Thomas Tai, Ph.D., Associate AES (Plant Sciences)
Allen Van Deynze, Ph.D., Professional Researcher (Plant Sciences)
Graduate Study. The Graduate Group in Plant Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at universities and colleges, government and industrial laboratories. The graduate curriculum provides both a breadth in the discipline and in-depth study and research in one of four areas of specialization: cell and developmental biology; environmental and integrative biology; molecular biology, biochemistry and genomics; and systematics and evolutionary biology. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, biotechnology, cell biology, cytology, developmental biology, ecology, genetics, genomics, molecular biology, morphology, paleo-botany, physiology, population biology, systematics, and weed science. The graduate adviser, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.
Preparation. For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisite to the advanced degrees in Plant Biology: biology, inorganic chemistry, organic chemistry, introductory physics, genetics, plant development and structure, biochemistry, introductory plant physiology, calculus, introductory statistics, ecology/systematics/evolution, and cell/molecular biology. Limited deficiencies can be made up after admission.
Graduate Adviser. Contact the Group office.

## Courses in Plant Biology (PBI)

Graduate
200A. PBGG Core Course Series-Fall quarter (5)
Lecture-3 hours; discussion-2 hours. Prerequisite: graduate standing; a broad background of under-graduate-level coursework in Plant Biology is recommended. The first of three PBGG graduate core courses. Coverage includes (1) plant genes, (2) biotechnology, (3) genomes and gene flow, (4) principles of plant systematics, and (5) the evolution of flowering plants.-I. (I.) Potter

## 200B. PBGG Core Course Series-Winter

 quarter (5)Lecture-3 hours; discussion-2 hours. Prerequisite: course 200A. The second of three PBGG graduate core courses. Coverage includes (1) embryo development, (2) cytoskeleton and vesicle trafficking, (3) cell walls, (4) cell growth, (5) secondary metabolism, (6) plastids and (7) senescence.-II. (II.) Labavitch

## 200C. PBGG Core Course Series - Spring

 quarter (5)Lecture-3 hours; discussion-2 hours. Prerequisite: course 200A and 200B. The third of three PBGG graduate core courses. Coverage includes (1) plant water relations, (2) cellular \& long distance transport processes, (3) mineral nutrition, (4) environmental impacts on growth \& development, (5) stress perception \& responses, (6) canopy processes, and (7) plant interactions with other organisms. - III. (III.) Blumwald, Silk

## 203N. Biology of the Plant Cell (4)

Lecture-3 hours; discussion/laboratory-2 hours. Prerequisite: Plant Biology 111 or Biological Sciences 104, or the equivalent. Recent progresses in plant cell biology. Intracellular motility in plant cells. Common techniques associated with the progress of plant cell biology. Open to senior undergraduate students in Plant Biology major. Offered in alternate years. (S/U grading only.)-Liu

## 210. Plant Ecophysiology (3)

Lecture-3 hours. Prerequisite: Plant Biology 111, 112, 117. Study of the mechanisms of physiological adaptation of plants to their environment. Offered in alternate years. - (II.)

## 212. Physiology of Herbicidal Action (3)

Lecture-3 hours. Prerequisite: Plant Biology 112, 122. Study of the fundamental processes involved in the physiological action of herbicides. Detailed consideration of the fate of herbicides in plants. Offered in alternate years. - III.

## 214. Higher Plant Cell Walls (3)

Lecture-2 hours; discussion - 1 hour. Prerequisite: Plant Biology 112, and a course in biochemistry. Lectures focus on the structure, analysis, synthesis, and development-related metabolism of cell walls. Discussions center on analysis of scientific papers related to lecture topics. Offered in alternate years.-I. Labavitch
220. Plant Developmental Biology (4)

Lecture-3 hours; discussion-1 hour; term paper. Prerequisite: plant anatomy, physiology, and biochemistry. A survey of the concepts of plant development and organization. Examines plant cells, tissues, and organs with special emphasis on experimental evidence for mechanisms regulating developmental processes. Offered in alternate years. - Sinha
223. Special Topics in Scientific Method (2) Discussion-2 hours. Examine the historical and philosophical background of the scientific method. Analyze the rational, perceptual, causal, creative and social aspects of scientific knowledge. Clarify the roles of reason, experimentation and creativity in scientific research. ( $S / \cup$ grading only.) -I. (I.) Bradford

## 227. Plant Molecular Biology (4)

Lecture/discussion-4 hours. Prerequisite: Molecular and Cellular Biology 121 or 161. Molecular aspects of higher plant biology with emphasis on gene expression. Plant nuclear and organelle genome organization, gene structure, mechanisms of gene regulation, gene transfer, and special topics related to development and response to biological and environmental stimuli. Offered in alternate years. - Britt, Sinha

## 229. Molecular Biology of Plant

Reproduction (3)
Lecture-3 hours. Molecular genetic basis of plant reproduction. Emphasis on understanding developmentally regulated gene expression as it relates to the major changes that occur during plant reproduction and on the genetic control of flowering. Offered in alternate years. - O'Neill
290A. Faculty Seminar (1)
Discussion-1 hour. Discussion of research area of seminar speakers in Plant Biology Graduate Group Seminar Series. Restricted to Plant Biology graduate students (PBGG). May be repeated six times for credit. (S/U grading only.) -I, II, III. (I, II, III.)
290B. Seminar (1)
Seminar -1 hour. Seminars presented by visiting scientists on research topics of current interest. (S/U grading only.) $-\mathrm{I}, \mathrm{II}$, III. (I, II, III.)

290C. Research Conference in Botany (1)
Discussion-1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and discussion by faculty and graduate students of research projects in botany. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 291. Graduate Student Seminar in Plant

 Biology (1)Seminar-1 hour. Prerequisite: graduate student standing. Student-given seminars on topics in plant biology, with critiques by instructor and peers. How to give a seminar, including preparation of visual and other teaching aids. Topic determined by instructor in charge. May be repeated for credit. (S/ U grading only.) -I, II, III. (I, II, III.)

## 292. Seminars in Plant Biology (1)

Seminar-1 hour. Prerequisite: consent of instructor. Review of current literature in botanical disciplines. Disciplines and special subjects to be announced quarterly. Students present and analyze assigned topics. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)
293. Seminar in Postharvest Biology (1) Discussion-1 hour. Prerequisite: consent of instructor; open to advanced undergraduates. Intensive study of selected topics in the postharvest biology of fruits, vegetables, and ornamentals. May be
repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
297T. Tutoring in Plant Biology (1-5)
Tutorial-3-15 hours. Offers graduate students, particularly those not serving as teaching assistants, the opportunity to gain teaching experience.
(S/U grading only.)
298. Group Study (1-5)

May be repeated up to four times for credit.
(S/U grading only.)
299. Research (1-12)

Prerequisite: graduate standing. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Professional

390. The Teaching of Plant Biology (2)

Discussion - 2 hours. Prerequisite: graduate standing; concurrent appointment as a teaching assistant in Plant Biology. Consideration of the problems of teaching botany, especially of preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. (S/U grading only.)-I, II, III. (I, II, III.)

## Plant Pathology

## Courses in Plant Pathology (PLP)

 Lower Division40. Edible Mushroom Cultivation (2)

Lecture-1 hour; laboratory/discussion-3 hours. Prerequisite: Biological Sciences 10 or Microbiology 20 recommended. Principles and practices of growing edible mushrooms, including culture maintenance, basic mushroom substrate preparation, composting, spawn generation techniques, inoculation methods, harvesting, and pests and pest management. - II. (II.) Davis

## Upper Division

## 120. Introduction to Plant Pathology (4)

Lecture-2 hours; laboratory-6 hours. Prerequisite: Biological Sciences 1C; Microbiology 102 recommended. The nature, cause, and control of plant dis-eases.-I, III. (I, III.) Bostock, Falk, Gilbertson,
McRoberts
123. Plant-Virus-Vector Interaction (3)

Lecture-3 hours. Prerequisite: Biological Sciences 2A, Biological Sciences 101; Plant Biology 105, course 120, and Entomology 100 recommended. Analysis of interactions necessary for viruses to infect plants.Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as Entomology 123 and Plant Biology 123.) Offered in alternate years. GE credit: SE, SL, WE. - (I.) Lucas, Gilbertson, Ullman

## 130. Fungal Biotechnology and

Biochemistry (3)
Lecture-3 hours. Prerequisite: Plant Biology 119, Biological Sciences 103. How fundamental physiological and biochemical activities of fungi impact the destructive and beneficial roles of these organisms in nature. Utilization and manipulation of fungi for biotechnological and industrial applications. - II. (II.) Gilchrist, Stergiopolous
135. Field Identification of Mushrooms (1)

Field work; three-day mandatory field trip. Prerequisite: introductory course in biological sciences; course in mycology recommended. Collection and identification of mushrooms and other fleshy fungi based on macro and microscopic features. (P/NP grading only.) - II. (II.) Davis
140. Agricultural Biotechnology and Public Policy (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: high school level biology, including genetics; Biological Sciences 10 recommended. Examination of the development and deployment of agricultural biotechnologies, particularly transgenic crop plants, microorganisms and animals, with consideration of conventional agriculture, public perceptions of technologies, food safety, environmental impact, public policies and regulations. GE credit: SciEng,
Wrt \| SL. - III. (III.) Cook, Newell-McGloughin

## 148. Introductory Mycology (4)

Lecture-2 hours; laboratory-6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Biology 148.) GE credit: SE.-I. MacDonald, Rizzo

## 150. Fungal Ecology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 1C or equivalent. The ecological roles of fungi as saprobes, mutualists and parasites in native and managed ecosystems. Physiological and reproductive strategies associated with adaptations to diverse habitats. -III. (II.) Gordon

## 185. Advanced Mushroom Taxonomy (2)

Laboratory/discussion-3 hours; fieldwork-1 hour. Prerequisite: course 135 or 148 , and Biological Sciences 101 or the equivalent. Microscopic and molecular methods used in the identification of mushroom species; molecular characterization including PCR-amplification of ribosomal nuclear DNA, digestion of the product with restriction enzymes, and DNA sequencing; a one-day field trip is required. Offered in alternate years.-I. Davis

## 189D. Global Disease Biology Research Discussion (1)

Discussion-1 hour. Prerequisite: junior standing, courses 90, 187, Science and Society 23; course 189 required concurrently. Restricted to Global Dis ease Biology majors only. Course helps prevent or solve problems during the students' research activity. Independent advising and assistance on research proposal. (P/NP grading only)-I, II, III. (I, II, III.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: course 120 and consent of instructor. Work experience off and on campus, supervised by a member of the faculty. (P/NP grading only.)
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

201 A. Impacts, Mechanisms and Control of Plant Disease (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 120, graduate student status in the Plant Pathology Graduate Program, or consent of instructor. A case-studies approach to analysis of plant diseases caused by bacteria, fungi, oomycetes, and viruses, including impacts, etiology, pathogen taxonomy and epidemiology, biochemical and genetic aspects of pathogen-host interactions, virulence and resistance, and approaches to disease control. - II. (II.) Gordon

201 B. Impacts, Mechanisms and Control of Plant Disease (3)
Lecture-2 hours; discussion - 1 hour. Prerequisite: course 120, course 201A, and graduate student status in the Plant Pathology Graduate Program, or consent of instructor. A case-studies approach to analysis of plant diseases, including emerging dis-
eases, caused by bacteria, fungi, nematodes, and oomycetes: impacts, etiology, pathogen taxonomy, epidemiology, biochemical and genetic aspects of pathogen-host interactions, virulence, resistance, disease control and statistical analysis. Offered in alternate years. - III. (III.) McRoberts

## 205A. Diseases of Vegetable and Field

 Crops (3)Lecture/discussion-3 hours; fieldwork-3 hours Prerequisite: course 120. Clinical study of diseases of vegetable and field crops with emphasis on etiol ogy, epidemiology, diagnosis, and control. Field trips required. Offered in alternate years. - III. Davis
205B. Diseases of Vegetable and Field Crops - Summer Field Trip (1)
Fieldwork-3 hours. Prerequisite: courses 120 and 205A. Continuation of course 205A-four-day field trip investigating diseases of vegetable and field crops (Deferred grading only, pending completion of sequence. S/U grading only.)-IV. (IV.) Davis

## 206A-206B. Diseases of Fruit, Nut, and

 Vine Crops (3-1)Lecture-2 hours; laboratory - 6 hours. Prerequisite: course 120; Plant Biology 119. Course 205 may be taken concurrently. Clinical study of fruit, nut, and vine crops diseases with emphasis on etiology, epidemiology, diagnosis, and control. Offered in alternate years. (Deferred grading only, pending completion of sequence.) - III-IV. (III-IV.) Kirkpatrick

## 210. Biochemistry and Molecular Biology

 of Plant-Microbe Interaction (4)Lecture/discussion-4 hours. Prerequisite: Biological Sciences 101, 102, 103, and 104, or the equivalent. Discussion of plant-microbe interactions, focused on the underlying cellular, biochemical, and molecular events that determine the diseased state. Offered in alternate years.-I. Bostock, Coaker

## 217. Molecular Genetics of Fungi (3)

Lecture-3 hours. Prerequisite: graduate standing in a biological science, Biological Sciences 101, 103, Molecular and Cellular Biology 161, Plant Biology 119, courses 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; plant pathogenesis; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. Offered in alternate years. (Same course as Biological Chemistry 217.)-II.

## 224. Advanced Mycology (4)

Lecture-2 hours; laboratory - 6 hours. Prerequisite: course 148 or Plant Biology 148 or consent of instructor. Systematics, evolution, and ecology of the fungi. Topics include modern techniques and theories on classification of fungi, species concepts, sexval compatibility and vegetative compatibility. Laboratories emphasize various approaches to fungal identification. Offered in alternate years. - III. Epstein, Rizzo

## 228. Plant Bacteriology (5)

Lecture - 2 hours; laboratory - 9 hours. Prerequisite: course 120; Microbiology 2 or the equivalent; Biological Sciences 102, 103. Study of bacteria which have a saprophytic, symbiotic, or parasitic association with higher and lower plants. Clinical and molecular methods for identification and classification of these bacteria. Offered in alternate years. (I.) Kirkpatrick, Gilbertson
230. Plant Virology (3)

Lecture-3 hours. Prerequisite: upper division or graduate course in molecular biology or graduate student in plant pathology. Viruses as causal agents of plant disease and as tools for manipulating plants; structures of virus particles; mechanisms of transmission, replication, and spread in the plant; cytology and molecular biology in susceptible and resistant reactions to virus infection; virus disease control. Only 2 units of credit to students who have completed Microbiology 262. Not open for credit to students who have completed course 226. Offered in alternate years. -II. Bruening, Falk

## 290. Seminar (1)

Seminar-1 hour. Review and evaluation of current research in plant pathology. (S/U grading only.) -I, II, III. (I, II, III.)
290C. Advanced Research Conference (1) Seminar-1 hour. Prerequisite: course 120 or consent of instructor. Presentation, evaluation, and critical discussions of research activities in the area of advanced plant pathology; primarily designed for graduate students. (S/U grading only.) - I, II, III. (I, II, III.)

## 291. Seminar in Molecular Plant Pathology (1)

Seminar-1 hour. Prerequisite: course 120 or consent of instructor. Review and evaluation of current literature and research in biochemistry and molecular biology of plant microbe interactions. May be repeated for credit. (S/U grading only.) -I, II. (I, II.) Bostock, Coaker, Cook, Gilchrist, VanAlfen

## 295. Seminar in Mycology (1)

Seminar-1 hour. Review and evaluation of current literature and research in mycology. May be repeated for credit. (S/U grading only.) - III. (III.) Rizzo
298. Special Group Study (1-5)
299. Research (1-12)
(S/U grading only.)

## Plant Physiology

See Plant Biology, on page 471; and Plant Biology (A Graduate Group), on page 473.

## Plant Sciences

185, Ecological Management and Restoration, on page 229, Environmental Horticulture and Urban
Forestry, on page 297, and Plant Sciences, on page 476.

Related Courses. See the Biotechnology, Environmental Horticulture, Horticulture and Agronomy, and Plant Biology course listings.
Graduate Study. For related graduate study, see the M.S. degree program in International Agricultural Development, and the M.S. and Ph.D. degree programs in the graduate groups of Horticulture and
Agronomy, Plant Biology, Ecology, Genetics, Geography, and Soils and Biogeochemistry. See also
Graduate Studies, on page 111.

## The Major Program

The Plant Sciences major is designed for students who are interested in a scientific understanding of how plants grow and develop in managed agricultural ecosystems and how plant products are utilized for food, fiber and environmental enhancement. Advances in science and technology have provided new insights and options for using plants to address the issues associated with providing renewable food, fiber and energy resources for a growing global population while minimizing adverse impacts on the natural environment. Graduates in Plant Sciences are able to apply their skills and knowledge to a diverse range of agricultural and environmental goals or pursue advanced degrees in plant sciences.
The Program. The curriculum provides depth in the biological and physical sciences and a sound understanding of how plants obtain and utilize resources from their environment to sustain their growth and development. The influences of genetics, management systems and environmental inputs on crop development and productivity are emphasized along with the postharvest preservation and marketing of plant products. Students will develop an area
of specialization with options in Crop Production, Plant Genetics and Breeding, or Postharvest Biology and Technology. An Individual option is also available to match specific subject matter or career goal interests in the plant sciences. All students gain practical experience through a combination of practical laboratory courses and internships. Students may also pursue an Honors thesis in their senior year.

Career Alternatives. Graduates from this program are prepared to pursue a wide range of careers, including various technical and management positions in agricultural and business enterprises, farming, or consulting; public, private, and non-profit agencies; Cooperative Extension; international development; teaching; or agricultural and environmental journalism and communication services. Graduates are qualified to pursue graduate studies in the natural and agricultural sciences, such as plant biology, genetics, breeding, horticulture, agronomy, biotechnology, ecology, environmental studies, pest management, education, or business management.

## B.S. Major Requirements:

UNITS
Preparatory Subject Matter.............. 57-64
Biological Sciences 1A, 1B, or
2A, 2B..
14-15
Plant Sciences 2
.4
Chemistry 2A, 2B, 2C .......................... 15
Chemistry $8 \mathrm{~A}, 8 \mathrm{~B}$ or $118 \mathrm{~A}, 118 \mathrm{~B}$,
118C
6-12
Physics 1A, 1B or 7A, 7B, 7C ............ 6-12
Mathematics 16A, 16B , or 17A, 17B.... 6-8
Plant Sciences 120
Plant Sciences 21 .................................... 3
Applied Biological Systems Technology 49
or Plant Sciences 49 (recommended) ..... 2-3
Depth Subject Matter ........................ 39-43
Plant Sciences 100A, 100B, 100C .......... 9
Plant Sciences 100AL, 100BL, 100CL....... 6
Plant Sciences 152................................. 4
Evolution and Ecology 100 or Plant Biology

Plant Biology 117 or 147 or Plant Sciences
142 or Environmental Horticulture 160 and
160 L.
4
Two courses chosen from: Plant Pathology
120, Entomology 110, Nematology 100,
Plant Sciences 176
7-9
Plant Sciences 101 .................................. 3
Internship; Plant Sciences 192 .................. 3
Areas of Specialization (choose one)
Crop Production Option
27-33
Complete the two courses in pest
management not completed for the depth

## Courses in Plant Sciences (PLS)

(Formerly courses in Agricultural Management and Rangeland Resources, Agronomy, Crop Science and Management, Plant Biology, Pomology, Range Science and Vegetable Crops.)

## Lower Division

## 1. Agriculture, Nature and Society (3)

Lecture-2 hours; discussion/laboratory - 1 hour
Multiple perspectives and connections between natural sciences, social sciences, and agriculture. Emphasizes agriculture's central position between nature and society and its key role in our search for a productive, lasting and hospitable environment.
Several full-period field trips provide hands-on learning. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 1. (Former Course Agricultural Management and Rangeland Resources 1.) GE credit: SciEng | SE.-I. (I.) Gradziel

## 2. Botany and Physiology of Cultivated

Plants (4)
Lecture -3 hours; discussion/laboratory-3 hours. Prerequisite: high school course in biology and chemistry recommended. A holistic introduction to the underlying botanical and physiological principles of cultivated plants and their response to the environment. Includes concepts behind plant selection, cultivation, and utilization. Laboratories include discussion and interactive demonstrations. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 2. (Former course Agricultural Management and
Rangeland Resources 2.) GE credit: SciEng \| SE,
SL. -I, II. (I, II.) Saltveit, Marrush

## 5. Plants for Garden, Orchard and

## Landscape (2)

Lecture-1 hour; laboratory-3 hours. Prerequisite: for non-majors. Hands-on experience with plants cultivated for food, environmental enhancement and personal satisfaction. Topics include establishing a vegetable garden, pruning and propagation activities, growing flowers and ornamental plants, and the role of plants in human health and well-being. Not open for credit to students who have completed Plant Biology 1 or Plant Sciences 2. (Former course Plant Biology 1.) GE credit: SE. - I, III. (I, III.) Marrush

## 6. Flower Power-Art and Science of

## Flowers and Their Uses (2)

Lecture/discussion-2 hours. Prerequisite: high school biology. Introduction to the art and science of using and growing flowers to harness the power that is represented by their aesthetic beauty. Handling, production, arranging, breeding and marketing of flowers. Emphasis on potted plants and cut-flowers. (P/NP grading only.) - III. (III.) Lieth

## 8. Fruits and Nuts of California and the

 World (3)Lecture-3 hours. Field trip seventh week of quarter. Biological and environmental principles of tree-crop agriculture emphasizing California production. Topics include temperate and subtropical species, biotechnology and genetic improvement, environmental physiology, plant and crop growth, pest and disease control, consumer issues. Not open for credit to students who have completed Plant Sciences 10. (Former course Plant Sciences 10.) GE credit: SciEng.II. (II.) Polito

## 12. Plants and Society (4)

Lecture-3 hours; extensive writing - 3 hours. Prerequisite: high school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies. Not open for credit to students who have complete Plant Biology 12. (Former course Plant Biology 12.) (Same course as Science and Society 12.) GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE. -I, II, III. (I, II, III.) Drakakaki, Fischer, Jasieniuk, Tian

## 14. Introduction to Current Topics in Plant Biology (4)

Discussion - 3 hours; term paper. Introduction to scientific methods and current understanding of genetics, metabolism, and cellular structure in plants, with special emphasis on topics related to societal issues, such as herbal medicines and genetically modified organisms. Designed for students not specializing in biology. Not open for credit to students who have completed Plant Biology 11. GE credit: SciEng,

## Wrt | SE, SL. - Inoue

## 15. Introduction to Sustainable Agriculture

 (4)Lecture -3 hours; laboratory - 3 hours. Multidisciplinary introduction to agricultural sustainability with a natural sciences emphasis. Sustainability concepts and perspectives. Agricultural evolution, history, resources and functions. Diverse agricultural systems and practices and their relative sustainability. Laboratories provide direct experience with selected agricultural practices and systems. GE credit:
SciEng | SE. - III. (III.) Van Horn, Williams

## 21. Application of Computers in Technology

Lecture-2 hours; laboratory/discussion-2 hours.
Prerequisite: high school algebra. Concepts of computing and applications using personal computers, spreadsheets, database management, word processing and communications. Not open for students who have completed Agricultural Management and Rangeland Resources 21 . (Former course Agricultural Management and Rangeland Resources 21.) GE credit: SciEng | SE, VL.-I, II, III. (I, II, III.) Frank

## 49. Organic Crop Production Practices (3)

Lecture-1 hour; discussion - 1 hour; laboratory-3 hours. Principles and practices of organic production of annual crops. Including organic crops, soil, and pest management, cover cropping, composting, seeding, transplanting, irrigation, harvesting and marketing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 49. (Former course Agricultural Management and Rangeland Resources 49 .) (P/NP grading only.) GE credit: SE. -I, III. (I, III.) Van Horn

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by faculty member. May be repeated for credit. (P/NP grading only.)
-I, II, III, IV. (I, II, III, IV.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.)

## Upper Division

## 100A. Metabolic Processes of Cultivated

 Plants (3)Lecture-3 hours. Prerequisite: course 2 or Biological Sciences 1C or consent of instructor. Principles of energy capture and photosynthesis, water use, and nutrient cycling. Conversion of these resources into products (carbohydrates, proteins, lipids, and other chemicals) by plants. Emphasis on the relationships between environmental resources, plant metabolism and plant growth. GE credit: SciEng | SE.-I. (I.) Fischer, Zakharov

## 100AL. Metabolic Processes of Cultivated

 Plants Laboratory (2)Lecture/discussion-3 hours. Prerequisite: course 100A or the equivalent (may be taken concurrently). Techniques and instruments used to study plant metabolic processes, including water relations, respiration, photosynthesis, enzyme kinetics, microscopy, immunochemistry, and nitrogen fixation. Quantitative methods, problem solving, and practical applications are emphasized. GE credit: SciEng | SE. (I.) Blumwald

## 100B. Growth and Yield of Cultivated

 Plants (3)Lecture-3 hours. Prerequisite: course 100A or consent of instructor. Principles of the cellular mechanisms and hormonal regulation underlying plant growth, development, and reproduction. Emphasis on how these processes contribute to the harvestable yield of cultivated plants and can be managed to increase crop productivity and quality. GE credit: SciEng | SE.-II. (II.) Bradford, Saltveit
100BL. Growth and Yield of Cultivated Plants Laboratory (2)
Lecture/discussion-3 hours. Prerequisite: course 100B or equivalent (may be taken concurrently). Laboratory exercises in plant growth and development and their regulation, including photomorphogenesis, plant growth regulators, plant anatomy, seed germination, fruit ripening and senescence. Includes field trips to illustrate relationships to cropping and marketing systems. GE credit:

## SciEng | SE. - (II.) Bradford

## 100C. Environmental Interactions of <br> Cultivated Plants (3)

Lecture-3 hours. Prerequisite: course 100A or consent of instructor. Principles of plant interactions with their physical and biological environments and their acquisition of the resources needed for growth and reproduction. Emphasis on how management practices and environmental conditions affect crop productivity. GE credit: SciEng | SE. - III. (III.) Brown

## 100CL. Environmental Interactions of

## Cultivated Plants Laboratory (2)

Lecture/discussion-3 hours. Prerequisite: course 100C (may be taken concurrently). Techniques and instruments used to study plant interactions with their physical and biological environments, including light responses, transpiration, microclimatology, nutrient availability and utilization, biomass accumulation. Quantitative methods and modeling are emphasized. GE credit: SciEng | SE. - III. (III.) Shackel

## 101. Agriculture and the Environment (3)

Lecture-3 hours. Prerequisite: course 2 or consent of instructor. Interaction between agriculture and the environment. Focus on the interaction between agriculture and the environment to address the principles required to analyze conflict and develop solutions to complex problems facing society. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 101. (Former course Agricultural Management and Rangeland Resources 101.) GE credit: SciEng | SE, SL. II. (II.) Tate
102. California Floristics (5)

Lecture-3 hours; laboratory - 8 hours. Prerequisite: course 2, Biological Sciences 1C, 2C, or equivalent course in Plant Sciences. Survey of the flora of California, emphasizing recognition of important vascular plant families and genera and use of taxonomic keys for species identification. Current understanding of relationships among families. Principles of plant taxonomy and phylogenetic systematics. One Saturday field trip. (Same course as Plant Biology 102.) GE credit: SciEng | SE, VL. - III. (III.) Potter

## 105. Concepts in Pest Management (3)

Lecture-2 hours; laboratory/discussion-3 hours. Prerequisite: Biological Sciences 1C or course 2, Chemistry 8B. Introduction to the ecological principles of integrated pest management, biology of different classes of pests and the types of losses they cause, population assessment, evaluation of advantages and disadvantages of different techniques used for pest management, IPM programs. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 105. (Former course Agricultural Management and Rangeland Resources 105.) GE credit:
SciEng | SE. -I. (I.) Al-Khatib, Flint
110A. Principles of Agronomic Crop Production in Temperate and Tropical

## Systems (3)

Lecture-3 hours. Prerequisite: course in general botany or course 2 recommended. Fundamentals of field crop production in temperate and tropical climates. Resource utilization and economic, political and social problems are considered in relation to technological problems and their influences on agricultural development. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110A. (Former course Agricultural Management and Rangeland Resources 110A.) - (I.) Mitchell

## 110C. Crop Management Systems for

 Vegetable Production (4)Lecture-2 hours; laboratory-3 hours; discussion1 hour. Prerequisite: course 2; course 110A recommended. Horticultural principles applied to production and management systems for vegetable crops. Laboratory and discussion will illustrate efficient field management and resource use practices. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110C. (Former course Agricultural Management and Rangeland Resources 110C.)-I. Mitchell

## 110L. Principles of Agronomy Laboratory

 (1)Laboratory-3 hours. Prerequisite: course 110B (may be taken concurrently). Field-oriented introduction to principles of agronomic crop production. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 110L. (Former course Agricultural Management and Rangeland Resources 110L.) - (I.) Mitchell

## 112. Forage Crop Ecology (3)

Lecture-3 hours. Prerequisite: course 2, Biological Sciences 1C, 2C, or consent of instructor. Forages as a world resource in food production. Ecological principles governing the adaptation, establishment, growth and management of perennial and annual forages, including pastures, rangelands and hay; aspects of forage quality which affect feeding value to livestock. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 112. (Former course Agricultural Management and Rangeland Resources 112.) Offered in alternate years. GE credit:
SciEng | SE.-III. Teuber

## 113. Biological Applications in Fruit Tree Management (2)

Lecture-1 hour; laboratory-3 hours. Prerequisite: course 2, Biological Sciences 1C, 2C or equivalent. Physiology, growth, development and environmental requirements of fruit trees and the cultural practices used to maintain them. Emphasis on the application of biological principles in the culture of commercially important temperate zone fruit tree species. Not
open for credit to students that have completed Plant Biology 173. (Former course Plant Biology 173.) GE credit: SciEng | SE.

## 114. Biological Applications in Fruit

## Production (2)

Lecture-1 hour; laboratory-3 hours. Prerequisite: course 2, Biological Sciences 1C or 2C; course 113. Reproductive biology of tree crop species. Biological principles of fruit production, tree nutrition and orchard management for optimizing cropping. Laboratories emphasize hands-on work with orchard tree systems that are done specifically to produce the crop. Not open for credit to students who have completed Plant Biology 174. (Former course Plant Biology 174.) GE credit: SciEng | SE. - III. (III.) DeJong

## 120. Applied Statistics in Agricultural

## Science (4)

Lecture-3 hours; discussion/laboratory-3 hours. Prerequisite: upper division standing. Application of statistical methods to design and analysis of research trials for plant, animal, behavioral, nutritional, and consumer sciences. Basic concepts and statistical methods are presented in lectures, laboratories emphasize data processing techniques, problem solving, and interpretation in specialized fields. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 120. (Former course Agricultural Management and Rangeland Resources 120.) GE credit:
SciEng | QL. - I. (I.) Laca, Medrano, Teuber
130. Rangelands: Ecology, Conservation

## and Restoration (3)

Lecture-3 hours. Prerequisite: Biological Sciences 1C; introductory ecology course and junior standing recommended. Introduction to the ecological principles and processes important for an understanding of the dynamics of range ecosystems. Emphasis on ecological and evolutionary concepts underlying management strategies for conserving biological diversity and environmental quality in rangelands Offered in alternate years. GE credit: SE, Wrt. Not open for credit to students who have completed Agricultural Management and Rangeland Resources
130. (Former course Agricultural Management and Rangeland Resources 130.) GE credit: SE. - (II.) Tate
131. Identification and Ecology of Grasses (2)

Lecture-7.5 hours; laboratory-20 hours; discus-sion-5 hours. Prerequisite: Biological Sciences 1C or course 2; Plant Biology 102 and junior standing recommended. Taxonomy and identification of western grasses. Development of skills in using plant identification keys. Ecology and evolution of grasses in grazing ecosystems. Given the week following spring quarter. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 131. (Former course Agricultural Management and Rangeland Resources 131.) Offered in alternate years. GE credit: SciEng | SE, VL.

## 135. Ecology and Community Structure of

 Grassland and Savannah Herbivores (3)Lecture -3 hours. Prerequisite: Biological Sciences 1A or 1B and course 2, or Biological Sciences 1C; general ecology course (Environmental Science and Policy 100) recommended. Feeding ecology of grassland herbivores and its importance in evolution of herbivore communities and social systems. Optimal foraging, interspecific interactions, and primary productivity are considered as factors structuring natural and managed grassland and savannah systems. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 135. (Former course Agricultural Management and Rangeland Resources 135.)

## 140. Culinary and Medicinal Herbs (3)

Lecture/discussion-3 hours. Prerequisite: Plant Sciences 2, Biological Sciences 1C, or Biological Sciences 2C. Growth, identification, cultivation and use of common culinary and medicinal herbs; herbal plant families; effects of climate and soils on herbs; herbal medicine; ecology and geography of herbs; herbs garden design; secondary chemistry of active compounds. (Same course as Environmental Science
and Management 140.) Not open for credit to students who have successfully completed Environmental and Resource Science 140 or Plant Biology 140. (Formerly Environmental and Resource Science or Plant Biology 140.) GE credit: SciEng | SE.

## 141. Ethnobotany (4)

Lecture - 3 hours; laboratory/discussion-2 hours. Prerequisite: course 2, Biological Sciences 1C or 2C. Relationships and interactions between plants and people, including human perceptions, management, and uses of plants, influences of plants on human cultures, and effects of human activity on plant ecology and evolution. Concepts, questions, methods, and ethical considerations in ethnobotanical research. Not open for credit to students who have completed Plant Biology 141. (Former course Plant Biology 141.) Offered in alternate years. GE credit: SciEng or SocSci, Wrt | OL, SE or SS, WE.II. Potter

## 142. Ecology of Crop Systems (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C; Mathematics 16A or Physics 1A, or consent of instructor. Ecological processes governing the structure and behavior of managed ecosystems. Emphasis on mechanistic and systems views of the physical environment, photosynthetic productivity, competition, adaptation, nutrient cycling, energy relations and contemporary issues such as climate change. Not open for credit to students who have completed Plant Biology 142. (Former course Plant Biology 142.) GE credit: SciEng.

## 144. Trees and Forests (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C. Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry. (Same course as Environmental Science and Management 144.) Not open for credit to students who have completed Plant Biology 144 or Environmental Horticulture 144 or Environmental and Resource Science 144. (Former course Plant Biology/Environmental Horticulture/Environmental and Resource Science 144.) GE credit: SciEng | SE,
VL.-I. (I.) Dahlgren, Latimer, Zwieniecki
145. Sierra Nevada Flora (3)

Lecture/laboratory-3 hours; fieldwork - 5 hours. Prerequisite: Plant Biology 102 or 108 or Evolution and Ecology 121 or Environmental Horticulture 105. An introduction to the flora of the Sierra Nevada. Basic plant identification, the principal plant communities and species of the Sierra Nevada. Class offered the first two weeks in July in the Sierra Nevada. Offered in alternate years. Not open for credit to students who have completed Plant Biology 145. (Former course Plant Biology 145.)
147. California Plant Communities (3) Lecture/discussion-3 hours. Prerequisite: course 2 or Biological Sciences 2C. Ecology, distribution, and species of California's plant communities. Environmental forces that determine these communities, the threats they face, and their conservation and restoration opportunities. Not open for credit to student who have completed Plant Biology 147. (Former course Plant Biology 147.) GE credit: SciEng \| SE, VL. - III. (III.) Young

## 147L. California Plant Communities Field

 Study (1)Discussion/laboratory-3 hours. Prerequisite: course 2 or Biological Sciences 2C, and concurrent or previous enrollment in course 147. Visits to many of northern California's plant communities, from the north coast to the Central Valley to the Sierras. Discussion of community ecology and hands-on identification of species. Two Saturday and two three-day field trips required. Not open for credit to students who have completed Plant Biology 147. (Former course Plant Biology 147.) GE credit: SciEng | SE, VL. - III. (III.) Young

## 150. Sustainability and Agroecosystem Management (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Soil Science 10, Chemistry 2A, and course 2, Biological Sciences 1C or 2C. Interdisciplinary analysis of agricultural production and food systems with primary emphasis on biophysical processes. General concepts governing the functioning of temperate and tropical agroecosystems in relation to resource availability, ecological sustainability, and socio-economic viability. Comparative ecological analyses of agroecosystems. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 150. (Former course Agricultural Management and Rangeland Resources 150.) GE credit: SciEng | OL, SE, SL. - III. (III.) Six

## 152. Plant Genetics (4)

Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: Biological Sciences 1A or 2A or consent of instructor. Basic principles of transmission genetics, cytogenetics, population and quantitative genetics, and molecular genetics. Practical aspects of genetic crosses and analysis of segregating populations. Not open to students who have completed Plant Biology 152. (Former course Plant Biology 152.) GE credit: SciEng | SE. -I. (I.) Beckles

## 153. Plant, Cell, Tissue and Organ Culture

 (4)Lecture-2 hours; discussion-1 hour; laboratory-3 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C. Basic and applied aspects of plant tissue culture including media preparation, micropropagation, organogenesis, embryogenesis, anther culture, protoplast culture and transformation. Not open for credit to students who have completed Plant Biology 153. (Former course Plant Biology 153.) GE credit: SciEng | SE.
154. Introduction to Plant Breeding (4)

Lecture -3 hours; laboratory -3 hours. Prerequisite: course 152, Biological Sciences 101 or consent of instructor. The principles, methods and applications of plant breeding and genetics to the improvement of crop plants. Illustration of how plant breeding is a dynamic, multidisciplinary, constantly-evolving science. Laboratory emphasizes hands-on experience in the basics of breeding through experiments. Not open for credit to students who have completed Plant Biology 154. (Former course Plant Biology 154.) GE credit: SciEng | SE. -II. (II.) St. Clair
157. Physiology of Environmental Stresses in Plants (4)
Lecture-2 hours; discussion-2 hours. Prerequisite: course 100C or Plant Biology 111 or 112 or Environmental Horticulture 102 or Viticulture and Enology 110. Stress concepts and principles; molecular, physiological, developmental and morphological characteristics enabling plants to avoid or tolerate environmental stresses; stress acclimation and adaptation processes; responses of wild and cultivated species to drought, flooding, nutrient deficiencies, salinity, toxic ions, extreme temperatures, etc. Not open for credit to students who have completed Plant Biology 157. (Former course Plant Biology 157.) GE credit: SciEng | SE.

