 ${\sf Seminar-3\ hours;\ term\ paper.\ Survey\ of\ important}$ works in contemporary political theory including such writers as Nietzsche, Heidegger, Arendt, Rawls, Nozick, Sandel. May be repeated for credit if topic differs.

220. Seminar in Political Theory (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing. Introduction to political theory and current debates over its study. Readings from and textual interpretations of political theory including the Federalist Papers and major works by thinkers such as Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, and Rawls. Other readings addressing issues of textual interpretation.

223. International Relations (4) Seminar-3 hours; term paper.

225. The International System (4)

Seminar -3 hours; term paper. Analysis of the international system by means of theory formulation and integration; critique of research designs; use of various techniques of data generation and analysis.

226. Seminar in International Political Economy (4)

Seminar — 3 hours; term paper. Restricted to graduate students. Research in international political economy. Structure of the global economy, as well as specific dimensions of international economic relations, including trade, capital flows, global production structures, and migration. Offered in alternate

229. Theories of International Relations (4)

Seminar-3 hours; term paper. Central concepts, debates, and paradigms in international relations; overview of research in international security and international political economy; inter-state and intrastate war; cooperation and conflict resolution; trade and finance; relationship between domestic and international politics, norms and institutions. Open to political science graduate students only unless consent of instructor. Offered in alternate years.

230. American Foreign Policy (4)

Seminar-3 hours; term paper.

231. U.S. Political Culture and Foreign Relations (4)

Seminar—3 hours; term paper. Relates U.S. political culture to formulation of foreign policy. Analyzes American ideological preferences in historical perspective, contemporary public opinion, decision making and implementation. Concludes by examining linkages between foreign policy behavior and democratic process. Offered in alternate years.

241. Communist Political Systems (4)

Seminar-4 hours. Prerequisite: course 141 or the equivalent, or consent of instructor. Systematic analysis of selected topics dealing with the political process of communist political systems.

242. Seminar in Comparative Politics (4)

Seminar - 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Systematic survey of theories and methods used in the study of comparative politics.

243. Comparative Institutional Change (4)

Seminar — 3 hours; term paper. Restricted to graduate students. Comparison of institutional changes in countries of the former Soviet Union and Eastern Europe during the period of transition to democracy. Special attention to institutions of mass representation-electoral and party systems and national legislatures. Offered in alternate years.

246. Policymaking in Third-World Societies (4)

Seminar-3 hours. Prerequisite: graduate standing or consent of instructor. Included in an analysis of policymaking process in Third-World countries are such topics as political resources, institutional resources, decision making, resource allocations, planning, and budgeting, implementation, and distribution of world resources. Offered in alternate years.

250. Policy Development and Impact in U.S. Courts (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing. Thorough overview of the literature regarding courts as policymaking institutions of government, with emphasis on the formation and implementation of judicial policy. Differences and similarities across the judicial, congressional, and executive branch policy processes. Offered in alternate years.

260. Political Parties (4)

Seminar - 3 hours; term paper. Survey of selected topics in American and comparative parties.

261. Political Behavior (4)

Seminar-3 hours; term paper. Survey of selected topics in political behavior and public opinion. May be repeated three times for credit when topic differs.

274. Political Economy (4)

Seminar-3 hours; term paper. Restricted to graduate students. Politics of economic policy as reflected in taxation, spending and regulation; impact of prices, employment, and growth on political demands; government responses to economic conditions; electoral politics and the political business cycle. Offered in alternate years

279. Political Networks: Methods and Applications (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing. Structure of political networks, sociomatrices and affiliation networks; general networks characteristics: density, centralization, polarization, interdependence, dyadic and triadic characteristics: structural and role equivalence; subsets of networks: cliques, blocks and bloc modeling; characteristics of individuals in networks: centrality and prestige.

280. Bayesian Methods: for Social and **Behavioral Sciences (4)**

Seminar — 3 hours; term paper. Prerequisite: course 212 or equivalent. Pass 1 open to graduate majors only; pass 2 open to graduate students. Methodology seminar introducing Bayesian quantitative methods to issues and problems in political science and other social and behavioral sciences. Offered in alternate years

281. Statistical Computing Issues in Political Science (4)

Seminar-3 hours; discussion/laboratory-1 hour. Prerequisite: course 213 or equivalent; graduate standing. Methodology seminar introducing computing issues in empirical models for political science and other social and behavioral sciences. Offered in alternate years.

282. Advanced Modeling of Political Behavior (4)

Seminar—3 hours; term paper. Prerequisite: course 215 or equivalent; graduate standing or consent of instructor. Applications of formal theory to political science. Review of relevant contributions in other social sciences. Consideration of advanced techniques in game theory. Rational and behavioral approaches.

283. Organizational Behavior (4)

Seminar-4 hours. Organizational behavior as it relates to public sector decision making.

290A. Research in American Government and Public Policy (4)

Seminar-3 hours; term paper. Restricted to graduate students. Special research seminar on problems and issues in the study of American government and public policy. May be repeated up to 6 times for credit if topic différs.

290B. Research in Political Theory (4)

Lecture — 3 hours; term paper. Restricted to graduate students only. Special research seminar on problems and issues in the study of political theory. May be repeated six times for credit if topic varies.

290C. Research in International Relations (4)

Lecture — 3 hours; term paper. Restricted to graduate students only. Special research seminar on select problems and issues in the study of international relations. May be repeated six times for credit if topic

290D. Research in Judicial Politics (4)

Seminar-4 hours. Prerequisite: graduate standing in political science or consent of instructor. Contemporary research on judicial politics, judicial institutions, jurisprudence, and judicial behavior.

290E. Research in Political Parties, Politics, and Political Behavior (4)

Seminar—4 hours. Special research seminar on selected problems and issues in the study of political parties, politics, and political behavior.

290F. Research in Comparative Government and Policy (4)

Lecture—3 hours; term paper. Restricted to graduate students only. Special research seminar on select problems and issues in the study of comparative government and policy. May be repeated six times for credit if topic varies.

290G. Research in Methodology (4)

Lecture-3 hours; term paper. Prerequisite: course 212. Special research seminar on selected problems and issues in methods in political science. May be repeated three times for credit if topic varies

297. Internships in Political Science (2)

Seminar-2 hours. Prerequisite: open only to persons who have internships or other positions in governmental agencies, political parties, etc.

Application and evaluation of theoretical concepts through work experience or systematic observation in public and political agencies. May be repeated for credit. (S/Ü grading only.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

299D. Directed Reading (1-12)

(S/U grading only.)

Professional Courses

390. The Teaching of Political Science (1)

Seminar — 1 hour. Prerequisite: graduate student standing in Political Science. Methods and problems of teaching political science at the undergraduate level. (S/Ŭ grading only.)

396. Teaching Assistant Training Practicum

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

Graduate Study. The Graduate Group in Population Biology emphasizes programs of study and research leading to the Ph.D. degree. The Group concentrates on population biology as the broad discipline that blends ecology, evolution, population genetics and systematics into a unified field. The course curriculum consists of first-year core courses offered by the Group faculty, seminars, and advanced courses in population biology, and related disciplines, chosen in consultation with a guiding

Graduate Adviser. Consult the Population Biology Graduate Group office or website.

Courses in Population Biology (PBG)

Graduate Courses

200A. Principles of Population Biology (5)

Lecture - 3 hours; discussion - 2 hours. Prerequisite: course 231 concurrently and consent of instructor. Principles of single-species ecology and evolution. Topics include ecology of individuals, population growth models, structured populations, life history strategies, stochastic populations, basic population genetics theory, deleterious alleles in natural populations, and molecular population genetics.—I. (I

200B. Principles of Population Biology (6)

Lecture - 5 hours; discussion - 1 hour. Prerequisite: course 200A, 231. Principles of multi-species communities. Topics include competition, mutualism, metapopulations, food webs and trophic cascades, interactions between simple ecological communities, island biogeography, succession, and large-scale patterns.—II. (II.)

200C. Principles of Population Biology (6)

Lecture - 5 hours; discussion - 1 hour. Prerequisite: course 200B. Principles of microevolution and macroevolution. Topics include evolutionary quantitative genetics, analysis of hybrid zones, speciation, the fossil record, biogeography, and phylogeny recon-

203. Advanced Evolution (3)

Lecture - 1 hour; discussion - 2 hours. Prerequisite: graduate standing. Adaptation and speciation, and biochemical and morphological evolution in plants and animals with emphasis on the appropriateness of different methods of analysis. Offered in alternate years.

206. Ecology of Insect Parasitoids (4)

Lecture — 3 hours; seminar — 1 hour. Prerequisite: introductory animal ecology or behavior. Insect parasitoids will be investigated as model systems to address current topics in behavioral, population, and evolutionary ecology. Theory will be synthesized and critical empirical tests of ecological hypotheses emphasized. (Same course as Entomology 206.) Offered in alternate years.

207. Plant Population Biology (3)

Lecture - 2 hours; laboratory/discussion - 1 hour. Prerequisite: advanced undergraduate ecology course (e.g., Environmental Science and Policy 100, Evolution and Ecology 101, Entomology 104, Plant Biology 117), and advanced undergraduate course in genetics and/or evolution (e.g., Biological Sciences 101 or Evolution and Ecology 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as Ecology 207.) Offered in alternate years. - II. Rice

212. Topics in Invertebrate Evolution (2)

Seminar-2 hours. Prerequisite: graduate standing or consent of instructor and Evolution and Ecology 112-112L; courses in evolutionary biology, systematics, and ecology highly recommended. Advanced seminar that critically examines problems relevant to evolutionary patterns among the invertebrates. May be repeated for credit when topic differs. (S/U grading only.) - (III.) Grosberg

220. Spatio-Temporal Ecology (2)

Lecture/discussion—2 hours. Prerequisite: course 200B or Ecology 204 or Evolution and Ecology 104 or Environmental Science and Policy 121 or consent of instructor. Spatiotemporal ecological theory focus-ing on population persistence and stability, predatorprey and host-parasitoid interactions, species coexistence and diversity maintenance, including effects of environmental variation, spatial and temporal scale, life-history traits and nonlinear dynamics. Topics vary. (Same course as Ecology 220.) May be repeated one time for credit. (S/U grading only.)

221. Animal Behavior, Ecology and Evolution (3)

Lecture - 3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 102, Evolution and Ecology 100, 101 or the equivalent, graduate standing, and consent of instructor. The interface between animal behavior, ecology and evolution. New developments in behavioral ecology and development and testing of hypotheses in this discipline. (Same course as Animal Behavior 221.)

224. Field Reconnaissance for Population Biologists (2)

Fieldwork – 6 hours. Prerequisite: graduate student in Population Biology, or consent of instructor. Biweekly field trips to acquaint students with plant and animal communities, biodiversity, and ecological and evolutionary research opportunities in northern and central California. May be repeated for credit. (S/U grading only.)

225. Terrestrial Field Ecology (4)

Seminar-1 hour; field work-12 hours. Prerequisite: introductory ecology and introductory statistics, or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results will be stressed. (Same course as Ecology/Entomology 225.)—III. (III.) Karban

231. Mathematical Methods in Population Biology (3)

Lecture - 3 hours. Prerequisite: Mathematics 16C or 21C or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as Ecology 231.)—I. (I.)

250A. Interdisciplinary Approaches to Biological Invasions (4)

Lecture/discussion-4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from ecology, ecological theory, evolution, genetics, philosophy, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving. - I. (I.)

250B. Interdisciplinary Approaches to Biological Invasions (4)

Lecture/discussion-4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from history, sociology, communications, law, policy, management, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving. - II. (II.)

251. Collaborative Project in Biological Invasions (3)

Project; discussion - 1 hour. Prerequisite: course 250A, 250B, or equivalent; and consent of instructor. A year-long interdisciplinary collaborative project focusing on biological invasions, resulting in a paper or other suitable product presented at a symposium at the conclusion of the project. May be repeated up to five times. (S/U grading only.)-I, II, III. (I, II, III.)

270. Research Conference in Evolutionary Biology (1)

Seminar - 1 hour. Prerequisite: consent of instructor. Critical presentation and evaluation of current literature and ongoing research in evolutionary biology. May be repeated for credit. (S/U grading only.)—I, 11, 111. (1, 11, 111.)

271. Research Conference in Ecology (1)

Seminar - 1 hour. Prerequisite: consent of instructor. Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

287. Advanced Animal Behavior (2)

Seminar—2 hours. Prerequisite: graduate standing and consent of instructor, courses in animal behavior (Neurobiology, Physiology, and Behavior 102 or the equivalent), and either evolution (Evolution and Ecology 100 or the equivalent) or ecology (Evolution and Ecology 101 or the equivalent). Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. (Same course as Animal Behavior 287.) May be repeated two times for credit.

290. Seminar (1)

Seminar — 1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by visiting lecturers, UC Davis graduate students and faculty. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

290C. Research Conference in Population Biology (1)

Discussion - 1 hour. Prerequisite: graduate standing and consent of instructor; concurrent enrollment in course 299. Presentation and discussion of faculty and graduate student research in population biology. May be repeated for credit. (S/U grading only.) — I, II, III. (I, II, III.)

292. Topics in Ecology and Evolution (1)

Seminar - 1 hour. Prerequisite: graduate standing. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. (Same course as Ecology 296.) (S/U grading only.)—I, II, III. (I, II, III.)

296. Seminar in Geographical Ecology (2)

Seminar—2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. May be repeated for credit. (S/U grading only.)—III. (III.) Shapiro

298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Precision Agriculture

(College of Agricultural and Environmental Sciences)

The Department of Biological and Agricultural Engineering offers a minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental

Minor Program Requirements:

This minor acquaints students with recent developments and their applications to agriculture, in geographic information systems (GIS), global positioning systems (GPS), variable rate technologies (VRT), crop and soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the "information age" in agriculture.

The Major Programs

The psychology program at UC Davis is broad and includes students and faculty with a variety of inter-

ests. The department has developed around five major areas of emphasis: Developmental Psychology, which involves the study of changes in behavior and abilities that occur as development proceeds and includes such topics as imaging the developing brain, development of self esteem, problem solving, attachment theory, symbolic representation in infants and children, development of children's understanding of mental states; Perception-Cognition, which involves the study of awareness and thought, and includes such topics as perception, learning, memory, and consciousness; Psychobiology, which involves the study of the biological correlates of behavior and includes such topics as physiological psychology, sensory processes, health psychology, and animal behavior; Social-Personality Psychology, which involves the study of the individual in his or her social environment and includes such topics as personality theory, abnormal psychology, individual differences, developmental psychology, and social psychology; and Quantitative which involves the study of linear models and psychometrics which includes topics, such as experimental design and the analysis of variance, regression analysis, and multivariate analysis.

The department offers the Bachelor of Arts (A.B.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathematics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take specialty courses on such far-ranging topics as sex differences, genius and creativity, and environmental awareness. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden your experiences and understanding of the field of psychology.

Preparatory Requirements. Before declaring a major in psychology, students must complete the following courses with a combined grade point average of at least 2.500. All courses must be taken for a letter grade. (Students in the Bachelor of Science, Biology program must complete Biological Sciences 2A.):

Biological Sciences 2A

Biological Sciences 10 and one course from Anthropology 1, Molecular and Cellular Biology 10, Neurobiology, Physiology, and Behavior 104 or 8 units Sociology or cultural anthropology 4 units

Career Alternatives. A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, the ministry, teaching, business, and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/ counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and other professions.

A.B. Major Requirements:

A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.

Total Units for the Major89-103

Recommended for All Majors. Students who plan to do graduate work in any area of psychology are strongly encouraged to complete Statistics 13 and Psychology 103A or both Statistics 13 and 102. Psychology 41 is a prerequisite for most upper division courses. Psychology 41 and Statistics 13 or

102 should be completed in the first year.

Major Advisers. K. Bales, S. Blozis, R.G. Coss, R.A. Emmons, A. Ekstrom, E. Ferrer, J. Geng, S. Ghetti, G.S. Goodman, K. Graf Estes, K. Grimm, P. Hastings, G.M. Herek, P. Janata, J.T. Johnson, L.A. Krubitzer, K. Lagattuta, A. Ledgerwood, D.L. Long, S. Luck, G.R. Mangun, W. Moons, L. Oakes, C. Pickett, C. Ranganath, S. Rivera, R.W. Robins, J. Schank, P.R. Shaver, J. Sherman, D.K. Simonton, T. Swaab, R. Thompson, B Trainor, M. Traxler, K.F. Widaman, A.P. Yonelinas, N.W. Zane

Human Development course credit. Human Development 100A, 100B, 100C, 101, 102, 120, and 121 can be used toward satisfying the 40-unit upper division major requirement to a maximum of 12 units. Students who have completed Human Development 100A or 100B will receive 2 units of credit for Psychology 140.

Minor Program Requirements:

Psychology......24 Psychology 1 or the equivalent 4 One course from each of the following 135, 136 Group B: Psychology 101, 113, 121, 122, 123, 126, 127, 129 Group C: Psychology 151, 152, 154, 161, 162, 168 Group D: Psychology 140, 141, 142, 143, Additional units to achieve a total of 20 upper One course selected from Human Development 100A, 100B, 100C, 101, 102, 120, 121 can be used toward satisfying the minor upper division unit requirement.

Honors and Honors Program. In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria and complete a research project involving a minimum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Course 194HA-194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained by writing the Graduate Adviser, Department of Psychology.

Graduate Adviser. See Registration Guide.

Courses in Psychology (PSC) **Lower Division Courses**

1. General Psychology (4)

Lecture-4 hours. Introduction emphasizing empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior. Only two units allowed to those who have taken course 15 or 16; no credit allowed to those who have taken both courses 15 and 16. GE credit: SocSci | SS.-I, II, III. (I, II, III.) Shaver, Johnson, E. Post, Thompson, Traxler

20. Freshman Psychology Seminar (4)

Seminar-4 hours. Prerequisite: freshman standing. Instructor will acquaint students with his or her program of research, the development of scientific questions from the literature, and the application of research methods to examine these questions. Critical thinking will be encouraged via expository writing and brief presentations.

41. Research Methods in Psychology (4)

Lecture — 3 hours; autotutorial. Prerequisite: course 1 or the equivalent; Statistics 13 or 102 recommended. Introduction to experimental design, interviews, questionnaires, field and observational methods, reliability, and statistical inference. GE credit: QL.-I, II, III. (I, II, III.)

41S. Research Methods in Psychology (4)

Lecture/laboratory-10 hours; web virtual lecture-10 hours. Prerequisite: course 1 or equivalent. Introduction to experimental design, interviews, questionnaires, observational research, qualitative approaches, case studies, content analysis, sampling, descriptive statistics, and statistical inference. Limited enrollment. Not open for credit to students who have taken course 41.—IV.

90X. Lower Division Seminar (1-2)

Seminar - 1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Psychology through shared readings, discussions, written assignments, or special activities such as fieldwork or laboratory work. May not be repeated for credit. Limited enrollment.

98. Directed Group Study (1-5)

Primarily for lower division students. (P/NP grading only.)

99. Special Study for Lower Division Students (1-5)

(P/NP grading only.)

Upper Division Courses 100. Introduction to Cognitive Psychology

Lecture - 4 hours. Prerequisite: courses 1 and 41. Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former course 136.—I, II, III. (I, II, III.) Ekstrom, Gibbs, Long, Luck

101. Introduction to Psychobiology (4)

Lecture-4 hours. Prerequisite: courses 1, 41. Survey and integration of the relationships between behavior and biological processes, including physiology, genes, development, ecology, and evolution. - I, II, III. (I, II, III.) Coss, Krubitzer, Schank, Trainor

103A. Statistical Analysis of Psychological Data (5)

Lecture-4 hours; laboratory-2 hours; term paper Prerequisite: course 1, 41 and Statistics 13 or 102. Pass 1 open to Psychology majors. Design and statistical analysis of psychological investigations and the interpretation of quantitative data in psychology. Not open for credit to students who have completed course 103. GE credit: QL.-I, II. (I, II.) Blozis, Grimm, Widaman

103B. Statistical Analysis of Psychological Data (4)

Lecture-4 hours. Prerequisite: course 103A and Statistics 13 or 102. Pass 1 open to Psychology majors. Probability theory, sampling distributions, hypothesis testing, statistical inference, one-way and two-way analysis of variance, nonparametric statistics, with applications in psychology. Not open for credit to students who have completed course 105. GE credit: QL.-II, III. (II, III.) Blozis, Ferrer, Grimm, Widaman

104. Applied Psychometrics: An Introduction to Measurement Theory (4)

Lecture-4 hours. Prerequisite: upper division standing in Psychology, courses 41 and 103, Statistics 13. Examination of the basic principles and applications of classical and modern test theory. Topic include test construction, reliability theory, validity theory, factor analysis and latent trait theory. GE credit: QL.—Grimm, Widaman

107. Questionnaire and Survey Research Methods (4)

Lecture/discussion-2 hours; laboratory/discussion - 2 hours. Prerequisite: consent of instructor; course 1; course 41 or an equivalent course on social or behavioral research methods. Introduction to survey and questionnaire research methods with emphasis on how to ask questions. Social and psychological factors that influence survey response. Practical aspects of fielding survey and question-naire research. Limited enrollment. Not offered every year. GE credit: QL.—Herek

113. Developmental Psychobiology (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: course 101. The biology of behavioral development; survey and integration of the organismic and environmental processes that regulate the development of behavior. — I, II. (II, III.) Schank

120. Agent-Based Modeling (4)

Lecture/laboratory-4 hours. Prerequisite: course 100 or 101. Introduction to agent-based computer simulation and analysis with emphasis on learning how to model animals, including humans, to achieve insight into social and group behavior. Limited enrollment. GE credit: QL. - Schank

121. Physiological Psychology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 1, 41, 101. Pass 1 open to Psychology majors. Relationship of brain structure and function to behavior, motivation, emotion, language, and learning in humans and other animals. Methodology of physiological psychology and neuroscience. Not open for credit to students who have completed course 108. (Former course 108.)—I, II, III. (I, II, III.) Bales, Krubitzer

122. Advanced Animal Behavior (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 102. Pass 1 open to Psychology majors. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free living animals. (Same course as Neurobiology, Physiology, and Behavior 150.) Not open for credit to students who have completed course 150. (Former course 150.)—III. (III.)

123. Hormones and Behavior (3)

Lecture - 3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101 and either course 101 or Neurobiology, Physiology, and Behavior 102. Pass 1 open to Psychology majors. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Neurobiology, Physiology, and Behavior 152.) Not open for credit to students who have completed course 152. (Former course 152.)—III. (III.) Bales, Trainor

124. Comparative Neuroanatomy (4)

Lecture — 3 hours; laboratory — 2 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Neurobiology, Physiology, and Behavior 124.)—II. (II.) Krubitzer, Recanzone

126. Health Psychology (4)

Lecture - 4 hours. Prerequisite: course 1, 41, 101. Pass 1 open to Psychology majors only. Psychological factors influencing health and illness. Topics include stress and coping, personality and health, symptom perception and reporting, heart disease, cancer, compliance, and health maintenance and promotion. Not open for credit to students who have completed course 160.—III. (III.) Emmons

127. Animal Cognition (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: courses 1, 41, 101. Pass 1 open to Psychology majors. Integrative review of the historical backdrop, theoretical issues, and scientific methods of studying animal cognition in a wide range of species. Emphasis on learning processes, pattern recognition, and the neurobiology of learning and memory. Not open for credit to students who have completed course 134. (Former course 134.)—II, III. (II, III.) Coss

129. Sensory Processes (4)

Lecture - 3 hours; term paper. Prerequisite: course 1, 41, 101. Pass 1 open to Psychology majors. Psychobiology of sensory systems in humans and other animals. The relationship of behavior to the physiology, structure, and function of the senses. GE credit: Wrt | WC.-III. (III.) Krubitzer

130. Human Learning and Memory (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: courses 1, 41, 100, and either Statistics 13 or 102; or consent of instructor. Consideration of major theories of human learning and memory with critical examination of relevant experimental data. - I, II, III. (I, II, III.) Ranganath, Yonelinas

131. Perception (4)

Lecture — 3 hours; independent library work. Prerequisite: courses 1, 41. The cognitive organizations related to measurable physical energy changes mediated through sensory channels. The perception of objects, space, motion, events.—I, II, III. (I, II, III.) Geng, Post

132. Language and Cognition (4)

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, 100; or consent of instructor. Introduction to the cognitive processes involved in language comprehension and production. Topics include the biological foundations of language, speech perception, word recognition, syntax, reading ability, and pragmatics. GE credit: WE.—I, II, III. (I, II, III.) Long, Swaab, Traxler

135. Cognitive Neuroscience: The Biological Foundations of the Mind (4)

Lecture—3 hours; writing. Prerequisite: courses 1, 41, and 100 or 131, or consent of instructor; course 101, 121, or 129 recommended. Neuroscientific

482 Psychology

foundations of higher mental processes including attention, memory, language, higher-level perceptual and motor processes, and consciousness. Emphasis on the neural mechanisms which form the substrates of human cognition, and the relationship of mind to brain.—I, II. (I, II.) Ekstrom, Geng, Janata, Mangun, Raganath

136. Psychology of Music (4)

Lecture/discussion—3 hours; term paper. Prerequisite: courses 1, 41, and either 100 or 131 or Music 6C; or consent of instructor. Introduction to the mental and neural representations of musical structures and processes involved in perceiving, remembering, and performing music. Music and emotion. GE credit: WE.—Janata

140. Developmental Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction. Two units of credit allowed to students who have completed Human Development 100A or 100B. Not open for credit to students who have completed course 112. (Former course 112.)—1, II, III. (I, II, III.) Ghetti, Gibbs, Goodman, Graf Estes, Lagattuta, Oakes

141. Cognitive Development (4)

Lecture—3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass 1 restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Human Development 101.) GE credit: Wrt | WE.—I, II, III. (I, III, III.) Chen, Ghetti, Gibbs, Goodman, Graf Estes, Lagattuta, Rivera

142. Social and Personality Development (4)

Lecture—3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass 1 open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Human Development 102.) GE credit: SocSci, Wrt | SS, WE.—I, II, III. (I, II, III.) Belsky, Gibbs, Hastings, Thompson

143. Infant Development (4)

Lecture—3 hours; lecture/discussion—1 hour; extensive writing. Prerequisite: courses 1 and 41, and either course 140 or Human Development 100A. Psychological development in infancy. Topics include physical and motor development, sensory and nervous system development, and memory and cognitive development. Emphasis will be on evaluating theories, empirical research, and experimental methods for understanding infant development.—III. (III.) Oakes

146. The Development of Memory (4)

Lecture—3 hours; term paper. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Theory and research on memory development with focus on infancy and childhood. Not open for credit to students who have completed course 133. (Former course 133.) GE credit: WE.—III. (III.) Ghetti, Rivera

148. Developmental Disorders (4)

Lecture/discussion—3 hours; term paper. Prerequisite: courses 1, 41, and either 140 or 141 or Human Development 100A or 100B. Current scientific knowledge of the influences of biological, cognitive, and environmental factors on the emergence of disorders with onset in childhood. Examples include autism spectrum, ADD/ADHD, dyslexia and dyscalculia. Emphasis placed on understanding these disorders, their causes and their treatments.—Ill. Rivera

151. Social Psychology (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction; group tensions, norm-development, attitudes, values, public opinion, status. Not open for credit to students who have completed course 145. [Former course 145.]—I, II, III. [I, III.] Johnson, Ledgerwood, Sherman

152. Social Cognition (4)

Lecture—4 hours. Prerequisite: courses 1 and 41. Examines how social factors influence how we attend to, encode, and process information and how these mental processes affect subsequent judgments and behavior.—III. (III.) Pickett, Sherman

153. Psychology and Law (4)

Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. Current theoretical and empirical issues in the study of psychology and law. Topics include eyewitness testimony, child abuse, jury decision making, juvenile delinquency and criminology, prediction of violence, insanity defense, and memory for traumatic events. Not open for credit to students who have completed course 115. (Former course 115.) Offered in alternate years.—I. Goodman

154. Psychology of Emotion (4)

Lecture—4 hours. Prerequisite: course 1, 41. Pass 1 open to Psychology majors. Introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge. Not open for credit to students who have completed course 143. (Former course 143.)—I, II, III. (I, II, III.) Moons, Shaver

155. Environmental Awareness (4)

Lecture—4 hours. Prerequisite: course 1. Pass 1 open to Psychology majors. Interactions of people and the environments they construct. Research methods for evaluating designed environments and reviews of current research in environmental psychology. Not open for credit to students who have completed course 1444. (Former course 1444.) GE credit: SocSci | SS.—1. (I.) Coss

157. Stereotyping, Prejudice, and Stigma

Lecture/discussion—3 hours; term paper. Prerequisite: course 151. Social psychological underpinnings of stereotyping, prejudice, and stigma from sociocultural, motivational, and cognitive perspectives. Topics include: origins, maintenance, change, effects on person perception and memory, and the automaticity/controllability of stereotyping and prejudice. Offered in alternate years. GE credit: Div.—(I, III.) Sherman

158. Sexual Orientation and Prejudice (4)

Lecture/discussion—4 hours. Prerequisite: course 1, 41. Pass 1 open to Psychology majors. Current scientific knowledge about sexual orientation and prejudice based on sexual orientation. Emphasis on learning the skills necessary for a critical understanding of science and public policy issues relevant to sexuality. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.—II. (I, II.) Herek

159. Gender and Human Reproduction (4)

Lecture—4 hours. Prerequisite: course 1 and 41. Pass 1 open to Psychology majors. Psychology of reproduction. Reproductive events over the course of an individual's life, including sexual development, mate choice, relationships, and reproduction. Biological and social psychological explanations at the levels of mechanism and evolutionary function. Not open for credit to students who have completed former course 149. (Formally course 149.)—III. Scheib

161. Psychology of the Self (4)

Lecture—4 hours. Prerequisite: courses 1 and 41. Psychological theory and research on the self. Topics include: self-knowledge, self-esteem, self-regulation, self-presentation, cognitive and emotional aspects of the self, and the role of the self in shaping social interaction.—I. (I.) Pickett

162. Personality Theory (4)

Lecture—4 hours. Prerequisite: courses 1, 41. Pass 1 open to Psychology majors. The theories of Freud, Erikson, and other major twentieth-century contemporary approaches to personality. Not open for credit to students who have completed course 147. (Former course 147.) GE credit: SocSci, Wrt | SS, WE.—I, II, III. (I, II, III.) Robins, Shaver

165. Introduction to Clinical Psychology (4) Lecture—4 hours. Prerequisite: courses 1, 41, 168, and either 140 or 151. Major theoretical formulations in the history of clinical psychology, from classical psychoanalysis to contemporary existentialism and behavior modification. A survey, based on lectures, films, and tapes, of what clinical psychologists do, including methods of appraisal, professional roles, and approaches to treatment.—I, II, III. (I, II,

168. Abnormal Psychology (4)

III.) Horn, Zane

Lecture—4 hours. Prerequisite: courses 1, 41. Descriptive and functional account of behavioral disorders, with primary consideration given to neurotic and psychotic behavior. GE credit: SocSci | SS.—I, II, III. (I, II, III.) Schepeler, Zane

170. Psychology of Religion (4)

Lecture—4 hours. Prerequisite: courses 1 and 41. Major theories, issues, data, and research methodologies of the psychology of religion. Religious experience and expression; religious development in childhood, adolescence, and adulthood; conversion; religious influences on physical and mental health; cross-cultural perspectives. GE credit: Div, Wrt | WE.—III. (III.) Emmons

175. Genius, Creativity, and Leadership (4)

Lecture—3 hours; term paper. Prerequisite: course 1 and 41 or the equivalent or consent of instructor. The phenomenon of genius examined from a diversity of theoretical, methodological, and disciplinary perspectives, with an emphasis on outstanding creativity and leadership in art, music, literature, philosophy, science, war, and politics. GE credit: SocSci, Wrt | SS, WE.—I, III. (I, III.) Simonton

180A. Research in Cognitive and Perceptual Psychology (4)

Lecture — 2 hours; laboratory — 4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in general experimental psychology (general research design and analysis, perception, cognition, cognitive development, etc.). Specific content will vary from quarter to quarter. May be repeated one time for credit when content differs.—III.

180B. Research in Psychobiology (4)

Lecture — 2 hours; laboratory — 4 hours. Prerequisite: course 101, three additional upper division courses in Psychology, and consent of instructor. Empirical research on selected topics in psychobiology (animal learning, animal behavior, physiological and sensory psychology, developmental psychobiology, computer modeling of neural systems). Content varies. May be repeated one time for credit when content differs.—III. (III.)

180C. Research in Personality and Social Psychology (4)

Lecture — 2 hours; laboratory — 4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in personality and social psychology (personality, social psychology, organizational psychology, etc.). Content will vary from quarter to quarter. May be repeated one time for credit when specific content differs. — III.

185. History of Psychology (4)

Lecture—3 hours; term paper. Prerequisite: courses 1, 41, upper division standing or consent of instructor. Pass 1 open to Psychology majors. Development of psychological thought and research in context of history of philosophy and science. Not open for credit to students who have completed course 120. (Former course 120.) GE credit: SocSci, Wrt | SS, WE.—I. (I.) Simonton

190. Seminar in Psychology (4)

Seminar—4 hours. Prerequisite: junior or senior standing; major in psychology or consent of instructor. Intensive treatment of a special topic or problem of psychological interest. May be repeated for credit in different subject area.—I, II, III. (I, II, III.)

190X. Upper Division Seminar (1-2)

Seminar – 1-2 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Psychology. Emphasis on student participation in learning. May not be repeated for credit. Limited

192. Fieldwork in Psychology (1-6)

Fieldwork — 1-6 hours. Prerequisite: upper division standing in psychology and consent of instructor. Supervised internship off and on campus, in community and institutional settings. Maximum of four units may be used towards satisfaction of upper division major requirement. May be repeated one time for credit. Limited enrollment (P/NP grading only.)

194HA-194HB. Special Study for Honors Students (3-3)

Independent study—9 hours. Prerequisite: senior standing in Psychology and qualifications for admission into college honors program, and consent of instructor; at least one course from 180A, 180B, 180C or 199 strongly recommended. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. (Deferred grading only, pending completion of sequence.) GE credit: WE.

197T. Tutoring in Psychology (1-3)

Tutoring - 1-3 hours. Prerequisite: upper division standing and consent of instructor. Intended for advanced undergraduate students who will lead discussion sections in Psychology courses. May be repeated for credit for a total of 8 units. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

200. Proseminar in Psychology (3)

Seminar—2 hours; independent study—1 hour. Pre-requisite: graduate standing in Psychology or consent of instructor. Introduces matriculating graduate students to research activities of departmental faculty. (S/U grading only.)—I. (I.)

201. Research Preceptorship (4)

Laboratory - 3-4 hours; discussion - 3-5 hours. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

202. Research Seminar (1)

Seminar — 1 hour. Prerequisite: graduate standing in psychology. Presentation of graduate research to program faculty and graduate students. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

204A. Statistical Analysis of Psychological Experiments (4)

Lecture-4 hours. Prerequisite: Statistics 102 or the equivalent and graduate standing in Psychology or consent of instructor. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Analysis of variance, factorial and repeated measures, and tests of trends. Not open for credit to students who have completed course 206.—I. Ferrer, Widaman

204B. Causal Modeling of Correlational Data (4)

Lecture — 4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Examination of how to make causal inferences from correlational data in the behavioral sciences. Emphasis on testing rival causal models using correlations among

observed variables. Beginning with multiple regression analysis, discussion advances to path analysis and related techniques.—II. Widamar

204C. Applied Psychometrics and Measurement Theory (4)

Lecture-4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis, and latent trait theory. Not open for credit to students who have completed course 204. (Former course 204.) Offered in alternate years.—III. Wida-

204D. Advanced Statistical Inference from **Psychological Experiments (4)**

Lecture - 4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Advanced topics in statistical inference, which may include probability theory, sampling distributions, statistical inference and hypothesis testing, nonparametric statistics, Bayesian approaches, and advanced issues in analysis of variance. Not open for credit to students who have completed course 205. (Former course 205.) Offered in alternate years.—III. Blozis

205A. Applied Multivariate Analysis of Psychological Data (4)

Lecture-4 hours. Prerequisite: three courses from 204A, 204B, 204C, 204D or the equivalents, or consent of instructor. Review of the major methods of multivariate data analysis for psychological data. Statistical routines_using a linear algebra-based computing language. Topics include multivariate analysis of variance, discriminant analysis, canonical analysis factor analysis, and component analysis. Not open for credit to students who have completed course 207B. (Former course 207B.) Offered in alternate years.—II. Ferrer

205B. Factor Analysis (4)

Lecture — 4 hours. Prerequisite: graduate standing, course 204A and 204B or the equivalent or consent of instructor. Theory and methods of factor analysis, including exploratory factor analysis, confirmatory factor analysis, and principal component analysis. Offered in alternate years. - II. Widamar

205C. Structural Equation Modeling (4)

Lecture - 3 hours; term paper. Prerequisite: graduate standing; course 204A and 204B or the equivalent or consent of instructor. Theory and methods of structural equation modeling, including path analysis, confirmatory factor analysis, multiple-group modeling and latent growth curve modeling. Offered in alternate years.—Ferrer, Grimm, Widaman

205D. Multilevel Models (4)

Lecture - 4 hours. Prerequisite: course 204A, graduate standing or consent of instructor. Introduction to statistical techniques for the analysis of normal, hierarchically structured data, such as cross-sectional clustered data or repeated-measures data. Topics include hierarchical linear models, latent growth curve models, and how these methods handle unbalanced and/or missing data. - II. (II.) Blozis

206A. Theoretical Foundations: Research Methods in Psychology (4)

Lecture/discussion-3 hours; term paper. Restricted to graduate student status. Examines the philosophy and research practices underlying experimental psychology. Topics to be covered include philosophy of science/epistemology, research design, inference and bias in research, theory development, validity, the social context of research, and critical thinking about research. Offered irregularly. - III. (III.) Pickett,

206B. Research Methods in Psychology: Applications in Social-Personality Research

Lecture/discussion-3 hours; term paper. Restricted to graduate student status. Overview of the research designs, assessment methods, and statistical procedure used by social-personality psychologists. Focus on the practical issues that arise when using each method in specific research contexts. Offered in alternate years. — (II.) Robins

207. Survey and Questionnaire Research

Lecture/discussion-4 hours. Prerequisite: completion of a course on social or behavioral research methods, graduate standing. Survey and question-naire research methods with emphasis on how to ask questions. Cognitive, motivational, and social processes that influence how respondents answer questions; sampling techniques; Internet resources; practical aspects of fielding survey and questionnaire research. Not offered every year.—I. Herek

208. Physiological Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. A conceptual analysis of the contributions of neuroanatomy, neurophysiology and neurochemistry to an understanding of animal and human behavior.—III. Bales

208A. Fundamentals of Human Electrophysiology (4)

Lecture/discussion - 1.5 hours; laboratory - 3 hours; extensive problem solving-1.5 hours.; project-3 hours. Restricted to 15 students. In-depth introduction and hands-on experience with the event-related potential (ERP) method in the study of attention, executive control, memory, language and social cognitive neuroscience. — II. (II.) Luck, Swaab

209A. Introduction to Programming: Matlab (4)

Lecture/laboratory-3 hours. Prerequisite: graduate standing or consent of instructor. The Matlab programming environment as a means of organizing, analyzing, and visualizing scientific data. Basic programming concepts such as variables, loops, conditional branching, and efficient programming techniques will be emphasized. Not offered every year.—Janata

210. Fundamentals of Cognitive Neuroimaging (3)

Lecture/discussion-3 hours. Prerequisite: basic knowledge of inferential statistics and experimental psychology. Introduction to empirical foundations and methodology of neuroimaging, emphasizing pragmatics of functional magnetic resonance imaging (fMRI) to study cognition. Topics include MR physics, the relationship between neural activity and the BOLD response, experimental design, and analysis of fMRI data. - Ranganath

211. Advanced Topics in Neuroimaging (2)

Seminar-2 hours. Prerequisite: course 210 or consent of instructor, Restricted to 16 students, Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. (Same course as Neuroscience 211 and Neurobiology, Physiology, and Behavior 211.) (S/U grading only.)—II. (II.) Miller

212A. Developmental Psychology: Cognitive and Perceptual Development (4)

Seminar-4 hours. Prerequisite: graduate standing or consent of instructor, completion of undergraduate or graduate course on developmental psychology or human development. Theories and empirical find ings concerning human cognitive and perceptual development. Development of perception, memory, concepts (e.g., theory of mind, concepts about number), problem solving, and language from infancy to adolescence.—I. Ghetti, Goodman, Graf Estes, Lagattuta, Rivera

212B. Developmental Psychology: Social, **Emotional, and Personality Development**

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor, completion of an undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human social, emotional, and personality development. Development of emotions, moral reasoning and behavior, personality, self-concept, and social cognition from infancy to adolescence (may include adulthood). - Thompson

217. Behavioral Genetics (4)

Lecture—3 hours; laboratory/discussion—1 hours; term paper. Prerequisite: graduate standing. Restricted to 20 students. Review basic principles in genetics and select topics in molecular genetics with emphasis on behavior. Use of modern molecular methods to outline complex relationships between genes, environment, and behavior. Not open for credit to students who have completed course 251.—II, III. (II, III.) Trainor

218A. Fundamentals of Animal Behavior

Lecture/discussion-4 hours; discussion-1 hour. Prerequisite: consent of instructor; upper-division undergraduate introduction to the biology of behavior, such as course 101, 122, 123, Neurobiology, Physiology, and Behavior 102, 150, 152, Wildlife, Fish, and Conservation Biology 141, Entomology 104, or Animal Science 105. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as Animal Behavior 218A.)—I. (I.) Sih

218B. Fundamentals of Animal Behavior

Lecture/discussion-4 hours; discussion-1 hour. Prerequisite: consent of instructor; course 209A. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as Animal Behavior 218B.)-II. (II.) Sih

220. History of Psychology (4)

Lecture - 2 hours; seminar - 2 hours. Prerequisite: graduate standing in psychology or consent of instructor. A lecture-seminar on the history of psy chology and on the applicability of early psychological theory and research to contemporary investigations. Offered in alternate years. -

230. Cognitive Psychology (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the mental processes by which knowledge is acquired, manipulated, stored, retrieved and used. Offered in alternate years.—I. Long, Mangun

231. Sensation and Perception (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the role of sensory processes and perception in experience and their effects on behavior. Offered in alternate years.—III.

241. Attitudes and Social Influence (4)

Lecture/discussion-3 hours; term paper. Prerequisite: consent of instructor. Survey of theory and research in the field of attitudes and social influence. Topics include attitude definition and measurement, major theories of attitude formation and change, the relationship between attitudes and behavior, and recent directions and controversies. Offered irregularly.-I, II, III. (I, II, III.) Ledgerwood

243. Social Cognition (4)

Lecture/discussion-3 hours, term paper. Prerequisite: consent of instructor. Processes underlying the perception, memory, and judgment of social stimuli, the effects of social and affective factors on cognition, and the interpersonal consequences of those processes. Topics include automaticity/control, motivated cognition, person perception, stereotyping, attitudes, and persuasion. Not offered every year. -Pickett, Sherman

244. Stereotyping, Prejudice, and Stigma

Lecture/discussion-3 hours, term paper. Prerequisite: consent of instructor. This course examines the social psychological underpinnings of stereotyping, prejudice, and stigma, including sociocultural, motivational, and cognitive factors. Not offered every year. — I, II, III. (I, III.) Herek, Sherman

245. Social Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in social psychology.—III. (III.) Johnson, Pickett, Robins

247. Personality (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in human personality.—II. (II.) Robins

250. Comparative Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. The study of animal behavior in an evolutionary and comparative

251. Topics in Genetic Correlates of Behavior (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and experiment in the genetic contributions to animal and human behavior. May be repeated for credit when topic differs. Offered in alternate years.

252. Topics in Psychobiology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Critical study in a selected area of psychobiology. May be repeated for credit when content differs. Offered in alternate years.

261. Cognitive Neuroscience (4)

Lecture — 3 hours; discussion — 1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Neuroscience 223.)—III. (III.) Ranganath, Swaab

263. Topics in Cognitive Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Selected topics in language processing, memory, perception, problem solving, and thinking, with an emphasis on the common underlying cognitive processes. May be repeated for credit when content differs. Offered in alternate years.

264. Topics in Psycholinguistics (4)

Seminar—4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Discussion of fundamental issues in the psychology of language. May be repeated for credit when content differs. Offered in alternate years.

270. Topics in Personality and Social Psychology (4)

Seminar – 4 hours. Prerequisite: graduate standing or consent of instructor. Critical study of a selected area of personality or social psychology. May be repeated for credit when topic differs.—I. (I.)

272. Topics in Developmental Psychology

Seminar—4 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Selected topics in developmental psychology, including developmental neuroscience, memory development, infancy, cognitive development, social development, child maltreatment, children and law, perceptual development, emotional development, children at risk, and adolescence, with emphasis on developmental processes and developmental theory. May be repeated for credit. Not offered every year.

289A. Current Research in Psychology (2)

Seminar-2 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Contemporary theory and empirical research in specialized topics in psýchology. Topics include developmental attachment, social neuroscience, mental health, emotion, sexual orientation and identity. May be repeated for credit if topic differs. (Deferred grading only, pending completion of sequence.)

289B. Current Research in Psychology (2)

Discussion - 2 hours. Prerequisite: course 289A; graduate standing in Psychology or consent of instructor. Intensive examination of contemporary theory and empirical research on a specialized topic in psychology. Sample topics include developmental attachment, social neuroscience, culture and mental health, electrophysiology and cognitive neuroscience, emotion, implicit cognitive processes, sexual orientation and identity, and attention. May be repeated for credit if content differs. (Deferred grading only, pending completion of sequence.)

290. Seminar (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Seminar devoted to a highly specific research topic in any area of basic psychology. Special topic selected for a quarter will vary depending on interests of instructor and students.—I, II, III. (I, II, III.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (2-9)

(S/U grading only.)

299D. Dissertation Research (1-12)

Prerequisite: consent of instructor. (S/U grading

Professional Courses

390A-390B. The Teaching of Psychology

Discussion, lecture, practice. Prerequisite: advanced graduate standing in psychology or a closely related discipline and consent of instructor. Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evaluation. Practical experience in the preparation and presentation of material. (S/U grading only; deferred grading only, pending completion of sequence.)—II-III. (II-III.)

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, Iİ, III.)

Quantitative Biology and Bioinformatics

(College of Biological Sciences)

The interdisciplinary minor in Quantitative Biology and Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of quantitative approaches, and develop the interdisciplinary perspective that is now the foundation of modern biological research and training.

