prerequisite: upper division standing and course 142. Profession of arms, its characteristics, uniqueness, roles, and responsibilities. Discussion topics include the professional soldier's responsibilities to the Army and the Nation, and the need for ethical conduct. Case studies are used to develop ethical decision making skills.—I. (I.)

#### 144A. Military Training Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 134A, 134B, 134C, and 141. Develops and exercises the leadership skills necessary to plan, coordinate and conduct a training program through practical application under supervision. Emphasis on analysis of objectives, instructor planning, media utilization and evaluation of learning. Students perform as cadet officers. (P/NP grading only.)—I. (I.)

#### 144B. Military Training Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 134A, 134B, 134C, and 141. Requirements for training of all other levels of the cadet corps are given to students for conduct in laboratory environment (under supervision). Students placed in realistic role of junior officer with appropriate level of responsibility. Students perform as cadet staff officers. (P/NP grading only.)—II. (II.)

#### 144C. Military Training Leadership Skills (0.5)

Laboratory—2 hours. Prerequisite: upper division standing; courses 134A, 134B, 134C, 141. Final laboratory in military science sequence; students are prepared for final testing and certification prior to commissioning as officers. Students will demonstrate all leadership skills necessary to commissioned officers. Students perform leadership tasks at platoon, company, and battalion levels. (P/NP grading only.)—III. (III.)

#### 191. Special Studies in Military Science (2)

Independent study—6 hours. Prerequisite: consent of department chair, and courses 131, 132A, 132B, 141, 142, 143. Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, principles of war, air-land battle imperatives, military strat-

egy, the operational art and professional ethics, May be repeated twice for credit when topic differs. (P/NP grading only.)

### Aerospace Studies (Air Force)

The Air Force Reserve Officer's Training Corps (AFROTC) is an educational program providing training in leadership, management, communications and military proficiency on college and university campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and enter the active duty forces after you complete a bachelor's or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.

The program is normally four years long, but a flexible design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participation. Until you accept a scholarship or enter your junior year of the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.

UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacramento campus.

#### Qualifications

Freshmen/Sophomore applicants must:

- Be full-time college students in good academic standing
- Have good moral character
- Be in strong physical condition
- Be at least 14 years old

Additionally, Juniors/Seniors/Scholarship recipients must:

- Be United States citizens or in the process of applying for citizenship
- Be 18 years old (or 17 years old with consent of parent or guardian)
- Pass the Air Force Officer Qualifying Test
- Pass a medical examination
- Be under the age of 30 at time of graduation (may be waived)

#### Scholarships

Opportunities for four-year and three-year undergraduate scholarships are better than ever. Scholarships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes \$150 monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local AFROTC detachments for a scholarship application. Applications are also available from local Air Force recruiters or your high school guidance counselors.

All scholarships are merit-based and consider a variety of factors: cumulative GPA, class standing, SAT/ACT scores, academic awards/achievements, leadership ability, athletic involvement, extracurricular activities, community service and letters of recommendation. All scholarship recipients must graduate and be commissioned before their 27th birthday (may be waived for prior military personnel). A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registration. The program is available at more than 700 universities and colleges nationwide.

If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and two-year full tuition scholarships are available for all academic majors, especially sci-

entific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for nontechnical majors are slightly higher. Applicants are primarily evaluated on their leadership ability and academic performance. Scholarship boards meet throughout the year for scientific and technical majors and in July for all academic majors. Scholarships also include a \$150 monthly stipend throughout the school year, required books and fees. Other loans and grants may be used towards room and board costs.

#### Challenging Careers

All commissioned officers enter the Air Force as second lieutenants for a 4-year active duty service commitment. Pilots and navigators serve longer commitments, based on training requirements. Once on active duty, you'll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 fighter, supervising 150 aircraft maintainers on the flightline, or caring for sick personnel in the emergency room, you will be rewarded knowing that you are making a difference.

### AFROTC at UC Berkeley

AFROTC Detachment 85  
176 Hearst Gym, Berkeley, CA, 94720-3610  
(800) 852-5747 or (510) 642-3572;  
[brown@uclink4.berkeley.edu](mailto:brown@uclink4.berkeley.edu);  
<http://airforcerotc.berkeley.edu>

To receive hands-on leadership and management practice, freshmen and sophomores take a one-hour academic course and a two-hour Leadership Laboratory each week; juniors and seniors take a three-hour course plus the lab. All units can be used as elective credit towards graduation. See the Military Sciences course listings in the UC Berkeley catalog. Classes are held during the fall and spring semesters and the curriculum includes the history of airpower, leadership and management topics, communication skills, and national security issues.

Between the sophomore and junior years, cadets compete to attend a four- or six-week field training program at a designated Air Force base. This competitive program consists of physical conditioning, outdoor survival training, career and aircraft orientations and an evaluation of leadership potential. Additional optional training opportunities are available during the summer months and include the Royal Air Force Exchange Program, Pentagon Internships, Jump School and Glider Training at the Air Force Academy, and summer job shadowing. Students are also encouraged to participate in optional orientation flights, base visits, and community service projects throughout the school year.

### AFROTC at CSU Sacramento

California State University Sacramento  
Public Service Building, Room 208  
6000 J Street  
Sacramento, CA 95819-6094  
(916) 278-7315

The CSUS Department of Aerospace Studies offers two-, three-, or four-year programs leading to a commission in the U.S. Air Force. About 30 percent of the corps commute to CSUS from UC Davis. All course work (12 or 16 semester units) is completed on the CSUS campus. Drills and courses are normally offered on Tuesdays, Wednesdays, and Thursdays. Field training is conducted at an active Air Force base during part of the summer, normally between the student's sophomore and junior years.

Upon completion of the program (integrated with UC Davis' quarter system) and all requirements for a bachelor's degree, cadets are commissioned as second lieutenants in the Air Force and serve a minimum of four years on active duty. Graduates who are qualified and are selected may enter pilot or navigator training after graduation, or serve in a specialty consistent with their academic major, indi-

vidual goals, and existing Air Force needs. Graduates may request a delay of entry to active duty to continue their education or may apply for Air Force sponsored graduate study to begin immediately upon entry to active duty. Due to firm scheduling requirements for the AFROTC program, students are encouraged to work closely with their academic advisers in planning their academic program.

AFROTC offers 3-year and 2-year scholarships to qualified students. Applications are accepted in any academic discipline. Express scholarships are currently available for qualified students majoring in electrical engineering and meteorology. Express scholarships pay up to \$15,000 annually in tuition and fees, \$480 per year in textbooks, and \$150 per month stipend.

Applications should normally be no later than the first quarter of a student's sophomore year. Juniors, seniors, and graduate students may also apply under certain conditions. Contact the Unit Admissions Officer in the Aerospace Studies Department at CSUS (916) 278-7315 for information.

### Naval ROTC

Department of Naval Science  
152 Hearst Gymnasium, UC Berkeley  
Berkeley, CA 94720-3640  
(510) 642-3551; <http://navyrotc.berkeley.edu>

UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student who satisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S.-Marine Corps or an Ensign in the U.S. Navy.

Navy option students take the following courses:

Freshman year:

- NS 1 Introduction to Naval Science
- NS 2 Sea Power and Maritime Affairs

Sophomore year:

- NS 3 Leadership and Management
- NS 10 Naval Ship Systems I

Junior year:

- NS 12A Navigation and Naval Operations I
- NS 12B Navigation and Naval Operations II

Senior year:

- NS 401 Naval Ship Systems II
- NS 412 Leadership and Ethics

In lieu of NS401, NS10, NS12A and NS12B, Marine Corps students participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of Warfare (or a designated equivalent).

Scholarship students are required to complete a number of other courses at Davis, including one year each of calculus, physics, and English, and one quarter each of computer science, and military history or national security policy.

Interested students should contact the Department of Naval Science at UC Berkeley at the address above to obtain information and apply.

The section of Molecular and Cellular Biology offers three major programs: Biochemistry and Molecular Biology, Cell Biology, and Genetics.

### The Biochemistry and Molecular Biology Major Program

The Biochemistry and Molecular Biology major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find this major a rewarding field of study.

**The Program.** The biochemistry and molecular biology program begins with the four-course, upper division common curriculum that provides an introduction to the principles of biochemistry, genetics, and cell biology. Majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper division courses in biochemistry and molecular biology examine detailed aspects of these subjects. Students are also required to take courses in other biological sciences and a full year of physical chemistry.

**Career Alternatives.** The biochemistry and molecular biology program provides a solid scientific background for students seeking a research, teaching, or service career in the life sciences. Positions are open to biochemists in bio-medical, biotechnological, pharmaceutical, agricultural research and chemical industries. Also, university-affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter.....54-58

Biological Sciences 1A-1B-1C..... 15  
 Chemistry 2A-2B-2C or 2AH-2BH-2CH... 15  
 Mathematics 16A-16B-16C, 17A-17B-17C or  
 21A-21B-21C.....9-12  
 Physics 7A-7B-7C..... 12  
 Statistics 13, 32, 100 (recommended) or  
 102 .....3-4

#### Depth Subject Matter .....53-54

Biological Sciences 101, 102, 103,  
 104 ..... 13  
 Chemistry 118A-118B-118C or 128A-  
 128B-128C, 129A-129B..... 12-13  
 Chemistry 107A-107B..... 6  
 Molecular and Cellular Biology 120L, 121,  
 123, 124 ..... 16  
 Restricted Electives ..... 6  
 6 units of upper division courses in  
 biological sciences or chemistry relevant to  
 the student's interest chosen in consultation  
 with the adviser. Students are encouraged  
 to obtain additional laboratory experience;  
 however, no more than 3 units of 192, 193  
 or 199 research may be counted toward  
 restricted elective units.

### Total Units for the Major .....107-112

**Master Adviser.** R.H. Doi

**Advising Center** for the major is located in 156  
 Briggs (530) 752-9032.

**Graduate Study.** See *Biochemistry and Molecular Biology (A Graduate Group)*, on page 156; and *Graduate Studies*, on page 97 in this catalog.

### The Cell Biology Major Program

The Cell Biology major program provides students with a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms.

**The Program.** To understand living organisms, the biologist must understand the cell. Hence, cell biology lies at the core of the biological sciences. Students taking this major gain a solid foundation in biological principles. The major emphasizes how cellular organization and function contribute to the development, maintenance and reproduction of adult organisms. The major illustrates the ways in which principles derived from the physical sciences, genetics, biochemistry, molecular biology and physiology are integrated in the study of living cells and emphasizes the experimental nature of the study of cell biology.

**Career Alternatives.** The major provides an excellent background for students wishing to enter postgraduate and professional programs in biological, health sciences or veterinary sciences; for students pursuing careers involving teaching or research in the biological sciences; for students interested in careers in the biotechnological or pharmaceutical industries; or for students interested in careers related to the administrative, legal or commercial aspects of biomedical science.

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter.....61-67

Biological Sciences 1A-1B-1C ..... 15  
 Chemistry 2A-2B-2C ..... 15  
 Mathematics 16A-16B-16C.....9  
 Physics 7A-7B-7C ..... 12  
 Statistics 13 or 100 (recommended).....4  
 Chemistry 8A-8B or 118A-118B-  
 118C .....6-12

#### Depth Subject Matter .....45-47

Biological Sciences 101, 102, 103,  
 104 ..... 13  
 Molecular and Cellular Biology 140L, 150,  
 150L .....9  
 Two courses from Molecular and Cellular  
 Biology 143, 144, or 145.....6  
 Molecular and Cellular Biology 121 or  
 161 .....3  
 One additional upper division laboratory  
 course from: Molecular and Cellular Biology  
 120L, 160L; Pathology, Microbiology, and  
 Immunology 126 and 126L ..... 4-6  
 Select at least 10 units from the following:  
 Chemistry 107A, 107B, 108; Molecular and  
 Cellular Biology 120L, 138, 142, 148, 158,  
 160L, 163, 178; Neurobiology, Physiology,  
 and Behavior 103; Pathology, Microbiology,  
 and Immunology 126, 126L; no more than 4  
 units of research (193, 194H, 199) can be  
 used for credit in this category ..... 10

### Total Units for the Major .....106-114

**Master Adviser.** D.G. Myles

**Advising Center** for the major is located in 156  
 Briggs (530) 752-0202.

### The Genetics Major Program

The Genetics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity, gene expression and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.

**Quarter Offered:** I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

**General Education (GE) credit:** ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

**The Program.** The genetics program begins with the four-course, upper division core curriculum that provides an introduction to the principles of genetics, biochemistry, and cell biology. Students then take additional upper division courses in specialized areas of modern genetics including gene expression, evolution, development, human genetics and genomics, as well as a laboratory course in the principles of genetics. Additional upper division courses in biological sciences, as well as internship/research coursework can be chosen to fulfill required elective units.

**Career Alternatives.** The genetics degree provides suitable preparation for a wide variety of careers, including teaching, research, work with biotechnology companies, medicine, and all the health sciences. It is also an excellent background for students wishing to continue their education in a graduate program, a teacher-training program, medical school, veterinary school, or other professional schools.

## B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter</b> ..... <b>57-66</b>	
Biological Sciences 1A-1B-1C.....	15
Chemistry 2A-2B-2C or 2AH-2BH-2CH .....	15
Chemistry 8A-8B or 118A-118B-118C .....	6-12
Mathematics 16A-16B-16C or 21A-21B-21C .....	9-12
Physics 7A-7B-7C.....	12

Two courses from Molecular and Cellular Biology 162, 163, 182 or Evolution and Ecology 102.....	6-7
Statistics 100.....	4
Restricted Electives.....	11
Upper division courses in genetics or other fields relevant to the student's interest chosen in consultation with the adviser. No more than 4 units of 192, 193, 198, or 199 can be used for credit in this category.	

**Total Units for the Major** ..... **105-115**

**Master Adviser.** J.E. Natzle

**Advising Center** for the major is located in 156 Briggs Hall (530) 752-0202.

**Graduate Study.** The Graduate Group in Genetics offers study and research leading to the M.S. and Ph.D. degrees in Genetics.

## Courses in Molecular and Cellular Biology (MCB)

### Lower Division Courses

#### 10. Introduction to Human Heredity (4)

Lecture—3 hours; discussion—1 hour. Topics in human heredity and human gene structure and function, including the genetic basis of human development, causes of birth defects, mental retardation, genetic diseases, sexual determination, development, and behavior. GE credit: SciEng.—III. (III.) Sanders

#### 99. Special Study (1-5)

Independent study—3-15 hours. Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

#### 120L. Biochemistry Laboratory (6)

Laboratory—10 hours; lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: Biological Sciences 103 (may be taken concurrently). Introduction to laboratory methods and procedures employed in studying biochemical processes. Designed for students who need experience in the use of biochemi-

cal techniques as laboratory tools.—I, II, III. (I, II, III.) Gasser, Hilt, J.C. Lagarias, L. Morand, Rubin, L. Segel

#### 121. Molecular Biology of Eukaryotic Cells (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101 and 103. Structure, expression, and regulation of eukaryotic genes. Chromosome structure and replication; gene structure, transcription, and RNA processing; protein synthesis and translation control; development, immune system, and oncogenes. Not open for credit to students who have completed Molecular and Cellular Biology 161.—II, III. (II, III.) Dahmus, Gasser, Harmer

#### 122. Structure and Function of Proteins (3)

Lecture—3 hours. Prerequisite: course 120L, Biological Sciences 103. Correlation of structure and biological function. Molecular models of enzymes that explain their physiological functioning. Physical and chemical methods used in determining protein structure. Function as measured by kinetic and binding models and as affected by physiological considerations.—I. Baldwin, Stahlberg

#### 123. Behavior and Analysis of Enzyme and Receptor Systems (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103. Introduction to the principles of enzyme kinetics and receptor-ligand interactions with emphasis on metabolic regulation and data analysis. Topics include simultaneous equilibria, chemical and steady-state kinetics, allosteric enzymes, multireactant systems, enzyme assays, membrane transport and computer-assisted simulations and analyses.—I, III. (I, III.) I. Segel, Wilson

#### 126. Plant Biochemistry (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C or the equivalent, and Biological Sciences 103. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as Plant Biology 126.)—III. (III.) Abel, Callis

#### 138. Undergraduate Seminar in Biochemistry (1)

Seminar—1 hour. Prerequisite: Biological Sciences 103. Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated twice for credit when topic differs. (P/NP grading only.)—I, II, III. (I, II, III.) Callis, Gasser, Kaplan, Scholey

#### 140L. Cell Biology Laboratory (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 104 (may be taken concurrently). Exercises illustrating the principles of cell biology with emphasis on light microscopy.—II. (II.) Nunnari

#### 142. Advanced Cell Biology: Contractile and Motile Systems (4)

Lecture—3 hours; term paper. Prerequisite: Biological Sciences 102, 104 (may be taken concurrently); Mathematics 16B. Advanced cell biology with emphasis on molecular, biophysical and cellular properties of contractile and motile systems.

#### 143. Cell Biophysics (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 103, 104. Physical principles underlying observations and mechanisms of cell motility. Organization of biomolecules into higher order subcellular structures that function as macromolecular machines. Examples include cytoskeletal filaments, polymer-motor systems, neurites, axonemes and mitotic spindles.—I. (I.) Scholey

#### 144. Mechanisms of Cell Division (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 104. The molecules and mechanisms that allow eukaryotic cells to coordinate cell growth, DNA replication, segregation of chromosomes and cell division.—II. (II.) McNally

#### 145. Assembly and Function of Cell Signaling Machinery (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101, 102, 104. Molecular basis of cell signaling, including positioning of cellular machinery, compo-

nents of various signaling pathways, and downstream effects of signaling on cell adhesion, cell differentiation, and programmed cell death.—III. (III.) Erickson

#### 148. Undergraduate Seminar in Cell Biology (2)

Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.)

#### 150. Embryology (4)

Lecture—4 hours. Prerequisite: Biological Sciences 101 and concurrent enrollment in course 150L. The events and mechanisms of embryonic development, including fertilization, morphogenesis, cell differentiation and organogenesis, with emphasis on vertebrates.—I, III. (I, III.) Armstrong, Edwards

#### 150L. Laboratory in Vertebrate Embryology (1)

Laboratory—3 hours. Prerequisite: concurrent enrollment in course 150. The comparative analysis of the embryonic development of vertebrates. (P/NP grading only.)—I, III. (I, III.) Edwards

#### 158. Undergraduate Seminar in Developmental Biology (2)

Seminar—2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.)

#### 160L. Principles of Genetics Laboratory (4)

Laboratory—6 hours; lecture—2 hours. Prerequisite: Biological Sciences 101. Laboratory work in basic and molecular genetics including gene mapping and isolation of mutants. Not open for credit to students who have completed Genetics 100L.—I, II, III. (I, II, III.) Britt, Burtis, Kiger, Kimbrell, Natzle, Rose, Sanders, Sundaresan

#### 161. Molecular Genetics (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101, Biological Sciences 102 may be taken concurrently. Molecular mechanisms for propagation and expression of the genome in eukaryotic and prokaryotic model organisms. How genetic and molecular tools, both classical and modern, are applied to the study of gene structure, function, and regulation. Not open for credit to students who have completed course 121.—II. (II.) Powers

#### 162. Human Genetics (3)

Lecture—3 hours. Prerequisite: course 161 (preferred) or 121, 164. Human molecular genetic variation, molecular basis of metabolic disorders, chromosome aberrations and consequences, analysis of the human genome, and computational techniques of genetic analysis.—I. (I.) Chedin

#### 163. Developmental Genetics (3)

Lecture—3 hours. Prerequisite: course 161 (preferred) or 121, course 164. Current aspects of development genetics. Historical background and current genetic approaches to the study of development of higher animals.—II. (II.) Natzle

#### 164. Advanced Eukaryotic Genetics (3)

Lecture—3 hours. Prerequisite: course 161 or 121. The five basic operations of genetic analysis: mutation, segregation, recombination, complementation, and regulation. Emphasis on the theory and practice of isolating and analyzing mutations, as well as understanding mechanisms underlying both Mendelian and epigenetic inheritance.—III. (III.) Burgess

#### 178. Undergraduate Seminar in Molecular Genetics (1)

Seminar—1 hour. Prerequisite: upper division standing, completion of Biological Sciences 101, course 160L, and completion or concurrent enrollment in course 161. Discussion of current topics in molecular genetics to show advanced applications of basic

principles and to highlight professional career opportunities. May be repeated for credit. (P/NP grading only.)—I, II, III, IV, V. Engebrecht, Rodriguez

### 182. Principles of Genomics (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101, course 121 or 161. Fundamentals of genomics, including structural genomics, functional genomics, proteomics, and bioinformatics, focusing on the impact of these disciplines on research in the biological sciences. Social impacts of genomic research.—III. (III.) Korf

### 190C. Undergraduate Research Conference (1)

Discussion—1 hour. Prerequisite: upper division standing and consent of instructor; concurrent enrollment in course 193 or 199. Presentation and discussion of current research by faculty and students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

### 191. Introduction to Research (1)

Seminar—1 hour. Prerequisite: Biological Sciences 102 (may be taken concurrently) or consent of instructor. Various topics in molecular and cellular biology including biochemistry, genetics, and cell biology will be discussed, along with ways undergraduates can participate in research projects of faculty members. May be repeated for credit. (P/NP grading only.)—I, III. (I, II.) L. Segel

### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Technical and/or practical experience on and off campus, supervised by a member of the Section of Molecular and Cellular Biology faculty. (P/NP grading only.)

### 193. Advanced Research (3)

Laboratory—6 hours; discussion—1 hour. Prerequisite: upper division standing, completion of an upper division Molecular and Cellular Biology laboratory course and consent of instructor. Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments on a weekly basis with faculty sponsor. May include presentation of a seminar to a research group. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

### 194H. Research Honors (3)

Independent study—9 hours. Prerequisite: 6 units of course 193 and/or 199 with faculty director; senior standing; GPA of at least 3.250; consent of Section. Honors project. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.)

### 197T. Tutoring in Molecular and Cellular Biology (1-5)

Tutorial—2-6 hours. Prerequisite: upper division standing, completion of course to be tutored, and consent of instructor. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

### 198. Directed Group Study (1-5)

Variable—1-5 hours. Prerequisite: consent of instructor. (P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

Independent study—3-15 hours. Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate Courses

### 200A. Current Techniques in Cell Biology (2)

Lecture—2 hours. Prerequisite: graduate standing; Biological Sciences 104 and course 141 or the equivalent courses. Current techniques used in cell biology research including microscopy, spectroscopy, electrophysiology, immunochemistry, histology, organelle isolation, calorimetry, tissue culture and gel electrophoresis. Lectures are presented by experts on each technique, with an emphasis on pit-

falls to avoid when using the technique. (Same course as Cell and Developmental Biology 200.) (S/U grading only.)—I. (I.) Beck

### 200B. Current Techniques in Biochemistry (2)

Lecture—2 hours. Prerequisite: Biological Sciences 103 and course 120L or the equivalent. Current techniques used in biochemical research including protein and carbohydrate analyses, immunochemistry, recombinant DNA methods, electrophoretic and chromatographic methods. (S/U grading only.)—II. (II.) Kaplan

### 200C. Current Techniques in Biophysics (2)

Lecture—2 hours. Prerequisite: graduate standing; Biological Sciences 102 or 104 or the equivalent. Current techniques in biophysics research including diffraction, magnetic resonance spectroscopy, calorimetry, optical spectroscopy, and electrophysiology. (Same course as Biophysics Graduate Group 200.) (S/U grading only.)—II. (II.) T. Chen, Jue

### 220L. Advanced Biochemistry Laboratory Rotations (5)

Laboratory—15 hours. Prerequisite: course 221A (may be taken concurrently) and 120L or the equivalent. Two five-week assignments in biochemistry research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated twice for credit.—I, II, III. (I, II, III.) Chedin, S. Lin

### 221A. Physical Biochemistry (4)

Lecture—4 hours. Prerequisite: Biological Sciences 103, Chemistry 107B, 108, and 128C, 129C, or 118C or the equivalent or consent of instructor. Chemical and physical properties of biomacromolecules emphasizing the interrelationship of molecular interactions and thermodynamic properties as determinants of higher order structure. The use of NMR and crystallography in determining macromolecular structure.—I. (I.) Baldwin, Schmid, Stahlberg, D. Wilson

### 221B. Mechanistic Enzymology (3)

Lecture—3 hours. Prerequisite: undergraduate level organic and biological chemistry, one course in physical chemistry recommended. Analysis of organic enzyme reaction mechanisms and the exploration of enzyme catalyzed reactions.—I. (I.) Baldwin, Toney

### 221C. Molecular Biology (4)

Lecture—4 hours. Prerequisite: course 221A or the equivalent. Pass 1 restricted to graduate students in biochemistry and molecular biology, microbiology, or genetics. Structure and organization of DNA and chromatin; DNA replication, repair and recombination; transcription and RNA processing; protein biosynthesis and turnover; transcriptional and post-transcriptional control mechanisms; examples from eukaryotic and eubacterial cells, and viruses. (Same course as Genetics 201C.)—III. (III.) Baldwin, Burgess, H. Chen, Heyer, Powers, Stewart

### 221D. Cellular Biochemistry (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 102, course 221A or the equivalent or consent of instructor. Molecular structure and biophysical properties of cell membranes; organelle biogenesis and trafficking; signal transduction, metabolism and metabolic regulation; cytoplasmic organization, biophysics of the cytoskeleton and force-generating mechanisms, mechanism of intracellular transport and mitosis; cell reproduction and the cell cycle.—II. (II.) McNally, Nunnari, Powers, Scholey

### 241. Membrane Biology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103, 104 or consent of instructor. Advanced topics on membrane biochemistry and biophysics. Relationship of the unique properties of biomembranes to their roles in cell biology and physiology. (Same course as Biophysics 241.)—III. (III.) Longo, Voss

### 242. Muscle Biophysics (4)

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: Biological Sciences 102, 103 and Mathematics 16B or 21B; or consent of instructor. The physical and chemical aspects of muscle function.

### 248. Seminar in Cell Biology (2)

Seminar—2 hours. Prerequisite: consent of instructor. Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems. May be repeated for credit.—I. Myles

### 251. Biology of Fertilization (3)

Lecture—2 hours; term paper. Prerequisite: Biological Sciences 104 or the equivalent, and consent of instructor. The morphology, physiology, and biochemistry of gametes, and the mechanism and consequences of their union. Offered in alternate years.—(I.) Myles

### 252. Cellular Basis of Morphogenesis (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 150. Development of form and structure; morphogenetic movement, mechanisms of cellular motility, cell adhesion, intercellular invasion, interaction of cells and tissues in development. Offered in alternate years.—(II.) Armstrong

### 255. Molecular Mechanisms in Animal Development (3)

Lecture—1.5 hours; seminar—1.5 hours. Prerequisite: graduate standing or consent of instructor; introductory background in developmental biology and molecular genetics recommended. Analysis of the molecular mechanisms that control animal development, with a special focus on multiple levels of gene regulation. Experimental systems including *Drosophila*, amphibians, *C. elegans*, and mice will be discussed. Readings will be taken from current literature. Offered in alternate years.—III. Natzle, L. Rose

### 256. Cell and Molecular Biology of Cancer (2)

Lecture—1 hour; term paper. Prerequisite: course in cell or developmental biology (e.g., course 150, 141, 163, or Biological Sciences 104). Analysis at the cellular and molecular levels of the regulation of normal and neoplastic tissue growth; tumor dissemination; identification and characterization of oncogenic agents; characterization of oncogenes and tumor-suppressor genes.—I. (I.) Armstrong

### 257. Cell Proliferation and Cancer Genes (3)

Lecture—1.5 hours; seminar—1.5 hours. Prerequisite: course 221C and 221D or the equivalent. Genetic and molecular alterations underlying the conversion of normal cells to cancers, emphasizing regulatory mechanisms and pathways. Critical reading of the current literature and development of experimental approaches.—I. (I.) Radke

### 258. Seminar in Development (2)

Seminar—2 hours. Prerequisite: consent of instructor. Reports and discussion on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit.—II. (II.) Armstrong, Erickson

### 259. Literature in Developmental Biology (1)

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in developmental biology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Armstrong, Erickson, Myles

### 262. Transgenic Expression Systems (3)

Lecture—3 hours. Prerequisite: Biological Sciences 101 and course 161 or consent of instructor. The molecular biology underlying current transgenic expression systems. Strategies for achieving regulated expression and secretion of proteins. Survey of bacterial, yeast, insect cell, mammalian cell, plant and animal expression systems. Offered in alternate years.

**263. Biotechnology Fundamentals and Application (2)**

Lecture—2 hours. Prerequisite: Biological Sciences 101, 102, Microbiology 102, graduate student in good standing. To train graduate students interested in a biotechnology career track; to learn recombinant DNA, rate processes of biological systems, optimization of bioreactor performance, practical issues in biotechnology, and some case studies of the development of biotechnology products and processes. Offered in alternate years.—II. (II.)

McDonald, Privalsky, Rodriguez, Vanderghaynst

**282. Biotechnology Internship (7-12)**

Internship—21-36 hours. Prerequisite: graduate standing and consent of instructor. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program. (S/U grading only.)—I, II, III. (I, II, III.) Dandekar

**290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Current Progress in Molecular and Cellular Biology (1)**

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subject of their own research activities. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Starr

**294. Current Progress in Biotechnology (1)**

Seminar—1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as Chemical Engineering 294.) (S/U grading only.)—I, II, III. (I, II, III.) Kjelstrom, McDonald, Rodriguez

**295. Literature in Molecular and Cellular Biology (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Critical reading and evaluation of current literature in molecular and cellular biology disciplines. Papers will be presented and discussed in detail. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Baldwin, Fisher, Myles, Privalsky, Radke, Wilson

**298. Group Study (1-5)**

Variable—1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)

**299. Research (1-12)**

Independent study—3-36 hours. (S/U grading only.)

**Professional Course****390. Methods of Teaching (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching biochemistry/genetics/cell biology. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion and laboratory sections, formulating examinations under supervision of instructor. Participating in the teaching program required for Ph.D. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Molecular, Cellular, and Integrative Physiology (A Graduate Group)

James R. Millam, Ph.D., Chairperson of the Group

Group Office. 310 Life Sciences Addition

**Faculty**

Thomas E. Adams, Ph.D., Professor (*Animal Science*)  
 Gary B. Anderson, Ph.D., Professor (*Animal Science*)  
 Joseph F. Antognini, M.D., Professor (*Anesthesiology and Pain Medicine*)  
 Hilary P. Benton, Ph.D., Associate Professor (*Anatomy, Physiology and Cell Biology*)  
 Trish J. Berger, Ph.D., Professor (*Animal Science*)  
 Sue Bodine, Ph.D., Professor (*Exercise Science*)  
 Ann C. Bonham, Ph.D., Professor (*Medical Pharmacology and Toxicology*)  
 Michael L. Bruss, D.V.M., Ph.D., Professor (*Anatomy, Physiology and Cell Biology*)  
 Peter M. Cala, Ph.D., Professor (*Physiology and Membrane Biology*)  
 Christopher C. Calvert, Ph.D., (*Animal Science*)  
 Earl E. Carstens, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Joseph J. Cech, Jr., Ph.D., Professor (*Wildlife, Fish, and Conservation Biology*)  
 Leo M. Chalupa, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Ernest S. Chang, Ph.D., Professor (*Bodega Marine Laboratory*)  
 Tsung-Yu Chen, Ph.D., Assistant Professor (*Neurology*)  
 Gary N. Cherr, Ph.D., Professor (*Bodega Marine Laboratory*)  
 Anthony T. W. Cheung, Ph.D. Professor (*Med: Pathology*)  
 Thomas P. Coombs-Hahn, Ph.D., Associate Professor (*Zoology Field Station*)  
 Nipavan Chiamvimonvat, M.D., Associate Professor (*Cardiovascular Medicine*)  
 Alan J. Conley, D.V.M., Ph.D., Professor (*Population Health and Reproduction*)  
 Carroll E. Cross, M.D., Professor (*Internal Medicine, Human Physiology*)  
 Fitz-Roy E. Curry, Ph.D., Professor (*Physiology and Membrane Biology*)  
 Jason P. Eiserich, Ph.D., Associate Professor (*Neurology*)  
 Michael J. Ferns, Ph.D., Associate Professor (*Anesthesiology and Pain Medicine*)  
 Alla F. Fomina, Ph.D., Assistant Professor (*Physiology and Membrane Biology*)  
 Charles A. Fuller, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 J. David Furlow, Ph.D., Associate Professor (*Neurobiology, Physiology, and Behavior*)  
 Jack M. Goldberg, Ph.D., Senior Lecturer (*Neurobiology, Physiology, and Behavior*)  
 Barbara A. Horwitz, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Andrew T. Ishida, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Lynelle R. Johnson, D.V.M., Ph.D., Assistant Professor (*Medicine and Epidemiology*)  
 James H. Jones, D.V.M., Ph.D., Professor (*Surgical and Radiological Sciences*)  
 Thomas Jue, Ph.D., Professor (*Biological Chemistry*)  
 Radhika Kajekar, Ph.D., Professor (VM: APC)  
 C. Tissa Kappagoda, M.D., Professor (*Internal Medicine*)  
 Marc P. Kaufman, Ph.D., Professor (*Internal Medicine, Physiology and Membrane Biology*)  
 George A. Kaysen, M.D., Professor (*Internal Medicine*)  
 Nguyen D. Kien, Ph.D., Professor (*Anesthesiology and Pain Medicine*)  
 Mark Kittleson, Ph.D., Professor (*Medicine and Epidemiology*)  
 Anne A. Knowlton, M.D., Associate Professor (*Cardiovascular Medicine*)  
 Dietmar Kueltz, Ph.D., Associate Professor (*Animal Science*)  
 Vijaya G. Kumari, M.D., Ph.D., Professor (*Cell Biology and Human Anatomy*)  
 Bill L. Lasley, Ph.D., Professor (*Population Health and Reproduction*)  
 Yu-Fung Lin, Ph.D., Assistant Professor (*Physiology and Membrane Biology*)  
 Irwin K. M. Liu, D.V.M., Ph.D. Professor (*Population Health and Reproduction*)

K.C. Kent Lloyd, D.V.M., Ph.D. Professor (*Anatomy, Physiology and Cell Biology*)  
 Roger B. McDonald, Ph.D., Professor (*Nutrition*)  
 Stuart A. Meyers, Ph.D., Assistant Professor (VM: APC)  
 Gabrielle A. Neviitt, Ph.D., Associate Professor (*Neurobiology, Physiology, and Behavior*)  
 Crina Nimigeau, Ph.D., Assistant Professor (*Physiology and Membrane Biology*)  
 Martha E. O'Donnell, Ph.D., Professor (*Physiology and Membrane Biology*)  
 Anita M. Oberbauer, Ph.D., Professor (*Animal Science*)  
 Pamela A. Pappone, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 John A. Payne, Ph.D. Associate Professor (*Physiology and Membrane Biology*)  
 Isaac N. Pessah, Ph.D., Professor (*Molecular Biosciences*)  
 Helen E. Raybould, Ph.D., Professor (*Anatomy, Physiology and Cell Biology*)  
 Michael P. Remler, M.D., Professor (*Neurology*)  
 Janet F. Roser, Ph.D., Professor (*Animal Science*)  
 Gabor M. Rubanyi, Ph.D., Adjunct Professor (*Berlex Biosciences*)  
 John C. Rutledge, M.D., Professor (*Internal Medicine*)  
 Jose Eduardo Santos, Ph.D., Associate Professor (VMTRC)  
 Saul Schaefer, M.D., Professor (*Internal Medicine*)  
 Edward S. Schelegle, Ph.D., Assistant Professor (*Anatomy, Physiology and Cell Biology*)  
 Michael F. Seldin, M.D., Ph.D., Professor (*Biological Chemistry*)  
 Arnold J. Sillman, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Espen E. Spangenburg, Ph.D., Assistant Professor (*Exercise Biology*)  
 Charles L. Stebbins, Ph.D., Professor (*Internal Medicine, Physiology and Membrane Biology*)  
 Eugene P. Steffey, V.M.D., Ph.D., Professor (*Surgical and Radiological Sciences*)  
 Judith S. Stern, Sc.D., Professor (*Nutrition, Internal Medicine*)  
 Alice F. Tarantal, Ph.D., Professor (*Pediatrics*)  
 Amparo Villablanca, M.D., Associate Professor (*Internal Medicine*)  
 Peter C. Wainwright, Ph.D., Professor (*Evolution and Ecology*)  
 W. Jeffrey Weidner, Ph.D. Professor (*Neurobiology, Physiology, and Behavior*)  
 Robert H. Weiss, M.D., Professor (*Internal Medicine*)  
 Jonathan Widdicombe, Ph.D., Professor (*Physiology and Membrane Biology*)  
 Barry W. Wilson, Ph.D., Professor (*Animal Science*)  
 Martin Wilson, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Reen Wu, Ph.D., Professor (*Anatomy, Physiology and Cell Biology*)  
 Clare E. Yellowley, Ph.D., Assistant Professor (*Anatomy, Physiology and Cell Biology*)  
 Jie Zheng, Ph.D., Assistant Professor (*MED: Physiology and Membrane Biology*)

**Emeriti Faculty**

Marylynn S. Barkley, Ph.D., Professor Emeritus  
 Edmund M. Bernauer, Ph.D., Professor Emeritus  
 Richard C. Carlsen, Ph.D., Professor Emeritus  
 John H. Crowe, Ph.D., Professor Emeritus  
 Irwin Feinberg, M.D., Professor Emeritus  
 Dorothy W. Gietzen, Ph.D., Professor Emeritus  
 Sarah D. Gray, Ph.D., Professor Emeritus  
 John M. Horowitz, Ph.D., Professor Emeritus  
 Dorothy E. Woolley, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)

**Affiliated Faculty**

Steven E. Anderson, Ph.D., Associate Researcher (*Physiology and Membrane Biology*)  
 Chao-Yin Chen, Ph.D., Assistant Research Physiologist (*Medical Pharmacology and Toxicology*)  
 Peter J. Havel, D.V.M., Ph.D., Associate Researcher (*Nutrition*)  
 Marta D. Van Loan, Ph.D., Associate Adjunct Professor (*Nutrition*)

Catherine A. VandeVoort, Ph.D., Associate Adjunct Professor (*Obstetrics and Gynecology*)

**Graduate Study.** The Graduate Group in Molecular, Cellular, and Integrative Physiology offers programs of study and research leading to the M.S. and Ph.D. degrees and participates in joint Ph.D./M.D. and Ph.D./D.V.M. programs. The programs emphasize broad training in the fundamental principles of cellular, molecular, and integrative physiology. For information regarding these programs, address the Program staff person at the Group office.

**Graduate Advisers.** A. Conley (*Population Health and Reproduction*), J. Goldberg (*Neurobiology, Physiology, and Behavior*), A. Oberbauer (*Animal Science*), J. Widdicombe (*Physiology and Membrane Biology*)

## Courses in Molecular, Cellular, and Integrative Physiology (MCP)

(Formerly courses in Physiology)

### Graduate Courses

#### 200L. Animal Cell Culture Laboratory (4)

Discussion—2 hours; laboratory—6 hours. Prerequisite: courses in undergraduate biochemistry, cell biology, or general physiology, or consent of instructor. Techniques of cell culture, with emphases on cell physiology and the actions of drugs and toxicants on cultured somatic cells. Design, performance and interpretation of experiments with animal cells in vitro.—II. (II.) B. Wilson, R. Wu

#### 210A-210B-210C. Advanced Physiology (4-6-6)

Lecture—3 hours (210A) or 5 hours (210B and 210C); discussion—1 hour. Prerequisite: graduate student in the Physiology Graduate Group Ph.D. program, or consent of instructor. Advanced course on general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Physiology 210A is the same course as Human Physiology 210A.)—II-III. (II-III.)

#### 210L. Physiology Laboratory Rotations (5)

Laboratory—15 hours. One mandatory 10-week rotation and up to two more voluntary rotations. Students will learn techniques and perform experiments related to a particular research problem. At the end of the 10-week period in the laboratory, students will give a short talk and hand in a research paper.—I, II, III, IV. (I, II, III, IV.) Widdicombe, Zheng

#### 216. Neurophysiology Literature (3)

Lecture—1 hour; discussion—2 hours. Lectures covering experimental and theoretical methods in studying cell membrane ion channels and the resulting characterization of the physiological functions and structure/function relationships of some of the most important channel types. Discussion of classical and current original papers.—I. (I.) Pappone

#### 219. Muscle Growth and Development (3)

Lecture—2 hours; seminar—1 hour. Prerequisite: Biological Sciences 103, Biological Sciences 104 or Molecular and Cellular Biology 150, or consent of instructor. Integration of growth and development of skeletal muscle; morphology, biochemistry, neural control mechanisms, circulatory and nutritional factors. Prenatal and neonatal differentiation of fiber types. Experimental and hereditary myopathies. Offered in alternate years.—III. Bodine, Carlsen

#### 220. General and Comparative Physiology of Reproduction (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 110, 110L; Biological Sciences 101, 103. Basic phenomena of sexual and asexual reproduction and comparisons of processes in a wide variety of animals; gamete formation, structure, and metabolism; fertilization; neuroendocrine mechanisms in maturation and reproductive cycles; behavioral aspects.—III. (III.) Anderson, Conley, Lasley

#### 222. Mammalian Gametogenesis and Fertilization (3)

Lecture/discussion—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 121 or the equivalent. Course will emphasize our current

understanding of events in mammalian gametogenesis and the fertilization process. Published results, conclusions drawn from these results, and their contribution to our understanding will be discussed.—III. (III.) Berger

#### 230. Advanced Endocrinology (2)

Lecture—2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 130 or the equivalent, and graduate standing. Focus on timely topic of endocrine research. Critical review of current literature and discussion of future research strategies in the area. May be repeated for credit when topic differs.

#### 231. Neuroendocrinology (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 110 or the equivalent course in systemic physiology; Neurobiology, Physiology, and Behavior 130 or the equivalent course in endocrinology. Neural-endocrine interactions; neural regulation of the endocrine system, especially in relation to reproduction; the role of hormones and growth factors in sexual differentiation of the brain.

#### 234. Neurophysiological Basis of Neurotoxicology (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 110 or the equivalent; basic understanding of neurophysiology. Mechanisms of action at the cellular and systemic level of a number of different neurotoxins and toxicants. Examples of ways toxins may act on the nervous system and techniques for study of neurotoxicology. (Same course as Environmental Toxicology 234.)—I. (I.) Woolley

#### 242. Biological Rhythms (3)

Lecture—2 hours; lecture/discussion—1 hour. Prerequisite: Neurobiology, Physiology, and Behavior 110 or the equivalent. General aspects and basic mechanisms of biological rhythms; the importance of rhythm desynchronization in areas of pharmacology and space medicine; telemetry; mathematical methods; chronometry; daily, reproductive, and annual periods; shift-work, jet lag and sleep disorders. Offered in alternate years.—(I.) Fuller

#### 261A. Topics in Vision: Eyes and Retinal Mechanisms (2)

Lecture/discussion—2 hours. Prerequisite: graduate standing, Neurobiology, Physiology, and Behavior 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neuroscience 261A and Neurobiology, Physiology, and Behavior 261A.) (S/U grading only.)—II. (II.) Ishida

#### 261B. Topics in Vision: Systems, Psychophysics, Computational Models (2)

Lecture/discussion—2 hours. Prerequisite: consent of instructor; course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Neuroscience 261B and Neurobiology, Physiology, and Behavior 261B.) (S/U grading only.) Offered in alternate years.—II. Olshausen

#### 261C. Topics in Vision: Clinical Vision Science (2)

Lecture/discussion—2 hours. Prerequisite: courses 261A and 261B, or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neuroscience 261C and Neurobiology, Physiology, and Behavior 261C.) (S/U grading only.) Not offered every year.—III. Werner

#### 275. Neurohumoral Regulatory Mechanisms of Thermogenesis (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Biological Sciences 104 or the equivalent; consent of instructor. Designed for graduate and advanced undergraduate students, this course will examine thermogenic systems in homeotherms (primarily

mammals) with respect to regulation (hormonal and central nervous control) and effector mechanisms (basis of heat generation at the target cell).

#### 290. Seminar (1)

Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (S/U grading only.)—I, II, III. (I, II, III.)

#### 290C. Research Conference in Physiology (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discussion of faculty and graduate student research in physiology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### 291B. Seminar in Cellular Mechanisms of Adaptation (1)

Discussion—0.5 hour; seminar—0.5 hour. Prerequisite: Neurobiology, Physiology, and Behavior 100B; Biological Sciences 103; consent of instructor. Review and evaluation of current literature and research in cellular adaptations to the environment. May be repeated for credit when topic differs. (S/U grading only.)

#### 291D. Research Approaches in Physiology (2)

Seminar—2 hours. Prerequisite: graduate standing in Graduate Group in Physiology or consent of instructor. Current research in physiology. Overall design of experiments and particular research areas. (S/U grading only.)—II. (II.) Eiserich, Raybould

#### 293. Current Progress in Physiology (1)

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by guest lecturers describing their current research activities. May be repeated for credit. (S/U grading only.)

#### 298. Group Study (1-5)

#### 299. Research (1-12)

(S/U grading only.)

### Professional Courses

#### 300A-300B. Pedagogical Aspects of Physiology in Higher Education (3-3)

Lecture, discussion, or laboratory, or combination. Prerequisite: meet qualifications for teaching assistant in physiology. Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Course meets teaching requirements for Ph.D. program in Physiology. (S/U grading only.)—I, II, III. (I, II, III.)

#### 390. The Teaching of Physiology (1)

Discussion—1 hour. Prerequisite: Teaching Assistant assignment to a physiology lecture course and consent of instructor. Practical experience in methods and problems of teaching physiology lecture courses. May include analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion sessions, and formulation of topics and questions for examinations under supervision of instructor. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Music

(College of Letters and Science)

Pablo Ortiz, D.M.A., Chairperson of the Department

**Department Office.** 112 Music Building (530) 752-5537; Fax (530) 752-0983;

<http://music.ucdavis.edu>

### Faculty

Ross Bauer, Ph.D., Professor  
William Beck, D.M.A., Lecturer  
Anna Maria Busse Berger, Ph.D., Professor  
Yu-Hui Chang, Ph.D., Assistant Professor  
Phebe Craig, M.M., Lecturer

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

Andrew D. Frank, M.A., Professor  
 Sandra Graham, Ph.D., Assistant Professor  
 D. Kern Holoman, Ph.D., Professor, *Academic Senate Distinguished Teaching Award, UC Davis Prize for Teaching and Scholarly Achievement*  
 Beth Levy, Ph.D., Assistant Professor  
 Samuel Nichols, Ph.D., Lecturer  
 David A. Nutter, Ph.D., Professor  
 Pablo Ortiz, D.M.A., Professor  
 Christopher A. Reynolds, Ph.D., Professor  
*Academic Senate Distinguished Teaching Award*  
 Rita Sahai, M.A., Lecturer  
 Laurie San Martin, Ph.D., Assistant Professor  
 Henry Spiller, Ph.D., Assistant Professor  
 Jeffrey Thomas, Professor  
 Amelia Triest, B.A., Lecturer

### Emeriti Faculty

Robert S. Bloch, M.A., Professor Emeritus  
 Sydney R. Charles, Ph.D., Professor Emeritus  
 Albert J. McNeil, M.S., Professor Emeritus  
 Jerome W. Rosen, M.A., Professor Emeritus  
 Wayne Slawson, Ph.D., Professor Emeritus

### Faculty Affiliates in Applied Music

Keith Bohm, D.M.A., Lecturer (saxophone)  
 Lois Brandwynne, M.A., Lecturer (piano)  
 Tod Brody, B.A., Lecturer (flute)  
 Bruce Chrisp, M.M., Lecturer (trombone)  
 Laura Reynolds, B.M., Lecturer (oboe)  
 Susan Lamb Cook, M.A., Lecturer (cello)  
 Phebe Craig, M.M., Lecturer (harpsichord)  
 Thomas Derrthick, B.M., Lecturer (string bass)  
 Christopher Froh, M.M., Lecturer (percussion)  
 David Granger, M.M., Lecturer (bassoon)  
 Agnes Lee, M.M., Lecturer (harp)  
 Calvin Lymos, B.A., Lecturer (gospel choir)  
 Michael McMullen, Lecturer (jazz band)  
 Scott Macomber, M.M., Lecturer (trumpet)  
 Zoila Munoz, M.M. Lecturer (voice)  
 Peter Nowlen, B.M., Lecturer (french horn)  
 Ellen Ruth Rose, M.M., Lecturer (viola)  
 Michael Sand, M.M., Lecturer (violin)  
 Jerome Simas, M.M., Lecturer (clarinet)  
 Marilyn Swan, B.M., Lecturer (piano)

### The Major Program

The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks in the major: composition and theory, music history, or performance. After a common core of courses, students following the track in composition and theory take advanced theory courses and/or seminars in composition; students following the track in music history take specialized seminars in music history; and students following the track in performance take an increased number of lessons and performance ensemble courses as well as conducting. All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year. Music majors who intend to pursue graduate studies in music are encouraged to satisfy the requirements of one of the honors programs in music.

**Study Abroad and the Music major.** The department strongly encourages interested students to pursue a portion of their studies abroad. Within the constraints of the campus and college residence requirements, it is possible for students to complete portions of the Music major at an international institution provided that the student consults with one of the undergraduate advisers and carefully plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Music majors have spent one quarter of a full year during their junior or senior years completing upper division coursework at EAP partner institutions in Italy, Germany, Australia, England, and France.

**The Program.** A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized

study of composition, history, or performance during the last two years of undergraduate work.

**Career Alternatives.** Many students who graduate with a degree in music continue on to careers in medicine, law, or business. Students who graduate with a B.A. in music from UC Davis have gone on to graduate programs in music at major universities and conservatories in the country. Some have become professors at distinguished universities or have received teaching credentials to teach at primary or secondary schools; others have become editors or found employment in music advertising or record companies.

### A.B. Major Requirements:

#### Preparatory Subject Matter ..... UNITS 27-45

Music 6A, 6B, 6C ..... 9  
 plus Music 2A, 2B, 2C ..... (0-6)\*  
 and Music 16A, 16B, 16C ..... (0-6)\*  
 Music 7A, 7B, &C ..... 9  
 plus Music 17A, 17B, 17C ..... (0-6)\*  
 Music 24A, 24B, 24C ..... 9  
 \* May be excused by diagnostic examination at the beginning of each quarter.

#### Depth Subject Matter ..... 36-37

Choose upper division courses from one of the following tracks:

**Track 1: Theory/Composition ..... 36-37**  
 Music 124A, 124B ..... 6  
 Music 195 ..... 2  
 At least 9 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 ..... 9  
 Music 101A, 101B ..... 8  
 Music 103 or 199 (for composers); or Music 122 (for theorists)\*\*\* ..... 3-4  
 At least 8 units selected from Music 102, 107A, 107B, 107C, 108A, 108B, 113, 114, 122, 198, 199 ..... 8  
 \*\*\* Note: Music 103 and 199 may be taken only once for credit toward the major.  
**Track 2: Music History ..... 37**  
 Music 124A, 124B ..... 6  
 Music 195 ..... 2  
 At least 9 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 ..... 9  
 Two quarters of Music 121 (on different subjects) ..... 8  
 At least 12 units selected from Music 101A, 101B, 102, 107A, 107B, 107C, 108A, 108B, 113, 114, 121, 122, 198, 199 ..... 12  
**Track 3: Music Performance ..... 37**  
 Music 124A, 124B ..... 6  
 Music 195 ..... 2  
 At least 19 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 ..... 19  
 At least 10 units selected from Music 101A, 101B, 102, 107A, 107B, 107C, 108A, 108B, 113, 114, 121, 122, 198, 199 ..... 10

#### Total Units for the Major ..... 63-82

**Honors Programs.** Students who wish to pursue particularly intensive studies in music should elect one of the following honors programs in place of one of the tracks above:  
**Theory/Composition Honors ..... 45-49**  
 Music 124A, 124B ..... 6  
 At least 11 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 ..... 11  
 Music 101A, 101B ..... 8  
 Two quarters of Music 194H for a total of at least 6 units resulting in a Senior composition or theory thesis ..... 6  
 Select 14-18 units from Music 102, 107A, 107B, 107C, 108A, 108B, 113, 114, 122 ..... 14-18

**Music History Honors ..... 41-45**  
 Music 124A, 124B ..... 6  
 At least 11 units selected from Music 130, 131, 140, 141, 142, 143, 144, 145, 146, 147, 154 ..... 11  
 Music 101A, 101B ..... 8  
 Two quarters of Music 194H for a total of at least 6 units resulting in a Senior thesis ..... 6  
 Select 10-14 units from Music 108A, 121, 122 ..... 10-14

**Major Advisers.** Y.H. Chang (A-F), J.W. Thomas (G-M), D.K. Holoman (N-Z)

### Minor Program Requirements:

#### Music ..... UNITS 22

A minimum of 16 units of upper division Music courses ..... 16  
 Courses chosen from: Music 105, 106, 107, 110, 126, 129  
 A minimum of six units in upper division music performance courses (Music 140, 141, 142, 143, 144, 145, 146, 147, 148, 154) may count toward the minor ..... 6

**Foreign Language Requirement.** Students contemplating graduate study in music are advised to consider pursuing foreign language study beyond the elementary level.

**Diagnostic Exams** are given before admission into Music 6A-6B-6C (Music 3A-3B may be recommended as an alternative). Diagnostic exams are also given for Music 16A-16B-16C and 17A-17B-17C at the beginning of each year. Transfer students should take the Music 6 diagnostic exam given during the first class meetings.

**Beginning and transfer students** are required to take Music 2A-2B-2C (Keyboard Competence) unless they can pass out of one or more of the classes by demonstrating proficiency through a diagnostic exam given at the beginning of each quarter. Students learn 1) four-part keyboard harmony in all major and minor keys; 2) moderate fluency with figured bass at the keyboard; 3) major and minor scales with proper fingering; ability to sight read simple piano music and Bach chorales.

**Student Performing Activities.** The Department of Music presents over 100 concerts each year, offering performance opportunities for both majors and non-majors in the UCD Symphony Orchestra, University Chorus and Chamber Chorus, Concert Band, Wind Ensemble, Early Music Ensemble, Baroque Chamber Orchestra, Jazz Band, Gospel Choir, and numerous chamber ensembles.

The large groups regularly present three concerts each year, while chamber ensembles perform frequently in the weekly Thursday Noon Concerts. Performance groups have collaborated with the Department of Dramatic Art in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

The Empyrean Ensemble, a professional new music ensemble, is in residence at UC Davis. The American Bach Soloists, an ensemble of professional singers and instrumentalists specializing in music of the eighteenth and early nineteenth century, is affiliated with the Department of Music.

**Faculty and Facilities.** The faculty is noted for its achievements in a variety of areas. The musicologists are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally. The journal, *19th-Century Music*, is housed in the department.

The regular faculty is joined during one quarter each year by a visiting Artist-in-Residence, a distinguished performer who gives public concerts and lectures and who works with students informally.

The department's facilities include a large collection of Renaissance, Baroque, and modern instruments, the Computer and Electronic Music Studio, practice

and rehearsal rooms, and an excellent music library with some 20,000 recordings, CDs, laser discs and videos.

**Graduate Study.** The Department of Music offers programs of study and research leading to the M.A. degree in composition/theory, musicology, ethnomusicology, and conducting, and the Ph.D. degree in composition/theory, musicology, and ethnomusicology. Detailed information regarding graduate study may be obtained from the Graduate Adviser.

**Graduate Advisers.** D.A. Nutter, C.A. Reynolds

## Courses in Music (MUS)

### Lower Division Courses

#### 2A. Keyboard Competence, Part 1 (2)

Performance—2 hours. Prerequisite: course 6A and 16A concurrently. Training to meet the minimum piano requirements for the major in music. All music majors will be expected to perform scales and simple harmonic progressions in twelve keys, both major and minor. (P/NP grading only.)—I. Triest

#### 2B. Keyboard Competence, Part 2 (2)

Performance—2 hours. Prerequisite: course 6B and 16B concurrently, course 2A or demonstration of required keyboard proficiency on diagnostic exam. Training to meet the minimum piano requirements for the major in music. The study of scales with both hands, harmonic progressions, and sight reading at the piano. (P/NP grading only.)—II. Triest

#### 2C. Keyboard Competence, Part 3 (2)

Performance—2 hours. Prerequisite: course 6C and 16C concurrently, course 2B or demonstration of required keyboard proficiency on diagnostic exam. Training to meet the minimum piano requirements for the major in music. The study of chord progressions, figured bass, sight reading, and piano repertoire. (P/NP grading only.)—III. Triest

#### 3A. Introduction to Music Theory (4)

Lecture—1 hour; recitation—3 hours. Fundamentals of music theory, ear-training, harmony, counterpoint, and analysis directed toward the development of listening and writing techniques. Intended for the general student.—I, II, III. (I, II, III.)

#### 3B. Introduction to Music Theory (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 3A. Continuation of course 3A. Intended for the general student.—II, III. (II, III.)

#### 6A. Elementary Theory, Part 1 (3)

Lecture—3 hours. Prerequisite: admission by examination given at beginning of fall quarter; course 2A and 16A concurrently or demonstration of required proficiency level on diagnostic exam. Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertoire. Intended primarily for music majors. Not open for credit to students who have completed course 4A.—I. Chang

#### 6B. Elementary Theory, Part 2 (3)

Lecture—3 hours. Prerequisite: course 6A; course 2B and 16B concurrently or demonstration of required proficiency level on diagnostic exam. Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertoire. Intended primarily for music majors. Not open for credit to students who have completed course 4B.—II. Chang

#### 6C. Elementary Theory, Part 3 (3)

Lecture—3 hours. Prerequisite: course 6B; course 2C and 16C concurrently or demonstration of required proficiency level on diagnostic exam. Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertoire. Intended primarily for music majors. Not open for credit to students who have completed course 4C.—III. Chang

#### 7A. Intermediate Theory, Part 1 (3)

Lecture—3 hours. Prerequisite: course 6C. Homophonic music of the Classical era with a focus on analysis of music by Haydn, Mozart, and Beethoven. Composition of pieces in the homophonic forms such as Minuet and Trio, Theme and Variations, Rondo and Sonata. Intended for music majors. Not open for credit to students who have completed course 5B.—I. Frank

7B. Intermediate Theory, Part 2 (3)

Lecture—3 hours. Prerequisite: course 7A. Nineteenth-century harmony and voice leading through the music of the Romantic era. Focus on analysis of music by Chopin, Schumann, Brahms, Wagner, and Wolf. Composition of character pieces and songs. Intended for music majors. Not open for credit to students who have completed course 5C.—II. Frank

#### 7C. Intermediate Theory, Part 3 (3)

Lecture—3 hours. Prerequisite: course 7B. The music of the first thirty years of the twentieth century and the various analytical tools pertaining to it. Works of Debussy, Stravinsky, Schoenberg, Berg, and others are discussed. Composition of small pieces for solo instruments, voice and piano. Intended for music majors. Not open for credit to students who have completed course 104A.—III. Frank

#### 10. Introduction to Musical Literature (4)

Lecture—3 hours; listening section—1 hour. An introduction to composers and major styles of Western music. Lectures, listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.) Holoman, Levy, Nutter

#### 16A. Elementary Musicianship, Part 1 (2)

Lecture/laboratory—2 hours. Prerequisite: course 6A concurrently, passing score on short diagnostic exam at the beginning of the quarter. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Recommended for those who intend to major in music.—I. Triest

#### 16B. Elementary Musicianship, Part 2 (2)

Lecture/laboratory—2 hours. Prerequisite: course 6B concurrently, course 6A or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Recommended for those who intend to major in music.—II. Triest

#### 16C. Elementary Musicianship, Part 3 (2)

Lecture/laboratory—2 hours. Prerequisite: course 6C concurrently, course 16B or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Recommended for those who intend to major in music.—III. Triest

#### 17A. Intermediate Musicianship, Part 1 (2)

Lecture/laboratory—2 hours. Prerequisite: course 16C or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Intended for music majors.—I. Craig

#### 17B. Intermediate Musicianship, Part 2 (2)

Lecture/laboratory—2 hours. Prerequisite: course 17A or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Intended for music majors.—II. Craig

#### 17C. Intermediate Musicianship, Part 3 (2)

Lecture/laboratory—2 hours. Prerequisite: course 17B or required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western Music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. Intended for music majors.—III. Craig

#### 24A. Introduction to the History of Music I (3)

Lecture—3 hours. Prerequisite: course 6A (may be taken concurrently). History of music from the late Baroque to Beethoven. Intended primarily for majors in music. GE credit: Wrt.—II. Reynolds

#### 24B. Introduction to the History of Music II (3)

Lecture—3 hours. Prerequisite: course 24A, course 6B (may be taken concurrently). The history of music from the Romantic Period to the nineteenth century. Intended primarily for majors in music. GE credit: Wrt.—III. Reynolds

#### 24C. Introduction to the History of Music III (3)

Lecture—3 hours. Prerequisite: course 24B, course 6C (may be taken concurrently). The history of music of the 20th century. Intended primarily for majors in music. GE credit: Wrt.—I. Levy

#### 28. Introduction to African American Music (4)

Lecture/discussion—3 hours; discussion—1 hour; listening; project. Survey of African American music, such as spirituals, blues, ragtime, jazz, theater, gospel, R&B, rap, and art music. Emphasis on historical and sociocultural contexts, as well as African roots. GE credit: Div, Wrt.—III. Graham

#### 30A-U. Applied Study of Music: Intermediate (1)

Performance instruction—1 hour. Prerequisite: open to Music majors with ability to perform scales and short compositions from standard repertoire; admission by audition and consent of instructor. Class instruction, arranged by section: (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (S) Lute; (T) Viola da gamba; (U) Recorder. May be repeated for credit. Offered as demand indicates.—I, II, III. (I, II, III.)

#### 31A-U. Applied Study of Music: Intermediate (Individual) Performance Instruction (2)

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: open to Music majors only; admission by audition and consent of instructor. Individual instruction in (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (S) Lute; (T) Viola da gamba; (U) Recorder. May be repeated for credit.—I, II, III. (I, II, III.)

#### 47. University Wind Ensemble (2)

Rehearsal—4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of a full variety of wind ensemble music; and to have students share their work in public performances. May be repeated for credit. (P/NP grading only.)—I. (I.) Nowlen

#### 54. University Gospel Choir (2)

Rehearsal—4 hours. Prerequisite: consent of instructor; open to any student in the university. Rehearsal, study, and performance of Gospel music. May be repeated for credit. (Same course as African American and African Studies 54.) (P/NP grading only.)—I, II, III. (I, II, III.) Lymos

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division Courses

#### 101A. Advanced Theory, Part 1 (4)

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: course 7C. Twentieth-century music from 1930 through 1950 and the various analytical tools pertaining to it. Works of Copland, Sessions, Schoenberg, Bartok, and Stravinsky are discussed. Composition of small pieces for piano and voice. For music majors. Not open for credit to students who have completed course 104B.—I. Bauer

**101B. Advanced Theory, Part 2 (4)**

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: course 101A. Music from 1950 to the present and the various analytical tools pertaining to it. Works of Babbitt, Carter, Dallapiccola, Ligeti, Messiaen, Reich and others are discussed. Composition of small pieces for ensemble. Intended for music majors. Not open for credit to students who have completed course 104C.—II. Bauer

**102. Tonal Counterpoint (4)**

Lecture—3 hours; practice—1 hour. Prerequisite: course 7A and 17A. Imitative tonal counterpoint with an analytical focus on the Two Part Inventions and Fugues (from the Well Tempered Klavier) of J.S. Bach. Composition of exercises and short pieces using contrapuntal techniques. Intended for music majors. Not open for credit to students who have completed course 5A.—III. Ortiz

**103. Workshop in Composition (3)**

Workshop—3 hours. Prerequisite: course 4C. Workshop in musical composition for undergraduates who are interested in pursuing serious compositional studies. Course will allow students to explore the techniques and materials of musical composition. May be repeated for credit. (P/NP grading only.)—(I, II, III.) Ortiz

**105. History and Analysis of Jazz (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3A or 10 or the equivalent. Jazz will be studied in its historical and cultural contexts; the evolution of jazz styles will be analyzed. Lectures, discussion/guided listening sections, and selected readings. Designed for non-majors. GE credit: ArtHum, Div, Wrt.—III. Bauer

**106. History of Rock Music (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3A-3B or 10 or consent of instructor. Rock studied in its musical, historical, and cultural contexts; analysis of the evolution of rock styles. Includes guided listening sections and selected readings. Designed for non-majors. GE credit: ArtHum, Wrt.—I. Reynolds

**107A. Computer and Electronic Music (3)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: consent of instructor. Studies in electronic and computer music composition. The principles and procedures of composition in various electronic media are explored through compositional exercises. Limited enrollment.—I. (I.) Beck

**107B. Computer and Electronic Music (3)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 107A and consent of instructor. Continuation of course 107A. Limited enrollment.—(II.) Beck

**107C. Computer and Electronic Music (3)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 107B and consent of instructor. Continuation of course 107B. Limited enrollment.—(III.)

**108A-108B. Orchestration (2-2)**

Lecture—2 hours. Prerequisite: course 5C. Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations.—I, II. San Martin

**109. Masterworks in Performance (2)**

Lecture—2 hours. Prerequisite: course 10 recommended. Thorough score study of a single masterwork to be performed on campus during the quarter. Guided listening, selected readings, analysis and study of composer's milieu. Recommended especially for members of the performing ensembles scheduled to present the work.

**110A. The Music of a Major Composer: Beethoven (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Beethoven will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.—I. Busse Berger

**110B. The Music of a Major Composer: Stravinsky (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Stravinsky will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.—II. Frank

**110C. The Music of a Major Composer: Bach (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Bach will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.

**110D. The Music of a Major Composer: Mozart (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Mozart will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.—III. San Martin

**110E. The Music of a Major Composer: Haydn (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. The work of Haydn in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.

**110F. American Masters (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 10 or 3A-3B. An overview of American concert music by master composers from Charles Ives to the present. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt.

**113. Introduction to Conducting (2)**

Lecture—1 hour; performance—1 hour. Prerequisite: course 6C. Principles and techniques of conducting as they apply to both choral and instrumental ensembles. Not open for credit to students who have completed course 111 or 112. Offered in alternate years.—I.

**114. Intermediate Conducting (2)**

Lecture—1 hour; performance—1 hour. Prerequisite: course 113. Intermediate conducting with a continued focus on principles and techniques as they apply to both choral and instrumental ensembles.—II.

**121. Topics in Music History and Criticism (4)**

Seminar—4 hours (includes selected listening). Prerequisite: courses 4A-4B-4C, 24A-24B-24C, and consent of instructor. Sources and problems of a historical period or musical style selected by the instructor and announced in advance. May be repeated for credit. GE credit: Wrt.—II, III. Nutter, Reynolds

**122. Topics in Analysis and Theory (4)**

Seminar—4 hours (includes selected listening). Prerequisite: courses 5C and 25C. Analysis of works of a composer or musical style selected by the instructor and announced in advance. Consideration of theoretical issues. May be repeated for credit. GE credit: Wrt.

**124A. History of Western Music: Middle Ages to 1600 (3)**

Lecture—3 hours. Prerequisite: course 6C and 24C. Historical survey of composers and musical styles from the Middle Ages to the beginning of the 17th century. GE credit: Wrt.—II. Busse Berger

**124B. History of Western Music: 1600-1750 (3)**

Lecture—3 hours. Prerequisite: course 124A. Historical survey of composers and musical styles from the late 1500s to the mid-18th century. GE credit: Wrt.—III. Busse Berger

**126. American Music (4)**

Lecture—3 hours; listening—1 hour. Prerequisite: course 10 or 3A-3B or consent of instructor. Introductory survey of American musics, including Native American music, Hispanic polyphony, New England psalmody, and selected 20th-century composers and styles. Offered in alternate years. GE credit: Div, Wrt.

**127. Music from Latin America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in Spanish. Not open to students who have taken Spanish 171 or 171S. (Same course as Spanish 171) Offered in alternate years.—II. Ortiz

**129A. Musics of the Americas (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3A or 3B recommended. Survey of music cultures from North, Central, and South America, including the Caribbean, with emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Not offered every year. GE credit: ArtHum, Div, Wrt.—Graham

**129B. Musics of Africa, Middle East, Indian Subcontinent (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3A or 3B recommended. Survey of music cultures with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Not offered every year. GE credit: ArtHum, Div, Wrt.—Graham

**129C. Musics of East and Southeast Asia (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3A or 3B recommended. Survey of music cultures from Japan, China, Korea, Vietnam, and Indonesia, with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Not offered every year. GE credit: ArtHum, Div, Wrt.—Graham

**129D. Folk Musics of Europe (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3A or 3B recommended. Survey of folk musics from all of Europe, with emphasis on the role of music in society and on the elements of music (instruments, genres, form, etc.). Introduction to ethnomusicological theory, methods, approaches. Not offered every year. GE credit: ArtHum, Div, Wrt.

**130A-U. Applied Study of Music: Advanced (1)**

Performance instruction—1 hour. Prerequisite: open to Music majors with ability to perform scales and short compositions from standard repertoire; admission by audition and consent of instructor. Class instruction, arranged by section: (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (S) Lute; (T) Viola da gamba; (U) Recorder. May be repeated for credit. Offered as demand indicates.—I, II, III. (I, II, III.)

**131A-U. Applied Study of Music: Advanced (Individual) (2)**

Performance instruction—0.5 hour; independent practice—5 hours. Prerequisite: open to Music majors only; admission by audition and consent of instructor. Individual instruction in (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (S) Lute; (T) Viola da gamba; (U) Recorder. May be repeated for credit.—I, II, III. (I, II, III.)

**132. Singing for Actors (1)**

Performance—1 hour. Prerequisite: consent of instructor. The elements of basic singing techniques, through selected exercises, vocalises, and songs. May be repeated for credit. (P/NP grading only.)

**140. University Jazz Band (2)**

Rehearsal—4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of jazz band music and full variety of jazz band styles, including swing, be-bop, and contemporary jazz styles. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) McMullen

**141. University Symphony (2)**

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Sight-reading, rehearsal and performance of music from the orchestral literature. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Holoman

**142. University Chamber Singers (2)**

Rehearsal—3 hours, plus sectionals—at least 1 hour. Prerequisite: admission subject to audition before first class meeting. Rehearsal and performance of works for small choral group. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Thomas

**143. University Concert Band (2)**

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Rehearsal and performance of music for band. May be repeated for credit. (P/NP grading only.)—II, III. (II, III.)

**144. University Chorus (2)**

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University. Rehearsal and performance of choral music. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Thomas

**145. Early Music Ensemble (2)**

Rehearsal—4 hours. Prerequisite: admission subject to audition before first class meeting. Rehearsal and performance of Medieval, Renaissance, and Baroque music for vocal ensemble and historical instruments. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Nutter

**146. Chamber Music Ensemble (1)**

Rehearsal—2 hours; student practice—1 hour. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Study, rehearsal, and performance of ensemble music for strings, winds, voice, piano, harpsichord, and organ. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Granger

**147. University Wind Ensemble (2)**

Rehearsal—4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of a full variety of wind ensemble music; and to have students share their work in public performances. May be repeated for credit. (P/NP grading only.)—I. (I.) Nowlen

**148. Hindustani Vocal Ensemble (2)**

Rehearsal—2 hours. Basics of Hindustani music through theory and practice. Fundamentals of raga (mode) and tala (rhythms) with special emphasis on improvisation, a central feature of khyal (singing style). Five ragas each quarter. May be repeated up to six times for credit. (P/NP grading only.)—I, II. (I, II.) Sahai

**154. University Gospel Choir (2)**

Rehearsal—4 hours. Prerequisite: consent of instructor; open to any student in the university. Rehearsal, study, and performance of Gospel music. May be repeated for credit. (Same course as African American and African Studies 154.) (P/NP grading only.)—I, II, III. (I, II, III.) Lymos

**192. Internship in Music (1-4)**

Internship—3-12 hours. Prerequisite: music major, consent of instructor and department chairperson. Internship outside the university related to music. May be repeated up to 8 units of credit. (P/NP grading only.)—I, II, III.

**194HA-194HB. Special Study for Honors Students (2-4)**

Independent study—6-12 hours. Prerequisite: course 7C, 124B. Open only to students who qualify for the honors program and admission to Music Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.)

**195. Senior Project (2)**

Project—6 hours. Prerequisite: Consent of instructor and undergraduate advisor. Preparation of a senior project in music composition (public presentation of a new work), in music performance (a public recital), or in music history and theory (public presentation of research results). Restricted to music majors with senior standing.—I, II, III. (I, II, III.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****200. Music Research (4)**

Seminar—3 hours; term paper. Introduction to problems and techniques of research; practical application of music bibliography to questions about significant issues in musicology, music theory, and performance practice.

**202. Notation (4)**

Seminar—3 hours; term paper. Study of musical notation; investigation of techniques for editing Medieval and Renaissance music.—I. Busse Berger

**203. Music Composition (4)**

Seminar—3 hours; term paper. Technical projects that explore compositional problems, the skill and techniques with which to solve them, and free composition. May be repeated for credit.—I, II, III. (I, II, III.) Bauer, Ortiz, San Martin, Chang

**204. Advanced Conducting (3)**

Tutorial—2 hours; practicum—2 hours. Prerequisite: courses 111, 112, or the equivalent; keyboard skills appropriate to graduate standing. Technical aspects of conducting and the broader issues in music history and analysis that conductors must face before leading a rehearsal or performance.

**207. Advanced Electronic and Computer Music (4)**

Seminar—2 hours; plus individual student/instructor meeting—2 hours. Prerequisite: courses 107A-107B-107C. Advanced composition of computer and electronic music with the Sun 3-based computer-music system and associated facilities.

**210A. Proseminar in Music (Theory and Analysis) (4)**

Seminar—3 hours; term paper. Voice-leading analysis of tonal music derived from Schenker and pitch-class set theory. Recent work on compositional design, generalizations of the concept of interval, psychologically oriented music theory, and theories of durational structure and timbre.—I. Bauer

**210B. Proseminar in Music (Musicology and Criticism) (4)**

Seminar—3 hours; term paper. Issues and concepts of music history, including performance practice questions for specific repertoires and periods; principles, aims, and methods of archival study; historical theory; evolution of musical styles; philosophical debates about goals and aims of the discipline in general.—I. Levy

**210C. Proseminar in Music (Ethnomusicology) (4)**

Seminar—3 hours; term paper. Intensive examination of major trends in ethnomusicology as exemplified by scholars working in several non-Western cultures. Ethnomusicological theory, ranging from ethnographic description to metamusical study (Seegar) to analysis of individual genres to sociological study.—II. Graham

**212. Ethics of Musical Ethnography (4)**

Seminar—3 hours; fieldwork. Prerequisite: course 210C. The role, methodology, perception, and assumptions of the ethnomusicologist in ethnographic scholarship. Examination of complex ethical and political questions in relation to practical fieldwork techniques. Offered in alternate years.—Graham

**213. Transcription and Notation (4)**

Seminar—3 hours; project. Prerequisite: course 210C. Practical instruction in the transcription and analysis of primarily non-Western musics. Analytical and theoretical issues, the politics of representation, and the cultural values and ideologies implicit in notation. Offered in alternate years.—Graham

**221. Topics in Music History (4)**

Seminar—3 hours. Studies in selected areas of music history and theory. May be repeated for credit.—I, II, III. Graham, Levy, Holoman

**222. Techniques of Analysis (4)**

Seminar—3 hours. Analysis and analytical techniques as applied to music of all historical style periods. May be repeated for credit.—III. Chang

**223. Ethnomusicology (Pacific Cultures) (4)**

Seminar—3 hours; term paper. Court music, religious music, and popular forms of China, Japan, Korea, Melanesia, and Indochina. Issues concerning history, theoretical constructs, performance practice, and cultural settings of the music will be stressed. May be repeated for credit.

**299. Individual Study (1-12)**

(S/U grading only.)

**Teaching Methods Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Native American Studies

(College of Letters and Science)

Stefano Varese, Ph.D., Chairperson of the Department

**Department Office.** 2401 Hart Hall  
(530) 752-3237;  
<http://nas.ucdavis.edu>

**Faculty**

Steven J. Crum, Ph.D., Professor  
Inés Hernandez-Avila, Ph.D., Professor  
Martha J. Macri, Ph.D., Professor  
Zoila Mendoza, Ph.D., Associate Professor  
Victor D. Montejó, Ph.D., Professor  
Hulleah Tsinnahjinn, M.F.A., Assistant Professor  
Edward Valandra Ph.D., Assistant Professor  
Stefano Varese, Ph.D., Professor

**Emeriti Faculty**

Jack D. Forbes, Ph.D., Professor Emeritus  
George C. Longfish, M.F.A, Professor Emeritus  
David Risling, M.A., Senior Lecturer Emeritus

**The Major Program**

Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider issues of cultural diversity, sovereignty, and indigenous knowledge systems in preparation for liv-

ing in a world of constantly increasing social and cultural complexity.

**The Program.** Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native experience in North America (north of Mexico). Plan II encourages interested students to focus upon Meso-America with, however, some course work integrating Meso-America with North America and South America. Plan III focuses upon South America, with some course work integrating that region with areas to the north.

**Career Alternatives.** Native American Studies is excellent preparation for a scholarly career or professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter ..... 20**

- Native American Studies 1, 10 ..... 8
- One or two courses from Native American Studies 32, 33, 46, 55 ..... 4-8
- One or two courses from African American and African Studies 12, 52, Anthropology 2, 3, Asian American Studies 1, Chicana/o Studies 10, History 17A ..... 4-8

**Depth Subject Matter ..... 16**

- Native American Studies 130A, 157, 180 ..... 12
- One course from Native American Studies 107, 115, 130B, 130C, 133, 156 ..... 4
- Note: If a course is counted for either Plans I, II, or III (below), it cannot also be counted as part of the 16 units of Depth Subject Matter.

**Areas of Specialization (complete one plan)**

**Plan I—North American Emphasis..... 28**

- Two courses from Native American Studies 107, 115, 116, 117, 118, 122, 130C, 156 ..... 8
- Two courses from Native American Studies 101, 181A, 181B, 181C ..... 8
- Two courses from Anthropology 113, 136, 161A, 161B, 165, 166, 172, 173, 174, 175, 176, African American and African Studies 100, 101, 107, 120, 123, 133, 153, 160, American Studies 120, Asian American Studies 100, 101, 110, 111, 112, Chicana/o Studies 100, 110, 111, 154, 156, Sociology 128, Women's Studies 102 ..... 8
- One other upper division Native American Studies course, selected in consultation with adviser ..... 4

**Plan II—Mexico-Central America Emphasis 28**

- Native American Studies 107, 133 ..... 8
- Three courses from History 161A, 166A, 166B, Anthropology 134, 145, 146, 174, 175, Chicana/o Studies 130, Native American Studies 122 ..... 12
- Two courses from Spanish 155, 172, Art History 151, Native American Studies 101, 156, 181A, 181B, 181C, or, if student's work is specifically focused upon a Meso-American language or topic, from Native American Studies 188, 191 ..... 8

**Plan III—South American Emphasis ..... 28**

- Native American Studies 107, 120 ..... 8
- Two courses from History 161A, 161B, 162, 163A, 163B, 165 ..... 8
- Three courses from Anthropology 134, 144, 174, 175, Native American Studies 101, 122, 156, 181A, 181B, 181C, or, if student's work is specifically focused upon a South American language or topic, from Native American Studies 188, 191 ..... 12

**Total Units for the Major ..... 64**

**Major Adviser.** S. Crum

**Minor Program Requirements:**

The Native American Studies minor provides an introduction to the Native experience in the Americas by means of exposure to course work dealing with some of the major aspects of Indian life, including history, values, politics, literature, and art.

UNITS

**Native American Studies ..... 24**

- Native American Studies 1 or 10 ..... 4
- Five upper division courses, at least one of which is chosen from each of the following groups ..... 20
- Ethno-History:* Native American Studies 130A, 130B, 130C, or 133
- Philosophy and values:* Native American Studies 156, 157, or 180
- Politics and current affairs:* Native American Studies 115, 116, 117, 118, 120, 122
- Art and literature:* Native American Studies 101, 181A, 181B, or 181C
- One other upper division course selected in consultation with adviser.

**Study Off Campus.** Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student's plan must be approved by the student's adviser and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed; and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program, Short-Term Programs Abroad.

**Graduate Study.** The Department offers a program of study leading to the M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

**Graduate Adviser.** M. Macri

**Courses in Native American Studies (NAS)**

**Lower Division Courses**

**1. Introduction to Native American Studies (4)**

Lecture—3 hours; discussion—1 hour. Introduction to Native American Studies with emphasis upon basic concepts relating to Native American historical and political development. GE credit: SocSci, Div.—I, II, III. (I, II, III.) Montejo, Crum

**5. Introduction to Native American Literature (4)**

Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. Study of selected Native American texts. Intensive focus on analysis of these texts, with frequent writing assignments to develop critical thinking and composition skills. GE credit: ArtHum, Div, Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously).—I, II, III. (I, II, III.)

**10. Native American Experience (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the diverse cultures of Native American peoples from North, Central, and South America. Emphasis on

Native American voices in the expression of cultural views and in the experience of conflicting values. GE credit: ArtHum or SocSci, Div, Wrt.—I, II, III. (I, II, III.) Varese, Hernandez-Avila, Macri

**32. Native American Music and Dance (4)**

Lecture/discussion—4 hours. Introduction to the music and dance of the native peoples of the Americas. Students will study secular native music and dance from a cross-section of regions and tribes. GE credit: Div.—I. (I.) Mendoza

**33. Native American Art in the U.S. (4)**

Lecture—4 hours. Comprehensive survey of Indian art forms with emphasis upon design, media, and function. Intent is to familiarize the student with a wide range of styles and techniques. GE credit: ArtHum, Div.—I. (I.)

**34. Native American Art Workshop (4)**

Lecture—1 hour; laboratory—6 hours; 3 hours to be arranged. Prerequisite: consent of instructor; course 33 recommended. Studio projects in Native American art, design, and crafts. (P/NP grading only).—(II.)

**46. Orientation to Research in Native American Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: Native American Studies major or minor, or consent of instructor. Introduces students to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis is upon learning to use documentary resources or other collections of data. Students will carry out individual projects. Limited enrollment. GE credit: SocSci, Div, Wrt.

**55. Americanisms: Native American Contributions to World Civilization (4)**

Lecture/discussion—4 hours. Prerequisite: course 1 or 10 recommended. American indigenous people's contributions to the contemporary world, with attention to forced participation of Indian societies in the development of Western dominance and resulting appropriation of cultural creations. Responses and initiatives of indigenous peoples will be analyzed. GE credit: SocSci, Div, Wrt.

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**101. Contemporary Indian Art (4)**

Lecture—4 hours. Prerequisite: course 33. Historical review of contemporary Indian art from 1900 to the present by looking at the two art centers of Oklahoma and Santa Fe. Social pressures that have influenced the imagery that exists today will be examined. GE credit: ArtHum, Div.—(II.)

**107. Special Topics in Native American Languages (4)**

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Investigation of various subjects in contemporary and historical Native American language studies. May be repeated for credit when a different topic is studied. GE credit: Div.—II. (III.) Macri

**115. Native Americans in the Contemporary World (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, 10, or 55. The sociocultural development of American Indian populations in modern times with emphasis upon North America. Attention will be given to contemporary Indian affairs and problems as well as to the background for present day conditions. Not open for credit to students who have completed Anthropology 141B. (Former course Anthropology 141B.) GE credit: SocSci, Div, Wrt.—II. Montejo

**116. Native American Traditional Governments (4)**

Lecture—4 hours. Prerequisite: course 1; Anthropology 2. Study of selected Native American Tribal Governments, confederations, leagues, and alliance systems. Offered in alternate years. GE credit: SocSci, Div.

**117. Native American Governmental Decision Making (4)**

Lecture—4 hours. Prerequisite: course 116, Political Science 2; Anthropology 123 recommended. Native American governmental and community decision making with emphasis on federal and state programs, tribal sovereignty, current political trends and funding for tribal services. Offered in alternate years. GE credit: SocSci, Div.

**118. Native American Politics (4)**

Lecture—4 hours. Prerequisite: course 117. Examination of the various interest groups and movements found among Native people and how they relate to the determination of Indian affairs. Study of political action available to Native groups, and local communities, along with relevant theory relating to underdevelopment. Offered in alternate years. GE credit: SocSci, Div.—II.

**120. Ethnopolitics of South American Indians (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, 10 or 55. Social, political, cultural movements of indigenous South Americans in response to establishment, expansion of European colonialism, post-colonial nation-states. Ethnopolitical processes developed through interactions between Indians, Euroamericans. Socioethnographic analysis of main indigenous areas and the development of national societies. GE credit: SocSci, Div, Wrt.—I. (I.) Varese

**122. Native American Community Development (4)**

Lecture—4 hours. Prerequisite: course 1, Community and Regional Development 151. Application of community development theory and techniques to the development problems of Native American communities. Offered in alternate years. (Former course 161.) GE credit: SocSci, Div, Wrt.—I. Varese

**125. Performance and Culture Among Native Americans (4)**

Lecture—3 hours; listening—3 hours. Prerequisite: upper division standing in division of humanities or social sciences or consent of instructor. Interdisciplinary study of public expressive forms among Native Americans. Comparative analysis of music, dances, rituals, and dramas from throughout the Americas in their social and cultural contexts. Offered in alternate years. Not open for credit to students who have completed Music 125.—III. (III.) Mendoza

**130A. Native American Ethno-Historical Development (4)**

Lecture—4 hours. Prerequisite: course 1 or 10; History 17A recommended. Study of Native American ethno-history in North America before 1770s. GE credit: SocSci, Div, Wrt.—I. (I.) Crum

**130B. Native American Ethno-Historical Development (4)**

Lecture—4 hours. Prerequisite: course 1; History 17A-17B recommended. Study of Native American ethno-history in North America, 1770-1890. GE credit: SocSci, Div, Wrt.—II. (II.) Crum

**130C. Native American Ethno-Historical Development (4)**

Lecture—4 hours. Prerequisite: course 1; History 17A-17B recommended. Study of Native American ethno-history in North America after 1890. GE credit: SocSci, Div, Wrt.—III. (III.) Crum

**133. Ethnohistory of Native People of Mexico and Central America (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, 10 or 55. Ethnohistorical development of pre-colonial, colonial, post-colonial Mexican and Central American indigenous people; the impact of economic and political factors on the process of cultural adaptation. Attention is given to the questions of nation-building, forced assimilation, indigenous resistance, organized political responses. GE credit: SocSci, Div.—III. (III.) Varese

**134. Race and Sex: Race Mixture and Mixed Peoples (4)**

Lecture—4 hours. Prerequisite: one course chosen from Anthropology 1 or 2, Native American Studies 10, Chicana/o Studies 110, African American and African Studies 100 or Asian American Studies

110. The phenomena of racial, ethnic and interreligious intermixture and marriage, and of multi-ethnic peoples. Emphases on the Americas and upon the sociocultural effects of intermixture and on the lives of bicultural and multi-ethnic persons. (Same course as Anthropology 134.) GE credit: SocSci, Div, Wrt.

**156. Native American Ethics and Value Systems (4)**

Lecture—4 hours. Prerequisite: upper division standing; course 1. Analysis of Native American systems of values and how these values translate into actual behavior; attention to the problem of implementing traditional values in the twentieth century and the possible impact of native values in modern societies. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. Forbes

**157. Native American Religion and Philosophy (4)**

Lecture—4 hours. Prerequisite: upper division standing; course 1 or Anthropology 2. Religious and philosophical thinking of Native American people with emphasis upon North America. Offered in alternate years. GE credit: Div.—(II.) Hernández-Ávila

**180. Native American Women (4)**

Lecture/discussion—4 hours. Prerequisite: course 1 or 10 or Women's Studies 50. Social and cultural foundations of the Native American women's personality, including the development of the Indian girl and the life phases of mature womanhood. Autobiographical and biographical texts are utilized. GE credit: SocSci, Div, Wrt.—II. (II.)

**181A-181B-181C. Native American Literature (4-4-4)**

Lecture—4 hours. Prerequisite: English 3, Comparative Literature 1, 2, 3, or any course from the General Education Literature Preparation List. Analysis of works by or about Native Americans including novels and autobiographies, analysis of Native American poetry, oral literature, songs, and tales. (A), the novel and fiction; (B), nonfiction works by native authors; (C), traditional literature and poetry. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I, II. (I-II-III.) Hernández-Ávila, Montejó

**184. Contemporary Indigenous Literature of Mexico (4)**

Lecture—4 hours. Prerequisite: course 1 or 10; course 181A or 181C recommended. Reading knowledge of Spanish required. Contemporary indigenous literature of Mexico, with a focus on the genres (poetry, fiction, drama, essay); analysis of cultural, historical, and spiritual themes, imagery, styles and performances; biographies of and influences on the Native writers themselves. Offered in alternate years.—III. Hernández-Ávila

**188. Special Topics in Native American Literary Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing and consent of instructor. Special topics drawn from Native American literature. May be repeated for credit when a different topic is studied. GE credit: Div, Wrt.—I, II. (II.) Hernández-Ávila, Montejó

**190. Seminar in Native American Studies (2)**

Discussion—2 hours. Prerequisite: senior standing. Seminar of critical issues faced by Native American people. (P/NP grading only.)—II. (II.)

**191. Topics in Native American Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing and consent of instructor. Selected topics in Native American ethno-history, development, culture, and thought. May be repeated for credit when a different topic is studied. GE credit: ArtHum, Div.—I, II. (I.)

**194HA-194HB. Special Studies for Honors Students (4-4)**

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing culminating in the completion of a senior honors thesis or project under direction of faculty adviser. (Deferred grading only, pending completion of sequence.)

**195. Field Experience in Native American Studies (12)**

Field work—36 hours. Prerequisite: senior standing and major in Native American Studies, completion of lower division major requirements, and course 161. Field work with governmental and community groups, under supervision of faculty adviser and sponsor. Knowledge acquired in other courses to be applied in field work. (P/NP grading only.)—I, II, III. (I, II, III.)

**196. Senior Project in Native American Studies (4)**

Discussion—1 hour; independent study—3 hours. Prerequisite: senior standing and major in Native American Studies, course 195 (may be taken concurrently), and consent of instructor. Guided research project that enables student to apply the theory and research principles from major course work. Final product is to be a major senior project or thesis. (P/NP grading only.)—I, II, III. (I, II, III.)

**197TC. Community Tutoring in Native American Studies (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of major committee; upper division standing with major in Native American Studies. Supervise tutoring in community. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****200. Basic Concepts in Native American Studies (4)**

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Analysis of the characteristics of the discipline of Native American Studies. Concentration is on both traditional and contemporary native scholarship and thought as well as the theoretical and methodological consequences derived from application of these ideas. Offered in alternate years.—(I.) Hernández-Ávila

**202. Advanced Topics in Native American Studies (4)**

Seminar—4 hours. Prerequisite: graduate standing. Advanced study of selected topics or themes relevant to the field of Native American studies. Topics will be announced at the time of offering. May be repeated for credit when topic differs.—I. (I, III.) Hernández-Ávila, Montejó, Macri

**212. Community Development for Sovereignty and Autonomy (4)**

Seminar—4 hours. Prerequisite: graduate standing and consent of instructor. Examines a sample of contemporary indigenous communities from south, central and north America with the goal of understanding and evaluating the strategies adopted by Native American communities to develop and implement forms of sovereignty or autonomous self-management. Offered in alternate years.—II. Varese

**213. Native Criminality and "Deviance" in Native Communities (4)**

Seminar—4 hours. Prerequisite: graduate standing. Examination of "deviance" in Native communities with focus on Native criminality in North America. Analysis of the concept of deviance from several different world views. Readings from a range of theories to incorporate varying theoretical perspective on criminality and deviance.

**220. Colonialism/Racism and Self-Determination (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Study of imperial/colonial systems and their psychosocial impacts upon oppressors and oppressed, of racism as the outgrowth of colonialism, and of nationalism, ethnic conflict and self-determination. Focus on indigenous peoples, but other groups will also be considered. Offered in alternate years.—(II.) Varese

**224. Performance in the Americas (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Ethnomusical and anthropological approaches to study of public performance in the Americas. New ways of looking at music, dance, rituals and other forms of public expressive forms normally called “folklore” or “popular culture.” Offered in alternate years. Not open for credit to students who have completed Music 224. (Former course Music 224.)—(II.) Mendoza

**250. Indigenous Critique of Classic Maya Ethnographies (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Construction of the Maya world through ethnographic writing during the present century. Deconstruction of ethnographies about the Mayans considering the modern theories and social/anthropological critiques of modern ethnographies. Offered in alternate years.—(II.) Montejó

**280. Ethnohistorical Theory and Method (4)**

Seminar—3 hours; term paper. Discussion of the ethnohistorical method; the utilization of diverse types of data, especially documentary sources, to reconstruct socio-cultural history. Particular attention to the applied area of ethnohistory in the solution of contemporary social problems. Offered in alternate years.—III. Crum

**298. Group Study for Graduate Students (1-5)**

Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

**299. Special Study for Graduate Students (1-12)**

Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

**Professional Course**

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**Natural Sciences**

(College of Letters and Science)

**Advising Center.** 174 Physics/Geology Building (530) 752-9100; <http://naturalsciences.ucdavis.edu/>

**Committee in Charge**

- Howard W. Day, Ph.D., Chairperson (*Geology*)
- Patricia Boeschaar, Ph.D., (*Physics*)
- Charles P. Nash, Ph.D. (*Chemistry*)
- J. Richard Pomeroy, Ph.D. (*Education*)
- Wendell H. Potter, Ph.D. (*Physics*)
- Thomas L. Rost, Ph.D. (*Plant Biology*)

**The Major Program**

Natural Sciences is an interdisciplinary major that provides significant breadth in biology, chemistry, earth sciences, physics and mathematics while offering additional depth in two of the natural sciences. It is especially designed to meet the needs of prospective science teachers, but will also serve students who wish to acquire training in more than one science. The major is sponsored by the Department of Geology.

**The Program.** The Natural Sciences curriculum offers an unusually broad training in science and mathematics. All students must complete a one year sequence in calculus, a course in statistics and one year sequences in chemistry, earth science, life science and physics. Each student will complete depth courses in two of these sciences. Prospective teachers may use these depth courses as preparation for primary and supplementary teaching credentials in science. Students who might wish to prepare for a teaching credential program should consult an advisor at their first opportunity in order to combine the prerequisites with General Education requirements.

**Career Alternatives.** The study of natural sciences prepares a student to meet the subject matter requirements for a science teaching credential in California as well as a variety of other careers. Students whose goals include business, journalism, law, or medicine may acquire a broad background in science through this curriculum.

**B.S. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>68</b>
Chemistry 2A, 2B, 2C .....	15
Biological Sciences 1A, 1B, 1C .....	15
Geology 2, 3, 3L, 50L, 60 .....	13
Mathematics 16A, 16B, 16C .....	9
Physics 7A, 7B, 7C .....	12
Statistics 100 or 102 .....	4

<b>Depth Subject Matter .....</b>	<b>42</b>
Concentration (chosen from among the four fields of concentration listed below) .....	27
Supplementary Field; chosen from among the four fields listed below. May not include the same field as the concentration. The same course may not be used to fulfill the requirements for both a Concentration and a Supplementary Field .....	15

**Total Units for the Major .....** 110

<b>Fields of Concentration:</b>	
Chemistry .....	27
Chemistry 105, 107A, 107B, 118A, 118B, 118C, 124A .....	25
Chemistry 197 or 199 .....	2
Earth Science .....	27
Geology 62, 100, 100L, 105, 108, 109, 109L, 116 .....	20
Soil Science 100 .....	4
Geology 199 .....	3
Life Science .....	27-34
Chemistry 8A, 8B or 118A, 118B, 118C .....	6-12
Biological Sciences 101 .....	4
Evolution and Ecology 100, 101 .....	8
Neurobiology, Physiology, and Behavior 101 .....	5
Neurobiology, Physiology, and Behavior 101L or Molecular and Cellular Biology 160L .....	3-4
One 199 course from Biological Sciences, Evolution and Ecology, Molecular and Cellular Biology, or Neurobiology, Physiology, and Behavior .....	1
Physics .....	27
Chemistry 107A, 110A .....	7
Geology 161, 162 .....	6
Physics 108, 122 .....	7
Physics 137 or 160 .....	3
Physics 199 .....	4

**Supplementary Fields:**

Chemistry .....	15
Chemistry 105, 107A, 118A, 124A .....	14
Approved elective .....	1
Other Chemistry or related science courses may be substituted with the prior approval of the major adviser.	
Earth Science .....	15
Geology 108, 109, 109L, 116, 138 .....	14
Approved elective .....	1
Other Geology or related science courses may be substituted with the prior approval of the major adviser.	
Life Science .....	15
Biological Sciences 101* .....	4
Evolution and Ecology 100 .....	4
Neurobiology, Physiology, and Behavior 101 .....	5
Approved electives .....	2
Other Biological Sciences or related science courses may be substituted with the prior approval of the major adviser.	

Physics .....	15
Physics 122 .....	3
Chemistry 107A, 110A .....	7
Geology 161 .....	3
Approved electives .....	2
Other Physics or related science courses may be substituted with the prior approval of the major adviser.	
*Note: Students pursuing a concentration in earth science or physics may not have had the necessary prerequisites in organic chemistry.	

**Major Advisers.** H. W. Day (*Geology*), D. A. Osleger (*Geology*)

**Nature and Culture**

(College of Letters and Science)

\_\_\_\_\_, Program Director

**Program Office.** 176 Voorhies Hall (530) 752-2257; <http://www.nac.ucdavis.edu>

**Committee in Charge**

- Michael Barbour, Ph.D. (*Environmental Horticulture*)
- Daniel Cox, Ph.D. (*Physics*)
- Laurie Glover, Ph.D. (*English*)
- W. Jack Hicks, Ph.D. (*English*)
- Scott McLean, Ph.D. (*Comparative Literature*)
- Timothy Morton, Ph.D. (*English*)
- Peter Moyle, Ph.D. (*Wildlife, Fish, and Conservation Biology*)
- David A. Osleger, Ph.D. (*Geology*)
- Ann Savageau (*Design*)
- Lenora Timm, Ph.D. (*Linguistics*)
- Louis Warren, Ph.D. (*History*)
- Michael Ziser, Ph.D. (*English*)

**The Major Program**

The Nature and Culture major is a coherent interdisciplinary set of studies that offers exploration of the complex relationships existing between human cultures and the natural world.

**The Program.** This program is the first of its kind in the country, providing a rigorous curriculum that interweaves courses in the natural sciences, the humanities, and the social sciences, supplemented by elective course work in these and other fields of study. There are at present three required core courses in Nature and Culture itself, a principal function of which is to tie together knowledge and experience gained in the various disciplines that students will work in as they progress through their studies.

**Career Alternatives.** Students completing an A.B. degree in Nature and Culture will be qualified to enter most professional schools, such as medicine and law, and many graduate programs in science and the humanities, especially those with an emphasis on interdisciplinary study. Students expecting to apply for highly specialized fields will need to plan their elective work carefully. The degree program provides excellent preparation for careers in business and government, as well as for the credential program for K-12 teaching. When combined with courses in non-fiction writing, the Nature and Culture curriculum will prepare students for the burgeoning fields of environmental writing and environmental journalism.

**A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter .....</b>	<b>38-41</b>
Nature and Culture 1 .....	4
Geology 3-3L and 50-50L and Geology 36 or Astronomy 2; or Chemistry 2A-2B and Biological Sciences 1A .....	13-15
Biological Sciences 1B-1C .....	10
Environmental Science and Policy 30, or Anthropology 2, or Geology 10 .....	3-4
Comparative Literature 1, 2, or 3, or English 3 .....	4
Comparative Literature 20 .....	4

**Recommended.** Statistics 13, 32, 102, or 103.

**Depth Subject Matter** ..... 44

Nature and Culture 100 and 180	8
Nature and Culture 120 or 140, or American Studies 157, or Veterinary Medicine 170	4
Environmental Science and Policy 100, or Evolution and Ecology 101 or Plant Biology 147	4
Anthropology/Environmental Science and Policy 101 or 102	4
English 184 or Native American Studies 181A, 181B, or 181C, or Comparative Literature 120	4
Electives, a minimum of 20 units selected in consultation with an adviser from one or two thematic clusters. Possible clusters include Human Evolution and Ecology, Human Culture and Society, Indigenous Peoples, California and the Southwest, Art and Literature, Earth and Environment, The Impact of Humans on the Environment, Environmental Law, Policy and Planning. A representative list of clusters and courses is available from advisers and from the Program office	20

**Total Units for the Major** ..... 82-85

**Major Advisers.** Consult the Program office.

**Minor Program Requirements:**

UNITS

**Nature and Culture**..... 24

Nature and Culture 1	4
Nature and Culture 100	4
Environmental Science and Policy 100, or Evolution and Ecology 101, or Plant Biology 147	4
Nature and Culture 120 or 140, or Veterinary Medicine 170	4
Anthropology/Environmental Science and Policy 101 or 102	4
English 184 or Native American Studies 181A, 181B, or 181C	4

**Courses in Nature and Culture (NAC)**

**Lower Division Courses**

**1. Intersections of Nature and Culture (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: satisfaction of Subject A requirement; Comparative Literature 1, 2 or 3, or English 3 recommended. Nature and culture as human constructs, conditioned by both time and place; importance of nature in human thought, both scientific and spiritual; scientific and literary view of the relation between nature and culture, including forms of observation and methods of analysis. GE credit: ArtHum or SciEng, Wrt.—II. (II.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Individual Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**100. The Culture of Nature: Theoretical Frameworks and Case Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1. Problems in nature and culture, with particular attention to integrative theoretical frameworks available for the investigation of specific issues. Case studies will vary with instructor. May be repeated once for credit when topic and instructor differ. GE credit: ArtHum or SciEng, Wrt.—III. (III.)

**120. Environmental Ethics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1. Ethical issues underlying environmental/ecological controversies, including anthropocentrism vs. ecocentrism, wilderness and species preservation, human population growth, animal rights, deep ecology, and ecofeminism. Empha-

sis is on critical examination of issues from cross-cultural, theoretical, and applied perspectives. GE credit: ArtHum, Wrt.—(III.) McLean

**130. The Nature of Exploration (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Writings and drawings of a historical period of exploration, with a focus on descriptions of nature. Consideration of what representations of the enterprise of exploration reveal about the cultural values of the explorers, and how those values persist. Offered in alternate years. GE credit: ArtHum, Wrt.—I. Glover

**140. Animal Rights (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing. Issues surrounding animal rights, including hunting, fishing, industrial husbandry and slaughter, experimentation, and pets. Emphasis on the complexities of human relations to other animals from historical, literary, and cross-cultural perspectives. Offered in alternate years. GE credit: ArtHum, Wrt.—II. McLean

**160. Art and the Natural World (4)**

Studio—6 hours. Field trips. Exploration of how the people of various cultures, from traditional to contemporary, have expressed their relationship to the natural world in art.

**180. Fieldwork in Nature and Culture (4)**

Discussion—1 hour; fieldwork—70 hours/quarter; term paper. Prerequisite: course 100 and consent of instructor. Fieldwork: one week prior to the beginning of the quarter, plus two weekends. Natural scientific, social scientific, and literary/artistic approaches to the study of nature and culture in one place, which will vary with instructor.—I. (I.)

**192. Internship in Nature and Culture (1-12)**

Internship—3-36 hours. Prerequisite: course 1. Internship in natural sciences, social sciences, or humanities on or off campus in which students use and improve their interdisciplinary skills and perspectives gained through the Nature and Culture curriculum. Supervised by a faculty member. May be repeated for credit. (P/NP grading only.)

**197T. Tutoring in Nature and Culture (1-5)**

Tutoring—3-15 hours. Prerequisite: consent of instructor. Assist in field trips, lead study sessions with groups and individual students. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Individual Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## Nematology

(College of Agricultural and Environmental Sciences)

Steven A. Nadler, Ph.D., Chairperson of the Department

**Chair Office.** 488 Hutchison Hall (530) 752-7567; <http://ucdnema.ucdavis.edu>

**Department Office.** 354 Hutchison Hall (530) 752-0300

**Faculty**

Edward P. Caswell-Chen, Ph.D., Professor  
Howard Ferris, Ph.D., Professor  
Bruce A. Jaffee, Ph.D., Professor  
Harry K. Kaya, Ph.D., Professor (*Entomology*)  
Edwin E. Lewis, Associate Professor  
Steven A. Nadler, Ph.D., Professor  
Becky B. Westerdahl, Ph.D., Professor  
Valerie M. Williamson, Ph.D., Professor

**Emeriti Faculty**

Armand R. Maggenti, Ph.D., Professor Emeritus  
Dewey J. Raski, Ph.D., Professor Emeritus

**Minor Program Requirements:**

UNITS

**Nematology** ..... 18-20

Nematology 100, 110, and Soil Science 100 ..... 10  
Two or three courses from one of the following areas ..... 8-10

(a) *Plant Science:* Microbiology 102; Entomology 100, 135, 153, 156, 156L; Evolution and Ecology 112; Plant Pathology 120, 148; Plant Biology 121; Soil Science 111, 112

(b) *Entomology:* One upper division Entomology course; Evolution and Ecology 112; Microbiology 102; Plant Biology 121; Plant Pathology 120, 148; Soil Science 102, 111, 112

**Minor Adviser.** S. A. Nadler

**Graduate Study.** Graduate degrees specializing in Nematology are offered through the Departments of Entomology and Plant Pathology, and through various Graduate Groups (Biochemistry, Ecology, Genetics, Plant Protection and Pest Management). Refer also to the Graduate Studies chapter of this catalog.