## 158. Mineral Nutrition of Plants (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: course 100A or Plant Biology 111 or Environmental Horticulture 102 or Viticulture and Enology 110. Evolution and scope of plant nutrition; essential elements; mechanisms of absorption and membrane transporters; translocation and allocation processes; mineral metabolism; deficiencies and toxicities; genetic variation in plant nutrition; applications to management and understanding ecological effects of nutrient availability or deficiency. Not open for credit to students who have completed Plant Biology 158. (Former course Plant Biology 158.) GE credit: SciEng | SE.-III. Brown

## 160. Agroforestry: Global and Local

 Perspectives (3)Lecture/discussion-3 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C; Plant Sciences 142 or 150 or Biological Sciences 2 B or a
general ecology course. Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have taken previously taken Agricultural Management and Rangeland Resources 160. (Former course Agricultural Management and Rangeland Resources
160.) (Same course as International Agricultural Development 160.) Offered in alternate years. GE credit: SciEng | SE.-I. Gradziel

## 162. Urban Ecology (3)

Lecture/discussion-3 hours. Prerequisite: a course in general or plant ecology (course 142, Plant Biology 117 Environmental Science and Policy 100, or Evolution and Ecology 101). Application of fundamental concepts and approaches in landscape and ecosystem ecology to urban ecosystems. Ecological and social drivers and responses. Landscape heterogeneity, nutrient dynamics, invasive species, altered hydrology and climate, and pollution. Discussion of primary literature. GE credit: SciEng | SE, SL. - II. (II.) Cadenasso

## 163. Ecosystem and Landscape Ecology (4)

 Lecture/discussion-4 hours. Prerequisite: course in general, plant, or soil ecology; Evolution and Ecology 117, Plant Biology 117, Environmental Science and Policy 100, Evolution and Ecology 101, Soil Science 112. Integration of concepts to understand and manage ecosystems in a complex and changing world. Emphasis on interactions among biotic, abiotic and human factors and changes over space/ time. Local to global controls over water, carbon and nutrients across ecosystems/landscapes. Not open for credit to students who have completed Ecology 201. - II. (II.) Cadenasso, Eviner170A. Fruit and Nut Cropping Systems (2) Lecture-1 hour; laboratory-3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major pomological crops, analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 170A. (Former course Agricultural Management and Rangeland Resources 170A.) Offered in alternate years. GE credit: SciEng | SE. - (I.) Gradziel
170B. Fruit and Nut Cropping Systems (2) Lecture-1 hour; laboratory-3 hours. Prerequisite: course 2, Biological Sciences 1C, or consent of instructor. Overview of production and handling systems of major pomological crops, including analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed Agricultural Management and Rangeland Resources 170B. (Former course Agricultural Management and Rangeland Resources 170B.) Offered in alternate years. GE credit: SciEng | SE.-(III.) Gradziel

## 171. Principles and Practices of Plant

 Propagation (4)Lecture-2 hours; discussion - 1 hour; laboratory - 3 hours. Prerequisite: course 2, Biological Sciences 1C or 2C. Principles and practices of propagating plants covering anatomical, physiological, and practical aspects. Not open for credit to students who have completed Plant Biology 171. (Former course Plant Biology 171.) GE credit: SciEng | SE. - III. (III.) Burger

## 172. Postharvest Physiology and Technology (4)

Lecture-3 hours; laboratory/discussion-2 hours. Prerequisite: general plant science background (e.g., courses 2, 12); course 196 recommended. Overview of physiological processes related to maturation and senescence of plant products and their responses to postharvest stresses. Targeted approaches and technologies to maintain product quality and limit postharvest disorders. Not open for credit to students who have completed Plant Biology 172. (Former course Plant Biology 172.) GE credit: SciEng | SE.-I. (I.) Saltveit, Zakharov

## 173. Molecular and Cellular Aspects of

 Postharvest Biology (3)Lecture/discussion-3 hours. Prerequisite: course 2, Biological Sciences 1C, 2C or equivalent. Basic concepts and current knowledge of issues relevant to postharvest biology. Mechanisms of fruit ripening, senescence, programmed cell death. Metabolism and functions of phytohormones, carbohydrates, lipids, pigments, flavor compounds, and phytonutrients at molecular and cellular levels. GE credit:
SciEng | SE. - (III.) Zakharov

## 174. Microbiology and Safety of Fresh Fruits and Vegetables (3)

Lecture-3 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C or equivalent. Overview of microorganisms on fresh produce, pre- and postharvest factors influencing risk of microbial contamination, attachment of microorganisms to produce, multiplication during postharvest handling and storage, and methods of detection. Mock outbreak trial and presentation of science-based forensic discovery. GE credit: SciEng | SE. - (I.)

## 176. Introduction to Weed Science (4)

Lecture-2 hours; laboratory/discussion - 4 hours. Prerequisite: course 2 or Biological Sciences 1C or 2C. Weed biology and ecology, methods of weed management, biological control, herbicides and herbicide resistance. Weed control in managed and natural ecosystems; invasive species. Laws and regulations. Application of herbicides. Sight and soft-ware-assisted identification of common weeds. Not open for credit to students who have completed Plant Biology 176. (Former course Plant Biology 176.) GE credit: SciEng | VL, SE. - II. (II.) DiTomaso, Fischer

## 178. Biology and Management of Aquatic Plants (3)

Lecture-3 hours. Prerequisite: course 2, Biological Sciences 1C or 2C; Chemistry $8 B$ or $118 B$; course 100C, Plant Biology 111, Environmental Horticulture 102, or Hydrologic Science 122 recommended. Brief survey of common and invasive fresh water plants and macroalgae, their reproductive modes, physiology, growth (photosynthesis, nutrient utilization), development (hormonal interactions), ecology, modes and impacts of invasion, and management. Two Saturday field trips required. Offered in alternate years. Not open for credit to students who have completed former course Plant Biology 178. (Former course Plant Biology 178.) GE credit: SciEng | SE.-I. Anderson

## 188. Undergraduate Research Proposal (3)

Lecture/discussion-3 hours. Prerequisite: upper division standing. Preparation and review of a scientific proposal. Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation. (Same course as Biotechnology 188.) GE credit: SciEng, Wrt | OL, SE, WE. - III. (III.) Kliebenstein

## 189L. Laboratory Research in Plant

## Sciences (2-5)

Laboratory-3-12 hours; discussion - 1 hour. Prereqvisite: course 188 and consent of instructor. Formulating experimental approaches to current questions in Plant Sciences; performance of proposed experiments. May be repeated up to 12 units for credit. (P/NP grading only.) -1, II, III. (I, II, III.)

## 190. Seminar on Alternatives in Agriculture

 (2)Seminar-2 hours. Prerequisite: upper division standing. Seminar on topics related to alternative theories, practices and systems of agriculture and the relationship of agriculture to the environment and society. Scientific, technological, social, political and economic perspectives. May be repeated for credit. (Former course Agricultural Management and Rangeland Resources 190.) (P/NP grading only.)
GE credit: SE.-II. (II.) Van Horn

190C. Research Group Conference (1)
Discussion-1 hour. Prerequisite: advanced standing; consent of instructor. Weekly conference on research problems, progress and techniques in the plant sciences. May be repeated for credit. (P/NP grading only.) -I , II, III. (II, III, III.)
192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by a faculty member. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.)

## 194H. Senior Honors Thesis (2-6)

Independent study. Prerequisite: senior standing; overall GPA of 3.250 or higher and consent of master adviser. Two or three successive quarters of guided research on a subject of special interest to the student. (P/NP grading only; deferred grading only, pending completion of thesis.) GE credit: SE, WE.

## 196. Postharvest Technology of <br> \section*{Horticultural Crops (3)}

Lecture/discussion-45 hours; fieldwork-45 hours. Prerequisite: upper division or graduate student standing. Intensive study of postharvest considerations and current procedures and challenges in postharvest handling for fruits, nuts, vegetables, and ornamentals in California. Scheduled first two weeks immediately following last day of spring quarter. Not open for credit to students who have completed Plant Biology 196. (Former course Plant Biology 196.) (P/ NP grading only.) GE credit: SE. - III. (III.) Mitcham

## 197T. Tutoring in Plant Sciences (1-5)

Tutorial-1-5 hours. Prerequisite: upper division standing, completion of course being tutored or the equivalent, consent of instructor. Leading small voluntary discussion or lab groups affiliated with one of the department's regular courses. May be repeated for up to eight units of credit. (P/NP grading only.)

## 198. Directed Group Study (1-5)

(P/NP grading only.)-I, II, III, IV. (I, II, III, IV.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.) - I, II, III, IV. (I, II, III, IV.)

## Graduate

205. Experimental Design and Analysis (5) Lecture-3 hours; discussion/laboratory-2 hours. Prerequisite: course 120 or equivalent. Introduction to the research process and statistical methods to plan, conduct and interpret experiments. Not open for credit to students who have completed Agronomy 205. (Former course Agronomy 205.) - II. (II.) Dubcovsky
206. Applied Multivariate Modeling in Agricultural and Environmental Sciences (4) Lecture-3 hours; discussion-1 hour. Prerequisite: one of course 120, Statistics 106, 108, course 205 or equivalent. Multivariate linear and nonlinear models. Model selection and parameter estimation. Anal$y$ sis of manipulative and observational
agroecological experiments. Discriminant, principal component, and path analyses. Logistic and biased regression. Bootstrapping. Exercises based on actual research by UC Davis students. Not open for credit to students who have complete Agronomy 206. (Former course Agronomy 206.)-I. (1.) Laca

## 21 1. Principles and Practices of HPLC (2)

 Lecture-1 hour; laboratory - 3 hours. Prerequisite: undergraduate physics and chemistry; Biological Sciences 102, 103 recommended. Principles and theory of HPLC involving various modes of separation and detection. Optimization of separation using isocratic and gradient elution. Develop practical knowledge about the use, maintenance and troubleshooting of HPLC equipment, including HPLC columns. Development of new HPLC methods. Not open for credit to students who have completed Agronomy 211. (Former course Agronomy 211.)
## 212. Postharvest Biology and

## Biotechnology of Fruits and Nuts (3)

Lecture-3 hours. Prerequisite: course 172. Review of postharvest biology of fruits and nuts and biotechnological approaches to address postharvest challenges. Morphology, biology and postharvest handling of fruits and nuts are presented along with current research, including biotechnology, and discussion of future research needs and approaches. Offered in alternate years. Not open for credit to students who have completed Pomology 212. - (III.) Crisosto, Mitcham, Zakharov

## 213. Postharvest Physiology of Vegetables

 (3)Lecture-2 hours; discussion - 1 hour. Prerequisite: course 172 or course 100B or Plant Biology 112. Comparative physiology of harvest vegetables; emphasis on maturation, senescence, compositional changes, physiological disorders and effects of environmental factors. Concepts and research procedures. Not open for credit to students who have completed Vegetable Crops 212. (Former course Vegetable Crops 212.) Offered in alternate years. (III.) Saltveit

## 220. Genomics and Biotechnology of Plant

 Improvement (3)Lecture-3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. Not open for credit to students who have completed Vegetable Crops 220. (Former course Vegetable Crops 220.) (Same course as Genetics 220.)-I. (I.) Neale
221. Genomics and Breeding of Vegetable Crops (3)
Lecture-3 hours. Prerequisite: Biological Sciences 101 or equivalent. Preview of genome structure, mapping, gene tagging and development of other genetic resources applied to improvement of major vegetables. For graduate students contemplating a career in modern vegetable breeding and biotechnology. Not open for credit to students who have completed Vegetable Crops 221. (Former course Vegetable Crops 221 .)

## 222. Advanced Plant Breeding (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: courses 154 and 205; Genetics 201D or Animal Genetics 107 recommended. Philosophy, methods, and problems in developing improved plant species. Topics include: inbreeding, heterosis, progeny testing, breeding methodology, index selection, germplasm conservation, and breeding for stress resistance. Laboratories include tours of breeding facilities and calculation and interpretation of quantitative data. Offered in alternate years. - (III.) Teuber

## 290. Seminar (1-2)

Seminar-1-2 hours. Topics of current interest related to Plant Sciences. (S/U grading only.) -I, II, III. (I, II, III.)

## 290C. Research Conference (1)

Discussion - 1 hour. Prerequisite: consent of instructor. (S/U grading only.) -I, II, III. (I, II, III.)

## 297T. Tutoring in Plant Science (1-5)

Tutoring - 1-5 hours. Prerequisite: graduate standing; consent of instructor; completion of course to be tutored or the equivalent. Designed for graduate students who desire teaching experience but are not teaching assistants. May be repeated for credit for a total of five units. Same course may not be tutored more than once. ( $S / U$ grading only.)
298. Group Study (1-5)
299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)-I, II, III, IV. (I, II, III, IV.)

## Professional <br> 396. Teaching Assistant Training Practicum (1-4) <br> Prerequisite: consent of instructor; graduate standing. (S/U grading only.) $-I$, II, III, IV. (I, II, III, IV.)

## Plastic Surgery

## Faculty

James F. Adams, Ph.D., Professor
Josephine T. Andrews, Ph.D., Associate Professor Cheryl L. Boudreau, Ph.D, Associate Professor
Amber Boydston, Ph.D., Assistant Professor
Erik Engstrom, Ph.D., Associate Professor
John B. Gates, Ph.D., Lecturer
Benjamin Highton, Ph.D., Professor
Stuart L. Hill, Ph.D., Lecturer
Robert Huckfeldt, Ph.D., Professor
Bradford S. Jones, Ph.D., Associate Professor
Kyle Joyce, Ph.D., Assistant Professor
Daniel Y. Kono, Ph.D., Professor
Scott MacKenzie, Ph.D., Assistant Professor Zeev Maoz, Ph.D., Professor
Heather McKibbens, Ph.D., Assistant Professor Jeannette Money, Ph.D., Associate Professor Gabriella R. Montinola, Ph.D., Associate Professor
Miroslav Nincic, Ph.D., Professor
Ethan Scheiner, Ph.D., Professor
John T. Scott, Ph.D., Professor
Academic Senate Distinguished Teaching Award
Matthew S. Shugart, Ph. D., Professor
Walter J. Stone, Ph.D., Professor
Robert S. Taylor, Ph.D., Associate Professor

## Emeriti Faculty

Larry Berman, Ph.D., Professor Emeritus
Edmond Costantini, Ph.D., Professor Emeritus
Alexander J. Groth, Ph.D., Professor Emeritus
John R. Owens, Ph.D., Professor Emeritus
Randolph M. Siverson, Ph.D., Research Professor and Professor Emeritus
Larry L. Wade, Ph.D., Professor Emeritus
Geoffrey A. Wandesforde-Smith, Ph.D., Professor Emeritus
Paul E. Zinner, Ph.D., Professor Emeritus

## The Major Program

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.
The Program. The Department of Political Science offers two major programs: political science and political science-public service. The political science major aims to provide the student with a broad
understanding of political concepts, political institutions, political behavior, and political processes. The political science-public service major is for students who desire opportunities for practical hands-on experience in their major. It differs in particular from the political science major in its internship requirement and its focus on the American political system.
Internships and Career Alternatives. Both the proximity of UC Davis to the state capitol and the programs offered by the UC Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

## Political Science

## A.B. Major Requirements:

Preparatory Subject Matter. 28
Three lower division Political Science courses
from: 1, 2, 3, 4
12
Political Science 51 (required course) ....... 4
Statistics 13, 32, 102 (or equivalent) ....... 4
One course from: Economics 1A, Economics
1B or Philosophy 5................................ 4
One course from: History 4C, 8, 9A, 10C,
$15,17 \mathrm{~A}$ or 17 B
.4
Depth Subject Matter .44-45
Four courses in one of the fields of concentration listed below 16
Three courses in another field of
concentration listed below...................... 12
Two courses in another field of concentration
listed below............................................ 8
Two other upper division courses in Political
Science. Only five units of Political Science
192 may be counted toward the depth
subject matter. ..8-9

## fields of Concentration

American Politics (courses with Political
Science 1 as a prerequisite): Political Science
100, 102, 104-109, 150-155, 160, 162-
$166,168,170-172,174-176,180,183$,
187, 195, 196A.
Comparative Politics (courses with Political
Science 2 as a prerequisite): Political Science
126, 140A-140C, 142A-142B, 143A-143B,
144A-144B, 146A-146B, 147A-147D,
148A-148C, 179, 196B.
International Relations (courses with Political
Science 3 as a prerequisite): Political Science
120-124, 126, 129, 130-132, 134-137,
139, 190, 196C, International Relations 131.

Political Theory (courses with Political Science 4 as a prerequisite): Political Science 110,
112-117, $118 \mathrm{~A}-118 \mathrm{C}, 119,187,196 \mathrm{D}$
Total Units for the Major .72-73
Political Science-Public Service
A.B. Major Requirements:

UNITS
Preparatory Subject Matter..................... 20
Political Science 1 .................................... 4
Two courses from: Political Science 2, 3, 4, 5
or 7 ..................................................... 8
Statistics 13 (or equivalent) ..................... 4
Political Science 51 (required course) ....... 4
Recommended: Economics 1A-1B
Depth Subject Matter .44-46
Core program ..................................... 1212

Three courses chosen from Political Science 100, 102, 104, 105, 106, 108, 109, 113, 114, 180.
Internship, Political Science 192A, 192B, or 192W.
... 6
Research paper, Political Science 193.... 2-4
Fields of concentration..
Select six upper division courses from two or three fields of concentration listed below with at least two courses in each field selected; at least 16 of the units must be in political science; Core Program courses may not be counted toward this requirement.

## Fields of Concentration

Field (1) Policy Process: Political Science 100, 102, 104, 105, 106, 108, 109, 140A,
$160,162,163,164,165,166,168,170$,
171, 172, 174, 175, 180, 183, 187, 195; Economics 130, 131
Field (2) Policy Interpretation (public/pre-
law): Political Science 119, 150, 151, 152,
153, 155
Field (3) State \& Local Policy: Political Science
100, 102, 104; Environmental Science and
Policy 173; Sociology 143A
Field (4) Foreign Policy: Political Science
122, 130, 131, 132, 134, 139
Field (5) Environmental Policy: Political
Science 107; Environmental Science and
Policy 160, 161, 162, 166, 168A, 168B,
169, 171, 172, 173, 179
Field (6) Economic Policy: Economics 100,
130, 131, 151A, 151B
Field (7) Social Policy: Sociology 104, 124,
141, 150, 151, 154, 155, 175, 181
Field (8) Policy Analysis Tools: Economics
102, 140; Political Science 114
Total Units for the Major $\qquad$
Major Advisers. Consult Department office.

## Minor Program Requirements:

Students electing a minor in Political Science may choose one of two plans.

Political Science
Six upper division courses: Three courses in one of the fields of concentration and three courses outside of that field.
Public Affairs Internship Program. This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 1273 Social Sciences and Humanities Building.
Graduate Study. The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.
Graduate Adviser. Consult Graduate Program Coordinator office.
American History and Institutions. This University requirement may be satisfied by passing any one of the following Political Science courses: 1,5, 100, 102, 104, 105, 106, 108, 109, 113, 130, $131,160,163$; see also under University requirements.

## Courses in Political Science (POL) Lower Division

1. American National Government (4)

Lecture-3 hours; discussion-1 hour. Survey of American national government, including the constitutional system, political culture, parties, elections, the presidency, Congress, and the courts. GE credit: SocSci, Wrt | ACGH, SS, WE.
2. Introduction to Comparative Politics (4)

Lecture-3 hours; discussion - 1 hour. Introduction to basic concepts in political analysis and application of them in comparative studies of selected countries. Coverage is given to cultural and other informal dimensions of politics as well as to more formal political and governmental structures. GE credit: SocSci, Wrt \| SS, WC, WE.

## 3. International Relations (4)

Lecture-3 hours; discussion - 1 hour. International conflict and cooperation, including the Cold War, nuclear weapons, and new techniques for understanding international politics. GE credit: SocSci, SocSci, Wrt \| SS, WC, WE.

## 4. Basic Concepts in Political Theory (4)

Lecture-3 hours; discussion - 1 hour. Analysis of such concepts as the individual, community, liberty, equality, justice, and natural law as developed in the works of the major political philosophers. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.

## 5. Contemporary Problems of the American Political System (4)

Lecture-3 hours; discussion - 1 hour. In-depth treatment of selected problems and issues of American politics, governmental institutions, and policies. GE credit: SocSci, Wrt \| ACGH, SS, WE.
7. Contemporary Issues in Law and Politics (4)

Seminar-4 hours. A seminar which focuses on the political dimensions of American law and institutions. Examines the role of courts in resolving contemporary issues of law and politics including abortion, capital punishment, and civil rights. Limited enrollment. Open to students having no more than 40.1 units. GE credit: SocSci, Wrt | ACGH, SS, WE.

## 51. Scientific Study of Politics (4)

Lecture-3 hours; discussion - 1 hour. Introduction to the basic principles of the scientific study of politics. Research design and empirical analysis of data with applications to different methodological approaches and different substantive areas in political science. GE credit: ArtHum or SocSci | AH or SS, QL, SE, VL, WE.
90X. Lower Division Seminar (4)
Seminar-4 hours. Prerequisite: lower division standing and consent of instructor. Examines fundamental issues and concepts that shape the study and practice of politics. Students will read, discuss and write about some of the most significant texts in political science in order to develop a foundation for the study of politics. Limited enrollment.

## 99. Special Study for Undergraduates (1-5)

 Prerequisite: consent of instructor. (P/NP grading only.)
## Upper Division

## 100. Local Government and Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. Politics and government of local communities in the United States, including cities, counties and special districts. Emphasizes sources and varieties of community conflict, legislative and executive patterns, expertise, decision making and the politics of structure. Observation of local governing boards. Offered irregularly. GE credit: SocSci, Wrt | ACGH, SS, WE.

## 102. Urban Public Policy (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 1, upper division standing in Political Science or consent of instructor. Political and economic relationships among central cities, suburbs, and regional, state, and federal governments. Focuses upon policy areas such as poverty, transportation, welfare, and housing, and upon who governs and who benefits from the policies in these areas. GE credit: SocSci, Wrt | ACGH, DD, QL, SS, WE.
104. California State Government and Politics (4)
Lecture-3 hours; term paper or discussion -1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. The California political system. Political culture, constitution, elections and parties, direct democracy, legislature, governor, executive branch, courts, finances, state-local relations and policy issues. Offered irregularly. GE credit: SocSci, Wrt \| ACGH, SS, WE.

## 105. The Legislative Process (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1. The legislative process with emphasis on the United States Congress; legislative organization and procedures, legislative leadership and policy making, legislators and constituents, relations between Congress and other agencies. GE credit: SocSci, Wrt | ACGH, SS, WE.

## 106. The Presidency (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1. The American presidencies origins and development; presidential power and influence as manifest in relationships with Congress, courts, parties, and the public in the formulation and administration of foreign and domestic policy; nominations, campaigns, and elections. GE credit:
SocSci, Wrt | ACGH, SS, WE.

## 107. Environmental Politics and

## Administration (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or consent of instructor. Introduction to the environment as a political issue in the United States and to the development of administrative mechanisms for handling environmental problems. Changing role of Congress, the presidency, the bureaucracy, and the courts in environmental policy formulation and implementation. GE credit: SocSci, Wrt | ACGH, QL, SS, WE.
108. Policy Making in the Public Sector (4) Lecture - 3 hours; term paper or discussion - 1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. Theoretical rationale for governmental activity, program evaluation, PPBS, positive theories of policy making, the quantitative study of policy determinants, implementation, and proposals for improved decision making. Offered irregularly. GE credit: SocSci, Wrt | ACGH, QL, SS, WE.

## 109. Public Policy and the Governmental

## Process (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1. The processes of formulating public policy, including individual and collective decision making, political exchange, competition, bargaining, coalition formation and the allocation of public goods, resources and opportunities. GE credit: SocSci, Wrt \| ACGH, QL, SS, WE.

## 110. The Strategy of Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Introduction to game theory. Explanation of the behavior of individuals in strategic interaction. Rational and behavioral approaches. Applications to political science and other fields. GE credit: SocSci, Wrt \| QL, SS, WE.
112. Contemporary Democratic Theory (4) Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 4. Major contemporary attempts to reformulate traditional democratic theory, attempts to replace traditional theory by conceptual models derived from modern social science findings. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE.

## 113. American Political Thought (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 4. Origins and nature of American political thought. Principles of American thought as they emerge from the founding period to the present. GE credit: ArtHum or SocSci, Wrt | ACGH, AH or SS, WE.

## 114. Quantitative Analysis of Political Data

 (4)Lecture-3 hours; term paper or discussion-1 hour. Logic and methods of analyzing quantitative political data. Topics covered include central tendency, probability, correlation, and non-parametric statistics.
Particular emphasis will be placed on understanding the use of statistics in political science research. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt \| AH or SS or SE, QL, VL, WE.

## 115. Medieval Political Thought (4)

Lecture-3 hours; term paper. Prerequisite: course 118A. Examination of the ideas central to medieval political thinking. Emphasis will be upon the thoughts of the major political thinkers of the period, rather than upon political history. GE credit: ArtHum or SocSci, Wrt \| AH or SS, WE.
116. Foundations of Political Thought (4) Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 4. Analysis and evaluation of the seminal works of a major political philosopher or of a major problem in political philosophy. May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: ArtHum or SocSci, Wrt \| AH or SS, WC, WE.

## 117. Topics in the History of Political

## Thought (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 4. The political thought of a specific historical period. Topics may include: Ancient Athens, the Italian Renaissance, the Enlightenment, or Nineteenth Century Germany. May be repeated once for credit. GE credit: SocSci, Wrt \| SS, WE.
118A. History of Political Theory: Ancient (4)

Lecture - 3 hours; term paper or discussion - 1 hour Prerequisite: course 4. Critical analyses of classical and medieval political philosophers such as Plato, Aristotle, Cicero and St. Thomas. GE credit: ArtHum or SocSci, Wrt \| AH or SS, WC, WE.
118B. History of Political Theory: Early

## Modern (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 4. Critical analyses of the works of late modern political philosophers such as Rousseau, Kant, Hegel, Tocqueville, Mill, Marx and Nietzsche. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.
118C. History of Political Theory: Late

## Modern (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 4. Critical analyses of the works of late modern political philosophers such as Rousseau, Kant, Hegel, Tocqueville, Mill, Marx and Nietzsche. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.
119. Contemporary Political Thought (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 4. Contemporary political thought from the end of the nineteenth century to the present. Emphasis upon an individual philosopher, concept, or philosophical movement; e.g.,
Nietzsche, Continental political thought, Rawls and critics, theories of distributive justice, feminist theory. Offered irregularly. GE credit: ArtHum or SocSci, Wrt \| AH or SS, WC, WE.
120. Theories of International Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 3, upper division standing or consent of instructor. Major contemporary approaches to the study of international politics, including balance of power, game theory, MarxistLeninist theory, systems theory, and decision-making analysis. GE credit: SocSci, Wrt \| SS, WE.

## 121. Scientific Study of War (4)

Lecture -3 hours; term paper or discussion - 1 hour. Prerequisite: course 3; course 51 or Statistics 13 with upper division standing. Restricted to upper division standing. An analysis of political processes involved in the initiation, conduct and termination of modern interstate warfare. GE credit: SocSci,
Wrt \| QL, SS, WE.
122. International Law (4)

Lecture -3 hours; term paper or discussion - 1 hour. Prerequisite: course 3 . Selected topics in international law; territory, sovereign immunity, responsibility, the peaceful settlement or nonsettlement of international disputes. GE credit: SocSci, Wrt | SS, WE.
123. The Politics of Interdependence (4)

Llecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 3, upper division standing or consent of instructor. In the past several decades, growing economic interdependence has generated new problems in international relations. Course deals with difficulties in managing complex interdependence and its implication on national policies and politics. GE credit: SocSci, Wrt | SS, WE.
124. The Politics of Global Inequality (4) Lecture-3 hours; term paper or discussion_1 hour. Prerequisite: course 3, upper division standing; course 123 recommended. Analysis of current economic and political international relations resulting from a long standing division of the global system into rich and poor regions. GE credit: SocSci, Div, Wrt | SS, WC, WE.

## 126. Ethnic Self-Determination and International Conflict (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 3. Compares the claims of the state and ethnic peoples in countries undergoing internal conflicts; e.g., South Africa, Northern Ireland. Analyzes the role of the international community in facilitating the peaceful resolution of conflicts. GE credit: SocSci, Div, Wrt \| SS, WC, WE.

## 129. Special Studies in International Politics

 (4)Lecture-3 hours; term paper. Prerequisite: course 3, upper division standing. Intensive examination of one or more special problems in international politics. May be repeated one time for credit when different topic is studied. GE credit: SocSci, Wrt \| SS, WE.-II.
130. Recent U.S. Foreign Policy (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 3, upper division standing or consent of instructor. Broad survey of the development of U.S. foreign policy in twentieth century with emphasis on transformation of policy during and after World War II, and the introduction to analytic tools and concepts useful for understanding of current foreign policy issues. GE credit: SocSci,
Wrt \| ACGH, SS, WE.
131. Analysis of U.S. Foreign Policy (4) Lecture-3 hours; term paper. Prerequisite: course 3, upper division standing or consent of instructor. Detailed presentation and examination of the formulation of execution of U.S. foreign policy. Survey of numerous factors influencing policy outcomes and how such determinants vary according to policy issue areas. GE credit: SocSci, Wrt | SS, WE.

## 132. National Security Policy (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 3, upper division standing. Development of national security policies since 1945. Analysis of deterrence and assumptions upon which it is based. Effects of nuclear weapons upon conduct of war, alliance systems, and the international system. Prospects of security and stability through arms control. GE credit: SocSci, Wrt | SS, WE.

## 135. International Politics of the Middle East (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 3 or consent of instructor. Restricted to upper division standing. International politics of the Middle East as a microcosm of world politics. The Middle East as a regional system. Domestic and International Politics in the Middle East. Changing Political Structures in the Middle East. Superpower involvement in the Middle East. GE credit: SocSci, Wrt \| SS, WE.
136. The Arab-Israeli Conflict (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 3 or International Relations 1. Restricted to upper division standing. Causes, course, and implications of Arab-Israeli conflict. Competing Israeli and Arab narratives, politics of force, diplomacy. Domestic politics and A-I conflict, the superpowers and the A-I conflict, A-I conflict and world politics, potential solutions. GE credit: SocSci, Wrt | SS, WE.

## 137. International Relations in Western Europe (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 3, upper division standing. Analysis of European unity, problems of the Atlantic alliance, Atlantic political economy, East-West relations, communism in Western Europe and the relationship between domestic politics and foreign policy. GE credit: SocSci, Wrt \| SS, WC, WE.
140A. Comparative Political Institutions: Electoral Systems (4)
Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 2. Workings of electoral institutions, focusing on systems used to elect presidents and assemblies, pass laws, and generally make decisions. Examples from systems throughout the world, including cases from both the advanced industrial and developing worlds. Offered in alternate years. GE credit: SocSci, Wrt | QL, SS, WE.
140B. Comparative Political Institutions: Parties (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor. Restricted to upper division standing. The factors shaping political parties and their role in democratic representation. Offered in alternate years. GE credit: SocSci, Div, Wrt | SS, WE.

## 140C. Comparative Political Institutions:

 Legislatures (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. Examination of legislatures from a comparative perspective. Offered in alternate years. GE credit: SocSci, Wrt \| SS, WE.

## 140D. When Institutions Fail (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 2. Pass One open to upper division Political Science \& International Relations majors. Examination of factors contributing to the success and failure of political institutions. Offered in alternate years. GE credit: QL, SS, WE. -I, III.

## 140E. Policy-Making Processes (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 2. Pass One open to upper division Political Science \& International Relations majors. Comparative analysis of policy-making in the U.S. and other countries. Offered irregularly. GE credit: QL, SS, WE.-I, III.
142A. Comparative Development: Political Development in Modernizing Societies (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. Nature and sequence of political development; its economic and social concomitants; role of elites, military, bureaucracy, and party systems; social stratification and group politics; social mobilization and political participation; instability, violence, and the politics of integration. Offered in alternate years. GE credit: SocSci, Wrt|SS, WC, WE.

## 142B. Comparative Development: Politics

 and Inequality (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. Linkages between politics and the distribution of social and economic goods. Impact of civil rights legislation, the politics of welfare states, and the effects of political participation on the distribution of goods. Offered in alternate years. GE credit: SocSci, Wrt \| SS, WC, WE.

142C. Comparative Political Development: Democracy and Democratization (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor. Pass One open to upper division Political Science \& International Relations majors. Examination of conditions promoting democratization and democratic stability. Offered irregularly. GE credit: SS, WE.-I, III.

## 143A. Latin American Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2. Issues related to democratic consolidation in Latin America, with a regional focus on South America. Topics include transitions to democracy, the role of the military, political economy, and political behavior. GE credit: SocSci, Div, Wrt \| SS, WC, WE.

## 143B. Mexican Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2. Introduction to the politics of contemporary Mexico. Focus on rise, fall, and aftermath of Mexico's one-party dominant system. GE credit: SocSci, Div, Wrt | SS, WC, WE.
144A. Politics of Post-Communist Countries: East European Politics (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; restricted to upper division standing. Post-war democratization, state-building and economic reform in East European states. GE credit: SocSci, Wrt \| SS, WC, WE.
144B. Politics of Post-Communist Countries: Russia (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; restricted to upper division standing. Democratization, state-building and economic reform; creation of new institutions; impacts of Soviet rule. GE credit: SocSci, Wrt \| SS, WC, WE.

## 146A. Politics of Africa: Issues in

Contemporary African Politics (4)
Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 2 or consent of instructor; course 134 recommended; upper division standing. African politics since the end of the Cold War. Topics include: Strategic Security Approach, Democratization, Human Rights, HIV/AIDS, African Peacekeeping, Terrorism, Religious and Ethnic Conflict, Debt and Stalled Development. Offered in alternate years. GE credit: SocSci, Div, Wrt \| SS, WC, WE.

## 146B. Politics of Africa: Development in

 Africa (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; course 134 recommended; upper division standing. Political and economic development within Sub-Saharan Africa. States and institutions, democracy, party systems, military coups/rule, bureaucracy/corruption, race/ethnicity, national/regional integrations, trade unions, economic development strategies, class formation, and women's roles and ideology. Offered in alternate years. GE credit: SocSci, Div, Wrt \| SS, WC, WE.

## 147A. West European Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. The evolution, politics, and contemporary problems of selected political systems of Western Europe. Offered in alternate years. GE credit: SocSci, Wrt | SS, WC, WE.

## 147B. West European Politics: British Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. The evolution, politics, and contemporary problems of Britain's political system. GE credit: SocSci, Wrt | SS, WC, WE.

## 147C. West European Politics: French

 Politics (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. The evolution, politics and contem-
porary problems of France's political system. Offered in alternate years. GE credit: SocSci, Wrt \| SS, WC, WE.

## 147D. West European Politics: German Politics (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 2 or consent of instructor; open to upper division Political Science \& International Relations Majors. Evolution, politics and contemporary problems of Germany's political system. GE credit: SocSci, Wrt \| SS, WC, WE.