The minor in Quantitative Biology and Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sci-

Minor Program Requirements:

UNITS

Quantitative Biology and Bioinformatics18-24

Core Courses Programming: Computer Science Engineering 10 or 30 or the equivalent* 4 Quantitative Biology: Biological Sciences 132 or Mathematics 124...... 4 Bioinformatics: Computer Science Preparation Complete one course from the following: Applied Science Engineering 115; Biomedical Engineering 105; Computer Science Engineering 122, 130;

Mathematics 128A, 128B, 128C, 135A;
Statistics 130A, 131A, 141A
Restricted Electives 6-8
Complete two or more courses from the
following list to achieve a total of 18-24
units: Biological Sciences 134, 180L, 181,
183; Biomedical Engineering 102, 117,
140, 141, 151; Biotechnology 150;
Computer Science Engineering 165A, 166;
Evolution and Ecology 102, 103, 104,
175; Microbiology 105; Molecular and
Cellular Biology 123, 143, 182;
Neurobiology, Physiology, and Behavior
166, 167; one course from Environmental
Science and Policy 121 or Wildlife, Fish,
and Conservation Biology 122

Restrictions. No more than two upper division courses from a single department may be offered in satisfaction of the minor requirements. Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

*The programming requirement may be satisfied by previous experience and therefore may not entail college course credit. Please see your minor adviser for this determination and its possible impact on your unit requirements for the minor.

Minor Adviser. Consult the College of Biological Sciences Dean's office in 202 Life Sciences (530) 752-0410.

Emeriti Faculty

Whalen W. Lai, Ph.D., Professor Emeritus

The Major Program

Religion is a major force in human experience. It has shaped the world's history, literature, art, culture, politics, ethics, and economics. In addition to offering courses in all the major religious traditions (Judaism, Christianity, Islam, Hinduism, and Chinese and Japanese religions), the Religious Studies Program has developed cross-cultural courses dealing with religious symbols, myths, and rituals in written texts, art, theater, and film, and the internet, as well as, thematic courses dealing with such topics as religion and the body, the rise of fundamentalism, religion and science, and religion and violence.

The Program. The major introduces students to the academic study of religion. Students can choose from a broad range of courses both in the program itself and in other departments and programs—history, philosophy, psychology, sociology, anthropology, American studies, classics, and medieval studies. In addition to studying religious thought per se, students in the major can also study the way religion has shaped human behavior in such matters as family life, gender roles, ethics, artistic life, concepts of individual freedom, the pursuit of science, and economics. For some students, Religious Studies is an appropriate second major and combines well with anything from philosophy to international agricultural development, political science, and the phys-

Career Alternatives. Because of the program's focus on developing critical thinking, writing, and reading skills, students who major in Religious Studies are well prepared to enter a variety of careers, including teaching, the health professions, law, business, and government. In an increasingly global society, knowledge of the world's religious traditions and practices has become an essential part of a student's education.

A.B. Major Requirements:

	UNITS
Preparatory Subject Matter	20
(a) One course from the Religious Studie	s 1
series	4
(b) Four courses from other Religious Studower division offerings	dies . 16
Depth Subject Matter	40
Religious Studies 100 Nine upper division Religious Studies	4
courses'*	. 36
* Four of these courses may be upper div	
courses related to religion that are offere	d by
other departments and taken with the	
approval of a Religious Studies adviser.	
Total Units for the Major	60

Recommended. A reading knowledge of a for-

eign language is highly recommended. Course Equivalents. The major advisers have a

list of lower and upper division courses that can be substituted for courses suggested above.

Major Advisers. Consult the Program office.

Minor Program Requirements:

	UNITS
Religious Studies	20
Lower division course	4
Upper division courses	16
Religious Studies 100 required.	
Some substitutions from other departm	ents
or programs allowed with consent of	
adviser.	

Minor Advisers. Same as major advisers.

Honors and Honors Program. A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. Upon successful completion of the additional requirements of the College of Letters and Science Honors Program, individual students may be recommended by the program for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major.

Education Abroad Program. The Religious Studies program encourages students to study in the Summer Abroad program, the Quarter Abroad program, or the Education Abroad program. With the approval of a major adviser, applicable courses taken abroad may be accepted in the major or

Teaching Credential Subject Representative. See the Teaching Credential/M.A. Program on page 115.

Hebrew. Students interested in Hebrew courses should see http://classics.ucdavis.edu/hebrew.

Human Rights Minor. Students interested in the Human Rights minor should see http:// humanrightsminor.ucdavis.edu.

Jewish Studies. Students interested in Jewish Studies should see http://jewishstudies.ucdavis.edu

Courses in Religious Studies (RST) **Lower Division Courses**

1. Survey of Religion (4)

Lecture - 3 hours; discussion - 1 hour. Basic concepts introduced through readings of the primary religious literature. Discussion of central ideas (creation, history, law, prophecy, suffering, mysticism, asceticism, karma, reincarnation, moksha, etc.); readings from the Bible, Bhagavad Gita, the Koran, selections from Plato and early Buddhist writings. GE credit: ArtHum, Div, Wrt | AĆGH, AH, DD, ŎL, VL, WE. — II. (II.)

1A. Topics in Comparative Religion (4)

Lecture - 3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on a particular theme in a number of religious traditions: (A) Pilgrimage. Not available to those who have taken course 3A. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-I, II, III, IV. (I, II, III, IV.) Tezcan, Venkatesan

1B. Topics in Comparative Religion (4)

Lecture - 3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on a particular theme in a number of religious traditions: (B) Death and After-life. Not available to those who have taken course 3A. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—I, II, III, IV. (I, Iİ, III, İV.)

1C. Topics in Comparative Religion (4)

Lecture - 3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on a particular theme in a number of religious traditions: (C) Sacrifice; (D) Conversion. Not available to those who have taken course 3A. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.-I, II, III, IV. (I, II, III, IV.) Coudert

1D. Topics in Comparative Religion (4)

Lecture - 3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on a particular theme in a number of religious traditions: (D) Conversion. Not available to those who have taken course 3A. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-I, II, III, IV. (I, II, III, IV.)

1E. Topics in Comparative Religion (4)

Lecture - 3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on a particular theme in a number of religious traditions: (E) Fundamentalism. Not available to those who have taken course 3A. GE credit: ArtHum, Div, Wrt | AH or SS, OL, VL, WE.-I, II, III, IV. (I, II, III, IV.) Watenpaugh

1F. Topics in Comparative Religion (4)

Lecture - 3 hours; discussion - 1 hour. Introduction to the methods used in comparative religion, focusing on a particular theme in a number of religious traditions: (F) Contemporary Religion. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.-I, II, III, IV. (I, II, III, IV.) Elmore, Miller

1G. Myth, Ritual, and Symbolism (4)

Lecture-3 hours; discussion-1 hour. Myths, rituals and religious symbols found in a variety of religious traditions including examples from ancient and contemporary religious life. Variety of religious phenomena; validity of different approaches to the study of religion. Not open to students who have taken and received unit credit for course 2. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.-I, II. (I, II) Janowitz

1H. Religion and Law (4)

Lecture - 3 hours; discussion - 1 hour. Methods used in the study of religion, focusing on a particular theme in a number of religious traditions. Offered in alternate years. GE credit: AH, OL, WC, WE.-

10. Contemporary Ethical Issues (2)

Lecture - 2 hours. This course presents challenging, contemporary perspective. Rotating topics wil include Ethical Eating, Capital Punishment, Animal Rights. May be repeated for credit. GE credit: Wrt.—II. (IÍ.) Coudert, Janowitz

10A. Contemporary Ethical Issues (2)

Discussion - 1 hour; extensive writing. Prerequisite: concurrent enrollment in course 10 required. Restricted to students enrolled in course 10. GE topical breadth and diversity credit only with concurrent enrollment in course 10. Discussion of the readings assigned for course 10 and completion of a major research paper. May be repeated for credit. GE credit: ArtHum, Div, Wrt | AH, WE.-II. (II.) Coudert, Janowitz

11. Ethical Eating (4)

Lecture—3 hours; extensive writing. Prerequisite: concurrent enrollment in course 10 required. Restricted to students enrolled in course 10. Introduction to the complex and varied ethical, religious, and cultural meanings that food has had across the centuries and globe. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—

12. The Emergence of Judaism, Christianity and Islam (4)

Lecture - 3 hours; discussion - 1 hour. History of religion in the ancient Near East and Mediterranean, from the Persian period through the rise of Islam. Emphasis on historical and social contexts of the formation of new traditions, in particular Judaism, Christianity, and Islam. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, WC, WE.— I, II. (I, II.) Vidas

21. Hebrew Scriptures (4)

Lecture - 3 hours; term paper. Selected texts from the Hebrew Scriptures (Genesis-II Chronicles) and review of modern scholarship on the texts from a variety of perspectives (historical, literary, sociological, psychological). Course work is based on an English translation and no knowledge of Hebrew is required. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-I. (I.)

23. Introduction to Judaism (4)

Lecture/discussion-3 hours; term paper. Introduction to the study of religion using examples from the rituals, art and holy texts of Judaism. No prior knowledge of either Judaism or the study of religion is necessary. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WC, WE.—II. (II.)

30. Religions of South Asia (4)

Lecture—3 hours; term paper. Introduction to South Asian religions, including Hinduism, Buddhism, Islam, Jainism and Sikhism. Traces historical developments from Vedic texts and their ascetic reformulation by sages such as Yajnavalkya, Siddhartha Gautama, and Mahavira into our global present. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—I, II. (I, II.) Elmore, Venkatesan

40. New Testament (4)

Lecture - 3 hours; discussion - 1 hour. New Testament literature from critical, historical, and theological perspectives. GE credit: ArtHum, Wrt | AH, WC, WE.-I. (I.) Chin

42. Religion and Science Fiction (4)

Lecture-3 hours; term paper. Representations of actual and fictional religious movements in science fiction and fantasy writing and film. Examination of: the characteristics of religion and religiosity in fictional religious movements; the relationship between religion, science, and technology in modern speculative fiction. Offered irregularly. GE credit: ArtHum, Div, Wrt. - I, II, III, IV. (I, II, III, IV.)

45. Christianity (4)

Lecture/discussion—3 hours; term paper. Major concepts and practices in the Christian tradition. Survey of the history of Christianity and Christian expansion from antiquity to modern times. Offered in alternate years. - (I, II.)

60. Introduction to Islam (4)

Lecture/discussion-3 hours; extensive writing. Introduction to topics central to the Islamic tradition Muhammad, the Qur'an, Islamic law, theology, philosophy, cosmology, worship, and mysticism. Race and gender in Islam, Islamic revival, and varying experiences of Islam in different historical and cultural settings. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH, WC, WE. - (I.)

65C. The Qur'an and Its Interpretation (4)

Lecture/discussion-3 hours; extensive writing. The Qur'an, its history, its various functions in the lives of Muslims, and its different interpretations. Quranic themes such as God and humankind, nature and revelation, eschatology and Satan. Islam and other religions; women, gender, and sexuality. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-(III.) Tezcan

67. Modern Hinduism (4)

Lecture—3 hours; term paper. Historical survey of modern Hinduism from the early nineteenth century to the present. Topics include Rammohun Roy, Sir William Jones, and Mahatma Gandhi, nationalism, post-colonialism and diasporic religion. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH or SS, VL, WC, WE.-II. Elmore, Venkatesan

68. Hinduism (4)

Lecture—3 hours; writing. Hindu tradition from ancient to modern times. Multiplicity of religious forms within Hinduism with mention of Jainism, Buddhism, and Sikhism and their relation to the mainstream of Hindu religion. Offered in alternate years. GE credit: ArtHum, Ďiv, Wrt | AH, VL, WC, WE.-I.

69. Introduction to Hindu Mythology (4)

Lecture—3 hours; term paper. Survey of the major narrative traditions within Hinduism, including epic literature and local stories in oral, textual, visual and performative forms. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—Ven-

70. Religion and Language (4)

Lecture/discussion-3 hours; term paper. Provides students with a basic toolkit for studying religious discourse in a variety of traditions. Concentrates on the sacred and profane, the wondrous and ordinary, the mystical and reasonable. - I, II, III. (I, II, III.) Mil

75. Introduction to Chinese Philosophy (4)

Lecture/discussion-4 hours. Introduction to Chinese philosophy from classical pre-modern times; emphasis on basic concepts and their impact on social conduct; the Age of Philosophers, the Han synthesis, the medieval Buddhist contribution. Not offered every

80. Religion, Gender, Sexuality (4)

Lecture/discussion-3 hours; term paper. Constructions of gender and sexuality within one or more religious traditions, pre-modern and modern. Emphasis on the interaction between religious, medical, and ethical definitions of the human body and sexual behavior. Offered in alternate years. GE credit: Div, Wrt | AH, WE.-II.

90. Human Rights (4)

Lecture/discussion—3 hours; term paper. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. GE credit: ArtHum, Div | AH or SS, WC, WE.-I, II. (I, II.) Watenpaugh

98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)

99. Special Study for Lower Division Undergraduates (1-5)

(P/NP grading only.)

Upper Division Courses

100. Study of Religion: Issues and Methods

Lecture—3 hours; term paper. Principal issues and methods of Religious Studies and associated fields. GE credit: AH or SS, WC, WE.-III. (III.)

102. Christian Origins (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 40. Development of Christianity from the end of the first century through the major controversies of the fifth century. Emphasis on the relationship between the new religious movement and the Roman Empire, and issues of early Christian identity and diversity. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Chin

103. Medieval and Byzantine Christianity (4)

Lecture/discussion—3 hours; term paper. Prerequisite: courses 40 or 45. Christianity in Europe and the Near East from the year 600 to 1450. Focus on the development of Catholic and Orthodox traditions in ritual, art, and thought, with attention to interactions between regional groups, and Christian interaction with Islam. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—I, II. Chin

104. Christianity 1450-1700 (4)

Lecture/discussion-3 hours; term paper. History of Reformation conflicts over the authority of scripture, the nature of man and the universe, and the basis of morality with the goal of understanding how these conflicts laid the foundation for the modern world. Offered irregularly. GE credit: ArtHum, Div, Wrt. -

105. Christianity and Modernity, 1700-1920 (4)

Lecture—3 hours; term paper. Reaction of Christian critics and apologists to the profound cultural and scientific transformations resulting from the Scientific Revolution, the Enlightenment, and the advent of the modern critical study of religion. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—(II.) Coudert

106. Christianity in the Contemporary World (4)

Lecture — 3 hours; term paper. Christianity in the 20th and 21st centuries. Relationship of Christianity to globalization, industrialization, mass media, and the contemporary secular state. Focus on Christianity in America and developing nations, and on the rela-tionship of established Christian institutions to new Christian movements. Offered irregularly. GE credit: ArtHum, Div, Wrt | ACGH, AH, WC, WE.—I, II, III. (I, II, III.) Chin, Coudert

110. Life, Meaning and Identity (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 1 or 2 or upper division standing. Study of religious lives, the quest for meaning and for personal identity; how religions frame the problems of

life; how cultural and personal crises affect youthful identity; the nature and structure of dreams, myths, and ideals. Offered in alternate years. GE credit: AH, WE.-II. Elmore

115. Mysticism (4)

Lecture-3 hours; term paper. Prerequisite: one lower division Religious Studies course (except 10, 98, or 99). Historical and descriptive analysis of selected key figures in mystical traditions and readings of representative mystical texts. Analytic term paper. Offered every three-four years. GÉ credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—(III.)

120. Religion, Magic and Science (4)

Lecture - 3 hours; extensive writing. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as Science and Technology Studies 120.) Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.—(I.) Coudert

122. Studies in Biblical Texts (4)

Lecture—3 hours; term paper. Prerequisite: course 21. Study of a book from the Prophets or writings from critical, historical, and religious perspectives. May be repeated one time for credit in different subject area. GE credit: AH, WE.-III. (III.)

124. Topics in Judaism (4)

Lecture — 3 hours; term paper. Prerequisite: course 23. Examination of selected aspects of Jewish life, religion, or literature. Potential topics include: Jewish Perspectives on Jesus; The Golem: History and Legend; Sexuality and Gender in Late Antique Judaism and Early Christianity. May be repeated for credit when topic differs. -II.

125. Dead Sea Scrolls, Apocrypha, and Pseudepigrapha (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 21 or 40 or consent of instructor. Survey of the Dead Sea Scrolls, apocryphal and pseudepigraphical writings of Judaism and Christianity and their historical, social, and religious importance. GE credit: Wrt | AH, WC, WE.—II.

126. The Formation of the Rabbinic Tradition (4)

Lecture/discussion-3 hours; term paper. Prerequisite: courses 21, 23, 40 or 125. Survey of the classical rabbinic Jewish texts such as the Talmud and of the social and historical contexts of their production in Palestine and Babylonia. Offered in alternate years. GE credit: Wrt | WC.-II. (II.) Vidas

130. Topics in Religious Studies (4)

Lecture/discussion-3 hours; term paper. Prerequisite: one from course 1, 2, 3A, 3B, or 3C or consent of instructor. Thematic study of a phenomenon in more than one religious tradition or of the relationship between religion and another cultural phenomenon. Topics may include archeology and the Bible, women and religion, religion and violence. May be repeated for credit when topic differs. GE credit: WC, WE.-II, III.

131. Genocide (4)

Lecture/discussion-3 hours; term paper. Prerequisite: one course from courses 1, 2, 3A, 3B, 3C, 3E or permission of instructor. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. Offered in alternate years. GE credit: ArtHum, Div | AH or SS, VL, WC, WE.—(I.) Watenpaugh

132. Topics in Mediterranean Ancient

Lecture/discussion—3 hours; term paper. Prerequisite: course 21, 40 or consent of instructor. Thematic study of specific sociological, literary or theological theme across the religious traditions of the ancient Mediterranean/Near East: Greek and Roman religions, Judaism, Christianity, Zoroastrianism, Manichaeism, etc. Topics may include creation, sacrifice, priesthoods, prophecies, holy books, the afterlife. Offered in alternate years. May be repeated two times for credit when topic differs. GE credit: AH, WC, WE.—I. Vidas

134. Human Rights (4)

Lecture/discussion—3 hours; term paper. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. Students who have completed course 90 are ineligible to receive credit for course 134. GE credit: ArtHum, Div | AH or SS, WC, WE.—III, IV. (III, IV.) Watenpaugh

135. The Bible and Film (4)

Lecture - 2 hours; term paper; film-viewing - 3 hours. Prerequisite: Humanities 10 recommended. Examination of the uses of the Judeo-Christian scriptures in film. Topics include dramatic depictions of biblical stories, the tension between science and religion, allegorical treatments of biblical themes, and the problems of religious conviction.—III.

140. Christian Theology (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 40; course 102 recommended. Historical and systematic introduction to Christian doctrine, with attention to divergent traditions and the problem of orthodoxy and heresy. GE credit: AH, WC, WE.-I. (I.)

141A. New Testament Literature: Synoptic Gospels (4)

Lecture — 3 hours; discussion — 1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Synoptic Tradition—Matthew, Mark, Luke and Acts. Offered every third year to alternate with 141B, 141C. GE credit: ArtHum, Wrt | AH, WC, WE.

141B. New Testament Literature: John (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Johannine Tradition—the Gospel and letters of John. Offered every third year to alternate with 141A, 141C. GE credit: ArtHum, Wrt | AH, WC, WE.—III.

141C. New Testament Literature: Paul (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 40. Life and thought of the early Church as reflected by the Pauline tradition—the letters of Paul. Offered every third year to alternate with 141A, 141B. GE credit: ArtHum, Wrt | AH, WC, WE.-

143. New Testament Apocrypha (4)

Lecture—3 hours; term paper. Prerequisite: course 40. Extra-canonical Christian writings and their reception, from antiquity to the present. Emphasis on the importance of New Testament figures both as literary characters and as authors within different Christian traditions. Offered irregularly. GE credit: ArtHum, Div, Wrt.-I, II, III. (I, II, III.) Ćhin

144. History of the Bible (4)

Lecture — 3 hours; term paper. Prerequisite: course 23 or 40. History of the formation of the Christian biblical canon, with emphasis on differences between Christian traditions; survey of translations and adaptations of the Bible in and outside of Western Christianity; and brief history of issues in biblical interpretation. Offered irregularly. GE credit: ArtHum, Div, Wrt.—I, II, III. (I, II, III.) Chin

145. Contemporary American Religion (4)

Lecture — 3 hours; discussion — 1 hour. Prerequisite: course 40 and History 17B recommended. Examination of several major movements and phenomena in twentieth-century American religion. Offered in alternate years. GE credit: ACGH, AH, DD, WE.-II.

150. Religious Ethics (4)

Lecture/discussion-3 hours; term paper or discussion. Prerequisite: course 10 recommended. Study of the religious bases of ethics through concentration on the ethical tracts of one major tradition, or through a comparison of the attitudes of two or more traditions to a common ethical issue. GE credit: AH, WE.-Chin, Coudert

156. Religion and the Performing Arts in India (4)

Lecture-3 hours; term paper. Prerequisite: course 30, 68, or consent of the instructor. Survey of religion and performing arts in India. Emphasis on the influence of colonialism, nationalism, and regionalism on the history of Indian performing arts. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—II. Venkatesan

157. Hindu Women and Goddesses (4)

Lecture - 3 hours; term paper. Prerequisite: course 10 recommended. Hindu goddesses and the religious lives of Hindu women in India and the diaspora. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—I, III. (I, III.) Venkatesan

160. Introduction to Islamic Thought (4)

Lecture - 3 hours; extensive writing. Prerequisite: course 60 recommended. The development of Islamic thought from the first centuries of Islam to the eighteenth century. Theology, philosophy, ethics, Sufism, historiography, political theory, fundamentalism, al-Farabi, al-Ghazzali, Ibn Rushd, Tusi, Ibn al-Arabi, Rumi, Molla Sadra, Ibn Khaldun, Ibn Abd al-Wahhab. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH, WC, WE.—II.

161. Modern Islam (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 60 or consent of instructor. The response of Islam to modernity: secularism, reformism, fundamentalism. Islam and imperialism, women, media and immigration. Islamic modernism, political Islam, Islam in Europe and America. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—II. (II.)

162. Introduction to Islamic Law (4)

Lecture — 3 hours; extensive writing. Prerequisite: course 60 recommended. The development of Islamic law in the formative centuries of Islam, ca. 600-1000, as well as its adaptation to changing economic, social, and political conditions in subsequent periods. Legal schools, legal theory, the Shari'a, reformist movements, human rights. Offered in alternate years. GE credit: ArtHum or SocSci, Div. Wrt | AH, WC, WE.—II. Tezcan

163. The Social Life of Islam (4)

Lecture-3 hours; term paper. Introduction to culture and social life in Muslim societies. Focus on the plurality of traditions in Muslim faith, reason, and everyday practice. Special attention to Muslim rituals, ethical values, verbal genres, family life, sexuality and veiling, and youth culture. Offered in alternate years.—II. Miller

165. Islam in Asia (4)

Lecture/discussion - 3 hours; extensive writing. Islam as a lived religion in the Indian sub-continent, Central Asia, China, and Southeast Asia. Emphasis is on primary sources studied comparatively and historically. GE credit: ArtHum, Div, Wrt.—III.

167. Iraq (4)

Seminar—3 hours; term paper. Origins, causes and ethical challenges of conditions in Iraq; larger historical, cultural and ethical dimensions of mass violence, war, liberation, neocolonialism, terrorism and resistance. - III. (III.) Watenpaugh

170. Buddhism (4)

Lecture-3 hours; term paper. Buddhism in its pan-Asian manifestations, from its beginning in India to its development in Sri Lanka and Southeast Asia, Central Asia, China and Japan; teachings and practices, socio-political and cultural impact. Offered in alternate years. GE credit: AH, VL, WC.-III. Elmore

172. Ch'an (Zen) Buddhism (4)

Lecture/discussion-3 hours; term paper. Doctrines and methods of the Ch'an Buddhism, both ancient and modern. Review of ritual techniques, including meditation.-II.

175A. Chinese Intellectual Traditions: Daoist Traditions (4)

Lecture/discussion-4 hours. Prerequisite: Chinese 11 or a course in Chinese history recommended. English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist divinities; Daoism and the state. Offered in alternate years. (Same course as Chinese 100A) GE credit: ArtHum, Div, Wrt | AH, WC. (II.) Halperin

189. Senior Colloquium (4)

Seminar - 3 hours; term paper. Prerequisite: consent of instructor. Primarily for seniors in Religious Studies. Discussion in depth of a problem in religion which requires the methods of several disciplines and is important in the encounter between religions.—Iİ. (II.)

190. Seminar (4)

Seminar — 3 hours; term paper. Prerequisite: consent of instructor; required of all Religious Studies majors. Allows majors to integrate their disciplined study of the field. Emphasis on current scholarly debate about the methods for analyzing and comparing diverse religious traditions. - (I.)

194HA-194HB. Special Study for Honors Students (1-5)

Independent study. Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

201. Methods and Issues in Religious Studies (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing. Focuses on controversies in the study of comparative religion. How is religion best defined? Are there methods unique to the study of religion? What does the study of religion contribute to the study of society in general? May be repeated two times for credit when topic differs. Offered in alternate years. (III.)

205. Religion and Media (4)

Lecture/discussion-3 hours; term paper. Many communities are finding global media technologies useful for religious practice. This course examines how religious revitalization is historically situated. A phenomenological approach will enable students to situate media and religion within the social and material world of practitioners. - IV. (IV.) Miller

210. Religion and Postcoloniality, or Savages, Civilization, and Spirituality (4)

Seminar - 3 hours; term paper. Prerequisite: graduate standing. This course examines relations between religion and colonialisms. Using specific historical situations it explores some of our thorniest theoretical problems. Students acquire a solid understanding of postcolonial theory and the historical tools to critically engage religion in the present. - III. (III.) Elmore

212. Religion and Violence (4)

Seminar—3 hours; term paper. Comparative and critical study of the ideological, cultural, and theological relationship between forms of violence and religion and religious practice. Offered in alternate years. - (II.) Watenpaugh

215. Topics in the History of Christianity (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing. Selected topics in the history of Christianity. Intended for graduate students seeking to do advanced work in the study of Christianity. May cover issues in Christian thought from antiquity, the middle ages, the early modern or modern period. May be repeated for credit when topic differs. Offered irregularly. — I, II, III. (I, II, III.) Chin, Coudert

299. Directed Research (1-12)

(S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Major Program

The Russian major introduces students to a culture rich in art, music, theater, film, language, and litera-ture. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations

The Program. The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions

Internships and Career Alternatives. Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

Honors and Honors Program. The honors program comprises at least one quarter of study under course 194H, which will include a research paper. For details consult the major advisor.

Study Abroad. Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and year-long programs spon-sored by CIEE and ACTR in St. Petersburg and Mos-

Prerequisite Credit. Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

Courses in Russian (RUS)

Lower Division Courses

Course Placement. Students who have learned Russian at home must consult the department for placement instructions. Students with two years of Russian in high school normally continue in Russian 2; those with three years, Russian 3; those with four years, Russian 4

1. Elementary Russian (5)

Discussion-5 hours; laboratory-1 hour. Introduction to Russian grammar and development of all language skills in a cultural context with special emphasis on communication. (Students who have successfully completed Russian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed.) GE credit: AH, WC.-I. (I.)

1A. Accelerated Intensive Elementary Russian (15)

Lecture/discussion-15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Russian grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed course 1, 2, or 3-IV. (IV.) Arnett

2. Elementary Russian (5)

Discussion-5 hours; laboratory-1 hour. Prerequisite: course 1. Continuation of grammar and lan guage skills developed in course 1. GE credit: AH, WC.-II. (II.)

3. Elementary Russian (5)

Discussion-5 hours; laboratory-1 hour. Prerequisite: course 2. Continuation of grammar and lan guage skills developed in course 2. GE credit: AH, WC.—III. (III.)

4. Intermediate Russian (4)

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 3. Grammar review and conversational practice. GE credit: AH, WC.—I. (I.)

5. Intermediate Russian (4)

Discussion—4 hours; laboratory—1 hour. Prerequisite: course 4. Grammar review. Introduction to literature. Conversational practice. GE credit: AH, WC.-II. (II.)

6. Intermediate Russian (4)

Discussion-4 hours; laboratory-1 hour. Prerequisite: course 5. Grammar review. Intermediate conversation and continued reading of literature. GE credit: AH, WC.—III. (III.)

45. Russian Fantasy and Science Fiction (4)

Lecture/discussion-3 hours; extensive writing. Genres of fantasy and science fiction in Russian literature from pre-revolutionary to post-Soviet times. Topics include the role of science and the supernatural in literature, history and types of science fiction. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—III. (III.) Stuchebrukhov

98. Directed Group Study (1-5)

Discussion - 1-5 hours. (P/NP grading only.)

99. Special Study for Undergraduates (1-5) (P/NP grading only.)

Upper Division Courses 101A. Advanced Russian (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 6 or consent of instructor. Topics in Russian. Grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversation exercises utilizing literary and colloquial variants of current Russian speech. GE credit: AH, WC.—I. (I.)

101B. Advanced Russian (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 101A or consent of instructor. Continuation of course 101A. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech. GE credit: AH, WC.—II. (II.)

101C. Advanced Russian (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 101B. Continuation of course 101B. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech. GE credit: AH, WC.—III. (III.)

102. Russian Composition (4)

Lecture/discussion—3 hours; tutorial—1 hour. Prerequisite: course 6 or consent of instructor. Practice in writing Russian. One composition on a different topic each week. Topics include history, geography, politics, and literature of Russia; comparison of Russian and American lifestyles; current events. Conducted in Russian. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—II.

103. Literary Translation (4)

Discussion—3 hours. Prerequisite: course 101C. Translation of Russian literary texts into stylistically equivalent idiomatic English. Offered in alternate years.—(III.)

105. Advanced Russian Conversation (4)

Recitation—3 hours; practice—1 hour. Prerequisite: course 6. Intensive conversational practice and discussion based on current events and contemporary texts. Offered in alternate years. GE credit: AH, OI.—II

122. 19th-Century Russian Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101C when the course offered in Russian; no prerequisite when offered in English. Students who have taken course 121 and course 127 will not be allowed to take Russian 122. Study of Russian literature (prose fiction, drama, poetry) from the period between 1800 and the end of the 19th century. May include authors like Pushkin, Lermontov, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekov. Offered alternately in English or Russian. GE credit: ArtHum, Wrt | AH, WC, WE.—I, II, III. [I, II, III.] Stuchebrukhov

123. Twentieth-Century Russian Prose (4)

Lecture—3 hours; term paper. Prerequisite: course 101C or consent of instructor. Examination of various trends including Symbolism, Neorealism, and Socialist Realism in development of prose. Readings from such writers as Bely, Gorky, Sholokhov, Pasternak, Solzhenitsyn and others. Conducted in Russian. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.—I.

124. Twentieth-Century Russian Literature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101C when offered in Russian; no prerequisite when offered in English. Study of Russian literature (prose, drama, poetry) from the period between 1900 and the end of the 20th century. May include authors like Y. Olesha, M. Bulgakov, D. Kharms, and L. Petrushevskaia. Offered alternately in English or Russian. Not open for credit to students who have taken courses 123 or 128. GE credit: AH, WC, WE.—I, II, III. (I, II, III.) Kaminer

126. The Russian Theater (4)

Lecture—3 hours; term paper. Prerequisite: course 101C or consent of instructor. The main works of Russian dramatists from Fonvizin to the present, including Gogol, Turgenev, Tolstoy, Ostrovsky, Chekhov, Blok, Mayakovsky, Kharms. Conducted in Russian. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.

128. Twentieth-Century Russian Poetry (4)

Discussion—3 hours; term paper. Prerequisite: course 101C or consent of instructor. Introduction to principles of Russian versification followed by historical and poetic analysis of the following figures: Brjusov, Blok, Akhmatova, Mandelshtam, Esenin, Mayakovsky, Khlebnikov, Pasternak, Evtushenko, Voznesensky, and Brodsky. Conducted in Russian. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.—III.

129. Russian Film (4)

Lecture/discussion—3 hours; film viewing—3 hours. Prerequisite: completion of Subject A requirement. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet empire; gender and the nation in Russian film. Course taught in English; films are in Russian with English subtitles. Offered in alternate years. (Same course as Film Studies 129.) GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—(II.)

130. Contemporary Russian Culture (4)

Lecture—3 hours; term paper. Current trends in Russian culture and the relationship between artists and the government. Topics include recent changes in the cultural scene, postmodernist trends in literature, visual art, film, and theater. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.— (III.)

133. Post-Soviet Literature (4)

Lecture/discussion—3 hours; term paper. Major authors and trends in Russian literature in post-1991 period. Discussion of impact of economic, social, and cultural turmoil of post-Soviet period on literary marketplace. Analysis of development of literary postmodernism in Russia. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.—I. (I.) Kaminer

139. Pushkin (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 101C or consent of instructor. The course covers three major periods of Pushkin's poetical works: his early Lyceum verse; his poetry of the early 1820s; and the mature period. The course also includes Pushkin's prose fiction, drama, and journalism. GE credit: ArtHum, Div | AH, WC, WE.—I. (I.)

140. Dostoevsky (in English) (4)

Lecture—3 hours. Reading and analysis of Dostoevsky's principal works such as Crime and Punishment, The Idiot, The Brothers Karamazov, and The Diary. Study of social and political views as reflected in Dostoevsky's works. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—(II.)

141. Tolstoy (in English) (4)

Lecture—3 hours. Study of Leo Tolstoy's literary evolution and moral quest. Readings include his Confession, a major novel such as War and Peace or Anna Karenina, and representative shorter fiction. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—1.

142. Women's Autobiography (in English) (4)

Lecture—2 hours; discussion—1 hour; term paper. Prerequisite: any introductory course in literature. An examination of Russian women's autobiography from the 18th through the 20th centuries, emphasizing the way in which the genre of autobiography serves as a means of the writer's creation of herself, as opposed to her definition by others. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

143. Chekhov (in English) (4)

Lecture/discussion—3 hours; extensive writing. Examination of Chekhov's short stories and major plays, such as The Seagull, Uncle Vanya, The Three Sisters, The Cherry Orchard, and Ivanov, in the broader cultural context of European and Russian fin de siecle. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.

150. Russian Culture (4)

Discussion — 3 hours; term paper. Knowledge of Russian not required. Study of Russian culture in nineteenth and twentieth centuries. Brief introduction of the beginnings up to nineteenth century. Russian art, music, philosophy, church, traditions, and daily life. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—II. (II.)

192. Research Essay (2)

Prerequisite: a Russian literature course (may be taken concurrently). A research essay, based on primary and secondary sources, dealing in depth with a topic arising from or related to the prerequisite literature course. May be repeated for credit. GE credit: AH, WC, WE.

194H. Special Study for Honors Students (4)

Independent study—4 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Russian studies.

195H. Honors Thesis (4)

Independent study—4 hours. Prerequisite: course 194H. Writing an honors thesis, under the direction of a faculty member, on a topic in Russian studies.

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

The Program. Science and Society is an interdepartmental teaching program administered by the College of Agricultural and Environmental Sciences that offers students throughout the campus the opportunity to discover the connections that link the social, biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.

The Science and Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Science and Society courses, upper division courses from both the College of Agricultural and Environmental Sciences and the College of Letters and Science in the areas of history and philosophy of science, policy and decision making, communication of science, and culture, ethics and applications.

Science and Society 22-27 Science and Society 1

Science and Society 2, 5, 15, 20, 30 ... 2-4 One course from each of the four following

History and Philosophy of Science: Community and Regional Development 118, 162, History 185A, 185B, History and Philosophy of Science 150, Nature and Culture 100, Philosophy 107, 108, Policy and Decision Making: Agricultural and Resource Economics 120, 147, 150, Consumer Science 100, Environmental Science and Policy 160, 165, Political Science 175, Sociology 155, or Communication of Science: Agricultural Education 172, Agricultural Management and Rangeland Resources 122, Anthropology 120, Communication 115, 130, 135, 138, 140, Community and Regional Development 174, Linguistics 163, Political Science 165 3-4 Culture, Ethics and Applications: Agricultural Management and Rangeland Resources 101, Community and Regional Development 142, Environmental Science and Policy 126, 164, Fiber and Polymer Science 110, International Agricultural Development 104, Plant Biology 151, Plant Pathology 140, or Sociology 144......34 Science and Society 1203

Minor Adviser. D. M. Rizzo

Related Courses. See Agricultural and Resource Economics 120, 147, Agricultural Management and Rangeland Resources 1, 101, 122, Communication 115, 140, Community and Regional Development 118, 142, 162, 174, Avian Sciences 13, Environmental Science and Policy 126, 160, 164, 165,

Fiber and Polymer Science 110, History 185A, 185B, History and Philosophy of Science 150, Nature and Culture 100, Plant Biology 12, Plant Pathology 140, Political Science 175, Wildlife, Fish, and Conservation Biology 10.

Courses in Science and Society (SAS)

Lower Division Courses

1. Critical Inquiry into Contemporary Issues (4)

Lecture/discussion-3 hours; discussion-1 hour. Contemporary issues, including global population trends, economic and environmental changes, cultural diversity and biodiversity, nutrition and food safety, fiber and textiles, changing consumer cultures. Inquiry processes emphasize ethics, multiple disciplines, and multiple perspectives. GE credit: Sci-Eng or SocSci, Div, Wrt | SE or SS, WE.—I. (I.) Cas-

2. Feeding the Planet: Influences on the Global Food Supply (3)

Lecture/discussion - 3 hours. Scientific principles and dynamic interactions involved in food production, food processing, nutrition, shelf life and marketing from differing viewpoints. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. GE credit: SciEng or SocSci, Wrt | SE, SL, SS.—II. (II.) Bostock, Davis

3. Science, Technology and Society (4)

Lecture — 4 hours. Impact of developments in science and technology on the individual in society and how economics, politics, culture and values affect technological development. Not open for credit to students who have completed former course Applied Behavioral Sciences 18. GE credit: SciEng or SocSci, Wrt | SE, SS. - (III.)

4. Water in Popular Culture (3)

Film viewing -2 hours; discussion -1 hour; lecture-1 hour. Importance of water in many aspects of society as revealed through a survey of its depictions in film. GE credit: SciEng or SocŚci, Wrt | SE, SL, SS.-I. (I.) Pasternack

5. Pathways to Discovery: Science and Society (3)

Lecture/discussion—3 hours. Highlights a current issue and/or controversy found in contemporary society and looks at how this problem impacts and is affected by the physical, social and biological sciences. Course varies with topic offered. May be repeated two times for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt | SE, SS.

7. Terrorism and War (4)

Lecture—3 hours; discussion—1 hour; term paper. Exploration of terrorism and war from science and social sciences perspectives. Terrorist cells and groups; biological, chemical, nuclear, and environmental terrorism; intelligence gathering and espio nage; military strategy; genocide; epochal wars; clash of civilizations; nation building; and future global scenarios. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE.-III. (III.) Carey

8. Water Quality at Risk (3)

Lecture - 2 hours; discussion - 1 hour. Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination.

Decoding popular media coverage of water quality and water contamination. (Same course as Environmental Science and Management 8.) Not open to students who have successfully completed Environ-mental and Resource Sciences 8. (Formerly Environmental and Resource Sciences 8.) GE credit: SciEng or SocSci, Wrt | SE, SL, SS, WE.-II. (II.) Hernes

9. Crisis in the Environment (3)

Lecture—3 hours. Explores contemporary environmental issues by examining the causes, effects and solutions to a wide range of environmental problems facing the global ecosystem. Integrated discussion of political, societal and economic impact linkages with environmental problems. GE credit: SciEng or Soc-Sci, Wrt | SE or SS, WE.—III. (III.) Dahlgren, Houlton

10. Water, Power, Society (3)

Lecture - 2 hours; discussion - 1 hour. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water prob-lems. (Same course as Hydrologic Science 10.) GE credit: SciEng or SocSci, Wrt | SE, SS.—III. (III.) Fogg

11. California Geography (3)

Lecture — 2 hours; discussion — 1 hour; term paper. Introduction to cultural/societal patterns of California and their relationship to natural resources, biomes, geomorphology, and physiography. Focus on diversity of California's environments and their impacts on and alterations by human activities. Environmental issues in the State. GE credit: SciEng, Soc-Sci, Wrt | SE or SS, WE.-I. (I.) Richards

12. Plants and Society (4)

Lecture - 3 hours; extensive writing - 3 hours. Prerequisite: high school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies. Not open for credit to students who have complete Plant Biology 12. (Former course Plant Biology 12.) (Same course as Plant Sciences 12.) GE credit: SciEng or SocSci, Div, Wrt | SE, SS.-I, İI, III. (I, II, III.) Fischer, Jasieniuk, Nevins, Tian

13. Disease and Society (3)

Lecture—3 hours. Limited enrollment. Introduction to the concept of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. GE credit: SciEng or SocSci | SE or SS, SL.-II. (II.)

15. AIDS and Society (4)

Lecture - 3 hours; discussion - 1 hour. Biology of HIV transmission and AIDS and how a biological agent acts on and influences the structure of contemporary society. Includes the psychology of risk and stigma, gender issues, changes in social relationships and public policy, global implications. GE credit: SciEng or SocSci, Div, Wrt | SE, SS.—III. (III.) Radke

18. GIS and Society (3)

Lecture—2 hours; Laboratory—3 hours; term paper or discussion—0.3 hours. Geographic Information Systems (GIS) as a spatial technology and a tool for change in society. Evaluate physical, biological and social impact of GIS in the context of case studies such as land, water and community planning. GE credit: SciEng or SocSci, Wrt | QL, SE, SL, SS, VL.— III. (III.) Wallender

20. Genetics and Society (4)

Lecture — 3 hours; discussion — 1 hour. Not open for credit to students who have completed course 140. Basic concepts of genetics, modern methods of biotechnology, the process of scientific discovery and the public perception of the process; present and future impact of genetics on society. GE credit: Sci-Eng or SocSci, Wrt | OL, SE, SL, SS, WE.—I, II. (I, II.) Coaker, Cook, Epstein, Ronald

25. Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences

Lecture - 2 hours; discussion - 1 hour. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty. GE credit: SciEng or SocSci, Div, Wrt | OL, QL, SE, SL, SS, VL, WC, WE.—II. (II.)

25V. Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (3)

Web virtual lecture; web electronic discussion—2 hours; autotutorial—5 hours; extensive writing—2 hours. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty. Students cannot take both course 025 and 025V for credit. GE credit: SE or SS, DD, OL, QL, SL, VL, WC, WE.-II. (II.) Bloom

30. Mushrooms, Molds, and Society (3)

Lecture/discussion - 3 hours. Fungi as organisms with which humans interact daily, societal issues arising from these interactions. Fungi in medicine, religion, agriculture, and industry, as well as cultural perceptions of fungi. GE credit: SciEng or SocSci, Wrt | SE, SS. -I, II. (I, II.) Gilchrist, Gordon, Rizzo

40. Photography: Bridging Art and Science

Lecture/discussion-2 hours; studio-3 hours. Photography is used to explore the common ground between art and science. Photographic processes, creativity and aesthetics, chaos and order, principles of space, time and light. Photographic interpretation and documentation of the natural world. GE credit: ArtHum or SciEng or SocSci, Div, Wrt | AH or SE, SL, VL, WE.—III. (III.) Nathan

42. Earth, Water, Science, Song (3)

Lecture - 2 hours; studio - 3 hours. Fusion of water and soil science with performing arts. Creative communication of scientific concepts and facts through exercises in song writing and poetry. Design, discuss and conduct public performances related to the functioning of the natural world. GE credit: ArtHum or SciEng | AH, OL, SE.-II. (II.) Silk

70A. Genetic Engineering in Medicine, Agriculture, and Law (5)

Lecture - 5 hours. Historical and scientific study of the impact of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised. Offered in a distance-learning format. Not open to students who have taken Biological Sciences 1A, Biological Sciences 2A or equivalent, or course 20. Concurrent enrollment in a two unit seminar course, Plant Biology 98, is required. GE credit: SciEng or SocSci | SE, SL, SS.—II. (II.) Harada

90A. Issues in Environmental and Resource Sciences (2)

Seminar-2 hours; two Saturday field trips. Prerequisite: limited to lower division students. Discussion of historical and current issues in environmental and resource sciences. Lectures, reading and field trips will provide background for selected topics. — I, Iİ. (I,

90B. Observing and Writing in Biology (2)

Seminar — 1 hour; laboratory — 1 hour; term paper. Students will observe the interactions between microscopic organisms, conduct simple laboratory experiments, describe and analyze observations and discuss scientific observations and writing.

90C. Herbal Medicine: Relevance for the 21st Century (2)

Seminar - 2 hours. Medicinal usage of plants from biological, historical, and cultural perspectives. Broad contexts of holistic and scientific paradigms for understanding herbal medicine. Saturday field trip to teach herb identification. - II. (II.)

90D. Saving Endangered Plant Species: Problems and Prospects (2)

Seminar-2 hours. Endangered plant species illustrate the value of conservation biology. Topics include societal issues and plant germplasm conservation, comparisons to animal conservation issues, and the economics of and justification for preserving endangered plants.—I. (I.) Parfitt

90E. Biotechnology—a New Era, a New Struggle (2)

Seminar-2 hours. Animal biotechnology and its applications. Discussion topics include potential societal impacts of various technologies, factors shaping public opinion, and ethical and moral questions arising from new biotechnology applications.—I. (I.)

90F. Food Distribution in a Hungry World (2)

Seminar — 2 hours. The biological, technological, environmental, and socioeconomic factors related to food distribution systems at local, regional, national, and international levels. The potential for increasing world food supply by reducing losses between harvest and consumption. —I. (I.)

90G. Science, Society and the Environment

Seminar-2 hours. Contemporary environmental issues, scientific approaches to addressing these issues, and accompanying societal and ethical considerations. —I. (I.) Wilson

90X. Lower Division Seminar (1-4)

Seminar — 1-4 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Science and Society through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May be repeated for credit. Limited enrollment. - Í, II, III. (I, II, III.)

91A. Explorations in Science and Society: **Cultures and Identities (2)**

Seminar - 1 hour; extensive writing or discussion - 1 hour. Prerequisite: participation in the summer Special Transitional Enrichment Program (STEP) or consent of instructor; course 1 concurrently. Exploration of linkages among identity and culture, multi-disciplinary inquiry, and agricultural and environmental science issues. - I. (I.)

91B. Explorations in Science and Society: Leadership and Collaboration (2)

Seminar—1 hour; extensive writing or discussion—1 hour. Prerequisite: course 91A or consent of instructor. Extends understanding of culture and identity to issues of leadership, collaboration, and social action in science and society. Includes a mandatory two and half day retreat.—II. (II.)

91C. Explorations in Science and Society: Engagement (2)

Seminar-1 hour; internship-3 hours. Prerequisite: course 91B or consent of instructor. Explorations of the concept of engagement in science and society from philosophical and practical perspectives. Exploration of the concept of engagement based on lea tures, self reflection, discussions and three hours of K-12 school internships per week. — III. (III.)

92. Internship in Science and Society (1-12)

Internship—3-36 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship on and off campus, in the community, or in institutional settings. (P/NP grading only.)