**Courses in Nematology (NEM)**

**Upper Division Courses**

**100. General Plant Nematology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1B or 10. An introduction to the classification, morphology, biology, and control of the nematodes attacking cultivated crops.—I. (I.) Ferris

**110. Introduction to Nematology (2)**

Lecture—2 hours. Prerequisite: Biological Sciences 1B or the equivalent or consent of instructor. The relationship of nematodes to human environment. Classification, morphology, ecology, distribution, and importance of nematodes occurring in water and soil as parasites of plants and animals.—II. (II.) Caswell-Chen, Nadler

**150. Revising Scientific Prose (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in English composition, understanding of English grammar and parts of speech, upper division standing in a science major, or consent of instructor. Principles of detailed revision; close analysis of writing styles in research papers, popular scientific articles, and other scientific reports; use of verb-based and noun-based writing styles. GE credit: Wrt.—II. (II.) Jaffee

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses**

**201. Molecular and Physiological Plant Nematology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: Biological Sciences 101; Plant Pathology 120, course 100 or 110. Molecular biology and physiology of nematodes using *Caenorhabditis elegans* as a model, but with emphasis on plant-parasitic species. Plant responses to nematodes. Discussion of current literature emphasized. Offered in alternate years.—II. Williamson

**203. Ecology of Parasitic Nematodes (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 101 or Plant Biology 117. Major concepts in population and community ecology of animal- and plant-parasitic nematodes. Current advances in techniques, theory, and basic information about nematode-host dynamics, and application to management of nematode diseases. Offered in alternate years.—(III.) Caswell-Chen

**204. Management of Plant-Parasitic Nematodes (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or 110. Theory, foundation, principles and practices of nematode management. Techniques and equipment used to manage nematodes and methods used to analyze their effectiveness. Offered in alternate years.—III. Westerdahl

**205. Insect Nematology and Biological Control (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: courses 100 and 110, Entomology 100 or 110. The biology of insect-parasitic nematodes, their effect on the host, and their potential as biological control agents of insect and other invertebrate pests. Application of ecological theory in classical and augmentative biological control. Offered in alternate years.—(I.) Kaya, Lewis

**206. Nematode Systematics and Evolution (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 100 recommended. Nematode diversity as revealed by morphological and molecular evidence. Laboratory experience focuses on structural features used in taxonomy. Phylogenetic relationships based on morphological and molecular data used to consider patterns of character change among taxa. Offered in alternate years.—(I.) Nadler

**210. Molecular Phylogenetic Analysis (3)**

Lecture—2 hours; laboratory—3 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as Evolution and Ecology 210.) Offered in alternate years.—(I.) Nadler, Sanderson

**245. Field Nematology (1)**

Fieldwork—6 days. Prerequisite: course 100. Six-day demonstration and field study in applied nematology including diagnosis and prediction of nematode field problem strategies for control field plot design, and establishment in association with diverse California crops. (S/U grading only.)—(I.)

**290. Seminar (1)**

Seminar—1 hour. (S/U grading only.)—II, III, (III, III.)

**290C. Advanced Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. (S/U grading only.)

**298. Group Study (1-5)**

(S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

## Neurobiology, Physiology, and Behavior

(College of Biological Sciences)

Leo M. Chalupa, Ph.D., Chairperson of the Section

Paul B. Salitsky, Ph.D., Lecturer

James D. Shaffrath, M.D., Lecturer

Grace L. Rosenquist, Ph.D., Assistant Adjunct

Professor

**The Exercise Biology Major Program**

**The Program.** The focus is on both the acute and adaptive effects of physical activity (and inactivity). Exercise biology deals with the mechanisms and consequences of activity from the molecular to the organismal (human ecological) level. We examine these mechanisms and consequences during growth, development, aging, disease and in altered environ-

mental conditions. The exercise biology major encompasses the critical aspects of an integrative program in applied human biology. The Bachelor of Arts program provides a greater breadth of knowledge in the humanities and social sciences and is more appropriate for those who wish to apply their knowledge within the human community. The Bachelor of Science program is appropriate for students who desire a strong preparation in human biology.

**Career Alternatives.** Students with further academic or professional interests in medicine and other health sciences, community service, business, sales, communications, education or coaching might find the Bachelor of Arts program attractive. The Bachelor of Science could lead to further graduate study in any field related to human biology as well as careers in medicine and other health sciences (e.g., physical therapy), biomechanics and biomedical engineering and medical equipment and pharmaceutical development and sales.

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 38-41**

Biological Sciences 1A-1B-1C ..... 15  
Chemistry 2A, 2B ..... 10  
Physics 1A-1B or 7A-7B ..... 6-8  
Psychology 1 ..... 4  
Statistics 13, 32, 100, or 102 ..... 3-4  
Psychology 41 recommended

**Depth Subject Matter ..... 40-45**

Biological Sciences 101 ..... 4  
Neurobiology, Physiology, and Behavior  
101 ..... 5  
Cell Biology and Human Anatomy 101 and  
101L ..... 7  
Exercise Biology 101, 102, 103, 104L.. 15  
One additional upper division course in  
Exercise Biology ..... 3-4  
Select one additional course from two of the  
three content areas listed below ..... 6-10  
*Sociology and Culture option:* African  
American and African Studies 100;  
Anthropology 101; Communication 161;  
Community and Regional Development  
176; Exercise Biology 120; History 178;  
History and Philosophy of Science 150;  
Science and Society 105, 120; Sociology  
122, 154, 159, 172  
*History and Philosophy option:* Dramatic  
Art 141; History 135A, 135B, 136, 139A,  
139B, 185A, History and Philosophy of  
Science 130A, 130B, 131; Philosophy  
108  
*Psychology and Communication option:*  
Agricultural and Resource Economics 112,  
Communication 134, 136; Environmental  
Science and Policy 126; Exercise Biology  
121, 122; Human Development 100C;  
Psychology 101, 121, 126, 140, 156  
No variable unit courses or Exercise  
Biology 148, 148L may be used to fulfill  
these requirements. Consult your adviser  
regularly.

Physics 7A-7B-7C or 9A-9B-9C ..... 12  
Statistics 13, 32, 100, or 102 ..... 3-4  
Psychology 1 is highly recommended for all  
students.  
Mathematics 21A-21B-21C-21D, 22A-22B,  
Physics 9A-9B-9C-9D and Engineering 5,  
35 are recommended for students interested  
in the Biomechanics option.

**Depth Subject Matter ..... 49-50**

Biological Sciences 101, 102, 103, 104..... 13  
 Neurobiology, Physiology, and Behavior 101..... 5  
 Cell Biology and Human Anatomy 101 and 101L..... 7  
 Exercise Biology 101, 102, 103, 104L..... 15  
 Completion of one Option listed below, or with adviser approval, select 3 courses as follows: 2 courses (at least 1 must have a laboratory component) from Exercise Biology 110, 111, 112, 115, 117, 125, 126 and 1 additional course from this group or from Exercise Biology 113, 116; Applied Science Engineering 115, Engineering 102; Neurobiology, Physiology, and Behavior 112, 113, 140; Nutrition 111AV; Physical Education 133..... 9-10  
*Physiology option:* Exercise Biology 111 and either 110 or 125..... 6  
 Select 1 additional course from Exercise Biology 110, 113, 116, 125; Neurobiology, Physiology, and Behavior 112, 113, 140..... 3-4  
*Biomechanics option:* Exercise Biology 115, 126..... 6  
 Select 1 course from Exercise Biology 113; Engineering 102; Applied Science Engineering 115; Neurobiology, Physiology, and Behavior 112..... 3-4  
*Applied Exercise Biology option:* Exercise Biology 112, 117..... 7  
 Select 1 course from Exercise Biology 116, 118; Nutrition 111AV, Physical Education 133..... 3  
 No variable unit courses or Exercise Biology 148, 148L may be used to fulfill these requirements. Consult your adviser regularly.

**Total Units for the Major ..... 109-120**

**Minor Program Requirements:**

UNITS

**Exercise Biology ..... 18**

At least 18 upper division units in exercise biology from one of three options..... 18  
 (a) *Biomechanics*  
 (1) Exercise Biology 103.  
 (2) Exercise Biology 113, 115, 126.  
 (3) Additional courses to complete a total of 18 upper division units. None of the variable-unit courses or Exercise Biology 148, 148L may be used to fulfill these requirements. Consult your adviser regularly.  
 (b) *Exercise Physiology*  
 (1) Exercise Biology 101.  
 (2) Minimum of three courses from Exercise Biology 110, 111, 112, 113, 116, 117, 118.  
 (3) Additional courses to complete a total of 18 upper division units. None of the variable-unit courses or Exercise Biology 148, 148L may be used to fulfill these requirements. Consult your adviser regularly.  
 (c) *Psychological Aspects*  
 (1) Exercise Biology 102.  
 (2) Exercise Biology 120, 121, 122.  
 (3) Additional courses to complete a total of 18 upper division units. None of the variable-unit courses or Exercise Biology 148, 148L may be used to fulfill these requirements. Consult your adviser regularly.

**Master Adviser.** Keith R. Williams for the Exercise Biology Major and Exercise Biology Minor

**Honors Program.** Those students with an outstanding academic record and an Exercise Biology GPA of 3.500 or higher may enter the Honors Program with the consent of a faculty adviser. An honors project must be completed consisting of 2 quarters of course 199 (at least 3 units per quarter),

2 units of course 194H, and an honors thesis. These units are taken in addition to the major requirements.

**Graduate Study.** A program of study and research leading to the M.S. degree is available through the Graduate Group in Exercise Science. For detailed information regarding graduate study, write to the Graduate Adviser, Graduate Group in Exercise Science. See also the Graduate Studies chapter of this catalog.

**Graduate Advisers.** D. Hawkins, M.P. Kaufman, C.L. Stebbins, K.R. Williams

**The Neurobiology, Physiology, and Behavior Major Program**

Neurobiology, Physiology, and Behavior is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions—they grow, reproduce, move, respond to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organ system, and the organism.

**The Program.** In the freshman and sophomore years, students majoring in Neurobiology, Physiology, and Behavior build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology, and Behavior courses and related upper division courses. Students can participate in a number of advanced laboratory courses or may design an individual, independent project guided by a member of the faculty.

**Career Alternatives.** Completion of the Neurobiology, Physiology, and Behavior major provides the foundation for advanced study leading to careers in high school teaching, college level teaching or research. It also serves as the basis for further training in the health professions, including but not limited to human and veterinary medicine, medical technology, physical therapy, pharmacy, dentistry and optometry. The major is also appropriate for those intending to seek careers in biotechnology or other biologically related industries.

**B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter ..... 60-70**

Biological Sciences 1A-1B-1C..... 15  
 Chemistry 2A-2B-2C..... 15  
 Chemistry 8A-8B or 118A-118B-118C..... 6-12  
 Mathematics 16A-16B-16C or 17A-17B-17C or 21A-21B-21C..... 9-12  
 Physics 7A-7B-7C..... 12  
 Statistics 13, 32, 100 (recommended), or 102..... 3-4

**Depth Subject Matter ..... 46-48**

Biological Sciences 101, 102, 103, 104..... 13  
 Neurobiology, Physiology, and Behavior 100, 101, 101L, 102..... 15  
 Select three or more units of laboratory course work from the following list..... 3  
 Neurobiology, Physiology, and Behavior 104L, 106, 111C, 111L, 160L, 194H; other courses with the approval of the master adviser.  
 Additional Neurobiology, Physiology, and Behavior depth unit requirement..... 12  
 All other Neurobiology, Physiology, and Behavior courses not used in satisfaction of any other requirement; or Anthropology 154A, 154B; or Entomology 104; or Exercise Biology 101, 102, 111. Courses 192, 197T, 199 may not be used to satisfy the depth unit requirement.

One course from Anthropology 151, Evolution and Ecology 100, Geology 107..... 3-4

**Total Units for Major ..... 106-118**

**Minor Program Requirements:**

**Neuroscience ..... 18**

Neurobiology, Physiology, & Behavior 100..... 4

Five courses from:

Choose at least four from following:  
 Neurobiology, Physiology, & Behavior 103, 112, 124, 126, 160, 161, 162, 163, 164, 165, 168, 169

One of the following may be completed to fulfill course requirement:

Psychology 113, 121, 129, Linguistics 175, Philosophy 103, Human Development 163

The following courses are cross-listed and either offering can be used to fulfill the course requirement: NPB 124/PSC 124, NPB 160/NSC 160, NPB 163/PSC 128

**Master Adviser.** Jack Goldberg in 191 Briggs Hall, for the Neurobiology, Physiology, & Behavior Major and the Neuroscience Minor

**Advising Center.** 188 Briggs Hall (530) 752-9696

**Graduate Study.** Information on graduate study in neuroscience, physiology or behavior may be obtained by writing the Graduate Adviser, Graduate Group Complex. See also the graduate course offerings listed under [Animal Behavior \(A Graduate Group\)](#), on page 131, [Neuroscience \(A Graduate Group\)](#), on page 397, and [Physiology](#), on page 413. See also [Graduate Studies](#), on page 97, in this catalog.

**Courses in Exercise Biology (EXB)**

**Lower Division Courses**

**10. Exercise and Fitness: Principles and Practice (3)**

Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have completed an upper division Exercise Biology course. GE credit: SciEng, Div.—II. (II.) Salitsky, Shaffrath

**90X. Lower Division Seminar (1-2)**

Lecture—1-2 hours. Prerequisite: lower division standing and consent of instructor. Gives freshman or sophomore level students the opportunity to study a special topic in the general area of Exercise Biology in a small class setting.

**92. Exercise Biology Internship (1-5)**

Internship—3-15 hours. Prerequisite: consent of instructor, dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated once for credit. (P/NP grading only.)

**97T. Tutoring in Exercise Biology (1-5)**

Tutorial—3-15 hours. Prerequisite: lower division standing and consent of instructor. Assisting the professor by tutoring students in exercise biology course-related projects. May be repeated for credit for 10 units including courses 97TC, 197T and 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.)—I, II, III. (I, II, III.)

**97TC. Tutoring Exercise Biology in the Community (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated once for credit. (P/NP grading only.)

**98. Directed Group Study**

Prerequisite: consent of instructor and chairperson. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor.

(P/NP grading only.)

**Upper Division Courses****101. Exercise Physiology (4)**

Lecture—4 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101. Physiologic responses to acute exercise, and physiologic adaptations to both chronic exercise (training) and selected environmental stresses. Emphasis on the muscular, metabolic, cardiovascular, respiratory and renal responses and adaptations to exercise. Only 1 unit of credit allowed to students who have completed Exercise Science 101. Only 3 units of credit allowed to students who have completed Exercise Science 102. Not open for credit to students who have completed Exercise Science 101 and 102 (Former Exercise Science 101 and 102).—I. (I.) Bodine, Shaffrath

**102. Introduction to Motor Learning and the Psychology of Sport and Exercise (4)**

Lecture—4 hours. Prerequisite: Psychology 1 recommended. Theoretical and practical issues in motor learning, sport psychology, and exercise psychology. Emphasis on how motor skills are acquired and retained, and on the application of social psychology and human motivation studies to human performance. Only 2 units of credit allowed to students who have completed Exercise Science 104. Only 2 units of credit allowed to students who have completed Exercise Science 105. Not open for credit to students who have completed Exercise Science 104 and 105. (Former Exercise Science 104 and 105.) GE credit: SocSci.—I, II. (I, II.) Salitsky

**103. Analysis and Control of Human Movement (4)**

Lecture—4 hours. Prerequisite: Cell Biology and Human Anatomy 101 and 101L, Physics 7A and 7B. Neurobiology, Physiology, and Behavior 101 recommended. Introduction to functional anatomy, neurophysiological basis of motor control, and biomechanics of human movement. Human movement understood in the context of body structures, basic principles of physics, and functional characteristics of nerve and muscle. Only 1 unit of credit allowed to students who have completed Exercise Science 103. Only 3 units of credit allowed to students who have completed Exercise Science 104. Not open for credit to students who have completed Exercise Science 103 and 104. (Former Exercise Science 103 and 104).—III. (III.) Williams

**104L. Exercise Biology Laboratory (3)**

Laboratory—3 hours; lecture—1 hour; discussion—1 hour. Prerequisite: course 101, 102, 103 (the last course may be taken concurrently). Principles and analytical procedures for assessing fundamental physiological, biomechanical, motor learning and motor control factors which underlie human movement and performance. Only 1 unit of credit allowed to students who have completed Exercise Science 101L. Only 1 unit of credit allowed to students who have completed Exercise Science 103. Not open for credit to students who have completed Exercise Science 101L and 103.—I, III. (I, III.) Shaffrath

**110. Exercise Metabolism (3)**

Lecture—2 hours; laboratory—five 4-hour sessions. Prerequisite: courses 101, 102; Chemistry 2A. Focus on energy metabolic pathways and fuels used during different modes of exercise. Also, exercise-induced adaptations which affect metabolism and performance will be discussed. Experiments in laboratory will utilize a variety of techniques to characterize the metabolic responses to exercise. GE credit: SciEng, Wrt.—II. (II.) Spangenburg.

**111. Environmental Effects on Physical Performance (3)**

Lecture—2 hours; laboratory—3 hours, with discussion—1 hour (alternate weeks). Prerequisite: courses 101, or consent of instructor. The effects of thermal, barometric and gravitational conditions on physiological function and physical performance of humans. Acute and chronic effects, emphasizing physiological adaptations and limitations, will be studied.—II. (II.) Shaffrath

**112. Clinical Exercise Physiology (4)**

Lecture—3 hours; laboratory—3 hours to alternate weekly with discussion—1 hour. Prerequisite: courses 101, or consent of instructor. Physical activity as a therapeutic modality is examined in normal and diseased populations (cardiovascular, pulmonary, diabetic). Assessment (graded exercise testing), exercise prescription and effects of exercise conditioning are examined in detail.—II. (II.) Shaffrath

**113. Growth and Development in Human Performance (3)**

Lecture—3 hours. Prerequisite: Cell Biology and Human Anatomy 101, and Neurobiology, Physiology, and Behavior 101. Development of human performance potential from conception to old age, including influence of exercise, athletic participation, and preventive medicine. Alterations in motor skill patterns, morphology, and body composition, and physiological capacities with aging. GE credit: SciEng.—III. (III.) Salitsky, Shaffrath

**115. Biomechanical Bases of Movement (3)**

Lecture—2 hours; laboratory—3 hours to alternate weekly with discussion—1 hour. Prerequisite: course 103 or consent of instructor. Biomechanical bases of human movement investigated; topics include musculo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application made to sport, clinical, and work environments, including extensive analysis of locomotion. GE credit: SciEng.—I. (I.) Williams

**116. Nutrition for Physically Active Persons (3)**

Lecture—3 hours. Prerequisite: course 101, Neurobiology, Physiology, and Behavior 101. The role of nutrition and exercise in modifying metabolism, body composition, performance and health of humans.—III. (III.) Meredith

**117. Exercise and Aging in Health and Disease (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 101 or 113 (concurrently). Etiology of and standard therapy for various diseases associated with aging (e.g., cardiovascular, pulmonary and renal diseases, diabetes, obesity, lipemias, etc.). Exercise will then be considered as a protective and/or therapeutic modality. GE credit: SciEng.—III. (III.) Shaffrath,

**120. Sports in American Society (4)**

Lecture—3 hours; discussion—1 hour. Sociological approaches to the study of sport and contemporary American culture, including sport's interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as Physical Education 120.) GE credit: SocSci, Div.—I, II. Salitsky

**121. Sport Psychology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 102. Consideration of major theories, research findings and methods of data collection in sport psychology through a critical examination of relevant experimental, clinical, and field data.—III. (III.) Salitsky

**122. Psychological Effects of Physical Activity (3)**

Lecture—3 hours. Prerequisite: Psychology 1; upper division standing. Physical activity is evaluated in terms of its ability to enhance the quality of life. Topics studied include: individual factors (self concept, type A); special populations (elderly, cardiovascular); and mental health changes (depression, anxiety).—II. (II.) Salitsky

**125. Neuromuscular and Behavioral Aspects of Motor Control (3)**

Lecture—2 hours; discussion—1 hour to alternate weekly with laboratory—2 hours. Prerequisite: course 101. Factors which affect control of movement from neuropsychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and

closed loop theories, motor programming, cognitive learning strategies, and the effects of biochemical and biomechanical influences.—III. (III.) Bodine.

**126. Tissue Mechanics (3)**

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: course 103 or Engineering 45 or consent of instructor. Structural and mechanical properties of biological tissues including bone, cartilage, ligaments, tendons, nerves, and skeletal muscle. (Same course as Biomedical Engineering 126.) GE credit: SciEng.—II. (II.) Hawkins

**148. Theory and Practice of Exercise Testing (1)**

Lecture/discussion—1 hour. Prerequisite: courses 101, 112 (may be taken concurrently); current CPR. Theory and practice of exercise testing applied to older adult populations. Physiological responses to and limitations of exercise testing. Application of exercise testing and training to healthy and diseased populations. (P/NP grading only).—I, III. (I, III.) Casazza

**148L. Adult Fitness Testing Laboratory (1)**

Laboratory—3 hours. Prerequisite: courses 148 (concurrently); current CPR. Testing symptomatic and asymptomatic older adults for functional aerobic capacity, body composition, blood lipids, pulmonary function, and cardiovascular disease risk. Counseling adults in appropriate exercise programs and lifestyle modifications. Two quarters minimum; third quarter permitted. (Former course Physical Education 148L.) (P/NP grading only).—I, III. (I, III.) Casazza

**192. Exercise Biology Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor, dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required. May be repeated up to 15 units of credit, including course 92. (P/NP grading only.)

**194H. Research Honors (2)**

Independent study—6 hours. Prerequisite: senior standing, minimum of 6 units of course 199, 3.500 GPA or greater in major courses, consent of honors thesis adviser. Completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty adviser, culminating in written honors thesis. (P/NP grading only).—I, II, III. (I, II, III.)

**197T. Tutoring in Exercise Biology (1-5)**

Tutorial—3-15 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in exercise biology course-related projects. May be repeated up to 10 units of credit including courses 97T, 97TC and 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only).—I, II, III. (I, II, III.)

**197TC. Tutoring Exercise Biology in the Community (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 10 units of credit including courses 97T, 97TC, 197T. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor and chairperson. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of chairperson. (P/NP grading only.)

**Courses in Neurobiology, Physiology, and Behavior (NPB)****Lower Division Courses****10. Elementary Human Physiology (4)**

Lecture—3 hours; discussion—1 hour. Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems

and how they function in homeostasis and human health. Not open for credit to students who have completed course 101. GE credit: SciEng.—III. (III.) Bautista, Antognini

### 12. The Human Brain and Disease (3)

Lecture—3 hours. Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson's, Alzheimer's, leprosy, amnesia and schizophrenia. Intended for non-science majors. Not open for credit to students who have completed courses 100, 101, 112, or Psychology 121. GE credit: SciEng.—I. (I.) Recanzone

### 14. Illusions: Fooling the Brain (3)

Lecture—3 hours. Introduction to perceptual processing in the human nervous system; illusions. GE credit: SciEng.—II. (II.) Ditterich

### 15. The Physiology of Human Aging (4)

Lecture—3 hours; discussion—1 hour. A broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. Some age-associated diseases will also be examined. Intended for non-science majors. Not open for credit to students who have completed Biological Sciences 15. GE Credit: SciEng.—I. (I.) Bautista

### 90A. Lower Division Seminar: Issues in Body Weight Regulation (2)

Seminar—2 hours. Prerequisite: lower division standing, consent of instructor. Critical examination of issues in body weight regulation through shared readings, discussions, written assignments, debates and oral presentations. Limited enrollment.—II. (II.) C. Warden, N. Warden

### 90B. Human Color Perception (2)

Seminar—2 hours; term paper. Prerequisite: lower division standing. The neural determinants of color appearance and why we see the world in the way we do. Demonstrations of color phenomena and what they tell us about the human brain. Limited enrollment. GE credit: ArtHum or SciEng, Wrt.—II. (II.) Werner

### 90C. Current Issues in Animal Behavior (2)

Seminar—2 hours. Prerequisite: lower division standing. The mechanisms and outcomes of sexual selection (mate choice and mate competition). Theory, current models and evidence that supports or refutes the models. Limited enrollment.—II. (II.) Hedrick

### 90D. Lower Division Seminar: Current Issues in Reproductive Endocrinology (2)

Seminar—2 hours. Prerequisite: lower division standing. The integrative roles of reproductive hormones in mammalian reproduction and health. Current theory and models regarding hormone function and use in reproductive health and contraception, and evidence that supports or refutes the models.—II. (II.)

### 90E. Biology of Aging (2)

Seminar—2 hours. Prerequisite: freshman standing. Current theories on the biology of aging covering genetic, biochemical, and physiological aspects. Emphasis on critical evaluation of controversial and contemporary issues.—I. (I.)

### 91C. Research Conference (1)

Discussion—1 hour. Prerequisite: Lower division standing in Neurobiology, Physiology, and Behavior or related biological science and consent of instructor; concurrent enrollment in course 99. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. (P/NP grading only.)—I, II, III. (I, II, III.)

### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the section of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty. (P/NP grading only.)

### 98. Directed Group Study (1-5)

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

### 99. Special Study for Undergraduates (1-5)

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

### Upper Division Courses

#### 100. Neurobiology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B; Physics 5C or 7C recommended. Brains and nervous systems, neurons and neural circuits. Vision, hearing, and feature extraction by the central nervous system. Development of nervous systems. Coordination of movement. The cell biology of learning and memory. Perception, cognition, and disorders of the brain. Not open for credit to students who have completed course 112, 160, 161 or 162, or Neuroscience 221 or 222.—I, II, III. (I, II, III.) Chapman, Mulloney, Sutter

#### 101. Systemic Physiology (5)

Lecture—5 hours. Prerequisite: Biological Sciences 1B; Physics 1B or 7C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Only three units of credit awarded for students having taken Biomedical Engineering 116.—I, II, III. (I, II, III.) Bautista, DeBello, Goldberg, Furlow, Ishida, Sillman, Usrey, Weidner

#### 101L. Systemic Physiology Laboratory (3)

Laboratory—3 hours; discussion—2 hours. Prerequisite: course 101 prior to taking 101L recommended, but 101 may be taken concurrently. Selected experiments to illustrate functional characteristics of organ systems discussed in course 101.—I, II, III. (I, II, III.) Bautista, Goldberg, Liets

#### 102. Animal Behavior (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed course 155. (Former course 155.)—II, III. (II, III.) Hahn, Nevitt

#### 103. Cellular Physiology/Neurobiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103 and 104; Physics 7C recommended. Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells, and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed course 100B. (Former course 100B.)—II. (II.) Pappone

#### 104L. Cellular Physiology/Neurobiology Laboratory (4)

Lecture—1 hour; laboratory—five 6-hour sessions and discussion—five 2-hour sessions to alternate weekly; extensive writing. Prerequisite: course 100 or 101 and Biological Sciences 103 and 104. Experiments in the physical and chemical processes of cells and tissues. GE credit: Wrt.—II. (II.) Liets

#### 105. Introduction to Computer Models (4)

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: Mathematics 16C or the equivalent, Physics 7C, Chemistry 2C, and course 100 or 101. Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applications include membrane transport, ionic channels, action potentials,  $Ca^{2+}$  oscillations, respiration, and muscle contraction. Offered in alternate years.

#### 106. Experiments in Neurobiology, Physiology, and Behavior: Design and Execution (3)

Laboratory—7.5 hours; discussion—0.5 hours. Prerequisite: course 100 or 101 or 102, and 199 and consent of instructor. Design and execution of experiments in neurobiology, physiology, and/or behavior. Students choose and design a project in

consultation with the sponsoring faculty member. May be repeated once for credit to complete the project, with consent of instructor. An additional repeat is permitted for a different project under the guidance of another faculty member. (P/NP grading only.)—I, II, III. (I, II, III.) Rosenquist

#### 111C. Advanced Systemic Physiology Laboratory (3)

Lecture—1 hour; laboratory—6 hours. Prerequisite: courses 101, 101L, Statistics 13; course 112, 113, or 114 recommended. Interfacing physiological recording equipment with microcomputers; data acquisition and analysis using the microcomputer; data interpretation within the framework of physiological concepts.—Sutter

#### 111L. Advanced Systemic Physiology Laboratory (3)

Lecture—1 hour; laboratory—6 hours; discussion—2 hours (laboratory and discussion alternate weekly). Prerequisite: courses 101, 101L. Selected comprehensive experiments in the autonomic nervous system, the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches using several species in demonstrating the physiology of organ systems. GE credit: Wrt.—I, III. (I, III.) Liets

#### 112. Neuroscience (3)

Lecture—3 hours. Prerequisite: course 100 or 101. Presentation of concepts in neuroscience including sensory systems, motor systems, and higher neural integration. Emphasis on mammalian nervous system.—I. (I.) Carstens

#### 113. Cardiovascular, Respiratory, and Renal Physiology (4)

Lecture—4 hours. Prerequisite: course 101; Chemistry 8B, Physics 7B and 7C recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance.—II. (II.) Goldberg

#### 114. Gastrointestinal Physiology (3)

Lecture—3 hours; term paper. Prerequisite: course 101; Biological Sciences 103 recommended. Advanced gastrointestinal physiology covering absorption, secretion, motility, and special emphasis on endocrinology and innervation. Emphasis will be on physiology of the gastrointestinal tract; some pathology and nutritional items will be covered. GE credit: Wrt.—I. (I.) Bautista

#### 117. Avian Physiology (3)

Lecture—3 hours. Prerequisite: course 101 or Biological Sciences 1B. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems.—III. (III.) Millam

#### 121. Physiology of Reproduction (3)

Lecture—3 hours. Prerequisite: course 101. Physiological mechanisms related to reproduction, breeding efficiency, and fertility, with special reference to domestic animals.—II. (II.) Berger

#### 121L. Physiology of Reproduction Laboratory (1)

Laboratory—3 hours. Prerequisite: course 121 recommended (may be taken concurrently). Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.)—II. (II.) Berger

#### 122. Developmental Endocrinology (3)

Lecture—3 hours. Prerequisite: course 101. Hormonal control of development, maturation and senescence from the cellular to organismal level, with emphasis on the human. Prenatal and neonatal life, childhood and adolescence, adulthood and pregnancy, as well as the endocrinology of aging.—I.

#### 123. Comparative Vertebrate Organology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A and 1B. Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to per-

form diverse physiological functions. (Same course as Anatomy, Physiology and Cell Biology 100.)—II. (II.) Bautista

#### 124. Comparative Neuroanatomy (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: Psychology 101, or course 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124.)—II. (II.) Krubitzer, Recanzone

#### 125. Comparative Physiology: Neurointegrative Mechanisms (3)

Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: neurointegrative mechanisms of integration including aspects of phylogenetic development at both neuronal and systemic levels. Woolley

#### 126. Comparative Physiology: Sensory Systems (3)

Lecture—3 hours. Prerequisite: course 100 or 101. Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanosensitive systems (audition, lateral lines, touch, echolocation, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electroreception, and pain. Emphasis on receptors.—II. Sillman

#### 127. Comparative Physiology: Circulation (3)

Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: circulation. Comparative approach to cardiovascular function in vertebrates and invertebrates.—II. (II.) Weidner

#### 128. Comparative Physiology: Endocrinology (3)

Lecture—3 hours. Prerequisite: course 101. Comparison of physiological functions in the animal kingdom: animal hormones and their functions.—II. (II.) Furlow, Chang

#### 129. Comparative Physiology: Respiration (3)

Lecture—3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: respiration.

#### 130. Physiology of the Endocrine Glands (4)

Lecture—4 hours. Prerequisite: course 101. Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease.—I. (I.) Adams

#### 131. Physiological Genomics (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, and 101, upper division standing. Genomics and its role in elucidating physiological and pathophysiological mechanisms; bioinformatics.—I. (I.) Warden

#### 139. Frontiers in Physiology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 100 and 101; 102 (may be taken concurrently). Lectures by leading authorities and discussion of the latest research in newly emerging areas in physiology. Offered every third year.—(III.)

#### 140. Principles of Environmental Physiology (3)

Lecture—3 hours. Prerequisite: course 101; Biological Sciences 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/ mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.)—II. (II.) Fuller

#### 141. Physiological Adaptation of Marine Organisms (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 103. Residence at Bodega Marine Laboratory required. Physiological adapta-

tion to the environment among organisms in marine and estuarine habitats. (See Bodega Marine Laboratory Program.)—III. (III.) Chang, Clegg

#### 141P. Physiological Adaptation of Marine Organisms/ Advanced Laboratory Topics (5)

Laboratory—12 hours; discussion—1 hour. Prerequisite: course 141 concurrently. Residence at Bodega Marine Laboratory required. Scientific research from hypothesis to publication, including training in methods of library research. Research related to topic covered in course 141. Final presentation both oral and written. (See Bodega Marine Laboratory Program.)—III. (III.) Chang, Cherr

#### 150. Advanced Animal Behavior (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 102 or Psychology 101. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals. (Same course as Psychology 122.)—III. (III.) Owings

#### 152. Hormones and Behavior (3)

Lecture—3 hours. Prerequisite: course 101, and either course 102 or Psychology 101. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Psychology 123.)—III. (III.) Bales, Furlow, Hahn

#### 159. Frontiers in Behavior (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 100, 101, 102. Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every third year.

#### 160. Molecular and Cellular Neurobiology (3)

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: course 100, Biological Sciences 101 and consent of instructor. Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intracellular signal transduction pathways, synaptic physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neuromodulation of synaptic circuitry. (Same course as Neuroscience 160.)—III. Burns, Chen, Mulloney

#### 160L. Advanced Cellular Neurobiology Laboratory (4)

Laboratory—12 hours. Prerequisite: course 160, Physics 7C recommended. Students will learn to record neural activity, to interpret their recordings, and to label neurons with antibodies against neurotransmitters. Mulloney

#### 161. Developmental Neurobiology (3)

Lecture—3 hours. Prerequisite: course 100 or 101. Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives.—III. (III.) Chalupa, McAllister

#### 162. Neural Mechanisms of Behavior (3)

Lecture—3 hours. Prerequisite: course 100 or 101. The relationship between brain and behavior. Identification and analysis of the relevant neural circuits involved. Examples of systems to be considered are birdsong, locomotion, echolocation.—III. (III.) Britten

#### 163. Information Processing Models in Neuroscience and Psychology (4)

Lecture—3 hours; term paper. Prerequisite: Mathematics 16B, Physics 7B, course 100 or Psychology 101. Basic mathematical modeling techniques used in neuroscience and psychology. Specific topics include linear systems theory, Fourier transforms, neural networks, adaptive systems, probabilistic

inference and information theory. Emphasis on understanding information processing in neural systems. (Same course as Psychology 128.)—II. Sutter

#### 164. Mammalian Vision (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100, 112, or Psychology 101. Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision.—II. Britten, Werner

#### 165. Neurobiology of Speech Perception (3)

Lecture—3 hours. Prerequisite: course 100 or 101. Interdisciplinary approach to speech perception with emphasis on functional neuroanatomy and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development, and hearing impairment.—I. (I.) Miller

#### 168. Neurobiology of Addictive Drugs (4)

Lecture/discussion—4 hours. Prerequisite: course 100 or 101 or the equivalent. Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opiates (morphine, heroin, methadone), amphetamines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and anti-depressants.—III. (III.) Liets

#### 169. Frontiers in Neurobiology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: courses 100 and 101, course 102 (may be taken concurrently). Lectures by leading authorities and discussion of the latest research in newly emerging areas in neurobiology. Offered every third year.—III.

#### 190C. Research Conference (1)

Discussion—1 hour. Prerequisite: upper division standing in Neurobiology, Physiology, and Behavior or related biological science and consent of instructor; concurrent enrollment in course 199. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in physiology. (P/NP grading only.)

#### 194HA-194HB-194HC. Neurobiology, Physiology, and Behavior-Honors (1-4-2)

Laboratory—3-12 hours. Prerequisite: senior standing; minimum 3.500 GPA in courses counted toward major; approval by the Master Adviser. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 197T. Tutoring in Neurobiology, Physiology, and Behavior (1-5)

Discussion—2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Section's regular courses. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 198. Directed Group Study (1-5)

(P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Graduate Courses

#### 217. Advanced Avian Physiology (1)

Project—1 hour. Prerequisite: course 117 concurrently and graduate standing. Study in depth of a topic in avian physiology through development of a lecture with associated instructional materials such as lesson plan, readings, presentation, and evaluation aids. (S/U grading only.)—III. (III.) Millam

**222. Systems Neuroscience (5)**

Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as Neuroscience 222.)—II. (II.) Usrey

**245. Computational Models of Cellular Signaling (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits.—II. (II.)

**247. Topics in Functional Neurogenomics (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as Neuroscience 247.)—III. Choudary

**261A. Topics in Vision: Eyes and Retinal Mechanisms (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing, course 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neuroscience 261A and Molecular, Cellular, and Integrative Physiology 261A.) (S/U grading only.)—(I.) Ishida

**261B. Topics in Vision: Systems, Psychophysics, Computational Models (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor, course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Neurobiology, Physiology, and Behavior 261B and Molecular, Cellular, and Integrative Physiology 261B.) (S/U grading only.) Offered in alternate years.—II. Britten

**261C. Topics in Vision: Clinical Vision Science (2)**

Lecture/discussion—2 hours. Prerequisite: courses 261A and 261B or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neuroscience 261C and Molecular, Cellular, and Integrative Physiology 261C.) Not offered every year. (S/U grading only.)—(III.) Werner

**263. Modeling in Systems Neuroscience (4)**

Lecture—3 hours; lecture/laboratory—1 hour. Prerequisite: consent of instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electroreception, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity. Offered in alternate years.—Sutter

**270. How to Write a Fundable Grant Proposal (3)**

Lecture/discussion—3 hours. Prerequisite: graduate standing in a life science and consent of instructor. Familiarization with the skills required to craft a successful grant proposal submitted to extramural agencies such as NIH and NSF.—(III.) Chalupa

**285. Literature in Visual Neuroscience (2)**

Seminar—2 hours. Critical presentation and discussion of current literature in visual neuroscience. (Same course as Neuroscience 285.) May be repeated for credit if topic differs. (S/U grading only.)—I, II, III. (I, II, III.) Usrey, Britten, Ditterich

**291. Auditory Neuroscience (1)**

Seminar—0.5 hours; discussion—0.5 hours. Prerequisite: course 100 or 112 or Neuroscience 222 or the equivalent. Exploration of various important aspects of auditory physiology, behavior and psychophysics through review of original literature. New topic each quarter. May be repeated for credit with consent of instructor. (S/U grading only.)—I, II, III. (I, II, III.) Recanzone, Sutter

## Neuroscience

See **Neurobiology, Physiology, and Behavior**, on page 392; and **Neuroscience (A Graduate Group)**, below.

## Neuroscience (A Graduate Group)

David Amaral, Ph.D., Chairperson of the Group

**Group Office.** 148 Center for Neuroscience (530) 757-8845; <http://neuroscience.ucdavis.edu/ngg>

**Faculty**

David Amaral, Ph.D., Professor (*Psychiatry*)  
 Kathleen Baynes, Ph.D., Associate Professor (*Neurology*)  
 Robert Berman, Ph.D., Professor (*Neurological Surgery*)  
 Ann Bonham, Ph.D., Associate Professor (*Internal Medicine, Pharmacology*)  
 Kenneth H. Britten, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Silvia Bunge, Ph.D., Assistant Professor (*Psychology*)  
 Marie Burns, Ph.D., Associate Professor (*Psychiatry*)  
 Earl E. Carstens, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Cameron Carter, Ph.D., Professor (*Psychology and Behavioral Science*)  
 Leo M. Chalupa, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Barbara Chapman, Ph.D., Associate Professor (*Neurobiology, Physiology, and Behavior*)  
 Tsung-Yu Chen, Ph.D., Assistant Professor (*Neurology*)  
 Hwai-Jong Cheng, MD, Ph.D., Assistant Professor (*Neurobiology, Physiology, and Behavior*)  
 Blythe Corbett, Ph.D., Assistant Professor (*Psychology*)  
 Gino Cortopassi, Ph.D., Associate Professor (*Molecular Biosciences*)  
 William DeBello, Ph.D., Assistant Professor (*Neurobiology, Physiology, and Behavior*)  
 Charlie DeCarli, Ph.D., Professor (*Neurology*)  
 Elva Diaz, Ph.D., Assistant Professor (*Pharmacology and Toxicology*)  
 Elizabeth Disbrow, Ph.D., Assistant Professor (*Neurology*)  
 Jochen Ditterich, Ph.D., Assistant Professor (*Neurobiology, Physiology, and Behavior*)  
 Michael Ferns, Ph.D., Associate Professor (*Anesthesiology and Pain Medicine*)  
 Dorothy W. Gietzen, Ph.D., Professor (*Anatomy, Physiology and Cell Biology*)  
 Fredric Gorin, M.D., Ph.D., Professor (*Neurology*)  
 Paul Hagerman, MD, Ph.D., Professor (*Biochemistry and Molecular Medicine*)  
 Randi Hagerman, MD, Ph.D., Professor (*Pediatrics*)  
 Linda Hall, Ph.D., Professor (*Biochemical Pharmacology*)

Andrew T. Ishida, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Petr Janata, Ph.D., Assistant Professor (*Psychology*)  
 Lee-Way Jin, Ph.D., Associate Professor (*Pathology*)  
 Edward G. Jones, M.D., Ph.D., Professor (*Psychiatry*)  
 Leah Krubitzer, Ph.D., Assistant Professor (*Psychology*)  
 Janine LaSalle, Ph.D., Associate Professor (*Medical Microbiology and Immunology*)  
 Noelle L'Etoile, Ph.D., Assistant Professor (*Psychiatry*)  
 Bruce Lyeth, Ph.D., Associate Professor (*Neurological Surgery*)  
 Richard Maddock, Ph.D., Professor (*Psychology and Behavioral Science*)  
 George (Ron) Mangun, Ph.D., Professor (*Psychology, Neurology*)  
 Kimberley McAllister, Ph.D., Assistant Professor (*Neurology*)  
 Lee Miller, Ph.D., Assistant Professor (*Neurobiology, Physiology, and Behavior*)  
 Brian Mulloney, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Pamela A. Pappone, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Isaac N. Pessah, Ph.D., Associate Professor (*Molecular Biosciences*)  
 David Pleasure, MD, Ph.D., Professor (*Neurology*)  
 Charan Ranganath, Ph.D., Assistant Professor (*Psychology*)  
 Gregg H. Recanzone, Ph.D., Professor (*Neurobiology*)  
 David Richman, M.D. Professor (*Neurology*)  
 Susan Rivera, Ph.D., Assistant Professor (*Psychology*)  
 Karen Sigvardt, Ph.D., Adjunct Professor (*Neurology*)  
 Mitchell L. Sutter, Ph.D., Assistant Professor (*Neurobiology*)  
 Diane Swick, Ph.D., Assistant Adjunct Professor (*Neurology*)  
 Jim Trimmer, Ph.D., Professor (*Pharmacology and Toxicology*)  
 Martin Usey, Ph.D., Assistant Professor (*Neurobiology, Physiology, and Behavior*)  
 Ana Elena Vazquez, Ph.D., Assistant Adjunct Professor (*Otolaryngology*)  
 John Werner, Ph.D., Professor (*Ophthalmology*)  
 Martin C. Wilson, Ph.D., Professor (*Neurobiology, Physiology, and Behavior*)  
 Ewa Wojciulik, Ph.D., Assistant Professor (*Psychology*)  
 David Woods, Ph.D., Adjunct Professor (*Neurology*)  
 Ebenezer Yamoah, Ph.D., Professor (*Otolaryngology*)  
 Andrew Yonelinas, Ph.D., Associate Professor (*Physiology*)  
 Chengji Zhou, Ph.D., Assistant Professor (*Human Anatomy*)

**Graduate Study.** The Graduate Group in Neuroscience offers programs of study leading to the Ph.D. degree. Neuroscience is a broad, interdepartmental program with faculty interests ranging from molecular biophysics of channels to cortical organization and cognition. A major goal of the program is to prepare students for careers as research scientists. Details of the program may be obtained from the Group office.

**Graduate Advisers.** R. Berman (*Neurological Surgery*), E. Carstens (*Neurobiology, Physiology, and Behavior*), B. Chapman (*Neurobiology, Physiology, and Behavior*), K. Sigvardt (*Center for Neuroscience*)

## Courses in Neuroscience (NSC)

### Upper Division Course

**160. Molecular and Cellular Neurobiology (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100, Biological Sciences 101 and consent of instructor. Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intracellular signal transduction pathways, synaptic physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neuromodulation of

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

synaptic circuitry. (Same course as Neurobiology, Physiology, and Behavior 160.)—III. (III.) Burns, Chen, Mulloney

### Graduate Courses

#### 200LA. Laboratory Methods in Neurobiology (6)

Laboratory—18 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated three times for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### 200LB. Laboratory Methods in Neurobiology (3)

Laboratory—9 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### 201. Neuroanatomy (3)

Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: consent of instructor. Mix of lectures, demonstrations, and dissections, emphasizing functional significance of neuroanatomy from a biological perspective, with comparisons between human and non-human brains. Emphasis placed on functional anatomy of the nervous system, integrated with cellular, molecular, cognitive, and developmental concepts. Limited enrollment.—I. (I.) Amaral, Jones, Usrey

#### 220. How to Give a Scientific Seminar (3)

Lecture/discussion—3 hours. Prerequisite: consent of instructor. Presentation of effective seminars. Student presentations of selected neuroscience topics in seminar format. Must be taken in two consecutive quarters.—II-III. (II-III.) McAllister

#### 221. Cellular Neurophysiology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Physiological aspects of cellular and subcellular organization of the nervous system. Neuronal cell biology, the structure and function of ion channels, electrical excitability, signaling cascades, sensory transduction and, mechanisms of synaptic transmission, and the cellular basis of learning and memory.—I. (I.) Trimmer, Yamoch

#### 222. Systems Neuroscience (5)

Lecture—4 hours; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as Neurobiology, Physiology, and Behavior 222.)—II. (II.) Usrey

#### 223. Cognitive Neuroscience (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Psychology 261.)—III. (III.)

#### 224A. Molecular and Developmental Neurobiology (2)

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Key issues in developmental and molecular neurobiology. Discussion emphasis on critical evaluation of the experiments and methods described in research papers. Readings of seminal, primary research papers, reviews, and book chapters. Reading materials will be distributed one week in advance.—II. (II.) Diaz, L'Etoile

#### 224B. Molecular and Developmental Neurobiology (2)

Lecture/discussion—2 hours. Prerequisite: course 224A or consent of instructor. Continuation of course 224A. Key issues in developmental and molecular neurobiology, focusing on developmental

topics. Discussion emphasis on critical evaluation of experiments and methods described in associated literature.—III. Chapman, McAllister

#### 226. Molecular and Developmental Neurobiology (4)

Lecture/discussion—4 hours. Prerequisite: consent of instructor. Introduction to molecular and developmental neurobiology. Topics range from neurulation to development of sensory systems and include modern molecular methods and their application in developmental neuroscience.—II. (II.) McAllister, L'Etoile

#### 243. Topics in Cellular and Behavioral Neurobiology (2)

Discussion—1 hour; seminar—1 hour. Prerequisite: consent of instructor. An advanced examination of several current problems in neurobiology. Topics will vary in different years; may be repeated for credit. (S/U grading only.)—III. (III.) Ishida

#### 247. Topics in Functional Neurogenomics (2)

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as Neurobiology, Physiology, and Behavior 247.)—II. Choudhary

#### 250. Biology of Neuroglia (2)

Lecture/discussion—1.5 hours. Prerequisite: consent of instructor. The properties and functions of non-neuronal or neuroglial cells in the mammalian central nervous system with relevance to neuronal development, physiology and injury response. Offered in alternate years. (Same course as Cell Biology and Human Anatomy 250.) (S/U grading only.)—III. Kumari

#### 261A. Topics in Vision: Eyes and Retinal Mechanisms (2)

Lecture/discussion—2 hours. Prerequisite: graduate standing, Neurobiology, Physiology, and Behavior 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neurobiology, Physiology, and Behavior 261A and Molecular, Cellular, and Integrative Physiology 261A.) (S/U grading only.)—II. (II.) Ishida

#### 261B. Topics in Vision: Systems, Psychophysics, Computational Models (2)

Lecture/discussion—2 hours. Prerequisite: consent of instructor, course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Neurobiology, Physiology, and Behavior 261B and Molecular, Cellular, and Integrative Physiology 261B.) (S/U grading only.) Offered in alternate years.—II. Olshausen

#### 261C. Topics in Vision: Clinical Vision Science (2)

Lecture/discussion—2 hours. Prerequisite: courses 261A and 261B, or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neurobiology, Physiology, and Behavior 261C and Molecular, Cellular, and Integrative Physiology 261C.) (S/U grading only.) Not offered every year.—III. Werner

#### 283. Neurobiological Literature (1)

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in neurobiology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Mulloney, Wilson

#### 284. Development of Sensory Systems (1)

Seminar—1 hour. Prerequisite: consent of instructor. Presentation and discussion of recent literature on the development of sensory systems. May be repeated for credit. (S/U grading only.)—II, III. (II, III.) Chapman

#### 285. Literature in Visual Neuroscience (2)

Seminar—2 hours. Critical presentation and discussion of current literature in visual neuroscience. (Same course as Neurobiology, Physiology, and Behavior 285.) May be repeated for credit if topic differs. (S/U grading only.)—I, II, III. (I, II, III.) Usrey, Britten

#### 290C. Research Conference in Neurobiology (1)

Discussion—1 hour. Prerequisite: graduate standing in Neuroscience or consent of instructor; course 299 (concurrently). Presentation and discussion of faculty and graduate student research in neurobiology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### 292. Cortical Plasticity and Perception (2)

Lecture/discussion—2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100 or 112 or equivalent or consent of instructor. Examination of research articles on cortical plasticity and changes in perception. Examples drawn from studies of the somatosensory, visual, auditory, and motor cortex. (Same course as Neurobiology, Physiology, and Behavior 292.) Offered in alternate years. (S/U grading only.)—(III.)

#### 298. Group Study (1-5)

(S/U grading only.)

#### 299. Research (1-12)

(S/U grading only.)

 Robert M. Hackman, Ph.D., Research Nutritionist  
 Marjorie Haskell, Ph.D., Associate Researcher  
 Peter Havel, Ph.D., D.V.M., Researcher  
 Wayne Hawkes, Ph.D., Assistant Adjunct Professor  
 M. Jane Heinig, Ph.D., Academic Administrator  
 Liping Huang, Ph.D., Assistant Adjunct Professor  
 Nancy Hudson, M.S., RD, Lecturer  
 Daniel Hwang, Ph.D., Adjunct Professor  
 Amy Block Joy, Ph.D., Specialist in Cooperative Extension  
 Lucia Kaiser, Ph.D., R.D., Associate Specialist in Cooperative Extension  
 Nancy Keim, Ph.D., Adjunct Professor  
 Shannon Kelleher, Ph.D., Assistant Researcher  
 Darshan Kelley, Ph.D., Adjunct Professor  
 Louise Lanoue, Ph.D., Assistant Researcher  
 John Newman, Ph.D., Assistant Adjunct Professor  
 John Polagruto, Ph.D., Academic Administrator  
 Hagen Schroeter, Ph.D., Assistant Researcher  
 Charles Stephensen, Ph.D., Associate Adjunct Professor

Barbara Sutherland, Ph.D., Academic Administrator  
 Marilyn S. Townsend, M.S., R.D., Specialist in Cooperative Extension  
 Janet Uriu-Adams, Ph.D., Associate Researcher  
 Marta Van Loan, Ph.D., Associate Adjunct Professor  
 Sheri Zidenberg-Cherr, Ph.D., Specialist in Cooperative Extension  
 Susan Zunino, Ph.D., Associate Adjunct Professor

**Major Programs.** See the majors in *Clinical Nutrition*, on page 174 and *Nutrition Science*, on page 402.

**Minor Program Requirements:**

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Note: If the student's major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor. Each program below lists replacement courses to fulfill the minimum unit requirement.

UNITS

**Community Nutrition ..... 24**  
 Preparation: plan in advance to include the required course prerequisites.  
 Nutrition 111AV and 111B ..... 5  
 Nutrition 118, 192 (2 units) ..... 6  
 Nutrition 120AN or 120BN ..... 4

Neurobiology, Physiology, and Behavior  
 101 ..... 5  
 Replacement courses; see note above:  
 Nutrition 114, 116A-116B, 116AL-116BL.  
 UNITS

**Food Service Management..... 25**

**Preparation.** Plan in advance to include the required course prerequisites.  
 Food Science and Technology 100A-100B, 101A-101B and 108 ..... 13  
 Food Service Management 120, 120L, 122 ..... 8  
 Agricultural and Resource Economics 112 ..... 4  
 Replacement courses; see note above:  
 Nutrition 10, 111AV, 111B, 114, 116A-116B, 120AN, or 120BN, Economics 1A-1B.  
 UNITS

**Nutrition and Food ..... 24**

**Preparation.** Plan in advance to include the required course prerequisites.  
 Nutrition 111AV and 111B ..... 5  
 Nutrition 120AN or 120BN ..... 4  
 Food Science and Technology 100A, 100B ..... 6  
 Neurobiology, Physiology, and Behavior 101 ..... 5  
 Replacement courses; see note above:  
 Nutrition 114, 116A-116B, 116AL-116BL.  
 UNITS

**Nutrition Science..... 20**

**Preparation.** Plan in advance to include the required course prerequisites.  
 Animal Biology 102 and 103, or Biological Sciences 102 and 103 and Nutrition 111AV and 111B ..... 11-15  
 Neurobiology, Physiology, and Behavior 101 ..... 5  
 Replacement courses; see note above:  
 Nutrition 114, 115, 116A-116B, 117, 120AN or 120BN, 122, 123, 124, 201, 204.

**Minor Adviser.** R.B. Rucker

**Graduate Study.** Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the Nutrition Graduate Group.

**Courses in Nutrition (NUT)**

**Lower Division Courses**

**10. Discoveries and Concepts in Nutrition (3)**

Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. GE credit: SciEng.—I, II, III. (I, II, III.) Applegate

**11. Current Topics and Controversies in Nutrition (2)**

Discussion—1.5 hours; oral reports, written reports, term paper. Prerequisite: course 10 (may be taken concurrently). Assigned readings and discussion of topics of current concern and broad interest in contemporary nutrition. Coordinated with course 10. Not open for credit to students who have taken an upper division course in nutrition. GE credit: SciEng, Wrt.—I, II, III. (I, II, III.) Applegate

**99. Individual Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**104. Environmental & Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 101; Biological Sciences 103 or Animal Biology 103. Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction path-

ways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as Environmental Toxicology 104.)—III. (III.) Oteiza, Rucker

**105. Nutrition and Aging (3)**

Lecture—3 hours. Prerequisite: course 111AV and Animal Biology 103 or the equivalent. Role of nutrition in the aging process from both an organismal/cell perspective, including demographics, theories of aging, nutrition and evolution, nutritional manipulation and life-span extension, and nutrition's impact on the diseases of aging.—III. (III.) McDonald

**111AV. Introduction to Nutrition and Metabolism (3)**

Online lecture—3 hours. Prerequisite: Chemistry 8B, Neurobiology, Physiology, and Behavior 101 or the equivalent. Introduction to metabolism of protein, fat and carbohydrate; the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status. Not open for credit to students who have completed course 101.—III. (III.) McDonald

**111B. Recommendations and Standards for Human Nutrition (2)**

Lecture—2 hours. Prerequisite: Chemistry 8B, Neurobiology, Physiology, and Behavior 101 or the equivalent. Critical analysis of the development of nutritional recommendations for humans. Topics include history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition recommendations in other countries and cultures. Not open for credit to students who have completed course 111.—III. (III.) Dewey

**112. Nutritional Assessment: Dietary, Anthropometric, and Clinical Measures (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Animal Biology 102 and 103 or course 101, course 111 (may be taken concurrently), Statistics 13. Methods of human nutritional assessment, including dietary, anthropometric, biochemical and hematological techniques, and physical examination. Principles of precision, accuracy, and interpretation of results for individuals and populations.—III. (III.) Brown

**114. Developmental Nutrition (4)**

Lecture—4 hours. Prerequisite: Animal Biology 102 and 103 or course 101; course 111. Role of nutritional factors in embryonic and postnatal development. GE credit: SciEng, Wrt.—II. (II.) Keen

**115. Animal Feeds and Nutrition (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 8B, Animal Science 41. Analyses and evaluation of feeds, influences of production, processing and storage methods on nutritive value of feeds. Animal nutrition. Diet formulation. GE credit: SciEng, Wrt.—II. (II.) DePeters

**116A-116B. Clinical Nutrition (3-3)**

Lecture—3 hours. Prerequisite: courses 111, 112 and Neurobiology, Physiology, and Behavior 101 or the equivalent. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions.—III. (III.) Steinberg, Stern, Clifford

**116AL. Clinical Nutrition Practicum (3)**

Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: course 116A (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A.—I. (I.) Steinberg

**116BL. Clinical Nutrition Practicum (3)**

Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: courses 116AL, and 116B (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and

patient education for pathological conditions covered in 116B. Continuation of course 116AL.—II. (II.) Steinberg

#### 117. Experimental Nutrition (6)

Lecture—3 hours; laboratory—6 hours; extensive writing. Prerequisite: courses 111, Biological Sciences 102 and 103, and a laboratory course in nutrition or biochemistry. Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: Wrt.—I. (I.) Clifford

#### 118. Community Nutrition (4)

Lecture—4 hours. Prerequisite: course 101 or 111, and 116A. Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education.—II. (II.) Dewey

#### 119A. International Community-Based Nutritional Assessment (1)

Lecture/discussion—1 hour. Prerequisite: course 112 (may be taken concurrently) and consent of instructor. Issues and problems related to community-based nutritional assessment in a low-income country; major nutritional problems in low-income countries; ethical issues in human investigation; survey design, data collection techniques, and data analysis; preparation for international travel; cross-cultural communication, health, and safety while living abroad.—Brown

#### 119B. International Community-Based Nutritional Assessment (6)

Lecture—2 hours; fieldwork—12 hours. Prerequisite: course 119A and consent of instructor. A six-week summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection of the study sample, collection and verification of data, and analysis and interpretation of the results; the project will be carried out by paired participation of students and faculty members of UC Davis and the collaborating foreign institution.—Brown

#### 120AN. Nutritional Anthropology (4)

Lecture—3 hours, discussion—1 hour. Prerequisite: course 2 or Geography 2 recommended. Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications. GE Credit: Div, SciEng, SocSci.—IV. (IV.)

#### 120BN. Nutritional Geography (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Geography 2 recommended. Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. GE Credit: Div, SciEng, SocSci.—IV. (IV.)

#### 122. Ruminant Nutrition and Digestive Physiology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: upper division standing; Animal Biology 103 or consent of instructor; Neurobiology, Physiology, and Behavior 101, Biological Sciences 1C, and Mathematics 16B recommended. Study of nutrient utilization as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises.—III. (III.) Fadel

#### 123. Comparative Animal Nutrition (3)

Lecture—3 hours. Prerequisite: Animal Biology 103. Restricted to upper division or graduate students. Comparative nutrition of animals; including laboratory, companion, zoo, and wild animals. Digestion and metabolic adaptations required for animal species to consume diverse diets ranging from grasses and leaves to nectar to insects and meat. Relation of

nutrition to metabolic adaptations and physiological states, including growth, reproduction, and diseases.—III. (III.) Klasing

#### 123L. Comparative Animal Nutrition Laboratory (1)

Laboratory—3 hours. Prerequisite: Animal Biology 103, course 123 (may be taken concurrently). Laboratory exercises leading to written reports on establishment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals.—III. (III.) Klasing

#### 124. Nutrition and Feeding of Finfishes (3)

Lecture—3 hours. Prerequisite: Biological Sciences 103 and Wildlife, Fish, and Conservation Biology 121. Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species.—I. (I.) Hung

#### 127. Environmental Stress and Development in Marine Organisms (10)

Lecture—4 hours; laboratory—12 hours; discussion—2 hours. Prerequisite: Environmental Toxicology 101 or Biological Sciences 102 or 104 or the equivalent; Environmental Toxicology 114A or course 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as Environmental Toxicology 127.) GE credit: SciEng.—IV. (IV.) Cherr

#### 129. Journalistic Practicum in Nutrition (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 111; a course in written or oral expression or consent of instructor. Critical analysis and discussion of current, controversial issues in nutrition; the use of journalistic techniques to interpret scientific findings for the lay public. Students will be required to write several articles for campus media. Course may be repeated once for credit.—III. (III.) Stern

#### 130. Experiments in Nutrition: Design and Execution (2)

Laboratory—6 hours. Prerequisite: consent of instructor; course 101, 110, 111, or 114 recommended. Experiments in current nutritional problems. Experimental design: students choose project and, independently or in groups of two-three, design a protocol, complete the project, and report findings. May be repeated for credit up to six times (three times per instructor) with consent of instructor.—I, II, III, IV. (I, II, III, IV.)

#### 190. Proseminar in Nutrition (1)

Seminar—1 hour. Prerequisite: senior standing; course 111. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic problems of community, national and international scope. May be repeated twice for credit with consent of instructor.—I, II, III. (I, II, III.) Zidenberg-Cherr

#### 190C. Nutrition Research Conference (1)

Discussion—1 hour. Prerequisite: upper division standing in Nutrition or related biological science; consent of instructor. Introduction to research findings and methods in nutrition. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

#### 192. Internship (1-12)

Internship—3-36 hours. Prerequisite: one upper division course in nutrition and consent of instructor. Work experience on or off campus in practical application of nutrition, supervised by a faculty member. (P/NP grading only.)

#### 197T. Tutoring in Nutrition (1-2)

Discussion/laboratory—3 or 6 hours. Prerequisite: Nutrition Science, Clinical Nutrition or related major. Completion of course 101. Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections, weekly conference with instructor in charge of course: written evaluations. May be repeated if tutoring a different course. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

(P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Graduate Courses

#### 201. Vitamin and Cofactor Metabolism (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division nutritional biochemistry and physiology course. Review of studies and relationships involving the metabolic functions of vitamins. Comparative nutritional aspects and the metabolism and chemistry of vitamins and vitamin-like compounds.—III. (III.) Rucker, Steinberg

#### 202. Advanced Nutritional Energetics (2)

Lecture—2 hours. Prerequisite: Animal Biology 102, 103, Neurobiology, Physiology, and Behavior 101 or the equivalent. History of nutritional energetics. Evaluation of energy transformations associated with food utilization. Energy expenditures at cellular, tissue, and animal levels as affected by diet and physiological state. Current and future feeding systems.—III. (III.) Sainz

#### 203. Advanced Protein and Amino Acid Nutrition (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: one upper division nutritional biochemistry and physiology course. Nutritional significance of protein and amino acids, including studies of the influence of dietary protein on digestion, absorption, metabolism, resistance to disease, and food intake. Study of dietary requirements and interrelationships among amino acids.—III. (III.) Calvert

#### 204. Mineral Metabolism (2)

Lecture—2 hours. Prerequisite: upper division nutrition or biochemistry course. Studies of metabolic functions and nutritional interrelationships involving minerals.—II. (II.) Lönnnerdal, Keen

#### 219A. International Nutrition (3)

Lecture—3 hours. Prerequisite: graduate standing; undergraduates only admitted with consent of instructor after completion of course 111AV. Epidemiology, etiology, and consequences of undernutrition, with particular focus on the nutritional problems of children and women in low income populations. Offered in alternate years.—II. Brown, Dewey

#### 219B. International Nutrition (3)

Lecture—3 hours. Prerequisite: course 219A. Intervention programs to prevent or ameliorate nutritional problems in low-income populations. Planning, implementing, and evaluating nutrition intervention programs. Offered in alternate years.—III. Brown, Dewey

#### 230. Experiments in Nutrition: Design and Execution (2)

Laboratory—6 hours. Prerequisite: consent of instructor; courses 201, 202, 203, 204, or the equivalent recommended. Student selected projects to enhance laboratory skills. Independently, or in groups of two-three students, design a protocol, carry out the project, analyze the results and report the findings. May be repeated for credit up to six times (limit of three times per instructor) with consent of instructor.—I, II, III. (I, II, III.)

#### 250. Metabolic Homeostasis (3)

Lecture—2 hours; discussion—1.5 hours. Prerequisite: passing the Nutrition Graduate Group Preliminary Examination or consent of instructor. Preference given to students with advanced standing in the Nutrition Graduate Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition energy balance.—I. (I.) Walsh

#### 251. Nutrition and Immunity (2)

Lecture/discussion—2 hours. Prerequisite: Pathology, Microbiology, and Immunology 126, Medical Microbiology 107 or the equivalent, Animal Biology 102. Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and

effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer. Offered in alternate years.—(II.) Klasing, Erickson, Stephensen

### 252. Nutrition and Development (3)

Lecture—3 hours. Prerequisite: courses 201, 202, 203, 204. Relationship of nutrition to prenatal and early postnatal development.—(II.) Keen

### 253. Control of Food Intake (3)

Lecture—2 hours; discussion—1 hour; 2 or 3 laboratory demonstrations per quarter. Prerequisite: course 201 or 202 or consent of instructor. Comprehensive study of the biochemical, nutritional, behavioral, and physiological mechanisms controlling food intake. Subject matter will be approached through lectures, laboratory demonstration and discussions where students and staff will critically evaluate the literature. Offered in alternate years.—III. Ramsey

### 254. Applications of Systems Analysis in Nutrition (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: course 202, Physiological Sciences 205A-205B or the equivalent. Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research. Offered in alternate years.—II. Fadel

### 257. Selected Topics in Nutritional and Hormonal Control of Nitrogen Metabolism (2)

Lecture—2 hours. Prerequisite: courses 201 through 204; Physiological Sciences 205A-205B or the equivalent. Quantitative and qualitative aspects of nitrogen metabolism; critical evaluation of dietary intake, hormones and diet-hormone interactions which affect nitrogen metabolism, including protein synthesis-degradation, amino acid synthesis-catabolism, nitrogen transport-excretion, depending on current literature. Offered in alternate years.—(I.) Klasing, Calvert

### 258. Field Research Methods in International Nutrition (3)

Lecture/discussion—3 hours. Prerequisite: graduate standing or consent of instructor. Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues. Offered in alternate years.—(II.) Brown, Dewey,

### 259. Nutrition and Aging (2)

Lecture—2 hours. Prerequisite: three of courses 201, 202, 203 and 204. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging. Offered in alternate years.—McDonald

### 260. Nutrition During Pregnancy (6)

Lecture—5 hours; term paper. Prerequisite: acceptance into the Master's Degree program of Advanced Studies in Maternal and Child Nutrition. Overview of the anatomical, physiological and biochemical changes that occur during pregnancy and early development. Discussion and evaluation of nutritional/lifestyle factors associated with pregnancy outcomes and nutrition programs/interventions for pregnant women.—(I.) Heinig

### 261. Lactation and Infant Nutrition (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: course 260. Overview of the physiological and biochemical processes underlying human lactation and nutritional needs of both mother and infant. Development of skills in assessment, nutrition counseling, education and support of new mothers and their families.—(II.) Heinig

### 262. Child and Adolescent Nutrition (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: course 261. Relationships among nutrition, growth, and development during childhood and adolescence. Nutritional assessment for normal and high risk groups; psychological, social, and economic factors contributing to nutritional status. Nutritional needs and interventions for special groups, including obese children/adolescents, athletes, and eating disordered.—III. (III.) Heinig

### 270. Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3)

Lecture—1 hour; discussion—1 hour; term paper. Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest, human and animal research protections. Not open for credit to students who have completed course 492B.—III. (III.) Steinberg

### 290. Beginning Nutrition Seminar (2)

Lecture/discussion—1 hour; seminar—1 hour. Prerequisite: first year graduate standing. Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics.—(I.) (I.) Schneeman, Dewey, Conklin

### 290C. Research Conference (1)

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style. (S/U grading only.)—I, II, III. (I, II, III.)

### 291. Advanced Nutrition Seminar (1)

Seminar—1 hour. Prerequisite: second-year graduate standing. Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

### 293A. Current Topics in Obesity, Food Intake and Energy Balance (3)

Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of instructor.—(I.) Stern

### 293B. Current Topics in Obesity, Food Intake, and Energy Balance with Special Topics (3)

Lecture—1 hour; seminar—1 hour; discussion—1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor.—II. (II.) Stern

### 294A. Current Topics in Developmental Nutrition (2)

Seminar—2 hours. Prerequisite: course 114 or 252 or consent of instructor. Effects of nutrition on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit when topic differs.—(I.) Lanoue

### 297T. Supervised Teaching in Nutrition (1-3)

Teaching under faculty supervision—3-9 hours. Prerequisite: graduate standing in nutrition or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. (S/U grading only.)

### 298. Group Study (1-5)

### 299. Research (1-12)

(S/U grading only.)

## Professional Courses

### 492A. Professionalism: An Academic Perspective (2)

Lecture/discussion—2 hours. Prerequisite: graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences.—II. (II.) Grivetti

### 492C. Grant Writing (3)

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: graduate standing in Nutrition or consent of instructor. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application. May be repeated once for credit with consent of instructor. Offered in alternate years.—III. Stern

## Nutritional Biology (A Graduate Group)

C. Christopher Calvert, Ph.D., Chairperson of the Group

**Group Office.** 3135 Meyer Hall  
(530) 754-7684; <http://nutrition.ucdavis.edu/ggn>

## Faculty

Lindsay H. Allen, Ph.D., R.D., Professor (*Nutrition*)  
Lars Berglund, Ph.D., Professor (*Endocrinology*)  
Kenneth H. Brown, M.D., Professor (*Nutrition*)  
C. Christopher Calvert, Ph.D., Professor (*Animal Science*)  
Andrew J. Clifford, Ph.D., Professor (*Nutrition*)  
Douglas E. Conklin, Ph.D., Associate Professor (*Animal Science*)  
Edward J. DePeters, Ph.D., Professor (*Animal Science*)  
Kathryn G. Dewey, Ph.D., Professor (*Nutrition*)  
Kent L. Erickson, Ph.D., Professor (*Cell Biology and Human Anatomy*)  
James G. Fadel, Ph.D., Professor (*Animal Science*)  
Andrea J. Fascetti, D.V.M., Ph.D., Assistant Professor (*Molecular Biosciences*)  
J. Bruce German, Ph.D., Professor (*Food Science and Technology*)  
M. Eric Gershwin, M.D., Professor (*Internal Medicine*)  
Ralph Green, M.D., Professor (*Pathology*)  
Louis E. Grivetti, Ph.D., Professor (*Nutrition, Geography*)  
Jean-Xavier Guinard, Ph.D., Professor (*Food Science and Technology*)  
Charles H. Halsted, M.D., Professor (*Internal Medicine, Nutrition*)  
Robert J. Hansen, Ph.D., Professor (*Molecular Biosciences*)  
Silas S. O. Hung, Ph.D., Professor (*Animal Science*)  
Thomas Jue, Ph.D., Professor (*Biological Chemistry*)  
Sidika E. Kasim-Karakas, M.D., Associate Professor (*Internal Medicine*)  
George A. Kaysen, M.D., Ph.D., Professor (*Internal Medicine*)  
Carl L. Keen, Ph.D., Distinguished Professor (*Nutrition, Internal Medicine*)  
Kirk C. Klasing, Ph.D., Professor (*Animal Science*)  
Bo L. Lönnerdal, Ph.D., Professor (*Nutrition, Internal Medicine*)  
Stanley L. Marks, B.V.Sc., Ph.D. Associate Professor (*Medicine and Epidemiology*)  
Roger B. McDonald, Ph.D., Professor (*Nutrition*)  
Alyson Mitchell, Ph.D., Assistant Professor (*Food Science and Technology*)  
Patricia Oteiza, Ph.D., Associate Professor (*Nutrition, Environmental Toxicology*)  
Anthony F. Philipps, M.D., Professor (*Pediatrics*)  
Jon Ramsey, Ph.D., Associate Professor (*Molecular Biosciences*)  
Helen E. Raybould, Ph.D., Professor (*Anatomy, Physiology and Cell Biology*)  
Quinton R. Rogers, Ph.D., Professor (*Molecular Biosciences*)

Robert B. Rucker, Ph.D., Distinguished Professor  
(*Nutrition, Biological Chemistry*)  
 Roberto D. Sainz, Ph.D., Associate Professor  
(*Animal Science*)  
 Jose Santos, Ph.D., Associate Professor (*VMTRC*)  
 Barbara O. Schneeman, Ph.D., Professor (*Nutrition,  
Food Science and Technology, Internal Medicine*)  
 Francene M. Steinberg, Ph.D., R.D., Assistant Profes-  
sor (*Nutrition*)  
 Judith S. Stern, Sc.D., R.D., Distinguished Professor  
(*Nutrition, Internal Medicine*)  
 Suzanne Teuber, M.D., Associate Professor  
(*Internal Medicine*)  
 Donal A. Walsh, Ph.D., Professor  
(*Biological Chemistry*)  
 Craig H. Warden, Ph.D., Associate Professor  
(*Neurobiology, Physiology, and Behavior*)  
 Vincent A. Ziboh, Ph.D., Professor  
(*Dermatology, Biological Chemistry*)

**Emeriti Faculty**

Ransom L. Baldwin, Jr., Ph.D., Professor Emeritus  
 Arthur L. Black, Ph.D., Professor Emeritus  
 Harry W. Colvin, Jr., Ph.D., Professor Emeritus  
 Robert E. Feeney, Ph.D., Professor Emeritus  
 Richard A. Freedland, Ph.D., Professor Emeritus  
 William N. Garrett, Ph.D., Professor Emeritus  
 Dorothy W. Gietzen, Ph.D., Professor Emeritus  
 C. Richard Grau, Ph.D., Professor Emeritus  
 Fredric W. Hill, Ph.D., Professor Emeritus  
 Jiro J. Kaneko, D.V.M., Ph.D., D.V.Sc.(hc), Professor  
Emeritus  
 Janet King, Ph.D., Professor Emeritus  
 F. Howard Kratzer, Ph.D., Professor Emeritus  
 Verne E. Mendel, Ph.D., Professor Emeritus  
 James H. Meyer, Ph.D., Professor Emeritus  
 James G. Morris, Ph.D., Professor Emeritus  
 Ernesto Pollitt, Ph.D., Professor Emeritus  
 Howard G. Schutz, Ph.D., Professor Emeritus  
 Aloys L. Tappel, Ph.D., Professor Emeritus  
 Pran N. Vohra, Ph.D., Professor Emeritus  
 William C. Weir, Ph.D., Professor Emeritus  
 Bruce M. Wolfe, M.D., Professor Emeritus  
 Frances J. Zeman, Ph.D., Professor Emeritus

**Affiliated Faculty**

Betty Burri, Ph.D., Associate Adjunct Professor  
(*Nutrition*)  
 Paul A. Davis, Ph.D., Research Nutritionist (*Nutrition*)

cialist (*Animal Science*)  
 Charles B. Stephensen, Ph.D., Adjunct Professor  
(*Nutrition*)  
 Marta D. Van Loan, Ph.D., Adjunct Professor  
(*Nutrition*)  
 Sheri A. Zidenberg-Cherr, Ph.D., Specialist in Coop-  
erative Extension (*Nutrition*)  
 Susan Zunino, Ph.D., Associate Adjunct Professor  
(*Nutrition*)

**Graduate Study.** The Graduate Group in Nutri-  
tional Biology offers programs of study and research  
leading to the M.S. and Ph.D. degrees. The great  
diversity of research interests represented by the fac-  
ulty members allows students to choose from a wide  
variety of themes: nutritional biochemistry, animal  
nutrition, nutrition and development, nutrient bio-

availability, human/clinical nutrition, nutrition and  
behavior, nutritional energetics, community nutrition,  
maternal and child nutrition, nutrition and endocri-  
nology, international nutrition, obesity/body compo-  
sition, physiology of digestion, nutrition and chronic  
disease, culture and nutrition, nutrition and gene  
expression, nutrition and aging, food preferences,  
nutrition and immunity, diet and exercise, dietary  
assessment, protein and lipid metabolism, food  
intake regulation, nutrition education.

**Graduate Advisers.** Consult the Nutritional Bio-  
logy Graduate Group office.

**Nutrition Science**

(College of Agricultural and Environmental Sciences)

**Faculty**

See the Department of [Nutrition](#), on page 398.

**The Major Program**

The study of nutrition encompasses all aspects of the  
consumption and utilization of food and its constitu-  
ents. Key areas of study include the biochemical  
reactions important to utilization of nutrients and  
food constituents and to the impact of diet on health  
and disease, and nutrition-related policy and public  
health issues. The nutrition science major includes  
two options for studying these areas: *nutritional bio-  
chemistry and community nutrition*.

**The Program.** Nutrition as it is taught on the Davis  
campus is a biological science and requires a com-  
plete background in chemistry and biology, along  
with calculus and either physics (nutritional biochem-  
istry option) or economics (community nutrition  
option). These courses are generally completed dur-  
ing the first two years, and along with biochemistry,  
must be completed before most nutrition classes can  
be taken. During their junior and senior years, stu-  
dents in the nutritional biochemistry option take  
additional course work in biochemistry, genetics,  
microbiology, physiology, immunology, and/or tox-  
icology. Students in the community nutrition option  
take additional course work in social and health-  
related sciences.

**Career Alternatives.** Both options are excellent  
preparation for professional or graduate training in  
medicine, public health, or other health sciences.  
The nutritional biochemistry option also provides  
preparation for technical work in nutrition in the  
animal, food, and pharmaceutical industries. The  
community nutrition option prepares students for jobs in  
administrative, teaching, or public health/public ser-  
vice positions. Students who complete the additional  
academic requirements for an internship in dietetics  
are also qualified for careers in dietetics following  
completion of an internship.

**B.S. Major Requirements:**

UNITS

**English Composition Requirement ..... 0-8**

See College requirement.

**Preparatory Subject Matter ..... 60-66**

- Anthropology 2 or Geography 2 or  
Sociology 3..... 4
- Biological Sciences 1A, 1B, 1C..... 15
- Chemistry 2A-2B-2C and 8A-8B, or 118A-  
118B, or 128A-128B and 129A ..... 21-23
- Mathematics 16A-16B ..... 6
- Physics 1A-1B (Nutritional Biochemistry  
option) or Economics 1A-1B (Community  
Nutrition option)..... 6-10
- Sociology 46A or Psychology 41 ..... 4
- Statistics 13 or Agricultural Management and  
Rangeland Resources 120..... 4

**Breadth/General Education ..... 6-24**

Satisfaction of General Education requirement

**Depth Subject Matter ..... 57-58**

- Animal Biology 102, 103 ..... 10
- Biological Sciences 101 ..... 4

- Food Science and Technology 100A and  
100B..... 8
- Neurobiology, Physiology, and Behavior  
101, 101L..... 8
- Nutrition 111AV, 111B, 112, 116A, 116B  
And 190 ..... 15
- Additional Upper Division Nutrition..... 5

**Nutritional Biochemistry option:**

- Nutrition 117..... 6

**Community Nutrition option:**

- Nutrition 118, 130/192 (2 units) ..... 6

**Restricted Electives..... 20**

Select one of the two options.

**Nutritional Biochemistry option:**

Biochemistry laboratory (Molecular and  
Cellular Biology 120L or an alternative  
selected upon consultation and approval of  
the faculty adviser) ..... 6  
 Additional courses in genetics, biochemistry,  
microbial biology, physiology, immunology,  
or toxicology, chosen from the following list in  
consultation with the faculty adviser ..... 14  
 Animal Genetics 111, Animal Science 123,  
124, Anthropology 153, Biological  
Sciences 104, Cell Biology and Human  
Anatomy 101, 101L, Environmental  
Toxicology 101, 128, Exercise Biology  
101, 102, 110, Food Science and  
Technology 104, 123-123L, 128,  
Neurobiology, Physiology, and Behavior  
112, 113, 114, 121, 130, 161, Molecular  
and Cellular Biology 121, 122, 123, 150-  
150L, 161, 162, 163, Microbiology 102,  
160, Medical Microbiology 130, Nutrition  
104, 105, 114, 127, Plant Biology 150,  
Psychology 121, Population, Health, and  
Reproduction 150, Pathology,  
Microbiology, and Immunology 126, 127,  
128.

**Community Nutrition option:**

Economics 100-101, or Agricultural and  
Resource Economics 100A-100B ..... 8  
 Additional courses chosen from the following  
list in consultation with the faculty  
adviser ..... 12  
 African American and African Studies 100,  
Agricultural and Resource Economics 15,  
120, 130, Agricultural Management and  
Rangeland Resources 150, Anthropology  
101, 122A, 126A, 126B, Asian American  
Studies 100, Chicana/o Studies 110,  
Community and Regional Development 2,  
151, 152, 153A, 153B, 172, 174, 176,  
Consumer Science 100, Economics 115A,  
115B, 130, 151A, 151B, 162, Education  
110, 153, Environmental Science and  
Policy 126, 165, Environmental Toxicology  
101, 128, Epidemiology and Preventive  
Medicine 101, 160, Exercise Biology 101,  
102, 110, 113, 117, Food Science and  
Technology 104, Geography 170, Human  
Development 100A, 100B, 100C,  
International Agricultural Development 10,  
103, 110, 111, 195A, 195B, Native  
American Studies 115, Nutrition 104, 105,  
114, 127, Plant Biology 150, Political  
Science 105, Psychology 1, 121, 126,  
130, 168, Sociology 145A, 145B, 154,  
170.

**Unrestricted Electives ..... 8-38**

**Total Units for the Degree ..... 180**

**Major Adviser.** B. L. Lönnerdal

**Advising Center** for the major is located in 3211  
Meyer Hall (530) 752-2512.

**Dietetics Internship.** To fulfill the academic  
requirements for an internship in Dietetics, choose  
the following courses from the categories in which  
they appear above: English 3 or University Writing  
Program 1, Psychology 1, Communication 1, Sociol-  
ogy 3 or Anthropology 2, Economics 1A or 1B,  
Nutrition 116AL-BL, 118. The following courses must  
also be added (some of which may meet restricted

elective requirements): Agricultural and Resource Economics 112; Food Science and Technology 101A, 101B, 108; Food Service Management 120, 120L, 122; Food Science and Technology 104, 104L. Students intending to apply for admission to a dietetic internship should contact the Advising office no later than the first quarter of the junior year for information on procedures.

**Graduate Study.** The Department of Nutrition offers programs of study and research leading to the M.S. and Ph.D. degrees in Nutrition. For information on graduate study contact the graduate adviser. See also [Graduate Studies](#), on page 97, in this catalog.

## Pharmacology and Toxicology (A Graduate Group)

Alan R. Buckpitt, Ph.D., Chairperson of the Group  
**Group Office.** 4117 Meyer Hall (Department of Environmental Toxicology (530) 752-4516; <http://www.envtox.ucdavis.edu/ptx>)

**Faculty.** The 78 faculty in the graduate group are from more than 36 academic departments and organized research units within the College of Agricultural and Environmental Sciences, the School of Medicine and the School of Veterinary Medicine.

**Graduate Study.** The program of study and research leading to the Ph.D. degree emphasizes an interdisciplinary approach to graduate student training. Many specialty areas in pharmacology and toxicology are represented in the research interests of the faculty. Graduate students can study areas of pharmacology and toxicology which emphasize the effects of chemicals in the environment, on human health, and on ecosystems. Molecular and analytical approaches are used to study reproductive, genetic and developmental, respiratory and neurological systems, as well as metabolic fate and pharmacokinetics. Career opportunities include teaching in professional schools and hospitals, laboratory research in academia, government, industry, environmental control, and agricultural and drug regulatory agencies. For detailed information on the program, contact the Group office, appropriate graduate adviser, or the group chairperson.

Individual courses are taught under departments of faculty in the group, including Environmental Toxicology, Molecular and Biological Sciences, Animal Physiology, Veterinary Medicine, and the School of Medicine.

**Graduate Advisers.** A.R. Buckpitt (*Molecular Biosciences*), J.A. Last (*Pulmonary Medicine*), M.G. Miller (*Environmental Toxicology*), K. Pinkerton (*Institute of Toxicology and Environmental Health*), R. Wu (*Pulmonary Medicine*)

## Courses in Pharmacology and Toxicology (PTX)

### Graduate Courses

#### 201. Principles of Pharmacology and Toxicology I (5)

Lecture—5 hours. Prerequisite: Biological Sciences 102 and Neurobiology, Physiology, and Behavior 101. First of three courses presenting fundamental principles of pharmacology and toxicology. Introductory overview of basic concepts in pharmacology/toxicology, followed by in-depth blocks on fate processes of chemicals in the body, fate processes in tissue selective responses, selective toxicity employed therapeutically.—I. (I.)

#### 202. Principles of Pharmacology and Toxicology II (4)

Lecture—4 hours. Prerequisite: course 201. The second of three courses presenting fundamental principles of pharmacology and toxicology. Principles of pharmacodynamics and mechanisms of drug/toxicant actions.—II. (II.)

#### 203. Principles of Pharmacology and Toxicology III (4)

Lecture—4 hours. Prerequisite: courses 201 and 202. Integrated physiological systems, cardiovascular and nervous systems and how drugs and toxicants act to perturb function.—III. (III.)

#### 230. Advanced Topics in Pharmacology and Toxicology (1-3)

Lecture/discussion/seminar—1 hour each (course format can vary at option of instructor). Prerequisite: course 201 and consent of instructor. In-depth coverage of selected topics for graduate students in Pharmacology-Toxicology and related disciplines. Topics determined by instructor in charge for each quarter.—I, II, III. (I, II, III.)

#### 290. Seminar (1)

Current topics in pharmacology and toxicology. (S/U grading only.)—I, II, III. (I, II, III.)

#### 299. Research (1-12)

(S/U grading only.)

## Philosophy

(College of Letters and Science)

James R. Griesemer, Ph.D., Chairperson of the Department

**Department Office.** 1241 Social Sciences and Humanities Building (530) 752-0607; <http://philosophy.ucdavis.edu>

### Faculty

Michael Glanzberg, Ph.D., Associate Professor  
 James R. Griesemer, Ph.D., Professor  
 Gerald Dworkin, Ph.D., Professor  
 George J. Matthey II, Ph.D., Senior Lecturer  
 Karen L. Neander, Ph.D., Professor  
 Paul Teller, Ph.D., Professor  
 Pekka Väyrynen, Ph.D., Assistant Professor

### Emeriti Faculty

Henry Allison, Ph.D., Professor Emeritus  
 Ronald A. Arbini, Ph.D., Professor Emeritus  
 William H. Bossart, Ph.D., Professor Emeritus  
 Robert C. Cummins, Ph.D., Professor Emeritus  
 Joel I. Friedlander, Ph.D., Professor Emeritus  
 Neal W. Gilbert, Ph.D., Professor Emeritus  
 Marjorie Grene, Ph.D., Professor Emerita  
 Michael Jubien, Ph.D., Professor Emeritus  
 John F. Malcolm, Ph.D., Professor Emeritus  
 Michael V. Wedin, Ph.D., Professor Emeritus  
 George Wilson, Ph.D., Professor Emeritus

### The Major Program

Philosophy addresses problems and questions that arise in all areas of human thought and experience and in all disciplines. Recurring questions about the nature of value, the good life, right conduct, knowledge, truth, language, mind, and reality are central

to philosophical study. Philosophy also investigates the methodologies and assumptions of the major disciplines in the university in order to deepen our understanding of the sciences, of mathematics, art, literature, and history, and of religion and morality. It leads us to address issues about the nature of these subjects, about the methods of reasoning characteristic of them, and about the contributions they make to our understanding of ourselves and our world.

Philosophy contributes to the liberal education of its students. The department emphasizes an analytic approach to philosophical questions, which trains students to understand and evaluate arguments and to think and write precisely and clearly. These skills are of immense value in a variety of careers.

**The Program.** The Department of Philosophy offers courses in such areas as the theory of knowledge, metaphysics, logic, ethics, and political philosophy. In addition, upper division courses are offered in moral and political philosophy, and aesthetics, and in the philosophy of religion, of mind, of language, of mathematics, of law, and of the physical, biological, and social sciences.

The problems of philosophy have important roots in past. The history of philosophy is important not only as part of the heritage of educated persons, but also because it is relevant to contemporary issues. For these reasons, the department places great emphasis on the history of philosophy, providing courses on the major figures and traditions of western philosophy.

**Career Alternatives.** Students of philosophy learn to understand and evaluate arguments and to think and write precisely and clearly. These analytical skills are assets in any career. Many of our majors have pursued graduate study in philosophy and have become philosophers in their own right. Others have pursued academic careers in related disciplines in the humanities and social sciences. Philosophy majors are well prepared for law, business, or other professional schools and have found careers in computer programming, government service, teaching, the ministry, and social work.

## A.B. Major Requirements:

UNITS

### Preparatory Subject Matter ..... 16

One course from any three of the following areas ..... 12

- (a) *General Philosophy*: Philosophy 1
- (b) *Ancient Philosophy*: Philosophy 21
- (c) *Early Modern Philosophy*: Philosophy 22N
- (d) *Philosophy of Mind*: Philosophy 13
- (e) *Ethics*: Philosophy 14, 15 or 24
- (f) *Philosophy of Science*: Philosophy 30, 31, 32 or 38
- (g) *Metaphysics*: Philosophy 101
- (h) *Theory of Knowledge*: Philosophy 102

Philosophy 12 ..... 4

### Depth Subject Matter ..... 36

Upper division units in Philosophy ..... 36  
 Note: Philosophy 101 and 102 may not be counted toward both preparatory and depth subject matter units.

### Total Units for the Major ..... 52

**Major Adviser.** G.J. Matthey

**Advising Office.** 1242 Social Science and Humanities

### Minor Program Requirements:

Students wishing to minor in Philosophy may choose a general minor or a minor specializing in logic. There are no specific courses required for the general minor, so students may create a program to suit their own interests. The range of choice in the logic specialization is limited to the courses listed.

UNITS

### Philosophy—General ..... 20

Twenty upper division units in philosophy. Philosophy 12 may be substituted for four of the upper division units.

### Philosophy—Logic ..... 20

Philosophy 12 or Mathematics 108 ..... 4  
 Philosophy 112 ..... 4  
 Select units from Philosophy 113, 131, 134, 135, 189K ..... 12

**Minor Adviser.** G.J. Matthey

**Honors Program.** The department offers an honors program, which gives qualifying majors the opportunity to work closely with faculty and graduate students.

**Courses for Non-Majors.** Students majoring in most disciplines in the university will find courses relevant to their educational or career goals. Philosophy 1 is the introductory course for non-majors. Philosophy 5 teaches critical thinking. The following courses are recommended:

- (1) *Pre-law*: 12, 14, 24, 30, 102, 112, 115, 116, 118 and, especially, 119;
- (2) *Pre-medical*: 14, 30, 108, 114, 115, 116;
- (3) *Business*: 14, 102, 112, 114, 115, 116, 117, 118, 119;
- (4) *Social Policy*: 14, 24, 101, 102, 114, 115, 116, 117, 118, 119;
- (5) *Social Sciences*: 12, 30, 31, 32, 101, 102, 103, 109, 118, 131;
- (6) *Physical Sciences*: 12, 30, 31, 32, 101, 102, 106, 107, 112, 131;
- (7) *Biological Sciences*: 30, 31, 32, 101, 102, 108, 110;
- (8) *Humanities and the Arts*: 14, 21 through 24, 101, 102, 103, 105, 114, 116, 118, 123, 160 through 175;
- (9) *Agricultural and Environmental Science and Policy*: 5, 14, 24, 30, 31, 114, 115, 116, 118.

**Department Activities.** The Philosophy department sponsors a lecture-seminar series of well-known philosophers who present papers in their fields of expertise. The department also operates ongoing faculty and graduate student colloquia. Undergraduate students are welcome to attend and join these discussions. Information can be obtained in the Department office.

**Graduate Study.** The Department of Philosophy offers programs of study leading to the M.A. and Ph.D. degrees. Detailed information may be obtained by writing to the Graduate Adviser.

**Graduate Adviser.** K. Neander

## Courses in Philosophy (PHI)

### Lower Division Courses

#### 1. Introduction to Philosophy (4)

Lecture—3 hours; discussion—1 hour. Problems of philosophy through major writings from various periods. Problems are drawn from political, aesthetic, religious, metaphysical, and epistemological concerns of philosophy. GE credit: ArtHum, Wrt.—I, II, III. (I, II, III.)

#### 5. Critical Reasoning (4)

Lecture—3 hours; discussion—1 hour. Criteria of good reasoning in everyday life and in science. Topics to be covered may include basic principles of deduction and induction; fallacies in reasoning; techniques and aids to reasoning; principles of scientific investigation; aids to clarity. Not open to students who have completed course 6. GE credit: Wrt.

#### 11. Philosophy East and West (4)

Lecture—3 hours; discussion—1 hour. Comparative treatment of select theories in Eastern and Western philosophy, e.g., of self, God, being, knowledge, enlightenment. Topics selected from the following philosophies: Eastern—Buddhist, Confucian, Hindu, Taoist; and Western—Platonist, Aristotelian, Medi-

eval Christian, Modern Rationalist/Empiricist, Kantian, Hegelian, Existentialist. GE credit: ArtHum, Div, Wrt.

#### 12. Introduction to Symbolic Logic (4)

Lecture—3 hours; discussion—1 hour. Sentence logic syntax and semantics. Truth tables. Transcription between sentence logic and English. Logical equivalence. Validity. Proof techniques.—I. (I.) Teller

#### 13. Minds, Brains, and Computers (4)

Lecture—3 hours; discussion—1 hour. Contemporary theories of the nature of the mind. The mind as a brain process and as a computer process. Ways in which neuroscience, artificial intelligence and psychology seek to understand the mind. Offered in alternate years. GE credit: SciEng or SocSci, Wrt.

#### 14. Ethical and Social Problems in Contemporary Society (4)

Lecture—3 hours; discussion—1 hour. Philosophical issues and positions involved in contemporary moral and social problems. Possible topics include civil disobedience and revolution, racial and sex discrimination, environment, population control, technology and human values, sexual morality, freedom in society. GE credit: ArtHum, Div, Wrt.

#### 15. Bioethics (4)

Lecture—3 hours; discussion—1 hour. Critical analysis of normative issues raised by contemporary medicine and biology. Possible topics include euthanasia, abortion, reproductive technologies, genetic engineering, practitioner/patient relationships, allocation of medical resources, experimentation on human subjects. GE credit: ArtHum, Wrt.—Dworkin

#### 21. History of Philosophy: Ancient (4)

Lecture—3 hours; discussion—1 hour. Survey of Greek philosophy with special attention to the Pre-Socratics, Plato, and Aristotle. GE credit: ArtHum, Wrt.

#### 22N. History of Philosophy: Early Modern (4)

Lecture—3 hours; discussion—1 hour. Survey of major figures in philosophy of the seventeenth and eighteenth centuries, with emphasis on Descartes, Hume, and Kant. Not open for credit to students who have completed former course 22 or 23. GE credit: ArtHum, Wrt.

#### 24. Introduction to Ethics and Political Philosophy (4)

Lecture—3 hours; discussion—1 hour. Reading of historical and contemporary works highlighting central problems in ethical theory and political philosophy. Why should we be moral? What is moral behavior? What is justice, both for the individual and for society? Is there a right of rebellion? GE credit: ArtHum, Wrt.—Väyrynen

#### 30. Introduction to Philosophy of Science (4)

Lecture—3 hours; discussion—1 hour. Basic problems in the philosophy of science, common to the physical, biological, and social sciences. Analysis of explanation, confirmation theory, observational and theoretical terms, the nature of theories, operationalism and behaviorism, realism, reduction. Not open for credit to students who have taken course 104. GE credit: ArtHum or SciEng, Wrt.—Teller

#### 31. Appraising Scientific Reasoning (4)

Lecture—3 hours; discussion—1 hour. Introduction to scientific hypotheses and the kinds of reasoning used to justify such hypotheses. Emphasis on adequate justification, criteria, and strategies for distinguishing scientific from pseudoscientific theories. Concrete historical and contemporary cases. GE credit: ArtHum or SciEng.—Griesemer

#### 32. Understanding Scientific Change (4)

Lecture—3 hours; discussion—1 hour. Concepts of scientific change in historical and philosophical perspective. Survey of models of growth of knowledge, 17th century to present. Relationship between logic of theories and theory choice. Kuhn's revolution model. Examples from various sciences. GE credit: ArtHum or SciEng, Wrt.—Griesemer

**38. Introduction to Philosophy of Biology (4)**

Lecture—3 hours; discussion—1 hour. Non-technical introduction to philosophical, social, and scientific ideas, methods and technologies in contemporary biological fields such as evolution, genetics, molecular biology, ecology, behavior. Philosophical consideration of determinism, reductionism, explanation, theory, modeling, observation, experimentation. Evaluation of scientific explanations of human nature. GE credit: ArtHum, Wrt.—Griesemer, Neander

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

(Certain upper division courses may not be offered every year.)

**101. Metaphysics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Theories of being. Such topics as reality, substance, universals, space, time, causality, becoming, body, experience, persons, freedom, and determinism. Views of the nature and method of metaphysics. Anti-metaphysical arguments. GE credit: ArtHum, Wrt.

**102. Theory of Knowledge (4)**

Lecture—3 hours; extensive writing or discussion. Prerequisite: one course in philosophy. Analysis of the concept of knowledge. The relation between knowledge, belief and truth. Development of foundationalist, coherentist and externalist theories of justified belief. Examination of skepticism. GE credit: ArtHum, Wrt.—Mattey

**103. Philosophy of Mind (4)**

Lecture/discussion—3 hours; term paper. The relation between mind and body, our knowledge of other minds, and the explanation of mental acts. Discussion of such concepts as action, intention, and causation. GE credit: ArtHum, Wrt.—Neander

**104. The Evolution of Mind (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one previous Philosophy course or instructor permission. The interpretation of human thought and behavior through the lens of evolutionary theory. Topics include the nature/nurture debate concerning cognitive and other mental capacities and traits, and the interaction between evolution, learning and development. GE Credit: SocSci.

**105. Philosophy of Religion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy recommended. Logical, metaphysical, epistemological, and existential aspects of selected religious concepts and problems. GE credit: ArtHum, Wrt.

**107. Philosophy of the Physical Sciences (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one philosophy course or a science background recommended. Nature of testability and confirmation of scientific hypotheses; nature of scientific laws, theories, explanations, and models. Problems of causality, determinism, induction, and probability; the structure of scientific revolutions. GE credit: ArtHum or SciEng, Wrt.—Teller

**108. Philosophy of the Biological Sciences (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in biology or one course in philosophy. Scientific method in biology. Nature of biological theories, explanations, and models. Problems of evolutionary theory, ecology, genetics, and sociobiology. Science and human values. GE credit: ArtHum or SciEng, Wrt.—Griesemer

**109. Philosophy of the Social Sciences (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy or a social science recommended. The nature of the social sciences, their subject matter and methods. Similarities to and

differences from natural and life sciences. Predicting and explaining human behavior. Behaviorism. Reduction, holism, and individualism. Related moral issues. The social sciences and philosophy. GE credit: ArtHum or SocSci, Wrt.—Neander, Teller

**111. Philosophy of Space and Time (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one upper division philosophy course. Philosophical problems of space and time. The philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include the nature of geometry, conventionalism, absolutist versus relativist views of space and time, philosophical impact of relativity theory.—Teller

**112. Intermediate Symbolic Logic (4)**

Lecture/discussion—4 hours. Prerequisite: course 12 or consent of instructor. Predicate logic syntax and semantics. Transcription between predicate logic and English. Proof techniques. Identity, functions, and definite descriptions. Introduction to concepts of metatheory.—II. (II.) Mattey

**113. Advanced Logic (4)**

Lecture/discussion—4 hours. Prerequisite: course 112 or Mathematics 108 or the equivalent. Topics will vary between metalogic of First-Order logic through the Completeness and Löwenheim-Skolem theorems; and Zermelo-Fraenkel set theory typically axiomatized as a First-Order theory. May be repeated once when subject area differs.

**114. History of Ethics (4)**

Lecture/discussion—4 hours. Prerequisite: one philosophy course. Study of some classic texts from the history of philosophical writing on central problems of ethics, taking the form either of a survey or concentrated examination of selected historical figures. Readings from such philosophers as Aristotle, Butler, Hume, Kant, Mill. GE credit: ArtHum, Wrt.

**115. Problems in Normative Ethics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy. Moral philosophy studied through examination of moral problems and the moral principles and common sense intuitions that bear on them. Problems discussed may include: animal rights, fetal rights, euthanasia, justice and health care, war, nuclear deterrence, world hunger, environmental protection. GE credit: ArtHum, Wrt.

**116. Ethical Theories (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy; one course in ethics recommended. Study of fundamental concepts and problems in ethical theory through an examination of classical and contemporary philosophical theories of ethics. Among the theories that may be discussed are utilitarianism, virtue theory, theories of natural rights, Kantian ethical theory, and contractarianism.—Väyrynen

**117. Foundations of Ethics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one of courses 114, 115, 116, 101, or 137. Advanced investigation of questions about the nature and foundations of morality. Among the topics that may be discussed are moral realism and anti-realism, cognitivism and non-cognitivism, types of relativism, moral skepticism, normative language and normative belief.

**118. Political Philosophy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy. Intensive examination of some central concepts of political thought such as the state, sovereignty, rights, obligation, freedom, law, authority, and responsibility. GE credit: SocSci, Div, Wrt.

**119. Philosophy of Law (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: one course in philosophy or consent of instructor. Philosophical theories of the nature of law, legal obligation, the relation of law and morals. Problems for law involving liberty and justice: freedom of expression, privacy, rights, discrimination and fairness, responsibility, and punishment. GE credit: SocSci, Div, Wrt.

**123. Aesthetics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy recommended. Nature of art, of artistic creation, of the work of art, and of aesthetic experience; nature and validity of criticism; relations of art to its environment. GE credit: ArtHum, Wrt.

**125. Theory of Action (4)**

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: one course in Philosophy. Survey of prominent contemporary approaches to leading problems in action theory. Problems include issues about the nature of intentional action and the conceptual character of explanations of actions in terms of the agent's reasons. Offered in alternate years. GE credit: ArtHum, Wrt.

**127. Film Theory (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: Film Studies 1 or consent of instructor. Survey of the conceptual frameworks used to study film (including semiotics, psychoanalysis, spectatorship, auteur, genre and narrative theories). Historical survey of major film theorists. (Same course as Film Studies 127.) GE credit: ArtHum, Wrt.

**128. Rationality (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: at least one course in philosophy. Philosophical issues concerning rationality in its various forms. Focus is on theoretical and practical reasoning and conditions for rational belief, choice, and action. Possible additional topics include rationality and human limitations; paradoxes of rationality; varieties of irrationality; rationality and objectivity.—Väyrynen

**131. Philosophy of Logic and Mathematics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 12 or one course for credit in mathematics. Nature of formal systems and mathematical theories. Selected topics include logical and semantic paradoxes; foundations of mathematics; set theory, type theory, and intuitionistic theory; philosophy of geometry; philosophical implications of Gödel's incompleteness results.

**134. Modal Logic (4)**

Lecture/discussion—4 hours. Prerequisite: course 112 or Mathematics 108 or the equivalent. Survey of the main systems of modal logic, including Lewis systems S4 and S5. "Possible worlds" semantics and formal proofs. Applications to epistemology, ethics, or temporality.—Mattey

**135. Alternative Logics (4)**

Lecture/discussion—4 hours. Prerequisite: course 12, Mathematics 108, or the equivalent. Alternatives to standard truth-functional logic, including many-valued logics, intuitionist logics, relevance logics, and non-monotonic logics.—Mattey

**137. Philosophy of Language (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy or linguistics. Discussion of philosophical theories of how languages work and philosophical problems arising from thinking about language. Emphasis on modern (1879–present) philosophical views on language.—Glanzberg

**143. Hellenistic and Neo-Platonic Philosophy (4)**

Lecture/discussion—4 hours. Prerequisite: course 21. Greek philosophy after Aristotle, including Epicureanism, Stoicism, Skepticism and Neo-Platonism. GE: ArtHum, Wrt.

**145. Medieval Philosophy (4)**

Lecture/discussion—3 hours; written reports. Prerequisite: course 21. Study of major philosophers in the medieval period. GE credit: ArtHum, Wrt.

**151. Nineteenth Century European Philosophy (4)**

Lecture/discussion—4 hours. Prerequisite: course 22N. Survey of the main movements in nineteenth century philosophy on the European continent. Idealism in Schopenhauer and Hegel, dialectical materi-

alism in Marx, irrationalism in Kierkegaard, Nietzsche and Dostoevsky. Not offered every year. GE credit; ArtHum.—Mattey

**156. Contemporary Analytic Philosophy (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one course in philosophy. Consideration of central issues such as meaning/reference, analytic/synthetic, reductionism, formal and ordinary language, essential properties, ontological commitment, possible world semantics; influential works by philosophers such as Russell, Moore, Wittgenstein, Austin, Carnap, Quine, Putnam, Kripke, van Fraassen.

**157. Twentieth Century European Philosophy (4)**

Lecture/discussion—4 hours. Prerequisite: one course in Philosophy. Survey of the main movements in twentieth century philosophy on the European continent, including phenomenology, existentialism, post-structuralism and post-modernism. Philosophers covered are Husserl, Heidegger, Sartre, Foucault, Derrida. GE credit: ArtHum.—Mattey

**160. Pre-Socratics (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Study of the metaphysical views of such pre-Socratic figures as the Milesians, the Pythagoreans, Heraclitus, Parmenides, Empedocles, Anaxagoras, and the atomists.—Wedin

**161. Plato (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. Examines Plato's most important contributions in metaphysics, epistemology, psychology, cosmology, ethics and political philosophy. Dialogues will be selected from Plato's middle and later writings. Offered in alternate years.—Wedin

**162. Aristotle (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21. An overview of Aristotle's most central and influential writings. Topics selected from fields such as metaphysics, physics, ethics, logic, and psychology. Offered in alternate years.—Wedin

**168. Descartes (4)**

Lecture/discussion—4 hours. Prerequisite: course 22N. The philosophical writings of René Descartes. Topics include the refutation of skepticism, the nature and existence of mind and body, the existence of God, and the foundations of science. Not offered every year.—Mattey

**170. Leibniz (4)**

Lecture/discussion—4 hours. Prerequisite: course 22N. Survey of the philosophical writings of Gottfried Wilhelm Leibniz. Topics include Leibniz's logic, the existence of God, human freedom, substance, and the relation between science and metaphysics. Not offered every year.—Mattey

**172. Locke and Berkeley (4)**

Lecture/discussion—4 hours. Prerequisite: course 22N. Principal metaphysical works of John Locke and George Berkeley. Topics include abstract ideas, existence of matter, primary and secondary qualities, essence, substance, the existence of God, and the nature of scientific knowledge. May be repeated for credit. Not offered every year.

**174. Hume (4)**

Lecture/discussion—4 hours. Prerequisite: course 22N. David Hume's *Treatise of Human Nature* and related writings. Topics include empiricism, space, causality, belief, skepticism, the passions, and morality. Not offered every year.—Mattey

**175. Kant (4)**

Lecture/discussion—4 hours. Prerequisite: course 22N. Immanuel Kant's *Critique of Pure Reason* and related writings. Topics include the nature of human cognition, space and time, *a priori* concepts, substance, causality, human freedom, and the existence of God. Not offered every year.—Mattey

**189A-K. Special Topics in Philosophy (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (A) History of Philosophy, (B) Metaphysics, (C) Theory of Knowledge, (D) Ethics, (E) Political Philosophy, (F) Philosophy of Law, (G) Aesthetics, (H) Philosophy of Mind, (I) Philosophy of Sci-

ence, (J) Philosophy of Language, (K) Logic. May be repeated up to eight units of credit. Not offered every year.

**194HA-194HB. Honors Research Project (4-4)**

Tutoring—3 hours; term paper. Prerequisite: consent of instructor; open to students who are members of the honors program in Philosophy. Completion of honors research project under direction of an instructor. Consult departmental major adviser for list of instructors available in a given quarter.