## 148A. Government and Politics of East

## Asia: China (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. Evolution of political institutions and political culture in China with emphasis on the post-1949 period. Primary attention to nationalism, modernization and political efficacy. Offered in alternate years. GE credit: SocSci, Wrt \| SS, WC, WE.

## 148B. Government and Politics in East Asia: Japan (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. Japanese politics, with an emphasis on the postwar period. Particular emphasis on political parties, elections, political economy, and social problems. Offered in alternate years. GE credit: SocSci, Div, Wrt \| SS, WC, WE.

## 148C. Government and Politics in East Asia: Southeast Asia (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2 or consent of instructor; upper division standing. Evolution of political institutions and economy of selected nations in Southeast Asia. Emphasis on imperialist legacy, nation building in multi-ethnic communities, and contrasts in economic performance. Offered in alternate years. GE credit: SocSci, Div, Wrt \| SS, WC, WE.

## 150. Judicial Politics and Constitutional Interpretation (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. Politics of judicial policy making, issues surrounding constitutional interpretation and decision making, prerequisite for courses on the politics of constitutional law. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

## 151. The Constitutional Politics of the First Amendment and the Right to Privacy (4)

 Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: courses 1 and 150 with upper division standing or consent of instructor. The constitutional politics surrounding such issues as the right to free expression, associational rights, the right to free exercise of religious beliefs and the right to privacy. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.
## 152. The Constitutional Politics of Equality

 (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: courses 1 and 150 with upper division standing or consent of instructor. Constitutional politics of equality in the American political system; issues surrounding constitutional doctrine and judicial policymaking; special attention on racial and sexual equality. Offered in alternate years. GE credit: SocSci, Wrt \| ACGH, DD, SS, WE.

## 153. The Constitutional Politics of the Justice System (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 150 with upper division standing or consent of instructor. Constitutional politics of the American criminal justice system. Issues surrounding constitutional doctrine and judicial policymaking on issues such as search and seizure. Arrest, trial, incarceration and other issues of due process. Offered in alternate years. GE credit: SocSci,
Wrt \| ACGH, DD, SS, WE.

## 154. Legal Philosophy (4)

Lecture-3 hours; term paper or discussion -1 hour. Prerequisite: course 1 or 4 , upper division standing or consent of instructor. Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decision making bodies. Offered irregularly. GE credit: SocSci, Wrt \| SS, WE.

## 155. Judicial Process and Behavior (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 1, upper division standing. Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decisionmaking bodies. Offered in alternate years. GE credit: SocSci, Wrt \| ACGH, SS, WE.

## 160. American Political Parties (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1, upper division standing or consent of instructor. Analysis of the structured operations of the party system in the United States; party functions and organizations, nomination processes, campaigns and elections, party trends and reforms. GE credit: SocSci, Wrt \| ACGH, DD, QL, WE.

## 162. Elections and Voting Behavior (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 1, upper division standing or consent of instructor. Analysis of American elections and partisan behavior; political socialization, political participation, partisanship and individual and group determinants of voting. Offered irregularly. GE credit: SocSci, Wrt \| ACGH, DD, SS, WE.

## 163. Group Politics (4)

Lecture-3 hours; term paper or discussion - 1 hour Prerequisite: course 1, upper division standing or consent of instructor. Groups, institutions and individvals, especially in American politics. Historical and analytical treatment of group theories as applied to interest groups (especially labor, business, agriculture, science, military); to racial, ethnic and sectional groups; to parties, public and legislative groups, bureaucracies. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

## 164. Public Opinion (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: upper division standing and course 1 or 5, or consent of instructor. Nature of public opinion in America as it is supposed to be and as it is. Distribution of opinions among different publics and the significance of that distribution for system stability and institutions. Opinion polling and its problems. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

## 165. Mass Media and Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1. Organization of and decision making within the media; media audiences and the effect of the media on attitudes and behavior; the relationship of the government to the media (censorship, secrecy, freedom of the press, government regulation); the media in election campaigns. GE credit: SocSci, Wrt | SS, WE.

## 166. Women in Politics (4)

Lecture-3 hours; discussion - 1 hour or seminar-1 hour. Prerequisite: course 1. The role of women in American politics. Historical experiences; contemporary organizations and strategies; areas of legislative concern; the impact of differences in social class, race, and ethnicity upon the involvement of women in politics. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

## 168. Chicano Politics (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 1. Political aspects of Chicano life in America; examines the Chicanos political role as it has been historically defined by different groups in society and the Chicanos responses to his/ her political environment. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

## 170. Political Psychology (4)

Lecture-3 hours; term paper or discussion-1 hour.
Prerequisite: course 51 or consent of instructor; upper division standing. Overview to the growing literature on political psychology. Introduction to how psychological concepts (personality, attitudes, stereotypes, heuristics, affect, identity, group dynamics) help us understand how citizens think about politics. GE credit: SocSci, Wrt \| SS, WE

## 171. The Politics of Energy (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1, upper division standing. Nature and performance of political processes for making energy choices at the international, national and state levels. Interaction of energy policy with other political goals and the ability of governmental institutions to overcome constraints on policy innovation. GE credit: SocSci, Wrt \| SS, WE.
172. American Political Development (4) Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1, some background in American politics is strongly recommended. Systematic analysis of contemporary issues in American political development: historical determinants of political change; the timing and character of institutional development; conditions for successful political action. Democratization, cultural change, party formation, state-building, constitutionalism, race relations. GE credit: SocSci, Wrt | ACGH, DD, SS, WE.

## 174. Government and the Economy (4)

Lecture - 3 hours; term paper or discussion - 1 hour. Prerequisite: course 1, upper division standing in Political Science or consent of instructor. Political basis of economic policy (taxation, spending and regulation); impact of prices, employment and growth on political demands; elite responses to economic conditions; policy alternatives and the public interest. GE credit: SocSci, Wrt | SS, WE. - III. (III.)

## 175. Science, Technology, and Policy (4)

 Lecture - 3 hours; term paper or discussion - 1 hour. Prerequisite: course 1; consent of instructor. Analysis of policymaking for science and the use of scientific expertise for making decisions about technology. Topics include funding of basic research, relationship of science to technological development, science and military policy, technological risks, technology assessment and scientists and politics. GE credit: SocSci, Wrt \| QL, SS, WE.176. Racial Politics (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1. Race, racial attitudes and racial policies in the United States with a specific emphasis on African Americans. GE credit: SocSci, Div, Wrt \| ACGH, DD, SS, WE.

## 179. Special Studies in Comparative Politics

 (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2, consent of instructor and upper division standing. Intensive examination of one or more special problems appropriate to comparative politics. Coverage is given to formal and informal political institutions, economically developing and developed countries, and non-democratic, democratic, and democratizing countries. May be repeated once for credit. GE credit: SocSci,
Wrt | SS, WE.
180. Bureaucracy in Modern Society (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1 or 2, upper division standing in Political Science or consent of instructor. Role of bureaucracy in a complex society, with emphasis upon changing relationships between government and the economy; consequences of rapid technological and social change for bureaucratic structures and processes; the problems of reconciling expertise and democracy and increasing the responsiveness of public bureaucracy. GE credit: SocSci ,

## Wrt | ACGH, SS, WE

## 183. Administrative Behavior (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. The implications for Ameri-
can public administration of evolving concepts about behavior in organizations. Offered irregularly. GE credit: SocSci, Wrt \| ACGH, SS, WE.

## 187. Administrative Theory (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 1 and upper division standing or consent of instructor. Historical and critical analy sis of the principal theories of organization and management of public agencies in light of such concepts as decision making, bureaucracy, authority and power, communication and control; examination of role of government bureaucracies in the total society. GE credit: SocSci, Wrt | SS, WE.

## 190. International Relations (4)

Lecture-3 hours; term paper or discussion - 1 hour. Open to majors in International Relations, or consent of instructor. Analysis and evaluation of substantive issues in contemporary international relations. Readings drawn from current academic and non-aca demic periodicals. GE credit: SocSci, Wrt|SS, WE.

## 192A. Internship in Public Affairs (5)

Prerequisite: enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science-Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: ACGH, SS, WE.
192B. Internship in Public Affairs (5)
Prerequisite: course 192A; enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science-Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: ACGH, SS, WE.

## 193. Research in Practical Politics (2)

Research project-6 hours. Prerequisite: courses 192A, 192B; open only to Political Science-Public Service majors, for whom it is required. Supervised preparation of an extensive paper relating internship experience to concepts, literature, and theory of political science. GE credit: SocSci \| SS, WE.

## 193W. Washington Center Research

 Seminar (4)Lecture/discussion - 1 hour; independent study-3 hours; tutorial -0.5 hour. Prerequisite: course 192W concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as UC Davis Washington Center 193.) GE credit: SocSci, Wrt | OL, SS, WE.

## 194HA-194HB. Special Study for Honors

## Students (4-4)

Seminar-2 hours; independent study -2 hours. Prerequisite: major in Political Science with upper division standing and a GPA of 3.500 in the major Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit:
SocSci | OL, SS, VL, WE.
195. Special Studies in American Politics (4) Seminar-4 hours. Prerequisite: consent of instructor and upper division standing. Intensive examination of one or more special problems appropriate to American politics. May be repeated one time for credit when topic differs. GE credit:
SocSci | ACGH, SS, WE.
196A. Seminar in American Politics (4)
Seminar-3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in American politics. Topics may include Congress, the Presidency, the Supreme Court, federalism, voting behavior, interest groups, ethnic groups or other topics with a more specialized content than normal course offerings. May be repeated one time for credit when topic differs. GE credit:
SocSci | ACGH, SS, WE. -I, II, III.

196B. Seminar in Comparative Politics (4) Seminar-3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in comparative politics. Topics may include one country or geographical area, political institutions or behavior across countries, political development, or other topics that are more specialized than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.
196C. Seminar in International Relations (4)

Seminar-3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in international relations including study of international political institutions (UN, EU, or NATO) or interstate relations (war, trade, immigration) and other topics with more specialized content than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.
196D. Seminar in Political Theory (4)
Seminar-3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, writing in political theory. Topics may include study of a single political thinker, a group of related thinkers, development of political concepts, or other topics with more specialized content than normal course offerings. May be repeated one time for credit when topic differs. GE credit: SocSci | SS, WE.

## 196E. Seminar in Research Methods (4)

 Seminar-3 hours; term paper. Prerequisite: upper division political science major or consent of instructor. Intensive reading, discussion, research, and writing in selected topics in research methods such as research design, statistics, game theory. May be repeated one time for credit when topic differs. GE credit: SocSci | QL, SS, VL, WE
## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

201. Urban Government and Politics (4) Seminar-4 hours. Survey and analysis of the literature in the field of local government and politics in the United States. Approaches to the study of political reform, local autonomy, community power, representation, expertise, service delivery, policymaking and political change. Offered in alternate years.

## 202. American State Government and

## Politics (4)

Seminar-4 hours. Survey and analysis of the literature in the field of state government, politics, and policy. Approaches to the study of the American states as political systems, including their governing institutions and processes and their role in the Federal system. Offered in alternate years.

## 203A. American Government: The Presidency (4)

Seminar-3 hours; term paper. Restricted to graduate students only. Thorough overview of the current research on political executives, with particular emphasis on the American presidency. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.
203B. American Government: Congress (4) Seminar-3 hours; term paper. Restricted to graduate students only. Thorough overview of the current research on Congress, with particular emphasis on political representation. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations.

203C. American Government: Courts (4)
Seminar-4 hours. Survey and analysis of the literature in the field of American government with a focus on courts. Emphasis on the development and testing of theories of behavior and processes.

## 207. Environmental Public Policy (4)

Seminar-4 hours. Analysis of the interface between the world of academic reflection about ecological and environmental problems and the world of political action. Evaluation of alternative approaches to policy analysis and recommendation. Individual research, including field research, will parallel discussion of the literature.

## 208. Policy Analysis (4)

Seminar-4 hours. Social science techniques applied to public policy formation and evaluation.
209. The American Political System (4)

Seminar-3 hours; term paper. Restricted to graduate students only. Analysis of selected theoretical and empirical issues posed by contemporary research in American government and politics.
210. Research Design in Political Science (4)

Seminar-3 hours; discussion/laboratory-1 hour. Prerequisite: graduate standing. Introduction to philosophy of science and research design for political science. Topics include: logic of empirical research, overview of research design approaches for political science research.

## 211. Research Methods in Political Science (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing. Pass One open to graduate majors; pass 2 open to graduate students. Introductory seminar introducing data analysis methods critical to basic empirical investigations in political science

## 212. Quantitative Analysis in Political

## Science (4)

Seminar-3 hours; term paper. Prerequisite: course 211. Pass One open to graduate majors; pass 2 open to graduate students. Introductory statistics course with an emphasis on applications in political science. Topics include descriptive statistics for samples, probability and probability distributions, hypothesis testing, ANOVA, bivariate regression, and introduction to multiple regression.

## 213. Quantitative Analysis in Political

 Science II (4)Seminar-3 hours; term paper. Prerequisite: courses 211, 212. Pass One open to graduate majors; pass 2 open to graduate students. More advanced topics in the use of statistical methods, with emphasis on political applications. Topics include: properties of least squares estimates, problems in multiple regression, and advanced topics (probit analysis, simultaneous models, time-series analysis, etc.).

## 214A. Research in Political Science (4)

Discussion-2 hours; lecture-1 hour; term paper. Prerequisite: course 213. Research seminar sequence required of all Ph.D. students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)

## 214B. Research in Political Science (4)

Discussion-2 hours; lecture-1 hour; term paper.
Prerequisite: courses 212 and 214 A ; advanced level graduate students in the Department of Political Science only. Research seminar sequence required of all Ph.D. students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. (Deferred grading only, pending completion of sequence.)

## 215. Introduction to Modeling Political

 Behavior (4)Seminar-3 hours; term paper. Prerequisite: courses 211, 212. Pass One open to graduate majors; pass 2 open to graduate students. Introduction to formal and game theoretic analyses of politics. Students will learn basic game theory and modeling skills. We
examine the benefits of modeling, and look at examples of formal analysis in a variety of political science subfields.

## 216. Qualitative Research Methods (4)

Seminar-3 hours; term paper. Methodology for utilizing theoretically-oriented case studies and controlled comparison of a small number of cases to develop and test theories. Examination of how the case study method compliments experimental, statistical and deductive modes of research. Offered in alternate years.

## 217. Social Choice Theory and Spatial Modeling (4)

Seminar-4 hours. Introduction to social choice theory and formal spatial modeling including Arrow's Theorem, the paradox of voting, cycling and agenda control. Focus on mastering modeling techniques as well as interpretation of classic works. Offered in alternate years.

## 218. Topics in Political Theory (4)

Seminar -3 hours; term paper. Topics vary and may be the work of a single theorist, time period, or political concept, such as justice. May be repeated three times for credit when topic differs.

## 219A. Political Theory Sequence (4)

Seminar-3 hours; term paper. Survey of the great works in ancient and medieval political theory including such writers as Plato, Aristotle, Cicero, St. Augustine, Aquinas, Alfarabi and Marsilius. Discussion of various interpretations of these authors.
Offered in alternate years.

## 219B. Political Theory Sequence (4)

Seminar-3 hours; term paper. Survey of the great works in early modern to contemporary political theory including such writers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls. Discussion of various interpretations of these authors. Offered in alternate years.

## 219C. Contemporary Political Theory (4)

Seminar-3 hours; term paper. Survey of important works in contemporary political theory including such writers as Nietzsche, Heidegger, Arendt, Rawls, Nozick, Sandel. May be repeated for credit if topic differs.

## 220. Seminar in Political Theory (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing. Introduction to political theory and current debates over its study. Readings from and textual interpretations of political theory including the Federalist Papers and major works by thinkers such as Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, and Rawls. Other readings addressing issues of textual interpretation.

## 223. International Relations (4)

Seminar-3 hours; term paper.

## 225. The International System (4)

Seminar-3 hours; term paper. Analysis of the international system by means of theory formulation and integration; critique of research designs; use of various techniques of data generation and analysis.

## 226. Seminar in International Political

 Economy (4)Seminar-3 hours; term paper. Restricted to graduate students. Research in international political economy. Structure of the global economy, as well as specific dimensions of international economic relations, including trade, capital flows, global production structures, and migration. Offered in alternate years.
229. Theories of International Relations (4)

Seminar-3 hours; term paper. Central concepts, debates, and paradigms in international relations; overview of research in international security and international political economy; inter-state and intrastate war; cooperation and conflict resolution; trade and finance; relationship between domestic and international politics, norms and institutions. Open to political science graduate students only unless consent of instructor. Offered in alternate years.

## 230. American Foreign Policy (4)

Seminar-3 hours; term paper.
231. U.S. Political Culture and Foreign Relations (4)
Seminar-3 hours; term paper. Relates U.S. political culture to formulation of foreign policy. Analyzes American ideological preferences in historical perspective, contemporary public opinion, decision making and implementation. Concludes by examining linkages between foreign policy behavior and democratic process. Offered in alternate years.

## 241. Communist Political Systems (4)

Seminar-4 hours. Prerequisite: course 141 or the equivalent, or consent of instructor. Systematic analysis of selected topics dealing with the political process of communist political systems.
242. Seminar in Comparative Politics (4) Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Systematic survey of theories and methods used in the study of comparative politics.
243. Comparative Institutional Change (4) Seminar-3 hours; term paper. Restricted to graduate students. Comparison of institutional changes in countries of the former Soviet Union and Eastern Europe during the period of transition to democracy. Special attention to institutions of mass representa-tion-electoral and party systems and national legislatures. Offered in alternate years.

## 246. Policymaking in Third-World Societies

 (4)Seminar-3 hours. Prerequisite: graduate standing or consent of instructor. Included in an analysis of policymaking process in Third-World countries are such topics as political resources, institutional resources, decision making, resource allocations, planning, and budgeting, implementation, and distribution of world resources. Offered in alternate years.

## 250. Policy Development and Impact in

 U.S. Courts (4)Seminar-3 hours; term paper. Prerequisite: graduate standing. Thorough overview of the literature regarding courts as policymaking institutions of government, with emphasis on the formation and implementation of judicial policy. Differences and similarities across the judicial, congressional, and executive branch policy processes. Offered in alternate years.
260. Political Parties (4)

Seminar-3 hours; term paper. Survey of selected topics in American and comparative parties.

## 261. Political Behavior (4)

Seminar-3 hours; term paper. Survey of selected topics in political behavior and public opinion. May be repeated three times for credit when topic differs.

## 274. Political Economy (4)

Seminar-3 hours; term paper. Restricted to graduate students. Politics of economic policy as reflected in taxation, spending and regulation; impact of prices, employment, and growth on political demands; government responses to economic conditions; electoral politics and the political business cycle. Offered in alternate years.

## 279. Political Networks: Methods and

 Applications (4)Seminar-3 hours; term paper. Prerequisite: graduate standing. Structure of political networks, sociomatrices and affiliation networks; general networks characteristics: density, centralization, polarization, interdependence, dyadic and triadic characteristics: structural and role equivalence; subsets of networks: cliques, blocks and bloc modeling; characteristics of individuals in networks: centrality and prestige.

## 280. Bayesian Methods: for Social and

 Behavioral Sciences (4)Seminar-3 hours; term paper. Prerequisite: course 212 or equivalent. Pass One open to graduate majors only; pass 2 open to graduate students. Methodology seminar introducing Bayesian quantitative methods to issues and problems in political science and other social and behavioral sciences. Offered in alternate years.

## 281. Statistical Computing Issues in Political

 Science (4)Seminar-3 hours; discussion/laboratory-1 hour.
Prerequisite: course 213 or equivalent; graduate standing. Methodology seminar introducing computing issues in empirical models for political science and other social and behavioral sciences. Offered in alternate years.

## 282. Advanced Modeling of Political

 Behavior (4)Seminar-3 hours; term paper. Prerequisite: course 215 or equivalent; graduate standing or consent of instructor. Applications of formal theory to political science. Review of relevant contributions in other social sciences. Consideration of advanced techniques in game theory. Rational and behavioral approaches.

## 283. Organizational Behavior (4)

Seminar-4 hours. Organizational behavior as it relates to public sector decision making.
284. Advanced Network Analysis (4)

Seminar-3 hours; term paper. Prerequisite: course 211, 212, 279. Exponential Random Graph Models (ERGMS) of networks, game theoretic models of network formation and network dynamics, diffusion processes, shocks and network collapse, percolation, cross-network spillover processes, social and political applications of advanced network models. Offered in alternate years.-Maoz, Zeev
290A. Research in American Government and Public Policy (4)
Seminar-3 hours; term paper. Restricted to graduate students. Special research seminar on problems and issues in the study of American government and public policy. May be repeated up to 6 times for credit if topic differs.

## 290B. Research in Political Theory (4)

Lecture-3 hours; term paper. Restricted to graduate students only. Special research seminar on problems and issues in the study of political theory. May be repeated six times for credit if topic varies.
290C. Research in International Relations (4)

Lecture-3 hours; term paper. Restricted to graduate students only. Special research seminar on select problems and issues in the study of international relations. May be repeated six times for credit if topic varies.

## 290D. Research in Judicial Politics (4)

Seminar-4 hours. Prerequisite: graduate standing in political science or consent of instructor. Contemporary research on judicial politics, judicial institutions, jurisprudence, and judicial behavior.
290E. Research in Political Parties, Politics, and Political Behavior (4)
Seminar-4 hours. Special research seminar on selected problems and issues in the study of political parties, politics, and political behavior.

## 290F. Research in Comparative

Government and Policy (4)
Lecture -3 hours; term paper. Restricted to graduate students only. Special research seminar on select problems and issues in the study of comparative government and policy. May be repeated six times for credit if topic varies.
290G. Research in Methodology (4)
Lecture-3 hours; term paper. Prerequisite: course 212. Special research seminar on selected problems and issues in methods in political science. May be repeated three times for credit if topic varies.

## 297. Internships in Political Science (2)

Seminar-2 hours. Prerequisite: open only to persons who have internships or other positions in governmental agencies, political parties, etc.
Application and evaluation of theoretical concepts through work experience or systematic observation in public and political agencies. May be repeated for credit. ( $\mathrm{S} / \mathrm{U}$ grading only.)
298. Group Study (1-5)
(S/U grading only.)
299. Research (1-12)
(S/U grading only.)
299D. Directed Reading (1-12)
(S/U grading only.)

## Professional

390. The Teaching of Political Science (1)

Seminar-1 hour. Prerequisite: graduate student standing in Political Science. Methods and problems of teaching political science at the undergraduate level. (S/U grading only.)
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. ( $S / U$ grading only.)

John H. Gillespie, Ph.D., Professor Emeritus
Kevin J. Rice, Ph.D., Professor Emeritus
Judy A. Stamps, Ph.D. Professor Emeritus
Graduate Study. The Graduate Group in Population Biology emphasizes programs of study and research leading to the Ph.D. degree. The Group concentrates on population biology as the broad discipline that blends ecology, evolution, population genetics and systematics into a unified field. The course curriculum consists of first-year core courses offered by the Group faculty, seminars, and advanced courses in population biology, and related disciplines, chosen in consultation with a guiding committee.
Graduate Adviser. Consult the Population Biology Graduate Group office or website.

## Courses in Population Biology <br> (PBG)

## Graduate

200A. Principles of Population Biology (5)
Lecture-3 hours; discussion-2 hours. Prerequisite: course 231 concurrently and consent of instructor. Principles of single-species ecology and evolution. Topics include ecology of individuals, population growth models, structured populations, life history strategies, stochastic populations, basic population genetics theory, deleterious alleles in natural populations, and molecular population genetics.-I. (I.)
200B. Principles of Population Biology (6) Lecture-5 hours; discussion-1 hour. Prerequisite: course 200A, 231. Principles of multi-species communities. Topics include competition, mutualism, metapopulations, food webs and trophic cascades, interactions between simple ecological communities, island biogeography, succession, and large-scale patterns.-III. (II.)

200C. Principles of Population Biology (6)
Lecture-5 hours; discussion-1 hour. Prerequisite: course 200B. Principles of microevolution and macroevolution. Topics include evolutionary quantitative genetics, analysis of hybrid zones, speciation, the fossil record, biogeography, and phylogeny reconstruction. - III. (III.)

## 203. Advanced Evolution (3)

Lecture-1 hour; discussion-2 hours. Prerequisite: graduate standing. Adaptation and speciation, and biochemical and morphological evolution in plants and animals with emphasis on the appropriateness of different methods of analysis. Offered in alternate years.
206. Ecology of Insect Parasitoids (4) Lecture-3 hours; seminar-1 hour. Prerequisite: introductory animal ecology or behavior. Insect parasitoids will be investigated as model systems to address current topics in behavioral, population, and evolutionary ecology. Theory will be synthesized and critical empirical tests of ecological hypotheses emphasized. (Same course as Entomology 206.) Offered in alternate years.
207. Plant Population Biology (3)

Lecture-2 hours; laboratory/discussion-1 hour.
Prerequisite: advanced undergraduate ecology course (e.g., Environmental Science and Policy 100, Evolution and Ecology 101, Entomology 104, Plant Biology 117), and advanced undergraduate course in genetics and/or evolution (e.g., Biological Sciences 101 or Evolution and Ecology 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as Ecology 207.) Offered in alternate years. - II. Rice

## 212. Topics in Invertebrate Evolution (2)

Seminar-2 hours. Prerequisite: graduate standing or consent of instructor and Evolution and Ecology 112-112L; courses in evolutionary biology, systemat ics, and ecology highly recommended. Advanced seminar that critically examines problems relevant to evolutionary patterns among the invertebrates. May be repeated for credit when topic differs. (S/U grading only.) - (III.) Grosberg

## 220. Spatio-Temporal Ecology (2)

Lecture/discussion-2 hours. Prerequisite: course 200B or Ecology 204 or Evolution and Ecology 104 or Environmental Science and Policy 121 or consent of instructor. Spatiotemporal ecological theory focusing on population persistence and stability, predatorprey and host-parasitoid interactions, species coexistence and diversity maintenance, including effects of environmental variation, spatial and temporal scale, life-history traits and nonlinear dynamics. Topics vary. (Same course as Ecology 220.) May be repeated one time for credit. ( $S / U$ grading only.)

## 221. Animal Behavior, Ecology and

 Evolution (3)Lecture-3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 102, Evolution and Ecology 100, 101 or the equivalent, graduate standing, and consent of instructor. The interface between animal behavior, ecology and evolution. New developments in behavioral ecology and development and testing of hypotheses in this discipline. (Same course as Animal Behavior 221.)

## 224. Field Reconnaissance for Population Biologists (2)

Fieldwork-6 hours. Prerequisite: graduate student in Population Biology, or consent of instructor. Biweekly field trips to acquaint students with plant and animal communities, biodiversity, and ecological and evolutionary research opportunities in northern and central California. May be repeated for credit. (S/U grading only.)
225. Terrestrial Field Ecology (4)

Seminar-1 hour; field work - 12 hours. Prerequisite: introductory ecology and introductory statistics, or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and
written and oral presentation of results will be stressed. (Same course as Ecology/Entomology 225.)-III. (III.) Karban

## 231. Mathematical Methods in Population

 Biology (3)Lecture-3 hours. Prerequisite: Mathematics 16C or 21C or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as Ecology 231 .)-I. (I.) Hastings

## 233. Computational Methods in Population

 Biology (3)Lecture/laboratory-2 hours; discussion/labora-tory-1 hour. Prerequisite: a course in theoretical ecology (e.g., Ecology 231 or an equivalent to Environmental Science and Policy 121 from your undergraduate institution) or consent of instructor; no programming experience required. Numerical methods for simulating population dynamics using the computational soffware package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R. (Same course as Ecology 233.) Offered in alternate years. (S/U grading only.) - (II.) Baskett, Schreiber

## 250A. Interdisciplinary Approaches to Biological Invasions (4)

Lecture/discussion-4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from ecology, ecological theory, evolution, genetics, philosophy, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving.-I. (I.)

## 250B. Interdisciplinary Approaches to

 Biological Invasions (4)Lecture/discussion-4 hours. Prerequisite: graduate standing. An integrative consideration of biological invasions, including an overview of concepts from history, sociology, communications, law, policy, management, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem solving.-II. (II.)

## 25 1. Collaborative Project in Biological Invasions (3)

Project; discussion-1 hour. Prerequisite: course 250A, 250B, or equivalent; and consent of instructor. A year-long interdisciplinary collaborative project focusing on biological invasions, resulting in a paper or other suitable product presented at a symposium at the conclusion of the project. May be repeated up to five times. ( $S / \mathrm{U}$ grading only.) $-\mathrm{I}, \mathrm{II}$, III. (I, II, III.)
271. Research Conference in Ecology (1)

Seminar-1 hour. Prerequisite: consent of instructor. Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter. May be repeated for credit. (S/U grading only.) - II. (II.) Schoener, Schreiber

## 287. Advanced Animal Behavior (2)

Seminar-2 hours. Prerequisite: graduate standing and consent of instructor, courses in animal behavior (Neurobiology, Physiology, and Behavior 102 or the equivalent), and either evolution (Evolution and Ecology 100 or the equivalent) or ecology (Evolution and Ecology 101 or the equivalent). Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. (Same course as Animal Behavior 287.) May be repeated two times for credit.
290. Seminar (1)

Seminar-1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by visiting lecturers, UC Davis graduate students and faculty. May be repeated for credit. (S/U grading only.) -I, II, III. (II, II, III.)
290C. Research Conference in Population Biology (1)
Discussion - 1 hour. Prerequisite: graduate standing and consent of instructor; concurrent enrollment in course 299. Presentation and discussion of faculty and graduate student research in population biology. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
292. Topics in Ecology and Evolution (1) Seminar-1 hour. Prerequisite: graduate standing. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. (Same course as Ecology 296.) (S/U grading only.) - I, II, III. (I, II, III.)
296. Seminar in Geographical Ecology (2) Seminar-2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. (Same course as Geography 214 .)(S/U grading only.) - III. (III.) Shapiro
298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)
299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Population Health and Reproduction

See Veterinary Medicine, School of, on page 539 .

## Precision Agriculture

(College of Agricultural and Environmental Sciences) The Department of Biological and Agricultural Engineering offers a minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental concerns.

## Minor Program Requirements:

This minor acquaints students with recent developments and their applications to agriculture, in geographic information systems (GIS), global positioning systems (GPS), variable rate technologies (VRT), crop and soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the "information age" in agriculture.

## The Major Programs

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis:
Developmental Psychology involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development are examined using a variety of methods including behavioral, neuroimaging, and physiological assessments.
Perception, Cognition, and Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.
Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.
Social-Personality Psychology involves the study of the individual in his or her social environment and includes such topics as personality and individual differences, emotions, stereotyping and prejudice, intergroup relations, the psychology of religion and psychological health and dysfunction.
Quantitative Psychology involves the study of linear and nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.
The department offers the Bachelor of Arts (A.B.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathematics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take specialty courses on such far-ranging topics as sex differences, genius and creativity, and environmental awareness. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden your experiences and understanding of the field of psychology.
Preparatory Requirements. Before declaring a major in psychology, students must complete the following courses with a combined grade point average of at least 2.500 . All courses must be taken for a letter grade. (Students in the Bachelor of Science, Biology program must complete Biological Sciences 2A.):

UNITS
Psychology 1, 41
.
Statistics 13 or 100 or 102
.4
Biological Sciences 2A
or
Biological Sciences 10 or 10 V and one course from: Anthropology 1, Molecular and Cellular Biology 10, Neurobiology,
Physiology, and Behavior $10 \ldots . . . . .5$ or 7-8
Career Alternatives. A degree in psychology provides broad intellectual foundations which are
useful to the graduate for the development of careers in a variety of areas, including social work, the ministry, teaching, business, and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/ counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and many other professions.

## A.B. Major Requirements:

## UNITS

Preparatory Subject Matter.............. 17-20
Psychology 1 or the equivalent.
Psychology 41 .............................. 4
Statistics 13 or 102................................. 4
Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.
Biological Sciences 2A; or a combination of
Biological Sciences 10 and one course from:
Anthropology 1, Molecular and Cellular
Biology 10, or Neurobiology, Physiology,
and Behavior 10.......................... 5 or 7-8

## Depth Subject Matter

.40
Two courses from two of the following four groups and one course from the remaining
two groups:.....................................23-24
Group A: Psychology 100 or 100Y, 130,
131, 132, 135, 136
Group B: Psychology 101, 113, 121, 122,
123, 126, 127 129, 159
Group C: Psychology 151, 152, 154, 158, 161, 162, 168
Group D: Psychology 140; or Human
Development (HDE) 100A or 100B,
Psychology 141/ HDE 101, Psychology 142/HDE 102, 143, 146, 148
Additional units to achieve a total of 40 upper
division units in psychology. $\qquad$ $.16-17$
A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.

## Total Units for the Major ................... 57-60

## Biology Emphasis

B.S. Major Requirements:

UNITS
Preparatory Subject Matter............... 53-61
Psychology 1 or the equivalent ................ 4
Psychology 41 ....................................... 4
Statistics 13 or 102................................ 4
Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.
Mathematics 16A-16B or 17A-17B or 21A-
21B....................................................6-8
Physics 10 or 7A-7B.............................4-8
Biological Sciences 2A, 2B, 2C 15 Chemistry
2A, 2B
.10
Chemistry $8 \mathrm{~A}-8 \mathrm{~B}$ or $118 \mathrm{~A}-118 \mathrm{~B}$ or 128 A -
128B................................................6-8
Depth Subject Matter
Seven Psychology courses distributed as specified:

Group A: Two courses from: Psychology 100 or 100Y, 130, 131, 132, 135,
136 ................................................... 8
Group B: Three courses from: Psychology 101, 113, 121, 122/, 123/, 126, 127, 129, 159 ................................... 11-12 Group C: One course from: Psychology 151, 152, 154, 158, 161, 162, 168 .. 4 Group D: One course from: Psychology 140 (or Human Development (HDE) 100A or 100B), Psychology 141/HDE 101, Psychology 142/HDE 102, 143, 146, 148.
.. 4
Additional units to achieve a total of 40 upper
division units in psychology................12-13

A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40-unit requirement.
Biological Sciences 101 ........................... 4
Neurobiology, Physiology, and Behavior
Neurobiology, Physiology, and Behavior
101
Total Units for the Major ............... 102-1 10

## Recommended

Psychology 180B, 199; on a Biological Psychology topic, Anthropology 154A,
Environmental Science and Policy 110,
Evolution and Ecology 100, 101.

## Mathematics Emphasis

B.S. Major Requirements:
Preparatory Subject Matter. ..... 41-54

Psychology 1 or the equivalent ................. 4
Psychology 41 ............................................ 4
Statistics 13 or 102 ................................. 4
Strongly recommended that Psychology 41 and Statistics 13 or 102 be completed in the first year.
Mathematics 21A, 21B, 21C................. 12
Computer Science Engineering 30 or
Computer Science Engineering 10 .. ... 4
Chemistry 10 or $2 \mathrm{~A}-2 \mathrm{~B}$ or $2 \mathrm{AH}-2 \mathrm{BH}$....4-10
Physics 10 or 7A-7B.
Biological Sciences 2 A ; or a combination of
Biological Sciences 10 and one course from: Anthropology 1, Molecular and Cellular Biology 10, or Neurobiology, Physiology, and Behavior 10

5-8
Depth Subject Matter ............................... 49
Five Psychology courses, distributed as
specified:
Group A: Two courses from: 100, 130,
131, 132, 135, 136 .......................... 8
Group B: Two courses from: Psychology
101, 113, 121, 122/, 123/, 126, 127,
129, 159 ...................................... 7-8
Group C: One course from: Psychology 151, 152, 154, 158, 161, 162, 168 or
Group D: One course from: Psychology 140 (or Human Development (HDE) 100A or 100B), Psychology 141/HDE 101, Psychology 142/HDE 102, Psychology 143, 146, 148
Psychology 103A
$\ldots 4$
One course from: Psycholo..................... 5
the equivalent.
Additional units to achi........................4-5
division units in psychology.............. 11-12
A maximum of 12 approved upper division Human Development units can be credited toward satisfaction of the 40 -unit requirement.
One course sequence from: Statistics 106-
108, 130A-130B, 131A-131B................. 8
Total Units for the Major .................90-103
Recommended for All Majors. Students who plan to do graduate work in any area of psychology are strongly encouraged to complete Statistics 13 and Psychology 103A or both Statistics 13 and
102. Psychology 41 is a prerequisite for most upper division courses. Psychology 41 and Statistics 13 or 102 should be completed in the first year.
Major Advisers. K. Bales, S. Blozis, R.G. Coss, R.A. Emmons, A. Ekstrom, E. Ferrer, J. Geng, S. Ghetti, G.S. Goodman, K. Graf Estes, K. Grimm, P. Hastings, G.M. Herek, P. Janata, L.A. Krubitzer, K. Lagattuta, A. Ledgerwood, D.L. Long, S. Luck, G.R. Mangun, W. Moons, L. Oakes, C. Pickett, C. Ranganath, S. Rivera, R.W. Robins, J. Schank, P.R. Shaver, J. Sherman, D.K. Simonton, D. Stolzenberg, T. Swaab, R. Thompson, B Trainor, M. Traxler, K.F. Widaman, B. Wiltgen, A.P. Yonelinas, N.W. Zane
Human Development course credit. Human Development 100A, 100B, 100C, 101, 102, 120, and 121 can be used toward satisfying the 40 -unit
upper division major requirement to a maximum of 12 units. Students who have completed Human Development 100A or 100B will receive 2 units of credit for Psychology 140.