97T. Tutoring in Science and Society (2-3)

Discussion/lecture-6-9 hours. Prerequisite: lower division standing; completion of course being tutored; consent of instructor. Tutoring in undergraduate Science and Society courses. Assisting with leading discussion groups under supervision of instructor(s) and teaching assistants. Acting as liaison between the students and course instructor(s) to foster effective communication and interaction. May not be repeated. (P/NP grading only.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Discussion - 3-15 hours. Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

Upper Division Courses 120. Science and Contemporary Societal Issues (3)

Lecture/discussion-3 hours. Prerequisite: upper division standing. Study of a contemporary societal issue/problem emphasizing critical thinking with information drawn from several disciplines. Multiple instructors illustrate the necessity of an interdisciplinary and cooperative approach in solving important issues. Topic will vary. May be repeated one time for credit. Course not offered every year. GE credit: Sci-Eng or SocSci, Wrt | SE, SS.—III. (III.)

130. Contemporary Leadership (4)

Lecture—3 hours; seminar—1 hour. Prerequisite: consent of instructor. Leadership, including issues, skills, and practices as they relate to individuals, organizations, diverse social settings and communities. Written and verbal communications, personality styles for collaborative work, and ethics. Limited enrollment. GE credit: OL.-II, III. (II, III.) King

135S. Biodiversity and Society in South

Lecture/discussion-3 hours; term paper or discussion-2 hours; fieldwork-2 hours. Prerequisite: acceptance into the Quarter Abroad Program "Biodiversity & Conservation in South Africa" and attendance in South Africa. Biodiversity in social context of South Africa; race, politics and conservation; use of indiaenous plants and animals; weeds; water issues; ecotourism. Weekend and other field trips Not offered every year. GE credit: SciEng or SocSci, Div, Wrt | SE, SS.—II. Cranston, Gullan

140. Genetics and Social Issues (4)

Lecture/discussion-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C. Social issues arising from the development and use of modern methods of biotechnology. Presentation, evaluation, and critical discussions of the present and future impact of genetics on society. Not open for credit to students who have completed course 20. GE credit: SocSci, Wrt.-II. (II.) Epstein

190X. Science & Society Seminar (1-4)

Seminar — 1-4 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Science and Society. Emphasis upon student participation in learning. Emphasis upon student participation in learning. May be repeated for credit. Limited enrollment. (P/NP grading only.)—I, II, III. (I, II, III.)

192. Internship in Science and Society (1-12)

Internship – 3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship on or off campus, in the community, or in institutional settings. (P/NP grading only.)

197T. Tutoring in Science and Society (1-5)

Tutoring — 3-15 hours. Prerequisite: upper division standing; completion of course being tutored or the equivalent. Tutoring of students in Science and Society courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another Science and Society course. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study in Science and Society

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

Graduate Courses

298. Group Study (1-5)

Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only.)

299. Graduate Research (1-12)

Prerequisite: graduate student and consent of instructor. May be repeated for credit. (S/U grading only.)

Professional Course 390. Teaching Methods in Science and Society (1)

Discussion - 1 hour. Prerequisite: graduate level and consent of instructor. Practical experience in methods and problems related to teaching Science and Society courses. Discussion of critical pedagogies specific to teaching of science-societal issues, preparing for and conducting discussion sessions, analyses of texts and supporting material, formulation of assignments, exams. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Science and **Technology Studies**

(College of Letters and Science) Joseph Dumit, Ph.D., Program Director

Program Office. 1240 Social Sciences and Humanities Building (530) 752-0703; http://sts.ucdavis.edu

Committee in Charge

Thomas Beamish, Ph.D. (Sociology) Mario Biagioli, Ph.D. (Science and Technology Studies, School of Law)

Patrick Carroll, Ph.D. (Sociology) Timothy Choy, Ph.D. (Anthropology, Science and

Technology Studies)

Marisol de la Cadena, Ph.D. (Anthropology) Joseph Dumit, Ph.D. (Anthropology, Science and Technology Studies)

James Griesemer, Ph.D. (Philosophy) Caren Kaplan, Ph.D. (American Studies)
Colin Milburn, Ph.D. (English)
Roberta Millstein, Ph.D. (Philosophy)
Daniel Stolzenberg, Ph.D. (History) Madhavi Sunder, J.D. (School of Law)

The Major Program

The Science and Technology Studies (STS) major is designed to facilitate the analysis and synthesis of science, technology, and medicine in a way that actively creates connections between the varieties of perspectives and concerns in the humanities and the sciences. The STS major takes science, technology, medicine, and their social, political, economic, and cultural contexts as its objects of study. As such, the STS major draws on the research programs of faculty in a wide range of departments, including American Studies, Anthropology, Economics, Environmental Science and Policy, History, Philosophy, Political Science, Science and Technology Studies, and Sociology. Students in STS pursue a broader understanding of science than is available within traditional science majors and is also suitable for students in the social sciences interested in interpreting science, technology and medicine as part of society and culture.

The Program. Graduation with a degree in Science and Technology Studies requires completion of introductory courses in the social sciences and humanities, in the natural sciences, and introductory, laboratory and seminar courses in STS. Upper division work includes twelve units from each of two different, complementing areas of concentration ("modules") and twelve units (plus prerequisites) providing depth, concentration and field work opportunities in the sciences. The modules are: (1) Cultural Studies of Science and Technology; (2) Éthics, Values, and Science Policy; (3) History and Philosophy of Science; IV. Medicine, Society, and Culture. Courses in the modules require careful selection to make the best use of the STS major. Prerequisites for courses in the sciences can be extensive and require substantial advance planning for timely completion. Students are encouraged to take advantage of faculty and staff advising to plan their course of study.

Career Alternatives. The STS major will create an opportunity to analyze science and allied prac-

tices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that must address the broader social, cultural and political ramifications of science, technology and medicine such as law, journalism, public policy, economics, government, and science education. Careers that students of STS from many universities nationwide have pursued, in addition to academic careers in STS, include employment in: systems engineering, website design, science museums, non-profit health organizations, government service, libraries, law, medicine, veterinary medicine, dentistry, nursing, teaching, public health administration, media companies, management consultant practice, and the Peace Corps.

A.B. Major Requirements

Preparatory Subject Matter 16 Science and Technology Studies 1............4 Science and Technology Studies 20...... 4 Eight units selected from American Studies 1Ă; Environmental Studies 1; Nature and Culture 1; Philosophy 30, 31, 32; Science

Depth Subject Matter 44-46

Twelve units each from two of the following Technology: Community and Regional Development 118, 162; History 139A, 139B; Nature and Culture 100, 180: Science and Technology Studies 130A, 131, 150; Sociology 176......(2) Ethics, Values, and Science Policy: Agricultural and Resource Economics 120, 147; Environmental Science and Policy 165; History 185B; Nature and Culture 120; Philosophy 115, 116; Physics 137, 160; Plant Pathology 140; Political Science 171, 175; Veterinary Medicine 170 ... 12 (3) History and Philosophy of Science: History 135A, 135B, 136, 185A, 185B; Philosophy 104, 108, 109; Science and Technology Studies 130A, 130B, (4) Medicine, Society, and Culture: Epidemiology and Preventive Medicine more than one module, that course may satisfy only one requirement. Science and Technology Studies 180...... 4 Science and Technology Studies 190, or 190HA-HB Science Electives: Select twelve units, at least eight of which must be from upper division courses, from the Approved Science Electives list below. (Unit totals will vary with required science elective courses in consultation with faculty advisors. Some courses in some areas may require prerequisites too extensive to be

Total Units for the Major......60-82

used for the STS major.

Approved Science Electives. Courses may be drawn from any of the following approved subject areas:

Aeronautical Science and Engineering; Animal Genetics; Animal Science; Anthropology; Applied Behavioral Sciences; Applied Biological Systems Technology; Atmospheric Science; Avian Sciences; Biological Chemistry; Biological Sciences; Cell Biology and Human Anatomy; Chemistry; Engineering; Engineering: Applied Science; Engineering: Biological Systems; Engineering: Chemical; Engineering: Civil and Environmental; Engineering: Computer Science; Engineering: Electrical and Computer; Engineering: Mechanical; Entomology; Environmental and

Resource Sciences; Environmental Horticulture; Environmental Science and Policy; Environmental Toxicology; Evolution and Écology; Exercise Science; Fiber and Polymer Science; Food Science and Technology; Geology; Hydrologic Science; Material Science and Engineering; Medical Microbiology; Medical Pharmacology and Toxicology; Microbiology; Molecular and Cellular Biology; Nematology; Neurobiology, Physiology, and Behavior; Nutrition; Pathology, Microbiology, and Immunology; Physics; Plant Biology; Plant Pathology; Population Health and Reproduction; Psychology; Soil Science; Wildlife, Fish, and Conservation Biology.

Major Adviser. J. Dumit

Courses in Science and Technology Studies (STS)

Lower Division Courses

1. Introduction to Science, Technology and **Medicine Studies (4)**

Lecture - 3 hours; discussion - 1 hour. History, philosophy, sociology, politics, and cultural studies of science, technology, and medicine. Emphasis on a broad range of perspectives. GE credit: SciEng or SocSci | SS, WE.—Carroll

20. Methods in Science, Technology and Medicine Studies (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 recommended. Methodological issues concerning the historical, philosophical, sociological, ethical, and political analysis of science, technology, and medicine. Detailed case studies to illustrate different methods of analysis. GE credit: SciEng or SocSci, Wrt | SS, WE. - Carroll

32. Drugs, Science and Culture (4)

Lecture - 3 hours; discussion - 1 hour. Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine. (Same course as Anthropology 32.) GE credit: SocSci, Div, Wrt | SS, VL.—I. (I.) Dumit

92. Internship (1-12)

Internship - 3-36 hours. Prerequisite: consent of instructor. Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty. May be repeated up to 12 units for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III,

98. Directed Group Study (1-5)

Prerequisite: consent of instructor (P/NP grading only.) GE credit: SS.

99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor (P/NP grading

Upper Division Courses 108. Intellectual Property in Science (4)

Lecture/discussion-4 hours. Prerequisite: course 1, or other Social Science or Humanities writing course. Historical and conceptual framework for contemporary debates about intellectual property and science. Topics include US patent system and copyright law, interaction between patents and industrial policy, credit in academic and industrial science, role of IP in global knowledge. GE credit: SocSci, Wrt | ACGH, SS, WE.—I. (I.) Biagioli

109. Visualization in Science (4)

Lecture - 3 hours; extensive writing or discussion - 1 hour. Prerequisite: course 1 or 20 or Anthropology 2. Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make

claims. Offered in alternate years. (Same course as Anthropology 109.) GE credit: SocSci, Wrt | SS, VL, WE.—II. Dumit

120. Religion, Magic and Science (4)

Lecture—3 hours; extensive writing. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as Religious Studies 120.) Offered in alternate years. GE credit: ArtHum, Div, Wrt.—Coudert

121. Special Topics in Medical Anthropology (4)

Lecture/discussion—4 hours. Prerequisite: course 1 or Anthropology 2. Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical encounters in a cross-cultural perspective. (Same course as Anthropology 121.) GE credit: SocSci, Div, Wrt | SS, WC, WE.—III. (III.) Giordano

129. Health and Medicine in a Global Context (4)

Lecture/discussion—4 hours; term paper. Prerequisite: course 1 or Anthropology 2. Recent works in medical anthropology and the science studies of medicine dealing with global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical technology and delivery, illness narratives, and others. (Same course as Anthropology 129.) GE credit: SocSci, Div, Wrt | SS.—II. (II.) Dumit

130A. From Natural History to the History of Nature (4)

Lecture/discussion—3 hours; term paper. Prerequisite: History 135A recommended. Evolution and demise of natural history as a discipline from Aristotle to Linnaeus. Considers ancient views of nature and its Renaissance rediscovery; the emergence of biology, botany, geology, and zoology; the history of taxonomy and classification. Offered in alternate years. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.—II.

130B. History of Modern Biology (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 130A recommended. Development of modern biology from pre-Darwinian roots to the present. Considers emergence of modern biological specialities and consolidation of biological theory around evolutionary ideas. History of allied fields such as genetics, paleontology, embryology, ecology, systematics and molecular biology. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.—III. (III.)

131. Darwin (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Students will explore the life and times of Charles Darwin and will trace the development of evolutionary thinking before and after the *Origin of Species* to appreciate its place in Victorian society and in the corpus of Darwin's thought. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.—Griesemer

150. Gender and Science (4)

Lecture/discussion—3 hours; term paper. An interdisciplinary approach to the relations between gender and science. Topics include the biological and cultural construction of sexual difference, the role of women as practitioners of science, and feminist approaches to science. GE credit: SocSci, Div, Wtt | ACGH, DD, SS, WE.

161. Time: Mechanism and Measurement (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 1. Cultural concepts of time; units and instruments of time measurement; historical differences in the social organization of time; and time measurement in twentieth-century science. GE credit: SocSci, Wrt | SS, WE.

163. History of Communication Technologies (4)

Lecture/discussion—3 hours; term paper. History of communication technologies from the late Middle Ages to the 20th century. Questions of technology,

knowledge, power and culture. Particular attention to questions about information and truth. Offered in alternate years. GE credit: SocSci | SS, WE.

164. Writing Science (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: English 3 or course 1, or equivalent. Texts and writing practices in the production of scientific knowledge. Surveys the literary structure of scientific arguments; history of scientific genres; rhetoric and semiotics in scientific culture; graphical systems in the experimental laboratory; narratives of science, including science fiction. (Same course as English 164.) Offered in alternate years. GE credit: Wrt | AH, SL, WE.—I. Milburn

165. Built Environments (4)

Lecture—3 hours; extensive writing. Built environments, which are designed to support forms of life. Their role as carriers of cultural memory and in turning knowledge of nature into social assets. Historical constellations of knowledge, social order, and power. Offered in alternate years. GE credit: SocSci, Wrt | SS.

173. Science Fiction (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 3 or Science and Technology Studies 1, or equivalent. The literary modes and methods of science fiction. Representative texts, authors, and themes of the genre—e.g., time travel, alternative universes, and utopias. Relations of science fiction to science, philosophy, and culture. (Same course as English 173.) GE credit: ArtHum, Wrt | AH, WE.

175. Laboratory Studies Lab (4)

Lecture/discussion—4 hours. Prerequisite: upper division standing or consent of instructor. Hands-on training in Science and Technology Studies field-work, interviewing, archival research and data analysis. Review of laboratory studies literature, informed consent procedures, ethics, and care of the data. Individual and group projects possible. GE credit: SS, WE.—III. (III.)

176. Sociology of Knowledge, Science, and Scientific Knowledge (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: upper division standing preferred. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as Sociology 176.) GE credit: SS.—Carroll

180. Topics in History and Philosophy of Science (4)

Seminar—3 hours; term paper. Prerequisite: course in History and Philosophy of Science or other coursework relevant to topic. In depth treatment of selected topics in the history and philosophy of science. Possible topics include history of modern physics, history of molecular biology, science and society, science and power, scientific explanation, technology and culture, theory testing. May be repeated for credit with consent of instructor.

190. Seminar in Science, Technology and Medicine Studies (4)

Lecture/discussion—3 hours; term paper. Prerequisite: open to junior and senior Science and Technology Studies majors only. Intensive reading, discussion, research and writing by small groups in selected topics of science, technology, and medicine studies scholarship. Emphasis on individual research projects.

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: consent of instructor. Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty. May be repeated three times for up to 12 units for credit. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

250. History and Philosophy of Science (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary seminar in the history and philosophy of science. Focuses on issues such as historiography, methodology, and the conceptual foundations of science. May be repeated for credit with consent of instructor.

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Sexuality Studies

(College of Letters and Science)

http://wms.ucdavis.edu/wgssite/sexualitystudies/

The interdisciplinary minor in Sexuality Studies offers students a unique opportunity to study the human-made aspects of sexual identities, desires, and practices, which differ across cultures and historical moments, and are not reducible to biology or anatomy. The minor in Sexuality Studies core and elective courses have sexuality at their center. Additional courses invite students to integrate their study of sexuality with issues of gender; race and ethnicity; class; politics and activism; literature and popular culture; law; and other domains.

The minor is sponsored by the Program in Women and Gender Studies.

Minor Program Requirements:

UNITS

Sexuality Studies18-20

Two Elective courses from Field A:

Women and Gender Studies 1704

Two Elective courses from the following:

Anthropology 139 BN, English 186, Epidemiology and Preventative Medicine 163, History 184, Human Development 12, Psychology 158, Science and Society 15, Women and Gender Studies 70........7-8

Two Elective courses from Field B (below) or seminars/individual study by petition to achieve a total of 18-20 units:

American Studies 115, Asian American Studies 112, Chicana/o Studies 160, English 166, German 145, History 132, Political Science 152, Sociology 120, Women and Gender Studies 140, Women and Gender Studies 179......8

Restrictions.

(a) Students may take no more than one lower division course to satisfy requirements for the minor.

(b) To satisfy the interdisciplinary component of the minor, students must either split their coursework roughly equally between two programs/departments or take coursework in at least three programs/departments.

(c) Students may petition the minor adviser to accept Special Topics courses and Capstone/Senior Seminars as additional courses, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.

(d) Students may petition the minor adviser to accept up to four units of registered individual study, group study or internship towards the minor program, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.

Advising. Program in Women and Gender Studies, 2222 Hart Hall (530) 752-6429 7

Social and Ethnic Relations

(College of Letters and Science)

The interdisciplinary minor in Social and Ethnic Relations explores the racial, ethnic, class and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American and African Studies, Asian American Studies, Native American Studies, and Women and Gender Studies.

Minor Program Requirements:

units

Social and Ethnic Relations 24

Select one course from each of the following six groups to total 24 units.

(a) African American and African Studies 100; Anthropology/Native American Studies 134; Women's Studies 102

(b) African American and African Studies 123, 133, 145A

(c) Asian American Studies 1, 2, 100, 110, 130

(d) Chicana/o Studies 130, 132 (e) Native American Studies 1, 10, 115, 119, 130A, 130B, 130C, 157, 180

(f) Women's Studies 103, 104, 180

Restrictions. (a) Courses applied toward the satisfaction of a major may not also be offered in satisfaction of the minor. (b) No more than four units (one course) may be lower division.

Advising. Contact the Program in Women and Gender Studies in 2222 Hart Hall (530) 752-4686.

The Program of Study

The Program in Social Sciences promotes the development of innovative curricular initiatives across the social sciences, including offering broadly conceived, integrative undergraduate-level and graduate-level courses. Faculty affiliated with the program are often engaged in interdepartmental teaching and research.

Social Theory and Comparative History

(College of Letters and Science)

This designated emphasis was disestablished effective September 19, 2011.

Program Office. Center for History, Society, and Culture, 5211 Social Sciences and Humanities Building (530) 752-3046

Courses in Social Theory and Comparative History (STH)

Graduate Courses

250. Research in Social Theory and Comparative History (4)

Seminar—3 hours; term paper. Prerequisite: admission to Social Theory and Comparative History Designated Emphasis. Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, and Culture faculty and visitors discussing current research.—III. (III.)

290. Advanced Topics in Social Theory and Comparative History (4)

Seminar—3 hours; term paper. Prerequisite: consent of instructor and History 204 or Sociology 242A. Interdisciplinary study of particular substantive problems in social theory and comparative history. Topics vary.—I, II, III. (I, II, III.)

295. Advanced Group Research in Social Theory and Comparative History (1)

Discussion—1 hour. Prerequisite: consent of instructor. Participation in research workshops sponsored by the Center for Comparative Research for History, Society, and Culture. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

296. Theory and Society Journal Editorial Workshop (1-4)

Workshop—1 hour; independent study—3 hours. Reading and offering workshop critiques of papers submitted for publication. Reading and discussion of other relevant work in history and the social sciences. May be repeated for credit up to 36 units or with consent of instructor. [5/U grading only.]—I, II, III. (I, II, III.) Gouldner

The Major Programs

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.

The Program. The Department of Sociology offers two major programs, Sociology and Sociology– Organizational Studies. Students selecting the Sociology major may choose from four options in the major. The General Sociology emphasis allows students to obtain a broad understanding of the concepts, methods, and theories of sociology. Students with a special interest in the areas of Law and Society or Social Services may choose a more specialized program of courses and practical experience within the sociology major. The Comparative Studies and World Development emphasis provides a sociological perspective on social and economic changes throughout the world, with a stress on relationships between "developed" and "underdeveloped" societies. In their junior year, students are encouraged to consider the Education Abroad Program - especially one in a developing country.

The Sociology–Organizational Studies major develops a broad understanding of the political, social, and economic organizations that comprise modern society. This major emphasizes a sociological perspective, but incorporates a multidisciplinary field of study. The major introduces students to a range of theories and methods that social scientists use in the analysis of organizations.

Career Opportunities. In the Sociology major, the General option is for students desiring a solid liberal arts education as well as those interested in graduate work in the social sciences. Options in Law and Society or Social Service prepare students for careers in such areas as law, corrections, social work or counseling. The Comparative Studies and World Development emphasis prepares students for graduate training leading to careers in international fields. Majors in Sociology–Organizational Studies will be prepared for a variety of career options, particularly in the field of management. The major spe cifically meets entry requirements for programs of professional training leading to a Masters degree in public or private management, and may also lead to further study in any of the disciplinary áreas incorpo rated in the major.

Sociology

A.B. Degree Requirements: General emphasis:

	UNITS
Preparatory Subject Matter	28-29
Sociology 1; 46A, and 46B Sociology 2, 3, 4, 5, 11, 30A, or	13

and completion of requirement for
preparatory subject matter; select one course
from Sociology 190X, 192/193, 194HA-194HB, 1954
194HA-194HB, 1954
Total Units for the Major73

Building. **Minor Program Requirements:**

Sociology......20

Major Advisers. Consult the Departmental Advising office in 1282 Social Sciences and Humanities

Choose any five upper division courses in Sociology, except the following: SOC190X, 191, 192/193, 194HA, 194HB, 195, 197T, 198, 199

Minor Advisers. Consult the departmental Advising office in 1282 Social Sciences and Humanities Building.

Honors Program. An Honors Program is available to Sociology and Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, students are encouraged to take a 199 course with their sponsor in the spring of their third year, prior to the seminar courses. The honors student writes an honors thesis and participates in a two-quarter honors seminar (course 194HA-194HB). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with Highest Honors or with High Honors. Applications for the program are due in August before the student begins their fourth year.

Honors Program Advisor. Drew Halfmann, dhalfmann@ucdavis.edu

Graduate Study. The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in sociology. Further information regarding graduate study may be obtained at the Department office or on our website.

Graduate students in Sociology have the opportunity to pursue designated emphases in Critical Theory, Social Theory and Comparative History, Native American Studies, Economy, Justice and Society, or Feminist Theory and Research. See these headings for further details on these interdisciplinary pro-

Graduate Advisers. Consult the Graduate Program Coordinator in 330 Young Hall.

Courses in Sociology (SOC)

Lower Division Courses

1. Introduction to Sociology (5)

Lecture - 4 hours; discussion - 1 hour. Principles and basic concepts of sociology. The study of groups, culture, collective behavior, classes and caste, community and ecology, role, status, and personality. GE credit: SocSci | ACGH, DD, SS.)

2. Self and Society (4)

Lecture—3 hours; discussion—1 hour. Principles and basic concepts of sociological social psychology. Includes the study of the character of the self, identity, roles, socialization, identity change, emotion and social interaction. GE credit: SocSci, Wrt | ACGH, DD, SS.

3. Social Problems (4)

Lecture-3 hours; discussion-1 hour. General sociological consideration of contemporary social problems in relation to sociocultural change and programs for improvement. GE credit: SocSci, Wrt | ACGH, DD, SS.

4. Immigration and Opportunity (4)

Lecture—3 hours; discussion—1 hour or term paper. Social and demographic analysis of immigration: motives and experiences of immigrants; immigration and social mobility; immigration, assimilation, and social change; multicultural societies. Detailed study of immigration into the U.S., with comparative studies of Europe, Australia, and other host countries. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WC.

5. Global Social Change: An Introduction to Macrosociology (4)

Lecture - 3 hours; discussion - 1 hour. An introduction to change and diversity in world history, including the United States. Examines population and family, technological change and economic development, power and status, culture and identity. GE credit: SocSci, Div, Wrt | ACGH, SS, WC

11. Sociology of Labor and Employment (4)

Lecture-3 hours; discussion-1 hour. Labor and employment issues in the contemporary United States with some use of historical and comparative materials. Topics will include strategies pursued by employers and employees, labor market discrimination and the role of social policies in shaping labor markets. GE credit: SocSci, Wrt | SS.

25. Sociology of Popular Culture (4)

Lecture - 3 hours; discussion - 1 hour. Social mechanisms that shape modern popular culture. High, folk, and mass culture: historical emergence of popular culture. Mass media, commercialization, ideology and cultural styles. Theories and methods for analyzing cultural expressions in pop music, street art, film, television, and advertising. GE credit: SocSci Wrt | SS, VL.

30A. Intercultural Relations in Multicultural Societies (3)

Lecture - 1.5 hours; discussion - 1.5 hours. Macrostructural analysis of contemporary multicultural societies; immigration and assimilation in comparative perspective; social construction of racial and ethnic group identities; ethnicity and gender; group conflict and cooperation; controversies surrounding multiculturalism. First course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div | ACGH, DD, SS.

30B. Intercultural Relations in Multicultural

Lecture - 1.5 hours; discussion - 1.5 hours. Prerequisite: course 30A or consent of instructor. Social-psychological analysis of personal experiences living in a multicultural society; conforming to or rejecting group identity or stereotypes; managing and reducing conflict; cross-cultural communication; promises and problems of diversity at UC Davis. Second course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div | ACGH, DD, SS.

46A. Introduction to Social Research (4)

Lecture - 3 hours; discussion - 1 hour; term paper Examination of the methodological problems of social research. Selection and definition of problems of investigation, data-gathering techniques, and sampling. GE credit: SS.

46B. Introduction to Social Research (4)

Lecture-3 hours; discussion-1 hour; term paper. Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association. GE credit: QL, SS

90X. Lower Division Seminar (1-2)

Seminar — 1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in sociology through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May not be repeated for credit. Limited enrollment. GE credit:

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily intended for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading

Upper Division Courses

100. Origins of Modern Sociological Theory

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1; consent of instructor; restricted to upper division standing. The origins of modern sociological thought. Special emphasis on three major theorists from the classical tradition of nineteenth century European social thought: Karl Marx, Max Weber, and Emile Durkheim. GE credit:

102. Society and Culture of California (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: introductory course in Sociology recommended. California's distinctive society and culture; sociological analyses of topical issues concerning diversity, environment, cities. GE credit: ACGH, DD,

103. Evaluation Research Methods (4)

Lecture—3 hours; discussion—1 hour; term paper; project. Prerequisite: course 46A and 46B, or Statistics 13 or the equivalent. Surveys applications of research methods to the evaluation of social programs, primarily emphasizing methodological issues, e.g., research design and data collection; uses of evaluation research are also discussed and placed in theoretical context. Participation in an evaluation project. GE credit: SL, SS.

104. The Political Economy of International Migration (4)

Lecture — 3 hours; term paper or discussion — 1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as International Relations 104). GE credit: SS, WC

106. Intermediate Social Statistics (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 46B or Statistics 13 or the equivalent. Intermediate level course in statistical analysis of social data, emphasizing the logic and use of statistical

measures, procedures, and mathematical models especially relevant to sociological analysis. GE credit: QL, SL, SS

118. Political Sociology (4)

Lecture - 3 hours; discussion - 1 hour; term paper; project. Relation of social cleavages and social cohesion to the functioning of political institutions; the social bases of local and national power structures; social sources of political movement, analysis of concepts of alienation, revolution, ideology, ruling class, and elite. GE credit: SS.

120. Deviance (4)

Lecture—3 hours; term paper or discussion. Social structural sources, institutional practices and microprocesses associated with illegality, evil, disease, immorality, disability, racial and class differences, citizenship, and the body. Special emphasis on expert knowledge and the production and management of social difference. GE credit: Wrt | SS.

122. Sociology of Adolescence (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Chronological age and social status; analysis of social processes bearing upon the socialization of children and adolescents. The emergence of "youth cultures." Generational succession as a cultural problem. GE credit: SS.

123. American Society (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. The demographic and social structure of American society and population, with emphasis on ethnic and class groups as bases for political and economic interest. Attention to selected current social controversies. GE credit: ACGH, DD,

124. Sociology of Education (4)

Lecture—3 hours; discussion—1 hour; term paper; project. Education and the social structure. Class size, curriculum, and economies of scale. Relations between families and schools in socialization; familial ascription and educational achievement. Education and industrialization. Organizational and occupational structure of schools. Discussion of selected controversies. GE credit: SS.

125. Sociology of Culture (4)

Lecture/discussion-3 hours; term paper. Sociological approaches to study of historical and contemporary culture and mass media, and their structuring in relation to social actors, institutions, stratification, power, the production of culture, audiences, and the significance of culture in processes of change. GE credit: SocSci | SS

126. Social Interaction (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 2. Everyday interaction in natural settings; ethnographic approaches to the understanding of social meanings, situations, personal identity and human relationships. Particular attention to the work of Erving Goffman and to principles of field observation and qualitative analysis. GE credit: Wrt | SS.

127. Sociology of Death (4)

Lecture - 3 hours. Prerequisite: course 1 or the equivalent. Overview of attitudes toward, structural effects of, and methods of coping with death and deathrelated behaviors. Particular attention to social psychological aspects of death and dying, to death occupations, and to death rituals in various cultures. GE credit: Wrt | SS.

128. Interracial Interpersonal Dynamics (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: one course from courses 1, 2, 3, Afro-American Studies 10, Asian American Studies 1, 2, Chicano Studies 10, Native American Studies 1, 20. Analysis of the influences of cultural differences and racial stratification on interpersonal interaction in instrumental settings (e.g., work, education, political action) and intimate settings (e.g., friendship, love, marriage, family). Minority/majority relationships. GE credit: Div, Wrt | SS.

129. Sociology of Black Experience in America (4)

Lecture—3 hours; discussion—1 hour; term paper; project. Survey of historical and contemporary theoretical sociological perspectives on the Black experience in United States. Emphasis on comparisons of Black sociological perspectives and mainstream perspectives of specific sociologists. GE credit: Div | ACGH, DD, SS.

130. Race Relations (4)

Lecture - 3 hours; term paper or discussion - 1 hour. Functions of the social definitions of race and racial groups. Analysis of racial conflict, oppression, and other forms of ethnic stratification. Models of ethnic interaction and social change. Emphasis on racial relationships within the U.S. GE credit: Div | ACGH, DD, SS.

131. The Family (4)

Lecture - 3 hours; discussion - 1 hour. Contemporary family life in historical and cross-cultural perspective. How different family forms arose, their significance today and prospects for further family change. Attention to power relations within and beyond the family and to the social implications of family transformation. GE credit: SocSci, Div, Wrt | ACGH, DD, SS.

132. The Sociology of Gender (4)

Lecture - 3 hours; discussion - 1 hour. Analysis of biological, psychological, cultural and structural conditions underlying the status and roles of men and women in contemporary society, drawing on a historical and comparative perspective. GE credit: Soc-Sci, Div | ACGH, DD, SS.

133. Sexual Stratification and Politics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 132 or the equivalent or consent of instructor. Analysis of origins, dynamics, and social implications of sexual stratification. Examination of classical and contemporary theorists such as Engels, Freud, J.S. Mill, de Beauvoir, Juliet Mitchell, D. Dinnerstein. Attention to selected issues in social movements for and against sexual equality. GE credit: Div | SS.

134. Sociology of Racial Ethnic Families (4)

Lecture—3 hours; discussion—1 hour or term paper. Asian American, Black, Chicano, and Native American family life in comparative historical perspective. Family structure and gender roles are considered in relation to socio-historical dynamics. Offered in alternate years. GE credit: Div, Wrt | ACGH, DD, SS.

135. Social Relationships (4)

Lecture—3 hours; discussion—1 hour or term paper. Prerequisite: course 1, 2 or 3, and upper division standing. Social and cultural factors influencing friendships and intimate relationships. Topics include relationship development, relationship maintenance, and relationship loss. GE credit: Div, Wrt | SS.

137. African American Society and Culture 1790-1990 (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 1. Political and social transformations of African American communities between 1790 and 1990, as seen through film, literature, and music. Topics include: Black consciousness, Afro-Slave culture, The Harlem Renaissance, and contemporary Hip Hop. GE credit: ACGH, DD, SS.

138. Economic Sociology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Economics 1A or 1B and upper division standing in the social sciences. Overview of the rapidly growing field of economic sociology. Focus on variations in the ways that markets are organized. The relationship between individual and collective rationality will also be emphasized. GE credit: ACGH, SS,

139. Corporations and Society (4)

Lecture—3 hours; discussion—1 hour; term paper. Prerequisite: course 1 or 2 or 3, and upper division standing. The study of the history and power of the modern corporation; corporate organization; politics, the state, and the corporation; labor unions and the labor process; competition, regulation and international markets; the multinational and conglomerate corporation; and mass markets and consumerism. GE credit: ACGH, SS.

140. Social Stratification (4)

Lecture - 3 hours; discussion - 1 hour or term paper or research project (instructor's option). Systems of social ranking, theories of stratification; power, prestige, culture, and styles of life of various social classes; social mobility and its consequences for social structure. GE credit: ACGH, DD, SS.

141. Industrialization and Social Change (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Selected technological and social factors. Preconditions of economic develop ment and industrialization. Social, political, and cultural issues at various levels of economic development. Major historical differences and major current trends. Emphasis either on highly industrialized countries or on less developed countries. GE credit: Wrt | SS.

143A. Urban Society (4)

Lecture - 3 hours; discussion - 1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Theories of city origins. Analysis of the historic process of urbanization and of varying city types. Comparison of American and European experience of metropolitanization, counterurbanization, and neighborhood change. Consideration of competing theories of urban growth and change and competing visions of the urban future. Offered in alternate years. GE credit: SS.

143B. Sociology of City Life (4)

Lecture-3 hours; discussion-1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent; course 143A recommended. Critical dissection of the "loss of community" issue. Analysis of the organization of primary ties in the city, of the culture of urban public life and of the learning of city skills. Offered in alternate years. GE credit: Wrt | SS.

144. Agriculture and Society (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: advanced standing in the social sciences or one year of course work in agricultural and environmental sciences. Development of agriculture as a major enterprise in modern society with the concomitant reduction in the labor force and family farms. Analysis of issues including mechanization, migrant labor, corporate farming, and public resource policy. Offered in alternate years. GE credit: SS.

145A. Sociology of Third World Development (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 1; upper division standing. Introduction to theories and contemporary issues in the sociology of development. Topics such as urbanization, rural/ agrarian change, class, status groups, international division of labor, sectoral shifts, international capital, informal economy, gender, and political processes are analyzed within a comparative-historical framework. GE credit: Div, Wrt | SS, WC.

145B. Gender and Rural Development in the Third World (4)

Seminar-4 hours. Prerequisite: course 1; upper division standing. Political-economic analysis of women and work during the process of socioeco nomic change in the world with particular attention to the family/household context. Offered in alternate years. GE credit: Div, Wrt | SS, WC.

146. Sociology of Religion (4)

Lecture - 3 hours; discussion - 1 hour or term paper or research project. Relationship between social structures and religions. The social setting of the major world religions. Religious innovators and institutionalization (churches, sects, cults). Secularization in the modern world and the rise of secular ideologies. Offered in alternate years. GE credit: SocSci, Div, Wrt | SS.

147. Sociological Perspectives on East Asia

Lecture—3 hours; discussion—1 hour or term paper or research project. Sociological theories and concepts applied toward understanding East Asian society. Emphasis on the political structure, stratification, and economy in China and Japan. Analysis of historical and contemporary similarities and differences. Offered in alternate years. GE credit: SS, WC.

148. Collective Behavior (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Study of behavior of human crowds and masses in extraordinary circumstances, including crowd panics, mass scares, collective protests, riots, revolutionary situations, ecstatic and revivalist gatherings, crazes, fads, and fashions. GE

149. Religion and American Society (4)

Lecture - 3 hours; class project. Historical, contemporary survey of religious traditions and organizations and their relation to U.S. social and cultural patterns. Civil religion, religious pluralism, minority and deviant communities, religious migration, U.S. religion as a social institution, and religion, politics, and social stratification. Offered in alternate years. GE credit: Div, Wrt | ACGH, DD, SS.

150. Criminology (4)

Lecture-3 hours; discussion-1 hour or term paper or research project. Sociological analysis of criminal behavior in relation to social structure and the criminalization process. GE credit: SS.

151. The Criminal Justice System (4)

Lecture — 3 hours; term paper or discussion — 1 hour. Prerequisite: course 150 and upper division standing. Sociological analysis of the different components of the criminal justice system including the emergence and interpretation of criminal laws, the contemporary roles and functions of the police, criminal courts and correctional institutions. GE credit:

152. Juvenile Delinquency (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Study of juvenile delinquency in relation to the family, peer groups, community, and institutional structures. Consideration of processing of the delinquent by formal agencies of control. GE credit: SS.

153. The Sociology of Childhood (4)

Lecture—3 hours; term paper. Prerequisite: upper division standing. Contemporary childhood in historical, cross-cultural, and global perspectives. Examine changes in understanding of the nature of childhood and "best interests of the child" by class, race, gender, geographic region, and historical period. GE credit: ACGH, DD, SS, WC.

154. Sociology of Health Care (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Overview of sociological research in medicine and health care, with emphasis on the organizational, institutional, and social psychological aspects. GE credit: SS.

155. Sociology of Law (4)

Lecture - 3 hours; discussion - 1 hour or term paper or research project. Law considered as social control; relation of legal institutions to society as affecting judicial decision making and administration of justice. Lawyers as an occupational group. Legal reform. GE credit: SS.

156. Social Movements (4)

Lecture—3 hours; discussion—1 hour or term paper or project (instructor's option). Analysis of several aspects of social movements: mobilization, forms of organization, ideology, recruitment, leadership, strategies and tactics, development, effects. Frequent use of sound and film materials. GE credit: SocSci | SS

157. Social Conflict (4)

Lecture-3 hours; discussion-1 hour or term paper or project. Analysis of the causes, dynamics, and regulation of social conflict within and between various kinds of social groupings with particular reference to nonviolent methods of waging and regulating conflict. GE credit: SS

158. Women's Social Movements in Latin America (4)

Lecture-3 hours; term paper. Restricted to upper division standing. Contemporary women's social movements in Latin America, focusing on Honduras, El Salvador, Brazil, and Nicaragua. Examination of exploitation and oppression in Latin America. GE credit: DD, SS, WC.

159. Sociology of Work and Employment

Lecture-3 hours; term paper or discussion-1 hour. Pass 1 restricted to upper division majors and graduate students. Historical and contemporary overview of employment, work, and occupations in American society. Study of authority and power relations, labor markets, control systems, stratification, and corporate structures, and how these factors shape work in diverse or organizational and employment setting. GE credit: SS.

160. Sociology of the Environment (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: upper-division standing in Sociology strongly recommended. Production, consumption, and urban expansion. Basic social logics surrounding current problems of resource scarcity (environmental extractions) and excess wastes (environmental additions). Ways that society can change and re-organize itself to become more environmentally conscious and hence ecologically sustainable. GE credit: ACGH, DD, SS, WC.

170. Population (4)

Lecture-3 hours; discussion-1 hour or term paper or research project. Introduction to the study of human population, including theories and statistical measures; social causes and consequences of population trends; changes in population structure; geographical distribution, migration, sociopsychological factors affecting fertility. GE credit: SocSci | QL, SS.

171. Sociology of Violence and Inequality (4)

Lecture/discussion-4 hours. Prerequisite: upperdivision standing or consent of instructor. How systems of social inequality organize the practice of violence. Definitions of violence and issues affecting the social capacity for violence. Analysis and comparison of different forms of violence associated with race, class, gender relations and social organization. GE credit: SS.

172. Ideology of Class, Race and Gender (4)

Lecture — 4 hours. Examination of popular belief systems that accompany relations between social classes, whites and blacks, and men and women in the United States. How do dominant groups attempt to justify each relationship, and is there ideological conflict or consensus between groups. GE credit: Div, Wrt | ACGH, DD, SS.

173. Sociology Through Literature (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Introduction to analysis of literature as sociological data. Reading of numerous works on American and other societies by authors such as Steinbeck, Lewis, Dreiser, Schulberg, Orwell, etc. GE credit: SS.

174. Sociology of the Jewish Experience (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: upper division standing required. The sociology of Jewish life, analyzing challenges to Jewish identity and community in the diaspora. Diversity within the Jewish community, Americanization, women, new immigrants, post-Holocaust Jewish identity, and Black-Jewish relations. Offered in alternate years. GE credit: SS.

175. Mass Communication (4)

Lecture—3 hours; term paper. Prerequisite: course 1 or 2. Examines the relationship between the media and social structures. History of media-state relations. Media as reflector and shaper of values.

Emphasis on current European and Marxist and pluralist theories rather than on content analysis. Offered in alternate years. GE credit: SS

176. Sociology of Knowledge, Science, and Scientific Knowledge (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: upper division standing preferred. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as Science and Technology Studies 176.) GE credit: SS.

180A. Complex Organizations (4)

Lecture—3 hours; discussion—1 hour or term paper or research project. Prerequisite: course 1; Economics 1A and 1B recommended. Develops a sociologi cal approach to organizations theory. Designed to introduce sociological concepts, address the alternative psychological and economic models, and involve students in the practice of organizational analysis. GE credit: SS.

180B. Complex Organizations (4)

Lecture - 3 hours; discussion - 1 hour or term paper or research project. Prerequisite: course 180A or consent of instructor. Builds on concepts and skills developed in course 180A. Deals with the issues of organizational decision making, design, and survival. Emphasis on relations between organizations and the effects of those relations in both the public and private sectors. GE credit: SS.

181. Social Change Organizations (4)

Lecture—3 hours; discussion—1 hour or term paper Prerequisite: course 1. Analysis of organizations with social change and improvement goals and programs, emphasizing voluntary associations and grassroots citizen groups. Topics treated include formation, decision making and leadership, strategies and tactics, factionalism and coalitions, effectiveness. Offered in alternate years. GE credit: Wrt | SS.

182. Experimental and Utopian Communities (4)

Lecture - 3 hours; discussion - 1 hour. The social structure of intentional, experimental or Utopian settlements and communitarian movements, including comparison with other small settlement forms: vil lages, neighborhoods, monasteries, encampments and nonsettlement communities based on occupation, ethnicity, and religion.

183. Comparative Organizations (4)

Lecture/discussion—3 hours; term paper. Prerequisite: course 180A or 180B; upper division standing. Examination of economic and political organizations of major industrial nations. Discussion of historical, cultural, social, and political influences on industrial patterns and practices, alternative theoretical models for explaining differential development. Societies may include Šweden, Japan, Germany, Taiwan, and South Korea. Offered in alternate years. GE credit: ACGH, SS, WC.

185. Sociology of Social Welfare (4)

Lecture - 3 hours; discussion - 1 hour or term paper or research project. Sociological analysis of the evolution and current organization of welfare functions in modern societies. GE credit: SS.

188. Social Stratification in China (4)

Lecture-3 hours; term paper. Prerequisite: upper division standing. Social and political systems and patterns of social stratification in relation to change in state power and economic institutions in China since 1949. Offered in alternate years. GE credit: SS. WC.

189. Social Science Writing (4)

Lecture-3 hours; discussion-1 hour or term paper. Prerequisite: course 46A, upper division standing, and 12 units of social science. Improved analytic writing and methods for reporting social science research to a wider public. Sociological analysis of the conditions of good and bad writing. GE credit: SS

190X. Seminar in Sociological Analysis (4)

Seminar — 3 hours; term paper. Prerequisite: upper division standing and course 100 (former course 165A). In-depth examination at an upper division level of a special topic in Sociology. Emphasis on student participation in learning. May not be repeated for credit. Limited enrollment.

191. Workshop in Contemporary Sociological Theory (4)

Lecture - 2 hours; workshop - 1 hour; term paper. Prerequisite: course 100 (former 165A) and senior standing. Workshop in contemporary sociological theory that allows students to explore the uses of theory in empirical inquiry on problems of interest to students. Contemporary theory considered in relation to classical and modern influences, concept formation, theory construction, and explanation. Not open for credit to students who have received credit for course 165B. GE credit: SS

192. Internship and Research Practicum (2-6)

Internship - 6-18 hours. Prerequisite: course 46A, upper division standing, approval of proposed internship and course 193 concurrently or consent of instructor. Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience. May be repeated for credit with consent of instructor. Maximum of 4 units may be counted toward the major. (P/NP grading only.)

193. Workshop in Field Research (2)

Lecture/discussion-2 hours. Prerequisite: course 46A, course 192 or 199 concurrently for two-four units, senior standing. Overview of the process of collecting, recording, analyzing, and reporting qualitative social data. Emphasis on application of principles; each participant completes an original research project. Not open for credit to students who have completed course 194HA. GE credit: SS, WE.

194HB. Special Study for Honors Students

Seminar-3 hours; term paper. Prerequisite: senior standing and admission to the Honors Program. Directed reading, research and writing culminating in the preparation of a Senior Honors Thesis under direction of faculty adviser. (Deferred grading only pending completion of sequence.) GE credit: SS

195. Special Topics in Sociological Analysis (4)

Seminar—3 hours; term paper. Prerequisite: upper division standing and consent of instructor. In-depth examination of topics in sociology. Emphasis on student research and writing. May be repeated for credit when topic differs. GE credit: SS.

197T. Tutoring in Sociology (1-4)

Tutorial - 3-12 hours. Prerequisite: upper division standing; completion of appropriate course with distinction. Activities vary depending on the nature of the course assignment. May include (but not limited to) tutoring on course material, advising on projects and papers, and leading discussion groups. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: open to seniors only. (P/NP grading only.)

Graduate Courses

201. Social Research (4)

Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative survey of sociological inquiry, taught as a practicum. Philosophy of social science; values and research; research agendas and research problem formulations; research process; explanations. interpretation; study design; concept formation, measure, sampling, data acquisition, inference; rhetoric and presentation of findings.

206. Quantitative Analysis in Sociology (4)

Lecture - 4 hours. Prerequisite: course 106. Survey of the statistical models and methods that serve as a foundation for quantitative research in sociology, with an emphasis on multivariate regression analysis, as well as measurement theory and time series analysis. (S/U grading only.)—II. (II.)

207A-207B. Methods of Quantitative Research (4-4)

Lecture—3 hours; paper. Prerequisite: course 106 or the equivalent. Principles of study design, examination of measurement, survey research methods and multivariate analysis. Course will stress actual practice of techniques. Students will carry out quantitative data analysis using packaged computer programs. (Deferred grading only, pending completion of sequence.)

208. Topics in Advanced Quantitative Methods in Social Science (4)

Seminar—3 hours; term paper. Prerequisite: course 206 or the equivalent and graduate standing; major graduate student. Analysis of the logic and application of an advanced statistical model; the particular model chosen may vary. Emphasis on the model's assumptions, its strengths and weaknesses, its application for social science inquiry, and the relationship between methods and social theory. May be repeated up to 12 units for credit. Offered in alternate years.