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor.

(P/NP grading only.)

**Graduate Courses**

**201. Metaphysics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics vary from quarter to quarter and may include the following: What are things? Do names refer to things? If so, how? Do things have essential properties? What is the nature of necessity? May be repeated for credit when topic differs and with consent of instructor.

**202. Theory of Knowledge (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Topics vary from quarter to quarter. Sample topics include belief, skepticism, justification, externalism, naturalized epistemology. May be repeated for credit with consent of instructor.—Mattey

**203. Philosophy of Mind (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the philosophy of mind such as the mind-body problem, mental representation, consciousness, intentionality. May be repeated for credit with consent of instructor.

**203P. Philosophy of Mind Practicum (4)**

Practicum—12 hours. Prerequisite: consent of instructor. Specific research conducted and prepared for publication by advanced students in a team setting. Topics include knowledge representation and learning in neural networks, the nature and formal properties of mental representation. May be repeated for credit when topic differs and with consent of instructor. (S/U grading only.)

**207. Philosophy of Physics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in Philosophy or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of physics, such as foundations of spacetime theories, the interpretation of quantum mechanics, or foundations of statistical mechanics. May be repeated for credit when topic differs and with consent of instructor.—Teller

**208. Philosophy of Biology (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of biology, such as foundations of evolutionary theories, reductionism in biology, sociobiology and cultural evolution. May be repeated for credit when topic differs and with consent of instructor.—Griesemer

**210. Philosophy of Science (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Treatment of one or more general topics of current interest in philosophy of science. Topics may include scientific explanation, theories of confirmation, scientific realism, reduction in physics and biology. May be repeated for credit when topic differs and with consent of instructor.—Teller

**212. Philosophy of Logic and Mathematics (4)**

Seminar—3 hours; term paper. Prerequisite: course 112 or 113 or Mathematics 108 or 125 or the equivalent. Philosophical issues in logic and math.

Topics may include nature of logical and mathematical truth or knowledge, correctness of logical systems, foundations of mathematics, metaphysical and epistemological presuppositions, applications to philosophical problems and formalization of philosophical theories. May be repeated for credit when topic differs and with consent of instructor.

**214. Ethics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Topics may include morality and motivation, objectivity in ethics, the relationship between the factual and the moral. Topics vary from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor.—Dworkin, Väyrynen

**217. Political Philosophy (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced studies in political philosophy. Topics vary but may include distributive justice, enforcement of morality by the state, equality, obligation to obey the law, social contract theory. May be repeated for credit when topic differs and with consent of instructor.—Dworkin

**237. Philosophy of Language (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of philosophical issues raised by language, such as the nature of semantic content, proper semantics for verbs of propositional attitude, feasibility and limitations of formal semantics and pragmatics for natural languages. May be repeated for credit when topic differs and with consent of instructor.

**261. Plato (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Plato's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor.—Wedin

**262. Aristotle (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Aristotle's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor.—Wedin

**275. Kant (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Intensive study of a topic in the philosophy of Kant, in such areas as metaphysics, theory of knowledge, ethics. May be repeated for credit with consent of instructor.—Mattey

**290. History of Philosophy (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the history of philosophy. Topics vary according to instructor from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor.—Wedin, Mattey

**298. Group Study (1-5)**

**299. Research (1-12)**

(S/U grading only.)

**Professional Course**

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Physical Education

(College of Letters and Science)

Suzanne C. Williams, M.S., Program Director

**Program Office.** 264 Hickey Gymnasium (530) 752-1111

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

**Committee in Charge**

G. Robert Biggs, B.A. (*Physical Education*)  
 Kathleen M. DeYoung, B.A. (*Physical Education*)  
 Pamela L. Gill-Fisher, M.A., (*Physical Education*)  
 Barbara A. Jahn, M.S. (*Physical Education*)  
 Susan Kauslarich, Ph.D., (*Chemistry*)  
 Douglas Larson, Ph.D., (*Ag & Resource Economics*)  
 Deanne M. Vochatzer, M.A. (*Physical Education*)  
 Jon E. Vochatzer, M.S. (*Physical Education*)  
 Suzanne C. Williams, M.S. (*Physical Education*)

**Faculty**

G. Robert Biggs, B.A., Supervisor  
 Kathleen M. DeYoung, B.A., Supervisor  
 Pamela L. Gill-Fisher, M.A., Supervisor  
 Barbara A. Jahn, M.S., Supervisor  
 Deanne M. Vochatzer, M.A., Supervisor  
 Jon E. Vochatzer, M.S., Supervisor  
 Suzanne C. Williams, M.S., Supervisor

**Affiliated Faculty**

Carissa Adams, Ph.D., Lecturer/Coach  
 Alex Antipa, B.S., Lecturer  
 Stephen T. Bronzan, M.S., Lecturer/Coach  
 Keith Buckley, M.A., Lecturer/Coach  
 Greg Chapla, B.A., Lecturer/Coach  
 Ping Chou, B.A., Lecturer/Coach  
 Greg Clink, M.A., Lecturer/Coach  
 Gary Colberg, M.A., Principal Recreation Supervisor  
 Rozanne DeWeese, M.A., Lecturer/Coach  
 Steven Doten, Ph.D., Lecturer/Coach  
 Henry Fastenau, Lecturer/Coach  
 Ross Flowers, M.A., Lecturer  
 Tim Fua, B.S., Lecturer/Coach  
 Adam Getchell, B.S., Lecturer  
 Jennifer Gross, B.A., Lecturer/Coach  
 Rick Henderson, B.S., Lecturer/Coach  
 Jeff Hogan, B.A., Supervising Athletic Trainer/Lecturer  
 Jason Jaques, M.A., Lecturer/Coach  
 Elaine Jones, M.S., Lecturer/Coach  
 Andrea Khoo, B.S., Lecturer  
 Daryl Lee, M.S., Lecturer/Coach  
 Cadelba Lomeli-Loibl, B.S., Lecturer  
 Ron Manara, B.A., Lecturer/Coach  
 Michelle Massari, B.S., Lecturer/Coach  
 Karen Matteson-Yoder, M.A., Lecturer/Coach  
 Bill Maze, M.B.A., Lecturer/Coach  
 Russell Meyer, Lecturer  
 Mike Moroski, M.A., Lecturer/Coach  
 Yasmin Mossadeghi, B.A., Lecturer/Coach  
 Peter Motekaitis, M.A., Lecturer/Coach  
 Mark Munoz, B.S., Lecturer/Coach  
 Gerald Nunes, B.S., Lecturer  
 Rex Peters, M.S., Lecturer/Coach  
 Emily Plessner, M.A., Lecturer/Coach  
 Jill Radzinski, M.A., Athletic Trainer/Lecturer  
 Felipe Restrepo, M.A., Lecturer/Coach  
 Maryclaire Robinson, M.S., Lecturer/Coach  
 Michelle Roppeau, M.A., Student Affairs Officer/Lecturer  
 Dwayne Schaffer, M.A., Lecturer/Coach  
 Sandy Simpson, B.A., Lecturer/Coach  
 Gary Stewart, M.A., Lecturer/Coach  
 Byron Talley, B.A., Lecturer/Coach  
 Christina Toy, B.A., Lecturer/Coach  
 Lisa Varnum, B.S., Athletic Trainer/Lecturer  
 Matt Vaughn, M.A., Lecturer/Coach  
 Bill Wagman, M.A., Lecturer/Coach  
 Cy Williams, M.A.T., Lecturer/Coach  
 Jamey Wright, M.S., Lecturer/Coach  
 Lennie Zalesky, M.A., Lecturer/Coach

**The Program of Study**

The Program in Physical Education facilitates the development and offering of non-major courses related to physical activities and education, fitness and health, athletic training, and organized sport. The Program is available as part of a student's general educational experience to enhance and broaden the understanding and experience of physical activity in the maintenance of lifetime health and fitness.

The basic activities series includes Physical Education 1, fitness, lifetime, and sports skills, Physical Education 6 for students participating in intercollegiate athletics, and Physical Education 7 for students interested in a career in teaching/coaching or officiating sports.

Additional lower division courses include those in special skill areas, such as life-saving and water safety, scuba diving, and health and fitness. Upper division courses include advanced skills in scuba diving and a series of courses that meet the mandated requirements for students pursuing teacher preparation and certification.

**Teaching Credential Subject Representative.** S. Williams; the Teaching Credential/M.A. Program on [page 102](#)

**Class and Recreational Use of Facilities.** The incidental fee payable by all students at the time of registration entitles students to the use of the gymnasium, showers, towels, lockers, tennis courts, and athletic fields. Equipment for games and sports are available for classes. Lockers must be turned in on the last day of class, i.e., before the final examination period. Fines are imposed for each formal transaction necessitated by failure of the student to comply with the regulations of the program.

**Courses in Physical Education (PHE)****Lower Division Courses****1. Physical Activities (0.5)**

Laboratory—2 hours. Sections in: (a) sports skills, rules and strategy; (b) physical fitness and personal health; (c) recreation; (d) aerobic dance. May be repeated along with course 6 for a combined total of 6 units. (P/NP grading only.)—I, II, III. (I, II, III.)

**6. Preparation and Participation in ICA Competition (1)**

Discussion/laboratory—10-20 hours. Prerequisite: consent of instructor (coach). Preparation and participation in Intercollegiate Athletics. Development of fundamental and advanced individual and team skills. In-depth knowledge of rules and strategy. Advanced sports competition and Conference and NCAA levels. May be repeated along with course 1 for a combined total of 6 units. (P/NP grading only.)—I, II, III. (I, II, III.)

**7. Professional Physical Education Activities: Men and Women (1)**

Lecture—1 hour; or laboratory—2 hours. Fundamental skills for: (a) coaching competitive athletics; (b) classroom teaching and coaching, and (c) classroom teaching and officiating. May be repeated for a total of six units.—I, II. (I, II.)

**8. Student-Athlete Life Skills (1)**

Lecture—1 hour. For student-athletes. Balancing academic and athletic demands. Academic, psychological, and sociocultural issues which influence success as a college student-athlete. May be repeated up to 3 times for credit. (P/NP grading only.)—I, III. (I, III.)

**15. Administration of Intramural Sports (2)**

Lecture—2 hours. Planning and administering intramural sports programs at the high school and college level.—I. (II.) Colberg

**25. Theory of Lifesaving and Water Safety (2)**

Lecture—1 hour; laboratory—2 hours. Prerequisite: sound physical condition, and no physical handicap that would render student unable to perform the required skills and ability to pass preliminary swimming test. Provides the student with the knowledge, organizational procedures, and skill development necessary to provide for water safety and save his/her own life or the life of another in an aquatic emergency. (American Red Cross Advanced Lifesaving Certificate awarded upon successful completion of necessary requirements.)—III. (III.) Jahn

**27. Training Course for Water Safety Instructors (2)**

Lecture—1 hour; laboratory—2 hours. Prerequisite: advanced swimming (course 1) or consent of instructor; course 5 and current Advanced Life-Saving Cer-

tificate. Theoretical knowledge and practical experience necessary for the organization and teaching of swimming and lifesaving classes. (American Red Cross Water Safety Instructor's Certificate awarded upon successful completion of necessary requirements.)—III. (III.) Jahn

**29. Basic Scuba (2)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: good physical condition, ability to pass preliminary swimming test. Introduction to basic knowledge required for scuba diving, function and maintenance of equipment, physics and physiology of diving, diver first aid and CPR, oceanography and marine life, and underwater communication. Pool and open water sessions available for certification. (P/NP grading only.)—I, III. (I, III.)

**40. Drugs and Society (2)**

Lecture—2 hours; fieldwork—2 hours total; film-viewing—5 hours total. Pharmacology, methods of use, and effects of use of psychoactive and performance-enhancing drugs. Historical overview of drug use. Identification of behavior of "at-risk" and "user" populations. (P/NP grading only.)—I. (I.)

**44. Principles of Healthful Living (2)**

Lecture—2 hours. Application of scientific and empirical knowledge to personal, family, and community health problems. (P/NP grading only.)—I, II, III. (I, II, III.)

**92. Physical Education Internship (1-5)**

Internship—3-15 hours; written project proposal and evaluation. Prerequisite: consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Biology majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for credit once but no internship units will be counted toward Exercise Biology major. (P/NP grading only.)

**97T. Tutoring in Physical Education (1-5)**

Tutorial—1-5 hours. Prerequisite: lower division standing and consent of Program Director. Tutoring of students in lower division physical activity courses. Weekly meetings with instructor in charge of courses. Written reports on methods and materials required. May be repeated once for credit. (P/NP grading only.)

**97TC. Tutoring in the Community (1-5)**

Tutorial—2-15 hours; discussion—1 hour. Prerequisite: lower division standing and consent of Program Director. Tutoring in the community in physical activity related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated once for credit. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor and Program Director. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

(P/NP grading only.)

**Upper Division Courses****100. Field Experience in Teaching Physical Education (2)**

Discussion—1 hour; fieldwork—4 hours. Prerequisite: upper division standing and appropriate course 1 or 7. Tutoring or teacher's aide in physical education activities, including athletic coaching, in public schools under the guidance of a regular teacher with supervision by a departmental faculty person. May be repeated once for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**120. Sports in American Society (4)**

Lecture—3 hours; discussion—1 hour. Sociological approaches to the study of sport and contemporary American culture, including sport's interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as Exercise Biology 120.) GE credit: SocSci, Div.—I, II. (I, II.) Salitsky, Doten

**128A. Intermediate Scuba Diving (4)**

Lecture—3 hours; laboratory—3 hours; fieldwork—2 hours. Prerequisite: course 29 and consent of instructor. Lectures and practice in diver safety, rescue, accident management and patient care. Pool and open water sessions required for certification. (P/NP grading only.)—II. (II.) Fastenau

**128B. Research Diving Techniques (4)**

Lecture—3 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: course 128A; consent of instructor. Lectures and application on search and light salvage, night diving, research techniques, cold-water, low visibility diving, blue water, deep and altitude diving. Pool and open water sessions required for certification. (P/NP grading only.)—III. (III.) Fastenau

**131. Physical Activity and the Disabled (4)**

Lecture—3 hours; laboratory—3 hours. The study of the diverse and complex nature of individuals with disabilities and how they adapt to their disabilities in daily living. Integration of individuals with disabilities into the community, schools, and physical activity and recreational programs. Not open for credit to students who have completed Exercise Biology 131. Vochatzer

**133. Prevention and Care of Sports Injuries (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Cell Biology and Human Anatomy 101 (may be taken concurrently). Prevention, care, and rehabilitation of injuries incurred by athletes. Laboratory on anatomy, emergency care, physical therapy methods, and taping techniques. Not open for credit to students who have completed Exercise Biology 133.—II. (III.)

**135. Advanced Procedures in Evaluation and Management of Athletic Injuries (3)**

Lecture—3 hours. Prerequisite: course 133 or Exercise Biology 133, Cell Biology and Human Anatomy 101, consent of instructor. Advanced study of the evaluation and management of athletic injuries, including mechanism of injury, biomechanics and pathophysiology. Current topics in athletic training. Not open for credit to students who have completed Exercise Biology 135.—III.

**142. Physical Education in the Public Schools (3)**

Lecture—3 hours. Analysis and study of the principles and methods basic to teaching physical education at the elementary and secondary levels.—II. (II.) S. Williams

**143. Coaching Effectiveness (3)**

Lecture—3 hours. Prerequisite: upper division standing; 3 units of courses 1 and 6 combined. Synthesis and application of basic components of sport psychology, sport pedagogy, and sport physiology and basic management and administration of athletics in public high schools. (P/NP grading only.)—II. (II.) Bronzan

**144. Principles of Health Education (2)**

Lecture—2 hours. Prerequisite: course 44 and upper division standing or consent of instructor. Principles of teaching health education in the public schools. (P/NP grading only.)

**150. Recreation in the Community (3)**

Lecture—2 hours; discussion—1 hour; two Saturday field trips—8 hours. The nature and scope of community recreation programs in California emphasizing low income, highly populated areas, and poor rural communities.

**192. Physical Education Internship (1-12)**

Internship—3-36 hours; written project proposal and evaluation. Prerequisite: upper division standing and consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Science majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for a total of 12 units (including course 92) but no internship units will be counted toward Exercise Science major. (P/NP grading only.)—I, II, III. (I, II, III.)

**197T. Tutoring in Physical Education (1-5)**

Tutorial—1-5 hours. Prerequisite: consent of chairperson. Tutoring of students in lower division physical activity courses. Written reports on methods and materials required. May be repeated once for credit. (P/NP grading only.)

**197TC. Tutoring in the Community (1-5)**

Tutorial—2-15 hours; discussion—1 hour. Prerequisite: upper division standing and consent of Department Chairperson. Tutoring in the community in physical education related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated once for credit. (P/NP grading only)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Professional Courses****300. The Elementary Physical Education Program (2)**

Lecture—1 hour; laboratory—2 hours; field trips to selected programs. Prerequisite: senior standing or credential student. Introduction to principles, theories, material, and practices of elementary school physical education program.—III. (III.)

**380. Methods of Teaching Physical Education (3)**

Lecture—1 hour; laboratory—6 hours. Prerequisite: course 142 and six units of course 7; or consent of instructor. The methods of teaching group and individual activities for grades K-12; program planning, class management, organization, and evaluation. (P/NP grading only.)—S. Williams

## Physical Medicine and Rehabilitation

See **Medicine, School of**, on page 345.

## Physics

(College of Letters and Science)

Shirley Chiang, Ph.D., Chairperson of the Department

Lori Lubin, Ph.D., Vice Chairperson of the Department (Administration and Undergraduate Matters)  
Steven Carlip, Ph.D., Vice Chairperson of the Department (Graduate Matters)

Gergely Zimanyi, Ph.D., Professor

**Emeriti Faculty**

Franklin P. Brady, Ph.D., Professor Emeritus  
Thomas A. Cahill, Ph.D., Professor Emeritus  
James E. Draper, Ph.D., Professor Emeritus  
Glen W. Erickson, Ph.D., Professor Emeritus  
Claude Garrod, Ph.D., Professor Emeritus  
James P. Hurley, Ph.D., Professor Emeritus  
John A. Jungerman, Ph.D., Professor Emeritus  
William J. Knox, Ph.D., Professor Emeritus  
Douglas W. McCalm, Ph.D., Senior Lecturer Emeritus, *Academic Senate Distinguished Teaching Award*  
Neal Peek, Ph.D., Senior Lecturer Emeritus  
Wendell H. Potter, Ph.D., Senior Lecturer Emeritus, *Academic Senate Distinguished Teaching Award*  
Roderick V. Reid, Jr., Ph.D., Professor Emeritus

**Affiliated Faculty**

Rodney W. Cole, Ph.D., Lecturer, *Academic Federation Excellence in Teaching Award*  
Randy R. Harris, Ph.D., Lecturer, *Academic Federation Excellence in Teaching Award*  
Eckart Lorenz, Ph.D., Adjunct Professor  
Michael McElfresh, Ph.D., Adjunct Professor  
Randy Phelps, Ph.D., Associate Adjunct Professor  
Harry B. Radousky, Ph.D., Adjunct Professor  
Michael Van Hove, Ph.D., Adjunct Professor  
Ramona Vogt, Ph.D., Associate Adjunct Professor

**The Major Program**

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Information learned from high-energy particle atomic-scale microscopes and high-energy particle accelerators and nuclear reactors teaches us not only what holds the nucleus atom and the atom nucleus together but also how proteins function and why stars shine.

**The Program.** The Department of Physics offers three degree programs: the Bachelor of Arts in Physics, and the Bachelor of Science in Physics and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market on completing a B.S. degree, the

applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

**Career Alternatives.** Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

**Physics**

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 41-47**

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE ..... 19-25  
 Mathematics 21A, 21B, 21C, 21D, 22A, 22B ..... 22

**Depth Subject Matter ..... 35-37**

Physics 104A, 105A, 110A, 110B, 112, 115A, 122 ..... 28  
 At least one course from 127, 140A, 129A, or 130A ..... 4  
 Physics 102 (1 unit) waived if 104B taken ..... 0-1  
 At least one additional fixed-unit upper division Physics course excluding 137 and 160 ..... 3-4

**Total Units for the Major ..... 76-84**

**B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 50-56**

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE ..... 19-25  
 Mathematics 21A, 21B, 21C, 21D, 22A, 22B ..... 22  
 Computer Science Engineering 30 (or equivalent programming course) ..... 4  
 Chemistry 2A or 2HA (2B-2C or 2HB-2HC highly recommended) ..... 5

**Depth Subject Matter ..... 59-62**

**Physics 104A, 105A, 105B, 110A, 110B, 110C, 112, 115A, 115B,..... 36**

Physics 102 (1 unit) or 104B ..... 1-4  
 Physics 122 or 116A,B and C ..... 4-12  
 Two courses from one specialty (Astrophysics/Cosmology, Condensed Matter, or Nuclear/Particle Physics) and one course from a different specialty. Lists of courses in each specialty are available from the department ..... 12  
 Additional upper division Physics courses excluding 137 and 160, for a total of 15 upper division Physics courses of 3 or more units each. With prior departmental approval, one course from mathematics, engineering, or natural science may be used to meet this requirement. May include only one course from 194H, 195, 198, 199 ..... 0-9

**Total Units for the Major ..... 109-118**

**Applied Physics**

**B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 49-56**

Physics 9A, 9B, 9C, 9D or 9HA, 9HB, 9HC, 9HD, 9HE ..... 19-25  
 Mathematics 21A, 21B, 21C, 21D, 22A, 22B ..... 22  
 Computer Science Engineering 30 (or equivalent programming course) ..... 4

Depending on area of concentration:  
 Chemistry 2A or 2HA (2B-2C or 2HB-2HC highly recommended)  
 or  
 Computer Science Engineering 40  
 or  
 Mathematics 22AL ..... 14-5

**Depth Subject Matter ..... 57-65**

Physics 104A, 105A, 110A, 110B, 112, 115A, 116A, 116B, ..... 32  
 Physics 102 (1 unit) or 104B ..... 1-4  
 Physics 122 or 116 C ..... 4  
 Further courses from approved lists within one of the following concentrations chosen in consultation with a major adviser, to bring total number of three-five unit Depth courses to 15 ..... 20-24  
 Lists of approved courses for concentrations in atmospheric physics, chemical physics, computational physics, geophysics, materials science, physical electronics, and physical oceanography are available from the Physics Department.

**Total Units for the Major ..... 106-121**

**Recommended Electives**

*Astronomy:* Astronomy 2  
*Computer and numerical analysis:* Mathematics 128A or Applied Science Engineering 115  
*Statistics:* Statistics 131A  
*Advanced mathematics:* Mathematics 108, 118AB, 119AB 127ABC 185AB

**Program Variance.** Courses from other departments may be submitted for courses in the depth subject matter requirements by obtaining written permission from the Undergraduate Curriculum Committee Chairperson, as approved by the Department.

**Major Advisers.** Contact Departmental Undergraduate Majors office in 225 Physics/Geology Building, for adviser assignment.

**Minor Program Requirements:**

All courses in the minor have prerequisites equivalent to Mathematics 21A-21B-21C-21D and 22A-22B and Physics 9A-9B-9C-9D. Students considering the possibility of a minor should consult with a Physics major advisor before beginning course work in the minor program.

UNITS

**Physics ..... 24**

At least 6 upper division courses in Physics (excluding Physics 137, 160, 197T and 199) ..... 24

**Graduate Study.** The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

**Astronomy.** In addition to the introductory Astronomy courses listed, Upper Division and graduate courses in Astronomy, Astrophysics and Cosmology are listed under Physics.

**Courses in Astronomy (AST)**

**Lower Division Courses**

**2. Introduction to Modern Astronomy and Astrophysics (4)**

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: good facility in high school physics and mathematics (algebra and trigonometry). Description and interpretation of astronomical phenomena using the laws of modern physics. Modern astronomical instrumentation. Gravitation, relativity, electromagnetic radiation, atomic and nuclear processes in relation to the structure and evolution of stars, the

solar system, galaxies, and the Universe. Not open to students who have received credit for course 10.—I, III. (I, III.) Becker, Fassnacht, Knox, Lubin

**10G. Introduction to Stars, Galaxies, and the Universe (3)**

Lecture—3 hours. Non-mathematical introduction to astrophysics of the Universe beyond our solar system using concepts of modern physics. Not open for credit to students who have completed course 2, 10, or any physics course (except 10, 137 or 160). GE credit: SciEng.—I, III. (I, III.)

**10L. Observational Astronomy Laboratory (1)**

Laboratory—2.5 hours. Prerequisite: course 10G or 10S (may be taken concurrently). Introduction to observations of the night sky using small telescopes in nighttime laboratory. Not open for credit to students who have completed course 2 or 10.—I, II, III. (I, II, III.)

**10S. Introduction to the Solar System (3)**

Lecture—3 hours. Non-mathematical introduction to the astrophysics of the solar system using concepts of modern physics. Not open for credit to students who have taken course 2 or any Physics course, except 10, 137, or 160. GE credit: SciEng.—II, III. (II, III.)

**Courses in Physics (PHY)**

Physics 10 is primarily a concept-oriented one-quarter lecture/discussion course requiring relatively little mathematical background.

Physics 1 is a two-quarter sequence requiring some mathematics (trigonometry). Either 1A alone or both quarters may be taken. The sequence is not intended to satisfy entrance requirements of a year of physics for professional schools, but will satisfy requirements of 3 or 6 units of physics.

Physics 7 is a one-year (three-quarter) introductory physics course with laboratory intended for students majoring in the biological sciences. It has a calculus prerequisite. If you don't need a full year of introductory physics, you should take one or two quarters of Physics 1 instead. Read the following information carefully if you are using Physics 7 to complete an introductory course you have already begun.

The sequence of material in Physics 7 is different from that in most traditionally taught introductory physics courses. Physics 7B is most like the first quarter or semester of traditionally taught courses which treat classical mechanics. Physics 7C is most like the last quarter or semester which, in traditionally taught courses, treats optics, electricity and magnetism, and modern physics. The content and sequence of Physics 7A is unlike that of most other traditionally taught courses.

If you have completed one introductory quarter or semester of a traditionally taught physics course and want to continue with Physics 7, you should first take (and will receive full credit for) Physics 7A. Then, either skip 7B, but self-study the last three weeks of material, or take 7B and receive reduced credit. Next, take 7C for full credit.

If you have taken two quarters of a year-long introductory physics course and have not had extensive work in optics, electricity and magnetism, and modern physics, you should take Physics 7C. In no case should you take Physics 7B without first taking Physics 7A. All other situations should be discussed directly with a Physics 7 instructor.

Students not intending to take the entire sequence should take Physics 1.

Physics 9 is a four-quarter sequence using calculus throughout and including laboratory work as an integral part. The course is primarily for students in the physical sciences and engineering.

Physics 9H is a five-quarter honors physics sequence, which may be taken instead of Physics 9. It is intended primarily for first-year students with a strong interest in physics and with advanced placement in mathematics. In course requirements and prerequisites, Physics 9HA–9HE can be substituted for Physics 9A–9D.

**Lower Division Courses****1A. Principles of Physics (3)**

Lecture—3 hours. Prerequisite: trigonometry or consent of instructor. Mechanics. Introduction to general principles and analytical methods used in physics with emphasis on applications in applied agricultural and biological sciences and in physical education. Not open to students who have received credit for course 7B, or 9A.—I. (I.)

**1B. Principles of Physics (3)**

Lecture—3 hours. Prerequisite: course 1A or 9A. Continuation of course 1A. Heat, optics, electricity, modern physics. Not open for credit to students who have received credit for course 7A, 7B, 7C, 9B, 9C, or 9D.—II. (II.)

**7A. General Physics (4)**

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: Mathematics 16B (may be taken concurrently). Introduction to general principles and analytical methods used in physics for students majoring in a biological science. Only two units of credit allowed to students who have completed course 9B, or 1B.—I, II, III. (I, II, III.)

**7B. General Physics (4)**

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: course 7A. Continuation of course 7A. Only two units of credit allowed to students who have completed course 9A, or 1A.—I, II, III. (I, II, III.)

**7C. General Physics (4)**

Lecture—1.5 hours; discussion/laboratory—5 hours. Prerequisite: course 7B. Continuation of course 7B. Only two units of credit allowed to students who have completed course 9C or 5C.—I, II, III. (I, II, III.)

**9A. Classical Physics (5)**

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: Mathematics 21B. Introduction to general principles and analytical methods used in physics for physical science and engineering majors. Classical mechanics. Only 2 units of credit to students who have completed course 1A or 7B. Not open for credit to students who have completed course 9HA.—I,III. (I,III.)

**9B. Classical Physics (5)**

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: course 9A, Mathematics 21C, 21D (may be taken concurrently). Continuation of course 9A. Fluid mechanics, thermodynamics, wave phenomena, optics. Only 2 units of credit to students who have completed course 7A. Not open for credit to students who have completed course 9HB, 9HC, or Engineering 105.—I,II. (I,II.)

**9C. Classical Physics (5)**

Lecture—3 hours; laboratory—2.5 hours; discussion—1 hour. Prerequisite: course 9B, Mathematics 21D, 22A (may be taken concurrently). Electricity and magnetism including circuits and Maxwell's equations. Only 3 units of credit to students who have completed course 7C. Not open for credit to students who have completed course 9HD.—II,III. (II,III.)

**9D. Modern Physics (4)**

Lecture—3 hours; discussion—1.5 hours. Prerequisite: course 9C and Mathematics 22A; Mathematics 22B recommended (may be taken concurrently). Introduction to physics concepts developed since 1900. Special relativity, quantum mechanics, atoms, molecules, condensed matter, nuclear and particle physics. Not open for credit to students who have completed course 9HB, 9HC, or 9HE.—I,III. (I,III.)

**9HA. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: Mathematics 21B (may be taken concurrently) or consent of instructor. Classical mechanics. Same material as course 9A in greater depth. For students in physical sciences, mathematics, and engineering. Only 2 units of credit to students who have completed course 7B. Not open for credit to students who have completed course 9A.—I. (I.)

**9HB. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: Physics 9HA or 9A, Mathematics 21C (may be taken concurrently). Special relativity, ther-

mal physics. Continuation of course 9HA. Only 2 units of credit to students who have completed course 7A. Not open for credit to students who have completed course 9B or 9D.—II. (II.)

**9HC. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HB and Mathematics 21D (may be taken concurrently). Waves, sound, optics, quantum physics. Continuation of Physics 9HB. Only 2 units of credit to students who have completed course 7C. Not open for credit to students who have completed course 9B or 9D.—III. (III.)

**9HD. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HC and Mathematics 21D. Electricity and magnetism. Continuation of Physics 9HC. Not open for credit to students who have completed course 9C.—I. (I.)

**9HE. Honors Physics (5)**

Lecture—3 hours; discussion/laboratory—4 hours. Prerequisite: course 9HD and Mathematics 22B (may be taken concurrently). Application of quantum mechanics. Not open for credit to students who have completed course 9D.—II. (II.)

**10. Topics in Physics for Nonscientists (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: high school algebra. Emphasis varies: survey of basic principles or a deeper exploration of some particular branch. Past topics included black holes, space time, and relativity; physics of music; history and philosophy; energy and the environment; and natural phenomena. Check with the Department office for the current emphasis. No units of credit allowed if taken after any other physics course. GE credit: SciEng, Wrt.

**49. Supplementary Work in Lower Division Physics (1-3)**

Students with partial credit in lower division physics courses may, with consent of instructor, complete the credit under this heading. May be repeated for credit.—I, II, III. (I, II, III.)

**90X. Lower Division Seminar (2)**

Seminar—2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Physics through shared readings, discussions, written assignments, or special activities such as laboratory work. May be repeated for credit. Limited enrollment.

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses****102. Computational Laboratory in Physics (1)**

Laboratory—3 hours. Prerequisite: Mathematics 21D, 22A, 22B, Computer Science Engineering 30, course 9D or 9HD, course 104A concurrently. Introduction to computational physics and to the computational resources in the physics department. Preparation for brief programming assignments required in other upper division physics classes. Not open for credit to students who have completed course 104B or 105AL.—I. (I.)

**104A. Introductory Methods of Mathematical Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B with grade C- or better or consent of instructor. Introduction to the mathematics used in upper-division physics courses, including applications of vector spaces, Fourier analysis, partial differential equations.—I. (I.)

**104B. Computational Methods of Mathematical Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 104A with grade C- or better and course 105AL or consent of instructor. Introduction to the use of computational techniques to solve the

mathematical problems that arise in advanced physics courses, complementing the analytical approaches emphasized in course 104A.—II. (II.)

**104C. Intermediate Methods of Mathematical Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 104A with grade C- or better or consent of instructor. Applications of complex analysis, conditional probability, integral transformations and other advanced topics. Not offered every year.—(III.)

**105A-105B. Analytical Mechanics (4-4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B passed with grade C- or better; or consent of department; course 104A and 105A passed with a grade C- or better or consent of department required for 105B. Principles and applications of Newtonian mechanics; introduction to Lagrange's and Hamilton's equations.—II. (II.)

**105C. Continuum Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 104B and 105A passed with a grade of C- or better, or consent of department. The continuum hypothesis and limitations. Tensor methods develop stress-strain relations for linear isotropic solids/fluids and field equations to study wave propagation in solids/fluids, heat flow, potential flow and ocean waves.—III. (III.)

**108. Optics (3)**

Lecture—3 hours. Prerequisite: course 9 or 7 sequence and Mathematics 21 sequence or consent of instructor. The phenomena of diffraction, interference, and polarization of light, with applications to current problems in astrophysics, material science, and atmospheric science. Study of modern optical instrumentation. Open to non-majors.—III. (III.)

**108L. Optics Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 108 concurrently. The laboratory will consist of one major project pursued throughout the quarter, based on modern applications of optical techniques.—III. (III.)

**110A-110B-110C. Electricity and Magnetism (4-4-4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B passed with grade C- or better, or consent of department; prerequisite for 110B is courses 110A and 104A passed with a grade of C- or better or consent of department; prerequisite for course 110C is courses 110B and 104B passed with a grade of C- or better, or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves.—II-III. (II-III.)

**112. Thermodynamics and Statistical Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A or the equivalent. Introduction to classical and quantum statistical mechanics and their connections with thermodynamics. The theory is developed for the ideal gas model and simple magnetic models and then extended to studies of solids, quantum fluids, and chemical equilibria.—I. (I.)

**115A. Foundation of Quantum Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: courses 104A and 105B with grade C- or better, or consent of instructor. Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics.—III. (III.)

**115B. Applications of Quantum Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better, or consent of department. Angular momentum and spin; hydrogen atom and atomic spectra; perturbation theory; scattering theory.—I. (I.)

**116A. Electronic Instrumentation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 9C, Mathematics 22B. An experimental and theoretical study of important electronic circuits commonly used in physics.—I. (I.)

**116B. Electronic Instrumentation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 9D, 116A. Continuation of course 116A. Introduction to the use of digital electronics and microcomputers in experimental physics.—II. (II.)

**116C. Introduction to Computer-Based Experiments in Physics (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 9D or 9HD, 116B, Mathematics 22B or consent of instructor. Introduction to techniques for making physical measurements using computer-based instrumentation.—III. (III.) Pellett

**121. Atomic Physics (4)**

Lecture—3 hours; term paper. Prerequisite: course 9D. The phenomena of atomic physics including contemporary work: fine and hyperfine-structure, quantum electrodynamics, laser spectroscopy, beam foil experiments and trapped atoms.—I. (I.)

**122. Advanced Physics Laboratory (4)**

Laboratory—8 hours; extensive problem solving. Prerequisite: course 9D with grade C- or better or consent of instructor. Experimental techniques and measurements in atomic, condensed matter, nuclear and high energy physics. Student performs three to six experiments depending on difficulty. Individual work is stressed. May be repeated for credit.—II, III. (II, III.)

**126. Introduction to Cosmology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 105A or consent of instructor. Introduction to cosmology.—III. (III.)

**127. Introduction to Astrophysics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 105A passed with grade C- or better, or consent of instructor. Celestial mechanics, radiation, astrophysical measurements, electromagnetic processes, the sun, binary and variable stars, stellar structure and evolution, galaxies, cosmology.—II. (II.)

**129A. Introduction to Nuclear Physics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Survey of basic nuclear properties and concepts requiring introductory knowledge of quantum mechanics: nuclear models and forces, radioactive decay and detecting nuclear radiation and nuclear reaction products, alpha, beta and gamma decay.—III. (III.)

**129B. Nuclear Physics, Extensions and Applications (4)**

Lecture—3 hours; term paper. Prerequisite: course 129A. Continuation of course 129A. Nuclear reactions, neutrons, fission, fusion accelerators, introduction to meson and particle physics, nuclear astrophysics, and applications of nuclear physics and techniques to mass spectrometry, nuclear medicine, trace element analysis. Not offered every year.

**130A-130B. Elementary Particle Physics (4-4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A passed with a grade of C- or better or consent of instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. Not offered every year.—II,III. (II,III.)

**137. Weapons of Mass Destruction, the Cold War, and Modern Terrorism (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing, one course from 1B, 7C, 9C, or 10. Science of nuclear, biological, and chemical weapons related to the Cold War and terrorism. Order of magnitude calculations and modern quandaries of mass destruction. (Same course as Applied Science Engineering 137.) GE credit: SciEng, Wrt.—I. Cox

**140A-140B. Introduction to Solid State Physics (4-4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 115A or the equivalent passed with a grade of C- or better or consent of instructor. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity.—II-III. (II-III.)

**160. Environmental Physics and Society (3)**

Lecture—3 hours. Prerequisite: course 9D or 7C; or course 10 or 1B and Mathematics 16B or the equivalent. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. (Same course as Engineering 160.) GE credit: SciEng or SocSci.—III. (III.)

**194HA-194HB. Special Study for Honors Students (4-4)**

Independent study—12 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. (Deferred grading only, pending completion of sequence).

**195. Senior Thesis (5)**

Independent study—15 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors with senior standing. Preparation of a senior thesis on a topic selected by the student with approval of the department. May be repeated for a total of 15 units.—I, II, III. (I, II, III.)

**197T. Tutoring in Physics and Astronomy (1-5)**

Tutoring of students in lower division courses. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. Weekly meeting with instructor. (P/NP grading only.—I, II, III. (I, II, III.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****200A. Theory of Mechanics and Electromagnetics (4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: courses 104B, 105B, and 110C or the equivalent; course 204A concurrently. Theoretical approaches in classical mechanics including the use of generalized coordinates and virtual work; variational calculus; Lagrange equations; symmetries, conservation laws, and Noether theorem; Lagrangian density; Hamilton formalism; canonical transformations; Poisson brackets; and Hamilton-Jacobi equations.—I. (I.)

**200B-200C. Theory of Mechanics and Electromagnetics (4-4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: course 200A, and course 204B concurrently. Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magneto-hydrodynamics; diffraction theory; radiating systems; and special relativity.—II-III. (II-III.)

**204A-204B. Methods of Mathematical Physics (4-4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: courses 104A and 104B or the equivalent. Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Green's functions, calculus of variations, introduction to numerical analysis.—III. (III.)

**210. Computational Physics (3)**

Lecture—3 hours. Prerequisite: knowledge of Fortran or C. Analytic techniques to solve differential equations and eigenvalue problems. Physics content of course will be self-contained, and adjusted according to background of students.—II. (II.)

**215A-215B-215C. Quantum Mechanics (4-4-4)**

Lecture—3 hours; independent study—1 hour. Prerequisite: course 115B or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation.—II-III. (II-III.)

**219A. Statistical Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 215B or the equivalent. Foundations of thermodynamics and classical and quantum statistical mechanics with simple applications to properties of solids, real gases, nuclear matter, etc. and a brief introduction to phase transitions.—III. (III.)

**219B. Statistical Mechanics (4)**

Lecture—3 hours; extensive problem solving. Prerequisite: course 219A. Further applications of thermodynamics and classical and quantum statistical mechanics. The modern theory of fluctuations about the equilibrium state, phase transitions and critical phenomena.—I. (I.)

**223A. Group Theoretical Methods of Physics—Condensed Matter (3)**

Lecture—3 hours. Prerequisite: courses 215A, 215B (215C is corequisite) or consent of instructor. Theory of groups and their representations with applications in condensed matter. Not offered every year.—I. (I.)

**223B. Group Theoretical Methods of Physics—Elementary Particles (3)**

Lecture—3 hours. Prerequisite: courses 215A, 215B (215C is corequisite) or consent of instructor. Theory of groups and their representations with applications in elementary particle physics. Not offered every year.

**224A. Nuclear Physics (3)**

Lecture—3 hours. Prerequisite: course 215B. Comprehensive study of the nucleon-nucleon interaction including the deuteron, nucleon-nucleon scattering, polarization, determination of real parameters of S-matrix, and related topics. Not offered every year.

**224B. Nuclear Physics (3)**

Lecture—3 hours. Prerequisite: course 224A. Study of nuclear models, including shell model, collective model, unified model. Energy level spectra, static momenta, and electromagnetic transition rates. Not offered every year.

**224C. Nuclear Physics (3)**

Lecture—3 hours. Prerequisite: course 224B. Study of nuclear scattering and reactions including the optical model and direct interactions. Beta decay and an introduction to weak interactions. Not offered every year.

**229A. Advanced Nuclear Theory (3)**

Lecture—3 hours. Prerequisite: course 224C. Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for two-body scattering. Not offered every year.

**229B. Advanced Nuclear Theory (3)**

Lecture—3 hours. Prerequisite: course 229A. Advanced topics in nuclear theory; theory of quantum-mechanical scattering processes. Exact formal theory and models for three-body scattering. Not offered every year.

**230A. Quantum Theory of Fields (3)**

Lecture—3 hours. Prerequisite: course 215C. Relativistic quantum mechanics of particles; techniques and applications of second quantization; Feynman diagrams; renormalization.—I. (I.)

**230B. Quantum Theory of Fields (3)**

Lecture—3 hours. Prerequisite: course 230A. Continuation of 230A, with selected advanced topics, such as S-matrix theory, dispersion relations, axiomatic formulations.—II. (II.)

**240A-240B. Solid State Physics (3-3)**

Lecture—3 hours. Prerequisite: courses 215A-215B-215C; courses 140A-140B recommended. Introduction to the phenomena and theory of the solid state. Periodic structures, lattice structures, electron states, static properties, electron-electron interaction, electron dynamics, transport properties, optical properties, the Fermi surface, magnetism, superconductivity.—III. (I-III.)

**240C. Condensed Matter Physics (3)**

Lecture—3 hours. Prerequisite: course 240AB. Review of second quantization. Interacting electron gas, electron-phonon interaction and effects, including instabilities of electronic systems. Topics in the theory of superconductivity and magnetism.—III (III.)

**241. Advanced Topics in Magnetism (3)**

Lecture—3 hours. Prerequisite: courses 240A-240B and 240C-240D, or consent of instructor. Topics chosen from areas of current research interest. Not offered every year.

**242. Advanced Topics in Superconductivity (3)**

Lecture—3 hours. Prerequisite: courses 240A-240B and 240C-240D, or consent of instructor. Topics chosen from areas of current research interest. Not offered every year.

**243A-243B-243C. Surface Physics of Materials (3-3-3)**

Lecture—3 hours. Prerequisite: courses 140A-140B, 115A-115B or the equivalents; courses 215A, 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Offered in alternate years—(I, II, III.)

**245A. High-Energy Physics (3)**

Lecture—3 hours. Prerequisite: course 230A. Phenomenology and systematics of strong, electromagnetic, and weak interactions of hadrons and leptons; determination of quantum numbers; quarks and quarkonia; deep inelastic scattering; the quark parton model; experiments at hadron colliders and electron-positron colliders.—II. (II.)

**245B. High-Energy Physics (3)**

Lecture—3 hours. Prerequisite: course 245A. Electroweak interactions; phenomenology of the Standard Model of SU(2)<sub>c</sub> × U(1)<sub>y</sub>; weak interaction experiments; properties of and experiments with W and Z vector bosons; Glashow-Weinberg-Salam model and the Higgs boson; introduction to supersymmetry and other speculations.—III. (III.)

**245C. High-Energy Physics (3)**

Lecture—3 hours. Prerequisite: course 245A. Strong interaction: quantum chromodynamics phenomenology; jets and other experimental tests; quark and gluon distribution functions; quark and gluon scattering; applications of the renormalization group. Not offered every year.—III. (III.)

**246. Supersymmetry: Theory and Phenomenology (3)**

Lecture—3 hours. Prerequisite: courses 230A-230B, 245A-245B recommended, or consent of instructor. Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergravity. Collider phenomenology of supersymmetry. Dark matter phenomenology. Not offered every year.

**250. Special Topics in Physics (3)**

Lecture—3 hours. Prerequisite: consent of instructor. Topic varies. May be repeated for credit. Not offered every quarter.—I, II, III. (I, II, III.)

**252A. Techniques of Experimental Physics (3)**

Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from condensed matter research will be utilized. Not offered every year.

**252B. Techniques of Experimental Physics (3)**

Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from nuclear and particle research will be utilized.—III. (III.)

**260. Introduction to General Relativity (3)**

Lecture—3 hours. Prerequisite: courses 200A, 200B. An introduction to general relativity. Differential geometry and curved spacetime; the Einstein field equations; gravitational fields of stars and black holes; weak fields and gravitational radiation; experimental tests; Big Bang cosmology.—I. (I.)

**262. Early Universe Cosmology (3)**

Lecture—3 hours. Prerequisite: second year standing in Physics graduate program or consent of instructor. Introduction to early universe cosmology: the Big Bang, inflation, primordial nucleosynthesis, dark matter, dark energy, and other topics of current interest.—I. (I.)

**263. Cosmic Structure Formation (3)**

Lecture—3 hours. Prerequisite: course 260. Growth of structure from small density inhomogeneities in the early universe to the diverse structures observable today. Use of observable properties (cosmic microwave background, gravitational lensing, peculiar velocities, number density, etc.) to constrain models of structure formation and fundamental physics.—III. (III.)

**265. High Energy Astrophysics and Radiative Processes (3)**

Lecture—3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course covering galactic and extragalactic X-ray and gamma-ray astronomy, radiative processes, and techniques of high-energy astrophysics.—I. (I.)

**266. Data Analysis for Astrophysics (3)**

Lecture—3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course covering measurement and signal analysis techniques for astrophysics and cosmology throughout the electromagnetic spectrum.—II. (II.)

**267. Observational Extragalactic Astronomy & Cosmology (3)**

Lecture—3 hours. Prerequisite: graduate standing in physics or consent of the instructor. Survey course covering current areas of research on extragalactic objects, their physical properties, origin, evolution, and distribution in space.—III. (III.)

**270. Current Topics in Physics Research (2)**

Lecture/discussion—2 hours. Prerequisite: graduate standing in physics or consent of instructor. Reading and discussion to help physics graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit when topics differ. (S/U grading only.)—I, II, III. (I, II, III.)

**280. Seminar in Ethics for Scientists (2)**

Seminar—2 hours. Prerequisite: graduate standing in any department of Science or Engineering. Studies of topical and historical issues in the ethics of science, possibly including issues such as proper authorship, peer review, fraud, plagiarism, responsible collaboration, and conflict of interest. Limited enrollment. (Same course as Chemical Engineering and Materials Science 280 and Chemistry 280.) (S/U grading only.)—III. (III.)

**290. Seminar in Physics (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in physics.

ics. Topics will vary weekly and will cover a broad spectrum of the active fields of physics research at a level accessible to all physics graduate students. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Seminar in Nuclear Physics (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in nuclear physics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**292. Seminar in Elementary Particle Physics (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in elementary particle physics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**293. Seminar in Condensed Matter Physics (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in condensed matter physics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**294. Seminar in Cosmology (1)**

Seminar—1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in Cosmology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**295. Introduction to Departmental Research (1)**

Seminar—1 hour. Seminar to introduce first- and second-year physics graduate students to the fields of specialty and research of the Physics staff. (S/U grading only.)—II.

**297. Research on the Teaching and Learning of Physics (3)**

Seminar—3 hours. Prerequisite: graduate standing in Physics or consent of instructor. Discussion and analysis of recent research in how students construct understanding of physics and other science concepts and the implications of this research for instruction.—III. (III.) Potter

**298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Professional Courses****371. Teaching in an Active-Engagement Physics Discussion/Lab Setting (1)**

Lecture/discussion—1 hour. Prerequisite: course 9D or equivalent; consent of instructor; open to graduate students only. Analysis of recent research on science/physics teaching and learning and its implications for teaching labs, discussions, and discussion/labs with an emphasis on the differences between conventional and active-engagement instructional settings. The appropriate role of the instructor in specific instructional settings. III. (III.)

**390. Methods of Teaching Physics (1)**

Lecture/discussion—1 hour. Prerequisite: graduate standing in Physics; consent of instructor. Practical experience in methods and problems related to teaching physics laboratories at the university level, including discussion of teaching techniques, analysis of quizzes and laboratory reports and related topics. Required of all Physics Teaching Assistants. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

See **Agricultural Management and Rangeland Resources**, on page 124; **Crop Science and Management**, on page 187; **Environmental Horticulture**, on page 258; **Plant Biology**, on page 413; **Plant Biology (A Graduate Group)**, on page 416; and **Vegetable Crops**, on page 469.

## Plant Biology

(College of Biological Sciences)

Venkatesan Sundaresan, Ph.D., Chairperson of the Section

**Section Office.** 1002 Life Sciences Addition (530) 752-0617; <http://www.plb.ucdavis.edu>

### Committee in Charge of the Major

Deborah Canington, Ph.D. (*Plant Biology*)  
Judy Jernstedt, Ph.D. (*Plant Sciences*)  
John Labavitch, Ph.D. (*Plant Sciences*)  
Alan Stemler, Ph.D. (*Plant Biology*)  
Terence Murphy, Ph.D. (*Plant Biology*)

### Faculty

Faculty includes members of the Departments of **Plant Sciences**, on page 419 and the Sections of the College of Biological Sciences.

### Primary Section Members

John L. Bowman, Ph.D., Professor  
Anne Britt, Ph.D., Professor  
Katayoon Dehesh, Ph.D., Professor  
John J. Harada, Ph.D., Professor  
Stacey Harmer, Ph.D., Assistant Professor  
Bo Liu, Ph.D., Associate Professor  
William J. Lucas, Ph.D., Professor  
Julin Maloof, Ph.D., Assistant Professor  
Terence M. Murphy, Ph.D., Professor  
Sharman O'Neill, Ph.D., Professor  
Thomas L. Rost, Ph.D., Professor, *Academic Senate Distinguished Teaching Award*  
Neelima Sinha, Ph.D., Professor  
Venkatesan Sundaresan, Ph.D., Professor  
Alan J. Stemler, Ph.D., Professor  
Steven M. Theg, Ph.D., Professor  
Larry N. Vanderhoef, Ph.D., Professor

### Secondary Section Members

Judy Callis, Ph.D., Professor  
James A. Doyle, Ph.D., Professor (*Geology*)  
Marilynn E. Eitzler, Ph.D., Professor  
Charles S. Gasser, Ph.D., Professor  
Marcel Rejmanek, Ph.D., Professor  
Raymond L. Rodriguez, Ph.D., Professor  
Irwin H. Segel, Ph.D., Professor  
Maureen L. Stanton, Ph.D., Professor  
Donald R. Strong, Ph.D., Professor

### Emeriti Faculty

Fredrick T. Addicott, Ph.D., Professor Emeritus  
Floyd M. Ashton, Ph.D., Professor Emeritus  
David E. Bayer, Ph.D., Professor Emeritus

Bruce A. Bonner, Ph.D., Professor Emeritus  
Paul A. Castelfranco, Ph.D., Professor Emeritus  
Deborah P. Delmer, Ph.D., Professor Emerita  
Emanuel Epstein, Ph.D., Professor Emeritus  
Richard H. Falk, Ph.D., Professor Emeritus  
Ernest M. Gifford, Ph.D., Professor Emeritus,  
*Academic Senate Distinguished Teaching Award*  
Hendrick J. Ketellapper, Ph.D., Professor Emeritus  
Donald W. Kyhos, Ph.D., Professor Emeritus  
Norma J. Lang, Ph.D., Professor Emerita  
C. Ralph Stacking, Ph.D., Professor Emeritus  
Robert M. Thornton, Ph.D., Senior Lecturer Emeritus,  
*Academic Senate Distinguished Teaching Award*  
John M. Tucker, Ph.D., Professor Emeritus  
Kenneth Wells, Ph.D., Professor Emeritus

### Affiliated Faculty

Deborah Canington, Ph.D., Lecturer, *Academic Federation Excellence in Teaching Award*  
Tom Goliber, Ph.D., Academic Coordinator  
Andrew Groover, Ph.D., Adjunct Assistant Professor

### The Major Program

Plant Biology is the scientific study of plants as organisms. It includes the disciplines of cellular and molecular plant biology and the traditional areas of botany, such as anatomy, morphology, systematics, physiology, mycology, phycology, ecology, and evolution.

**The Program.** The plant biology major consists of core courses in applied plant biology, plant anatomy, plant physiology, and plant ecology, as well as biochemistry, cell biology, and genetics. In addition, students complete a set of courses in one of the following areas: (1) general botany; (2) applied plant biology; (3) plant evolution and ecology; (4) plant genetics and breeding; and (5) plant physiology, development, and molecular biology. The major provides breadth in diverse areas of plant biology and depth in one of several areas of specialization. Independent research opportunities in plant biology are available. Consult with an adviser.

**Career Alternatives.** A plant biology degree is an excellent credential for a wide range of career options, including domestic and international opportunities in business, research and teaching in both governmental and private sectors. Plant biologists can work in the field, in the forest, in the laboratory, in botanical gardens or nurseries, in food or seed companies, or in pharmaceutical, energy or chemical industries, and pursue rewarding careers in the areas of biotechnology, environmental protection, farming, or agribusiness. The program is also an excellent background for students wishing to enter graduate or other professional schools, including medicine, law or journalism.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter..... 35

Biological Sciences 1A-1B-1C..... 15  
Chemistry 2A-2B, 8A-8B..... 16  
Agricultural Management and Rangeland Resources 120 or Statistics 13 or 100 or 102 ..... 4

#### Depth Subject Matter ..... 41-43

Biological Sciences 101 ..... 4  
Evolution and Ecology 108 or Plant Biology 102 or 108 ..... 5  
Evolution and Ecology 140 or Plant Biology 116 ..... 4-5  
Plant Biology 105, 111, 112, and Plant Biology 117/Evolution and Ecology 117 ..... 15  
Additional upper division units in Plant Biology or related natural science courses ..... 13-14

#### Total Units for the Major ..... 76-78

#### Recommended

Chemistry 2C; Evolution and Ecology 100;  
Plant Biology 118, and Plant Biology 148/  
Plant Pathology 148.

For students with interests in specialized areas of plant biology (e.g., agricultural botany, ecology, systematics and evolution, morphology, plant physiology, etc.), certain substitutions, including courses in other sections or departments, may be allowed upon prior consultation with a Plant Biology major adviser.

### B.S. Major Requirements:

UNITS

#### Preparatory Subject Matter.....60-67

Biological Sciences 1A-1B-1C ..... 15  
Chemistry 2A-2B-2C ..... 15  
Chemistry 8A-8B or 118A-118B-118C ..... 6-12  
Mathematics 16A-16B-16C..... 9  
Physics 7A-7B-7C ..... 12  
Agricultural Management and Rangeland Resources 120 or Statistics 13, 32, 100, or 102 ..... 3-4

#### Depth Subject Matter ..... 45

Biological Sciences 101 or Plant Biology 152 (Students completing the Applied Plant Biology option or the Plant Genetics and Breeding option should take Plant Biology 152) ..... 4  
Biological Sciences 102, 103, 104 ..... 9  
Plant Biology 105, 111 ..... 8  
Completion of one option listed below ..... 24  
Research experience through internships or special studies is recommended.

#### General Botany option

Evolution and Ecology 100, Plant Biology 112 ..... 7  
Plant Biology 117 or 142 ..... 4  
One course from the Applied Plant Biology course list ..... 3-5  
One course from the Evolution and Diversity course list ..... 3-5  
Additional upper division course work from any of the five course lists, chosen in consultation with an adviser, to achieve a total of 24 or more units. At least one course chosen from the option course lists must include a formal laboratory or fieldwork section ..... 3-7

#### Applied Plant Biology option

Plant Biology 112 ..... 3  
Plant Biology 142 or 143 ..... 3-4  
Plant Biology 160 ..... 3  
Molecular and Cellular Biology 120L; Plant Biology, 153, 158, 172L, 189; or Plant Pathology 120 ..... 2-6  
Additional upper division course work from the Applied Plant Biology course list to achieve a total of 24 or more units ..... 8-13

#### Plant Evolution and Ecology option

Evolution and Ecology 100 ..... 4  
Plant Biology 117 or 142 ..... 4  
One course from the Applied Plant Biology course list ..... 3-5  
Additional upper division course work from the Ecology and/or Evolution and Diversity course lists to achieve a total of 24 or more units. At least one course chosen must include a formal laboratory or fieldwork section ..... 11-13

#### Plant Genetics and Breeding option

Plant Biology 108 or 143 ..... 3-5  
Plant Biology 154 ..... 4  
Plant Biology 112 or 113 or 160 ..... 3  
Plant Biology 161A or 161B ..... 4  
Additional upper division course work from the Plant Genetics and Breeding course list to achieve a total of 24 or more units ..... 8-10

#### Plant Physiology, Development and Molecular Biology option

Plant Biology 112 ..... 3  
Molecular and Cellular Biology 120L or Plant Biology 153 ..... 4-6  
One course from the Applied Plant Biology course list ..... 3-5  
One course from the Ecology course list (Plant Biology 117 recommended) ..... 3-4

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

One course from the Evolution and Diversity course list ..... 3-5  
 Additional upper division course work from the Plant Physiology, Development, and Molecular Biology course list to achieve a total of 24 or more units ..... 1-8

**Total Units for the Major ..... 105-112**

## Course Lists

### Applied Plant Biology

Agricultural Management and Rangeland Resources 107, 110A, 110B, 110C, 110L, 112, 118, 150, 160, 170A, 170B; Atmospheric Science 133; Entomology 100, 100L, 110, 119, 135; Environmental Horticulture 102, 105, 120, 125, 130, 133; Environmental Toxicology 101; Hydrologic Science 124; International Agricultural Development 160; Nematology 100, 110; Plant Biology 119, 141, 142, 143, 146, 152, 153, 154, 157, 158, 160, 171, 172, 172L, 173, 174, 176, 178, 196; Plant Pathology 120; Soil Science 100, 105, 109, 111; Viticulture and Enology 101A, 101B, 101C, 110, 115, 118.

### Ecology

Agricultural Management and Rangeland Resources 112, 130, 131, 134, 135, 137; Environmental Science and Policy 121, 123, 124, 150C, 151, 151L, 155, 155L; Evolution and Ecology 138; Hydrologic Science 122, 122L, 124; Plant Biology 117, 119, 142, 146; Plant Pathology 150.

### Evolution and Diversity

Agricultural Management and Rangeland Resources 131; Evolution and Ecology 100, 102, 140, 149; Plant Biology 102, 108, 116, 118, 143, 148.

### Plant Genetics and Breeding

Agricultural Management and Rangeland Resources 118, 150; Entomology 110; Evolution and Ecology 100; Molecular and Cellular Biology 161, 164; Plant Biology 116, 117, 142, 153, 157; Plant Pathology 120, 130.

### Plant Physiology, Development, and Molecular Biology

Molecular and Cellular Biology 126; Plant Biology 113, 153, 157, 158, 160; Plant Pathology 130.

**Master Adviser.** A. Stemler, Plant Biology Section office in 2220 Life Sciences Addition

### Minor Program Requirements:

UNITS

### Plant Biology ..... 23

Biological Sciences 1C (or equivalent introductory plant biology course) ..... 5  
 Upper division units, including at least one course from each of the following four groups ..... 18  
 (a) *Anatomy and Morphology:* Evolution and Ecology 140; Plant Biology 105, 116, 118.  
 (b) *Physiology and Development:* Plant Biology 111, 112; Plant Pathology 130.  
 (c) *Evolution and Ecology:* Evolution and Ecology 100; Plant Biology 102, 117, 143.  
 (c) *Evolution and Ecology:* Evolution and Ecology 100; Plant Biology 102, 117, 143.  
 (d) *Applied Plant Biology:* Agricultural Management and Rangeland Resources 110A, 110B; Plant Biology 154, 160, 171, 172.

**Minor Adviser.** Same as for major above.

**Honors and Honors Programs.** Students on the honors list may elect to substitute a maximum of 5 units of 194H for 5 upper division units of the regular major; however, recommendations for high honors and highest honors at graduation are not dependent on the completion of 194H. See [Academic Information, on page 62](#) and the appropriate College section for Dean's Honors List information.

**Graduate Study.** Consult the Plant Biology Graduate Group listing.

## Courses in Plant Biology (PLB)

### Lower Division Courses

#### 1. Plants for Garden, Orchard and Landscape (2)

Lecture—1 hour; laboratory—3 hours. For non-majors. Hands-on experience with plants cultivated for food, environmental enhancement and personal satisfaction. Topics include establishing a vegetable garden, pruning and propagating trees and vines, growing flowers and ornamental plants, and the role of plants in human health and well-being. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 2 or Plant Science 1. (Former course Plant Science 1.) (P/NP grading.)—I, III. (I, III.) Marrush

#### 11. Plants and the Biosphere (3)

Lecture—3 hours; one weekend field trip (half-day); term paper. Ethnobotanical and ecological themes are emphasized in examining our dependence on plants, the ecological roles of plants, and the development of botany as a contemporary science. Intended primarily for non-science majors. GE credit: SciEng, Wrt.—I. (I.) Inoue

#### 12. Plants and People (3)

Lecture—3 hours. Prerequisite: high school biology. Plants as a resource for food, recreation, and environmental enhancement. Emphasis on how our relationship to plants has changed through history and how the growth and development of plants affect their utility. Not open for credit to students who have completed Plant Science 10. (Former course Plant Science 10.) GE credit: SciEng, Div, Wrt.—I, II, III. (I, II, III.) Bradford, Fischer, Jasieniuk, Nevins

#### 90X. Plant Science Seminar (1-4)

Prerequisite: consent of instructor. Examination of a special topic in a small group setting. Not open for credit to students who have completed course Plant Science 90X. (Former course Plant Science 90X.)

#### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology faculty. (P/NP grading only.)

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

For questions about courses numbered 102 through 126, see the Plant Biology Section office in 1002 Life Sciences Addition. For questions concerning courses numbered 1, 12, 140 through 188 and 196, see the Plant Science Advising Center in 1220 Plant and Environmental Sciences.

#### 102. California Floristics (5)

Lecture—2 hours; lecture/discussion—1 hour; laboratory—6 hours (includes three one-day, weekend field trips). Prerequisite: Biological Sciences 1A, 1B, 1C or the equivalent in plant science. Survey of the flora of California, with emphasis on field recognition and identification of important vascular plant families and genera characterizing the major floristic regions. Lectures review the taxonomic diversity, evolutionary relationships, and geographical patterns of California flora.—III. (III.) Potter

#### 105. Developmental Plant Anatomy (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: introductory plant biology (for example, Biological Sciences 1C). Survey of vascular plant structure and development. Current ideas and experimental evidence for developmental concepts.—I. (I.) Canington

#### 108. Systematics and Evolution of Angiosperms (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B and 1C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and

trends within them based on morphological and molecular evidence. (Same course as Evolution and Ecology 108.) GE credit: SciEng.—III. (III.) Doyle

#### 111. Plant Physiology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C; Chemistry 8B and Physics 7C (either may be taken concurrently); course 105 recommended. The plant cell as a functional unit. The processes of absorption, movement, and utilization of water and minerals. Water loss, translocation, photosynthesis, respiration.—I. (I.) Lucas, Dehesh

#### 111D. Problems in Plant Physiology (1)

Discussion—1 hour. Prerequisite: course 111 concurrently. Discussion of problems and applications relating to principles presented in course 111. Students will be assigned problems each week showing novel applications of principles described in course 111 and will prepare answers to be delivered orally during the class period. (P/NP grading only.)—I. (I.) Lucas, Dehesh

#### 112. Plant Growth and Development (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C, Chemistry 8B. Introduction to the mechanisms and control systems that govern plant growth and development and the responses of plants to the environment. Strong emphasis on vegetative development of flowering plants. GE credit: SciEng.—II. (II.) Harada, Sundaresan

#### 112D. Problems in Plant Growth and Development (1)

Discussion—1 hour. Prerequisite: course 112 concurrently. Discussion of problems and applications relating to principles presented in course 112. Students will be assigned problems each week showing novel applications of the principles described in course 112 and will prepare answers to be delivered orally during class period. (P/NP grading only.)—II. (II.) Harada, Sundaresan

#### 113. Molecular and Cellular Biology of Plants (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1C, 101; Biological Sciences 102 recommended. Molecular and cellular aspects of the growth and development of plants and their response to biological and environmental stresses. Primary focus on processes unique to plants. Experimental approaches will be emphasized.—III. (III.) Harada

#### 113D. Problems in Molecular and Cellular Biology of Plants (1)

Discussion—1 hour. Prerequisite: course 113 concurrently. Discussion of topics and applications related to principles presented in course 113. Assigned topics each week show novel applications of the principles described in course 113; discussion of topics during class period. (P/NP grading only.)—III. (III.) Harada

#### 116. Plant Morphology and Evolution (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: introductory plant biology (e.g., Biological Sciences 1C); plant anatomy recommended (e.g., course 105). Introduction to the form, development and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. GE credit: SciEng.—II. (II.) Jernstedt

#### 117. Plant Ecology (4)

Lecture—3 hours; fieldwork—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C; course 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as Evolution and Ecology 117.)—I. (I.) Rejmanek

#### 118. Introductory Phycology and Bryology (5)

Lecture—3 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A and 1C. Comparative morphology, physiology, development and reproduction of cyanobacteria, the major algal groups, and the bryophytes. Focus on structure-function and evolu-

tionary relationships. Ecological factors and commercial uses are considered. Laboratories include study of living organisms and identification exercises.—II. (II.) Canington

### 119. Population Biology of Weeds (3)

Lecture—2 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C; introductory statistics recommended. Origin and evolution of weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions of weeds and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. Not open for credit to students who have completed Plant Biology 121. (Same course as Evolution and Ecology 119.)—III. (III.) Rejmanek

### 123. Plant-Virus-Vector Interaction (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1C, 101; course 105, Plant Pathology 120, and Entomology 100 recommended. Analysis of the interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern experimental approaches to the interdiction of viral movement. Offered alternate years. (Same course as Entomology 123/Plant Pathology 123.)—(I.) Lucas, Gilbertson, Ullman

### 126. Plant Biochemistry (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C or the equivalent, and Biological Sciences 103. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as Molecular and Cellular Biology 126.)—(I.) Callis, Abel

### 140. Culinary and Medicinal Herbs (3)

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 1C. Growth, identification, cultivation, and use of common culinary and medicinal herbs; herbal plant families; effects of climate and soils on herbs; herbal medicine; ecology and geography of herbs; herb garden design; secondary chemistry of active compounds. (Same course as Environmental and Resource Sciences 140.)—III. (III.) Bledsoe

### 141. Principles and Methods of Ethnobotany (4)

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: Biological Sciences 1C or Plant Sciences 2 or the equivalent; course 108 recommended. Examination of concepts, questions, and methods in ethnobotany, the study of human-plant interactions. Specific topics include traditional and scientific classification systems, uses of specific plants, plant evolution under domestication, and ethical issues related to ethnobotany. Offered in alternate years. GE credit: SciEng or SocSci, Wrt.—(II.) Potter, Dean

### 142. Ecology of Crop Systems (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C; Mathematics 16A or Physics 1A, or consent of instructor. Ecological processes governing the structure and behavior of managed ecosystems. Emphasis on mechanistic and systems views of the physical environment, photosynthetic productivity, competition, adaptation, nutrient cycling, energy relations and contemporary issues such as climate change. GE credit: SciEng.—II. (II.) Bloom

### 143. Evolution of Crop Plants (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1C or the equivalent. Origins of crops and agriculture, including methodological approaches, center of origin and diversity, crop dissemination pathways, and differences between wild and cultivated plants. Group studies of individual crops are published on the Internet. Not open for credit to students who have completed Plant Science 103. GE credit: SciEng, Wrt.—III. (III.) Gepts

### 144. Trees and Forests (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1C. Biological structure and function of trees as organisms; understanding of for-

ests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry. (Same course as Environmental Horticulture 144 and Environmental and Resource Sciences 144.)—I. (I.) Barbour, Berry, Bledsoe

### 145. Sierra Nevada Flora (3)

Lecture/laboratory—30 hours (total); fieldwork—50 hours (total). Prerequisite: course 102 or 108 or Evolution and Ecology 121 or Environmental Horticulture 105. An introduction to the flora of the Sierra Nevada. Basic plant identification, the principle plant communities and species of the Sierra Nevada. Class offered the first two weeks in July in the Sierra Nevada. Offered in alternate years.—(III.) Ronald

### 146. Rhizosphere Ecology (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C. Effects of plant-microbe interactions on plant growth, soil formation, and agricultural sustainability. Physical, chemical and biological processes that occur at the surface of plant roots. Evolution and modification of the biochemical and genetic bases of rhizosphere ecology. Offered in alternate years.—(III.) Phillips

### 147. Survey of Plant Communities of California (4)

Lecture/discussion—2 hours; fieldwork—3 hours; extensive writing. Prerequisite: Biological Sciences 1A or 1B or 1C or Molecular and Cellular Biology 10 recommended. Consent of instructor required quarter prior to course. Upper division standing required if enrollment must be limited. Selected plant communities analyzed for their structure and the relationship of their component species to the environment. Four weekend field trips required. GE credit: SciEng, Wrt.—III. (III.) Barbour, Jackson, Ronald

### 148. Introductory Mycology (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Pathology 148.)—I. (I.) MacDonald, Rizzo

### 150. Plant Natural Product Chemistry (3)

Lecture—2 hours; discussion—1 hour. Prerequisite: Biological Sciences 101 and 103, or the equivalent. Traditional biochemical and modern genetic approaches for studying plant-derived compounds such as isoprenoids, alkaloids, and phenylpropanoids. The impact of plant-derived compounds on biological processes in ecology, evolution and nutrition.—I. (I.) Inoue, Kliebenstein

### 152. Plant Genetics (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: Biological Sciences 1A or consent of instructor. Basic principles of transmission genetics, cytogenetics, population and quantitative genetics, and molecular genetics. Practical aspects of genetic crosses and analysis of segregating populations. Not open for credit to students who have completed Plant Science 105. (Former course Plant Science 105.)—III. (III.)

### 153. Plant, Cell, Tissue and Organ Culture (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Plant Sciences 2. Basic and applied aspects of plant tissue culture including media preparation, micropropagation, embryo-genesis, anther culture, protoplast culture and transformation. Offered in alternate years. Not open for credit to students who have completed Plant Science 107. (Former course Plant Science 107.) Offered in alternate years.—II

### 154. Introduction to Plant Breeding (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 152, Biological Sciences 101 or consent of instructor. The principles, methods and applications of plant breeding and genetics to the improvement of crop plants. Illustration of how plant breeding is a dynamic, multidisciplinary, constantly-evolving sci-

ence. Laboratory emphasizes hands-on experience in the basics of breeding through experiments.

(Former course Plant Science 113.)—II. (II.) St. Clair

### 157. Physiology of Environmental Stresses in Plants (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: course 112 (may be taken concurrently) or the equivalent. Stress concepts and principles; physiological, developmental and morphological characteristics enabling plants to avoid or tolerate environmental stresses; mechanisms of acclimation common to many stresses; responses of wild and cultivated species to drought, flooding, nutrient deficiencies, salinity, toxic ions, extreme temperatures. Offered in alternate years.—II. Lauchli, Silk

### 158. Mineral Nutrition of Plants (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 111 or the equivalent. Evolution and scope of plant nutrition; essential and other elements; mechanisms of absorption and translocation; mineral metabolism; deficiencies and toxicities; genetic and ecological aspects of plant nutrition. Not open for credit to students who have completed Plant Biology/Plant Science 135. (Former course Plant Biology/Plant Science 135.)—III. (III.) Richards, Brown

### 160. Principles of Plant Biotechnology (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A and 101. Principles and concepts of plant biotechnology including recombinant DNA technology, plant molecular biology, plant cell and tissue culture, and crop improvement. Not open for credit to students who have completed Plant Science 140. (Former course Plant Science 140.)—II. (II.) Dandekar

### 161A. Plant Genetics and Biotechnology Laboratory (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 152 and/or 160. Techniques of genetic analysis at the molecular and organismal levels, including segregation and linkage analysis, cytogenetics and recombinant DNA. Not open for credit to students who have completed Plant Science 141A. (Former course Plant Science 141A.)—I. (I.) Dandekar, Beckles

### 161B. Plant Genetics and Biotechnology Laboratory (4)

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 152 and/or 160. Advanced techniques of genetic analysis at the molecular and organismal levels, including transformation, gene expression, analysis of transgenic plants and QTL analysis. Not open for credit to students who have completed Plant Science 141B. (Former course Plant Science 141B.)—II. (II.)

### 162. Cellular and Molecular Bases of Ion Transport Processes (4)

Lecture—2 hours; extensive problem solving. Prerequisite: Biological Sciences 1A or the equivalent, Mathematics 16A or the equivalent, Physics 7A-7B or Chemistry 2A-2B or the equivalent. Basic physiological, biochemical, and molecular principles of energy production in plant and animal cells. The use of energy to transport ions and nutrients in and out of the cell, and cellular and molecular mechanisms regulating these processes.—II. (II.) Blumwald, Shackel

### 170. Plant Molecular Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A and 1C or the equivalent. Introduction to the application of molecular genetic techniques to questions concerning ecological, genetic and evolutionary processes in plant populations. Emphasis on the use of molecular genetic information for decision making in management and conservation.—II. (II.) Jasieniuk

### 171. Plant Propagation (4)

Lecture—2 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C. Principles and practices of propagating plants covering anatomical, physiological, and practical aspects. Not open for credit to students who have completed Plant Science 109. (Former course Plant Science 109.)—I. (I.) Burger

**172. Postharvest Physiology and Handling of Horticultural Commodities (3)**

Lecture—3 hours. Prerequisite: general plant science background recommended (e.g., Plant Sciences 2, course 12 or Food Science and Technology 2); concurrent enrollment in course 172L recommended. Physiological processes related to the maturation and senescence of fruits, vegetables, and ornamentals; fundamentals involved in handling, transportation, storage, and marketing practices, e.g., temperature and humidity control, protective treatments, controlled atmospheres. Not open for credit to students who have completed Plant Science 112. (Former course Plant Science 112.)—I. (I.) Kader, Reid, Saltveit

**172L. Postharvest Physiology and Handling Laboratory (2)**

Discussion—1 hour; laboratory—3 hours. Prerequisite: course 172 (may be taken concurrently). Demonstrations and exercises following the subject matter of course 172. Not open for credit to students who have completed Plant Science 112L. (Former course Plant Science 112L.)

**173. Biological Applications in Fruit Tree Management (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Plant Sciences 2 or the equivalents. Physiology, growth, development and environmental requirements of fruit trees and cultural practices used to maintain them. Emphasis on the application of biological principles in the culture of commercially important temperate zone fruit tree species. Not open for credit to students who have completed Plant Science 115. (Former course Plant Science 115.)—II. (II.) DeJong

**174. Biological Applications in Fruit Production (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: Biological Sciences 1C or Plant Sciences 2; course 173 recommended. Reproductive biology of tree-crop species. Biological principles of fruit production, tree nutrition and orchard management. Laboratories emphasize hands-on work with orchard tree systems.—III. (III.) DeJong, Polito

**176. Introduction to Weed Science (3)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C. Principles of weed science including mechanical, biological, and chemical control methods. Weed control in crop, pasture, range, brush, forests, aquatic, and non-crop situations. Types of herbicides. Application of herbicides. Sight identification of common weeds and demonstrations to illustrate the principles. Not open for credit to students who have completed former course 120.—II. (II.) Fischer

**178. Biology and Management of Freshwater Macrophytes (3)**

Lecture—3 hours; two field trips. Prerequisite: Biological Sciences 1A, 1B, 1C, Chemistry 8B; course 111 or Hydrologic Science 122 recommended. Brief survey of common fresh water macrophytes, their reproductive modes, physiology, growth (photosynthesis, nutrient utilization), development (hormonal interactions), ecology and management. Offered in alternate years. Not open for credit to students who have completed former course 150. (Former course 150.)—(I.) Anderson

**189. Experiments in Plant Biology: Design and Execution (3)**

Laboratory/discussion—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C or the equivalent courses in plant sciences, and consent of the instructor. Provides an opportunity for undergraduate students to formulate experimental approaches to current questions in plant biology and to carry out their proposed experiments. May be repeated for credit for a total of 12 units. (P/NP grading only.)—I, II, III. (I, II, III.)

**190C. Research Conference in Botany (1)**

Discussion—1 hour. Prerequisite: upper division standing in botany or related discipline; consent of instructor. Introduction to research methods in botany. Design of field or laboratory research projects,

survey of appropriate literature, and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing; consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology Section faculty. (P/NP grading only.)

**194H. Special Study for Honors Students (1-5)**

Prerequisite: open only to majors of senior standing on honors list. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.)

**196. Postharvest Technology of Horticultural Crops (3)**

Lecture/discussion/demonstration—5 days; field trip—5 days. Prerequisite: upper division or graduate student standing. Intensive study of current procedures for postharvest handling of fruits, nuts, vegetables, and ornamentals in California. Scheduled first two weeks immediately following last day of spring quarter. Considered a spring course for pre-enrollment. Not open for credit to students who have completed Plant Science 196. (Former course Plant Science 196.) (P/NP grading only.)—III. (III.) Mitcham

**197T. Tutoring in Plant Biology (1-5)**

Discussion—2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Section's regular courses. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## Plant Biology (A Graduate Group)

John Harada, Ph.D., Chairperson of the Group

Steffan Abel, Ph.D., Associate Professor  
(Plant Sciences)

Douglas Adams, Ph.D., Associate Professor  
(Viticulture and Enology)

Michael Barbour, Ph.D., Professor (Plant Sciences)

Diane Beckles, Ph.D., Assistant Professor  
(Plant Sciences)

Alan Bennett, Ph.D., Professor (Plant Sciences)

Alison Berry, Ph.D., Associate Professor  
(Plant Sciences)

Caroline Bledsoe, Ph.D., Professor  
(Land, Air, and Water Resources)

Arnold Bloom, Ph.D., Professor (Plant Sciences)

Arnold Blumwald, Ph.D., Professor (Plant Sciences)

Richard Bostock, Ph.D., Professor (Plant Pathology)

John Bowman, Ph.D., Professor (Plant Biology)

Kent Bradford, Ph.D., Professor (Plant Sciences)

Anne Britt, Ph.D., Professor (Plant Biology)

Patrick Brown, Ph.D., Professor (Plant Sciences)

David Burger, Ph.D., Professor (Plant Sciences)

Judy Callis, Ph.D., Professor  
(Molecular and Cellular Biology)

Doug Cook, Ph.D., Professor (Plant Pathology)

Abhaya Dandekar, Ph.D., Professor (Plant Sciences)

Katayoon Dehesh, Ph.D., Professor (Plant Biology)

Ted DeJong, Ph.D., Professor (Plant Sciences)

James Doyle, Ph.D., Professor  
(Evolution and Ecology)

Don Durzan, Ph.D., Professor (Plant Sciences)

Marilynn Eitzler, Ph.D., Professor  
(Molecular and Cellular Biology)

Bryce Falk, Ph.D., Professor (Plant Pathology)

Albert Fischer, Ph.D., Associate Professor  
(Plant Sciences)

Charles Gasser, Ph.D., Professor  
(Molecular and Cellular Biology)

David Gilchrist, Ph.D., Professor (Plant Pathology)

Thomas Gradziel, Ph.D., Professor (Plant Sciences)

John Harada, Ph.D., Professor (Plant Biology)

James Harding, Ph.D., Professor (Plant Sciences)

Stacey Harmer, Ph.D., Assistant Professor  
(Plant Biology)

Theodore Hsiao, Ph.D., Professor

(Land, Air, and Water Resources)

Kentaro Inoue, Ph.D., Assistant Professor  
(Plant Sciences)

Louise Jackson, Ph.D., Professor (Plant Sciences)

Marie Jasieniuk, Ph.D., Assistant Professor  
(Plant Sciences)

Judy Jernstedt, Ph.D., Professor (Plant Sciences)

Adel Kader, Ph.D., Professor (Plant Sciences)

Clarence Kado, Ph.D., Professor (Plant Pathology)

Daniel Kliebenstein, Ph.D. Assistant Professor  
(Plant Sciences)

John Labavitch, Ph.D., Professor (Plant Sciences)

Clark Lagarias, Ph.D., Professor

(Molecular and Cellular Biology)

Andre Lauchli, Ph.D., Professor

(Land, Air, and Water Resources)

J. Heinrich Lieth, Ph.D., Professor (Plant Sciences)

Bo Liu, Ph.D., Associate Professor (Plant Biology)

William Lucas, Ph.D., Professor (Plant Biology)

Julin Maloof, Ph.D., Assistant Professor  
(Plant Biology)

Mark Matthews, Ph.D., Professor

(Viticulture and Enology)

Richard Michelmore, Ph.D., Professor  
(Plant Sciences)

Terence Murphy, Ph.D., Professor (Plant Biology)

Florence Negre, Ph.D., Assistant Professor  
(Plant Sciences)

Donald Nevins, Ph.D., Professor (Plant Sciences)

Sharman O'Neill, Ph.D., Professor (Plant Biology)

Kyaw Tha Paw, Ph.D., Professor

(Plant Sciences)

**Graduate Study.** The Graduate Group in Plant Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at colleges and universities, government or industrial laboratories. The graduate curriculum involves both a broad overview of the discipline and in-depth study and research in one of four areas of specialization: cell and developmental biology; systematics and evolutionary biology; environmental and integrative biology; and molecular biology, biochemistry and genomics. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, cell biology, cytology, developmental biology, ecology, genetics, molecular biology, morphology, paleo-botany, physiology, population biology, systematics, and weed science.

**Preparation.** For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisite to the advanced degrees in Plant Biology: inorganic chemistry, organic chemistry, introductory physics, genetics, structural botany, biochemistry, introductory plant physiology, introductory plant physiology laboratory, calculus, introductory statistics, plant ecology/systematics/evolution, genetics, and plant cell/molecular biology. Limited deficiencies can be made up after admission. The graduate adviser, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

**Graduate Adviser.** Contact the Group office.

**Courses in Plant Biology (PBI)****Graduate Courses****200A. PBGG Core Course Series-Fall quarter (5)**

Lecture—3 hours; discussion—2 hours. Prerequisite: graduate standing; a broad background of undergraduate-level coursework in Plant Biology is recommended. The first of three PBGG graduate core courses. Coverage includes (1) plant genes, (2) biotechnology, (3) genomes and gene flow, (4) principles of plant systematics, and (5) the evolution of flowering plants.—I. (I.) Potter

**200B. PBGG Core Course Series — Winter quarter (5)**

Lecture—3 hours; discussion—2 hours. Prerequisite: course 200A. The second of three PBGG graduate core courses. Coverage includes (1) embryo devel-

opment, (2) cytoskeleton and vesicle trafficking, (3) cell walls, (4) cell growth, (5) secondary metabolism, (6) plastids and (7) senescence.—II. (II.) Labavitch

**200C. PBGG Core Course Series-Spring quarter (5)**

Lecture—3 hours; discussion—2 hours. Prerequisite: course 200A and 200B. The third of three PBGG graduate core courses. Coverage includes (1) plant water relations, (2) cellular & long distance transport processes, (3) mineral nutrition, (4) environmental impacts on growth & development, (5) stress perception & responses, (6) canopy processes, and (7) plant interactions with other organisms.—III. (III.) Blumwald, Silk

**201. Plant Senescence: Cellular and Molecular Aspects (4)**

Lecture—4 hours. Prerequisite: Plant Biology 111, 112; Biological Sciences 102 and 103. Cellular and molecular phenomena associated with the senescence of plants and plant parts. Emphasis on principles and mechanisms. Offered in alternate years.—I. Reid

**202. Advanced Physiology of Cultivated Plants (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing, Plant Biology 111 or the equivalent. Physiological processes as they pertain to growth and partitioning in higher plants. Background lectures on source-sink concepts and current areas of investigation followed by weekly round-table discussion led by students on focused sub-topics in the source-sink area. Offered in alternate years. (S/U grading only.)—I. DeJong

**203N. Research Tools in Plant Cell and Molecular Biology (4)**

Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: Plant Biology 111 or Biological Sciences 104 or the equivalent. Theories of commonly employed approaches in plant cell and molecular biology, including antibodies, epitope-tagging, bioluminescence, protein identification, and protein localization. Breakthroughs on techniques used in plant biology. Offered in alternate years. (S/U grading only.)—I. Liu

**205B. Advanced Plant Physiology (3)**

Lecture/discussion—3 hours. Prerequisite: Plant Biology 111, 112, and Biological Sciences 103. Photosynthesis, photophosphorylation, chloroplast metabolism and biology. Offered in alternate years.—II. Theg

**205C. Advanced Plant Physiology/Biochemistry (3)**

Lecture—3 hours. Prerequisite: Plant Biology 111, 112, Biological Sciences 103. Integrative studies that combine physiological, biochemical and molecular approaches to study of plant metabolism. Fundamentals of basic metabolic pathways extending to use of mutants and genetic engineering to dissect such pathways; how pathways are integrated and respond to signals. Offered in alternate years.—III.

**208. Plant Hormones and Regulators (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Plant Biology 112. Chemistry, biochemistry and physiological activity of major classes of natural plant growth regulators. Primary consideration given to concepts that are of current research interest. Growth regulators in agriculture. Offered in alternate years.—II. Abel

**210. Plant Ecophysiology (3)**

Lecture—3 hours. Prerequisite: Plant Biology 111, 112, 117. Study of the mechanisms of physiological adaptation of plants to their environment. Offered in alternate years.—(II.) Pearcy

**211. Ecophysiological Methods (3)**

Lecture—1 hour; laboratory—4 hours; individual project; one Saturday field trip to be arranged. Prerequisite: Plant Biology 111, 117, and consent of instructor. A laboratory and lecture course covering basic concepts underlying the research methods and instrumentation useful in plant ecophysiology. Offered in alternate years.—III. Pearcy

**212. Physiology of Herbicidal Action (3)**

Lecture—3 hours. Prerequisite: Plant Biology 112, 122. Study of the fundamental processes involved in the physiological action of herbicides. Detailed consideration of the fate of herbicides in plants. Offered in alternate years.—III.

**214. Higher Plant Cell Walls (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 112, and a course in biochemistry. Lectures focus on the structure, analysis, synthesis, and development-related metabolism of cell walls. Discussions center on analysis of scientific papers related to lecture topics. Offered in alternate years.—I. Labavitch, Nevins

**217. Membrane Biology of Plants (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 112 and Biological Sciences 103, or consent of instructor. Structure, biogenesis, and function of plant cell membranes. Emphasis will be placed on the molecular basis of plant membrane functions and on the role of membranes in selected physiological processes. Offered in alternate years.—(III.) Lucas

**218A. Advanced Concepts in Plant Cell Biology: Cell Biogenesis (3)**

Lecture/discussion—3 hours. Prerequisite: Biological Sciences 102, 103. Survey of molecular mechanisms underlying structural and functional differentiation of plant cell subcellular compartments. Topics include membrane and protein biosynthesis, protein targeting and turnover, and regulation of nuclear and organellar gene expression as related to the biogenesis of plant cell organelles. Offered in alternate years.—(II.) Bennet, Theg

**218B. Advanced Concepts in Plant Cell Biology: Signal Transduction and Intercellular Communication (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 102, 103 or consent of instructor. Intracellular signal transduction pathways in the plant cells as well as longer term, adaptive responses which involve signals transmitted between plant cells. Weekly lectures and student-led discussions on current literature. Offered in alternate years.—III. Lucas, Dehesh

**219. Reproductive Biology of Flowering Plants (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 111 and Biological Sciences 101. Fundamental mechanisms of reproductive biology of flowering plants and their influence on genetic variation, evolution, and cultural practices. Offered in alternate years. (Former course Plant Science 270.)—(I.)

**220. Plant Developmental Biology (4)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: plant anatomy, physiology, and biochemistry. A survey of the concepts of plant development and organization. Examines plant cells, tissues, and organs with special emphasis on experimental evidence for mechanisms regulating developmental processes. Offered in alternate years.—Bowman, Sinha

**223. Special Topics in Scientific Method (2)**

Discussion—2 hours. Examine the historical and philosophical background of the scientific method. Analyze the rational, perceptual, causal, creative and social aspects of scientific knowledge. Clarify the roles of reason, experimentation and creativity in scientific research. (S/U grading only.)—I. (I.) Bradford

**224. Water in Physiology and Ecology of Plants (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Hydrologic Science 124, or Plant Biology 111 and 117, or consent of instructor. Evapotranspiration and energy balance; water and component potentials; water transport to, within, and from plants; dynamics and regulation of water status; drought resistance; responses to water deficits and salinity; water use efficiency; adaptation to aridity; productivity in relation to water. Offered every fourth quarter. (Former course Plant Science 224.)—II. Hsiao

**225. Methods and Instrumentation for Crop and Soil Science (3)**

Lecture—1 hour; laboratory—3 hours; discussion—1 hour. Prerequisite: basic knowledge of plant physiology, soil science, chemistry and physics. Theory and practice of in situ sampling and instrumentation methods for crop science (broadly defined to include tree crops) and related aspects of soil science (e.g., moisture and fertility) and laboratory analysis. Offered in alternate years.—III.

**227. Plant Molecular Biology (4)**

Lecture/discussion—4 hours. Prerequisite: Molecular and Cellular Biology 121 or 161. Molecular aspects of higher plant biology with emphasis on gene expression. Plant nuclear and organelle genome organization, gene structure, mechanisms of gene regulation, gene transfer, and special topics related to development and response to biological and environmental stimuli.—(II.) Britt, Sinha

**229. Molecular Biology of Plant Reproduction (3)**

Lecture—3 hours. Molecular genetic basis of plant reproduction. Emphasis on understanding developmentally regulated gene expression as it relates to the major changes that occur during plant reproduction and on the genetic control of flowering. Offered in alternate years.—O'Neill

**290A. Faculty Seminar (1)**

Seminar—1 hour. Seminars presented by members of Plant Biology faculty describing their areas of research. Required of all beginning students in the Plant Biology Graduate Group. (S/U grading only.)—I, II, III. (I, II, III.)

**290B. Seminar (1)**

Seminar—1 hour. Seminars presented by visiting scientists on research topics of current interest. (S/U grading only.)—I, II, III. (I, II, III.)

**290C. Research Conference in Botany (1)**

Discussion—1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and discussion by faculty and graduate students of research projects in botany. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Graduate Student Seminar in Plant Biology (1)**

Seminar—1 hour. Prerequisite: graduate student standing. Student-given seminars on topics in plant biology, with critiques by instructor and peers. How to give a seminar, including preparation of visual and other teaching aids. Topic determined by instructor in charge. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**292. Seminars in Plant Biology (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Review of current literature in botanical disciplines. Disciplines and special subjects to be announced quarterly. Students present and analyze assigned topics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**293. Seminar in Postharvest Biology (1)**

Discussion—1 hour. Prerequisite: consent of instructor; open to advanced undergraduates. Intensive study of selected topics in the postharvest biology of fruits, vegetables, and ornamentals. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**297T. Tutoring in Plant Biology (1-5)**

Tutorial—3-15 hours. Offers graduate students, particularly those not serving as teaching assistants, the opportunity to gain teaching experience. (S/U grading only.)

**298. Group Study (1-5)**

May be repeated up to four times for credit. (S/U grading only.)

**299. Research (1-12)**

Prerequisite: graduate standing. (S/U grading only.)

**Professional Course****390. The Teaching of Plant Biology (2)**

Discussion—2 hours. Prerequisite: graduate standing; concurrent appointment as a teaching assistant in Plant Biology. Consideration of the problems of

teaching botany, especially of preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. (S/U grading only.)—I, II, III. (I, II, III.)

## Plant Pathology

(College of Agricultural and Environmental Sciences)

Thomas R. Gordon, Ph.D., Chairperson of the Department

**Related Major Program.** See the major in [Plant Biology](#), on page 413.

**Graduate Study.** The Department of Plant Pathology offers programs of study and research leading to the M.S. and Ph.D. degrees. Information can be obtained from the graduate adviser. See also the [Graduate Studies](#), on page 96.

**Graduate Advisers.** R. L. Gilbertson, L. Epstein, B. C. Kirkpatrick, R. M. Davis

**Courses in Plant Pathology (PLP)****Lower Division Course****40. Edible Mushroom Cultivation (2)**

Lecture—1 hour; laboratory/discussion—3 hours. Prerequisite: Biological Sciences 10 or Microbiology 20 recommended. Principles and practices of growing edible mushrooms, including culture maintenance, basic mushroom substrate preparation, composting, spawn generation techniques, inoculation methods, harvesting, and pests and pest management.—II. (II.) Davis

**Upper Division Courses****120. Introduction to Plant Pathology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1C; Microbiology 102 recommended. The nature, cause, and control of plant diseases.—I, III. (I, III.) Falk, Gilbertson, Bostock

**123. Plant-Virus-Vector Interaction (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1C, 101; Plant Biology 105, course 120, and Entomology 100 recommended. Analysis of the interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern experimental approaches to the interdiction of viral movement. Offered alternate years. (Same course as Entomology 123/Plant Biology 123.)—I. Lucas, Gilbertson, Ullman

**130. Fungal Biotechnology and Biochemistry (3)**

Lecture—3 hours. Prerequisite: Plant Biology 119, Biological Sciences 103. How fundamental physiological and biochemical activities of fungi impact the destructive and beneficial roles of these organisms in nature. Utilization and manipulation of fungi for biotechnological and industrial applications.—II. (II.) Gilchrist, Bostock

**135. Field Identification of Mushrooms (1)**

Field work; three-day mandatory field trip. Prerequisite: introductory course in biological sciences; course in mycology recommended. Collection and identification of mushrooms and other fleshy fungi based on macro and microscopic features. (P/NP grading only.)—II. (II.) Davis

**140. Agricultural Biotechnology and Public Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: high school level biology, including genetics; Biological Sciences 10 recommended. Examination of the development and deployment of agricultural biotechnologies, particularly transgenic crop plants, microorganisms and animals, with consideration of conventional agriculture, public perceptions of technologies, food safety, environmental impact, public policies and regulations. GE credit: SciEng, Wrt.—III. (III.) Bruening, Williamson

**148. Introductory Mycology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Biology 148.)—I. MacDonald, Rizzo

**150. Fungal Ecology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1C or equivalent. The ecological roles of fungi as saprobes, mutualists and parasites in native and managed ecosystems. Physiological and reproductive strategies associated with adaptations to diverse habitats.—II. (II.) Gordon

**151A-151B. Fungal Biodiversity in Natural Environments (4-4)**

Lecture—1 hour; laboratory—6 hours; field work—three or four one-day-long weekend field trips. Prerequisite: introductory course in mycology (e.g., Plant Biology 148/course 148); Plant Pathology 150 (may be taken concurrently). Fungal biodiversity within a natural habitat. Fungi collected on field trips will be identified during laboratory periods. The ecological roles of the various fungal taxa are emphasized. Offered in alternate years.—(II,III.) MacDonald

**155. Ecology of Forest Diseases (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Tree diseases and their role in temperate and tropical forest ecosystems. Impacts of both native and exotic pathogens. Interactions between forest pathogens and insects. Approaches to management and regulation. One field trip is required. Offered in alternate years.—III. Rizzo

**185. Advanced Mushroom Taxonomy (2)**

Laboratory/discussion—3 hours; fieldwork—1 hour. Prerequisite: course 135 or 148, and Biological Sciences 101 or the equivalent. Microscopic and molecular methods used in the identification of mushroom species; molecular characterization including PCR-amplification of ribosomal nuclear DNA, digestion of the product with restriction enzymes, and DNA sequencing; a one-day field trip is required. Offered in alternate years.—I. Davis

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: course 120 and consent of instructor. Work experience off and on campus, supervised by a member of the faculty. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****205A. Diseases of Vegetable and Field Crops (3)**

Lecture/discussion—3 hours; fieldwork—3 hours. Prerequisite: course 120. Clinical study of diseases of vegetable and field crops with emphasis on etiology, epidemiology, diagnosis, and control. Field trips required. Offered in alternate years.—III. Davis, Webster

**205B. Diseases of Vegetable and Field Crops—Summer Field Trip (1)**

Fieldwork—3 hours. Prerequisite: courses 120 and 205A. Continuation of course 205A—four-day field trip investigating diseases of vegetable and field crops (Deferred grading only, pending completion of sequence. S/U grading only.)—IV. (IV.) Davis, Webster

**206A-206B. Diseases of Fruit, Nut, and Vine Crops (3-1)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 120; Plant Biology 119. Course 205 may be taken concurrently. Clinical study of fruit, nut, and vine crops diseases with emphasis on etiology, epidemiology, diagnosis, and control. Offered in alternate years. (Deferred grading only, pending completion of sequence.)—III-IV. (III-IV.)

**208. Ecology of Plant Pathogens and Epidemiology of Plant Diseases (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 120 or the equivalent. Interaction between higher plants, plant pathogens, and the environment which is important in the occurrence and severity of plant disease. Emphasis is placed on the population dynamics and ecology of plant pathogens in the aerial and soil environment. Offered in alternate years.—III. Duniway

**209. Principles of Plant Disease Control (3)**

Lecture—3 hours. Prerequisite: course 120 or the equivalent. Discussion of the underlying principles and methods used for the control of plant diseases. Emphasis placed on application of epidemiological principles, biological (including host resistance), and chemical strategies to achieve disease control. Offered in alternate years.—II.

**210. Biochemistry and Molecular Biology of Plant-Microbe Interaction (4)**

Lecture/discussion—4 hours. Prerequisite: Biological Sciences 101, 102, 103, and 104, or the equivalent. Discussion of plant-microbe interactions, focused on the underlying cellular, biochemical, and molecular events that determine the diseased state. Offered in alternate years.—I. Gilchrist, Bostock

**215X. Genetics and Molecular Biology of Plant Pathogens (4)**

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 120 and Biological Sciences 101. Genetic analysis of pathogenicity, cultivar-specificity, and host-specificity in plant pathogens, particularly fungi; application of molecular biology to the isolation and characterization of the genes involved; and to aspects of pathogen identification; emphasis on research techniques and problem-solving. Offered in alternate years.—(II.)

**217. Molecular Genetics of Fungi (3)**

Lecture—3 hours. Prerequisite: graduate standing in a biological science, Biological Sciences 101, 103, Molecular and Cellular Biology 161, Plant Biology 119, courses 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; plant pathogenesis; secretion; control of reproduc-

tion; molecular evolution; transformation; and gene manipulation. Offered in alternate years. (Same course as Biological Chemistry 217.)—II. Holland

**222. Experimental Approaches in Plant Pathology (2)**

Lecture—2 hours. Prerequisite: course 120 or the equivalent. Experimental approaches, methods of analysis and techniques used in current research in plant pathology, particularly with fungi. Avoiding common research pitfalls. Offered in alternate years.—II. Epstein

**224. Advanced Mycology (4)**

Lecture—2 hours; laboratory—6 hours. Prerequisite: course 148 or Plant Biology 148 or consent of instructor. Systematics, evolution, and ecology of the fungi. Topics include modern techniques and theories on classification of fungi, species concepts, sexual compatibility and vegetative compatibility. Laboratories emphasize various approaches to fungal identification. Offered in alternate years.—III. Rizzo

**228. Plant Bacteriology (5)**

Lecture—2 hours; laboratory—9 hours. Prerequisite: course 120; Microbiology 2 or the equivalent; Biological Sciences 102, 103. Study of bacteria which have a saprophytic, symbiotic, or parasitic association with higher and lower plants. Clinical and molecular methods for identification and classification of these bacteria. Offered in alternate years.—(I.) Kirkpatrick, Gilbertson

**230. Plant Virology (3)**

Lecture—3 hours. Prerequisite: upper division or graduate course in molecular biology or graduate student in plant pathology. Viruses as causal agents of plant disease and as tools for manipulating plants; structures of virus particles; mechanisms of transmission, replication, and spread in the plant; cytology and molecular biology in susceptible and resistant reactions to virus infection; virus disease control. Only 2 units of credit to students who have completed Microbiology 262. Not open for credit to students who have completed course 226. Offered in alternate years.—II. Bruening, Falk

**230L. Plant Pathology Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 230 (may be taken concurrently). Experimental approaches and methods for plant virus identification; investigation of plant virus infection cycles, disease induction, plant reaction to infection, and the structure of virus particles. Not open for credit to students who have completed course 226.—Bruening, Falk

**290. Seminar (1)**

Seminar—1 hour. Review and evaluation of current research in plant pathology. (S/U grading only.)—I, II, III. (I, II, III.)

**290C. Advanced Research Conference (1)**

Seminar—1 hour. Prerequisite: course 120 or consent of instructor. Presentation, evaluation, and critical discussions of research activities in the area of advanced plant pathology; primarily designed for graduate students. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Seminar in Molecular Plant Pathology (1)**

Seminar—1 hour. Prerequisite: course 120 or consent of instructor. Review and evaluation of current literature and research in biochemistry and molecular biology of plant-microbe interactions. May be repeated for credit. (S/U grading only.)—I, II. (I, II.) Bostock, Gilchrist, Cook, VanAlfen

**293. Seminar on Soil Microbiology and Root Diseases (1)**

Seminar—1 hour. Prerequisite: basic knowledge of soil microbiology and plant pathology. Critical reviews of current research papers related to soil microbiology and ecology, soil-borne plant pathogens, and/or biological control. May be repeated for credit. (S/U grading only.)—II. Epstein

**295. Seminar in Mycology (1)**

Seminar—1 hour. Review and evaluation of current literature and research in mycology. May be repeated for credit. (S/U grading only.)—III. (III.) Rizzo

**298. Special Group Study (1-5)****299. Research (1-12)**

(S/U grading only.)

 Trevor V. Suslow, Ph.D., Lecturer  
 Kenneth W. Tate, Ph.D., Lecturer  
 Steven R. Temple, Ph.D., Lecturer

**Major Programs.** See *Agricultural Management and Rangeland Resources*, on page 124, *Biotechnology*, on page 163, *Crop Science and Management*, on page 187, and *Environmental Horticulture and Urban Forestry*, on page 259.

**Related Courses.** See the *Biotechnology*, *Environmental Horticulture*, *Horticulture and Agronomy*, and *Plant Biology* course listings.

**Graduate Study.** For related graduate study, see the M.S. degree programs in *Horticulture and Agronomy*, and *International Agricultural Development*, and the M.S. and Ph.D. degree programs in the graduate groups of *Plant Biology*, *Ecology*, *Genetics*, *Geography*, and *Soils and Biogeochemistry*. See also *Graduate Studies*, on page 97, in this catalog.

### Courses in Plant Sciences (PLS)

(Formerly courses in *Agricultural Management and Rangeland Resources*, *Agronomy*, *Crop Science and Management*, *Pomology*, *Range Science and Vegetable Crops*.)

#### Lower Division Courses

##### 1. Agriculture, Nature and Society (3)

Lecture—2 hours; discussion/laboratory—1 hour. Multiple perspectives and connections between the natural sciences, social sciences, and agriculture. Emphasis on agriculture's central position between nature and society and its key role in our search for a productive, lasting and hospitable environment. Several full-period field trips provide hands-on learning. Not open for credit to students who have completed *Agricultural Management and Rangeland Resources 1*. (Former course *Agricultural Management and Rangeland Resources 1*.)—I. (I.) Gradziel

##### 2. Botany and Physiology of Cultivated Plants (4)

Lecture—3 hours; discussion/laboratory—3 hours. Prerequisite: high school course in biology and chemistry recommended. A holistic introduction to the underlying botanical and physiological principles of cultivated plants and their response to the environment. Includes concepts behind plant selection, cultivation, and utilization. Laboratories include discussion and interactive demonstrations. Not open for credit to students who have completed *Agricultural Management and Rangeland Resources 2*. (Former course *Agricultural Management and Rangeland Resources 2*.)—II. (II.) Saltveit, Marrush

##### 10. Fruits and Nuts of California and the World (3)

Lecture—3 hours. Field trip on seventh Saturday of quarter (1/2 day). Biological and environmental principles of tree-crop agriculture emphasizing California production. Topics include temperate and subtropical species, biotechnology and genetic improvement, environmental physiology, plant and crop growth, pest and disease control, consumer issues. GE credit: SciEng. Not open for credit to students who have completed *Pomology 10*. (Former course *Pomology 10*.)—II. (II.) Polito

##### 21. Applications of Microcomputers in Agriculture (3)

Lecture—1.5 hours; laboratory/discussion—2 hours; autotutorial—2 hours. Prerequisite: high school algebra.

personal computers, spreadsheets, database management, word processing and communications. Not open for students who have completed *Agricultural Management and Rangeland Resources 21*, *Computer Science Engineering 15*, *30*, *35*, or *Engineering 5*. (Former course *Agricultural Management and Rangeland Resources 21*.)—I, II, III. (I, II, III.) Laca, Geng

##### 49. Organic Crop Production Practices (3)

Lecture—1 hour; discussion—1 hour; field work—3 hours. Principles and practices of organic production of annual crops. Topics include organic crop, soil, and pest management, cover cropping, composting, seeding, transplanting, irrigation, harvesting and marketing. Includes field trip(s). Not open for credit to students who have completed *Agricultural Management and Rangeland Resources 49*. (Former course *Agricultural Management and Rangeland Resources 49*.) (P/NP grading only.)—I, III. (I, III.) Van Horn

##### 92. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by faculty member. (P/NP grading only.)

##### 98. Directed Group Study (1-5)

Primarily for lower division students. (P/NP grading only.)

##### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

### Upper Division Courses

##### 101. Agriculture and the Environment (3)

Lecture—3 hours. Prerequisite: course 2 or consent of instructor. Interaction between agriculture and the environment. Principles required to analyze conflict and develop solutions to complex problems facing society. Not open for credit to students who have completed *Agricultural Management and Rangeland Resources 101*. (Former course *Agricultural Management and Rangeland Resources 101*.)—II. (II.) Phillips

##### 105. Concepts in Pest Management (3)

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: *Biological Sciences 1C* or course 2, *Chemistry 8B*. Introduction to the ecological principles of integrated pest management, biology of different classes of pests and the types of losses they cause, population assessment, evaluation of advantages and disadvantages of different techniques used for pest management, IPM programs. Not open for credit to students who have completed *Agricultural Management and Rangeland Resources 105*. (Former course *Agricultural Management and Rangeland Resources 105*.)