## Minor Program Requirements:

## Psychology

 24Psychology 1 or the equivalent................. 4
One course from each of the following four
groups ......................................... 15-16 Group A: Psychology 100, 130, 131, 132, 135, 136
Group B: Psychology 101, 113, 121, 122,
123, 126, 127, 129, 159
Group C: Psychology 151, 152, 154, 158, 161, 162, 168
Group D: Psychology 140, 141 142, 143, 146, 148
Additional units to achieve a total of 20 upper
division units $\qquad$
One course selected from: Human
Development100A, 100B, 100C, 101, 102, 120, 121 can be used toward satisfying the minor upper division unit requirement
Honors and Honors Program. In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria for honors and complete a research project involving a minimum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Course 194HA194 HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.
Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained at the Department Office or on our website.
Graduate Adviser. See http://
gradstudies.ucdavis.edu/programs/
program-detail.cfm?id=79.

## Courses in Psychology (PSC)

## Lower Division

## 1. General Psychology (4)

Lecture-4 hours. Introduction emphasizing empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior. Only two units allowed to those who have taken course 15 or 16; no credit allowed to those who have taken both courses 15 and 16. GE credit: SocSci | SS. - I, II, III. (II, II, III.) E. Post, Simonton, Thompson, Traxler

## 20. Freshman Psychology Seminar (4)

Seminar-4 hours. Prerequisite: freshman standing. Instructor will acquaint students with his or her program of research, the development of scientific questions from the literature, and the application of research methods to examine these questions. Critical thinking will be encouraged via expository writing and brief presentations.

## 41. Research Merhods in Psychology (4)

 Lecture-3 hours; autotutorial. Prerequisite: course 1 or the equivalent; Statistics 13 or 102 recommended. Introduction to experimental design, interviews, questionnaires, field and observational methods, reliability, and statistical inference. GE credit: QL.-I, II, III. (I, II, III.) Cross, E. Post
## 41S. Research Methods in Psychology (4)

 Lecture/laboratory - 10 hours; web virtual lecture10 hours. Prerequisite: course 1 or equivalent. Limited enrollment. Introduction to experimental design, interviews, questionnaires, observational research, qualitative approaches, case studies, content analy-sis, sampling, descriptive statistics, and statistical inference. Not open for credit to students who have taken course 41. Offered irregularly.

## 90X. Lower Division Seminar (1-2)

Seminar-1-2 hours. Prerequisite: lower division standing and consent of instructor. Limited enrollment. Examination of a special topic in Psychology through shared readings, discussions, written assignments, or special activities such as fieldwork or laboratory work. May not be repeated for credit. Offered irregularly.
98. Directed Group Study (1-5)

Primarily for lower division students. (P/NP grading only.)
99. Special Study for Lower Division Students (1-5)
(P/NP grading only.)

## Upper Division

## 100. Introduction to Cognitive Psychology

## (4)

Lecture-4 hours. Prerequisite: courses 1 and 41 . Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former course 136.-I, II, III. (II, II, III.) v, Ekstrom, Gibbs, Long, Luck
100Y. Introduction to Cognitive Psychology (4)

Web virtual lecture-3 hours; discussion - 1 hour; lecture-1 hour. Prerequisite: courses 1; 41. Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former course 136 or current course 100.-II, III. (II, III.) Luck

## 101. Introduction to Psychobiology (4)

Lecture-4 hours. Prerequisite: courses 1, 41. Survey and integration of the relationships between behavior and biological processes, including physiology, genes, development, ecology, and evolu-tion.-I, II, III. (I, II, III.) Coss, Krubitzer, Schank, Stolzenberg, Trainor

## 103A. Statistical Analysis of Psychological

 Data (5)Lecture-4 hours; laboratory-2 hours; term paper. Prerequisite: course 1, 41 and Statistics 13 or 102. Pass One open to Psychology majors. Design and statistical analysis of psychological investigations and the interpretation of quantitative data in psychology. Not open for credit to students who have completed course 103. GE credit: QL.-I, II. (I, II.) Blozis, Grimm, Widaman
103B. Statistical Analysis of Psychological Data (5)
Lecture-4 hours; laboratory-2 hours. Prerequisite: course 103A; Statistics 13 or 102. Pass One open to Psychology majors. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Simple regression analysis, multiple regression analysis, non-parametric statistics, introduction to multivariate statistics, with applications in psychology. Not open for credit to students who
have completed course 105. GE credit: QL. - II, III. (II, III.) Blozis, Ferrer, Grimm, Widaman

## 104. Applied Psychometrics: An

 Introduction to Measurement Theory (4) Lecture-4 hours. Prerequisite: upper division standing in Psychology, courses 41 and 103, Statistics 13. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis and latent trait theory. Offered irregularly. GE credit: QL.-Grimm, Widaman107. Questionnaire and Survey Research Methods (4)
Lecture/discussion-2 hours; laboratory/discus-sion-2 hours. Prerequisite: consent of instructor; course 1; course 41 or an equivalent course on social or behavioral research methods. Limited enrollment. Introduction to survey and questionnaire research methods with emphasis on how to ask questions. Social and psychological factors that influence survey response. Practical aspects of fielding survey and questionnaire research. Limited enrollment.
Offered irregularly. GE credit: QL. - Herek
108. Developmental Psychobiology (4) Lecture - 3 hours; laboratory - 2 hours. Prerequisite: course 101. The biology of behavioral development; survey and integration of the organismic and environmental processes that regulate the development of behavior. -I, II. (II, III.) Schank

## 120. Agent-Based Modeling (4)

Lecture/laboratory-4 hours. Prerequisite: course 100 or 101. Introduction to agent-based computer simulation and analysis with emphasis on learning how to model animals, including humans, to achieve insight into social and group behavior. Limited enrollment. GE credit: QL.-I. (I.) Schank

## 121. Physiological Psychology (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: courses 1, 41, 101. Pass One open to Psychology majors. Relationship of brain structure and function to behavior, motivation, emotion, language, and learning in humans and other animals. Methodology of physiological psychology and neuroscience. Not open for credit to students who have completed course 108. (Former course 108.)-I, II, III. (I, II, III.) Bales, Krubitzer
122. Advanced Animal Behavior (4)

Lecture -3 hours; laboratory -3 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 102. Pass One open to Psychology majors. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free living animals. (Same course as Neurobiol ogy, Physiology, and Behavior 150.) Not open for credit to students who have completed course 150. (Former course 150.) Offered irregularly.

## 123. Hormones and Behavior (3)

Lecture-3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101 and either course 101 or Neurobiology, Physiology, and Behavior 102. Pass One open to Psychology majors. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Neurobiology, Physiology, and Behavior 152.) Not open for credit to students who have completed course 152. (Former course 152.)-III. (III.) Bales, Trainor
124. Comparative Neuroanatomy (4)

Lecture - 3 hours; laboratory - 2 hours. Prerequisite: course 101 or Neurobiology, Physiology, and Behavior 100 or 101 . Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Neurobiology, Physiology, and Behavior 124.) GE credit: SL.-II. (II.) Krubitzer, Recanzone

## 125. Behavioral Genetics and Epigenetics (3)

Lecture-3 hours. Prerequisite: course 101. Review of basic principles in genetics and select topics in epigenetics with emphasis on behavior. Use of mod ern molecular methods to outline complex relationships between genes, environment, and behavior. II, III. (II, III.) Stolzenberg, Trainor

## 126. Health Psychology (4)

Lecture-4 hours. Prerequisite: course 1, 41, 101 Pass One open to Psychology majors only. Psychological factors influencing health and illness. Topics include stress and coping, personality and health, symptom perception and reporting, heart disease, cancer, compliance, and health maintenance and promotion. Not open for credit to students who have completed course 160.-III, III. (II, III.) Emmons, Moons

## 127. Animal Cognition (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: courses 1, 41, 101. Pass One open to Psychology majors. Integrative review of the historical backdrop, theoretical issues, and scientific methods of studying animal cognition in a wide range of species. Emphasis on learning processes, pattern recognition, and the neurobiology of learning and memory. Not open for credit to students who have completed course 134. (Former course 134.)
Offered irregularly.-Coss
130. Human Learning and Memory (4) Lecture-3 hours; discussion-1 hour. Prerequisite: courses 1, 41, 100, and either Statistics 13 or 102; or consent of instructor. Consideration of major theories of human learning and memory with critical examination of relevant experimental data.-I, II, III. (II, II, III.) Ranganath, Yonelinas

## 131. Perception (4)

Lecture-3 hours; independent library work. Prerequisite: courses 1,41. The cognitive organizations related to measurable physical energy changes mediated through sensory channels. The perception of objects, space, motion, events. - II. (II.) Geng

## 132. Language and Cognition (4)

Lecture-3 hours; term paper. Prerequisite: courses 1,41,100; or consent of instructor. Introduction to the cognitive processes involved in language comprehension and production. Topics include the biological foundations of language, speech perception, word recognition, syntax, reading ability, and prag matics. GE credit: WE. -I, II, III. (I, II, III.) Long, Swaab, Traxler

## 135. Cognitive Neuroscience: The Biological

 Foundations of the Mind (4)Lecture-4 hours;. Prerequisite: course 1, 41, or consent of instructor; course 101, 121, or 129 recommended. Neuroscientific foundations of higher mental processes including attention, memory, language, higher-level perceptual and motor processes, and consciousness. Emphasis on the neural mechanisms which form the substrates of human cognition and the relationship of mind to brain. - I, II, III. II, II, III.) Ekstrom, Geng, Janata, Mangun, Ranganath

## 136. Psychology of Music (4)

Lecture/discussion-3 hours; term paper. Prerequisite: courses 1, 41, and either 100 or 131 or Music $6 C$; or consent of instructor. Introduction to the mental and neural representations of musical structures and processes involved in perceiving, remembering, and performing music. Music and emotion. GE credit: WE. - III. (III.) Janata

## 137. Neurobiology of Learning \& Memory

 (4)Lecture -4 hours. Prerequisite: courses 1, 41, 101. Overview of the neural basis of learning and memory focusing on modern behavioral neuroscience research with animals. Topics include consolidation, neural plasticity, cellular competition for memory storage, and the role of neurogenesis in learning. I, III. (II, III.) Wiltgen

## 140. Developmental Psychology (4)

Lecture-4 hours. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction. Two units of credit allowed to students who have completed Human Development 100A or 100B. Not open for credit to students who have completed course 112. (Former course 112.)-I, II, III. (I, III, III.) Cross, Ghetti, Gibbs, Goodman, Graf Estes, Lagattuta, Oakes

## 141. Cognitive Development (4)

Lecture-3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass One restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/ nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Human Development 101.) GE credit: Wrt | WE.-I, II, III. (I, II, III.) Chen, Cross, Ghetti, Gibbs, Goodman, Graf Estes, Lagattuta, Rivera

## 142. Social and Personality Development

 (4)Lecture-3 hours; term paper. Prerequisite: Human Development 100A or 100B or course 140. Pass One open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Human Development 102.) GE credit: SocSci, Wrt | SS, WE.-I, II, III. (II, II, III.) Belsky, Gibbs, Hastings, Thompson

## 143. Infant Development (4)

Lecture-3 hours; extensive writing. Prerequisite: courses 1 and 41, and either course 140 or Human Development 100A. Psychological development in infancy. Topics include physical and motor development, sensory and nervous system development, and memory and cognitive development. Emphasis will be on evaluating theories, empirical research, and experimental methods for understanding infant development. GE credit: WE.-I. (I.) Oakes

## 146. The Development of Memory (4)

Lecture-3 hours; term paper. Prerequisite: courses 1, 41. Pass One open to Psychology majors. Theory and research on memory development with focus on infancy and childhood. Not open for credit to students who have completed course 133. (Former course 133.) GE credit: WE. - III. (III.) Ghetti, Rivera
148. Developmental Disorders (4)

Lecture/discussion-3 hours; term paper. Prerequisite: courses 1,41 , and either 140 or 141 or Human Development 100A or 100B. Current scientific knowledge of the influences of biological, cognitive, and environmental factors on the emergence of disorders with onset in childhood. Examples include autism spectrum, ADD/ADHD, dyslexia and dyscalculia. Emphasis placed on understanding these disorders, their causes and their treatments.-III, III. (II, III.) Rivera

## 151. Social Psychology (4)

Lecture-4 hours. Prerequisite: courses 1, 41. Pass
One open to Psychology majors. Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction; group tensions, norm-development, attitudes, values, public opinion, status. Not open for credit to students who have completed course 145. (Former course 145.)I, II, III. (I, II, III.) Ledgerwood, Moons, Sherman

## 152. Social Cognition (4)

Lecture-4 hours. Prerequisite: courses 1 and 41 Examines how social factors influence how we attend to, encode, and process information and how these mental processes affect subsequent judgments and behavior. - III. (III.) Pickett, Sherman

## 153. Psychology and Law (4)

Prerequisite: courses 1, 41. Pass One open to Psychology majors. Current theoretical and empirical issues in the study of psychology and law. Topics include eyewitness testimony, child abuse, jury decision making, juvenile delinquency and criminology, prediction of violence, insanity defense, and memory for traumatic events. Not open for credit to students who have completed course 115. (Former course 115.) Offered in alternate years. - III. Goodman
154. Psychology of Emotion (4)

Lecture-4 hours. Prerequisite: course 1, 41. Pass One open to Psychology majors. Introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge. Not open for credit to students who have completed course 143. (Former course 143.)-I, II, III. (I, II, III.) Moons, Shaver

## 155. Environmental Awareness (4)

 Lecture-4 hours. Prerequisite: course 1. Pass One open to Psychology majors. Interactions of people and the environments they construct. Research methods for evaluating designed environments and reviews of current research in environmental psychology. Not open for credit to students who have completed course 144. (Former course 144.) Offered irregularly. GE credit: SocSci | SS.-Coss
## 157. Stereotyping, Prejudice, and Stigma

 (4)Lecture/discussion-4 hours. Prerequisite: course 151. Social psychological underpinnings of stereotyping, prejudice, and stigma from sociocultural, motivational, and cognitive perspectives. Topics include: origins, maintenance, change, effects on person perception and memory, and the automaticity/controllability of stereotyping and prejudice. GE credit: Div. - II. (II.) Sherman

## 158. Sexual Orientation and Prejudice (4)

Lecture/discussion -4 hours. Prerequisite: course 1, 41. Pass One open to Psychology majors. Current scientific knowledge about sexual orientation and prejudice based on sexual orientation. Emphasis on learning the skills necessary for a critical understanding of science and public policy issues relevant to sexuality. GE credit: SocSci, Div, Wrt \| ACGH, DD, SS, WE. - II. (II.) Herek
159. Gender and Human Reproduction (4) Lecture-4 hours. Prerequisite: course 1 and 41 . Pass One open to Psychology majors. Psychology of reproduction. Reproductive events over the course of an individual's life, including sexual development, mate choice, relationships, and reproduction. Biological and social psychological explanations at the levels of mechanism and evolutionary function. Not open for credit to students who have completed former course 149. (Formally course 149.) - III. (III.) Scheib

## 161. Psychology of the Self (4)

Lecture-4 hours. Prerequisite: courses 1 and 41 . Psychological theory and research on the self. Topics include: self-knowledge, self-esteem, self-regulation, self-presentation, cognitive and emotional aspects of the self, and the role of the self in shaping social interaction.-l. (I.) Pickett

## 162. Introduction to Personality Psychology (4)

Lecture-3 hours; term paper. Prerequisite: course 1, 41. Pass One open to Psychology majors. Scientific study of personality. Methods of personality research. Overview of current research and theory in the field of personality psychology. Not open for credit to students who have completed former course 147. GE credit: SocSci, Wrt | SS. - II, III. (II, III.) Robins, Shaver
165. Introduction to Clinical Psychology (4) Lecture-4 hours. Prerequisite: courses 1, 41, 168, and either 140 or 151. Major theoretical formulations in the history of clinical psychology, from classical psychoanalysis to contemporary existentialism and behavior modification. A survey, based on lectures, films, and tapes, of what clinical psychologists do, including methods of appraisal, professional roles, and approaches to treatment. - III. (III.) Zane

## 168. Abnormal Psychology (4)

Lecture-4 hours. Prerequisite: courses 1, 41.
Descriptive and functional account of behavioral disorders, with primary consideration given to neurotic and psychotic behavior. GE credit: SocSci | SS.-I, II, III. (I, II, III.) Schepeler, Zane

## 492 Psychology

170. Psychology of Religion (4)

Lecture-4 hours. Prerequisite: courses 1 and 41
Major theories, issues, data, and research methodologies of the psychology of religion. Religious experience and expression; religious development in childhood, adolescence, and adulthood; conversion; religious influences on physical and mental health; cross-cultural perspectives. GE credit: Div,
Wrt \| WE.-III. (III.) Emmons
175. Genius, Creativity, and Leadership (4) Lecture-3 hours; term paper. Prerequisite: course 1 and 41 or the equivalent or consent of instructor. The phenomenon of genius examined from a diversity of theoretical, methodological, and disciplinary perspectives, with an emphasis on outstanding creativity and leadership in art, music, literature, philosophy, science, war, and politics. GE credit: SocSci,
Wrt \| SS, WE. - I, III. (I, III.) Simonton

## 180A. Research in Cognitive and Perceptual Psychology (4)

Lecture-2 hours; laboratory-4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in general experimental psychology (general research design and analysis, perception, cognition, cognitive development, etc.). Specific content will vary from quarter to quarter. May be repeated one time for credit when content differs. Offered irregularly.

## 180B. Research in Psychobiology (4)

Lecture-2 hours; laboratory-4 hours. Prerequisite: course 101, three additional upper division courses in Psychology, and consent of instructor. Empirical research on selected topics in psychobiology (animal learning, animal behavior, physiological and sensory psychology, developmental psychobiology, computer modeling of neural systems). Content varies. May be repeated one time for credit when content differs. Offered irregularly.

## 180C. Research in Personality and Social Psychology (4)

Lecture-2 hours; laboratory-4 hours. Prerequisite: course 41, and four upper division Psychology courses and consent of instructor. Empirical research on selected topics in personality and social psychology (personality, social psychology, organizational psychology, etc.). Content will vary from quarter to quarter. May be repeated one time for credit when specific content differs. Offered irregularly.

## 185. History of Psychology (4)

Lecture-3 hours; term paper. Prerequisite: courses 1,41, upper division standing or consent of instructor. Pass One open to Psychology majors. Development of psychological thought and research in context of history of philosophy and science. Not open for credit to students who have completed course 120. (Former course 120.) GE credit: SocSci, Wrt | SS, WE.-I. (I.) Simonton

## 190. Seminar in Psychology (4)

Seminar-4 hours. Prerequisite: junior or senior standing; major in psychology or consent of instructor. Intensive treatment of a special topic or problem of psychological interest. May be repeated for credit in different subject area.-I, II, III. (I, II, III.)
190X. Upper Division Seminar (1-2)
Seminar-1-2 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Psychology. Emphasis on student participation in learning. May not be repeated for credit. Limited enrollment.
192. Fieldwork in Psychology (1-6)

Fieldwork-1-6 hours. Prerequisite: upper division standing in psychology and consent of instructor. Supervised internship off and on campus, in community and institutional settings. Maximum of four units may be used towards satisfaction of upper division major requirement. May be repeated one time for credit. Limited enrollment (P/NP grading only.)

194HA-194HB. Special Study for Honors Students (3-3)
Independent study-9 hours. Prerequisite: senior standing in Psychology and qualifications for admis sion into college honors program, and consent of instructor; at least one course from 180A, 180B 180C or 199 strongly recommended. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. (Deferred grading only, pending completion of sequence.) GE credit: WE

## 197T. Tutoring in Psychology (1-3)

Tutoring - 1-3 hours. Prerequisite: upper division standing and consent of instructor. Intended for advanced undergraduate students who will lead dis cussion sections in Psychology courses. May be repeated for credit for a total of 8 units. (P/NP grading only.)
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

200. Proseminar in Psychology (3)

Seminar-2 hours; independent study - 1 hour. Prerequisite: graduate standing in Psychology or consent of instructor. Introduces matriculating graduate students to research activities of departmental faculty. ( $S / U$ grading only.) -l. (I.)

## 201. Research Preceptorship (4)

Laboratory-3-4 hours; discussion-3-5 hours. Prerequisite: consent of instructor. May be repeated for credit. (S/U grading only.) - I, II, III. (I, II, III.)
202. Research Seminar (1)

Seminar-1 hour. Prerequisite: graduate standing in psychology. Presentation of graduate research to program faculty and graduate students. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 204A. Statistical Analysis of Psychological Experiments (5)

Lecture-4 hours; laboratory-2 hours. Prerequisite: Statistics 102 or equivalent; graduate standing in Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Analysis of variance, factorial and repeated measures, and tests of trends. Not open for credit to students who have completed course 206.-I. (I.) Ferrer, Widaman
204B. Causal Modeling of Correlational Data (4)
Lecture-4 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Examination of how to make causal inferences from correlational data in the behavioral sciences. Emphasis on testing rival causal models using correlations among observed variables. Beginning with multiple regression analysis, discussion advances to path analysis and related techniques. - II. Widaman
204D. Advanced Statistical Inference from Psychological Experiments (5)
Lecture-4 hours; laboratory-2 hours. Prerequisite: course 204A or the equivalent or consent of instructor. Advanced topics in statistical inference, which may include probability theory, sampling distributions, statistical inference and hypothesis testing, nonparametric statistics, Bayesian approaches, and advanced issues in analysis of variance. Not open for credit to students who have completed course 205. - III. (III.) Blozis

## 205A. Applied Multivariate Analysis of

 Psychological Data (4)Lecture-4 hours. Prerequisite: three courses from 204A, 204B, 204C, 204D or the equivalents, or consent of instructor. Review of the major methods of multivariate data analysis for psychological data. Statistical routines using a linear algebra-based com-
puting language. Topics include multivariate analysis of variance, discriminant analysis, canonical analysis factor analysis, and component analysis. Not open for credit to students who have completed course 207B. (Former course 207B.) Offered in alternate years. - II. Ferrer

## 205B. Factor Analysis (4)

Lecture -4 hours. Prerequisite: graduate standing, course 204A and 204B or the equivalent or consen of instructor. Theory and methods of factor analysis, including exploratory factor analysis, confirmatory factor analysis, and principal component analysis. Offered in alternate years. - II. Widaman
205C. Structural Equation Modeling (4)
Lecture-3 hours; term paper. Prerequisite: graduate standing; course 204A and 204B or the equivalent or consent of instructor. Theory and methods of structural equation modeling, including path analysis, confirmatory factor analysis, multiple-group modeling and latent growth curve modeling. Offered in alternate years. -Ferrer, Grimm, Widaman

## 205D. Multilevel Models (4)

Lecture-4 hours. Prerequisite: course 204A, graduate standing or consent of instructor. Introduction to statistical techniques for the analysis of normal, hierarchically structured data, such as cross-sectional clustered data or repeated-measures data. Topics include hierarchical linear models, latent growth curve models, and how these methods handle unbalanced and/or missing data.-II. (II.) Blozis

## 205E. Applied Psychometrics and

## Measurement Theory (4)

Lecture-4 hours. Prerequisite: course 204A or equivalent; graduate standing in Psychology or consent of instructor. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis, and latent trait theory. Not open for credit to students who have completed course 204 or 204C. Offered in alternate years. - III. Widaman
205F. Item Response Theory (4)
Lecture -3 hours; term paper. Prerequisite: course 204A or the equivalent; graduate standing in Psychology or consent of instructor. Item response theory allows for the creation of precise measurement instruments in psychological testing. Review Classical Test Theory, and then cover basic IRT models through advanced applications. Offered in alternate years. - III. Grimm

## 206A. Theoretical Foundations: Research

## Methods in Psychology (4)

Lecture/discussion - 3 hours; term paper. Restricted to graduate student status. Examines the philosophy and research practices underlying experimental psy chology. Topics to be covered include philosophy of science/epistemology, research design, inference and bias in research, theory development, validity, the social context of research, and critical thinking about research. Offered irregularly. - III. (III.) Pickett, Sherman
206B. Research Methods in Psychology: Applications in Social-Personality Research (4)

Lecture/discussion - 3 hours; term paper. Restricted to graduate student status. Overview of the research designs, assessment methods, and statistical procedure used by social-personality psychologists. Focus on the practical issues that arise when using each method in specific research contexts. Offered in alternate years. - (II.) Robins

## 207. Survey and Questionnaire Research

 Methods (4)Lecture/discussion-4 hours. Prerequisite: completion of a course on social or behavioral research methods, graduate standing. Survey and questionnaire research methods with emphasis on how to ask questions. Cognitive, motivational, and social processes that influence how respondents answer questions; sampling techniques; Internet resources; practical aspects of fielding survey and questionnaire research. Offered irregularly.-I. Herek

## 208. Physiological Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. A conceptual analysis of the contributions of neuroanatomy, neurophysiology and neurochemistry to an understanding of animal and human behavior. - III. Bales

## 208A. Fundamentals of Human

## Electrophysiology (4)

Lecture/discussion - 1.5 hours; laboratory-3 hours; extensive problem solving -1.5 hours.; project-3 hours. Restricted to 15 students. In-depth introduction and hands-on experience with the event-related potential (ERP) method in the study of attention, executive control, memory, language and social cognitive neuroscience. - II. (II.) Luck, Swaab

## 209A. Introduction to Programming:

## Matlab (4)

Lecture/laboratory-3 hours. Prerequisite: graduate standing or consent of instructor. The Matlab programming environment as a means of organizing, analyzing, and visualizing scientific data. Basic programming concepts such as variables, loops, conditional branching, and efficient programming techniques will be emphasized. Offered irregularly. - Janata

## 210. Fundamentals of Cognitive Neuroimaging (3)

Lecture/discussion-3 hours. Prerequisite: basic knowledge of inferential statistics and experimental psychology. Introduction to empirical foundations and methodology of neuroimaging, emphasizing pragmatics of functional magnetic resonance imaging (fMRI) to study cognition. Topics include MR physics, the relationship between neural activity and the BOLD response, experimental design, and analysis of fMRI data.-Ranganath
211 . Advanced Topics in Neuroimaging (2) Seminar-2 hours. Prerequisite: course 210 or consent of instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of FMRI with EEG/MEG. (Same course as Neuroscience 211 and Neurobiology, Physiology, and Behavior 21 1.) (S/U grading only.) - II. (II.) Miller

## 212A. Developmental Psychology:

Cognitive and Perceptual Development (4) Seminar-4 hours. Prerequisite: graduate standing or consent of instructor, completion of undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human cognitive and perceptual development. Development of perception, memory, concepts (e.g., theory of mind, concepts about number), problem solving, and language from infancy to adolescence.-I. Ghetti, Goodman, Graf Estes,
Lagattuta, Rivera
212B. Developmental Psychology: Social, Emotional, and Personality Development (4)

Seminar-4 hours. Prerequisite: graduate standing or consent of instructor, completion of an undergradvate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human social, emotional, and personality development. Development of emotions, moral reasoning and behavior, personality, self-concept, and social cognition from infancy to adolescence (may include adulthood). - Thompson
217. Behavioral Genetics (4)

Lecture-3 hours; laboratory/discussion - 1 hours; term paper. Prerequisite: graduate standing. Restricted to 20 students. Review basic principles in genetics and select topics in molecular genetics with emphasis on behavior. Use of modern molecular methods to outline complex relationships between genes, environment, and behavior. Not open for credit to students who have completed course 251.-II. (II.) Trainor

## 218A. Fundamentals of Animal Behavior

 (5)Lecture/discussion-4 hours; discussion-1 hour. Prerequisite: consent of instructor; upper-division undergraduate introduction to the biology of behavior, such as course 101, 122, 123, Neurobiology, Physiology, and Behavior 102, 150, 152, Wildlife, Fish, and Conservation Biology 141, Entomology 104, or Animal Science 105. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as Animal Behavior 218A.)-I. (I.) Sih
218B. Fundamentals of Animal Behavior (5)

Lecture/discussion-4 hours; discussion-1 hour. Prerequisite: consent of instructor; course 209A. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as Animal Behavior 218B.)-II. (II.) Sih

## 220. History of Psychology (4)

Lecture-2 hours; seminar-2 hours. Prerequisite: graduate standing in psychology or consent of instructor. A lecture-seminar on the history of psychology and on the applicability of early psychological theory and research to contemporary investigations. Offered in alternate years. Simonton
221. Academic Writing in Psychology (4)

Lecture/discussion - 3 hours; term paper. Prerequisite: consent of instructor. Class size limited to 10. Strategies for developing and honing academic writing skills and writing productivity, with a particular focus on how to write a clear and compelling empirical journal article in psychology. May be repeated four times for credit with consent of instructor if student chooses to focus on a substantially different writing project. Offered irregularly.-l. Ledgerwood

## 230. Cognitive Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the mental processes by which knowledge is acquired, manipulated, stored, retrieved and used. Offered in alternate years.-I. Long, Mangun

## 231. Sensation and Perception (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Analysis of the role of sensory processes and perception in experience and their effects on behavior. Offered in alternate years. - III.

## 241. Attitudes and Social Influence (4)

Lecture/discussion-3 hours; term paper. Prerequisite: consent of instructor. Survey of theory and research in the field of attitudes and social influence. Topics include attitude definition and measurement, major theories of attitude formation and change, the relationship between attitudes and behavior, and recent directions and controversies. Offered irregu-larly.-Ledgerwood

## 243. Social Cognition (4)

Lecture/discussion-3 hours, term paper. Prerequisite: consent of instructor. Processes underlying the perception, memory, and judgment of social stimuli, the effects of social and affective factors on cognition, and the interpersonal consequences of those processes. Topics include automaticity/control, motivated cognition, person perception, stereotyping, attitudes, and persuasion. Offered irregularly. - Pickett, Sherman
244. Stereotyping, Prejudice, and Stigma (4)

Lecture/discussion - 3 hours, term paper. Prerequisite: consent of instructor. This course examines the social psychological underpinnings of stereotyping, prejudice, and stigma, including sociocultural, motivational, and cognitive factors. Offered irregu-larly.-Herek, Sherman

## 245. Social Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in social psychology.-III. (III.) Johnson,

## Pickett, Robins

## 247. Personality (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and research in human personality. - II. (II.) Robins

## 250. Comparative Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. The study of animal behavior in an evolutionary and comparative framework.-II.

## 251. Topics in Genetic Correlates of

## Behavior (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Theory and experiment in the genetic contributions to animal and human behavior. May be repeated for credit when topic differs. Offered in alternate years.

## 252. Topics in Psychobiology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Critical study in a selected area of psychobiology. May be repeated for credit when content differs. Offered in alternate years.

## 261. Cognitive Neuroscience (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Neuroscience 223.) - III. (III.) Ranganath, Swaab
263. Topics in Cognitive Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Selected topics in language processing, memory, perception, problem solving, and thinking, with an emphasis on the common underlying cognitive processes. May be repeated for credit when content differs. Offered in alternate years.

## 264. Topics in Psycholinguistics (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Discussion of fundamental issues in the psychology of language. May be repeated for credit when content differs. Offered in alternate years.
270. Topics in Personality and Social Psychology (4)
Seminar-4 hours. Prerequisite: graduate standing or consent of instructor. Critical study of a selected area of personality or social psychology. May be repeated for credit when topic differs.-I. (I.)

## 272. Topics in Developmental Psychology (4)

Seminar-4 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Selected topics in developmental psychology, including developmental neuroscience, memory development, infancy, cognitive development, social development, child maltreatment, children and law, perceptual development, emotional development, children at risk, and adolescence, with emphasis on developmental processes and developmental theory. May be repeated for credit. Offered irregularly.
289A. Current Research in Psychology (2)
Seminar-2 hours. Prerequisite: graduate standing in Psychology or consent of instructor. Contemporary theory and empirical research in specialized topics in psychology. Topics include developmental attachment, social neuroscience, mental health, emotion, sexual orientation and identity. May be repeated for credit if topic differs. (Deferred grading only, pending completion of sequence.)
289B. Current Research in Psychology (2)
Discussion-2 hours. Prerequisite: course 289A; graduate standing in Psychology or consent of instructor. Intensive examination of contemporary theory and empirical research on a specialized topic
in psychology. Sample topics include developmental attachment, social neuroscience, culture and mental health, electrophysiology and cognitive neuroscience, emotion, implicit cognitive processes, sexual orientation and identity, and attention. May be repeated for credit if content differs. (Deferred grad ing only, pending completion of sequence.)
290. Seminar (4)

Seminar-4 hours. Prerequisite: graduate standing in psychology or consent of instructor. Seminar devoted to a highly specific research topic in any area of basic psychology. Special topic selected for a quarter will vary depending on interests of instructor and students. -I, II, III. (II, II, III.)

## 298. Group Study (1-5)

(S/U grading only.)
299. Research (2-9)
(S/U grading only.)
299D. Dissertation Research (1-12)
Prerequisite: consent of instructor. ( $S / \cup$ grading only.)

## Professional

390A-390B. The Teaching of Psychology (6-4)
Discussion, lecture, practice. Prerequisite: advanced graduate standing in psychology or a closely related discipline and consent of instructor. Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evalvation. Practical experience in the preparation and presentation of material. ( $\mathrm{S} / \mathrm{U}$ grading only; deferred grading only, pending completion of sequence.) - II-III. (II-III.)
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Quantitative Biology and Bioinformatics

## (College of Biological Sciences)

The interdisciplinary minor in Quantitative Biology and Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of quantitative approaches, and develop the interdisciplinary perspective that is now the foundation of modern biological research and training.
The minor in Quantitative Biology and Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sciences.

## Minor Program Requirements:

Quantitative Biology and
Bioinformatics
Core Courses.
Programming: Computer Science
Engineering 10 or 30 or the
equivalent* $\qquad$
Quantitative Biology: Biological Sciences
132 or Mathematics 124
.4
Bioinformatics: Computer Science
Engineering 124 or 129
Quantitative and Computational Preparation..
................... 4
Applied course from the following
Applied Science Engineering 115;
Biomedical Engineering 105; Computer
Science Engineering 122, 130;

Mathematics 128A, 128B, 128C, 135A;
Statistics 130A, 131A, 141A
*The programming requirement may be satisfied by previous experience and therefore may not entail college course credit. Please see your minor adviser for this determination and its possible impact on your unit requirements for the minor.
Restricted Electives $\qquad$ . 6-8
Complete two or more courses from the following list to achieve a total of 18-24 units: Biological Sciences 134, 180L, 181, 183; Biomedical Engineering 102, 117,
140, 141, 151; Biotechnology 150;
Computer Science Engineering 165A, 166;
Evolution and Ecology 102, 103, 104,
175; Microbiology 105; Molecular and Cellular Biology 123, 143, 182;
Neurobiology, Physiology, and Behavior
166, 167; one course from: Environmental
Science and Policy 121 or Wildlife, Fish,
and Conservation Biology 122
Restrictions. No more than two upper division courses from a single department may be offered in satisfaction of the minor requirements. Only one course used to satisfy a requirement for the minor may be applied toward a student's major.
Minor Adviser. Consult the Biology Academic Success Center (BASC). 1023 Sciences Laboratory Building; 530-752-0410;

Allison Coudert, Ph.D., Professor
Mark Elmore, Ph.D., Assistant Professor
Naomi Janowitz, Ph.D., Professor
Meaghan O'Keefe, Ph.D., Assistant Professor W. Flagg Miller, Ph.D., Associate Professor Mairaj Syed, Ph.D., Assistant Professor
Baki Tezcan, Ph.D., Associate Professor Archana Ventakesan, Ph.D., Assistant Professor Keith Watenpaugh, Ph.D., Associate Professor

## Emeriti Faculty

Whalen W. Lai, Ph.D., Professor Emeritus

## The Major Program

Religion is a major force in human experience. It has shaped the world's history, literature, art, culture, politics, ethics, and economics. In addition to offering courses in all the major religious traditions (Judaism, Christianity, Islam, Hinduism, and Chinese and Japanese religions), the Religious Studies Program has developed cross-cultural courses dealing with religious symbols, myths, and rituals in written texts, art, theater, and film, and the Internet, as well as, thematic courses dealing with such topics as religion and the body, the rise of fundamentalism, religion and science, and religion and violence.
The Program. The major introduces students to the academic study of religion. Students can choose from a broad range of courses both in the program itself and in other departments and programs-history, philosophy, psychology, sociology, anthropology, American studies, classics, and medieval studies. In addition to studying religious thought per se, students in the major can also study the way religion has shaped human behavior in such matters as family life, gender roles, ethics, artistic life, concepts of individual freedom, the pursuit of science, and economics. For some students, Religious Studies is an appropriate second major and combines well with anything from philosophy to international agricultural development, political science, and the physical sciences.
Career Alternatives. Because of the program's focus on developing critical thinking, writing, and reading skills, students who major in Religious Studies are well prepared to enter a variety of careers, including teaching, the health professions, law, business, and government. In an increasingly global society, knowledge of the world's religious traditions and practices has become an essential part of a student's education.