215. Economy, Polity, and Society (4)

Seminar — 3 hours; paper. Prerequisite: consent of instructor. Open to graduate students in sociology and related disciplines. Course introduces students to topics and selected issues in the related fields of economic and political sociology and political econ-

220. Deviance, Law, and Social Control (4)

Seminar - 3 hours; projects. Prerequisite: course 120 or consent of instructor. Report and discussions of literature on selected forms of deviance in relation to law and formal social control. Agency contacts and exploratory research projects.

224. Sociology of Education (4)

Seminar — 3 hours; term paper. Prerequisite: course 206 or the equivalent recommended. Overview of sociological theories accounting for the form, role, and evolution of educational systems. Emphasis on empirical research on education and social stratification and application to educational policy. Topics include tracking, racial/ethnic achievement inequalities, school organization, and the immigrant experience.

225. Cultural Sociology (4)

Seminar—3 hours, term paper. Explores the varied ways in which culture is understood in the social sciences and the research questions that follow from contrasting viewpoints. The approach is historically informed and focused on changing cultural forms in relation to industrialization and post-modernism. Offered in alternate years.

226. Sociological Social Psychology (4)

Seminar - 3 hours; seminar paper - 1 hour. Prerequisite: graduate standing or consent of instructor. Advanced study of the varying approaches, methods, issues and topical concerns of sociological social psychology. Analysis of central and representative historical and contemporary works.

227. Sociology of Reproduction (4)

Lecture—3 hours; discussion—1 hour. Recent social science scholarship in such areas as teenage pregnancy, family planning, abortion, adoption, AIDS, and new reproductive technologies; focus on the current situation in the United States. Offered in alternate years.

230. Ethnic (Race) Relations (4)

Lecture - 3 hours; term paper. Advanced study of the determinants of ethnic groupings and their interrelationships. Major theme will be the patterns of ethnic stratification and causes of ethnic conflict. Specific focus upon dominance and resistance to dominance. Influence of social science research.

233. Gender, Culture, and Local/Global Transformation (4)

Seminar—3 hours; term paper. Focus on critical approach to women and development; analyze local transformations with global connections within specific cultural contexts. Course covers theory, methodological issues, and relationship between theory and practice. Offered in alternate years.

234. Gender, Family, and Society (4)

Seminar — 3 hours; seminar paper. Prerequisite: graduate standing or consent of instructor. The major theoretical traditions and concerns in family sociology and sociology of gender. Analysis of selected classical and contemporary works representative of functionalist, Marxist, psychoanalytic, feminist and critical theoretical approaches to these subjects (e.g., Engels, Parsons, Freud, Horkheimer, Goode, Lasch, Mitchell). Emphasis on macro and historical

242A-242B. Comparative Methods in Historical Sociology (4-4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative approaches to major historical phenomena such as nationalism, bureaucratization, feudalism, and capitalism; the relevance of psychological and sociological theories to historical interpretation; the verifiability of historically grounded hypothesis; the meaning of analogy, correspondence and causality. (If taken as a sequence, deferred grading only, pending completion of sequence.)

243. Urban Society (4)

Seminar—3 hours; term paper. Broad overview of the issues and concerns of the field of urban sociology. Special emphasis on the human experience of urban living in contemporary, cross-cultural or historical settings.

245. Developing Societies (4)

Seminar-3 hours; term paper or project. Prerequisite: graduate student status or familiarity with problems of developing societies. Analysis of social and economic problems of developing societies from the standpoint of theory and research on modernization and underdevelopment. Nature of third world dependency and interdependence in the global political economy. Offered in alternate years.

248. Social Movements (4)

Seminar—3 hours; term paper. Analysis of current issues in and contributions to the study of collective behavior and social movements; particular focus upon the strategies and tactics of social movements.

254. Sociological Issues in Health Care (4)

Seminar-3 hours; term paper. Prerequisite: open to graduate or professional students. Sociological perspectives and methods directed to health care issues. Students select topics for supervised research. The course will have a theme (described in advance) each time it is offered. Paper on research will be required. (S/U grading only.)

255. Sociology of Law (4)

Seminar-4 hours. Prerequisite: consent of instructor. Analysis of the nature of the legal process and its impact on social behavior. Will consider (1) nature and functions of law, (2) the organization and administration of law, and (3) the capacity of law to affect social behavior.

265A. Classical Sociological Theory (4)

Lecture - 3 hours; discussion - 1 hour. Introduces graduate students to the work of the main classical thinkers in the tradition of social theory, such as Marx, Durkheim, Weber, Simmel, Freud, G.H. Mead, and Parsons, locating them within the historical, cultural, and philosophical milieu in which their ideas originated.

265B. Theory in Contemporary Sociology

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 265A. Explores the uses of theories in contemporary sociology by tracing their connections with classical sociological writings and their relations to broader theoretical concerns of contemporary social thought, with particular emphasis on relevance to the current historical, cultural and social

270. Social Demography (4)

Seminar-4 hours. Prerequisite: course 170 or consent of instructor. How social institutions affect and are affected by the level and variation of mortality, migration, and fertility. Special emphases on the determinants of fertility-related attitudes and behavior, on less-developed countries, and on contemporary empirical studies.

280. Organizations and Institutions (4)

Seminar—4 hours. Theory of formal organizations and bureaucracy. Methods of research in organizational and institutional studies. Historical and comparative analysis of political, religious, educational, military, and economic structure.

290. Seminar (4)

Seminar-3 hours; term paper. (S/U grading only.)

292A-292B. Field Research (4-4)

Seminar-3 hours; field trips. Prerequisite: graduate standing in Sociology or consent of instructor. The process of collecting, analyzing and reporting qualitative social data: techniques of intensive interviewing, participant-observation and document analysis; generating, developing, and evaluating analytic frameworks; recording, storing, retrieving, and writ-ing up qualitative data. Emphasis on application of principles; each participant completes a fieldwork project. (Deferred grading only, pending completion of sequence.)

293. Proseminar in Sociology (2)

Seminar — 2 hours. Prerequisite: first-year Sociology graduate students only. Introduction to graduate training in sociology. A seminar designed to introduce students entering graduate work in the department to its ongoing research activities. (S/U grading only.) -(I.)

295. Special Topics Seminar. (4)

Lecture/discussion—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Research topics in Sociology. Specific topic will vary according to faculty interest and student demand.

May be repeated for credit when topic differs.—I, II, III. (İ, II, III.)

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

299. Individual Study (1-12)

(S/U grading only.)

Professional Courses

390A. The Teaching of Sociology (2)

Lecture - 1 hour; discussion - 1 hour. Prerequisite: graduate standing; required for first-time teaching assistants. Practical instruction in teaching methods for qualitative and quantitative courses. Pedagogical issues involved in critical sociological analysis. (S/U grading only.)—I. (I.)

390B. The Teaching of Sociology (2)

Lecture - 1 hour; discussion - 1 hour. Prerequisite: graduate standing. Practical instruction in devising course syllabi, lectures and assignments for Associate-Instructors and others interested in college teaching. Discussion of pedagogical methods of teaching qualitative and quantitative courses. (S/U grading only.) — II. (II.)

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Professional Course

466. Research Paper Workshop (2)

Workshop - 1.5 hours; discussion - 0.5 hours. Prerequisite: Master of Arts standing. A workshop to assist advanced graduate students in the preparation of an original research paper. Students present their research papers and discuss issues in theory, research design, data, empirical inference, and verbal and written presentation of a professional research paper. (S/U grading only.)

Soil Science

See Geology, on page 321; Soil Science, on page 500; Soils and Biogeochemistry (A Graduate Group), on page 501; and Soil and Water Science, on page

Soil Science

(College of Agricultural and Environmental Sciences) Faculty. See Land, Air and Water Resources, on

Major Programs. See the Soils and Biogeochemistry track in Environmental Science and Manage ment, on page 295.

Minor Program Requirements:

The Department of Land, Air and Water Resources, Soils and Biogeochemistry Program, offers a minor program in soil science. The minor is especially geared toward students in the environmental sciences including Hydrologic Science, Environmental Science and Management, Environmental Toxicology, Ecological Management and Restoration, International Agricultural Development, Crop Science and Management, Environmental Horticulture and Urban Forestry, Geology, and Plant Biology

UNITS

Soil Science	21
Soil Science 1005	
Courses selected from Soil Science 102,	
105, 107, 109, 111, 112, 118, 120, Plant	
Sciences 158, Hydrologic Science 124,	
13416	

Minor Adviser. R.J. Southard (Land, Air and Water Resources)

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees in Soils and Biogeochemistry are available. Information regarding these programs can be obtained from the graduate advisers, at http://soils.ucdavis.edu/ and in the Graduate Announcement. See also Graduate Studies, on page

Graduate Adviser. Wendy Silk (Land, Air and Water Resources)

Courses in Soil Science (SSC)

Questions pertaining to the following courses should be directed to the instructor, to the Resource Sciences Teaching Center in 1152 Plant and Environmental Sciences Building (530) 752-1669, or see undergraduate and graduate Soils and Biogeochemistry courses at http://lawr.ucdavis.edu/undergrad_sws.htm or http://lawr.ucdavis.edu/graduate_sbg.htm.

Lower Division Courses

10. Soils in Our Environment (3)

Lecture - 3 hours; independent study. Soils in our global ecosystem; soils as natural bodies formed by interactive environmental processes; soil response to use and management; sustainable use of soil resources; role of soils in agricultural and environmental issues; role of soils in our daily lives. Limited enrollment. GE credit: SciEng | QL, SE, SL.—I. (I.) Dahlgren

92. Soil Science Internship (1-12)

Internship - 3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.)

Upper Division Courses 100. Principles of Soil Science (5)

Lecture—3 hours; laboratory—3 hours; term paper. Prerequisite: Chemistry 2A-2B, Physics 1A-1B, Biological Sciences 1A; Geology 50, Biological Sciences 1C recommended. Soil as part of natural and managed ecosystems and landscapes. Solid, liquid, and gas phases and their interactions in the soil. Water, gas and heat movement in soil. Soil biology. Plant nutrient acquisition and use. Soil development, management and use. GE credit: QL, SE, SL, VL.-I. (I.) Scow, Southard

102. Environmental Soil Chemistry (3)

Lecture — 3 hours. Prerequisite: course 100 or the equivalent; general chemistry. Soil chemistry processes related to the fate and transport of contaminants in soil. Soil minerals, natural organic matter, surface charge, soil solution chemistry, redox reactions in soil, and sorption of inorganic and organic contaminants. GE credit: QL, SE, SL.-II. (II.) Parikh

105. Field Studies of Soils in California Ecosystems (5)

Prerequisite: courses 100 and 120, or equivalent recommended. Field-based studies of soils in California ecosystems, away from campus, throughout California. Emphasis on description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes in soils on the landscape; and the role of soils in land use. May be repeated one time for credit. GE credit: QL, SE, SL, VL, WE.—IV. (IV.) Amundson, Dahlgren, O'Geen, Southard

107. Soil Physics (5)

Lecture—3 hours; laboratory—3 hours; discussion—1 hour. Prerequisite: course 100, Environmental and Resource Sciences 100, Mathematics 16A, or the equivalent. Physical properties of soil. Principles of water, gas, heat, and solute movement in soil with selected examples related to soil and water management. Influence of soil properties on transfer processes. GE credit: SE. - I. (I.) Hopmans

109. Sustainable Nutrient Management (4) Lecture - 3 hours; laboratory - 3 hours. Prerequisite: course 100 or the equivalent. Availability of nutrients in organic and conventional agricultural, vineyard, orchard and plantation forest soils; management of fertilizers, cover crops, compost, sewage sludge and manures for crop production and to prevent loss to the environment is emphasized. GE credit: OL, QL, SE, SL, VL, WE.—III. (III.) Horwath

111. Soil Microbiology (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Chemistry 1C and Biological Sciences 1C. Major groups of microorganisms in soil, their interrelationships, and their responses to environmental variables. Role of microorganisms in cycling of nutrients. Plant-microbe relationships. Transformations of organic and inorganic pollutants. GE credit: QL, SE, SL, WE.—II. (II.) Scow

112. Soil Ecology (3)

Lecture - 2 hours; laboratory/discussion - 2 hours. Prerequisite: Biological Sciences 1B, 1C, course 100. The biology and ecology of soil communities, emphasizing the soil food web and litter decomposi-tion. Role of specific biota, ranging from microorganisms to earthworms. Applications to restoration, remediation, ecosystem science, and agriculture. GE credit: Wrt | SE, SL.—I. (I.) Jaffee

118. Soils in Land Use and the Environment

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 100 or consent of instructor. Soils are considered as elements in land use planning and environ-mental quality. Topics include: soil survey reports, remote sensing, land capability classification, soil erosion/conservation, waste disposal on soils and soil reclamation. One one-day field trip. GE credit: SE, SL.—III. (III.) O'Geen

120. Soil Genesis, Morphology, and Classification (5)

Lecture—4 hours; laboratory—3 hours (includes five one-day weekend field trips). Prerequisite: course 100; Geology 50 recommended. Recognition and description of soils; chemical, biological and physical processes of soil formation. Factors of soil formation. Interactions of soils with diverse ecosystems. Introduction to soil classification. Practice using soil taxonomy. Practical experience describing soil properties in the field. GE credit: QL, SE, SL, VL.-III. (III.) Southard

192. Soil Science Internship (1-12)

Internship - 3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

202. Topics in Advanced Soil Chemistry (3)

Lecture/discussion-3 hours. Prerequisite: undergraduate course in soil chemistry, water chemistry, or consent of instructor. Reviews of current research in soil chemistry. Topics include double layer theory; clay mineral and oxide surface chemistry; adsorp tion on soil surfaces; speciation and modeling of solution ions; solubility and mineral stability diagrams. Discussion of current journal articles. May be repeated one time for credit when topic differs. Offered in alternate years.—II. Parikh

205. Field Studies of Soils in California Ecosystems (5)

Fieldwork-50 hours; discussion-15 hours; lecture—5 hours. Prerequisite: courses 100 and 120 or equivalent recommended. Field-based soil studies in California ecosystems. Description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes; their role in land use. Similar to SSC 105; requires additional work for graduate credit. May be repeated one time for credit if geographic locale changes. Limited enrollment.—IV. (IV.) Amundson, Dahlgren, Southard

208. Soil-Plant Interrelationships (3)

Lecture-3 hours. Prerequisite: course 100, Plant Biology 111B, or consent of instructor. Plant needs, occurrence and reactions of water and mineral nutrients in soils; root systems and their growth in soils; mass flow and diffusion mechanisms in nutrient acquisition; models relating nutrient uptake to soil and plant characteristics; nutrient assimilation and crop quality. Offered in alternate years. - (II.) Rich-

209. Physiology and Ecology of Mycorrhizal Symbioses (3)

Lecture/discussion-3 hours. Prerequisite: Plant Biology 111 or consent of instructor; course 100 recommended. Structure, function and evolutionary development of mycorrhizal fungi and the root-fungal symbiosis. Emphasis on regulation of carbon and nutrient exchanges between host and symbiont. Course integrates mycorrhizal physiology and ecology in an ecosystem context. Offered in alternate years. — (I.) Bledsoe

211. Advanced Soil Microbiology (3)

Lecture - 3 hours. Prerequisite: Chemistry 8A-8B; course 111; Biological Sciences 102, 103 or an equivalent course recommended. Microbial metabolism of organic chemicals in soil, both natural and xenobiotic. Decomposition of organic matter. Kinetics of microbial processes in soil. Offered in alternate years. — (III.) Scow

216. Physical Geochemistry (3)

Lecture - 3 hours. Prerequisite: course 102 or Chemistry 110A or Geology 115 and Mathematics 119. First half emphasizes equilibrium thermodynamics, including choices of standard states, ideal solutions,

and use of the Gibbs-Duhem relation. Second half covers geochemical kinetics including simple rate laws, transition state theory, solute diffusion, and experimental methods.—I. (I.) Casey

218. Soil Erosion and Conservation (3)

Lecture - 2 hours; discussion - 1 hour. Prerequisite: graduate standing; courses 118, 120. Processes of soil erosion by wind and water in agricultural areas, and methods of soil conservation will be discussed. Methods of predicting rates of soil erosion will be considered. Offered in alternate years.—(II.) Singer

219. Ecosystem Biogeochemistry (4)

Lecture—3 hours; laboratory/discussion—2 hours. Prerequisite: introductory courses in ecology/biology and soils recommended; undergraduates accepted with consent of instructor. Multidisciplinary analysis of energy and nutrient transfers within ter restrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as Ecology 219.)-III. (III.) Houlton

220. Pedology (3)

Lecture—3 hours. Prerequisite: consent of instructor; course 120 recommended. Topics selected from studies of soil-forming processes, soil-geomorphic relations, mineral weathering, new developments in soil classification, and development of pedologic theory. Topics vary from year to year. May be repeated one time for credit. Offered in alternate years. — (I.) Southard

222. Global Carbon Cycle (3)

Lecture - 3 hours. Prerequisite: Chemistry 8A, 8B, Mathematics 16A, 16B, course 100 or the equivalent. Global carbon cycle from Phanerozoic epoch to modern times. Examination of long and short-term carbon cycles. Transfer of carbon among ocean, land and life with emphasis on humic substance formation, methods of characterization, reactions with organics and soil carbon stabilization. Offered in alternate years.—II. Horwath

290. Special Topics in Soil Science (1-4)

Seminar - 1-4 hours. Prerequisite: graduate standing. Seminars and critical review of problems, issues, and research in soil science. May be repeated for credit. (S/U grading only.)-I, II, III. (I,

298. Group Study (1-5)

Prerequisite: consent of instructor.

299. Research (1-12)

(S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Graduate Study. The Soils and Biogeochemistry Graduate Group offers programs of study and research leading to the M.S. and Ph.D. degrees. The focus of Soils and Biogeochemistry is on the physical, chemical and biological processes occurring in soils of different landforms and ecosystems. The goal is to understand the complex processes of mass and energy flow that control agricultural and natural ecosystem functions, productivity, and sustainability. Investigations assess impacts and implications of natural processes and anthropogenic effects, such as climate change, on soil and ecosystem behavior and development. Examples include: fate and emission of greenhouse gases; soil carbon sequestration; fate and transport of native and applied chemicals; soil microbial ecology; nutrient uptake and management; nutrient cycling in managed and wildland ecosystems; pesticide and trace element adsorption on surfaces; mineral weathering; organic agriculture; bioavailability of toxics; soil erosion; conservation; ecosystem productivity and sustainability; and the study of soil evolution on the landscape. These studies are carried out within a framework of integrating applied chemical, physical, mathematical, and biological sciences

The Major Program

The Spanish major program assures proficiency in all four language skills-speaking, understanding, reading, and writing-and acquaints students with the intellectual and cultural contributions of the Spanishspeaking world through a study of its language, literature, and cultural productions.

The Program. The department's lower division program gives students a solid foundation in the Spanish language, either through the traditional elementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. Linguistics 1 introduces students to a systematic study of language in general and serves as an introduction to upper division courses in Spanish linguistics. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary and cultural criticism and to the four areas of study represented in the department's curriculum: Spanish linguistics Spanish literature and culture, Latin-American literature and culture, and Latino literatures and cultures in the United States. Students are encouraged to work closely with the department's academic advisers in designing a program of studies tailored to their individual needs and interests. Many students combine the Spanish major with another major in the humanities or social sciences.

Student Learning Outcomes. Educational

- Demonstrate effective communicative skills in Spanish in the Interpersonal, Interpretative and Presentational modes.
- Demonstrate cultural awareness with respect to the diversity of the Spanish speaking world by comprehending Spanish for native speakers in a variety of settings, types of discourse, topics, registers, and broad regional variations
- Demonstrate awareness of genre and register in an oral and written mode.
- Demonstrate analytic, interpretive and critical thinking skills with respect to linguistics, literature and cultural studies.

Career Alternatives. The program, alone or in combination with other major programs, may lead to advanced study of the language or literature and culture of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, business, or international relations.

A.B. Major Requirements:

UNITS

Depth Subject Matter 45-48

One course in each of the following five

Spanish 117, 174, 176, or 177 4
Students place: Students planning to take Spanish 110 should do so at the beginning of the upper division sequence or concurrently with Spanish 100, 100S, 141, 141S, 170 or

Seven elective courses to be chosen in consultation with the student's major

Students may, with the approval of their adviser, take up to two elective courses outside the Spanish department in such programs as Anthropology (Anthropology 144), Chicana/o Studies (Chicana/o Studies 154, 155, 156, 160, 170, 171), Comparative Literature (Comparative Literature 152, 165, Education (Education 151, 152), History (History 159, 160, 161A, 161B, 164, 165, 166A, 166B, 167, 168, 169A, 169B), Linguistics (Linguistics 166), Native American Studies (Native American Studies 120, 133, 184), Art History (Art History 151), African American and African Studies (African American and African Studies 107A, 180). A maximum of six units of course 199 may be counted toward the major. Course 199 cannot be used to replace regular departmental courses.

Total Units for the Major......49-85

Major Advisers. Consult Department.

Advising. Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major adviser. This is especially important for students who intend to use their major as preparation for graduate study, for those who are planning a teaching career, and

for those who wish to take advantage of our EAP

Minor Program Requirements:

UNITS Spanish 23-24

One course in each of the following five
areas:
Spanish 100, 100S, 141, 141S, 170, or
170S4
Spanish 111N, 115, or 116 3-4
Spanish 130, 131N, 134A, or 142 4
Spanish 150N, 151, 157, 159 or
15984
Spanish 117, 174, 176, or 177 4
One upper division elective in
Spanish
Consult a departmental adviser if any of
these courses are to be taken abroad.

Honors Program. Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least six units of Spanish 194H distributed over two quarters. Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.

Education Abroad Program Options. The department encourages its majors to consider study in a Spanish-speaking country with our Education Abroad Program [EAP]. It is now possible for our stu-dents to complete significant portions of the Spanish major in the EAP centers at both the lower (Preparatory Subject Matter) and upper division levels through newly introduced options.

UC Davis Quarter Abroad. The Quarter Abroad Program offers programs in Mendoza, Argentina and in Madrid, Spain. These programs aim at providing students with opportunities to increase their knowledge of the Spanish language and cultures by experiencing the life-learning challenges of living and studying abroad.

Students will earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program may offer an upper division course taught by the UC Davis Program Director focusing on history, culture and society.

For more information, contact C. Colombi or C. Martínez-Carazo or see http://quarterabroad.ucdavis.edu.

Teaching Credential Subject Representative. C. Colombi; see the Teaching Credential/M.A. Program on page 115.

Graduate Study. The Department offers courses leading to the M.A. degree in Spanish to students who have completed with distinction the A.B. degree in Spanish, or the equivalent. Candidates will be recommended for admission to graduate studies in Spanish provided they meet the requirements of the Graduate Studies office and the Department of Spanish. The Department also offers programs of study and research leading to the Ph.D. degree. Detailed information may be obtained by writing to the Chairperson or the Graduate Director of the Spanish Department.

Graduate Adviser. Consult Department.

Prerequisite Credit. Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

Courses in Portuguese (POR) Lower Division Courses

1. Elementary Portuguese (5)

Lecture/discussion-5 hours; laboratory-1 hour. Introduction to Portuguese grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed Portuguese 2 or 3 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. GE credit: WC.—I. (I.)

2. Elementary Portuguese (5)

Lecture/discussion-5 hours; laboratory-1 hour. Prerequisite: course 1. Continuation of course 1 in the areas of grammar and development of all basic language skills in cultural context with special emphasis on communication. GE credit: WC.-II.

3. Elementary Portuguese (5)

Lecture/discussion-5 hours; laboratory-1 hour. Prerequisite: course 2. Continuation of course 2 in the areas of grammar and development of all basic language skills in cultural context with special emphasis on communication. GE credit: WC.-III. (III.)

Lecture — 3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. The evolution of the Latin American short story from the 19th century to the present. Emphasis on the contemporary period. Offered in alternate years. GE credit: AH, WC. - (I.) Egan, Peluffo

154. Latin American Novel (4)

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Evolution of the Latin American novel from the 19th century to the present. Emphasis on significant contemporary works. Offered in alternate years. GE credit: ÁH, WC.-(II.) Bejel, Bernucci, Egan

155. Mexican Novel (4)

Lecture -3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Evolution of the Mexican novel from the 19th century to the present. Emphasis on the narrative of the Revolution and significant contemporary works. GE credit: AH, WC.—II. (II.) Egan

156. Latin American Literature of the Turn of the 20th Century (4)

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Modernism as an authentic expression of Latin American literature and its influence on 20th-century poetry and prose. In depth analysis of the works of Darío and other major writers of the era. Offered in alternate years. GE credit: AH, WC. - (II.) Egan, Peluffo

157. Great Works of Latin American Literature/Culture (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of major works of Latin American literature/culture and their cultural and literary milieus. May include novels, poetry, film, etc. Works may be analyzed in terms of style, influence, cultural significance, political importance, and/or commercial success. Offered in alternate years. GE credit: AH, WC.-III. Bejel, Bernucci, Egan, Irwin, Lazzara, Peluffo

158. Latin American Poetry: From Vanguardism to Surrealism and Beyond (4)

Lecture — 3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of vanguardism, surrealism, and more recent movements of Latin American poetry. An in-depth analysis of the works of such major poets as Neruda, Vallejo, and Paz. Offered in alternate years. GE credit: AH, WC.—(II.) Bejel, Bernucci, Egan

159. Special Topics in Latin American Literature and Culture (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Latin American literature and culture. May be repeated two times for credit when topic differs. Offered in alternate years. GE credit: AH, WC.-I, II, III, IV. (I, II, III, IV.) Bejel, Bernucci, Egan, Irwin, Lazarra, Peluffo

159S. Special Topics in Latin American Literature and Culture (4)

Lecture—3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Latin American literature and culture. Offered in a Spanish speaking country under the supervision of UC Davis faculty. May be repeated two times for credit when topic differs. GE credit: AH, WC.—III. (III.) Lazzara, Peluffo

160. Latin American Women Writers in Translation (4)

Lecture/discussion-3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Latin American women writers from the 19th and 20th centuries. Recent theoretical approaches to literature by women in Latin America. Discussions in English of works by Matto de Turner, Avellaneda, Storni, Ocampo, Águstini, Mistral, Castellanos, and others. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC.—III. (III.) Peluffo

170. Introduction to Latin American Culture

Lecture-3 hours; term paper. Prerequisite: course 24, 24S or 33. Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not open for credit for students who have completed course 170S. GE credit: ArtHum, Div | AH, VL, WC, WE.—III. (III.) Bejel, Irwin, Lazzara, Peluffo

170S. Introduction to Latin American Culture (4)

Lecture - 3 hours; project. Prerequisite: course 24, 24S or 33. Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not open for credit for students who have completed course 170. GE credit: ArtHum, Div | AH, VL, WC, WE.—III. (III.) Colombi, Lazzara, Peluffo

171. Music from Latin America (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e., tango, bossa nova, salsa, música motena, musica andina) as well as its implications in other musical genres. Taught in Spanish. Not open to students who have taken course 171S or Music 127. (Same course as Music 171.) Offered in alternate years. GE credit: AH, WC.-II.

171S. Music from Latin America (4)

Lecture — 3 hours; discussion — 1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e., tango, bossa nova, salsa, musica motena, música andina) as well as its implications in other musical genres. Taught in Spanish and in a Spanish speaking country under the supervision of UC Davis faculty. Not open to students who have taken course 171 or Music 127. GE credit: AH, WC.-II. (II.)

172. Mexican Culture (4)

Lecture-3 hours; term paper or discussion-1 hour or term paper. Prerequisite: course 24, 24S or 33. Study of Mexican culture through a diversity of cultural expression, including elite, popular and mass media culture. Focus on national icons and archetypes, multiculturalism, transnationalism. May be repeated once for credit. GE credit: ArtHum, Div | AH, VL, WC.—III. (III.) Egan, Irwin

173. Cinema and Latin American Culture (4)

Lecture/discussion-3 hours; film viewing-3 hours. Prerequisite: course 24, 24S, or 33. Understanding Latin American cultures through cinema. History and critical analysis of Latin American film. Focus on a national cinematic tradition. Comparative experiences in different parts of Latin America and/or a particular era. Conducted entirely in Spanish. May be repeated one time for credit. GE credit: ArtHum, Div | AH, VL, WC.-Irwin

174. Chicano Culture (4)

Lecture—3 hours; term paper/discussion—1 hour. Prerequisite: course 24 or 33. An interdisciplinary survey of Chicano culture. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. (Former course 124.) GE credit: ArtHum, Div | ACGH, AH, DD.—II. (II.) Alarcón

175. Topics in Spanish American Cultural Studies (4)

Lecture — 3 hours; project — 1 hour. Prerequisite: course 24, 24S, or 33. Specific historical tendencies and issues in Latin American culture(s) from precolombian times to present. Studies of literature, film, art, journalism and performance. Focus on issues of aesthetics, politics, identity, and globalization. May be repeated once for credit if content differs. GE credit: ArtHum, Div | AH, VL, WC, WE.-III. (III.) Bejel, Irwin, Lazzara, Peluffo

176. Literature in Spanish Written in the United States (4)

Lecture—3 hours; term paper. Prerequisite: course 24 or 33. Survey of the literary and cultural contributions of the main Spanish-speaking populations present in the U.S.: Chicanos, Puerto Ricans, Cuban-Americans, Central Americans, and other Latinos. GE credit: ArtHum, Div | ACGH, AH, DD.—III. (III.) Alarcón

177. California and Latin America (4)

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: course 24, 24S or 33. Interdisciplinary survey on the relationship between California and Latin Ámerica (1500s-present). Latin American representations of California and Californian representations of Latin America, as well as borderlands texts, with a special focus on Mexican-American perspectives. Conducted in Spanish. GE credit: ACGH, DD.-Irwin

180. Senior Seminar in Spanish Linguistics (4)

Seminar-3 hours; term paper. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Spanish linguistics. Limited enrollment. May be repeated one time for credit. GE credit: AH or SS, OL, WE.—I. (I.) Blake, Bradley, Colombi

181. Senior Seminar in Spanish Literature/ Culture (4)

Seminar — 3 hours; term paper — 1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Spanish literary or cultural studies. Independent research project. May be repeated one time for credit if content differs. Limited enrollment. GE credit: AH, OL, WE.-II. (II.) Altisent, González, Martin, Martínez-Carazo

182. Senior Seminar in Latin American Literature/Culture (4)

Seminar - 3 hours; term paper - 1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Latin American literary or cultural studies. Independent research project. May be repeated one time for credit if content differs. Limited enrollment. GE credit: AH, OL, WC, WE.-III. (III.) Bejel, Egan, Irwin, Lazzara, Peluffo

1921. Internship in Spanish (1-12)

Independent study—3-36 hours. Prerequisite: course 23; junior standing; major in Spanish, Chicano Studies, or a related field. Internships in fields where Spanish language skills can be used and perfected (teaching, counseling, translating-interpreting). May be repeated for credit for a total of 8 units. Units will not count toward the Spanish major. (P/NP grading only.)

194H. Special Study for Honors Students (1-5)

Independent Study - 3-15 hours. Prerequisite: Senior standing and qualification for the Spanish honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Spanish literature, civilization, or language studies. May be repeated for up to 8 units of credit. (P/NP grading only.) GE credit: AH, WC,

197T. Tutoring in Spanish (1-4)

Tutorial — 1-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)

197TC. Tutoring in the Community (2-4)

Tutorial — 2-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.) GE credit: AH,

199. Special Study for Advanced Undergraduates (1-5)

May be repeated for up to 6 units of credit (P/NP grading only.) GE credit: AH, WC, WE.

Graduate Courses

201. Literary Theory I (4)

Seminar — 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Basic theories and practical approaches to modern and contemporary Hispanic literature. Emphasis on formalism, poststructuralism, socio-cultural discourses, and ideologies. — II. (II.) Bejel

202. Literary Theory II (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major contemporary critical theories including recent, innovative approaches to Hispanic literature and culture. Readings from Semiotics and Deconstructionism to Psychological and Socio-ideological approaches. Emphasis on Postmodern and Neo-colonial discourse. - III. (III.) Bejel

203. Research Methodologies (1)

Seminar-1 hour. Introduction to the range of scholarly research methodologies currently being realized in Spanish linguistics, literary and cultural studies: archival research, textual analysis, discourse analy sis, statistics for linguistics, etc.; introduction to scholarly writing (MLA style) and scholarly publishing.—II. (II.) Altisent, Bejel, Bernucci, Blake, Colombi, Egan, Irwin, Lazzara, Martin, Martinez-Carazo, New comb, Peluffo

205. Spanish Phonology (4)

Seminar-3 hours; term paper. Prerequisite: some knowledge of phonetics is required and consent of instructor; Linguistics 109 and 139 highly recommended. Analyzes the sound patterns of Spanish from both linear and non-linear perspectives. Students will develop a clear understanding of what phonology is and the nature of Spanish phonology, as defined by modern linguistic analysis.—II. (II.)

206. Spanish Syntax (4)

Seminar — 3 hours; term paper. Prerequisite: Linguistics 140 and 165. An examination of Spanish word order within the framework of general linguistic theory. The student will investigate how to write a grammar of Spanish with particular attention to the structure of noun and verb clauses. — I. (I.) Blake

207. History of the Spanish Language (4)

Seminar — 3 hours; term paper. Prerequisite: Latin 1. (Former course 220A.) — I, III. (I, III.) Blake

208. Old Spanish Texts (4)

Seminar - 3 hours; term paper. Prerequisite: course 207. An in-depth linguistic examination of Old Spanish texts from the 12th to the 15th centuries, with particular attention to the significance of orthographic changes. — II. (II.) Blake

211. Hispanic Dialectology (4)

Seminar—3 hours; term paper. Prerequisite: course 220 or consent of instructor. Descriptive and historical study of the distinctive features of Peninsular and American Spanish dialects. (Former course 221.)-

212. Applied Linguistics (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing and courses 215 and 216 recommended. Focuses on the relevant linguistic aspects of teaching Spanish. Designed for graduate students who have an interest in second-language learning and teaching.—II. (II.) Colombi, Blake

215. Special Topics in Hispanic Linguistics (4)

Seminar — 3 hours; term paper. Prerequisite: consent of instructor; courses 205 and 206 recommended. Specialized topics in Hispanic linguistics (e.g., pragmatics, sociolinguistics, topics in syntax, semantics, or diachronic studies). May be repeated for credit when topic differs.—III. (III.)

222. Critical Approaches to Spanish Literature I: Prose and Essay (4)

Seminar — 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical approaches to Spanish narrative and essay. May be repeated two times for credit when topic differs. Offered in alternate years.—II. Altisent, Martín

223. Critical Approaches to Spanish Literature II: Poetry and Drama (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical approaches to Spanish poetry and drama. May be repeated two times for credit when topic differs. Offered in alternate years.—II. Altisent, Armistead,

224. Studies of a Major Writer, Period, or Genre in Spanish Literature (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Spanish writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor. — III. (III.)

230. Topics in Latin American Cultural Studies (4)

Seminar—3 hours; term paper. Discussion of select contemporary theoretical debates in Latin American Cultural Studies. Application of critical questions to the analysis of cultural texts. May be repeated two times for credit when topic differs. Offered in alternate years. - (II.) McKee

231. Interamerican Studies (4)

Seminar—3 hours; term paper. Survey of methodologies of investigation for crosscultural or comparative projects in the geographical context of the Americas. Focus on particular problems of language, discipline, national definitions, and global hierarchies of knowledge that complicate such projects. Readings of interamerican cultural texts. Offered in alternate years. - (II.) Irwin

252. Medieval Spanish Literature: Prose (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of the major genres of Medieval Spanish prose from its origins to 1450.—I. (I.)

253. Medieval Spanish Literature: Epic (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Medieval Spanish epic narratives. Major theoretical perspectives on the genesis, diffusion, and character of the Medieval epic. Relationship of epic to ballad literature.—II. (IÌ.)

254. Medieval Hispanic Lyric (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Analysis of the most representative lyric poetry in the various Peninsular languages and in provencal, troubadour poetry, kharjas, villancicos, cantigas de amigo, and courtly lyric. — II. (II.)

255. Spanish Literature of the Early Renaissance (4)

Seminar-3 hours; term paper. Spanish Literature, 1450-1550, with emphasis on La Celestina. (Former course 229.)-I. (I.) Martín

256. Spanish Literature of the Renaissance and Golden Age: Poetry (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Extensive critical study of the main currents of Renaissance and Baroque Spanish poetry through its language structures, styles ("Culteranismo-Conceptismo"), rhetorical devices, myths, and themes (love, death, time). -1. (I.) Martín

257. Spanish Literature of the Renaissance and Golden Age: Drama (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. An exploration of major 16th and 17th century literary and cultural developments through the study of selected dramas. - I. (I.) Martín

258. Spanish Literature of the Renaissance and Golden Age: Prose (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The origins and development of the Spanish novel during the Renaissance and the Spanish Golden Age.—I. (I.) Martín

259. Cervantes and the Novel (4)

Seminar - 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The narrative works of Miguel de Cervantes with special emphasis on Don Quijote. - I. (I.) Martín

260. Modern Spanish Literature (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics of Spanish literature, from 1700-1920. - I. (I.)

261. Contemporary Spanish Literature: Poetry (4)

Seminar - 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Critical analysis of modern Spanish poetry from a wide spectrum of poetic currents. - I. (I.) Altisent

262. Contemporary Spanish Literature: Narrative (4)

Seminar — 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the 20th-century novel and short story with emphasis on the avant-garde, existentialism, social realism, and postmodern trends. May be repeated two times for credit when topic differs and with consent of instructor. - III. Altisent

263. Contemporary Spanish Literature: Drama (4)

Seminar - 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. The Spanish theatrical production of the last 70 years. - I. (I.)

264. Contemporary Spanish Literature: Essay (4)

Seminar - 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major thinkers from Ganivet to Unamuno and Ortega y Gassett. Emphasis will be placed on the relationships between Spanish thought and European philosophical currents. Offered in alternate years. — (III.)

265. Women Writers of Spain (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Introduction to the development of a feminine consciousness in the Spanish contemporary literary scene. Selected texts represent particularly innovative typologies of feminine discourse in the realm of the historical, psychoanalytical, and metafictional, erotic, and allegorical fiction. — I. (I.) Altisent

272. Critical Approaches to Latin American Literature: Narrative (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development of Latin American literary periods and currents in narrative (novel, short story, and essay), from early colonial times to the present. May be repeated two times for credit. if material changes. Offered in alternate years.—I. Bejel, Bernucci, Egan, Lazzara, Peluffo

273. Critical Approaches to Latin American Literature: Poetry and Drama (4)

Seminar - 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development of Latin American literary periods and currents in poetry and drama, from early Colonial times to the present. May be repeated two times for credit when topic differs. Offered in alternate years. - I. Bejel, Bernucci, Egan

274. Studies of a Major Writer, Period, or Genre in Latin American Literature (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Latin American writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit.—I. (I.) Bejel, Bernucci, Egan, Irwin, Lazzara,

275. Colonial Literature (4)

Seminar—3 hours; term paper. Prerequisite: graduate standing and consent of instructor. An examination of pre-Hispanic and Colonial narrative, poetry and theatre. Emphasis on historical, anthropological, and ethnographic approaches to Colonial discourse. — I. (I.) Egan

276. Twentieth-Century Latin American

Seminar—4 hours. Prerequisite: graduate standing or consent of instructor. Major Latin American dramatists from Florencio Sánchez to the present. Offered in alternate years. (Former course 240.)-

277. Latin American Novel, 1900-1950 (4)

Seminar — 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends and key authors in Latin America in the first half of the 20th century. Offered in alternate years. (Former course 241A.)—(I.) Bernucci, Egan

278. New Trends in Latin American Fiction (4)

Seminar — 3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Recent developments in Latin American narrative. Emphasis on innovative language and structure. Offered in alternate years. (Former course 241B.)—(II.) Egan, Lazzara

279. Mexican Narrative (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the evolution of Mexican narrative. Emphasis on the narrative of the Revolution and significant contemporary works. Offered in alternate years. — (III.) Egan

280. Latin American Short Story (4)

Seminar—3 hours; term paper. Works by major writers with emphasis on 20th-century authors such as Quiroga, Borges, García Márquez, Cortázar, and Rulfo. (Former course 243.)—III. (III.) Bernucci, Egan

281. Latin American Women Writers (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of feminist critical theories, gender construction, and selfrepresentation within the history of socio-cultural changes in Latin America. - I. (I.) Peluffo

282. Darío and Modernism (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of poetry and prose of Spanish-American Modernism (1880-1916). Offered in alternate years. (Former course 245.)—(I.) Egan

283. New Directions in Latin American Poetry (4)

Seminar-3 hours; term paper. New trends in Latin American poetry. Offered in alternate years. — (III.)

284. The Latin American Essay (4)

Seminar-3 hours; term paper. Major Latin American essayists from Sarmiento to contemporary essayists. Offered in alternate years. - (II.) Irwin

285. Multicultural Approaches to Cuban Literature and Culture (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends in Cuban literature. Emphasis on historical, geographic, social and cultural context (including music and film). Course taught in English with some readings in Spanish.—III. (III.) Bejel

291. Foreign Language Learning in the Classroom (4)

Seminar—3 hours; project. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as French 291 and German 291.)—I, II. (I, II.) Arnett, Blake, Bradley

298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. May be repeated for credit. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Courses

390. The Teaching of Spanish in College (4)

Lecture - 2 hours; discussion - 2 hours. Prerequisite: graduate standing. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of graduate teaching assistants. - I. (I.) López-Burton

396. Teaching Assistant Training Practicum

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Major Program

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

The Program. Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. The B.S. degree program has three options: General Option, Applied Statistics Option, and Computational Statistics Option. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications of statistics.

B.S. in Statistics-General Option emphasizes statistical theory and is especially recommended as preparation for graduate study in statistics.

B.S. in Statistics-Applied Statistics Option emphasizes statistical applications. This major is recommended for students who do not plan to pursue graduate studies in statistics and those who are interested in combining the statistics study with a second major or minor program in the social and life sci-

B.S. in Statistic-Computational Statistics Option emphasizes computing. This major is recommended for students interested in the computational and data management aspects of statistical

A.B. in Statistics-Applied Statistics Option emphasizes statistical applications. This major is recommended for students who do not plan to pursue graduate studies in statistics and those who are interested in combining the statistics study with a second major or minor program in the social sciences or who wish to pursue a Bachelor of Arts degree

Career Alternatives. Probability models and statistical methods are used in a great many fields, including the biological and social sciences, business and engineering. The wide applicability of statistics has created in both the public and private sectors a strong demand for graduates with statistical training. Employment opportunities include careers in data and policy analysis in government, financial management, quality control, insurance and health care industry, actuarial work, engineering, public health, biological and pharmaceutical research, law, and education. Some students have entered advanced studies in statistics, economics, psychology, medicine and other professional school programs.

A.B. Major Requirements:

3 1	UNITS
Preparatory Subject Matter	19-23
Mathematics 16A, 16B, 16C; or 17A, 17 17C; or 21A, 21B, 21C	12 .3 .4
Depth Subject Matter	45-48
Statistics 106, 108, 138 or the equivalent	. 8 . 4

Related elective courses	9-12
Three upper division courses approve	d by
major adviser; they should follow a	
coherent sequence in a single discipli	ne in
the social sciences where statistical me	thods
and models are applied and should c	over
the quantitative aspects of the discipli	ne.
Total Units for the Major	41-

1

Total Units for the Major64-71	
B.S. Major Requirements:	
General Statistics option	
UNITS	
Preparatory Subject Matter 30-32	
Mathematics 21A, 21B, 21C, 21D 16 Mathematics 22A or 67 3-4 Mathematics 25 4 Computer Science Engineering 30 or 6 Computer Science Engineering 40 (or the equivalent) 4 Any one introductory statistics course except Statistics 10 3-4	
Depth Subject Matter 51-52	
Statistics 106, 108, 138	
One upper division course approved by major adviser; it should be in mathematics, computer science or in quantitative aspects of a substantive discipline.	

Total Units for the Major.....81-84

UNITS

UNITS

Applied Statistics option

Preparatory Subject Matter26-31
Mathematics 16A, 16B, 16C; or
17A, 17B, 17C; or 21A, 21B, 21C
(21 series recommended) 9-12
Mathematics 22A 3
Computer science Engineering 30 or
Computer Science Engineering 40 (or the
equivalent)4
Two introductory courses serving as the
prerequisites to upper division courses in a
chosen discipline to which statistics is
applied
Any one introductory statistics course
except Statistics 10
Depth Subject Matter 51-56
Statistics 106, 108, 138, 141

Statistics 106, 108, 138, 141
Statistics 130A, 130B8
Three courses selected from Statistics 104,
135, 137, 142, 144, 145
Five upper division elective courses
outside of Statistics
The electives are chosen with and must be
approved by the major adviser. The
electives should follow a coherent sequence
in one single disciple where statistical
methods and models are applied: at least

three of them should cover the quantitative aspects of the discipline. Total Units for the Major......77-87 **Computational Statistics option**

Statistics 106, 108, 14112	
Statistics 131A, 131B 8	
Two courses from Statistics 104, 135, 137,	
138, 142, 144, 1458	

Programming, Data Management & Data Technologies: Computer Science Engineering
110 or 145; and 165A or 166 8
Two courses on Scientific Computational
Algorithm and Visualization from: Computer
Science Engineering 122A, 129, 140A,
158, 163 8
Two courses from Mathematics 124, 128A,
128B, 129, 145, 148, 160, 165, 167,
168 8

Total Units for the Major 82-83 Major Adviser. A. Aue

Students are encouraged to meet with an adviser to plan a program as early as possible. Sometime before or during the first quarter of the junior year, students planning to major in Statistics should consult with a faculty adviser to plan the remainder of their undergraduate programs.

Minor Program Requirements:

The Department offers a minor program in Statistics that consists of five upper division level courses focusing on the fundamentals of mathematical statistics and of the most widely used applied statistical methods.

UNITS

Statistics
Statistics 106, 108, and 130A-130B or
131A-131B16
One course from Statistics 104, 135, 137,
138, 141, 142, 144, 145 4
Preparation. Statistics 13 or 32 or 100 or
102.

Graduate Study. The Graduate Program in Statistics offers study and research leading to the M.S. and Ph.D. degrees in Statistics, including a Ph.D. in Statistics with an emphasis in Biostatistics. Detailed information concerning these degree programs, as well as information on admissions and on financial support, is available from the Department of Statistics.

Graduate Adviser. F. Hsieh

Statistical Consulting. The Department provides a consulting service for researchers on campus. For more information, call the Statistical Laboratory office (530) 752-6096.

Integrated B.S./M.S. Degree Program

The Department offers undergraduate majors a path into the Statistics M.S. program through the Integrated Degree Program (I.D.P.). This program is intended for students who seek to be employed as statisticians in government or industry. The minimum major GPA requirement is 3.200 at the end of the junior year, although students with demonstrated excellence in academic work (with a major GPA of 3.500 or above) are most likely to be admitted. Students with a major GPA of 3.500 or above may waive the GRE requirement in the M.S. application. Before moving into the graduate phase, I.D.P. students must satisfy all requirements of the B.S. dearee.