##### 107. Small Fruit Production (2)

Lecture—2 hours; two field trips arranged at mutual convenience. Prerequisite: *Biological Sciences 1C* or the equivalent. Strawberries (*Fragaria*), blackberries-raspberries (*Rubus*), blueberries-cranberries (*Vaccinium*) as important nutritional resources; their origin, production and utilization with emphasis on recent progress in integrated management. Not open for credit to students who have completed *Agricultural Management and Rangeland Resources 107*. (Former course *Agricultural Management and Rangeland Resources 107*.) Offered in alternate years.—(II.) Shaw

##### 110A. Principles of Agronomic Crop Production in Temperate and Tropical Systems (3)

Lecture—3 hours. Prerequisite: course in general botany or course 2 recommended. Fundamentals of field crop production in temperate and tropical climates. Resource utilization and economic, political and social problems are considered in relation to technological problems and their influences on agricultural development. Not open for credit to students who have completed *Agricultural Management and Rangeland Resources 110A*. (Former course *Agricultural Management and Rangeland Resources 110A*.)

**110B. Management of Agronomic Crops in Temperate and Tropical Systems (3)**

Lecture—3 hours. Prerequisite: course in general botany or course 2; course 110A recommended. Application of agronomic principles in production of temperate and tropical crops. Specific crops discussed with reference to management and efficient use of physical and biological resources. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110B. (Former course Agricultural Management and Rangeland Resources 110B.)—III. (II.) Travis, Rains

**110C. Crop Management Systems for Vegetable Production (4)**

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 2; course 110A recommended. Horticultural principles applied to production and management systems for vegetable crops. Laboratory and discussion will illustrate efficient field management and resource use practices. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110C. (Former course Agricultural Management and Rangeland Resources 110C.)—I. (I.) Bloom, Marrush

**110L. Principles of Agronomy Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 110B (may be taken concurrently). Field-oriented introduction to principles of agronomic crop production. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110L. (Former course Agricultural Management and Rangeland Resources 110L.)

**112. Forage Crop Ecology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1C or consent of instructor. Forages as a world resource in food production. Ecological principles governing the adaptation, establishment, growth and management of perennial and annual forages, including pastures, rangelands and hay; aspects of forage quality which affect feeding value to livestock. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 112. (Former course Agricultural Management and Rangeland Resources 112.) Offered in alternate years.—III. Teuber

**118. Seed Production and Quality (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 2 or Biological Sciences 1C; Plant Biology 152 recommended. Principles of crop seed production, storage and utilization. Biological and environmental factors influencing seed quality. Measurement and preservation of seed vigor and viability. Technological aspects of crop establishment from seeds. Laboratories include field trips to seed industry facilities. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 118. (Former course Agricultural Management and Rangeland Resources 118.) Offered in alternate years.—(III.) Bradford

**120. Applied Statistics in Agricultural Science (4)**

Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: upper division standing. Applications of statistical methods to the analysis and interpretation of research data in plant, animal, behavioral, food and nutritional sciences. Lectures cover basic concepts and statistical methods. Specialized laboratory sections cover procedures, data processing and interpretations. GE credit: SciEng. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 120. (Former course Agricultural Management and Rangeland Resources 120.)—I. (I.) Teuber

**121. Systems Analysis in Agriculture and Resource Management (4)**

Lecture—2 hours; discussion/laboratory—2 hours. Prerequisite: course 21 or equivalent computer experience; Mathematics 16A. The process of systems analysis and dynamic simulation of biological and environmental systems, use of systems analysis for development of optimal management strategies for agricultural and environmental systems. GE credit: SciEng, Wrt. Not open for credit to students who

have completed Agricultural Management and Rangeland Resources 121. (Former course Agricultural Management and Rangeland Resources 121.)—I. (I.) Foin

**122. Management of Information for the Agricultural and Environmental Sciences (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 21 or consent of instructor. Introduction to systems and technology for acquiring, storing, manipulating and communicating various types of information including numerical data, text, graphics and multimedia images. Laboratory exercises introduce a wide variety of information management systems used in offices and laboratories. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 122. (Former course Agricultural Management and Rangeland Resources 122.)

**130. Rangelands: Ecology, Conservation and Restoration (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1C; introductory ecology course and junior standing recommended. Introduction to the ecological principles and processes important for an understanding of the dynamics of range ecosystems. Emphasis on ecological and evolutionary concepts underlying management strategies for conserving biological diversity and environmental quality in rangelands. Offered in alternate years. GE credit: SciEng, Wrt. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 130. (Former course Agricultural Management and Rangeland Resources 130.)—(II.) Rice

**131. Identification and Ecology of Grasses (2)**

Lecture—7.5 hours; laboratory—20 hours; discussion—5 hours (total for course). Prerequisite: Biological Sciences 1C or course 2; Plant Biology 102 and junior standing recommended. Taxonomy and identification of western grasses. Development of skills in using plant identification keys. Ecology and evolution of grasses in grazing ecosystems. Given the week following spring quarter. Offered in alternate years. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 131. (Former course Agricultural Management and Rangeland Resources 131.)—III. Rice

**134. Comparative Ecology of Major Rangeland Systems (3)**

Lecture—3 hours; one Saturday field trip required. Prerequisite: course 130 or the equivalent; Environmental Science and Policy 100 recommended. Study of vegetation structure, composition, and succession in North American rangeland communities. Description and comparison of interactions between vegetation and grazing animals on grassland, desert, forested, and tundra rangelands. Discussion of current rangeland management strategies. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 134. (Former course Agricultural Management and Rangeland Resources 134.)

**135. Ecology and Community Structure of Grassland and Savannah Herbivores (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A or 1B and course 2, or Biological Sciences 1C; general ecology course (Environmental Science and Policy 100) recommended. Feeding ecology of grassland herbivores and its importance in evolution of herbivore communities and social systems. Optimal foraging, interspecific interactions, and primary productivity are considered as factors structuring natural and managed grassland and savannah systems. Offered in alternate years. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 135. (Former course Agricultural Management and Rangeland Resources 135.)—(I.) Demment

**137. Field Course in Rangeland Monitoring and Management (2)**

Lecture—1 hour; fieldwork—3 hours (week-long intensive field course given the week following spring quarter). Prerequisite: course 2 or the equivalent; Plant Biology 102 and junior standing recom-

mended. Introduction to rangeland vegetation monitoring methods and management strategies. Field sampling of vegetation composition and structure, soil status, and wildlife and fish habitat. Grazing management strategies to achieve desired future condition of rangelands. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 137. (Former course Agricultural Management and Rangeland Resources 137.)

**150. Cropping Systems of the World (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2 or Biological Sciences 1C, and Soil Science 10. General concepts of the functioning of cropping systems as related to resource availability, energy flow, economic yield, sustainability and integration; means of increasing resource use efficiency; low and high input cropping systems in temperate and tropical zones. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 150. (Former course Agricultural Management and Rangeland Resources 150.)—II. (II.) van Kessel

**160. Agroforestry: Global and Local Perspectives (3)**

Lecture/discussion—3 hours. Prerequisite: course 2 or Biological Sciences 1C, Plant Biology 142 or a general ecology course (Environmental Science and Policy 100). Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 160. (Former course Agricultural Management and Rangeland Resources 160.) Offered in alternate years.—I. Gradziel

**170A. Fruit and Nut Cropping Systems (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major pomological crops, analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Offered in alternate years. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 170A. (Former course Agricultural Management and Rangeland Resources 170A.)—(I.) Gradziel

**170B. Fruit and Nut Cropping Systems (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major pomological crops, including analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 170B. (Former course Agricultural Management and Rangeland Resources 170B.) Offered in alternate years.—(III.) Gradziel, McGranahan

**180. Introduction to Geographic Information Systems (4)**

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 21 or equivalent familiarity with computers, course 120 or the equivalent, Mathematics 16A. Management and analysis of georeferenced data. Spatial database management and modeling. Applications to agriculture, biological resource management and social sciences. Cartographic modeling. Vector and raster-based geographic information systems. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 132 or 180. (Former course Agricultural Management and Rangeland Resources 180.) [Same course as Applied Biological Systems Technology 180.]—I. (I.) Plant

**190. Seminar on Alternatives in Agriculture (2)**

Seminar—2 hours. Prerequisite: upper division standing. Seminar on topics related to alternative theories, practices and systems of agriculture and the relationship of agriculture to the environment and society. Scientific, technological, social, political and economic perspectives. May be repeated for credit. (Former course Agricultural Management and Rangeland Resources 190.) (P/NP grading only.)—I, II. (II.) Van Horn

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in plant and environmental sciences. Internship supervised by a faculty member. (P/NP grading only.)

**194H. Senior Honors Thesis (2-6)**

Independent study. Prerequisite: Senior standing; overall GPA of 3.250 or higher and consent of master adviser. Two or three successive quarters of guided research on a subject of special interest to the student. (P/NP grading only; deferred grading only, pending completion of thesis.)

**197T. Tutoring in Plant Sciences (1-5)**

Tutorial—1-5 hours. Prerequisite: upper division standing, completion of course being tutored or the equivalent, consent of instructor. Leading small voluntary discussion or lab groups affiliated with one of the department's regular courses. May be repeated for up to eight units of credit. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****205. Experimental Design and Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 120 or the equivalent. Graduate students in agricultural and environmental sciences will be introduced to the research process and statistical methods to plan, conduct and interpret experiments. Not open for credit to students who have completed Agronomy 205. (Former course Agronomy 205.)—II. (II.) Dubcovsky

**206. Multivariate Systems and Modeling (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 120 or the equivalent. Graduate students in the biological and environmental sciences will be presented multiple regression, multivariate and computer modeling methods needed to conduct research experiments and analyze multivariate data systems.—III. (III.) Laca

**211. Principles and Practices of HPLC (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: undergraduate physics and chemistry; Biological Sciences 102, 103 recommended. Principles and theory of HPLC involving various modes of separation and detection. Optimization of separation using isocratic and gradient elution. Develop practical knowledge about the use, maintenance and troubleshooting of HPLC equipment, including HPLC columns. Development of new HPLC methods. Not open for credit to students who have completed Agronomy 211. (Former course Agronomy 211.)—III. (III.) Goyal

**212. Postharvest Biology and Biotechnology of Fruits and Nuts (3)**

Lecture—3 hours. Prerequisite: Plant Biology 172 or the equivalent. Review of postharvest biology of fruits and nuts in relation to biotechnological procedures used in handling, emphasizing research needs. Not open for credit to students who have completed Pomology 212. (Former course Pomology 212.) Offered in alternate years.—(III.) Kader, Mit-cham

**213. Postharvest Physiology of Vegetables (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Plant Biology 172. Comparative physiology of harvest vegetables; emphasis on maturation, senescence, compositional changes, physiological disorders and effects of environmental factors. Concepts and research procedures. Not open for credit to students who have completed Vegetable Crops 212. (Former course Vegetable Crops 212.) Offered in alternate years.—(III.) Saltveit

**216. Ecology and Agriculture (3)**

Lecture/discussion—3 hours. Prerequisite: Plant Biology 142 or consent of instructor. Ecological principles and relationships as applied to agriculture. Integration of ecological approaches into agricultural research to develop environmentally sound management practices. Topics include crop autecology, biotic interactions among crops and pests, and crops systems ecology. Not open for credit to students who have completed Vegetable Crops 216. (Former course Vegetable Crops 216.) (Same course as Ecology 216.)—I. (I.) Jackson

**220. Genomics and Biotechnology of Plant Improvement (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. Not open for credit to students who have completed Vegetable Crops 220. (Former course Vegetable Crops 220.) (Same course as Genetics 220.)—Michelmore

**221. Genomics and Breeding of Vegetable Crops (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 101 or equivalent. Preview of genome structure, mapping, gene tagging and development of other genetic resources applied to improvement of major vegetables. For graduate students contemplating a career in modern vegetable breeding and biotechnology. Not open for credit to students who have completed Vegetable Crops 221. (Former course Vegetable Crops 221.)—III. (III.) Quiros

**222. Advanced Plant Breeding (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 205; Genetics Graduate Group 201D or Animal Genetics 107; Plant Biology 154. Philosophy, methods, and problems in developing improved plant species. Topics include: inbreeding, heterosis, progeny testing, breeding methodology, index selection, germplasm conservation, and breeding for stress resistance. Laboratories include tours of breeding facilities and calculation and interpretation of quantitative data. Not open for credit to students who have completed Agronomy 221. (Former course Agronomy 221.) Offered in alternate years.—(III.) Teuber

**290. Seminar (1-2)**

Seminar—1-2 hours. Topics of current interest related to Plant Sciences. (S/U grading only.)—I, II, III. (I, II, III.)

**290C. Research Group Conference (1)**

Discussion—1-2 hours. Prerequisite: students in a plant science graduate program. Research conference conducted by departmental faculty to discuss design, philosophy, and interpretation of ongoing specific research areas. (S/U grading only.)—I, II, III. (I, II, III.)

**297T. Tutoring in Plant Science (1-5)**

Tutoring—1-5 hours. Prerequisite: graduate standing; consent of instructor; completion of course to be tutored or the equivalent. Designed for graduate students who desire teaching experience but are not teaching assistants. May be repeated for credit for a total of 5 units. Same course may not be tutored more than one time. (S/U grading only.)

**298. Group Study (1-5)****299. Research (1-12)**

Prerequisite: graduate standing. (S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

**Faculty**

James Adams, Ph.D., Associate Professor  
Josephine Andrews, Ph.D., Associate Professor  
Larry Berman, Ph.D., Professor  
James Fowler, Ph.D., Assistant Professor  
Scott S. Gartner, Ph.D., Associate Professor  
John B. Gates, Ph.D., Associate Professor  
Jeff Gill, Ph.D., Associate Professor  
Emily O. Goldman, Ph.D., Associate Professor  
Benjamin Highton, Ph.D., Associate Professor  
Stuart L. Hill, Ph.D., Associate Professor  
Robert Huckfeldt, Ph.D., Professor  
Robert W. Jackman, Ph.D., Professor  
Cindy Kam, Ph.D., Assistant Professor  
Daniel Y. Kono, Ph.D., Assistant Professor  
Jeannette Money, Ph.D., Associate Professor  
Gabriella R. Montinola, Ph.D., Associate Professor  
Miroslav Nincic, Ph.D., Professor  
Larry I. Peterman, Ph.D., Professor  
Donald S. Rothchild, Ph.D., Professor  
Brian R. Sala, Ph.D., Assistant Professor  
Ethan Scheiner, Ph.D., Assistant Professor  
John T. Scott, Ph.D., Professor  
Randolph M. Siverson, Ph.D., Professor  
James F. Spriggs II, Ph.D., Professor  
Walter Stone, Ph.D., Professor  
Robert Taylor, Ph.D., Assistant Professor  
Elizabeth Zechmeister, Ph.D., Assistant Professor

**Emeriti Faculty**

Edmond Costantini, Ph.D., Professor Emeritus  
Richard W. Gable, Ph.D., Professor Emeritus  
Alexander J. Groth, Ph.D., Professor Emeritus  
Clyde E. Jacobs, Ph.D., Professor Emeritus  
Joyce K. Kallgren, Ph.D., Professor Emerita  
Lloyd D. Musolf, Ph.D., Professor Emeritus  
John R. Owens, Ph.D., Professor Emeritus  
Larry L. Wade, Ph.D., Professor Emeritus  
Geoffrey A. Wandesforde-Smith, Ph.D., Professor Emeritus  
Paul E. Zinner, Ph.D., Professor Emeritus

**The Major Program**

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

**The Program.** The Department of Political Science offers two major programs: political science and political science-public service. The political science major aims to provide the student with a broad understanding of political concepts, political institutions, political behavior, and political processes. The political science-public service major is for students who desire opportunities for practical hands-on experience in their major. It differs in particular from the political science major in its internship requirement and its focus on the American political system.

**Internships and Career Alternatives.** Both the proximity of UC Davis to the state capitol and the programs offered by the UC Davis Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

**Political Science**

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 28**

- Three lower division Political Science courses from: 1, 2, 3, 4 ..... 12
- Political Science 51 (required course) ..... 4
- Statistics 13, 32, 102 (or equivalent)..... 4
- One course from Economics 1A, Economics 1B or Philosophy 5..... 4
- One course from History 4C, 8, 9A, 10C, 15, 17A or 17 B..... 4

**Depth Subject Matter ..... 44-45**

- Four courses in one of the fields of concentration listed below ..... 16
- Three courses in another field of concentration listed below ..... 12
- Two courses in another field of concentration listed below ..... 8
- Two other upper division courses in Political Science. Only 5 units of Political Science 192 may be counted toward the depth subject matter. .... 8-9

**Fields of Concentration**

- American Politics (courses with Political Science 1 as a prerequisite):* Political Science 100, 102, 105-109, 150-155, 160-166, 168, 170-171, 174-176, 180, 183, 187, 195, 196D
- Comparative Politics (courses with Political Science 2 as a prerequisite):* Political Science 126, 140, 142, 144-145, 147-149, 178-179, 196B.
- International Relations (courses with Political Science 3 as a prerequisite):* Political Science 120-126, 129, 130-132, 134, 137, 139, 196C, International Relations 131.
- Political Theory (courses with Political Science 4 as a prerequisite):* Political Science 111-119, 187, 196D

**Total Units for the Major ..... 72-73**

**Political Science—Public Service**

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 20**

- One course from Political Science 1, 5, or 7..... 4
- Two courses from Political Science 2, 3, or 4..... 8
- Statistics 13 (or equivalent)..... 4
- Political Science 111 ..... 4
- Recommended: Economics 1A-1B.

**Depth Subject Matter ..... 45-50**

- Core program ..... 12
- Two courses chosen from Political Science 100, 104, 105, 106, 113, 180; and one course from Political Science 108, 109, 114.
- Internship, Political Science 192A, 192B, or 192W .....7-10
- Research paper, Political Science 193 .....2-4
- Fields of concentration ..... 24
- Select six upper division courses from two or three fields of concentration listed below with at least two courses in each field selected; at least 16 of the units must be in political science; Core Program courses may not be counted toward this requirement.

**Fields of Concentration**

- Field (1) Policy formulation:* Political Science 100, 104, 105, 106, 108, 109, 160, 161, 162, 163, 164, 165, 166, 168, 170, 171, 174, 175, 195; Economics 130
- Field (2) Policy implementation and evaluation:* Political Science 180, 183, 187; Economics 131
- Field (3) Policy interpretation—Substance and procedures (public/pre-law):* Political Science 150, 151, 152, 153, 155
- Field (4) Policy areas:*
  - (a) Urban policy and implementation: Political Science 100, 102, Environmental Horticulture 110, Environmental Science and Policy 173
  - (b) Environmental policy and implementation: Political Science 107, Environmental Science and Policy 160, 161, 166, 168A-168B, 172, 179
  - (c) Environmental policy and implementation: open field that might include courses relevant to health care, welfare, education, community development, transportation, science and technology, etc.; requires approval of Political Science—Public Service adviser.

**Total Units for the Major ..... 68**

**Major Advisers.** Consult Department office.

**Minor Program Requirements:**

Students electing a minor in Political Science may choose one of two plans.

UNITS

**Political Science ..... 24**

Six upper division courses: Three courses in one of the fields of concentration and three courses outside of that field.

**Public Affairs Internship Program.** This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 1273 Social Sciences and Humanities Building.

**Graduate Study.** The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

**Graduate Adviser.** Consult Graduate Program Coordinator office.

**American History and Institutions.** This University requirement may be satisfied by passing any one of the following Political Science courses: 1, 5, 100, 101, 102, 103, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163; see also under University requirements.

**Courses in Political Science (POL)**

**Lower Division Courses**

**1. American National Government (4)**

Lecture—3 hours; discussion—1 hour. Survey of American national government, including the constitutional system, political culture, parties, elections, the presidency, Congress, and the courts. GE credit: SocSci, Wrt.—I, II, III.

**2. Introduction to Comparative Politics (4)**

Lecture—3 hours; discussion—1 hour. Introduction to basic concepts in political analysis and application of them in comparative studies of selected countries. Coverage is given to cultural and other informal dimensions of politics as well as to more formal political and governmental structures. GE credit: SocSci, Wrt.—I, III.

**3. International Relations (4)**

Lecture—3 hours; discussion—1 hour. International conflict and cooperation, including the Cold War, nuclear weapons, and new techniques for understanding international politics. GE credit: SocSci, Wrt.—I, II, III. (I, II, III.)

**4. Basic Concepts in Political Theory (4)**

Lecture—3 hours; discussion—1 hour. Analysis of such concepts as the individual, community, liberty, equality, justice, and natural law as developed in the works of the major political philosophers. GE credit: SocSci, Wrt.—I.

**5. Contemporary Problems of the American Political System (4)**

Lecture—3 hours; discussion—1 hour. In-depth treatment of selected problems and issues of American politics, governmental institutions, and policies. GE credit: SocSci, Wrt.—II.

**7. Contemporary Issues in Law and Politics (4)**

Seminar—4 hours. A seminar which focuses on the political dimensions of American law and institutions. Examines the role of courts in resolving contemporary issues of law and politics including abortion, capital punishment, and civil rights. Limited enrollment. Open to students having no more than 40.1 units. GE credit: SocSci, Wrt.—III.

**51. Scientific Study of Politics (4)**

Lecture/discussion—4 hours. Introduction to the basic principles of the scientific study of politics. Research design and empirical analysis of data with applications to different methodological approaches and different substantive areas in political science. GE credit: SocSci.—I, II, III.

**90X. Lower Division Seminar (4)**

Seminar—4 hours. Prerequisite: lower division standing and consent of instructor. Examines fundamental issues and concepts that shape the study and practice of politics. Students will read, discuss and write about some of the most significant texts in political science in order to develop a foundation for the study of politics. Limited enrollment.

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**100. Local Government and Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing or consent of instructor. Politics and government of local communities in the United States, including cities, counties, and special districts. Emphasizes sources and varieties of community conflict, legislative and executive patterns, expertise, decision making, and the politics of structure. Observation of local governing boards. GE credit: SocSci, Wrt.

**102. Urban Public Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing in Political Science or consent of instructor. Political and economic relationships among central cities, suburbs, and regional, state, and federal governments. Focuses upon policy areas such as poverty, transportation,

welfare, and housing, and upon who governs and who benefits from the policies in these areas. GE credit: SocSci, Wrt.—I.

**104. California State Government and Politics (4)**

Lecture—3 hours; research paper. Prerequisite: course 1. The California political system. Political culture, constitution, elections and parties, direct democracy, legislature, governor, executive branch, courts, finances, state-local relations, and policy issues.

**105. The Legislative Process (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Analysis of the legislative process with emphasis on the United States Congress; legislative organization and procedures, legislative leadership and policy making, legislators and constituents, relations between Congress and other agencies. GE credit: SocSci, Wrt.—II.

**106. The Presidency (4)**

Lecture—3 hours; discussion—1 hour; optional term paper. Prerequisite: course 1. The American presidency's origins and development; presidential power and influence as manifest in relationships with Congress, courts, parties, and the public in the formulation and administration of foreign and domestic policy; nominations, campaigns, and elections. GE credit: SocSci, Wrt.—II, III.

**107. Environmental Politics and Administration (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Introduction to the environment as a political issue in the United States and to the development of administrative mechanisms for handling environmental problems. Changing role of Congress, the presidency, the bureaucracy, and the courts in environmental policy formulation and implementation. GE credit: SocSci, Wrt.

**108. Policy Making in the Public Sector (4)**

Lecture—3 hours; research paper. Prerequisite: course 1. The theoretical rationale for governmental activity, program evaluation, PPBS, positive theories of policy making, the quantitative study of policy determinants, implementation, and proposals for improved decision making. GE credit: SocSci, Wrt.

**109. Public Policy and the Governmental Process (4)**

Lecture—3 hours; research paper. Prerequisite: course 1. The processes of formulating public policy, including individual and collective decision making, political exchange, competition, bargaining, coalition formation and the allocation of public goods, resources and opportunities. GE credit: SocSci, Wrt.—I.

**110. The Strategy of Politics (4)**

Lecture/discussion—4 hours. Introduction to game theory. Explanation of the behavior of individuals in strategic interaction. Rational and behavioral approaches. Applications to political science and other fields.—I. (I.)

**111. Systematic Political Science (4)**

Lecture/discussion—4 hours. Philosophical basis of modern political science; major specific approaches; selected concepts relevant to modern political concerns; and research design and execution.—I, III.

**112. Contemporary Democratic Theory (4)**

Lecture—3 hours; term paper. Prerequisite: course 4. Major contemporary attempts to reformulate traditional democratic theory, attempts to replace traditional theory by conceptual models derived from modern social science findings. Offered in alternate years. GE credit: SocSci, Wrt.

**113. American Political Thought (4)**

Lecture—3 hours; term paper. Prerequisite: course 4. Origins and nature of American political thought. Principles of American thought as they emerge from the founding period to the present. GE credit: SocSci, Wrt.

**114. Quantitative Analysis of Political Data (4)**

Lecture—3 hours; term paper. Logic and methods of analyzing quantitative political data. Topics covered include central tendency, probability, correlation, and non-parametric statistics. Particular emphasis will be placed on understanding the use of statistics in political science research. Offered in alternate years. GE credit: SocSci, Wrt.

**115. Medieval Political Thought (4)**

Lecture—3 hours; term paper. Prerequisite: course 118A. Examination of the ideas central to medieval political thinking. Emphasis will be upon the thoughts of the major political thinkers of the period, rather than upon political history. GE credit: SocSci, Wrt.

**116. Foundations of Political Thought (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 4. Analysis and evaluation of the seminal works of a major political philosopher or of a major problem in political philosophy. May be repeated once when topic differs. Offered in alternate years. GE credit: SocSci, Wrt.—II.

**117. Marxism (4)**

Lecture—3 hours; discussion—1 hour. Examination of the political and social philosophy of Karl Marx, with reference to the evolution of Marxism in the nineteenth and twentieth centuries.

**118A. History of Political Theory: Ancient (4)**

Lecture—3 hours; term paper. Prerequisite: course 4. Critical analyses of classical and medieval political philosophers such as Plato, Aristotle, Cicero and St. Thomas. GE credit: SocSci, Wrt.—I.

**118B. History of Political Theory: Early Modern (4)**

Lecture—3 hours; term paper. Prerequisite: course 4. Critical analysis of the works of early modern political philosophers such as Machiavelli, Montaigne, Hobbes, Locke and Hume. GE credit: SocSci, Wrt.—II.

**118C. History of Political Theory: Late Modern (4)**

Lecture—3 hours; term paper. Prerequisite: course 4. Critical analyses of the works of late modern political philosophers such as Rousseau, Kant, Hegel, Tocqueville, Mill, Marx and Nietzsche. GE credit: SocSci, Wrt.—III.

**119. Contemporary Political Thought (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 4. Contemporary political thought from the end of the nineteenth century to the present. Emphasis upon an individual philosopher, concept, or philosophical movement, e.g., Nietzsche, Continental political thought, Rawls and critics, theories of distributive justice, feminist theory.

**120. Theories of International Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3, upper division standing or consent of instructor. Major contemporary approaches to the study of international politics, including balance of power, game theory, Marxist-Leninist theory, systems theory, and decision-making analysis.

**121. The Scientific Study of War (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3, course 111 or Statistics 13; upper division standing. An analysis of political processes involved in the initiation, conduct and termination of modern interstate warfare. GE credit: SocSci, Wrt.

**122. International Law (4)**

Lecture—4 hours. Prerequisite: course 3. Selected topics in international law; territory, sovereign immunity, responsibility, the peaceful settlement or nonsettlement of international disputes. GE credit: SocSci, Wrt.—III.

**123. The Politics of Interdependence (4)**

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor. In the past several decades, growing economic interdependence has generated new problems in international relations. Course deals with difficulties in

managing complex interdependence and its implication on national policies and politics. GE credit: SocSci, Wrt.—II, III.

**124. The Politics of Global Inequality (4)**

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing; course 123 recommended. Long-standing division of the global system into richer and poorer regions poses many important problems in international political economy. Course presents a theoretical background to North-South issues and analyses of current problems in economic and political relations. GE credit: SocSci, Div, Wrt.—I, III.

**126. Ethnic Self-Determination and International Conflict (4)**

Lecture—3 hours; individual meetings with students to discuss term papers. Prerequisite: course 3. Compares the claims of the state and ethnic peoples in countries undergoing internal conflicts, e.g., South Africa, Northern Ireland. Analyzes the role of the international community in facilitating the peaceful resolution of conflicts. GE credit: SocSci, Div, Wrt.—I. (I.)

**129. Special Studies in International Politics (4)**

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing. Intensive examination of one or more special problems in international politics. May be repeated once for credit when different topic is studied. GE credit: SocSci, Wrt.—II.

**130. Recent U.S. Foreign Policy (4)**

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor. Broad survey of the development of U.S. foreign policy in twentieth century with emphasis on transformation of policy during and after World War II, and the introduction to analytic tools and concepts useful for understanding of current foreign policy issues. GE credit: SocSci, Wrt.—III.

**131. Analysis of U.S. Foreign Policy (4)**

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor. Detailed presentation and examination of the formulation of execution of U.S. foreign policy. Survey of numerous factors influencing policy outcomes and how such determinants vary according to policy issue areas. GE credit: SocSci, Wrt.

**132. National Security Policy (4)**

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing. Development of national security policies since 1945. Analysis of deterrence and assumptions upon which it is based. Effects of nuclear weapons upon conduct of war, alliance systems, and the international system. Prospects of security and stability through arms control. GE credit: SocSci, Wrt.—II.

**134. Africa and U.S. Foreign Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 3 or consent of instructor; upper division standing. Overview of American foreign policy toward Africa. Relationship to global adversaries. Legacies of colonialism. Challenge of national self-determination and white racism. Policies on non-alignment, producer cartels, multinational corporations, continental integration and trade and aid relations.—I.

**137. International Relations in Western Europe (4)**

Lecture—4 hours. Prerequisite: course 3, upper division standing. Analysis of European unity, problems of the Atlantic alliance, Atlantic political economy, East-West relations, communism in Western Europe and the relationship between domestic politics and foreign policy.—I.

**139. Special Studies in Foreign Policy (4)**

Lecture—3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor. Extensive examination of one or more special problems in foreign policy. May be repeated once for credit when topic differs.

**140. Comparative Public Policy (4)**

Lecture—3 hours; term paper. Prerequisite: course 2. Ideological orientations, institutions, processes, and public policies of modern states. Emphasis on democratic, socialist, communist and fascist experience.

**140A. Comparative Electoral Systems (4)**

Lecture/discussion—4 hours. Prerequisite: course 2. Workings of electoral institutions, focusing on systems used to elect presidents and assemblies, pass laws, and generally make decisions. Examples from both the advanced industrial and developing worlds. Offered in alternate years.—II.

**142. Politics and Inequality (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2. Examines the linkages between politics and the distribution of social and economic goods. Topics include the impact of civil rights legislation, the politics of welfare states, and the effects of political participation on the distribution of goods. GE credit: SocSci, Div.—II.

**143. Latin American Politics (4)**

Lecture—3 hours; term paper. Prerequisite: course 2. Issues related to democratic consolidation in Latin America. Topics include transitions to democracy, the role of the military, political economy, and political behavior. GE credit: SocSci, Wrt.

**144. Russian Politics and Policy (4)**

Lecture/discussion—4 hours. Prerequisite: course 2 or consent of instructor. Democratization, state-building and economic reform; creation of new institutions; impacts of Soviet rule. GE credit: SocSci, Wrt.—III. (III.)

**145. Government and Politics in Emergent Nations (4)**

Lecture—4 hours. Prerequisite: course 2. Conceptual study of problems of political organization and procedure in the context of rapid change engendered by social revolution in "emergent countries" and liberation from colonial oppression. Offered in alternate years.

**147. Politics and Policy in Western Europe (4)**

Lecture—4 hours. Prerequisite: course 2. The evolution, politics, and contemporary problems of selected political systems of Western Europe.

**148A. Government and Politics in East Asia: China (4)**

Lecture—4 hours. Prerequisite: course 2 or consent of instructor. Evolution of political institutions and political culture in China with emphasis on the post-1949 period. Primary attention to nationalism, modernization and political efficacy.—I. (II.)

**148B. Government and Politics in East Asia: Pacific Rim (4)**

Lecture—4 hours. Prerequisite: course 2 or consent of instructor. Establishment and evolution of political cultures and establishment of political institutions in selected countries of the Pacific Rim, namely Japan, Korea, Taiwan. Emphasis on post World War—II, III.

**148C. Government and Politics in East Asia: Southeast Asia (4)**

Lecture—3 hours; term paper. Prerequisite: course 2 or consent of instructor. Evolution of political culture, institutions, economy of selected nations in Southeast Asia including Vietnam plus two or three other examples. Emphasis on imperialist legacy, nation building in multi-ethnic communities, contrasts between socialist and non-socialist development models. Offered in alternate years.—III.

**149. Politics of Development in Africa (4)**

Lecture/discussion—4 hours. Prerequisite: course 2 or consent of instructor; course 134 recommended. Political and economic development within Sub-Saharan Africa. States and institutions, democracy, party systems, military coups/rule, bureaucracy/corruption, race/ethnicity, national/regional integrations, trade unions, economic development strategies, class formation, and women's roles and ideology.

**150. Judicial Politics and Constitutional Interpretation (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing. Politics of judicial policymaking; issues surrounding constitutional interpretation and decision making; prerequisite for courses on the politics of constitutional law.—I, II.

**151. The Constitutional Politics of the First Amendment and the Right to Privacy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150. The constitutional politics surrounding such issues as the right to free expression, associational rights, the right to free exercise of religious beliefs, and the right to privacy. GE credit: SocSci, Wrt.—II.

**152. The Constitutional Politics of Equality (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150. Constitutional politics of equality in the American political system; issues surrounding constitutional doctrine and judicial policymaking; special attention on racial and sexual equality. Offered in alternate years. GE credit: SocSci, Div, Wrt.—III.

**153. The Constitutional Politics of the Justice System (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 150. Constitutional politics of the American criminal justice system; the issues surrounding constitutional doctrine and judicial policymaking on issues such as search and seizure, arrest, incarceration, and other issues of due process. Offered in alternate years.—III.

**154. Legal Philosophy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or 4, upper division standing. Analysis of the nature and functions of law; law as an instrument of social control and the relationship between law and morality. Offered in alternate years.

**155. Judicial Process and Behavior (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing. Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decision-making bodies. Offered in alternate years. GE credit: SocSci, Wrt.—II.

**160. American Political Parties (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Analysis of the structured operations of the party system in the United States; party functions and organizations, nomination processes, campaigns and elections, party trends and reforms. GE credit: SocSci, Wrt.—II.

**161. Comparative Political Parties (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Organization, operation, governmental function and social bases of political parties especially in Great Britain and France but with some reference to other Western European countries.

**162. Elections and Voting Behavior (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Analysis of American elections and partisan behavior; political socialization, political participation, partisanship and individual and group determinants of voting. GE credit: SocSci, Wrt.—I.

**163. Group Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Groups, institutions, and individuals, especially in American politics. Historical and analytical treatment of group theories as applied to interest groups (especially labor, business, agriculture, science, military); to racial, ethnic, and sectional groups; to parties, public and legislative groups, bureaucracies. GE credit: SocSci, Wrt.—I.

**164. Public Opinion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: upper division standing and course 1 or 5, or consent of instructor. Nature of public opinion in America as it is "supposed to be" and as it is. Distribution of opinions among different publics and the signifi-

cance of that distribution for system stability and institutions. Opinion polling and its problems. GE credit: SocSci, Wrt.—II.

**165. Mass Media and Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Organization of and decision making within the media; media audiences and the effect of the media on attitudes and behavior; the relationship of the government to the media (censorship, secrecy, freedom of the press, government regulation); the media in election campaigns. GE credit: SocSci, Wrt.—I.

**166. Women in Politics (4)**

Lecture—3 hours; discussion—1 hour or seminar—1 hour. Prerequisite: course 1. The role of women in American politics. Historical experiences; contemporary organizations and strategies; areas of legislative concern; the impact of differences in social class, race, and ethnicity upon the involvement of women in politics. GE credit: SocSci, Div.

**168. Chicano Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Political aspects of Chicano life in America; examines the Chicano's political role as it has been historically defined by different groups in society and the Chicano's responses to his/her political environment. GE credit: SocSci, Div.

**170. Political Psychology (4)**

Seminar—3 hours; term paper. Prerequisite: course 1. Social psychological theories of how voters form political attitudes and to what extent such attitudes translate into behaviors.

**171. The Politics of Energy (4)**

Lecture/discussion—4 hours. Prerequisite: course 1, upper division standing. Analysis of nature and performance of political processes for making energy choices at the international, national and state levels. Emphasizes interaction of energy policy with other political goals and the ability of governmental institutions to overcome constraints on policy innovation.

**172. American Political Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, some background in American politics is strongly recommended. Systematic analysis of contemporary issues in American political development: historical determinants of political change; the timing and character of institutional development; conditions for successful political action. Topics may include democratization, cultural change, party formation, state-building, constitutionalism, race relations.

**174. Government and the Economy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1, upper division standing in Political Science or consent of instructor. Political basis of economic policy (taxation, spending and regulation); impact of prices, employment and growth on political demands; elite responses to economic conditions; policy alternatives and the public interest. GE credit: SocSci, Wrt.

**175. Science, Technology, and Policy (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1. Analysis of policymaking for science and the use of scientific expertise for making decisions about technology. Topics include funding of basic research, relationship of science to technological development, science and military policy, technological risks, technology assessment and scientists and politics. GE credit: SocSci, Wrt.—III.

**176. Racial Politics (4)**

Seminar—3 hours; term paper. Prerequisite: Course 1. Race, racial attitudes and racial policies in the United States with a specific emphasis on African Americans. GE credit: SocSci, Div.

**178. Political Development in Modernizing Societies (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 2. Nature and sequence of political development; its economic and social concomitants; role of elites, military, bureaucracy, and party systems;

social stratification and group politics; social mobilization and political participation; instability, violence, and the politics of integration.—I.

**179. Special Studies in Comparative Politics (4)**

Seminar—4 hours. Prerequisite: course 2, consent of instructor and upper division standing. Intensive examination of one or more special problems appropriate to comparative politics. May be repeated once for credit.

**180. Bureaucracy in Modern Society (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or 2, upper division standing in Political Science or consent of instructor. Role of bureaucracy in a complex society, with emphasis upon changing relationships between government and the economy; consequences of rapid technological and social change for bureaucratic structures and processes; the problems of reconciling expertise and democracy and increasing the responsiveness of public bureaucracy. GE credit: SocSci, Wrt.

**183. Administrative Behavior (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. The implications for American public administration of evolving concepts about behavior in organizations.

**187. Administrative Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1 or consent of instructor. Historical and critical analysis of the principal theories of organization and management of public agencies in the light of such concepts as decision making, bureaucracy, authority and power, communication and control; an examination of the role of government bureaucracies in the total society. GE credit: SocSci, Wrt.—III.

**190. International Relations (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: open to majors in International Relations, or consent of instructor. Analysis and evaluation of substantive issues in contemporary international relations. Readings drawn from current academic and non-academic periodicals.

**192A. Internship in Public Affairs (5)**

Prerequisite: enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science—Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: SocSci, Wrt.

**192B. Internship in Public Affairs (5)**

Prerequisite: course 192A; enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science—Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: SocSci, Wrt.

**192W. Internship in the UC Davis Washington Center Program (7)**

Internship—28 hours. Prerequisite: junior or senior standing, admission in the UC Davis Washington Center undergraduate program, course 193W concurrently. Internship in Washington, DC with associated, supervised research project. (Same course as UC Davis Washington Center 192.) (P/NP grading only.)—I, II, III.

**193. Research in Practical Politics (2)**

Research project—6 hours. Prerequisite: courses 192A, 192B; open only to Political Science—Public Service majors, for whom it is required. Supervised preparation of an extensive paper relating internship experience to concepts, literature, and theory of political science.—I, II, III.

**193W. Washington Center Research Seminar (4)**

Lecture/discussion—1 hour; independent study—3 hours; tutorial—0.5 hour. Prerequisite: course 192W concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as UC Davis Washington Center 193.) GE credit: Wrt.—I, II, III.

**194HA-194HB. Special Study for Honors Students (4-4)**

Seminar—2 hours; independent study—2 hours. Prerequisite: major in Political Science with upper division standing and a GPA of 3.500 in the major. Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence.)—I, II.

**195. Special Studies in American Politics (4)**

Seminar—4 hours. Prerequisite: consent of instructor and upper division standing. Intensive examination of one or more special problems appropriate to American politics. May be repeated once for credit when topic differs.—I.

**196A. Seminar in American Politics (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in American politics. Topics may include Congress, the Presidency, the Supreme Court, federalism, voting behavior, interest groups, ethnic groups or other topics with a more specialized content than normal course offerings. May be repeated once for credit when topic differs.—I, II, III.

**196B. Seminar in Comparative Politics (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in comparative politics. Topics may include one country or geographical area, political institutions or behavior across countries, political development, or other topics that are more specialized than normal course offerings. May be repeated once for credit when topic differs.—I, II, III.

**196C. Seminar in International Relations (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in international relations including study of international political institutions (UN, EU, or NATO) or interstate relations (war, trade, immigration) and other topics with more specialized content than normal course offerings. May be repeated once for credit when topic differs.—I, II, III.

**196D. Seminar in Political Theory (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in political theory. Topics may include study of a single political thinker, a group of related thinkers, development of political concepts, or other topics with more specialized content than normal course offerings. May be repeated once for credit when topic differs.—I, II, III.

**196E. Seminar in Research Methods (4)**

Seminar—3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, and writing in selected topics in research methods such as research design, statistics, game theory. May be repeated once for credit when topic differs.—I, II, III.

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses**

**201. Urban Government and Politics (4)**

Seminar—4 hours. Survey and analysis of the literature in the field of local government and politics in the United States. Approaches to the study of political reform, local autonomy, community power, representation, expertise, service delivery, policymaking and political change. Offered in alternate years.

**202. American State Government and Politics (4)**

Seminar—4 hours. Survey and analysis of the literature in the field of state government, politics, and policy. Approaches to the study of the American

states as political systems, including their governing institutions and processes and their role in the Federal system. Offered in alternate years.

**203A. American Government: The Presidency (4)**

Seminar—4 hours. Thorough overview of the current research on political executives, with particular emphasis on the American presidency. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.—II. (II.)

**203B. American Government: Congress (4)**

Seminar—4 hours. Thorough overview of the current research on Congress, with particular emphasis on political representation. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.—III.

**203C. American Government: Courts (4)**

Seminar—4 hours. Survey and analysis of the literature in the field of American government with a focus on courts. Emphasis on the development and testing of theories of behavior and processes.

**207. Environmental Public Policy (4)**

Seminar—4 hours. Analysis of the interface between the world of academic reflection about ecological and environmental problems and the world of political action. Evaluation of alternative approaches to policy analysis and recommendation. Individual research, including field research, will parallel discussion of the literature.

**208. Policy Analysis (4)**

Seminar—4 hours. Social science techniques applied to public policy formation and evaluation.—II. (II.)

**209. The American Political System (4)**

Seminar—4 hours. Analysis of selected theoretical and empirical issues posed by contemporary research in American government and politics.—II.

**210. Research Design in Political Science (4)**

Seminar—3 hours; discussion/laboratory—1 hour. Prerequisite: graduate standing. Introduction to philosophy of science and research design for political science. Topics include: logic of empirical research, overview of research design approaches for political science research.—I.

**211. Research Methods in Political Science (4)**

Seminar—3 hours; discussion/laboratory—1 hour. Prerequisite: graduate standing. Introductory seminar introducing data analysis methods critical to basic empirical investigations in political science.—I.

**212. Quantitative Analysis in Political Science (4)**

Seminar—4 hours. Prerequisite: course 211. Topics usually covered in an introductory statistics course with an emphasis on applications in political science—descriptive statistics for samples, probability and probability distributions, hypothesis testing, ANOVA, bivariate regression, and introduction to multiple regression.—II.

**213. Quantitative Analysis in Political Science II (4)**

Seminar—4 hours. Prerequisite: courses 211, 212. More advanced topics in the use of statistical methods, with emphasis on political applications. Topics include: properties of least squares estimates, problems in multiple regression, and advanced topics (probit analysis, simultaneous models, time-series analysis, etc.).—III.

**214A. Research in Political Science (4)**

Discussion—2 hours; lecture—1 hour; term paper. Prerequisite: course 213. Research seminar sequence required of all Ph.D. students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)—II. (II.)

**214B. Research in Political Science (4)**

Discussion—2 hours; lecture—1 hour; term paper. Prerequisite: courses 212 and 214A; advanced level graduate students in the Department of Political

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

Science only. Research seminar sequence required of all Ph.D. students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)—II. (II.) Highton

#### **215. Introduction to Modeling Political Behavior (4)**

Seminar—3 hours. Prerequisite: courses 211 and 212. Introduction to formal and game theoretic analyses of politics. Students will learn basic game theory and modeling skills. We examine the benefits of modeling, and look at examples of formal analysis in a variety of political science sub-fields. Offered in alternate years.—I.

#### **216. Qualitative Research Methods (4)**

Seminar—3 hours; term paper. Methodology for utilizing theoretically-oriented case studies and controlled comparison of a small number of cases to develop and test theories. Examination of how the case study method complements experimental, statistical and deductive modes of research. Offered in alternate years.—III.

#### **217. Social Choice Theory and Spatial Modeling (4)**

Seminar—4 hours. Introduction to social choice theory and formal spatial modeling including Arrow's Theorem, the paradox of voting, cycling and agenda control. Focus on mastering modeling techniques as well as interpretation of classic works. Offered in alternate years.

#### **218. Topics in Political Theory (4)**

Seminar—3 hours; term paper. Topics will vary and may be the work of a single theorist, time period, or political concept, such as justice. Offered in alternate years.—II.

#### **219A. Political Theory Sequence (4)**

Seminar—3 hours; term paper. Survey of the great works in ancient and medieval political theory including such writers as Plato, Aristotle, Cicero, St. Augustine, Aquinas, Alfarabi and Marsilius. Discussion of various interpretations of these authors. Offered in alternate years.—II.

#### **219B. Political Theory Sequence (4)**

Seminar—3 hours; term paper. Survey of the great works in early modern to contemporary political theory including such writers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls. Discussion of various interpretations of these authors. Offered in alternate years.—I. (III.)

#### **219C. Contemporary Political Theory (4)**

Seminar—3 hours; term paper. Survey of important works in contemporary political theory including such writers as Nietzsche, Heidegger, Arendt, Rawls, Nazick, Sandel. May be repeated for credit if topic differs.—III. (III.)

#### **220. Seminar in Political Theory (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Introduction to political theory and current debates over its study. Readings from and textual interpretations of political theory including the Federalist Papers and major works by thinkers such as Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, and Rawls. Other readings addressing issues of textual interpretation.—I.

#### **223. International Relations (4)**

Seminar—3 hours; term paper.—I.

#### **225. The International System (4)**

Seminar—3 hours; term paper. Analysis of the international system by means of theory formulation and integration; critique of research designs; use of various techniques of data generation and analysis.—III.

#### **226. Seminar in International Political Economy (4)**

Seminar—4 hours. Research in international political economy. Structure of the global economy, as well as specific dimensions of international economic relations, including trade, capital flows, global production structures, and migration. Offered in alternate years.—I.

#### **229. Theories of International Relations (4)**

Seminar—3 hours; term paper. Central concepts, debates, and paradigms in international relations; overview of research in international security and international political economy; inter-state and intra-state war; cooperation and conflict resolution; trade and finance; relationship between domestic and international politics, norms and institutions. Open to political science graduate students only unless consent of instructor. Offered in alternate years.—III. Goldman

#### **230. American Foreign Policy (4)**

Seminar—3 hours; term paper.—III.

#### **231. U.S. Political Culture and Foreign Relations (4)**

Seminar—3 hours; term paper. Relates U.S. political culture to formulation of foreign policy. Analyzes American ideological preferences in historical perspective, contemporary public opinion, decision making and implementation. Concludes by examining linkages between foreign policy behavior and democratic process. Offered in alternate years.—II.

#### **241. Communist Political Systems (4)**

Seminar—4 hours. Prerequisite: course 141 or the equivalent, or consent of instructor. Systematic analysis of selected topics dealing with the political process of communist political systems.

#### **242. Seminar in Comparative Politics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Systematic survey of theories and methods used in the study of comparative politics.

#### **243. Comparative Institutional Change (4)**

Seminar—4 hours. Comparison of institutional changes in countries of the former Soviet Union and Eastern Europe during the period of transition to democracy. Special attention to institutions of mass representation—electoral and party systems and national legislatures. Offered in alternate years.

#### **246. Policymaking in Third-World Societies (4)**

Seminar—3 hours. Prerequisite: graduate standing or consent of instructor. Included in an analysis of policymaking process in Third-World countries are such topics as political resources, institutional resources, decision making, resource allocations, planning, and budgeting, implementation, and distribution of world resources. Offered in alternate years.

#### **250. Policy Development and Impact in U.S. Courts (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing. Thorough overview of the literature regarding courts as policymaking institutions of government, with emphasis on the formation and implementation of judicial policy. Differences and similarities across the judicial, congressional, and executive branch policy processes. Offered in alternate years.

#### **260. Political Parties (4)**

Seminar—3 hours; term paper. Survey of selected topics in American and comparative parties.

#### **261. Political Behavior (4)**

Seminar—3 hours; term paper. Survey of selected topics in political behavior and public opinion.—III.

#### **274. Political Economy (4)**

Seminar—4 hours. Politics of economic policy as reflected in taxation, spending and regulation; impact of prices, employment, and growth on political demands; government responses to economic conditions; electoral politics and the political business cycle. Offered in alternate years.—III.

#### **280. Bayesian Methods: for Social and Behavioral Sciences (4)**

Seminar—3 hours; lab—1 hour. Prerequisite: course 212 or equivalent; graduate standing. Methodology seminar introducing Bayesian quantitative methods to issues and problems in political science and other social and behavioral sciences. Offered in alternate years.—(I.)

#### **281. Statistical Computing Issues in Political Science (4)**

Seminar—3 hours; discussion/laboratory—1 hour. Prerequisite: course 213 or equivalent; graduate standing. Methodology seminar introducing computing issues in empirical models for political science and other social and behavioral sciences. Offered in alternate years.—(I.)

#### **282. Advanced Modeling of Political Behavior (4)**

Seminar—3 hours; term paper. Prerequisite: course 215 or equivalent; graduate standing or consent of instructor. Applications of formal theory to political science. Review of relevant contributions in other social sciences. Consideration of advanced techniques in game theory. Rational and behavioral approaches.—III. (III.)

#### **283. Organizational Behavior (4)**

Seminar—4 hours. Organizational behavior as it relates to public sector decision making.

#### **290A. Research in American Government and Public Policy (4)**

Seminar—4 hours. Special research seminar on selected problems and issues in the study of American government and public policy. May be repeated up to 6 times for credit if taught by different instructor.—I, II, III

#### **290B. Research in Political Theory (4)**

Seminar—4 hours. Special research seminar on selected problems and issues in the study of political theory.—I, II, III.

#### **290C. Research in International Relations (4)**

Seminar—4 hours. Special research seminar on selected problems and issues in the study of international relations.—I, II, III.

#### **290D. Research in Judicial Politics (4)**

Seminar—4 hours. Prerequisite: graduate standing in political science or consent of instructor. Contemporary research on judicial politics, judicial institutions, jurisprudence, and judicial behavior.—I, II, III.

#### **290E. Research in Political Parties, Politics, and Political Behavior (4)**

Seminar—4 hours. Special research seminar on selected problems and issues in the study of political parties, politics, and political behavior.—I, II, III.

#### **290F. Research in Comparative Government and Policy (4)**

Seminar—4 hours. Special research seminar on selected problems and issues in the study of comparative government and policy.—I, II, III.

#### **290G. Research in Methodology (4)**

Lecture—3 hours; term paper. Prerequisite: course 212. Special research seminar on selected problems and issues in methods in political science. May be repeated three times for credit if topic varies.—I, II, III. (I, II, III.)

#### **297. Internships in Political Science (2)**

Seminar—2 hours. Prerequisite: open only to persons who have internships or other positions in governmental agencies, political parties, etc. Application and evaluation of theoretical concepts through work experience or systematic observation in public and political agencies. May be repeated for credit. (S/U grading only.)

#### **298. Group Study (1-5)**

(S/U grading only.)

#### **299. Research (1-12)**

(S/U grading only.)

#### **299D. Directed Reading (1-12)**

(S/U grading only.)

### **Professional Courses**

#### **390. The Teaching of Political Science (1)**

Seminar—1 hour. Prerequisite: graduate student standing in Political Science. Methods and problems of teaching political science at the undergraduate level. (S/U grading only.)—I, II, III.

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III.

David J. Begun, Ph.D., Associate Professor  
 Monique Borgerhoff Mulder, Ph.D., Professor  
 Louis W. Botsford, Ph.D., Professor  
 Tim Caro, Ph.D., Professor  
 James R. Griesemer, Ph.D., Professor  
 Richard K. Grosberg, Ph.D., Professor  
 Susan P. Harrison, Ph.D., Professor  
 Alan M. Hastings, Ph.D., Professor  
 Richard Karban, Ph.D., Professor  
 Artyom Kopp, Ph.D., Assistant Professor  
 Charles H. Langley, Ph.D., Professor  
 Sharon P. Lawler, Ph.D., Associate Professor  
 Richard McElreath, Ph.D., Assistant Professor  
 Sergey V. Nuzhdin, Ph.D., Associate Professor  
 Marcel Rejmanek, Ph.D., Professor  
 Kevin J. Rice, Ph.D., Professor  
 Jay A. Rosenheim, Ph.D., Professor  
 Michael J. Sanderson, Ph.D., Professor  
 Thomas W. Schoener, Ph.D., Professor  
 Mark W. Schwartz, Ph.D., Professor  
 H. Bradley Shaffer, Ph.D., Professor  
 Arthur M. Shapiro, Ph.D., Professor  
 Andrew Sih, Ph.D., Professor  
 John J. Stachowicz, Ph.D., Assistant Professor  
 Judy A. Stamps, Ph.D., Professor  
 Maureen L. Stanton, Ph.D., Professor  
 Sharon Y. Strauss, Ph.D., Professor  
 Donald R. Strong, Ph.D., Professor  
 Catherine A. Toff, Ph.D., Professor  
 Michael Turelli, Ph.D., Professor  
 Geerat J. Vermeij, Ph.D., Professor  
 Peter C. Wainwright, Ph.D., Professor  
 Philip S. Ward, Ph.D., Professor  
 Truman P. Young, Ph.D., Professor

### Emeriti Faculty

Hugh Dingle, Ph.D., Professor Emeritus  
 John H. Gillespie, Ph.D., Professor Emeritus  
 Leslie D. Gottlieb, Ph.D., Professor Emeritus  
 Timothy G. Prout, Ph.D., Professor Emeritus

### Affiliated Faculty

Peter L. Chesson, Ph.D., Adjunct Professor

**Graduate Study.** The Graduate Group in Population Biology emphasizes programs of study and research leading to the Ph.D. degree. The Group concentrates on population biology as the broad discipline that blends ecology, evolution, population genetics and systematics into a unified field. The course curriculum consists of first-year core courses offered by the Group faculty, seminars, and advanced courses in population biology, and related disciplines, chosen in consultation with a guiding committee.

**Graduate Adviser.** Consult the Population Biology Graduate Group office.

## Courses in Population Biology (PBG)

### Graduate Courses

#### 200A. Principles of Population Biology (5)

Lecture—3 hours; discussion—2 hours. Prerequisite: course 231 concurrently and consent of instructor. Principles of single-species ecology and evolution. Topics include ecology of individuals, population growth models, structured populations, life history strategies, stochastic populations, basic population genetics theory, deleterious alleles in natural populations, and molecular population genetics.—I. (I.)

#### 200B. Principles of Population Biology (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: course 200A, 231. Principles of multi-species communities. Topics include competition, mutualism, metapopulations, food webs and trophic cascades, interactions between simple ecological communities, island biogeography, succession, and large-scale patterns.—II. (II.)

#### 200C. Principles of Population Biology (6)

Lecture—5 hours; discussion—1 hour. Prerequisite: course 200B. Principles of microevolution and macroevolution. Topics include evolutionary quantitative genetics, analysis of hybrid zones, speciation, the fossil record, biogeography, and phylogeny reconstruction.—III. (III.)

#### 203. Advanced Evolution (3)

Lecture—1 hour; discussion—2 hours. Prerequisite: graduate standing. Adaptation and speciation, and biochemical and morphological evolution in plants and animals with emphasis on the appropriateness of different methods of analysis. Offered in alternate years.

#### 206. Ecology of Insect Parasitoids (4)

Lecture—3 hours; seminar—1 hour. Prerequisite: introductory animal ecology or behavior. Insect parasitoids will be investigated as model systems to address current topics in behavioral, population, and evolutionary ecology. Theory will be synthesized and critical empirical tests of ecological hypotheses emphasized. (Same course as Entomology 206.) Offered in alternate years.

#### 207. Plant Population Biology (3)

Lecture—2 hours; laboratory/discussion—1 hour. Prerequisite: advanced undergraduate ecology course (e.g., Environmental Science and Policy 100, Evolution and Ecology 101, Entomology 104, Plant Biology 117), and advanced undergraduate course in genetics and/or evolution (e.g., Biological Sciences 101 or Evolution and Ecology 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as Ecology 207.) Offered in alternate years.—II. Rice

#### 212. Topics in Invertebrate Evolution (2)

Seminar—2 hours. Prerequisite: graduate standing or consent of instructor and Evolution and Ecology 112-112L; courses in evolutionary biology, systematics, and ecology highly recommended. Advanced seminar that critically examines problems relevant to evolutionary patterns among the invertebrates. May be repeated for credit when topic differs. (S/U grading only.)—III. (III.) Grosberg, Stachowicz

#### 220. Spatio-Temporal Ecology (2)

Lecture/discussion—2 hours. Prerequisite: course 200B or Ecology 204 or Evolution and Ecology 104 or Environmental Science and Policy 121 or consent of instructor. Spatiotemporal ecological theory focusing on population persistence and stability, predator-prey and host-parasitoid interactions, species coexistence and diversity maintenance, including effects of environmental variation, spatial and temporal scale, life-history traits and nonlinear dynamics. Topics vary. (Same course as Ecology 220.) May be repeated once for credit. (S/U grading only.)

#### 221. Animal Behavior, Ecology and Evolution (3)

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 102, Evolution and Ecology 100, 101 or the equivalent, graduate standing, and consent of instructor. The interface between animal behavior, ecology and evolution. New developments in behavioral ecology and development and testing of hypotheses in this discipline. (Same course as Animal Behavior 221.)—I. (I.) Stamps

#### 224. Field Reconnaissance for Population Biologists (2)

Fieldwork—6 hours. Prerequisite: graduate student in Population Biology, or consent of instructor. Biweekly field trips to acquaint students with plant and animal communities, biodiversity, and ecological and evolutionary research opportunities in northern and central California. May be repeated for credit. (S/U grading only.)

#### 225. Terrestrial Field Ecology (4)

Seminar—1 hour; field work—12 hours. Prerequisite: introductory ecology and introductory statistics, or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results will be stressed. (Same course as Ecology/Entomology 225.)—III. (III.) Karban

#### 231. Mathematical Methods in Population Biology (3)

Lecture—3 hours. Prerequisite: Mathematics 16C or 21C or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as Ecology 231.)—I. (I.) Hastings

#### 250A. Interdisciplinary Approaches to Biological Invasions (4)

Lecture/discussion—4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from ecology, ecological theory, evolution, genetics, philosophy, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving.

#### 250B. Interdisciplinary Approaches to Biological Invasions (4)

Lecture/discussion—4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from history, sociology, communications, law, policy, management, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving.

#### 251. Collaborative Project in Biological Invasions (3)

Project; discussion—1 hour. Prerequisite: course 250A, 250B, or equivalent; and consent of instructor. A year-long interdisciplinary collaborative project focusing on biological invasions, resulting in a paper or other suitable product presented at a symposium at the conclusion of the project. May be repeated up to five times. (S/U grading only.)—I, II, III. (I, II, III.)

#### 270. Research Conference in Evolutionary Biology (1)

Seminar—1 hour. Prerequisite: consent of instructor. Critical presentation and evaluation of current literature and ongoing research in evolutionary biology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### 287. Advanced Animal Behavior (2)

Seminar—2 hours. Prerequisite: graduate standing and consent of instructor, courses in animal behavior (Neurobiology, Physiology, and Behavior 102 or the equivalent), and either evolution (Evolution and Ecology 100 or the equivalent) or ecology (Evolution and Ecology 101 or the equivalent). Reading, reports and discussion on current topics in animal

behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. (Same course as Animal Behavior 287.) May be repeated twice for credit.—III. (III.) Stamps

**290. Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by visiting lecturers, UCD graduate students and faculty. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**290C. Research Conference in Population Biology (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor; concurrent enrollment in course 299. Presentation and discussion of faculty and graduate student research in population biology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**292. Topics in Ecology and Evolution (1)**

Seminar—1 hour. Prerequisite: graduate standing. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. (Same course as Ecology 296.) (S/U grading only.)—I, II, III. (I, II, III.)

**296. Seminar in Geographical Ecology (2)**

Seminar—2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. May be repeated for credit. (S/U grading only.)—III. (III.) Shapiro

**298. Group Study (1-5)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

**299. Research (1-12)**

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Population Health and Reproduction

See [Veterinary Medicine, School of, on page 469.](#)

## Precision Agriculture

(College of Agricultural and Environmental Sciences)

The Department of Biological and Agricultural Engineering offers a minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental concerns.

**Minor Program Requirements:**

This minor acquaints students with recent developments and their applications to agriculture, in geographic information systems (GIS), global positioning systems (GPS), variable rate technologies (VRT), crop and soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the "information age" in agriculture.

UNITS

**Precision Agriculture..... 20**

- Applied Biological Systems Technology 145, 175, 180..... 10
- Select 10 or more units from Agricultural Management and Rangeland Resources 120 or Statistics 100, Agricultural Management and Rangeland Resources 110A or Plant Biology 112, Environmental and Resource Sciences 186, Soil Science 109 ..... 10

**Minor Advisers.** S.K. Upadhyaya, D.K. Giles

## Preventive Veterinary Medicine

See [Veterinary Medicine, School of, on page 469.](#)

## Psychiatry

See [Medicine, School of, on page 345.](#)

## Psychology

(College of Letters and Science)

Phillip R. Shaver, Ph.D., Chairperson of the Department

**Department Office.** 135 Young Hall (530) 752-1880; <http://psychology.ucdavis.edu>

**Faculty**

- Karen L. Bales, Ph.D., Assistant Professor
- Jennifer Beer, Ph.D., Assistant Professor
- Shelley Blozis, Ph.D., Assistant Professor
- Silvia A. Bunge, Ph.D., Assistant Professor
- John P. Capitanio, Ph.D., Professor
- Cameron S. Carter, M.D., Professor (*Psychiatry and Behavioral Sciences*)
- Richard G. Coss, Ph.D., Professor
- Robert A. Emmons, Ph.D., Professor
- Emilio Ferrer, Ph.D., Assistant Professor
- Simona Ghetti, Ph.D., Assistant Professor
- Gail S. Goodman, Ph.D., Professor
- Kenneth R. Henry, Ph.D., Professor
- Gregory M. Herek, Ph.D., Professor
- Petr Janata, Ph.D. Assistant Professor
- Joel T. Johnson, Ph.D., Professor
- Neal E. A. Kroll, Ph.D., Professor
- Leah A. Krubitzer, Ph.D., Professor
- Kristin Lagattuta, Ph.D., Assistant Professor
- Debra L. Long, Ph.D., Professor, *Academic Senate Distinguished Teaching Award*
- George R. Mangun, Ph.D., Professor
- Sally P. Mendoza, Ph.D., Professor *Research Faculty*
- Donald H. Owings, Ph.D., Professor
- Cynthia Pickett, Ph.D. Associate Professor
- Robert B. Post, Ph.D., Professor
- Charan Ranganath, Ph.D., Assistant Professor
- Susan Rivera, Ph.D., Assistant Professor
- Richard W. Robins, Ph.D., Associate Professor
- Jeffrey Schank, Ph.D., Associate Professor
- Phillip R. Shaver, Ph.D., Professor
- Jeffrey W. Sherman, Ph.D. Professor
- Dean K. Simonton, Ph.D., Professor, *UC Davis Prize for Teaching and Scholarly Achievement*
- Stanley Sue, Ph.D., Professor, *UC Davis Prize for Teaching and Scholarly Achievement*
- Tamara Swaab, Ph.D., Assistant Professor
- Ross Thompson, Ph.D., Professor
- Matthew Traxler, Ph.D., Assistant Professor
- David Whitney, Ph.D., Assistant Professor
- Keith F. Widaman, Ph.D., Professor
- Ewa Wojculik, Ph.D., Assistant Professor
- Andrew P. Yonelinas, Ph.D., Professor
- Nolan Zane, Ph.D., Professor

**Emeriti Faculty**

- Linda P. Acredolo, Professor Emerita
- Jarvis R. Bastian, Ph.D., Professor Emeritus
- Alan C. Elms, Ph.D., Professor Emeritus
- Karen P. Ericksen, Ph.D., Professor Emerita
- Albert A. Harrison, Ph.D., Professor Emeritus
- Peter R. Marler, Ph.D., Professor Emeritus
- William A. Mason, Ph.D., Professor Emeritus
- G. Mitchell, Ph.D., Professor Emeritus
- Robert M. Murphy, Ph.D., Professor Emeritus

Thomas Natsoulas, Ph.D., Professor Emeritus  
Theodore E. Parks, Ph.D., Professor Emeritus  
Robert Sommer, Ph.D., Professor Emeritus  
Charles T. Tart, Ph.D., Professor Emeritus

**Affiliated Faculty**

- Katherine Gibbs, Ph.D., Lecturer
- Jacqueline Horn, Ph.D., Lecturer
- Elizabeth Post, Ph.D., Lecturer
- Joanna Scheib, Ph.D., Adjunct Assistant Professor
- Eva Schepler, Ph.D. Lecturer
- Lisa Tavano-Hall, Ph.D., Lecturer

**The Major Programs**

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis: Developmental Psychology, which involves the study of changes in behavior and abilities that occur as development proceeds and includes such topics as imaging the developing brain, development of self esteem, problem solving, attachment theory, symbolic representation in infants and children, development of children's understanding of mental states; Perception-Cognition, which involves the study of awareness and thought, and includes such topics as perception, learning, memory, and consciousness; Psychobiology, which involves the study of the biological correlates of behavior and includes such topics as physiological psychology, sensory processes, health psychology, and animal behavior; Social-Personality Psychology, which involves the study of the individual in his or her social environment and includes such topics as personality theory, abnormal psychology, individual differences, developmental psychology, and social psychology; and Quantitative which involves the study of linear models and psychometrics which includes topics, such as experimental design and the analysis of variance, regression analysis, and multivariate analysis.

The department offers the Bachelor of Arts (A.B.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathematics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take specialty courses on such far-ranging topics as sex differences, genius and creativity, environmental awareness, and organization psychology. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden your experiences and understanding of the field of psychology.

**Preparatory Requirements.** Before declaring a major in psychology, students must complete the following courses with a combined grade point average of at least 2.500. All courses must be taken for a letter grade. (Students in the Bachelor of Science, Biology program must complete Biological Sciences 1A.):

- Psychology 1, 41 ..... 8 units
- Statistics 13 or 102 ..... 4 units
- Biological Sciences 1A
- or
- Biological Sciences 10 and one course from Anthropology 1, Molecular and Cellular Biology 10, Neurobiology, Physiology, and Behavior 10 ..... 5 or 8 units
- Sociology or cultural anthropology.... 4 units

**Career Alternatives.** A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, the ministry, teaching, business, and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and other professions.

**A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter</b> .....	<b>21-25</b>
Psychology 1 or the equivalent.....	4
Psychology 41 .....	4
Statistics 13 or 102 .....	4
Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.	
Biological Sciences 1A; or a combination of Biological Sciences 10 and one course from Anthropology 1, Molecular and Cellular Biology 10, or Neurobiology, Physiology, and Behavior 10 .....	5-8
One course in sociology or cultural anthropology; may be lower or upper division, minimum of 4 units .....	4-5
<b>Depth Subject Matter</b> .....	<b>40</b>
Two courses from two of the following four groups and one course from the remaining two groups .....	23-24
Group A: Psychology 100, 130, 131, 132, 135	
Group B: Psychology 101, 113, 121, 122, 123, 126, 127, 129	
Group C: Psychology 151, 154, 162, 168	
Group D: Psychology 140; or Human Development 100A or 100B, Psychology 141/Human Development 101, Psychology 142/Human Development 102	
Additional units to achieve a total of 40 upper division units in psychology .....	16-17
A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.	
<b>Total Units for the Major</b> .....	<b>61-65</b>
<b>Biology Emphasis</b>	
<b>B.S. Major Requirements:</b>	
	UNITS
<b>Preparatory Subject Matter</b> .....	<b>52-61</b>
Psychology 1 or the equivalent.....	4
Psychology 41 .....	4
Statistics 13 or 102 .....	4
Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.	
Mathematics 16A-16B or 17A-17B or 21A-21B .....	6-8
Physics 10 or 7A-7B .....	4-8
Biological Sciences 1A, 1B.....	10
Chemistry 2A, 2B.....	10
Chemistry 8A-8B or 118A-118B or 128A-128B .....	6-8
One course in sociology or cultural anthropology; may be lower or upper division, minimum of 4 units .....	4-5
<b>Depth Subject Matter</b> .....	<b>49</b>
Seven Psychology courses distributed as specified:	
Group A: two courses from Psychology 100, 130, 131, 132, 135 .....	8
Group B: three courses from Psychology 101, 113, 121, 122, 123, 126, 127, 129 .....	11-12
Group C: one course from Psychology 151, 154, 162, 168 .....	4
Group D: one course from Psychology 140 (or Human Development 100A or 100B), Psychology 141/Human Development 101, Psychology 142/Human Development 102 .....	4
Additional units to achieve a total of 40 upper division units in psychology .....	12-13
(A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.)	
Biological Sciences 101 .....	4
Neurobiology, Physiology, and Behavior 101 .....	5

**Total Units for the Major**..... **101-110 Recommended**

Psychology 180B, 199; on a psychobiological topic, Anthropology 154A, Environmental Science and Policy 110, Evolution and Ecology 100, 101.

**Mathematics Emphasis**

**B.S. Major Requirements:**

UNITS

**Preparatory Subject Matter** .....

Psychology 1 or the equivalent .....	4
Psychology 41 .....	4
Statistics 13 or 102 .....	4
Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.	
Mathematics 21A, 21B, 21C, .....	12
Computer Science Engineering 30 or Engineering 5 .....	4
Chemistry 10 or 2A-2B or 2AH-2BH....	4-10
Physics 10 or 7A-7B .....	4-8
Biological Sciences 1A; or a combination of Biological Sciences 10 and one course from Anthropology 1, Molecular and Cellular Biology 10, or Neurobiology, Physiology, and Behavior 10 .....	5-8
One course in sociology or cultural anthropology; may be lower or upper division, minimum of 4 units .....	4-5

**Depth Subject Matter** .....

Five Psychology courses, distributed as specified:	
Group A: two courses from 100, 130, 131, 132, 135 .....	8
Group B: two courses from Psychology 101, 113, 121, 122, 123, 126, 127, 129 .....	7-8
Group C: one course from Psychology 151, 154, 162, 168	
or	
Group D: one course from Psychology 140 (or Human Development 100A or 100B), Psychology 141/Human Development 101, Psychology 142/Human Development 102 .....	4
Additional units to achieve a total of 40 upper division units in psychology .....	11-12
A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.	
Psychology 103A.....	5
One course from Psychology 103B, 104, or the equivalent .....	4
One course sequence from Statistics 106-108, 130A-130B, 131A-131B .....	8

**Total Units for the Major**..... **93-107 Recommended for All Majors.**

Students who plan to do graduate work in any area of psychology are strongly encouraged to complete Statistics 13 and Psychology 103A or both Statistics 13 and 102. Psychology 41 is a prerequisite for most upper division courses. Psychology 41 and Statistics 13 or 102 should be completed in the first year.

**Major Advisers.** K. Bales, J. Beer, S. Blozis, S. Bunge, J.P. Capitanio, C.S. Carter, R.G. Coss, R.A. Emmons, E. Ferrer, S. Ghetti, G.S. Goodman, K.R. Henry, G.M. Herek, P. Janata, J.T. Johnson, N.E.A. Krull, L.A. Krubitzer, K. Lagattuta, D.L. Long, G.R. Mangun,, D.H. Owings, C. Pickett,, R.B. Post, C. Ranganath, S. Rivera, R.W. Robins, P.R. Shaver, J. Sherman, D.K. Simonton, , S. Sue, T. Swaab, R. Thompson, M. Traxler, D. Whitney, K.F. Widaman, E. Wojciulik, A.P. Yonelinas, N.W. Zane

**Human Development course credit.** Human Development 100A, 100B, 100C, 101, 102, 120, and 121 can be used toward satisfying the 40-unit upper division major requirement to a maximum of 12 units. Students who have completed Human Development 100A or 100B will receive 2 units of credit for Psychology 140.

**Minor Program Requirements:**

UNITS

**Psychology**..... **24**

Psychology 1 or the equivalent .....	4
One course from each of the following four groups.....	15-16
Group A: Psychology 100, 130, 131, 132, 135	
Group B: Psychology 101, 113, 121, 122, 123, 126, 127, 129	
Group C: Psychology 151, 154, 162, 168	
Group D: Psychology 140, 141, 142	
Additional units to achieve a total of 20 upper division units .....	4-5
One course selected from Human Development 100A, 100B, 100C, 101, 102, 120, 121 can be used toward satisfying the minor upper division unit requirement.	

**Honors and Honors Program.** In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria and complete a research project involving a minimum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Course 194HA-194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

**Graduate Study.** The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained by writing the Graduate Adviser, Department of Psychology.

**Graduate Adviser.** See *Class Schedule and Registration Guide*.

**Courses in Psychology (PSC)**

**Lower Division Courses**

**1. General Psychology (4)**

Lecture—4 hours. Introduction emphasizing empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior. Only 2 units of credit allowed for students who have completed course 15 or 16. Not open for credit to students who have completed course 15 and 16. GE credit: SocSci.—I, II, III. (I, II, III.) Shaver, Johnson, Capitanio, Thompson, Tavano-Hall, Traxle

**20. Freshman Psychology Seminar (4)**

Seminar—4 hours. Prerequisite: freshman standing. Instructor will acquaint students with his or her program of research, the development of scientific questions from the literature, and the application of research methods to examine these questions. Critical thinking will be encouraged via expository writing and brief presentations.

**41. Research Methods in Psychology (4)**

Lecture—3 hours; autotutorial. Prerequisite: course 1 or the equivalent; Statistics 13 or 102 recommended. Introduction to experimental design, interviews, questionnaires, field and observational methods, reliability, and statistical inference.—I, II, III. (I, II, III.) E. Post

**90X. Lower Division Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Psychology through shared readings, discussions, written assignments, or special activities such as fieldwork or laboratory work. May not be repeated for credit. Limited enrollment.

**98. Directed Group Study (1-5)**

Primarily for lower division students. (P/NP grading only.)

**99. Special Study for Lower Division Students (1-5)**

(P/NP grading only.)

**Upper Division Courses****100. Introduction to Cognitive Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1 and 41. Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former course 136.—I, II, III. (I, II, III.) Gibbs, Kroll, Long

**101. Introduction to Psychobiology (4)**

Lecture—4 hours. Prerequisite: courses 1, 41. Survey and integration of the relationships between behavior and biological processes, including physiology, genes, development, ecology, and evolution.—I, II, III. (I, II, III.) Coss, Henry, Krubitzer, Owings, Schank

**103A. Statistical Analysis of Psychological Data (5)**

Lecture—4 hours; laboratory—2 hours; term paper. Prerequisite: course 1, 41 and Statistics 13 or 102. Pass 1 open to Psychology majors. Design and statistical analysis of psychological investigations and the interpretation of quantitative data in psychology. Not open for credit to students who have completed course 103.—I. (I.) Widaman, Blozis

**103B. Statistical Analysis of Psychological Data (4)**

Lecture—4 hours. Prerequisite: course 103A and Statistics 13 or 102. Pass 1 open to Psychology majors. Probability theory, sampling distributions, hypothesis testing, statistical inference, one-way and two-way analysis of variance, nonparametric statistics, with applications in psychology. Not open for credit to students who have completed course 105.—II, III. (II, III.) Widaman, Blozis, Ferrer

**104. Applied Psychometrics: An Introduction to Measurement Theory (4)**

Lecture—4 hours. Prerequisite: upper division standing in Psychology, courses 41 and 103, Statistics 13. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis and latent trait theory.—Widaman

**109. Interactive Computer Programming for Psychological Experiments (4)**

Lecture—2 hours; laboratory—3 hours. Prerequisite: course 41 and one of course 100, 130, or 132 and consent of instructor. Instruction in programming with an emphasis on programming desktop computers as an interactive research tool. Not open for credit to students who have completed course 181. (Former course 181.)—Janata

**113. Developmental Psychobiology (4)**

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101. The biology of behavioral development; survey and integration of the organismic and environmental processes that regulate the development of behavior.—I, II. (II, III.) Schank, Owings

**121. Physiological Psychology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 1, 41, 101. Pass 1 open to Psychology majors. Relationship of brain structure and function to behavior, motivation, emotion, language, and learning in humans and other animals. Methodology of physiological psychology and neuroscience. Not open for credit to students who have completed course 108. (Former course 108.)—I, II, III. (I, II, III.) Bales, Henry, Krubitzer

**122. Advanced Animal Behavior (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 102. Pass 1 open to Psychology majors. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free living animals. (Same course as Neurobiol-

ogy, Physiology, and Behavior 150.) Not open for credit to students who have completed course 150. (Former course 150.)—III. (III.) Owings, Scheib

**123. Hormones and Behavior (3)**

Lecture—3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101 and either course 101 or Neurobiology, Physiology, and Behavior 102. Pass 1 open to Psychology majors. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Neurobiology, Physiology, and Behavior 152.) Not open for credit to students who have completed course 152. (Former course 152.)—III. (III.) Bales

**124. Comparative Neuroanatomy (4)**

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Neurobiology, Physiology, and Behavior 124.)—II. (II.) Krubitzer, Recanzone

**126. Health Psychology (4)**

Lecture—4 hours. Prerequisite: course 1, 41, 101. Pass 1 open to Psychology majors only. Psychological factors influencing health and illness. Topics include stress and coping, personality and health, symptom perception and reporting, heart disease, cancer, compliance, and health maintenance and promotion. Not open for credit to students who have completed course 160.—II, III. (II, III.) Capitanio, Emmons

**127. Animal Cognition (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 1, 41, 101. Pass 1 open to Psychology majors. Integrative review of the historical backdrop, theoretical issues, and scientific methods of studying animal cognition in a wide range of species. Emphasis on learning processes, pattern recognition, and the neurobiology of learning and memory. Not open for credit to students who have completed course 134. (Former course 134.)—II. (II.) Coss

**128. Information Processing Models in Neuroscience and Psychology (4)**

Lecture—3 hours; term paper. Prerequisite: Mathematics 16B, Physics 7B, course 101 or Neurobiology, Physiology, and Behavior 100. Pass 1 open to Psychology majors. Basic mathematical modeling techniques used in neuroscience and psychology. Specific topics include linear systems theory, Fourier transforms, neural networks, adaptive systems, probabilistic inference and information theory. Emphasis on understanding information processing in neural systems. (Same course as Neurobiology, Physiology, and Behavior 163.) Not open for credit to students who have completed course 163. (Former course 163.)—(II.) Olshausen

**129. Sensory Processes (4)**

Lecture—3 hours; term paper. Prerequisite: course 1, 41, 101. Pass 1 open to Psychology majors. Psychobiology of sensory systems in humans and other animals. The relationship of behavior to the physiology, structure, and function of the senses. GE credit: Wrt.—I, II, III. (I, II, III.) Henry, Krubitzer, Tavano-Hall

**130. Human Learning and Memory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: courses 1, 41, 100, and either Statistics 13 or 102; or consent of instructor. Consideration of major theories of human learning and memory with critical examination of relevant experimental data.—I, II, III. (I, II, III.) Ghatti, Goodman, Kroll, Ranganath, Yonelinas

**131. Perception (4)**

Lecture—3 hours; independent library work. Prerequisite: courses 1, 41. The cognitive organizations related to measurable physical energy changes

mediated through sensory channels. The perception of objects, space, motion, events.—I, II, III. (I, II, III.) Post, Whitney

**132. Language and Cognition (4)**

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, 100; or consent of instructor. Introduction to the cognitive processes involved in language comprehension and production. Topics include the biological foundations of language, speech perception, word recognition, syntax, reading ability, and pragmatics.—I, II, III. (II, III.) Long, Swaab, Traxler

**135. Cognitive Neuroscience: The Biological Foundations of the Mind (4)**

Lecture—3 hours; writing. Prerequisite: courses 1, 41, and 100 or 131, or consent of instructor; course 101, 121, or 129 recommended. Neuroscientific foundations of higher mental processes including attention, memory, language, higher-level perceptual and motor processes, and consciousness. Emphasis on the neural mechanisms which form the substrates of human cognition, and the relationship of mind to brain.—I, II. (I, II.) Bunge, Janata, Raganath, Wojcik

**140. Developmental Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction. Two units of credit allowed to students who have completed Human Development 100A or 100B. Not open for credit to students who have completed course 112. (Former course 112.)—I, II, III. (I, II, III.) Gibbs, Goodman, Lagattuta

**141. Cognitive Development (4)**

Lecture—3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass 1 restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Human Development 101.) GE credit: Wrt.—I, II, III. (I, II, III.) Chen, Ghatti, Gibbs, Goodman, Lagattuta, Rivera

**142. Social and Personality Development (4)**

Lecture—3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass 1 open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Human Development 102.) GE credit: SocSci, Wrt.—I, II, III. (I, II, III.) Conger, Gibbs, Robins, Thompson

**146. The Development of Memory (4)**

Lecture—3 hours; term paper. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Theory and research on memory development with focus on infancy and childhood. Not open for credit to students who have completed course 133. (Former course 133.)—II. (III.) Ghatti, Goodman, Rivera

**151. Social Psychology (4)**

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction; group tensions, norm-development, attitudes, values, public opinion, status. Not open for credit to students who have completed course 145. (Former course 145.)—I, II, III. (I, II, III.) Johnson, Pickett, Shaver, Sherman

**153. Psychology and Law (4)**

Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Current theoretical and empirical issues in the study of psychology and law. Topics include eyewitness testimony, child abuse, jury decision making, juvenile delinquency and criminology, prediction of violence, insanity defense, and memory for traumatic events. Not open for credit to students

who have completed course 115. (Former course 115.) Offered in alternate years.—III. Goodman, Johnson

#### 154. Psychology of Emotion (4)

Lecture—4 hours. Prerequisite: course 1, 41. Pass 1 open to Psychology majors. Introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge. Not open for credit to students who have completed course 143. (Former course 143.)—I, II, III. (I, II, III.) Beer, Robins, Shaver

#### 155. Environmental Awareness (4)

Lecture—4 hours. Prerequisite: course 1. Pass 1 open to Psychology majors. Interactions of people and the environments they construct. Research methods for evaluating designed environments and reviews of current research in environmental psychology. Not open for credit to students who have completed course 144. (Former course 144.) GE credit: SocSci—I. (I.) Coss

#### 156. Organizational Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Survey of interrelationships among psychological processes, interpersonal dynamics, and organizational forms. Topics include motivation, communication, decision making, leadership, personnel selection and training, stress and conflict, career development, organizational development, and organization-community relations. Not open for credit to students who have completed course 183. (Former course 183.)—III. (III.) Harrison

#### 158. Sexual Orientation and Prejudice (4)

Lecture/discussion—4 hours. Prerequisite: course 1, 41. Pass 1 open to Psychology majors. Current scientific knowledge about sexual orientation and prejudice based on sexual orientation. Emphasis on learning the skills necessary for a critical understanding of science and public policy issues relevant to sexuality. GE credit: SocSci, Div, Wrt.—II. (III.) Herek

#### 159. Gender and Human Reproduction (4)

Lecture—4 hours. Prerequisite: course 1 and 41. Pass 1 open to Psychology majors. Psychology of reproduction. Reproductive events over the course of an individual's life, including sexual development, mate choice, relationships, and reproduction. Biological and social psychological explanations at the levels of mechanism and evolutionary function. Not open for credit to students who have completed former course 149. (Formally course 149.)—I, II, III. Scheib

#### 162. Personality Theory (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. The theories of Freud, Erikson, and other major twentieth-century contemporary approaches to personality. Not open for credit to students who have completed course 147. (Former course 147.) GE credit: SocSci, Wrt.—I, II, III. (I, II, III.) Emmons, Robins, Shaver

#### 162V. Personality Theory (4)

Online lecture—4 hours. Prerequisite: course 1, 41. The theories of Freud, Erikson, and other major twentieth-century contemporary approaches to personality. Not open for credit to students who have completed former course 147. GE credit: SocSci, Wrt.

#### 165. Introduction to Clinical Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41, 168, and either 140 or 151. Major theoretical formulations in the history of clinical psychology, from classical psychoanalysis to contemporary existentialism and behavior modification. A survey, based on lectures, films, and tapes, of what clinical psychologists do, including methods of appraisal, professional roles, and approaches to treatment.—I, II, III. (I, II, III.) Horn, Sue, Zane

#### 168. Abnormal Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Descriptive and functional account of behavioral disorders, with primary consideration given to neurotic and psychotic behavior. GE credit: SocSci.—I, II, III. (I, II, III.) Emmons, Schepeler, Sue, Zane

#### 170. Psychology of Religion (4)

Lecture—4 hours. Prerequisite: courses 1 and 41. Major theories, issues, data, and research methodologies of the psychology of religion. Religious experience and expression; religious development in childhood, adolescence, and adulthood; conversion; religious influences on physical and mental health; cross-cultural perspectives. GE credit: Div, Wrt.—II, III. (II, III.) Emmons

#### 175. Genius, Creativity, and Leadership (4)

Lecture—3 hours; term paper. Prerequisite: course 1 and 41 or the equivalent or consent of instructor. The phenomenon of genius examined from a diversity of theoretical, methodological, and disciplinary perspectives, with an emphasis on outstanding creativity and leadership in art, music, literature, philosophy, science, war, and politics. GE credit: SocSci, Wrt.—I, III. (I, III.) Simonton

#### 177. Psychobiography and Life History (4)

Lecture—4 hours. Prerequisite: course 1 or consent of instructor; course 41. Case-history research as a nonquantitative approach to studying personality. Psychological interpretation of life histories of outstanding individuals in the arts, politics, science and other areas. GE credit: SocSci, Wrt.

#### 180A. Research in Cognitive and Perceptual Psychology (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in general experimental psychology (general research design and analysis, perception, cognition, cognitive development, etc.). Specific content will vary from quarter to quarter. May be repeated once for credit when content differs.—I, (II, III.)

#### 180B. Research in Psychobiology (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 101, three additional upper division courses in Psychology, and consent of instructor. Empirical research on selected topics in psychobiology (animal learning, animal behavior, physiological and sensory psychology, developmental psychobiology, computer modeling of neural systems). Content varies. May be repeated once for credit when content differs.—III. (III.)

#### 180C. Research in Personality and Social Psychology (4)

Lecture—2 hours; laboratory—4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in personality and social psychology (personality, social psychology, organizational psychology, etc.). Content will vary from quarter to quarter. May be repeated once for credit when specific content differs.

#### 185. History of Psychology (4)

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, upper division standing or consent of instructor. Pass 1 open to Psychology majors. Development of psychological thought and research in context of history of philosophy and science. Not open for credit to students who have completed course 120. (Former course 120.) GE credit: SocSci, Wrt.—II. (II.) Simonton

#### 190. Seminar in Psychology (4)

Seminar—4 hours. Prerequisite: junior or senior standing; major in psychology or consent of instructor. Intensive treatment of a special topic or problem of psychological interest. May be repeated for credit in different subject area.—II, III. (I, III.)

#### 190X. Upper Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Psychology. Emphasis on student participation in learning. May not be repeated for credit. Limited enrollment.

#### 192. Fieldwork in Psychology (1-6)

Fieldwork—1-6 hours. Prerequisite: upper division standing in psychology and consent of instructor. Supervised internship off and on campus, in community and institutional settings. Maximum of four units

may be used towards satisfaction of upper division major requirement. May be repeated once for credit. Limited enrollment (P/NP grading only.)

#### 194HA-194HB. Special Study for Honors Students (3-3)

Independent study—9 hours. Prerequisite: senior standing in Psychology and qualifications for admission into college honors program, and consent of instructor; at least one course from 180A, 180B, 180C or 199 strongly recommended. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. (Deferred grading only, pending completion of sequence.)

#### 197T. Tutoring in Psychology (1-3)

Tutoring—1-3 hours. Prerequisite: upper division standing and consent of instructor. Intended for advanced undergraduate students who will lead discussion sections in Psychology courses. May be repeated for credit for a total of 8 units. (P/NP grading only.)

#### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Graduate Courses

#### 200. Proseminar in Psychology (3)

Seminar—2 hours; independent study—1 hour. Prerequisite: graduate standing in Psychology or consent of instructor. Introduces matriculating graduate students to research activities of departmental faculty. (S/U grading only.)—I. (I.)

#### 201. Research Preceptorship (4)

Laboratory—3-4 hours; discussion—3-5 hours. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### 202. Research Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing in psychology. Presentation of graduate research to program faculty and graduate students. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### 204A. Statistical Analysis of Psychological Experiments (4)

Lecture—4 hours. Prerequisite: Statistics 102 or the equivalent and graduate standing in Psychology or consent of instructor. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Analysis of variance, factorial and repeated measures, and tests of trends. Not open for credit to students who have completed course 206.—I. Ferrer, Widaman

#### 204B. Causal Modeling of Correlational Data (4)

Lecture—4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Examination of how to make causal inferences from correlational data in the behavioral sciences. Emphasis on testing rival causal models using correlations among observed variables. Beginning with multiple regression analysis, discussion advances to path analysis and related techniques.—II. Simonton

#### 204C. Applied Psychometrics and Measurement Theory (4)

Lecture—4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis, and latent trait theory. Not open for credit to students who have completed course 204. (Former course 204.) Offered in alternate years.—III. Widaman

#### 204D. Advanced Statistical Inference from Psychological Experiments (4)

Lecture—4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Advanced topics in statistical inference, which may include probabil-

ity theory, sampling distributions, statistical inference and hypothesis testing, nonparametric statistics, Bayesian approaches, and advanced issues in analysis of variance. Not open for credit to students who have completed course 205. (Former course 205.) Offered in alternate years.—III.

#### **205A. Applied Multivariate Analysis of Psychological Data (4)**

Lecture—4 hours. Prerequisite: three courses from 204A, 204B, 204C, 204D or the equivalents, or consent of instructor. Review of the major methods of multivariate data analysis for psychological data. Statistical routines using a linear algebra-based computing language. Topics include multivariate analysis of variance, discriminant analysis, canonical analysis factor analysis, and component analysis. Not open for credit to students who have completed course 207B. (Former course 207B.) Offered in alternate years.—II.

#### **205B. Factor Analysis (4)**

Lecture—4 hours. Prerequisite: graduate standing, course 204A and 204B or the equivalent or consent of instructor. Theory and methods of factor analysis, including exploratory factor analysis, confirmatory factor analysis, and principal component analysis. Offered in alternate years.—II. Blozis, Widaman

#### **205C. Structural Equation Modeling (4)**

Lecture—4 hours. Prerequisite: graduate standing, course 204A and 204B or the equivalent or consent of instructor. Theory and methods of structural equation modeling, including path analysis, confirmatory factor analysis, and multiple-group modeling. Offered in alternate years.—II. Blozis, Widaman

#### **205D. Multilevel Models (4)**

Lecture—4 hours. Prerequisite: course 204A, graduate standing or consent of instructor. Introduction to statistical techniques for the analysis of normal, hierarchically structured data, such as cross-sectional clustered data or repeated-measures data. Topics include hierarchical linear models, latent growth curve models, and how these methods handle unbalanced and/or missing data.—II. (II.) Blozis

#### **207. Survey and Questionnaire Research Methods (4)**

Lecture/discussion—4 hours. Prerequisite: completion of a course on social or behavioral research methods, graduate standing. Survey and questionnaire research methods with emphasis on how to ask questions. Cognitive, motivational, and social processes that influence how respondents answer questions; sampling techniques; Internet resources; practical aspects of fielding survey and questionnaire research. Not offered every year.—I. Herek

#### **208. Physiological Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. A conceptual analysis of the contributions of neuroanatomy, neurophysiology and neurochemistry to an understanding of animal and human behavior.—Henry

#### **212A. Developmental Psychology: Cognitive and Perceptual Development (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor, completion of undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human cognitive and perceptual development. Development of perception, memory, concepts (e.g., theory of mind, concepts about number), problem solving, and language from infancy to adolescence.—II. Ghetti, Goodman, Lagattuta, Rivera

#### **212B. Developmental Psychology: Social, Emotional, and Personality Development (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor, completion of an undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human social, emotional, and personality development. Development of emotions, moral reasoning and behavior, personality, self-concept, and social cognition from infancy to adolescence (may include adulthood).—Thompson

#### **220. History of Psychology (4)**

Lecture—2 hours; seminar—2 hours. Prerequisite: graduate standing in psychology or consent of instructor. A lecture-seminar on the history of psychology and on the applicability of early psychological theory and research to contemporary investigations. Offered in alternate years.—Simonton

#### **230. Cognitive Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the mental processes by which knowledge is acquired, manipulated, stored, retrieved and used. Offered in alternate years.—I. Long

#### **231. Sensation and Perception (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the role of sensory processes and perception in experience and their effects on behavior. Offered in alternate years.—III. Post, Whitney

#### **245. Social Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in social psychology.—I. (III.) Pickett, Robins, Johnson

#### **247. Personality (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in human personality.—II. (II.) Emmons, Robins

#### **250. Comparative Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. The study of animal behavior in an evolutionary and comparative framework.—II. Owings

#### **251. Topics in Genetic Correlates of Behavior (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and experiment in the genetic contributions to animal and human behavior. May be repeated for credit when topic differs. Offered in alternate years.

#### **252. Topics in Psychobiology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Critical study in a selected area of psychobiology. May be repeated for credit when content differs. Offered in alternate years.—(I.)

#### **261. Cognitive Neuroscience (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Neuroscience 223.)—III. (III.) Bunge, Swaab, Wojciulik, Ranganath

#### **263. Topics in Cognitive Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Selected topics in language processing, memory, perception, problem solving, and thinking, with an emphasis on the common underlying cognitive processes. May be repeated for credit when content differs. Offered in alternate years.—(I.) Goodman, Kroll, Long, Post, Yonelinas, Rivera, Lagattuta

#### **264. Topics in Psycholinguistics (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Discussion of fundamental issues in the psychology of language. May be repeated for credit when content differs. Offered in alternate years.—Long, Traxler

#### **265. Topics in Psychology of Consciousness (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in the psychology of consciousness. May be repeated for credit when content differs. Offered in alternate years.

#### **270. Topics in Personality and Social Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Critical study of a selected area of personality or social psychology. May be repeated for credit when topic differs.—I. (I.) Emmons, Shaver, Beer, Herek, Pickett, Robins, Sherman

#### **272. Topics in Developmental Psychology (4)**

Seminar—4 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Selected topics in developmental psychology, including developmental neuroscience, memory development, infancy, cognitive development, social development, child maltreatment, children and law, perceptual development, emotional development, children at risk, and adolescence, with emphasis on developmental processes and developmental theory. May be repeated for credit. Not offered every year.—I. Bunge, Ferrer, Ghetti, Goodman, Lagattuta, Rivera, Robins, Thompson, Widaman

#### **290. Seminar (4)**

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Seminar devoted to a highly specific research topic in any area of basic psychology. Special topic selected for a quarter will vary depending on interests of instructor and students.—I, II, III. (I, II, III.)

#### **298. Group Study (1-5)**

(S/U grading only.)

#### **299. Research (2-9)**

(S/U grading only.)

#### **299D. Dissertation Research (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

### **Professional Courses**

#### **390A-390B. The Teaching of Psychology (6-4)**

Discussion, lecture, practice. Prerequisite: advanced graduate standing in psychology or a closely related discipline and consent of instructor. Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evaluation. Practical experience in the preparation and presentation of material. (S/U grading only; deferred grading only, pending completion of sequence.)—II-III. (II-III.)

#### **396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## **Quantitative Biology and Bioinformatics**

(College of Biological Sciences)

The interdisciplinary minor in Quantitative Biology and Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of quantitative approaches, and develop the interdisciplinary perspective that is now the foundation of modern biological research and training.

The minor in Quantitative Biology and Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sciences.

**Minor Program Requirements:**

UNITS

**Quantitative Biology and Bioinformatics ..... 18-24**

Core Courses.....	8-12
Programming: Computer Science Engineering 10 or 30 or the equivalent*.....	4
Quantitative Biology: Biological Sciences 132 or Mathematics 124.....	4
Bioinformatics: Computer Science Engineering 124.....	4
Quantitative and Computational Preparation.....	4
Complete one course from the following: Applied Science Engineering 115; Computer Science Engineering 110; Mathematics 128A, 128B, 128C, 131; Statistics 130A, 131A, 141A.....	4
Restricted Electives.....	6-8
Complete two or more courses from the following list to achieve a total of 18-24 units: Animal Genetics 120; Computer Science Engineering 122A, 165A; Environmental Science and Policy 121; Evolution and Ecology 102, 103, 104, 175; Molecular and Cellular Biology 123, 143, 182; Neurobiology, Physiology, and Behavior 105, 131, 163; Wildlife, Fish, and Conservation Biology 122	

**Restrictions.** No more than two upper division courses from a single department/section may be offered in satisfaction of the minor requirements. Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

\*The programming requirement may be satisfied by previous experience and therefore may not entail college course credit. Please see your minor adviser for this determination and its possible impact on your unit requirements for the minor.

**Minor Adviser.** Consult the College of Biological Sciences Dean's office in 202 Life Sciences Addition, (530) 752-0410.

**Radiation Oncology**

See [Medicine, School of](#), on page 345.

**Radiology**

See [Medicine, School of](#), on page 345.

**Range and Wildlands Science**

See [Agronomy and Range Science](#), on page 128; and [Range Science](#), on page 434.

**Range and Wildlands Science**

(College of Agricultural and Environmental Sciences) Admission into the Range and Wildlands Science major has been discontinued. Students interested in this area should see the major for [Agricultural Man-](#)

[agement and Rangeland Resources](#), on page 124; Range and Natural Resources specialization.

**The Major Program**

Range and Wildlands Science is the study of the biological and physical components of land resources which are used mostly for grazing domestic livestock, but which also provide wildlife habitats, watersheds, recreation, and open space.

**The Program.** The major provides background in the biological, physical, and social sciences. Comprehensive study in the plant, animal, soil, and resource sciences supplements the core of range management courses. Integration of the knowledge of a variety of specialized fields is learned as a basis for land management oriented toward the multiple use concept and the maintenance of environmental quality.

**Career Alternatives.** Range and Wildlands Science graduates, especially those with some experience, may be employed as consultants, extension specialists, ranch managers, or ranchers. They may also qualify for the position of Range Conservationist in governmental agencies such as the Forest Service, Soil Conservation Service, and the Bureau of Land Management. If career work with such an agency is desired, it is recommended that trainee or apprenticeship experience with that agency be included in the major program of study as an internship. In addition, the training provided by this major should give an excellent background for natural resource management positions.

**B.S. Major Requirements:**

UNITS

**English Composition Requirement ..... 0-8**

See College requirement.

**Preparatory Subject Matter ..... 63-67**

Animal Science 2.....	4
Biological Sciences 1A, 1B, 1C.....	5
Chemistry 2A, 2B, 8A, 8B.....	16
Agricultural Science and Management 21, Engineering 5, or Computer Science Engineering 10.....	3
Agricultural and Resource Economics 1, Economics 1A, or 1B.....	4-5
Geology 1-1L.....	4
Mathematics 16A; 16B recommended... ..	3-6
Physics 1A, 1B.....	6
Soil Science 100.....	4
Agricultural Science and Management 150.....	4

**Breadth/General Education ..... 6-24**

Satisfaction of General Education requirement to include two non-introductory courses in Agricultural and Resource Economics, Economics, Environmental Science and Policy, or Geography.

**Depth Subject Matter ..... 51-56**

Botany 111 or Water Science 104.....	3-4
Botany 117 or Plant Science 101.....	4
Geography 3, Atmospheric Science 105.....	3-4
Soil science, two upper division courses.....	6-8
Water Science 141.....	3
Nutrition 115.....	4
Wildlife ecology or management, one upper division course in wildlife, fish and conservation biology, or zoology.....	3-4
Agronomy 112.....	3
Select units from Range Science 100, 133, 134, 135, 105, 160, 145; and Range Science 192, 198, 199; not more than a total of 3 units can be counted:.....	18
Geography 106.....	4

**Restricted Electives ..... 6-8**

Two upper division natural science or applied biological science courses in one or two of the following: animal science, botany, entomology, genetics, geography, mathematics, nematology, plant pathology,

plant science, environmental and resource sciences, water science, or weed science.

**Unrestricted Electives ..... 17-47**

**Total Units for the Major ..... 180**

**Major Adviser.** Contact Plant Sciences Department office.

**Advising Center** for the major is in 1220A Plant and Environmental Sciences (530) 752-1715.

**Graduate Study.** See [Ecology \(A Graduate Group\)](#), on page 196.

**Range Science**

(College of Agricultural and Environmental Sciences)

**Faculty.** See [Plant Sciences](#), on page 419.

**Related Courses.** See Plant Sciences 101, 112, 130, 131, 134, 135, 137; Nutrition 115; Soil Science 105, 120; Wildlife, Fish, and Conservation Biology 151.

**Religious Studies**

(College of Letters and Science)

Naomi Janowitz, Ph.D., Program Director

**Program Office.** 622 Sproul Hall (530) 752-4999; <http://religions.ucdavis.edu>

**Committee in Charge**

- David Biale, Ph.D. (*History*)
- Lincoln D. Hurst, Ph.D. (*Religious Studies*)
- Naomi Janowitz, Ph.D. (*Religious Studies*)
- Whalen Lai, Ph.D. (*Religious Studies*)
- Jay Mechling, Ph.D. (*American Studies*)
- Baki Tezcan, Ph.D. (*Religious Studies, History*)

**Faculty**

- Lincoln D. Hurst, Ph.D., Associate Professor
- Naomi Janowitz, Ph.D., Professor
- Whalen W. Lai, Ph.D., Professor
- Baki Tezcan, Ph.D., Assistant Professor

**The Major Program**

Majoring in religious studies provides an opportunity to explore and analyze, from an academic perspective, the written and oral traditions of diverse religions

**The Program.** The major introduces students to the academic study of religion. The religious studies major offers a broad choice of courses, including history, philosophy, sociology, anthropology, American studies, classics, and medieval studies. For some students, religious studies is an appropriate second major and might combine well with anything from philosophy to international agricultural development, from history to international relations.

**Career Alternatives.** The emphasis in religious studies courses on developing analytical thinking skills and clear written expression is an asset for many career goals. As a strong liberal arts program, the major can lead to research and/or teaching on all levels in the field of religion. Because the major integrates so many academic areas, it is also an excellent background for graduate programs, especially in the humanities, and for professional schools including law, business, and foreign service.

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 24**

- At least one course from each of the following groups..... 20
- (a) Religious Studies 1, 2
- (b) Religious Studies 21, 23, 40, 60, 70, 75
- Anthropology 2 or, with approval from adviser, a lower division course related to religion from African American and African

Studies, American Studies, Philosophy, Native American Studies, or other departments .... 4

**Depth Subject Matter ..... 40**

- Five upper division Religious Studies courses plus Religious Studies 100..... 24
- Two upper division History courses related to religion ..... 8
- Sociology, philosophy, anthropology ..... 8
- Two upper division courses related to religion in the above disciplines such as Philosophy 105, 145, Sociology 146, 149, Anthropology 124; or, with approval from adviser, in other disciplines such as Medieval Studies, Native American Studies, African American and African Studies, Classics, or other departments.

**Total Units for the Major ..... 64**

**Recommended.** A reading knowledge of a foreign language is highly recommended. Consult the major adviser for a complete list of recommended upper division courses.

**Course Equivalents.** The major advisers have a list of lower and upper division courses that can be substituted for courses suggested above.

**Major Advisers.** W.W. Lai, N. Janowitz, L. Hurst

**Minor Program Requirements:**

The following four minor program options and others responsive to students' needs are subject to approval by the major adviser or the Curriculum Committee. The four areas of emphasis are Religious Studies, Asian Religions, Judaism, and Christian Studies.

UNITS

**Religious Studies ..... 20**

- Lower division course ..... 4
- Upper division courses ..... 16
- Religious Studies 100 required.
- Some substitutions from other departments or programs allowed with consent of adviser.

**Preministerial Adviser.** L.D. Hurst

**Jewish Studies.** Students interested in Jewish studies should contact M. Hoffman of Religious Studies or D. Biale of History.

**Courses in Hebrew (HEB)**

**Lower Division Courses**

**1. Elementary Hebrew (5)**

Lecture/discussion—4 hours; laboratory—1 hour. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew. (Students who have successfully completed, with a C- or better, Hebrew 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I. (I.)

**2. Elementary Hebrew (5)**

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 1 or the equivalent. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew.—II. (II.)

**3. Elementary Hebrew (5)**

Lecture/discussion—4 hours; laboratory—1 hour. Prerequisite: course 2 or the equivalent. Speaking, listening comprehension, reading and writing fundamentals of modern Hebrew.—III. (III.)

**21. Intermediate Mod Hebrew I (5)**

Lecture/discussion—5 hours. Prerequisite: course 3 or consent of instructor. Development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Not open to students who have taken courses 100 or 100A.—I. (I.)

**22. Intermediate Modern Hebrew II (5)**

Lecture/discussion—5 hours. Prerequisite: course 21 or consent of instructor. Continued development and refinement of grammar, composition, and language

skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Not open to students who have taken course 101 or 100B.—II. (II.)

**23. Intermediate Modern Hebrew III (5)**

Lecture/discussion—5 hours. Prerequisite: course 22 or consent of instructor. Continued development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Further development of writing and translating skills. Not open to students who have taken course 100C or 102.—III. (III.)

**Upper Division Courses**

**100AN. Advanced Modern Hebrew I (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 23 or consent of instructor. Students who have taken course 100A as 2nd year Hebrew may take course 100AN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing.—I. (I.)

**100BN. Advanced Modern Hebrew II (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100AN or consent of instructor. Students who have taken course 100B as 2nd year Hebrew may take course 100BN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing.—II. (II.)