## A.B. Major Requirements:

## UNITS

Preparatory Subject Matter..................... 20
(A) One course from the Religious Studies 1
series .................................................. 4
(B) Four courses from other Religious Studies
lower division offerings
16
Depth Subject Matter
.40
Religious Studies 100............................. 4
Nine upper division Religious Studies courses*
................ 36
Four of these courses may be upper division courses related to religion that are offered by other departments and taken with the approval of a Religious Studies adviser.
Total Units for the Major 60
Recommended. A reading knowledge of a foreign language is highly recommended.
Course Equivalents. The major advisers have a list of lower and upper division courses that can be substituted for courses suggested above.
Major Advisers. Consult the Program office.
Minor Program Requirements:
Religious Studies ..................................... 20
Lower division course .............................. 4
Upper division courses .......................... 16
Religious Studies 100 required. Some substitutions from other departments or programs allowed with consent of adviser.
Minor Advisers. Same as major advisers.
Honors and Honors Program. A student
becomes eligible for graduation with honors by
meeting the minimum GPA and course requirements established by the College of Letters and Science. Upon successful completion of the additional requirements of the College of Letters and Science Honors
Program, individual students may be recommended
by the program for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major.
Education Abroad Program. The Religious Studies program encourages students to study in the Summer Abroad program, the Quarter Abroad program, or the Education Abroad program. With the approval of a major adviser, applicable courses taken abroad may be accepted in the major or minor programs.
Teaching Credential Subject Representative. See the Teaching Credential/M.A. Program on page 115 .
Hebrew. Students interested in Hebrew courses should see http://classics.ucdavis.edu/hebrew.
Human Rights Minor. Students interested in the Human Rights minor should see http:// humanrightsminor.ucdavis.edu.
Jewish Studies. Students interested in Jewish Studies should see http://jewishstudies.ucdavis.edu.

## Courses in Religious Studies (RST)

Lower Division

## 1. Survey of Religion (4)

Lecture-3 hours; discussion-1 hour. Basic concepts introduced through readings of the primary religious literature. Discussion of central ideas (creation, history, law, prophecy, suffering, mysticism, asceticism, karma, reincarnation, moksha, etc.); readings from the Bible, Bhagavad Gita, the Koran, selections from Plato and early Buddhist writings. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, VL, WE. - II. (II.)

## 1A. Pilgrimage (4)

Lecture-3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on the theme of pilgrimage in different religious traditions. Not open to students who have taken course 3A. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC,
WE.-I, II, III, IV. (I, II, III, IV.) Tezcan, Venkatesan

## 1B. Death and Afterlife (4)

Lecture-3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on the theme of death and the afterlife in different religious traditions. Not open to students who have taken course 3B. GE credit: ArtHum, Div, Wrt \| AH, OL, VL, WC, WE.I, II, III, IV. (I, II, III, IV.)

## 1C. Sacrifice (4)

Lecture-3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on the theme of sacrifice in different religious traditions. Not available to those who have taken course 3C. Offered irregularly. GE credit: ArtHum, Div, Wrt \| AH, OL, VL,
WC, WE. -I, II, III, IV. (II, II, III, IV.) Coudert

## 1D. Conversion (4)

Lecture-3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on the theme of conversion in different religious traditions. Not available to those who have taken course 3D. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC,

## WE. -I, II, III, IV. (I, II, III, IV.)

## 1E. Fundamentalism (4)

Lecture-3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on the idea of fundamentalism in different religious traditions. Not available to those who have taken course 3 E . Offered irregularly. GE credit: ArtHum or SocSci, Div,
Wrt | AH or SS, OL, VL, WE.-I, II, III, IV. (I, II, III,

## IV.) Watenpaugh

## 1F. Religion Today (4)

Lecture-3 hours; discussion - 1 hour. Introduction to comparative religion, focusing on different religious traditions in the contemporary world. GE credit: ArtHum, Div, Wrt | AH, DD, WC, WE.-I, II, III, IV. (I, II, III, IV.)
1G. Myth, Ritual, and Symbolism (4)
Lecture-3 hours; discussion - 1 hour. Myths, rituals and religious symbols found in a variety of religious traditions including examples from ancient and con-
temporary religious life. Variety of religious phenomena; validity of different approaches to the study of religion. Not open to students who have taken and received unit credit for course 2. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE. -I, II. (I, II) Janowitz

## 1H. Religion and Law (4)

Lecture-3 hours; discussion - 1 hour. Methods used in the study of religion, focusing on a particular theme in a number of religious traditions. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE. - Vidas

## 10. Contemporary Ethical Issues (2)

Lecture -2 hours. Presents challenging, contemporary ethical issues from a multicultural perspective Rotating topics will include Ethical Eating, Capital
Punishment, Euthanasia, Poverty, and Animal Rights. May be repeated for credit. GE credit: ArtHum,
Wrt | AH, WE. - III. (III.) Coudert, Janowitz

## 10A. Contemporary Ethical Issues (2)

Discussion-1 hour; extensive writing. Prerequisite: concurrent enrollment in course 10 required. Restricted to students enrolled in course 10. GE topical breadth and diversity credit only with concurrent enrollment in course 10. Discussion of the readings assigned for course 10 and completion of a major research paper. May be repeated for credit. GE credit: ArtHum, Div, Wrt | AH, WE. - II. (II.) Coudert, Janowitz

## 11. Ethical Eating (4)

Lecture-3 hours; term paper or discussion - 1 hour. Introduction to the complex and varied ethical, religious, and cultural meanings that food has had across the centuries and globe. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE. - Coudert
12. The Emergence of Judaism, Christianity and Islam (4)
Lecture-3 hours; discussion-1 hour. History of religion in the ancient Near East and Mediterranean,
from the Persian period through the rise of Islam.
Emphasis on historical and social contexts of the formation of new traditions, in particular Judaism,
Christianity, and Islam. Offered in alternate years. GE credit: ArtHum, Div, Wrt \| AH, OL, WC, WE. I, III. (I, III.)

## 15Y. Reading War/Fighting War (4)

Lecture-2 hours; web electronic discussion-1 hour; extensive writing. Introduction to both classic religious texts about war and a set of actual scenarios drawn from the experience and training of soldiers in recent military conflicts. Offered irregularly. GE credit: ArtHum, Div, Wrt | ACDH, AH, DD, OL, VL, WC, WE. - (III.) Janowitz

## 21. Hebrew Scriptures (4)

Lecture-3 hours; term paper or discussion. Selected texts from the Hebrew Scriptures (Genesis II Chronicles) and review of modern scholarship on the texts from a variety of perspectives (historical, literary, sociological, psychological). Course work is based on an English translation and no knowledge of Hebrew is required. GE credit: ArtHum, Div,
Wrt | AH, WC, WE.-I. (I.)

## 23. Introduction to Judaism (4)

Lecture/discussion - 3 hours; term paper. Introduction to the study of religion using examples from the rituals, art and holy texts of Judaism. No prior knowledge of either Judaism or the study of religion is necessary. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WC, WE. - II. (II.)

## 30. Religions of South Asia (4)

Lecture-3 hours; discussion - 1 hour. Introduction to South Asian religions, including Hinduism, Buddhism, Islam, Jainism and Sikhism. Traces historical developments from Vedic texts and their ascetic reformulation by sages such as Yajnavalkya, Siddhartha Gautama, and Mahavira into our global present. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.-I, II. (I, II.) Elmore, Venkatesan

## 40. New Testament (4)

Lecture-3 hours; discussion-1 hour. New Testament literature from critical, historical, and theological perspectives. GE credit: ArtHum, Wrt | AH, WC, WE.-I. (I.) Chin

## 42. Religion and Science Fiction (4)

Lecture-3 hours; term paper. Representations of actual and fictional religious movements in science fiction and fantasy writing and film. Examination of: the characteristics of religion and religiosity in fictional religious movements; the relationship between religion, science, and technology in modern speculative fiction. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WE. -I, II, III, IV. (I, II, III, IV.) Chin

## 45. Christianity (4)

Lecture/discussion - 3 hours; term paper or discussion. Major concepts and practices in the Christian tradition. Survey of the history of Christianity and Christian expansion from antiquity to modern times Course pays particular attention to Christianity in China, India, Africa, the Middle East, and Latin America. Offered in alternate years. GE credit: ArtHum | AH, VL, WC, WE.-I, II, III, IV. Chin
60. Introduction to Islam (4)

Lecture/discussion-3 hours; term paper or discus-sion-1 hour. Introduction to topics central to the Islamic tradition. Muhammad, the Qur'an, Islamic law, theology, philosophy, cosmology, worship, and mysticism. Race and gender in Islam, Islamic revival, and varying experiences of Islam in different historical and cultural settings. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE.-(I.) Tezcan
65C. The Qur'an and Its Interpretation (4) Lecture/discussion-3 hours; extensive writing. The Qur'an, its history, its various functions in the lives of Muslims, and its different interpretations. Quranic themes such as God and humankind, nature and revelation, eschatology and Satan. Islam and other religions; women, gender, and sexuality. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE. - (III.) Tezcan

## 67. Modern Hinduism (4)

Lecture-3 hours; term paper. Historical survey of modern Hinduism from the early nineteenth century to the present. Topics include Rammohun Roy, Sir William Jones, and Mahatma Gandhi, nationalism, post-colonialism and diasporic religion. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.-II. Elmore, Venkatesan

## 68. Hinduism (4)

Lecture -3 hours; writing. Hindu tradition from ancient to modern times. Multiplicity of religious forms within Hinduism with mention of Jainism, Buddhism, and Sikhism and their relation to the mainstream of Hindu religion. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.-I.
69. Introduction to Hindu Mythology (4)

Lecture/discussion-3 hours; term paper or discussion -1 hour. Survey of the major narrative traditions within Hinduism, including epic literature and local stories in oral, textual, visual and performative forms. Offered in alternate years. GE credit: ArtHum, Div, Wrt \| AH, VL, WC, WE.-Venkatesan

## 70. Religion and Language (4)

Lecture/discussion-3 hours; term paper. Basic toolkit for studying religious discourse in a variety of traditions. Concentration on the sacred and profane, the wondrous and ordinary, and the mystical and reasonable. GE credit: ArtHum, Div, Wrt | AH, WC, WE. -I, II. (I, II.) Miller
75. Introduction to Chinese Philosophy (4) Lecture/discussion-4 hours. Introduction to Chinese philosophy from classical pre-modern times; emphasis on basic concepts and their impact on social conduct; the Age of Philosophers, the Han synthesis, the medieval Buddhist contribution. Offered irregularly.
80. Religion, Gender, Sexuality (4)

Lecture/discussion-3 hours; term paper. Constructions of gender and sexuality within one or more religious traditions, pre-modern and modern. Emphasis on the interaction between religious, medical, and ethical definitions of the human body and sexual behavior. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WE.-II.

## 90. Human Rights (4)

Lecture/discussion-3 hours; term paper. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. GE credit: ArtHum or SocSci, Div | AH or SS, WC, WE. -I, II. (I, II.) Watenpaugh

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.)
99. Special Study for Lower Division Undergraduates (1-5)
(P/NP grading only.)

## Upper Division

## 100. Study of Religion: Issues and Methods

 (4)Lecture-3 hours; term paper. Principal issues and methods of Religious Studies and associated fields. GE credit: ArtHum or SocSci | AH or SS, WC, WE. -III. (III.)

## 102. Christian Origins (4)

Lecture/discussion - 3 hours; term paper. Prerequisite: course 40. Development of Christianity from the end of the first century through the major controversies of the fifth century. Emphasis on the relationship between the new religious movement and the Roman Empire, and issues of early Christian identity and diversity. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-Chin

## 103. Medieval and Byzantine Christianity

Jenny Kaminer, Ph.D. (German and Russian)
Olga Stuchebrukhov, Ph.D. (German and Russian)

## Emeriti Faculty

James Gallant, Ph.D., Lecturer Emeritus
Daniel Rancour-Laferriere, Ph.D., Professor Emeritus Valerie A. Tumins, Ph.D., Professor Emerita

## The Major Program

The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.

The Program. The major program instructs students in speaking, understanding, reading, and writ ing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions.
Internships and Career Alternatives. Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter ..................0-27

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

299. Individual Study (1-12)

Prerequisite: graduate standing. Restricted to graduate students. May be repeated for credit. (S/U grading only)-I, II, III. (I, II, III.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
May be repeated for credit. (S/ $U$ grading only.)-I, II, III. (I, II, III.)

## Science and Society

(College of Agricultural and Environmental Sciences) David M. Rizzo, Ph.D., Program Director
Program Office. 152 Hutchison Hall
530-754-7277

## Faculty

Arnold Bloom, Ph.D., Professor (Plant Sciences)
Richard M. Bostock, Ph.D., Professor
(Plant Pathology)
James Carey, Ph.D., Professor (Entomology)
Gita Coaker, Ph.D., Assistant Professor
(Plant Pathology)
Edward Caswell-Chen, Ph.D., Professor (Nematology)
Douglas R. Cook, Ph.D., Professor (Plant Pathology) Randy Dahlgren, Ph.D., Professor (Land, Air and

Water Resources) Academic Senate Distinguished Teaching Award
R. Michael Davis, Ph.D., Professor and Specialist in

Cooperative Extension (Plant Pathology)
Lynn Epstein, Ph.D., Professor (Plant Pathology)

Albert Fischer, Ph.D., Professor (Plant Sciences)
Graham Fogg, Ph.D., Professor
(Land, Air and Water Resources)
David Gilchrist, Ph.D., Professor (Plant Pathology)
Thomas R. Gordon, Ph.D., Professor (Plant Pathology)
John Harada, Ph.D., Professor (Plant Biology) Academic Senate Distinguished Teaching Award
Peter Hernes, Ph.D., Associate Professor (Land, Air and Water Resources)
William R. Horwath, Ph.D., Professor (Land, Air and Water Resources)
Benjamin Z. Houlton, Ph.D., Assistant Professor (Land, Air and Water Resources)
Lovell Jarvis, Ph.D., Professor
(Agricultural \& Resouce Economics)
Marie Jasieniuk, Ph.D., Assistant Professor (Plant Sciences)
Annie King, Ph.D., Professor (Animal Science)
Johan Leveau, Ph.D., Assistant Professor (Plant Pathology)
James D. Murray, Ph.D., Professor (Animal Science)
Terrence Nathan, Ph.D., Professor
(Land, Air and Water Resources)
Sanjai J. Parikh, Ph.D., Assistant Professor (Land, Air and Water Resources)
Gregory Pasternack, Ph.D., Professor
(Land, Air and Water Resources)
James H. Richards, Ph.D., Professor (Land, Air and Water Resources)
David Rizzo, Ph.D., Professor (Plant Pathology)
Pamela C. Ronald, Ph.D., Professor (Plant Pathology)
Wendy Silk, Ph.D., Professor
(Land, Air and Water Resources)
Li Tian, Ph.D., Assistant Professor (Plant Sciences)
The Program. Science and Society is an interdepartmental teaching program administered by the College of Agricultural and Environmental Sciences that offers students throughout the campus the opportunity to discover the connections that link the social, biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.
The Science and Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Science and Society courses, upper division courses from both the College of Agricultural and Environmental Sciences and the College of Letters and Science in the areas of history and philosophy of science, policy and decision making, communication of science, and culture, ethics and applications.

## Courses in Science and Society (SAS)

## Lower Division

1. Critical Inquiry into Contemporary Issues

## (4)

Lecture/discussion-3 hours; discussion-1 hour. Contemporary issues, including global population trends, economic and environmental changes, cultural diversity and biodiversity, nutrition and food safety, fiber and textiles, changing consumer cultures. Inquiry processes emphasize ethics, multiple disciplines, and multiple perspectives. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE.-I. (I.) Cas-well-Chen

## 2. Feeding the Planet: Influences on the Global Food Supply (3)

Lecture/discussion - 3 hours. Scientific principles and dynamic interactions involved in food production, food processing, nutrition, shelf life and marketing from differing viewpoints. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. GE credit: SciEng or SocSci, Wrt | SE or SS, SL.-II. (II.) Bostock, Davis

## 3. Science, Technology and Society (4)

Lecture-4 hours. Impact of developments in science and technology on the individual in society and how economics, politics, culture and values affect technological development. Not open for credit to students who have completed former course Applied Behavioral Sciences 18. Offered irregularly. GE credit: SciEng or SocSci, Wrt \| SE or SS.

## 4. Water in Popular Culture (3)

Film viewing-2 hours; discussion-1 hour; lecture - 1 hour. Importance of water in many aspects of society as revealed through a survey of its depictions in film. GE credit: SciEng or SocSci, Wrt | SE or SS, SL. -I. (I.) Pasternack

## 5. Pathways to Discovery: Science and

 Society (3)Lecture/discussion - 3 hours. Highlights a current issue and/or controversy found in contemporary society and looks at how this problem impacts and is affected by the physical, social and biological sciences. Course varies with topic offered. May be repeated two times for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt \| SE or SS.

## 7. Terrorism and War (4)

Lecture-3 hours; discussion-1 hour; term paper. Exploration of terrorism and war from science and social sciences perspectives. Terrorist cells and groups; biological, chemical, nuclear, and environmental terrorism; intelligence gathering and espionage; military strategy; genocide; epochal wars; clash of civilizations; nation building; and future global scenarios. GE credit: SciEng or SocSci, Div, Wrt | SE or SS, WE. - III. (III.) Carey

## 7V. Terrorism and War (4)

Web Virtual Lecture-3 hours, autotutorial -5 hours, web electronic discussion-1 hour, extensive writing; term paper or discussion. Prerequisite: consent of instructor. Terrorism and war from science and social sciences perspectives: terrorism (terrorist cells, WMD's, religious extremism), warfare (military strategy, genocide), and statecraft (diplomacy, clash of civilizations, epochal wars). GE credit: SocSci,
Wrt \| SS, WC, WE. - Carey

## 8. Water Quality at Risk (3)

Lecture-2 hours; discussion-1 hour. Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination. (Same course as Environmental Science and Management 8.) Not open to students who have successfully completed Environmental and Resource Sciences 8. (Formerly Environmental and Resource Sciences 8.) GE credit: SciEng or SocSci, Wrt | SE or SS, SL, WE. - II. (II.) Hernes

## 9. Crisis in the Environment (3)

Lecture-3 hours. Explores contemporary environmental issues by examining the causes, effects and solutions to a wide range of environmental problems facing the global ecosystem. Integrated discussion of political, societal and economic impact linkages with environmental problems. GE credit: SciEng or SocSci, Wrt | SE or SS, WE. - III. (III.) Dahlgren, Houlton

## 10. Water, Power, Society (3)

Lecture-2 hours; discussion-1 hour. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as Hydrologic Science 10.) GE credit: SciEng or SocSci, Wrt | SE or SS, SL. -III. (III.) Fogg

## 11. California Geography (3)

Lecture-2 hours; discussion-1 hour; term paper. Introduction to cultural/societal patterns of California and their relationship to natural resources, biomes, geomorphology, and physiography. Focus on diversity of California's environments and their impacts on and alterations by human activities. Environmental issues in the State. GE credit: SciEng or SocSci, Wrt \| SE or SS, WE.-I. (I.) Richards

## 12. Plants and Society (4)

Lecture-3 hours; extensive writing - 3 hours. Prerequisite: high school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies. Not open for credit to students who have complete Plant Biology 12. (Former course Plant Biology 12.) (Same course as Plant Sciences 12.) GE credit: SciEng or SocSci, Div, Wrt | SE, SS. -I, II, III. (II, II, III.) Fischer, Jasieniuk,
Nevins, Tian

## 13. Disease and Society (3)

Lecture-3 hours. Limited enrollment. Introduction to the concept of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. GE credit: SciEng or SocSci \| SE or SS, SL.-II. (II.) Leveau

## 15. AIDS and Society (4)

Lecture-3 hours; discussion - 1 hour. Biology of HIV transmission and AIDS and how a biological agent acts on and influences the structure of contemporary society. Includes the psychology of risk and stigma, gender issues, changes in social relationships and public policy, global implications. GE credit: SciEng or SocSci, Div, Wrt | SE or SS. - III. (III.) Radke

## 18. GIS and Society (3)

Lecture-2 hours; Laboratory - 3 hours; term paper or discussion-0.3 hours. Geographic Information Systems (GIS) as a spatial technology and a tool for change in society. Evaluate physical, biological and social impact of GIS in the context of case studies such as land, water and community planning. GE credit: SciEng or SocSci, Wrt \| QL, SE or SS, SL,

## VL. - III. (III.) Wallender

## 20. Genetics and Society (4)

Lecture-3 hours; discussion-1 hour. Not open for credit to students who have completed course 140. Basic concepts of genetics, modern methods of biotechnology, the process of scientific discovery and the public perception of the process; present and future impact of genetics on society. GE credit: SciEng or SocSci, Wrt | OL, SE or SS, SL, WE.-I, II. (I, II.) Coaker, Cook, Epstein, Ronald
25. Global Climate Change: Convergence of Biological, Geophysical, \& Social Sciences (3)

Lecture-2 hours; discussion - 1 hour. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty. GE credit: SciEng or SocSci, Div, Wrt \| OL, QL, SE or SS, SL, VL, WC, WE. - II. (II.) Bloom

25V. Global Climate Change: Convergence of Biological, Geophysical, \& Social Sciences (3)
Web virtual lecture; web electronic discussion-2 hours; autotutorial - 5 hours; extensive writing-2 hours. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty. Students cannot take both course 025 and 025 V for credit. GE credit: SciEng or SocSci \| SE or SS, DD, OL, QL, SL, VL, WC, WE.-I, II, III. (I, II, III.) Bloom
30. Mushrooms, Molds, and Society (3) Lecture/discussion-3 hours. Fungi as organisms with which humans interact daily, societal issues arising from these interactions. Fungi in medicine, religion, agriculture, and industry, as well as cultural perceptions of fungi. GE credit: SciEng or SocSci,
Wrt | SE or SS.-I, II. (I, II.) Gilchrist, Gordon, Rizzo

## 40. Photography: Bridging Art and Science

 (3)Lecture/discussion-2 hours; studio-3 hours. Photography is used to explore the common ground between art and science. Photographic processes, creativity and aesthetics, chaos and order, principles of space, time and light. Photographic interpretation and documentation of the natural world. GE credit: ArtHum or SciEng or SocSci, Div, Wrt \| AH or SE or SS, SL, VL, WE. - III. (III.) Nathan

## 42. Earth, Water, Science, Song (3)

Lecture-2 hours; studio-3 hours. Fusion of water and soil science with performing arts. Creative communication of scientific concepts and facts through exercises in song writing and poetry. Design, discuss and conduct public performances related to the functioning of the natural world. GE credit: ArtHum or SciEng | AH or SE, OL.-II. (II.) Silk

## 70A. Genetic Engineering in Medicine,

## Agriculture, and Law (5)

Lecture-5 hours. Historical and scientific study of the impact of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised. Offered in a dis-tance-learning format. Not open to students who have taken Biological Sciences 1A, Biological Sciences 2A or equivalent, or course 20. Concurrent enrollment in a two unit seminar course, Plant Biology 98, is required. GE credit: SciEng or SocSci | SE or SS, SL. - II. (II.) Harada

90A. Issues in Environmental and Resource Sciences (2)
Seminar-2 hours; two Saturday field trips. Prerequisite: limited to lower division students. Discussion of historical and current issues in environmental and resource sciences. Lectures, reading and field trips will provide background for selected topics. - I, II. (I, II.)

90B. Observing and Writing in Biology (2)
Seminar-1 hour; laboratory-1 hour; term paper. Students will observe the interactions between microscopic organisms, conduct simple laboratory experiments, describe and analyze observations and discuss scientific observations and writing.
90C. Herbal Medicine: Relevance for the 21 st Century (2)
Seminar-2 hours. Medicinal usage of plants from biological, historical, and cultural perspectives. Broad contexts of holistic and scientific paradigms for understanding herbal medicine. Saturday field trip to teach herb identification. - II. (II.)
90D. Saving Endangered Plant Species: Problems and Prospects (2)
Seminar-2 hours. Endangered plant species illustrate the value of conservation biology. Topics include societal issues and plant germplasm conservation, comparisons to animal conservation issues, and the economics of and justification for preserving endangered plants.-I. (I.) Parfitt

## 90E. Biotechnology-a New Era, a New

 Struggle (2)Seminar-2 hours. Animal biotechnology and its applications. Discussion topics include potential societal impacts of various technologies, factors shaping public opinion, and ethical and moral questions arising from new biotechnology applications.-l. (I.) Murray

## 90F. Food Distribution in a Hungry World

 (2)Seminar-2 hours. The biological, technological, environmental, and socioeconomic factors related to food distribution systems at local, regional, national, and international levels. The potential for increasing world food supply by reducing losses between harvest and consumption.-l. (l.)
90G. Science, Society and the Environment (2)

Seminar-2 hours. Contemporary environmental issues, scientific approaches to addressing these issues, and accompanying societal and ethical considerations. -II. (II.) Wilson

## 90X. Lower Division Seminar (1-4)

Seminar-1-4 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Science and Society through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May be repeated for credit. Limited enroll-ment.-I, II, III. (I, II, III.)

## 91 A. Explorations in Science and Society:

 Cultures and Identities (2)Seminar-1 hour; extensive writing or discussion-1 hour. Prerequisite: participation in the summer Special Transitional Enrichment Program (STEP) or consent of instructor; course 1 concurrently. Exploration of linkages among identity and culture, multi-disciplinary inquiry, and agricultural and environmental science issues.-l. (1.)
91 B . Explorations in Science and Society: Leadership and Collaboration (2)
Seminar-1 hour; extensive writing or discussion-1 hour. Prerequisite: course 91A or consent of instructor. Extends understanding of culture and identity to issues of leadership, collaboration, and social action in science and society. Includes a mandatory two and half day retreat. - II. (II.)
91C. Explorations in Science and Society: Engagement (2)
Seminar-1 hour; internship-3 hours. Prerequisite: course 91 B or consent of instructor. Explorations of the concept of engagement in science and society from philosophical and practical perspectives. Explo-
ration of the concept of engagement based on lectures, self reflection, discussions and three hours of K-12 school internships per week. -III. (III.)
92. Internship in Science and Society (1-12) Internship-3-36 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship on and off campus, in the community, or in institutional settings. (P/NP grading only.)

## 97T. Tutoring in Science and Society (2-3)

 Discussion/lecture-6-9 hours. Prerequisite: lower division standing; completion of course being tutored; consent of instructor. Tutoring in undergraduate Science and Society courses. Assisting with lead ing discussion groups under supervision of instructor(s) and teaching assistants. Acting as liaison between the students and course instructor(s) to foster effective communication and interaction. May not be repeated. (P/NP grading only.)
## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Discussion-3-15 hours. Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

## Upper Division

110. Applications of Evolution in Medicine, Human Behavior, and Agriculture (4) Lecture-2 hours; discussion-1 hour; term paper. Prerequisite: Biological Sciences 2A, 2B, and 2C. Class size limited to 60 students. Applications of evolutionary biology in medicine, human behavior, and agriculture. Examination of the imprint of evolution on the human life cycle from conception to death. GE credit: SciEng | SE, SL, WE. - III. (III.) Rosenheim
111. Science and Contemporary Societal Issues (3)
Lecture/discussion-3 hours. Prerequisite: upper division standing. Study of a contemporary societal issue/problem emphasizing critical thinking with information drawn from several disciplines. Multiple instructors illustrate the necessity of an interdisciplinary and cooperative approach in solving important issues. Topic will vary. May be repeated one time for credit. Course not offered every year. GE credit: SciEng or SocSci, Wrt | SE or SS. - III. (III.)

## 121. Global Poverty: Critical Thinking and

## Taking Action (4)

Lecture-3 hours; discussion-1 hour. Social science and engineering analysis of causes and effects of world poverty and of policies to reduce it via economic growth, foreign aid, and community-level interventions, e.g., in potable water, sanitation, lighting, small scale energy, irrigation, health and microfinance. GE credit: SocSci | SS, WC. - II. (II.) Jarvis,

## Kornbluth

## 130. Contemporary Leadership (4)

Lecture-3 hours; seminar-1 hour. Prerequisite: consent of instructor. Leadership, including issues, skills, and practices as they relate to individuals, organizations, diverse social settings and communities. Written and verbal communications, personality styles for collaborative work, and ethics. Limited enrollment. GE credit: OL. - II, III. (II, III.) King
135S. Biodiversity and Society in South Africa (4)
Lecture/discussion-3 hours; term paper or discussion - 2 hours; fieldwork-2 hours. Prerequisite: acceptance into the Quarter Abroad Program "Biodiversity \& Conservation in South Africa" and attendance in South Africa. Biodiversity in social context of South Africa; race, politics and conservation; use of indigenous plants and animals; weeds; water issues; ecotourism. Weekend and other field trips. Offered irregularly. GE credit: SciEng or SocSci, Div, Wrt | SE or SS. - II. Cranston, Gullan

## 140. Genetics and Social Issues (4)

Lecture/discussion-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C. Social issues arising from the development and use of mod-
ern methods of biotechnology. Presentation, evaluation, and critical discussions of the present and future impact of genetics on society. Not open for credit to students who have completed course 20. GE credit: SocSci, Wrt. - II. (II.) Epstein
190X. Science \& Society Seminar (1-4)
Seminar-1-4 hours. Prerequisite: upper division standing and consent of instructor. In-depth examination at an upper division level of a special topic in Science and Society. Emphasis upon student participation in learning. Emphasis upon student participation in learning. May be repeated for credit. Limited enrollment. (P/NP grading only.) -I, II, III. (I, II, III.)

## 192. Internship in Science and Society

## (1-12)

Internship-3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship on or off campus, in the community, or in institutional settings. (P/NP grading only.)
197T. Tutoring in Science and Society (1-5)
Tutoring-3-15 hours. Prerequisite: upper division standing; completion of course being tutored or the equivalent. Tutoring of students in Science and Society courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another Science and Society course. (P/NP grading only.)
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study in Science and Society (1-5)
Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

## Graduate

298. Group Study (1-5)

Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only.)
299. Graduate Research (1-12)

Prerequisite: graduate student and consent of instructor. May be repeated for credit. (S/U grading only.)

## Professional

390. Teaching Methods in Science and Society (1)
Discussion-1 hour. Prerequisite: graduate level and consent of instructor. Practical experience in methods and problems related to teaching Science and Society courses. Discussion of critical pedagogies specific to teaching of science-societal issues, preparing for and conducting discussion sessions, analyses of texts and supporting material, formulation of assignments, exams. May be repeated for credit. (S/U grading only.) -I III, III. (II, II, III.)

## Science and Technology Studies

(College of Letters and Science)
Joseph Dumit, Ph.D., Program Director
Program Office. 1240 Social Sciences and
Humanities Building

## Committee in Charge

Thomas Beamish, Ph.D. (Sociology)
Mario Biagioli, Ph.D.
(Science and Technology Studies, School of Law)
Patrick Carroll, Ph.D. (Sociology)
Timothy Choy, Ph.D. (Anthropology, Science and Technology Studies)
Marisol de la Cadena, Ph.D. (Anthropology)
Joseph Dumit, Ph.D. (Anthropology, Science and Technology Studies)
James Griesemer, Ph.D. (Philosophy)
Caren Kaplan, Ph.D. (American Studies)
Colin Milburn, Ph.D. (English, Science \& Technology Studies)

Roberta Millstein, Ph.D. (Philosophy)
Kriss Ravetto-Biagioli, Ph.D. (Cinema and
Technocultural Studies, Science \& Technology Studies)
Daniel Stolzenberg, Ph.D. (History)
Madhavi Sunder, J.D. (School of Law)

## The Major Program

The Science and Technology Studies (STS) major is designed to facilitate the analysis and synthesis of science, technology, and medicine in a way that actively creates connections between the varieties of perspectives and concerns in the humanities and the sciences. The STS major takes science, technology, medicine, and their social, political, economic, and cultural contexts as its objects of study. As such, the STS major draws on the research programs of faculty in a wide range of departments, including American Studies, Anthropology, Economics,
Environmental Science and Policy, History, Philosophy, Political Science, Science and Technology Studies, and Sociology. Students in STS pursue a broader understanding of science than is available within traditional science majors and is also suitable for students in the social sciences interested in interpreting science, technology and medicine as part of society and culture.
The Program. Graduation with a degree in Science and Technology Studies requires completion of introductory courses in the social sciences and humanities, in the natural sciences, and introductory, laboratory and seminar courses in STS. Upper division work includes twelve units from each of two different, complementing areas of concentration ("modules") and twelve units (plus prerequisites) providing depth, concentration and field work opportunities in the sciences. The modules are: (1) Cultural Studies of Science and Technology; (2) Ethics, Values, and Science Policy; (3) History and Philosophy of Science; IV. Medicine, Society, and Culture. Courses in the modules require careful selection to make the best use of the STS major. Prerequisites for courses in the sciences can be extensive and require substantial advance planning for timely completion. Students are encouraged to take advantage of faculty and staff advising to plan their course of study.
Career Alternatives. The STS major will create an opportunity to analyze science and allied practices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that must address the broader social, cultural and political ramifications of science, technology and medicine such as law, journalism, public policy, economics, government, and science education. Careers that students of STS from many universities nationwide have pursued, in addition to academic careers in STS, include employment in: systems engineering, website design, science museums, non-profit health organizations, government service, libraries, law, medicine, veterinary medicine, dentistry, nursing, teaching, public health administration, media companies, management consultant practice, and the Peace Corps.

## A.B. Major Requirements

Preparatory Subject Matter
Science and Technogy Studies 1 ....
Science and Technology Studies 20 .......... 4
Eight units selected from American Studies
1A, 1E, 5; Environmental Studies 1;
Humanities 3; Philosophy 30, 31, 32;
Science and Society 1, 2, 3, 5; Science and Technology Studies 32; Lower-division science courses from the Approved Science Electives list below.
Depth Subject Matter . 8

Twelve units each from two of the following four modules: ....................................... 24 (1) Cultural Studies of Science and Technology: American Studies 101G, 158;
Cinema and Technocultural Studies 151;
Community and Regional Development

118, 162; History 139A, 139B; Science and Technology Studies 108, 109, 120,
130A, 131, 150, 160, 162, 165, 173,
176; Sociology 150, 175.
(2) Ethics, Values, and Science Policy:

Agricultural and Resource Economics 120,
147; Environmental Science and Policy
165; History 185B; Nature and Culture
120; Philosophy 115, 116 ; Physics 137,
160; Plant Pathology 140; Political Science
171, 175; Veterinary Medicine 170.... 12 (3) History and Philosophy of Science: History 135A, 135B, 136, 185A, 185B;
Philosophy 104, 108, 109; Science and
Technology Studies 120, 130A, 130B,
131, 160, 161, 163, 164.
(4) Medicine, Society, and Culture:

American Studies 101G; Communication
165; Epidemiology and Preventive
Medicine 101, 160; History 139A, 139B;
Psychology 160; Science and Technology
Studies 109, 120, 121 ; Sociology
154.