To apply for the I.D.P., undergraduate students must submit the Statistics I.D.P. form along with supporting documents during the last quarter of their junior year, to enter the I.D.P. in the first quarter of their senior year. In addition, applicants must submit an application to the M.S. program during the senior year, prior to the deadline of May 31st. Before applying to the I.D.P., students are strongly advised to consult with both the undergraduate and graduate

Once a student enters the graduate phase of the I.D.P., they follow the course requirements for the Master's degree (36 units, 18 of which are graduate level). A maximum of 12 units taken in the undergraduate phase can be transferred to the M.S. provided they have not been used to satisfy any requirements of the B.S. degree.

Courses in Statistics (STA) Lower Division Courses

10. Statistical Thinking (4)

Lecture - 3 hours; discussion/laboratory - 1 hour. Prerequisite: two years of high school algebra. Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media; emphasis is on understanding polls, unemployment rates, health studies; understanding probability, risk and odds. GE credit: SciEng or SocSci, Wrf | QL, SE.-III. (III.)

12. Introduction to Discrete Probability (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: two years of high school algebra. Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; independence; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications in the social, biological, and engineering sciences. Offered in alternate years. GE credit: SciEng | QL, SE.

13. Elementary Statistics (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: two years of high school algebra or the equivalent in college. Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit to students who have completed course 13V or higher. GE credit: SciEng | QL, SE. - I, II, III. (I, II, III.)

13V. Elementary Statistics (4)

Lecture - 1.5 hours; web virtual lecture - 5 hours. Prerequisite: two years of high school algebra or the equivalent in college. Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit to students who have completed course 13 or higher. GE credit: SciEng | QL, SE.-I. (I.)

32. Basic Statistical Analysis Through Computers (3)

Lecture - 3 hours. Prerequisite: Mathematics 16B or 17B or 21B; ability to program in a high-level computer language such as Pascal. Overview of probability modeling and statistical inference. Problem solution through mathematical analysis and computer simulation. Recommended as alternative to course 13 for students with some knowledge of calculus and computer programming. Only two units of credit allowed to students who have taken course 13, or 102; not open for credit to students who have taken course 100. GE credit: SciEng | SE, QL.—II, III. (II. III.)

90X. Seminar (1-2)

Seminar — 1-2 hours. Prerequisite: high school algebra and consent of instructor. Examination of a special topic in a small group setting.

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Upper Division Courses 100. Applied Statistics for Biological Sciences (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: Mathematics 16B or the equivalent. Descriptive statistics, probability, sampling distributions, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have taken course 13, 32

or 103. Not open for credit to students who have taken course 102. GE credit: SciEng | QL, SE.-I, II, III. (I, II, III.)

102. Introduction to Probability Modeling and Statistical Inference (4)

Lecture — 3 hours; discussion — 1 hour. Prerequisite: two years of high school algebra; upper division standing. Introductory probability and statistics at a rigorous yet precalculus level. Rigorous precalculus introduction to probability and parametric/nonparametric statistical inference with computing; binomial, Poisson, geometric, normal, and sampling distributions; exploratory data analysis; regression analysis; ANOVA. Not open for credit to students who have taken course 100. GE credit: SciEng | QL, SE, SL.— I, III. (I, III.)

103. Applied Statistics for Business and Economics (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 13, 32, or 102; and Mathematics 16A, 16B; course 100 may replace courses 13, 32, or 102. Descriptive statistics; probability; random variables; expectation; binomial, normal, Poisson, other univariate distributions; joint distributions; sampling distributions, central limit theorem; properties of estimators; linear combinations of random variables; testing and estimation; Minitab computing package. Two units credit given to students who have completed course 100. GE credit: SciEng | QL, SE.-I, İI, III. (I, II, III.)

104. Applied Statistical Methods: Nonparametric Statistics (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: course 13, 32, or 102; course 100 may replace courses 13, 32, or 102. Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests. Offered in alternate years. GE credit: SciEng | QL, SE. — (II.)

106. Applied Statistical Methods: Analysis of Variance (4)

Lecture-4 hours. Prerequisite: course 13, 32, or 102; course 100 may replace courses 13, 32, or 102. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design, Latin squares. Multiple comparisons procedures. One-way random effects model. GE credit: SciEng | QL, SE, SL.-I, II. (I, II.)

108. Applied Statistical Methods: Regression Analysis (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 13, 32, or 102; course 100 may replace courses 13, 32, or 102. Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: SciEng | QL, SE, SL.—I, II, III. (I, II, III.)

120. Probability and Random Variables for Engineers (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21A, B, C, and D. Basic concepts of probability theory with applications to electrical engineering, discrete and continuous random variables, conditional probability, combinatorics, bivariate distributions, transformation or random variables, law of large numbers, central limit theorem, and approximations. No credit for students who have completed course 131A or Civil and Environmental Engineering 114. GE credit: SciEng | QL, SE.—I, III. (I, III.) Mueller

130A. Mathematical Statistics: Brief Course

Lecture - 3 hours; discussion - 1 hour. Prerequisite: Mathematics 16B. Basic probability, densities and distributions, mean, variance, covariance, Chebyshev's inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes. Only 2 units of credit allowed to students who have taken course 131A. GE credit: QL, SE.-I. (I.)

130B. Mathematical Statistics: Brief Course

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 130A. Transformed random variables, large sample properties of estimates. Basic ideas of hypotheses testing, likelihood ratio tests, goodnessof-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics. GE credit: QL, SE.—II. (II.)

131A. Introduction to Probability Theory (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Mathematics 21A, 21B, 21C, and 22A. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have completed Mathematics 135A. GE credit: QL, SE.—İ, II, III. (I,

131B. Introduction to Mathematical Statistics (4)

Lecture — 3 hours; discussion — 1 hour. Prerequisite: course 131A or consent of the instructor. Sampling, methods of estimation, sampling distributions, confi dence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory and nonparametric inference. GE credit: QL, SE.—II, III. (II, III.)

131C. Introduction to Mathematical Statistics (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 131B, or consent of the instructor. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory and nonparametric inference. GE credit: SE, QL. – III. (III.)

133. Mathematical Statistics for Economists

Lecture—3 hours; discussion—1 hour. Prerequisite: course 103 and Mathematics 16B, or the equivalents; no credit will be given to students majoring in Statistics. Probability, basic properties; discrete and continuous random variables (binomial, normal, t, chi-square); expectation and variance of a random variable; bivariate random variables (bivariate normal); sampling distributions; central limit theorem; estimation, maximum likelihood principle; basics of hypotheses testing (one-sample). GE credit: QL, SE. — I. (I.)

135. Multivariate Data Analysis (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: course 130B, and preferably course 131B. Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotelling's T²; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets. GE credit: QL, SE.—III. (III.)

137. Applied Time Series Analysis (4)

Lecture—3 hours; term paper. Prerequisite: course 108 or the equivalent. Time series relationships, cyclical behavior, periodicity, spectral analysis, coherence, filtering, regression, ARIMA and statespace models; Applications to data from economics, engineering, medicine environment using time series software. ĞE credit: QL, SE.—III. (III.)

138. Analysis of Categorical Data (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 130B or 131B, or courses 106 and 108. Varieties of categorical data, cross-classifications, contingency tables, tests for independence. Multidimensional tables and log-linear models, maximum likelihood estimation; tests of goodness-of-fit. Logit models, linear logistic models. Analysis of incomplete tables. Packaged computer programs, analysis of real data. GE credit: SciEng | QL, SE. — I. (I.)

141. Statistical Computing (4)

Lecture - 3 hours; laboratory - 1 hour. Prerequisite: one introductory class in Statistics (such as 13, 32, 100, or 102), or the equivalent. Organization of computations to access, transform, explore, analyze data and produce results. Concepts and vocabulary of statistical/scientific computing. GE credit: QL,

142. Reliability (4)

Lecture - 3 hours; discussion/laboratory - 1 hour. Prerequisite: course 130B or 131B or consent of instructor. Stochastic modeling and inference for reliability systems. Topics include coherent systems, statistical failure models, notions of aging, maintenance policies and their optimization. Offered in alternate years. GE credit: QL, SE.

144. Sampling Theory of Surveys (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 130B or 131B. Simple random, stratified random, cluster, and systematic sampling plans; mean, proportion, total, ratio, and regression estimators for these plans; sample survey design, absolute and relative error, sample size selection, strata construction; sampling and nonsampling sources of error. Offered in alternate years. GE credit: SciEng | QL, SE.—(I.)

145. Bayesian Statistical Inference (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 130A and 130B, or 131A and 131B, or the equivalent. Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. Offered in alternate years. GE credit: QL, SE. - (II.)

190X. Seminar (1-2)

Seminar - 1-2 hours. Prerequisite: one of courses 13, 32, 100, 102, or 103. In-depth examination of a special topic in a small group setting.

192. Internship in Statistics (1-12)

Internship - 3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor. Work experience in statistics. (P/NP grading only.)

194HA-194HB. Special Studies for Honors Students (4-4)

Independent study-12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SE

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

205. Statistical Methods for Research with **SAS (4)**

Lecture—3 hours; laboratory—1 hour. Prerequisite: An introductory upper division statistics course and some knowledge of vectors and matrices; suggested courses are 100, or 102, or 103, or the equivalent. Focus on linear statistical models widely used in scientific research. Emphasis on concepts, methods and data analysis using SAS. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, variable transformation, factorial designs and ANCOVA.—III. (III.)

222. Biostatistics: Survival Analysis (4)

Lecture - 3 hours; discussion/laboratory - 1 hour. Prerequisite: course 131C. Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics. (Same course as Biostatistics 222.)—I. (I.)

223. Biostatistics: Generalized Linear Models (4)

Lecture - 3 hours; discussion/laboratory - 1 hour. Prerequisite: course 131C. Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as Biostatistics 223.)-

224. Analysis of Longitudinal Data (4)

Lecture - 3 hours; discussion/laboratory - 1 hour. Prerequisite: course/Biostatistics 222, 223 and course 232B or consent of instructor. Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated mea surements and longitudinal data in biostatistical and statistical settings. (Same course as Biostatistics 224.) - III. (III.)

225. Clinical Trials (4)

Lecture — 3 hours; discussion/laboratory — 1 hour. Prerequisite: course/Biosatistics 223 or consent of instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as Biostatistics 225.) Offered in alternate years.—III.

226. Statistical Methods for Bioinformatics (4)

Lecture—3 hours; discussion/laboratory—1 hour.
Prerequisite: course 131C or consent of instructor; data analysis experience recommended. Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of omics data. (Same course as Biostatistics 226.) Offered in alternate years. — (II.)

231A. Mathematical Statistics I (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 131A-C, Mathematics 25 and Mathematics 125 A or equivalent. First part of three-quarter sequence on mathematical statistics. Emphasizes foundations. Topics include basic concepts in asymptotic theory, decision theory, and an overview of methods of point estimation. - I. (I.)

231B. Mathematical Statistics II (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 231A. Second part of a three-quarter sequence on mathematical statistics. Emphasizes: hyposthesis testing (including multiple testing) as well as theory for linear models.—II. (II.)

231C. Mathematical Statistics III (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 231A, 231B. Third part of three-quarter sequence on mathematical statistics. Emphasizes large sample theory and their applications. Topics include statistical functionals, smoothing methods and optimization techniques relevant for statistics. —

232A. Applied Statistics I (4)

Lecture — 3 hours; laboratory — 1 hour. Prerequisite: courses 106, 108, 131A, 131B, 131C, and Mathematics 167. Estimation and testing for the general linear model, regression, analysis of designed experiments, and missing data techniques.—I. (I.)

232B. Applied Statistics II (4)

Lecture — 3 hours; laboratory — 1 hour. Prerequisite: courses 106, 108, 131A, 131B, 131C, 232A and Mathematics 167. Alternative approaches to regression, model selection, nonparametric methods amenable to linear model framework and their applicationss. - II. (II.)

232C. Applied Statistics III (4)

Lecture—3 hours; laboratory—1 hour. Prerequisite: courses 106, 108, 131C, 232B and Mathematics 167. Multivariate analysis: multivariate distributions, multivariate linear models, data analytic methods including principal component, factor, discriminant, canonical correlation and cluster analysis. - II. (II.)

233. Design of Experiments (3)

Lecture - 3 hours. Prerequisite: course 131C. Topics from balanced and partially balanced incomplete block designs, fractional factorials, and response surfaces. Offered in alternate years. - (III.)

235A-235B-235C. Probability Theory (4-4-

Lecture—3 hours; term paper or discussion—1 hour. Prerequisite: 235A—Mathematics 125B and 135A or course 131A or consent of instructor; 235B-Mathematics 235A/course 235A or consent of instructor; 235C-Mathematics 235B/course 235B or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Mathematics 235A-235B-235C.)—I-II-III. (I-II-III.)

237A-237B. Time Series Analysis (4-4)

Lecture - 3 hours; term paper. Prerequisite: course 131B or the equivalent; course 237A is a prerequisite for course 237B. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering. Offered in alternate years. — (I-II.)

238. Theory of Multivariate Analysis (4)

Lecture—3 hours; term paper. Prerequisite: courses 131B and 135. Multivariate normal and Wishart distributions, Hotelling's T-Squared, simultaneous inference, likelihood ratio and union intersection tests, Bayesian methods, discriminant analysis, principal component and factor analysis, multivariate clustering, multivariate regression and analysis of variance, application to data. Offered in alternate

240A-240B. Nonparametric Inference (4-4)

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C recommended. Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology. Offered in alternate years. (11-111.)

241. Asymptotic Theory of Statistics (4)

Lecture—3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C desirable. Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference. Offered in alternate years. (III.)

242. Introduction to Statistical Programming (4)

Lecture - 3 hours; laboratory - 1 hour. Prerequisite: courses 130A and 130B or equivalent. Essentials of statistical computing using a general-purpose statistical language. Topics include algorithms; design; debugging and efficiency; object-oriented concepts; model specification and fitting; statistical visualization; data and text processing; databases; computer systems and platforms; comparison of scientific programming languages. Offered in alternate years.

243. Computational Statistics (4)

Lecture — 3 hours; laboratory — 1 hour. Prerequisite: courses 130A and 130B or equivalent, and Mathematics 167 or Mathematics 67 or equivalent. Numerical analysis; random number generation; computer experiments and resampling techniques (bootstrap, cross validation); numerical optimization; matrix decompositions and linear algebra computations; algorithms (markov chain monte carlo, expectation-maximization); algorithm design and efficiency; parallel and distributed computing. Offered in alternate years. - II.

250. Topics in Applied and Computational Statistics (4)

Lecture—3 hours; lecture/discussion—1 hour. Pre-requisite: course 131A; course 232A recommended, not required. Resampling, nonparametric and semiparametric methods, incomplete data analysis, diagnostics, multivariate and time series analysis, applied Bayesian methods, sequential analysis and quality control, categorical data analysis, spatial and image analysis, computational biology, functional data analysis, models for correlated data, learning theory. May be repeated for credit with consent of graduate advisor. Not offered every year.-I, II, III.

251. Topics in Statistical Methods and Models (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 231B or the equivalent. Topics may include Bayesian analysis, nonparametric and semiparametric regression, sequential analysis, bootstrap, statistical methods in high dimensions, reliability, spatial processes, inference for stochastic process, stochastic methods in finance, empirical processes, changepoint problems, asymptotics for parametric, nonparametric and semiparametric models, nonlinear time series, robustness. May be repeated for credit with consent of instructor. Not offered every year.—

252. Advanced Topics in Biostatistics (4)

Lecture—3 hours; discussion/laboratory—1 hour. Prerequisite: course 222, 223. Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit with consent of adviser when topic differs. (Same course as Biostatistics 252.) Offered in alter-

280. Orientation to Statistical Research (2)

Seminar - 2 hours. Prerequisite: consent of instructor. Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member. May be repeated one time for credit. (S/Ú grading only.)—III. (III.)

290. Seminar in Statistics (1-6)

Prerequisite: consent of instructor. Seminar on advanced topics in probability and statistics. (S/U grading only.)—I, II, III. (I, II, III.)

292. Graduate Group in Statistics Seminar (1-2)

Seminar - 1-2 hours. Prerequisite: graduate standing. Advanced study in various fields of statistics with emphasis in applied topics, presented by members of the Graduate Group in Statistics and other guest speakers. (S/U grading only.)-III. (III.)

298. Directed Group Study (1-5)

Prerequisite: graduate standing, consent of instruc-

299. Individual Study (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

299D. Dissertation Research (1-12)

Prerequisite: advancement to candidacy for Ph.D., consent of instructor. (S/U grading only.)

Professional Courses

390. Methods of Teaching Statistics (2)

Lecture/discussion-1 hour; laboratory-1 hour. Prerequisite: graduate standing. Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training. May be repeated for credit. (S/U grading only.)—I. (I.)

396. Teaching Assistant Training Practicum

Prerequisite: consent of instructor; graduate standing. (\dot{S}/U grading only.)—I, II, III. (\ddot{I} , II, III.)

Professional Course

401. Methods in Statistical Consulting (3)

Lecture - 3 hours; discussion - 1 hour. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University clients. Students must be enrolled in the graduate program in Statistics or Biostatistics. May be repeated for credit with consent of graduate adviser. Not offered every year. (S/U grading only.)—I, II, III. (I, II, III.)

Graduate Study. The Graduate Program in Statistics offers programs of study and research leading to the M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Facility in computer programming is essential for some of the course work. The supervised statistical consulting required of all M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for in-depth concurrent study in an applied field. For detailed information contact the

Chairperson of the Program or the Graduate

Preparation. Preparation for the graduate program requires a year of calculus, a course in linear algebra, facility with a programming language and upper division coursework in mathematics and/or statistics. For admission to the Ph.D. program, course work requirements for the master's degree, and at least one semester/two quarters of advanced calculus must be completed.

Graduate Study. The Graduate Group in the Study of Religion offers students classical training in the literatures of particular religious traditions, and they are encouraged to understand these traditions at the intersection of contemporary thematic and regional phenomena.

Students have the opportunity to concentrate primarily on one of three regional specializations: American religious cultures, Mediterranean religions, and Asian religions. An additional regional specialization typically serves as a secondary area of competence. Students further shape their scholarship through intensive engagement in one of the following thematic specializations: Values, Ethics, and Human Rights; Modernity, Science, and Secularism: Visual Culture, Media, and Technology; Language, Rhetoric, and Performance; Body and Praxis; Theory and Method.

This curriculum guides students through a rigorous course of study, providing the breadth and depth necessary to produce exciting, rigorous scholarship at forefront of the field of Religious Studies. Graduate Group training prepares students for careers in academia as well as in the government and the pri**Preparation.** Admission to the Graduate Group requires a Bachelor's or Master's degree in a discipline relevant to the study of religion, as well as preparation in at least one language relevant to the intended area of primary research. The group requires three letters of recommendation and a sample of recent written work. The general GRE is also required.

Graduate Adviser. Contact the Group office.

The Major Program

The Sustainable Agriculture and Food Systems (SA&FS) major serves those interested in improving the sustainability of agriculture and food systems. This major prepares graduates to understand the interdisciplinary and systems-based aspects of sustainability and provides them with the knowledge, leadership skills and experiences required to excel in agricultural and food systems professions.

The Program

This program is designed to develop students' competencies for addressing the environmental, social, and economic challenges and opportunities associ ated with agricultural and food systems sustainability. The program emphasizes an experiential learning approach to sustainability education, allowing students to choose between three tracks within the major. Students in the Agriculture and Ecology track will focus on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits. Students in the Food and Society track will focus on issues related to the social, cultural, political and community development aspects of agriculture and food systems. Students in the Economics and Policy track will focus on issues related to agricultural and resource economics, policy and management. The program provides students with practical experiences through courses with on- and off-campus fieldwork and through internship placements at sites related to students' interests and focus of study.

Internships and Career Alternatives

Sustainable Agriculture and Food Systems students are required to complete an internship in the field before graduation. Internships have been arranged with local, county, and state agricultural agencies, production farms and commercial processors and retailers, domestic and international non-governmental organizations, and rural and urban community development programs. Graduates are prepared to pursue a broad range of careers related to agricultural production and food system management, rural and urban community services, education and development, and agricultural and environmental sciences, as well as careers in agricultural, environmental, and economic policy and analysis. Positions may be in private industry, government and public service agencies and in the non-profit sector, nationally and internationally. The major also prepares students for graduate studies in a wide range of fields related to agriculture and food systems.

Graduate Study. The Graduate Group in Textiles offers a program of study and research leading to the M.S. degree. Students in the program use an interdisciplinary approach emphasizing the physical and behavioral science aspects of textiles. Research areas include chemical, physical, biochemical, and mechanical properties of fibers and polymers as well as fibrous assemblies, including composites, paper, and nonwovens; and psychological and sociological factors relating to perception and consumption of textiles and apparel. Extensive specialized fiber, polymer, and textiles research facilities and a behavioral research laboratory are available. For detailed information regarding the program, address the Chairperson of the Group.

The Major Program

The textiles and clothing major emphasizes the connections among (a) the physical characteristics of textile products, (b) human perceptions of and behavior toward these products, and (c) global economic trends affecting the textile/apparel marketplace. An integrative knowledge base links textile products with people and processes, to focus on the production, distribution, and consumer use of textiles and apparel; see also Fiber and Polymer Science, on page 309.

The Program. The textiles and clothing major offers two options: textile science and marketing/ economics. The Textile Science option provides students with a broad knowledge base in both the social and physical sciences. This base includes production, end-use applications and care of textiles and apparel, physical and chemical properties of textiles, and social-psychological and economic aspects of textiles and clothing. The Marketing/Economics option emphasizes social science and business course work, while also providing students with an awareness of the physical nature of textile products.

Internships and Career Alternatives. Textiles and clothing majors can pursue internships and careers in apparel production and merchandising, retail management, international marketing, textile testing and conservation, and textiles journalism. The majority of textiles and clothing graduates accept entry-level management and technical positions within the textile and apparel industry or in related fields, (e.g., merchandising and marketing, production, research and development, technical service and design). Students may also pursue graduate studies in textiles, business, and other areas depending on their specific selections of restricted elective course work.

Courses in Textiles and Clothing (TXC)

Questions pertaining to the following courses should be directed to the instructor or to the Division of Textiles and Clothing. See also courses in Fiber and Polymer Science, on page 309.

Lower Division Courses 6. Introduction to Textiles (4)

Lecture—3 hours; laboratory—3 hours. Introduction to the structure and properties of textiles. Consumer use and fabric characteristics are emphasized. GE credit: SciEng | SE, SL, VL.-I. (I.) Sun

7. Style and Cultural Studies (4)

Lecture/discussion-3 hours; discussion/laboratory-1 hour. The multiple and overlapping influences of gender, sexuality, ethnicity, and class on constructions of identity and community are explored through the study of style in popular culture and everyday life. Continuity and change in clothing and appearance styles are interpreted. GE credit: Soc-Sci, Div, Wrt | SS, VL, WC, WE.—III. (III.) Kaiser

8. The Textile and Apparel Industries (4)

Lecture — 4 hours. Textile and apparel industries including fashion theory, production, distribution, and consumption of textile goods. GE credit: SocSci, Div | SS.

92. Internship in Textiles and Clothing (1-12)

Internship - 3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

99. Special Study for Lower Division Students (1-5)

(P/NP grading only.)

Upper Division Courses 107. Social and Psychological Aspects of Clothing (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: Sociology 2. Social and cognitive factors influencing management and perception of personal appearance in everyday life. Concepts and methods appropriate to the study of meaning of clothes in social and cultural contexts. GE credit: SocSci, Div, Wrt | SS, VL, WE.-I. (I.)

162. Textile Fabrics (3)

Lecture - 3 hours. Prerequisite: course 6. Properties of fabrics as related to serviceability, comfort, and appearance. GE credit: SciEng | SE, VL.—III. (III.)

162L. Textile Fabrics Laboratory (1)

Laboratory-3 hours. Prerequisite: course 162 (may be taken concurrently). Laboratory methods and procedures employed in studying properties of textile fabrics as related to serviceability, comfort, and appearance. GE credit: QL, SE, VL, WE.—III. (III.) Pan

163. Textile Coloration and Finishing (3)

Lecture - 3 hours. Prerequisite: course 6, Fiber and Polymer Science 110, or Chemistry 8B. Basic principles of textile dyeing, printing, and finishing; color theory; structure, properties, and application of dyes and finishes; factors affecting application and fastness; maintenance of dyed and finished textiles. GE credit: SE, VL.-III. (III.) Sun

163L. Textile Coloration and Finishing Laboratory (1)

Laboratory—3 hours. Prerequisite: course 163 (may be taken concurrently). Demonstrates various aspects of dyeing, printing, and finishing of textile substrates including the effect of fiber and finish type, and physical and chemical variables on dyeing and finishing processes and on the properties of the resultant textile. GE credit: QL, SE, SL, WE.-III. (III.) Sun

164. Principles of Apparel Production (3)

Lecture - 3 hours. Prerequisite: course 6 or 8. Overview of characteristics, technology, processes, and research in apparel manufacturing industries including study of government statistics, material utilization and fabrication, mechanization, management, and production engineering. GE credit: OL, SS, VL.

165. Textile Processes (3)

Lecture/discussion-3 hours. Prerequisite: course 6. Physical processes involved in the production of textiles from the individual fiber to the finished fabric. Includes spinning, texturing, yarn formation, weaving preparation, weaving and knitting, tufting and fabric finishing. GE credit: SE.

171. Clothing Materials Science (4)

Lecture - 3 hours; laboratory/discussion - 3 hours. Prerequisite: course 6, 8, and senior standing. The properties, characterization, and performance evaluation of clothing materials and structures for specific functional applications. Principles and methods related to wetting and transport properties, fabric hand and aesthetic properties, clothing comfort, and material and assembly technology. GE credit: SE, VL. — II. (II.) Hsieh

173. Principles of Fashion Marketing (3)

Lecture - 3 hours. Prerequisite: course 8, Economics 1A, Agricultural and Resource Economics 113 or 136. Study of basic elements of fashion marketing including philosophy and objectives, organization, merchandising, pricing, promotion and personnel. Offered in alternate years. GE credit: SS, VL.—III.

174. Introduction to World Trade in Textiles and Clothing (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 8. Structure of the global fiber/textile/ apparel complex and its distribution patterns with an overview of political, economic and technological factors that are changing these industries and their markets. GE credit: SocSci, Div | SS, WC.—II. (II.) Rucker

180A-180B. Introduction to Research in Textiles (2-2)

Laboratory-6 hours. Prerequisite: senior standing with textile-related major, and consent of instructor. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.) GE credit: SS, WE.—I, II, III. (I, II, III.)

192. Internship in Textiles and Clothing

laboratory-3-36 hours. Prerequisite: consent of instructor. Work-learn experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)

197T. Tutoring in Textiles and Clothing (1-5)

Discussion/laboratory-3-15 hours. Prerequisite: upper division textiles-related major and consent of instructor. Tutoring of students in Textiles and Clothing courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another textiles course. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

230. Behavioral Science Concepts in Textiles (3)

Lecture - 3 hours. Prerequisite: course 107, upper division or graduate course in statistics (e.g., Agricultural Management and Rangeland Resources 120) and one in a behavioral science (e.g., Psychology 145). Examination of theories and research concerning relationships between clothing and human behavior with emphasis on research techniques, including methods of measuring clothing variables. Offered in alternate years.—I. Kaiser

290. Seminar (1)

Seminar — 1 hour. Critical review of selected topics of current interest in textiles. (S/U grading only.)-I, II. (L. II.)

290C. Research Conference (1)

Discussion — 1 hour. Prerequisite: graduate standing; consent of instructor. Individual faculty members meet with their graduate students. Critical presentations of original research are made by graduate stu-dents. Research activities are planned. Discussions are led by major professors for their research groups. (S/U grading only.)—I, II, III. (I, II, III.)

293. Recent Advances in Textiles (3)

Lecture - 3 hours. Prerequisite: two upper division courses in Textiles and Clothing or consent of instructor. Critical reading and evaluation on selected topics of current interest in textiles. Multidisciplinary aspects of the topics selected will be stressed. May be repeated for credit. - (III.)

298. Group Study (1-5)

299. Research (1-12)

(S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Dramatic Art Major Program

The A.B. degree in Dramatic Art provides students with an appreciation for and understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre, dance performance, and production. Students build significant skills in specific areas (including acting, directing, choreography, design, playwriting and devising, production skills and management) as well as achieving a broad knowledge of theatre, dance and film.

Productions and Facilities. Each year's schedule includes the undergraduate EDGE festival in theatre and dance, and the UC Davis Film Festival; opportunities to work with professional directors and choreographers in two main stage productions; practice-as-research projects established through the Institute of Exploration in Theatre, Dance and Performance, and workshops, performance projects and established scripts developed by M.F.A and Ph.D. established scripts developed by M.T.A din Tri.D. students. These productions are staged in our proscenium (Main), thrust (Wyatt), black box (Arena), performance studio (University Club) and intimate laboratory theatre (Lab A), as well as in the Mondavi Center's Vanderhoef Studio Theatre and Jackson Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

Dramatic Art 124C, 1267	
Total Units for the Major	.73

Major Adviser. Consult Department office. **Minor Program Requirements:**

UNITS Dramatic Art......22

One course from Dramatic Art 20, 21A, 24, two of the following areas: acting/dance; directing/choreography/ playwriting/stage management/

dramaturgy; design/studio/technical production; and crew assignments for a minimum of one production which may include stage management, fly crew, stage running crew, props, running crew, lighting board operator, follow spot operator, sound board operator, costume running crew, dresser, make-up

Transfer Students. As described above, all students completing a major in Dramatic Art must participate in dramatic productions, including work in at least two of the following three areas: acting/dance; design (scenic, costume, lighting, painting, props, sound); directing/playwriting/stage management and crew assignments for a minimum of two produc-tions while in residence at UC Davis. Transfer students should see the major adviser for an evaluation of your previous experience.

Guest Artists. The Granada Visiting Artists Program brings distinguished professional artists to the campus each year, to be in residence for a quarter. These working professional artists interact closely with students in the classroom and rehearsal halfs and provide them excellent pre-professional experiences of theater practice.

Graduate Study. The Department of Dramatic Art offers programs of study and research leading to the M.F.A. in Dramatic Art (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies. Detailed information may be obtained by contacting the Graduate Adviser.

Graduate Advisers. Ph.D. Performance Studies and Graduate Group: L. Hunter; M.F.A. Dramatic Art Program: P. Lichtenfels

Courses in Dramatic Art (DRA)

Lower Division Courses

1. Theatre, Performance and Culture (4)

Lecture — 3 hours; discussion — 1 hour. Introductory Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." Not open to students who have completed course 1S. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, Wrt. - I, II, III, IV. (I, II, III, IV.) Bogad, Hunter, Rossini

1S. Theatre, Performance and Culture (4)

Lecture - 3 hours; discussion - 1 hour. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." For Short Term Programs Abroad. Not open to students who have completed course 1. Not offered every year. GE credit: ArtHum, Div, Wrt.

5. Understanding Performance: Appreciation of Modern Theatre, Dance, Film and Performance Art (4)

Lecture/discussion-2 hours; laboratory/discussion - 5 hours; tutorial - 1 hour. Relevance of theatre and performance to modern culture and society. Approaches to theatre/dance/media/performance art, integrated into Mondavi Centre for the Arts and Theatre and Dance Department programs. GE credit: ArtHum, Div. - I, III. (I, III.)

10. Introduction to Acting (3)

Laboratory/discussion-4 hours; term paper. Fundamentals of movement, speech, theatre games, and improvisation. Selected reading and viewing of theatre productions. Intended for students not specializing in Dramatic Art. - I, II, III. (I, II, III.)

14. Introduction to Contemporary Dance (4)

Lecture — 3 hours; laboratory — 3 hours. Introduction to basic issues and methods in contemporary dance. Focus on preparing the student for dancing and dance-making through basic techniques of improvisation and composition. Consideration of dance as a cultural practice. GE credit: VL.-I, II, III. (I, II, III.)

20. Introduction to Dramatic Art (4)

Lecture - 3 hours; discussion - 1 hour. Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts. GE credit: ArtHum | AH. -I, III. (I, III.)

21A. Fundamentals of Acting (4)

Lecture — 2 hours; laboratory — 4 hours. Prerequisite: course 20. Open to students planning to major in Dramatic Art. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of theatre productions. GE credit: OL, VL. — I. (I.)

21B. Fundamentals of Acting (4)

Lecture – 2 hours; laboratory – 4 hours. Prerequisite: course 21A and consent of instructor. Open to students planning to major in Dramatic Art. Theory and practice of acting with emphasis on character analysis, interpretation, and development. Acting in a student-directed project. Viewing of theatre productions. GE credit: OL, VL.—III. (III.)

24. Visual Aspects of Dramatic Art (4)

Lecture - 3 hours; laboratory - 2 hours. Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup.

25. Technical Aspects of Dramatic Production (3)

Lecture-3 hours. Technical principles of dramatic production emphasizing the three areas of scenic, costume and lighting studios. Subjects covered include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production.

26. Performing Arts Production Management (3)

Lecture—3 hours. Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction, audience control, box office, promotion, safety, accommodations for persons with disabilities and emergency procedures.

30. Theatre Laboratory (1-5)

Prerequisite: course 25 or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit up to 11 units.—I, II, III. (I, II, III.)

40A. Beginning Modern Dance (2)

Laboratory/discussion-4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated one time for credit with consent of instructor.—I, II, III. (I, II, III.)

40B. Intermediate Modern Dance (2)

Laboratory/discussion-4 hours. Prerequisite: course 40A. Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history. May be repeated one time for credit with consent of instructor. - I, II, III. (I, II, III.)

41A. Beginning Jazz Dance (2)

Laboratory/discussion-4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated one time for credit with consent of instructor.

41B. Intermediate Jazz Dance (2)

Laboratory/discussion-4 hours. Prerequisite: course 41A. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers.

May be repeated one time for credit with consent of

42A. Beginning Ballet (2)

Laboratory/discussion-4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated one time for credit with consent of instructor. - I, II, III. (I, II, III.)

42B. Intermediate Ballet (2)

Laboratory/discussion-4 hours. Prerequisite: course 42A or consent of instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated one time for credit with consent of instructor. — I, II, III. (I, II, III.)

43A. Contact Improvisation Dance (2)

Lecture/laboratory-4 hours. Fundamentals of contact improvisation and its applications to all forms of dance, performance, sports, physical safety and health. Solo improvisation, safety, communication, alignment, basic lifting and weight-sharing, intuition, developing relaxed readiness and personal expression. May be repeated two times for credit. Not offered every year.

43B. Intermediate Contact Improvisation (2)

Lecture/laboratory-4 hours. Prerequisite: course 43A. Building on the fundamentals. Reviewing basics, extended improvising, skillfully working with partners of different sizes and abilities, advanced lifting, advanced safety practices, embracing risk and disorientation, subtle nuances of communication. May be repeated two times for credit.

44A. Beginning Hip Hop Dance (2)

Laboratory/discussion-4 hours. Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated one time for credit.

44B. Intermediate Hip Hop Dance (2)

Laboratory/discussion-4 hours. Prerequisite: course 44A or consent of instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences. May be repeated one time for credit.

92. Internship in Dramatic Art (1-12)

Prerequisite: consent of instructor and department chairperson; lower division students (less than 84 units completed). Internship outside the Department of Theatre and Dance enabling students to practice their skills. May be repeated for credit up to 12 units. (P/NP grading only.)—I, II, III, IV. (I, II, III, IV.)

98. Directed Group Study (1-5)

Primarily for lower division students. (P/NP grading only.)

99. Special Study for Undergraduates (1-5) (P/NP grading only.)

Upper Division Courses

111S. Representation and Identity in Culture and Cinema (4)

Lecture/discussion-2 hours; film viewing-4 hours. Issues of personal and collective identity via study of film narratives from different cultures. Reflection of dominant cultural identities in film. Taught in Australia. GE credit: ArtHum, Div, Wrt.

114. Theatre on Film (4)

Lecture/discussion-3 hours; film viewing-2 hours; term paper. Prerequisite: consent of instructor; graduate standing; course 1, 14, 15. Study of six/eight plays on film, using mixed casts and raising issues of diversity. Focus: sociohistorical context for production and reception, interpretation and analysis of topics (gender, ethnicity, age, politics, philosophy), and filming, screenwriting, design, and acting/ directing for film. GE credit: ArtHum or SocSci, Div, Wrt | V

115. Advanced Study of Major Film Makers (4)

Lecture/discussion-3 hours; film viewing-2 hours. Prerequisite: course 15. Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films. May be repeated for credit when different film creator studied.

121A. Advanced Acting: Mask, Myth, and Tragedy (4)

Lecture/laboratory-6 hours. Prerequisite: course 21B and consent of instructor. Theory and practice of acting focused on the performance skills necessary to enact verse plays. Specific concentration on language as vocal and physical metaphor.

121B. Advanced Acting: Comedy from Farce to Manners (4)

Lecture/laboratory-6 hours. Prerequisite: courses 21B, 121A and consent of instructor. Theory and practice of acting in comic plays. Specific issues addressed will be comic characterization, physical mask, and timing.

122A. Advanced Acting: Realism (4)

Lecture/laboratory-6 hours. Prerequisite: course 21B and consent of instructor. The issues of Stanislavski realism are explored through selected plays. Script analysis using improvisation and emotional scoring

122B. Advanced Acting: Non-Realism (4)

Lecture/laboratory-6 hours. Prerequisite: courses 21B, 122A and consent of instructor. Exploration of the acting techniques needed to perform a non-realistic script. Different avant-garde movements will be examined through performance of the scripts.

124A. Principles of Theatrical Design: Scenery (4)

Lecture-seminar - 4 hours. Prerequisite: course 24 or consent of instructor. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction.

124B. Principles of Theatrical Design: Scenery (4)

Lecture-seminar - 4 hours. Prerequisite: course 24 or consent of instructor. Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays.

124C. Principles of Theatrical Design: Lighting (4)

Lecture-seminar — 4 hours. Prerequisite: course 24 or consent of instructor. Theories of lighting the stage, equipment and control systems, execution of lighting plots. - Munn

124D. Principles of Theatrical Design: Costume (4)

Lecture-seminar - 4 hours. Prerequisite: course 24 or consent of instructor. Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern and period plays. - I. (I.)

124E. Costume Design for Film (4)

Lecture/discussion-4 hours. Prerequisite: 24 or 124D or consent of instructor. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films. GE credit: OL, VL.—II. (II.) Morgan

125. Scenic Painting: Studio (4)

Lecture -2 hours; studio -3 hours; laboratory -3hours. Prerequisite: upper division standing in Dramatic Art, Art Studio, or Design; or course 24 or 25, or consent of instructor. Scene painting techniques, practices and materials. Course satisfies production requirement in studio category. May be repeated one time with consent of instructor. Offered in alternate years.

126. Principles of Performing Arts Stage Management (3)

Lecture/discussion - 2 hours; laboratory - 3 hours. Prerequisite: course 20, 24, 25, 26 or the equivalent or consent of instructor. Stage management principles for theatre, dance, musical theatre, music, and concerts. The dynamical role of the stage manager in the performing arts, upper-management team.

127A. Principles of Directing (4)

Lecture — 2 hours; laboratory — 4 hours. Prerequisite: courses 21A, 26; two of 156AN, 156BN, 156CN; or consent of instructor. Director's creative approach to the play and to its staging. GE credit: VL

127B. Principles of Directing (4)

Lecture — 2 hours; laboratory — 4 hours; rehearsal. Prerequisite: course 127A and consent of instructor for non-majors. Director's creative approach to the actor. GE credit: VL

128. Principles of Theatre Sound (3)

Lecture/discussion-2 hours; laboratory-3 hours. Fundamentals of sound, sound equipment, and sound design as used in modern theatre and other performance venues. Assembly, set-up, and operation of basic theatre sound reinforcement system, recording system, and theatrical playback system. -Jacobson

130. Approaches to Theatrical Design: Practice and Theory (4)

Seminar - 2 hours; studio - 4 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio or Design. Advanced scenic design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres. Course satisfies Dramatic Art production requirement in Design. Offered in alternate

135. Voice in Performance (2)

Performance instruction—4 hours. Prerequisite: course 21B or consent of instructor. Progression of exercises to free, develop and strengthen the voice, as a human and then as an actor's instrument with emphasis on how the voice works, to freeing the channel for sound, to interpersonal communication. May be repeated two times for credit. - I. (I.)

140A. Dance Composition (4)

Lecture — 3 hours; laboratory — 3 hours. Prerequisite: courses 40A, 41A, and 42A, or consent of instructor. Introduction to the craft of choreography. Students will compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy.-II. (II.)

140B. Dance Composition (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: course 140A. Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment.—III. (III.)

140C. Dance Composition (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: courses 140A, 140B. Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it through creation of short dance studies.—I. (I.)

141. Introduction to the Fundamentals of Movement (3)

Lecture/discussion-3 hours. Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of body mind specialists Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga. GE credit: VL.-I. (I.)

142. History of Modern Dance (5)

Lecture—3 hours; laboratory—3 hours; extensive writing. The Modern Dance tradition in the U.S., focusing on its theorizations of individual and social identity. Students will write and choreograph analyses of principle dances in this tradition. Offered in alternate years.

143. Dance and Movement Studio (1-4)

Laboratory/discussion-2-8 hours. Prerequisite: course 14 or consent of instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions. May be repeated for credit for a total of 8 units.

144. Introduction to Traditional Chinese Physical Culture (4)

Lecture/discussion-4 hours. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: ArtHum or SocSci, DIV | AH, SS.—II. (II.) Hunter

144B. Introduction to Traditional Chinese Physical Culture (4)

Lecture/discussion-4 hours. Prerequisite: course 144A. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. May be repeated two times for credit when content and instructor varies and if student progression is required. GE credit: ArtHum or SocSci, Div | AH, SS. - I, II, III, IV. (I, II, III, IV.)

144C. Daoist Philosophy in Traditional Chinese Movement Culture (4)

Lecture/discussion-4 hours. Prerequisite: course course 144B. Daoist practices of movement and their relation to daoist philosophy, explored through work in dance laboratory conditions. Integration of practice with conceptual analysis, and critical philosophy around values and ethical action. May be repeated two times for credit when content or instructor varies and if student progression is required. GE credit: AH, WC.—I, II, III, IV. (I, II, III, IV.) Hunter

145. Directed Choreography Projects (4)

Lecture/laboratory—6 hours. Prerequisite: courses 140A, 140B, 140C or consent of instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals. - Grenke

146A. Professional Track Modern Dance I

Laboratory/discussion-6 hours. Prerequisite: course 40B; consent of instructor. Professionally oriented performance training. Rigorous, consistent training regimen based on traditional modern dance technique. Breath and voice, skeletal and muscular placement, moving from the spine, contraction technique, movement intention. May be repeated two times for credit. - II. (II.)

146B. Professional Track Modern Dance II (3)

Laboratory/discussion-6 hours. Prerequisite: courses 40B and 146A; consent of instructor. Continuous of course 146A. Body and space relationships in solos, duets and group work; stylitic variations of Graham technique; works of Paul Taylor. May be repeated two times for credit. — (III.) (III.)

146C. Professional Track Modern Dance III (3)

Lecture/discussion-6 hours. Prerequisite: courses 40B, 146A, and 146B; consent of instructor. Continuation of course 146B. Time as a theatrical device, sustaining movement and non-movement, phrasing, musicality. May be repeated two times for credit. -Grenke

150. American Theatre and Drama (4)

Lecture — 4 hours. The history of the theatre from Colonial times to the present. Readings of selected plays. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

151S. Australian Performance and Culture (4)

Lecture/discussion-2 hours: seminar-2 hours. Australian performance and theatre practices as a product of its culture of origin. Relationships between art and society. Taught in Australia. GE credit: ArtHum.

154. Asian Theatre and Drama: Contexts and Forms (4)

Lecture/discussion-4 hours. Prerequisite: upper division standing. Selected Asian plays and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; intercultural performance—the fusion of Asian and Western traditions. Offered in alternate years. GE credit: ArtHum, Div, Wrt.

155. Representing Race in Performance (4)

Lecture - 4 hours. Representation and performance of "race" in American culture featuring different subheadings such as "African American Theatre" or "Asian-Americans on Stage." Offered in alternate years. May be repeated one time for credit when topic differs. GE credit: ArtHum, Div, Wrt | AH, DD, WE.—III. (III.)

155A. African American Dance and Culture in the United States, Brazil and the Caribbean (4)

Lecture/discussion-4 hours. A comparative study of the African American dance forms in the U.S.A. Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as African American and African Studies 155A.) Offered in alternate years.

155B. Ancient and Contemporary Greek Theatre and Dance (6)

Discussion/laboratory-10 hours; performance instruction - 10 hours; seminar - 13 hours. Origins of early theatres and the first actors, playwrights and dancers and their powerful influence on western performance and thought up to present day. Offered in Greece. GE credit: ArtHum | AH.—IV. (IV.)

156D. Theatre History through Shakespeare (4)

Lecture-4 hours; writing. Shakespeare's plays, theatre history, and theatre today. European contexts from 1590-2004 and international theatre from 20th century. Stagecraft, different media (print, stage, film), social/political environments, design, and cultural change (gender, sexuality and ethnicity). May be repeated one time for four units of credit. GE credit: ArtHum, Div., Wrt.

156AN. Performance Analysis (4)

Lecture — 3 hours; discussion — 1 hour. Prerequisite: course 1, 20, or consent of instructor. Performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE credit: ArtHum, Div, Wrt | AH, DD, WE

156BN. Theatre in History and Place: Local, National and Global Conditions for Production (4)

Laboratory-3 hours; discussion-1 hour. Prerequisite: course 1, course 20 or consent of instructor. Exploration of local, national and global issues in theatre production, with special attention to historical changes in social and political contexts for performance. GE credit: ArtHum, Div, Wrt | AH, WC,

156CN. Modern Aesthetic Movements in Performance (4)

Laboratory/discussion-3 hours; discussion-1 hour. Prerequisite: course 1, course 20 or consent of instructor. Important movements in performance, especially theatre and dance, from realism to the present. Primary emphasis on Western traditions though others may be studied. GE credit: ArtHum, Div, Wrt | AH, WE.

156D. Theatre History through Shakespeare (4)

Laboratory-4 hours; extensive writing. Shakespeare's plays, theatre history, and theatre today. European contexts from 1590-2004 and international theatre from 20th century. Stagecraft, different media (print, stage, film), social/political environments, design, and cultural change (gender, sexuality and ethnicity). May be repeated one time for credit. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—II, IV. (II, IV.) Hunter

158. Performance Studies Undergraduate Seminar (4)

Seminar-4 hours. Prerequisite: course 156A, B, or C, or consent of instructor. Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic issues as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry. May be repeated for credit. GE credit: Wrt.

159. Contemporary Experimental Performance, Theatre and Drama (4)

Lecture/discussion—4 hours. Evaluation and examination of the "New Theatre"—its experimental and innovative nature since the 1960s. Dance, film,

stage, performance art and public acts of a performative nature. Not open for credit to students who have completed course 159S

159S. Contemporary Experimental Performance, Theatre and Drama (4)

Lecture/discussion-4 hours. Evaluation and examination of the "New Theatre"—its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. This course is offered in Sydney, Australia. Not open for credit to students who have completed course 159. Not offered every year.