**100CN. Advanced Modern Hebrew III (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 100BN. Students who have taken course 100C as 2nd year Hebrew may take course 100CN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing.—III. (III.)

**Courses in Religious Studies (RST)**

**Lower Division Courses**

**1. Survey of Religion (4)**

Lecture—3 hours; discussion—1 hour. Basic concepts introduced through readings of the primary religious literature. Discussion of central ideas (creation, history, law, prophecy, suffering, mysticism, asceticism, karma, reincarnation, moksha, etc.); readings from the Bible, Bhagavad Gita, the Koran, selections from Plato and early Buddhist writings. GE credit: ArtHum, Div, Wrt.—II. (II.)

**2. Myth, Ritual, and Symbolism (4)**

Lecture—3 hours, discussion—1 hour. Myths, rituals and religious symbols found in a variety of religious traditions including examples from ancient and contemporary religious life. Variety of religious phenomena; validity of different approaches to the study of religion. GE credit: ArtHum, Div, Wrt.—I, III. (I, III.) Lai, Janowitz

**3A-C. Topics in Comparative Religion (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the methods used in comparative religion, focusing on a particular theme in a number of religious traditions: (A) The Experiential Dimension: Pilgrimage; (B) The Mythic Dimension: Death and the After-life; (C) The Ritual Dimension: Sacrifice. May be repeated for credit in a different subject area. GE credit: ArtHum, Div, Wrt.—I. (I.)

**3D. Topics in Comparative Religion (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the methods used in comparative religion, focusing on a particular theme in several religious traditions: (A) The Experiential Dimension: Pilgrimage; (B) The Mythic Dimension: Death and the After-life; (C) The Ritual Dimension: Sacrifice; (D) The Existential Dimension: Conversion. May be repeated for credit. Offered in alternate years. GE Credit: Div, ArtHum, Wri.—II. Tezcan

**21. Hebrew Scriptures (4)**

Lecture—3 hours; term paper. Selected texts from the Hebrew Scriptures (Genesis—II Chronicles) and review of modern scholarship on the texts from a variety of perspectives (historical, literary, sociologi-

cal, psychological). Course work is based on an English translation and no knowledge of Hebrew is required. GE credit: ArtHum, Div, Wrt.—I. (I.)

**23. Introduction to Judaism (4)**

Lecture/discussion—3 hours; term paper. Introduction to the study of religion using examples from the rituals, art and holy texts of Judaism. No prior knowledge of either Judaism or the study of religion is necessary. GE credit: ArtHum, Div, Wrt.—II. (II.)

**40. New Testament (4)**

Lecture—3 hours; discussion—1 hour. New Testament literature from critical, historical, and theological perspectives. GE credit: ArtHum, Wrt.—I. (I.) Hurst

**60. Introduction to Islam (4)**

Lecture/discussion—3 hours; extensive writing. Introduction to topics central to the Islamic tradition. Muhammad, the Qur'an, Islamic law, theology, philosophy, cosmology, worship, and mysticism. Race and gender in Islam, Islamic revival, and varying experiences of Islam in different historical and cultural settings. Offered in alternate years. GE credit: ArtHum, SocSci, Div, Wrt.—(I.) Tezcan

**65C. The Qur'an and Its Interpretation (4)**

Lecture/discussion—3 hours; extensive writing. The Qur'an, its history, its various functions in the lives of Muslims, and its different interpretations. Quranic themes such as God and humankind, nature and revelation, eschatology and Satan. Islam and other religions; women, gender, and sexuality. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.) Tezcan

**68. Hinduism (4)**

Lecture—3 hours; writing. Hindu tradition from ancient to modern times. Multiplicity of religious forms within Hinduism with mention of Jainism, Buddhism, and Sikhism and their relation to the mainstream of Hindu religion. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I.

**75. Introduction to Chinese Philosophy (4)**

Lecture/discussion—4 hours. Introduction to Chinese philosophy from classical pre-modern times; emphasis on basic concepts and their impact on social conduct; the Age of Philosophers, the Han synthesis, the medieval Buddhist contribution. Not offered every year.—Lai

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)

**99. Special Study for Lower Division Undergraduates (1-5)**

(P/NP grading only.)

**Upper Division Courses**

**100. Study of Religion: Issues and Methods (4)**

Lecture—3 hours; term paper. Principal issues and methods of Religious Studies and associated fields.—III. (III.)

**102. Christian Origins (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 40; course 23 recommended. Beginning of the Christian faith seen in relation to milieu in which it originated. Offered in alternate years.—(I.) Hurst

**110. Life, Meaning and Identity (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1 or 2 or upper division standing. Study of religious lives, the quest for meaning and for personal identity; how religions frame the problems of life; how cultural and personal crises affect youthful identity; the nature and structure of dreams, myths, and ideals. Offered in alternate years.—II. Lai

**115. Mysticism (4)**

Lecture—3 hours; term paper. Prerequisite: one lower division Religious Studies course (except 10, 98, or 99). Historical and descriptive analysis of selected key figures in mystical traditions and readings of representative mystical texts. Analytic term paper. Offered every three-four years. GE credit: ArtHum, Div, Wrt.—(III.)

**120. Religion, Magic and Science (4)**

Lecture—3 hours; extensive writing. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as Science and Technology Studies 120.) Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(I.) Coudert

**122. Studies in Biblical Texts (4)**

Lecture—3 hours; term paper. Prerequisite: course 21. Study of a book from the Prophets or writings from critical, historical, and religious perspectives. May be repeated once for credit in different subject area.—III. (III.) Janowitz

**124. Topics in Judaism (4)**

Lecture—3 hours; term paper. Prerequisite: course 23. Examination of selected aspects of Jewish life, religion, or literature. Potential topics include: Jewish Perspectives on Jesus; The Golem: History and Legend; Sexuality and Gender in Late Antique Judaism and Early Christianity. May be repeated for credit when topic differs.—II.

**125. Dead Sea Scrolls, Apocrypha, and Pseudepigrapha (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 21 or 40 or consent of instructor. Survey of the Dead Sea Scrolls, apocryphal and pseudepigraphical writings of Judaism and Christianity and their historical, social, and religious importance. GE credit: Wrt.—II. Janowitz

**130. Topics in Religious Studies (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: one from course 1, 2, 3A, 3B, or 3C or consent of instructor. Thematic study of a phenomenon in more than one religious tradition or of the relationship between religion and another cultural phenomenon. Topics may include archeology and the Bible, women and religion, religion and violence. May be repeated for credit when topic differs.—II, III.

**135. The Bible and Film (4)**

Lecture—2 hours; term paper; film-viewing—3 hours. Prerequisite: Humanities 10 recommended. Examination of the uses of the Judeo-Christian scriptures in film. Topics include dramatic depictions of biblical stories, the tension between science and religion, allegorical treatments of biblical themes, and the problems of religious conviction.—III. Hurst

**140. Christian Theology (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 40; course 102 recommended. Historical and systematic introduction to Christian doctrine, with attention to divergent traditions and the problem of orthodoxy and heresy.—I. (I.) Hurst

**141A. New Testament Literature: Synoptic Gospels (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Synoptic Tradition—Matthew, Mark, Luke and Acts. Offered every third year to alternate with 141B, 141C. GE credit: ArtHum, Wrt.—Hurst

**141B. New Testament Literature: John (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Johannine Tradition—the Gospel and letters of John. Offered every third year to alternate with 141A, 141C. GE credit: ArtHum, Wrt.—III. Hurst

**141C. New Testament Literature: Paul (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Pauline tradition—the letters of Paul. Offered every third year to alternate with 141A, 141B. GE credit: ArtHum, Wrt.—(II.) Hurst

**145. Contemporary American Religion (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 40 and History 17B recommended. Examination of several major movements and phenomena in twentieth-century American religion. Offered in alternate years.—II.

**150. Religious Ethics (4)**

Lecture/discussion—4 hours. Prerequisite: course 4. Study of the religious bases to ethics through concentration on the ethical tracts of one major tradition, or through a comparison of the attitudes of two or more traditions to a common ethical issue. Offered every three years.—(II.) Lai

**160. Introduction to Islamic Thought (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 60 recommended. The development of Islamic thought from the first centuries of Islam to the eighteenth century. Theology, philosophy, ethics, Sufism, historiography, political theory, fundamentalism, al-Farabi, al-Ghazzali, Ibn Rushd, Tusi, Ibn al-Arabi, Rumi, Molla Sadra, Ibn Khaldun, Ibn Abd al-Wahhab. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—II. Tezcan

**162. Introduction to Islamic Law (4)**

Lecture—3 hours; extensive writing. Prerequisite: course 60 recommended. The development of Islamic law in the formative centuries of Islam, ca. 600-1000, as well as its adaptation to changing economic, social, and political conditions in subsequent periods. Legal schools, legal theory, the Shari'a, reformist movements, human rights. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt.—II. Tezcan

**165. Islam in Asia (4)**

Lecture/discussion—3 hours; extensive writing. Islam as a lived religion in the Indian sub-continent, Central Asia, China, and Southeast Asia. Emphasis is on primary sources studied comparatively and historically. GE credit: ArtHum, Div, Wrt.—III.

**170. Buddhism (4)**

Lecture—3 hours; term paper. Buddhism in its pan-Asian manifestations, from its beginning in India to its development in Sri Lanka and Southeast Asia, Central Asia, China and Japan; teachings and practices, socio-political and cultural impact. Offered in alternate years.—III. Lai

**172. Ch'an (Zen) Buddhism (4)**

Lecture/discussion—3 hours; term paper. Doctrines and methods of the Ch'an Buddhism, both ancient and modern. Review of ritual techniques, including meditation.—II. Lai

**189. Senior Colloquium (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor. Primarily for seniors in Religious Studies. Discussion in depth of a problem in religion which requires the methods of several disciplines and is important in the encounter between religions.—II. (II.)

**190. Seminar (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor; required of all Religious Studies majors. Allows majors to integrate their disciplined study of the field. Emphasis on current scholarly debate about the methods for analyzing and comparing diverse religious traditions.—(I.)

**194HA-194HB. Special Study for Honors Students (1-5)**

Independent study. Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Course****201. Religion and the Body (4)**

Seminar—3 hours; term paper. Prerequisite: graduate student standing. Some institutionalized religions view the body as the source of sin, requiring repression to save the soul. Yet, other traditions also exist,

in which the body is viewed positively. This course investigates cultural factors which account for this difference. Offered in alternate years. (III.) Coudert

## Russian

(College of Letters and Science)

Winder McConnell, Ph.D., Program Director

**Program Office.** 622 Sproul Hall  
(530) 752-4999; <http://russian.ucdavis.edu>

**Committee in Charge**

Yuri Druzhnikov, Ph.D. (*Russian*)  
Winder McConnell, Ph.D. (*German and Russian*)  
Olga Stuchebukhova, Ph.D. (*Russian*)

**Faculty**

Yuri Druzhnikov, Ph.D., Professor  
Olga Stuchebukhova, Ph.D., Assistant Professor

**Emeriti Faculty**

James Gallant, Ph.D., Lecturer Emeritus  
Daniel Rancour-Laferriere, Ph.D., Professor Emeritus  
Valerie A. Tumins, Ph.D., Professor Emerita

**Affiliated Faculty**

Fred Choate, Ph.D., Lecturer

**The Major Program**

The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.

**The Program.** The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions.

**Internships and Career Alternatives.** Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

**A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter.....4-31**

Russian 1 through 6; or the equivalent .....0-27  
Russian 41 or 42 ..... 4

**Depth Subject Matter ..... 40**

Russian 101A, 101B, 101C ..... 12  
Russian 102 or 103 or 104 or 105 ..... 4  
Russian 150 ..... 4  
Additional upper division units chosen in consultation with adviser ..... 20

**Total Units for the Major ..... 44-71**

**Major Adviser.** Contact Program office.

**Minor Program Requirements:**

UNITS

**Russian ..... 20**

Russian 101A, 101B, 101C ..... 12  
Other upper division Russian courses ..... 8

**Honors and Honors Program.** The honors program comprises at least one quarter of study under course 194H, which will include a research paper. See also the University and College requirements.

**Study Abroad.** Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and year-long programs sponsored by CIEE and ACTR in St. Petersburg and Moscow.

**Teaching Credential Subject Representative.** Staff; see the Teaching Credential/M.A. Program on page 102.

**Prerequisite credit.** Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

## Courses in Russian (RUS)

### Lower Division Courses

Course Placement. Students who have learned Russian at home must consult the department for placement instructions. Students with two years of Russian in high school normally continue in Russian 2; those with three years, Russian 3; those with four years, Russian 4.

#### 1. Elementary Russian (5)

Discussion—5 hours; laboratory—1 hour. Introduction to Russian grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Russian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.)—I. (I.)

#### 2. Elementary Russian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 1. Continuation of grammar and language skills developed in course 1.—II. (II.)

#### 3. Elementary Russian (5)

Discussion—5 hours; laboratory—1 hour. Prerequisite: course 2. Continuation of grammar and language skills developed in course 2.—III. (III.)

#### 4. Intermediate Russian (4)

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 3. Grammar review and conversational practice.—I. (I.)

#### 5. Intermediate Russian (4)

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 4. Grammar review. Introduction to literature. Conversational practice.—II. (II.)

#### 6. Intermediate Russian (4)

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 5. Grammar review. Intermediate conversation and continued reading of literature.—III. (III.)

#### 10. Elementary Conversation (2)

Discussion—2 hours. Prerequisite: course 1; course 2 or 3 (concurrently). Conversational practice to improve pronunciation and master spoken idioms. May be repeated for credit up to a maximum of 6 units.—II, III. (II, III.)

#### 15. Russia Today and Tomorrow (4)

Lecture/discussion—4 hours. Examination of basic issues that pertain to the former totalitarian superpower which is in transition to democracy, the conflicts in Russia, its civilization and intellectual history up to including the present day and its tendencies for the future. GE credit: ArtHum, Div.—III. Druzhnikov

#### 41. Survey of Nineteenth-Century Russian Literature (in English) (4)

Lecture—3 hours. Introduction to dominant literary trends, major literary figures and landmarks of Russian prose and poetry from the period of Sentimentalism through Romanticism and Realism to the beginnings of Modernism. Offered in alternate years. GE credit: ArtHum, Wrt.—II.

#### 42. Survey of Twentieth-Century Russian Literature (in English) (4)

Lecture—3 hours. Introduction to major literary trends such as Symbolism, Acmeism, Futurism, Neorealism, and Socialist Realism. Readings from repre-

sentative writers such as Gorky, Bely, Pasternak, Solzhenitsyn, and Tertz. Offered in alternate years. GE credit: ArtHum, Wrt.—(II.)

#### 44. Children's Literature in Russia (4)

Lecture—3 hours; term paper. Knowledge of Russian not required. History and theory of children's literature, with special reference to Russian and Soviet examples. Analysis of genres, technique, and folklore elements, contrasted with those of the West. Students will write their own literature for children. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—Druzhnikov

#### 45. Russian Fantasy and Science Fiction (4)

Lecture/discussion—3 hours; extensive writing. Genres of fantasy and science fiction in Russian literature from pre-revolutionary to post-Soviet times. Topics include the role of science and the supernatural in literature, history and types of science fiction. GE credit: ArtHum, Div, Wrt.—III. (III.) Stuchebukhov

#### 98. Directed Group Study (1-5)

Discussion—1-5 hours. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division Courses

#### 101A. Advanced Russian (4)

Lecture—2 hours; discussion—1 hour; recitation—1 hour. Prerequisite: course 6. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversation exercises utilizing literary and colloquial variants of current Russian speech.—I.

#### 101B. Advanced Russian (4)

Lecture—2 hours; discussion—1 hour; recitation—1 hour. Prerequisite: course 101A. Continuation of course 101A. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech.—II.

#### 101C. Advanced Russian (4)

Lecture—2 hours; discussion—1 hour; recitation—1 hour. Prerequisite: course 101B. Continuation of course 101B. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech.—III.

#### 102. Russian Composition (4)

Lecture/discussion—3 hours; tutorial—1 hour. Prerequisite: course 6 or consent of instructor. Practice in writing Russian. One composition on a different topic each week. Topics include history, geography, politics, and literature of Russia; comparison of Russian and American lifestyles; current events. Conducted in Russian. Offered in alternate years. GE credit: ArtHum.—II. Druzhnikov

#### 103. Literary Translation (4)

Discussion—3 hours. Prerequisite: course 101C. Translation of Russian literary texts into stylistically equivalent idiomatic English. Offered in alternate years.—(III.)

#### 104. Scientific Translation (4)

Discussion—3 hours; individual translation projects—1 hour. Prerequisite: course 101A. Techniques of translating Russian scientific texts. Science students will select articles from their fields of interest; Russian students will work on materials assigned by instructor. Offered in alternate years.

#### 105. Advanced Russian Conversation (4)

Conversation—3 hours; preparation of texts—1 hour. Prerequisite: course 6. Intensive conversational practice and discussion based on current events and contemporary texts. Offered in alternate years.—I. Druzhnikov

#### 121. Nineteenth-Century Russian Prose (in English) (4)

Lecture—3 hours; term paper. Development of prose from Pushkin and Gogol, through Dostoevsky and Tolstoy, to Maxim Gorky. Other writers are selected sequentially: Turgenev, Goncharov, Pisemsky,

Saltykov, Chekhov. Romanticism, the Natural School, critical realism, and psychological realism are covered. Offered in alternate years. GE credit: ArtHum.—(I.) Druzhnikov

#### 123. Twentieth-Century Russian Prose (in English) (4)

Lecture—3 hours; term paper. Examination of various trends including Acmeism, Symbolism, Neorealism, and Socialist Realism in development of prose. Readings from such writers as Gorky, Zamiatin, Sholokhov, Pasternak, and Solzhenitsyn. Offered in alternate years. GE credit: ArtHum, Wrt.—Druzhnikov

#### 126. The Russian Theater (in English) (4)

Lecture—3 hours; discussion—1 hour. The main works of Russian dramatists from Gogol to the present, including Turgenev, Tolstoy, Chekhov, Gorky, Mayakovsky, Bulgakov, Shvarts. Offered in alternate years. GE credit: ArtHum, Wrt.

#### 127. Nineteenth-Century Russian Poetry (4)

Discussion—3 hours; term paper. Prerequisite: course 6. Introduction to the principles of Russian versification followed by historical and poetic analysis of the following figures: Derzhavin, Zhukovsky, Pushkin, Delvig, Baratynsky, Lermontov, Nekrasov, Tjutchev, and Fet. Conducted in Russian. Offered in alternate years. GE credit: ArtHum.

#### 128. Twentieth-Century Russian Poetry (4)

Discussion—3 hours; term paper. Prerequisite: course 6. Introduction to principles of Russian versification followed by historical and poetic analysis of the following figures: Brjusov, Blok, Akhmatova, Mandelstam, Esenin, Mayakovsky, Khlebnikov, Pasternak, Evtushenko, Voznesensky, and Brodsky. Conducted in Russian. Offered in alternate years. GE credit: ArtHum.—III. Druzhnikov

#### 129. Russian Film (4)

Lecture/discussion—3 hours; term paper; film viewing—3 hours. Prerequisite: completion of Subject A requirement. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet empire; gender and the nation in Russian film. In English; films with English subtitles. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II.

#### 130. Contemporary Russian Culture (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Current trends in Russian culture and the relationship between artists and the government. Topics include history of censorship, official and dissident art, recent changes in the cultural scene. Knowledge of Russian not required. Offered in alternate years. GE credit: ArtHum, Wrt.—(III.)

#### 131. Literature of Revolution (4)

Lecture—3 hours; essays. Prerequisite: History 3 or 4C, and/or any introductory literature course. Study of impact of revolution on society and culture; the major artistic, political and historical works surrounding the Russian revolutions of 1905 and 1917. Offered in alternate years. GE credit: ArtHum, Wrt.

#### 132. Nature and Culture in Russia (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: any introductory course in environmental studies. History of the environmental movement in Russia from the 1920's to the present, showing the influence of Stalinism on environmental ethics; concepts of society and nature in Russian literature and film; international implications of Russian environmental policy. Knowledge of Russian is not required. GE credit: ArtHum, Wrt.—(I.)

#### 138. Pushkin's Eugene Onegin (4)

Lecture/Discussion—3 hours; term paper. Prerequisite: course 101C, or consent of instructor. Detailed analyses of Pushkin's novel Eugene Onegin; its style, syntax, and links to Russian History and culture. GE Credit: ArtHum, Div, Wrt.—II. Druzhnikov

#### 139. Pushkin (in English) (4)

Lecture/discussion—3 hours; term paper. The life and works of Pushkin, the most prominent poet of Russia. Evaluations of Pushkin by both Russian and Western scholars. Images of Pushkin and the official

myths that surround him. No knowledge of Russian required. GE credit: ArtHum, Div, Wrt.—(I.) Druzhnikov

#### 140. Dostoevsky (in English) (4)

Lecture—3 hours. Reading and analysis of Dostoevsky's principal works such as *Crime and Punishment*, *The Idiot*, *The Brothers Karamazov*, and *The Diary*. Study of social and political views as reflected in Dostoevsky's works. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.)

#### 141. Tolstoy (in English) (4)

Lecture—3 hours. Study of Leo Tolstoy's literary evolution and moral quest. Readings include his *Confession*, a major novel such as *War and Peace* or *Anna Karenina*, and representative shorter fiction. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—I.

#### 142. Women's Autobiography (in English) (4)

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: any introductory course in literature. An examination of Russian women's autobiography from the 18th through the 20th centuries, emphasizing the way in which the genre of autobiography serves as a means of the writer's creation of herself, as opposed to her definition by others. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

#### 143. Alexander Solzhenitsyn (4)

Lecture/discussion—3 hours; term paper. Prerequisite: any introductory literature course or consent of instructor. Examination of the literary and political writings of the major Russian dissident in the biographical context in which they were created. Knowledge of Russian not required. GE credit: ArtHum, Div, Wrt.—(II.)

#### 144. Christ and Literature (4)

Lecture—3 hours; term paper. Consideration of the intersection of literature, culture, and (at times heretical/blasphemous) theology in Russia and elsewhere. Analysis of texts; discussion of historical contexts and related philosophical approaches to the New Testament. GE credit: ArtHum, Div, Wrt.—III. (III.)

#### 150. Russian Culture (4)

Discussion—3 hours; term paper. Knowledge of Russian not required. Study of Russian culture in nineteenth and twentieth centuries. Brief introduction of the beginnings up to nineteenth century. Russian art, music, philosophy, church, traditions, and daily life. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. (II.)

#### 151. Writers and Censorship in Russia and the Soviet Union (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: any introductory literature course or consent of instructor. Literature and censorship in Russia. Personal responsibility of the author vs. conformism to state morality. Russian myths and Russian realities. GE credit: ArtHum, Wrt.—I. Druzhnikov

#### 154. Russian Folklore (4)

Lecture—3 hours; term paper. Knowledge of Russian not required. Russian folklore, rituals, and history will be analyzed and compared with folklore of other peoples. Sociological implications of attitudes toward family unit, children, etc. Influences of folklore on Russian literature and historiography. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—II. (II.)

#### 159. Yiddish Literature in Translation (4)

Lecture/discussion—3 hours; term paper. Major writers of Yiddish in English translation; major genres of Yiddish literature from the mid-19th century to the present. GE credit: ArtHum, Div.—III.

#### 166. Representations of Sexuality in Russian Literature (4)

Lecture—3 hours; term paper. Prerequisite: Women's Studies 50 or introductory psychology. Sexuality in Russian oral and written literature from a dual, feminist-psychoanalytic perspective. Monogamy, free love, sexism, homosexuality, incest, androgyny, and others as depicted by such writers as Pushkin, Gogol, Tolstoy, Dostoevsky, Akhmatova, Blok, Tolstaya, and others. GE credit: ArtHum, Div, Wrt.

#### 192. Research Essay (2)

Prerequisite: a Russian literature course (may be taken concurrently). A research essay, based on primary and secondary sources, dealing in depth with a topic arising from or related to the prerequisite literature course. May be repeated for credit.

#### 194H. Special Study for Honors Students (4)

Independent study—4 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Russian studies.

#### 195H. Honors Thesis (4)

Independent study—4 hours. Prerequisite: course 194H. Writing an honors thesis, under the direction of a faculty member, on a topic in Russian studies.

#### 198. Directed Group Study (1-5)

(P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

(*Food Science and Technology*)

**The Program.** Science and Society is an interdepartmental teaching program administered by the College of Agricultural and Environmental Sciences that offers students throughout the campus the opportunity to discover the connections that link the social,

biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.

The Science and Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Science and Society courses, upper division courses from both the College of Agricultural and Environmental Sciences and the College of Letters and Science in the areas of history and philosophy of science, policy and decision making, communication of science, and culture, ethics and applications.

#### Minor Program Requirements:

UNITS

#### Science and Society ..... 22-27

Science and Society 1 ..... 4

Science and Society 2, 5, 15, 20, 30, 90A,

90B, 90C or 90X ..... 2-4

One course from each of the four following areas:

*History and Philosophy of Science:*

Community and Regional Development

118, 162, History 185A, 185B, History

and Philosophy of Science 150, Nature

and Culture 100, Philosophy 107, 108, or

109 ..... 4

*Policy and Decision Making:* Agricultural

and Resource Economics 120, 147, 150,

Consumer Science 100, Environmental

Science and Policy 160, 165, Political

Science 175, Sociology 155, or

181 ..... 3-4

*Communication of Science:* Agricultural

Education 172, Agricultural Management

and Rangeland Resources 122,

Anthropology 120, Communication 115,

130, 135, 138, 140, Community and

Regional Development 174, Linguistics

163, Political Science 165 ..... 3-4

*Culture, Ethics and Applications:*

Agricultural Management and Rangeland

Resources 101, Community and Regional

Development 142, Environmental Science

and Policy 126, 164, Fiber and Polymer

Science 110, International Agricultural

Development 104, Plant Biology 151, Plant

Pathology 140, or Sociology 144 ..... 3-4

Science and Society 120 ..... 3

#### Minor Adviser. D. M. Rizzo

**Related Courses.** See Agricultural and Resource Economics 120, 147, Agricultural Management and Rangeland Resources 1, 101, 122, Communication 115, 140, Community and Regional Development 118, 142, 162, 174, Avian Sciences 13, Environmental Science and Policy 126, 160, 164, 165, Fiber and Polymer Science 110, History 185A, 185B, History and Philosophy of Science 150, Nature and Culture 100, Plant Biology 12, Plant Pathology 140, Political Science 175, Wildlife, Fish, and Conservation Biology 10.

#### Courses in Science and Society (SAS)

##### Lower Division Courses

#### 1. Critical Inquiry into Contemporary Issues (4)

Lecture/discussion—3 hours; discussion—1 hour. Contemporary issues, including global population trends, economic and environmental changes, cultural diversity and biodiversity, nutrition and food safety, fiber and textiles, changing consumer cultures. Inquiry processes emphasize ethics, multiple disciplines, and multiple perspectives. GE credit: Sci-Eng or SocSci, Div, Wrt.—I. (I.) Winter

**2. Feeding the Planet: Influences on the Global Food Supply (3)**

Lecture/discussion—3 hours. Scientific principles and dynamic interactions involved in food production, food processing, nutrition, shelf life and marketing from differing viewpoints. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. GE credit: SciEng or SocSci, Wrt.—II. (II.) Bruening, Bostock, Davis

**3. Science, Technology and Society (4)**

Lecture—4 hours. Impact of developments in science and technology on the individual in society and how economics, politics, culture and values affect technological development. Not open for credit to students who have completed former course Applied Behavioral Sciences 18. GE credit: SciEng or SocSci, Wrt.—(III.)

**4. Water in Popular Culture (3)**

Film viewing—2 hours; discussion—1 hour. Importance of water in many aspects of society as revealed through a survey of its depictions in film. GE credit: SciEng, SocSci, Wrt.—I. (I.) Pasternack

**5. Pathways to Discovery: Science and Society (3)**

Lecture/discussion—3 hours. Highlights a current issue and/or controversy found in contemporary society and looks at how this problem impacts and is affected by the physical, social and biological sciences. Course varies with topic offered. May be repeated twice for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt.

**7. Terrorism and War (4)**

Lecture—3 hours; discussion—1 hour; term paper. Exploration of terrorism and war from science and social sciences perspectives. Terrorist cells and groups; biological, chemical, nuclear, and environmental terrorism; intelligence gathering and espionage; military strategy; genocide; epochal wars; clash of civilizations; nation building; and future global scenarios. GE credit: SciEng or SocSci, Wrt.—II. (II.) Carey

**8. Water Quality at Risk (3)**

Lecture—2 hours; discussion—1 hour. Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination. GE credit: SciEng, SocSci, Wrt. (Same course as Environmental and Resource Sciences 8.)—II. (II.) Hernes

**10. Water and Power and Society (3)**

Lecture—2 hours; discussion—1 hour. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as Hydrologic Science 10.) GE credit: SciEng, SocSci, Wrt.—III. (III.) Fogg

**15. AIDS and Society (4)**

Lecture—3 hours; discussion—1 hour. Biology of HIV transmission and AIDS and how a biological agent acts on and influences the structure of contemporary society. Includes the psychology of risk and stigma, gender issues, changes in social relationships and public policy, global implications. GE credit: SciEng or SocSci, Div, Wrt.—III. (III.) Radke

**20. Genetics and Society (4)**

Lecture—3 hours; discussion—1 hour. Not open for credit to students who have completed course 140. Basic concepts of genetics, modern methods of biotechnology, the process of scientific discovery and the public perception of the process; present and future impact of genetics on society. GE credit: SciEng or SocSci, Wrt.—I, II. (I, II.) Cook, Epstein, Ronald

**25. Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (3)**

Lecture—2 hours; discussion—1 hour. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty. GE Credit: Div, SciEng, SocSci, Wrt.—II. (II.) Bloom

**30. Mushrooms, Molds, and Society (3)**

Lecture/discussion—3 hours. Fungi as organisms with which humans interact daily, societal issues arising from these interactions. Fungi in medicine, religion, agriculture, and industry, as well as cultural perceptions of fungi. GE credit: SciEng or SocSci, Wrt.—I, II. (I, II.) Gordon, Rizzo

**90A. Issues in Environmental and Resource Sciences (2)**

Seminar—2 hours; two Saturday field trips. Prerequisite: limited to lower division students. Discussion of historical and current issues in environmental and resource sciences. Lectures, reading and field trips will provide background for selected topics.—I, II. (I, II.) Stasulat

**90B. Observing and Writing in Biology (2)**

Seminar—1 hour; laboratory—1 hour; term paper. Students will observe the interactions between microscopic organisms, conduct simple laboratory experiments, describe and analyze observations and discuss scientific observations and writing.—Jaffee

**90C. Herbal Medicine: Relevance for the 21st Century (2)**

Seminar—2 hours. Medicinal usage of plants from biological, historical, and cultural perspectives. Broad contexts of holistic and scientific paradigms for understanding herbal medicine. Saturday field trip to teach herb identification.—II. (II.)

**90D. Saving Endangered Plant Species: Problems and Prospects (2)**

Seminar—2 hours. Endangered plant species illustrate the value of conservation biology. Topics include societal issues and plant germplasm conservation, comparisons to animal conservation issues, and the economics of and justification for preserving endangered plants.—I. (I.) Parfitt

**90E. Biotechnology—a New Era, a New Struggle (2)**

Seminar—2 hours. Animal biotechnology and its applications. Discussion topics include potential societal impacts of various technologies, factors shaping public opinion, and ethical and moral questions arising from new biotechnology applications.—I. (I.) Murray

**90F. Food Distribution in a Hungry World (2)**

Seminar—2 hours. The biological, technological, environmental, and socioeconomic factors related to food distribution systems at local, regional, national, and international levels. The potential for increasing world food supply by reducing losses between harvest and consumption.—I. (I.) Kader

**90G. Science, Society and the Environment (2)**

Seminar—2 hours. Contemporary environmental issues, scientific approaches to addressing these issues, and accompanying societal and ethical considerations.—I. (I.) Wilson

**90X. Lower Division Seminar (1-4)**

Seminar—1-4 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Science and Society through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May be repeated for credit. Limited enrollment.—I, II, III. (I, II, III.)

**91A. Explorations in Science and Society: Cultures and Identities (2)**

Seminar—1 hour; extensive writing or discussion—1 hour. Prerequisite: participation in the summer Special Transitional Enrichment Program (STEP) or consent of instructor; course 1 concurrently. Exploration

of linkages among identity and culture, multi-disciplinary inquiry, and agricultural and environmental science issues.—I. (I.) MacDonald

**91B. Explorations in Science and Society: Leadership and Collaboration (2)**

Seminar—1 hour; extensive writing or discussion—1 hour. Prerequisite: course 91A or consent of instructor. Extends understanding of culture and identity to issues of leadership, collaboration, and social action in science and society. Includes a mandatory two and half day retreat.—II. (II.)

**91C. Explorations in Science and Society: Engagement (2)**

Seminar—1 hour; internship—3 hours. Prerequisite: course 91B or consent of instructor. Explorations of the concept of engagement in science and society from philosophical and practical perspectives. Exploration of the concept of engagement based on lectures, self reflection, discussions and three hours of K-12 school internships per week.—III. (III.)

**92. Internship in Science and Society (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship on and off campus, in the community, or in institutional settings. (P/NP grading only.)

**97T. Tutoring in Science and Society (2-3)**

Discussion/lecture—6-9 hours. Prerequisite: lower division standing; completion of course being tutored; consent of instructor. Tutoring in undergraduate Science and Society courses. Assisting with leading discussion groups under supervision of instructor(s) and teaching assistants. Acting as liaison between the students and course instructor(s) to foster effective communication and interaction. May not be repeated. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Discussion—3-15 hours. Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

**Upper Division Courses****105. Organismal Interactions in Everyday Life (3)**

Lecture—2 hours; discussion/laboratory—1 hour. Prerequisite: Biological Sciences 10 or 1A. Ecology and evolution of organismal interactions and the importance of these interactions to human health and welfare and a sustainable environment. Students will debate environmental issues on scientific, political, and ethical grounds. GE credit: SciEng, Wrt.

**120. Science and Contemporary Societal Issues (3)**

Lecture/discussion—3 hours. Prerequisite: upper division standing. Study of a contemporary societal issue/problem emphasizing critical thinking with information drawn from several disciplines. Multiple instructors illustrate the necessity of an interdisciplinary and cooperative approach in solving important issues. Topic will vary. May be repeated once for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt.—III. (III.)

**130. Contemporary Leadership (4)**

Lecture—3 hours; seminar—1 hour. Prerequisite: consent of instructor. Leadership, including issues, skills, and practices as they relate to individuals, organizations, diverse social settings and communities. Written and verbal communications, personality styles for collaborative work, and ethics. Limited enrollment.—II, III. (II, III.) Lippin

**140. Genetics and Social Issues (4)**

Lecture/discussion—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C. Social issues arising from the development and use of modern methods of biotechnology. Presentation, evaluation, and critical discussions of the present and future impact of genetics on society. Not open for credit to students who have completed course 20. GE credit: SocSci, Wrt.—II. (II.) Epstein

**190X. Science & Society Seminar (1-4)**

Seminar—1-4 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Science and Society. Emphasis upon student participation in learning. Emphasis upon student participation in learning. May be repeated for credit. Limited enrollment. (P/NP grading only.)—I, II, III. (I, II, III.)

**192. Internship in Science and Society (1-12)**

Internship—3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship on or off campus, in the community, or in institutional settings. (P/NP grading only.)

**197T. Tutoring in Science and Society (1-5)**

Tutoring—3-15 hours. Prerequisite: upper division standing; completion of course being tutored or the equivalent. Tutoring of students in Science and Society courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another Science and Society course. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study in Science and Society (1-5)**

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

**Graduate Courses****298. Group Study (1-5)**

Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only.)

**299. Graduate Research (1-12)**

Prerequisite: graduate student and consent of instructor. May be repeated for credit. (S/U grading only.)

**Professional Course****390. Teaching Methods in Science and Society (1)**

Discussion—1 hour. Prerequisite: graduate level and consent of instructor. Practical experience in methods and problems related to teaching Science and Society courses. Discussion of critical pedagogies specific to teaching of science-societal issues, preparing for and conducting discussion sessions, analyses of texts and supporting material, formulation of assignments, exams. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Science and Technology Studies

(College of Letters and Science)

Joseph Dumit, Ph. D., Program Director

**Program Office.** 1241 Social Sciences and Humanities Building  
(530) 752-9621; <http://sts.ucdavis.edu>

**Committee in Charge**

Thomas Beamish, Ph.D. (Sociology)

Joan Cadden, Ph.D. (History)

Marisol de la Cadena, Ph.D. (Anthropology)

Patrick Carroll, Ph.D. (Sociology)

Joseph Dumit, Ph.D.

(Anthropology, Science and Technology Studies)

James Griesemer, Ph.D. (Philosophy)

Catherine J. Kudlick, Ph.D. (History)

Colin Milburn, Ph.D. (English)

Benjamin S. Orlove, Ph.D.

(Environmental Science and Policy)

Carolyn de la Pena, Ph.D. (American Studies)

**The Major Program**

The Science and Technology Studies (STS) major is designed to facilitate the analysis and synthesis of science, technology, and medicine in a way that actively creates connections between the varieties of

perspectives and concerns in the humanities and the sciences. The STS major takes science, technology, medicine, and their social, political, economic, and cultural contexts as its objects of study. As such, the STS major draws on the research programs of faculty in a wide range of departments, including American Studies, Anthropology, Economics, Environmental Science and Policy, History, Philosophy, Political Science, Science and Technology Studies, and Sociology. Students in STS pursue a broader understanding of science than is available within traditional science majors and is also suitable for students in the social sciences interested in interpreting science, technology and medicine as part of society and culture.

**The Program.** Graduation with a degree in Science and Technology Studies requires completion of introductory courses in the social sciences and humanities, in the natural sciences, and introductory, laboratory and seminar courses in STS. Upper division work includes twelve units from each of two different, complementing areas of concentration ("modules") and twelve units (plus prerequisites) providing depth, concentration and field work opportunities in the sciences. The modules are: I. Cultural Studies of Science and Technology; II. Ethics, Values, and Science Policy; III. History and Philosophy of Science; IV. Medicine, Society, and Culture. Courses in the modules require careful selection to make the best use of the STS major. Prerequisites for courses in the sciences can be extensive and require substantial advance planning for timely completion. Students are encouraged to take advantage of faculty and staff advising to plan their course of study.

**Career Alternatives.** The STS major will create an opportunity to analyze science and allied practices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that must address the broader social, cultural and political ramifications of science, technology and medicine such as law, journalism, public policy, economics, government, and science education. Careers that students of STS from many universities nationwide have pursued, in addition to academic careers in STS, include employment in: systems engineering, Web site design, science museums, non-profit health organizations, government service, libraries, law, medicine, veterinary medicine, dentistry, nursing, teaching, public health administration, media companies, management consultant practice, and the Peace Corps.

**A.B. Major Requirements**

	UNITS
<b>Preparatory Subject Matter</b> .....	<b>16</b>
Science and Technology Studies 1 .....	4
Science and Technology Studies 20 .....	4
Eight units selected from American Studies 1A; Environmental Studies 1; Nature and Culture 1; Philosophy 30, 31, 32; Science and Society 1, 2, 3, 5 .....	8
<b>Depth Subject Matter</b> .....	<b>44-46</b>
Twelve units each from two of the following four modules: .....	24
(I) <i>Cultural Studies of Science and Technology</i> : Community and Regional Development 118, 162; History 139A, 139B; Nature and Culture 100, 180; Science and Technology Studies 130A, 131, 150; Sociology 176 .....	12
(II) <i>Ethics, Values, and Science Policy</i> : Agricultural and Resource Economics 120, 147; Environmental Science and Policy 165; History 185B; Nature and Culture 120; Philosophy 115, 116; Physics 137, 160; Plant Pathology 140; Political Science 171, 175; Veterinary Medicine 170 ...	12
(III) <i>History and Philosophy of Science</i> : History 135A, 135B, 136, 185A, 185B; Philosophy 104, 108, 109; Science and Technology Studies 130A, 130B, 131 .....	12
(IV) <i>Medicine, Society, and Culture</i> : Epidemiology and Preventive Medicine	12

101, 160; History 139A, 139B; Psychology 160; Sociology 154 .....

**Total Units for the Major** ..... **60-82**

Approved Science Electives. Courses may be drawn from any of the following approved subject areas:

Aeronautical Science and Engineering; Animal Genetics; Animal Science; Anthropology; Applied Behavioral Sciences; Applied Biological Systems Technology; Atmospheric Science; Avian Sciences; Biological Chemistry; Biological Sciences; Cell Biology and Human Anatomy; Chemistry; Engineering; Engineering: Applied Science; Engineering: Biological Systems; Engineering: Chemical; Engineering: Civil and Environmental; Engineering: Computer Science; Engineering: Electrical and Computer; Engineering: Mechanical; Entomology; Environmental and Resource Sciences; Environmental Horticulture; Environmental Science and Policy; Environmental Toxicology; Evolution and Ecology; Exercise Science; Fiber and Polymer Science; Food Science and Technology; Geology; Hydrologic Science; Material Science and Engineering; Medical Microbiology; Medical Pharmacology and Toxicology; Microbiology; Molecular and Cellular Biology; Nematology; Neurobiology, Physiology, and Behavior; Nutrition; Pathology, Microbiology, and Immunology; Physics; Plant Biology; Plant Pathology; Population Health and Reproduction; Psychology; Soil Science; Wildlife, Fish, and Conservation Biology.

**Major Adviser.** J. Dumit

**Courses in Science and Technology Studies (STS)****Lower Division Courses****1. Introduction to Science, Technology and Medicine Studies (4)**

Lecture—3 hours; discussion—1 hour. History, philosophy, sociology, politics, and cultural studies of science, technology, and medicine. Emphasis on a broad range of perspectives. GE credit: SciEng or SocSci.—Carroll

**20. Methods in Science, Technology and Medicine Studies (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 recommended. Methodological issues concerning the historical, philosophical, sociological, ethical, and political analysis of science, technology, and medicine. Detailed case studies to illustrate different methods of analysis. GE credit: SciEng or SocSci, Wrt.—Carroll

**32. Drugs, Science and Culture (4)**

Lecture—3 hours; discussion—1 hour. Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine. (Same course as Anthropology 32)—III. (III.) Dumit

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

## Upper Division Courses

### 120. Religion, Magic and Science (4)

Lecture—3 hours; extensive writing. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as Religious Studies 120.) Offered in alternate years. GE credit: ArtHum, Div, Wrt.—Coudert

### 130A. From Natural History to the History of Nature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: History 135A recommended. Evolution and demise of natural history as a discipline from Aristotle to Linnaeus. Considers ancient views of nature and its Renaissance rediscovery; the emergence of biology, botany, geology, and zoology; the history of taxonomy and classification. GE credit: ArtHum or SciEng, Wrt.

### 130B. History of Modern Biology (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 130A recommended. Development of modern biology from pre-Darwinian roots to the present. Considers emergence of modern biological specialties and consolidation of biological theory around evolutionary ideas. History of allied fields such as genetics, paleontology, embryology, ecology, systematics and molecular biology. GE credit: ArtHum or SciEng, Wrt.

### 131. Darwin (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Students will explore the life and times of Charles Darwin and will trace the development of evolutionary thinking before and after the *Origin of Species* to appreciate its place in Victorian society and in the corpus of Darwin's thought. GE credit: ArtHum or SciEng, Wrt.—Griesemer

### 150. Gender and Science (4)

Lecture/discussion—3 hours; term paper. An interdisciplinary approach to the relations between gender and science. Topics include the biological and cultural construction of sexual difference, the role of women as practitioners of science, and feminist approaches to science. GE credit: SocSci, Div, Wrt.

### 161. Time: Mechanism and Measurement (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 1. Cultural concepts of time; units and instruments of time measurement; historical differences in the social organization of time; and time measurement in twentieth-century science. GE credit: SocSci, Wrt.

### 163. History of Communication Technologies (4)

Lecture/discussion—3 hours; term paper. History of communication technologies from the late Middle Ages to the 20th century. Questions of technology, knowledge, power and culture. Particular attention to questions about information and truth. Offered in alternate years. GE credit: SocSci.

### 165. Built Environments (4)

Lecture—3 hours; extensive writing. Built environments, which are designed to support forms of life. Their role as carriers of cultural memory and in turning knowledge of nature into social assets. Historical constellations of knowledge, social order, and power. Offered in alternate years. GE credit: SocSci, Wrt.

### 176. Sociology of Knowledge, Science, and Scientific Knowledge (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing preferred. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as Sociology 176.)—Carroll

### 180. Topics in History and Philosophy of Science (4)

Seminar—3 hours; term paper. Prerequisite: course in History and Philosophy of Science or other coursework relevant to topic. In depth treatment of selected topics in the history and philosophy of science. Possible topics include history of modern physics, history of molecular biology, science and society, science and power, scientific explanation, technology and culture, theory testing. May be repeated for credit with consent of instructor.

### 190. Seminar in Science, Technology and Medicine Studies (4)

Lecture/discussion—3 hours; term paper. Prerequisite: open to junior and senior Science and Technology Studies majors only. Intensive reading, discussion, research and writing by small groups in selected topics of science, technology, and medicine studies scholarship. Emphasis on individual research projects.

### 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate Courses

### 250. History and Philosophy of Science (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary seminar in the history and philosophy of science. Focuses on issues such as historiography, methodology, and the conceptual foundations of science. May be repeated for credit with consent of instructor.

### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional Course

### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Sexuality Studies

(College of Letters and Science)

<http://wms.ucdavis.edu/wgssite/sexualitystudies/default.html>

The interdisciplinary minor in Sexuality Studies offers students a unique opportunity to study the human-made aspects of sexual identities, desires, and practices, which differ across cultures and historical moments, and are not reducible to biology or anatomy. The minor in Sexuality Studies core and elective courses have sexuality at their center. Additional courses invite students to integrate their study of sexuality with issues of gender; race and ethnicity; class; politics and activism; literature and popular culture; law; and other domains.

The minor is sponsored by the Program in Women and Gender Studies.

### Minor Program Requirements:

UNITS

Sexuality Studies ..... 18-20

One Core course:

Women and Gender Studies 170 ..... 4

Two Elective courses from the following:

Anthropology 139 BN, English 186, Epidemiology and Preventative Medicine 163, History 184, Human Development 12, Psychology 158, Science and Society 15, Women and Gender Studies 70 ..... 7-8  
Sufficient courses from Additional Course List (below) or seminars/individual study by petition to achieve a total of 18-20 units ..... 7-8

Additional course list:

American Studies 115, Asian American Studies 112, Chicana/o Studies 160, English 166, German 145, History 132, Political Science 152, Sociology 120, Women and Gender Studies 140, Women and Gender Studies 179

### Restrictions.

(a) Students may take no more than one lower division course to satisfy requirements for the minor.

(b) To satisfy the interdisciplinary component of the minor, students must either split their coursework roughly equally between two programs/departments or take coursework in at least three programs/departments.

(c) Students may petition the minor adviser to accept Special Topics courses and Capstone/Senior Seminars as additional courses, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.

(d) Students may petition the minor adviser to accept up to four units of registered individual study, group study or internship towards the minor program, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.

Advising. Program in Women and Gender Studies, 2222 Hart Hall (530) 752-4686

## Social and Ethnic Relations

(College of Letters and Science)

The interdisciplinary minor in Social and Ethnic Relations explores the racial, ethnic, class and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American and African Studies, Asian American Studies, Native American Studies, and Women and Gender Studies.

### Minor Program Requirements:

UNITS

Social and Ethnic Relations ..... 24

Select one course from each of the following six groups to total 24 units.

(a) African American and African Studies 100; Anthropology/Native American Studies 134; Women's Studies 102

(b) African American and African Studies 123, 133, 145A

(c) Asian American Studies 1, 2, 100, 110, 130

(d) Chicana/o Studies 130, 132

(e) Native American Studies 1, 10, 115, 119, 130A, 130B, 130C, 157, 180

(f) Women's Studies 103, 104, 180

Advising. Contact Women and Gender Studies in 2222 Hart Hall, (530) 752-4686.

Restrictions. (a) Courses applied toward the satisfaction of a major may not also be offered in satisfaction of the minor. (b) No more than four units (one course) may be lower division.

## Social Sciences

(College of Letters and Science)

Marianne Page, Ph.D., Program Director

**Program Office.** 108 Sproul Hall  
(530) 752-4001

### Committee in Charge

Elizabeth Cascio, Ph.D. (*Economics*)

Eric Grodsky, Ph.D. (*Sociology*)

Michael Kurlander, Ph.D. (*School of Education*)

GJ Matthey, Ph.D. (*Philosophy*)

Marianne Page, Ph.D. (*Economics*)

Randolph Siverson, Ph.D. (*Political Science*)

Kimberlee Shauman, Ph.D. (*Sociology*)

Ann Stevens, Ph.D. (*Economics*)

### Emeriti Faculty

Nigel Allan, Ph.D. Professor Emeritus

Dennis J. Dingemans, Ph.D., Senior Lecturer Emeritus

Howard F. Gregor, Ph.D., Professor Emeritus

Frederick J. Simoons, Ph.D., Professor Emeritus

Kenneth Thompson, Ph.D., Professor Emeritus

### The Program of Study

The Program in Social Sciences promotes the development of innovative curricular initiatives across the social sciences, including offering broadly conceived, integrative undergraduate-level and graduate-level courses. Faculty affiliated with the program are often engaged in interdepartmental teaching and research.

## Social Theory and Comparative History

Marisol de la Cadena, Ph.D., Interim Program Director and Associate Professor (*Anthropology*)

**Program Office.** Center for History, Society, and Culture, 2231 Social Sciences and Humanities Building (530) 754-8328

**Graduate Study.** The program comprises course work and research leading to the Ph.D. with a designated emphasis in Social Theory and Comparative History. The program provides theoretical training and interdisciplinary perspective to Ph.D. candidates in the nine participating departments and graduate groups (Anthropology, Comparative Literature, Cultural Studies, Economics, English, Geography, History, Political Science, and Sociology). Students from other departments are also welcome. All students must fulfill all Ph.D. requirements of their home department. The additional requirements leading to the designated emphasis include: (1) four graduate courses (Social Theory and Comparative History 250, Sociology 242A, and two courses sponsored by the Social Theory and Comparative History program, one of which must be offered by a department other than the student's home department); (2) presentation of a Social Theory and Comparative History field as one area of specialization in the departmental Ph.D. qualifying examination; (3) an oral discussion, following passage of the Ph.D. qualifying examination, based on the student's dissertation prospectus; (4) completion of the dissertation to the satisfaction of the student's thesis committee, one of whose members will be a representative of the Social Theory and Comparative History program.

**Graduate Adviser.** Consult the Program Director, Program office, or see <http://chsc.ucdavis.edu> for advising and detailed information on application and requirements.

## Courses in Social Theory and Comparative History (STH)

### Graduate Courses

#### 250. Research in Social Theory and Comparative History (4)

Seminar—3 hours; term paper. Prerequisite: admission to Social Theory and Comparative History Designated Emphasis. Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, and Culture faculty and visitors discussing current research.—III. (III.)

#### 290. Advanced Topics in Social Theory and Comparative History (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor and History 204 or Sociology 242A. Interdisciplinary study of particular substantive problems in social theory and comparative history. Topics vary.—I, II, III. (I, II, III.)

#### 295. Advanced Group Research in Social Theory and Comparative History (1)

Discussion—1 hour. Prerequisite: consent of instructor. Participation in research workshops sponsored by the Center for Comparative Research for History, Society, and Culture. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### 296. Theory and Society Journal Editorial Workshop (1-4)

Workshop—1 hour; independent study—3 hours. Reading and offering workshop critiques of papers submitted for publication. Reading and discussion of other relevant work in history and the social sciences. May be repeated for credit up to 36 units or with consent of instructor. (S/U grading only.)—I, II, III. (I, II, III.) Gouldner

## Sociology

(College of Letters and Science)

James C. Cramer, Ph.D., Chairperson of the Department

**Department Office.** 1282 Social Sciences and Humanities Building  
(530) 752-0782; <http://sociology.ucdavis.edu>

### Faculty

Thomas D. Beamish, Ph.D., Associate Professor

Nicole W. Biggart, Ph.D., Professor (*Sociology, Management*)

Fred Block, Ph.D., Professor

Patrick Carroll, Ph.D., Associate Professor

Lawrence E. Cohen, Ph.D., Professor

James C. Cramer, Ph.D., Professor

Diane H. Felmler, Ph.D., Professor

T. Ryken Grattet, Ph.D., Associate Professor

Laura Grindstaff, Ph.D., Associate Professor

Eric Grodsky, Ph.D., Assistant Professor

Drew Halfmann, Ph.D., Assistant Professor

John R. Hall, Ph.D., Professor

Bruce D. Haynes, Ph.D., Associate Professor

Mary Jackman, Ph.D., Professor

Carole E. Joffe, Ph.D., Professor

Carl C. Jorgensen, Ph.D., Associate Professor

David J. Kyle, Ph.D., Associate Professor

Ming-Cheng Lo, Ph.D., Associate Professor

William McCarthy, Ph.D., Professor

Dina G. Okamoto, Ph.D., Assistant Professor

Donald A. Palmer, Ph.D., Professor (*Management*)

Kimberlee A. Shauman, Ph.D., Assistant Professor

Xiaoling Shu, Ph.D., Associate Professor

Vicki Smith, Ph.D., Professor

Diane L. Wolf, Ph.D., Professor

### Emeriti Faculty

Bruce M. Hackett, Ph.D., Professor Emeritus

John F. Lofland, Ph.D., Professor Emeritus

Lyn H. Lofland, Ph.D., Research Professor Emerita

John F. Scott, Ph.D., Professor Emeritus

John T. Walton, Ph.D., Research Professor Emeritus

### Affiliated Faculty

Debora Paterniti, Ph.D., Associate-Adjunct Professor  
Norman Skonovd, Ph.D., Lecturer

### The Major Programs

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.

**The Program.** The Department of Sociology offers two major programs, Sociology and Sociology—Organizational Studies. Students selecting the Sociology major may choose from four options in the major. The General Sociology emphasis allows students to obtain a broad understanding of the concepts, methods, and theories of sociology. Students with a special interest in the areas of Law and Society or Social Services may choose a more specialized program of courses and practical experience within the sociology major. The Comparative Studies and World Development emphasis provides a sociological perspective on social and economic changes throughout the world, with a stress on relationships between “developed” and “underdeveloped” societies. In their junior year, students are encouraged to consider the Education Abroad Program—especially one in a developing country.

The Sociology—Organizational Studies major develops a broad understanding of the political, social, and economic organizations that comprise modern society. This major emphasizes a sociological perspective, but incorporates a multidisciplinary field of study. The major introduces students to a range of theories and methods that social scientists use in the analysis of organizations.

**Career Opportunities.** In the Sociology major, the General option is for students desiring a solid liberal arts education as well as those interested in graduate work in the social sciences. Options in Law and Society or Social Service prepare students for careers in such areas as law, corrections, social work or counseling. The Comparative Studies and World Development emphasis prepares students for graduate training leading to careers in international fields. Majors in Sociology—Organizational Studies will be prepared for a variety of career options, particularly in the field of management. The major specifically meets entry requirements for programs of professional training leading to a Masters degree in public or private management, and may also lead to further study in any of the disciplinary areas incorporated in the major.

### Sociology

#### A.B. Degree Requirements:

#### General emphasis:

UNITS

#### Preparatory Subject Matter..... 29

Sociology 1, 46A, and 46B; or the equivalents.....	13
Sociology 2, 3, 4 or 5.....	4
Anthropology 2 or 20.....	4
Select from History 4A, 4B, 4C, 8, 9A, 9B, 10C, 15, 16, 17A, 17B.....	4
Select from Philosophy 5, 14, 24.....	4

#### Depth Subject Matter ..... 44

(A) Sociology 100.....	4
(B) Select one course from each of the following four clusters.....	16
<i>Individual, Culture and Society:</i> Sociology 125, 126, 135.....	4
<i>Stratification and Social Differentiation:</i> Sociology 130, 132, 140.....	4
<i>Organizations and Institutions:</i> Sociology 118, 131, 146, 180A.....	4
<i>Social Dynamics:</i> Sociology 104, 141, 143A, 170.....	4

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

(C) Select three upper division courses from one of the following clusters; not counting courses taken to fulfill requirement B ..... 12

*Individual, Culture and Society:* Sociology 102, 120, 122, 125, 126, 127, 128, 129, 131, 132, 134, 135, 143B, 148, 150, 152, 172, 173, 174, 175, 176

*Stratification and Social Differentiation:* Sociology 118, 128, 129, 130, 132, 133, 134, 140, 145A, 145B, 172, 185, 188, and not more than one of the following courses: African American and African Studies 123, Asian American Studies 100, Chicana/o Studies 110, or Native American Studies 115

*Organizations and Institutions:* Sociology 118, 124, 131, 133, 139, 144, 146, 149, 150, 151, 154, 155, 159, 180A, 180B, 181, 182, 183, 185

*Social Dynamics:* Sociology 104, 123, 125, 138, 141, 143A, 145A, 145B, 147, 148, 156, 157, 170

*Student-initiated thematic cluster:* developed with a faculty adviser and approved by the Sociology Undergraduate Curriculum Committee

(D) Eight units of Sociology beyond courses taken to fulfill above requirements, and outside of the course cluster used to fulfill requirement C ..... 8

(E) One integrative course (prerequisite: senior standing and completion of requirement for Preparatory Subject Matter, Depth Subject Matter, requirement A, and at least two of the courses for requirement B). Choose from Sociology 190X, 191, 192/193, 194HA-194HB, 195 ..... 4

**Total Units for the Major ..... 73**

### Law and Society emphasis:

UNITS

#### Preparatory Subject Matter ..... 29

Sociology 1, 3, 46A and 46B (or the equivalents) ..... 17

Anthropology 2 or 20 ..... 4

Select from History 4A, 4B, 4C, 8, 9A, 9B, 10C, 15, 17A, 17B ..... 4

Philosophy 5 or 14 ..... 4

#### Depth Subject Matter ..... 44

Sociology 100 and 155 ..... 8

Select courses from the following categories ..... 32

*Individual Culture and Society:* Sociology 125, 126, 135 ..... 4

*Stratification and Social Differentiation:* Sociology 130, 132, 140 ..... 4

*Organizations and Institutions:* Sociology 118, 131, 146, 180A4

*Crime and Social Dynamics:* Sociology 120, 150, 151, 152 ..... 12

*Stratifications and Social Dynamics:* Sociology 118, 148, 156, 157; African American and African Studies 121, 145A, 145B; Asian American Studies 155; Chicana/o Studies 130, 132; Native American Studies 117, 118 ..... 4

*Legal Studies:* Philosophy 119; Political Science 122, 154, Environmental Science and Policy 161, Psychology 153 ..... 4

*Methodology:* Prerequisite: senior standing and completion of requirement for preparatory subject matter; select one course from Sociology 190X, 192/193, 194HA-194HB, 195 ..... 4

**Total Units for the Major ..... 73**

### Social Services emphasis:

#### Preparatory Subject Matter ..... 28

Sociology 2, 3, 46A, and 46B; or the equivalents ..... 16

Psychology 1 ..... 4

Select from African American and African Studies 10, 15; Asian American Studies 1, 2; Chicana/o Studies 10, 20; Native American Studies 1, 10 ..... 8

#### Depth Subject Matter ..... 44

Sociology 131, 140, 185 ..... 12

Select four units of upper division psychology: Psychology 140, 142, 151, 168 ..... 4

Select seven courses distributed as specified ..... 28

*Social Issues:* Sociology 104, 120, 122, 124, 139, 143A, 144, 146, 150, 152, 154, 155, 170 ..... 8

*Social Interaction:* Sociology 126, 127, 128, 143B, 148, 157 ..... 4

*Race and Ethnicity:* African American and African Studies 100; Community and Regional Development 176; Asian American Studies 110, 111, 150; Chicana/o Studies 110; Native American Studies 115; Sociology 129, 130, 134 ..... 4

*Gender:* Sociology 132, 133, 145B, 172 ..... 4

*Organizational Behavior:* Sociology 151, 180A, 180B, 181, 182, 183 ..... 4

*Methodology:* Prerequisite—senior standing and completion of requirement for preparatory subject matter: Sociology 103, 106; or the equivalents, 190X, 192/193, 194HA, 194B, 195 ..... 4

**Total Units for the Major ..... 72**

### Comparative Studies and World Development emphasis:

#### Preparatory Subject Matter ..... 30-56

Sociology 1, 5, 46A, and 46B; or the equivalents ..... 17

Economics 1B ..... 5

Anthropology 2 ..... 4

At least 4 units from Geography 2-2G, History 10C, Political Science 2 ..... 4

Course work in language instruction in modern foreign language equivalent to 26 units at UC Davis ..... 26

#### Depth Subject Matter ..... 48

Sociology 100, 104, 141, 145A, 170 .. 20

Economics 115A or Anthropology 126A .. 4

At least twelve units from Sociology 118, 130, 131, 143A, 144, 145A, 145B, 156 ..... 12

Regional focus, three courses from one of the following groups ..... 12

(a) *Africa/Middle East:* African American and African Studies 110, 111; Anthropology 140A, 140B, 142; Economics 175; History 115A, 115B, 115C, 116; Political Science 134, 146

(b) *Latin America/Pacific:* African American and African Studies 107A; Anthropology 144, 147; Economics 175; Geography 122A, 122B; History 161A, 161B, 162, 165; Spanish 170, 171 (formerly 135 and 136)

(c) *Asia:* Anthropology 149; Economics 171, 172, 173; Geography 126, 127; History 193, 194A, 194B, 194C; Political Science 138, 148A, 148B; Religious Studies 168, 172; Sociology 147, 188

**Total Units for the Major ..... 78-104**

### Sociology—Organizational Studies

#### A.B. Degree Requirements:

UNITS

#### Preparatory Subject Matter ..... 26-27

Sociology 1 or 2, 5, 46A, and 46B; or the equivalents ..... 16-17

Economics 1A, 1B ..... 10

#### Depth Subject Matter ..... 44

Sociology 180A, ..... 4

Sociology 106 ..... 4

Select from Psychology 156, Communication 130 or 136 ..... 4

Select six courses from below, at least three courses from Sociology ..... 24

Agricultural and Resource Economics 112; American Studies 125; Community and

Regional Development 151/151L, 152, 154, 156, 158, 162, 164, 168; Economics 116, 121A, 121B, 151A, 151B; History 185B, 194D; Political Science 107, 180, 187; Sociology 100, 103, 124, 138, 139, 141, 159, 180B, 181, 183, 185

Select from Sociology 128, 130, 132, 134, 140, 145A, 145B, 172 ..... 4

Select from Sociology 190X, 192/193, 194HA-194HB, 195; Prerequisite: senior standing and completion of requirement for preparatory subject matter ..... 4

**Total Units for the Major ..... 70-71**

**Major Advisers.** Consult the Departmental Advising office in 1282 Social Sciences and Humanities Building.

### Minor Program Requirements:

Students in other disciplines may elect to minor in Sociology by choosing a sociological subject emphasis listed below. On transcripts, the minor will appear as a minor in Sociology.

UNITS

#### Sociology ..... 20

##### Sociology—General emphasis

Select from Sociology 100, 126, 140, 170, 180A ..... 8

One course from any three clusters; see cluster lists under Sociology Major—General Emphasis ..... 12

##### Sociology—Organizational Studies emphasis

Sociology 180A and 180B ..... 8

Select from Agricultural and Resource Economics 112; American Studies 125; Communication 134, 136; Community and Regional Development 162, 163, 164; Economics 100; Political Science 180, 181, 183, 187, 188; Psychology 183 ..... 8

Select from Anthropology 122; History 174A, 179, 187A, 187B, 194D; Sociology 118, 139, 141, 156, 159, 175, 181, 183 ..... 4

##### Sociology—Social Service emphasis

Sociology 185, plus 4 units selected from Sociology 131, 132, 133, 145B ..... 8

Select from Sociology 129, 130, 133, 134, 140, 172 ..... 4

Four units from Social Issues cluster and four units from Social Interaction cluster; see cluster lists under Sociology Major—Social Services emphasis ..... 8

##### Sociology—Law and Society emphasis

Sociology 155, plus one of Sociology 120, 150, 152 ..... 8

One of Sociology 129, 130, 131, 132, 133, 134, or 172 ..... 4

One of Sociology 118, 139, 140, 141, 145A or 145B, 180A or 180B, or 185 ..... 4

One of Sociology 100, 122, 124, 126, 128, 143A or 143B, 156, 157, or 191 ..... 4

**Minor Advisers.** Consult the departmental Advising office in 1282 Social Sciences and Humanities Building.

**Honors Program.** An Honors Program is available to Sociology and Sociology—Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, the honors student writes an honors thesis and participates in a two-quarter honors seminar (course 194HA-194HB). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with Highest Honors or with High Honors.

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in sociology. Further information regarding graduate study may be obtained at the Department office or on our Web site.

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

Graduate students in Sociology have the opportunity to pursue designated emphases in Critical Theory, Social Theory and Comparative History, Native American Studies, Economy, Justice and Society, or Feminist Theory and Research. See these headings for further details on these interdisciplinary programs.

**Graduate Advisers.** Consult the Graduate Program Coordinator in 1287 Social Sciences and Humanities Building.

## Courses in Sociology (SOC)

### Lower Division Courses

#### 1. Introduction to Sociology (5)

Lecture—4 hours; discussion—1 hour. Principles and basic concepts of sociology. The study of groups, culture, collective behavior, classes and caste, community and ecology, role, status, and personality. GE credit: SocSci.—I, II, III. (I, II, III.)

#### 2. Self and Society (4)

Lecture—3 hours; discussion—1 hour. Principles and basic concepts of sociological social psychology. Includes the study of the character of the self, identity, roles, socialization, identity change, emotion and social interaction. GE credit: SocSci, Wrt.—I, II, III. (I, II, III.)

#### 3. Social Problems (4)

Lecture—3 hours; discussion—1 hour. General sociological consideration of contemporary social problems in relation to sociocultural change and programs for improvement. GE credit: SocSci, Wrt.—I, II, III. (I, II, III.)

#### 4. Immigration and Opportunity (4)

Lecture—3 hours; discussion—1 hour or term paper. Social and demographic analysis of immigration: motives and experiences of immigrants; immigration and social mobility; immigration, assimilation, and social change; multicultural societies. Detailed study of immigration into the U.S., with comparative studies of Europe, Australia, and other host countries. GE credit: SocSci, Div, Wrt.—I. (I.)

#### 5. Global Social Change: An Introduction to Macrosociology (4)

Lecture—3 hours; discussion—1 hour. An introduction to change and diversity in world history, including the United States. Examines population and family, technological change and economic development, power and status, culture and identity. GE credit: SocSci, Div, Wrt.—I. (I.)

#### 11. Sociology of Labor and Employment (4)

Lecture—3 hours; term paper. Labor and employment issues in the contemporary United States with some use of historical and comparative materials. Topics will include strategies pursued by employers and employees, labor market discrimination and the role of social policies in shaping labor markets. GE Credit: SocSci, Wrt.—II.

#### 25. Sociology of Popular Culture (4)

Lecture—3 hours; discussion—1 hour. Social mechanisms that shape modern popular culture. High, folk, and mass culture: historical emergence of popular culture. Mass media, commercialization, ideology and cultural styles. Theories and methods for analyzing cultural expressions in pop music, street art, film, television, and advertising. GE credit: SocSci, Wrt.—II, III. (II, III.)

#### 30A. Intercultural Relations in Multicultural Societies (3)

Lecture—1.5 hours; discussion—1.5 hours. Macrostructural analysis of contemporary multicultural societies; immigration and assimilation in comparative perspective; social construction of racial and ethnic group identities; ethnicity and gender; group conflict and cooperation; controversies surrounding multiculturalism. First course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div.—I. (I.)

#### 30B. Intercultural Relations in Multicultural Societies (3)

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: course 30A or consent of instructor. Social-psychological analysis of personal experiences living in a multicultural society; conforming to or rejecting

group identity or stereotypes; managing and reducing conflict; cross-cultural communication; promises and problems of diversity at UC Davis. Second course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div.—II. (II.)

#### 46A. Introduction to Social Research (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Examination of the methodological problems of social research. Selection and definition of problems of investigation, data-gathering techniques, and sampling.—I, II, III. (I, II, III.)

#### 46B. Introduction to Social Research (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association.—I, II, III. (I, II, III.)

#### 90X. Lower Division Seminar (1-2)

Seminar—1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in sociology through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May not be repeated for credit. Limited enrollment.

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily intended for lower division students. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

### Upper Division Courses

#### 100. Classical and Modern Sources of Sociological Theory (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Historical introduction of sociological thought, with special reference to its 19th-century origins and 20th-century lines of development. Consideration of theoretical texts may include works of Marx, Durkheim, Simmel, early critical theorists, Parsons, and the Chicago School. Not open for credit to students who have received credit for course 165A. GE credit: Wrt.—I, II, III. (I, II, III.)

#### 102. Society and Culture of California (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: introductory course in Sociology recommended. California's distinctive society and culture; sociological analyses of topical issues concerning diversity, environment, cities.—(II.)

#### 103. Evaluation Research Methods (4)

Lecture—3 hours; discussion—1 hour or field research (instructor's option). Prerequisite: course 46A and 46B, or Statistics 13 or the equivalent. Surveys applications of research methods to the evaluation of social programs, primarily emphasizing methodological issues, e.g., research design and data collection; uses of evaluation research are also discussed and placed in theoretical context. Participation in an evaluation project.—III. (III.)

#### 104. The Political Economy of International Migration (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as International Relations 104).—(II.)

#### 106. Intermediate Social Statistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 46B or Statistics 13 or the equivalent. Intermediate level course in statistical analysis of social data, emphasizing the logic and use of statistical measures, procedures, and mathematical models especially relevant to sociological analysis.—I, III. (I, III.)

#### 118. Political Sociology (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Relation of social cleavages and social cohesion to the functioning of political institu-

tions; the social bases of local and national power structures; social sources of political movement, analysis of concepts of alienation, revolution, ideology, ruling class, and elite.—I, II, III. (II, III.)

#### 120. Deviance (4)

Lecture—3 hours; term paper or discussion. Social structural sources, institutional practices and micro-processes associated with illegality, evil, disease, immorality, disability, racial and class differences, citizenship, and the body. Special emphasis on expert knowledge and the production and management of social difference. GE credit: Wrt.—I, II. (I, II.)

#### 122. Sociology of Adolescence (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Chronological age and social status; analysis of social processes bearing upon the socialization of children and adolescents. The emergence of "youth cultures." Generational succession as a cultural problem.

#### 123. American Society (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. The demographic and social structure of American society and population, with emphasis on ethnic and class groups as bases for political and economic interest. Attention to selected current social controversies.

#### 124. Sociology of Education (4)

Lecture—3 hours; term paper or discussion—1 hour (instructor's option). Education and the social structure. Class size, curriculum, and economies of scale. Relations between families and schools in socialization; familial ascription and educational achievement. Education and industrialization. Organizational and occupational structure of schools. Discussion of selected controversies.—III. (III.)

#### 125. Sociology of Culture (4)

Lecture/discussion—3 hours; term paper. Sociological approaches to study of historical and contemporary culture and mass media, and their structuring in relation to social actors, institutions, stratification, power, the production of culture, audiences, and the significance of culture in processes of change. GE credit: SocSci.—I, II. (I, II.)

#### 126. Social Interaction (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 2. Everyday interaction in natural settings; ethnographic approaches to the understanding of social meanings, situations, personal identity and human relationships. Particular attention to the work of Erving Goffman and to principles of field observation and qualitative analysis. GE credit: Wrt.—I. (I, III.)

#### 127. Sociology of Death (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Overview of attitudes toward, structural effects of, and methods of coping with death and death-related behaviors. Particular attention to social psychological aspects of death and dying, to death occupations, and to death rituals in various cultures. GE credit: Wrt.

#### 128. Interracial Interpersonal Dynamics (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: one course from courses 1, 2, 3, Afro-American Studies 10, Asian American Studies 1, 2, Chicano Studies 10, Native American Studies 1, 20. Analysis of the influences of cultural differences and racial stratification on interpersonal interaction in instrumental settings (e.g., work, education, political action) and intimate settings (e.g., friendship, love, marriage, family). Minority/majority relationships. GE credit: Div, Wrt.—(III.)

#### 129. Sociology of Black Experience in America (4)

Lecture—3 hours; discussion—1 hour or research or term paper (instructor's option). Survey of historical and contemporary theoretical sociological perspectives on the Black experience in United States. Emphasis on comparisons of Black sociological perspectives and mainstream perspectives of specific sociologists. GE credit: Div.—(I, III.)

**130. Race Relations (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Functions of the social definitions of race and racial groups. Analysis of racial conflict, oppression, and other forms of ethnic stratification. Models of ethnic interaction and social change. Emphasis on racial relationships within the U.S. GE credit: Div.—I, II. (I, II.)

**131. The Family (4)**

Lecture—3 hours; discussion—1 hour. Contemporary family life in historical and cross-cultural perspective. How different family forms arose, their significance today and prospects for further family change. Attention to power relations within and beyond the family and to the social implications of family transformation. GE credit: SocSci, Div, Wrt.—I, II, III. (I, II, III.)

**132. The Sociology of Gender (4)**

Lecture—3 hours; discussion—1 hour. Analysis of biological, psychological, cultural and structural conditions underlying the status and roles of men and women in contemporary society, drawing on a historical and comparative perspective. GE credit: SocSci, Div.—I, II, III. (I, II, III.)

**133. Sexual Stratification and Politics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 132 or the equivalent or consent of instructor. Analysis of origins, dynamics, and social implications of sexual stratification. Examination of classical and contemporary theorists such as Engels, Freud, J.S. Mill, de Beauvoir, Juliet Mitchell, D. Dinnerstein. Attention to selected issues in social movements for and against sexual equality. GE credit: Div.

**134. Sociology of Racial Ethnic Families (4)**

Lecture—3 hours; discussion—1 hour or term paper. Asian American, Black, Chicano, and Native American family life in comparative historical perspective. Family structure and gender roles are considered in relation to socio-historical dynamics. Offered in alternate years. GE credit: Div, Wrt.

**135. Social Relationships (4)**

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1, 2 or 3, and upper division standing. Social and cultural factors influencing friendships and intimate relationships. Topics include relationship development, relationship maintenance, and relationship loss. GE credit: Div, Wrt.—II. (II.)

**137. African American Society and Culture 1790-1990 (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1. Political and social transformations of African American communities between 1790 and 1990, as seen through film, literature, and music. Topics include: Black consciousness, Afro-Slave culture, The Harlem Renaissance, and contemporary Hip Hop.—II. (II.)

**138. Economic Sociology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A or 1B and upper division standing in the social sciences. Overview of the rapidly growing field of economic sociology. Focus on variations in the ways that markets are organized. The relationship between individual and collective rationality will also be emphasized.—I, II, III. (I, II, III.)

**139. Corporations and Society (4)**

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 or 2 or 3, and upper division standing. The study of the history and power of the modern corporation; corporate organization; politics, the state, and the corporation; labor unions and the labor process; competition, regulation and international markets; the multinational and conglomerate corporation; and mass markets and consumerism.—I, II, III. (I, II, III.)

**140. Social Stratification (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project (instructor's option). Systems of social ranking, theories of stratification; power, prestige, culture, and styles of life of various social classes; social mobility and its consequences for social structure.—I, II, III. (I, II, III.)

**141. Industrialization and Social Change (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Selected technological and social factors. Preconditions of economic development and industrialization. Social, political, and cultural issues at various levels of economic development. Major historical differences and major current trends. Emphasis either on highly industrialized countries or on less developed countries. GE credit: Wrt.—I. (II.)

**143A. Urban Society (4)**

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Theories of city origins. Analysis of the historic process of urbanization and of varying city types. Comparison of American and European experience of metropolitanization, counterurbanization, and neighborhood change. Consideration of competing theories of urban growth and change and competing visions of the urban future. Offered in alternate years.—III. (III.)

**143B. Sociology of City Life (4)**

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent; course 143A recommended. Critical dissection of the "loss of community" issue. Analysis of the organization of primary ties in the city, of the culture of urban public life and of the learning of city skills. Offered in alternate years. GE credit: Wrt.—III.

**144. Agriculture and Society (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: advanced standing in the social sciences or one year of course work in agricultural and environmental sciences. Development of agriculture as a major enterprise in modern society with the concomitant reduction in the labor force and family farms. Analysis of issues including mechanization, migrant labor, corporate farming, and public resource policy. Offered in alternate years.—(I.)

**145A. Sociology of Third World Development (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; upper division standing. Introduction to theories and contemporary issues in the sociology of development. Topics such as urbanization, rural/agrarian change, class, status groups, international division of labor, sectoral shifts, international capital, informal economy, gender, and political processes are analyzed within a comparative-historical framework. GE credit: Div, Wrt.—II. (II.)

**145B. Gender and Rural Development in the Third World (4)**

Seminar—4 hours. Prerequisite: course 1; upper division standing. Political-economic analysis of women and work during the process of socio-economic change in the world with particular attention to the family/household context. Offered in alternate years. GE credit: Div, Wrt.—(II.)

**146. Sociology of Religion (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Relationship between social structures and religions. The social setting of the major world religions. Religious innovators and institutionalization (churches, sects, cults). Secularization in the modern world and the rise of secular ideologies. Offered in alternate years. GE credit: SocSci, Div, Wrt.—I.

**147. Sociological Perspectives on East Asia (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological theories and concepts applied toward understanding East Asian society. Emphasis on the political structure, stratification, and economy in China and Japan. Analysis of historical and contemporary similarities and differences. Offered in alternate years.—(III.)

**148. Collective Behavior (4)**

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Study of behavior of human

crowds and masses in extraordinary circumstances, including crowd panics, mass scares, collective protests, riots, revolutionary situations, ecstatic and revivalist gatherings, crazes, fads, and fashions.—III. (III.)

**149. Religion and American Society (4)**

Lecture—3 hours; class project. Historical, contemporary survey of religious traditions and organizations and their relation to U.S. social and cultural patterns. Civil religion, religious pluralism, minority and deviant communities, religious migration, U.S. religion as a social institution, and religion, politics, and social stratification. Offered in alternate years. GE credit: Div, Wrt.—(III.)

**150. Criminology (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological analysis of criminal behavior in relation to social structure and the criminalization process.—I, III. (I, III.)

**151. The Criminal Justice System (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 150 and upper division standing. Sociological analysis of the different components of the criminal justice system including the emergence and interpretation of criminal laws, the contemporary roles and functions of the police, criminal courts and correctional institutions.—II. (II.)

**152. Juvenile Delinquency (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Study of juvenile delinquency in relation to the family, peer groups, community, and institutional structures. Consideration of processing of the delinquent by formal agencies of control.—I, II, III. (I, II, III.)

**154. Sociology of Health Care (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Overview of sociological research in medicine and health care, with emphasis on the organizational, institutional, and social psychological aspects.—II. (II.)

**155. Sociology of Law (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Law considered as social control; relation of legal institutions to society as affecting judicial decision making and administration of justice. Lawyers as an occupational group. Legal reform.—I, III. (I, III.)

**156. Social Movements (4)**

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Analysis of several aspects of social movements: mobilization, forms of organization, ideology, recruitment, leadership, strategies and tactics, development, effects. Frequent use of sound and film materials. GE credit: SocSci.—II, III. (II, III.)

**157. Social Conflict (4)**

Lecture—3 hours; discussion—1 hour or term paper or project. Analysis of the causes, dynamics, and regulation of social conflict within and between various kinds of social groupings with particular reference to nonviolent methods of waging and regulating conflict.—(I.)

**159. Sociology of Occupations (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Natural history of occupations; the institutional matrix of occupations; colleague and client relationships; occupational social controls; career lines, and occupational-related self-definitions; occupational politics.—II. (I, II.)

**160. Sociology of the Environment (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing in Sociology recommended. Production, consumption, and urban expansion. Basic social logics surrounding current problems of resource scarcity (environmental extractions) and excess wastes (environmental additions). Ways that society can change and reorganize itself to become more environmentally conscious and hence ecologically sustainable.—II. (II.)

**170. Population (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Introduction to the study of human population, including theories and statistical measures; social causes and consequences of population trends; changes in population structure; geographical distribution, migration, socio-psychological factors affecting fertility. GE credit: SocSci.—I. (II.)

**171. Sociology of Violence and Inequality (4)**

Lecture/discussion—4 hours. Prerequisite: upper-division standing or consent of instructor. How systems of social inequality organize the practice of violence. Definitions of violence and issues affecting the social capacity for violence. Analysis and comparison of different forms of violence associated with race, class, gender relations and social organization.—II. (II.)

**172. Ideology of Class, Race and Gender (4)**

Lecture—4 hours. Examination of popular belief systems that accompany relations between social classes, whites and blacks, and men and women in the United States. How do dominant groups attempt to justify each relationship, and is there ideological conflict or consensus between groups. GE credit: Div, Wrt.—I. (I.)

**173. Sociology Through Literature (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Introduction to analysis of literature as sociological data. Reading of numerous works on American and other societies by authors such as Steinbeck, Lewis, Dreiser, Schulberg, Orwell, etc. Offered in alternate years.

**174. Sociology of the Jewish Experience (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing required. The sociology of Jewish life, analyzing challenges to Jewish identity and community in the diaspora. Diversity within the Jewish community, Americanization, women, new immigrants, post-Holocaust Jewish identity, and Black-Jewish relations. Offered in alternate years.—(III.)

**175. Mass Communication (4)**

Lecture—3 hours; term paper. Prerequisite: course 1 or 2. Examines the relationship between the media and social structures. History of media-state relations. Media as reflector and shaper of values. Emphasis on current European and Marxist and pluralist theories rather than on content analysis. Offered in alternate years.—I.

**176. Sociology of Knowledge, Science, and Scientific Knowledge (4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing preferred. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as Science and Technology Studies 176.)—I. (III.)

**180A. Complex Organizations (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 1; Economics 1A and 1B recommended. Develops a sociological approach to organizations theory. Designed to introduce sociological concepts, address the alternative psychological and economic models, and involve students in the practice of organizational analysis.—I, II. (I, II.)

**180B. Complex Organizations (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 180A or consent of instructor. Builds on concepts and skills developed in course 180A. Deals with the issues of organizational decision making, design, and survival. Emphasis on relations between organizations and the effects of those relations in both the public and private sectors.—II, III.

**181. Social Change Organizations (4)**

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1. Analysis of organizations with social change and improvement goals and programs, emphasizing voluntary associations and grassroots citizen groups. Topics treated include formation, decision making and leadership, strategies and tactics, factionalism and coalitions, effectiveness. Offered in alternate years. GE credit: Wrt.—III. (III.)

**182. Experimental and Utopian Communities (4)**

Lecture—3 hours; discussion—1 hour. The social structure of intentional, experimental or Utopian settlements and communitarian movements, including comparison with other small settlement forms: villages, neighborhoods, monasteries, encampments and nonsettlement communities based on occupation, ethnicity, and religion.

**183. Comparative Organizations (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 180A or 180B; upper division standing. Examination of economic and political organizations of major industrial nations. Discussion of historical, cultural, social, and political influences on industrial patterns and practices, alternative theoretical models for explaining differential development. Societies may include Sweden, Japan, Germany, Taiwan, and South Korea. Offered in alternate years.—I. (I)

**185. Sociology of Social Welfare (4)**

Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological analysis of the evolution and current organization of welfare functions in modern societies.—I, II. (I, II.)

**188. Social Stratification in China (4)**

Lecture—3 hours; term paper. Prerequisite: upper division standing. Social and political systems and patterns of social stratification in relation to change in state power and economic institutions in China since 1949. Offered in alternate years.—I.

**189. Social Science Writing (4)**

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 46A, upper division standing, and 12 units of social science. Improved analytic writing and methods for reporting social science research to a wider public. Sociological analysis of the conditions of good and bad writing.

**190X. Seminar in Sociological Analysis (4)**

Seminar—3 hours; term paper. Prerequisite: upper division standing and course 100 (former course 165A). In-depth examination at an upper division level of a special topic in Sociology. Emphasis on student participation in learning. May not be repeated for credit. Limited enrollment.—(I, II, III.)

**191. Workshop in Contemporary Sociological Theory (4)**

Lecture—2 hours; workshop—1 hour; term paper. Prerequisite: course 100 (former 165A) and senior standing. Workshop in contemporary sociological theory that allows students to explore the uses of the theory in empirical inquiry on problems of interest to students. Contemporary theory considered in relation to classical and modern influences, concept formation, theory construction, and explanation. Not open for credit to students who have received credit for course 165B.—III. (III.)

**192. Internship and Research Practicum (2-6)**

Internship—6-18 hours. Prerequisite: course 46A, upper division standing, approval of proposed internship and course 193 concurrently or consent of instructor. Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience. May be repeated for credit with consent of instructor. Maximum of 4 units may be counted toward the major. (P/NP grading only.)—I, II, III. (I, II, III.)

**193. Workshop in Field Research (2)**

Lecture/discussion—2 hours. Prerequisite: course 46A, course 192 or 199 concurrently for two-four units, senior standing. Overview of the process of collecting, recording, analyzing, and reporting qual-

itative social data. Emphasis on application of principles; each participant completes an original research project. Not open for credit to students who have completed course 194HA.—I, II, III. (I, II, III.)

**194HA-194HB. Special Study for Honors Students (4-4)**

Seminar—3 hours; term paper. Prerequisite: senior standing and admission to the Honors Program. Directed reading, research and writing culminating in the preparation of a Senior Honors Thesis under direction of faculty adviser. (Deferred grading only pending completion of sequence.)—I, II. (I, II.)

**195. Special Topics in Sociological Analysis (4)**

Seminar—3 hours; term paper. Prerequisite: upper division standing and consent of instructor. In-depth examination of topics in sociology. Emphasis on student research and writing. May be repeated for credit when topic differs.—I, II, III. (I, II, III.)

**197T. Tutoring in Sociology (1-4)**

Tutorial—3-12 hours. Prerequisite: upper division standing; completion of appropriate course with distinction. Activities vary depending on the nature of the course assignment. May include (but not limited to) tutoring on course material, advising on projects and papers, and leading discussion groups. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: open to seniors only. (P/NP grading only.)

**Graduate Courses****201. Social Research (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing, or consent of instructor. Survey of sociological inquiry, taught as practicum. Philosophy of social science; values and research; research agendas and research problem formulation; research process; explanation vs. interpretation; study design; concept formation, measurement, sampling, data acquisition, inference; rhetoric and presentation of findings.—I. (I.)

**206. Quantitative Analysis in Sociology (4)**

Lecture—4 hours. Prerequisite: course 106. Survey of the statistical models and methods that serve as a foundation for quantitative research in sociology, with an emphasis on multivariate regression analysis, as well as measurement theory and time series analysis. (S/U grading only.)—II. (II.)

**207A-207B. Methods of Quantitative Research (4-4)**

Lecture—3 hours; paper. Prerequisite: course 106 or the equivalent. Principles of study design, examination of measurement, survey research methods and multivariate analysis. Course will stress actual practice of techniques. Students will carry out quantitative data analysis using packaged computer programs. (Deferred grading only, pending completion of sequence.)—(I, II.)

**208. Topics in Advanced Quantitative Methods in Social Sciences (4)**

Seminar—3 hours; term paper. Prerequisite: course 206 or the equivalent and graduate standing. Analysis of the logic and application of an advanced statistical model; the model chosen may vary. Emphasis on the model's assumptions, its strengths and weaknesses, its application for social science inquiry, and the relationship between methods and social theory. May be repeated for credit when topic differs. Offered in alternate years.—II. (II.)

**215. Economy, Polity, and Society (4)**

Seminar—3 hours; paper. Prerequisite: consent of instructor. Open to graduate students in sociology and related disciplines. Course introduces students to topics and selected issues in the related fields of economic and political sociology and political economy.—(III.)

**220. Deviance, Law, and Social Control (4)**

Seminar—3 hours; projects. Prerequisite: course 120 or consent of instructor. Report and discussions of literature on selected forms of deviance in relation to law and formal social control. Agency contacts and exploratory research projects.—(III.)

**224. Sociology of Education (4)**

Seminar—3 hours; term paper. Prerequisite: course 206 or the equivalent recommended. Overview of sociological theories accounting for the form, role, and evolution of educational systems. Emphasis on empirical research on education and social stratification and application to educational policy. Topics include tracking, racial/ethnic achievement inequalities, school organization, and the immigrant experience.—(I.)

**225. Cultural Sociology (4)**

Seminar—3 hours, term paper. Explores the varied ways in which culture is understood in the social sciences and the research questions that follow from contrasting viewpoints. The approach is historically informed and focused on changing cultural forms in relation to industrialization and post-modernism. Offered in alternate years.—(I.)

**226. Sociological Social Psychology (4)**

Seminar—3 hours; seminar paper—1 hour. Prerequisite: graduate standing or consent of instructor. Advanced study of the varying approaches, methods, issues and topical concerns of sociological social psychology. Analysis of central and representative historical and contemporary works.—(II.)

**227. Sociology of Reproduction (4)**

Lecture—3 hours; discussion—1 hour. Recent social science scholarship in such areas as teenage pregnancy, family planning, abortion, adoption, AIDS, and new reproductive technologies; focus on the current situation in the United States. Offered in alternate years.

**230. Ethnic (Race) Relations (4)**

Lecture—3 hours; term paper. Advanced study of the determinants of ethnic groupings and their interrelationships. Major theme will be the patterns of ethnic stratification and causes of ethnic conflict. Specific focus upon dominance and resistance to dominance. Influence of social science research.—(III.)

**233. Gender, Culture, and Local/Global Transformation (4)**

Seminar—3 hours; term paper. Focus on critical approach to women and development; analyze local transformations with global connections within specific cultural contexts. Course covers theory, methodological issues, and relationship between theory and practice. Offered in alternate years.—III.

**234. Gender, Family, and Society (4)**

Seminar—3 hours; seminar paper. Prerequisite: graduate standing or consent of instructor. The major theoretical traditions and concerns in family sociology and sociology of gender. Analysis of selected classical and contemporary works representative of functionalist, Marxist, psychoanalytic, feminist and critical theoretical approaches to these subjects (e.g., Engels, Parsons, Freud, Horkheimer, Goode, Lasch, Mitchell). Emphasis on macro and historical questions.—(III.)

**242A-242B. Comparative Methods in Historical Sociology (4-4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative approaches to major historical phenomena such as nationalism, bureaucratization, feudalism, and capitalism; the relevance of psychological and sociological theories to historical interpretation; the verifiability of historically grounded hypothesis; the meaning of analogy, correspondence and causality. (If taken as a sequence, deferred grading only, pending completion of sequence.)—I, II, (I, II.)

**243. Urban Society (4)**

Seminar—3 hours; term paper. Broad overview of the issues and concerns of the field of urban sociology. Special emphasis on the human experience of urban living in contemporary, cross-cultural or historical settings. I. (I.)

**245. Developing Societies (4)**

Seminar—3 hours; term paper or project. Prerequisite: graduate student status or familiarity with problems of developing societies. Analysis of social and economic problems of developing societies from the standpoint of theory and research on modernization and underdevelopment. Nature of third world dependency and interdependence in the global political economy. Offered in alternate years.—(I.)

**248. Social Movements (4)**

Seminar—3 hours; term paper. Analysis of current issues in and contributions to the study of collective behavior and social movements; particular focus upon the strategies and tactics of social movements.—(III.)

**254. Sociological Issues in Health Care (4)**

Seminar—3 hours; term paper. Prerequisite: open to graduate or professional students. Sociological perspectives and methods directed to health care issues. Students select topics for supervised research. The course will have a theme (described in advance) each time it is offered. Paper on research will be required. (S/U grading only.)—I.

**255. Sociology of Law (4)**

Seminar—4 hours. Prerequisite: consent of instructor. Analysis of the nature of the legal process and its impact on social behavior. Will consider (1) nature and functions of law, (2) the organization and administration of law, and (3) the capacity of law to affect social behavior.

**265A. Classical Sociological Theory (4)**

Lecture—3 hours; discussion—1 hour. Introduces graduate students to the work of the main classical thinkers in the tradition of social theory, such as Marx, Durkheim, Weber, Simmel, Freud, G.H. Mead, and Parsons, locating them within the historical, cultural, and philosophical milieu in which their ideas originated.—II. (II)

**265B. Theory in Contemporary Sociology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 265A. Explores the uses of theories in contemporary sociology by tracing their connections with classical sociological writings and their relations to broader theoretical concerns of contemporary social thought, with particular emphasis on relevance to the current historical, cultural and social milieu.—III. (III.)

**270. Social Demography (4)**

Seminar—4 hours. Prerequisite: course 170 or consent of instructor. How social institutions affect and are affected by the level and variation of mortality, migration, and fertility. Special emphases on the determinants of fertility-related attitudes and behavior, on less-developed countries, and on contemporary empirical studies.

**280. Organizations and Institutions (4)**

Seminar—4 hours. Theory of formal organizations and bureaucracy. Methods of research in organizational and institutional studies. Historical and comparative analysis of political, religious, educational, military, and economic structure.—(III.)

**290. Seminar (4)**

Seminar—3 hours; term paper. (S/U grading only.)

**292A-292B. Field Research (4-4)**

Seminar—3 hours; field trips. Prerequisite: graduate standing in Sociology or consent of instructor. The process of collecting, analyzing and reporting qualitative social data: techniques of intensive interviewing, participant-observation and document analysis; generating, developing, and evaluating analytic frameworks; recording, storing, retrieving, and writing up qualitative data. Emphasis on application of principles; each participant completes a fieldwork project. (Deferred grading only, pending completion of sequence.)—I, II. (II.)

**293. Proseminar in Sociology (2)**

Seminar—2 hours. Prerequisite: first-year Sociology graduate students only. Introduction to graduate training in sociology. A seminar designed to intro-

duce students entering graduate work in the department to its ongoing research activities. (S/U grading only.)—(I.)

**295. Special Topics Seminar. (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Research topics in Sociology. Specific topic will vary according to faculty interest and student demand. May be repeated for credit when topic differs.—I, II, III. (I, II, III.)

**298. Group Study (1-5)**

Prerequisite: consent of instructor. (S/U grading only.)

**299. Individual Study (1-12)**

(S/U grading only.)

**Professional Courses****390A. The Teaching of Sociology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing; required for first-time teaching assistants. Practical instruction in teaching methods for qualitative and quantitative courses. Pedagogical issues involved in critical sociological analysis. (S/U grading only.)—I. (I.)

**390B. The Teaching of Sociology (2)**

Lecture—1 hour; discussion—1 hour. Prerequisite: graduate standing. Practical instruction in devising course syllabi, lectures and assignments for Associate-Instructors and others interested in college teaching. Discussion of pedagogical methods of teaching qualitative and quantitative courses. (S/U grading only.)—II. (II.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**Professional Course****466. Research Paper Workshop (2)**

Workshop—1.5 hours; discussion—0.5 hours. Prerequisite: Master of Arts standing. A workshop to assist advanced graduate students in the preparation of an original research paper. Students present their research papers and discuss issues in theory, research design, data, empirical inference, and verbal and written presentation of a professional research paper. (S/U grading only.)

**Soil Science**

---

See [Geology](#), on page 284; [Soil Science](#), on page 447; [Soils and Biogeochemistry \(A Graduate Group\)](#), on page 449; and [Soil and Water Science](#), on page 449.

---

**Soil Science**

---

(College of Agricultural and Environmental Sciences)

**Faculty**

See under the Department of [Land, Air, and Water Resources](#), on page 320.

**Major Programs.** See the major in [Soil and Water Science](#), on page 449.

**Minor Program Requirements:**

The Department of Land, Air, and Water Resources, Soils and Biogeochemistry Program, offers a minor program in soil science. The minor is especially geared toward students in the environmental sciences including Hydrologic Science, Environmental and Resource Sciences, Environmental Toxicology, Agricultural Management and Rangeland Resources, International Agricultural Development, Crop Science and Management, Environmental Biology and

Management, Environmental Horticulture and Urban Forestry, Geology, and Plant Biology.

## UNITS

**Soil Science ..... 21**

Soil Science 100 ..... 5  
 Courses selected from Soil Science 105, 107, 109, 111, 112, 118, 120, Plant Biology 158, Hydrologic Science 124, 134 ..... 16

**Minor Adviser.** R.J. Southard (*Land, Air, and Water Resources*)

**Graduate Study.** Programs of study leading to the M.S. and Ph.D. degrees in Soils and Biogeochemistry are available. Information regarding these programs can be obtained from the graduate advisers, at <http://soils.ucdavis.edu/> and in the Graduate Announcement. See also *Graduate Studies*, on page 97, in this catalog.

**Graduate Adviser.** R. Zasoski (*Land, Air, and Water Resources*)

**Courses in Soil Science (SSC)**

Questions pertaining to the following courses should be directed to the instructor, to the Resource Sciences Teaching Center in 1152 Plant and Environmental Sciences Building (530) 752-1669, or see undergraduate and graduate Soils and Biogeochemistry courses at [http://lawr.ucdavis.edu/undergrad\\_sws.htm](http://lawr.ucdavis.edu/undergrad_sws.htm) or [http://lawr.ucdavis.edu/graduate\\_sbg.htm](http://lawr.ucdavis.edu/graduate_sbg.htm).

**Lower Division Courses****10. Soils in Our Environment (3)**

Lecture—3 hours; independent study. Soils in our global ecosystem; soils as natural bodies formed by interactive environmental processes; soil response to use and management; sustainable use of soil resources; role of soils in agricultural and environmental issues; role of soils in our daily lives. Limited enrollment. GE credit: SciEng.—I. (I.) Dahlgren

**92. Soil Science Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.)

**Upper Division Courses****100. Principles of Soil Science (5)**

Lecture—3 hours; laboratory—3 hours; term paper. Prerequisite: Chemistry 2A-2B, Physics 1A-1B, Biological Sciences 1A; Geology 50, Biological Sciences 1C recommended. Soil as part of natural and managed ecosystems and landscapes. Solid, liquid, and gas phases and their interactions in the soil. Water, gas and heat movement in soil. Soil biology. Plant nutrient acquisition and use. Soil development, management and use.—I. (I.) Singer

**102. Soil and Water Chemistry (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: course 100 or the equivalent. Soil solution and solid-phase chemistry of soils in relation to agricultural and environmental concerns. Interactions between soil solids, precipitates and solution phases: mineralogy, ion exchange, adsorption, weathering and buffering, soil colloidal behavior, models of solution and solid-phase interactions.—II. (II.)

**105. Field Studies of Soils in California Ecosystems (5)**

Prerequisite: courses 100 and 120, or equivalent recommended. Field-based studies of soils in California ecosystems, away from campus, throughout California. Emphasis on description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes in soils on the landscape; and the role of soils in land use. May be repeated one time for credit.—IV. (IV.) Amundson, Dahlgren, O'Geen, Singer, Southard

**107. Soil Physics (5)**

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 100, Environmental and Resource Sciences 100, Mathematics 16A, or the equivalent. Physical properties of soil. Principles of water, gas, heat, and solute movement in soil with selected examples related to soil and water management. Influence of soil properties on transfer processes.—I. (I.) Hopmans

**109. Nutrient Cycling and Management (5)**

Lecture—3 hours; discussion—1 hour; laboratory—3 hours. Prerequisite: course 100 or the equivalent. Plant nutrients in soil; effects of fertilizers, cover crops, compost and other amendments on plant productivity and soil quality; nutrient sustainability in alternative agricultural and natural ecosystems; soil fertility assays.—III. (III.) Horwath

**111. Soil Microbiology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 1C and Biological Sciences 1C. Major groups of microorganisms in soil, their interrelationships, and their responses to environmental variables. Role of microorganisms in cycling of nutrients. Plant-microbe relationships. Transformations of organic and inorganic pollutants.—II. (II.) Scow

**112. Soil Ecology (3)**

Lecture—2 hours; laboratory/discussion—2 hours. Prerequisite: Biological Sciences 1B, 1C, course 100. The biology and ecology of soil communities, emphasizing the soil food web and litter decomposition. Role of specific biota, ranging from microorganisms to earthworms. Applications to restoration, remediation, ecosystem science, and agriculture. GE credit: Wrt.—I. (I.) Jaffee

**118. Soils in Land Use and the Environment (4)**

Lecture—3 hours; discussion—1 hour; one one-day field trip. Prerequisite: course 100 or consent of instructor. Soils are considered as elements in land use planning and environmental quality. Topics include: soil survey reports, remote sensing, land capability classification, soil erosion/conservation, waste disposal on soils and soil reclamation.—III. (III.) Singer

**120. Soil Genesis, Morphology, and Classification (5)**

Lecture—4 hours; laboratory—3 hours (includes five one-day weekend field trips). Prerequisite: course 100; Geology 50 recommended. Recognition and description of soils; chemical, biological and physical processes of soil formation. Factors of soil formation. Interactions of soils with diverse ecosystems. Introduction to soil classification. Practice using soil taxonomy. Practical experience describing soil properties in the field.—III. (III.) Southard

**192. Soil Science Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****202. Topics in Advanced Soil Chemistry (3)**

Lecture/discussion—3 hours. Prerequisite: undergraduate course in soil chemistry, water chemistry, or consent of instructor. Reviews of current research in soil chemistry. Topics include double layer theory; clay mineral and oxide surface chemistry; adsorption on soil surfaces; speciation and modeling of solution ions; solubility and mineral stability diagrams. Discussion of current journal articles. May be repeated once for credit when topic differs. Offered in alternate years.—II. Zasoski

**205. Field Studies of Soils in California Ecosystems (5)**

Fieldwork—50 hours; discussion—15 hours; lecture—5 hours. Prerequisite: courses 100 and 120 or equivalent recommended. Field-based soil studies in California ecosystems. Description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes; their role in land use. Similar to SSC 105; requires additional work for graduate credit. May be repeated once for credit if geographic locale changes. Limited enrollment.—IV. (IV.) Amundson, Dahlgren, Singer, Southard

**208. Soil-Plant Interrelationships (3)**

Lecture—3 hours. Prerequisite: course 100, Plant Biology 111B, or consent of instructor. Plant needs, occurrence and reactions of water and mineral nutrients in soils; root systems and their growth in soils; mass flow and diffusion mechanisms in nutrient acquisition; models relating nutrient uptake to soil and plant characteristics; nutrient assimilation and crop quality. Offered in alternate years.—(II.) Richards

**209. Physiology and Ecology of Mycorrhizal Symbioses (3)**

Lecture/discussion—3 hours. Prerequisite: Plant Biology 111 or consent of instructor; course 100 recommended. Structure, function and evolutionary development of mycorrhizal fungi and the root-fungal symbiosis. Emphasis on regulation of carbon and nutrient exchanges between host and symbiont. Course integrates mycorrhizal physiology and ecology in an ecosystem context. Offered in alternate years.—(I.) Bledsoe

**211. Advanced Soil Microbiology (3)**

Lecture—3 hours. Prerequisite: Chemistry 8A-8B; course 111; Biological Sciences 102, 103 or an equivalent course recommended. Microbial metabolism of organic chemicals in soil, both natural and xenobiotic. Decomposition of organic matter. Kinetics of microbial processes in soil. Offered in alternate years.—(III.) Scow

**216. Physical Geochemistry (3)**

Lecture—3 hours. Prerequisite: course 102 or Chemistry 110A or Geology 115 and Mathematics 119. First half emphasizes equilibrium thermodynamics, including choices of standard states, ideal solutions, and use of the Gibbs-Duhem relation. Second half covers geochemical kinetics including simple rate laws, transition state theory, solute diffusion, and experimental methods.—I. (I.) Casey

**218. Soil Erosion and Conservation (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: graduate standing; courses 118, 120. Processes of soil erosion by wind and water in agricultural areas, and methods of soil conservation will be discussed. Methods of predicting rates of soil erosion will be considered. Offered in alternate years.—(II.) Singer

**219. Ecosystem Biogeochemistry (4)**

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: introductory courses in ecology/biology and soils recommended; undergraduates accepted with consent of instructor. Multidisciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as Ecology 219.)—III. (III.) Dahlgren

**220. Pedology (3)**

Lecture—3 hours. Prerequisite: consent of instructor; course 120 recommended. Topics selected from studies of soil-forming processes, soil-geomorphic relations, mineral weathering, new developments in soil classification, and development of pedologic theory. Topics vary from year to year. May be repeated once for credit. Offered in alternate years.—(I.) Southard

**222. Organic Chemistry of Soil (3)**

Lecture—3 hours. Prerequisite: Chemistry 8A, 8B, Mathematics 16A, 16B, course 100 or the equivalent. Structure and function of soil organic matter,

biochemistry of humic substance formation, relationship of organic matter to nutrient cycling and sustainability in agricultural and natural ecosystems, reactions of organics with humic substances in soil and water, methods for characterization. Offered in alternate years.—II. Horwath

### 290. Special Topics in Soil Science (1)

Seminar—1 hour. Prerequisite: graduate standing. Oral presentation and discussion of scientific material and procedures for review and critique of publications. (S/U grading only.)—I, III. (I, III.)

### 298. Group Study (1-5)

Prerequisite: consent of instructor.

### 299. Research (1-12)

(S/U grading only.)

## Professional Course

### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## Soils and Biogeochemistry (A Graduate Group)

Louise E. Jackson, Ph.D., Chairperson of the Group

**Group Office.** 1152 Plant & Environmental Sciences Building  
(530) 752-1669; <http://soils.ucdavis.edu/>

Victor Claassen, Ph.D., Assistant Researcher Soil Scientist  
Stephen Gattan, Ph.D., Specialist in Cooperative Extension

Richard Higashi, Ph.D., Assistant Research Chemist  
Kassimira Hristova, Ph.D., Assistant Research Soil Scientist

Jeffrey P. Mitchell, Ph.D., Specialist in Cooperative Extension

A. Toby O'Geen, Ph.D., Assistant Soil Resource Specialist in Cooperative Extension

G. Stuart Pettygrove, Ph.D., Soils Specialist in Cooperative Extension

**Graduate Study.** The Soils and Biogeochemistry Graduate Group offers programs of study and research leading to the M.S. and Ph.D. degrees. Soils and biogeochemistry focuses on study of the physical, chemical and biological processes that occur in soils of different landforms and ecosystems. The goal is to understand the complex processes of mass and energy flow that control agricultural and natural ecosystem functions, productivity, and sustainability. These studies assess impacts and implications of natural processes and anthropogenic effects, such as climate change, on soil and ecosystem behavior and development. Examples include: pesticide and trace element adsorption on surfaces; mineral weathering; fate and transport of native and applied chemicals; soil microbial ecology; fate and emission of greenhouse gases; soil carbon sequestration; nutrient uptake and management; nutrient cycling in managed and wildland ecosystems; organic agriculture; bioavailability of toxics; soil erosion; conservation; ecosystem productivity and sustainability; and the study of soil evolution on the landscape. These studies are carried out within a framework of integrating applied chemical, physical, mathematical, and biological sciences.