154 ................................................. 12
Note: Although a course may be listed in more than one module, that course may satisfy only one requirement.
Science and Technology Studies 175 ........ 4
Science and Technology Studies 180, 190, or 190HA-HB 4-6
Science Electives: Select twelve units, at least eight of which must be from upper division courses, from the Approved Science Electives list below. (Unit totals will vary with required prerequisites.)
Note: Students are strongly advised to choose science elective courses in consultation with faculty advisors. Some courses in some areas may require prerequisites too extensive to be used for the STS major

## Total Units for the Major.

$\qquad$ 60-82
Approved Science Electives. Courses may be drawn from any of the following approved subject areas:
Aeronautical Science and Engineering;
Animal Genetics; Animal Science;
Anthropology; Applied Behavioral Sciences; Applied Biological Systems Technology;
Atmospheric Science; Avian Sciences;
Biological Chemistry; Biological Sciences;
Cell Biology and Human Anatomy;
Chemistry; Earth \& Planetary Sciences;
Engineering; Engineering: Applied Science;
Engineering: Biological Systems; Engineering:
Chemical; Engineering: Civil and Environmental; Engineering: Computer Science; Engineering: Electrical and Computer; Engineering: Mechanical; Entomology; Environmental and Resource
Sciences; Environmental Horticulture;
Environmental Science and Policy;

Major Adviser. J. Dumit

## Courses in Science and Technology Studies (STS)

## Lower Division

## 1. Introduction to Science, Technology and

 Medicine Studies (4)Lecture-3 hours; discussion -1 hour. History, philosophy, sociology, politics, and cultural studies of science, technology, and medicine. Emphasis on a broad range of perspectives. GE credit: SciEng or SocSci | SS, WE. - Carroll
20. Methods in Science, Technology and Medicine Studies (4)
Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 recommended. Methodological issues concerning the historical, philosophical, sociological, ethical, and political analysis of science, technology, and medicine. Detailed case studies to illustrate different methods of analysis. GE credit: SciEng or SocSci, Wrt \| SS, WE.-Carroll

## 32. Drugs, Science and Culture (4)

Lecture-3 hours; discussion-1 hour. Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine. (Same course as Anthropology 32.)
GE credit: SocSci, Div, Wrt \| SS, VL.—Dumit
92. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Work experience off and on campus in all subject areas offered in the program in Science \& Technology Studies under the supervision of a member of the faculty. May be repeated up to 12 units for credit. (P/NP grading only.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor (P/NP grading only.) GE credit: SS.
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor (P/NP grading only.)

## Upper Division

## 108. Intellectual Property in Science (4)

Lecture/discussion-4 hours. Prerequisite: course 1, or other Social Science or Humanities writing course. Historical and conceptual framework for contemporary debates about intellectual property and science. Topics include US patent system and copyright law, interaction between patents and industrial policy, credit in academic and industrial science, role of IP in global knowledge. GE credit: SocSci, Wrt | ACGH, SS, WE.-Biagioli

## 109. Visualization in Science (4)

Lecture-3 hours; extensive writing or discussion - 1 hour. Prerequisite: course 1 or 20 or Anthropology 2. Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make claims. Offered in alternate years. (Same course as Anthropology 109.) GE credit: SocSci, Wrt \| SS, VL, WE. - Dumit

## 120. Religion, Magic and Science (4)

Lecture-3 hours; extensive writing. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as Religious Studies 120.) Offered in alternate years. GE credit: GE credit: ArtHum, Div, Wrt \| AH, OL, VL, WC, WE.-Coudert

## 121. Special Topics in Medical <br> \section*{Anthropology (4)}

Lecture/discussion-4 hours. Prerequisite: course 1 or Anthropology 2. Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical
encounters in a cross-cultural perspective. (Same course as Anthropology 121.) GE credit: SocSci, Div, Wrt \| SS, WC, WE. - Giordano

## 129. Health and Medicine in a Global

 Context (4)Lecture/discussion-4 hours; term paper. Prerequisite: course 1 or Anthropology 2. Recent works in medical anthropology and the science studies of medicine dealing with global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical technology and delivery, illness narratives, and others. (Same course as Anthropology 129.) GE credit: SocSci, Div, Wrt | SS. - Dumit
130A. From Natural History to the History of Nature (4)
Lecture/discussion-3 hours; term paper. Prerequisite: History 135A recommended. Evolution and demise of natural history as a discipline from Aristotle to Linnaeus. Considers ancient views of nature and its Renaissance rediscovery; the emergence of biology, botany, geology, and zoology; the history of taxonomy and classification. Offered in alternate years. GE credit: ArtHum or SciEng, Wrt \| AH or SE, WE.
130B. History of Modern Biology (4)
Lecture/discussion-3 hours; term paper. Prerequisite: course 130A recommended. Development of modern biology from pre-Darwinian roots to the present. Considers emergence of modern biological specialities and consolidation of biological theory around evolutionary ideas. History of allied fields such as genetics, paleontology, embryology, ecology, systematics and molecular biology. GE credit: ArtHum or SciEng, Wrt \| AH or SE, WE.

## 131. Darwin (4)

Lecture-3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Students will explore the life and times of Charles Darwin and will trace the development of evolutionary thinking before and after the Origin of Species to appreciate its place in Victorian society and in the corpus of Darwin's thought. GE credit: ArtHum or SciEng,

## Wrt | AH or SE, WE.-Griesemer

## 151. Media Theory (5)

Lecture-2 hours; discussion-1 hour; film viewing -3 hours; extensive writing. Critical and theoretical approaches to the emergence of new technologies since the invention of photography. Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics, visual and gamer theory). (Same course as Cinema and Technocultural Studies 150.) GE credit: AH or SS, OL, VL, WE.

## 150. Gender and Science (4)

Lecture/discussion-3 hours; term paper. An interdisciplinary approach to the relations between gender and science. Topics include the biological and cultural construction of sexual difference, the role of women as practitioners of science, and feminist approaches to science. GE credit: SocSci, Div,
Wrt | ACGH, DD, SS, WE.

## 160. Ghosts of the Machine: How

## Technology Rewires our Senses (4)

Lecture-3 hours; extensive writing or discussion - 1 hour. Historical, aesthetic and critical approaches to how information technologies produced ghost effects or a sense of terror in response to new media like the photograph, gramophone, film, typewriter, computer, Turing Machine. Focus on technological media transforms sense perception. Offered in alternate years. (Same course as Technocultural Studies 160.) GE credit: ArtHum or SocSci | ACGH, AH or SS, VL, WE. - Ravetto-Biagioli

## 161. Time: Mechanism and Measurement

 (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 1. Cultural concepts of time; units and instruments of time measurement; historical differences in the social organization of time; and time measurement in twentieth-century science. GE credit: SocSci, Wrt \| SS, WE.

## 162. Surveillance Technologies and Social

 Media (4)Lecture - 3 hours; film viewing - 3 hours; term paper. Prerequisite: Technocultural Studies 1 or course 20. Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Exploration of the boundary between security and control, information and spying. (Same course as Cinema \& Technocultural Studies 162.) Offered in alternate years. GE credit: ACGH, AH or SS, OL, VL, WE.Ravetto

## 163. History of Communication <br> \section*{Technologies (4)}

Lecture/discussion - 3 hours; term paper. History of communication technologies from the late Middle Ages to the 20th century. Questions of technology, knowledge, power and culture. Particular attention to questions about information and truth. Offered in alternate years. GE credit: SocSci | SS, WE.

## 164. Writing Science (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: English 3 or course 1, or equivalent. Texts and writing practices in the production of scientific knowledge. Surveys the literary structure of scientific arguments; history of scientific genres; rhetoric and semiotics in scientific culture; graphical systems in the experimental laboratory; narratives of science, including science fiction. (Same course as English 164.) Offered in alternate years. GE credit: ArtHum, Wrt | AH, SL, WE. - Milburn

## 165. Built Environments (4)

Lecture-3 hours; extensive writing. Built environments, which are designed to support forms of life. Their role as carriers of cultural memory and in turning knowledge of nature into social assets. Historical constellations of knowledge, social order, and power. Offered in alternate years. GE credit: SocSci, Wrt | SS.

## 173. Science Fiction (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 3 or Science and Technology Studies 1 , or equivalent. The literary modes and methods of science fiction. Representative texts, authors, and themes of the genre-e.g., time travel, alternative universes, and utopias. Relations of science fiction to science, philosophy, and culture. (Same course as English 173.) GE credit: ArtHum, Wrt | AH, WE.

## 175. Laboratory Studies Lab (4)

Lecture/discussion-4 hours. Prerequisite: upper division standing or consent of instructor. Hands-on training in Science and Technology Studies fieldwork, interviewing, archival research and data analysis. Review of laboratory studies literature, informed consent procedures, ethics, and care of the data. Individual and group projects possible. GE credit: SocSci | SS, WE.

## 176. Sociology of Knowledge, Science, and

 Scientific Knowledge (4)Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: upper division standing preferred. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as Sociology 176.) GE credit: SocSci | SS. - Carroll
180. Topics in History and Philosophy of Science (4)
Seminar-3 hours; term paper. Prerequisite: course in History and Philosophy of Science or other coursework relevant to topic. In depth treatment of selected topics in the history and philosophy of science. Possible topics include history of modern physics, history of molecular biology, science and society, science
and power, scientific explanation, technology and culture, theory testing. May be repeated for credit with consent of instructor.

## 190. Seminar in Science, Technology and

 Medicine Studies (4)Lecture/discussion - 3 hours; term paper. Prerequisite: open to junior and senior Science and Technology Studies majors only. Intensive reading, discussion, research and writing by small groups in selected topics of science, technology, and medicine studies scholarship. Emphasis on individual research projects.

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Work experience off and on campus in all subject areas offered in the program in Science \& Technology Studies under the supervision of a member of the faculty. May be repeated three times for up to 12 units for credit. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

250. History and Philosophy of Science (4) Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary seminar in the history and philosophy of science. Focuses on issues such as historiography, methodology, and the conceptual foundations of science.
May be repeated for credit with consent of instructor.
251. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

## 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Sexuality Studies

## (College of Letters and Science)

http://wgs.ucdavis.edu/sexualitystudies
The interdisciplinary minor in Sexuality Studies offers students a unique opportunity to study the humanmade aspects of sexual identities, desires, and practices, which differ across cultures and historical moments, and are not reducible to biology or anatomy. The minor in Sexuality Studies core and elective courses have sexuality at their center. Additional courses invite students to integrate their study of sexuality with issues of gender; race and ethnicity; class; politics and activism; literature and popular culture; law; and other domains.
The minor is sponsored by the Program in Women and Gender Studies.

## Minor Program Requirements:

UNITS
Sexuality Studies
.18-20
One Core Course:
Women and Gender Studies 170 .4
Two Elective courses from the following:
Anthropology 139 BN, English 186,
Epidemiology and Preventative Medicine

163, History 184, Human Development
12, Psychology 158, Science and Society
15, Women and Gender Studies 70 ...7-8
Two Elective courses from Field B (below) or seminars/individual study by petition to achieve a total of 18-20 units:
American Studies 115, Asian American
Studies 112, Chicana/o Studies 160,
English 166, German 145, History 132,
Political Science 152, Sociology 120,
Women and Gender Studies 140, Women
and Gender Studies 179 ....................... 8

## Restrictions.

(A) Students may take no more than one lower division course to satisfy requirements for the minor.
(B) To satisfy the interdisciplinary component of the minor, students must either split their coursework roughly equally between two programs/departments or take coursework in at least three programs/ departments.
(C) Students may petition the minor adviser to accept Special Topics courses and Capstone/Senior Seminars as additional courses, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.
(D) Students may petition the minor adviser to accept up to four units of registered individual study, group study or internship towards the minor program, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.
Advising. Program in Women and Gender Studies, 2222 Hart Hall 530-752-6429

## Social and Ethnic Relations

(College of Letters and Science)
The interdisciplinary minor in Social and Ethnic Relations explores the racial, ethnic, class and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American and African Studies, Asian American Studies, Native American Studies, and Women and Gender Studies.

## Minor Program Requirements:

Social and Ethnic Relations.
.24
Select one course from each of the following six groups to total 24 units:
(A) African American and African Studies 100; Anthropology/Native American Studies 134; Women's Studies 102
(B) African Ámerican and African Studies

123, 133, 145A
(C) Asian American Studies 1, 2, 100,

110, 130
(D) Chicana/o Studies 130, 132
(E) Native American Studies 1, 10, 115,

119, 130A, 130B, 130C, 157, 180
(F) Women's Studies 103, 104, 180

Restrictions. (A) Courses applied toward the satis-
faction of a major may not also be offered in satisfaction of the minor. (B) No more than four units (one course) may be lower division.
Advising. Contact the Program in Women and Gender Studies in 2222 Hart Hall 530-752-4686.
Contact the Program in Asian American Studies,
3131 Hart Hall, ethnicstudiessao@ucdavis.edu.

## Social Sciences

(College of Letters and Science)
Program Office. 469 Kerr Hall;
530-752-0741

## Committee in Charge

Michael Kurlaender, Ph.D. (School of Education) Dina Okamoto, Ph.D. (Sociology)
Marianne Page, Ph.D. (Economics)
Heather Rose, Ph.D. (School of Education)
Kimberlee Shauman, Ph.D. (Sociology)
Ann Stevens, Ph.D. (Economics)

## Emeriti Faculty

Nigel Allan, Ph.D. Professor Emeritus Dennis J. Dingemans, Ph.D., Senior Lecturer Emeritus Howard F. Gregor, Ph.D., Professor Emeritus Frederick J. Simoons, Ph.D., Professor Emeritus Kenneth Thompson, Ph.D., Professor Emeritus

## The Program of Study

The Program in Social Sciences promotes the development of innovative curricular initiatives across the social sciences, including offering broadly conceived, integrative undergraduate-level and gradu-ate-level courses. Faculty affiliated with the program are often engaged in interdepartmental teaching and research.

## Social Theory and Comparative History

(College of Letters and Science)
This designated emphasis was disestablished effective September 19, 2011.
Program Office. Center for History, Society, and Culture, 5211 Social Sciences and Humanities Building 530-752-3046

## Courses in Social Theory and Comparative History (STH) <br> Graduate

## 250. Research in Social Theory and

## Comparative History (4)

Seminar-3 hours; term paper. Prerequisite: admission to Social Theory and Comparative History Designated Emphasis. Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, and Culture faculty and visitors discussing current research. - III. (III.)
290. Advanced Topics in Social Theory and Comparative History (4)
Seminar-3 hours; term paper. Prerequisite: consent of instructor and History 204 or Sociology 242A. Interdisciplinary study of particular substantive problems in social theory and comparative history. Topics vary. -I, II, III. (I, II, III.)

## 295. Advanced Group Research in Social

 Theory and Comparative History (1)Discussion - 1 hour. Prerequisite: consent of instructor. Participation in research workshops sponsored by the Center for Comparative Research for History, Society, and Culture. May be repeated for credit.
(S/U grading only.) -I, II, III. (I, II, III.)

## 296. Theory and Society Journal Editorial

 Workshop (1-4)Workshop -1 hour; independent study -3 hours. Reading and offering workshop critiques of papers submitted for publication. Reading and discussion of other relevant work in history and the social sciences. May be repeated for credit up to 36 units or with consent of instructor. (S/U grading only.) -I, II, III. (I, II, III.) Gouldner

Lyn H. Lofland, Ph.D., Research Professor and
Professor Emerita
John T. Walton, Ph.D., Professor Emeritus

## Affiliated Faculty

Lalia Kiburi, Ph.D., Lecturer
Debora Paterniti, Ph.D., Associate Adjunct Professor

## The Major Programs

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.
The Program. The Department of Sociology offers two major programs, Sociology and SociologyOrganizational Studies. Students selecting the Sociology major may choose from four options in the major. The General Sociology emphasis allows students to obtain a broad understanding of the concepts, methods, and theories of sociology. Students with a special interest in the areas of Law and Society or Social Services may choose a more specialized program of courses and practical experience within the sociology major. The Comparative Studies and World Development emphasis provides a sociological perspective on social and economic changes throughout the world, with a stress on relationships between "developed" and "developing" societies. In their junior year, students are encouraged to consider the Education Abroad Program-especially one in a developing country.
The Sociology-Organizational Studies major develops a broad understanding of the political, social, and economic organizations that comprise modern society. This major emphasizes a sociological per-
spective, but incorporates a multidisciplinary field of study. The major introduces students to a range of theories and methods that social scientists use in the analysis of organizations.
Career Opportunities. In the Sociology major, the General option is for students desiring a solid liberal arts education as well as those interested in graduate work in the social sciences. Options in Law and Society or Social Services prepare students for careers in such areas as law, corrections, social work or counseling. The Comparative Studies and World Development emphasis prepares students for graduate training leading to careers in international fields. Majors in Sociology-Organizational Studies will be prepared for a variety of career options, particularly in the field of management. The major specifically meets entry requirements for programs of professional training leading to a Master's degree in public or private management, and may also lead to further study in any of the disciplinary areas incorporated in the major.

## Sociology

## A.B. Degree Requirements:

## General emphasis:

## Total Units for the Major 71-73

Comparative Studies and World Development emphasis:
Preparatory Subject Matter ..... 30-60
Sociology 1; 5; 46A and 46B ..... 18
Economics 1B ..... 4
Anthropology 2 or 20 ..... 4
History 10C or Political Science 2 ..... 4
Course work in one modern foreign languageat the two-year level or provide proof ofproficiency27-30
Depth Subject Matter ..... 48
Sociology 100, 104, 141, 145A,
170 ..... 20

134, 140, 145A, 145B, 172 $\qquad$ .. 4
One additional elective upper division
Sociology course not already used to fulfill
other major requirements. May use Sociology 190X, 191, 192/193, 194H, 195
Total Units for the Major .74
Major Advisers. Consult the Departmental Advising office in 1282 Social Sciences and Humanities Building.

## Minor Program Requirements:

## UNITS

Sociology................................................ 20
Choose any five upper division courses in Sociology, except the following: SOC 190X, 191, 192/193, 194H, 195, 197T, 198, 199

Minor Advisers. Consult the departmental Advising office in 1282 Social Sciences and Humanities Building.
Honors Program. An Honors Program is available to Sociology and Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, students are encouraged to take a 199 course with their sponsor in the spring of their third year, prior to the seminar courses. Honors students write an honors thesis and take two quarters (8 units) of Honors coursework (SOC 194H). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.
Graduate Study. The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in sociology. Further information regarding graduate study may be obtained at the Department office or on our website.
Graduate students in Sociology have the opportunity to pursue designated emphases in Critical Theory, Social Theory and Comparative History, Native American Studies, Economy, Justice and Society, or Feminist Theory and Research. See these headings for further details on these interdisciplinary programs.
Graduate Advisers. Consult the Graduate Program Coordinator in 327 Young Hall.

## Courses in Sociology (SOC)

## Lower Division

## 1. Introduction to Sociology (5)

Lecture-4 hours; discussion -1 hour. Principles and basic concepts of sociology. The study of groups, culture, collective behavior, classes and caste, community and ecology, role, status, and personality. GE credit: SocSci | ACGH, DD, SS.)

## 2. Self and Society (4)

Lecture-3 hours; discussion-1 hour. Principles and basic concepts of sociological social psychology. Includes the study of the character of the self, identity, roles, socialization, identity change, emotion and social interaction. GE credit: SocSci,
Wrt | ACGH, DD, SS.

## 3. Social Problems (4)

Lecture-3 hours; discussion - 1 hour. General sociological consideration of contemporary social problems in relation to sociocultural change and programs for improvement. GE credit: SocSci, Wrt | ACGH, DD, SS.

## 4. Immigration and Opportunity (4)

Lecture-3 hours; discussion-1 hour or term paper. Social and demographic analysis of immigration: motives and experiences of immigrants; immigration and social mobility; immigration, assimilation, and social change; multicultural societies. Detailed study of immigration into the U.S., with comparative studies of Europe, Australia, and other host countries. GE credit: SocSci, Div, Wrt \| ACGH, DD, SS, WC.

## 5. Global Social Change: An Introduction to

 Macrosociology (4)Lecture-3 hours; discussion - 1 hour. An introduction to change and diversity in world history, including the United States. Examines population and family, technological change and economic development, power and status, culture and identity. GE credit: SocSci, Div, Wrt | ACGH, SS, WC.
11. Sociology of Labor and Employment ( Lecture-3 hours; discussion-1 hour. Labor and employment issues in the contemporary United States with some use of historical and comparative materials. Topics will include strategies pursued by employers and employees, labor market discrimination and the role of social policies in shaping labor markets. GE credit: SocSci, Wrt \| SS.

## 25. Sociology of Popular Culture (4)

 Lecture-3 hours; discussion - 1 hour. Social mechanisms that shape modern popular culture. High, folk, and mass culture: historical emergence of popular culture. Mass media, commercialization, ideology and cultural styles. Theories and methods for analyzing cultural expressions in pop music, street art, film, television, and advertising. GE credit: SocSci, Wrt | SS, VL.
## 30A. Intercultural Relations in Multicultural

 Societies (3)Lecture- 1.5 hours; discussion-1.5 hours. Macrostructural analysis of contemporary multicultural societies; immigration and assimilation in comparative perspective; social construction of racial and ethnic group identities; ethnicity and gender; group conflict and cooperation; controversies surrounding multiculturalism. First course in a two-course Multicultural Immersion Program. GE credit: SocSci,
Div \| ACGH, DD, SS.

## 30B. Intercultural Relations in Multicultural

 Societies (3)Lecture- 1.5 hours; discussion-1.5 hours. Prerequisite: course 30A or consent of instructor. Social-psychological analysis of personal experiences living in a multicultural society; conforming to or rejecting group identity or stereotypes; managing and reducing conflict; cross-cultural communication; promises and problems of diversity at UC Davis. Second course in a two-course Multicultural Immersion Program. GE credit: SocSci, Div \| ACGH, DD, SS.

## 46A. Introduction to Social Research (4)

 Lecture-3 hours; discussion - 1 hour; term paper. Examination of the methodological problems of social research. Selection and definition of problems of investigation, data-gathering techniques, and sampling. GE credit: SocSci | SS.
## 46B. Introduction to Social Research (5)

 Lecture-4 hours; discussion-1 hour. Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association. GE credit: SocSci | QL, SS. - II. (II.)
## 90X. Lower Division Seminar (1-2)

Seminar-1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in sociology through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May not be repeated for credit. Limited enrollment. GE credit: SocSci | SS.

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily intended for lower division students. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

100. Origins of Modern Sociological Theory (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 1; consent of instructor; restricted to upper division standing. The origins of modern sociological thought. Special emphasis on three major theorists from the classical tradition of
nineteenth century European social thought: Karl Marx, Max Weber, and Emile Durkheim. GE credit: SocSci | SS.
102. Society and Culture of California (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: introductory course in Sociology recommended. California's distinctive society and culture; sociological analyses of topical issues concerning diversity, environment, cities. GE credit:
SocSci | ACGH, DD, SS .

## 103. Evaluation Research Methods (4)

Lecture-3 hours; discussion-1 hour; term paper; project. Prerequisite: course 46A and 46B, or Statis tics 13 or the equivalent. Surveys applications of research methods to the evaluation of social programs, primarily emphasizing methodological issues, e.g., research design and data collection; uses of evaluation research are also discussed and placed in theoretical context. Participation in an evaluation project. GE credit: SocSci | SL, SS.

## 104. The Political Economy of International

 Migration (4)Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as International Relations 104). GE credit: SocSci|SS, WC.

## 106. Intermediate Social Statistics (5)

 Lecture-4 hours; discussion - 1 hour. Prerequisite: course 46B or Statistics 13 or the equivalent. Intermediate level course in statistical analysis of social data, emphasizing the logic and use of statistical measures, procedures, and mathematical models especially relevant to sociological analysis. GE credit: SocSci \| QL, SL, SS.
## 118. Political Sociology (4)

Lecture-3 hours; discussion-1 hour; term paper; project. Relation of social cleavages and social cohesion to the functioning of political institutions; the social bases of local and national power structures; social sources of political movement, analysis of concepts of alienation, revolution, ideology, ruling class, and elite. GE credit: SocSci | SS.

## 120. Deviance (4)

Lecture-3 hours; term paper or discussion. Social structural sources, institutional practices and microprocesses associated with illegality, evil, disease, immorality, disability, racial and class differences, citizenship, and the body. Special emphasis on expert knowledge and the production and management of social difference. GE credit: SocSci, Wrt \| SS.

## 122. Sociology of Adolescence (4)

Lecture-3 hours; discussion-1 hour or term paper or research project. Chronological age and social status; analysis of social processes bearing upon the socialization of children and adolescents. The emergence of "youth cultures." Generational succession as a cultural problem. GE credit: SocSci | SS.
124. Education and Inequality in the US (4) Lecture-3 hours; term paper or discussion - 1 hour. Functions of schooling in contemporary U.S. society. Racial, ethnic, social class, and gender inequalities in student outcomes. Consideration of classic and current controversies in the sociology of education and education policy. GE credit: SocSci \| SS.

## 124. Sociology of Education (4)

Lecture-3 hours; discussion - 1 hour; term paper; project. Education and the social structure. Class size, curriculum, and economies of scale. Relations between families and schools in socialization; familial ascription and educational achievement. Education and industrialization. Organizational and occupational structure of schools. Discussion of selected controversies. GE credit: SocSci $\|$ SS.

## 126. Social Interaction (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 2. Everyday interaction in natural settings; ethnographic approaches to the under-
standing of social meanings, situations, personal identity and human relationships. Particular attention to the work of Erving Goffman and to principles of field observation and qualitative analysis. GE credit: SocSci, Wrt | SS.

## 127. Sociology of Death (4)

Lecture-3 hours. Prerequisite: course 1 or the equivalent. Overview of attitudes toward, structural effects of, and methods of coping with death and deathrelated behaviors. Particular attention to social psychological aspects of death and dying, to death occupations, and to death rituals in various cultures. GE credit: SocSci, Wrt \| SS.
128. Interracial Interpersonal Dynamics (4) Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: one course from courses 1, 2, 3, AfroAmerican Studies 10, Asian American Studies 1, 2, Chicano Studies 10, Native American Studies 1, 20. Analysis of the influences of cultural differences and racial stratification on interpersonal interaction in instrumental settings (e.g., work, education, political action) and intimate settings (e.g., friendship, love, marriage, family). Minority/majority relationships. GE credit: SocSci, Div, Wrt \| SS.

## 129. Sociology of Black Experience in America (4)

Lecture-3 hours; discussion-1 hour; term paper; project. Survey of historical and contemporary theoretical sociological perspectives on the Black experience in United States. Emphasis on comparisons of Black sociological perspectives and mainstream perspectives of specific sociologists. GE credit: SocSci, Div | ACGH, DD, SS.

## 130. Race Relations (4)

Lecture-3 hours; term paper or discussion-1 hour. Functions of the social definitions of race and racial groups. Analysis of racial conflict, oppression, and other forms of ethnic stratification. Models of ethnic interaction and social change. Emphasis on racial relationships within the U.S. GE credit: SocSci,
Div | ACGH, DD, SS.

## 131. The Family (4)

Lecture-3 hours; discussion-1 hour. Contemporary family life in historical and cross-cultural perspective. How different family forms arose, their significance today and prospects for further family change. Attention to power relations within and beyond the family and to the social implications of family transformation. GE credit: SocSci, Div,

## Wrt | ACGH, DD, SS

132. The Sociology of Gender (4)

Lecture-3 hours; discussion-1 hour. Analysis of biological, psychological, cultural and structural conditions underlying the status and roles of men and women in contemporary society, drawing on a historical and comparative perspective. GE credit:
SocSci, Div | ACGH, DD, SS.
133. Sexual Stratification and Politics (4) Lecture-3 hours; discussion-1 hour. Prerequisite: course 132 or the equivalent or consent of instructor. Analysis of origins, dynamics, and social implications of sexual stratification. Examination of classical and contemporary theorists such as Engels, Freud, J.S. Mill, de Beauvoir, Juliet Mitchell, D. Dinnerstein. Attention to selected issues in social movements for and against sexual equality. GE credit: SocSci,
Div | SS.
134. Sociology of Racial Ethnic Families (4) Lecture-3 hours; discussion-1 hour or term paper. Asian American, Black, Chicano, and Native American family life in comparative historical perspective. Family structure and gender roles are considered in relation to socio-historical dynamics. Offered in alternate years. GE credit: SocSci, Div, Wrt | ACGH, DD, SS.
135. Social Relationships (4)

Lecture-3 hours; discussion - 1 hour or term paper. Prerequisite: course 1, 2 or 3, and upper division standing. Social and cultural factors influencing friendships and intimate relationships. Topics include
relationship development, relationship maintenance, and relationship loss. GE credit: Div, SocSci, Wrt \| SS.

## 137. African American Society and Culture 1790-1990 (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 1. Political and social transformations of African American communities between 1790 and 1990, as seen through film, literature, and music. Topics include: Black consciousness, Afro-Slave culture, The Harlem Renaissance, and contemporary Hip Hop. GE credit: SocSci \| ACGH, DD, SS.

## 138. Economic Sociology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Economics 1A or 1B and upper division standing in the social sciences. Overview of the rapidly growing field of economic sociology. Focus on variations in the ways that markets are organized. The relationship between individual and collective rationality will also be emphasized. GE credit:
SocSci | ACGH, SS, WC.

## 139. Corporations and Society (4)

Lecture-3 hours; discussion - 1 hour; term paper. Prerequisite: course 1 or 2 or 3 , and upper division standing. The study of the history and power of the modern corporation; corporate organization; politics, the state, and the corporation; labor unions and the labor process; competition, regulation and international markets; the multinational and conglomerate corporation; and mass markets and consumerism. GE credit: SocSci | ACGH, SS.

## 140. Social Stratification (4)

Lecture-3 hours; discussion - 1 hour or term paper or research project (instructor's option). Systems of social ranking, theories of stratification; power, prestige, culture, and styles of life of various social classes; social mobility and its consequences for social structure. GE credit: SocSci | ACGH, DD, SS.

## 141. Industrialization and Social Change

 (4)Lecture-3 hours; discussion - 1 hour or term paper or research project. Selected technological and social factors. Preconditions of economic development and industrialization. Social, political, and cultural issues at various levels of economic development. Major historical differences and major current trends. Emphasis either on highly industrialized countries or on less developed countries. GE credit: SocSci, Wrt \| SS.

## 143A. Urban Society (4)

Lecture-3 hours; discussion-1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Theories of city origins. Analysis of the historic process of urbanization and of varying city types. Comparison of American and European experience of metropolitanization, counterurbanization, and neighborhood change. Consideration of competing theories of urban growth and change and competing visions of the urban future. Offered in alternate years. GE credit: SocSci | SS.

## 143B. Sociology of City Life (4)

Lecture-3 hours; discussion - 1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent; course 143A recommended. Critical dissection of the "loss of community" issue. Analysis of the organization of primary ties in the city, of the culture of urban public life and of the learning of city skills. Offered in alternate years. GE credit: SocSci, Wrt \| SS.

## 144. Agriculture and Society (4)

Lecture-3 hours; discussion - 1 hour or term paper or research project. Prerequisite: advanced standing in the social sciences or one year of course work in agricultural and environmental sciences. Development of agriculture as a major enterprise in modern society with the concomitant reduction in the labor force and family farms. Analysis of issues including mechanization, migrant labor, corporate farming, and public resource policy. Offered in alternate years. GE credit: SocSci $\mid$ SS.

## 145A. Sociology of Third World

 Development (4)Lecture-3 hours; discussion-1 hour. Prerequisite: course 1; upper division standing. Introduction to theories and contemporary issues in the sociology of development. Topics such as urbanization, rural/ agrarian change, class, status groups, international division of labor, sectoral shifts, international capital, informal economy, gender, and political processes are analyzed within a comparative-historical framework. GE credit: SocSci, Div, Wrt | SS, WC.
145B. Gender and Rural Development in the Third World (4)
Seminar-4 hours. Prerequisite: course 1; upper division standing. Political-economic analysis of women and work during the process of socioeconomic change in the world with particular attention to the family/household context. Offered in alternate years. GE credit: SocSci, Div, Wrt \| SS, WC.
147. Sociological Perspectives on East Asia (4)

Lecture-3 hours; discussion - 1 hour or term paper or research project. Sociological theories and concepts applied toward understanding East Asian society. Emphasis on the political structure, stratification, and economy in China and Japan. Analysis of historical and contemporary similarities and differences. Offered in alternate years. GE credit: SocSci | SS, WC.

## 148. Collective Behavior (4)

Lecture-3 hours; discussion - 1 hour or term paper or project (instructor's option). Prerequisite: course 1 or the equivalent. Study of behavior of human crowds and masses in extraordinary circumstances, including crowd panics, mass scares, collective protests, riots, revolutionary situations, ecstatic and revivalist gatherings, crazes, fads, and fashions. GE credit: SocSci | SS.

## 149. Religion and American Society (4)

Lecture-3 hours; class project. Historical, contemporary survey of religious traditions and organizations and their relation to U.S. social and cultural patterns. Civil religion, religious pluralism, minority and deviant communities, religious migration, U.S. religion as a social institution, and religion, politics, and social stratification. Offered in alternate years. GE credit: SocSci, Div, Wrt \| ACGH, DD, SS.

## 150. Criminology (4)

Lecture-3 hours; discussion - 1 hour or term paper or research project. Sociological analysis of criminal behavior in relation to social structure and the criminalization process. GE credit: SocSci | SS.

## 151. The Criminal Justice System (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 150 and upper division standing. Sociological analysis of the different components of the criminal justice system including the emergence and interpretation of criminal laws, the contemporary roles and functions of the police, criminal courts and correctional institutions. GE credit: SocSci|SS.

## 152. Juvenile Delinquency (4)

Lecture-3 hours; discussion - 1 hour or term paper or research project. Study of juvenile delinquency in relation to the family, peer groups, community, and institutional structures. Consideration of processing of the delinquent by formal agencies of control. GE credit: SocSci | SS.

## 153. The Sociology of Childhood (4)

Lecture-3 hours; term paper. Prerequisite: upper division standing. Contemporary childhood in historical, cross-cultural, and global perspectives. Examine changes in understanding of the nature of childhood and "best interests of the child" by class, race, gender, geographic region, and historical period. GE credit: SocSci | ACGH, DD, SS, WC.

## 154. Sociology of Health Care (4)

Lecture-3 hours; discussion - 1 hour or term paper or research project. Overview of sociological research in medicine and health care, with emphasis on the organizational, institutional, and social psychological aspects. GE credit: SocSci | SS.

## 155. Sociology of Law (4)

Lecture-3 hours; discussion-1 hour or term paper or research project. Law considered as social control; relation of legal institutions to society as affecting judicial decision making and administration of justice. Lawyers as an occupational group. Legal reform. GE credit: SocSci | SS.

## 157. Social Conflict (4)

Lecture-3 hours; discussion-1 hour or term paper or project. Analysis of the causes, dynamics, and regulation of social conflict within and between various kinds of social groupings with particular reference to nonviolent methods of waging and regulating conflict. GE credit: SocSci | SS.

## 158. Women's Social Movements in Latin

 America (4)Lecture-3 hours; term paper. Restricted to upper division standing. Contemporary women's social movements in Latin America, focusing on Honduras, El Salvador, Brazil, and Nicaragua. Examination of exploitation and oppression in Latin America. GE credit: SocSci | DD, SS, WC.

## 159. Sociology of Work and Employment

 (4)Lecture-3 hours; term paper or discussion-1 hour. Pass 1 restricted to upper division majors and graduate students. Historical and contemporary overview of employment, work, and occupations in American society. Study of authority and power relations, labor markets, control systems, stratification, and corporate structures, and how these factors shape work in diverse or organizational and employment setting. GE credit: SocSci | SS.
160. Sociology of the Environment (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: upper-division standing in Sociology strongly recommended. Production, consumption, and urban expansion. Basic social logics surrounding current problems of resource scarcity (environmental extractions) and excess wastes
(environmental additions). Ways that society can change and re-organize itself to become more environmentally conscious and hence ecologically sustainable. GE credit: SocSci | ACGH, DD, SS, WC.

## 161. The Civil Justice System (4)

Lecture-3 hours; term paper. Prerequisite: course
155; upper division standing. Pass One open to upper division and graduate Sociology \& Sociology Organizational Studies majors. Empirical studies of the different aspects of the civil justice system in the United States and Global Society including the litigation, juries, civil rights, and international laws relating to trade, the environment, and human rights. - II. (II.)

## 171. Sociology of Violence and Inequality

 (4)Lecture/discussion-4 hours. Prerequisite: upperdivision standing or consent of instructor. How systems of social inequality organize the practice of violence. Definitions of violence and issues affecting the social capacity for violence. Analysis and comparison of different forms of violence associated with race, class, gender relations and social organization. GE credit: SocSci \| SS.

## 172. Ideology of Class, Race and Gender

 (4)Lecture-4 hours. Examination of popular belief systems that accompany relations between social classes, whites and blacks, and men and women in the United States. How do dominant groups attempt to justify each relationship, and is there ideological conflict or consensus between groups. GE credit: SocSci, Div, Wrt | ACGH, DD, SS.

## 173. Sociology Through Literature (4)

 Lecture-3 hours; discussion - 1 hour or term paper or research project. Introduction to analysis of literature as sociological data. Reading of numerous works on American and other societies by authors such as Steinbeck, Lewis, Dreiser, Schulberg, Orwell, etc. GE credit: SocSci \| SS.174. American Jewish Identities and Communities (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: upper division standing required. Sociology of Jewish life, analyzing challenges to Jewish identity and community in the diaspora.
Diversity within the Jewish community, Americanization, women, new immigrants, post-Holocaust Jewish identity, and LGBT Jews. Offered in alternate years. GE credit: SocSci | SS.