160A-160B. Principles of Playwriting (4-4)

Lecture/seminar—4 hours. Prerequisite: two courses in Dramatic Art or related courses in other departments; course 160A prerequisite for 160B or consent of instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE

170. Media Theatre (3)

Lecture - 1 hour; rehearsal - 2 hours; performance -1 hour. Prerequisite: upper division standing in Dramatic Art, Music, Art Studio, Design, Computer Science, or Engineering: Computer Science, or consent of instructor. New media and application of theatre design and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation. May be repeated one time for credit.

180. Theatre Laboratory (1-5)

Prerequisite: upper division standing and course 25, or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit.—I, II, III. (I, II,

192. Internships in Theatre and Dance (1-12)

Internship - 3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. May be repeated for credit for a total of 12 units. Not open to students who have completed course 1925. (P/NP grading only.)

1925. Internships in Theatre and Dance (1-12)

Internship – 3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or the-atre/dance/physical theatre companies. This course is offered in Sydney, Australia. May be repeated for credit for a total of 12 units. Not open to students who have completed course 192. Not offered every year. (P/NP grading only.)—McCutcheon

194HA-194HB. Special Study for Honors Students (3-3)

Independent study-9 hours. Prerequisite: qualification for Letters and Science Honors Program and admission to Dramatic Art Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Dramatic Art. (Deferred grading only, pending completion of sequence)

197T. Tutoring in Dramatic Art (1-5)

Tutoring - 1-5 hours. Prerequisite: upper division or graduate standing with major in dramatic art; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

Graduate Courses

200. Methods and Materials in Theatre Research (4)

Seminar-3 hours; term paper. Essential research tools in theatre and related fields; bibliographies. primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.

211. Advanced Voice and Speech (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: advanced senior undergraduate Acting major or graduate student. Open only to Dramatic Arts Students and Ph.D. students with an emphasis in Performance and Theatre. Review a progression of exercises to free, develop and strengthen the voice, first as a human instrument, and then as an actor's instrument using various texts such as Shakespeare, Ibsen and contemporary plays. Required for the M.F.A. degree in Acting. May be repeated two times for credit. - I, IV. (I, IV.)

212. Advanced Stage Movement (3)

Laboratory-6 hours. Prerequisite: graduate standing in the MFA Program. The application of modes of exploration, breath placement, and the use of imagery as well as Laban's effort/shape system as a method of analysis in classic and modern plays Open to advanced undergraduates by consent of instructor. May be repeated for credit.

221. Special Problems in Advanced Acting

Seminar-2 hours; laboratory-4 hours. Prerequisite: consent of instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit.

224A. Seminar in Theatrical Design: Ancient Worlds—Early 17th Century (4)

Seminar - 2 hours; project - 2 hours. Prerequisite: graduate standing. Group study while focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Greek, Medieval, Renaissance, Shakespearean, Jacobean, early 17th century. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.—I. (I.) lacovelli, Morgan, Munn

224B. Seminar in Theatrical Design: Mid 17th Century to 1900 (4)

Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; course 224A or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Cavalier, Restoration 18th century opera and ballet, 19th century drama. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.—II. (II.) lacovelli, Morgan, Munn

224C. Seminar in Theatrical Design: the 20th Century (4)

Seminar—2 hours; project—2 hours. Prerequisite: graduate standing; course 224A and 224B or consent of instructor. Group study focusing primarily on one discipline-scenic, costume or lighting design. 20th century genres covered: Realism, Brecht, Musicals, Contemporary Dance, short narrative film. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.—III. (III.) lacovelli, Munn

224D. Seminar in Theatrical Design: **Contemporary Concepts (4)**

Seminar — 2 hours; project — 2 hours. Prerequisite: graduate standing; course 224A, 224B, and 224C or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on contemporary design concepts for new works and classics: Shakespeare, modern dance, concept plays and musicals. Script and character analysis for design in performance, research, design projects.—I. (I.) lacovelli, Morgan, Munn

224E. Seminar in Theatrical Design: **Advanced Concepts (4)**

Seminar – 2 hours; project – 2 hours. Prerequisite: graduate standing; courses 224A, 224B, 224C, and 224D or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on special issues in contemporary design concepts for new works and classics. Script and character analysis for design in performance, research, design projects.—III. (III.) Iacovelli, Morgan, Munn

225. Performance Design Studio: Techniques and Media (2)

Studio - 2 hours. Prerequisite: graduate standing; must be taken concurrently with course 224 series. Exploration and development of techniques and skills in the performance design process. Drafting, model building, drawing, painting and rendering, costume drawing, color theory, lighting techniques, design portfolio preparation and presentation. May be repeated up to five times for credit. -1, II, III. (I, II, III.) Iacovelli, Morgan, Munn

228. Seminar in Directing Theory: Non-Realism (4)

Seminar-3 hours; term paper. Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays—Greek to the present; emphasis on textual analysis.

229. Special Problems in Directing (5)

Seminar-2 hours; laboratory-2 hours; rehearsal-4 hours. Prerequisite: consent of instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated for credit.

230. Advanced Problems in Choreography and Performance (2)

Laboratory/discussion - 2 hours. Prerequisite: consent of instructor. Explores contemporary issues of choreography and performance in depth and how those issues pertain to performance work. Focus will include contemporary thought on representation, legibility, new forms, and cultural attitudes. May be repeated six times for credit. - I, II, III. (I, II, III.) Davidson

244. Critical Approaches to Traditional Systems of Body Movement (4)

Discussion/laboratory-6 hours; project; term paper. Introduction to traditional systems for body movement, development of critical approaches to them, and experiments in how they inform training and practice in theatre, dance, and performance. May be repeated five times for credit. Not offered

250. Modern Theatre (4)

Seminar-3 hours; term paper. The theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced. Offered in alternate years.

251. Scoring and Scripting in Performance (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. The process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists' "scores" will layer and transform the "script" into performance for specific time, place, spectators.

252. Performance: Concepts of Space, Place, and Time (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Innovative theories of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consideration of various tempi from music and move-

253. Approaches to Collaboration (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Exploration of different approaches to collaboration among artists in different media and their influence on the creative pro-

254. Performing Identities/Personae (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Historical and contemporary theories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual ori-

255. Composition in the Arts (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: graduate standing. Examine manner in which specific elements utilized by actors, dancers, directors, choreographers, and designers are combined or related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products. May be repeated one time for credit.

257. Interdisciplinary Seminar in Theatre, Dance and Performance (4)

Seminar - 3 hours; project. Prerequisite: consent of instructor. Interdisciplinary seminar for first and second year MFA students in Dramatic Art. Topics will range from current practice in dance, theatre, film and performance, to leading edge developments by outstanding practitioners in the field. Students must be enrolled on the MFA in Dramatic Art. Students taking the Ph.D. in Performance Studies or the DE in Studies in Performance and Practice may apply to join the class. May be repeated two times for credit.

259. Topics in Contemporary Theatre and Performance (4)

Seminar—3 hours; term paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship (e.g., "Brecht and After," "British Theater," "Race and Gender in Performance." May be repeated five times for credit.

260. Topics in Contemporary Theatre and Performance (4)

Seminar—3 hours; term paper; project. Prerequisite: admission to any graduate program in the University. Preference will be given to students enrolled in the Designated Emphasis in Studies in Performance and Practice. Instruction is offered a variety of disciplinary approaches and methodologies in Performance and Practice, with a focus is on crossdisciplinary learning and research. Usually offered each quarter. Maybe repeated for credit with different topical matter/instructor. Offered irregularly.

265A. Performance Studies: Modes of Production (4)

Seminar—3 hours; term paper; project. Introduces students to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory. Offered in alternate years. May be repeated three times for credit when topic

265B. Performance Studies: Signification and the Body (4)

Seminar—3 hours; term paper; project. Introduces students to analysis of the body in performance, drawing on theoretical models from several fields. Offered in alternate years. May be repeated three times for credit when topic differs.

265C. Performance Studies: Performance and Society (4)

Seminar—3 hours; term paper; project. Introduces students to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. Offered in alternate years. May be repeated three times for credit when topic differs.

265D. Performance Studies: Theory, History, Criticism (4)

 $\begin{array}{l} {\sf Seminar-3\ hours;\ term\ paper;\ project.\ Introduction}\\ {\sf to\ the\ theory,\ history\ and\ criticism,\ informing\ perfor} \end{array}$ mance studies. Offered in alternate years. May be repeated three times for credit when topic differs.

280. Theatre Laboratory (1-12)

Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit.—I, II, III. (I, II, III.)

298. Group Study (1-5)

Prerequisite: consent of instructor.

299. Individual Study (1-12) (S/U grading only.)

299D. Dissertation Research (1-12) (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

Professional Courses

413. Stage Make-up (1)

Lecture/laboratory-2 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up.

Transportation **Technology and Policy** (A Graduate Group)

Graduate Study. The Graduate Group in Transportation Technology and Policy offers the M.S. (Plan I—thesis; and Plan II—exam), and Ph.D. degrees in two areas of specialization: Transportation Technology; and Transportation Planning and Policy. The technology track is for students trained in engineering and the physical sciences and interested in systems-level planning, analysis, management and design of advanced technologies (emphasizing vehicle propulsion and "intelligent transportation system" technologies) focusing on energy and environmental issues. The planning and policy track is aimed at students from a wider range of disciplines interested in the broader public policy issues concerning transportation systems. The curriculum for both tracks includes courses in civil, mechanical, and environmental engineering, economics, policy sciences, statistics, travel behavior, management, technology assessment and environmental studies.

Preparation. Applicants will normally be expected to have completed two courses in calculus, one course in linear algebra, and one course each in calculus level statistics and microeconomics. Additionally, students entering the technology track will need either to have an appropriate technical background or make up a relatively large number of prerequisite courses in order to be able to take the approved courses in that track.

Patricia L. Mokhtarian, Ph.D., Professor

Program of Study. Students will have the option of following either a technology or policy/management track. M.S. students complete 6 core courses plus electives. Ph.D. students take 7 courses from the same core, 3 additional courses from their chosen track, one more in the alternate track, plus electives. Master's degrees require a minimum of 36 quarter units and doctoral degrees require a minimum of 54 units. M.S. Plan I students may replace up to 6 units of regular course work with research (course 299) units. At least two thirds of all credits must be at the araduate level.

Graduate Adviser. P.L. Mokhtarian

Curriculum

Core Courses. Students in each track are required to take courses in a common set of core competencies, as well as (for Ph.D. students) some courses in the other track.

Knowledge areas core courses: M.S. and Ph.D. students take Transportation Technology (TTP 210), Transportation Policy (ECI 252 or TTP 220), and Transportation Systems (ECI 251)

Skill areas core courses: M.S. and Ph.D. students take one in the area of Research Design from the following: Transportation Survey Methods (TTP 200), Research Methods in Environmental Policy (ESP 278), Survey and Questionnaire Research Methods (PSY 207), Design and Analysis of Engineering Experiments (EBS 265), Experimental Design and Analysis (PLS 205), Engineering Experimentation and Uncertainty Analysis (MAE 207), or Statistical Methods for Research (STA 205);

M.S. and Ph.D. students take one in the area of Economics from the following:
Microeconomic Analysis (ARE 204),
Economic Analysis of Resource and
Environmental Policies (ARE 275),
Environmental Economics (ARE 276), or
Infrastructure Economics (ECI 268);

M.S. students take one and Ph.D. students take two in the area of Transportation Models and Quantitative Methods from the following: Applied Linear Programing (ARE 252), Optimization Techniques with Economic Applications (ARE 253), Dynamic Optimization Techniques with Economic Applications (ARE 254), Applied Econometrics (ARE 256), Probabilistic Design and Optimization (ECI 249), Dynamic Programming and Multistage Decision
Processes (ECI 253), Discrete Choice Analysis of Travel Demand (ECI 254), Urban Traffic Management and Control (ECI 256), Transportation-Air Quality: Theory and Practice (ECI 269), Applied Statistical Methods: Regression Analysis (STA 108), Applied Statistical Methods: Analysis of Variance (STA 106), Analysis of Ćategorical Data (STA 138), Design and Analysis of Engineering Experiments (EBS 265), Multivariate Systems and Modeling (PLS 206), or Psychological Data (PSC 204A, B, C. or DI:

Integration and Breadth core courses: M.S. and Ph.D. students take ITS Seminars (TTP 281), Transportation Orientation Seminar (TTP 282), and Research (TTP 299).

Planning and Policy Courses. Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural and Resource Economics, 100B, 130, 136, 144, 175, 176, 204, 275, 276 Anthropology 104N, 127, 211, 222 Civil and Environmental Engineering, 165, 252, 258, 268, 269

Civil and Environmental Engineering/
Environmental Science and Policy 163, 289A
Communication 170
Community and Regional Development 162, 171, 240, 245
Ecology 213
Economics 101, 200D
Education 222
Engineering 250
Environmental Horticulture 110
Environmental Science and Policy 163, 167, 168A, 171, 179 212A
Geography 155
History 172
Landscape Architecture 180G, 180L, 180M, 181M, 201, 205, 220
Management 240, 244, 251, 252, 293
Political Science 175, 187, 208, 279
Psychology 155
Sociology 141, 143A, 143B, 160
Transportation Technology and Policy 200, 210, 220, 281, 282, 292, 289A, 298

Technology Courses. Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Applied Biological Systems Technology 180, 181N, 182
Applied Science Engineering-Livermore 220A, 220B
Biological Systems Engineering 216
Civil and Environmental Engineering 143, 149, 161, 162, 179, 242, 244, 250, 253, 256, 257, 269, 282
Computer Science Engineering 168
Environmental and Resource Sciences 131, 186
Electrical and Computer Engineering 207
Landscape Architecture 150
Mechanical Engineering 134, 161, 163, 188, 216, 217, 218, 226, 234, 236, 258, 269
Plant Science 180

Other Courses. Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural and Resource Economics 106,

155, 252, 253, 254, 255, 256 Agronomy 205, 206 Anthropology 138 Biological Systems Engineering 265 Civil and Environmental Engineering 153, Community and Regional Development 151, Economics 140, 240A, 240B, 240, 256 Engineering, Applied Science 115 Engineering, Biological Sciences 265 Environmental Science and Policy 278 Graduate School of Management 249 Mathematics 108, 227, 258A, 258B Mechanical and Aeronautical Engineering Nutrition 492A Psychology 204A, 204B, 204C, 204D, 205A, 205B, 205C Sociology 298 Statistics 106, 108, 130, 131A, 131B, 131C, 135, 137, 138, 140, 142, 144, 205, 222, 223 Transportation Technology and Policy 200, 292, 396

Courses in Transportation Technology and Policy (TTP) Graduate Courses

200. Transportation Survey Methods (4)

Lecture—4 hours. Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues.

Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have completed Civil and Environmental Engineering 255.—II. (II.) Mokhtarian

210. Fundamentals of Transportation Technology (4)

Lecture—2 hours; discussion—2 hours. Prerequisite: consent of instructor; Mathematics 21A, 21B, 22A; graduate or junior/senior undergraduate as a technical elective. Limited enrollment. Not open for credit to students who have completed Transportation Technology and Policy; Fundamentals of Transportation Technology 289. [Former course Transportation Technology 289].—II. (II.) Erickson

220. Transportation Planning and Policy (4)

Lecture/discussion—4 hours. Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies. Students having taken this course previously as course 289 cannot repeat for credit; having taken other course 289 offerings does not preclude taking this course for credit. Limited enrollment. Offered in alternate years.—III. Handy

281. ITS Transportation Seminar Series (1)

Seminar—1.5 hours. Transportation seminars by guest speakers, on varied topics. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.) Mokhtarian, Sperling

282. Transportation Orientation Seminar (1)

Seminar—1 hour. Ten weeks of seminars, introducing various topics in transportation research and education, focusing on topics of particular interest at UC Davis. May be repeated for credit. (S/U grading only.)—1. (I.) Handy

283. Professionalism, Leadership, and Ethics (1)

Seminar—2 hours. Speakers from industry, government, academia, and NGOs will lead discussions about succeeding and performing in the professional world. They will address leadership, ethics, and other workplace issues. May be repeated for credit. (S/U grading only.)—III. (III.) Sperling

289A. Selected Topics in Transportation Technology and Policy (1-5)

Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out through lecture or laboratory, or a combination of both. May be repeated for credit.—I, II, III. (I, II, III.)

289B. Selected Topics in Transportation Technology and Policy (1-5)

Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out lecture or laboratory, or a combination of both. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

290C. Graduate Research Group Conference (1)

Discussion—1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in transportation. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

292. Internship in Transportation Technology and Policy (1-5)

Prerequisite: second year standing; approval of project prior to period of internship. Supervised work experience in transportation studies. May be repeated for credit if topic differs. (S/U grading only.)—I, II, III. (I, II, III.)

298. Group Study (1-5)

Discussion — 1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12)

Discussion—1-12 hours. Prerequisite: consent of instructor. (S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

The Program

The University Writing Program (UWP) offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The

UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific disciplines, and writing in the professions. The Professional Writing Minor serves students from all majors who are planning careers as professional writers or editors, as well as those whose academic and professional careers demand advanced writing skills. The Program offers graduate courses in the teaching of writing and in composition theory, history, and research. The Designated Emphasis in Writing, Rhetoric, and Composition Studies offers Ph.D. students in affiliated programs the opportunity to prepare for leadership roles in writing research, teaching, and program administration. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology of exemplary student writing, Prized Writing, and a journal for writing instructors, Writing on the Edge. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

Minor Program Requirements:

UNITS

Professional Writing20 One course from each of the following four

Group A: University Writing Program 101, 102A, 102B, 102C, 102D, 102E, 102F, 102G, 102H, 102I, 102J, 102K, 102L Group B: Sociology 189, University Writing Program 104A, 104B, 104C, 104D, 104E, 104F, 104I, 110, 111A, 111B, 111C Group C: Anthropology 110, 120, Classics 110, Communication 101, 105, 152, Design 145, English 105, 106, 164, History 101, Linguistics 106, Philosophy 137A, 137B, 137C, Science and Technology Studies 164, Technocultural Studies 191, University Writing Program 112A

Group D: University Writing Program 192 (or equivalent)

Additional units to achieve a total of 20 upper division units

One additional course from Groups A, B, or C above

Note: At least twelve units must be from University Writing Program courses

Courses in University Writing Program (UWP)

Lower Division Courses

1. Expository Writing (4)

Lecture/discussion-4 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composi-tion, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. GE credit: Wrt | AH, WE.—I, II, III, IV. (I, II, III, IV.)

11. Popular Science and Technology Writing (4)

Lecture/discussion - 3 hours; discussion - 1 hour. Positioning of science and technology in society as reflected and constructed in popular texts. Topics include genre theory, demarcation, rhetorical figures, forms of qualitative and quantitative reasoning, and the epistemic role of popularization in science. Offered irregularly. GE credit: AH, WE.-II. (II.)

18. Style in the Essay (4)

Lecture/discussion-4 hours. Prerequisite: course 1 or English 3 or the equivalent. Style, language, and structure in the essay. Analyzing style, developing a voice in writing, revising sentences, developing effective paragraphs and arguments, and writing with force and clarity. GE credit: Wrt | AH, WE.—I, II, III. (I, II, III.)

19. Writing Research Papers (4)

Lecture/discussion-4 hours. Prerequisite: course 1 or English 3 or the equivalent. Critical reading, analysis, documentation, and writing research-based assignments. Formulation of research topics and development of effective arguments. Reading and writing assignments may focus on a single theme. GE credit: Wrt | AH, WE.-I, II. (I, II.)

92. Internship in Writing (1-12)

Internship - 3-36 hours. Prerequisite: course 1 or English 3. Internships in fields where students can practice their skills. May be repeated for credit for a total of 12 units. (P/NP grading only.)

98. Directed Group Study (1-5)

Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. May be repeated two times for credit. (P/NP grading only.) GE credit: AH, WE.

99. Special Study for Undergraduates (1-5) Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. (P/NP grading only.) GE credit: AH, WE.

Upper Division Courses

101. Advanced Composition (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Instruction in advanced principles of expository writing. Writing tasks within and beyond the University. Different writing modes, including narrative, analysis, explanation, argument, critique. GE credit: Wrt | AH, WE.-I, II, III, IV. (I, II,

102A. Writing in the Disciplines: Special Topics (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors or to stu-dents concurrently enrolled in an upper division course in a specific academic discipline or interdisci-plinary field. Advanced instruction in writing in that discipline and practice in effective styles of communication. May be repeated one time for credit if taken in conjunction with a different subject-matter course. GE credit: Wrt | AH, WE.-I, II, III. (I, II, III.)

102B. Writing in the Disciplines: Biology (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in a biological science or to students concurrently enrolled in an upper division biological science course. Advanced instruction in writing in biology. Not open for credit to students who have completed English 102B. GE credit: Wrt | AH, WE.—I, II, III. (I, II, III.)

102C. Writing in the Disciplines: History (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in history or to students concurrently enrolled in an upper division course accepted for the history major. Advanced instruction in writing in history. GE credit: Wrt | AH, WE.—II. (II.)

102D. Writing in the Disciplines: International Relations (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in international relations or to students concurrently enrolled in an upper division course accepted for the majo Advanced instruction in writing in international relations. GE credit: Wrt | AH, WE.-II. (II.)

102E. Writing in the Disciplines: Engineering (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to upper division stu-dents in the College of Engineering and to students enrolled in an upper division engineering or computer science course for the major. Advanced instruction in writing in engineering. GE credit: Wrt | AH, WE.-I, II, III. (I, II, III.)

102F. Writing in the Disciplines: Food Science and Technology (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in food science and technology and to students concurrently enrolled in an upper division course in food science and technology. Advanced instruction in writing in food science and technology. GE credit: Wrt | AH, WE.-III. (III.)

102G. Writing in the Disciplines: Environmental Writing (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to students with upper division coursework with an environmental focus. Advanced instruction in writing and practice in effective styles of communication in the fields of environmental study, policy, or advocacy. Not open for credit to students who have completed course 102A in the same academic field. GE credit: Wrt | AH, WE.-III. (III.)

102H. Writing in the Disciplines: Human Development and Psychology (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper division course in Human Development or Psychology. Advanced instruction in writing and practice in effective styles of communication in Human Development and Psychology. Not open for credit to students who have completed course 102A in the same academic field. GE credit: Wrt | AH, WE.—I. (I.)

1021. Writing in the Disciplines: Ethnic Studies (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors in ethnic studies, or students with upper division coursework focusing on race and ethnicity. Advanced instruction in cross-disciplinary writing about race and ethnicity and practice in effective styles of communication. Not open for credit to students who have completed Wrt | AH, WE.-I. (I.)

102J. Writing in the Disciplines: Fine Arts (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper divi-sion course in Art History, Art Studio, Design, Music, or Theater and Dance. Advanced instruction in writing about the arts and practice in effective styles of communication. Not open for credit to students who have completed course 102A in the same academic field. GE credit: Wrt | AH, WE.—I, III. (I, III.)

102K. Writing in the Disciplines: Sociology

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors in Sociology or to students concurrently enrolled in an upper division Sociology course. Advanced instruction in writing and practice in effective styles of communication in Sociology and related academic and professional fields. Not open for credit to students who have completed course 102A in the same academic field. GE credit: Wrt | AH, WE.-

102L. Writing in the Disciplines: Film Studies (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper division course in Film Studies, Technocultural Studies, English, American Studies, or any other upper division course that includes the analysis and understanding of film as a medium. Advanced instruction in writing about film and practice in effective styles

of communication. Not open for credit to students who have completed course 102A in the same academic field. GÉ credit: Wrt | AH, WE.-II. (II.)

104A. Writing in the Professions: Business Writing (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Effective communication in and for organizations, including businesses (corporations), government agencies, and non-profit organizations. Suitable for students entering careers that require substantial communications, such as management, public relations, and grant writing. GE credit: AH, WE.—I, II, III. (I, II, III.)

104B. Writing in the Professions: Law (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced principles of critical thinking, argumentation, and style, with special emphasis on their application in the legal profession. Suitable for students planning careers in law, business, administration, or management. GE credit: Wrt | AH, WE.—I, II, III. (I, II, III.)

104C. Writing in the Professions: Journalism (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Non-fiction for magazines and newspapers, with attention to style and language. Emphasis on research, interviewing, market analysis, and query letters. GE credit: Wrt | AH, WE. –I, II, III. (I, II, III.)

104D. Writing in the Professions: Elementary and Secondary Education (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced expository writing in the contemporary American classroom. Strongly recommended for teaching credential candidates. GE credit: Wrt | AH, WE.-I, II, III. (I, II,

104E. Writing in the Professions: Science (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing or enrollment in a graduate science curriculum. Writing abstracts, research proposals, scientific papers, other forms of scientific communication. Presenting data graphically. Primarily for students engaged in or planning careers in basic or applied research. GE credit: Wrt | AH, WE.—I, II, III. (I, II, III.)

104F. Writing in the Professions: Health (4)

Lecture/discussion — 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced expository writing common in the health professions, emphasizing effective communication between the writer and different audiences. Topics relate to health, disability, and disease. Suitable for students planning careers in professions such as medicine, dentistry, physical therapy, optometry. GE credit: Wrt | AH, WE. –I, II, III. (I, II, III.)

1041. Writing in the Professions: Internships

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to students concurrently enrolled in an internship and to Contemporary Leadership minors. Advanced instruction in writing in the workplace, including public and private sectors, government agencies, profit and non-profit organizations. Collaborative work and practice in effective styles of communication. Not open for credit to students who have completed course 102A. GE credit: Wrt | AH, WE.-III. (III.)

104T. Writing in the Professions: Technical Writing (4)

Lecture/discussion-3 hours; extensive writing. Communicating effectively about technology and other technical subjects to varied audiences for varied purposes. Suitable for students entering professions that require communicating technical information to subject matter experts, managers,

technicians, and non-specialists. Not open for credit to students who have taken course 104A prior to Fall 2012. GE credit: AH, WE.-I, II, III. (I, II, III.)

110. Specialized Genres in Professional Writing (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students who have satisfied the upper-division writing requirement. Counts toward the writing minor. Instruction in the elements and practices of professional writing in specialized genres. Offered irregularly. GE credit:

111A. Specialized Topics in Journalism (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism. Counts toward the writing minor. Instruction in the elements and practices of advanced journalism. May be repeated one time for credit if specialized journalism topic for each course differs. Offered irregularly. GE credit: Wrt | AH, WE.

111B. Specialized Topics in Journalism: Investigative Journalism (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism; counts toward the writing minor. Instruction in the elements and practices of in-depth investigative journalism.

Offered in alternate years. GE credit: Wrt | AH,

111C. Specialized Topics in Journalism: Science Journalism (4)

Lecture/discussion—3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism. Counts toward the writing minor. Instruction in the elements and practices of science journalism. Offered in alternate years. GE credit: Wrt | AH, WE.-II.

112A. Introduction to Professional Editing (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students who have satisfied the upper-division writing requirement; counts toward the writing minor, Group C: Theory, History, and Design. Introduction to general editing practices and principles, with an emphasis on professional editing in organizational contexts, including academia and the workplace. Extensive practice in copy, comprehensive, and collaborative editing. Offered irregularly. GE credit: ArtHum, Wrt | AH, VL, WE.

192. Internship in Writing (1-12)

Internship - 3-36 hours. Prerequisite: course 1 or English 3 or the equivalent. Internships in fields where students can practice their skills. May be repeated up to 12 units for credit. (P/NP grading only.) GE credit: AH.

197T. Tutoring in Writing (1-5)

Tutoring — 1-5 hours. Prerequisite: upper division standing; consent of instructor. Tutoring one-on-one or leading small voluntary discussion groups affiliated with a writing course. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit:

197TC. Community Tutoring in Writing (1-4)

Tutoring – 1-4 hours. Prerequisite: upper division standing; consent of instructor. Field experience, with individuals or in K-12 classroom instruction, focusing on reading- and writing-to-learn strategies in any subject area. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit: AH.

198. Directed Group Study (1-5)

Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit: AH, WE.

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH, WE.

Graduate Courses

250. Writing Assessment (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: graduate standing or consent of instructor. Examines key testing and measurement concepts; the history of writing assessment; and relationships among writing tests and methods of teaching writing; the impacts of Information and Communication Technology (ICT), and how educational policies both drive and respond to writing assessments. Offered in alternate years. — (II.) Whithaus

270. Literacy and Technology (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: graduate standing or consent of instructor. Examines how the physical qualities of texts offer different affordances during production and reception; grounds these discussions in the development of literacy practices and writing technologies from ancient to contemporary; creates frameworks for research into literacy, teaching, and textual technologies. Offered in alternate years. — (II.) Andersen, Whithaus

298. Directed Group Study (1-5)

Prerequisite: graduate standing; consent of instructor. (S/U grading only.)

299. Individual Study (1-12)

Prerequisite: consent of instructor; graduate standing. (S/U grading only.)

Professional Courses

390. Theory and Practice of University-Level Composition Instruction (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing; appointment as Teaching Assistant in the Composition Program. Examination of current theories about the teaching of writing and their practical application to undergraduate writing courses at UC Davis. Not open for credit to students who have completed English 390. (S/U grading only.)—III.

392. Teaching Expository Writing (2)

Discussion - 2 hours. Prerequisite: graduate standing, appointment as Teaching Assistant in the Composition Program; completion of course 390 or the equivalent. Discussion of problems related to teaching expository writing at the university level, with special emphasis on teaching reading and writing skills and responding to student papers. (S/U grading only.)—I. (I.)

396. Teaching Assistant Training Practicum

Prerequisite: graduate standing; consent of instructor. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

Departmental Courses

Anatomy, Physiology and Cell Biology (APC)

Lower Division Courses

92. Internship (1-12)

Internship—3-36 hours. Prerequisite: lower division standing; consent of instructor. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology & Cell Biology. Internships are supervised by a member of the faculty. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading

Upper Division Courses 100. Comparative Vertebrate Organology

Lecture—3 hours; laboratory—3 hours. Prerequisite: Biological Science 1A and 1B or 2A and 2B. Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as Neurobiology, Physiology, and Behavior 123.)—II. (II.) Meyers

192. Internship (1-15)

Internship - 3-45 hours. Prerequisite: upper division standing, approval of internship. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology and Cell Biology. Internships are supervised by a member of the faculty. May be repeated for credit if topic differs. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading

Graduate Courses

285. Morphometry of Cells, Tissues and Organs (2)

Lecture - 1 hour; laboratory - 3 hours. Prerequisite: course 100 or the equivalent; Statistics 13. Stereological estimation of volumes, surfaces and lengths of organs/components; estimation of number of cells in an organ or tissue, their volumes, products and gene expression. Practical application of stereology

and avoidance of most common biases of histological measurements. Offered in alternate years. - II.

286. Basics of Microscopy and Cellular Imaging (2)

Lecture—1 hour; laboratory—2 hours. Prerequisite: graduate standing. Practical applications of basic microscope techniques used to image cells and tissues with the goal of using these techniques to generate publication quality images. Principles of light, epifluorescent, confocal and electron microscopy, their applications and limitations. Restricted enrollment. Öffered in alternate years. - III. Van Winkle

290. Seminar (1)

Seminar — 1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (P/NP grading only.)—I, II, III. (I, II, III.)

291. Topics in Biology of Respiratory System (1)

Seminar — 1 hour. Prerequisite: graduate standing and consent of instructor. Topics concerning structure and function of respiratory system. Possible topics include: lung growth, pulmonary reaction to toxicants, pulmonary inflammation, lung metabolism, biology of lung cells, tracheobronchial epithelium, nasal cavity structure and function. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, İII.) Hyde, Wu, Pinkerton

298. Group Study (1-5)

Laboratory-6-15 hours. Prerequisite: consent of instructor.

299. Research (1-12)

Laboratory-6-36 hours. Prerequisite: consent of instructor. (S/U grading only.)

Medicine and Epidemiology (VME) **Upper Division Courses**

158. Infectious Disease in Ecology and Conservation (3)

Lecture — 3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or Veterinary Medicine 409 or equivalent. Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and application to field data. Scientists role in developing disease control policies. Offered in alternate years. — (II.) Foley

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

201. Emerging Issues at the Interface of Ecosystem, Animal and Human Health (3)

Lecture — 1 hour; discussion — 2 hours. Prerequisite: Active student status in MPVM, Master of Public Health programs or graduate groups in Epidemiology, Ecology, Public Health, Comparative Pathology, or consent of instructor. Restricted to 20 students. Principles of one health with emphasis on the relationships and interdependence of environmental, animal and human health. Exploration of critical data gaps needed to achieve sustainability in ecosystems and disease prevention.—II. (II.) Johnson

217. Evaluation and Application of Diagnostic Tests (2)

Lecture/discussion-17 sessions; laboratory-3 sessions. Prerequisite: introductory courses in probability (e.g., Preventive Veterinary Medicine 402 or Statistics 102) and epidemiology (e.g., Preventive Veterinary Medicine 405 or Epidemiology 205); a working knowledge of immunological principles beneficial but not essential to understanding technical material associated with diagnostic tests. Topics include sensitivity, specificity, predictive values, Bayes' Theorem, ROC analysis, measuring agree ment between tests, series and parallel testing strategies. Emphasis on rational evaluation, interpretation and presentation of test results for individuals and aggregates. Offered in alternate years.-III

219. Clinical Experimental Design (3)

Lecture - 15 sessions. Prerequisite: biostatistics, ecology, epidemiology, experience in clinical medicine or microbiology recommended. Design and construction of experiments, hypothesis testing, exploratory data analysis, controls, inferring causation, and the performance of scientific research. Offered in alternate years.—II. Foley

225. Retroviral Pathogenesis Seminar/ Journal Club (1)

Discussion - 1 hour. Prerequisite: graduate student status in the Comparative Pathology, Microbiology or Immunology graduate groups. Participatory seminar addressing the mechanisms of retroviral pathogenesis in a journal club format. Focus on the review of current scientific journal papers concerning viral pathogenesis, immunology and virology with a special focus on retroviruses. May be repeated 12 times for credit. (S/U grading only.)-I, II, III. (I, II, III.) George, Sparger

258. Infectious Disease in Ecology and Conservation (1)

Discussion-2 hours. Prerequisite: course 158 (must be taken concurrently). Presentation, analysis and discussion of primary literature on the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Multidisciplinary approach combines perspectives of ecology and veterinary medicine. Offered in alternate years. (S/U grading only.)—II. Foley

290C. Research Group Conference (1)

Conference — 10 sessions. Prerequisite: first-, secondor third-year standing in the School of Veterinary Medicine. Current research topics relevant to veterinary clinical pharmacology. May be repeated two times for credit. (S/U grading only.)—I, II, III. (I, II, III.) Tell

298. Group Study (1-5)

Prerequisite: student in School of Veterinary Medicine or consent of instructor. Group study in selected areas of the clinical sciences. (S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Molecular Biosciences (VMB) **Lower Division Course**

92. Internship (1-12)

Internship - 3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

Upper Division Courses 192. Internship (1-12)

Internship - 3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

234. Current Topics in Neurotoxicology (3)

Lecture - 3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health

impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as Environmental Toxicology 234 and Molecular, Cellular, and Integrative Physiology 234.) Offered in alternate years. - II. P. Lein

253. Metabolism of Toxicants and Drugs (2)

Lecture - 2 hours. Prerequisite: Pharmacology and Toxicology 201, 202, 203, general biochemistry or consent of instructor. Significance/chemical pathways of toxicants and drug metabolism, enzymology and molecular aspects of P450 and flavin monooxygenases, hydrolases and phase 2 transferases and experimental approaches for metabolism studies.

Offered in alternate years.—II. Buckpitt

254. Toxicology of the Respiratory System

Lecture — 3 hours; discussion. Prerequisite: Pharmacology and Toxicology 201, 202, 203, or consent of instructor. Survey of structure and function of the respiratory system, the pathophysiology of major lung diseases, the interactions of toxicants with the lung and response of this organ to injury. Offered in alternate years. - (II.) Pinkerton

255. Pharmacokinetics and Biopharmaceuticals (2)

Lecture - 16 sessions; discussion - 4 sessions. Indepth study of pharmacokinetics, including the fundamentals of pharmacokinetics, how to design a pharmacokinetic study and how to use both compartmental and non-compartmental analysis to interpret the data. Offered in alternate years. – III. Knych, Stanlev

290. Seminar (1)

Seminar — 1 hour. Prerequisite: graduate standing and consent of instructor Topics in nutrition, pharmacology/toxicology, and biochemistry. May be repeated for credit. (S/U grading only.) -1, II, III. (I,

297T. Tutoring in Graduate Molecular Biosciences (1-5)

Prerequisite: graduate or professional student standing and consent of instructor. Assist in preparation and teaching of courses in Nutrition, Pharmacology and Toxicology, or other courses offered by the department under direct supervision of the instructor. Designed for graduate or professional students who desire teaching experience in graduate courses. May be repeated up to 5 units of credit. (S/U grading only.)—I, II, III. (I, II, III.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Course

397T. Tutoring in Molecular Biosciences (1-5)

Discussion - 1-5 hours. Prerequisite: graduate or professional standing and consent of instructor. Experience in professional curriculum for graduate or professional students, not teaching assistants, under direct supervision of instructor. May be repeated up to 5 units of credit (S/U grading only.) -1, II, III. (I, II,

Pathology, Microbiology, and Immunology (PMI)

Lower Division Course

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading

Upper Division Courses

126. Fundamentals of Immunology (3)

Lecture — 3 hours. Prerequisite: Biological Sciences 102 or the equivalent or consent of instructor. Overview of immunology including components of the immune system, initiation and regulation of the immune response, infection and immunity, hypersensitivity and immune dysfunction. Clinical immunologic techniques, immunodeficiency and vaccinology. — II. (II.) Stott

126L. Immunology Laboratory (2)

Laboratory-6 hours. Prerequisite: course 126 or the equivalent (may be taken concurrently). Laboratory procedures in clinical immunology. Laboratory animal immunization/bleeding. Quantitative and qualitative characterization of the immune response. Cells of the immune system. - II. (II.) Stott

127. Medical Bacteria and Fungi (5)

Lecture—3 hours; laboratory—5 hours. Prerequisite: general microbiology (Microbiology 102 and 102L), basic immunology (course 126 or Medical Microbiology 188). An introduction to the bacterial and mycotic pathogens of man and animals, with emphasis on pathogenic mechanisms and ecologic aspects of infectious disease. — III. (III.) LeFebvre

128. Biology of Animal Viruses (3)

Lecture — 3 hours. Prerequisite: Biological Sciences 102. Fundamental physical and chemical properties of animal viruses; methods of propagation, purification and assay. Mechanisms of viral replication and pathogenesis of viral infections in man and animals. Immunity to virus diseases and oncogenic properties of animal viruses. Two units of credit to students who have completed Microbiology 162.—III. (III.) Miller

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

214. Vector-borne Infectious Diseases: Changing Patterns (2)

Lecture/discussion-2 hours. Prerequisite: graduate student standing (PhD or MS). Restricted to 10 students. Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. Prerequisite: consent of instructor. (S/U grading only).—I. (I.) Lanzaro, Reisen

221. Topics in Virus Research (1)

standing (PhD or MS). Restricted to 10 students. Discussion-based seminar covering graduate student virology research. Informal presentations and discussion of technical problems in research design and experimentation are encouraged. Current stage of the research project is not important. (S/U grading only.)-I. (I.) Murphy

250. Philosophy and Ethics of Biomedical Science (1)

Seminar - 1 hour. Prerequisite: graduate-level standing. Presentations by faculty and guest speakers followed by discussions of relevant current events by graduate students. (S/U grading only.)-III. (III.) Gal-

270. Advanced Immunology (3)

Lecture - 2 hours; discussion - 1 hour. Prerequisite: Introductory course in immunology. Graduate student status in the Comparative Pathology Graduate Group. All other students will require consent of instructor. Current concepts of immunology with an emphasis on interactions between the host, the environment and the pathogen. These interactions will include those that are protective and successful for the host as well as those that are deleterious—II. (II.) Stott

275. Comparative Pathology of Organ Systems (4)

Lecture - 3 hours; laboratory/discussion - 2 hours. Prerequisite: graduate level standing. Correlative alterations in structure and function of organ response to injury presented in context of major disease syndromes. Emphasis on general responses to disease in both humans and animals. Introductory material on the mechanisms of viral, bacterial and parasite pathogenesis.—I. (I.) Affolter

283. Comparative Avian Anatomy and Pathology (1-3)

Lecture—3 hours. Prerequisite: Anatomy section (1 unit): upper division undergraduate standing, veterinary students, or graduate standing, and consent of instructor; Pathology section: third- or fourth-year standing in the School of Veterinary Medicine or graduate standing and consent of instructor. Ten lectures outline gross/microscopic functional anatomy of a wide range of avian species as appropriate for students interested in avian biology. The remaining 20 lectures encompass comparative aspects of avian pathobiology and disease manifestations for students interested in avian diseases.—I. (I.) Lowenstine

285. Cellular Basis of Disease (3)

Lecture—3 hours. Prerequisite: Biological Sciences 104, Veterinary Medicine 452, course 275, or Medical Pathology 210. Application of cell biology, biochemistry and molecular biology to the understanding of the basic nature of disease. Cellular injury and mechanisms of adaptation, host-defense and vascular responses, and cellular transformation.—II. (II.) Mohr, Wu

287. Comparative Pathology of Laboratory Animals (3)

Lecture—3 hours. Prerequisite: general and systemic pathology; second-, third-, or fourth-year standing in the School of Veterinary Medicine or graduate student standing, or consent of instructor. Recognition of lesions and understanding of pathogenesis of diseases of animals commonly kept in laboratory settings. Species covered include rodents, lagomorphs, amphibians, nonhuman primates, genetically manipulated animals and novel animal models. Offered in alternate years.—(III.)

290. Seminar (1)

Seminar — 1 hour. Prerequisite: graduate level standing. Topics in pathology, microbiology or immunology. May be repeated for credit. (S/U grading only.) I, II, III, IV. (I, II, III, IV.)

291A. Seminar in Immunology (1)

Seminar—1 hour. Prerequisite: course 126 or the equivalent. Students choose topic for each quarter. Individual or pairs of students choose a paper for all to read and present a seminar based on the subject of the paper. All students participate in discussion. May be repeated for credit. (S/U grading only.)—I, III. (I, III.) Gershwin

293A. Seminar in Infectious Diseases (1)

Seminar—1 hour. Prerequisite: current enrollment in health science professional school or graduate standing in biological sciences. Discussion of current topics and cases of infectious diseases. May be repeated one time for credit if topic differs. (S/U grading only.)—I, II, III. (I, III.) Byrne

293B. Necropsy and Surgical Pathology (2-4)

Laboratory—6-12 hours. Prerequisite: graduate student standing and consent of instructor. Responsible diagnostic casework. Performance of necropsies, slide reading, and case reporting. May be repeated for credit. (S/U grading only.)—I, II, III, IV. (I, II, III, IV.)

296. Microbiological Diagnosis (2-5)

Laboratory—5-14 hours; discussion—1 hour. Prerequisite: laboratory course in veterinary or medical microbiology or equivalent or consent of Chief of Microbiology, VM Teaching Hospital. Laboratory diagnosis of infectious diseases involving case work at the VM Teaching Hospital. (S/U grading only.) I, II, III. (I, II, III.) Byrne

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

Population Health and Reproduction (PHR)

Lower Division Course

92. Internship in Veterinary Science (1-4)

Discussion/laboratory—1-4 hours; clinic—3-36 hours; final report. Prerequisite: approval of project prior to period of internship by faculty sponsor. Supervised work experience in reproduction. (P/NP grading only.)

Upper Division Courses

106. Human-Animal Interactions: Benefits and Issues (2)

Lecture—18 sessions; fieldwork—1 session. Prerequisite: upper division standing or consent of instructor. The contributions of animals to human society, including historic, anthropologic, developmental, human health and therapeutic perspectives, as well as effects of humans on animals. One field trip required.—II. (II.) Hart

192. Internship in Veterinary Science (1-12)

Discussion/laboratory—1-12 hours; clinic—3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in Reproduction. May be repeated for credit. (P/NP grading only.)

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

202. Sampling in Health-Related Research (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 403 or the equivalent; consent of instructor. A very thorough coverage of simple random sampling, stratified sampling, cluster sampling, systematic sampling and other sampling methods applied extensively in epidemiology and other health-related disciplines. Emphasis on application of the sampling methods. Offered in alternate years.—II. Farver

203. Multivariate Biostatistics (3)

Lecture—3 hours. Prerequisite: Preventive Veterinary Medicine 403 and 404, or the equivalent; consent of instructor. Multivariate procedures covered are principal component analysis, factor analysis, Twogroup and k-group multivariate ANOVA, multivariate regression, Two-group and k-group discriminant analysis and repeated measures analysis, cluster analysis, and canonical analysis. Emphasis is on application of procedures. Offered in alternate years.—(II.) Farver

210. Epidemiological Approaches to Waterborne Zoonotic Pathogens (1)

Lecture—1 hour. Waterborne zoonotic diseases remain a significant cause of human illness. Review key waterborne pathogens; their biology, fate and transport in aquatic systems; on-farm management practices for reducing microbial contamination of California's fresh and marine aquatic resources from livestock production systems. [S/U grading only.]—II. (II.) Atwill

212. Epidemiology of the Zoonoses (4)

Lecture — 35 sessions; discussion — 5 sessions. Prerequisite: graduate standing or third-year standing in the School of Veterinary Medicine or consent of instructor. Epidemiological, biological and ecological features of some major infections shared by humans and other animals. Wildlife and domestic animals zoonoses of major health and economic significance are presented to illustrate how knowledge of zoonoses epidemiology is essential for implementing control measures. — II. (II.) Chomel

241. Advanced Topics in Canine Genetics and Genomics (2)

Discussion—2 hours. Prerequisite: Genetics 201A, 201C (or equivalents, with consent of instructor). Indepth study of topics in canine genomics and genetics. Topics will vary annually, but can include positional cloning, whole genome association, complex traits and linkage disequilibrium. Students will lead discussions on assigned readings. May be repeated for credit when topic differs. Limited enrollment. Offered in alternate years.—III. Bannasch

242. Ecological Genetics: Applied Genetics for Ecology, Health, and Conservation of Natural Populations (3)

Lecture—2 hours; discussion—0.5 hours; laboratory—0.5 hours. Prerequisite: undergraduate genetics and ecology/conservation biology courses recommended. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. Limited enrollment. (Same course as Ecology 242.)—1. (I.) Ernest

243. Advanced Topics in Conservation Genetics (2)

Discussion—18 sessions; lecture—2 sessions. Prerequisite: undergraduate genetics and ecology or consent of instructor. Restricted to 16 students. Indepth study of topics related to the application of genetic tools to wildlife conservation. Topics will vary annually, but may include use of non-invasive methods of genetic assessment and monitoring of wildlife populations. Students will lead discussions on assigned readings. (S/U grading only.)—II. (II.)