**Graduate Advisers.** C.S. Bledsoe, K.M. Scow (*Land, Air, and Water Resources*)

**Graduate Admissions Officer.** Wendy K. Silk (*Land, Air, and Water Resources*), (530) 752-0686; [wksilk@ucdavis.edu](mailto:wksilk@ucdavis.edu).

## Soil and Water Science

(College of Agricultural and Environmental Sciences)

### The Major Program

Soil and water science is concerned with the use and protection of our land and water resources. The major teaches graduates sound scientific principles for managing soil and water resources to benefit both agriculture, forestry and the environment.

**The Program.** Major programs include land use, soil survey, soil management and conservation, plant nutrition, diagnostic technology, irrigation and drainage, water resources management, water quality, and related environmental problems; for example, the emphasis on water quality would include more than the minimum number of units of physical and biological sciences, while an emphasis in resource allocation and land-use planning would include more courses in the social, political, and economic areas.

**Internships and Career Alternatives.** Before they graduate, many students receive practical work experience through student internships with state and federal agencies, soil and plant labs, and growers. Students also have the opportunity to work on research projects with faculty members and to develop individual research or study topics. Graduates are qualified for managerial and technical positions with environmental and agricultural businesses. They are also prepared for positions in advising, planning, land appraisal, and research and teaching with private, government, and international organizations involved with soil and water development, use, and conservation. Some graduates also continue in master's and doctoral programs in soil science, hydrologic science, ecology, and plant physiology.

## B.S. Major Requirements:

UNITS

### English Composition Requirement .....4-12

See College requirement.....0-8  
Communication 1 .....4

### Preparatory Subject Matter .....74

Biological Sciences 1A, 1B, 1C.....15  
Chemistry 2A-2B-2C and a more advanced course .....18  
Agricultural Management and Rangeland Resources 21 or Engineering 5 or one Ecology course with adviser's approval .....3  
Economics 1A, 1B .....5  
Geology 50 .....3  
Mathematics 16A, 16B .....6  
Physics 7A-7B-7C .....12  
Statistics 13, 100 or Agricultural Management and Rangeland Resources 120 .....4  
Additional physical sciences, biological sciences, and/or mathematics with approval of adviser .....8

### Breadth/General Education .....15-33

Satisfaction of General Education requirement.....6-24  
At least one upper division course from each of the following areas, with approval of adviser, (1) resource management, (2) environmental law, (3) environmental economics and decision making .....9

### Depth Subject Matter .....30

Soil Science 100 .....4  
Environmental and Resource Sciences 100, 100L .....6  
Additional upper division units in soil science and hydrologic science .....20

### Restricted Electives .....27

To supplement or expand areas of student interest selected with approval of adviser .....24  
Special study or experience; 192 or 199 course in the major area .....3

### Unrestricted electives .....4-30

### Total Units for the Degree .....180

**Major Adviser.** W. Horwath (*Land, Air, and Water Resources*)

**Advising Center** for the major is located in 1152 Plant & Environmental Sciences Building (530) 752-1669. Contact Merlyn Potters at [mmpotters@ucdavis.edu](mailto:mmpotters@ucdavis.edu).

**Graduate Study.** Graduate programs are available in Soils and Biogeochemistry as well as Hydrologic Sciences. Detailed information can be obtained from the Graduate Advisers and the Graduate Announcement. See also [Graduate Studies](#), on page 97, in this catalog.

**Courses.** For specific courses of instruction in this major, see course listings under Atmospheric Science, Plant Science, Environmental and Resource Sciences, Soil Science, and Hydrologic Science.

**Related Courses.** See courses in Agricultural and Resource Economics, Agricultural Management and Rangeland Resources, Applied Biological Systems Technology, Chemistry, Biological and Agricultural Engineering, Civil and Environmental Engineering, Environmental Science and Policy, Environmental Toxicology, Geology, International Agricultural Development, Plant Biology, Vegetable Crops, and Viticulture and Enology.

## Spanish

(College of Letters and Science)

Emilio Bejel, Chairperson of the Department

**Department Office.** (Spanish and Classics), 616 Sproul Hall (530) 752-0835; <http://spanish.ucdavis.edu>

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

**Faculty**

Marta E. Altisent, Ph.D., Associate Professor  
 Samuel G. Armistead, Ph.D., Professor  
 Emilio Bejel, Ph.D., Professor  
 Robert Blake, Ph.D., Professor  
 Travis Bradley, Ph.D., Assistant Professor  
 Cecilia Colombi, Ph.D., Associate Professor  
 Michael Lazzaro, Ph.D., Assistant Professor  
 Linda Egan, Ph.D., Associate Professor  
 Cristina González, Ph.D., Professor  
 Robert Irwin, Ph.D., Associate Professor  
 Adrienne Martín, Ph.D., Associate Professor  
 Christine Martínez-Carzo, Assistant Professor  
 Almerindo E. Ojeda, Ph.D., Associate Professor  
 (Linguistics)  
 Ana Peluffo, Ph.D., Assistant Professor

**Emeriti Faculty**

Zunilda Gertel, Ph.D., Professor Emerita  
 Mario González, Ph.D., Lecturer Emeritus  
 Didier T. Jaén, Ph.D., Professor Emeritus  
 Daniel S. Keller, Ph.D., Professor Emeritus  
 Fabián A. Samaniego, M.A., Senior Lecturer Emeritus  
 Robert M. Scari, Ph.D., Professor Emeritus  
 Hugo J. Verani, Ph.D., Professor Emeritus

**Affiliated Faculty**

Francisco Alarcón, M.A., Lecturer  
 Norma López-Burton, M.A., Lecturer

**The Major Program**

The Spanish major program assures proficiency in all four language skills—speaking, understanding, reading, and writing—and acquaints students with the intellectual and cultural contributions of the Spanish-speaking world through a study of its language, literature, and traditions.

**The Program.** The department's lower division program gives students a solid foundation in the Spanish language, either through the traditional elementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. Linguistics 1 introduces students to a systematic study of language in general and serves as an introduction to upper division courses in Spanish linguistics. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary and cultural criticism and to the four areas of study represented in the department's curriculum: Spanish linguistics, Spanish literature and culture, Spanish-American literature and culture, and Hispanic literatures and cultures in the United States. Students are encouraged to work closely with the department's academic advisers in designing a program of studies tailored to their individual needs and interests. Many students combine the Spanish major with another major in the humanities or social sciences.

**Career Alternatives.** The program, alone or in combination with other major programs, may lead to advanced study of the language or literature and culture of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, business, or international relations.

**A.B. Major Requirements:**

	UNITS
<b>Preparatory Subject Matter</b> .....	<b>4-37</b>
Spanish 1, 2, 3, 21, 22, 23, and 24 ..	0-33
or Spanish 31, 32, 33 .....	0-15
Linguistics 1 .....	4
In consultation with a departmental adviser and with the consent of the department chairperson, Linguistics 1 may be taken concurrently with upper division courses.	

**Depth Subject Matter** ..... **45-48**

One course in each of the following five areas .....

Spanish 100 .....	4
Spanish 111N, 115, or 116 .....	3-4
Spanish 130, 131N, or 134N .....	4
Spanish 150N, 151N, or 157 .....	4
Spanish 117, 174, or 176 .....	4

Students planning to take Spanish 110 should do so at the beginning of the upper division sequence or concurrently with Spanish 100.

Seven elective courses to be chosen in consultation with the student's major adviser .....

No more than seven electives may be taken with EAP, preferably concentrated in two of the following areas. Other combinations are possible with the approval of the major adviser:

- (a) Spanish literature
  - (b) Spanish-American literature
  - (c) Chicano/Latino literature
  - (d) Spanish linguistics
- Students may, with the approval of their adviser, take up to three elective courses outside the Spanish department in such programs as Anthropology (Anthropology 144, 146), Chicana/o Studies (Chicana/o Studies 154, 155, 156, 160, 171), Comparative Literature 152, Education (Education 151, 152), History (History 161A, 161B, 164, 165, 166A, 166B, 167, 168, 169A, 169B), and Linguistics (Linguistics 166).

A maximum of six units of course 199 may be counted toward the major. Course 199 cannot be used to replace regular departmental courses.

**Total Units for the Major** ..... **49-85**

**Major Advisers.** Consult Department.

**Advising.** Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major adviser. This is especially important for students who intend to use their major as preparation for graduate study, for those who are planning a teaching career, and for those who wish to take advantage of our EAP options.

**Minor Program Requirements:**

	UNITS
<b>Spanish</b> .....	<b>23-24</b>

One course in each of the following five areas:

Spanish 100 .....	4
Spanish 111N, 115, or 116 .....	3-4
Spanish 130, 131N, or 134N .....	4
Spanish 150N, 151N, or 157 .....	4
Spanish 117, 174, or 176 .....	4

One upper division elective in Spanish .....

Consult a departmental adviser if any of these courses are to be taken abroad.

**Honors Program.** Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least six units of Spanish 194H distributed over two quarters. Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.

**Education Abroad Program Options.** The department encourages its majors to consider study in a Spanish-speaking country with our Education Abroad Program (EAP). It is now possible for our students to complete significant portions of the Spanish major in the EAP centers at both the lower (Prepara-

tory Subject Matter) and upper division levels through newly introduced options.

**Short Term Language and Culture Programs.**

A Short Term Program Abroad is offered in Mendoza, Argentina and in Santander, Spain. These programs aim at providing students with opportunities to increase their knowledge of the Spanish language and the Latin American culture by experiencing the life-learning challenges of living and studying abroad.

Students will earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program has an upper division course taught by the UC Davis Program Director focusing on history, culture and society.

For more information, contact C. Colombi or see <http://shorttermabroad.ucdavis.edu>.

**Teaching Credential Subject Representative.** C. Colombi; see the Teaching Credential/M.A. Program on page 102.

**Graduate Study.** The Department offers courses leading to the M.A. degree in Spanish to students who have completed with distinction the A.B. degree in Spanish, or the equivalent. Candidates will be recommended for admission to graduate studies in Spanish provided they meet the requirements of the Graduate Studies office and the Department of Spanish. The Department also offers programs of study and research leading to the Ph.D. degree. Detailed information may be obtained by writing to the Chairperson or the Graduate Director of the Spanish Department.

**Graduate Adviser.** Consult Department.

**Prerequisite Credit.** Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

**Courses in Spanish (SPA)**

Course placement: Students with two years of high school Spanish normally take Spanish 2, those with three years take Spanish 3, and those with four years take Spanish 21. It is recommended that transfer students who have successfully completed a two-year sequence at the junior college level continue their study by taking Spanish 24 or 100. Consult a departmental adviser.

**Lower Division Courses**

**1. Elementary Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit to students who have completed course 1S. Students who have successfully completed Spanish 2 or 3 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.—I, II, III. (I, II, III.)

**1S. Elementary Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 1.—III.

**2. Elementary Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 1 or 1S. Continuation of courses 1 and 1S in the areas of grammar and basic language skills. Not open for credit to students who have completed course 2S.—I, II, III. (I, II, III.)

**2S. Elementary Spanish (5)**

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 1 or 1S. Continuation of Spanish 1 in the areas of grammar and basic language skills. Offered in a Spanish speaking country under

the supervision of UC Davis faculty/lecturer. Not open for credit to students who have completed course 2.—III.

### 2V. Elementary Spanish (5)

Lecture/discussion—2 hours; web electronic discussion—3 hours. Prerequisite: course 1 or 1S. Continuation of course 1 or 1S in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials. Not open to students who have taken course 2 or 2S.—I, II, III, IV. (I, II, III, IV.)

### 3. Elementary Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2 or 2S. Completion of grammar sequence and continuing practice of all language skills using cultural texts. Not open for credit to students who have completed course 3S.—I, II, III. (I, II, III.)

### 3S. Elementary Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 2 or 2S. Completion of grammar sequence and continuing practice of all language skills using cultural texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 3.—III. (III.)

### 3V. Elementary Spanish (5)

Lecture/discussion—2 hours; web electronic discussion—3 hours. Prerequisite: course 2, 2S, or 2V. Completion of grammar sequence and continuing practice of all language skills using cultural texts. Hybrid format combining classroom instruction with technologically based materials. Not open to students who have taken course 3 or 3S.—I, II, III, IV. (I, II, III, IV.)

### 8. Elementary Spanish Conversation (2)

Discussion—3 hours. Prerequisite: course 3; course 21 (concurrently) recommended. Designed to develop oral communication skills. Emphasis on increasing vocabulary, improving listening comprehension, pronunciation, accuracy and grammar control. Practice of everyday situations. Not open to native speakers or to upper division students.—I, II, III. (I, II, III.)

### 21. Intermediate Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 3 or 3S. Review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Students transferring from other institutions are recommended to start the second year program at this point. Not open for credit to students who have completed course 21S.—I, II, III. (I, II, III.)

### 21S. Intermediate Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 3 or 3S. Review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Students transferring from other institutions are recommended to start the second year program at this point. Not open for credit to students who have completed course 21.—III. (III.)

### 22. Intermediate Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 21 or 21S. Continuation of course 21 and 21S. Focus on more difficult grammar concepts and further practice on composition. Development of all language skills through exercises and reading of modern texts. Not open for credit to students who have completed course 22S.—I, II, III. (I, II, III.)

### 22S. Intermediate Spanish (5)

Lecture/discussion—5 hours; laboratory—1 hour. Prerequisite: course 21 or 21S. Continuation of course 21 and 21S. Focus on more difficult grammar concepts and further practice on composition. Development of all language skills through exercises and reading of modern texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 22.—III. (III.)

### 23. Spanish Composition I (4)

Lecture—3 hours; extensive writing. Prerequisite: course 22 or 22S. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Not open for credit to students who have completed 23S.—I, II, III. (I, II, III.)

### 23S. Spanish Composition I (4)

Lecture—3 hours; extensive writing. Prerequisite: course 22. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Course is taught in a Spanish speaking country. Not open for credit to students who have completed course 23.—III.

### 24. Spanish Composition II (4)

Lecture—3 hours; extensive writing. Prerequisite: course 23 or 23S. Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres.

Compositions, journals, individual and group projects. Not open for credit to students who have completed course 24S.—I, II, III. (I, II, III.)

### 24S. Spanish Composition II (4)

Lecture—3 hours; extensive writing. Prerequisite: course 23. Development of advanced level writing skills, with particular emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. Course is taught in a Spanish speaking country. Not open for credit to students who have completed course 24.—III.

### 28. Intermediate Spanish Conversation (2)

Discussion—3 hours. Prerequisite: course 8 or 22. Continuation of course 8. Designed to develop oral communication skills at a more advanced level. Practice in more complex situations. (Former course 9.)—I, II, III. (I, II, III.)

### 31. Intermediate Spanish for Native Speakers I (5)

Lecture/discussion—3 hours; tutorial—1 hour; frequent writing assignments. Prerequisite: course 3 or the equivalent, or consent of instructor. First course of a three-quarter series designed to provide bilingual students whose native language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Intensive review of grammar and composition.—I. (I.)

### 32. Intermediate Spanish for Native Speakers II (5)

Lecture/discussion—3 hours; tutorial—1 hour; frequent writing assignments. Prerequisite: course 31 or consent of instructor. Continuation of intensive review of grammar and composition. Development of all language skills through reading of modern texts, presentation/discussion of major ideas, vocabulary expansion, and writing essays on topics discussed. Designed for students whose native language is Spanish. (Former course 7B.)—II. (II.)

### 33. Intermediate Spanish for Native Speakers III (5)

Lecture/discussion—3 hours; tutorial—1 hour; frequent writing assignments. Prerequisite: course 32 or consent of instructor. Development of writing skills, with emphasis on experimenting with various writing styles: analytical, argumentative, and creative. Analytical review of literary genres. Written essays will be assigned. Students will develop a research paper. Designed for students whose native language is Spanish. (Former course 7C.)—III. (III.)

### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. Primarily for lower division students. (P/NP grading only.)

### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division Courses

Course 100 is prerequisite to all upper division literature courses.

### 100. Principles of Hispanic Literature and Criticism (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 24S or 33. Principles of literary criticism applied to the study of fiction, drama, poetry, and essay of major literary writers of the Hispanic world. Not open for credit to students who have completed course 100S.—I, II, III. (I, II, III.)

### 100S. Principles of Hispanic Literature and Criticism (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33. Principles of literary criticism applied to the study of fiction, drama, poetry and essay of major literary writers of the Hispanic world. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 100.—III.

### 110. Advanced Spanish Composition (4)

Lecture—3 hours; frequent writing assignments. Prerequisite: course 24 or 33. Practice in expository writing with emphasis on clarity and idiomatic expression. Practical application and review of selected grammar topics. (Part of former courses 110A and 110B.)—I, II, III. (I, II, III.)

### 111N. The Structure of Spanish: Sounds and Words (3)

Lecture—3 hours. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor. A linguistic description of the sound patterns of Spanish and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. (Former course 132.)—I, II, III. (I, II, III.)

### 112N. The Structure of Spanish: Words and Phrases (3)

Lecture—3 hours. Prerequisite: course 111N. A study of Spanish word and phrase structure, with special emphasis on the constituent structure of noun and verb phrases. Theoretical and practical comparisons with English and with other Romance languages. (Former course 131.)—II, III. (II, III.) Blake, Ojeda

### 113. Spanish Pronunciation (4)

Lecture—3 hours; term paper. Prerequisite: Linguistics 1 and course 24 or 33. The sound structure of modern Spanish; theoretical analysis of selected problems in pronunciation. Strongly recommended for prospective teachers of Spanish.—I, II, III. Bradley

### 114N. Contrastive Analysis of English and Spanish (4)

Lecture—3 hours; extensive writing. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor; courses 111N and 112N recommended. Contrastive analysis of English and Spanish, error analysis, introduction to structuralist and transformational linguistics. Individual and group conferences. (Former course 137.)—III. (III.) Colombi, Ojeda

### 115. History of the Spanish Language (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 24S or 33 and Linguistics 1 or consent of instructor. The Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization. Not open for credit to students who have completed course 115S.—I, II, III. (I, II, III.) Blake

### 115S. History of the Spanish Language (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: course 24 or 33 and Linguistics 1 or consent of instructor. The Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization. Offered in a Spanish-

speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 115.—III.

#### 116. Applied Spanish Linguistics (4)

Lecture—3 hours; extensive writing or discussion—1 hour. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor. Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. For students interested in teaching Spanish as a career.—I, II. (I, II.) Blake, Colombi

#### 117. Teaching Spanish as a Native Tongue in the U.S.: Praxis and Theory (4)

Lecture—3 hours; extensive writing. Prerequisite: Linguistics 1 and course 24 or 33, or consent of instructor; course 116 and Linguistics 116 recommended. Designed for students interested in teaching Spanish to native speakers. Focus on cultural diversity of the main Spanish-speaking populations in the U.S.; applied language teaching methodologies in the context of teaching Spanish to native speakers at different levels. Conducted primarily in Spanish.—I. (I.) Colombi, Alarcón

#### 118. Topics in Spanish Linguistics (4)

Lecture—3 hours; term paper. Prerequisite: courses 111 and 112. A study of specialized topics in Spanish linguistics, for example: language and use; text and context; language and society; bilingualism; Spanish dialectology; syntax and semantics. May be repeated once for credit when topic differs.—III. (III.)

#### 123. Creative Writing in Spanish (4)

Discussion—4 hours. Prerequisite: course 24 or 33, or consent of instructor. Intensive writing of poetry or fiction in Spanish or in a bilingual (Spanish/English) format. Students will write both in prescribed forms and in experimental forms of their own choosing. Offered in alternate years.—(III.) Alarcón

#### 130. Survey of Spanish Literature to 1700 (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Survey of Spanish literature (narrative, poetry and drama) to 1700. Emphasis on the multicultural birth of the Spanish culture, the formation and growth of the Spanish language and letters through its written records and the literature of the early period. (Part of former courses 103A and 103B.)—I. (I.) Armistead, Martín

#### 131N. Survey of Spanish Literature: 1700 to Present (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100. Survey of modern Spanish literature, providing an overview of main literary movements (romanticism, realism, naturalism, modernism, avant-garde). Emphasis on the philosophical and historical background and on the European context for modern Spanish literature. (Part of former courses 104A and 104B.)—II. (II.) Altitest

#### 132N. Medieval and Renaissance Spanish Literature (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Introduction to the study of the principal works and authors of Medieval and early 16th-century Spanish literature. (Part of former courses 112 and 103A.)—I. (I.) Armistead

#### 133N. Golden Age Literature of Spain (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Introduction to the study of the principal authors and literary movements of 16th- and 17th-century Spain and Spanish American colonial literature. (Part of former courses 103B, 109 and 115.)—I. (I.) Martín

#### 134N. Don Quijote (4)

Lecture—3 hours; term paper. Prerequisite: course 100. A critical reading of Don Quijote by Cervantes. Focused interpretations of important passages and characters in the context of the socio-cultural background of the period. Don Quijote as prototype for the modern novel. Offered in alternate years. (Former course 111.)—(II.) Martín

#### 135N. Spanish Romanticism (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Romanticism as a philosophical concept, and as a literary movement in Spain, with emphasis on

its distinctive, specific "Romantic" qualities and its literary expression in five leading authors of the early nineteenth century. (Former course 114.)—III. (III.)

#### 136N. The Spanish Novel of the 19th Century (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Literary realism in Spain, focusing on Leopoldo Alas (Clarín), Emilia Pardo Bazán and Benito Pérez Galdós. The unique characteristics of Spanish realism and its historical roots in Cervantes and the picaresque. (Former course 119.)—II. (II.)

#### 137N. Twentieth-Century Spanish Fiction (4)

Lecture—3 hours; term paper. Prerequisite: course 100 or 131. Study of the main literary trends and authors of the modern Spanish novel and short story. Selected works by Unamuno, Valle-Inclán, Sender, Cela, Matute, Ayala and others. (Former course 120A.)—III. (III.) Altitest

#### 138N. Modern and Contemporary Spanish Poetry (4)

Lecture—3 hours; term paper. Prerequisite: course 100 or 131. Study of the main literary trends and authors of modern and contemporary Spanish poetry. Selected works by Machado, Juan Ramón Jiménez, García Lorca, Guillén, Aleixandre, Hernández Hierro and others. Offered in alternate years. (Former course 120C.)—(III.) Altitest

#### 139. Modern Spanish Theater (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Study of the main dramatic trends and playwrights of modern Spanish theater. Selected works by Valle Inclán, García-Lorca, Mihura, Buero-Vallejo, Arrabal and others. Offered in alternate years. (Former course 120B.) GE credit: ArtHum, Div.—(I.) Altitest

#### 140N. Modern Spanish Essay (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Ortega, Unamuno and the modern Spanish essay. Their concept of Spain and their relations with other movements and thinkers.—II. (II.)

#### 141. Introduction to Spanish Culture (4)

Lecture—3 hours; term paper. Prerequisite: course 24, 24S, or 33. Introduction to history, geography and culture of Spain. Art, history of ideas, and everyday cultural manifestations. Introduction to critical reading and textual analysis. Not open for credit to students who have completed course 141S. GE credit: ArtHum, Div.—I. (I.) González, Martínez-Carazo

#### 141S. Introduction to Spanish Culture (4)

Lecture—3 hours; term paper. Prerequisite: course 24, 24S, or 33. Introduction to history, geography and culture of Spain. Art, history of ideas, and everyday cultural manifestations. Introduction to critical reading and textual analysis. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 141. GE credit: ArtHum, Div.—III. (III.) Martínez-Carazo

#### 142. Special Topics in Spanish Cultural and Literary Studies (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Special topics in the study of Spanish literature and culture. May be repeated twice for credit when topic differs. (Part of former course 151.)—I, II, III. (I, II, III.) Armistead, Martín

#### 143. Spanish Art (4)

Lecture—3 hours; term paper or discussion—1 hour. Spanish art and the different historical, sociological and political manifestations that frame it. History of art, including Paleolithic, Roman, Visigothic, Romanesque, Goth, Renaissance, Baroque, Neoclassic and Contemporary art. GE credit: ArtHum—IV. (IV.) Martínez-Carazo

#### 144. Topics in Spanish Cultural Studies (4)

Lecture—3 hours; project. Prerequisite: course 24, 24S, or 33. Study of specific historical tendencies in Spanish culture(s) from the Romans to the present. Sources studied may include literature, film, art, journalism, and performance. Approaches to material may address issues of aesthetics, politics, identity,

and globalization. May be repeated one time for credit. GE credit: ArtHum.—I. (I.) González, Martínez-Carazo

#### 148. Cinema in the Spanish-Speaking World in Translation (4)

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 24 or 24S or 33. Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Not open for credit to students who have completed Spanish 148S. GE credit: ArtHum, Div.—II. (II.) Martínez-Carazo

#### 148S. Cinema in the Spanish-Speaking World in Translation (4)

Lecture—3 hours; film viewing—3 hours. Prerequisite: course 24 or 33. Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Not open for credit to students who have completed course 148. GE credit: ArtHum, Div.—III. (III.) Martínez-Carazo

#### 149. Latin-American Literature in Translation (4)

Lecture/discussion—3 hours; term paper. Prerequisite: English 3 or the equivalent. Reading, lectures and discussions in English of works by Borges, Cortázar, Fuentes, García Márquez, Paz and others. May not be counted toward the major in Spanish. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—(III.) Egan

#### 150N. Survey of Spanish-American Literature to 1900 (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Spanish American literature from prehispanic texts and the Chronicles of the Conquest to Romanticism and Modernism. Reading selections include fiction, poetry, drama and essays. (Former course 105A.)—I. (I.) Egan

#### 151N. Survey of Spanish-American Literature 1900 to Present (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 100. Spanish-American literature from Modernism to the present. Reading selections include fiction, poetry, drama, and essays. (Former course 105B.)—II. (II.) Egan, Bejel

#### 153. Spanish-American Short Story (4)

Lecture—3 hours; term paper. Prerequisite: course 100. The evolution of the Spanish-American short story during the 19th and 20th centuries. Emphasis on the contemporary period. Offered in alternate years. (Former course 128.)—(I.) Egan

#### 154. Spanish-American Novel (4)

Lecture—3 hours; term paper. Prerequisite: course 100. The evolution of the Spanish-American novel during the 19th and 20th centuries. Emphasis on significant contemporary works. Offered in alternate years. (Part of former courses 108A and 108B.)—(II.) Egan

#### 155. Mexican Novel (4)

Lecture—3 hours; term paper. Prerequisite: course 100. The evolution of the Mexican novel during the 19th and 20th centuries. Emphasis on the narrative of the Revolution and significant contemporary works. (Former course 129.)—II. (II.) Egan

#### 156. Darío, Modernism and Its Legacy (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Modernism as an authentic expression of Latin American literature and its influence on 20th-century poetry and prose. In depth analysis of the works of Darío and other major Modernist writers. Offered in alternate years. (Former course 125.)—(II.) Egan

#### 157. 20th Century Masters in Spanish-American Literature (4)

Lecture—3 hours; term paper. Prerequisite: course 100. Study of major 20th-century Spanish-American writers and their cultural and literary milieus. Offered in alternate years. (Part of former courses 127 and 138.)—(III.) Egan, Bejel

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

**158. Spanish-American Poetry: From Vanguardism to Surrealism and Beyond (4)**

Lecture—3 hours; term paper. Prerequisite: course 100. Study of vanguardism, surrealism, and more recent movements of 20th-century poetry. An in-depth analysis of the works of such major poets as Neruda, Vallejo, and Octavio Paz. Offered in alternate years.—(II.)

**159. Special Topics in Spanish-American Literature and Culture (4)**

Lecture—3 hours; term paper. Prerequisite: course 100 or 100S. Special topics in the study of Spanish-American literature and culture. Course 159 and 159S combined may be repeated twice for credit when topic differs.—I, II, III. (I, II, III.) Egan

**159S. Special Topics in Spanish American Literature and Culture**

Lecture—3 hours; term paper. Prerequisite: course 100 or 100S. Special topics in the study of Spanish-American literature and culture. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Course 159S and 159 may be repeated twice for credit when topic differs.—III. (III.)

**160. Latin American Women Writers in Translation (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Latin American women writers from the 19th and 20th centuries. Recent theoretical approaches to literature by women in Latin America. Discussions in English of works by Matto de Turner, Avellaneda, Storni, Ocampo, Agustini, Mistral, Castellanos, and others. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—III. (III.) Peluffo

**170. Introduction to Spanish American Culture (4)**

Lecture—3 hours; term paper—1 hour. Prerequisite: course 24, 24S, or 33. Introduction to history, geography and culture of Spanish America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not open for credit for students who have completed course 170S. GE credit: ArtHum, Div.—III. (III.) Bejel, Irwin, Lazzara, Peluffo

**170S. Introduction to Spanish American Culture (4)**

Lecture—3 hours; project. Prerequisite: course 24, 24S, or 33. Introduction to history, geography and culture of Spanish America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Offered in a Spanish-speaking country. Not open for credit for students who have completed course 170. GE credit: ArtHum, Div.—III. (III.) Colombi

**171. Music from Latin America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e., tango, bossa nova, salsa, música motena, música andina) as well as its implications in other musical genres. Taught in Spanish. Not open to students who have taken course 171S or Music 127. (Same course as Music 171.) Offered in alternate years.—II.

**171S. Music from Latin America (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e., tango, bossa nova, salsa, música motena, música andina) as well as its implications in other musical genres. Taught in Spanish and in a Spanish speaking country under the supervision of UC Davis faculty. Not open to students who have taken course 171 or Music 127.—II. (II.)

**172. Mexican Culture (4)**

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 24 or 33. The development of Mexican culture from the Aztec-Mayan era to the present. Study includes important periods such as the Conquest and Colonialism, the Independence movement, and changes from the Revolution to con-

temporary Mexico. Reading, lectures and discussions in Spanish. (Former course 135.) GE credit: ArtHum, Div.—III. (III.) Egan

**173. Cinema and Latin American Culture (4)**

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 24, 24S, or 33. Understanding Latin American cultures through cinema. History and critical analysis of Latin American film. Focus on a national cinematic tradition. Comparative experiences in different parts of Latin America and/or a particular era. Conducted entirely in Spanish. May be repeated one time for credit. GE Credit: ArtHum, Div.—Irwin

**174. Chicano Culture (4)**

Lecture—3 hours; term paper/discussion—1 hour. Prerequisite: course 24 or 33. An interdisciplinary survey of Chicano culture. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. (Former course 124.) GE credit: ArtHum, Div.—II. (II.) Alarcón

**175. Topics in Spanish American Cultural Studies (4)**

Lecture—3 hours; project—1 hour. Prerequisite: course 24, 24S, or 33. Specific historical tendencies and issues in Spanish American culture(s) from pre-colonial times to present. Sources studied may include literature, film, art, journalism and performance. Approaches to material may address issues of aesthetics, politics, identity, and globalization. May be repeated one time for credit if content differs. GE credit: ArtHum, Div.—III. (III.) Bejel, Irwin, Lazzara, Peluffo

**176. Literature in Spanish Written in the United States (4)**

Lecture—3 hours; term paper. Prerequisite: course 24 or 33. Survey of the literary and cultural contributions of the main Spanish-speaking populations present in the U.S.: Chicanos, Puerto Ricans, Cuban-Americans, Central Americans, and other Latinos. GE credit: ArtHum, Div.—III. (III.) Alarcón

**181. Senior Seminar in Spanish Literature/Culture (4)**

Seminar—3 hours; term paper—1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Spanish literary or cultural studies. Independent research project. May be repeated one time for credit if content differs. Limited enrollment.—II. (II.) Altisent, Armistead, González, Martín, Martínez-Carazo

**182. Senior Seminar in Latin American Literature/Culture (4)**

Seminar—3 hours; term paper—1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Latin American literary or cultural studies. Independent research project. May be repeated one time for credit if content differs. Limited enrollment.—III. (III.) Bejel, Egan, Irwin, Lazzara, Peluffo

**192I. Internship in Spanish (1-12)**

Independent study—3-36 hours. Prerequisite: course 23; junior standing; major in Spanish, Chicano Studies, or a related field. Internships in fields where Spanish language skills can be used and perfected (teaching, counseling, translating/interpreting). May be repeated for credit for a total of 8 units. Units will not count toward the Spanish major. (P/NP grading only.)

**194H. Special Study for Honors Students (1-5)**

Independent Study—3-15 hours. Prerequisite: Senior standing and qualification for the Spanish honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Spanish literature, civilization, or language studies. May be repeated for up to 8 units of credit. (P/NP grading only.)

**197T. Tutoring in Spanish (1-4)**

Tutorial—1-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in undergraduate courses including leadership in small

voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

**197TC. Tutoring in the Community (2-4)**

Tutorial—2-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

May be repeated for up to 6 units of credit (P/NP grading only.)

**Graduate Courses****201. Literary Theory I (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Basic theories and practical approaches to modern and contemporary Hispanic literature. Emphasis on formalism, poststructuralism, socio-cultural discourses, and ideologies.—II. (II.) Bejel

**202. Literary Theory II (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major contemporary critical theories including recent, innovative approaches to Hispanic literature and culture. Readings from Semiotics and Deconstructionism to Psychological and Socio-ideological approaches. Emphasis on Postmodern and Neo-colonial discourse.—III. (III.) Bejel

**205. Spanish Phonology (4)**

Seminar—3 hours; term paper. Prerequisite: some knowledge of phonetics is required and consent of instructor; Linguistics 109 and 139 highly recommended. Analyzes the sound patterns of Spanish from both linear and non-linear perspectives. Students will develop a clear understanding of what phonology is and the nature of Spanish phonology, as defined by modern linguistic analysis.—II. (II.)

**206. Spanish Syntax (4)**

Seminar—3 hours; term paper. Prerequisite: Linguistics 140 and 165. An examination of Spanish word order within the framework of general linguistic theory. The student will investigate how to write a grammar of Spanish with particular attention to the structure of noun and verb clauses.—I. (I.) Blake, Ojeda

**207. History of the Spanish Language (4)**

Seminar—3 hours; term paper. Prerequisite: Latin 1. (Former course 220A.)—I, III. (I, III.) Blake

**208. Old Spanish Texts (4)**

Seminar—3 hours; term paper. Prerequisite: course 207. An in-depth linguistic examination of Old Spanish texts from the 12th to the 15th centuries, with particular attention to the significance of orthographic changes.—II. (II.) Blake

**211. Hispanic Dialectology (4)**

Seminar—3 hours; term paper. Prerequisite: course 220 or consent of instructor. Descriptive and historical study of the distinctive features of Peninsular and American Spanish dialects. (Former course 221.)—III. (III.)

**212. Applied Linguistics (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing and courses 215 and 216 recommended. Focuses on the relevant linguistic aspects of teaching Spanish. Designed for graduate students who have an interest in second-language learning and teaching.—II. (II.) Colombi, Blake

**215. Special Topics in Hispanic Linguistics (4)**

Seminar—3 hours; term paper. Prerequisite: consent of instructor; courses 205 and 206 recommended. Specialized topics in Hispanic linguistics (e.g., pragmatics, sociolinguistics, topics in syntax, semantics, or diachronic studies). May be repeated for credit when topic differs.—III. (III.)

**222. Critical Approaches to Spanish Literature I: Prose and Essay (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical approaches to Spanish narrative and essay. May be repeated twice for credit when topic differs. Offered in alternate years.—II. Altisent, Armistead, Martín

**223. Critical Approaches to Spanish Literature II: Poetry and Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical approaches to Spanish poetry and drama. May be repeated twice for credit when topic differs. Offered in alternate years.—II. Altisent, Armistead, Martín

**224. Studies of a Major Writer, Period, or Genre in Spanish Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Spanish writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor.—III. (III.)

**252. Medieval Spanish Literature: Prose (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of the major genres of Medieval Spanish prose from its origins to 1450.—I. (I.) Armistead

**253. Medieval Spanish Literature: Epic (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Medieval Spanish epic narratives. Major theoretical perspectives on the genesis, diffusion, and character of the Medieval epic. Relationship of epic to ballad literature.—II. (II.) Armistead

**254. Medieval Hispanic Lyric (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Analysis of the most representative lyric poetry in the various Peninsular languages and in provençal, troubadour poetry, *kharjas*, *villancicos*, *cantigas de amigo*, and courtly lyric.—II. (II.) Armistead

**255. Spanish Literature of the Early Renaissance (4)**

Seminar—3 hours; term paper. Spanish Literature, 1450-1550, with emphasis on *La Celestina*. (Former course 229.)—I. (I.) Armistead, Martín

**256. Spanish Literature of the Renaissance and Golden Age: Poetry (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Extensive critical study of the main currents of Renaissance and Baroque Spanish poetry through its language structures, styles ("*Culteranismo-Conceptismo*"), rhetorical devices, myths, and themes (love, death, time).—I. (I.) Martín

**257. Spanish Literature of the Renaissance and Golden Age: Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of major 16th and 17th century literary and cultural developments through the study of selected dramas.—I. (I.) Martín

**258. Spanish Literature of the Renaissance and Golden Age: Prose (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The origins and development of the Spanish novel during the Renaissance and the Spanish Golden Age.—I. (I.) Martín

**259. Cervantes and the Novel (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The narrative works of Miguel de Cervantes with special emphasis on *Don Quijote*.—I. (I.) Martín, Armistead

**260. Modern Spanish Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics of Spanish literature, from 1700-1920.—I. (I.)

**261. Contemporary Spanish Literature: Poetry (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical analysis of modern Spanish poetry from a wide spectrum of poetic currents.—I. (I.) Altisent

**262. Contemporary Spanish Literature: Narrative (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the 20th-century novel and short story with emphasis on the avant-garde, existentialism, social realism, and postmodern trends. May be repeated twice for credit when topic differs and with consent of instructor.—III. Altisent

**263. Contemporary Spanish Literature: Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The Spanish theatrical production of the last 70 years.—I. (I.) Altisent

**264. Contemporary Spanish Literature: Essay (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major thinkers from Gánivet to Unamuno and Ortega y Gasset. Emphasis will be placed on the relationships between Spanish thought and European philosophical currents. Offered in alternate years.—(III.)

**265. Women Writers of Spain (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Introduction to the development of a feminine consciousness in the Spanish contemporary literary scene. Selected texts represent particularly innovative typologies of feminine discourse in the realm of the historical, psycho-analytical, and metafictional, erotic, and allegorical fiction.—I. (I.) Altisent

**272. Critical Approaches to Spanish American Literature: Narrative (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development of Spanish-American literary periods and currents in narrative (novel, short story, and essay), from early Colonial times to the present. May be repeated twice for credit when topic differs. Offered in alternate years.—Egan, Bejel, Larsen

**273. Critical Approaches to Spanish American Literature: Poetry and Drama (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development of Spanish-American literary periods and currents in poetry and drama, from early Colonial times to the present. May be repeated twice for credit when topic differs. Offered in alternate years.—Egan

**274. Studies of a Major Writer, Period, or Genre in Spanish-American Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Spanish-American writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor.—I. (I.)

**275. Colonial Literature (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing and consent of instructor. An examination of pre-Hispanic and Colonial narrative, poetry and theatre. Emphasis on historical, anthropological, and ethnographic approaches to Colonial discourse.—I. (I.) Egan

**276. Twentieth-Century Spanish-American Drama (4)**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Major Spanish-American dramatists from Florencio Sánchez to the present. Offered in alternate years. (Former course 240.)—(III.)

**277. Spanish-American Novel, 1900-1950 (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends and key authors in Spanish America in the first half of the 20th century. Offered in alternate years. (Former course 241A.)—(I.) Egan

**278. New Trends in Spanish-American Fiction (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Recent developments in Spanish-American narrative. Emphasis on innovative language and structure. Offered in alternate years. (Former course 241B.)—(II.) Egan

**279. Mexican Narrative (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the evolution of Mexican narrative. Emphasis on the narrative of the Revolution and significant contemporary works. Offered in alternate years.—(III.) Egan

**280. Spanish-American Short Story (4)**

Seminar—3 hours; term paper. Works by major writers with emphasis on 20th-century authors such as Quiroga, Borges, García Márquez, Cortázar, and Rulfo. (Former course 243.)—III. (III.) Egan

**281. Spanish-American Women Writers (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of feminist critical theories, gender construction, and self-representation within the history of socio-cultural changes in Latin America.—I. (I.) Egan

**282. Darío and Modernism (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of poetry and prose of Spanish-American Modernism (1880-1916). Offered in alternate years. (Former course 245.)—(I.) Egan

**283. New Directions in Spanish-American Poetry (4)**

Seminar—3 hours; term paper. Offered in alternate years. (Former course 247.)—(III.) Egan

**284. The Spanish-American Essay (4)**

Seminar—3 hours; term paper. Major Spanish-American essayists from Sarmiento to Octavio Paz. Offered in alternate years. (Former course 248.)—(II.) Egan

**285. Multicultural Approaches to Cuban Literature and Culture (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends in Cuban literature. Emphasis on historical, geographic, social and cultural context (including music and film). Course taught in English with some readings in Spanish.—III. (III.) Bejel

**298. Group Study (1-5)**

Prerequisite: graduate standing and consent of instructor. May be repeated for credit. (S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Professional Courses****390. The Teaching of Spanish in College (4)**

Lecture—2 hours; discussion—2 hours. Prerequisite: graduate standing. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of graduate teaching assistants.—I. (I.) López-Burton

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

# Statistics

(College of Letters and Science)

Rudolph Beran, Ph.D., Chairperson of the Department

(530) 752-2361; <http://www-stat.ucdavis.edu>

## Faculty

- Rudolph Beran, Ph.D., Professor
- Prabir Burman, Ph.D., Professor
- Nello Cristianini, Ph.D., Associate Professor
- Christiana Drake, Ph.D., Associate Professor
- Peter Hall, Ph.D., Professor
- Fushing Hsieh, Ph.D., Professor
- Jiming Jiang, Ph.D., Associate Professor
- Yue-Pok (Ed) Mack, Ph.D., Professor
- Hans-Georg Müller, Ph.D., Professor
- Debashis Paul, Ph.D., Assistant Professor
- Jie Peng, Ph.D., Assistant Professor
- Katherine Pollard, Ph.D., Assistant Professor
- Wolfgang Polonik, Ph.D., Associate Professor
- George G. Roussas, Ph.D., Professor
- Francisco J. Samaniego, Ph.D., Professor,  
*Academic Senate Distinguished Teaching Award*
- Rituparna Sen, Ph.D., Assistant Professor
- Robert H. Shumway, Ph.D., Professor
- Duncan Temple Lang, Ph.D., Associate Professor
- Jessica M. Utts, Ph.D., Professor,  
*Academic Senate Distinguished Teaching Award*
- Jane-Ling Wang, Ph.D., Professor

## Emeriti Faculty

- P.K. Bhattacharya, Ph.D., Professor Emeritus
- Alan P. Fenech, Ph.D., Professor Emeritus
- Alvin D. Wiggins, Ph.D., Professor Emeritus

## Affiliated Faculty

- Rahman Azari, Ph.D., Lecturer

## The Major Program

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

**The Program.** Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. The A.B. degree is very flexible, facilitating a double major or extensive elective course work in a field in which statistics is applied. The B.S. degree program has two options: one emphasizes mathematics and is especially recommended as preparation for graduate study in statistics; the other emphasizes computer science. All three programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications of statistics.

**Career Alternatives.** Probability models and statistical methods are used in a great many fields, including the biological and social sciences, business and engineering. The wide applicability of statistics has created in both the public and private sectors a strong demand for graduates with statistical training. Current employment opportunities include state and federal government positions with a statistician designation, industrial positions (e.g., in the actuarial series within an insurance company, in the data management unit in a health science facility, or in the research units in pharmaceutical and biotechnology industries), and teaching positions.

## A.B. Major Requirements:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>25</b>
Mathematics 21A, 21B, 21C .....	12
Mathematics 22A, 22B.....	6

Computer Science Engineering 30 or Computer Science Engineering 40 (or the equivalent) .....	4
Statistics 32.....	3
<b>Depth Subject Matter .....</b>	<b>41-44</b>
Statistics 106, 108 or the equivalent .....	8
Statistics 131A, 131B, 131C .....	12
Three courses from Statistics 104, 135, 137, 138, 141, 142, 144, 145 .....	12
Related elective courses .....	9-12
Three upper division courses approved by major adviser; they should be in mathematics, computer science or in quantitative aspects of a substantive discipline.	

**Total Units for the Major .....**66-69

## B.S. Major Requirements:

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>25-29</b>
Mathematics 21A, 21B, 21C .....	12
Mathematics 22A, 22B .....	6
Computer science:	
<i>General option:</i> Computer Science Engineering 30 or Computer Science Engineering 40 (or the equivalent) .....	4
<i>Computer Science option:</i> Computer Science Engineering 30 and 40 .....	8
Statistics 32.....	3

## Depth Subject Matter

Complete one of the two options below.

<b>Statistics—General option .....</b>	<b>51-52</b>
Statistics 106, 108 or the equivalent .....	8
Statistics 131A, 131B, 131C or the equivalent .....	12
Four courses selected from Statistics 104, 135, 137, 138, 141, 142, 144, 145 ...	16
Three courses selected from Mathematics 108, 127A, 127B, 127C, 128A, 128B, 128C, 167, 168; Mathematics 127 strongly recommended for students considering graduate work in Mathematics or Statistics.....	12
Related elective course .....	3-4
One upper division course approved by major adviser; it should be in mathematics, computer science or in quantitative aspects of a substantive discipline.	

**Total Units for the Major .....**76-77

## Statistics—Computer Science option.....

Statistics 106, 108 (or the equivalent) .....	8
Statistics 131A, 131B, 131C .....	12
Two courses from Statistics 104, 135, 137, 138, 141, 142, 144, 145 .....	8
Computer Science Engineering 110, 165A.....	8
Two courses from Mathematics 128A, 128B, 132A, 132B, 167, 168 .....	8
Two courses from Computer Science Engineering 122A, 124, 130, 175 .....	8

**Total Units for the Major .....** 81

**Major Adviser.** C. Drake

Students are encouraged to meet with an adviser to plan a program as early as possible. Sometime before or during the first quarter of the junior year, students planning to major in Statistics should consult with a faculty adviser to plan the remainder of their undergraduate programs.

## Minor Program Requirements:

The Department offers a minor program in Statistics that consists of a survey at the upper division level of the fundamentals of mathematical statistics and of the most widely used applied statistical methods.

	UNITS
<b>Statistics .....</b>	<b>20</b>
Statistics 106, 108, and 130A-130B or 131A-131B.....	16
One course from Statistics 104, 135, 137, 138, 141, 142, 144, 145 .....	4

**Preparation.** Statistics 13 or 32 or 100 or 102.

**Graduate Study.** The Graduate Program in Statistics offers study and research leading to the M.S. and Ph.D. degrees in Statistics, including a Ph.D. in Statistics with an emphasis in Biostatistics. Detailed information concerning these degree programs, as well as information on admissions and on financial support, is available from the Department of Statistics.

**Graduate Adviser.** P. Burman

**Statistical Consulting.** The Department provides a consulting service for researchers on campus. For more information, call the Statistical Laboratory office (530) 752-6096.

## Courses in Statistics (STA)

### Lower Division Courses

#### 10. Statistical Thinking (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: two years of high school algebra. Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media; emphasis is on understanding polls, unemployment rates, health studies; understanding probability, risk and odds. GE credit: SciEng or SocSci, Wrt.—III. (III.)

#### 12. Introduction to Discrete Probability (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: two years of high school algebra. Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; independence; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications in the social, biological, and engineering sciences. Offered in alternate years. GE credit: SciEng.

#### 13. Elementary Statistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra or the equivalent in college. Descriptive statistics; basic probability concepts; binomial, normal, Student's *t*, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit to students who have completed course 13V or higher. GE credit: SciEng.—I, II, III. (I, II, III.)

#### 13V. Elementary Statistics (4)

Lecture—1.5 hours; online lecture—5 hours. Prerequisite: two years of high school algebra or the equivalent in college. Descriptive statistics; basic probability concepts; binomial, normal, Student's *t*, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit to students who have completed course 13 or higher. GE credit: SciEng.—I. (I.) Utts

#### 32. Basic Statistical Analysis Through Computers (3)

Lecture—3 hours. Prerequisite: Mathematics 16B or 21B; ability to program in a high-level computer language such as Pascal. Overview of probability modeling and statistical inference. Problem solution through mathematical analysis and computer simulation. Recommended as alternative to course 13 for students with some knowledge of calculus and computer programming. GE credit: SciEng.—II, III. (II, III.)

#### 90X. Seminar (1-2)

Seminar—1-2 hours. Prerequisite: high school algebra and consent of instructor. Examination of a special topic in a small group setting.

#### 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division Courses

**100. Applied Statistics for Biological Sciences (4)**

Lecture—3 hours; laboratory—2 hours. Prerequisite: Mathematics 16B or the equivalent. Probability computation/modeling, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have taken course 13 or 32. Not open for credit to students who have taken course 102. GE credit: SciEng.—I, II, III. (I, II, III.)

**102. Introduction to Probability Modeling and Statistical Inference (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: two years of high school algebra, and upper division standing. Introductory probability and statistics at a rigorous yet precalculus level. Rigorous precalculus introduction to probability and parametric/nonparametric statistical inference with computing; binomial, Poisson, geometric, normal, and sampling distributions; exploratory data analysis; regression analysis; ANOVA. Only two units of credit allowed to students who have taken course 32. Not open for credit to students who have taken course 100. GE credit: SciEng.—I, III. (I, III.)

**103. Applied Statistics for Business and Economics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 13, 32, or 102; and Mathematics 16A, 16B. Descriptive statistics; probability; random variables; expectation; binomial, normal, Poisson, other univariate distributions; joint distributions; sampling distributions, central limit theorem; properties of estimators; linear combinations of random variables; testing and estimation; Minitab computing package. GE credit: SciEng.—I, II, III. (I, II, III.)

**104. Applied Statistical Methods: Nonparametric Statistics (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 13, 32, or 102. Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests. Offered in alternate years. GE credit: SciEng.—(II.)

**106. Applied Statistical Methods: Analysis of Variance (4)**

Lecture—4 hours. Prerequisite: course 13, 32, or 102. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design, Latin squares. Multiple comparisons procedures. One-way random effects model. GE credit: SciEng.—I, II. (I, II.)

**108. Applied Statistical Methods: Regression Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 13, 32 or 102. Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: SciEng.—I, II, III. (I, II, III.)

**120. Probability and Random Variables for Engineers (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21A, 21B, 21C, and 22A. Basic concepts of probability theory with applications to electrical engineering, discrete and continuous random variables, conditional probability, combinatorics, bivariate distributions, transformation of random variables, law of large numbers, central limit theorem, and approximations. No credit for students who have taken course 131A or Civil and Environmental Engineering 114. GE credit: SciEng.—I, III. (I, III.)

**130A. Mathematical Statistics: Brief Course (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 16B. Basic probability, densities and distributions, mean, variance, covariance, Chebyshev's inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals

for certain quantities, computing sample sizes. Only 2 units of credit allowed to students who have taken course 131A.—I. (I.)

**130B. Mathematical Statistics: Brief Course (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130A. Transformed random variables, large sample properties of estimates. Basic ideas of hypotheses testing, likelihood ratio tests, goodness-of-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics.—II. (II.)

**131A. Introduction to Probability Theory (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21A, 21B, 21C, and 22A. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have taken Mathematics 131.—I, II, III. (I, II, III.)

**131B-131C. Introduction to Mathematical Statistics (4-4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131A, or Mathematics 22A and 131. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory, and nonparametric inference.—II-III. (II-III.)

**133. Mathematical Statistics for Economists (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 103 and Mathematics 16B, or the equivalents; no credit will be given to students majoring in Statistics. Probability, basic properties; discrete and continuous random variables (binomial, normal, t, chi-square); expectation and variance of a random variable; bivariate random variables (bivariate normal); sampling distributions; central limit theorem; estimation, maximum likelihood principle; basics of hypotheses testing (one-sample).—I. (I.)

**135. Multivariate Data Analysis (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130B, and preferably course 131B. Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotelling's  $T^2$ ; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets.—III. (III.)

**137. Applied Time Series Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: course 108 or the equivalent. Time series relationships, cyclical behavior, periodicity, spectral analysis, coherence, filtering, regression, ARIMA and state-space models; Applications to data from economics, engineering, medicine environment using time series software.—III. (III.)

**138. Analysis of Categorical Data (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130B or 131B, or courses 106 and 108. Varieties of categorical data, cross-classifications, contingency tables, tests for independence. Multidimensional tables and log-linear models, maximum likelihood estimation; tests of goodness-of-fit. Logit models, linear logistic models. Analysis of incomplete tables. Packaged computer programs, analysis of real data. GE credit: SciEng.—I. (I.)

**141. Statistical Computing (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 130A or 131A, and one of courses 13, 32, 100, 102, or the equivalent, and experience in computer programming; course 130B or 131B recommended. Use of computers in statistics. Numerical foundations of statistical procedures. Computation of probabilities and quantiles. Random numbers. Monte Carlo method and bootstrap. Methods for parametric statistical models. Graphical methods and exploratory data analysis.—II. (II.)

**142. Reliability (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 130B or 131B or consent of instructor. Stochastic modeling and inference for reliability systems. Topics include coherent systems, statistical failure models, notions of aging, maintenance policies and their optimization. Offered in alternate years.

**144. Sampling Theory of Surveys (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 130B or 131B. Simple random, stratified random, cluster, and systematic sampling plans; mean, proportion, total, ratio, and regression estimators for these plans; sample survey design, absolute and relative error, sample size selection, strata construction; sampling and nonsampling sources of error. Offered in alternate years. GE credit: SciEng.—(I.)

**145. Bayesian Statistical Inference (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 130A and 130B, or 131A and 131B, or the equivalent. Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. Offered in alternate years.—(II.)

**190X. Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: one of courses 13, 32, 100, 102, or 103. In-depth examination of a special topic in a small group setting.

**192. Internship in Statistics (1-12)**

Internship—3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Work experience in statistics. (P/NP grading only.)

**194HA-194HB. Special Studies for Honors Students (4-4)**

Independent study—12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate Courses

**205. Statistical Methods for Research (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 106 or the equivalent. Topics in design of experiments include factorial designs, balanced and unbalanced experiments, random and mixed effects models, response surface methodology, nested design, repeated measures, cross-over design, analysis of covariance. Applications in engineering, biological sciences, medicine and environmental research. Offered in alternate years.—(III.)

**222. Biostatistics: Survival Analysis (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 131C. Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics. (Same course as Biostatistics 222.)—I. (I)

**223. Biostatistics: Generalized Linear Models (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 131C. Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as Biostatistics 223.)—II. (II)

**224. Analysis of Longitudinal Data (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course/Biostatistics 222, 223 and course 232B or consent of instructor. Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings. (Same course as Biostatistics 224.)—III. (III.)

**225. Clinical Trials (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course/Biostatistics 223 or consent of instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as Biostatistics 225.) Offered in alternate years.—III.

**226. Statistical Methods for Bioinformatics (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131C or consent of instructor; data analysis experience recommended. Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of -omics data. (Same course as Biostatistics 226.) Offered in alternate years.—II.

**231A. Mathematical Statistics I (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131A, 131B, 131C, Mathematics 127A, 127B or the equivalent. First part of three-quarter sequence on mathematical statistics. Emphasizes foundations. Topics include basic concepts in asymptotic theory, decision theory (e.g. risk function, Bayes and minimax optimality, Bayes estimation), and an overview of methods of point estimation.—I. (I.)

**231B. Mathematical Statistics II (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231A. Second part of a three-quarter sequence on mathematical statistics. Emphasizes large sample theory, e.g. asymptotics of MLE, likelihood-ratio-test and Chi-square-test, CLT with applications in (generalized) linear models. Classical hypothesis testing, e.g. Neyman-Pearson theory, UMP (unbiased)-tests.—II. (II.)

**231C. Mathematical Statistics III (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231A, 231B. Third part of three-quarter sequence on mathematical statistics. Emphasizes large sample theory and their applications. Topics include statistical functionals (applications to L- and M-estimation); resampling methods (jackknife, bootstrap); curve estimation (density, regression, failure rate); rank tests, and one instructor-selected topic.—III. (III.)

**232A. Applied Statistics I (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 106, 108, 131A, 131B, 131C, Mathematics 167. Estimation and testing for the general linear model, ANOVA design, model validation, variable selection, and analyzing data with the linear model.—I. (I.)

**232B. Applied Statistics II (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 232A. Estimation and testing for the general linear mixed model, Bayesian hierarchical modeling, nonparametric modeling, analyzing data and designing experiments with respect to these models.—II. (II.)

**232C. Applied Statistics III (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 232B. Multivariate analysis: multivariate distributions, multivariate linear models, data analytic methods including principal component, factor, discriminant, cluster, and canonical correlation analyses, nonparametric methods, regression trees, and Bayesian methods.—III. (III.)

**233. Design of Experiments (3)**

Lecture—3 hours. Prerequisite: course 131C. Topics from balanced and partially balanced incomplete block designs, fractional factorials, and response surfaces. Offered in alternate years.—(III.)

**235A-235B-235C. Probability Theory (4-4-4)**

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: Mathematics 127C and 131 or course 131A or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Mathematics 235A-235B-235C.)—I-III. (I-III.)

**237A-237B. Time Series Analysis (4-4)**

Lecture—3 hours; term paper. Prerequisite: course 131B or the equivalent; course 237A is a prerequisite for course 237B. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering. Offered in alternate years.—(II.)

**238. Theory of Multivariate Analysis (4)**

Lecture—3 hours; term paper. Prerequisite: courses 131B and 135. Multivariate normal and Wishart distributions, Hotelling's T-Squared, simultaneous inference, likelihood ratio and union intersection tests, Bayesian methods, discriminant analysis, principal component and factor analysis, multivariate clustering, multivariate regression and analysis of variance, application to data. Offered in alternate years.—II.

**240A-240B. Nonparametric Inference (4-4)**

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C recommended. Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology. Offered in alternate years. (II-III.)

**241. Asymptotic Theory of Statistics (4)**

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C desirable. Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference. Offered in alternate years. (III.)

**250. Topics in Applied and Computational Statistics (4)**

Lecture—3 hours; lecture/discussion—1 hour. Prerequisite: course 131A; course 232A recommended, not required. Resampling, nonparametric and semiparametric methods, incomplete data analysis, diagnostics, multivariate and time series analysis, applied Bayesian methods, sequential analysis and quality control, categorical data analysis, spatial and image analysis, computational biology, functional data analysis, models for correlated data, learning theory. May be repeated for credit with consent of graduate advisor. Not offered every year.—I, II, III.

**251. Topics in Statistical Methods and Models (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 231B or the equivalent. Topics may include Bayesian analysis, nonparametric and semiparametric regression, sequential analysis, bootstrap, statistical methods in high dimensions, reliability, spatial processes, inference for stochastic process, stochastic methods in finance, empirical processes, change-point problems, asymptotics for parametric, nonparametric and semiparametric models, nonlinear time series, robustness. May be repeated for credit with consent of instructor. Not offered every year.—II. (II.)

**252. Advanced Topics in Biostatistics (4)**

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 222, 223. Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit with consent of adviser when topic differs. (Same course as Biostatistics 252.) Offered in alternate years.—III.

**280. Orientation to Statistical Research (2)**

Seminar—2 hours. Prerequisite: consent of instructor. Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member. May be repeated once for credit. (S/U grading only.)—III. (III.)

**290. Seminar in Statistics (1-6)**

Prerequisite: consent of instructor. Seminar on advanced topics in probability and statistics. (S/U grading only.)—I, II, III. (I, II, III.)

**292. Graduate Group in Statistics Seminar (1-2)**

Seminar—1-2 hours. Prerequisite: graduate standing. Advanced study in various fields of statistics with emphasis in applied topics, presented by members of the Graduate Group in Statistics and other guest speakers. (S/U grading only.)—III. (III.)

**298. Directed Group Study (1-5)**

Prerequisite: graduate standing, consent of instructor.

**299. Individual Study (1-12)**

Prerequisite: consent of instructor. (S/U grading only.)

**299D. Dissertation Research (1-12)**

Prerequisite: advancement to candidacy for Ph.D., consent of instructor. (S/U grading only.)

**Professional Course****390. Methods of Teaching Statistics (2)**

Lecture/discussion—1 hour; laboratory—1 hour. Prerequisite: graduate standing. Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training. May be repeated for credit. (S/U grading only.)—I. (I.)

**Professional Course****401. Methods in Statistical Consulting (3)**

Lecture—3 hours; discussion—1 hour. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University clients. Students must be enrolled in the graduate program in Statistics or Biostatistics. May be repeated for credit with consent of graduate advisor. Not offered every year. (S/U grading only.)—I, II, III. (I, II, III.)

## Statistics (A Graduate Program)

Rudolph Beran, Ph.D., Chairperson of the Program

**Program Office.** 4118 Mathematical Sciences Building  
(530) 752-2362; <http://www-stat.ucdavis.edu>

**Faculty**

Laurel Beckett, Ph.D., Professor  
(Public Health Sciences)

Rudolph Beran, Ph.D., Professor (Statistics)

Prabir Burman, Ph.D., Professor (Statistics)

Colin Cameron, Ph.D., Professor (Economics)

Nello Cristianini, Ph.D., Associate Professor  
(Statistics)  
Christiana Drake, Ph.D., Associate Professor  
(Statistics)  
Thomas B. Farver, Ph.D., Professor  
(Population Health and Reproduction)  
Peter Hall, Ph.D., Professor (Statistics)  
Fushing Hsieh, Ph.D., Professor (Statistics)  
Jiming Jiang, Ph.D., Professor (Statistics)  
Oscar Jorda, Ph.D., Associate Professor (Economics)  
Yue-Pok (Ed) Mack, Ph.D., Professor (Statistics)  
Norman Matloff, Ph.D., Professor  
(Computer Science)  
Hans-Georg Mueller, M.D., Ph.D., Professor  
(Statistics)  
Debashis Paul, Ph.D., Assistant Professor (Statistics)  
Jie Peng, Ph.D., Assistant Professor (Statistics)  
Katherine Pollard, Ph.D., Assistant Professor  
(Statistics)  
Wolfgang Polonik, Ph.D., Associate Professor  
(Statistics)  
David Rocke, Ph.D., Professor  
(Graduate School of Management)  
George G. Roussas, Ph.D., Professor (Statistics)  
Naoki Saito, Ph.D., Associate Professor  
(Mathematics)  
Francisco J. Samaniego, Ph.D., Professor (Statistics)  
Rituparna Sen, Ph.D., Assistant Professor (Statistics)  
Robert H. Shumway, Ph.D., Professor (Statistics)  
Duncan Temple Lang, Ph.D., Associate Professor  
(Statistics)  
Chih-Ling Tsai, Ph.D., Professor  
(Graduate School of Management)  
Jessica M. Utts, Ph.D., Professor (Statistics)  
Jane-Ling Wang, Ph.D., Professor (Statistics)

### Emeriti Faculty

P.K. Bhattacharya, Ph.D., Professor Emeritus  
Alan P. Fenech, Ph.D., Professor Emeritus  
Alvin D. Wiggins, Ph.D., Professor Emeritus

### Affiliated Faculty

Rahman Azari, Ph.D., Lecturer (Statistics)

**Graduate Study.** The Graduate Program in Statistics offers programs of study and research leading to the M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Facility in computer programming is essential for some of the course work. The supervised statistical consulting required of all M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for in-depth concurrent study in an applied field. For detailed information contact the Chairperson of the Program or the Graduate Adviser.

**Preparation.** For admission to the Ph.D. program, course work requirements for the master's degree, and at least one semester/two quarters of advanced calculus must be completed.

**Graduate Adviser.** P. Burman

## Subject A

See **University Requirements**, on page 83.

## Surgery

See **Surgery (SUR)**, on page 370; and **Surgical and Radiological Sciences (VSR)**, on page 478.

## Surgical and Radiological Sciences

See **Veterinary Medicine, School of**, on page 469.

## Technocultural Studies

(College of Letters and Science)

Douglas Kahn, Ph.D., Program Director

**Program Office.** Art Building, Room 316  
(530) 752-9674; <http://technoculture.ucdavis.edu>

### Committee in Charge

Glenda Drew, M.A. (Design)  
Jesse Drew, Ph.D. (Technocultural Studies)  
Frances Dyson, Ph.D. (Technocultural Studies)  
Andy Jones, Ph.D. (English)  
Douglas Kahn, Ph.D. (Technocultural Studies)  
Pablo Ortiz, D.M.A. (Music)  
Bob Ostertag, Ph.D. (Technocultural Studies)  
Simon Sadler, Ph.D. (Art History)  
Oliver Staadt, Ph.D. (Computer Science)  
Kathryn Sylva, M.F.A. (Design)

### Faculty

Frances Dyson, Ph.D., Associate Professor  
Douglas Kahn, Ph.D., Professor  
Michael Neff, Ph.D., Assistant Professor  
(Computer Science, Technocultural Studies)  
Bob Ostertag, Ph.D., Associate Professor  
Julie Wyman, MFA, Assistant Professor

### Emeriti Faculty

Lynn Hershman, M.A., Professor Emerita

### The Major Program

The major is an interdisciplinary integration of current research in cultural history and theory with innovative hands-on production in digital media and "low-tech." It focuses on the fine and performing arts, media arts, community media, literature and cultural studies as they relate to technology and science. Although students must choose an emphasis in either critical studies or creative production, both emphases stress an integration of studies and production. Backed by critical perspectives and the latest forms of research and production skills, students enjoy the mobility to explore individual research and expression, project-based collaboration and community engagement.

### The Program

Preparatory course work involves a solid introduction to the history, ideas and current activities of technocultural studies, along with four one-unit technical skill courses enabling individuals to get up to speed on digital imaging, sound, digital video and Web production, among other skills. For depth subject matter, students in the major select to concentrate on either critical studies or creative production emphases, and work toward a final project. All majors are required to take at least one course from another department or program relevant to their area of study, upon approval from TCS, and may take more courses with approval. The final project for the critical studies emphasis consists of a substantial research paper. The final project for the creative production emphasis will be a major individual or collaborative work. Plans for final projects must be approved in advance.

**Career Paths.** Technocultural Studies is designed to prepare graduates to be highly adaptable, collaborative, multi-skilled and current with the latest developments. Perhaps most importantly is self-motivation: students do best when fueled by their own passions and plot their own directions, while held to very high

standards. We feel this is the best education for living and working in a complex, rapidly changing world. Final research papers and creative production portfolios will provide graduate school admissions committees, employers or clients with tangible evidence of TCS graduates' track records and talents.

### A.B. Major Requirements:

UNITS

#### Preparatory Subject Matter..... 28

Technocultural Studies 1, 2, 4, 5, 6,  
7A-E..... 24  
American Studies 1A or 5..... 4

#### Depth Subject Matter ..... 44

Technocultural Studies 190, 191..... 8  
Production emphasis ..... 32

Choose five from production based  
Technocultural Studies 100, 101, 103,  
104, 110, 111, 112, 113, 121, 122,  
123, 192, plus two from Technocultural  
Studies 120, 150, 151, 152, 153, 154,  
155, 158, 159, plus a four-unit class from  
another department or program relevant to  
the student's area of concentration, as  
approved by Technocultural Studies.

Studies emphasis ..... 32

Choose two from production based  
Technocultural Studies 100, 101, 103,  
104, 110, 111, 112, 113, 121, 122,  
123, 192, plus five from Technocultural  
Studies 120, 150, 151, 152, 153, 154,  
155, 158, 159, plus a four-unit class from  
another department or program relevant to  
student's area of concentration, as  
approved by Technocultural Studies.

Technocultural Studies 198..... 4

#### Total Units for the Major ..... 72

**Major Adviser.** See Program office.

### Courses in Technocultural Studies (TCS)

#### Lower Division Courses

##### 1. Introduction to Technocultural Studies (4)

Lecture—3 hours; extensive writing. Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices. GE credit: ArtHum. Ostertag/Drew

##### 2. Critiques of Media (4)

Lecture/discussion—3 hours; term paper. Introduction to different forms of critical analysis of media, with focus on creative responses to the media within visual arts, media arts, and net culture. Response of artists to the power of mass media, from early forms of photomontage through contemporary "culture-jamming" and alternative media networks. GE credit: ArtHum.—Dyson

##### 4. Parallels in Art and Science (4)

Lecture—3 hours; term paper. Issues arising from historical and contemporary encounters between the arts and sciences, with emphasis on comparative notions of research, experimentation, and progress. GE credit: ArtHum.

##### 5. Media Archaeology (4)

Lecture/discussion—3 hours; term paper. Evolution of media technologies and practices beginning in the 19th Century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies. GE credit: ArtHum. Drew

##### 6. Technoculture and the Popular Imagination (4)

Lecture—3 hours; extensive writing. Issues of technological and scientific developments as conveyed through mass media and popular culture with special attention to public spectacle, exhibitions, broadcasts, performances, demonstrations and literary fictions and journalistic accounts. GE credit: ArtHum.—Kahn

**7A-E. Technocultural Workshop (1)**

Seminar—1 hour. Workshops in technocultural digital skills: (A) Digital Imaging; (B) Digital Video; (C) Digital Sound; (D) Web Design; (E) Topics in Digital Production.—I. (I.)

**Upper Division Courses****100. Experimental Digital Cinema I (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Experimental approaches to the making of film and video in the age of digital technologies. Opportunities for independent producers arising from new media. Instruction in technical, conceptual and creative skills for taking a project from idea to fruition. Hershman

**101. Experimental Digital Cinema II (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 100. Continuation of course 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition. Hershman

**103. Interactivity and Animation (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Fundamentals of creating interactive screen-based work. Theories of interactivity, linear versus non-linear structures, and audience involvement and participation. Use of digital production tools to produce class projects. Drew

**104. Documentary Production (4)**

Lecture/discussion—3 hours; project. Prerequisite: course 7B or the equivalent, course 155. Traditional and new forms of documentary, with focus on technocultural issues. Skills and strategies for producing work in various media. Progression through all stages of production, from conception through post-production to critique.—Drew

**110. Object-Oriented Programming for Artists (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 1. Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations.—III.

**111. Community Media Production (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Use of video and new media tools to address social issues among neighborhood and community groups. Students will use basic video, sound, and lighting techniques as they work with local groups in a group video project.—III. (III.)

**112. New Radio Features and Documentary (4)**

Lecture/discussion—3 hours; laboratory—3 hours. New feature and documentary production for radio and other audiophonic media, including audio streaming Web sites and installation. Emphasis on new and experimental approaches to audio production for broadcast on community radio and in international arts programming.

**113. Community Networks (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Impact and implications of computer-based networks in community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action.

**120. History of Sound in the Arts (4)**

Lecture—3 hours; term paper. Prerequisite: course 1. A survey of the use of sound, voice, noise, and modes of listening in the modernist, avant-garde, and experimental arts, from the late 19th Century to the present. Focus on audiophonic and audiovisual technologies.—Kahn

**121. Introduction to Sonic Arts (4)**

Lecture/discussion—3 hours; lecture/laboratory—3 hours. Prerequisite: course 7C. Introduction to the use of sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works.—Ostertag

**122. Intermediate Sonic Arts (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: course 121, 170C. Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, and found sounds to create multidimensional stories. Presentation of live performances, audio recordings, and sound installations.—Ostertag

**123. Sight and Soundtrack (4)**

Lecture/discussion—3 hours; laboratory—3 hours. Prerequisite: courses 7C, 170C. The use of sound to articulate, lend mood or subconsciously underscore visual, environmental or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement.—Ostertag

**150. Introduction to Theories of the Technoculture (4)**

Lecture/discussion—3 hours; extensive writing. Major cultural theories of technology with emphasis on media, communications, and the arts. Changing relationships between technologies, humans, and culture. Focus on the evolution of modern technologies and their reception within popular and applied contexts. GE credit: ArtHum—Dyson

**151. Topics in Virtuality (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1. Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists' work and writing.—Dyson

**152. New Trends in Technocultural Arts (4)**

Lecture/discussion—3 hours; term paper. Current work at the intersection of the arts, culture, science, and technology including biological and medical sciences, computer science and communications, and artificial intelligence and digital media.—Hershman

**153. Concepts of Innovative Soundtracks (4)**

Lecture/discussion—3 hours; term paper. Innovative and unconventional soundtracks in cinema, media arts, and fine arts. Introduction to basic analytical skills for understanding sound-image relationships.—Kahn

**154. Outsider Machines (4)**

Lecture/discussion—3 hours; term paper. Invention, adaptation and use of technologies outside the mainstream, commonsense, and the possible. Topics include machines as metaphor and embodied thought, eccentric customizing and fictional technologies.—Kahn

**155. Introduction to Documentary Studies (4)**

Lecture/discussion—3 hours; term paper. Recent evolution of the documentary. The personal essay film; found-footage/appropriation work; non-linear, multi-media forms; spoken word; storytelling; oral history recordings; and other examples of documentary expression.—I. (I.)

**158. Technology and the Modern American Body (4)**

Lecture/discussion—3 hours; term paper. Prerequisite: course 1 and either American Studies 1 or 5. The history and analysis of the relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. (Same course as American Studies 158.) GE credit: ArtHum.—de la Pena

**159. Media Subcultures (4)**

Lecture/discussion—3 hours; term paper. Relationships between subcultural groups and media technologies. Media as the cohesive and persuasive force of subcultural activities. List-servs, Web sites, free radio, fan 'zines, and hip-hop culture. GE credit: Div.—II. (II.)

**170A-E. Advanced Technocultural Workshop (1)**

Seminar—1 hour. Prerequisite: course 7A or the equivalent. Workshops in advanced technocultural digital skills: (A) Digital Imaging; (B) Digital Video; (C) Digital Sound; (D) Web Design; (E) Topics in Digital Production.

**190. Research Methods in Technocultural Studies (4)**

Lecture/discussion—3 hours; project. Introduction to basic research methods for Technocultural Studies: electronic and archived images, sounds and data, satellite downlinking, radiowave scanning, and oral histories.

**191. Writing Across Media (4)**

Lecture/discussion—3 hours; extensive writing. Introduction to experimental approaches to writing for different media and artistic practices. How written texts relate to the images, sounds, and performances in digital and media production.—Kahn

**192. Internship (1-4)**

Internship—3-12 hours. Supervised internship on or off campus in area relevant to Technocultural Studies. May be repeated twice for credit. (P/NP grading only.)

**197. Tutoring in Technocultural Studies (1-5)**

Tutorial—3-15 hours. Prerequisite: consent of instructor. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. May be repeated for credit up to eight units. (P/NP grading only.)—I, II, III. (I, II, III.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. Guided study with faculty member in independent scholarly activity. May be repeated for credit up to eight units. (P/NP grading only.)

## Textile Arts and Costume Design

See [Design](#), on page 189.

## Textile Science

See [Fiber and Polymer Science](#), on page 272.

## Textiles (A Graduate Group)

Gang Sun, Ph.D., Chairperson of the Group

**Group Office.** 129 Everson Hall

(530) 752-6650;

<http://textiles.ucdavis.edu>

**Faculty**

Colin A. Carter, Ph.D., Professor  
(*Agricultural and Resource Economics*)

You-Lo Hsieh, Ph.D., Professor

(*Textiles and Clothing*)

Susan B. Kaiser, Ph.D., Professor (*Textiles and Clothing, Women and Gender Studies*)

Dean MacCannell, Ph.D., Professor  
(*Landscape Architecture*)

Zuhair A. Munir, Ph.D., Professor

(*Chemical Engineering and Materials Science*)

Ning Pan, Ph.D., Professor (*Textiles and Clothing, Biological and Agricultural Engineering*)  
 Victoria Z. Rivers, M.A., Professor (*Design*)  
 Margaret H. Rucker, Ph.D., Professor (*Textiles and Clothing*)  
 James F. Schackelford, Ph.D., Professor (*Chemical Engineering and Materials Science*)  
 Charles F. Shoemaker, Ph.D., Professor (*Food Science and Technology*)  
 Gang Sun, Ph.D., Associate Professor (*Textiles and Clothing*)

**Emeriti Faculty**

Gyongy Laky, M.A., Professor Emeritus (*Textiles and Clothing*)  
 Howard G. Schutz, Ph.D., Professor Emeritus (*Consumer Science*)  
 Jo Ann C. Stabb, M.A., Senior Lecturer Emeritus (*Design*)  
 S. Haig Zeronian, Ph.D., Professor Emeritus (*Textiles and Clothing*)

**Graduate Study.** The Graduate Group in Textiles offers a program of study and research leading to the M.S. degree. Students in the program use an interdisciplinary approach emphasizing the physical and behavioral science aspects of textiles. Research areas include chemical, physical, biochemical, and mechanical properties of fibers and polymers as well as fibrous assemblies, including composites, paper, and nonwovens; and psychological and sociological factors relating to perception and consumption of textiles and apparel. Extensive specialized fiber, polymer, and textiles research facilities and a behavioral research laboratory are available. For detailed information regarding the program, address the Chairperson of the Group.

**Graduate Adviser.** G. Sun (*Textiles and Clothing*)

**Textiles and Clothing**

(College of Agricultural and Environmental Sciences)

Susan B. Kaiser, Ph.D., Chairperson of the Division

**Division Office.** 129 Everson Hall (530) 752-6650; <http://textiles.ucdavis.edu>

**Faculty**

You-Lo Hsieh, Ph.D., Professor  
 Susan B. Kaiser, Ph.D., Professor  
 Ning Pan, Ph.D., Professor  
 Margaret H. Rucker, Ph.D., Professor  
 Gang Sun, Ph.D., Associate Professor

**Emeriti Faculty**

Stephen C. Jett, Ph.D., Professor Emeritus  
 Mary Ann Morris, Ph.D., Professor Emeritus  
 S. Haig Zeronian, Ph.D., D.Sc., Professor Emeritus

**Affiliated Faculty**

Joan Chandler, M.S., Lecturer

**The Major Program**

The textiles and clothing major emphasizes the connections among (a) the physical characteristics of textile products, (b) human perceptions of and behavior toward these products, and (c) global economic trends affecting the textile/apparel marketplace. An integrative knowledge base links textile products with people and processes, to focus on the production, distribution, and consumer use of textiles and apparel; see also *Fiber and Polymer Science*, on page 272.

**The Program.** The textiles and clothing major offers two options: textile science and marketing/economics. The Textile Science option provides students with a broad knowledge base in both the social and physical sciences. This base includes production, end-use applications and care of textiles and apparel, physical and chemical properties of textiles, and social-psychological and economic aspects of textiles and clothing. The Marketing/Economics option emphasizes social science and busi-

ness course work, while also providing students with an awareness of the physical nature of textile products.

**Internships and Career Alternatives.** Textiles and clothing majors can pursue internships and careers in apparel production and merchandising, retail management, international marketing, textile testing and conservation, and textiles journalism. The majority of textiles and clothing graduates accept entry-level management and technical positions within the textile and apparel industry or in related fields, (e.g., merchandising and marketing, production, research and development, technical service and design). Students may also pursue graduate studies in textiles, business, and other areas depending on their specific selections of restricted elective course work.

**B.S. Major Requirements:**

	UNITS
<b>English Composition Requirement .....</b>	<b>4-12</b>
See College Requirement .....	0-8
Communication 1 .....	4
<b>Preparatory Subject Matter .....</b>	<b>43-45</b>
Agricultural Management and Rangeland Resources 21 or Computer Science Engineering 15 or 30 .....	3-4
Economics 1A-1B .....	10
Anthropology 2, Science and Society 1, Art History 1A, 1B, 1C, or 1D .....	4
Physics 1A or 10 .....	3-4
Psychology 1 .....	4
Sociology 2 .....	4
Statistics 13 .....	4
Textiles and Clothing 6, 7, 8 .....	12
<b>Breadth/General Education .....</b>	<b>6-24</b>
Satisfaction of General Education requirement.	

**Select one of the following two options:**

**Marketing/Economics Option**

**Additional Preparatory Subject Matter for the option .....** **18-19**

Management 11A-11B .....	8
Chemistry 10 or 2A .....	4-5
Mathematics 16A-16B .....	6

**Depth Subject Matter .....** **57-58**

Agricultural and Resource Economics 100A-100B, 106, 136 .....	16
Statistics 103 .....	4
Psychology 151 or 156, or Consumer Science 100 .....	3-4
Fiber and Polymer Science 110, Textiles and Clothing 107, 162, 162L, 163, 163L, 164, 165, 171, 173, 174 .....	31

**Restricted Electives .....** **12**

Courses selected from the following:  
 Agricultural and Resource Economics 18, 112, 142, 155, 157, 171A, 171B, Anthropology 122A, 126A, Consumer Science 100, Design 77A, 77B, 143, Economics 101, 121A, 121B, 134, 162, and other relevant course work, Foreign language units may be used to satisfy any or all of the required 12 units, Mathematics 16C, Psychology 151, 156, Sociology 123, 126, 140, 141, 145, Textiles and Clothing 180A, 180B, 230, 293, with consent of instructor, and a maximum of 5 units in either Textiles and Clothing 192 or 199.

**Unrestricted Electives .....** **15-44**

**Textile Science Option**

**Additional Preparatory Subject Matter for the option .....** **19**

Chemistry 2A, 2B, 8A, 8B .....	16
Mathematics 16A .....	3

**Depth Subject Matter .....** **52-53**

Agricultural and Resource Economics 112, 113 .....	8
Design 143 .....	4
Psychology 151 or 156, or Consumer Science 100 .....	3-4

Fiber and Polymer Science 100, 161, 161L, Textiles and Clothing 107, 162, 162L, 163, 163L, 164, 165, 171, 173, 174 .....

**Restricted Electives..... 16**

Courses selected from the following:  
 Agricultural and Resource Economics 18, 141, 142, 155, 171A, 171B, Agricultural Management and Rangeland Resources 120, Chemistry 2C, 128A, 128B, 128C, Communication 42, 130, 136, 140, Community and Regional Development 162, Consumer Science 100, Design 77A, 77B, 142A, 142B, 160A, 160B, 160C, 170A, 170B, 170C, Economics 11A, 11B, 100, 101, 121A, 121B, 134, Fiber and Polymer Science 110, Foreign Language units may be used to satisfy any or all of the required 16 units, Mathematics 16B, 16C, Psychology 151, 156, Sociology 25, 123, 126, 140, 148, 159, 175, Statistics 106, 108; Textiles and Clothing 180A, 180B, 230, 293, with consent of instructor, and a maximum of 5 units in either Textiles and Clothing 192 or 199.

**Unrestricted Electives ..... 17-46**

**Total Units for the Degree ..... 180**

**Major Adviser.** G. Sun

**Advising Center** for the major is located in 129B Everson Hall (530) 752-4417.

**Minor Program Requirements:**

The Division of Textiles and Clothing offers a minor program for non-majors interested in satisfying secondary career objectives. For acceptance into the program see the staff adviser in 133B Everson Hall.

UNITS

**Textiles and Clothing ..... 18**

Textiles and Clothing 6, 7, or 8 .....

Courses selected from Fiber and Polymer Science 100, 110, 161, 161L, Textiles and Clothing 107, 162-162L, 163-163L, 164, 165, 171, 173, 174 .....

**Minor Adviser.** G. Sun

**Courses in Textiles and Clothing (TXC)**

Questions pertaining to the following courses should be directed to the instructor or to the Division of Textiles and Clothing. See also courses in *Fiber and Polymer Science*, on page 272.

**Lower Division Courses**

**6. Introduction to Textiles (4)**

Lecture—3 hours; laboratory—3 hours. Introduction to the structure and properties of textiles. Consumer use and fabric characteristics are emphasized. GE credit: SciEng.—I. (I.) Sun

**7. Style and Cultural Studies (4)**

Lecture/discussion—3 hours; discussion/laboratory—1 hour. The multiple and overlapping influences of gender, sexuality, ethnicity, and class on constructions of identity and community are explored through the study of style in popular culture and everyday life. Continuity and change in clothing and appearance styles are interpreted. GE credit: SocSci, Div, Wrt.—III. (III.) Kaiser

**8. The Textile and Apparel Industries (4)**

Lecture—4 hours. Textile and apparel industries including fashion theory, production, distribution, and consumption of textile goods. GE credit: SocSci, Div.—I. (I.) Rucker

**92. Internship in Textiles and Clothing (1-12)**

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**99. Special Study for Lower Division Students (1-5)**

(P/NP grading only.)

**Upper Division Courses**

**107. Social and Psychological Aspects of Clothing (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Sociology 2. Social and cognitive factors influencing management and perception of personal appearance in everyday life. Concepts and methods appropriate to the study of meaning of clothes in social and cultural contexts. GE credit: SocSci, Div, Wrt.—I. (I.) Kaiser, Chandler

**162. Textile Fabrics (3)**

Lecture—3 hours. Prerequisite: course 6. Properties of fabrics as related to serviceability, comfort, and appearance. GE credit: SciEng.—III. (III.) Pan

**162L. Textile Fabrics Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 162 (may be taken concurrently). Laboratory methods and procedures employed in studying properties of textile fabrics as related to serviceability, comfort, and appearance.—III. (III.) Pan

**163. Textile Coloration and Finishing (3)**

Lecture—3 hours. Prerequisite: course 6, Fiber and Polymer Science 110, or Chemistry 8B. Basic principles of textile dyeing, printing, and finishing; color theory; structure, properties, and application of dyes and finishes; factors affecting application and fastness; maintenance of dyed and finished textiles.—III. (III.) Sun

**163L. Textile Coloration and Finishing Laboratory (1)**

Laboratory—3 hours. Prerequisite: course 163 (may be taken concurrently). Demonstrates various aspects of dyeing, printing, and finishing of textile substrates including the effect of fiber and finish type, and physical and chemical variables on dyeing and finishing processes and on the properties of the resultant textile.—III. (III.) Sun

**164. Principles of Apparel Production (3)**

Lecture—3 hours. Prerequisite: course 6 or 8. Overview of characteristics, technology, processes, and research in apparel manufacturing industries including study of government statistics, material utilization and fabrication, mechanization, management, and production engineering.—II. (II.) Chandler

**165. Textile Processes (3)**

Lecture/discussion—3 hours. Prerequisite: course 6. Physical processes involved in the production of textiles from the individual fiber to the finished fabric. Includes spinning, texturing, yarn formation, weaving preparation, weaving and knitting, tufting and fabric finishing.

**171. Clothing Materials Science (4)**

Lecture—3 hours; laboratory/discussion—3 hours. Prerequisite: course 6, 8, and senior standing. The properties, characterization, and performance evaluation of clothing materials and structures for specific functional applications. Principles and methods related to wetting and transport properties, fabric hand and aesthetic properties, clothing comfort, and material and assembly technology.—II. (II.) Hsieh

**173. Principles of Fashion Marketing (3)**

Lecture—3 hours. Prerequisite: course 8, Economics 1A, Agricultural and Resource Economics 113 or 136. Study of basic elements of fashion marketing including philosophy and objectives, organization, merchandising, pricing, promotion and personnel. Offered in alternate years.—III. Rucker

**174. Introduction to World Trade in Textiles and Clothing (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: course 8. Structure of the global fiber/textile/apparel complex and its distribution patterns with an overview of political, economic and technological factors that are changing these industries and their markets. GE credit: SocSci, Div.—II. (II.) Rucker

**180A-180B. Introduction to Research in Textiles (2-2)**

Laboratory—6 hours. Prerequisite: senior standing with textile-related major, and consent of instructor. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.)

**192. Internship in Textiles and Clothing (1-12)**

Laboratory—3-36 hours. Prerequisite: consent of instructor. Work-learn experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

**197T. Tutoring in Textiles and Clothing (1-5)**

Discussion/laboratory—3-15 hours. Prerequisite: upper division textiles-related major and consent of instructor. Tutoring of students in Textiles and Clothing courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another textiles course. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses**

**230. Behavioral Science Concepts in Textiles (3)**

Lecture—3 hours. Prerequisite: course 107, upper division or graduate course in statistics (e.g., Agricultural Management and Rangeland Resources 120) and one in a behavioral science (e.g., Psychology 145). Examination of theories and research concerning relationships between clothing and human behavior with emphasis on research techniques, including methods of measuring clothing variables. Offered in alternate years.—I. Kaiser

**290. Seminar (1)**

Seminar—1 hour. Critical review of selected topics of current interest in textiles. (S/U grading only.)—I, II. (I, II.)

**290C. Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing; consent of instructor. Individual faculty members meet with their graduate students. Critical presentations of original research are made by graduate students. Research activities are planned. Discussions are led by major professors for their research groups. (S/U grading only.)—I, II, III. (I, II, III.)

**293. Recent Advances in Textiles (3)**

Lecture—3 hours. Prerequisite: two upper division courses in Textiles and Clothing or consent of instructor. Critical reading and evaluation on selected topics of current interest in textiles. Multidisciplinary aspects of the topics selected will be stressed. May be repeated for credit.—(III.)

**298. Group Study (1-5)**

**299. Research (1-12)**

(S/U grading only.)

**Professional Course**

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**Theatre and Dance**

(College of Letters and Science)

**The Dramatic Art Major Program**

The A.B. degree in Dramatic Art provides students with an appreciation for and understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre, dance performance, and production. Students build significant skills in specific areas as well as achieving a broad knowledge of theatre, dance and film.

**Productions and Facilities.** Each year's schedule includes undergraduate festivals in theatre, dance, and film; opportunities to work with professional directors and choreographers in three main stage productions; and performance projects and established scripts developed by M.F.A. students. These productions take place on our proscenium (Main), thrust (Wyatt), black box (Arena), performance studio (University Club) stages as well as in the Mondavi Center's Studio Theatre and Jackson Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

**A.B. Major Requirements: Theatre Emphasis**

	UNITS
<b>Preparatory Subject Matter.....</b>	<b>33</b>
Dramatic Art 20, 24, 25, 26 .....	14
Dramatic Art 21A or 14 .....	4
Choose 4 units from Dramatic Art 21B, 40A, 40B, 41A, 41B, 98, 99, African American and African Studies 51 or courses in other departments with departmental approval.....	4
Dramatic Art 30 .....	1
Participation in at least two of the following areas: acting/dance; directing/choreography/playwriting; stage management/dramaturgy; design/studio/technical production; and crew assignments for a minimum of two productions which may include stage management, fly crew, stage running crew, props, running crew, lighting board operator, follow spot operator, sound board operator, costume running crew, dresser, make-up	
<b>Depth Subject Matter .....</b>	<b>45-47</b>
Dramatic Art 156A, 156B, 156C.....	12
One course from Dramatic Art 124A, 124B, 124C, 124D.....	4
One course from Dramatic Art 150, 154, 155, 155A, 159 .....	4
One course from Dramatic Art 121A, 121B, 122A, 122B, 141, 143 .....	3-4
One course from Dramatic Art 126, 127A, 127B, 140A, 160A.....	3-4
A minimum of 10 units chosen from the following: Dramatic Art 121A, 121B, 122A, 122B, 124A, 124B, 124C, 124D, 125, 126, 127A, 127B, 130, 140A, 141, 143,	

150, 154, 155A, 159, 160A, 160B, 170.....	10
Dramatic Art 180.....	9
Participation in University Theatre in at least two of the following areas: acting/dance; directing/choreography/playwriting/stage management/dramaturgy; design/studio/technical production; and crew assignments for a minimum of two productions which may include stage management, fly crew, stage running crew, props, running crew, lighting board operator, follow spot operator, sound board operator, costume running crew, dresser, make-up	
<b>Total Units for the Major.....</b>	<b>78</b>
<b>Dance Emphasis</b>	UNITS
<b>Preparatory Subject Matter.....</b>	<b>28</b>
Dramatic Art 14, 24, 26.....	11
Choose 10 units from Dramatic Art 21A, 40A, 40B, 41A, 41B, 42A, 42B, 44A, 44B, African American and African Studies 51.....	12
Dramatic Art 30; crew.....	4
Dramatic Art 30; performance.....	3
<b>Depth Subject Matter.....</b>	<b>45</b>
Dramatic Art 140A, 140B, 140C, 141, 145.....	19
Choose 19 units from African American and African Studies 155, Dramatic Art 142, 143, 154, 155, 156C, 159, Music 107A, Native American Studies 125.....	19
Dramatic Art 124C, 126.....	7
<b>Total Units for the Major.....</b>	<b>73</b>
<b>Major Adviser.</b> _____	
<b>Minor Program Requirements:</b>	UNITS
<b>Dramatic Art.....</b>	<b>22</b>
One course from Dramatic Art 20, 21A, 24, 25, 26.....	3-4
Two courses chosen from Dramatic Art 156A, 156B, 156C.....	8
Two courses chosen from Dramatic Art 121A, 121B, 122A, 122B, 124A, 124B, 124C, 124D, 125, 126, 127A, 127B, 130, 140A, 141, 142, 143, 150, 154, 155, 155A, 159, 160A, 160B, 170.....	6
Dramatic Art 180.....	5
Participation in University Theatre in at least two of the following areas: acting/dance; directing/choreography/playwriting/stage management/dramaturgy; design/studio/technical production; and crew assignments for a minimum of one production which may include stage management, fly crew, stage running crew, props, running crew, lighting board operator, follow spot operator, sound board operator, costume running crew, dresser, make-up	
<b>Transfer Students.</b> As described above, all students completing a major in Dramatic Art must participate in dramatic productions, including work in at least three of the following four areas: acting/dance, design, studio (scenic, costume, lighting, painting, props, sound), directing/playwriting/stage management. Such experience gained prior to transfer to UC Davis may count toward partial satisfaction of this requirement; transfer students should see the major adviser for an evaluation of your previous experience. While in residence at UC Davis, transfer students are required to participate in a minimum of five dramatic productions and that participation must include work in at least three of the four areas specified above, as well as running crew.	
<b>Guest Artists.</b> The Granada Visiting Artists Program brings distinguished professional artists to the campus each year, to be in residence for a quarter. These working professional artists interact closely with students in the classroom and rehearsal halls	

and provide them excellent pre-professional experiences of theater practice.

**Graduate Study.** The Department of Dramatic Art offers programs of study and research leading to the M.F.A. (acting, directing, design, choreography) and Ph.D. (performance and culture) degrees. Detailed information may be obtained by contacting the Graduate Adviser.

**Graduate Advisers.** *Ph.D. Program:* L. Hunter; *M.F.A. Program:* Della Davidson

**Courses in Dramatic Art (DRA)**

**Lower Division Courses**

**1. Theatre, Performance and Culture (4)**  
Lecture—3 hours; discussion—1 hour. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." Not open to students who have completed course 1S. GE credit: ArtHum, Div, Wrt.—Bogad, Hunter, Rossini

**1S. Theatre, Performance and Culture (4)**  
Lecture—3 hours; discussion—1 hour. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." For Short Term Programs Abroad. Not open to students who have completed course 1. Not offered every year. GE credit: ArtHum, Div, Wrt.—McCutcheon

**10. Introduction to Acting (3)**  
Laboratory/discussion—4 hours; term paper. Fundamentals of movement, speech, theatre games, and improvisation. Selected reading and viewing of theatre productions. Intended for students not specializing in Dramatic Art.—I, II, III. (I, II, III.)

**14. Introduction to Contemporary Dance (4)**  
Lecture—3 hours; laboratory—3 hours. Introduction to basic issues and methods in contemporary dance. Focus on preparing the student for dancing and dance-making through basic techniques of improvisation and composition. Consideration of dance as a cultural practice.—I, II, III. (I, II, III.)

**20. Introduction to Dramatic Art (4)**  
Lecture—3 hours; discussion—1 hour. Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts. GE credit: ArtHum.

**21A. Fundamentals of Acting (4)**  
Lecture—2 hours; laboratory—4 hours. Prerequisite: course 20. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of theatre productions. Limited to those planning to major in Dramatic Art.—, II. (I, II.)

**21B. Fundamentals of Acting (4)**  
Lecture—2 hours; laboratory—4 hours. Prerequisite: course 21A and consent of instructor. Theory and practice of acting with emphasis on character analysis, interpretation, and development. Acting in a student-directed project. Viewing of theatre productions. Limited to those planning to major in Dramatic Art.

**24. Visual Aspects of Dramatic Art (4)**  
Lecture—3 hours; laboratory—2 hours. Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup.

**25. Technical Aspects of Dramatic Production (3)**  
Lecture—3 hours. Technical principles of dramatic production emphasizing the three areas of scenic, costume and lighting studios. Subjects covered

include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production.

**26. Performing Arts Production Management (3)**  
Lecture—3 hours. Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction, audience control, box office, promotion, safety, accommodations for persons with disabilities and emergency procedures.—Winn

**30. Theatre Laboratory (1-5)**  
Prerequisite: course 25 or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit up to 11 units.—I, II, III. (I, II, III.)

**40A. Beginning Modern Dance (2)**  
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated once for credit with consent of instructor.

**40B. Intermediate Modern Dance (2)**  
Laboratory/discussion—4 hours. Prerequisite: course 40A. Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history. May be repeated once for credit with consent of instructor.

**41A. Beginning Jazz Dance (2)**  
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated once for credit with consent of instructor.

**41B. Intermediate Jazz Dance (2)**  
Laboratory/discussion—4 hours. Prerequisite: course 41A. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated once for credit with consent of instructor.

**42A. Beginning Ballet (2)**  
Laboratory/discussion—4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated once for credit with consent of instructor.

**42B. Intermediate Ballet (2)**  
Laboratory/discussion—4 hours. Prerequisite: course 42A or consent of instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated once for credit with consent of instructor.

**44A. Beginning Hip Hop Dance (2)**  
Laboratory/discussion—4 hours. Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated once for credit.

**44B. Intermediate Hip Hop Dance (2)**  
Laboratory/discussion—4 hours. Prerequisite: course 44A or consent of instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences. May be repeated once for credit.

**92. Internship in Dramatic Art (1-12)**

Prerequisite: consent of instructor and department chairperson; lower division students (less than 84 units completed). Internship outside the Department of Theatre and Dance enabling students to practice their skills. May be repeated for credit up to 12 units. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.)

**98. Directed Group Study (1-5)**

Primarily for lower division students. (P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**  
(P/NP grading only.)**Upper Division Courses****111S. Representation and Identity in Culture and Cinema (4)**

Lecture/discussion—2 hours; film viewing—4 hours. Issues of personal and collective identity via study of film narratives from different cultures. Reflection of dominant cultural identities in film. Taught in Australia. GE credit: ArtHum, Div, Wrt.—McCutcheon

**115. Advanced Study of Major Film Makers (4)**

Lecture/discussion—3 hours; film viewing—2 hours. Prerequisite: course 15. Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films. May be repeated for credit when different film creator studied.

**121A. Advanced Acting: Mask, Myth, and Tragedy (4)**

Lecture/laboratory—6 hours. Prerequisite: course 21B and consent of instructor. Theory and practice of acting focused on the performance skills necessary to enact verse plays. Specific concentration on language as vocal and physical metaphor. Offered in alternate years.

**121B. Advanced Acting: Comedy from Farce to Manners (4)**

Lecture/laboratory—6 hours. Prerequisite: courses 21B, 121A and consent of instructor. Theory and practice of acting in comic plays. Specific issues addressed will be comic characterization, physical mask, and timing. Offered in alternate years.

**122A. Advanced Acting: Realism (4)**

Lecture/laboratory—6 hours. Prerequisite: course 21B and consent of instructor. The issues of Stanislavski realism are explored through selected plays. Script analysis using improvisation and emotional scoring. Offered in alternate years.

**122B. Advanced Acting: Non-Realism (4)**

Lecture/laboratory—6 hours. Prerequisite: courses 21B, 122A and consent of instructor. Exploration of the acting techniques needed to perform a non-realistic script. Different avant-garde movements will be examined through performance of the scripts. Offered in alternate years.

**124A. Principles of Theatrical Design: Scenery (4)**

Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction.

**124B. Principles of Theatrical Design: Scenery (4)**

Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays.

**124C. Principles of Theatrical Design: Lighting (4)**

Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Theories of lighting the stage, equipment and control systems, execution of lighting plots.—Munn

**124D. Principles of Theatrical Design: Costume (4)**

Lecture-seminar—4 hours. Prerequisite: course 24 or consent of instructor. Source materials for theatrical costuming, selecting fabrics, elements of design,

analysis of plays in terms of costume design, execution of designs for modern and period plays.—Morgan

**124E. Costume Design for Film (4)**

Lecture/discussion—4 hours. Prerequisite: course 24 or 124D or consent of instructor. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films.—Morgan

**125. Scenic Painting: Studio (4)**

Lecture—2 hours; studio—3 hours; laboratory—3 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio, or Design; or course 24 or 25, or consent of instructor. Scene painting techniques, practices and materials. Course satisfies production requirement in studio category. May be repeated once with consent of instructor. Offered in alternate years.

**126. Principles of Performing Arts Stage Management (3)**

Lecture/discussion—2 hours; laboratory—3 hours. Prerequisite: course 20, 24, 25, 26 or the equivalent or consent of instructor. Stage management principles for theatre, dance, musical theatre, music, and concerts. The dynamical role of the stage manager in the performing arts, upper-management team.—Winn

**127A. Principles of Directing (4)**

Lecture—2 hours; laboratory—4 hours. Prerequisite: courses 21A, 26; two of 156A, 156B, 156C; or consent of instructor. The director's creative approach to the play and to its staging.

**127B. Principles of Directing (4)**

Lecture—2 hours; laboratory—4 hours; rehearsal. Prerequisite: course 127A and consent of instructor for non-majors. The director's creative approach to the actor.

**128. Principles of Theatre Sound (3)**

Lecture/discussion—2 hours; laboratory—3 hours. Fundamentals of sound, sound equipment, and sound design as used in modern theatre and other performance venues. Assembly, set-up, and operation of basic theatre sound reinforcement system, recording system, and theatrical playback system.—Jacobson

**130. Approaches to Theatrical Design: Practice and Theory (4)**

Seminar—2 hours; studio—4 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio or Design. Advanced scenic design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres. Course satisfies Dramatic Art production requirement in Design. Offered in alternate years.

**140A. Dance Composition (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 40A, 41A, and 42A, or consent of instructor. Introduction to the craft of choreography. Students will compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy.—Davidson

**140B. Dance Composition (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 140A. Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment.—Grenke

**140C. Dance Composition (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 140A, 140B. Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it through creation of short dance studies.—Davidson

**141. Introduction to the Fundamentals of Movement (3)**

Lecture/discussion—3 hours. Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of body mind specialists Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga.

**142. History of Modern Dance (5)**

Lecture—3 hours; laboratory—3 hours; extensive writing. The Modern Dance tradition in the U.S., focusing on its theorizations of individual and social identity. Students will write and choreograph analyses of principle dances in this tradition. Offered in alternate years.

**143. Dance and Movement Studio (1-4)**

Laboratory/discussion—2-8 hours. Prerequisite: course 14 or consent of instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions. May be repeated for credit for a total of 8 units.

**144. Introduction to Traditional Chinese Physical Culture (4)**

Lecture/discussion—4 hours. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications.—Hunter

**145. Directed Choreography Projects (4)**

Lecture/laboratory—6 hours. Prerequisite: courses 140A, 140B, 140C or consent of instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals.—Grenke

**146A. Professional Track Modern Dance I (3)**

Laboratory/discussion—6 hours. Prerequisite: course 40B; consent of instructor. Professionally oriented performance training. Rigorous, consistent training regimen based on traditional modern dance technique. Breath and voice, skeletal and muscular placement, moving from the spine, contraction technique, movement intention. May be repeated two times for credit.—Grenke

**146B. Professional Track Modern Dance II (3)**

Laboratory/discussion—6 hours. Prerequisite: courses 40B and 146A; consent of instructor. Continuation of course 146A. Body and space relationships in solos, duets and group work; stylistic variations of Graham technique; works of Paul Taylor. May be repeated two times for credit.—Grenke

**146C. Professional Track Modern Dance III (3)**

Lecture/discussion—6 hours. Prerequisite: courses 40B, 146A, and 146B; consent of instructor. Continuation of course 146B. Time as a theatrical device, sustaining movement and non-movement, phrasing, musicality. May be repeated two times for credit.—Grenke

**150. American Theatre and Drama (4)**

Lecture—4 hours. The history of the theatre from Colonial times to the present. Readings of selected plays. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**151S. Australian Performance and Culture (4)**

Lecture/discussion—2 hours; seminar—2 hours. Australian performance and theatre practices as a product of its culture of origin. Relationships between art and society. Taught in Australia. GE credit: ArtHum.—McCutcheon

**154. Asian Theatre and Drama: Contexts and Forms (4)**

Lecture/discussion—4 hours. Prerequisite: upper division standing. Selected Asian plays and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; inter-

cultural performance—the fusion of Asian and Western traditions. Offered in alternate years. GE credit: ArtHum, Div, Wrt.—Sellers-Young

**155. Representing Race in Performance (4)**  
Lecture—4 hours. Examination of how “race” is represented and performed in American culture. Course will feature different sub-headings such as “African American Theatre” or “Asian-Americans on Stage.” May be repeated once for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

**155A. African American Dance and Culture in the United States, Brazil and the Caribbean (4)**

Lecture/discussion—4 hours. A comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as African American and African Studies 155A.) Offered in alternate years.

**155B. Ancient and Contemporary Greek Theatre and Dance (6)**

Discussion/laboratory—10 hours; performance instruction—10 hours; seminar—13 hours. Origins of early theatres and the first actors, playwrights and dancers and their powerful influence on western performance and thought up to present day. Offered in Greece. GE credit: ArtHum.—IV. (IV.) Shannon

**156A. History of Theatre and Dance: Ancient to 1650 (4)**

Lecture—4 hours. Overview of theatre and dance as it has come to be recognized in ancient societies through to 1650. Performance traditions studied include Greek, Indian, Aztec, Roman, Japanese (Noh), through the Renaissance. GE credit: ArtHum, Div, Wrt.—I. (I.)

**156B. History of Theatre and Dance: 1650-1900 (4)**

Lecture—4 hours. Overview of theatre and dance between 1650 and 1900. Dance and theatre are related to the specific social and political organizations of court society in 17th and 18th century France, Germany and England, and to Japanese society. GE credit: ArtHum, Div, Wrt.

**156C. History of Theatre and Dance: The Twentieth Century (4)**

Lecture—4 hours. Overview of theatre and dance in the twentieth century. Although largely focused on Western theatrical practices, the relationship between East and West performance practices will be studied and contemporary Japanese theatre will be included. GE credit: ArtHum, Div, Wrt.