## 175. Mass Communication (4)

Lecture-3 hours; term paper. Prerequisite: course 1 or 2 . Examines the relationship between the media and social structures. History of media-state relations. Media as reflector and shaper of values. Emphasis on current European and Marxist and pluralist theories rather than on content analysis.
Offered in alternate years. GE credit: SocSci | SS.

## 176. Sociology of Knowledge, Science, and

 Scientific Knowledge (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: upper division standing preferred. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as Science and Technology Studies 176.) GE credit:
SocSci | SS.
180A. Complex Organizations (4)
Lecture-3 hours; discussion-1 hour or term paper or research project. Prerequisite: course 1; Economics 1 A and 1 B recommended. Develops a sociological approach to organizations theory. Designed to introduce sociological concepts, address the alternative psychological and economic models, and involve students in the practice of organizational analysis. GE credit: SocSci \| SS.

## 180B. Complex Organizations (4)

Lecture-3 hours; discussion - 1 hour or term paper or research project. Prerequisite: course 180A or consent of instructor. Builds on concepts and skills developed in course 180A. Deals with the issues of organizational decision making, design, and survival. Emphasis on relations between organizations and the effects of those relations in both the public and private sectors. GE credit: SocSci | SS.

## 181. Social Change Organizations (4)

Lecture-3 hours; discussion-1 hour or term paper.
Prerequisite: course 1. Analysis of organizations with social change and improvement goals and programs, emphasizing voluntary associations and grassroots citizen groups. Topics treated include formation, decision making and leadership, strategies and tactics, factionalism and coalitions, effectiveness. Offered in alternate years. GE credit: SocSci, Wrt \| SS.

## 182. Experimental and Utopian Communities (4)

Lecture-3 hours; discussion-1 hour. The social structure of intentional, experimental or Utopian settlements and communitarian movements, including comparison with other small settlement forms: villages, neighborhoods, monasteries, encampments and nonsettlement communities based on occupation, ethnicity, and religion.
183. Comparative Organizations (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 180A or 180B; upper division standing. Examination of economic and political organizations of major industrial nations. Discussion of historical, cultural, social, and political influences on industrial patterns and practices, alternative theoretical models for explaining differential development. Societies may include Sweden, Japan, Germany, Taiwan, and South Korea. Offered in alternate years. GE credit: SocSci, ACGH, SS, WC.

## 185. Sociology of Social Welfare (4)

Lecture-3 hours; discussion - 1 hour or term paper or research project. Sociological analysis of the evolution and current organization of welfare functions in modern societies. GE credit: SocSci \| SS.
188. Social Stratification in China (4) Lecture-3 hours; term paper. Prerequisite: upper division standing. Social and political systems and patterns of social stratification in relation to change in state power and economic institutions in China since 1949. Offered in alternate years. GE credit: SocSci | SS, WC.
189. Social Science Writing (4)

Lecture-3 hours; discussion - 1 hour or term paper. Prerequisite: course 46A, upper division standing, and 12 units of social science. Improved analytic writing and methods for reporting social science research to a wider public. Sociological analysis of the conditions of good and bad writing. GE credit: SocSci | SS.
190X. Seminar in Sociological Analysis (4) Seminar-3 hours; term paper. Prerequisite: upper division standing and course 100 (former course 165A). In-depth examination at an upper division level of a special topic in Sociology. Emphasis on student participation in learning. May not be repeated for credit. Limited enrollment.

## 191. Workshop in Contemporary Sociological Theory (4)

Lecture-2 hours; workshop-1 hour; term paper. Prerequisite: course 100 (former 165A) and senior standing. Workshop in contemporary sociological theory that allows students to explore the uses of theory in empirical inquiry on problems of interest to students. Contemporary theory considered in relation to classical and modern influences, concept formation, theory construction, and explanation. Not open for credit to students who have received credit for course 165B. GE credit: SocSci | SS.

## 192. Internship and Research Practicum

 (2-6)Internship-6-18 hours. Prerequisite: course 46A, upper division standing, approval of proposed internship and course 193 concurrently or consent of instructor. Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience. May be repeated for credit with consent of instructor. Maximum of 4 units may be counted toward the major. (P/NP grading only.)

## 193. Workshop in Field Research (2)

 Lecture/discussion-2 hours. Prerequisite: course 46A, course 192 or 199 concurrently for two-four units, senior standing. Overview of the process of collecting, recording, analyzing, and reporting qualitative social data. Emphasis on application of principles; each participant completes an original research project. Not open for credit to students who have completed course 194HA. GE credit: SocSci | SS, WE.194H. Special Study for Honors Students (1-5)
Prerequisite: senior standing and admission to the Honors Program. Independent study of a sociological problem involving the writing of an Honors thesis. (P/NP grading only; deferred grading only, pending completion of sequence) May be repeated up to eight units for credit. GE credit: WE.-I, II. (I, II.)

194HB. Special Study for Honors Students (4)

Seminar-3 hours; term paper. Prerequisite: senior standing and admission to the Honors Program.
Directed reading, research and writing culminating in the preparation of a Senior Honors Thesis under direction of faculty adviser. (Deferred grading only pending completion of sequence.) GE credit: SocSci | SS.
195. Special Topics in Sociological Analysis (4)

Seminar-3 hours; term paper. Prerequisite: upper division standing and consent of instructor. In-depth examination of topics in sociology. Emphasis on student research and writing. May be repeated for credit when topic differs. GE credit: SocSci \| SS.

197T. Tutoring in Sociology (1-4)
Tutorial-3-12 hours. Prerequisite: upper division standing; completion of appropriate course with distinction. Activities vary depending on the nature of the course assignment. May include (but not limited to) tutoring on course material, advising on projects and papers, and leading discussion groups. (P/NP grading only.)
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: open to seniors only. (P/NP grading only.)

## Graduate

## 201. Social Research (4)

Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative survey of sociological inquiry, taught as a practicum. Philosophy of social science; values and research; research agendas and research problem formulations; research process; explanations. interpretation; study design; concept formation, measure, sampling, data acquisition, inference; rhetoric and presentation of findings.
206. Quantitative Analysis in Sociology (4) Lecture-4 hours. Prerequisite: course 106. Survey of the statistical models and methods that serve as a foundation for quantitative research in sociology, with an emphasis on multivariate regression analysis, as well as measurement theory and time series analysis. (S/U grading only.)-II. (II.)

## 207A. Methods of Quantitative Research

## (4)

Lecture-3 hours; term paper. Prerequisite: course 106 or the equivalent. Principles of study design, examination of measurement, survey research methods and multivariate analysis. Course will stress actual practice of techniques. Students will carry out quantitative data analysis using packaged computer programs. -I. (I.)

## 208. Topics in Advanced Quantitative

 Methods in Social Science (4)Seminar-3 hours; term paper. Prerequisite: course 206 or the equivalent and graduate standing; major graduate student. Analysis of the logic and application of an advanced statistical model; the particular model chosen may vary. Emphasis on the model's assumptions, its strengths and weaknesses, its application for social science inquiry, and the relationship between methods and social theory. May be repeated up to 12 units for credit. Offered in alternate years.

## 215. Economy, Polity, and Society (4)

Seminar-3 hours; paper. Prerequisite: consent of instructor. Open to graduate students in sociology and related disciplines. Course introduces students to topics and selected issues in the related fields of economic and political sociology and political economy.
220. Deviance, Law, and Social Control (4)

Seminar-3 hours; projects. Prerequisite: course
120 or consent of instructor. Report and discussions of literature on selected forms of deviance in relation to law and formal social control. Agency contacts and exploratory research projects.

## 224. Sociology of Education (4)

Seminar-3 hours; term paper. Prerequisite: course 206 or the equivalent recommended. Overview of sociological theories accounting for the form, role, and evolution of educational systems. Emphasis on empirical research on education and social stratification and application to educational policy. Topics include tracking, racial/ethnic achievement inequalities, school organization, and the immigrant experience.

## 225. Cultural Sociology (4)

Seminar-3 hours, term paper. Explores the varied ways in which culture is understood in the social sciences and the research questions that follow from

[^4]contrasting viewpoints. The approach is historically informed and focused on changing cultural forms in relation to industrialization and post-modernism. Offered in alternate years.
226. Sociological Social Psychology (4) Seminar-3 hours; seminar paper-1 hour. Prerequisite: graduate standing or consent of instructor. Advanced study of the varying approaches, methods, issues and topical concerns of sociological social psychology. Analysis of central and representative historical and contemporary works.
227. Sociology of Reproduction (4)

Lecture-3 hours; discussion-1 hour. Recent social science scholarship in such areas as teenage pregnancy, family planning, abortion, adoption, AIDS, and new reproductive technologies; focus on the current situation in the United States. Offered in alternate years.
230. Ethnic (Race) Relations (4)

Lecture-3 hours; term paper. Advanced study of the determinants of ethnic groupings and their interrelationships. Major theme will be the patterns of ethnic stratification and causes of ethnic conflict. Specific focus upon dominance and resistance to dominance. Influence of social science research.
233. Gender, Culture, and Local/Global Transformation (4)
Seminar-3 hours; term paper. Focus on critical approach to women and development; analyze local transformations with global connections within specific cultural contexts. Course covers theory, methodological issues, and relationship between theory and practice. Offered in alternate years

## 234. Gender, Family, and Society (4)

Seminar-3 hours; seminar paper. Prerequisite: graduate standing or consent of instructor. The major theoretical traditions and concerns in family sociology and sociology of gender. Analysis of selected classical and contemporary works representative of functionalist, Marxist, psychoanalytic, feminist and critical theoretical approaches to these subjects (e.g., Engels, Parsons, Freud, Horkheimer, Goode, Lasch, Mitchell). Emphasis on macro and historical questions.

## 242A. Comparative Methods in Historical

 Sociology (4-4)Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative approaches to major historical phenomena such as nationalism, bureaucratization, feudalism, and capitalism; the relevance of psychological and sociological theories to historical interpretation; the verifiability of historically grounded hypothesis; the meaning of analogy, correspondence and causality. 243. Urban Society (4)

Seminar-3 hours; term paper. Broad overview of the issues and concerns of the field of urban sociology. Special emphasis on the human experience of urban living in contemporary, cross-cultural or historical settings.

## 245. Developing Societies (4)

Seminar-3 hours; term paper or project. Prerequisite: graduate student status or familiarity with problems of developing societies. Analysis of social and economic problems of developing societies from the standpoint of theory and research on modernization and underdevelopment. Nature of third world dependency and interdependence in the global political economy. Offered in alternate years.

## 248. Social Movements (4)

Seminar-3 hours; term paper. Analysis of current issues in and contributions to the study of collective behavior and social movements; particular focus upon the strategies and tactics of social movements.
254. Sociological Issues in Health Care (4) Seminar-3 hours; term paper. Prerequisite: open to graduate or professional students. Sociological perspectives and methods directed to health care issues. Students select topics for supervised research. The course will have a theme (described in advance) each time it is offered. Paper on research will be required. (S/U grading only.)

## 255. Sociology of Law (4)

Seminar-4 hours. Prerequisite: consent of instructor. Analysis of the nature of the legal process and its impact on social behavior. Will consider (1) nature and functions of law, (2) the organization and administration of law, and (3) the capacity of law to affect social behavior.
265A. Classical Sociological Theory (4) Lecture-3 hours; discussion - 1 hour. Introduces graduate students to the work of the main classical thinkers in the tradition of social theory, such as Marx, Durkheim, Weber, Simmel, Freud, G.H. Mead, and Parsons, locating them within the historical, cultural, and philosophical milieu in which their ideas originated.

## 265B. Theory in Contemporary Sociology

 (4)Lecture-3 hours; discussion-1 hour. Prerequisite: course 265A. Explores the uses of theories in contemporary sociology by tracing their connections with classical sociological writings and their relations to broader theoretical concerns of contemporary social thought, with particular emphasis on relevance to the current historical, cultural and socia milieu.

## 270. Social Demography (4)

Seminar-4 hours. Prerequisite: course 170 or con sent of instructor. How social institutions affect and are affected by the level and variation of mortality, migration, and fertility. Special emphases on the determinants of fertility-related attitudes and behavior, on less-developed countries, and on contemporary empirical studies.
280. Organizations and Institutions (4) Seminar-4 hours. Theory of formal organizations and bureaucracy. Methods of research in organizational and institutional studies. Historical and comparative analysis of political, religious, educational, military, and economic structure.

## 290. Seminar (4)

Seminar-3 hours; term paper. (S/U grading only.)

## 292A. Field Research (4-4)

Seminar-3 hours; field trips. Prerequisite: graduate standing in Sociology or consent of instructor. The process of collecting, analyzing and reporting qualitative social data: techniques of intensive interviewing, participant-observation and document analysis; generating, developing, and evaluating analytic
frameworks; recording, storing, retrieving, and writing up qualitative data. Emphasis on application of principles; each participant completes a fieldwork project.

## 293. Proseminar in Sociology (2)

Seminar-2 hours. Prerequisite: first-year Sociology graduate students only. Introduction to graduate training in sociology. A seminar designed to introduce students entering graduate work in the department to its ongoing research activities. (S/U grading only.) - (I.)
295. Special Topics Seminar. (4)

Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Research topics in Sociology. Specific topic will vary according to faculty interest and student demand May be repeated for credit when topic differs. - I, II, III. (I, II, III.)
298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)
299. Individual Study (1-12)
(S/U grading only.)

## Professional

390A. The Teaching of Sociology (2)
Lecture - 1 hour; discussion - 1 hour. Prerequisite: graduate standing; required for first-time teaching assistants. Practical instruction in teaching methods for qualitative and quantitative courses. Pedagogical issues involved in critical sociological analysis. (S/U grading only.)-I. (I.)

390B. The Teaching of Sociology (2)
Lecture-1 hour; discussion - 1 hour. Prerequisite: graduate standing. Practical instruction in devising course syllabi, lectures and assignments for Associ-ate-Instructors and others interested in college teaching. Discussion of pedagogical methods of teaching qualitative and quantitative courses. (S/U grading only.)-II. (II.)
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated
for credit. (S/U grading only.) - I, II, III. (II, II, III.)

## Professional

## 466. Research Paper Workshop (2)

Workshop- 1.5 hours; discussion-0.5 hours. Prerequisite: Master of Arts standing. A workshop to assist advanced graduate students in the preparation of an original research paper. Students present their research papers and discuss issues in theory, research design, data, empirical inference, and verbal and written presentation of a professional research paper. ( $S / U$ grading only.)

## Soil Science

See Earth and Planetary Sciences, on page 223; Soil Science, on page 509; Soils and Biogeochemistry (A Graduate Group), on page 510; and Soil and Water Science, on page 511.

## Soil Science

(College of Agricultural and Environmental Sciences)
Faculty. See Land, Air and Water Resources, on page 364.
Major Programs. See the Soils and Biogeochemistry track in Environmental Science and Management, on page 298.

## Minor Program Requirements:

The Department of Land, Air and Water Resources, Soils and Biogeochemistry Program, offers a minor program in soil science. The minor is especially geared toward students in the environmental sciences including Hydrologic Science, Environmental Science and Management, Environmental Toxicology, Ecological Management and Restoration, International Agricultural Development, Crop Science and Management, Environmental Horticulture and Urban Forestry, Geology, and Plant Biology.

UNITS
Soil Science
.21
Soil Science 100 ...................................... 5
Courses selected from Soil Science 102, 105,
107, 109, 111, 118, 120, Plant Sciences
158, Hydrologic Science 124,
134 ...................................................... 16
Minor Adviser. R.J. Southard (Land, Air and Water Resources)
Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees in Soils and Biogeochemistry are available. Information regarding these programs can be obtained from the graduate advisers, at http://soils.ucdavis.edu/ and in the Graduate Announcement. See also Graduate Studies, on page 111.

Graduate Advisers. Randy Dahlgren and Sanjai Parikh (Land, Air and Water Resources)
Courses in Soil Science (SSC)
Questions pertaining to the following courses
should be directed to the instructor, to the Resource

Sciences Teaching Center in 1150 Plant and Environmental Sciences Building 530-752-1603, or see undergraduate and graduate Soils
and Biogeochemistry courses at
http://lawr.ucdavis.edu/undergrad_esm.htm or http://lawr.ucdavis.edu/graduate_sbg.htm.

## Lower Division

10. Soils in Our Environment (3)

Lecture-3 hours; independent study. Soils in our global ecosystem; soils as natural bodies formed by interactive environmental processes; soil response to use and management; sustainable use of soil resources; role of soils in agricultural and environmental issues; role of soils in our daily lives. Limited enrollment. GE credit: SciEng | QL, SE, SL. -I. (I.) Dahlgren

## 92. Soil Science Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.) - I, II, III. (I, II, III.)

## Upper Division

## 100. Principles of Soil Science (5)

Lecture-3 hours; laboratory-3 hours; term paper. Prerequisite: Chemistry 2A-2B, Physics 1A-1B, Biological Sciences 1A; Geology 50, Biological Sciences 1 C recommended. Soil as part of natural and managed ecosystems and landscapes. Solid, liquid, and gas phases and their interactions in the soil. Water, gas and heat movement in soil. Soil biology. Plant nutrient acquisition and use. Soil development, management and use. GE credit: SciEng | QL, SE, SL, VL.-I. (I.) Southard
102. Environmental Soil Chemistry (3) Lecture-3 hours. Prerequisite: course 100 or the equivalent; general chemistry. Soil chemistry processes related to the fate and transport of contaminants in soil. Soil minerals, natural organic matter, surface charge, soil solution chemistry, redox reactions in soil, and sorption of inorganic and organic contaminants. GE credit: SciEng | QL, SE, SL.-II. (II.) Parikh

## 105. Field Studies of Soils in California Ecosystems (5)

Prerequisite: courses 100 and 120 , or equivalent recommended. Field-based studies of soils in California ecosystems, away from campus, throughout California. Emphasis on description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes in soils on the landscape; and the role of soils in land use. May be repeated one time for credit. GE credit: SciEng | QL, SE, SL, VL, WE. -IV. (IV.) Southard, Dahlgren, O'Geen, Amundson

## 107. Soil Physics (5)

Lecture-3 hours; laboratory-3 hours; discussion1 hour. Prerequisite: course 100, Environmental and Resource Sciences 100, Mathematics 16A, or the equivalent. Physical properties of soil. Principles of water, gas, heat, and solute movement in soil with selected examples related to soil and water management. Influence of soil properties on transfer processes. GE credit: SE.-I. (I.) Hopmans
109. Sustainable Nutrient Management (4) Lecture-3 hours; laboratory-3 hours. Prerequisite: course 100 or the equivalent. Availability of nutrients in organic and conventional agricultural, vineyard, orchard and plantation forest soils; management of fertilizers, cover crops, compost, sewage sludge and manures for crop production and to prevent loss to the environment is emphasized. GE credit:
SciEng | OL, QL, SE, SL, VL, WE. - III. (III.) Horwath

## 111. Soil Microbiology (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Chemistry 1C and Biological Sciences 1C. Major groups of microorganisms in soil, their interrelationships, and their responses to environmental variables. Role of microorganisms in cycling of nutrients.

Plant-microbe relationships. Transformations of organic and inorganic pollutants. GE credit: SciEng | QL, SE, SL, WE. - II. (II.) Scow

## 118. Soils in Land Use and the Environment

 (4)Lecture -3 hours; discussion - 1 hour. Prerequisite: course 100 or consent of instructor. Soils are considered as elements in land use planning and environmental quality. Topics include: soil survey reports, remote sensing, land capability classification, soil erosion/conservation, waste disposal on soils and soil reclamation. One one-day field trip. GE credit: SciEng | SE, SL. - III. (III.) O'Geen

## 120. Soil Genesis, Morphology, and

Classification (5)
Lecture-4 hours; laboratory-3 hours (includes five one-day weekend field trips). Prerequisite: course 100; Geology 50 recommended. Recognition and description of soils; chemical, biological and physical processes of soil formation. Factors of soil formation. Interactions of soils with diverse ecosystems. Introduction to soil classification. Practice using soil taxonomy. Practical experience describing soil prop erties in the field. GE credit: SciEng | QL, SE, SL, VL. - III. (III.) Southard

## 192. Soil Science Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.) - I, II, III. (I, II, III.)

## 198. Directed Group Study (1-5)

(P/NP grading only.)-I, II, III. (I, II, III.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.) - I, II, III. (II, II, III.)

## Graduate

202. Topics in Advanced Soil Chemistry (3)

Lecture/discussion-3 hours. Prerequisite: undergraduate course in soil chemistry, water chemistry, or consent of instructor. Reviews of current research in soil chemistry. Topics include double layer theory; clay mineral and oxide surface chemistry; adsorption on soil surfaces; speciation and modeling of solution ions; solubility and mineral stability diagrams. Discussion of current journal articles. May be repeated one time for credit when topic differs. - II.

## (II.) Parikh

## 205. Field Studies of Soils in California Ecosystems (5)

Fieldwork-50 hours; discussion- 15 hours; lec-ture-5 hours. Prerequisite: courses 100 and 120 or equivalent recommended. Limited enrollment. Fieldbased soil studies in California ecosystems. Description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes; their role in land use. Similar to SSC 105; requires additional work for graduate credit. May be repeated one time for credit if geographic locale changes. Offered irregularly. - IV. (IV.) Amundson, Dahlgren, O'Geen, Southard

## 208. Soil-Plant Interrelationships (3)

Lecture-3 hours. Prerequisite: course 100, Plant Biology 111 B , or consent of instructor. Plant needs, occurrence and reactions of water and mineral nutrients in soils; root systems and their growth in soils; mass flow and diffusion mechanisms in nutrient acquisition; models relating nutrient uptake to soil and plant characteristics; nutrient assimilation and crop quality. Offered in alternate years. - (II.) Richards
211. Advanced Soil Microbiology (3) Lecture-3 hours. Prerequisite: Chemistry 8A-8B; course 111; Biological Sciences 102, 103 or an equivalent course recommended. Microbial metabolism of organic chemicals in soil, both natural and xenobiotic. Decomposition of organic matter. Kinetics of microbial processes in soil. Offered in alternate years.-!. Scow
219. Ecosystem Biogeochemistry (4)

Lecture-3 hours; laboratory/discussion - 2 hours Prerequisite: introductory courses in ecology/biology and soils recommended; undergraduates accepted with consent of instructor. Multidisciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as Ecology 219.)-III. (III.) Houlton
220. Pedology (3)

Lecture - 3 hours. Prerequisite: consent of instructor; course 120 recommended. Topics selected from studies of soil-forming processes, soil-geomorphic relations, mineral weathering, new developments in soil classification, and development of pedologic theory. Topics vary from year to year. May be repeated one time for credit. Offered in alternate years. - (II.) Southard

## 222. Global Carbon Cycle (3)

Lecture-3 hours. Prerequisite: Chemistry 8A, 8B Mathematics 16A, 16B, course 100 or the equivalent. Global carbon cycle from Phanerozoic epoch to modern times. Examination of long and short-term carbon cycles. Transfer of carbon among ocean, land and life with emphasis on humic substance formation, methods of characterization, reactions with organics and soil carbon stabilization. Offered in alternate years. - II. (II.) Horwath
290. Special Topics in Soil Science (1-4)

Seminar-1-4 hours. Prerequisite: graduate standing. Seminars and critical review of problems, issues, and research in soil science. May be repeated for credit. (S/U grading only.) $-I$ III, III. (I, II, III.)
298. Group Study (1-5)

Prerequisite: consent of instructor. May be repeated for credit when topic differs. (S/U grading only)-I, II, III. (I, II, III.)
299. Research (1-12)
(S/U grading only.) -I, II, III. (I, II, III.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Soils and Biogeochemistry (A Graduate Group)

A. Toby O'Geen, Ph.D., Chairperson of the Group

Group Office. 1152 Plant \& Environmental
Sciences Building

Jeffrey P. Mitchell, Ph.D., Cooperative Extension Specialist (Plant Sciences)
A. Toby O'Geen, Ph.D., Cooperative Extension Specialist
Ken Tate, Ph.D., Cooperative Extension Specialist (Plant Sciences)
Graduate Study. The Soils and Biogeochemistry Graduate Group offers programs of study and research leading to the M.S. and Ph.D. degrees. The focus of Soils and Biogeochemistry is on the physical, chemical and biological processes occurring in soils of different landforms and ecosystems. The goal is to understand the complex processes of mass and energy flow that control agricultural and natural ecosystem functions, productivity, and sustainability. Investigations assess impacts and implications of natural processes and anthropogenic effects, such as climate change, on soil and ecosystem behavior and development. Examples include: fate and emission of greenhouse gases; soil carbon sequestration; fate and transport of native and applied chemicals; soil microbial ecology; nutrient uptake and management; nutrient cycling in managed and wildland ecosystems; pesticide and trace element adsorption on surfaces; mineral weathering; organic agriculture; bioavailability of toxics; soil erosion; conservation; ecosystem productivity and sustainability; and the study of soil evolution on the landscape. These studiss are carried out within a framework of integrating applied chemical, physical, mathematical, and biological sciences.
Graduate Advisers. Randy Dahlgren, Ph.D.; Sanja Parikh, PhD.

## Graduate Admissions Officer. A. Toby

O'Geen, PhD.

## The Major Program

The Spanish major program assures proficiency in all four language skills-speaking, understanding, reading, and writing-and acquaints students with the intellectual and cultural contributions of the Spanishspeaking world through a study of its language, literazure, and cultural productions.
The Program. The department's lower division program gives students a solid foundation in the Spanish language, either through the traditional alementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. Linguistics 1 introduces students to a systematic study of language in general and serves as an introduction to upper division courses in Spanish linguistics. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary and cultural criticism and to the four areas of study represented in the department's curriculum: Spanish linguistics, Spanish literature and culture, Latin-American literatore and culture, and Latino literatures and cultures in the United States. Students are encouraged to work closely with the department's academic advisers in designing a program of studies tailored to their individual needs and interests. Many students combine the Spanish major with another major in the humanties or social sciences.

## Student Learning Outcomes. Educational

 Objectives:- Linguistics. Demonstrate knowledge of the Spanish speaking world's linguistic diversity through the comprehension of Spanish in a variety of sitnations, discursive modes and historical, regional or social variations. Demonstrates analytic, interpretative, and critical thinking skills; Spanish $111 \mathrm{~N}, 113,115 / \mathrm{S}, 116,117,118$, 180.
- Literature. Demonstrate analytic, interpretative and critical thinking skills with respect to literary texts from Latin America, Spain, the United States and other countries in which there is a literary production in Spanish; Spanish 100/S,

130, 131N, 134A/B, 142 (Spain); 150N 151, 157, 159/S (Latin America); 117, 174, 176, 177 (United States).

- Culture. Demonstrate cultural awareness with respect to the diversity of cultural products and manifestations produced in the Spanish speaking world (Latin America, Spain, the United States and other countries in which there is a cultural production in Spanish; Spanish 100/S, 141/S, 170/S, 174.
- Film and Art. Demonstrate analytic interpretafive and critical thinking skills with respect to linguistics, literature and cultural studies.
Career Alternatives. The program, alone or in combination with other major programs, may lead to advanced study of the language or literature and cutture of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, business, or international relations.

## A.B. Major Requirements:

Preparatory Subject Matter .................4-37
Spanish 1, 2, 3, 21 or 21 S, 22 or 22S, 23
or 23S, and 24 or 24 S ...................... 0-33
or Spanish 31, 32, 33 ........................0-15
Linguistics 1 $\begin{array}{r}0-15 \\ \hline\end{array}$
In consultation with a departmental adviser and with the consent of the department chairperson, Linguistics 1 may be taken concurrently with upper division courses.
Depth Subject Matter $.45-48$
One course in each of the following five
areas: ........................................... 19-20
Spanish $100,100 \mathrm{~S}, 141,141 \mathrm{~S}, 170$ or 170S. ... 4
Spanish $111 \mathrm{~N}, 115$, or 116.............3-4
Spanish 130, $131 \mathrm{~N}, 134 \mathrm{~A}$ or $142 \ldots \ldots .4$
Spanish 150N, 151, 157, 159 or 159S ....................................... Spanish $117,174,176$, or $177 \ldots \ldots \ldots .4$ Students planning to take Spanish 110 should do so at the beginning of the upper division sequence or concurrently with Spanish 100, 100S, 141, 141S, 170 or 170S.
Seven elective courses to be chosen in consultation with the student's major

Students may, with the approval of their adviser, take up to two elective courses outside the Spanish department in such programs as:
African American and African Studies:
African American and African Studies
107A, 180
Anthropology: Anthropology 144
Art History: Art History 151
Chicana/o Studies: Chicana/o Studies
154, 155, 156, 160, 170, 171
Comparative Literature: Comparative
Literature 152, 165/S
Education: Education 151, 152
History: History 159, 160, 161A, 161B,
164, 165, 166A, 166B, 167, 168, 169A, 169B
Linguistics: Linguistics 166
Native American Studies: Native American Studies 120, 133A/B, 184
A maximum of six units of course 199 may be counted toward the major. Course 199 cannot be used to replace regular departmental courses.
Total Units for the Major $\qquad$ .49-85
Major Advisers. Student Affairs Officer/Undergraduate Academic Coordinator; Laura Barrera, libarrera@ucdavis.edu.
Advising. Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major adviser. This is especially important for students who intend
to use their major as preparation for graduate study, for those who are planning a teaching career, and for those who wish to take advantage of our Education Abroad Program options.

## Minor Program Requirements:

UNITS
Spanish.............................................. 23-24
One course in each of the following five
areas:
Spanish 100, 100S, 141, 141S, 170, or
170S.
Spanish $111 \mathrm{~N}, 115$ or 116 3-4
Spanish $130,131 \mathrm{~N}, 134 \mathrm{~A}$, or $142 \ldots . .4$
Spanish 150N, 151, 157, 159 or 1595. .. 4
Spanish 117, 174, 176, or 177.......... 4
One upper division elective in
Spanish.
Consult a departmental adviser if any of
these courses are to be taken abroad.
Honors Program. Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least six units of Spanish 194H distributed over two quarters. Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.
Education Abroad Program Options. The department encourages its majors to consider study in a Spanish-speaking country with our Education Abroad Program (EAP). It is now possible for our students to complete significant portions of the Spanish major in the EAP centers at both the lower (Preparatory Subject Matter) and upper division levels through newly introduced options.
UC Davis Quarter Abroad. The Quarter Abroad Program offers programs in Mendoza, Argentina (fall quarter) and in Madrid, Spain (spring quarter). These programs aim at providing students with opportunities to increase their knowledge of the Spanish language and cultures by experiencing the life-learning challenges of living and studying abroad.
Students may earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program may offer an upper division course taught by the UC Davis Program Director focusing on history, culture and society.
For more information, contact $C$. Colombi
or C. Martínez-Carazo or see http://
studyabroad.ucdavis.edu/programs/ quarterabroad/.
Teaching Credential Subject Representative. C. Colombi; see the Teaching Credential/M.A. Program on page 115.
Graduate Study. The Department offers courses leading to the M.A. degree in Spanish to students who have completed with distinction the A.B. degree in Spanish, or the equivalent. Candidates will be recommended for admission to graduate studies in Spanish provided they meet the requirements of the Graduate Studies office and the Department of Spanish. The Department also offers programs of study and research leading to the Ph.D. degree. Detailed information may be obtained by writing to the Chairperson or the Graduate Director of the Spanish Department.
Graduate Adviser. Mandy Bachman,
mlbachman@ucdavis.edu.
Prerequisite Credit. Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

## Courses in Portuguese (POR) Lower Division

## 1. Elementary Portuguese (5)

Lecture/discussion-5 hours; laboratory-1 hour. Introduction to Portuguese grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed Portuguese 2 or 3 in the 1 Oth or higher grade of high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a $P / N P$ petition is filed. GE credit: WC.-I. (I.)

## 1 A. Accelerated Intensive Elementary

 Portuguese (15)Lecture/discussion-15 hours. Not open to students who have completed courses 1, 2 or 3 . Intended for students who wish to complete three quarters of Portuguese 1, 2, and 3. GE credit: WC.-IV. (IV.)

## 2. Elementary Portuguese (5)

Lecture/discussion-5 hours; laboratory-1 hour. Prerequisite: course 1. Continuation of course 1 in the areas of grammar and development of all basic language skills in cultural context with special emphasis on communication. GE credit: WC.-II. (II.)

## 3. Elementary Portuguese (5)

Lecture/discussion-5 hours; laboratory-1 hour. Prerequisite: course 2. Continuation of course 2 in the areas of grammar and development of all basic language skills in cultural context with special emphasis on communication. GE credit: WC.-III. (III.)

## 21. Intermediate Portuguese (5)

Lecture/discussion - 5 hours; laboratory - 1 hour. Prerequisite: course 3. Review and develop the grammar, vocabulary, and composition acquired in first year Portuguese through exercises and reading of modern texts. GE credit: WC.-I. (I.) Bernucci

## 22. Intermediate Portuguese (5)

Lecture/discussion-5 hours; laboratory-1 hour. Prerequisite: course 21 . Continuation of course 21. Focus on more difficult grammar concepts and further composition practice. Development of all language skills through exercises and reading of modern texts. GE credit: WC. - II. (II.) Bernucci

## 23. Portuguese Composition I (4)

Lecture-3 hours; extensive writing. Prerequisite: course 22. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Class activities include composition, journals, letters, individual and group projects. GE credit: WC, WE. - III. (III.)

## 31. Intermediate Portuguese for Spanish Speakers (4)

Lecture/discussion-3 hours; laboratory-1 hour. Prerequisite: course 3 or the equivalent, or consent of instructor. Development of linguistic and learning skills required for Spanish-speaking students in upper-division courses in Portuguese.-II. (II.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. Directed group study primarily for lower division students.-I. (I.)

## Upper Division

## 100. Principles of Luso-Brazilian Literature

 and Criticism (4)Lecture-3 hours; term paper. Prerequisite: course 3 or Spanish 24,24 S or 33 . Principles of literary criticism applied to the study of fiction, poetry, and essays of major literary writers of the Luso-Brazilian world. GE credit: ArtHum | AH, WC, WE. -I. (I.) Newcomb

## 111. The Structure of Portuguese: Sounds and Words (3)

Lecture/discussion-3 hours. Prerequisite: course 22 or 23. Linguistic description of sound patterns of Portuguese and how those sounds can be used to form
larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. GE credit: SS. -II. (II.)

## 130. Survey of Luso-Brazilian Literature:

 1500-1800 (4)Lecture/discussion -3 hours; term paper. Prerequisite: course 22 or 23; 100. Overview of Luso-Brazilian literature, covering three major literary periods: Renaissance, Baroque, and Enlightenment. Attention to the concept of imitation and nativism. GE credit: AH, WC.-II. (II.)

## 199. Special Study for Advanced

 Undergraduates (1-5)Independent study with professor for advanced undergraduate students, or honor thesis students. (P/ NP grading only) Offered irregularly. GE credit: AH.

## Courses in Spanish (SPA)

Course placement. Students with two years of high school Spanish normally take Spanish 2, those with three years take Spanish 3, and those with four years take Spanish 21 . It is recommended that transfer students who have successfully completed a twoyear sequence at the junior college level continue their study by taking Spanish 24, 24S, 100, 100S, 141, 141S, 170, or 170S. Consult a departmental adviser.

## Lower Division

## 1. Elementary Spanish (5)

Lecture/discussion-5 hours; laboratory-1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit to students who have completed course 1S. Students who have successful completed Spanish 2 or 3 in the 10 th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's $\mathrm{P} / \mathrm{NP}$ option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. GE credit: WC.-I, II, III. (I, II, III.)

## 1A. Accelerated Intensive Elementary

Spanish (15)
Lecture/discussion - 15 hours. Introduction to Spanish grammar and development of all language skills in a cultural context with emphasis on communication. Special 12 -week accelerated, intensive summer session course combining the work of courses 1,2 and 3 . Not open to students who have completed course 1, 1S, 2, 2S, 3 or 3S. GE credit: WC. -IV. (IV.) López-Burton

## 1S. Elementary Spanish (5)

Lecture/discussion-5 hours; laboratory-1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have completed course 1. GE credit: WC. -III.
2. Elementary Spanish (5)

Lecture/discussion-5 hours; laboratory-1 hour.
Prerequisite: course 1 or 1 S . Continuation of courses
1 and $1 S$ in the areas of grammar and basic language skills. Not open for credit to students who have completed course 2S. GE credit: WC. -I, II, III. (I, II, III.)

## 2S. Elementary Spanish (5)

Lecture/discussion - 5 hours; laboratory - 1 hour. Prerequisite: course 1 or 1 S . Continuation of Spanish 1 in the areas of grammar and basic language skills. Offered in a Spanish speaking country under the supervision of UC Davis faculty/lecturer. Not open for credit to students who have completed course 2. GE credit: WC. - III.