266. Applied Analytic Epidemiology (3)

Lecture—2 hours; laboratory—2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as Master of Public Health 266.)—III. (III.) Kass

290A. Seminar (1)

Seminar—1 hour. Discussion of current topics in animal reproduction and medicine, as well as presentation of research findings by graduate students and faculty. May be repeated for credit. (S/U grading only.)—1, II, III. (I, II, III.)

292. Current Topics in Reproduction (1)

Seminar—1 hour. Prerequisite: consent of instructor. Discussion of current scientific literature in reproduction, as well as presentation of research findings by graduate students and faculty. (S/U grading only.)—1, II, III. (J, II, III.)

298. Group Study (1-5)

Prerequisite: consent of instructor.

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

Preventive Veterinary Medicine (MPM)

Professional Courses 402. Medical Statistics I (5)

Lecture—37 sessions; laboratory—13 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Statistics in clinical, laboratory and population medicine: graphical and tabular presentation of data; probability; binomial; Poisson, normal, t., F-, and Chi-square distributions; elementary nonparametric methods; simple linear regression and correlation; life tables. Microcomputer applications of statistical procedures in population medicine.—1. (1.) Farver

403. Medical Statistics II (3)

Lecture — 20 sessions; laboratory — 10 sessions. Prerequisite: Prerequisite: MPVM standing in the School of Veterinary Medicine and/or successful completion of course 402 (or equivalent) or consent of instructor. Analysis of variance in biomedical sciences; nonparametric methods; multiple regression; biomedical applications of statistical methods. Microcomputer applications to reinforce principles that are taught in lecture. Continuation of course 402.—II. (II.) Farver

404. Medical Statistics III (4)

Lecture—3 hours; laboratory—2 hours. Prerequisite: MPVM standing in the School of Veterinary Medicine and/or successful completion of course 403 (or equivalent) or consent of instructor. Continuation of course 403. Analysis of time dependent variation and trends, analysis of multiway frequency tables; logistic regression; survival analysis selecting the best regression equation; biomedical applications.— III. (III.) Farver

405. Principles of Epidemiology (4)

Lecture - 4 hours. Prerequisite: MPVM standing in the School of Veterinarian Medicine or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiol ogy, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Epidemiology 205A.)—I. (I.) Gold, Miller

405L. Epidemiology Laboratory (1)

Lecture—1 session; lecture/discussion—1 session; laboratory-1 session. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Practical application of epidemiological methods using the microcomputer as a tool to solve problems. Utilizes spreadsheets and databases as tools to organize and analyze data. Emphasize epidemiological methods introduced in course 405. Data sets provided.—I. (I.) Lehenbauer

406A. Epidemiologic Study Design (3)

Lecture-20 sessions; discussion-6 sessions; laboratory-4 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Builds on concepts presented in course 405. Concepts of epidemiologic study design-clinical trials, observational cohort studies, case control studies-introduced in course 405 and covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Epidemiology 206.)—II. (II.) Miller

408A. Veterinary Research: Planning and Reporting (2)

Lecture - 20 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research.—Foley

408B. Veterinary Research: Planning and Reporting (1)

Lecture - 10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research. - I. (I.) Foley

408C. Veterinary Research: Planning and Reporting (1)

Discussion - 10 sessions. Prerequisite: Master of Preventive Veterinary Medicine standing in the School of Veterinary Medicine or consent of instructor; completion of course 408A and course 408B. Planning, critical analysis, ethics, and written and oral communication of veterinary research. - II. (II.) Chomel

410. Animal Health Policy and Risk Communication (1)

Discussion - 10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. International, national and state policy issues affecting veterinary medicine, how policy is made, organizational cultures, the role of science in policy-making, ten best practices in risk/crisis communication, message-mapping for the public and policy-makers, and effective meeting management. - I. (I.) Mazet

426. Applied Epidemiologic Problem Solving (1)

Laboratory—10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation; descriptive statistical analysis using spreadsheets, database management, and Epi Info software. Builds on skills learned in courses 405L and 406.—II. (II.)

Surgical and Radiological Sciences (VSR)

Lower Division Course

99. Special Study for Undergraduates (1-5) (P/NP grading only.)

Upper Division Course 199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

250. Anesthesia in Animal Research (2)

Lecture - 2 hours. Prerequisite: graduate student standing and consent of instructor. Pharmacodynamic and pharmacokinetic effects of common anesthetics used in several common laboratory species. Explore how anesthetic protocols may impact the measurement and interpretation of results in physiology and pharmacology research studies.—II. (II.)

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading

Viticulture and Enology

Meredith, Ph.D., Professor Emerita Ann C. Noble, Ph.D., Professor Emerita Cornelius S. Ough, D.Sc., Professor Emeritus Vernon L. Singleton, Ph.D., Professor Emeritus Academic Senate Distinguished Teaching Award

Affiliated Faculty

Matthew W. Fidelibus, Ph.D., Associate Specialist in Cooperative Extension

James T. Lapsley, Ph.D., Associate Adjunct Professor Andrew J. McElrone, Ph.D., Assistant Adjunct

Anita Oberholster, Ph.D., Specialist in Cooperative

Kerri L. Steenwerth, Ph.D., Assistant Adjunct Professor

James A. Wolpert, Ph.D., Specialist in Cooperative Extension

The Major Program

The Viticulture and Enology major provides an inter-disciplinary education in the biological and physical principles underlying grape and wine production as well as practical knowledge of grape growing (viticulture) and wine making (enology). This program provides the knowledge base for problem-solving and decision-making in commercial grape and wine

Preparatory Requirements. Before transferring into the Viticulture and Enology major, students must complete the following courses with a grade of C- or better and with a combined grade point average of at least 2.500 at the University of California (at least 3.000 for similar courses taken at community college) for these and all other preparatory courses. In addition, students' overall UC GPA must be 2.250 or higher. All courses must be taken for a letter grade.

Biological Sciences 1A or 2A 4-5	units
Chemistry 2A, 2B, 2C, 8A	units
Mathematics 16A	units
Physics 1A, 1B or 7A 4-6	units

Recommendations. Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into required upper division courses and may thus delay graduation. Some courses may be available at UC Davis during Summer Session:

Chemistry 8B	
Mathematics 16B	3 units
Biological Sciences 1C or Plant	
Sciences 2 4-	5 units
Biological Sciences 102	3 units

The Program. The curriculum builds upon a foundation of biology, chemistry, biochemistry and mathematics with specialized courses related to grape and wine production. To complete the program, students may choose to place particular emphasis on viticulture, enology or economics. Credit may also be earned for foreign language study and intern-

Career Alternatives. Graduates are qualified for a variety of vineyard and winery positions, including production management, quality control and research. Additionally they may work in related fields such as pest management, nursery production and analytical services.

R S Major Requirements:

b.5. Major Requirements:	
3	UNITS
Preparatory Subject Matter	. 44-51
Biological Sciences 1A or 2A and 1C	
or Plant Sciences 28	3-10
Chemistry 2A-2B-2C	. 15
Chemistry 8A, 8B	
Plant Sciences 21 or equivalent and advi	
approval	
Mathematics 16A-16B	
Physics 1A, 1B or 7A	4-0
Viticulture and Enology 2, 3	
Depth Subject Matter	. 48-54
Biological Sciences 102, 103 or 105	.3-6
Microbiology 102, 102L or 101	
Plant Sciences 120 or Statistics 106	4
Viticulture and Enology 101A, 101B,	
101C, 110, 118	
Viticulture and Enology 123, 124, 125, 1	126,
128, 135 and in consultation with the	

adviser, choose 3 of the following courses: 123L, 124L, 125L, 126L, 128L. If more than 3 are taken, the extra courses will count as restricted electives in Area B............. 21-22

Restricted Electives......28

In consultation with adviser, choose 28 units from three of the following five areas. At least 12 units must be from one of the following areas: (A) Plant Science, (B) Food Science and Microbiology, or (C) Economics and

(A) Plant Science area: Applied Biological Systems Technology 142, 145, 147, 175, 180, Atmospheric Science 133, Biological Sciences 101, Biotechnology 160, Entomology 110, Hydrologic Science 110, 124, Molecular and Cellular Biology 126, Nematology 100, Plant Biology 111, 112, 123, 143, 172, 172L, Plant Pathology 120, Plant Sciences 142, 146, 154, 157, 158, 171, 176, Soil Science 100, 102, 109, 118, Viticulture and Enology 111. (B) Food Science and Microbiology area: Biological Sciences 101, Food Science and Technology 102A, 102B, 104, 104L, 108, 109, 110A, 110B, 127, Microbiology 140, 150, 155L, Viticulture and Enology

(C) Economics and Business area: Agricultural and Resource Economics 100A, 112, 113, 118, 130, 140, 150, Economics 1A, 1B, Management 11A, 11B, Viticulture and Enology 111, 130 (D) Language area: Maximum 12 units, not counting course 1, of one of the following languages: French, German, Italian, Portuguese or Spanish. At least one course must be Intermediate or Conversational; qualifying Intermediate or Conversational courses are listed below:

French 8, 21, 22, 23, 38, German 6, 11, 20, 21, 22, Italian 4, 5, Spanish 8, 21, 22, 28, 31, 32, 33.

Courses taught in English will not count as restricted electives in this major. (E) Internship area: A maximum of 8 units of Viticulture and Enology 190X, 192, 198, 199, 290 or 298 may be counted as restricted electives by prior arrangement with adviser. May be increased to 12 units in exceptional circumstances.

Total Units for the Major 120-133 Major Adviser. M. Matthews

Related Major Programs. Food Science and Technology, and Plant Sciences.

Graduate Study. Several graduate groups offer programs of study leading to advanced degrees in the fields of viticulture and enology. For the M.S. or Ph.D. degree, see Agricultural and Environmental Chemistry (A Graduate Group), on page 139, Engineering: Chemical Engineering and Materials Science, on page 252, Ecology (A Graduate Group), on page 224, Food Science (A Graduate Group), on page 311, Genetics (A Graduate Group), on page 318, Horticulture and Agronomy (A Graduate Group), on page 340, Microbiology (A Graduate Group), on page 419, Plant Biology (A Graduate Group), on page 464, Plant Pathology, on page 465, Soils and Biogeochemistr (A Graduate Group), on page 501, and Viticulture and Enology (A Graduate Group), on page 529

Courses in Viticulture and Enology (VEN)

Lower Division Courses

2. Introduction to Viticulture (2)

Lecture - 2 hours. Fundamental principles of biology and culture of the grapevine including taxonomy, morphology, physiology, distribution, domestication, utilization, propagation, production systems, harvesting, and storage and processing of grapes.

Successful completion of the course should prepare students for upper division courses in viticulture. GE credit: SE. — I. (I.) Williams

3. Introduction to Winemaking (3)

Lecture - 3 hours. Overview of the history of wine, viticulture, fermentation, winery operations, the physiology of wine consumption, wines produced in California and other major wine-producing regions and the sensory evaluation of wine. GE credit: SE, SS.-I, II, III. (I, $\dot{\text{II}}$, III.) Heymann, Waterhouse, Adams

90X. Lower Division Seminar (2)

Seminar-1 hour; term paper (required)/discussion. Prerequisite: lower division standing and consent of instructor. Introduction to current issues surrounding wine and health as they relate to diet, nutrition, and toxicology. May not be repeated for credit. GE credit: Wrt.

99. Special Study for Undergraduates (1-5) (P/NP grading only.)

Upper Division Courses 101A. Viticultural Practices (3)

Lecture - 1.5 hours; discussion/laboratory - 3.5 hours. Prerequisite: course 2. Identification, cultivation, and use of the major wine, table, raisin, and rootstock cultivars. Includes practices specific to the fall such as fruit contracts, maturity sampling, harvesting, cover crops, and soil-pests. One field trip required. GE credit: SE.-I. (I.) Walker

101B. Viticultural Practices (3)

Lecture – 1.5 hours; discussion/laboratory – 3.5 hours. Prerequisite: course 2. Theory, principles, and practices of pruning and grapevine propagation. Plant materials and the certification process, weed control and weed identification, wood diseases, and frost protection. One field trip required. GE credit: SE. - II. (II.) Walker

101C. Viticultural Practices (3)

Lecture - 1.5 hours; discussion/laboratory - 3.5 hours. Prerequisite: course 2. Field oriented experience in the principles and practices of grapevine production, including vineyard establishment, vine training, trellising, canopy management practices, irrigation and water management, and methods of crop adjustment for improvement of fruit quality. One field trip required. GE credit: SE.-III. (III.) Smart

110. Grapevine Growth and Physiology (3)

Lecture - 3 hours. Prerequisite: course 2. Botanical aspects including morphology and domestication will precede lectures covering flower development and energy budget concepts. Impact of physiological variables such as photosynthesis translocation, mineral nutrition, and water relations on fruit ripening and composition will be covered. GE credit: SE.—II. (II.) Matthews

111. World Viticulture (3)

Lecture - 3 hours. Prerequisite: upper division standing. Study of the diversity of viticulture, both geographical and historical. History of grape growing and its spread throughout the world will be covered, along with discussions of current viticultural practices in different parts of the world, including California. GE credit: OL, SE, WE.

111L. Critical Evaluation of Wines of the World (1)

 ${\it Laboratory/discussion-3\ hours.\ Prerequisite:}$ course 111 (must be taken concurrently), course 125 with a grade of C or better. Critical analysis of wines produced in different parts of the world with emphasis on the relationship between sensory properties of the wines and factors associated with their place of origin. (P/NP grading only.) GE credit: SE

115. Raisin and Table Grape Production (2)

Lecture - 2 hours. Prerequisite: course 2. Overview of the raisin and table grape industries in California and other production areas of the world. Cultural practices associated with raisin and table grape production will also be discussed. GE credit: ŠE. – I. (I.)

118. Grapevine Pests, Diseases and Disorders (3)

Lecture - 3 hours. Prerequisite: course 2. Various pests and diseases of vineyards throughout California. Pest/disease identification and control methods (to include sampling techniques) also will be discussed. Integrated management approach to pest control methods will be emphasized. GE credit: SE.—I. (I.) Williams

123. Analysis of Musts and Wines (2)

Lecture — 2 hours. Prerequisite: Chemistry 2C and 8B or equivalent; Agricultural Management and Range-land Resources 21 or equivalent. Students enrolled in the lecture only portion of the course will be required to enroll in 1 unit of course 199/299. Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. GE credit: SE. -I. (I.) Ebeler

123L. Analysis of Musts & Wines Laboratory (2)

Lab-3 hours; independent study-3 hours. Prerequisite: Chemistry 2C and 8B, or equivalent, Agricultural Management and Rangeland Resources 21, and course 123 (course 123 may be taken concur-rently). Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. Laboratory exercises demonstrating various chemical, physical and biochemical meth ods. Data will be analyzed and results interpreted in weekly lab reports; includes student-designed independent project and written report. Enrollment restricted to upper division and graduate students in Viticulture & Enology; others by approval of instructor. GE credit: Wrt | QL, SE, VL, WE.—I. (I.) Ebeler

124. Wine Production (2)

Lecture - 2 hours. Prerequisite: course 3, 123 (may be taken concurrently), Biological Sciences 102. Principles and practices of making standard types of wines, with special reference to grape varieties used and methods of vinification. GE credit: SE, WE.—I.

124L. Wine Production Laboratory (3)

Laboratory-3 hours; independent study-3 hours; term paper. Prerequisite: course 124 (may be taken concurrently). Restricted to undergraduate students in fermentation science, viticulture and enology, biotechnology, microbiology, food science and applied plant biology or graduate students in food science, agricultural and environmental chemistry and horticulture. Current technologies used in production of California table wines; analysis and monitoring of impact of fermentation variables on microbial performance and product quality; student-designed independent research project. GE credit: OL, SE, WE.— I. (I.) Bisson

125. Wine Types and Sensory Evaluation (2)

Lecture — 2 hours. Prerequisite: course 124; Plant Sciences 120 or Statistics 106. Open to upper division and graduate students in Viticulture & Enology; others by approval of instructor. Principles of sensory evaluation and application to wines. Factors influencing wine flavor, data from sensory analysis of model solutions. GE credit: QL, SE.—III. (III.) Hey-

125L. Sensory Evaluation of Wine Laboratory (2)

Laboratory—3 hours; term paper. Prerequisite: course 125 (may be taken concurrently). Restricted to upper division majors in fermentation science or viticulture and enology or graduate students in food science. Sensory evaluation of wines and model systems using discrimination tests, ranking, descriptive analysis and time-intensity analysis. Data analyzed by appropriate statistical tests and results interpreted in extensive weekly lab reports. GE credit: QL, SE, VL, WE.—III. (III.) Heymann

126. Wine Stability (3)

Lecture - 2 hours; discussion - 1 hour. Prerequisite: course 124. Restricted to students in viticulture and enology, fermentation science, applied plant biology majors, or graduate students in food science, micro biology, horticulture, and horticulture and agronomy.

528 Viticulture and Enology

Principles of equilibria and rates of physical and chemical reactions in wines; treatment of unstable components in wines by absorption, ion exchange, refrigeration, filtration, and membrane processes; and protein, polysaccharide, tartrate, oxidative, and color stabilities. GE credit: SE.-II. (II.) Boulton

126L. Wine Stability Laboratory (2)

Laboratory—3 hours; independent study—3 hours. Prerequisite: course 126 (may be taken concurrently). Restricted to upper division fermentation science, viticulture and enology majors, or graduate students in food science, agricultural and environmental chemistry, microbiology or by consent of instructor. Practical application of principles of equilibria and rates of physical and chemical reactions to wine stability. GE credit: SE, WE.-II. (II.) Boulton

128. Wine Microbiology (2)

Lecture - 2 hours. Prerequisite: courses 123 and 124; Microbiology 102 and 102L, or Food Science and Technology 104 and 104L; courses 125 and 126 recommended. Nature, development, physiology, biochemistry, and control of yeasts and bacteria involved in the making, aging and spoilage of wine. GE credit: SE.—II. (II.) Mills

128L. Wine Microbiology Laboratory (2)

Laboratory-6 hours. Prerequisite: course 123, 124, and 128 (may be taken concurrently), Microbiology 102L or Food Science and Technology 104 and 104L; course 125 and 126 recommended. Restricted to upper division students in fermentation science, viticulture and enology or graduate students in food science. Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine. GE credit: SE, VL, WE.—II. (II.) Mills

135. Wine Technology and Winery Systems

Lecture - 3 hours; discussion/laboratory - 2 hours. Prerequisite: course 124. Process technologies and process systems that are used in modern commercial wineries. Lectures, demonstrations, problem solving sessions, and possible field trips. Includes grape preparation and fermentation equipment; post-fermentation processing equipment; winery utilities, cleaning systems, and waste treatment. GE credit: SE.—III. (III.) Block

140. Distilled Beverage Technology (3)

Lecture—3 hours. Prerequisite: Chemistry 8B; Food Science and Technology 110A. Distillation principles and practices; production technology of brandy, whiskey, rum, vodka, gin, and other distilled beverages; characteristics of raw materials, fermentation, distillation, and aging. Offered in alternate years. GE credit: QL, SE.—(III.) Boulton

181. Readings in Enology (1)

Discussion—1 hour. Prerequisite: course 3. Critical evaluation of selected monographs in enology. Discussion leadership rotates among the students. May be repeated three times for credit. (P/NP grading only.) GE credit: SE.-III. (III.) Matthews

190X. Winemaking Seminar (1)

Seminar - 1 hour; discussion - 1 hour. Prerequisite: course 3. Open to Viticulture and Enology majors and graduate students. Outside speakers on a specific winemaking topic chosen for the quarter. Discussion with the speaker hosted by the faculty member(s) in charge. May be repeated for credit up to 3 times. (P/NP grading only.) GE credit: SE.—III. (III.)

192. Internship (1-12)

Internship - 3-36 hours. Prerequisite: completion of 84 units. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a member of the department or major faculty, but are arranged by the student. (P/NP grading only.) GE credit: SE.

198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.) GE credit: SE.

Graduate Courses

200. Introduction to Scientific Methods (2)

Lecture/discussion-1 hour; term paper. Prerequi site: graduate standing or consent of instructor. Processes involved in conducting scientific research Topics include conducing literature review, formulating hypotheses, and analyzing and reporting results. Annotated bibliography and written and oral research proposal.

210. Grape Development and Composition

Lecture - 3 hours; discussion - 1 hour. Prerequisite: Biological Sciences 102 and 103, or 105. Anatomy, physiology and biochemistry of grape berry development, with emphasis on the development of grape composition relevant to winemaking. Offered in alternate years.—III. Adams, Polito

213. Flavor Chemistry of Foods and Beverages (3)

Lecture/discussion - 3 hours. Prerequisite: Chemistry 8B, course 123, course 123L or Food Science and Technology 103 or consent of instructors. Students will become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods. Students will be required to read and critically evaluate flavor chemistry literature. (Same course as Food Science and Technology 213). - III. (III.) Ebeler, Heymann

215. Sensometrics (3)

Lecture-3 hours. Prerequisite: Food Science and Technology 117 or the equivalent, course 125 and 125L or Food Science and Technology 107A or 107B. Experimental design and statistical analysis, including multivariate analysis, for both sensory and instrumental data in enology and food-related studies. — I. (I.) Heymann

216. Vineyard Establishment and Development (4)

Lecture/discussion—3 hours; fieldwork—3 hours; term paper. Prerequisite: courses 101A, 101B, 101C, and one of courses 115 or 116, and course 118 or consent of instructor; course 110, Soil Science 100, Atmospheric Science 133 and Agricultural and Resource Economics 140 recommended. Application of plant, meteorological, soil, water, and economic sciences to vineyard establishment and development. Preparation of a comprehensive study to determine the viticultural and economic feasibility of a given site for raisin, table, or wine grape production. — I. (I.) Smart

217. Field and GIS Evaluation of Soils (3)

Lecture/laboratory-4 hours; fieldwork-3 hours. Prerequisite: Plant Sciences 120, 205 or 206; Soil Science 100, 105, or 107; course 101C; Applied Biotechnology 180 are recommended; consent of Instructor. Principles and practices used to evaluate agricultural soils in the field, including soil pits, soil cores, electrical conductivity meters, ground penetrating radar, geomorphology and surface terrain analysis. Use of geographic information sciences, soil databases, digital elevation models and geostatics. tistics. Offered in alternate years. — (II.) Smart

219. Natural Products of Wine (3)

Lecture—3 hours. Prerequisite: courses 123 and 124, or natural products background and consent of instructor. Structure, occurrence, and changes due to wine production to the natural products found in wine. Chemicals with a sensory impact will be emphasized, including flavonoids and other phenolics, terpenes and norisoprenoids, pyrazines, oak volatiles and other wine constituents. - I. (I.) Water-

223. Instrumental Analysis of Must and Wine (4)

Lecture - 2 hours; laboratory - 3 hours; discussion -1 hour. Prerequisite: course 123 or Food Science and Technology 103 required. Biological Sciences 102 and 103 or Biological Sciences 105, Chemistry

107B or Chemistry 115 recommended. Open to upper division students in Viticulture & Enology, Food Science and Technology; students in Food Science, Ag & Environmental Chemistry and Viticulture & Enology graduate groups. Theory and practice of instrumental analysis of wines and musts. Emphasis on the principles of analytical techniques (e.g., CE, GC, HPLC, Mass Spectrometry) and factors determining correct choice of instrumental method.—III. (III.) Ebeler

224. Advances in the Science of Winemaking (3)

Lecture - 3 hours. Prerequisite: course 125, 126 and graduate standing or consent of instructor. Selected topics in the science and technology of winemaking. Topics drawn from current research of participating faculty. Critical analysis of the technical content of published material.—III. (III.)

225. Advanced Sensory Analysis of Wines

Lecture/discussion-2 hours; laboratory-4 hours. Prerequisite: courses 124 and 125 (or Food Science and Technology 107) and Agricultural Management and Rangeland Resources 120 or the equivalent. Sensory descriptive analysis experiments will be designed and conducted using standard sensory science methods. Data will be analyzed by analyses of variance, principal component analyses and generalized Procrustes analysis to evaluate the judge's performance and interpret the significance of the results.—III. Heymann

235. Winery Design (4)

Lecture - 2 hours; discussion - 1 hour; independent study. Prerequisite: course 124, 135 or consent of instructor. Design of wineries, Includes process calculations, equipment selection, process layout and building choice and siting. Project scheduling, capital costs, and ten-year cash flow analysis for the winery. One field trip required. Offered in alternate years. - II. Boulton

270. Critical Evaluation of Scientific Literature (2)

Discussion-2 hours. Prerequisite: consent of instructor. Contemporary research topics in biological sciences. Discussion of recent research articles in a special topic area. Intended to develop skills in critical evaluation of scientific publications. May be repeated for credit. (S/U grading only.)-II, III. (II,

290. Seminar (1)

Seminar - 1 hour. Prerequisite: consent of instructor. (S/U grading only.)—I, İİI. (I, III.)

290C. Advanced Research Conference (1)

Discussion - 1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

291. Advanced Viticulture (2)

Lecture/discussion-2 hours. Prerequisite: course 110, 116, 124, 125; course 210 recommended. Critical evaluation of scientific and popular literature on selected topics of current interest that relate viticulture to fruit or wine sensory attributes or quality. May be repeated one time for credit. Offered in alternate years. — (II.) Matthews

292. Advanced Internship (1-15)

Internship — 3-45 hours. Prerequisite: courses 123, 123L, 124, 124L, 125, 125L, 126, 126L, 128, 128L; consent of instructor. Restricted to Viticulture & Enology Graduate Group graduate students. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a graduate group faculty member or students major professor, but are arranged by the student. May be repeated 12 units for credit. (S/U grading only.)—I, II, III. (I, II,

297T. Tutoring in Viticulture and Enology

Prerequisite: graduate standing and consent of instructor. Designed for graduate students who desire teaching experience, but are not teaching assistants. Student contact primarily in laboratory or discussion sections, and under direction of a faculty member. (S/U grading only.)

298. Group Study (1-5)

(S/U grading only.)

299. Research (1-12)

(S/U grading only.)

Professional Course

396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) I, II, III. (I, II, III.)

Viticulture and **Enology** (A Graduate Group)

McElrone, Ph.D. Assistant Adjunct Professor (Viticulture and Enology) Anita Oberholster, Ph.D., Assistant Specialist in Cooperative Extension (Viticulture and Enology)
Kerri L. Steenwerth, Ph.D., Assistant Adjunct Professor (Viticulture and Enology) James A. Wolpert, Ph.D., Specialist in Cooperative Extension (Viticulture and Enology)

Graduate Study. The M.S. program offers advanced studies in viticulture and enology, ranging from the genetics, physiology and biochemistry of grapevines to the chemistry, microbiology and sensory science of wines and the chemical engineering of winemaking. Graduate students will usually work on a project that requires at least two of these fields of science and may involve grapevines, grapes, and wine or wine distillates. Topics can vary; examples include the molecular biology of grapevines, bacteria or yeast, the grape and wine chemistry associated with fermentation and aging and the correlation of analytical and sensory analyses. All application material must be received in the Group office by January 15.

Ph.D. studies are offered through one of the following Graduate Groups: Agricultural and Environmental Chemistry, Chemical Engineering, Food Science, Horticulture and Agronomy, Genetics, Microbiology, and Plant Biology.

Preparation. Applicants to the program are required to have a level of competence equivalent to that of a strong science undergraduate program. This includes coursework in biology, general chemistry, organic chemistry, calculus, statistics (analysis of variance), biochemistry, and microbiology. Specific requirements are outlined in detail and may be obtained from the Group office or see http://wineserver.ucdavis.edu.

Graduate Advisers. H. Heymann, D.A. Mills

War–Peace Studies

(College of Letters and Science)

The interdisciplinary minor in War-Peace Studies examines the causes and dynamics of intra- and international wars and efforts to prevent and settle such conflicts

Students in the minor are encouraged to participate in the educational activities of the Davis Program of the UC Institute on Global Conflict and Cooperation

The minor is sponsored by the International Relations

Minor Program Requirements:

UNITS

War-Peace Studies......19-20

One or two courses from each of the following areas:

Approaches: Anthropology 123AN, 126B, Comparative Literature 157, Philosophy 115, 118, Political Science 121, 123, 124, 132, 176, Sociology 157, Women's Studies 102

Northern and Western Regions: History 134A, 138C, 142A, 143, 144A, 144B, 145, 170B, 171B, 174B, Native American Studies 130B, Political Science 130, 131 Southern and Eastern Regions: Anthropology 142, 143A, 143B, 144, History 165, 191F, 194C, Native

American Studies 120, Political Science

Restriction. No more than two courses from a single department may be offered in satisfaction of the minor requirements

Advising. International Relations Program (530) 754-8098

Washington, D.C. Program

Program Location. 1608 Rhode Island Avenue, NW, Washington, D.C. 20036

Campus Program Office. 105 and 108 South Hall (530) 752-6652;

http://washingtonprogram.ucdavis.edu

The University of California hosts a system-wide academic and residential program for undergraduate students attending from each of the UC campuses. Housed within the UC Washington Center (UCDC), an 11-story, state of the art facility, convenient to public transportation and located in downtown D.C., the programs provide undergraduates opportunity to enrich their education while in residence for one quarter in the nation's capital. The program's principal activities include enrollment in credit-bearing courses, participation in academic internships, and opportunity to explore the many educational, cultural and historical activities in the Washington

Program of Study

UCDC is open to undergraduates from all majors who will have upper-division standing by the start of the quarter in which they plan to participate. A GPA of at least 3.000 is recommended for admission although not required. Applicants are also evaluated based on overall relevant experience, a written statement, and letters of recommendation

Academic Year Component (11 weeks). Students earn academic credit and continue to be registered as full-time UC Davis students during the quarter in which they participate.

- Internship. Students work three to four days per week as interns in Congress, federal agencies, interest groups, trade associations, research institutions, media corporations, museums, or in other organizations related to the interests and objectives of individual students.
- Research Seminar. Each student writes a research paper in consultation with Washington Program faculty and graduate fellows. To complete the assignment, students take advantage of the many unique research resources in Washington, DC.
- Elective Seminar Course. Each student enrolls in one upper division seminar course taught at UCDC. These courses vary each quarter from among offerings that typically include international relations, history, political science, public policy and other social sciences; the arts and humanities; and science policy. In addition to regular instruction, seminars often include guest speakers, observations of congressional committees and federal agencies, and other relevant

Courses are taught by UCDC faculty appointed by the various UC campuses, or visiting faculty from the Washington area.

Financial aid eligibility and awards as determined by the home campus is maintained while enrolled in the program, and the aid package can be adjusted to reflect the additional costs of the program.

Summer Component (10 weeks). UCDC also offers a 10-week Summer Program with a credit or non-credit option. The credit option allows students to enroll in courses in addition to working at an internship. Students pay the summer sessions rate per credit hour plus an application fee. The noncredit option (internship only) has no enrollment fee. Both options allow students to participate in many educational, cultural, historical and social activities.

University Graduation Requirements

• All prospective applicants should carefully plan their course programs in order to satisfy university, college, and major/minor requirements for their degree.

530 Water Science

- Although units and grade points earned at UCDC are incorporated into the University transcript and GPA calculation, departments and programs retain the right to determine which UCDC courses will be accepted in satisfaction of major and minor requirements.
- All degree candidates must meet the University residence requirement. Students should consult with their college Dean's office early during the UCDC planning process for information on the university residence requirement, particularly students who intend to study abroad or participate in UCDC during their senior year.

Recognizing the special value of UCDC, the faculty has approved two exceptions to the usual residence requirement for students participating in the Washington Program:

- Students planning to graduate immediately upon completion of participation in UCDC may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus immediately preceding entry into UCDC
- Students who have not finished all of their degree requirements following completion of their participation in the UCDC program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCDC, on the Davis campus within the final 90 units earned toward the degree.

Students who will not meet the residency requirements outlined may petition their Dean's office requesting an exception to policy.

- Students may satisfy GE requirements while at UCDC but should consult with their college Dean's office prior to departure for information on the certification process.
- Students with a large number of units may participate in the UCDC program provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time at UCDC. Participants may only return to campus from UCDC to complete any outstanding degree requirements provided that they can do so within the 225 unit restriction.

Courses in UC Davis Washington Center (WAS)

Upper Division Courses 175. Health Policy and Health Politics (4)

Seminar — 3 hours; extensive writing or discussion – 1 hour. Restricted to students attending UC Washington Center program. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of model policies to address them. (Same course as Public Health Sciences 175W.) GE credit: SocSci, Wrt | ACGH, OL, SS, WE.

187. Gun Violence (4)

Lecture/discussion-4 hours. Gun violence, viewed from the perspectives of criminology and public health. Topics include personal and societal contributing factors and critical assessment of potential solutions. Offered in alternate years.

192. Internship in the UC Davis Washington Center Program (7)

Internship—28 hours. Prerequisite: junior or senior standing, admission in the UC Davis Washington Center undergraduate program, course 193 concurrently. Internship in Washington, DC with associated, supervised research project. (Same course as Political Science 192W.) (P/NP grading only.)

193. Washington Center Research Seminar

Lecture/discussion-1 hour; independent study-3 hours; tutorial-0.5 hour. Prerequisite: course 192 concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as Political Science 193W.) GE credit: Wrt | OL, SS, WE.

The Major Program

The Wildlife, Fish, and Conservation Biology major deals with the relationships between the requirements of wildlife and the needs of people. Understanding these relationships is vital for the maintenance of ecological diversity, recreational resources, and food supplies. Students completing the major possess a broad knowledge of ecology and natural history, but with the quantitative skills to use this knowledge in critical thinking and decision-

The Program. The major emphasizes broad training in biological and physical sciences, with specialization in one of five areas. The major is primarily for students interested in becoming professionals in the diverse and cutting-edge fields of wildlife, fish, and conservation biology including veterinary and wildlife health sciences. The breadth of course requirements, when combined with electives also make this an excellent preparatory major for secondary school teaching. Certification by professional societies such as The Wildlife Society, American Fisheries Society, or the Ecological Society of Amer-

ica, or preparation for specialized resource-related graduate studies may also be achieved by careful planning of electives with a faculty adviser.

Career Alternatives. The major prepares students to excel in the dynamic fields of environmental and conservation biology emphasizing vertebrate animals in their natural environments, as well as resolution of conflicts between humans and wild animals. Positions now held by graduates in this major include wildlife biology, fisheries biology, wildlife damage management, and resource biologists and managers with local, state, and federal agencies. Many graduates are biologists or consultants with private industries such as environmental consulting firms, commercial fishing businesses, electrical utilities, sporting clubs or businesses, and aquaculture operations, while others are veterinarians, medical physicians, and professors/researchers who teach and/or conduct research in academic institutions.

Restricted Electives...... 15-24

Choose one from the five Areas of Specialization shown below. Students must maintain a C average (2.000 GPA) and pass all course work in their chosen specialization

Areas of Specialization

(1) Conservation Biology: Complete Wildlife, Fish, and Conservation Biology 155 & 155L. Choose one course from Environmental Science and Policy 161, 170, or 171. Choose two courses from Environmental Horticulture 160, Environmental Science and Policy 127, Evolution and Ecology

115, 117, 138, 147, Wildlife, Fish, and Conservation Biology 152, 156, or 157. Choose one course from Animal Science 103, Nature and Culture 120, 140, or Veterinary Medicine 170.

(2) Fish Biology: Complete Wildlife, Fish, and

Conservation Biology 120 & 120L.

Choose one course from Entomology 116 or Evolution and Ecology 112 & 112L. Choose three courses from Animal Science 118, Environmental Science and Policy 116N, 150C, 151, 151L, Evolution and Ecology 115, Environmental Science and Management 100, Hydrology 143, Wildlife, Fish, and Conservation Biology 155 & 155L, or 157.

Choose one course from Hydrology 150, Environmental Science and Policy 161, 169, or Landscape Architecture 150

(3) Wildlife Biology: Complete Wildlife, Fish,

and Conservation Biology 151.
Choose one course from Plant Biology 102, 147, Plant Sciences 144 or 178. Choose one course from Environmental Horticulture 160, Environmental Science and Policy 155, Plant Sciences 130, Wildlife, Fish, and Conservation Biology 155 & 155L, 156, or 157.

Choose two courses from Animal Science 104, Environmental Science and Policy 121, Environmental Toxicology 101, Evolution and Ecology 107, Landscape Architecture 150, Medical Microbiology 116, Wildlife, Fish, and Conservation Biology 136, 141 (cannot be used to simultaneously satisfy the Depth Subject Matter requirement), or 152.

Note: Students interested in certification as a Wildlife Biologist from The Wildlife Society should consider additional courses in plant sciences. Recommended courses include Plant Biology 108, 117, 118, 119, 148, Plant Sciences 131, 144, 145, or 178.

(4) Wildlife Health: Complete either Biological Sciences 102 and 103 or Animal Biology 102 and 103.

Choose one course from Wildlife, Fish, and Conservation Biology 136, 151, 152, or 155 &155L.

Choose one course from Animal Science 103 or 170.

Choose one course from Anatomy, Physiology, and Cell Biology 100, Animal Science 104, Medical Microbiology 115, 116, Microbiology 102, Molecular and Cell Biology 150, Neurobiology, Physiology, and Behavior 101, 126, 127, 128, 129, 140, or Veterinary Medicine 158. Note that this AOS recommends additional preparatory courses; prerequisites for admission to Veterinary Medicine vary among schools and students should confirm the specific requirements of the school(s) to which they wish to apply. Additional Preparatory (recommended, not required): Chemistry 2C, 118A, 118B, 118C, Physics 7A, 7B, 7C.

(5) Individualized: Students may, with prior approval of their adviser and the curriculum committee, design their own individualized specialization within the major. The specialization will consist of five upper division courses with a common theme.

Total Units for the Degree 119-136 Major Adviser. N. A. Fangue

Students transferring to UC Davis from another institution or new students declaring the major of Wild-life, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. Contact the Department in 1088 Academic Surge Building or telephone (530) 752-6586.

Minor Program Requirements:

The minor in Wildlife, Fish, and Conservation Biology is for students interested in basic training and understanding of the ecology and conservation of wild terrestrial and aquatic vertebrates, emphasizing birds, mammals, and fish, but with relevance and application to all life forms.

Wildlife, Fish, and Conservation Biology......20-32

Wildlife, Fish, and Conservation Biology 100, 151, either 154 or 155 & 155L, and choose one course from 110, 111, or Two to four upper division elective courses chosen from the Wildlife, Fish, and Conservation Biology curriculum, excluding WFC 190, 191, 192, 195, 197T, 198, and 199.....5-16

Minor Adviser. N. A. Fangue

Graduate Study. Faculty in Wildlife, Fish, and Conservation Biology are active members of several graduate programs, including the Ecology, Population Biology, Genetics, Animal Behavior, and Avian Science graduate groups. Students interested in graduate studies should see Graduate Studies, on

Courses in Wildlife, Fish, and **Conservation Biology (WFC)**

Lower Division Courses

10. Wildlife Ecology and Conservation (4)

Lecture - 3 hours; discussion - 1 hour. Introduction to the ecology and conservation of vertebrates. Complexity and severity of world problems in conserving biological diversity. GE credit: SciEng, Div, Wrt | SE, SL, WE.—I, III. (I, III.) Elliott-Fisk, Moyle, Kelt

11. Introduction to Conservation Biology (3)

Lecture — 3 hours. Introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats for students with no background in biological sciences. GE credit: SciEng, Wrt | SE, SL.—III. Caro

50. Natural History of California's Wild Vertebrates (3)

Lecture - 2 hours; discussion - 1 hour. Examination of the natural history of California's wild vertebrates (fish, amphibians, reptiles, birds, and mammals), including their biogeography, systematics, ecology and conservation status. GE credit: SciEng, Wrt | SE, SL, WE.-II. (II.) Elliott-Fisk

92. Internship (1-6)

Internship - 3-18 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. Special study for undergraduates. (P/NP grading only.)—I, II, III. (I, II,

Upper Division Courses 100. Field Methods in Wildlife, Fish, and Conservation Biology (4)

Lecture - 2 hours; laboratory - 3 hours; fieldwork - 3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 and consent of instructor. Introduction to field methods for monitoring and studying wild vertebrates and their habitats, with an emphasis on ecology and conservation.
Required weekend field trips. GE credit: SE.—III. (III.) Eadie, Kelt, Todd, Van Vuren

101. Field Research in Wildlife Ecology (2)

Lecture/discussion-2 hours. Prerequisite: Consent of instructor and one upper division course in each of ecology, statistics, and ornithology, mammalogy, or herpetology. Field research in ecology of wild ver-

tebrates in terrestrial environments; formulation of testable hypotheses, study design, introduction to research methodology, oral and written presentation of results. Limited enrollment. Offered in alternate years. GE credit: Wrt | SE, VL, WE.—I. Eadie, Kelt, Todd, Van Vuren

101L. Field Research in Wildlife Ecology: Laboratory (4)

Lecture/discussion-2 hours; field work-15 hours. Prerequisite: consent of instructor, course 101 (may be taken concurrently), and one upper division course in each of ecology, statistics, and ornithology, mammalogy, or herpetology. Field research in ecology of wild vertebrates in terrestrial environments; testing ecological hypotheses through field research, application of research methodology, supervised independent research projects. Held between Labor Day and fall quarter. Limited enrollment. Offered in alternate years.—I. Eadie, Kelt, Todd, Van Vuren

102. Field Studies in Fish Biology (1)

Lecture/discussion-1 hour. Prerequisite: upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Emphasis on theory of quantitative fish capture methods and design of individual research projects on ecology, behavior, physiology or population biology of fishes. Not offered every year. - III. Moyle

102L. Field Studies in Fish Biology: Laboratory (6)

Fieldwork-15 hours; laboratory-12 hours; discussion/laboratory-3 hours. Prerequisite: course 102, upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Field investigations of fish biology are emphasized including quantitative capture methods and individual research projects on ecology, behavior, physiology or population biology of fishes at the field site in relation to their habitats. Not offered every year. (Deferred grading only, pending completion of projects.) GE credit: SciEng, Wrt | SE, WE.—III. Moyle

110. Biology and Conservation of Wild Mammals (3)

Lecture — 3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Origins, evolution, diversification, and geographical and ecological distributions of mammals. Morphological, physiological, reproductive, and behavioral adaptations of mammals to their environment.—III. (III.) Kelt

110L. Laboratory in Biology and Conservation of Wild Mammals (3)

Laboratory -- 6 hours. Prerequisite: course 110 (may be taken concurrently); consent of instructor. Laboratory exercises in the morphology, systematics, species identification, anatomy, and adaptations of wild mammals to different habitats. Limited enrollment.— III. (III.) Kelt

111. Biology and Conservation of Wild Birds (3)

Lecture—3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Phylogeny, distribution, migration, reproduction, population dynamics, behavior and physiological ecology of wild birds. Emphasis on adaptations to environ ments, species interactions, management, and conservation. GE credit: SE. - I. (I.) Eadie

111L. Laboratory in Biology and Conservation of Wild Birds (3)

Laboratory-6 hours; fieldwork-3 hours. Prerequisite: course 111 (may be taken concurrently); consent of instructor. Laboratory exercises in bird species identification, anatomy, molts, age and sex, specialized adaptations, behavior, research, with emphasis on conservation of wild birds. Several weekend field trips, after class bird walks, and independent bird study are required. Limited enrollment.—I. (I.) Eadie

120. Biology and Conservation of Fishes (3)

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C. Evolution, ecology, and conservation of marine and freshwater fishes.—I. (I.) Moyle

120L. Laboratory in Biology and Conservation of Fishes (1)

Laboratory—3 hours. Prerequisite: course 120 (may be taken concurrently). Morphology, taxonomy, conservation, and identification of marine and freshwater fishes with emphasis on California species. Limited enrollment.—I. (I.) Moyle

121. Physiology of Fishes (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: upper division courses in nutrition and physiology or consent of instructor. Comparative physiology, growth, reproduction, behavior, and energy relations of fishes. Not offered every year. GE credit: SciEng, Wrt | SE, WE.—II. (II.)

122. Population Dynamics and Estimation (4)

Lecture—3 hours; laboratory—3 hours. Prerequisite: Mathematics 16A-16B; Statistics 13 or the equivalent; an upper division course in ecology. Description of bird, mammal and fish population dynamics, modeling philosophy, techniques for estimation of animal abundance (e.g., mark-recapture, change-inratio, etc.), mathematical models of populations (e.g., Leslie matrix, logistic, dynamic pool, stock-recruitment); case histories.—III. (III.) Botsford

130. Physiological Ecology of Wildlife (4)

Lecture—4 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Principles of physiological ecology, emphasizing vertebrates. Ecological, evolutionary, and behavioral perspectives on physiological mechanisms used by animals to adapt to their environment, in the context of climate-change and other threats to biodiversity. Tropical, temperate, and polar ecosystems are highlighted. GE credit: SciEng | SE.—II. (II.) Fangue

136. Ecology of Waterfowl and Game Birds(3)

Lecture—3 hours; laboratory—3 hours; fieldwork—1 hour. Prerequisite: course 111, 111L or the equivalent, or consent of instructor. Detailed examination of distribution, behavior, population dynamics, and management of waterfowl and upland game birds. Offered in alternate years.—(II.) Eadie

141. Behavioral Ecology (4)

Lecture—3 hours; film viewing—1 hour. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Basic theories underlying the functional and evolutionary significance of behavior, and the role of ecological constraints. Supporting empirical evidence taken mainly from studies of wild vertebrates. Offered in alternate years. GE credit: SE.—[II.] Caro

151. Wildlife Ecology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: Biological Sciences 2A, 2B, 2C or equivalent. Ecology of wild vertebrates, including habitat selection, spatial organization, demography, population dynamics, competition, predation, herbivory, energetics, and community dynamics, set in the context of human-caused degradation of environments in North America.—1. (I.) Van Vuren

152. Ecology of Human—Wildlife Conflicts (3)

Lecture—3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C, or the equivalent. Ecological approaches to managing wild vertebrates that come into conflict with agriculture, public health, or the conservation of biodiversity. Offered in alternate years.—II. Van Vuren

153. Wildlife Ecotoxicology (4)

Lecture—3 hours; discussion—1 hour. Prerequisite: introductory courses in organic chemistry, ecology, and physiology, or consent of instructor; Environmental Toxicology 101 recommended. Various forms of environmental pollution in relation to fish and wildlife, the effects and mechanisms of pollutants, effects on individuals and systems, laboratory and field eco-

toxicology, examples/case histories, philosophical/management considerations. Not offered every year. GE credit: SciEng, Wrt | SE, WE.