**156D. Theatre History through Shakespeare (4)**

Lecture—4 hours; writing. Shakespeare’s plays, theatre history, and theatre today. European contexts from 1590-2004 and international theatre from 20th century. Stagecraft, different media (print, stage, film), social/political environments, design, and cultural change (gender, sexuality and ethnicity). May be repeated one time for four units of credit. GE Credit: ArtHum, Div., Wri.—Hunter

**156AN. Performance Analysis (4)**

Laboratory/discussion—3 hours; discussion—1 hour. Prerequisite: course 1, course 20 or consent of instructor. Analysis of performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE Credit: ArtHum, Div, Wri.—Bogad

**156BN. Theatre in History and Place: Local, National and Global Conditions for Production (4)**

Laboratory/discussion—3 hours; discussion—1 hour. Prerequisite: course 1, course 20 or consent of instructor. Exploration of local, national and global issues in theatre production, with special attention to historical changes in social and political contexts for performance. GE Credit: ArtHum, Div, Wri.—Hunter

**156CN. Modern Aesthetic Movements in Performance (4)**

Laboratory/discussion—3 hours; discussion—1 hour. Prerequisite: course 1, course 20 or consent of instructor. Study of important movements in performance, especially theatre and dance from realism to the present. Primary emphasis on Western traditions though others may be studied. GE Credit: ArtHum, Div, Wri.—Rossini

**158. Performance Studies Undergraduate Seminar (4)**

Seminar—4 hours. Prerequisite: course 156A, B, or C, or consent of instructor. Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic issues as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry. May be repeated for credit. GE Credit: Wri.

**159. Contemporary Experimental Performance, Theatre and Drama (4)**

Lecture/discussion—4 hours. Evaluation and examination of the “New Theatre” — its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. Not open for credit to students who have completed course 159S.—III. (III.) McCutcheon

**159S. Contemporary Experimental Performance, Theatre and Drama (4)**

Lecture/discussion—4 hours. Evaluation and examination of the “New Theatre” — its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. This course is offered in Sydney, Australia. Not open for credit to students who have completed course 159. Not offered every year. — McCutcheon

**160A-160B. Principles of Playwriting (4-4)**

Lecture/seminar—4 hours. Prerequisite: two courses in Dramatic Art or related courses in other departments; course 160A prerequisite for 160B or consent of instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays.

**170. Media Theatre (3)**

Lecture—1 hour; rehearsal—2 hours; performance—1 hour. Prerequisite: upper division standing in Dramatic Art, Music, Art Studio, Design, Computer Science, or Engineering: Computer Science, or consent of instructor. New media and application of theatre design and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation. May be repeated once for credit.

**180. Theatre Laboratory (1-5)**

Prerequisite: upper division standing and course 25, or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit.—I, II, III. (I, II, III.)

**192. Internships in Theatre and Dance (1-12)**

Internship—3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. May be repeated for credit for a total of 12 units. Not open to students who have completed course 192S. (P/NP grading only.)

**192S. Internships in Theatre and Dance (1-12)**

Internship—3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. This course is offered in Sydney, Australia. May be repeated for credit for a total of 12 units. Not offered every year. (P/NP grading only.)—McCutcheon

**194HA-194HB. Special Study for Honors Students (3-3)**

Independent study—9 hours. Prerequisite: qualification for Letters and Science Honors Program and admission to Dramatic Art Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Dramatic Art. (Deferred grading only, pending completion of sequence).

**197T. Tutoring in Dramatic Art (1-5)**

Tutoring—1-5 hours. Prerequisite: upper division or graduate standing with major in dramatic art; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department’s regular courses. May be repeated for credit. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate Courses

**200. Methods and Materials in Theatre Research (4)**

Seminar—3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.

**211. Advanced Voice and Speech (2)**

Laboratory—4 hours. Open to advanced undergraduates with consent of instructor. Voice production and speech related to specific acting problems in classical plays, particularly in verse. May be repeated for credit.

**212. Advanced Stage Movement (3)**

Laboratory—6 hours. Prerequisite: graduate standing in the MFA Program. The application of modes of exploration, breath placement, and the use of imagery as well as Laban’s effort/shape system as a method of analysis in classic and modern plays. Open to advanced undergraduates by consent of instructor. May be repeated for credit.

**221. Special Problems in Advanced Acting (4)**

Seminar—2 hours; laboratory—4 hours. Prerequisite: consent of instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit.

**224A. Seminar in Theatrical Design: Ancient Worlds—Early 17th Century (4)**

Seminar—2 hours; project—2 hours. Prerequisite: graduate standing. Group study while focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Greek, Medieval, Renaissance, Shakespearean, Jacobean, early 17th century. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.—I. (I.) Iacovelli, Morgan, Munn

**224B. Seminar in Theatrical Design: Mid 17th Century to 1900 (4)**

Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; course 224A or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Cavalier, Restoration 18th century opera and ballet, 19th century drama. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.—II. (II.) Iacovelli, Morgan, Munn

**224C. Seminar in Theatrical Design: the 20th Century (4)**

Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; course 224A and 224B or consent of instructor. Group study focusing primarily on one discipline — scenic, costume or lighting design. 20th century genres covered: Realism, Brecht, Musi-

icals, Contemporary Dance, short narrative film. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.—III. (III.) lacovelli, Munn

**224D. Seminar in Theatrical Design: Contemporary Concepts (4)**

Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; course 224A, 224B, and 224C or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on contemporary design concepts for new works and classics: Shakespeare, modern dance, concept plays and musicals. Script and character analysis for design in performance, research, design projects.—I. (I.) lacovelli, Morgan, Munn

**224E. Seminar in Theatrical Design: Advanced Concepts (4)**

Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; courses 224A, 224B, 224C, and 224D or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on special issues in contemporary design concepts for new works and classics. Script and character analysis for design in performance, research, design projects.—II. (II.) lacovelli, Morgan, Munn

**225. Performance Design Studio: Techniques and Media (2)**

Studio—2 hours. Prerequisite: graduate standing; must be taken concurrently with course 224 series. Exploration and development of techniques and skills in the performance design process. Drafting, model building, drawing, painting and rendering, costume drawing, color theory, lighting techniques, design portfolio preparation and presentation. May be repeated up to five times for credit.—I, II, III. (I, II, III.) lacovelli, Morgan, Munn

**228. Seminar in Directing Theory: Non-Realism (4)**

Seminar—3 hours; term paper. Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays—Greek to the present; emphasis on textual analysis. Offered in alternate years.

**229. Special Problems in Directing (5)**

Seminar—2 hours; laboratory—2 hours; rehearsal—4 hours. Prerequisite: consent of instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated for credit.

**250. Modern Theatre (4)**

Seminar—3 hours; term paper. The theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced. Offered in alternate years.

**251. Scoring and Scripting in Performance (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. The process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists' "scores" will layer and transform the "script" into performance for specific time, place, spectators.

**252. Performance: Concepts of Space, Place, and Time (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Innovative theories of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consideration of various tempi from music and movement.

**253. Approaches to Collaboration (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Exploration of different approaches to collaboration among artists in different media and their influence on the creative process.—I.

**254. Performing Identities/Personae (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Historical and contemporary theories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual orientation.

**255. Composition in the Arts (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Examine manner in which specific elements utilized by actors, dancers, directors, choreographers, and designers are combined or related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products. May be repeated once for credit.

**259. Topics in Contemporary Theatre and Performance (4)**

Seminar—3 hours; term paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship (e.g., "Brecht and After," "British Theater," "Race and Gender in Performance." May be repeated five times for credit.

**265A. Theory of Dramatic Art: Modes of Production (4)**

Seminar—3 hours; term paper. Introduces students to literature of theatrical practice, cultural and aesthetic theory, as related to practical stage performance.

**265B. Theory of Dramatic Art: Signification and the Body (4)**

Seminar—3 hours; term paper. Introduce students to analysis of the body in performance, drawing on the theoretical models from various fields.

**265C. Theory of Dramatic Art: Technologies of Difference (4)**

Seminar—3 hours; term paper. Introduce students to history, theory, practice of staging social and cultural difference.

**265D. Theory of Dramatic Art (4)**

Seminar—3 hours; term paper. Theory and aesthetic principles of dramatic art as a fine art. Offered in alternate years. (Former course 265.)

**280. Theatre Laboratory (1-12)**

Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit.—I, II, III. (I, II, III.)

**298. Group Study (1-5)**

Prerequisite: consent of instructor.

**299. Individual Study (1-12)**

(S/U grading only.)

**299D. Dissertation Research (1-12)**

(S/U grading only.)

**Professional Course**

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**Professional Course**

**413. Stage Make-up (1)**

Lecture/laboratory—2 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up.

## Transportation Technology and Policy (A Graduate Group)

Patricia L. Mokhtarian, Ph.D., Chairperson of the Group

**Group Office.** 2028 Academic Surge (530) 752-0247; <http://www.its.ucdavis.edu>

Pieter Stroeve, Sc.D., Professor  
(Chemical Engineering and Materials Science)  
Steven Velinsky, Ph.D., Professor  
(Mechanical and Aeronautical Engineering)  
Anthony Wexler, Ph.D., Professor  
(Mechanical and Aeronautical Engineering)  
James Wilen, Ph.D., Professor  
(Agricultural and Resource Economics)  
Michael Zhang, Ph.D., Associate Professor  
(Civil and Environmental Engineering)

### Emeriti Faculty

Myron "Mike" Hoffman, Professor Emeritus

**Affiliated Faculty**

Rahman Azari, Ph.D., Lecturer (*Statistics*)  
 Andrew F. Burke, Ph.D., Research Engineer  
 (*Institute of Transportation Studies*)  
 Mark A. Delucchi, Ph.D., Research Ecologist (*Institute of Transportation Studies*)  
 Ryuichi Kitamura, Ph.D., Research Engineer  
 (*Institute of Transportation Studies*)  
 Kenneth S. Kurani, Ph.D., Research Engineer  
 (*Institute of Transportation Studies*)  
 Tom Turrentine, Ph.D., Research Anthropologist  
 (*Institute of Transportation Studies*)

**Graduate Study.** The Graduate Group in Transportation Technology and Policy offers the M.S. (Plan I—thesis; and Plan II—exam), and Ph.D. degrees in two areas of specialization: Transportation Technology; and Transportation Planning and Policy. The technology track is for students trained in engineering and the physical sciences and interested in systems-level planning, analysis, management and design of advanced technologies (emphasizing vehicle propulsion and “intelligent transportation system” technologies) focusing on energy and environmental issues. The planning and policy track is aimed at students from a wider range of disciplines interested in the broader public policy issues concerning transportation systems. The curriculum for both tracks includes courses in civil, mechanical, and environmental engineering, economics, policy sciences, statistics, travel behavior, management, technology assessment and environmental studies.

**Preparation.** Applicants will normally be expected to have completed two courses in calculus, one course in linear algebra, and one course each in calculus level statistics and microeconomics. Additionally, students entering the technology track will need either to have an appropriate technical background or make up a relatively large number of prerequisite courses in order to be able to take the approved courses in that track.

**Program of Study.** Students will have the option of following either a technology or policy/management track. M.S. students complete 6 core courses plus electives. Ph.D. students take 7 courses from the same core, 3 additional courses from their chosen track, one more in the alternate track, plus electives. Master's degrees require a minimum of 36 quarter units and doctoral degrees require a minimum of 54 units. M.S. Plan I students may replace up to 6 units of regular course work with research (course 299) units. At least two thirds of all credits must be at the graduate level.

**Graduate Adviser.** P.L. Mokhtarian

**Curriculum**

**Core Courses.** Students in each track are required to take courses in a common set of core competencies, as well as (for Ph.D. students) some courses in the other track.

*Knowledge areas core courses:* M.S. and Ph.D. students take Transportation Technology (TTP 210), Transportation Policy (ECI 252 or TTP 220), and Transportation Systems (ECI 251).

*Skill areas core courses:* M.S. and Ph.D. students take one in the area of Research Design from the following: Transportation Survey Methods (TTP 200), Research Methods in Environmental Policy (ESP 278), Design and Analysis of Engineering Experiments (EBS 265), Experimental Design and Analysis (AGR 205), Engineering Experimentation and Uncertainty Analysis (MAE 207), or Statistical Methods for Research (STA 205);

M.S. and Ph.D. students take one in the area of Economics from the following: Transportation Economics (ECN 145), Microeconomic Analysis (ARE 204), Economic Analysis of Resource and Environmental Policies (ARE 275),

Environmental Economics (ARE 276), or Infrastructure Economics (ECI 268);

M.S. students take one and Ph.D. students take two in the area of Transportation Models and Quantitative Methods from the following: Discrete Choice Analysis of Travel Demand (ECI 254), Urban Traffic Management and Control (ECI 256), Transportation-Air Quality: Theory and Practice (ECI 269), Applied Statistical Methods: Regression Analysis (STA 108), Applied Statistical Methods: Analysis of Variance (STA 106), Analysis of Categorical Data (STA 138), Design and Analysis of Engineering Experiments (EBS 265), Multivariate Systems and Modeling (AGR 206), Applied Econometrics (ARE 256), or Psychological Data (PSC 204A, B, C, or D);

*Integration and Breadth core courses:* MS and Ph.D. students take ITS Seminars (TTP 298), Transportation Orientation Seminar (TTP 282), Leadership, Professionalism, and Ethics Seminar (TTP 283), and Research (TTP 299).

**Planning and Policy Courses.** Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural and Resource Economics, 100B, 136, 144, 175, 176, 204, 275, 276  
 Anthropology 104N, 127, 211, 222  
 Civil and Environmental Engineering, 165, 258, 268  
 Civil and Environmental Engineering/Environmental Science and Policy 163  
 Communication 170  
 Community and Regional Development 162, 171, 240, 245  
 Ecology 213  
 Economics 145  
 Education 222  
 Engineering 250  
 Environmental Horticulture 110  
 Environmental Science and Policy 163, 167, 168A, 171, 179 212A  
 Geography 155  
 History 172  
 Landscape Architecture 180, 181, 201, 220  
 Management 240, 251, 252, 293  
 Political Science 187, 208  
 Psychology 155  
 Sociology 141, 143A, B  
 Transportation Technology and Policy 200, 210, 220, 281, 282, 283, 292, 298

**Technology Courses.** Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural Management and Rangeland Resources 132, 198  
 Applied Science Engineering-Davis 115, 116  
 Applied Science Engineering-Livermore 220A, 220B  
 Atmospheric Science 116, 270  
 Biological Systems Engineering 216, 265  
 Civil and Environmental Engineering 149, 153, 161, 162, 179, 189, 242, 256, 257, 269, 282  
 Computer Science Engineering 168  
 Environmental and Resource Sciences 131, 186  
 Electrical and Computer Engineering 207  
 Landscape Architecture 198  
 Mechanical Engineering 134, 161, 163, 188, 217, 218, 226, 234, 236, 258, 298

**Other Courses.** Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural and Resource Economics 106, 252, 253, 254, 255, 256  
 Agronomy 205, 206  
 Anthropology 138  
 Civil and Environmental Engineering 153, 254

Community and Regional Development 151, 151L  
 Economics 140, 240A, B  
 Engineering, Applied Science 115  
 Engineering, Biological Sciences 265  
 Environmental Science and Policy 278  
 Graduate School of Management 249  
 Mathematics 108, 227, 258A  
 Mechanical and Aeronautical Engineering 207  
 Nutrition 492A  
 Psychology 204A, B, C, D, 205A, B, C  
 Sociology 298  
 Statistics 103, 106, 108, 131A, B, C, 135, 137, 138, 140, 142, 144, 205, 222, 223  
 Transportation Technology and Policy 200, 210, 220, 281, 282, 283

**Courses in Transportation Technology and Policy (TTP)****Graduate Courses****200. Transportation Survey Methods (4)**

Lecture—4 hours. Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have completed Civil and Environmental Engineering 255.—II. (II.) Mokhtarian

**281. ITS Transportation Seminar Series (1)**

Seminar—1.5 hours. Transportation seminars by guest speakers, on varied topics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Mokhtarian, Sperling

**283. Professionalism, Leadership, and Ethics (1)**

Seminar—2 hours. Speakers from industry, government, academia, and NGOs will lead discussions about succeeding and performing in the professional world. They will address leadership, ethics, and other workplace issues. May be repeated for credit. (S/U grading only.)—III. (III.) Sperling

**289A. Selected Topics in Transportation Technology and Policy (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out through lecture or laboratory, or a combination of both. May be repeated for credit.—I, II, III. (I, II, III.)

**289B. Selected Topics in Transportation Technology and Policy (1-5)**

Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out through lecture or laboratory, or a combination of both. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**290C. Graduate Research Group Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in transportation. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**292. Internship in Transportation Technology and Policy (1-5)**

Prerequisite: second year standing; approval of project prior to period of internship. Supervised work experience in transportation studies. May be repeated for credit if topic differs. (S/U grading only.)—I, II, III. (I, II, III.)

**298. Group Study (1-5)**

Discussion—1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)

**299. Research (1-12)**

Discussion—1-12 hours. Prerequisite: consent of instructor. (S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

## UC Davis Short-Term Programs Abroad

Eric Schroeder, Director

207 Third Street, Suite 220  
(530) 757-3308; Fax (530) 297-7142;  
<http://summer-abroad.ucdavis.edu>

**Programs of Study**

UC Davis Summer Abroad is a study-abroad program unique to the Davis campus. A UC Davis faculty-led program, Summer Abroad offers multiple programs each year in various countries and specializations. Participants remain registered UC Davis students while abroad and receive UC Davis units for their academic work. Financial aid and scholarships apply. Students may participate in Summer Abroad as early as their freshman year, or as late as their senior year or after graduation.

**Academic Focus.** Students of any major can participate in Summer Abroad. All programs are approximately four weeks in length, and are led by UC Davis faculty members. Students may also earn units through an internship component for some programs. All programs allow students to experience the program country's unique culture through co-curricular activities, such as day-trips to surrounding areas, museum tours, and theater visits.

Students can earn 8-12 quarter units through 2-3 courses taken abroad. Students may be able to apply earned units towards their major, minor, or General Education requirements.

Summer Abroad courses can apply specifically towards the Global and International Studies minor. The minor is designed for students who intend to focus their interest in global and international studies in either the Arts and Humanities or the Social Sciences.

In preparation for Summer Abroad, students are urged to take Education Abroad Program 90X or 190X, which examine issues of study abroad.

## UC Davis Washington Center

Emily O. Goldman, Ph.D., Director and Associate Professor

UC Davis Washington Center,  
1608 Rhode Island Avenue NW, Third Floor  
Washington, D.C. 20036  
(202) 974-6351

**Information.**

UC Davis Washington Center On-Campus Office  
Internship and Career Center  
South Hall, 2nd Floor  
(530) 754-5718;  
<http://washingtonprogram.ucdavis.edu>

The UC Davis Washington Center began operations in the 1990-91 academic year. It provides students and faculty new and expanded opportunities in the nation's capital to enrich their education and research. Its principal activities are an undergraduate academic internship program, fellowships and internships for graduate and professional school students, fellowships and research grants for faculty, and conferences and workshops organized by UC Davis faculty. The University of California Washington Center resides in an 11-story, state of the art facility in downtown D.C. The center houses the aca-

dem and residential programs for undergraduate, faculty, and graduate students participating in the UC Davis Washington Center, as well as those from other UC campuses.

**Undergraduate Academic Internship Program**

The UC Davis Washington Center undergraduate program is open to students from all majors at UC Davis who have completed 89.9 units towards graduation. Students earn 15 units of academic credit, continue to be registered as full-time students, and fulfill university residency requirements. A GPA of at least 3.000 is recommended for admission although not required. Applicants are also evaluated based on overall relevant experience, a written statement, letters of recommendation and personal interviews.

The Undergraduate Academic Internship Program runs 11 weeks each fall, winter, and spring quarter-fall. It has three principal components:

- **Internship.** 7 units: Students work three to four days per week as interns in Congress, federal agencies, interest groups, trade associations, research institutions, the media, museums or in other organizations related to policy, politics, science and culture and geared to the interests and objectives of individual students.
- **Research Seminar.** 4 units: This is the core academic component of the program. Each student writes a 20-25 page research paper in consultation with Washington Program faculty and graduate fellows. To complete the assignment, students take advantage of the many unique research resources in Washington, DC.
- **Elective Seminar Course.** 4 units: Each student also enrolls in one upper division seminar course taught at the Washington Center. These courses vary each quarter, and are a mix of political science, international relations, history, other social sciences, the arts and humanities, and science policy. In addition to regular instruction, seminars often include guest speakers, observations of congressional committees and federal agencies, and other relevant Washington experiences. UC Davis course equivalencies are established each quarter.

Courses are taught by UC Davis faculty in residence, faculty from the UCLA, UC Santa Barbara, UC Santa Cruz, UC San Diego, UC Berkeley, UC Irvine and UC Riverside programs, or visiting faculty from the Washington area.

Financial aid eligibility is maintained, and the aid package can be adjusted to reflect the additional costs of the program. Some additional financial awards also are offered directly by the Washington Center, including the University of California President's Washington Scholarship, Joyce and Norman Weil Scholarships, and the Blanche and Frank Goldstein Building Bridges Award.

Students reside at the UC Washington Center facility, convenient to public transportation. Arrangements are made to cover health services and other aspects of student life. The program also includes many educational, cultural and historical activities in the Washington area.

**Summer Program.** The UC Davis Washington Center also operates an 11-week Summer Program. The Summer Program has a credit or non-credit option. The credit option allows students to earn 7 units of academic credit, in addition to working at an internship. Students pay the summer sessions rate per credit hour plus an application fee. The non-credit internship has a program fee of \$200. Both options allow students to participate in many educational, cultural, historical and social activities. Some financial assistance is provided but is more limited than for the academic year programs.

The Washington Center also has positions during the academic year for graduate students as Graduate Fellows; combination of a predoctoral research fellowship and a teaching assistantship, and Graduate Summer Internships.

**Courses in UC Davis Washington Center (WAS)****Upper Division Courses****175. Health Policy and Health Politics (4)**

Seminar—3 hours; extensive writing or discussion—1 hour. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of model policies to address them. (Same course as Epidemiology and Preventive Medicine 175W.) GE credit: SocSci, Wrt.—III. Wintemute

**187. Gun Violence (4)**

Lecture/discussion—4 hours. Gun violence, viewed from the perspectives of criminology and public health. Topics include personal and societal contributing factors and critical assessment of potential solutions. Offered in alternate years.—III. Wintemute

**192. Internship in the UC Davis Washington Center Program (7)**

Internship—28 hours. Prerequisite: junior or senior standing, admission in the UC Davis Washington Center undergraduate program, course 193 concurrently. Internship in Washington, DC with associated, supervised research project. (Same course as Political Science 192W.) (P/NP grading only.)—I, II, III. (I, II, III.) Goldman

**193. Washington Center Research Seminar (4)**

Lecture/discussion—1 hour; independent study—3 hours; tutorial—0.5 hour. Prerequisite: course 192 concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as Political Science 193W.) GE credit: Wrt.—I, II, III. (I, II, III.) Goldman

## University Writing Program

(College of Letters & Science)

\_\_\_\_\_, Director

 Jayne L. Walker, Ph.D., Lecturer

## The Program

The University Writing Program (UWP) offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific disciplines, and writing in the professions. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology of exemplary student writing, *Prized Writing*, and a journal for writing instructors, *Writing on the Edge*. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

## Courses in University Writing Program (UWP)

### Lower Division Courses

#### 1. Expository Writing (4)

Lecture/discussion—4 hours. Prerequisite: completion of Subject A requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments will be made. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 1.—I, II, III. (I, II, III.)

#### 18. Style in the Essay (4)

Lecture/discussion—4 hours. Prerequisite: course 1 or English 3 or the equivalent. Style, language, and structure in the essay. Instruction in analyzing style, developing a written voice, revising sentences, developing effective paragraphs and arguments, and writing with force and clarity. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 18.—I, II, III. (I, II, III.)

#### 19. Writing Research Papers (4)

Lecture/discussion—4 hours. Prerequisite: course 1 or English 3 or the equivalent. Development of skills in critical reading, analysis, documentation, and writing needed for research-based assignments. Instruction provided in formulating research topics and in developing effective arguments. Reading and writing assignments may focus on a single theme. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 19.—I, II, III. (I, II, III.)

#### 92. Internship in Writing (1-12)

Internship—3-36 hours. Prerequisite: course 1 or English 3. Internships in fields where students can practice their skills. May be repeated for credit for a total of 12 units. Not open for credit to students who have completed English 92. (P/NP grading only.)

#### 98. Directed Group Study (1-5)

Prerequisite: course 1 or English 3. Not open for credit to students who have completed English 98. (P/NP grading only.)

#### 99. Special Study for Undergraduates (1-5)

Not open for credit to students who have completed English 99. (P/NP grading only.)

## Upper Division Courses

#### 101. Advanced Composition (4)

Lecture/discussion—3 hours. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Instruction for students in all disciplines in advanced principles of expository writing. Focus on writing tasks both within and beyond the academy. Assignments provide practice in a variety of modes of writing: narrative, analysis, explanation, argument, critique. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 101.—I, II, III. (I, II, III.)

#### 102A. Writing in the Disciplines (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent; concurrent enrollment in a specified course in a subject-matter discipline, acceptance into a specified major, or consent of instructor. Advanced instruction in the elements of expository writing, with special emphasis on their application to writing projects in a specified academic discipline. May be repeated one time for credit if taken in conjunction with a different subject-matter course. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 102A.—I, II, III. (I, II, III.)

#### 102B. Writing in the Disciplines: Biological Sciences (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent, upper division standing. Open to majors in a biological science or to students concurrently enrolled in an upper division biological science course. Advanced instruction in writing in the discipline of biology. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 102B.—I, II, III. (I, II, III.)

#### 102C. Writing in History (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent, upper division standing. Open to majors in history or to students concurrently enrolled in an upper division course accepted for the major. Advanced instruction in writing in the discipline of history. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 102C.—II. (II.)

#### 102D. Writing in International Relations (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent, upper division standing. Open to majors in international relations or to students concurrently enrolled in an upper division course accepted for the major. Advanced instruction in writing in the discipline of international relations. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 102D.—II. (II.)

#### 102E. Writing in Engineering (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent, upper division standing. Open to upper division students in the College of Engineering and to student enrolled in an upper division engineering or computer science course. Advanced instruction in writing in the discipline of engineering. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 102E.—I, II, III. (I, II, III.)

#### 102F. Writing in Food Science and Technology (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent, upper division standing. Open to majors in food science and technology or to students concurrently enrolled in an upper division course in food science and technology. Advanced instruction in writing in the discipline of food science and technology. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 102F.

#### 102G. Writing: Bioregion (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent, upper division standing. Open to majors in Land, Air, and Water Resources, Nature and Culture, Wildlife, Fish, and Conservation Biology or concurrent enrollment in an upper division course that focuses to some extent on the bioregion (e.g., botany, geology, or literature of California). Advanced instruction in writing in those disciplines that focus on the intertwined human and non-human communities of the Putah and Cache Creek watersheds in which the university is located. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 102G.

#### 104A. Writing in the Professions: Business Reports and Technical Communication (4)

Lecture/discussion—3 hours. Prerequisite: course 1 or English 3 or the equivalent, and upper division standing. Instruction designing, writing, and documenting formal and informal reports directed toward a variety of work-related audiences. Instruction in presenting data graphically. Suitable for students planning careers in science, government, business, engineering, or industry. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 104A.—I, II, III. (I, II, III.)

#### 104B. Writing in the Professions: Law (4)

Lecture/discussion—3 hours. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Instruction in advanced principles of critical thinking, argumentation, and style, with special emphasis on their application to situations in the legal profession. Suitable for students planning careers in law, business, administration, or management. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 104B.—I, II, III. (I, II, III.)

#### 104C. Writing in the Professions: Journalism (4)

Lecture/discussion—3 hours. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced instruction in writing non-fiction for magazines and newspapers, including problems of style and language. Special emphasis on conducting research, interviewing, analyzing markets, and writing query letters. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 104C.—I, II, III. (I, II, III.)

#### 104D. Writing in the Professions: Elementary and Secondary Education (4)

Lecture/discussion—3 hours. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced instruction in a variety of modes of expository writing, concentrating on topics related to teaching and issues in contemporary American education. Strongly recommended for teaching credential candidates. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 104D.—I, II, III. (I, II, III.)

**104E. Writing in the Professions: Science (4)**

Lecture/discussion—3 hours. Prerequisite: course 1 or English 3 or the equivalent and upper division or graduate science curriculum. Advanced instruction in writing abstracts, research proposals, scientific papers, other forms of scientific communication and in presenting data graphically. Primarily for students engaged in or planning careers in basic or applied research. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 104E.—I, II, III. (I, II, III.)

**104F. Writing in the Health Profession (4)**

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent, advanced standing. Advanced instruction in several forms of expository writing common in the health professions, focusing on topics related to health, disability, and disease and emphasizing effective communication between the writer and different audiences. Suitable for students planning careers in such health professions as medicine, dentistry, physical therapy, genetic counseling, and optometry. GE credit: Wrt (cannot be used to satisfy a college or university composition requirement and GE writing experience simultaneously). Not open for credit to students who have completed English 104F.—I, II, III. (I, II, III.)

**192. Internship in Writing (1-12)**

Internship—3-36 hours. Prerequisite: course 1 or English 3. Internships in fields where students can practice their skills. A maximum of 4 units is allowed toward the major in English. May be repeated for credit for a total of 12 units. Not open for credit to students who have completed English 192. (P/NP grading only.)

**197T. Tutoring in Writing (1-5)**

Tutoring—1-5 hours. Prerequisite: upper division standing and consent of chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. Does not fulfill requirement for major. May be repeated for credit for a total of 8 units. Not open for credit to students who have completed English 197T. (P/NP grading only.)

**197TC. Community Tutoring in Writings (1-4)**

Tutoring—1-4 hours. Prerequisite: upper division standing and a major in English; consent of chairperson. Field experience, with individuals or in classroom in instruction of English language, literature, and composition. Does not fulfill requirement for major. May be repeated for credit. Not open for credit to students who have completed English 197TC. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: one course from courses 1, English 3, 5F, or 5P. Not open for credit to students who have completed English 198. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Not open for credit to students who have completed English 199. (P/NP grading only.)

**Graduate Courses****298. Directed Group Study (1-5)**

Not open for credit to students who have completed English 298. (S/U grading only.)

**299. Individual Study (1-12)**

Not open for credit to students who have completed English 299. (S/U grading only.)

**Professional Courses****390. Theory and Practice of University-Level Composition Instruction (4)**

Seminar—3 hours; term paper. Prerequisite: graduate standing; appointment as Teaching Assistant in the Composition Program. Examination of current theories about the teaching of writing and their practical application to undergraduate writing courses at

UC Davis. Not open for credit to students who have completed English 390. (S/U grading only.)—III. (III.)S

**392. Teaching Expository Writing (2)**

Discussion—2 hours. Prerequisite: graduate standing, appointment as Teaching Assistant in the Composition Program; completion of course 390 or the equivalent. Discussion of problems related to teaching expository writing at the university level, with special emphasis on teaching reading and writing skills and responding to student papers. (S/U grading only.)—I. (I.)

**396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. Not open for credit to students who have completed English 396. (S/U grading only.)—I, II, III. (I, II, III.)

- William T. Ferrier, D.V.M., Assistant Clinical Professor  
(Medicine and Epidemiology)

Julie R. Fischer, D.V.M., Associate Clinical Professor (Medicine and Epidemiology)  
 Kirsten Gilardi, D.V.M., Associate Clinical Professor (Medicine and Epidemiology)  
 Stephen M. Griffey, D.V.M., Ph.D., Associate Clinical Professor (Pathology, Microbiology, and Immunology)  
 Thelma Lee Gross, D.V.M., Clinical Professor (Medicine and Epidemiology)  
 Pamela J. Hullinger, D.V.M., Associate Clinical Professor (Medicine and Epidemiology)  
 Kate F. Hurley, D.V.M., Assistant Clinical Professor (Medicine and Epidemiology)  
 Donald L. Janssen, D.V.M., Clinical Professor (Medicine and Epidemiology)  
 Michael L. Johnson, Ph.D., Associate Adjunct Professor (Medicine and Epidemiology)  
 Janine B. Kasper, D.V.M., Lecturer (Anatomy, Physiology and Cell Biology)  
 Karen Sue Kearns, D.V.M., Associate Clinical Professor (Medicine and Epidemiology)  
 Lonnie V. Kendall, D.V.M., Ph.D., Assistant Clinical Professor (Pathology, Microbiology, and Immunology)  
 Donald J. Klingborg, D.V.M., Lecturer (Population Health and Reproduction)  
 Gregg D. Kortz, D.V.M., Assistant Clinical Professor (Surgical and Radiological Sciences)  
 Michael Lane, D.V.M., Lecturer (Population Health and Reproduction)  
 Gregory C. Lanzaro, Ph.D., Entomologist (Population Health and Reproduction and Entomology)  
 Nicholas W. Lerche, D.V.M., M.P.V.M., Adjunct Professor (Population Health and Reproduction)  
 Marta L. Marthas, Ph.D., Adjunct Professor (Pathology, Microbiology, and Immunology)  
 Patrick J. Morris, D.V.M., Clinical Professor (Medicine and Epidemiology)  
 Thomas W. North, Ph.D., Adjunct Professor (Molecular Biosciences)  
 Karen L. Oslund, D.V.M., Ph.D., Assistant Adjunct Professor (Pathology, Microbiology, and Immunology)  
 John R. Reed, D.V.M., Clinical Professor (Surgical and Radiological Sciences)  
 Thomas H. Reidarson, D.V.M., Clinical Professor (Medicine and Epidemiology)  
 Jeffrey A. Roberts, D.V.M., Associate Clinical Professor (Medicine and Epidemiology)  
 Oliver P. Roemer, D.V.M., Associate Clinical Professor (Surgical and Radiological Sciences)  
 Randall H. Scagliotti, D.V.M., Associate Clinical Professor (Surgical and Radiological Sciences)  
 Sonjia M. Shelly, D.V.M., Assistant Clinical Professor (Pathology, Microbiology, and Immunology)  
 Sam Silverman, D.V.M., Ph.D., Clinical Professor (Surgical and Radiological Sciences)  
 Candace A. Sousa, D.V.M., Clinical Professor (Medicine and Epidemiology)  
 Jill V. Spangenberg, D.V.M., Ph.D., Associate Clinical Professor (Medicine and Epidemiology)  
 Ellen E. Sparger, D.V.M., Ph.D., Associate Adjunct Professor (Medicine and Epidemiology)  
 Meg Rose Sutherland-Smith, D.V.M., Associate Clinical Professor (Medicine and Epidemiology)  
 Raymund F. Wack, D.V.M., Clinical Professor (Medicine and Epidemiology)  
 Katherine Wasson, D.V.M., Ph.D., Assistant Clinical Professor (Center for Comparative Medicine)  
 Johanna L. Watson, D.V.M., Ph.D., Associate Clinical Professor (Medicine and Epidemiology)  
 Mary Beth Whitcomb, D.V.M., Lecturer (Surgical and Radiological Sciences)  
 Michael M. Ziccardi, D.V.M., M.P.V.M., Ph.D., Assistant Adjunct Professor (Pathology, Microbiology, and Immunology)

## Veterinary Medicine (VMD)

### Lower Division Course

#### 92. Internship in Veterinary Science (1-12)

Discussion/laboratory—1-4 hours; clinical experience—3-36 hours. Prerequisite: approval of project by faculty sponsor prior to period of internship. Students in this program will be under the supervision of

faculty in the School of Veterinary Medicine whose expertise is appropriate for the proposed project. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.) Ilkiw

### Upper Division Courses

#### 170. Ethics of Animal Use (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: any basic course in composition or speech. Ethical issues relating to animal use in contemporary society. Integration of philosophical theories with scientific evidence relating to animal behavior, mentality, and welfare. Uses of animals in agriculture, research, and as companions. Ethical responsibilities regarding wildlife and the environment. (Same course as Animal Science 170.) GE credit: SocSci, Wrt.—III. (III.) Tannenbaum

#### 192. Internship in Veterinary Science (1-12)

Discussion/laboratory and clinic—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in veterinary medicine. (P/NP grading only.) Ilkiw

### Graduate Courses

#### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

#### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

### Professional Courses

#### 400A. Freshman Doctoring (2.5)

Lecture—18 sessions; discussion—2 sessions; workshop—5 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine and consent of instructor. Introduction to the "art" of veterinary medicine, focusing on essential skills such as communication, team-building, leadership, conflict management, stress management and financial management. Emphasis on practical application of these skills to be able to function efficiently and effectively in practice, academia, industry, government or other career. (S/U grading only.)—I. (I.) Klingborg, Timmins

#### 400B. Sophomore Doctoring (2.3)

Lecture—13 sessions; discussion—4 sessions; project—1 hour; laboratory—5 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine; consent of instructor. Further the development of new technical skills that will prepare students for life-long learning and successful veterinary practice management. Emphasis will be on hands-on learning through participation. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III. (I, II, III.) Klingborg, Timmins

#### 401A. The Normal Anatomy of the Canine Locomotor System (3.4)

Lecture—16 sessions; laboratory—18 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Normal canine anatomy of bones, joints, muscles, ligaments, tendons, nerves and vessels of the vertebral column and limbs; musculoskeletal physiology and biomechanics.—I. (I.) Meyers

#### 401B. The Normal Anatomy of the Canine Head (1.7)

Lecture—7 sessions; laboratory—8 sessions; discussion—2 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Normal canine anatomy with comparison to other species of bones, joints, muscles, ligaments, tendons, nerves and vessels of the head including the eye and ear.—II. (II.) Plopper

#### 402. Structure and Function of the Cardiovascular and Respiratory Systems (4.5)

Lecture—32 sessions; laboratory—13 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine or consent of instructor. Integrated view of cardiovascular and respiratory anatomy and physiology. (Deferred grading only, pending completion of sequence.)—I, II. (I, II.) Jones

#### 402D. Structure and Function of the Urinary System and Body Fluids (2.3)

Lecture—17 sessions; laboratory—6 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine; consent of instructor. Basic understanding of the structure and function of the urinary system plus physiology of body fluids and acid-base balance. Structure and function are correlated.—III. (III.) Schelegle

#### 403. Physiological Chemistry (5.9)

Lecture—52 sessions; discussion—7 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine and consent of instructor. Biochemical principles used to analyze problems and to evaluate metabolic relationships important in animal health and pathophysiology. Integrative approach, emphasizing controls of major metabolic pathways, molecular basis of gene expression, tumorigenesis and signal transduction.—I. (I.) Cortopassi

#### 405. Veterinary Parasitology (3.6)

Lecture—26 sessions; laboratory—10 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Biological and clinical aspects of parasites and the diseases they cause in animals.—III. (III.) Conrad, Boyce

#### 406. Principles of Behavior (0.7)

Lecture—7 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Overview of animal behavior with relevance to veterinary medicine.—I. B. Hart

#### 407. Principles and Techniques of Operative Surgery and Anesthesia (2.4)

Lecture—24 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine; course 426. Introduction to operative and anesthetic skills and foundation in the importance of regional anatomy in the planning and conduct of surgical practice.—I. (I.) Gregory, Ilkiw

#### 407L. Principles and Techniques of Surgery and Anesthesia Laboratory (1.4)

Laboratory—14 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Introduction to surgical anatomy, operative and anesthetic skills. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III. (I, II, III.) Gregory, Ilkiw

#### 408. Nutrition and Nutritional Diseases in Animals (2.9)

Lecture—27 sessions; laboratory—2 three-hour sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Principles of nutrition and their application to the solution of nutritional disorders of animals.—II. (II.) Ramsey

#### 409. Epidemiology (1.7)

Lecture—11 sessions; discussion—6 session. Prerequisite: first-year standing in School of Veterinary Medicine. Approved for graduate degree credit. Introduction to epidemiology and its applications in veterinary medicine.—I. (I.) Kass

#### 412. Fundamentals of Zoonoses (1.1)

Lecture—11 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine or consent of instructor. Major zoonotic infections transmitted mainly by domestic animals, especially pets and particularly in North America. A short review of symptoms in animals and humans, epidemiology, diagnostic tests, treatment and prevention will be presented for each animal species and each infection or infestation. Some zoonotic diseases, subject to USDA rules and regulations, will be studied in more detail (i.e., rabies, brucellosis, tuberculosis, avian chlamydiosis).—III. (III.) Chomel

#### 413. Veterinary Food Safety (1.3)

Lecture—13 sessions; discussion—3 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine; consent of instructor. The food system and diseases transmitted by food. Topics include sources of contaminants, the function of processing in food safety, and the role of veterinarians in pre-harvest food safety and in food protection in general.—III. (III.) Cliver

**414A. Principles of Veterinary Pharmacology and Toxicology (2.5)**

Lecture—20 sessions; discussion—4 sessions; laboratory—1 session. Prerequisite: second-year standing in the School of Veterinary Medicine.

Introduction to the principles of pharmacology and toxicology. Pharmacology/toxicokinetics, pharmacology/toxicodynamics and chemotherapy of bacterial, neoplastic, fungal and viral diseases.—I. (I.) Buckpitt

**414B. Veterinary Pharmacology (2.5)**

Lecture—23 sessions; discussion—2 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine; consent of instructor. Basic principles for the use of drugs affecting the autonomic and central nervous systems as well as compounds affecting the cardiovascular system.—II (II.)

**414C. Veterinary Toxicology (1.9)**

Lecture—16 sessions; discussion—2 sessions; laboratory—1 session. Prerequisite: second-year standing in the School of Veterinary Medicine; consent of instructor. Toxicants of major importance in veterinary medicine. Basic principles and mechanism of action of toxicants, therapeutic and diagnostic approach.—III. (III.) Puschner

**415A. Freshman Clinical Skills (1.1)**

Lecture—1 session; lab—10 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine and consent of instructor. Development of clinical skills by learning procedures that are important to the practice of veterinary medicine in a variety of species in both a laboratory and clinical environment. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III. (I, II, III.) Nelson

**415B. Sophomore Clinical Skills (1.2)**

Lecture—1 session; lab—11 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine and consent of instructor. Development of clinical skills by learning procedures that are important to the practice of veterinary medicine in a variety of species in both a laboratory and clinical environment. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III. (I, II, III.) Nelson

**415C. Junior Clinical Skills (1.9)**

Lecture—1 session; lab—18 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and consent of instructor. Development of clinical skills by learning procedures that are important to the practice of veterinary medicine in a variety of species in both a laboratory and clinical environment. (Deferred grading only, pending completion of sequence. S/U grading only.)—I, II, III. (I, II, III.) Nelson

**419. Virology (2.7)**

Lecture—19 sessions; laboratory—8 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine or consent of instructor.

Introduction to the classification, morphology, and the strategy of replication of animal viruses, covering the molecular pathogenesis of animal viruses at the cellular level with emphasis on agents of infectious diseases of domestic animals.—I. (I.) Yilma

**420. Immunology (3)**

Lecture—21 sessions; laboratory—9 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Concepts of immunology. Emphasis is on the principles of vaccination, responses to pathogenic agents, and the development of hypersensitivity and autoimmune reactions.—III. (III.) Gershwin

**421. Principles of Neurosciences (2.7)**

Lecture—22 sessions; laboratory—5 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. An integrated study of normal neurobiology, neuroanatomy and neurophysiology, to enable students to engage in studies of neurologic disorders and clinical neurology.—II. (II.) LeCouteur

**422. Veterinary Ophthalmology (1.9)**

Lecture—17 sessions; laboratory—2 sessions. Prerequisite: third-year standing in School of Veterinary Medicine. The eye and related structures. Basic anatomy and physiology with clinically relevant aspects

emphasized. Presentation of clinical appearance of common pathological changes. Specific diseases frequently encountered in general practice, including signs, causes, diagnostic approach, and treatment philosophy.—II. (II.) Hollingsworth

**425. Veterinary Genetics (1.8)**

Lecture—16 sessions; discussion—2 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine or consent of instructor. Introduction to veterinary genetics as preparation to recognize breeds; assess a pedigree; explain coat color inheritance; distinguish Mendelian from non-Mendelian patterns; interpret results of "various laboratory tests." Explain to a layperson how diseases or traits are attributed to a gene or gene defect; "appreciate breaking genetics/biotechnology news."—III. (III.) Lyons

**426. Principles of Veterinary Anesthesiology and Critical Patient Care (1.7)**

Lecture—15 sessions; laboratory—2 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Basic principles of veterinary anesthesiology including techniques of monitoring and management of animals under anesthesia.—III. (III.) Steffy

**427. Cell and Tissue Structure and Function (3.3)**

Lecture—24 sessions; laboratory—9 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Relationship between structure and function of animal tissues, emphasizing the molecular and cellular processes which integrate normal physiological activity. Mechanisms of cell division, differentiation and locomotion. Microscopic anatomy and organization of cells and extracellular molecules to form specialized differentiated tissues.—I. (I.) Tablin

**430. Principles of Radiography and Radiologic Interpretation (3.6)**

Lecture—24 sessions; laboratory—2 sessions; discussion—10 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine and consent of instructor. Physical principles of x-ray production and x-ray matter interactions as they pertain to diagnostic medical imaging and radiation safety. Principles of radiologic interpretation. Principles of ultrasound physics and interpretation. (Deferred grading only, pending completion of sequence.)—I, II, III. (I, II, III.) Wisner

**431. Endocrinology (1.8)**

Lecture—17 sessions; laboratory—1 session. Prerequisite: first-year standing in the School of Veterinary Medicine. The structure and function of endocrine glands and how hormones and cytokines influence physiological processes.—III. (III.)

**432. Structure and Function of the Gastrointestinal and Mammary Systems (3.2)**

Lecture—22 sessions; laboratory—10 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Basic understanding and correlation of the structure and function of the gastrointestinal and mammary systems. Multiple species' differences examined.—II. (II.) Bruss

**433. Veterinary Oncology (1.2)**

Lecture—12 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Relationships between pathology, hematology, cytology, immunology, and the clinical manifestations of neoplastic diseases in animals.—I. (I.) Kent

**434. Basic Veterinary Hematology (2)**

Lecture—14 sessions; laboratory—6 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. The regulation of production of blood cells, the morphology of bone marrow and hematopoietic cells, the morphology and function of blood cells and the activities of hemostasis.—III. (III.) Vernau

**435. Veterinary Clinical Pathology (3.3)**

Lecture—22 sessions; laboratory/discussion—11 sessions. Prerequisite: second-year standing in School of Veterinary Medicine. The principles, selec-

tion, use, interpretation, and limitations of laboratory tests used for the diagnosis and monitoring of disease in animals.—II. (II.) Christopher

**436. Veterinary Ethics and Law (1.2)**

Discussion—12 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Ethical and legal issues critical to successful and ethical veterinary practice. Processes through which ethical and legal questions are approached and resolved. Background reading materials and discussions are supplemented with problem-based learning.—I. (I.) Tannenbaum

**437. Veterinary Ethics and Law (2)**

Lecture—16 sessions; discussion—4 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine or consent of instructor. Ethical and legal issues critical to successful and ethical veterinary practice. Processes through which ethical and legal questions are approached and resolved. Reading and discussions supplemented with problem-based learning.—III. (III.) Tannenbaum

**440. Veterinary Neurology (2.7)**

Lecture—21 sessions; laboratory—6 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Integrated study of the relationship between microanatomy, neurophysiology, neuropathology, and the clinical manifestations and diagnosis of neurological diseases, and the use of the various neurodiagnostic aids.—I. (I.) LeCouteur

**444. Clinical Endocrinology (1.5)**

Lecture—12 sessions; discussion—3 sessions. Prerequisite: third-year standing in School of Veterinary Medicine or consent of instructor. A correlated review of common endocrinology disorders affecting the dog and cat.—II. (II.) Feldman

**446. Veterinary Reproduction (4)**

Lecture—30 sessions; laboratory—10 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Structural, functional, pathological, and clinical aspects of reproduction in animals.—II. (II.) Conley

**447. Introduction to Public Veterinary Practice and Foreign Animal Diseases (1)**

Lecture—10 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine and consent of instructor. Overview of the importance of foreign animal diseases and the veterinary responsibilities associated with the prevention, detection and reporting of these diseases in the United States.—I. (I.) Smith

**451. Veterinary Bacteriology and Mycology (4.9)**

Lecture—34 sessions; laboratory—15 three-hour sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Introduction to the bacterial and fungal agents of animal diseases. Specifically, each microorganism will be discussed with respect to overall significance to animal disease; structural and functional aspects including morphology, cellular composition, and products of medical interest.—I. (I.) LeFebvre

**452. General Pathology (3.1)**

Lecture—18 sessions; laboratory—13 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Basic principles of disease and in particular the fundamental mechanisms responsible for creating a disease situation. Illustrations of how the application of general pathological principles is used to determine disease pathogenesis and prognosis.—I. (I.) Mohr

**459. Systemic Pathology (5.8)**

Lecture—44 sessions; laboratory—14 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine or consent of instructor. Basic understanding of the pathobiology of major organ systems relevant to a variety of animal species. Emphasis on mechanisms of injury, patterns of response to injury and on balance between damage and repair.—II. (II.) Moore

**460. Fundamentals of Clinical Orthopedics (1)**

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and consent of instructor. Fundamental concepts of veterinary orthopedics, including differentials of bone disease, diagnostics for bone disease, bone biomechanics, principles of fracture repair, applied joint anatomy, principles of joint disease, applied tendon and ligament anatomy, and principles of tendon and ligament disease.—I. (I.) MacDonald

**470B-470C. VMTH Techniques (3.4)**

Clinical activity—34 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Clinical training in veterinary medicine with assignments in the medical and surgical services and clinical diagnostic facilities of the Veterinary Medical Teaching Hospital, discussions regarding client relations and experience with advanced techniques to prepare students for the senior clinical year. [Deferred grading only, pending completion of sequence. S/U grading only.]—II-III. Smith

**480. Senior Clinic (15)**

Clinical activity—60 hours. Prerequisite: fourth-year standing in School of Veterinary Medicine. Integration of knowledge and development of clinical judgement and skills in the diagnosis, treatment, and prevention of animal disease. [Deferred grading only, pending completion of sequence. S/U grading only.]—I, II, III, IV. (I, II, III, IV.) Smith

**Departmental Courses****Anatomy, Physiology and Cell Biology (APC)****Upper Division Courses****100. Comparative Vertebrate Organology (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Sciences 1A and 1B. Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as Neurobiology, Physiology, and Behavior 123.)—II. (II.) Werner

**192. Internship (1-15)**

Internship—3-45 hours. Prerequisite: upper division standing, approval of internship. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology and Cell Biology. Internships are supervised by a member of the faculty. May be repeated for credit if topic differs. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Graduate Courses****284. Ruminant Nutrition and Physiology (3)**

Lecture—27 sessions; laboratory—3 sessions. Prerequisite: graduate or first-year standing in School of Veterinary Medicine. Basic and applied aspects of ruminant nutrition and physiology, nutritional and metabolic disorders of ruminants.—III. (III.) Bruss

**285. Morphometry of Cells, Tissues and Organs (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: course 100 or the equivalent; Statistics 13. Stereological estimation of volumes, surfaces and lengths of organs/components; estimation of number of cells in an organ or tissue, their volumes, products and gene expression. Practical application of stereology and avoidance of most common biases of histological measurements. Offered in alternate years.—II. Hyde

**286. Basics of Microscopy and Cellular Imaging (2)**

Laboratory—1 hour; Lecture—2 hours. Prerequisite: graduate standing; consent of instructor. Practical applications of basic microscope techniques used to image cells and tissues with the goal of using these techniques to generate publication quality images. Principles of light, epifluorescent, confocal and electron microscopy, their applications and limitations. Restricted enrollment. Offered in alternate years.—III. Van Winkle

**290. Seminar (1)**

Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (P/NP grading only.)—I, II, III. (I, II, III.)

**291. Topics in Biology of Respiratory System (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Topics concerning structure and function of respiratory system. Possible topics include: lung growth, pulmonary reaction to toxicants, pulmonary inflammation, lung metabolism, biology of lung cells, tracheobronchial epithelium, nasal cavity structure and function. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Hyde, Wu, Pinkerton

**292. Topics in Neuroscience Research (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Students will examine current topics in neuroscience research literature, as well as evaluate rationale, methods, results, interpretation of data, and relevance of studies. Possible topics include pain, autonomic nervous system, neuroendocrinology, neurotransmitter regulation of gene expression, neuroendocrine-immune interactions, stress. (S/U grading only.)

**298. Group Study (1-5)**

Laboratory—6-15 hours. Prerequisite: consent of instructor.

**299. Research (1-12)**

Laboratory—6-36 hours. Prerequisite: consent of instructor. (S/U grading only.)

**Professional Courses****410. Equine Locomotor Anatomy (1.8)**

Lecture—9 sessions; laboratory—9 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Normal anatomy of the equine fore and hind limb bones, joints, muscles, ligaments, tendons, nerves and vessels with emphasis on clinically applicable structures.—III. Stover

**458. Behavior Therapy in Companion Animals (2)**

Lecture—20 sessions. Prerequisite: second- or third-year standing in the School of Veterinary Medicine. Clinical application of behavior modification procedures, management and drug therapy to resolve common behavioral problems of companion animals including dogs, cats, horses and birds.—III. (III.) B. Hart, Bain

**Medicine and Epidemiology (VME)****Upper Division Courses****171. Health Issues Confronting Asian Americans and Pacific Islanders (4)**

Lecture/discussion—4 hours. Health issues confronting Asian Americans and Pacific Islanders. (Same course as Asian American Studies 171.)—II. (II.) Chen

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****217. Evaluation and Application of Diagnostic Tests (2.0)**

Lecture/discussion—17 sessions; laboratory—3 sessions. Prerequisite: consent of instructor; introductory courses in probability (e.g., Preventive Veterinary Medicine 402 or Statistics 102) and epidemiology (e.g., Preventive Veterinary Medicine 405 or Epidemiology 205); a working knowledge of

immunological principles beneficial but not essential to understanding technical material associated with diagnostic tests. Topics include sensitivity, specificity, predictive values, Bayes' Theorem, ROC analysis, measuring agreement between tests, series and parallel testing strategies. Emphasis on rational evaluation, interpretation and presentation of test results for individuals and aggregates. Offered in alternate years.—III. Gardner

**219. Clinical Experimental Design (3)**

Lecture—15 sessions. Prerequisite: biostatistics, ecology, epidemiology, experience in clinical medicine or microbiology recommended. Design and construction of experiments, hypothesis testing, exploratory data analysis, controls, inferring causation, and the performance of scientific research. Offered in alternate years.—(II.) Foley

**294B. Conservation Biology and Veterinary Medicine (1)**

Seminar—10 sessions. Prerequisite: first-, second- or third-year standing in the School of Veterinary Medicine or graduate student standing. Current topics in conservation biology as they relate to veterinary medicine, wildlife population management and ecosystem health. May be repeated two times for credit if topic differs. (S/U grading only.)—II. (II.) Mazet

**298. Group Study (1-5)**

Prerequisite: student in School of Veterinary Medicine or consent of instructor. Group study in selected areas of the clinical sciences. (S/U grading only.)

**299. Research (1-12)**

(S/U grading only.)

**Professional Courses****410. Husbandry, Feeding and Management of Captive Animals (2)**

Lecture—20 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine; consent of instructor. Introduction of management and husbandry dynamics as a prerequisite for preventive health programs in zoos, aquaria, vivaria, and other environments for exotic pets and wild animals.—III. (III.) Tell

**412. Laboratory Animal Medicine (2)**

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. The role of an institutional laboratory animal veterinarian. Emphasis on the role of the attending veterinarian, mouse genetics, vivarium management, health monitoring programs, experimental design and animal models.—II. (II.) Kendall

**413. Medical Primatology (2)**

Lecture—20 sessions. Prerequisite: second- and third-year standing in School of Veterinary Medicine; consent of instructor. Major diseases, medical management and husbandry of captive non-human primates. Offered in alternate years. (S/U grading only.)—III. (III) Lerche

**415. Management and Diseases of Captive Wildlife (2.0)**

Lecture—20 sessions. Prerequisite: second- or third-year standing in the School of Veterinary Medicine or consent of instructor. Introduction to the roles of a zoological veterinarian and the most common topics encountered. Emphasis on taxonomy, husbandry, preventive medicine and the most common diseases seen in common captive wildlife species.—I. (I.) Wack

**416. Diseases of Fish (2.1)**

Lecture—18 sessions; laboratory—3 sessions. Prerequisite: second- or third-year standing in the School of Veterinary Medicine or consent of instructor. Etiology, pathology, diagnosis, treatment and prevention of diseases of fish. Preventive management of diseases in aquaculture and aquaria. Offered in alternate years.—III. Hedrick

**417. Companion Avian Medicine (2)**

Lecture—20 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine or consent of instructor. Diseases, diagnostics, medical management and surgery of psittacine species. Avian nutrition, husbandry, and management.—II (II.) Tell

**419. Companion Exotic Small Animal Medicine and Surgery (3.4)**

Lecture—34 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine or consent of instructor. The etiology, clinical presentation, diagnostic evaluation, treatment, prevention, and control of medical diseases of companion small exotic mammals, amphibians and reptiles.—I. (I.) Hawkins

**424. Shelter Medicine (1)**

Seminar—10 sessions. Prerequisite: first-, second-, or third-year standing in the School of Veterinary Medicine; consent of instructor. Shelter medicine is a newly emerging specialty in veterinary medicine building on the clever solutions and experience of hundreds of shelter veterinarians, managers, technicians, rescue and foster homes, and others, who have learned their skill in the trenches. (S/U grading only.)—III. (III.) Hurley

**427. Introduction to Food Animal Herd Health Medicine (1.9)**

Lecture—17 sessions; laboratory—2 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463A and 463B (concurrently) or consent of instructor. Introduction to current problem solving concepts, approaches, and issues addressed in subsequent food animal medicine courses; contexts for developing problem solving skills through on-site, field investigation of herd and flock health problems.—I. (I.) Hoar

**428. Food Animal Surgery (1.6)**

Lecture—16 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and consent of instructor. Selected topics in surgical diseases of food animals.—III. (III.) Smith

**428L. Food Animal Surgery Laboratory (0.8)**

Laboratory—8 three-hour sessions. Prerequisite: third-year standing in School of Veterinary Medicine; course 428 (concurrently). Representative surgeries of food animals performed by groups of students. Limited enrollment. (S/U grading only.)—III. (III.) Smith

**429A. Sheep Herd Health (1)**

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463A, 463B, 427, course 463C concurrently, or consent of instructor. The application of problem-solving and epidemiologic methods to sheep diseases and their control.—II. (II.) Lane

**429B. Beef Herd Health (1)**

Lecture—10 sessions. Prerequisites: Third-year standing in the School of Veterinary Medicine, course 463A, 463B, 427, 463C concurrently or consent of instructor. The application of problem-solving methods to diseases of grazing beef cattle and their control.—II. (II.) Hoar

**429C. Swine Herd Health (1)**

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 463A, 463B, 427, course 463C concurrently, or consent of instructor. The application of problem-solving and epidemiologic methods to swine diseases and their control.—II. (II.) Gardner

**430. Raptor Medicine and Rehabilitation (2)**

Lecture—20 sessions. Prerequisite: first-, second- or third-year standing in the School of Veterinary Medicine. Biology, behavior, parasites, diseases, toxins, iatrogenic conditions, diagnostics, treatments, nursing, housing, nutrition, rehabilitation and release techniques for eggs, orphans and adult native California raptors.—III. (III.) Tell

**432. Medical and Husbandry Procedures for Raptors (1)**

Laboratory—1 hour. Prerequisite: first-, second-, or third-year standing in the School of Veterinary Medicine or consent of instructor. Serves as student treatment crew for the Raptor Center providing hands-on experience with handling, restraint and treatment for ill and injured birds of prey with the goal of rehabilitation and release back into their native habitat. May be repeated once for credit with consent of instructor.—I, II, III. (I, II, III.) Tell

**446. Small Animal Reproduction (1)**

Lecture—7 sessions; discussion—1 session; laboratory—2 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Provides a complete description (history, physical examination, laboratory abnormalities, etc.) of the common abnormalities associated with the genital tract of male and female dogs and cats.—III. (III.) Feldman

**450. Small Animal Clinical Immunology (1.7)**

Lecture—17 sessions. Prerequisite: second- or third-year standing in the School of Veterinary Medicine; consent of instructor. Review of the basic mechanisms of immunologic diseases in small companion animals and a description of common immunologic diseases organized by body system, including clinical presentation, diagnosis and treatment.—III. (III.) Sykes

**454. International Veterinary Medicine Baja California Fieldwork (2)**

Fieldwork—40 hours. Students in the School of Veterinary Medicine or consent of instructor. Livestock diseases responsible for limiting trade across the U.S./Mexico border, how knowledge is extended to ranchers, and how veterinarians are educated in Mexico. Offered during Spring break. (S/U grading only.)—III. (III.) Hird

**455. Beginning Veterinary Spanish (2)**

Lecture/discussion—3 hours. Prerequisite: first-, second-, third-year or MPVM standing in the School of Veterinary Medicine. Preparation to converse with clients (e.g. companion animal owners) and livestock managers in Spanish in clinical settings. (S/U grading only.)—II. (II.) Hird

**456. Intermediate Veterinary Spanish (1)**

Discussion—10 sessions. Prerequisite: first-, second-, third-year or MPVM standing in the School of Veterinary Medicine. May be repeated two times for credit. Presentations on veterinary-related topics in Spanish by native speakers and others and discussion to prepare students to converse with clients (e.g., companion animal owners and livestock managers) in Spanish. (S/U grading only.)—III. (III.) Hird

**461A. Small Animal Medicine—Level I (3.6)**

Lecture—32 sessions; lab—4 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine; consent of instructor. Fundamental principles, clinical manifestations, diagnostic methods and therapeutic approaches to the medical diseases of dogs and cats. Course is a core option for the professional veterinary curriculum and preparatory for advanced courses in small medical diagnoses and therapeutics.—III. (III.) Johnson

**461B. Small Animal Medicine—Level I (3.3)**

Lecture—33 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and completion of course 461A, if Small Animal Medicine is your core or consent of instructor. Continuation of fundamental principles, clinical manifestations, diagnostic methods, and therapeutic approaches to the medical diseases of dogs and cats.—I. (I.) Marks

**461C. Small Animal Medicine—Level I (3.7)**

Lecture—37 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 461A, 461B (Small Animal Medicine core only), or consent of instructor. Continuation of fundamental principles, clinical manifestations, diagnostic methods and therapeutic approaches to the medical diseases of dogs and cats.—II. (II.) White

**462. Small Animal Medicine, Level II (2)**

Discussion—20 sessions. Prerequisite: course 461A, 461B, 461C, third-year standing in the School of Veterinary Medicine, or consent of instructor. Emphasis on differential diagnosis covering diseases of the skin, cardiovascular, respiratory, gastrointestinal and urinary systems, plus infectious diseases affecting various organ systems. The course is a bridge between didactic teaching and the use of that knowledge in a clinical setting.—III. (III.) Ihrke

**463A. Food Animal Medicine, Level I (3.6)**

Lecture—36 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Fundamentals of food animal medicine presented in a lecture format with integrated case discussion to illustrate the context and application of material presented and to promote development of problem-solving skills.—III. (III.) Smith

**463B. Food Animal Medicine, Level I (3.4)**

Lecture—34 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and completion of course 463A, if Food Animal Medicine is your core; consent of instructor. Fundamentals of food animal medicine with integrated case discussions to illustrate the context and application of material presented and to promote development of problem-solving skills.—I. (I.) George

**463C. Food Animal Medicine, Level I (3.3)**

Lecture—31 sessions; laboratory—2 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine (and courses 463A, B if Food Animal Medicine is fulfilling your core requirement). Continuation of the fundamentals of food animal medicine with integrated case discussions to illustrate the context and application of material presented and to promote development of problem-solving skills.—II. (II.) George

**464A. Equine Medicine, Level I (3.2)**

Lecture—28 sessions; laboratory—4 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine or consent of instructor. The etiology, pathophysiology, epidemiology, clinical presentation, diagnostic evaluation, treatment, prevention, and control of important infectious and non-infectious diseases of horses. Emphasis on problem-based approach to differential diagnosis.—III. (III.) Wilson

**464B. Equine Medicine, Level I (3.7)**

Lecture—35 sessions; discussion—2 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and completion of course 464A (Equine Medicine core), or consent of instructor. Continuation in instruction in the etiology, pathophysiology, epidemiology, clinical presentation, diagnostic evaluation, treatment, prevention, and control of important infectious and noninfectious diseases of horses. A problem-based approach to differential diagnosis is emphasized.—I. (I.) Spier

**464C. Equine Medicine, Level I (3.4)**

Lecture—33 sessions; discussion—1 session. Prerequisite: third-year standing in the School of Veterinary Medicine (and courses 464A, B if Equine Medicine is fulfilling your core requirement). Continuation in instruction in the etiology, pathophysiology, epidemiology, clinical presentation, diagnostic evaluation, treatment, prevention and control of important infectious and non-infectious diseases of horses. A problem-based approach to differential diagnosis emphasized.—II. (II.) Pusterla

**465. Advanced Equine Medicine, Level II (3.6)**

Lecture—36 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine; courses 464A, 464B, and 464C; consent of instructor. An approach to commonly encountered problems of horses held as individuals and farm settings. Development of problem-solving skills related to the medical management of horses and their problems.—III. (III.) Watson

**465L. Advanced Equine Medicine Level II Laboratory (0.8)**

Laboratory—8 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and course 464A,B,C. Clinical presentation and instruction in treatment of the medical aspects of equine practice. (S/U grading only.)—III. (III.) Watson

**466. Equine Critical Care (2)**

Lecture—10 sessions; discussion—10 sessions. Prerequisite: course 464A, 464B, 464C, or consent of instructor, third-year standing in the School of Veterinary Medicine. Focus on common equine emergencies and their initial life-support management strategies. Rational approach to diagnosis and man-

agement of emergency and critically ill equine patients in clinical practice. Pathophysiology of Systemic Inflammatory Response Syndrome (SIRS), Multiple Organ Dysfunction Syndrome (MODS), and critical illness.—III. (III.) Magdesian

#### **468. Advanced Feline Medicine (2)**

Lecture—20 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine; consent of instructor. Fundamental principles, clinical manifestations, diagnostic methods, and therapeutic approaches to medical diseases of cats. Diseases unique to cats and diseases whose clinical presentations and diagnostic evaluations are fundamentally different in cats versus dogs.—III. (III.) Westropp

#### **481. Clinical Rounds (1)**

Discussion—10 sessions. Prerequisite: first- or second-year standing in the School of Veterinary Medicine or consent of instructor. Discussion of selected small and large animal cases from the Veterinary Medical Teaching Hospital. May be repeated once for credit. (S/U grading only.)—I, II. (I, II.) Smith

#### **486. Equine Clinical Neonatology (1)**

Discussion—10 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine. Discussion of methods of equine neonatal intensive care and disease pathophysiology in a case format. (S/U grading only.)—III. (III.) Madigan

#### **487. Comparative Bio-Medical: Form and Function (2)**

Lecture—20 sessions. Prerequisite: first, second- or third-year standing in the School of Veterinary Medicine. Comparative biology approach and concepts for non-traditional animal species; alternative pets, zoos, rehabilitation centers, wildlife, aquaculture, laboratory animals, and non-human primates. (S/U grading only.)—II. (II.) Larsen

#### **493. Seminar in Veterinary Medicine (1)**

Seminar—2 hours. Prerequisite: professional standing; resident in Veterinary Medical Teaching Hospital. Seminars given by the faculty of the School of Veterinary Medicine in topics relating directly to the practice of clinical medicine and surgery. Residents will assist in the presentation of seminar material. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

#### **494. International Programs Seminar (1)**

Seminar—10 sessions. Prerequisite: first, second-, or third-year standing or MPVM standing in the School of Veterinary Medicine; consent of instructor. Discussion by veterinarians around the world of aspects of veterinary medicine in their countries and regions, ranging from livestock to wildlife medicine to companion animal practice. May be repeated twice for credit. (S/U grading only.)—II. (II.) Hird

### **Molecular Biosciences (VMB)**

#### **Lower Division Course**

##### **92. Internship (1-12)**

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

#### **Upper Division Courses**

##### **192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

##### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

#### **Graduate Courses**

##### **247. Natural Toxicants (2)**

Lecture—2 hours. Prerequisite: organic chemistry, Biological Sciences 102 and 103, or consent of instructor. Toxicity and metabolism of natural toxicants with emphasis on the toxic plants present in the

western United States. General pathways of metabolism plus the relationship between chemical properties and biologic activity of natural toxicants are discussed. Offered in alternate years.—III.

##### **253. Metabolism of Toxicants and Drugs (2)**

Lecture—2 hours. Prerequisite: Pharmacology and Toxicology 201, 202, 203, general biochemistry or consent of instructor. Significance/chemical pathways of toxicants and drug metabolism, enzymology and molecular aspects of P450 and flavin monooxygenases, hydrolases and phase 2 transferases and experimental approaches for metabolism studies. Offered in alternate years.—II. Buckpitt

##### **254. Toxicology of the Respiratory System (3)**

Lecture—3 hours; discussion. Prerequisite: Pharmacology and Toxicology 201, 202, 203, or consent of instructor. Survey of structure and function of the respiratory system, the pathophysiology of major lung diseases, the interactions of toxicants with the lung and response of this organ to injury. Offered in alternate years.—II. Buckpitt

##### **260. Toxicologic Pathology (3)**

Lecture—3 hours. Prerequisite: Pharmacology and Toxicology 201, 202, and 203. Provide introduction to organ system pathology; provide understanding of pathogenesis and significance of chemically induced tissue injury in the various organs of the body. Offered in alternate years.—II.

##### **290. Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing and consent of instructor. Topics in nutrition, pharmacology/toxicology, and biochemistry. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

##### **297T. Tutoring in Graduate Molecular Biosciences (1-5)**

Prerequisite: graduate or professional student standing and consent of instructor. Assist in preparation and teaching of courses in Nutrition, Pharmacology and Toxicology, or other courses offered by the department under direct supervision of the instructor. Designed for graduate or professional students who desire teaching experience in graduate courses. May be repeated up to 5 units of credit. (S/U grading only.)—I, II, III. (I, II, III.)

##### **298. Group Study (1-5)**

(S/U grading only.)—, II, III, IV. (I, II, III, IV.)

##### **299. Research (1-12)**

(S/U grading only.)

#### **Professional Course**

##### **397T. Tutoring in Molecular Biosciences (1-5)**

Discussion—1-5 hours. Prerequisite: graduate or professional standing and consent of instructor. Experience in professional curriculum for graduate or professional students, not teaching assistants, under direct supervision of instructor. May be repeated up to 5 units of credit (S/U grading only.)—I, II, III. (I, II, III.)

#### **Professional Courses**

##### **418. Veterinary Complementary Medicine (1.1)**

Lecture—10 sessions; laboratory—1 session. Prerequisite: first, second-, or third-year standing in the School of Veterinary Medicine. Introduction to complementary (alternative) medicine and how it is applied for the treatment of diseases. Acupuncture, chiropractic, herbal medicine, and traditional Chinese medicine. Acupuncture technique in both equine and small animals. (S/U grading only.)—I. (I.) Mount

##### **475. Diagnosis and Treatment of Food Animal and Equine Poisoning (2)**

Lecture—20 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Clinical systematic approach to poisoning problems in livestock, horses and other ungulate stock emphasizing diagnosis and treatment, including poisonous plants.—III. Mount

##### **480. Diagnosis and Treatment of Small Animal Poisoning (2)**

Lecture—20 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Clinical systematic approach to poisoning problems in dogs, cats, and pet birds, emphasizing diagnosis and treatment.—II. (II.) Mount

##### **485. Advanced Clinical Nutrition (2)**

Lecture—14 sessions; laboratory—1 session; discussion—4 sessions; project. Prerequisite: third-year standing in the School of Veterinary Medicine or consent of instructor. Advanced training in the principles and application of small animal clinical nutrition. (S/U grading only.)—I. (I.) Fascetti

### **Pathology, Microbiology, and Immunology (PMI)**

#### **Lower Division Course**

##### **99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

#### **Upper Division Courses**

##### **101. Comparative Hematology (2)**

Lecture—2 hours. Prerequisite: Biological Sciences 1A, 1B, Neurobiology, Physiology, and Behavior 101, Biological Sciences 102; or consent of instructor. An overview of the production, function and morphology of vertebrate blood cells, their alteration in health and disease, and the basic principles of laboratory testing in hematology. For students interested in medical technology or animal health. Offered in alternate years.—III.

##### **126. Fundamentals of Immunology (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 102 or the equivalent or consent of instructor. Overview of immunology including components of the immune system, initiation and regulation of the immune response, infection and immunity, hypersensitivity and immune dysfunction. Clinical immunologic techniques, immunodeficiency and vaccinology.—II. (II.) Stott

##### **126L. Immunology Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 126 or the equivalent (may be taken concurrently). Laboratory procedures in clinical immunology. Laboratory animal immunization/bleeding. Quantitative and qualitative characterization of the immune response. Cells of the immune system.—III. (III.) LeFebvre

##### **127. Medical Bacteria and Fungi (5)**

Lecture—3 hours; laboratory—5 hours. Prerequisite: general microbiology (Microbiology 102 and 102L), basic immunology (course 126 or Medical Microbiology 188). An introduction to the bacterial and mycotic pathogens of man and animals, with emphasis on pathogenic mechanisms and ecologic aspects of infectious disease.—III. LeFebvre

##### **128. Biology of Animal Viruses (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 102. Fundamental physical and chemical properties of animal viruses; methods of propagation, purification and assay. Mechanisms of viral replication and pathogenesis of viral infections in man and animals. Immunity to virus diseases and oncogenic properties of animal viruses. Two units of credit to students who have completed Microbiology 162.—I. (I.) Miller

##### **198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

##### **199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

#### **Graduate Courses**

##### **270. Advanced Immunology (3)**

Lecture—3 hours. Prerequisite: introductory course in immunology. Current concepts in lymphocyte biology, ontogeny, cooperation, functional attributes and protective immune response(s), mechanisms of immunologic disease, immunological unresponsiveness and host-escape mechanisms of viral, bacterial, and parasitic pathogens. Strategies in

immunomodulation and immunotherapy. Advanced methodologies in immunologic research. Offered in alternate years.—III. Stott

### 275. Comparative Pathology of Organ Systems (4)

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: graduate level standing and consent of instructor. Correlative alterations in structure and function of organ response to injury presented in context of major disease syndromes. Emphasis on general responses to disease in both humans and animals. Introductory material on the mechanisms of viral, bacterial and parasite pathogenesis.—I. (I.) Wilson

### 280A. The Mouse as an Experimental Model for Human and Animal Diseases I (3)

Lecture—3 hours. Prerequisite: graduate level standing in the biological sciences, first-, second-, or third-year standing in the School of Veterinary Medicine, or professional standing in the School of Medicine. Mice as models in biomedical research. Basic mouse biology, including reproduction and development, embryology, functional anatomy, ecology and genetics.—I. (I.)

### 280B. The Mouse as an Experimental Model for Human and Animal Diseases II (3)

Lecture—3 hours. Prerequisite: course 280A. Mice as models in biomedical research. Emphasis on mouse genomics, experimental pathology, immunology, physiology and other uses of experimental mouse models. Current technologies for establishment and evaluation of mouse models.—III. (III.)

### 283. Comparative Avian Anatomy and Pathology (1-3)

Lecture—3 hours. Prerequisite: anatomy section (1.0 unit); upper division undergraduate standing, veterinary students, or graduate standing, and consent of instructor. Pathology section: third- or fourth-year standing in the School of Veterinary Medicine or graduate standing and consent of instructor. Ten lectures outline gross/microscopic functional anatomy of a wide range of avian species as appropriate for students interested in avian biology. The remaining 20 lectures encompass comparative aspects of avian pathobiology and disease manifestations for students interested in avian diseases.—I. (I.) Lowenstine

### 285. Cellular Basis of Disease (3)

Lecture—3 hours. Prerequisite: Biological Sciences 104, Veterinary Medicine 452, course 275, or Medical Pathology 210. Application of cell biology, biochemistry and molecular biology to the understanding of the basic nature of disease. Cellular injury and mechanisms of adaptation, host-defense and vascular responses, and cellular transformation. Offered in alternate years.—(II.) Mohr, Wu

### 287. Comparative Pathology of Laboratory Animals (3)

Lecture—3 hours. Prerequisite: general and systemic pathology; second-, third-, or fourth-year standing in the School of Veterinary Medicine or graduate student standing, or consent of instructor. Recognition of lesions and understanding of pathogenesis of diseases of animals commonly kept in laboratory settings. Species covered include rodents, lagomorphs, amphibians, nonhuman primates, genetically manipulated animals and novel animal models. Offered in alternate years.—(III.) Lowenstine

### 290. Seminar (1)

Seminar—1 hour. Prerequisite: graduate level standing. Topics in pathology, microbiology or immunology. May be repeated for credit. (S/U grading only.) I, II, III, IV. (I, II, III, IV.)

### 291A. Seminar in Immunology (1)

Seminar—1 hour. Prerequisite: course 126 or the equivalent. Students choose topic for each quarter. Individual or pairs of students choose a paper for all to read and present a seminar based on the subject of the paper. All students participate in discussion. May be repeated for credit. (S/U grading only.)—I, III. (I, III.) Gershwin

### 292A. Seminar in Animal Virology (1)

Seminar—1 hour. A discussion of the current topics in animal virology. May be repeated for credit. (Same course as Microbiology 296.) (S/U grading only.)—I, II, III. (I, II, III.) Marthas, Miller

### 292B. Surgical Pathology Conference (1)

Discussion—1 hour. Prerequisite: graduate student standing or consent of instructor. Diagnosis and discussion of current surgical pathology cases based on clinical records and microscopic study. May be repeated for credit. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Munson

### 293A. Seminar in Infectious Diseases (1)

Seminar—1 hour. Prerequisite: current enrollment in health science professional school or graduate standing in biological sciences. Discussion of current topics and cases of infectious diseases. May be repeated one time for credit if topic differs. (S/U grading only.)—I, II, III. (I, II, III.) Byrne

### 293B. Necropsy and Surgical Pathology (2-4)

Laboratory—6-12 hours. Prerequisite: graduate student standing and consent of instructor. Responsible diagnostic casework. Performance of necropsies, slide reading, and case reporting. May be repeated for credit. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Munson

### 296. Microbiological Diagnosis (2-5)

Laboratory—5-14 hours; discussion—1 hour. Prerequisite: laboratory course in veterinary or medical microbiology or equivalent or consent of Chief of Microbiology, VM Teaching Hospital. Laboratory diagnosis of infectious diseases involving case work at the VM Teaching Hospital. (S/U grading only.) I, II, III. (I, II, III.) Byrne

### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

### 299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Professional Courses

### 418. Health and Disease in Terrestrial Wildlife (2)

Lecture—20 sessions. Prerequisite: first-, second-, or third-year standing in the School of Veterinary Medicine or consent of instructor. Ecology and epidemiology of disease in free-ranging terrestrial wildlife. Offered in alternate years. (S/U grading only.)—II. Ziccardi

### 419. Field Techniques for Assessment of Wildlife and Ecosystem Health (2)

Fieldwork—7 sessions. Prerequisite: Medicine and Epidemiology 294B, first-, second-, third-year or MPVM standing in the School of Veterinary Medicine or consent of instructor. Introduction to the concepts and technical skills necessary to conduct field studies pertaining to wildlife/ecosystem health. Emphasis on Southern California ecosystem. (S/U grading only.)—III. (III.) Ziccardi

### 475. Diagnostic Medicine of Domestic Animals (2)

Discussion—2 hours. Prerequisite: second-year standing in the School of Veterinary Medicine or consent of instructor. An integrated, problem oriented, approach to diagnosis of animal infectious disease through the disciplines of microbiology, clinical pathology and anatomic pathology. Participants organize assigned cases for presentation to the class in a grand rounds format with presentations by small groups composed of individuals who act as either a moderator, microbiologist, clinical pathologist or pathologist. (S/U grading only.)—III. (III.) Wilson

### 476. Comparative Pathology of Non-Mammalian Vertebrates (2)

Lecture—20 sessions. Prerequisite: second- or third-year standing in the School of Veterinary Medicine or consent of instructor; Medicine and Epidemiology 410, 487. Mechanisms of disease in non-mammalian vertebrates (fish, amphibians, reptiles, and birds) that differ from mammalian species including

tissue response to injury, repair and neoplasia. Gross lesions of common diseases affecting non-mammalian vertebrates.—III. (III.)

## Population Health and Reproduction (PHR)

### Lower Division Course

#### 92. Internship in Veterinary Science (1-4)

Discussion/laboratory—1-4 hours; clinic—3-36 hours; final report. Prerequisite: approval of project prior to period of internship by faculty sponsor. Supervised work experience in reproduction. (P/NP grading only.)

### Upper Division Courses

#### 106. Human-Animal Interactions: Benefits and Issues (2)

Lecture—9 sessions; discussion—9 sessions; laboratory—1 session. Prerequisite: upper division standing or consent of instructor. The contributions of animals to human society, including historic, anthropologic, developmental, human health and therapeutic perspectives, as well as effects of humans on animals. One field trip required.—II. (II.) L. Hart

#### 111. Food Animals and the Public's Health (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1 or consent of instructor. Causes, prevention, and control of animal diseases important in economic agriculture and in public health, with emphasis upon animal management factors in disease.—II. (II.) Moore

#### 150. Foodborne Infections and Intoxications (4)

Lecture—4 hours. Prerequisite: Food Science and Technology 104 or Pathology, Microbiology, and Immunology 127 or second- or third-year standing in the School of Veterinary Medicine. Prevalence and characteristics of those diseases of humans which are derived from food or food sources; access of disease agents to and distribution in food and food sources; exposure of people to these agents; prevention of foodborne diseases.—III. (III.) Cliver

#### 192. Internship in Veterinary Science (1-12)

Discussion/laboratory—1-12 hours; clinic—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in Reproduction. May be repeated for credit. (P/NP grading only.)

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

## Graduate Courses

#### 202. Sampling in Health-Related Research (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 403 or the equivalent; consent of instructor. A very thorough coverage of simple random sampling, stratified sampling, cluster sampling, systematic sampling and other sampling methods applied extensively in epidemiology and other health-related disciplines. Emphasis on application of the sampling methods. Offered in alternate years.—II. Farver

#### 203. Multivariate Biostatistics (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 403 and 404, or the equivalent; consent of instructor. Multivariate procedures covered are principal component analysis, factor analysis, Two-group and k-group multivariate ANOVA, multivariate regression, Two-group and k-group discriminant analysis and repeated measures analysis, cluster analysis, and canonical analysis. Emphasis is on application of procedures. Offered in alternate years.—II. Farver

#### 210A. Analytic Epidemiology I: Case Control Studies (3)

Lecture—2 hours; laboratory/discussion—3 hours. Prerequisite: Statistics 130B and Preventive Veterinary Medicine 406 or the equivalent or consent of instructor. Theory and practice of epidemiologic

data analysis. Topics include confounding, stratification, matching, interaction, and logistic regression. (Same course as Epidemiology 210A.)

**210B. Analytic Epidemiology II: Cohort Studies (3)**

Lecture/discussion—3 hours. Prerequisite: course 210A. Theory and practice of epidemiologic data analysis. Topics include rates, rate standardization, cohort analysis, Poisson regression, and survival/failure-time methods. (Same course as Epidemiology 210B.)

**212. Epidemiology of the Zoonoses (4)**

Lecture—35 sessions; discussion—5 sessions. Prerequisite: graduate standing or third-year standing in the School of Veterinary Medicine or consent of instructor. Epidemiological, biological and ecological features of some major infections shared by humans and other animals. Wildlife and domestic animals zoonoses of major health and economic significance are presented to illustrate how knowledge of zoonoses epidemiology is essential for implementing control measures.—II. (II.) Chomel

**213. Food Safety (1)**

Lecture—10 sessions. Prerequisite: graduate standing or consent of instructor. Food-borne disease hazards from producer to consumer; types and causes of food-borne illness; measures for prevention of food-borne disease and enhancement of food safety.—III. (III.) Cliver

**214. Vector-Borne Infectious Diseases: Changing Patterns (2)**

Lecture/discussion—2 hours. Prerequisite: consent of instructor. Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. (Same course as Entomology 214.)—I. (I.) Chomel

**216A. Immunodiagnostic Techniques (2)**

Lecture—10 sessions; laboratory—10 sessions. Prerequisite: MPVM student or consent of instructor. Applications of serologic techniques for diagnosis of animal diseases.

**216B. Research Methods in Avian Immunology (2)**

Discussion—1 hour; laboratory—3 hours. Prerequisite: laboratory immunology background or consent of instructor. Laboratory techniques used in the study of avian immune systems and pathogenesis of avian disease.

**220. Avian Medicine (3)**

Lecture—3 hours. Prerequisite: second-year standing or MPVM standing in the School of Veterinary Medicine or graduate standing or consent of instructor. Instruction on the methods of prevention of the major diseases of domestic poultry.—III. (III.) Wakenell

**222. Avian Immunology (3)**

Lecture—3 hours. Prerequisite: basic immunology course or consent of instructor. Normal structure of the avian immune system, quick review of basic immunology, comparison between mammalian and avian immune systems and generation of immune responses, immunodiagnosics and vaccination.—III. (III.) Wakenell

**225. Preventive Avian Medical Practice (3)**

Lecture—3 hours. Prerequisite: first, second, third-year, or MPVM standing in the School of Veterinary Medicine or consent of instructor. Economic structure of broiler, commercial egg and turkey industries, delivery of preventive veterinary medical services within these industries. Specific prevention, eradication programs pertaining to diseases of economic importance are covered. Environmental, OSHA, regulatory and agroterrorism.—III. (III.) Wakenell

**231. Pathophysiology of Mammalian Reproductive Processes (3)**

Lecture—3 hours. Prerequisite: fourth-year standing in School of Veterinary Medicine or consent of instructor. Physiological and pathological aspects of reproductive failure in mammals concerning gonadal function, fertilization, implantation, prenatal mortality, neonatal mortality, environmental factors, anatomical and hereditary defects, intersexuality and behavior. Offered in alternate years.

**232. Advanced Reproductive Biology (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: neurobiology, physiology and behavior 121 and 130; graduate standing or consent of instructor. Examination of or challenge to established and emerging concepts at the molecular, cellular and organismal levels. Reproductive development, the male, the non-pregnant female and the pregnant or senescent female. Offered in alternate years.—(III.) Conley

**266. Applied Analytic Epidemiology (3)**

Lecture—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as Master of Public Health 266.)—III. (III.) Kass

**290A. Seminar (1)**

Seminar—1 hour. Discussion of current topics in animal reproduction and medicine, as well as presentation of research findings by graduate students and faculty. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Ball

**290B. Current Topics in Avian Medicine (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Topics from the current literature in avian medicine will be assigned to students for discussion and interpretation. May be repeated for credit.—I, II, III. (I, II, III.) Wakenell

**292. Current Topics in Reproduction (1)**

Seminar—1 hour. Prerequisite: consent of instructor. Discussion of current scientific literature in reproduction, as well as presentation of research findings by graduate students and faculty. (S/U grading only.)—I, II, III. (I, II, III.)

**298. Group Study (1-5)**

**299. Research (1-12)**  
(S/U grading only.)

**Professional Courses**

**406. Human-Animal Interactions in Veterinary Science (1)**

Lecture—9 sessions; laboratory—1 session. Prerequisite: first, second-, or third-year standing in the School of Veterinary Medicine. Human relationships with companion animals, and, secondarily, on food, laboratory, and wild animals from the perspectives of veterinarians and their clients' needs. Emphasis on the benefits of companion animals for human mental and physical well-being, the role of animals in the human life cycle, societal traditions in keeping animals, and types of specialized and more typical relationships with animals.—II. (II.) Hart

**408. Behavior and Biology of Mice as Domestic Animals (1)**

Lecture—10 sessions. Prerequisite: first, second-, or third-year standing in the School of Veterinary Medicine, or graduate standing in psychology, animal science, animal behavior, or consent of instructor. Laboratory mouse biology and welfare, including the development and purposes of specialized strains of mice, constraints for their care and environmental enrichment, legislation and regulation, and the human benefits of their use.—II. (II.) L. Hart

**420. Zoonoses of Non-Human Primates (2)**

Lecture—20 sessions. Prerequisite: second- or third-year standing in the School of Veterinary Medicine and consent of instructor. Epidemiological, clinical, and biological features of zoonoses of non-human primates. Emphasis given to major zoonoses which are threatening to human health and their treatment and prevention. Focus also on management of non-human primates in research, zoological gardens and in the wild. Offered in alternate years.—(II.) Chomel

**429D. Dairy Herd Health Management (4)**

Lecture—40 sessions. Prerequisite: Medicine and Epidemiology 427, 463A, 463B, 463C, third-year standing in School of Veterinary Medicine, and consent of instructor. Practical systems for delivering vet-

erinary services to dairy farms with emphasis on disease prevention and improved herd performance.—III. (III.) Moore

**429DL. Dairy Herd Health Management Laboratory (0.6)**

Laboratory—6 sessions. Prerequisite: third-year standing in School of Veterinary Medicine; course 429D concurrently or consent of instructor. Practical systems for delivering veterinary services to dairy farms with emphasis on disease prevention and improved herd performance. Field trips and computer laboratories to practice skills in animal observations, facilities observations and use of the computer for nutrition services and dairy records analysis. (S/U grading only.)—III. (III.) Moore

**429E. Dairy Goat Herd Health (1)**

Lecture—10 sessions. Prerequisite: Medicine and Epidemiology 427, 463A, 463B, 463C, third-year standing in School of Veterinary Medicine, or consent of instructor. The application of problem-solving and epidemiologic methods to dairy goat diseases and their control.—III. (III.) Rowee

**432. Reproductive Technology in Mammals and Birds (0.8)**

Lecture—5 sessions; discussion—3 sessions. Prerequisite: first-year standing in the School of Veterinary Medicine or consent of instructor. Introductory course in the application of technology to the reproductive process in mammals and birds. Emphasis on domestic animals, but birds and non-domestic mammals also discussed. Exposure of students to some of the "sexier" aspects of population/reproduction management. (S/U grading only.)—III. (III.) BonDurant

**432L. Reproductive Technology in Mammals and Birds, Laboratory (0.2)**

Laboratory—2 sessions. Prerequisite: course 432 concurrently, first-year standing in the School of Veterinary Medicine. Laboratory demonstrations and exercises in gamete freezing, thawing, and handling; artificial insemination of cattle; artificial insemination and other applications of reproductive technology in small ruminants. (S/U grading only.)—III. (III.) BonDurant

**440. Ruminant Clinical Nutrition (1.9)**

Lecture—19 sessions. Prerequisite: Veterinary Medicine 408, second- or third-year standing in the School of Veterinary Medicine or consent of instructor. Nutritional related disorders in ruminants with a herd basis approach. Nutritionally related disorders that affect modern cattle production. Emphasis on understanding the problem and preventing it through nutritional management.—II. (III.) Santos

**442. Equine Theriogenology (2)**

Lecture—20 sessions. Prerequisite: third-year standing in School of Veterinary Medicine; consent of instructor. Discussions of abnormal conditions and physiologic function in equine reproduction with emphasis on methods of diagnosis and interpretation of clinical and laboratory findings associated with the abnormalities.—I. (I.) Ball

**442L. Equine Theriogenology Laboratory (1.0)**

Laboratory—10 sessions. Prerequisite: third-year standing in School of Veterinary Medicine; consent of instructor. Hands-on diagnosis and implementation of techniques related to reproductive examination of horses. Routine and current procedures performed on the farm. Designed to maximize the opportunity for assessment of the normal reproductive anatomy, the diagnosis and interpretations of physiologic conditions and for becoming comfortable in performing the various routine procedures. I. (I.) Ball

**445. Food Animal Theriogenology and Reproductive Performance (2)**

Lecture—20 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine or consent of instructor. Physiological, pathophysiological, and management factors affecting the reproductive health and performance of food animals, with emphasis on dairy, beef cattle, and sheep. Minor

emphasis on swine and goats. Assessment of, and intervention strategies for, herd reproductive performance.—II. (II.) BonDurant

#### 445L. Food Animal Theriogenology Laboratory (1)

Laboratory—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, course 445 concurrently or consent of instructor. Obstetrical and gynecological diagnosis and treatment for food animals; breeding soundness examination of males; analysis and on-farm use of computerized reproductive records; embryo technology. (S/U grading only.)—II. (III.) BonDurant

#### 446A. Food Animal Reproduction (1)

Lecture—6 sessions; laboratory—4 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Conditions affecting the reproductive system in the cow, sow, ewe, and goat, with emphasis on symptomatology, pathophysiology, treatment, control, prevention, and herd health applications.—III. (III.) Rowe

#### 446B. Equine Reproduction (1)

Lecture—6 sessions; laboratory—4 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Approved for graduate degree credit. Discussion of special problems of equine reproduction with emphasis on methods of diagnosis and the interpretation of clinical and laboratory findings.—III. (III.) Ball

#### 446C. Non-Domestic Reproduction (1)

Lecture—10 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Follows course 446A. Information relating to reproduction in non-domestic mammals, birds, and reptile species. Concepts relating to the evaluation of reproductive status, diagnosis of infertility, assisted reproduction and contraception will be presented.—III. (III.) BonDurant

#### 450. HACCP and Risk Assessment in Pre- and Post-harvest Food Safety (3)

Lecture/discussion—3 hours. Prerequisite: a first year course in microbiology or food science or consent of instructor. Application of the Hazard Analysis-Critical Control Point (HACCP) system in the food industry, for regulatory agencies; and in the pre-harvest area of food production. Development of HACCP plans. (S/U grading only.)—II. (II.) Cliver

#### 452. On-Farm Food Safety/Veterinary Public Health (2)

Lecture—20 sessions. Prerequisite: Master's of Preventive Veterinary Medicine students or consent of instructor. The organizations and regulations responsible for ensuring food safety, pathogens that may be on the farm and cause public health concerns, management systems that affect animal health, and key topics regarding environmental health relating to animal agriculture.—III. (III.) Cullor, Chomel

#### 457. Veterinary Business Management (2)

Lecture—10 sessions. Prerequisite: first, second, third, or fourth-year standing in School of Veterinary Medicine or consent of instructor. Information essential to the successful management of a veterinary practice. Topics include basic accounting, medical recordkeeping, money management, business and personal insurance, client relations and tax law. (S/U grading only.)—III. (III.) Klingborg

#### 483. Pet Loss Support Hotline and End of Life Issues (2)

Discussion/Laboratory—3-6 hours. Prerequisite: first, second, or third-year standing the School of Veterinary Medicine. Training and experience in addressing end-of-life issues for companion animals, including hospice, decision-making and pet loss support. Responding to pet loss hotline callers who are anticipating or experiencing the end of a relationship with a beloved companion animal. Communication skills, especially supportive listening, and referral to community resources. (S/U grading only.)—I, II, III. (I, II, III.) L. Hart

## Preventive Veterinary Medicine (MPM)

### Professional Courses

#### 402. Medical Statistics I (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: enrollment in the MPVM program in the School of Veterinary Medicine or consent of instructor. Statistics in clinical, laboratory and population medicine: graphical and tabular presentation of data; probability; binomial; Poisson, normal, t, F, and Chi-square distributions; elementary nonparametric methods; simple linear regression and correlation; life tables. Microcomputer applications of statistical procedures in population medicine.—IV. (IV.) Farver

#### 403. Medical Statistics II (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 402 or equivalent. Continuation of course 402. Analysis of variance in biomedical sciences; nonparametric methods; multiple regression; biomedical applications of statistical methods. Microcomputer applications to reinforce principles that are taught in lecture.—I. (I.) Farver

#### 404. Medical Statistics III (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 403 or the equivalent, consent of instructor. Analysis of time dependent variation and trends, analysis of multiway frequency tables; logistic regression; survival analysis selecting the best regression equation; biomedical applications.—II. (II.) Farver

#### 405. Principles of Epidemiology (4)

Lecture—4 hours. Prerequisite: course 402 or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. [Same course as Epidemiology 205A.]—I. Hird

#### 405L. Epidemiology Laboratory (1)

Laboratory—10 hours. Prerequisite: course 405 (may be taken concurrently) with grade of C or better, course 412 with grade B- or better. A practical application of epidemiological methods using the microcomputer as a tool to solve problems. Utilizes spreadsheets and databases as tools to organize and analyze data. Emphasis on epidemiological methods introduced in course 405. Data sets provided.—I. (I.) Case

#### 406A. Epidemiologic Study Design (3)

Lecture—1.5 hours; discussion—0.9 hours; laboratory—1.8 hours. Prerequisite: course 405/Epidemiology 205A, Epidemiology 205B. Builds on concepts presented in course 405. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in course 405 and covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. [Same course as Epidemiology 206.]—II. (II.) Hird

#### 408A. Veterinary Research: Planning and Reporting (2)

Lecture—20 sessions. Prerequisite: Master's of Preventive Veterinary Medicine (MPVM) standing in the School of Veterinary Medicine, course 402 or Statistics 102 (with a grade of B- or better), course 405 and 412, or equivalent courses (may be taken concurrently), and ability to use commercial software in statistical and graphical applications, or consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research.—I. (I.) Thurmond

#### 408B. Veterinary Research: Planning and Reporting (1)

Lecture—10 sessions. Prerequisite: consent of instructor; course 408A. Planning, critical analysis, ethics, and written and oral communication of veterinary research.—II. (II.) Thurmond

#### 412. Introduction to Information Management (3)

Lecture—10 sessions; laboratory—20 sessions. Prerequisite: consent of instructor; Master's of Preventive Veterinary Medicine (MPVM) students; intermediate computer skills using word processing, spreadsheet, and presentation software. Emphasis on data quality and design of data applications. Introduction to information management. Emphasis on data quality and design of data applications. Specific topics include library fundamentals and managing human resources for project management, data collection, organization, storage, analysis and communication. Limited enrollment.—IV. (IV.) Sischo

#### 426. Applied Epidemiologic Problem Solving (1)

Laboratory—3 hours. Prerequisite: grade of C or better in course 405L. Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation; descriptive statistical analysis using spreadsheets, database management, and Epi Info software. Builds on skills learned in courses 405L and 406.—II. (II.) Gardner

## Surgical and Radiological Sciences (VSR)

### Lower Division Course

#### 99. Special Study for Undergraduates (1-5)

(P/NP grading only.)

### Upper Division Course

#### 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

### Graduate Courses

#### 290. Clinical Neurology/Neuropathology Conference (1)

Seminar—1.5 hours. Prerequisite: third- or fourth-year standing in the School of Veterinary Medicine, Veterinary Medicine Teaching Hospital, or UCDCM resident or graduate student in appropriate discipline. Discussion and review of neural and muscular pathology of selected cases from the Veterinary Medicine Teaching Hospital. (S/U grading only.)—I, II, III. (I, II, III.) Higgins, LeCouteur

#### 296. Small Animal Radiology Case Discussions (1)

Seminar—1 hour. Prerequisite: first or second year standing in the School of Veterinary Medicine or consent of instructor. The role of diagnostic radiology in the clinical setting and student interpretation of radiographs. May be repeated once for credit. (S/U grading only.)—I, II, III. Hornof

#### 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

#### 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

### Professional Courses

#### 400. Equine Radiographic Anatomy (1)

Autotutorial—1 hour. Prerequisite: first-, second-, or third-year standing in the School of Veterinary Medicine. Self-study of the radiographic anatomy displayed on the standard radiographic projections of the musculoskeletal system of the horse. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Wisner

#### 401. Small Animal Radiology Case Discussions (1)

Discussion—10 sessions. Prerequisite: first-, second-, or third-year standing in the School of Veterinary Medicine. The role of diagnostic radiology in the clinical setting and student interpretation of radiographs. May be repeated one time for credit. (S/U grading only.)—I, II, III. (I, II, III.) Wisner

**402. Large Animal Radiology Case Discussions (1)**

Discussion—10 sessions. Prerequisite: first-, second-, or third-year standing in the School of Veterinary Medicine. The role of diagnostic radiology in the clinical setting and student interpretation of radiographs. May be repeated one time for credit. (S/U grading only.)—I, II, III. (I, II, III.) Wisner

**404A. Small Animal Radiology (2.9)**

Lecture—17 sessions; discussion—12 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine and consent of instructor. Registration in course 404A is required at the beginning of both winter and spring quarters for this two quarter course. Students may audit the course, but retroactive adds after the examination has been administered at the end of each quarter are not allowed. Course 404A is required for students who intend to rotate through the Small Animal Radiology Service during their senior year. Introduction to radiographic interpretation as it relates to musculoskeletal, thoracic, and abdominal disorders of small animals. Assignment of unknown cases as practice in interpreting radiographic patterns described in lecture. (Deferred grading only, pending completion of sequence.)—II, III. (II, III.) Pollard

**404B. Large Animal Radiology (1.6)**

Lecture—12 sessions; discussion—4 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine and consent of instructor. Radiographic manifestations of common equine orthopedic, upper airway and thoracic diseases. Common radiographic abnormalities in non-equine large animal patients. Equine and other large animal radiographic pattern recognition and differential diagnosis generation based on the identified pattern.—II. (II.) Puchalski

**405. Advanced Small Animal Abdominal Ultrasound (2.2)**

Lecture—12 sessions; discussion—6 sessions; laboratory—4 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. The use of ultrasound for the diagnosis of common clinical diseases in both the abdomen and thorax. Examination techniques of the thorax and the abdomen covered in the laboratory sessions and examples of the abnormal presented in discussion.—II. (II.)

**406. Small Animal Diagnostic Ultrasound (1.1)**

Lecture—7 sessions; discussion—1 session; laboratory—3 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine. Ultrasound imaging physics, artifacts, machine controls, techniques of abdominal scanning and basic ultrasonographic anatomy. Lab sessions reinforce topics covered in lecture and provide hands on ultrasound experience.—I. (I.)

**407R. Comparative Dentistry and Oral Surgery (2)**

Discussion—2 hours. Prerequisite: residents in the Veterinary Medical Teaching Hospital; graduate students, veterinarians enrolled in training programs leading to board-certification in veterinary dentistry, AVDC Diplomates and dentists with consent of instructor. Review of current literature pertaining to comparative oral biology, surgery and medicine and related basic sciences; half of sessions based on topics assigned by course leader while other half consist of critical reviews of recent papers chosen by the participants. May be repeated once for credit. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Verstraete

**409. Known Case Conference (1.5)**

Discussion/demonstration—1.5 hours. Prerequisite: DVM degree and consent of instructor. Approved for graduate degree credit. Film review of current VM Teaching Hospital proven cases. Intended for radiology residents and others with background in diagnostic radiology. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**411R. Small Animal Orthopedics Conference (0.9)**

Discussion—9 sessions. Prerequisite: house officers at the Veterinary Medical Teaching Hospital or completion of D.V.M. or equivalent. Graduate students

with permission of instructor. Discussion of current cases and literature pertaining to small animal orthopedics. (S/U grading only.)—I, II, III. (I, II, III.) Kapatkin

**413. Small Animal Dentistry (2.4)**

Lecture—19 sessions; discussion—5 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Introduction to the principles of oral examination, pathophysiology and treatment of periodontitis, exodontics, basic oral soft tissue surgery dental emergencies, orthodontics, developmental and regressive dental conditions, endodontics, prosthodontics, advanced periodontology, oral medicine and advanced oral surgery. (S/U grading only.)—I. Verstraete

**413L. Small Animal Dentistry Lab (0.3)**

Lab—3 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine; concurrent enrollment in course 413; consent of instructor. Principles of oral examination, oral radiography, routine periodontal treatment and dental extraction techniques. (Deferred grading only, pending completion of sequence. S/U grading only.)—II, III. (II, III.) Verstraete

**415. Lameness in Dogs (1.4)**

Lecture—13 sessions; laboratory—1 session. Prerequisite: third-year standing in the School of Veterinary Medicine; consent of instructor. Discussion of lameness examination and detailed descriptions of common congenital and acquired disorders that cause lameness in dogs. Discussion of methods to diagnose and treat.—III. (III.) Kapatkin

**416. Equine Ultrasonology (1)**

Lecture—8 sessions; discussion—2 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and consent of instructor. Familiarize students with ultrasonographic diagnostic methodology and with ultrasonologic features of common diseases of the major equine organ systems.—III. (III.) Whitcomb

**416L. Equine Ultrasonology Lab (0.4)**

Laboratory—4 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine, concurrent enrollment in course 416 and consent of instructor. Familiarize students with ultrasonographic diagnostic methodology and with ultrasonologic features of common diseases of the major equine organ systems.—III. (III.) Whitcomb

**423. Diagnostic Ophthalmology (1.5)**

Lecture—15 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine or consent of instructor; successful completion of Veterinary Medicine 422. The pathogenesis and diagnosis of commonly encountered eye diseases of common domestic animals.—II. (II.) Maggs

**424. Case Studies in Veterinary Oncology (1)**

Lecture—10 sessions. Prerequisite: second-year standing in the School of Veterinary Medicine and consent of instructor. The internal medicine subspecialty of oncology. Clinical considerations and basic tenets of tumor biology. (S/U grading only.)—I. (I.) Theon

**425R. Veterinary Cancer Biology: Clinical Applications (1)**

Seminar—10 sessions. Prerequisite: resident in the Veterinary Medical Teaching Hospital or consent of instructor, course 433. Survey of contemporary literature regarding the clinical management of important tumors in domestic animals and focus on diagnosis and treatment. (S/U grading only.)—I. (I.) Kent

**426R. Veterinary Cancer Biology: Mechanisms of Disease (1)**

Seminar—10 sessions. Prerequisite: resident in the Veterinary Medical Teaching Hospital or consent of instructor, course 433. Survey of contemporary literature regarding the biology of cancer with particular reference to mechanisms underlying tumorigenesis in domestic animals. (S/U grading only.)—III. (III.) Kent

**431R. Advanced Veterinary Neurology/Neurosurgery (2)**

Seminar—4 hours. Prerequisite: graduate clinical student (resident) in the Veterinary Medical Teaching Hospital and consent of instructor. Lectures/discussions/literature reviews of diagnosis and medical/surgical treatment of neurological diseases of animals. Relevant neurologic and neurosurgical topics from human medicine will be addressed. May be repeated for credit up to 12 times for 24 units of credit. (S/U grading only.)—I, II, III, IV (I, II, III, IV) LeCouteur

**432R. Graduate Veterinary Neurosurgery Seminar (1.5)**

Lecture/laboratory—15 sessions. Prerequisite: small animal surgery residency program or the neurology/neurosurgery residency program in the School of Veterinary Medicine. Graduate students and residents in other disciplines with consent of instructor. Overview of the diagnosis and treatment of neurological disease in small animals with an emphasis on neurosurgery. Laboratory sessions allow residents to develop familiarity with anatomical landmarks and the neurosurgical skills necessary to perform a variety of neurosurgical procedures. May be repeated for credit. (S/U grading only.)—II, III. (II, III.) LeCouteur

**450. HACCP & Rick Assessment in Pre and Postharvest Food Safety (3)**

Lecture/discussion—3 hours. Prerequisite: first-, second-, third-year or MPVM standing in the School of Veterinary Medicine; Master of Public Health students, advanced undergraduate and graduate students from Food Science and Animal Science or consent of instructor. Application of the Hazard Analysis-Critical Control Point (HACCP) system in the food industry, for regulatory agencies; and in the preharvest area of food production. Development of HACCP plans. (S/U grading only.)—II. (II.) Cliver, Hajmeer

**450R. Veterinary Ophthalmology Slide Review (1)**

Discussion—1 hour. Prerequisite: resident in Veterinary Medical Teaching Hospital Ophthalmology program or consent of instructor. Review and critical evaluation of 35 mm projection slides involving clinical and microscopic depictions of normal and abnormal conditions seen in the field of veterinary ophthalmology. Discussion of current treatment modalities, diagnostic capabilities and other related and relevant issues. (S/U grading only.)—I, II, III. (I, II, III.) Maggs, Hollingsworth

**451R. Veterinary Ophthalmology Literature Review (1)**

Discussion—1 hour. Prerequisite: resident in Veterinary Medical Teaching Hospital Ophthalmology program or consent of instructor. Survey and critical evaluation of contemporary literature in or related to the field of veterinary ophthalmology. (S/U grading only.)—I, II, III. (I, II, III.) Maggs, Hollingsworth

**460. Emergency and Critical Patient Care (2)**

Lecture—20 sessions. Prerequisite: third-year standing in School of Veterinary Medicine. Introduction to the essential and practical concepts of care for emergency and critically ill patients.—III. Haskins

**461. Management of Small Animal Musculoskeletal Trauma (1.6)**

Lecture—16 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine and Veterinary Medicine 460. Introduction to principles of small animal orthopedic surgery including: orthopedic anatomy and examination, orthopedic instrumentation, fracture management, traumatic joint disease and traumatic muscle and tendon disease.—III. (III.) Haskins

**461L. Small Animal Orthopedic Surgery Laboratory (0.4)**

Laboratory—4 sessions. Prerequisite: course 461 concurrently, third-year standing in the School of Veterinary Medicine. Hands-on experience in application of external coaptation and basic principles of application of different types of fixation for fractures. (S/U grading only.)—II. (II.) Hayashi

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

**462. Radiographic Diagnosis: Small Animal (1)**

Lecture—1 session; discussion—9 sessions. Prerequisite: course 404A, third-year standing in the School of Veterinary Medicine. Small animal radiographic case studies. Presentation and discussion of assigned cases before knowing the actual diagnosis. (S/U grading only.)—III. (III.) Wisner

**463. Surgical and Anesthetic Considerations in Small Animal Soft Tissue Surgery (2.2)**

Lecture—22 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Pathophysiology and surgical treatment of selected soft tissue diseases.—III. (III.) Gregory

**464R. Principles of Veterinary Radiation Oncology (2)**

Lecture—2 hours. Prerequisite: house officers in the Veterinary Medical Teaching Hospital. Graduate students or veterinary students with consent of instructor. Principles and practice of veterinary radiation therapy. Topics include physical methods of radiation therapy, biological effects of therapeutic radiation and applications in veterinary patients. (S/U grading only.) Offered in alternate years.—I. Theon

**465R. Biology and Practice of Veterinary Radiation Oncology (2)**

Lecture—2 hours. Prerequisite: house officers in the Veterinary Medical Teaching Hospital. Graduate students or veterinary students with consent of instructor. Principles and practice of veterinary radiation therapy. Topics include physical methods of radiation therapy, biologic effects of therapeutic radiation and applications in veterinary patients. (S/U grading only.) Offered in alternate years.—II. Theon

**466. Large Animal Applied Anesthesiology (1.5)**

Lecture—15 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine or consent of instructor. Applied clinical anesthesiology. Special techniques and consideration for anesthetizing a variety of species including horses, swine, ruminants, camelids, and large non-domestic species.—II. (II.) Brosnan

**467. Small Animal Anesthesiology (2)**

Lecture—20 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. The safe clinical administration of anesthetic drugs to small animals. Clinical applications, indications and contraindications, methods of use of common anesthetic drugs and techniques will be discussed.—II. (II.) Illkiw

**468. Equine Lameness and Radiology (4)**

Lecture—40 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Principles for the clinical evaluation and radiographic interpretation of lameness disorders of the fore- and hindlimbs of horses. Methods used in large animal radiography and the latest techniques for managing and treating equine lameness. Anatomy and pathology of some areas of the musculoskeletal system.—III. (III.) MacDonald

**468L. Equine Lameness and Radiology Laboratory (1.1)**

Laboratory—11 sessions. Prerequisite: course 468 concurrently, third-year standing in School of Veterinary Medicine. Focus on clinical gait evaluation, and various diagnostic strategies for localizing lameness disorders in the fore- and hindlimbs of horses. Radiographs from clinical cases. Clinical evaluation and treatment of various disorders of the foot. Equine chiropractic and acupuncture therapy.—III. (III.) Galuppo

**469. Equine Surgery (3)**

Lecture—30 sessions. Prerequisite: third-year standing in the School of Veterinary Medicine. Appropriate methods of diagnosis for surgical diseases, provide an understanding of different treatment options, and develop a framework for establishing a prognosis for the disease considering particular uses of horses.—II. (II.) Snyder

**469L. Equine Surgery Laboratory (1.4)**

Laboratory—8 sessions; discussion—6 sessions. Prerequisite: course 469 concurrently, third-year standing in School of Veterinary Medicine. Common equine surgical procedures and other techniques useful in equine practice. (S/U grading only.)—II. (II.) Snyder

**470R. Equine Surgery Journal Discussion (1)**

Discussion—1 hour. Prerequisite: course 471R concurrently, resident in Veterinary Medical Teaching Hospital or consent of instructor. Current veterinary literature and other related topics in preparation for board certification in the American College of Veterinary Surgeons. Critical evaluation of journal articles for content, methodology and statistical methods. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Galuppo

**471R. Equine Surgery Case Management Conference (1)**

Discussion—1.5 hours. Prerequisite: course 470R concurrently, resident in Veterinary Medical Teaching Hospital or consent of instructor. Discussion of soft tissue, orthopedic and lameness clinical disorders that focus on pathophysiology of disease, appropriate treatment options, and evaluation of prognosis. Simulation of mock oral examination for the American College of Veterinary Surgeons board examination. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Galuppo

**481R. Clinical Soft Tissue Surgery Conference (1)**

Discussion—1 hour. Prerequisite: open to students with D.V.M. or equivalent degree who are residents in specialty training. Graduate students in a related discipline with consent of instructor. Review current medical literature and discuss presentation, diagnosis and treatment of small animal surgical conditions, review the morbidity and mortality of clinical cases and provide mock examinations in preparation for ACVS specialty boards. May be repeated for credit. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.) Kyles

**491R. Anesthesia/Critical Care Basic Science Management Conference (1.2)**

Discussion—12 sessions. Prerequisite: resident in the Veterinary Medical Teaching Hospital or consent of instructor. Physiology, pharmacology and clinical practice as it relates to anesthetic management of veterinary patients. May be repeated three times for credit. (S/U grading only.)—I, II, III. (I, II, III.) Pypendop

**493R. Anesthesia/Critical Care Case Management Conference (1.2)**

Discussion—12 sessions. Prerequisite: resident in the Veterinary Medical Teaching Hospital or consent of instructor. Discussion of VMTH case material to illustrate specific medical problems and their preventive and corrective management as it pertains to anesthesia and critical care. May be repeated three times for credit. (S/U grading only.)—I, II, III. (I, II, III.) Pypendop

## Viticulture and Enology

(College of Agricultural and Environmental Sciences)  
James A. Wolpert, Ph.D., Chairperson of the Department

**Department Office.** 1023 Wickson Hall

**The Major Program**

The Viticulture and Enology major provides an interdisciplinary education in the biological and physical principles underlying grape and wine production as well as practical knowledge of grape growing (viticulture) and wine making (enology). This program provides the knowledge base for problem-solving and decision-making in commercial grape and wine production.

**Preparatory Requirements.** Before transferring into the Viticulture and Enology major, students must complete the following courses with a grade of C- or better and with a combined grade point average of at least 2.500 at the University of California (at least 3.000 for similar courses taken at community college) for these and all other preparatory courses. In addition, students' overall GPA must be 2.250 or higher. All courses must be taken for a letter grade.

Biological Sciences 1A	..... 5 units
Chemistry 2A, 2B, 2C, 8A	..... 17 units
Mathematics 16A	..... 3 units
Physics 1A, 1B or 7A	..... 4-6 units

**Recommendations.** Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into required upper division courses and may thus delay graduation. Some courses may be available at UC Davis during Summer Session.

Chemistry 8B	..... 4 units
Mathematics 16B	..... 3 units
Biological Sciences 1C	..... 5 units
Biological Sciences 102	..... 3 units

**The Program.** The curriculum builds upon a foundation of biology, chemistry, biochemistry and mathematics with specialized courses related to grape and wine production. To complete the program, students may choose to place particular emphasis on viticulture, enology or economics. Credit may also be earned for foreign language study and internships.

**Career Alternatives.** Graduates are qualified for a variety of vineyard and winery positions, including production management, quality control and research. Additionally they may work in related fields such as pest management, nursery production and analytical services.

**B.S. Major Requirements:**

UNITS

**English Composition Requirement** ..... 0-8

See College requirement..... 0-8

**Breadth/General Education**..... 24

See General Education requirement.

**Preparatory Subject Matter.....41-51**

Biological Sciences 1A, 1C.....	10
Chemistry 2A-2B-2C.....	15
Chemistry 8A, 8B.....	6
Agricultural Management and Rangeland Resources 21 or equivalent and adviser approval.....	0-3
Mathematics 16A-16B.....	6
Physics 1A, 1B or 7A.....	4-6
Viticulture and Enology 2, 3 or equivalent and adviser approval.....	0-5

**Depth Subject Matter ..... 53-54**

Biological Sciences 102, 103.....	6
Microbiology 102, 102L.....	7
Agricultural Management and Rangeland Resources 120 or Statistics 100 or 106.....	4
Viticulture and Enology 101A, 101B, 101C, 110, 118.....	15
Viticulture and Enology 123, 124, 125, 126, 128, 135 and in consultation with the adviser, choose 3 of the following courses: 123L, 124L, 125L, 126L, 128L. If more than 3 are taken, the extra courses will count as restricted electives in Area B.....	21-22

**Restricted Electives..... 28**

In consultation with adviser, choose 28 units from three of the following five areas. At least 12 units must be from one of the following areas: (A) Plant Science, (B) Food Science and Microbiology, or (C) Economics and Business.

(A) *Plant Science area:* Applied Biological Systems Technology 142, 145, 147, 175, 180, Atmospheric Science 133, Biological Sciences 101, Entomology 110, Hydrologic Science 110, 117, 124, Molecular and Cellular Biology 126, Nematology 100, Plant Biology 111, 112, 123, 142, 143, 146, 154, 157, 158, 160, 171, 172, 172L, 176, Plant Pathology 120, Soil Science 100, 102, 109, 118, Viticulture and Enology 111.

(B) *Food Science and Microbiology area:* Biological Sciences 101, Food Science and Technology 102A, 102B, 104, 104L, 108, 109, 110A, 110B, 127, Microbiology 140, 150, 155L, Viticulture and Enology 140.

(C) *Economics and Business area:* Agricultural and Resource Economics 100A, 112, 113, 118, 130, 140, 150, Economics 1A, 1B, Management 11A, 11B, Viticulture and Enology 111, 130

(D) *Language area:* Maximum 12 units, not counting course 1, of one of the following languages: French, German, Italian, Portuguese or Spanish. At least one course must be Intermediate or Conversational; qualifying Intermediate or Conversational courses are listed below:  
French 8, 21, 22, 23, 38, German 6, 11, 20, 21, 22, Italian 4, 5, Spanish 8, 21, 22, 28, 31, 32, 33.

Courses taught in English will not count as restricted electives in this major.

(E) *Internship area:* A maximum of 8 units of Viticulture and Enology 190X, 192, 198, 199, 290 or 298 may be counted as restricted electives by prior arrangement with adviser. May be increased to 12 units in exceptional circumstances.

**Unrestricted Electives ..... 16-37****Total Units for the Degree ..... 180**

**Major Adviser.** M. Matthews

**Related Major Programs.** Food Science and Technology, Agricultural Management and Rangeland Resources, and Crop Science.

**Graduate Study.** Several graduate groups offer programs of study leading to advanced degrees in the fields of viticulture and enology. For the M.S. or Ph.D. degree see [Agricultural and Environmental Chemistry \(A Graduate Group\)](#), on page 123, [Engi-](#)

[neering: Chemical Engineering and Materials Science](#), on page 221, [Ecology \(A Graduate Group\)](#), on page 196, [Food Science \(A Graduate Group\)](#), on page 275, [Genetics \(A Graduate Group\)](#), on page 282, [Horticulture and Agronomy \(A Graduate Group\)](#), on page 301, [Microbiology \(A Graduate Group\)](#), on page 374, [Plant Biology \(A Graduate Group\)](#), on page 416, [Plant Pathology](#), on page 418, [Soils and Biogeochemistry \(A Graduate Group\)](#), on page 449, and [Viticulture and Enology \(A Graduate Group\)](#), on page 483.

**Courses in Viticulture and Enology (VEN)****Lower Division Courses****2. Introduction to Viticulture (2)**

Lecture—2 hours. Fundamental principles of biology and culture of the grapevine including taxonomy, morphology, physiology, distribution, domestication, utilization, propagation, production systems, harvesting, and storage and processing of grapes. Successful completion of the course should prepare students for upper division courses in viticulture.—I. (I.) Williams

**3. Introduction to Winemaking (3)**

Lecture—3 hours. Overview of the history of wine, viticulture, fermentation, winery operations, the physiology of wine consumption, wines produced in California and other major wine-producing regions and the sensory evaluation of wine. GE credit: SciEng or SocSci.—I, II, III. (I, II, III.) Heymann, Waterhouse, Adams

**90X. Lower Division Seminar (2)**

Seminar—1 hour; term paper (required)/discussion. Prerequisite: lower division standing and consent of instructor. Introduction to current issues surrounding wine and health as they relate to diet, nutrition, and toxicology. May not be repeated for credit. GE credit: Wrt.

**99. Special Study for Undergraduates (1-5) (P/NP grading only.)****Upper Division Courses****101A. Viticultural Practices (3)**

Lecture—1.5 hours; discussion/laboratory—3.5 hours. Prerequisite: course 2. Identification, cultivation, and use of the major wine, table, raisin, and rootstock cultivars. Includes practices specific to the fall such as fruit contracts, maturity sampling, harvesting, cover crops, and soil-pests. One field trip required.—I. (I.) Walker

**101B. Viticultural Practices (3)**

Lecture—1.5 hours; discussion/laboratory—3.5 hours. Prerequisite: course 2. Theory, principles, and practices of pruning and grapevine propagation. Plant materials and the certification process, weed control and weed identification, wood diseases, and frost protection. One field trip required.—II. (II.) Walker

**101C. Viticultural Practices (3)**

Lecture—1.5 hours; discussion/laboratory—3.5 hours. Prerequisite: course 2. Field oriented experience in the principles and practices of grapevine production, including vineyard establishment, vine training, trellising, canopy management practices, irrigation and water management, and methods of crop adjustment for improvement of fruit quality. One field trip required.—III. (III.) Smart

**110. Grapevine Growth and Physiology (3)**

Lecture—3 hours. Prerequisite: course 2. Botanical aspects including morphology and domestication will precede lectures covering flower development and energy budget concepts. Impact of physiological variables such as photosynthesis translocation, mineral nutrition, and water relations on fruit ripening and composition will be covered.—II. (II.) Matthews

**111. World Viticulture (3)**

Lecture—3 hours. Prerequisite: upper division standing. Study of the diversity of viticulture, both geographical and historical. History of grape growing

and its spread throughout the world will be covered, along with discussions of current viticultural practices in different parts of the world, including California.

**111L. Critical Evaluation of Wines of the World (1)**

Laboratory/discussion—3 hours. Prerequisite: course 111 (must be taken concurrently), course 125 with a grade of C or better. Critical analysis of wines produced in different parts of the world with emphasis on the relationship between sensory properties of the wines and factors associated with their place of origin. (P/NP grading only.)

**115. Raisin and Table Grape Production (2)**

Lecture—2 hours. Prerequisite: course 2. Overview of the raisin and table grape industries in California and other production areas of the world. Cultural practices associated with raisin and table grape production will also be discussed.—I. (I.) Williams

**118. Grapevine Pests, Diseases and Disorders (3)**

Lecture—3 hours. Prerequisite: course 2. Various pests and diseases of vineyards throughout California. Pest/disease identification and control methods (to include sampling techniques) also will be discussed. Integrated management approach to pest control methods will be emphasized.—I. (I.) Williams

**123. Analysis of Musts and Wines (2)**

Lecture—2 hours. Prerequisite: Chemistry 2C and 8B or equivalent; Agricultural Management and Rangeland Resources 21 or equivalent. Students enrolled in the lecture only portion of the course will be required to enroll in 1 unit of course 199/299. Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking.—I. (I.) Ebeler

**123L. Analysis of Musts & Wines Laboratory (2)**

Lab—3 hours; independent study—3 hours. Prerequisite: Chemistry 2C and 8B, or equivalent, Agricultural Management and Rangeland Resources 21, and course 123 (course 123 may be taken concurrently). Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. Laboratory exercises demonstrating various chemical, physical and biochemical methods. Data will be analyzed and results interpreted in weekly lab reports; includes student-designed independent project and written report. Enrollment restricted to upper division and graduate students in Viticulture & Enology; others by approval of instructor. GE Credit: Wri.—I. (I.) Ebeler

**124. Wine Production (2)**

Lecture—2 hours. Prerequisite: course 3, 123 (may be taken concurrently), Biological Sciences 102. Principles and practices of making standard types of wines, with special reference to grape varieties used and methods of vinification.—I. (I.) Bisson

**124L. Wine Production Laboratory (3)**

Laboratory—3 hours; independent study—3 hours; term paper. Prerequisite: course 124 (may be taken concurrently). Restricted to undergraduate students in fermentation science, viticulture and enology, biotechnology, microbiology, food science and applied plant biology or graduate students in food science, agricultural and environmental chemistry and horticulture. Current technologies used in production of California table wines; analysis and monitoring of impact of fermentation variables on microbial performance and product quality; student-designed independent research project.—I. (I.) Bisson

**125. Wine Types and Sensory Evaluation (2)**

Lecture—2 hours. Prerequisite: course 124; Agricultural and Rangeland Management 120 or Statistics 100 or 106. Principles of sensory evaluation and application to wines. Factors influencing wine flavor, data from sensory analysis of model solutions—III. (III.) Heymann

**125L. Sensory Evaluation of Wine Laboratory (2)**

Laboratory—3 hours; term paper. Prerequisite: course 125 (may be taken concurrently). Restricted to upper division majors in fermentation science or viticulture and enology or graduate students in food science. Sensory evaluation of wines and model systems using discrimination tests, ranking, descriptive analysis and time-intensity analysis. Data analyzed by appropriate statistical tests and results interpreted in extensive weekly lab reports.—III. (III.) Heymann

**126. Wine Stability (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: course 124. Restricted to students in viticulture and enology, fermentation science, applied plant biology majors, or graduate students in food science, microbiology, horticulture, and horticulture and agronomy. Principles of equilibria and rates of physical and chemical reactions in wines; treatment of unstable components in wines by absorption, ion exchange, refrigeration, filtration, and membrane processes; and protein, polysaccharide, tartrate, oxidative, and color stabilities.—II. (II.) Boulton

**126L. Wine Stability Laboratory (2)**

Laboratory—3 hours; independent study—3 hours. Prerequisite: course 126 (may be taken concurrently). Restricted to upper division fermentation science, viticulture and enology majors, or graduate students in food science, agricultural and environmental chemistry, microbiology or by consent of instructor. Practical application of principles of equilibria and rates of physical and chemical reactions to wine stability.—II. (II.) Boulton

**128. Wine Microbiology (2)**

Lecture—2 hours. Prerequisite: courses 123 and 124; Microbiology 102 and 102L, or Food Science and Technology 104 and 104L; courses 125 and 126 recommended. Nature, development, physiology, biochemistry, and control of yeasts and bacteria involved in the making, aging and spoilage of wine.—II. (II.) Mills

**128L. Wine Microbiology Laboratory (2)**

Laboratory—6 hours. Prerequisite: course 123, 124, and 128 (may be taken concurrently), Microbiology 102L or Food Science and Technology 104 and 104L; course 125 and 126 recommended. Restricted to upper division students in fermentation science, viticulture and enology or graduate students in food science. Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine.—II. (II.) Mills

**130. Management, Marketing, and Economics of the California Wine Industry (9)**

Lecture—24 hours; lecture/discussion—4 hours; fieldwork—8 hours. Prerequisite: course 124. Introduction to management, marketing and economics of wine in the United States with particular emphasis on California. Reviews market segmentation and explores alternative strategies for grape acquisition, production, brand development, distribution, and social policy formation. GE credit: Wrt.

**135. Wine Technology and Winery Systems (5)**

Lecture—3 hours; discussion/laboratory—2 hours. Prerequisite: course 124. Process technologies and process systems that are used in modern commercial wineries. Lectures, demonstrations, problem solving sessions, and possible field trips. Includes grape preparation and fermentation equipment; post-fermentation processing equipment; winery utilities, cleaning systems, and waste treatment.—III. (III.) Block

**140. Distilled Beverage Technology (3)**

Lecture—3 hours. Prerequisite: Chemistry 8B; Food Science and Technology 110A. Distillation principles and practices; production technology of brandy, whiskey, rum, vodka, gin, and other distilled beverages; characteristics of raw materials, fermentation, distillation, and aging. Offered in alternate years.—(III.) Boulton

**181. Readings in Enology (1)**

Discussion—1 hour. Prerequisite: course 3. Critical evaluation of selected monographs in enology. Discussion leadership rotates among the students. May be repeated three times for credit. (P/NP grading only.)—III. (III.) Matthews

**186. Fermentation Science (3)**

Lecture—3 hours. Prerequisite: Microbiology 102, Biological Sciences 101. Basic principles of fermentation science and biotechnology with emphasis on industrial fermentation processes that generate useful products including fermented food and beverages, pharmaceuticals, fine chemicals, and other gene products.

**190X. Winemaking Seminar (1)**

Seminar—1 hour; discussion—1 hour. Prerequisite: course 3. Open to Viticulture and Enology majors and graduate students. Outside speakers on a specific winemaking topic chosen for the quarter. Discussion with the speaker hosted by the faculty member(s) in charge. May be repeated for credit up to 3 times. (P/NP grading only.)—III. (III.)

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a member of the department or major faculty, but are arranged by the student. (P/NP grading only.)

**198. Directed Group Study (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****200. Introduction to Scientific Methods (2)**

Lecture/discussion—1 hour; term paper. Prerequisite: graduate standing or consent of instructor. Processes involved in conducting scientific research. Topics include conducting literature review, formulating hypotheses, and analyzing and reporting results. Annotated bibliography and written and oral research proposal.

**210. Grape Development and Composition (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 102, 103. The anatomy, physiology and biochemistry of grape berry development, with emphasis on the development of grape composition relevant to winemaking. Offered in alternate years.—III. Adams, Polito

**215. Sensometrics (3)**

Lecture—3 hours. Prerequisite: Food Science and Technology 117 or the equivalent, course 125 and 125L or Food Science and Technology 107A or 107B. Experimental design and statistical analysis, including multivariate analysis, for both sensory and instrumental data in enology and food-related studies.—I. (I.) Heymann

**216. Vineyard Establishment and Development (4)**

Lecture/discussion—3 hours; fieldwork—3 hours; term paper. Prerequisite: courses 101A, 101B, 101C, and one of courses 115 or 116, and course 118 or consent of instructor; course 110, Soil Science 100, Atmospheric Science 133 and Agricultural and Resource Economics 140 recommended. Application of plant, meteorological, soil, water, and economic sciences to vineyard establishment and development. Preparation of a comprehensive study to determine the viticultural and economic feasibility of a given site for raisin, table, or wine grape production.—I. (I.) Smart

**219. Natural Products of Wine (3)**

Lecture—3 hours. Prerequisite: courses 123 and 124, or natural products background and consent of instructor. Structure, occurrence, and changes due to wine production to the natural products found in wine. Chemicals with a sensory impact will be emphasized, including flavonoids and other pheno-

lics, terpenes and norisoprenoids, pyrazines, oak volatiles and other wine constituents.—I. (I.) Waterhouse

**220. Secondary Nutrients, Chemistry (3)**

Lecture—2 hours; discussion—1 hour. Prerequisite: Chemistry 8B, Biological Sciences 102. Introduction to phytochemicals with possible health or nutritional effects, with a focus on chemical structure, reactivity and occurrence in foods, including phenolics, glucosinylates, carotenoids and fiber. Students will give oral reports.

**223. Instrumental Analysis of Must and Wine (4)**

Lecture—2 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 123 or Food Science and Technology 103; Biological Sciences 102, Chemistry 107B or 115 recommended. Open to upper division students in Fermentation Science, Viticulture and Enology, or graduate students in Food Science, Agricultural and Environmental Chemistry or Viticulture and Enology. Theory and practice of instrumental analysis of wines and musts. Emphasis on the principles of analytical techniques (e.g., CE, GC, HPLC, Mass Spectrometry) and factors determining correct choice of instrumental method.—III. (III.) Ebeler

**224. Advances in the Science of Winemaking (3)**

Lecture—3 hours. Prerequisite: course 125, 126 and graduate standing or consent of instructor. Selected topics in the science and technology of winemaking. Topics drawn from current research of participating faculty. Critical analysis of the technical content of published material.—III. (III.)

**225. Advanced Sensory Analysis of Wines (3)**

Lecture/discussion—2 hours; laboratory—4 hours. Prerequisite: courses 124 and 125 (or Food Science and Technology 107) and Agricultural Management and Rangeland Resources 120 or the equivalent. Sensory descriptive analysis experiments will be designed and conducted using standard sensory science methods. Data will be analyzed by analyses of variance, principal component analyses and generalized Procrustes analysis to evaluate the judge's performance and interpret the significance of the results.—(III.) Heymann

**235. Winery Design (4)**

Lecture—2 hours; discussion—1 hour; independent study. Prerequisite: course 124, 135 or consent of instructor. Design of wineries. Includes process calculations, equipment selection, process layout and building choice and siting. Project scheduling, capital costs, and ten-year cash flow analysis for the winery. One field trip required. Offered in alternate years.—II. Boulton

**270. Critical Evaluation of Scientific Literature (2)**

Discussion—2 hours. Prerequisite: consent of instructor. Contemporary research topics in biological sciences. Discussion of recent research articles in a special topic area. Intended to develop skills in critical evaluation of scientific publications. May be repeated for credit. (S/U grading only.)—II, III. (II, III.) Bisson

**290. Seminar (1)**

Seminar—1 hour. Prerequisite: consent of instructor. (S/U grading only.)—I, III. (I, III.)

**290C. Advanced Research Conference (1)**

Discussion—1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Advanced Viticulture (2)**

Lecture/discussion—2 hours. Prerequisite: course 110, 116, 124, 125; course 210 recommended. Critical evaluation of scientific and popular literature on selected topics of current interest that relate viticulture and enology.

culture to fruit or wine sensory attributes or quality. May be repeated once for credit. Offered in alternate years.—(II.) Matthews

### 297T. Tutoring in Viticulture and Enology (1-5)

Prerequisite: graduate standing and consent of instructor. Designed for graduate students who desire teaching experience, but are not teaching assistants. Student contact primarily in laboratory or discussion sections, and under direction of a faculty member. (S/U grading only.)

### 298. Group Study (1-5)

(S/U grading only.)

### 299. Research (1-12)

(S/U grading only.)

## Professional Course

### 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) I, II, III. (I, II, III.)

## Viticulture and Enology (A Graduate Group)

Susan E. Ebeler, Ph.D., Chairperson of the Group

Research, Plant Pathologist/Immunologist  
(*Viticulture and Enology*)  
James A. Wolpert, Ph.D., Cooperative Extension Viti-  
culture Specialist (*Viticulture and Enology*)

**Graduate Study.** The M.S. program offers advanced studies in viticulture and enology, ranging from the genetics, physiology and biochemistry of

grapevines to the chemistry, microbiology and sensory science of wines and the chemical engineering of winemaking. Graduate students will usually work on a project that requires at least two of these fields of science and may involve grapevines, grapes, and wine or wine distillates. Topics can vary; examples include the molecular biology of grapevines, bacteria or yeast, the grape and wine chemistry associated with fermentation and aging and the correlation of analytical and sensory analyses. All application material must be received in the Group office by January 15.

Ph.D. studies are offered through one of the following Graduate Groups: Agricultural and Environmental Chemistry, Chemical Engineering, Food Science, Horticulture and Agronomy, Genetics, Microbiology, and Plant Biology.

**Preparation.** Applicants to the program are required to have a level of competence equivalent to that of a strong science undergraduate program. This includes coursework in biology, general chemistry, organic chemistry, calculus, statistics (analysis of variance), biochemistry, and microbiology. Specific requirements are outlined in detail and may be obtained from the Group office or see <http://wineserver.ucdavis.edu>.

**Graduate Advisers.** H. Heymann, D.A. Mills

## War–Peace Studies

(College of Letters and Science)

The interdisciplinary minor in War–Peace Studies examines the causes and dynamics of intra- and international wars and efforts to prevent and settle such conflicts.

Students in the minor are encouraged to participate in the educational activities of the Davis Program of the UC Institute on Global Conflict and Cooperation (IGCC).

The minor is sponsored by the International Relations Program.

### Minor Program Requirements:

UNITS

#### War–Peace Studies..... 19-20

One or two courses from each of the following areas:

*Approaches:* Anthropology 123AN, 126B, Comparative Literature 157, Philosophy 115, 118, Physics 137/Applied Science Engineering 137, Political Science 121, 123, 124, 132, 176, Sociology 119, 157, Women's Studies 102  
*Northern and Western Regions:* History 134A, 138C, 142A, 143, 144A, 144B, 145, 170B, 171B, 174B, Native American Studies 130B, Political Science 130, 131  
*Southern and Eastern Regions:* Anthropology 142, 143A, 143B, 144, History 165, 191F, 194C, Native American Studies 120, Political Science 126, 134, 145, 149, 178

**Restriction.** No more than two courses from a single department may be offered in satisfaction of the minor requirements.

**Advising.** International Relations Program  
(530) 752-3063

## Water Science

See **Hydrologic Sciences (A Graduate Group)**, on page 306; **Hydrology**, on page 308; and **Soil and Water Science**, on page 449.

## Wildlife, Fish, and Conservation Biology

(College of Agricultural and Environmental Sciences)

Dirk H. Van Vuren, Ph.D., Chairperson of the Department

**Department Office.** 1088 Academic Surge  
(530) 752-6586; <http://wfcb.ucdavis.edu>

### Faculty

Daniel W. Anderson, Ph.D., Professor  
Louis W. Botsford, Ph.D., Professor  
Tim Caro, Ph.D., Professor  
Joseph J. Cech, Jr., Ph.D., Professor  
John M. Eadie, Ph.D., Professor  
Deborah L. Elliott-Fisk, Ph.D., Professor

A. Peter Klimley, Ph.D., Associate Adjunct Professor  
Peter B. Moyle, Ph.D., Professor  
Dirk H. Van Vuren, Ph.D., Professor  
Rosie Woodroffe, Ph.D., Associate Professor

### Emeriti Faculty

Ronald E. Cole, B.S., Lecturer Emeritus  
Don C. Erman, Ph.D., Professor Emeritus  
Nancy A. Erman, M.S., Lecturer Emerita  
E. Lee Fitzhugh, Ph.D., Specialist in Cooperative Extension, Emeritus  
Walter E. Howard, Ph.D., Professor Emeritus  
Nadine K. Jacobsen, Ph.D., Professor Emerita  
Rex E. Marsh, A.B., Lecturer Emeritus

### Affiliated Faculty

Christopher M. Dewees, Ph.D., Specialist in Cooperative Extension, Lecturer  
Andrew Engilis, Jr., B.S., Principal Museum Scientist  
Terrell P. Salmon, Ph.D., Specialist in Cooperative Extension  
Lisa C. Thompson, Ph.D., Assistant Specialist in Cooperative Extension

### The Major Program

The Wildlife, Fish, and Conservation Biology major deals with the relationships between the requirements of wildlife and the needs of people. Understanding these relationships is vital for the maintenance of ecological diversity, recreational resources, and food supplies. Students completing the major possess a broad knowledge of ecology and natural history, but with the quantitative skills to use this knowledge in critical thinking and decision-making.

**The Program.** The major emphasizes broad training in biological and physical sciences, with specialization in one of nine areas. The major is primarily for students interested in becoming professionals in the diverse fields of wildlife, fish, and conservation biology. The breadth of course requirements, when combined with electives, make this an excellent preparatory major for such areas as veterinary medicine and secondary school teaching. Certification by professional societies such as The Wildlife Society, American Fisheries Society, or the Ecological Society of America or preparation for specialized resource-related graduate studies may also be achieved by careful planning of electives with a faculty adviser.

**Career Alternatives.** The major prepares students to excel in the dynamic fields of environmental and conservation biology emphasizing vertebrate animals in their natural environments, as well as resolution of conflicts between humans and wild animals. Positions now held by graduates in this major include wildlife biology, fisheries biology, wildlife damage management, and resource biologists and managers with local, state and federal agencies. Some graduates are biologists or consultants with private industries such as environmental consulting firms, commercial fishing businesses, electrical utilities, sportsman's clubs, and aquaculture operations, while others are veterinarians, medical physicians,

and professors/researchers who teach and/or conduct research in academic institutions.

**B.S. Major Requirements:**

UNITS  
**Written/Oral Expression..... 8**

- University Writing Program 1 ..... 4
- Communication 1 ..... 4
- Above requirements simultaneously satisfy the College requirements.

**Preparatory Subject Matter ..... 47-53**

- Biological Sciences 1A, 1B, 1C ..... 15
- Chemistry 2A, 2B, 8A, 8B..... 16
- Mathematics 16A, 16B ..... 6
- Physics 1A, 1B or 7A, 7B, 7C ..... 6-12
- Statistics 100, 102, or Agricultural Management and Rangeland Resources 120 ..... 4

**Breadth/General Education ..... 6-24**

Satisfaction of General Education requirement.

**Depth Subject Matter ..... 49-61**

- Students graduating with this major are required to attain at least a C average (2.000) in all courses taken at the university in depth subject matter.
- Environmental Science and Policy 100 or Evolution and Ecology 101 ..... 4
- Evolution and Ecology 100 ..... 4
- Biological Sciences 101 ..... 4
- Neurobiology, Physiology, and Behavior 101 ..... 5
- Anatomy, Physiology and Cell Biology 100 or Evolution and Ecology 105 ..... 3-4
- Choose three lecture courses and two (laboratory) courses from Wildlife, Fish, and Conservation Biology 110, (110L), 111, (111L), 120, (120L), or Evolution and Ecology 134, (134L) ..... 12-13
- Wildlife, Fish, and Conservation Biology 122 and Neurobiology, Physiology, and Behavior 102, and either Wildlife, Fish, and Conservation Biology 121 or 130 ..... 11-12
- Choose one course (two recommended) from Statistics 104, 106 or 108 ..... 3-8
- Wildlife, Fish, and Conservation Biology 100, or 101 and 101L, or 102 and 102L ..... 3-7

**Restricted Electives ..... 9-34**

Choose one from the nine Areas of Specialization shown below. Students must maintain a C average (2.000 GPA) and pass all course work in their chosen specialization.

**Areas of Specialization**

- (1) *Behavioral Ecology*: Complete Wildlife, Fish, and Conservation Biology 141. Choose one course from Neurobiology, Physiology, and Behavior 150 or Entomology 104. Choose two courses from Animal Science 103, 104, 105, Anthropology 101, 122A, 128A, 154A, 154B, Neurobiology, Physiology, and Behavior 152, 159, 162, Psychology 127, or Wildlife, Fish, and Conservation Biology 151.
- (2) *Conservation Biology*: Complete Wildlife, Fish, and Conservation Biology 154 and 155. Choose one course from Environmental Science and Policy 161, 166, 170, or 171. Choose one course from a or b:  
 (a) Plant Biology 117, Environmental Horticulture 160, Evolution and Ecology 117, 147, or Wildlife, Fish, and Conservation Biology 156;  
 (b) Evolution and Ecology 115, 138, or Wildlife, Fish, and Conservation Biology 157, 158.
- (3) *Ecotoxicology and Disease Ecology*: Complete Wildlife, Fish, and Conservation Biology 153, 158, and either Biological

- Sciences 102, 103, or Animal Biology 102, 103. Choose one course from a or b:  
 (a) Environmental Toxicology 101, 112A (112B recommended), or 138;  
 (b) Pathology, Microbiology, and Immunology 101, Medical Microbiology 115 or 116.
- (4) *Fisheries Biology*: Complete Wildlife, Fish, and Conservation Biology 102, 102L, 120, 120L, and 121. Complete one of the following options:  
 Option 1: Environmental Science and Policy 116 or Evolution and Ecology 115; complete the Bodega Marine Lab Spring Quarter Program.  
 Option 2: Biological Sciences 102, 103, or Animal Biology 102, 103; complete one course from a and one course from b:  
 (a) Entomology 116, Evolution and Ecology 112-112L, or Environmental Science and Policy 151L;  
 (b) Environmental Science and Policy 116, 151, Evolution and Ecology 115, Geology 175, Hydrologic Science 122, or Wildlife, Fish, and Conservation Biology 157.  
 Option 3: Complete one course from Entomology 116, Evolution and Ecology 112-112L or Environmental Science and Policy 151L. Choose four courses from Environmental and Resource Sciences 100, Environmental Science and Policy 116, 151, Evolution and Ecology 115, Geology 175, Hydrologic Science 122, 143, or Wildlife, Fish, and Conservation Biology 157.
- (5) *Physiological Ecology*: Complete Wildlife, Fish, and Conservation Biology 121 and 130 and either Biological Sciences 102, 103 or Animal Biology 102, 103. Choose two courses from Neurobiology, Physiology, and Behavior 126, 127, 128, 140, or 141.
- (6) *Wildlife Damage Management*: Complete Wildlife, Fish, and Conservation Biology 152, Agricultural Management and Rangeland Resources 105, Evolution and Ecology 104, and choose one course from Nature and Culture 140 or Veterinary Medicine 170.
- (7) *Wildlife Biology*: Complete Wildlife, Fish, and Conservation Biology 100 or 101-101L, Wildlife, Fish, and Conservation Biology 151, and two courses from Evolution and Ecology 134L or Wildlife, Fish, and Conservation Biology 110L or 111L; and  
 (a) Choose one course from Plant Biology 102, 108, 117, 144, 147, 178, or Evolution and Ecology 117; and  
 (b) Choose one course from Agricultural Management and Rangeland Resources 130, Environmental Science and Policy 155, Environmental Horticulture 160, Wildlife, Fish, and Conservation Biology 155, 156, or 157; and  
 (c) Choose two courses from Environmental Science and Policy 121, Wildlife, Fish, and Conservation Biology 136, 152, 153, 154, or 158.
- (8) *Population Dynamics*: Mathematics 16C (17A-17B-17C or 21A-21B-21C recommended), Statistics 108, Environmental Science and Policy 121, Engineering 6, and one additional upper division statistics course beyond the Depth Subject Matter requirement (e.g. Statistics 104, 106; note that Statistics 100, 102 do not fulfill this requirement).
- (9) *Individualized*: Students may, with prior approval of their adviser and the curriculum committee, design their own individualized specialization within the major. The specialization will consist of four-six courses with a common theme.

**Unrestricted Electives ..... 0-62**

**Total Units for the Degree (minimum) .. 180**

**Major Adviser.** D. W. Anderson

Students transferring to Davis from another institution or new students declaring the major of Wildlife, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. See the receptionist in 1088 Academic Surge Building or telephone (530) 752-6586.

**Minor Program Requirements:**

The minor in Wildlife, Fish, and Conservation Biology is for students interested in basic training and understanding of the ecology and conservation of wild terrestrial and aquatic vertebrates, emphasizing birds, mammals, and fish, but with relevance and application to all life forms.

UNITS

**Wildlife, Fish, and Conservation**

**Biology ..... 21-30**

- Wildlife, Fish, and Conservation Biology 100, 151, either 154 or 155, and choose one course from 110, 111, or 120 ..... 15
- Two to four upper division elective courses chosen from the Wildlife, Fish, and Conservation Biology curriculum, excluding WFC 190, 191, 192, 195, 198, and 199 ..... 5-16

**Minor Adviser.** D. W. Anderson

**Graduate Study.** Faculty in Wildlife, Fish, and Conservation Biology are active members of several graduate programs, including the Ecology, Population Biology, and Animal Behavior graduate groups. Students interested in graduate studies should see [Graduate Studies](#), on page 97, in this catalog.

**Courses in Wildlife, Fish, and Conservation Biology (WFC)**

**Lower Division Courses**

**10. Wildlife Ecology and Conservation (4)**

Lecture—3 hours; discussion—1 hour. Introduction to the ecology and conservation of vertebrates. Complexity and severity of world problems in conserving biological diversity. GE credit: SciEng, Div, Wrt.—I. (I.) Moyle, Kelt

**11. Introduction to Conservation Biology (3)**

Lecture—3 hours. Introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats for students with no background in biological sciences. GE credit: SciEng, Wrt.—III. (III.) Caro

**92. Internship (1-6)**

Internship—3-18 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

**Upper Division Courses**

**100. Field Methods in Wildlife, Fish, and Conservation Biology (4)**

Lecture—2 hours; laboratory—3 hours; fieldwork—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 and consent of instructor. Introduction to field methods for monitoring and studying wild vertebrates and their habitats, with an emphasis on ecology and conservation. Required weekend field trips.—III. (III.) Anderson, Eadie, Kelt, Van Vuren

**101. Field Research in Wildlife Ecology (2)**

Lecture/discussion—2 hours. Prerequisite: one upper division course in each of ecology, statistics, and ornithology, mammology, or herpetology and consent of instructor. Field research in ecology of wild vertebrates in terrestrial environments; formulation of testable hypotheses, study design, introduction to research methodology, oral and written presentation of results. Limited enrollment. Offered in alternate years. GE credit: Wrt.—I. Anderson, Eadie, Kelt, Van Vuren

**101L. Field Research in Wildlife Ecology: Laboratory (4)**

Lecture/discussion—2 hours; field work—15 hours. Prerequisite: consent of instructor, course 101 (may be taken concurrently), and one upper division course in each of ecology, statistics, and ornithology, mammalogy, or herpetology. Field research in ecology of wild vertebrates in terrestrial environments; testing ecological hypotheses through field research, application of research methodology, supervised independent research projects. Held between Labor Day and fall quarter. Limited enrollment. Offered in alternate years.—I. Anderson, Eadie, Kelt, Van Vuren

**102. Field Studies in Fish Biology (1)**

Lecture/discussion—1 hour. Prerequisite: upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Emphasis on theory of quantitative fish capture methods and design of individual research projects on ecology, behavior, physiology or population biology of fishes. Offered in alternate years.—III. Moyle, Cech

**102L. Field Studies in Fish Biology: Laboratory (6)**

Fieldwork—15 hours; laboratory—12 hours; discussion/laboratory—3 hours. Prerequisite: course 102, upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Field investigations of fish biology are emphasized including quantitative capture methods and individual research projects on ecology, behavior, physiology or population biology of fishes at the field site in relation to their habitats. Offered in alternate years. (Deferred grading only, pending completion of projects.) GE credit: SciEng, Wrt.—III. Moyle, Cech

**110. Biology and Conservation of Wild Mammals (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, Evolution and Ecology 101 or Environmental Science and Policy 100. Origins, evolution, diversification, and geographical and ecological distributions of mammals. Morphological, physiological, reproductive, and behavioral adaptations of mammals to their environment.—III. (III.) Kelt

**110L. Laboratory in Biology and Conservation of Wild Mammals (2)**

Laboratory—6 hours. Prerequisite: course 110 (may be taken concurrently) and consent of instructor. Laboratory exercises in the morphology, systematics, species identification, anatomy, and adaptations of wild mammals to different habitats. Limited enrollment.—III. (III.) Kelt

**111. Biology and Conservation of Wild Birds (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, and Evolution and Ecology 101. Phylogeny, distribution, migration, reproduction, population dynamics, behavior and physiological ecology of wild birds. Emphasis on adaptations to environments, species interactions, management, and conservation.—I. (I.) Anderson, Eadie

**111L. Laboratory in Biology and Conservation of Wild Birds (2)**

Laboratory—6 hours. Prerequisite: course 111 (may be taken concurrently); consent of instructor. Laboratory exercises in bird species identification, anatomy, molts, age and sex, specialized adaptations, behavior, research, with emphasis on conservation of wild birds. Limited enrollment.—I. (I.) Anderson, Eadie

**120. Biology and Conservation of Fishes (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1B. Evolution, ecology, and conservation of marine and freshwater fishes.—I. (I.) Moyle

**120L. Laboratory in Biology and Conservation of Fishes (1)**

Laboratory—3 hours. Prerequisite: course 120 (may be taken concurrently). Morphology, taxonomy, conservation, and identification of marine and freshwater fishes with emphasis on California species. Limited enrollment.—I. (I.) Moyle

**121. Physiology of Fishes (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: upper division courses in nutrition and physiology or consent of instructor. Comparative physiology, growth, reproduction, behavior, and energy relations of fishes. GE credit: SciEng, Wrt.—II. (II.) Cech

**122. Population Dynamics and Estimation (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mathematics 16A-16B; Statistics 13 or the equivalent; an upper division course in ecology. Description of bird, mammal and fish population dynamics, modeling philosophy, techniques for estimation of animal abundance (e.g., mark-recapture, change-in-ratio, etc.), mathematical models of populations (e.g., Leslie matrix, logistic, dynamic pool, stock-recruitment); case histories.—III. (III.) Botsford

**130. Physiological Ecology of Wildlife (4)**

Lecture—4 hours. Prerequisite: course 110, 111, or 120; Neurobiology, Physiology, and Behavior 101; and Evolution and Ecology 101. Animal functions, adaptations, and ecological energetics of wildlife. Nutrition, metabolism, and productivity are emphasized as a pattern of relationships for understanding the distribution and abundance of wild ectotherms and endotherms in time and space. Not offered every year.—II. (II.)

**136. Ecology of Waterfowl and Game Birds (3)**

Lecture—2 hours; laboratory—3 hours; field trip. Prerequisite: courses 111 and 111L or the equivalent. Detailed examination of distribution, behavior, population dynamics, and management of waterfowl and upland game birds. Offered in alternate years.—(II.) Eadie

**141. Behavioral Ecology (4)**

Lecture—3 hours; film viewing—1 hour. Prerequisite: Evolution and Ecology 101. Basic theories underlying the functional and evolutionary significance of behavior, and the role of ecological constraints. Supporting empirical evidence taken mainly from studies of wild vertebrates. Offered in alternate years.—(II.) Caro

**151. Wildlife Ecology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences, 1A, 1B, 1C or the equivalents; course 110L or 111L recommended. Ecology of wild vertebrates, including habitat selection, spatial organization, demography, population growth and regulation, competition, predation, and community dynamics, set in the context of human-caused degradation of environments in North America.—I. (I.) Van Vuren

**152. Ecological Management of Problem Wildlife (3)**

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, and 1C, or the equivalent. Ecological approaches to managing wild vertebrates that cause problems for agriculture, public health, or conservation of biodiversity. Offered in alternate years.—II. Van Vuren

**153. Wildlife Ecotoxicology (4)**

Lecture—3 hours; discussion—1 hour. Prerequisite: introductory courses in organic chemistry, ecology, and physiology, or consent of instructor; Environmental Toxicology 101 recommended. Various forms of environmental pollution in relation to fish and wildlife, the effects and mechanisms of pollutants, effects on individuals and systems, laboratory and field ecotoxicology, examples/case histories, philosophical/management considerations. Offered in alternate years. GE credit: SciEng, Wrt.—II. Anderson

**154. Conservation Biology (4)**

Lecture—3 hours; term paper (will be one or more book reviews). Prerequisite: Evolution and Ecology 101 or Environmental Studies 100 or the equivalent. An introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats.—I. (I.) Woodroffe

**155. Habitat Conservation and Restoration (4)**

Lecture—3 hours; laboratory—3 hours. Prerequisite: introductory ecology course; course 154 and Environmental Horticulture 160 recommended. Analysis of the characteristics of wildlife and fish habitats, the conservation of habitats, and restoration. GE credit: SciEng, Wrt.—I. (II.) Elliott-Fisk

**156. Plant Geography (4)**

Lecture—3 hours; laboratory—3 hours; term paper. Field trips will be substituted for some in-lab activities. Prerequisite: Environmental Science and Policy 100 or Evolution and Ecology 101; Plant Biology 102 or 108 strongly recommended. Survey of the geographical distribution of vegetation types and habitats, with consideration of the environmental and historical factors that determine these patterns. Conservation and management approaches. Analytical field and lab techniques introduced. Offered in alternate years. GE credit: SciEng, Wrt.—II. Elliott-Fisk

**157. Coastal Ecosystems (4)**

Lecture—3 hours; laboratory/fieldwork—3 hours. Prerequisite: Environmental Studies 100 or Evolution and Ecology 101; course work in organismal biology, physical geography, and geology recommended. Overview of coastal ecosystems, physical and biological elements and processes, and coastal zone dynamics, including sandy, rocky and muddy shorelines, estuaries, dunes and coastal watersheds. Discussion of the role of historical factors and conservation, restoration, and management approaches. Not offered every year.—(II.) Elliott-Fisk

**158. Infectious Disease in Ecology and Conservation (3)**

Lecture—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or Veterinary Medicine 409 or the equivalent. Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and their applications. Role of scientists in developing disease control policies. Offered in alternate years.—III. Woodroffe

**190. Departmental Research Seminar (1)**

Seminar—1 hour. Prerequisite: upper division standing in the biological sciences. Reports and discussions of recent advances related to wildlife and fisheries biology. May be repeated for credit up to 3 times. (P/NP grading only.)—I, II, III.

**191. Museum Science (2)**

Lecture—1 hour; laboratory—3 hours. Prerequisite: upper division standing and consent of instructor. Principles and methods required to preserve and present biological specimens for research, teaching collections, and museums. Offered in alternate years. (P/NP grading only.)—II. Engilis

**192. Internship (1-12)**

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

**195. Field and Laboratory Research (3)**

Laboratory—6 hours; discussion—1 hour. Prerequisite: course 110L, 111L, or 120L; 121 or 130; Evolution and Ecology 101 or the equivalent; and consent of instructor. Critique and practice of research methods applied to field and/or laboratory environments of wild vertebrates. Students work independently or in small groups to design experimental protocol, analyze data, and report their findings. May be repeated twice for credit.—I, II, III. (I, II, III.)

**197T. Tutoring in Wildlife and Fisheries (1-5)**

Prerequisite: major in Wildlife, Fish, and Conservation Biology and consent of instructor. Experience in teaching under guidance of faculty member. (P/NP grading only.)

**198. Directed Group Study (1-5)**

(P/NP grading only.)

**199. Special Study for Advanced Undergraduates (1-5)**

(P/NP grading only.)

**Graduate Courses****222. Advanced Population Dynamics (3)**

Lecture—3 hours. Prerequisite: graduate standing; advanced course in ecology (e.g., Evolution and Ecology 101), population dynamics (e.g., course 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended. Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research. Not offered every year.—II. (II.) Botsford

**223. Conservation Biology and Animal Behavior (3)**

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Ecology 208 or Animal Behavior 221. Influences of concepts of animal behavior (functional, evolutionary, developmental, mechanistic, and methodological issues) on conservation biology theory and practice. Offered in alternate years. (III.)—Caro

**290. Seminar (1-3)**

Seminar—1-3 hours. Prerequisite: consent of instructor. Seminar devoted to a highly specific research topic in any area of wildlife or fisheries biology. Special topic selected for a quarter will vary depending on interests of instructor and students. (S/U grading only.)—I, II, III. (I, II, III.)

**290C. Research Group Conference (1)**

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress and techniques in wildlife and fishery sciences. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**291. Seminar in Aquatic Ecology (2)**

Seminar—2 hours. Prerequisite: graduate standing in biology. Presentation and analysis of assigned topics in aquatic ecology emphasizing fish, fisheries and aquatic conservation. Offered in alternate years. (S/U grading only.)—III. (III.) Moyle

**292. Physiology of Fishes Seminar (1)**

Seminar—1 hour. Prerequisite: graduate standing and at least two courses in physiology; consent of instructor. Seminar devoted to current topics concerning the physiological functioning of fishes. May be repeated twice for credit. (S/U grading only.)—I. (I.) Cech

**294. Behavioral Ecology of Predators and Prey (3)**

Seminar—2 hours. Prerequisite: graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator prey interactions. May be repeated twice for credit. (Same course as Animal Behavior 294.) Offered in alternate years.—II. Caro

**295. Seminar in Wildlife Ecotoxicology (3)**

Seminar—2 hours; term paper. Prerequisite: graduate standing in biology. Presentation and analysis of assigned and searched research papers on transport, exposure, and effects of environmental contaminants on wildlife-associated ecosystem components, especially at individual/population levels. Specific subjects vary each offering. Offered in alternate years. (S/U grading only.)—II. Anderson

**297T. Supervised Teaching in Wildlife and Fisheries Biology (1-3)**

Tutorial—3-9 hours. Prerequisite: meet qualifications for teaching assistant; graduate standing; and consent of instructor. Tutoring and teaching students in undergraduate courses in Wildlife, Fish, and Conservation Biology. Weekly conferences with instructor; evaluations of teaching; preparing for and conducting demonstrations, laboratories, and discussions; preparing and grading examinations. May be repeated for a total of 6 units when a different course is tutored. (S/U grading only.)

**298. Group Study (1-5)****299. Research (1-12)**

(S/U grading only.)

Students transferring to UC Davis from another institution or new students declaring the major of Wildlife, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. See the receptionist in 1088 Academic Surge Building or telephone (530) 754-4323.

Susan Kaiser, Ph.D., Professor (Textiles and Clothing, Women and Gender Studies)

Anna K. Kuhn, Ph.D., Professor

Luz Mena, Ph.D., Assistant Professor

Kimberly D. Nettles, Ph.D., Assistant Professor

Judith Newton, Ph.D., Professor

Leslie Rabine, Ph.D., Professor

Juana Maria Rodriguez, Ph.D., Associate Professor

Margaret Swain, Ph.D., Associate Professor

**The Major Program**

Women's Studies is an interdisciplinary major founded on the premise that gender is a historically variable construction that centrally shapes the historical experience and everyday lives of women as well as men. Women's Studies also assumes that gender, race, class, sexual and national identities are constructed in relation to one another. The intersections of these categories of experience as well as the history of debate over what these categories mean is an important strand of the Women's Studies curriculum. Women's Studies at UC Davis is particularly rich in faculty doing comparative, cross-cultural work

on women and gender. Among the faculty offering courses for the major are scholars working on women and gender in Africa, the Caribbean, the Americas, China, Europe, Japan, India, various countries of the Middle East, Southeast Asia, and the United States.

**The Program.** Perhaps the most exciting, albeit challenging, aspects of the Women and Gender Studies Program is that students can pursue their particular academic interests and design their course of study accordingly. In devising their program of study, students will draw on courses offered in African American and African Studies, American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German, History, Italian, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textiles and Clothing, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, race, class, ethnicity, and sexuality, the Women and Gender Studies Program affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an adviser that is in accordance with their individual career goals. Many Women and Gender Studies majors find it advantageous to pursue a double major, or to minor in another discipline such as Political Science, History, English, Sociology, Comparative Literature or Ethnic Studies.

**Career Alternatives.** A degree in Women's Studies opens possibilities for future employment. The WGS Program introduces students to relevant social issues, fosters critical thinking, and encourages social advocacy; it also hones their verbal and writing skills. It prepares students for entrance into graduate programs in the Humanities or Social Sciences.

Pre-professional students will discover that a major in Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social or family-related issues. Students who plan to do practical work in counseling, clinical psychology, social services, or political science will also find Women's Studies to be a helpful undergraduate major. Those who wish to do graduate level research in such fields as history, literature, ethnic studies, philosophy, sociology, anthropology, economics, political science, French, German, Italian, comparative literature, dramatic art, education, film, English, or Spanish will also benefit from a strong undergraduate background in women's history, feminist social theory, and a feminist understanding of narrative and cultural representation.

Increasingly, corporations, colleges and universities, insurance companies, and personnel firms are hiring specialists in women and gender studies as consultants. Current state and federal agencies need people who have special understanding for the problems that women face in society, industry, and the professions. Educational institutions need specialists to develop and administer women's studies programs, women's centers, and other organizations designed specifically to study and assist women.

**Women's Studies****A.B. Major Requirements:**

UNITS

**Preparatory Subject Matter..... 20**

Two courses from Women's Studies 20, 50, 60, 70 ..... 8

Three courses selected from the following:  
African American and African Studies 10, 15, American Studies 1E, 1F, Anthropology 2, 20, 21, Art History 15, Asian American Studies 1, 2, Chicana/o Studies 10, 50, Classics 15, Comparative Literature 12, Dramatic Art 1, English 30A or 30B, 45, 46A or 46B or 46C, History 72A, 72B, Humanities 10, Native American Studies 1, 10, Nature and Culture 1, Political Science 7,

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2007-2008 offering in parentheses

General Education (GE) credit: ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Social-Cultural Diversity; Wrt=Writing Experience

Psychology 1, Science and Society 1, 15, Sociology 1, 2, 3, Textiles and Clothing 7, Women's Studies 80..... 12

**Depth Subject Matter ..... 44**

Women's Studies 103, 104, 190 and one additional upper division Women's Studies course..... 16

Cross-Cultural Requirement..... 16  
Choose four courses (at least one from each category). Courses used to meet this requirement may not duplicate those used to meet other Women's Studies major requirements. The list that follows represents a partial list of options; other courses may be included with the consent of the Women's Studies Adviser.

*Ethnic Studies: Women of Color in the United States:* African American and African Studies 123, 133, Anthropology 139, Asian American Studies 112, Chicana/o Studies 111, 122, 131, Native American Studies 134, 180, Sociology 134, 172, Women's Studies 160, 180.  
*Cultures Outside the United States:* Anthropology 130, 131, 148B, Comparative Literature 135, 138, 159, English 185A, 185B, French 133, German 112A, 128A, 129, History 102G, 102H, 148A, 148B, Italian 141, Russian 142, Sociology 145B, Women's Studies 102, 182, 184.

*Historical Material Prior to 1900:* African American and African Studies 123, Asian American Studies 112, English 185A, History 148A, 148B, Italian 141, Native American Studies 180.

Gender-based courses ..... 12

Choose one of two tracks: Disciplinary or Thematic. Courses used to meet this requirement may not duplicate those used to meet other Women's Studies major requirements.

**Disciplinary track**

Choose three courses from one of the following focus groups:  
*Anthropology focus:* Anthropology 129, 130, 131, 134, 139, 148B, 158, Women's Studies 102, 182, 184.  
*History focus:* African American and African Studies 123, Asian American Studies 112, English 185A, History 102H, 102G, 148A, 148B, Italian 141, Native American Studies 180.

*Literature and Language focus:* Comparative Literature 135, 138, 159, English 185A, 185B, French 133, German 112A, 128A, 129, Italian 141, Linguistics 163, Russian 142, Women's Studies 180.

*Sociology and Psychology focus:* Anthropology 129, Chicana/o Studies 122, Psychology 149, Sociology 131, 132, 134, 145B, 172, Women's Studies 187.

**Thematic track**

In consultation with a Women's Studies adviser, choose three courses that form a thematic cluster (for example, Gender and Race in the United States; The Cultural Representations of Gender; Feminist Film Theory and Production; Gender and Public Policy; Gender and Global Issues; Gender and Autobiography; The Body, Theory and Representation; Sexualities; Gender and Science). Other clusters may be developed in consultation with a Women's Studies adviser.

**Total units for the major ..... 64**

**Major Adviser.** All Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

**Minor Program Requirements:**

UNITS

**Women's Studies ..... 24**

Women's Studies 20, 50, 60, 70 or 80.... 4  
Choose one from African American and African Studies 123, 133, Anthropology 139, Asian American Studies 112, Chicana/o Studies 102, 111, 122, 131, Native American Studies 134, 180, Sociology 134, 172, Women's Studies 160, 180..... 4

Choose one from Anthropology 130, 131, 148B, Comparative Literature 135, 138, 159, English 185A, 185B, French 133, German 112, 128A, 129, History 148A, 148B, Italian 141, Russian 142, Sociology 145B, Women's Studies 102, 182, 184..... 4

Additional Electives from approved list of upper division cross-listed and Women's Studies courses ..... 12

Note: With prior consultation with an adviser, other upper division courses may be accepted toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

**Minor Adviser.** All Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

**Graduate Study.** The Women's Studies Program offers a designated emphasis in Feminist Theory and Research for students enrolled in the Ph.D. programs of twelve other affiliated departments. See [Feminist Theory and Research](#), on page 272.

**Courses in Women's Studies (WMS)**

**Lower Division Courses**

**20. Cultural Representations of Gender (4)**

Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. Interdisciplinary investigation of how specific cultures represent gender difference. Examine a variety of cultural forms and phenomena including film, television, literature, music, popular movements, and institutions. GE credit: ArtHum, Div, Wrt.—III. (III.)

**25. Gender and Global Cinema (4)**

Lecture—3 hours; film viewing—3 hours. The role gender plays in film history/culture in various geographical contexts and in aspects of contemporary globalization. Films from nations such as China, Colombia, Cuba, Ethiopia, India, Iran, Korea, New Zealand, and the U.S. GE credit: ArtHum, Div, Wrt.—II. (II.) Kuhn

**50. Introduction to Women and Gender Studies (4)**

Lecture—3 hours; discussion—1 hour. Interdisciplinary introduction surveys and integrates anthropological, artistic, cultural studies, historical, legal, literary, philosophical, psychological, scientific, and sociological perspectives on the study of gender and its relationship to race, sexuality, class, and other aspects of social experience. GE credit: ArtHum or SocSci, Div, Wrt.—I, II, III.

**60. Introduction to Feminist Interpretations of Western Thought (4)**

Lecture/discussion—4 hours. A critical introduction to major traditions of social thinking in the West from a feminist perspective. Not offered every year. GE credit: ArtHum or SocSci, Div, Wrt.—Rabine

**70. Theory and History of Sexualities (4)**

Lecture/discussion—4 hours. Key issues in the social construction, organization, and reproduction of sexualities such as the intersection of sexual identity with gender, race, ethnicity, and class, and the relation between movements for sexual liberation and the regulation of the body. GE credit: ArtHum or SocSci, Div.—(I.)

**80. Special Topics in Women's Studies (4)**

Lecture/discussion—4 hours. In-depth examination of a women's studies topic related to the research interest of the instructor. May be repeated for credit when topic differs. Limited enrollment.

**90X. Lower Division Seminar (2)**

Seminar—2 hours. Examination of a special topic in Women's Studies through shared readings, discussions, and written assignments. Offered in alternate years.

**91. Research Seminar in the Transnational Production and Consumption of Fashion (1-2)**

Seminar—1-2 hours. Preparation for a research conference. May be repeated for credit when topic varies.—II. (II.) Kaiser, Rabine

**98. Directed Group Study (1-5)**

Prerequisite: consent of instructor. P/NP grading only.)

**99. Special Study for Undergraduates (1-5)**

Prerequisite: consent of instructor. (P/NP grading only.)

**Upper Division Courses**

**102. Colonialism, Nationalism, and Women (4)**

Lecture/discussion—4 hours. Prerequisite: one course specified for Women's Studies major. Explores key dimensions of women's relationship to colonialism and nationalism in one or more societies. GE credit: SocSci, Div.—I.

**103. Introduction to Feminist Theory (4)**

Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race, identity politics, and the social construction of women's experience.—I. (I.) Kuhn, Mena, Rodriguez

**104. Feminist Approaches to Inquiry (4)**

Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. Feminist applications and transformations of traditional disciplinary practices; current issues and methodologies in feminist interdisciplinary work.—II. (II.) Mena, Rodriguez

**130. Feminism and the Politics of Family Change (4)**

Lecture/discussion—4 hours. Prerequisite: any Women's Studies course or Sociology 131 or 132. An examination of contemporary conflicts over family values and the changing family from a feminist perspective. Offered in alternate years. GE credit: ArtHum or SocSci, Div.—(II.)

**136. Topics in Gender, Production, Consumption and Meaning (4)**

Lecture/discussion—3 hours; term paper Construction of gender through production and consumption of goods and services. Transnational movement of peoples and products. Topics may include fashion, film, food, and technology. May be repeated for credit. GE Credit: ArtHum, Div, SocSci, Wri.—Gopinath, Ho, Kaiser, Kaplan, Kuhn, Nettles, Rabine, Rodriguez

**137. Feminist Interpretations of Contemporary Western Thought (4)**

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Introduction to deciphering, demystifying, and interpreting poststructuralist, postmodern, and postcolonial thought from a feminist perspective: applications to gender, race, sexuality, and class. Not offered every year. GE credit: ArtHum or SocSci, Div, Wrt.—Kuhn, Rabine

**138. Transnational Studies of Dress, Fashion, and Gender (4)**

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies or Textiles and Clothing 7, 107, or 174. Dress and fashion as cultural communication, aesthetic expression, capitalist commodity. History, sociology, semiotics of fashion. Fashion as means of gender oppression and liberation. Use

of dress in identity construction across cultures. Clothing workers on the global assembly line. Not offered every year. GE credit: ArtHum or SocSci, Div, Wrt.—Rabine, Kaiser

### 139. Feminist Cultural Studies (4)

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies or American Studies. The histories, theories, and practices of feminist traditions within Cultural Studies. (Same as course American Studies 139.) GE credit: SocSci, Div, Wrt.—(II.) Gopinath, Kaplan, Rodriguez

### 140. Gender and Law (4)

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies. Exploration of women's legal rights in historical and contemporary context, discussing a variety of legal issues and applicable feminist theories. Topics include constitutional equal protection, discrimination in employment and education, sexual orientation discrimination, and the regulation of abortion. GE credit: SocSci, Div.—III.

### 158. Contemporary Masculinities (4)

Lecture/discussion—4 hours. Prerequisite: one course specified for the Women's Studies major. A multicultural study of contemporary trends in masculinity and the economic, social and political forces that have shaped them. Topics may include men's movements, ethnic nationalist masculinities, and images of masculinity in popular culture. GE credit: ArtHum or SocSci, Div.—III. Newton, Ho

### 160. Representations of Women of Color in Cinema (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: course 20 or another film course. The representations of women of color in commercial and independent films from a feminist perspective. GE credit: ArtHum, Div.—(III.) Mena, Rodriguez

### 162. Feminist Film Theory and Criticism (4)

Lecture/discussion—3 hours; film-viewing—3 hours. Prerequisite: one course from the Women's Studies major and Humanities 10 or consent of instructor. Historical overview of and contemporary issues in feminist film theory, including representation, spectatorship, and cultural production. Film stars, women filmmakers, and the intersections of gender, race, sexuality, and class in films and their audiences. Offered in alternate years. GE credit: ArtHum, Div.—III. Gopinath

### 164. Topics in Gender and Cinematic Representation (4)

Lecture/discussion—3 hours; film-viewing—3 hours. Prerequisite: one course from the Women's Studies major and Humanities 10 or consent of instructor. Examination of a specific topic within the broad rubric of gender and cinema. Possible topics include Latinas in Hollywood; gender, nation, cinema; and gender and film genre. Topics vary. May be repeated twice for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div.—Gopinath, Kuhn, Rodriguez

### 165. Feminist Media Production (6)

Lecture/discussion—3 hours; laboratory—3 hours; fieldwork—6 hours. Prerequisite: one course in Women and Gender Studies or consent of instructor. Basic media production and community service. Video, audio and photography instruction; feminist community documentary; video ethnography; video journals; alternative representations of fashion and women's bodies. Fundamentals of camera and microphone operation, interviewing techniques, and editing. May be repeated two times for credit if topic differs. Not offered every year. GE credit: ArtHum, Div, SocSci.—Ross

### 170. Queer Studies (4)

Lecture/discussion—4 hours. Prerequisite: course 20, or 50, or 70, or consent of instructor. Study of queer sexualities, identities, theories, practices. Alternative sexualities as historical, social, and cultural constructions in intersections with race, gender, class, nationality. Interdisciplinary exploration of sexual liberation and the regulation of sexuality through history, theory and expressive cultural forms. GE credit: ArtHum or SocSci, Div, Wrt. Not offered every year.—Gopinath, Rodriguez

### 178A-F. Transnationalism and Writing by Women of Color (4)

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Writings by women of color in a transnational framework, understood in their cultural, socio-economic, and historical contexts. The interrelation among gender, writing, nationalism, and transnationalism, with focus on women's writing in specific geographic/national locations and their diasporas: (A) The Arab World; (B) Asia; (C) The Caribbean; (D) Africa; (E) Diasporic Women Writers in Europe; (F) Topics on Women Writers of Color. Not offered every year. GE credit: ArtHum, Div, Wrt.—Gopinath, Ho, Joseph, Kuhn, Mena, Nettles, Rodriguez

### 179. Gender and Literature (4)

Lecture/discussion—4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Role of literature, especially novels, in constructing, challenging, and transforming normative genders in society. Transhistorical and transnational focus on gender in its intersections with race, class, sexuality, and politics. Not offered every year. GE credit: ArtHum, Div, Wrt.—Gopinath, Ho, Kuhn, Nettles, Newton, Rabine, Rodriguez

### 180. Women of Color Writing in the United States (4)

Lecture/discussion—4 hours. Prerequisite: course 20 or 50. Literature, especially novels, written by contemporary women of color in the United States, understood in their socio-economic, cultural and historical contexts. GE credit: ArtHum, Div.—II. Ho

### 182. Globalization, Gender and Identity (4)

Lecture/discussion—4 hours. Prerequisite: course 50. Feminist theories on affects of gender on self and identity and cross cultural study as it intersects gender with race, class, ethnicity. Impact of globalization processes on gender and identity. Offered in alternate years. GE credit: SocSci, Div, Wrt.—III.

### 184. Gender in the Arab World (4)

Lecture/discussion—4 hours. Prerequisite: course 50. Examination of the history, culture, and social/political/economic dynamics of gender relations and gendering in the Arab world. GE credit: SocSci, Div, Wrt.—II. Joseph

### 187. Gender and Social Policy (4)

Lecture/discussion—3 hours; term paper. Prerequisite: upper division standing and a course in Women's Studies. The role of gender in the creation of social policies, especially with respect to issues brought into the policy arena by contemporary feminism. Offered in alternate years. GE credit: SocSci, Div.—(III.) Nettles

### 189. Special Topics in Women and Gender Studies (4)

Lecture/discussion—4 hours. Prerequisite: one course from the Women's Studies major. In-depth examination of a women's studies topic related to the research interests of the instructor. May be repeated once for credit when topic differs. Not offered every year.—I. Gopinath, Ho, Joseph, Kaiser, Kuhn, Nettles, Newton, Rabine, Rodriguez, SwainNewton, Projansky

### 190. Senior Seminar (4)

Seminar—4 hours. Prerequisite: senior standing in Women's Studies. Capstone course for senior Women's Studies majors, which focuses on current issues on feminism as they impact theory, public policy, and practice.—III. (III.)

### 191. Capstone Seminar (4)

Seminar—4 hours. Prerequisite: course 104 or Textiles and Clothing 107, and course 194HA, course 199, or Textiles and Clothing 199, or consent of instructor. Revision, completion, and presentation of senior research or creative project. Creating a multimedia Web site for publishing research and creative projects. GE credit: Wrt.—III. (III.) Kaiser, Rabine

### 192. Internship in Women's Studies (1-12)

Internship—3-36 hours; written report. Prerequisite: completion of a minimum of 84 units and consent of instructor; enrollment dependent on availability of intern positions with priority to Women's Studies

majors. Supervised internship and study in positions/institutional settings dealing with gender-related problems or issues, as for example, a women's center, affirmative action office, advertising agency, or social welfare agency. Final written report on internship experience. (P/NP grading only.)

### 193. Gender and Global Issues Internship Seminar (2)

Seminar—2 hours. Prerequisite: course 192 concurrently. The ethics of working in communities and community projects, emphasizing feminist understandings of activism, communities, globalization, multiculturalism, and the politics of institutions, agencies, and organizations. May be repeated for credit. (P/NP grading only.)—I, II, III. (I, II, III.) Swain

### 194HA-194HB. Senior Honors Project in Women's Studies (4-6)

Independent study—12 hours. Prerequisite: senior standing, Women's Studies major, and adviser's approval. In consultation with an adviser, students complete a substantial research paper or significant creative project on a Women's Studies topic. (Deferred grading only, pending completion of sequence.)

### 195. Thematic Seminar in Women's Studies (4)

Seminar—4 hours. Prerequisite: two courses specified for women's studies major. Group study of a topic, issue or area in feminist theory and research involving intensive reading and writing. May be repeated for credit when topic differs. Limited enrollment. GE credit: ArtHum or SocSci, Div.—III.

### 197T. Tutoring in Women's Studies (1-4)

Tutoring—3-12 hours. Prerequisite: upper division standing and consent of director. Leading small, voluntary discussion groups affiliated with a Women's Studies course. May be repeated for credit for a total of 8 units. (P/NP grading only.)

### 198. Directed Group Study (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

### 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

## Graduate Courses

### 200A. Current Issues in Feminist Theory (4)

Seminar—4 hours. Current issues in feminist theory; techniques employed to build feminist theory in various fields.—I. (I.) Gopinath, Kaplan, Kuhn, Mena, Newton, Rodriguez

### 200B. Problems in Feminist Research (4)

Seminar—4 hours. Prerequisite: course 200A with a grade of B+ or better. Application of feminist theoretical perspectives to the interdisciplinary investigation of a problem or question chosen by the instructor(s). May be repeated for credit when subject area differs.—II. (II.) Gopinath, Nettles, Rodriguez

### 201. Special Topics in Feminist Theory and Research (4)

Lecture/discussion—4 hours. Explores in depth a topic in feminist theory and research related to the research interests of the instructor. May be repeated for credit when topic differs. Limited enrollment.—(III.) Gopinath, Ho, Joseph, Kaiser, Kuhn, Nettles, Newton, Rabine, Rodriguez, Swain

### 250. Cultural Study of Masculinities (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structures. (Same course as American Studies 250.)—Newton, Mechling

**299. Special Study for Graduate Students (1-12)**

(S/U grading only.)

**299D. Dissertation Research and Writing (4)**

Prerequisite: courses 200A and 200B; fulfillment of course requirements for the DE in Feminist Theory and Research, advancement to candidacy. (S/U grading only.)

**Professional Course****396. Teaching Assistant Training Practicum (1-4)**

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

**Zoology**

## GENERAL EDUCATION THEME OPTIONS

General Education theme options are sets of GE courses sharing a common intellectual theme. These GE theme options are not a separate element of the GE requirement, but a way of selecting your GE courses so that you may benefit from a coherent focus of study while completing the GE requirement. Completion of a theme satisfies the GE requirement for students with majors assigned to the GE topical breadth area of Arts and Humanities. Students with majors assigned to the topical breadth area of either Science and Engineering or Social Science will need to complete additional GE courses in Arts and Humanities to satisfy the campus GE requirement.

### Global Population and Environmental Issues

For centuries, there have been concerns and predictions about population growth and its potential effects on the environment and the quality of life. Perspectives on population and environmental issues often vary based on such factors as gender, social class, culture, nation, race/ethnicity, and religion. In this group of courses, students will learn about the complex interplay among environmental, economic, and ethical issues through the study of global population patterns. They will learn how science addresses the use of natural resources by humans, along with the fundamentals of environmental impacts such as global warming. This option group of courses explores diverse perspectives on global population and environmental issues by examining biological, physical, and social processes that influence the everyday lives of people around the world.

Topics might include the social, economic, and environmental challenges of population growth; and the ethics and dilemmas of natural resource use.

#### Global Population

International Agricultural Development 10,	SocSci, Div, Wrt
[or Community & Regional Development 1	SocSci, Div, Wrt]

### Biodiversity and Cultural Diversity

The nations with the greatest biodiversity often have tremendous ethnic and cultural diversity. This option examines diversity in many interrelated contexts: biological diversity and the impact of contemporary humans; values and cultural practices in regard to production and consumption; the clothes people wear; creation and use of social spaces; and the preservation of genetic resources for food, fiber, and pharmaceuticals

Topics might include conservation biology; integration of human and natural systems; cultural expression through clothing and appearance; and discussion of what are cultural and social rights.

#### Biodiversity and Cultural Diversity

Landscape Architecture 2	SocSci, Wrt

### Food and Fiber

This option focuses on food and fiber systems, from their plant, animal, or synthetic sources to their ultimate use by humans for health, safety, communication, and pleasure. Understanding these systems enables students to see the connections between the food and clothes that are part of our everyday lives and the scientific, social, and cultural issues that make them so significant to society as a whole.

Topics might include food and clothing safety, quality, and availability; media and consumer perceptions; and cultural histories, values, and meanings.

### Changing Agriculture

Changing demographics, environmental issues, and social-political trends in California all play a role in public perceptions and policies related to our food and fiber systems, natural resources, and community values. These perceptions, policies, and values need to be critically examined in the context of larger global economic trends and environmental health and safety. In this option group of courses, students can explore a range of challenging issues related to the complex interplay between rural and urban needs and values.

Topics might include holistic approaches to agriculture; international migration and agricultural development; and how plants and animals influence the course of history.

## APPENDIX

## **RESIDENCE FOR TUITION INFORMATION**

### **Tuition Fee for Nonresident Students**

If you have not been living in California with intent to make it your permanent home for more than one year immediately before the residence determination date for each term in which you propose to attend the University, you must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

### **Law Governing Residence**

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of the Regents of the University of California. Under these rules, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors; see [Who is a Resident?](#), below.

### **Who is a Resident?**

If you are an adult student (18 years of age or older) you may establish residence for tuition purposes in California if: (1) you are a U.S. citizen; (2) you are a permanent resident or other immigrant; or (3) you are a nonimmigrant who is not precluded from establishing a domicile in the U.S. Nonimmigrants who are not precluded from establishing a domicile in the U.S. include those who hold visas of the following types: A, E, G, H-1, H-4, I, K, L, N, NATO, O-1, O-3, R, or V. **To establish residence you must be physically present in California for more than one year and you must have come here with the intent to make California your home as opposed to coming to this state to go to school.** Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of your stay. You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and establishing those ties with California. Evidence of intent must be dated one year before the term for which you seek resident classification. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for one full year. Effective Fall 1993, if your parents are not residents of California you will be required to be financially independent in order to be a resident for tuition purposes; see [Requirement for Financial Independence](#), below).

Your residence cannot be derived from your spouse, registered domestic partner, or your parents.

### **Requirement for Financial Independence**

You will be considered “financially independent” if one or more of the following applies: (1) you are at least 24 years of age by December 31 of the calendar year for which you are requesting resident classification; (2) you are a veteran of the U.S. Armed Forces; (3) you are a ward of the court or both parents are deceased; (4) you have children or other legal dependents other than a spouse or registered domestic partner; (5) you are married or in a registered domestic partnership, or a graduate student or a professional student, and you were not claimed as an income tax

deduction by your parents or any other individual for the tax year immediately preceding the term for which you are requesting resident classification; or (6) you are a single undergraduate student and you were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you are requesting resident classification, and you can demonstrate self-sufficiency for those years and the current year. Note: Graduate or professional school students who are employed at UC Davis 49% or more (or awarded the equivalent in University-administered funds; e.g., fellowships, grants, stipends) during the term for which classification as a resident is requested are exempt from the financial independence requirement.

### **Establishing Intent to Become a California Resident**

Indications of your intent to make California your permanent residence can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver's license or, if you do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which you keep your personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which you claim residence can also serve as an indication of your intent. Documentary evidence is required and all relevant indications will be considered in determining your classification. Your intent will be questioned if you return to your prior state of residence when the University is not in session.

### **General Rules Applying to Minors**

If you are an unmarried minor (under age 18), the residence of the parent with whom you live is considered to be your residence. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of your parent's right of control. If you lived with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa which precludes you from establishing domicile in the U.S., you may establish your own residence when both your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

### **Specific Rules Applying to Minors**

- 1. Deceased Parents.** You may establish your own residence if both of your parents are deceased and a legal guardian has not been appointed for you.
- 2. Divorced/Separated Parents.** You may be able to derive California resident status from a California resident parent if you move to California to live with that parent on or before your 18th birthday. If you begin residing with your California parent after your 18th birthday, you will be treated like any other adult student coming to California to establish residence.

- 3. Parent of Minor Moves From California.** You may be entitled to resident status if you are a minor U.S. citizen or eligible alien whose parent(s) was a resident of California who left that state within one year of the residence determination date if: (1) you remained in California after your parent(s) departed; (2) you enroll in a California public postsecondary institution within one year of the time your parent(s) depart and establish residence elsewhere; and (3) once enrolled, you maintain continuous attendance in that institution. Financial independence will not be required in this case.
- 4. Self-Support.** You may be entitled to resident status if you are a U.S. citizen or eligible alien, a minor, and can prove the following: (1) you lived in California for the entire year immediately preceding the residence determination date; (2) you are self-supporting and were self supporting the entire year preceding the residence determination date; and (3) you intend to make California your permanent home.
- 5. Two-Year Care and Control.** You may be entitled to resident status if you are a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

### Exemptions from Nonresident Tuition

- 1. Member of the Military.** If you are a member of the U.S. military stationed in California on active duty, unless you are assigned for educational purposes to a state-supported institution of higher education, you may be exempt from the nonresident tuition fee. You must provide the residence deputy on campus with a statement from your commanding officer or personnel officer stating that your assignment to active duty in California is not for educational purposes. The letter must include the dates of your assignment to the state.
- 2. Spouse, Registered Domestic Partner, or Other Dependents of Military Personnel.** You are exempt from payment of the nonresident tuition fee if you are a spouse, a registered domestic partner, a natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. If you are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the armed forces, or the member of the military retires from active duty immediately after having served in California on active duty, you may retain this exemption.
- 3. Child, Spouse, or Registered Domestic Partner of Faculty Member.** To the extent funds are available, if you are an unmarried dependent child under age 21 the spouse, or the registered domestic partner of a member of the University faculty who is a member of the Academic Senate, you may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.
- 4. University Employment Outside of California.** You may be entitled to resident classification if you are a full-time University employee, or the unmarried dependent child, the spouse, or the registered domestic partner of a full-time University employee who is assigned to work outside of the state of California (e.g., Los Alamos National Laboratory and the University of California Washington D.C. Center). The University employee's employment status must be ascertained each term.
- 5. Child, Stepchild, Spouse, or Registered Domestic Partner of Deceased Public Law Enforcement or Fire Suppression Employee.** You may be entitled to a waiver of the nonresident tuition fee if you are the child, the stepchild, the spouse, or the registered domestic partner of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.
- 6. Dependent Child of a California Resident.** A student who has not been an adult resident of California for more than one year and who is the dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date may be entitled to resident classification until the student has resided in California for the minimum time necessary to become a resident so long as continuous attendance is maintained at an institution.
- 7. Native American Graduate of BIA School.** You are eligible for an exemption from the nonresident fee if you are a graduate of a California school operated by the Federal Bureau of Indian Affairs and you enroll at one of the University of California campuses. Currently, Sherman Indian High School in Riverside is the only California high school operated by the BIA.
- 8. Employee of a California Public School District.** A student holding a valid credential authorizing service in California public schools and employed by a school district in a full-time certificate position may be exempt from nonresident tuition.
- 9. Student Athlete in Training at U.S. Olympic Training Center, Chula Vista.** An amateur athlete in training at the U.S. Olympic Training Center in Chula Vista may be exempt from nonresident tuition until s/he has resided in California for the minimum time necessary to become a resident.
- 10. Graduate of California High School.** A student who attended high school in California for three or more years (9th grade included) and graduated from a California high school (or attained the equivalent) may be exempt from nonresident tuition.
- 11. Surviving Spouse, Registered Domestic Partner, or Dependent Child of a California Resident Killed in the September 11, 2001 Terrorist Attacks.** An undergraduate student who is the surviving spouse, registered domestic partner, or dependent child of a California resident killed in the September 11, 2001 terrorist attacks on the World Trade Center, the Pentagon Building or the crash of United Airlines Flight 93, may be exempt from nonresident tuition and mandatory system-wide fees. Eligible students must meet the financial need requirements for the Cal Grant A program.
- 12. Recipient of a Congressional Medal of Honor or the Child of a Recipient of the Congressional Medal of Honor.** An undergraduate student who is a recipient of a Congressional Medal of Honor or who is the child of a recipient of the Congressional Medal of Honor may be exempt from nonresident tuition and mandatory system-wide fees. The recipient of the Medal of Honor must be a California resident or must have been a California resident at the time of his or her death. The student may not be older than 27 and the student's annual income may not exceed the national poverty level.

### **Temporary Absence**

If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former home during non-instructional periods, your presence in the state will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption; a student who is in the state solely for educational purposes will NOT be classified as a resident for tuition purposes regardless of the length of his or her stay. If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or your parents if you are a minor) to verify that you did nothing inconsistent with your claim of a continuing California residence during your absence. Steps that you (or your parents) should take to retain a California residence include:

1. Continue to use a California permanent address on all records; educational, employment, military, etc.
2. Satisfy California resident income tax obligations. Note: If you are claiming California residence, you are liable for payment of income taxes on your total income from the date you establish California residence. This includes income earned in another state or country.
3. Retain your California voter's registration and vote by absentee ballot.
4. Maintain a California driver's license and vehicle registration. If it is necessary to change your driver's license and/or vehicle registration while you are temporarily residing in another state, you must change them back to California within the time prescribed by law.
5. Maintain active bank accounts.

### **Classification to Resident Status**

If you are classified as a non-resident student and you wish to be classified as a resident, you should file your petition at least three weeks before the first day of instruction for the quarter for which you seek resident status. Late petitions will not be accepted.

### **Incorrect Classification**

If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all nonresident tuition fees not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the campus residence deputy.

### **Time Limitation Providing Documentation**

If additional documentation is required for either an initial residence classification or reclassification but is not readily accessible, you will be allowed until the end of the applicable term to provide it. Please remember that you are liable for payment of fees when they are due. Petitioning for a change of status does not alter the fee payment deadline.

### **Inquiries and Appeals**

Inquiries regarding residence requirements, determination and/or recognized exceptions should be directed to the Residence Deputy,

Office of the University Registrar, One Shields Avenue, Davis, California 95616, (530) 752-4749. **NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.** You are cautioned that this summary is not a complete explanation of the law regarding residence. Please note that changes may be made in the residence requirement between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst at Legal Analyst—Residence Matters, 1111 Franklin St., 8th Floor, Oakland, CA 94607-5200 within 30 days of notification of the residence deputy's final decision.

## **UNIVERSITY POLICY ON NONDISCRIMINATION, SEXUAL HARASSMENT, STUDENT RECORDS AND PRIVACY**

**Nondiscrimination.** The University of California, in accordance with applicable Federal and State law and University policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (pregnancy includes pregnancy, childbirth and medical conditions related to pregnancy or childbirth), disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access and treatment in University programs and activities.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to Director, Student Judicial Affairs, (530) 752-112

**Sexual Harassment.** Sexual harassment is prohibited by law and by university policy and is not condoned by UC Davis (Policy 380-12 at <http://manuals.ucdavis.edu/ppm/380/380-12.htm>). The Sexual Harassment Education Program (530) 752-2255 provides information and assists in resolving complaints of sexual harassment informally. Students may also use formal and informal grievance procedures to resolve complaints of alleged sexual harassment or other illegal discrimination (Policy 280-05 at <http://manuals.ucdavis.edu/ppm/280/280-05.htm>). Students should seek assistance as soon as possible (time limits apply to filing formal complaints) and may receive informal counseling and/or referrals by contacting the Sexual Harassment Education Program, the Office of Student Judicial Affairs, the ASUCD Student Advocacy Office, Counseling & Psychological Services, or the Women's Resources and Research Center. Formal complaints may be filed with the vice chancellor or dean of the school or college in which the alleged discrimination or harassment occurred.

**Disclosures from Student Records.** Students have the right to review records that relate to themselves in their capacity as students and to request corrections of records that are inaccurate. Most disclosures from student records to outside parties require prior consent from the student.

Under the Family Educational Rights and Privacy Act of 1974 and University and campus policies, UC Davis students have the following rights:

- To review their own student records within 45 days after the student submits a written request for access to the Registrar or other department having possession of the records to be reviewed. That office will make arrangements for access and notify the student when and where the records may be reviewed. If the records are maintained by a different office, the request will be redirected and the student notified. The campus maintains several types of student records in various locations. Questions about how to obtain records should be referred to Student Judicial Affairs at (530) 752-1128.
- To request amendment of their own student records if they believe the records are inaccurate or misleading. Students should submit a written request to the office that maintains the records specifying the portion of the record the student wants changed and why it is believed to be inaccurate or misleading. That office has 45 days to determine whether the record should be changed and notify the student of the decision, including of the right to a hearing and hearing procedures.
- To restrict the disclosure of personally identifiable information contained in student records, except when law and policy permit disclosure without consent. Examples of circumstances in which the student's consent is not required for disclosure of student records include the following:
  1. Disclosure of "directory" or "public" information including the student's name; local and/or permanent address(es), e-mail addresses and telephone number(s); dates of attendance; major; grade level; enrollment status (undergraduate/graduate. Full or part time); number of enrolled course units; degrees and honors received; most recent previous educational institution attended; participation in officially recognized activities, including intercollegiate athletics, and the name, weight and height of participants on ICA teams. Such information may be published in a student directory.
    - a. To prevent disclosures of telephone numbers and/or addresses, students must submit a written request to the Registrar by the tenth day of instruction. To prevent disclosure of their e-mail address, students must follow instructions at <https://computingaccounts.ucdavis.edu/>, and then select "Change your directory information."
    - b. Students may designate as confidential and withhold all information about themselves by filing a request with the Registrar. If all information is designated confidential, no information about a student can be disclosed without the student's written consent (except as otherwise permitted by law and policy) including verifying student status, awards, or any degrees earned.
  2. Disclosure to campus officials (for example faculty, staff, student employees, or those under contract with the University) having a legitimate educational interest in the records. Legitimate educational interest means the information is relevant and necessary to a task or determination that is (a) an employment responsibility or an assigned subject matter for the inquirer and/or related to (b) the inquirer's participation in the student's education; (c) the discipline of a student; or (d) providing a service or benefit related to a student or student's family (such as health care, counseling, job placement, or financial aid).

Parental/guardian information is confidential. It is used by UC Davis only for notification of events, ceremonies, awards and development or in case of an emergency involving the student.

For more information, see University of California Policies Applying to Disclosure of Information from Student records and UC Davis Policy and Procedure Manual Section 320-21.

Questions about these rights and requirements should be referred to Student Judicial Affairs, (530) 752-1128. Students can file complaints regarding alleged violations of privacy rights with the Office of Student Judicial Affairs.

Students may also contact the U.S. Department of Education concerning alleged violations of these requirements, addressed to the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC. 20202-4605. See section 99.63 at <http://www.ed.gov/policy/gen/quid/jfpcof/ferpa/index.html>.

**Social Security Numbers.** A student's Social Security number is used to verify personal identity in the UC Davis Student Records System. Disclosure of social security number is mandatory. In compliance with state law, Social security numbers are confidential and are not used as student identifiers.

## **CAMPUS SECURITY, CRIME AWARENESS, AND ALCOHOL AND DRUG ABUSE PREVENTION**

In accordance with federal law, UC Davis annually provides students and employees with information regarding campus security, crime statistics, and alcohol and drug abuse prevention, pursuant to the Student Right to Know and Campus Security Act of 1990 and the Drug Free Schools Act of 1989. The UC Davis Police and Campus Administration make continual efforts to reduce crime on campus. A well-informed community is better served and safer.

For a copy of the complete UC Davis security and crime prevention report, including crime statistics, campus security measures and crime reporting procedures, applicants for admission or prospective employees may contact the UC Davis Campus Violence Prevention Office, located in the UC Davis Police Department, contact (530) 752-3299, or [jmbeeman@ucdavis.edu](mailto:jmbeeman@ucdavis.edu).

## **ACCREDITATION**

The University of California, Davis is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges, 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

UC Davis is also accredited by the, Accreditation Board for Engineering and Technology, Accreditation Council for Graduate Medical Education, American Assembly of Collegiate Schools of Business, American Association for Accreditation of Laboratory Animal Care, American Bar Association, American Chemical Society, American Dietetic Association, American Society of Landscape Architects, Association of American Law Schools, Association of American Medical Colleges, Commission of Teacher Credentialing, Computer Science Accreditation Commission, Council on Education and Public Health, and the Council on Education of the American Veterinary Medical Association.

Students interested in reviewing the accreditation documents may do so by scheduling an appointment with the Office of the Provost in Mrak Hall.

## THE BOARD OF REGENTS

Governance of the University is entrusted to a corporation called The Board of Regents. Of the individuals composing the board, 18 are California citizens appointed by the governor; and seven, including the president of the University and the governor of California, serve *ex officio*. A Student Regent is selected each year from a list of names submitted to the board by the Student Body Presidents' Council.

The Regents have delegated authority in academic matters to the Academic Senate of the faculty, which determines academic policy and supervises the instructional activities of the entire University. All of the permanent faculty, as well as key administrators, are members of the Senate.

The Regents have delegated authority for the organization of the University to the president. Robert C. Dynes is president and head of the Universitywide administration. Authority for the administration of each campus has been delegated to a chancellor.

## THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

### Regents Ex Officio

Arnold Schwarzenegger  
*Governor of California and President of the Regents*

Cruz M. Bustamante  
*Lieutenant Governor of California*

Fabian Núñez  
*Speaker of the Assembly*

Jack O'Connell  
*State Superintendent of Public Instruction*

Richard Rominger  
*President of the Alumni Associations of the University of California*

Eric G. Juline  
*Vice President of the Alumni Associations of the University of California*

Robert C. Dynes  
*President of the University*

### Appointed Regents

Current term expires on March 1 of year indicated.

Richard C. Blum, 2014

Russell Gould, 2017

Judith L. Hopkinson, 2009

Eddie Island, 2017

Odessa P. Johnson, 2012

Joanne C. Kozberg, 2010

Sherry L. Lansing, 2010

Monica Lozano, 2013

George M. Marcus, 2012

John J. Moores, 2009

Gerald L. Parsky, 2008

Norman J. Pattiz, 2014

Peter Preuss, 2008

Frederick Ruiz, 2016

Leslie Tang Schilling, 2013

Paul Watcher, 2016

Adam Rosenthal, June 30, 2005  
*Student Regent*

Clifford Brunk, September 1, 2006  
*Faculty Representative*

John B. Oakley, September 1, 2007  
*Faculty Representative*

## Principal Officers of the Regents

James E. Holst  
*General Counsel*

Marie N. Berggren  
*Interim Treasurer*

Leigh Trivette  
*Secretary*

## ADMINISTRATIVE OFFICERS OF THE UNIVERSITY

Robert C. Dynes  
*President of the University*

Wyatt R. (Rory) Hume  
*Acting Provost and Senior Vice President—Academic Affairs*

Vacant  
*Senior Vice President—Business and Finance*

Bruce B. Darling  
*Senior Vice President—University Affairs*

W.R. Gomes  
*Vice President—Agriculture and Natural Resources*

Lawrence C. Hershman  
*Vice President—Budget*

William H. Gurtner  
*Vice President—Clinical Services Development*

Winston C. Doby  
*Vice President—Student Affairs*

Anne C. Broome  
*Vice President—Financial Management*

Wyatt R. (Rory) Hume  
*Vice President—Health Affairs*

Admiral S. Robert Foley; Retired, U.S. Navy  
*Vice President—Laboratory Management*

Julius Zelmanowitz

## UNIVERSITY CHANCELLORS

Robert J. Birgeneau  
*Chancellor at Berkeley*

Larry N. Vanderhoef  
*Chancellor at Davis*

Michael V. Drake  
*Chancellor at Irvine*

Albert Carnesale  
*Chancellor at Los Angeles*

Carol Tomlinson-Keasey  
*Chancellor at Merced*

France A. Córdova  
*Chancellor at Riverside*

Marye Anne Fox  
*Acting Chancellor at San Diego*

J. Michael Bishop  
*Chancellor at San Francisco*

Henry T. Y. Yang  
*Chancellor at Santa Barbara*

Denice D. Denton  
*Chancellor at Santa Cruz*

**ADMINISTRATIVE OFFICERS—UC DAVIS****Chancellor**

Larry N. Vanderhoef, Ph.D.

**Chancellor Emeritus**

Theodore L. Hullar, Ph.D.

**Vice Chancellors**

Virginia S. Hinshaw, Ph.D.

*Provost and Executive Vice Chancellor*

Stan Nosek, M.S.

*Vice Chancellor—Administration*

Barry M. Klein, Ph.D.

*Vice Chancellor—Research*

John Meyer, M.P.A.

*Vice Chancellor—Resource Management and Planning*

Judy K. Sakaki, Ph.D.

*Vice Chancellor—Student Affairs*

Beverly “Babs” Sandeen, Ph.D.

*Interim Vice Chancellor—University Relations***Vice Provosts**

Barbara A. Horwitz, Ph.D.

*Vice Provost—Academic Personnel*

Peter Yellowlees, M.D.

*Interim Vice Provost—Information and Educational Technology*

Fred Wood, Ph.D.

*Interim Vice Provost—Undergraduate Studies*

William B. Lacy, Ph.D.

*Vice Provost—University Outreach and International Programs***Associate Chancellor**

Sally P. Springer, Ph.D.

**Associate Chancellor**

Maril R. Stratton, M.A.

**Associate/Assistant Vice Chancellors/Provost**

Rahim Reed, M.P.A., J.D.

*Associate Executive Vice Chancellor—Campus Community Relations*

Dennis W. Shimek, B.S.

*Senior Associate Vice Chancellor—Human Resources and Risk Management and Special Advisor to the Chancellor*

Karen Hull

*Associate Vice Chancellor—Business Services*

Maurice Hollman

*Associate Vice Chancellor—Facilities Operations and Maintenance*

J. Michael Allred, M.B.A.

*Associate Vice Chancellor—Finance*

Lynne Chronister, M.P.A.

*Associate Vice Chancellor—Research Administration*

Bernd Hamann, Ph.D.

*Associate Vice Chancellor—Research*

Alan B. Bennett, Ph.D.

*Associate Vice Chancellor—Research*

Deb Niemeier, Ph.D.

*Associate Vice Chancellor—Research*

Jill M. Blackwelder, B.S.

*Associate Vice Chancellor—Safety Services*

Janet C. Gong, Ed.D.

*Associate Vice Chancellor—Student Affairs*

Cheryl Brown Lohse, M.S.

*Associate Vice Chancellor—University Relations; Development*

Dennis J. Dutschke, Ph.D.

*Associate Vice Provost—International Programs*

Peggy Shannon, M.F.A.

*Associate Vice Provost—University Outreach*

Robert I. Loessberg-Zahl, M.P.P.

*Assistant Executive Vice Chancellor*

Jennifer Barber, M.S.

*Acting Assistant Vice Chancellor—Alumni Relations/ Executive Director—CAAA*

Kelly Ratliff, M.B.A.

*Assistant Vice Chancellor—Budget Resource Management and Institutional Planning and Analysis*

Robert Segar, M.L.A.

*Assistant Vice Chancellor—Campus Planning*

Richard F. Keller, B.A.

*Assistant Vice Chancellor—Capital Resource Management*

Marjorie M. Dickinson, B.A.

*Assistant Vice Chancellor—Government and Community Relations*

Lisa Lapin, B.A.

*Assistant Vice Chancellor—University Communications*

J. Leon Washington, M.A.

*Assistant Vice Chancellor—Student Affairs; Enrollment and Academic Support*

Griselda Castro

*Assistant Vice Chancellor—Student Affairs; Student Life***University Librarian**

Marilyn J. Sharrow, M.A.L.S.

**Registrar**

Frank Wada, M.A.

Nicole Woolsey Biggart, Ph.D., Dean  
Richard P. Castanias, Ph.D., Associate Dean-Academic Affairs

**Graduate Studies**

Jeffery Gibeling, Ph.D., Dean  
Edward Caswell-Chen, Ph.D., Associate Dean for Graduate Programs  
Sharman O'Neill, Ph.D., Associate Dean for Research Programs

**School of Law**

Rex R. Perschbacher, J.D., Dean  
Kevin Johnson, J.D., Associate Dean—Academic Affairs  
Hollis L. Kulwin, J.D., Assistant Dean—Student Affairs  
Adam Talley, Assistant Dean Administration

**School of Medicine**

Claire Pomeroy, M.D., M.B.A., Vice Chancellor for Human Health Sciences and Dean  
Ann Bonham, Ph.D., Executive Associate Dean-Research and Education  
Thomas Nesbitt, M.D., M.P.H., Executive Associate Dean-Administration/Clinical Outreach  
Frederick Meyers, M.D., Senior Associate Dean-Academic Affairs  
Lars Berglund, M.D., Ph.D., Associate Dean-Clinical Research  
Fitz-Roy Curry, Ph.D., Associate Dean-Research  
Lydia Howell, M.D., Associate Dean-Academic Affairs  
Michael Wilkes, M.D., Ph.D., Vice Dean-Medical Education  
Amerish Bera, M.D., Assistant Dean-Admissions and Outreach

Ralph de Vere White, M.D., Assistant Dean-Cancer Services  
Faith Fitzgerald, M.D., Assistant Dean-Humanities and Bioethics  
Jesse Joad, M.D., Assistant Dean-Faculty Development and Diversity  
Vijaya Kumari, M.B.B.S., Ph.D., Assistant Dean-Curricular Affairs  
James Nuovo, M.D., Assistant Dean-Graduate Medical Education  
Brian O'Neill, M.D., Assistant Dean-Veterans Affairs  
John Owings, M.D., Assistant Dean-Student Affairs

**School of Veterinary Medicine**

Bennie I. Osburn, D.V.M., Ph.D., Dean  
John R. Pascoe, B.V.Sc., Ph.D., Executive Associate Dean  
Jan E. Ilkiw, B.V.Sc., Ph.D., Associate Dean—Academic Programs  
James S. Cullor, D.V.M., Ph.D., Associate Dean and Director—Veterinary Medicine Teaching and Research Center, Tulare  
Susan Hildebrand, D.V.M., Associate Dean—Student Programs  
Kent K. C. Lloyd, D.V.M., Ph.D., Associate Dean—Research and Graduate Education  
Bradford P. Smith, D.V.M., Associate Dean—Clinical Programs and Director—Veterinary Medical Teaching Hospital  
Donald J. Klingborg, D.V.M., Associate Dean—Veterinary Extension and Public Programs Director—Center for Continuing Professional Education  
David W. Hird, D.V.M., Ph.D., M.P.V.M., Director, Masters of Preventive Veterinary Medicine Program

**UC Davis Extension**

Dennis Pendleton, Ph.D., Dean

**PROPORTION OF UC DAVIS GRADUATES FINDING WORK IN THEIR FIELDS OF CHOICE<sup>1</sup>**

The percent of alumni whose full-time job is in the field of their choice is shown by field of study. Figures do not include the 13 percent of graduates who had not decided on a career field at the time of the survey.

Field of Study<sup>2</sup>, Percentage finding work in field of choice

Agricultural Sciences, 78	Humanities, Arts and Cultural Studies, 68
Biological Sciences, 74	Human Sciences, 75
Engineering, 86	Mathematical and Physical Sciences, 68
Environmental Sciences, 83	Social Sciences, 60
<b>Total, 72</b>	

<sup>1</sup>Source: A 2003 survey of June 2002 graduates conducted by Student Affairs Research and Information.

<sup>2</sup>Fields of Study are groups of related undergraduate majors as organized into UC Davis colleges or divisions.

**RETENTION DATA AND GRADUATION RATES AT UC DAVIS****Freshmen\***

(Retention and graduation rates through Summer 2005 for all undergraduates entering UC Davis as freshmen.)

Fall Quarter of Initial Enrollment:	Number of Students**	Percent Enrolled One Year	Percent Graduating in Four Years	Percent Graduating in Five Years	Percent Graduating in Six Years
1993	3,114	90.6%	29.8%	67.9%	81.9%
1994	3,182	89.2%	30.5%	65.6%	78.2%
1995	3,245	88.8%	31.7%	68.4%	80.5%
1996	3,685	91.1%	37.6%	72.6%	83.5%
1997	3,526	89.7%	37.6%	71.0%	80.5%
1998	3,616	89.6%	38.7%	72.2%	81.3%
1999	3,817	90.1%	42.0%	74.7%	83.9%

**Transfer Students**

(Retention and graduation rates through Spring 2000 for all undergraduates transferring to UC Davis as juniors.)

Fall Quarter of Initial Enrollment:	Number of Students**	Percent Enrolled One Year	Percent Graduating in Four Years	Percent Graduating in Five Years	Percent Graduating in Six Years
1993	1,409	88.6%	36.7%	69.7%	78.4%
1994	1,689	88.3%	37.1%	70.1%	77.6%
1995	1,726	85.4%	36.1%	67.4%	77.1%
1996	1,634	86.7%	40.4%	72.8%	78.6%
1997	1,631	85.1%	39.9%	70.9%	76.9%
1998	1,541	88.4%	46.1%	75.0%	80.9%
1999	1,390	89.6%	49.1%	76.7%	83.4%

Retention is defined as enrollment at the 3rd week census point of the fall term 1 year from initial fall term.

Graduation is defined as having received degree from UC Davis (does not include students who transferred to another institution to complete their degree).

\*Retention and graduation tracking limited to students enrolled full-time in their initial term of enrollment.

\*\*Students excluded from these counts include those who are now deceased or participated in any of the following: Military Service, Foreign Service, Religious Mission.

**ANSWERS:**

1 B. 103. UC Davis is a leader in interdisciplinary study, and its four colleges, five professional schools and 86 graduate programs make it the most comprehensive of all the UC campuses. 2 A. 294,151 service hours for various organizations in Yolo and Sacramento counties. 3 B. 12<sup>TH</sup>. UC Davis research funding topped \$500 million in 2005. 4 C. \$93,100 in 2004, twice the California average. 5 C. 6,300 internships in government, business and academia.

THE UNIVERSITY OF CALIFORNIA,  
DAVIS, MAKES A DIFFERENCE IN THE  
LIVES OF PEOPLE EVERY DAY.

WE ARE FUELED BY OUR **LEARNING**,  
ENERGIZED BY **DISCOVERY**.

OUR TRADITION OF **ENGAGEMENT**  
GUIDES ALL THAT WE DO.

WE ARE A COLLABORATIVE **COMMUNITY**  
UNITED BY A VISION OF MAKING THE  
WORLD A BETTER PLACE.

The campus's breadth of academic and outside-the-classroom programs, commitment to providing an attentive and research-enriched education, determination to address society's needs and consideration of campus community members as family are truly distinctive.