154. Conservation Biology (4)

Lecture—3 hours; term paper (will be one or more book reviews). Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or the equivalent. An introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats. GE credit: SE, WE.—I. (I.) Todd

155. Habitat Conservation and Restoration (3)

Lecture—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course; course 154 and Environmental Horticulture 160 recommended. Analysis of the characteristics of wildlife and fish habitats, the conservation of habitats, and restoration. GE credit: SciEng, Wrt | SE, VL, WE.—II. (II.) Elliott-Fisk

155L. Habitat Conservation and Restoration Laboratory (2)

Fieldwork—3 hours; laboratory—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course; course 155 (may be taken concurrently). Analysis of the characteristics of wildlife and fish habitats, application of restoration methods, and evaluation of conservation and restoration projects in the field. Students will also participate during the term in a restoration project.—II. (II.) Elliott-Fisk

156. Plant Geography (4)

Lecture—3 hours; laboratory—3 hours; term paper. Field trips will be substituted for some in-lab activities. Prerequisite: Environmental Science and Policy 100 or Evolution and Ecology 101; Plant Biology 102 or 108 strongly recommended. Survey of the geographical distribution of vegetation types and habitats, with consideration of the environmental and historical factors that determine these patterns. Conservation and management approaches. Analytical field and lab techniques introduced. Offered in alternate years. GE credit: SciEng, Wrt | SE, VL, WE.—III. Elliott-Fisk

157. Coastal Ecosystems (4)

Lecture—3 hours; laboratory/fieldwork—3 hours. Prerequisite: Environmental Studies 100 or Evolution and Ecology 101; course work in organismal biology, physical geography, and geology recommended. Overview of coastal ecosystems, physical and biological elements and processes, and coastal zone dynamics, including sandy, rocky and muddy shorelines, estuaries, dunes and coastal watersheds. Discussion of the role of historical factors and conservation, restoration, and management approaches. Offered in alternate years. GE credit: SE, VL.—(III.) Elliott-Fisk

158. Infectious Disease in Ecology and Conservation (3)

Lecture—3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or Veterinary Medicine 409 or the equivalent. Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and their applications. Role of scientists in developing disease control policies. Not offered every year.

190. Departmental Research Seminar (1)

Seminar—1 hour. Prerequisite: upper division standing in the biological sciences. Reports and discussions of recent advances related to wildlife and fisheries biology. May be repeated for credit up to 3 times. (P/NP grading only.)—I, II, III.

191. Museum Science (2)

Lecture—1 hour; laboratory—3 hours. Prerequisite: upper division standing and consent of instructor. Principles and methods required to preserve and present biological specimens for research, teaching collections, and museums. Not offered every year. (P/NP grading only.)—II. Engilis

192. Internship (1-12)

Internship—3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)

195. Field and Laboratory Research (3)

Laboratory—6 hours; discussion—1 hour. Prerequisite: course 110L, 111L, or 120L; 121 or 130; Evolution and Ecology 101 or the equivalent; and consent of instructor. Critique and practice of research methods applied to field and/or laboratory environments of wild vertebrates. Students work independently or in small groups to design experimental protocol, analyze data, and report their findings. May be repeated two times for credit. GE credit: SE.—I, II, III. (I, II, III.)

197T. Tutoring in Wildlife and Fisheries (1-5)

Prerequisite: major in Wildlife, Fish, and Conservation Biology and consent of instructor. Experience in teaching under guidance of faculty member. (P/NP grading only.)

198. Directed Group Study (1-5)

(P/NP grading only.)

199. Special Study for Advanced Undergraduates (1-5)

(P/NP grading only.)

Graduate Courses

222. Advanced Population Dynamics (3)

Lecture—3 hours. Prerequisite: graduate standing; advanced course in ecology (e.g., Evolution and Ecology 101), population dynamics (e.g., course 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended. Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research. Not offered every year.—II. (II.) Botsford

223. Conservation Biology and Animal Behavior (3)

Lecture—1.5 hours; discussion—1.5 hours. Prerequisite: Ecology 208 or Animal Behavior 221. Influences of concepts of animal behavior (functional, evolutionary, developmental, mechanistic, and methodological issues) on conservation biology theory and practice. Offered in alternate years. (III.)—Caro

290. Seminar (1-3)

Seminar — 1-3 hours. Prerequisite: consent of instructor. Seminar devoted to a highly specific research topic in any area of wildlife or fisheries biology. Special topic selected for a quarter will vary depending on interests of instructor and students. (S/U grading only.) — I, II, III. (I, II, III.)

290C. Research Group Conference (1)

Discussion—1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress and techniques in wildlife and fishery sciences. May be repeated for credit. (S/U grading only.)—I, II, III. (I, II, III.)

291. Seminar in Aquatic Ecology (2)

Seminar—2 hours. Prerequisite: graduate standing in biology. Presentation and analysis of assigned topics in aquatic ecology emphasizing fish, fisheries and aquatic conservation. Offered in alternate years. (S/U grading only.)—III. (III.) Moyle

292. Physiology of Fishes Seminar (1)

Seminar—1 hour. Prerequisite: graduate standing and at least two courses in physiology; consent of instructor. Seminar devoted to current topics concerning the physiological functioning of fishes. May be repeated two times for credit. Not offered every year. (S/U grading only.)—1. (I.)

294. Behavioral Ecology of Predators and Prey (3)

Seminar—2 hours. Prerequisite: graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals,

antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator prey interactions. May be repeated two times for credit. (Same course as Animal Behavior 294.) Offered in alternate years.—II. Caro

295. Seminar in Wildlife Ecotoxicology (3)

Seminar — 2 hours; term paper. Prerequisite: graduate standing in biology. Presentation and analysis of assigned and searched research papers on transport, exposure, and effects of environmental contam-inants on wildlife-associated ecosystem components, especially at individual/population levels. Specific subjects vary each offering. Offered in alternate years. (S/U grading only.)

297T. Supervised Teaching in Wildlife and Fisheries Biology (1-3)

Tutorial — 3–9 hours. Prerequisite: meet qualifications for teaching assistant; graduate standing; and consent of instructor. Tutoring and teaching students in undergraduate courses in Wildlife, Fish, and Conservation Biology. Weekly conferences with instructor; evaluations of teaching; preparing for and conducting demonstrations, laboratories, and discussions; preparing and grading examinations. May be repeated for a total of 6 units when a different course is tutored. (S/U grading only.)

298. Group Study (1-5) 299. Research (1-12)

(S/U grading only.)

Students transferring to UC Davis from another institution or new students declaring the major of Wild-life, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. Contact the Department in 1088 Academic Surge Building or telephone (530) 752-6586.

The Major Program

Women's Studies is an interdisciplinary major founded on the feminist theoretical premise that gender is a historically variable construction that centrally shapes the historical experience and everyday lives of women as well as men. Women's Studies also assumes that gender, race, class, sexual and national identities are constructed in relation to one another. The intersections of these categories of experience as well as the history of debate over what these categories mean is an important strand of the Women's Studies curriculum. Women's Studies at UC Davis is particularly rich in faculty doing comparative, cross-cultural work on women and gender. Among the faculty offering courses for the major are scholars working on women and gender in various countries across Africa, the Americas, Asia, the Caribbean, Europe, and the Middle East,

The Program. Perhaps the most exciting aspect of the Women's Studies major is that students can pursue their particular academic interests and design their course of study accordingly. In devising their program of study, students will draw on courses offered in African American and African Studies, American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German and Italian Studies History, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textiles and Clothing, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Women and Gender Studies Program affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an adviser that is in accordance with their individual career goals. Many Women's Studies majors find it advantageous to pursue a double major, or to minor in another field of study.

Career Alternatives. A degree in Women's Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, and encourages social advocacy; it also hones their verbal and writing skills. It prepares students for entrance into graduate programs in the Humanities or Social Sciences.

Pre-professional students will discover that a major in Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social or family-related issues. Students who plan to do practical work in counseling, clinical psychology, social services, or political science will also find Women's Studies to be a helpful undergraduate major. Those who wish to do graduate level research in such fields as anthropology, comparative literature, cultural studies, education, ethnic studies, film studies, history, languages and literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong undergraduate background in women's history, feminist social theory,

and a feminist understanding of narrative and cultural representation.

Increasingly, corporations, colleges and universities, insurance companies, and personnel firms are hiring specialists in women and gender studies as consul-tants. Current state and federal agencies need people who have special understanding for the problems that women face in society, industry, and the professions. Educational institutions need specialists to develop and administer women and gender studies programs, women's centers, and other organizations designed specifically to study and assist women.

Women's Studies

A.B. Major Requirements:

UNITS

Two courses from Women's Studies 20, 50, Three courses selected from the following: African American and African Studies 10, 15, American Studies 1E, 1F, Anthropology 2, 20, 21, Art History 15, Asian American Studies 1, 2, Chicana/o Studies 10, 50, Classics 15, Comparative Literature 12, Dramatic Art 1, English 30A or 30B, 45, 46A or 46B or 46C, History 72A, 72B, Humanities 10, Native American Studies 1, 10, Nature and Culture 1, Political Science 7, Psychology 1, Science and Society 1, 15, Sociology 1, 2, 3, Textiles and Clothing 7, Women's Studies 8012

Preparatory Subject Matter.....20

Depth Subject Matter44

Women's Studies 103, 104, 190 and one additional upper division Women's Studies Cross-Cultural Requirement...... Choose four courses (at least one from each category). Courses used to meet this requirement may not duplicate those used to meet other Women's Studies major requirements. The list that follows represents a partial list of options; other courses may be included with the consent of the Women's Studies Adviser.

Ethnic Studies: Women of Color in the United States: African American and African Studies 123, 133, Anthropology 139, Asian American Studies 112 Chicana/o Studies 111, 122, 131, Native American Studies 134, 180, Sociolog 134, 172, Women's Studies 160, 180. Cultures Outside the United States: Anthropology 130A, Comparative Literature 135, 138, 159, English 185A, 185B, German 129, History 102G, 102H, 148A, 148B, Women's Studies 102, 182, 184

Historical Material Prior to 1900: African American and African Studies 123, Asian American Studies 112, English 185A, History 148A, 148B, Italian 141, Native American Studies 180.

Thematic. Courses used to meet this requirement may not duplicate those used to meet other Women's Studies major requirements.

Disciplinary track

Choose three courses from one of the following focus groups:

Anthropology focus: Anthropology 129, 130, 131, 134, 139, 148B, 158, Women's Studies 102, 182, 184. History focus: African American and African Studies 123, Asian American Studies 112, English 185A, History 102H, 102G, 110C, 116, 132, 148A, 148B, 159, 173, 176B, 177B, 184, 193A, Italian 141, Native American Studies 180. Literature and Language focus: Comparative Literature 135, 138, 159,

English 185A, 185B, French 133, German 129, Italian 141, Linguistics 163, Russian 142, Women's Studies 129. Sociology and Psychology focus: Anthropology 129, Chicana/o Studies 122, Psychology 149, Sociology 131, 132, 134, 145B, 172, Women's Studies

Thematic track

In consultation with a Women's Studies adviser, choose three courses that form a thematic cluster (for example, Gender and Race in the United States; The Cultural Representations of Gender; Gender and Public Policy; Gender and Global Issues; Gender and Autobiography; The Body, Theory and Representation; Sexualities; Gender and Science). Other clusters may be developed in consultation with a Women's Studies adviser.

Total units for the major64

Major Adviser. All Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

Minor Program Requirements:

UNITS

Women's Studies 24

Women's Studies 20, 50, 60, 70 or 80 4 Choose one from African American and African Studies 123, 133, Anthropology 139, Asian American Studies 112 Chicana/o Studies, 111, 122, 131, Native American Studies 134, 180, Sociology 134, 172, Women's Studies 160, 180.... Choose one from Anthropology 148B, Comparative Literature 135, 138, 159 English 185A, 185B, 129, History 102G, 102H, 148A, 148B, Women's Studies 102, 182, 184.. Additional Electives from approved list of upper division cross-listed and Women's Studies courses Note: With prior consultation with an adviser, other upper division courses may be accepted toward the minor program. Under no circumstances may more than one lower division course be offered in

satisfaction of requirements for the minor. Minor Adviser. All Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.

Graduate Study. The Women and Gender Studies Program offers a designated emphasis in Feminist Theory and Research for students enrolled in the Ph.D. programs of twelve other affiliated depart-

Courses in Women's Studies (WMS) **Lower Division Courses**

20. Cultural Representations of Gender (4)

Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major Interdisciplinary investigation of how specific cultures represent gender difference. Examine a variety of cultural forms and phenomena including film, television, literature, music, popular movements, and institutions. GE credit: ArtHum, Div, Wrt | ACGH, AH or SS, DD, VL, WC, WE.—III. (III.) Craig

25. Gender and Global Cinema (4)

Lecture - 3 hours; film viewing - 3 hours. The role gender plays in film history/culture in various geographical contexts and in aspects of contemporary globalization. Films from nations such as China, Colombia, Cuba, Ethiopia, India, Iran, Korea, New Zealand, and the U.S. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.—II. (II.) Constable, Kuhn

50. Introduction to Women and Gender Studies (4)

Lecture - 3 hours; discussion - 1 hour. Interdisciplinary introduction surveys and integrates anthropological, artistic, cultural studies, historical, legal, literary,

philosophical, psychological, scientific, and sociological perspectives on the study of gender and its relationship to race, sexuality, class, and other aspects of social experience. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WC, WE.-I, II, III. Ho, Kaplan, Kuhn, Mena, Nettles-Barcelón

60. Introduction to Feminist Interpretations of Western Thought (4)

Lecture/discussion—4 hours. A critical introduction to major traditions of social thinking in the West from a feminist perspective. Not offered every year. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.-Craig

70. Theory and History of Sexualities (4)

Lecture/discussion-4 hours. Key issues in the social construction, organization, and reproduction of sexualities such as the intersection of sexual identity with gender, race, ethnicity, and class, and the relation between movements for sexual liberation and the regulation of the body. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.—(I.)

80. Special Topics in Women's Studies (4)

Lecture/discussion-4 hours. In-depth examination of a women's studies topic related to the research interest of the instructor. May be repeated for credit when topic differs. Limited enrollment.—Constable, Ho, Joseph, Kaiser, Kuhn, Mena, Nettles-Barcelón, Swain

90X. Lower Division Seminar (2)

Seminar - 2 hours. Examination of a special topic in Women's Studies through shared readings, discussions, and written assignments. Offered in alternate years.—Constable, Joseph, Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

91. Research Seminar in the Transnational **Production and Consumption of Fashion**

Seminar—1-2 hours. Preparation for a research conference. May be repeated for credit when topic varies. - II. (II.) Kaiser

98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—Constable Ho, Joseph, Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)—Constable, Craig, Ho, Joseph, Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

Upper Division Courses 102. Colonialism, Nationalism, and Women (4)

Lecture/discussion-4 hours. Prerequisite: one course specified for Women's Studies major. Explores key dimensions of women's relationship to colonialism and nationalism in one or more societies. GE credit: SocSci, Div | AH or SS, WC, WE.-I. Mena, Swain

103. Introduction to Feminist Theory (4)

Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major. Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race, identity politics, and the social construction of women's experience. GE credit: ACGH, AH or SS, DD, WE.-I. (I.) Constable, Craig, Kuhn, Mena, Nettles-Barcelón

104. Feminist Approaches to Inquiry (4)

Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major. Feminist applications and transformations of traditional disciplinary practices; current issues and methodologies in feminist interdisciplinary work. GE credit: ACGH, AH or SS, DD, WE.—II. (II.) Constable, Mena, Nettles-Barcelón

130. Feminism and the Politics of Family Change (4)

Lecture/discussion-4 hours. Prerequisite: any Women's Studies course or Sociology 131 or 132. An examination of contemporary conflicts over fam-

ily values and the changing family from a feminist perspective. Offered in alternate years. GE credit: . ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE. - (II.) Joseph

136. Topics in Gender, Production, Consumption and Meaning (4)

Lecture/discussion-3 hours; term paper Construction of gender through production and consumption of goods and services. Transnational movement of peoples and products. Topics may include fashion, film, food, and technology. May be repeated for credit. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WC, WE.—Constable, Ho, Kaiser, Nettles-Barcelón

137. Feminist Interpretations of Contemporary Western Thought (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Introduction to deciphering, demystifying, and interpreting poststructuralist, postmodern, and postcolonial thought from a feminist perspective: applications to gender, race, sexuality, and class. Not offered every year. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE

138. Transnational Studies of Dress, Fashion, and Gender (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies or Textiles and Clothing 7, 107, or 174. Dress and fashion as cultural communication, aesthetic expression, capitalist commodity. History, sociology, semiotics of fashion. Fashion as means of gender oppression and liberation. Use of dress in identity construction across cultures. Clothing workers on the global assembly line. Not offered every year. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.—Kaiser

139. Feminist Cultural Studies (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies or American Studies. The histories, theories, and practices of feminist traditions within Cultural Studies. (Same as course American Studies 139.) GE credit: SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WE. - (II.) Kaiser

140. Gender and Law (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies. Exploration of women's legal rights in historical and contemporary context, discussing a variety of legal issues and applicable feminist theories. Topics include constitutional equal protection, discrimination in employment and education, sexual orientation discrimination, and the regulation of abortion. GE credit: SocSci, Div | ACGH, DD, SS.-(III.) West

158. Contemporary Masculinities (4)

Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major. A multicultural study of contemporary trends in masculinity and the economic, social and political forces that have shaped them. Topics may include men's movements, ethnic nationalist masculinities, and images of masculinity in popular culture. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.—III. Craig, Ho

160. Representations of Women of Color in Cinema (4)

Lecture/discussion-3 hours; film viewing-3 hours. Prerequisite: course 20 or another film course. The representations of women of color in commercial and independent films from a feminist perspective. GE credit: ArtHum, Div | ACGH, AH, DD, VL. - (III.)

162. Feminist Film Theory and Criticism (4)

Lecture/discussion-3 hours; film-viewing-3 hours. Prerequisite: one course from the Women's Studies major and Humanities 10 or consent of instructor. Historical overview of and contemporary issues in feminist film theory, including representation, spectatorship, and cultural production. Film stars, women filmmakers, and the intersections of gender, race, sexuality, and class in films and their audiences. Offered in alternate years. GE credit: ArtHum, Div | ACGH, AH, DD, VL, WC, WE.—III. Constable

164. Topics in Gender and Cinematic Representation (4)

Lecture/discussion - 3 hours; film-viewing - 3 hours. Prerequisite: one course from the Women's Studies major and Humanities 10 or consent of instructor. Examination of a specific topic within the broad rubric of gender and cinema. Possible topics include Latinas in Hollywood; gender, nation, cinema; and gender and film genre. Topics vary. May be repeated two times for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div | AH, VL, WC, WE.—Constable, Kuhn

165. Feminist Media Production (6)

Lecture/discussion-3 hours; laboratory-3 hours; fieldwork-6 hours. Prerequisite: one course in Women and Gender Studies or consent of instructor. Basic media production and community service. Video, audio and photography instruction; feminist community documentary; video ethnography; video journals; alternative representations of fashion and women's bodies. Fundamentals of camera and microphone operation, interviewing techniques, and editing. May be repeated two times for credit if topic differs. Not offered every year. GE credit: ArtHum or SocSci, Div | ACGH, AH, DD, VL.

170. Queer Studies (4)

Lecture/discussion-4 hours. Prerequisite: course 20, or 50, or 70, or consent of instructor. Study of queer sexualities, identities, theories, practices Alternative sexualities as historical, social, and cultural constructions in intersections with race, gender, class, nationality. Interdisciplinary exploration of sexual liberation and the regulation of sexuality through history, theory and expressive cultural forms. Not offered every year. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

178A-F. Transnationalism and Writing by Women of Color (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Writings by women of color in a transnational framework, understood in their cultural, socio-economic, and historical contexts. The interrelation among gender, writing, nationalism, and transnationalism, with focus on women's writing in specific geographic/ national locations and their diasporas: (A) The Arab World; (B) Asia; (C) The Caribbean; (D) Africa; (E) Diasporic Women Writers in Europe; (F) Topics on Women Writers of Color. Not offered every year. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Constable, Ho, Joseph, Kuhn, Mena, Nettles-Barcelón

179. Gender and Literature (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Role of literature, especially novels, in constructing, challenging, and transforming normative genders in society. Transhistorical and transnational focus on gender in its intersections with race, class, sexuality, and politics. Not offered every year. GE credit: ArtHum, Div, Wrt | AH, WC, WE.—Constable, Ho,

180. Women of Color Writing in the United States (4)

Lecture/discussion—4 hours. Prerequisite: course 20 or 50. Literature, especially novels, written by contemporary women of color in the United States, understood in their socio-economic, cultural and historical contexts. GE credit: ArtHum, Div | ACGH, AH, DD, WE.-II. Ho, Nettles-Barcelón, Kuhn

182. Globalization, Gender and Identity (4)

Lecture/discussion-4 hours. Prerequisite: course 50. Feminist theories on affects of gender on self and identity and cross cultural study as it intersects gender with race, class, ethnicity. Impact of globalization processes on gender and identity. Offered in alternate years. GE credit: SocSci, Div, Wrt | AH or SS, WC, WE.—III. Mama, Mena, Swain

184. Gender in the Arab World (4)

FORMER GENERAL EDUCATION COURSES; PRE-FALL 2011

The following section pertains to students who matriculated to UC Davis prior to Fall 2011. Students who matriculated for the first time in Fall 2011 or later should refer to the New General Education Courses; Fall 2011 and On, on page 538.

For the most up-to-date General Education courses, use the GE search tool at http://registrar4.ucdavis.edu/courses/GE_courses/.

TOPICAL BREADTH

These courses provide GE credit for topical breadth. Many of these courses also satisfy the GE requirement for social-cultural diversity (indicated by **D**) and/or provide GE credit for writing experience (indicated by **W**). Complete lists of the courses that satisfy the social-cultural diversity requirement and the courses that provide writing experience credit follow this list.

^{*} This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously. † Also assigned to another area of topical breadth.

Credit for writing experience allowed if co-course taken concurrently (see writing experience list).

WRITING EXPERIENCE

These courses satisfy the GE requirement for writing experience. Many of these courses also provide GE credit for topical breadth or social-cultural diversity. Refer to the topical breadth and social-cultural diversity course lists to determine if any additional GE credit applies.

[†] Also assigned to another area of topical breadth. # Credit for writing experience allowed if co-course taken concurrently (see writing experience list).

GENERAL EDUCATION THEME OPTIONS

The following section only pertains to students who matriculated to UC Davis prior to Fall 2011.

General Education theme options are sets of GE courses sharing a common intellectual theme. These GE theme options are not a separate element of the GE requirement, but a way of selecting your GE courses so that you may benefit from a coherent focus of study while completing the GE requirement. Completion of a theme satisfies the GE requirement for students with majors assigned to the GE topical breadth area of Arts and Humanities. Students with majors assigned to the topical breadth area of either Science and Engineering or Social Science will need to complete additional GE courses in Arts and Humanities to satisfy the campus GE requirement.

Global Population and Environmental Issues

For centuries, there have been concerns and predictions about population growth and its potential effects on the environment and the quality of life. Perspectives on population and environmental issues often vary based on such factors as gender, social class, culture, nation, race/ethnicity, and religion. In this group of courses, students will learn about the complex interplay among environmental, economic, and ethical issues through the study of global population patterns. They will learn how science addresses the use of natural resources by humans, along with the fundamentals of environmental impacts such as global warming. This option group of courses explores diverse perspectives on global population and environmental issues by examining biological, physical, and social processes that influence the everyday lives of people around the world.

Topics might include the social, economic, and environmental challenges of population growth; and the ethics and dilemmas of natural resource use.

Global Population	
Atmospheric Science 5 [or 10]	SciEng, Wrt
Human Development 117	SciEng, Wrt
Agricultural and Resource Economics 15	SocSci, Div, Wrt
Science and Society 1	SciEng or SocSci, Div, Wrt
[or Fiber and Polymer Science 110	SciEng or SocSci, Wrt]
International Agricultural Development 10, [or Community & Regional	SocSci, Div, Wrt
Development 1	SocSci, Div, Wrt]

Biodiversity and Cultural Diversity

The nations with the greatest biodiversity often have tremendous ethnic and cultural diversity. This option examines diversity in many interrelated contexts: biological diversity and the impact of contemporary humans; values and cultural practices in regard to production and consumption; the clothes people wear; creation and use of social spaces; and the preservation of genetic resources for food, fiber, and pharmaceuticals.

Topics might include conservation biology; integration of human and natural systems; cultural expression through clothing and appearance; and discussion of what are cultural and social rights.

Biodiversity and Cultural Diversity			
Wildlife, Fish and Conservation Biology 10	SciEng, Div, Wrt		
Plant Biology 11	SciEng, Wrt		
Textiles and Clothing 7	SocSci, Div, Wrt		
Community and Regional Development 2	SocSci, Div, Wrt		
Landscape Architecture 2	SocSci, Wrt		

Food and Fiber

This option focuses on food and fiber systems, from their plant, animal, or synthetic sources to their ultimate use by humans for health, safety, communication, and pleasure. Understanding these systems enables students to see the connections between the food and clothes that are part of our everyday lives and the scientific, social, and cultural issues that make them so significant to society as a whole.

Topics might include food and clothing safety, quality, and availability; media and consumer perceptions; and cultural histories, values, and meanings.

Food and Fiber	
Animal Science 1	SciEng, Wrt
[or Plant Biology 12	SciEng, Div, Wrt]
Nutrition 10	SciEng
and Nutrition 11	SciEng, Wrt
[or Food Science and Technology 10	SciEng or SocSci]
Textiles and Clothing 6	SciEng
Textiles and Clothing 7 or 107	SocSci, Div, Wrt
Science and Society 1	SciEng or SocSci,
	Div, Wrt
Viticulture and Enology 3	SciEng or SocSci

Changing Agriculture

Changing demographics, environmental issues, and social-political trends in California all play a role in public perceptions and policies related to our food and fiber systems, natural resources, and community values. These perceptions, policies, and values need to be critically examined in the context of larger global economic trends and environmental health and safety. In this option group of courses, students can explore a range of challenging issues related to the complex interplay between rural and urban needs and values.

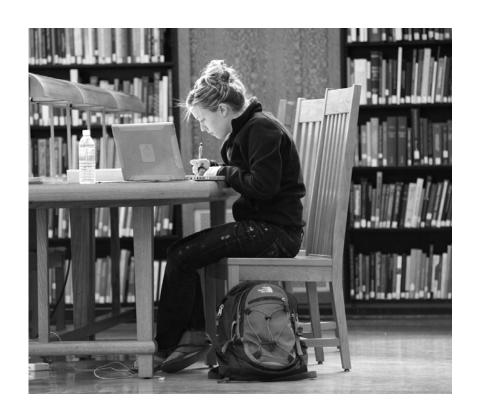

Topics might include holistic approaches to agriculture; international migration and agricultural development; and how plants and animals influence the course of history.

Changing Agriculture Theme Option			
Animal Science 1	SciEng, Wrt		
Entomology 110	SciEng, Wrt		
Plant Biology 12	SciEng, Div, Wrt		
Agricultural and Resource Economics 15	SocSci, Div, Wrt		
Environmental & Resource			
Sciences 121*	SciEng, Wrt		
Science and Society 2	SciEng or SocSci, Wrt		

This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.

Also assigned to another area of topical breadth.

Credit for writing experience allowed if co-course taken concurrently (see writing experience list).

APPENDIX

RESIDENCE FOR TUITION INFORMATION

Policy Governing Residence

The determination of residence for tuition purposes at the University of California is governed by the UC Residency Policy and Guidelines. Under the UC Residency Policy, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors and that establish exemptions The UC Residency Policy establishes the Residence Determination Date for each term as the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester. All of the UC requirements for residency must be met prior to the Residence Determination Date for classification as a resident. Documentary evidence may be required and all relevant indications will be considered in determining residence classifications.

You are cautioned that this summary is not a complete explanation of the regulations regarding residence. Please note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date.

Office of the General Counsel

Requirements for Resident Classification, Rules Applying to Minors and Exemptions from Nonresident Supplemental Tuition can be found published as the "UC Residency Policy and Guidelines" available at Office of the General Counsel website under Educational Affairs and Campus Services.

Read the full text of UC Residency Policy-Residency Guidelines for Purposes of Tuition and Fees at http://www.ucop.edu/ogc/guides.html.

Nonresident Supplemental Tuition Fee for Nonresident Students

If you have not met all of the UC requirements for residency prior to the Residence Determination Date each term in which you propose to attend the University, you must pay Nonresident Supplemental Tuition in addition to all other fees.

Resident Determination Process

California residence for tuition purposes is determined for each student under the UC Residency Policy and Guidelines based on information provided to a campus Residence Deputy on the Statement of Legal Residence. Additional information and documentation in support of your claim of resident status for tuition purposes may be requested as needed. Applicants and students are responsible for submitting ALL RELEVANT DOCUMENTATION AND INFORMATION to the campus Residence Deputy in support of their in-state residency request. Information or documents requested but not made available to the Residence Deputy will NOT be considered or reviewed on appeal.

Incorrect Classification

If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all Nonresident Supplemental Tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the campus Residence Deputy.

Appeals

Any student, following a final decision on their residence classification by the Residence Deputy may apply for an appeal with the Office of the General Counsel within 30 days of notification of the Residence Deputy's final decision.

All inquiries regarding the appeal process should be addressed to the Office of the General Counsel at Residency. Appeal@ucop.edu.

Petitions for Classification to Resident Status

Nonresident students may apply for a change of classification to resident status once all the requirements have been met. Petitions for Classification to Resident Status from continuing UC Davis students classified as nonresident for tuition purposes in a prior quarter must be filed during the filing period and no later than the Fee Payment Deadline for the term they wish to classify as a Resident. Deadline exceptions will only be made in the cases of a documented medical illness, death in the immediate family, or an administrative error on the part of the university. Petition supporting documents will not be accepted after the 20th day of instruction unless an extension has been requested from a Residence Deputy.

Inquiries

Inquiries regarding residence requirements, determination, classification and /or recognized exceptions should be directed to Residence Deputy, Office of the University Registrar, One Shields Avenue, Davis, California 95616 or residencedeputy@ucdavis.edu.

Inquiries regarding the UC Residence Policy and Guidelines or appeals, should be directed to Office of the General Counsel at Residency. Appeal@ucop.edu.

NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO PROVIDE INFORMATION REGARDING RESIDENCE REQUIREMENTS.

UNIVERSITY POLICY ON NONDISCRIMINATION, SEXUAL HARASSMENT, DISABILITY **ACCOMMODATIONS, STUDENT RECORDS** AND PRIVACY

Nondiscrimination. The University of California, in accordance with applicable Federal and State law and University policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (including pregnancy, childbirth, and medical conditions related to pregnancy or childbirth), physical or mental disability, age, medical condition (cancerrelated or genetic characteristics), ancestry, marital status, citizenship, sexual orientation, or service in the uniformed services (includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services) status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Discrimination, Harassment, or Arbitrary Treatment. If students have questions about student-related nondiscrimination policies or concerns about possible discrimination, harassment, or arbitrary treatment, they may contact Student Judicial Affairs for information and assistance (530) 752-1128. Additional resources for students include the UC Davis Compliance Officer (ADA and Title IX Officer) (530) 752-9466 or the dean's office for their college. Graduate students may also contact the Office of Graduate Studies (530) 752-0650 or the Graduate Students Association (530) 752-6108. Students are encouraged to seek assistance as soon as possible, as time limits may apply to grievance processes.

Campus policies provide for a prompt and effective response to student complaints. This response may include early resolution procedures or, as appropriate, an administrative review or investigation. The student will be informed of the results of the review.

Sexual Harassment. Sexual harassment is prohibited by law and by university policy and will not be condoned. Campus policy (PPM Section 380-12at http://manuals.ucdavis.edu/ppm/380/ 380-12.htm) describes campus procedures for resolving sexual harassment complaints, which may include interim actions, early resolution processes, and formal investigation procedures. If a complaint of sexual harassment is substantiated, the campus will take appropriate remedial action. The Sexual Harassment Education Program (530) 752-9255 255 works with students to resolve complaints of sexual harassment and provides referrals to other campus resources. Students may report sexual harassment to deans, supervisors, managers, the Campus Sexual Harassment Officer (Director of the Sexual Harassment Education Program) and other campus officials, including Student Judicial Affairs and Student Housing, and the Compliance Director (Title IX Officer) 530-752-9466. With the exception of certain confidential resources, University officials receiving a report of sexual harassment must immediately consult with the Sexual Harassment Officer. Students may seek confidential advice and support from Counseling and Psychological Services (530) 752-0871, the Campus Violence Prevention Program (530) 752-3299, the Lesbian, Gay, Bi-Sexual, and Transgender Resource Center (530) 752-24452, and the

Women's Resources and Research Center (530) 752-3372. Consultation with these resources will not lead to a report of sexual harassment unless additional action is taken by the individual seeking advice.

Accommodations for Students with Disabilities. Students with documented disabilities may be entitled to reasonable accommodations to gain access to the University's academic programs. More information about academic accommodations can be obtained by contacting the Student Disability Center (530) 752-3184 or http://sdc.ucdavis.edu. Questions or concerns about accommodations that are not related to academic programs should be directed to the UC Davis Compliance Director (ADA Officer) (530) 752-9466, For complaints of alleged discrimination on the basis of disability under PPM Section 280-05, contact Student Judicial Affairs (530) 752-1128 or the UC Davis Compliance Director.

Disclosures from Student Records. Students have the right to review records that relate to themselves in their capacity as students and to request corrections of records believed to be inaccurate. Most disclosures from student records to outside parties require prior consent from the student.

Under the Family Educational Rights and Privacy Act of 1974 and University and campus policies, UC Davis students have the following rights:

- A. To review their own student records within 45 days after the student submits a written request for access to the Registrar or other department in possession of the records. That office will make arrangements for access and notify the student when and where the records may be reviewed. If the records requested are in a different office, the request will be redirected and the student notified. The campus maintains several types of student records in various locations. Questions about how to obtain records should be referred to Student Iudicial Affairs at (530) 752-1128.
- **B.** To request amendment of their own student records if they believe the records are inaccurate or misleading, students should submit a written request to the office that maintains the records specifying the portion of the record the student wants changed and why it is believed to be inaccurate or misleading. That office has 45 days to determine whether the record should be changed and notify the student of the decision. If a student wishes to contest this decision, the student should contact Student Judicial Affairs.
- **C.** To restrict the disclosure of personally identifiable information contained in student records, except when law and policy permit disclosure without consent. Examples of circumstances in which the student's consent is not required for disclosure of student records include the following:
- Disclosure of "directory" or "public" information including the student's name; local and/or permanent address(es), email addresses and telephone number(s); dates of attendance; major field(s) of study [major, minor, concentration, specialization, and similar designations]; grade level; enrollment status (undergraduate/graduate, full time or part time, number of enrolled course units) degrees and honors received; most recent previous educational institution attended; participation in officially recognized activi-

ties, including Intercollegiate Athletics (ICA), and the name, weight and height of participants on ICA teams.

- To prevent disclosures of telephone numbers and/or addresses, students must submit a written request to the Registrar by the tenth day of instruction. To prevent disclosure of their e-mail address, students must follow instructions at https://computingaccounts.ucdavis.edu/, and select the Change your directory information option.
- Students may designate all information about themselves as confidential and withhold it from public disclosure by filing a request with the Office of the University Registrar in 12 Mrak Hall. If all information is designated confidential, UC Davis cannot respond to requests for verification of student status or degrees, make public any honors, or include the student's name in the commencement program without the student's specific written consent.
- Disclosure to campus officials (for example faculty, staff, student employees, or those under contract with the University) having a legitimate educational interest in the records. Legitimate educational interest means the information is relevant and necessary to a task or determination that is (a) an employment responsibility or an assigned subject matter for the inquirer and/or related to (b) the inquirer's participation in the student's education; (c) the discipline of a student; or (d) providing a service or benefit related to a student or student's family (such as health care, counseling, job placement, or financial aid).
- Disclosure of appropriate student records, including academic records, disciplinary records, and other student records, to other educational institutions in which a student seeks or intends to enroll, or is currently enrolled, so long as the disclosure is for purposes related to the student's enrollment or transfer

For more information, see UC Davis Policy and Procedure Manual Section 320-21 at http://manuals.ucdavis.edu/ppm/320/320-21.htm.

Contact Student Judicial Affairs (530) 752-1128 for questions about these rights and requirements. Student complaints regarding alleged violations of privacy rights should be submitted to Student Judicial Affairs.

Students may also contact the U.S. Department of Education concerning alleged violations of these requirements, addressed to the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC. 20202-4605. See Section 99.63 at http://www.ed.gov/policy/gen/guid/fpco/ferpa/index.html.

Social Security Numbers. A student's Social Security number is used to verify personal identity in the UC Davis Student Records System. Students are mandated to disclose their social security number to UC Davis. In compliance with state law, Social security numbers are confidential and are not used as student identifiers.

Release of Registration Material and Grades. In compliance with student privacy rights under federal and state law and University policy, the Office of the Registrar may not release a students

grades, registration material, and/or identification card to anyone other than the student without specific written authorization signed by the student. The person to whom the information, material, or card is released must be designated by name and must present proof of identity. The signed authorization is kept in the "Record of Disclosures" in the student's file.

CAMPUS SECURITY, CRIME AWARENESS, AND ALCOHOL AND DRUG ABUSE PREVENTION

In accordance with federal law, UC Davis annually provides students and employees with information regarding campus security, crime statistics, and alcohol and drug abuse prevention, pursuant to the Student Right to Know and Campus Security Act of 1990 and the Drug Free Schools Act of 1989. The UC Davis Police and Campus Administration make continual efforts to reduce crime on campus. A well-informed community is better served and safer.

For a copy of the complete UC Davis security and crime prevention report, including crime statistics, campus security measures and crime reporting procedures, applicants for admission or prospective employees may contact the UC Davis Campus Violence Prevention Office, located in the UC Davis Police Department, contact (530) 752-3299, or jxsouza@ucdavis.edu.

ACCREDITATION

The University of California, Davis is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501 (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

UC Davis is also accredited by the Accreditation Board for Engineering and Technology, Accreditation Council for Graduate Medical Education, Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), American Association for Accreditation of Laboratory Animal Care, American Bar Association, American Chemical Society, American Dietetic Association, American Psychological Association, American Society of Crime Lab Directors Laboratory Accreditation Board (ASCLD/LAB); American Society of Landscape Architects, Association of American Law Schools, Association of American Medical Colleges, Association to Advance Collegiate Schools of Business, Commission on Accreditation for Dietetics Education; Commission on Collegiate Nursing Education; Commission on Teacher Credentialing, Computer Science Accreditation Commission, Council on Education and Public Health, the Council on Education of the American Veterinary Medical Association, Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL), and the Liaison Committee on Medical Education.

Students interested in reviewing WASC accreditation documents may do so at http://wasc.ucdavis.edu. Those interested in reviewing profession-specific accreditation documents should contact the relevant Dean's office.

THE BOARD OF REGENTS

Governance of the University is entrusted to a corporation called The Board of Regents. Of the individuals composing the board, eighteen are California citizens appointed by the governor; and seven, including the president of the University and the governor of California, serve ex officio. A Student Regent is selected each year from a list of names submitted to the board by the Student Body Presidents' Council.

The Regents have delegated authority in academic matters to the Academic Senate of the faculty, which determines academic policy and supervises the instructional activities of the entire University. All of the permanent faculty, as well as key administrators, are members of the Senate.

The Regents have delegated authority for the organization of the University to the president. Mark G. Yudof is President and head of the Universitywide administration. Authority for the administration of each campus has been delegated to a chancellor.

Associate/Assistant Vice Chancellors and Vice Provosts

Rahim Reed, M.P.A., J.D.

Associate Executive Vice Chancellor—Campus Community Relations

Emily Galindo, M.B.A.

Associate Vice Chancellor—Student Affairs (Divisional and Auxiliary Services)

Griselda Castro, M.A.

Associate Vice Chancellor—Student Affairs (Student Life, Campus Community and Retention Services

Lora Jo Bossio, M.A.

Associate Vice Chancellor—Student Affairs (Enrollment, Wellness and Technology Services)

J. Michael Allred, M.B.A.

Associate Vice Chancellor—Administrative and Resource Management (Accounting and Financial Services—Finance/Controller)

Jill Parker, B.S.

Associate Vice Chancellor—Administrative and Resource Management (Safety Services)

Karen Slakey Hull, M.B.A.

Associate Vice Chancellor—Administrative and Resource Management (Human Resources)

Kelly Ratliff, M.B.A.

Associate Vice Chancellor—Administrative and Resource Management (Budget and Institutional Analysis)

Cindy Kiel, J.D.

Executive Associate Vice Chancellor—Research Administration

Bernd Hamann, Ph.D.

Associate Vice Chancellor—Research (Interdisciplinary Research and Strategic Initiatives)

Heather Young, Ph.D., R.N., F.A.A.N.

Associate Vice Chancellor—Betty Irene Moore School of Nursing

Mitchel Benson, M.S.J.

Associate Vice Chancellor—University Communications

Marie Carter-Dubois, M.B.A.

Assistant Executive Vice Chancellor—Office of the Provost

Marjorie M. Dickinson, B.A.

Assistant Vice Chancellor—Government Relations

Richard R. Engel, M.A.

Assistant Vice Chancellor—Alumni Relations

Clayton Halliday, A.I.A.

Assistant Vice Chancellor—Administrative and Resource Management (Design and Construction Management)

Diane Davies-Conley, C.P.A., M.B.A.

Assistant Vice Chancellor—Administrative and Resource Management (Chief Operating Officer)

Karl Mohr, M.A.

Assistant Vice Chancellor—Administrative and Resource Management (20/20 Initiative)

Robert Segar, M.L.A.

Assistant Vice Chancellor—Administrative and Resource Management (Campus Planning and Community Resources)

Sid England, Ph.D.

Assistant Vice Chancellor—Administrative and Resource Management (Environmental Stewardship and Sustainability)

Adrienne Martin, Ph.D

Associate Vice Provost—University Outreach and International Programs (International Programs)

Vacant

Associate Vice Provost—University Outreach and International Programs (University Outreach and Engagement)

Gary Ford, Ph.D.

Associate Vice Provost—Undergraduate Education

Gail Martinez, Ph.D.

Assistant Vice Provost—Undergraduate Education

Robert Kerr, Ph.D.

Assistant Vice Provost—University Outreach and International Programs (Alumni and Development)

Dave Shelby

Assistant Vice Provost—Information and Educational Technology

Chief campus Counsel

Steven A. Drown, J. D.

Chief Executive Officer—Medical Center

Ann Madden Rice, M.A.

Chief Officer—Regional and Community Engagement

Beverly "Babs" Sandeen, Ph.D.

Acting University Librarian

Randolph Siverson, Ph.D.

Registrar

Elias S. Lopez, Ph.D.

Directors

Nona Richardson, M.A.

Interim Director, Intercollegiate Athletics

Jeremiah Maher

Director, Internal Audit Services

Michelle Famula, M.D.

Director, Student Health & Wellness Center

Katy Maloney, B.S.

Director, Financial Aid

Richard R. Engel, M.A.

Executive Director, Cal Aggie Alumni Association

Barry Shiller, B.A.

Interim Executive Director, Strategic Communications

Emily Galindo, M.B.A.

Executive Director, Student Housing

Elias S. Lopez, Ph.D.

Executive Director, Technology Services and University Registrar

Don Roth, Ph.D.

Executive Director, Mondavi Center/University Cultural Programs

College of Agricultural and Environmental Sciences

Neal K. Van Alfen, Ph.D., Dean

James MacDonald, Ph.D., Executive Associate Dean

Jan Hopmans, Ph.D., Associate Dean

Mary Delany, Ph.D., Associate Dean

Diane Ullman, Ph.D., Associate Dean—Undergraduate Academic Programs

James E. Hill, Ph.D., Associate Dean—International Programs

Tom Kaiser, Executive Assistant Dean—Administration

Julie Fritz-Rubert, Assistant Dean-College Personnel

Christine Schmidt, Assistant Dean—College Advancement

College of Biological Sciences

James E.K. Hildreth, Ph.D., M.D., Dean

Carol A. Erickson, Ph.D., Executive Associate Dean-Graduate Studies and Research

Diana G. Myles, Ph.D., Associate Dean—Undergraduate Academic Programs

Donna Watkins Olsson, M.P.P., Executive Assistant Dean

PROPORTION OF UC DAVIS GRADUATES FINDING WORK IN THEIR FIELDS OF CHOICE

The percent of alumni whose full-time job is in the field of their choice is shown by field of study. Figures do not include the five percent of graduates who had not decided on a career field at the time of the survey.

Field of Study², Percentage finding work in field of choice

RETENTION DATA AND GRADUATION RATES AT UC DAVIS

Agricultural Sciences, 88% Biological Sciences, 67% Engineering, 86% Environmental Sciences, 79%

Humanities, Arts and Cultural Studies, 61% Human Sciences, 69% Mathematical and Physical Sciences, 88% Social Sciences, 67%

Total, 71%

Source: A 2009 survey of June 2007-08 graduates conducted by Student Affairs Research and Information. ²Fields of Study are groups of related undergraduate majors as organized into UC Davis colleges or divisions.

Freshmen*

(Retention and graduation rates through Summer 2011 for all undergraduates entering UC Davis as freshmen.)

Fall Quarter of Initial Enrollment:	Number of Students**	Percent Returned for Second Year	Percent Graduating in Four Years	Percent Graduating in Five Years	Percent Graduating in Six Years
1996	3,685	91%	38%	73%	79%
1997	3,524	90%	38%	71%	78%
1998	3,616	90%	39%	72%	78%
1999	3,816	90%	42%	75%	80%
2000	4,319	90%	43%	76%	81%
2001	4400	90%	43%	73%	79%
2002	4653	91%	47%	77%	81%
2003	4775	90%	50%	75%	80%
2004	4258	91%	51%	78%	82%
2005	4375	90%	51%	77%	82%

Transfer Students

(Retention and graduation rates through Summer 2011 for all undergraduates transferring to UC Davis from California community colleges.)

Fall Quarter of Initial Enrollment: 2000	Number of Students** 1,596	Percent Returned for Second Year 88%	Percent Graduating in Two Years 39%	Percent Graduating in Three Years 75%	Percent Graduating in Four Years 82%
2001	1,607	89%	40%	75%	83%
2002	1,668	90%	46%	78%	85%
2003	1,581	90%	47%	78%	83%
2004	1,734	89%	48%	78%	85%
2005	1,588	88%	53%	79%	84%
2006	1,617	90%	49%	80%	85%
2007	1,650	88%	48%	77%	84%

Retention is defined as enrollment at the third week census point of the fall term one year from initial fall term.

Graduation is define as having received a degree from UC Davis (does not include students who transferred to another institution to complete their degree).

LOOKING FOR UC DAVIS STUDENT LIFE RESOURCES IN ONE PLACE?

Introducing **studentlife.ucdavis.edu**, where the information you want is organized in four easy categories:

live

Finding housing, eating well, visiting the doctor, affording education, choosing a career—all are components of your life.

learn

Outside of the classroom, you may find that you need help with mastering concepts, studying effectively, managing your time or applying what you've learned to your career.

play

From watching a game with roommates, to joining an intramural sports team or taking a non-academic class, incorporate fun into your life to stay healthy and relieve stress constructively.

connect

Friends, mentors and advisors—all contribute to your experience as an Aggie. Whether socializing with classmates on Facebook, volunteering in the community, serving in a leadership role on campus or joining a club, connect and thrive at UC Davis.