## 2V. Elementary Spanish (5)

Web virtual lecture-3 hours; web electronic discus-sion-2 hours. Prerequisite: course 1, 1S, or previous high school Spanish language experience. Continuation of course 1, 1S, or previous high school experience in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically based materials. Not open for credit to students who have taken course 2, 2S, 2Y, or higher. GE credit: WC. -I, II, III, IV. (I, II, III, IV.) Blake

## 2Y. Elementary Spanish (5)

Lecture/discussion-3 hours; web electronic discussion -2 hours. Prerequisite: course 1 or 1 S . Continuation of course 1 or 15 in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials. Not open to students who have taken course 2 or 2 S. GE credit: WC. -I, II, III, IV. (I, II, III, IV.)

## 3. Elementary Spanish (5)

Lecture/discussion - 5 hours; laboratory-1 hour. Prerequisite: course 2 or 2 S . Completion of grammar sequence and continuing practice of all language skills using cultural texts. Not open for credit to students who have completed course 3S. GE credit: WC. -I, II, III. (I, II, III.)

## 3S. Elementary Spanish (5)

Lecture/discussion-5 hours; laboratory-1 hour. Prerequisite: course 2 or 2 S . Completion of grammar sequence and continuing practice of all language skills using cultural texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 3. GE credit: WC.-III. (III.)

## 3V. Elementary Spanish (5)

Web virtual lecture-3 hours; web electronic discus sion-2 hours. Prerequisite: course 2, 2S, 2V, or 2 Y . Continuation of course $2,2 \mathrm{~S}, 2 \mathrm{~V}$ or 2 Y . Online format combining synchronous chatting with technologically based materials. Not open to students who have taken course 3, 3S, 3Y, or higher. GE credit WC. - II, IV. (II, IV.) Blake
3Y. Elementary Spanish (5)
Lecture/discussion-3 hours; web electronic discus-sion-2 hours. Prerequisite: course 2, 2S, or 2V. Completion of grammar sequence and continuing practice of all language skills using cultural texts. Hybrid format combining classroom instruction with technologically based materials. Not open to students who have taken course 3 or 3 S . GE credit: WC. -I, II, III, IV. (I, II, III, IV.)

## 8. Elementary Spanish Conversation (2)

Discussion-3 hours. Prerequisite: course 3; course 21 (concurrently) recommended. Designed to develop oral communication skills. Emphasis on increasing vocabulary, improving listening comprehension, pronunciation, accuracy and grammar control. Practice of everyday situations. Not open to native speakers or to upper division students. GE credit: OL, WC. -I, II, III. (I, II, III.)

## 21. Intermediate Spanish (5)

Lecture/discussion - 5 hours; laboratory - 1 hour. Prerequisite: course 3 or 3S. Review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Students transferring from other institutions are recommended to start the second year program at this point. Not open for credit to students who have completed course 21 S . GE credit: WC. I, II, III. (I, II, III.)

## 21 . Intermediate Spanish (5)

Lecture/discussion - 5 hours; laboratory - 1 hour Prerequisite: course 3 or 3S. Review and develop the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Students transferring from other institutions are recommended to start the second year program at this point. Not open for credit to students who have completed course 21 . GE credit: WC. III. (III.)

## 21 Y. Intermediate Spanish (5)

Lecture/discussion-3 hours; web electronic discus-sion-2 hours. Prerequisite: course 3, 3S, or 3V. Continuation of courses 3 or 3 V in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials where learning takes place both face-to-face and online. Not open to students who have taken course 21 or 21 S . GE credit: WC. -1 III, III. (I, II, III.)

## 22. Intermediate Spanish (5)

Lecture/discussion - 5 hours; laboratory - 1 hour Prerequisite: course 21 or 21 S . Continuation of course 21 and 21 S . Focus on more difficult grammar concepts and further practice on composition. Development of all language skills through exercises and reading of modern texts. Not open for credit to students who have completed course 22S. GE credit: WC. -I, II, III. (I, II, III.)

22S. Intermediate Spanish (5)
Lecture/discussion-5 hours; laboratory-1 hour. Prerequisite: course 21 or 21 S . Continuation of course 21 and 21 S . Focus on more difficult grammar concepts and further practice on composition. Development of all language skills through exercises and reading of modern texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit to students who have completed course 22. GE credit: WC.-III. (III.)
22V. Intermediate Spanish (5)
Lecture/discussion-3 hours; web electronic discus-sion-2 hours. Prerequisite: course $21,21 \mathrm{~S}$, or 21 V . Continuation of course $21,21 \mathrm{~S}$, or 21 V in the areas of grammar and basic language skills. Online format combining synchronous chatting with technolog-ically-based materials. Not open to students who have taken course 22 or 22S. Offered irregularly. GE credit: WC.-I, II, III, IV. (I, II, III, IV.) Blake, Bradley

## 23. Spanish Composition I (4)

Lecture-3 hours; extensive writing. Prerequisite: course 22 or 22 S . Development of writing skills by way of reading, discussion, and analysis of authen tic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Not open for credit to students who have completed 23S. GE credit: WC, WE. -I, II, III. (I, II, III.)

## 23S. Spanish Composition I (4)

Lecture-3 hours; extensive writing. Prerequisite: course 22. Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Course is taught in a Spanish speaking country. Not open for credit to students who have completed course 23 . GE credit: WC, WE.III.

## 24. Spanish Composition II (4)

Lecture-3 hours; extensive writing. Prerequisite: course 23 or 23S. Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres.
Compositions, journals, individual and group projects. Not open for credit to students who have completed course 24S. GE credit: WC, WE. -I, II, III. (I, II, III.)
24S. Spanish Composition II (4)
Lecture -3 hours; extensive writing. Prerequisite: course 23. Development of advanced level writing skills, with particular emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres.
Compositions, journals, individual and group proiects. Course is taught in a Spanish speaking country. Not open for credit to students who have completed course 24 . GE credit: WC, WE. - III.

## 28. Intermediate Spanish Conversation (2)

 Discussion-3 hours. Prerequisite: course 8 or 22. Continuation of course 8. Designed to develop oral communication skills at a more advanced level. Practice in more complex situations. (Former course 9.) GE credit: OL, WC. -I, II, III. (I, II, III.)
## 31. Intermediate Spanish for Native

## Speakers I (5)

Lecture/discussion-3 hours; tutorial-1 hour; frequent writing assignments. Prerequisite: course 3 or the equivalent, or consent of instructor. First course of a three-quarter series designed to provide bilingual students whose native language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Intensive review of grammar and composition. GE credit: OL, WC, WE.-I. (I.)

## 32. Intermediate Spanish for Native Speakers II (5)

Lecture/discussion-3 hours; tutorial-1 hour; frequent writing assignments. Prerequisite: course 31 or consent of instructor. Continuation of intensive review of grammar and composition. Development of all language skills through reading of modern
texts, presentation/discussion of major ideas, vocabulary expansion, and writing essays on topics discussed. Designed for students whose native language is Spanish. (Former course 7B.) GE credit: OL, WC, WE. - II. (II.)

## 148S. Cinema in the Spanish-Speaking

 World in Translation (4)Lecture-3 hours; film viewing - 3 hours. Prerequisite: course 24 or 33 . Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Not open for credit to students who have completed course 148. GE credit: ArtHum, Div | AH, VL, WC.-III. (III.) MartínezCarazo

## 149. Latin-American Literature in

## Translation (4)

Lecture/discussion-3 hours; term paper. Prerequisite: English 3 or the equivalent. Reading, lectures and discussions in English of works by Borges, Cortázar, Fuentes, García Márquez, Paz and others. May not be counted toward the major in Spanish. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE. - (III.) Egan, Newcomb
150N. Survey of Latin American Literature to 1900 (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Latin American literature from preconquest texts and the chronicles of the Conquest to romanticism and modernism. Reading selections include fiction, poetry, drama and essays. GE credit:
ArtHum | AH, WC.-I. (I.) Bernucci, Egan

## 151. Survey of Latin American Literature

 1900 to Present (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Latin American literature from 1900 to the present. Reading selections include fiction, poetry, drama, essays, testimonio, etc. GE credit:
ArtHum | AH, WC.-II. (II.) Bejel, Irwin, Egan, Lazzara, Peluffo
151 N. Survey of Spanish-American Literature 1900 to Present (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 100. Spanish-American literature from Modernism to the present. Reading selections include fiction, poetry, drama, and essays. (Former course 105B.) GE credit: ArtHum | AH, WC.-II. (II.) Egan, Bejel

## 153. Latin American Short Story (4)

Lecture-3 hours; term paper. Prerequisite: course $100,100 \mathrm{~S}, 141,141 \mathrm{~S}, 170$ or 170 S . The evolution of the Latin American short story from the 19th century to the present. Emphasis on the contemporary period. Offered in alternate years. GE credit: ArtHum | AH, WC. - (I.) Egan, Peluffo

## 154. Latin American Novel (4)

Lecture-3 hours; term paper. Prerequisite: course $100,100 \mathrm{~S}, 141,141 \mathrm{~S}, 170$ or 170S. Evolution of the Latin American novel from the 19th century to the
present. Emphasis on significant contemporary works. Offered in alternate years. GE credit ArtHum | AH, WC.-(III) Bejel, Bernucci, Egan 155. Mexican Novel (4) Lecture-3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Evolution of the Mexican novel from the 19th century to the present. Emphasis on the narrative of the Revolution and significant contemporary works. GE credit: ArtHum | AH, WC.-II. (II.) Egan

## 156. Latin American Literature of the Turn of the 20th Century (4)

Lecture-3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Modernism as an authentic expression of Latin American literature and its influence on 20th-century poetry and prose. In depth analysis of the works of Darío and other major writers of the era. Offered in alternate years. GE credit: ArtHum | AH, WC. - (II.) Egan, Peluffo

## 157. Great Works of Latin American

 Literature/Culture (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of major works of Latin American literature/culture and their cultural and literary milieus. May include novels, poetry, film, etc. Works may be analyzed in terms of style, influence, cultural significance, political importance, and/or commercial success. Offered in alternate years. GE credit: ArtHum | AH, WC.-III. Bejel, Bernucci, Egan, Irwin, Lazzara, Peluffo

## 158. Latin American Poetry: From

Vanguardism to Surrealism and Beyond (4)
Lecture-3 hours; term paper. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Study of vanguardism, surrealism, and more recent movements of Latin American poetry. An in-depth analysis of the works of such major poets as Neruda, Vallejo, and Paz. Offered in alternate years. GE credit: ArtHum | AH, WC. - (II.) Bejel, Bernucci, Egan

## 159. Special Topics in Latin American

 Literature and Culture (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 100, 100S, 141, 141S, 170 or 170S. Special topics in the study of Latin American literature and culture. May be repeated two times for credit when topic differs. Offered in alternate years. GE credit: ArtHum | AH, WC. - I, II, III, IV. (I, II, III, IV.) Bejel, Bernucci, Egan, Irwin, Lazarra, Peluffo

## 159S. Special Topics in Latin American Literature and Culture (4)

Lecture-3 hours; term paper. Prerequisite: course 100, 100S, 141, 1415, 170 or 170S. Special topics in the study of Latin American literature and culture. Offered in a Spanish speaking country under the supervision of UC Davis faculty. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC. - III. (III.) Lazzara, Peluffo

## 160. Latin American Women Writers in

 Translation (4)Lecture/discussion-3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Latin American women writers from the 19th and 20th centuries. Recent theoretical approaches to literature by women in Latin America. Discussions in English of works by Matto de Turner, Avellaneda, Storni, Ocampo, Agustini, Mistral, Castellanos, and others. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC.-III. (III.) Peluffo

## 170. Introduction to Latin American Culture

 (4)Lecture - 3 hours; term paper. Prerequisite: course 24, 24S or 33. Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not open for credit for students who have completed course 170S. GE credit: ArtHum, Div \| AH, VL, WC, WE. - III. (III.) Bejel, Irwin, Lazzara, Peluffo

170S. Introduction to Latin American

## Culture (4)

Lecture-3 hours; project. Prerequisite: course 24, 24 S or 33. Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not open for credit for students who have completed course 170. GE credit: ArtHum, Div | AH, VL, WC, WE. - III.
(III.) Colombi, Lazzara, Peluffo

## 171. Music from Latin America (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in Spanish. Not open to students who taken course 171S or Music 127. (Same course as Music 127) May be repeated one time for credit when content differs. Offered in alternate years. GE credit:
ArtHum | AH, WC.-II. Irwin, Ortiz

## 172. Mexican Culture (4)

Lecture-3 hours; term paper or discussion-1 hour or term paper. Prerequisite: course 24, 24S or 33. Study of Mexican culture through a diversity of cultural expression, including elite, popular and mass media culture. Focus on national icons and archetypes, multiculturalism, transnationalism. May be repeated once for credit. GE credit: ArtHum,
Div | AH, VL, WC.-III. (III.) Egan, Irwin
173. Cinema and Latin American Culture (4) Lecture/discussion -3 hours; film viewing - 3 hours. Prerequisite: course 24, 24S, or 33. Understanding Latin American cultures through cinema. History and critical analysis of Latin American film. Focus on a national cinematic tradition. Comparative experiences in different parts of Latin America and/or a particular era. Conducted entirely in Spanish. May be repeated one time for credit. GE credit: ArtHum, Div | AH, VL, WC.-Irwin

## 174. Chicano Culture (4)

Lecture-3 hours; term paper/discussion - 1 hour. Prerequisite: course 24 or 33 . An interdisciplinary survey of Chicano culture. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. (Former course 124.) GE credit: ArtHum, Div | ACGH, AH, DD.-II. (II.) Alarcón

## 175. Topics in Spanish American Cultural Studies (4)

Lecture-3 hours; project-1 hour. Prerequisite: course 24, 24S, or 33 . Specific historical tendencies and issues in Latin American culture(s) from precolombian times to present. Studies of literature, film, art, journalism and performance. Focus on issues of aesthetics, politics, identity, and globalization. May be repeated once for credit if content differs. GE credit: ArtHum, Div | AH, VL, WC, WE. - III. (III.) Bejel, Irwin, Lazzara, Peluffo

## 176. Literature in Spanish Written in the

## United States (4)

Lecture-3 hours; term paper. Prerequisite: course 24 or 33 . Survey of the literary and cultural contributions of the main Spanish-speaking populations present in the U.S.: Chicanos, Puerto Ricans, CubanAmericans, Central Americans, and other Latinos. GE credit: ArtHum, Div | ACGH, AH, DD. - III. (III.) Alarcón

## 177. California and Latin America (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 24, 24 S or 33. Interdisciplinary survey on the relationship between California and Latin America (1500s-present). Latin American representations of California and Californian representations of Latin America, as well as borderlands texts, with a special focus on Mexican-American perspectives. Conducted in Spanish. GE credit: ACGH, DD.-Irwin
180. Senior Seminar in Spanish Linguistics (4)

Seminar-3 hours; term paper. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Spanish linguistics. Limited enrollment. May be repeated one time for credit. GE credit: ArtHum or SocSci \| AH or SS, OL, WE.-I. (I.) Blake, Bradley, Colombi
181. Senior Seminar in Spanish Literature/ Culture (4)
Seminar-3 hours; term paper-1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Spanish literary or cultural studies. Independent research project. May be repeated one time for credit if content differs. Limited enrollment. GE credit: ArtHum | AH, OL, WE. - II. (II.) Altisent, González, Martin, Martínez-Carazo

## 182. Senior Seminar in Latin American

 Literature/Culture (4)Seminar-3 hours; term paper-1 hour. Prerequisite: senior standing; a major in Spanish or consent of instructor. Group study of a special topic drawn from Latin American literary or cultural studies. Independent research project. May be repeated one time for credit if content differs. Limited enrollment. GE credit: ArtHum | AH, OL, WC, WE.-III. (III.) Bejel, Egan, Irwin, Lazzara, Peluffo
1921. Internship in Spanish (1-12)

Independent study-3-36 hours. Prerequisite: course 23; junior standing; major in Spanish, Chicano Studies, or a related field. Internships in fields where Spanish language skills can be used and perfected (teaching, counseling, translating-interpreting). May be repeated for credit for a total of 8 units. Units will not count toward the Spanish major. (P/NP grading only.)
194H. Special Study for Honors Students (1-5)
Independent Study-3-15 hours. Prerequisite: Senior standing and qualification for the Spanish honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Spanish literature, civilization, or language studies. May be repeated for up to 8 units of credit. (P/NP grading only.) GE credit: AH, WC, WE.

## 197T. Tutoring in Spanish (1-4)

Tutorial-1-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)
197TC. Tutoring in the Community (2-4)
Tutorial-2-4 hours. Prerequisite: upper division standing and permission of the chair. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.) GE credit: AH, WC, WE.

## 199. Special Study for Advanced

Undergraduates (1-5)
May be repeated for up to 6 units of credit (P/NP grading only.) GE credit: AH, WC, WE.

## Graduate

## 201. Literary Theory I (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Basic theories and practical approaches to modern and contemporary Hispanic literature. Emphasis on formalism, poststructuralism, socio-cultural discourses, and ideologies. - II. (II.) Bejel

## 202. Literary Theory II (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Major contemporary critical theories including recent, innovative
approaches to Hispanic literature and culture. Readings from Semiotics and Deconstructionism to Psychological and Socio-ideological approaches. Emphasis on Postmodern and Neo-colonial discourse. - III. (III.) Bejel

## 203. Research Methodologies (1)

Seminar-2 hour. Introduction to the range of scholarly research methodologies currently being realized in Spanish linguistics, literary and cultural studies: archival research, textual analysis, discourse analysis, statistics for linguistics, etc.; introduction to scholarly writing (MLA style) and scholarly publishing. (S/ U grading only.) - II. (II.) Altisent, Bejel, Bernucci, Blake, Carazo, Colombi, Egan, Irwin, Martin, Marti-nez-Lazzara, Newcomb, Peluffo

## 205. Spanish Phonology (4)

Seminar-3 hours; term paper. Prerequisite: some knowledge of phonetics is required and consent of instructor; Linguistics 109 and 139 highly recommended. Analyzes the sound patterns of Spanish from both linear and non-linear perspectives. Students will develop a clear understanding of what phonology is and the nature of Spanish phonology, as defined by modern linguistic analysis. - II. (II.)

## 206. Spanish Syntax (4)

Seminar-3 hours; term paper. Prerequisite: Linguistics 140 and 165. An examination of Spanish word order within the framework of general linguistic theory. The student will investigate how to write a grammar of Spanish with particular attention to the structure of noun and verb clauses. - I. (I.) Blake

## 207. History of the Spanish Language (4)

 Seminar-3 hours; term paper. Prerequisite: Latin 1 (Former course 220A.) - I, III. (I, III.) Blake

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development of Latin American literary periods and currents in narrative (novel, short story, and essay), from early colonial times to the present. May be repeated two times for credit. if material changes. Offered in alternate years.-I. Bejel, Bernucci, Egan, Lazzara, Peluffo

## 273. Critical Approaches to Latin American

 Literature: Poetry and Drama (4)Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Development of Latin American literary periods and currents in poetry and drama, from early Colonial times to the present. May be repeated two times for credit when topic differs. Offered in alternate years. -I. Bejel, Bernucci, Egan
274. Studies of a Major Writer, Period, or Genre in Latin American Literature (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Artistic development of a major Latin American writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit.-I. (I.) Bejel, Bernucci, Egan, Irwin, Lazzara, Peluffo

## 275. Colonial Literature (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing and consent of instructor. An examination of pre-Hispanic and Colonial narrative, poetry and theatre. Emphasis on historical, anthropological, and ethnographic approaches to Colonial dis-course.-l. (l.) Egan

## 276. Twentieth-Century Latin American

 Drama (4)Seminar-4 hours. Prerequisite: graduate standing or consent of instructor. Major Latin American dramatists from Florencio Sánchez to the present.
Offered in alternate years. (Former course 240.) (III.) Egan
277. Latin American Novel, 1900-1950 (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of main trends and key authors in Latin America in the first half of the 20th century. Offered in alternate years (Former course 241A.) - (I.) Bernucci, Egan

## 278. New Trends in Latin American Fiction (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Recent developments in Latin American narrative. Emphasis on innovative language and structure. Offered in alternate years. (Former course 241B.)-(II.) Egan, Lazzara

## 279. Mexican Narrative (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of the evolution of Mexican narrative. Emphasis on the narrative of the Revolution and significant contemporary works. Offered in alternate years. - (III.) Egan
280. Latin American Short Story (4)

Seminar-3 hours; term paper. Works by major writers with emphasis on 20th-century authors such as Quiroga, Borges, García Márquez, Cortázar, and Rulfo. (Former course 243.) - III. (III.) Bernucci, Egan 281. Latin American Women Writers (4) Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of feminist critical theories, gender construction, and selfrepresentation within the history of socio-cultural changes in Latin America.-I. (I.) Peluffo

## 282. Darío and Modernism (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of poetry and prose of Spanish-American Modernism (18801916). Offered in alternate years. (Former course 245.) - (I.) Egan

## 283. New Directions in Latin American

 Poetry (4)Seminar-3 hours; term paper. New trends in Latin American poetry. Offered in alternate years. - (III.) Egan
284. The Latin American Essay (4)

Seminar-3 hours; term paper. Major Latin American essayists from Sarmiento to contemporary essayists. Offered in alternate years. - (II.) Irwin
285. Multicultural Approaches to Cuban Literature and Culture (4)
Seminar-3 hours; term paper. Prerequisite: gradu ate standing or consent of instructor. Study of main trends in Cuban literature. Emphasis on historical, geographic, social and cultural context (including music and film). Course taught in English with some readings in Spanish. - III. (III.) Bejel

## 291. Foreign Language Learning in the <br> Classroom (4)

Seminar-3 hours; project. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as French 291 and German 291.)-I, II. (I, II.) Arnett, Blake, Bradley
298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. May be repeated for credit. (S/U grading only.)
299. Research (1-12)
(S/U grading only.)
Professional
390. The Teaching of Spanish in College (4)

Lecture-2 hours; discussion-2 hours. Prerequisite: graduate standing. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of graduate teaching assis-tants.-I. (I.) López-Burton

## 396. Teaching Assistant Training Practicum

 (1-4)Prerequisite: graduate standing. May be repeated
for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## The Major Program

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.
The Program. Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. The B.S. degree program has three options: General Option, Applied Statistics Option, and Computational Statistics Option. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications of statistics.

## B.S. in Statistics-General Option emphasizes

 statistical theory and is especially recommended as preparation for graduate study in statistics.
## B.S. in Statistics-Applied Statistics Option

 emphasizes statistical applications. This major is recommended for students who do not plan to pursue graduate studies in statistics and those who are interested in combining the statistics study with a second major or minor program in the social and life sciences.
## B.S. in Statistic-Computational Statistics

Option emphasizes computing. This major is recommended for students interested in the computational and data management aspects of statistical analysis.

## A.B. in Statistics-Applied Statistics Option

 emphasizes statistical applications. This major is recommended for students who do not plan to pursue graduate studies in statistics and those who are interested in combining the statistics study with a second major or minor program in the social sciences or who wish to pursue a Bachelor of Arts degree.Career Alternatives. Probability models and statistical methods are used in a great many fields, including the biological and social sciences, busi-
ness and engineering. The wide applicability of statistics has created in both the public and private sectors a strong demand for graduates with statistical training. Employment opportunities include careers in data and policy analysis in government, financial management, quality control, insurance and health care industry, actuarial work, engineering, public health, biological and pharmaceutical research, law, and education. Some students have entered advanced studies in statistics, economics, psychology, medicine and other professional school programs.

Related elective courses . ..... 3-4
One upper division course approved bymajor adviser; it should be in mathematics,computer science or in quantitative aspectsof a substantive discipline.

Total Units for the Major .................. 81-84

## Applied Statistics option

Preparatory Subject Matter .............. 26-31
Mathematics 16A, 16B, 16C; or 17A, 17B,
17 C ; or $21 \mathrm{~A}, 21 \mathrm{~B}, 21 \mathrm{C}(21$ series
recommended).. 9-12
Mathematics 22A.................................... 3
Computer science Engineering 30 or
Computer Science Engineering 40 (or the equivalent) .. 4
Two introductory courses serving as the
prerequisites to upper division courses in a
chosen discipline to which statistics is applied.7-8

Any one introductory statistics course except
Statistics 10.
Depth Subiect Matter .a.............. 51
Sth Subject Matter ......................51-56
Statistics 106, 108, 138, 141.
major GPA requirement is 3.200 at the end of the junior year, although students with demonstrated excellence in academic work (with a major GPA of 3.500 or above) are most likely to be admitted. Students with a major GPA of 3.500 or above may waive the GRE requirement in the M.S. application. Before moving into the graduate phase, I.D.P. students must satisfy all requirements of the B.S. degree.
To apply for the I.D.P., undergraduate students must submit the Statistics I.D.P. form along with supporting documents during the last quarter of their junior year, to enter the I.D.P. in the first quarter of their senior year. In addition, applicants must submit an application to the M.S. program during the senior year, prior to the deadline of May 31 st. Before applying to the I.D.P., students are strongly advised to consult with both the undergraduate and graduate advisers.
Once a student enters the graduate phase of the I.D.P., they follow the course requirements for the Master's degree ( 36 units, 18 of which are graduate level). A maximum of 12 units taken in the undergraduate phase can be transferred to the M.S. provided they have not been used to satisfy any requirements of the B.S. degree.

## Courses in Statistics (STA)

## Lower Division

## 10. Statistical Thinking (4)

Lecture-3 hours; discussion/laboratory - 1 hour. Prerequisite: two years of high school algebra. Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media; emphasis is on understanding polls, unemployment rates, health studies; understanding probability, risk and odds. GE credit: SciEng or SocSci, Wrt | QL, SE. - III. (III.)
12. Introduction to Discrete Probability (4) Lecture-3 hours; laboratory - 1 hour. Prerequisite: two years of high school algebra. Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; independence; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications in the social, biological, and engineering sciences. Offered in alternate years. GE credit: SciEng | QL, SE.

## 13. Elementary Statistics (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: two years of high school algebra or the equivalent in college. Descriptive statistics; basic probability concepts; binomial, normal, Student's $t$, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit to students who have completed course 13 V or higher. GE credit:
SciEng | QL, SE. - I, II, III. (I, II, III.)

## 13Y. Elementary Statistics (4)

Lecture- 1.5 hours; web virtual lecture-5 hours. Prerequisite: two years of high school algebra or the equivalent in college. Descriptive statistics; basic probability concepts; binomial, normal, Student's $t$, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit for students who have completed course 13, or higher. GE credit: SciEng | QL, SE.-I. (I.) Utts
32. Basic Statistical Analysis Through Computers (3)
Lecture-3 hours. Prerequisite: Mathematics 16 B or 17 B or 21 B ; ability to program in a high-level computer language such as Pascal. Overview of probability modeling and statistical inference. Problem solution through mathematical analysis and computer simulation. Recommended as alternative to course 13 for students with some knowledge of calculus and computer programming. Only two units of credit allowed to students who have taken course

13, or 102; not open for credit to students who have taken course 100. GE credit: SciEng | SE, QL.-II, III. (II, III.)

90X. Seminar (1-2)
Seminar-1-2 hours. Prerequisite: high school algebra and consent of instructor. Examination of a special topic in a small group setting.

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

## 100. Applied Statistics for Biologica

 Sciences (4)Lecture -3 hours; laboratory - 1 hour. Prerequisite: Mathematics 16B or the equivalent. Descriptive statistics, probability, sampling distributions, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have taken course 13,32 or 103. Not open for credit to students who have taken course 102. GE credit: SciEng | QL, SE.-I, II, III. (I, II, III.)
102. Introduction to Probability Modeling and Statistical Inference (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: two years of high school algebra; upper division standing. Introductory probability and statistics at a rigorous yet precalculus level. Rigorous precalculus introduction to probability and parametric/nonparametric statistical inference with computing; binomial, Poisson, geometric, normal, and sampling distributions; exploratory data analysis; regression analysis; ANOVA. Not open for credit to students who have taken course 100. GE credit: SciEng | QL, SE, SL. I, III. (I, III.)

## 103. Applied Statistics for Business and

 Economics (4)Lecture-3 hours; discussion-1 hour. Prerequisite: course 13, 32, or 102; and Mathematics 16A, 16B; course 100 may replace courses 13,32 , or 102 . Descriptive statistics; probability; random variables; expectation; binomial, normal, Poisson, other univariate distributions; joint distributions; sampling distributions, central limit theorem; properties of estimators; linear combinations of random variables; testing and estimation; Minitab computing package. Two units credit given to students who have completed course 100. GE credit: SciEng | QL, SE.-I, II, III. (I, II, III.)

## 104. Applied Statistical Methods:

## Nonparametric Statistics (4)

Lecture-3 hours; laboratory-1 hour. Prerequisite: course 13, 32, or 102; course 100 may replace courses 13,32, or 102. Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests. Offered in alternate years. GE credit:
SciEng | QL, SE. - (II.)
106. Applied Statistical Methods: Analysis of Variance (4)
Lecture-4 hours. Prerequisite: course 13,32, or 102; course 100 may replace courses 13,32 , or 102. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design, Latin squares. Multiple comparisons procedures. One-way random effects model. GE credit: SciEng | QL, SE, SL.-I, II. (I, II.)

## 108. Applied Statistical Methods:

## Regression Analysis (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 13,32 , or 102; course 100 may replace courses 13, 32, or 102. Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: SciEng | QL, SE, SL.-I, II, III. (I, II, III.)
120. Probability and Random Variables for Engineers (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: Mathematics 21A, B, C, and D. Basic concepts of probability theory with applications to electrical engineering, discrete and continuous random variables, conditional probability, combinatorics, bivariate distributions, transformation or random variables, law of large numbers, central limit theorem, and approximations. No credit for students who have completed course 131A or Civil and Environmental Engineering 114. GE credit: SciEng | QL, SE.-I, III. (II, III.) Mueller
130A. Mathematical Statistics: Brief Course (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Mathematics 16B. Basic probability, densities and distributions, mean, variance, covariance, Chebyshev's inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes. Only 2 units of credit allowed to students who have taken course 131A. GE credit: SciEng | QL, SE.-I. (I.)
130B. Mathematical Statistics: Brief Course (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 130A. Transformed random variables, large sample properties of estimates. Basic ideas of
hypotheses testing, likelihood ratio tests, goodness-of-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics. GE credit: SciEng | QL, SE.II. (II.)

131 A. Introduction to Probability Theory (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: Mathematics $21 \mathrm{~A}, 21 \mathrm{~B}, 21 \mathrm{C}$, and 22A. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have completed Mathematics 135A. GE credit: SciEng | QL, SE.-I, II, III. (I, II, III.)

## 131B. Introduction to Mathematical

Statistics (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 131A or consent of the instructor. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory and nonparametric inference. GE credit:
SciEng | QL, SE. - II, III. (II, III.)
131C. Introduction to Mathematical
Statistics (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 131B, or consent of the instructor. Sampling, methods of estimation, sampling distributions, confidence intervals, testing hypotheses, linear regression, analysis of variance, elements of large sample theory and nonparametric inference. GE credit: SciEng | SE, QL. - III. (III.)
133. Mathematical Statistics for Economists (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 103 and Mathematics 16B or the equivalents; no credit will be given to students majoring in Statistics. Probability, basic properties; discrete and continuous random variables (binomial, normal, t , chi-square); expectation and variance of a random variable; bivariate random variables (bivariate normal); sampling distributions; central limit theorem; estimation, maximum likelihood principle; basics of hypotheses testing (one-sample). GE credit:
SciEng | QL, SE.-I. (I.)

## 135. Multivariate Data Analysis (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 130B, and preferably course 131B. Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and
covariance matrix; Hotelling's $\mathrm{T}^{2}$; simultaneous infer-
ence; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets. GE credit: SciEng | QL, SE.-III. (III.)

## 137. Applied Time Series Analysis (4)

Lecture-3 hours; term paper. Prerequisite: course 108 or the equivalent. Time series relationships, cyclical behavior, periodicity, spectral analysis, coherence, filtering, regression, ARIMA and statespace models; Applications to data from economics, engineering, medicine environment using time series software. GE credit: SciEng | QL, SE. - III. (III.)

## 138. Analysis of Categorical Data (4)

 Lecture-3 hours; discussion-1 hour. Prerequisite: course 130B or 131B, or courses 106 and 108. Varieties of categorical data, cross-classifications, contingency tables, tests for independence. Multidimensional tables and log-linear models, maximum likelihood estimation; tests of goodness-of-fit. Logit models, linear logistic models. Analysis of incomplete tables. Packaged computer programs, analysis of real data. GE credit: SciEng | QL, SE.-I. (I.)
## 141. Statistical Computing (4)

Lecture-3 hours; laboratory-1 hour. Prerequisite: one introductory class in Statistics (such as 13, 32, 100, or 102), or the equivalent. Organization of computations to access, transform, explore, analyze data and produce results. Concepts and vocabulary of statistical/scientific computing. GE credit:
SciEng | QL, SE.-I. (I.)

## 142. Reliability (4)

Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: course 130B or 131B or consent of instructor. Stochastic modeling and inference for reliability systems. Topics include coherent systems, statistical failure models, notions of aging, maintenance policies and their optimization. Offered in alternate years. GE credit: SciEng | QL, SE.
144. Sampling Theory of Surveys (4)

Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: course 130B or 131B. Simple random, stratified random, cluster, and systematic sampling plans; mean, proportion, total, ratio, and regression estimators for these plans; sample survey design, absolute and relative error, sample size selection, strata construction; sampling and nonsampling sources of error. Offered in alternate years. GE credit: SciEng | QL, SE. - (I.)
145. Bayesian Statistical Inference (4) Lecture-3 hours; laboratory-1 hour. Prerequisite: courses 130A and 130B or 131A and 131B, or the equivalent. Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. Offered in alternate years. GE credit: SciEng | QL, SE. - (II.)

## 190X. Seminar (1-2)

Seminar-1-2 hours. Prerequisite: one of courses $13,32,100,102$, or 103. In-depth examination of a special topic in a small group setting.

## 192. Internship in Statistics (1-12)

Internship-3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor.
Work experience in statistics. (P/NP grading only.)

## 194HA-194HB. Special Studies for Honors

 Students (4-4)Independent study-12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SciEng \| SE.

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced <br> Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

## 201. SAS Programming for Statistical

 Analysis (3)Lecture-2 hours; discussion/laboratory-1 hour. Prerequisite: introductory, upper-division Statistics course; some knowledge of vectors and matrices; courses 106 or 108 or the equivalent suggested. Introductory SAS language, data management, statistical applications, methods. Includes basics, graphics, summary statistics, data sets, variables and functions, linear models, repetitive code, simple macros, GLIM and GAM, formatting output, correspondence analysis, bootstrap. Prepare SAS base programmer certification exam. - III. (III.)
205. Statistical Methods for Research with SAS (4)
Lecture-3 hours; laboratory-1 hour. Prerequisite: An introductory upper division statistics course and some knowledge of vectors and matrices; suggested courses are 100, or 102, or 103, or the equivalent. Focus on linear statistical models widely used in scientific research. Emphasis on concepts, methods and data analysis using SAS. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, variable transformation, factorial designs and ANCOVA.- III. (III.)
206. Statistical Methods for Research-I (4) Lecture-3 hours; laboratory/discussion-1 hour. Prerequisite: introductory statistics course; some knowledge of vectors and matrices. Focus on linear statistical models. Emphasis on concepts, method and data analysis; formal mathematics kept to minimum. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, factorial designs and analysis of covariance. Use of professional level software.-I. (I.)
207. Statistical Methods for Research - II (4)

Lecture-3 hours; laboratory/discussion - 1 hour. Prerequisite: course 206; knowledge of vectors and matrices. Linear and nonlinear statistical models emphasis on concepts, methods/data analysis using professional level software; formal mathematics kept to minimum. Topics include linear mixed models, repeated measures, generalized linear models, model selection, analysis of missing data, and multiple testing procedures. -I. (I.)
208. Statistical Methods in Machine Learning (4)
Lecture-3 hours; laboratory/discussion-1 hour. Prerequisite: course 206, 207 and 135, or their equivalents. Focus on linear and nonlinear statistical models. Emphasis on concepts, methods, and data analysis; formal mathematics kept to minimum. Topics include resampling methods, regularization techniques in regression and modern classification, cluster analysis and dimension reduction techniques. Use professional level software. - III. (III.)
222. Biostatistics: Survival Analysis (4)

Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: course 131C. Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics.
(Same course as Biostatistics 222.)-I. (I.)

## 223. Biostatistics: Generalized Linear

Models (4)
Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: course 131C. Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as Biostatistics 223.) II. (II.)
224. Analysis of Longitudinal Data (4) Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: course/Biostatistics 222, 223 and course 232B or consent of instructor. Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated mea-
surements and longitudinal data in biostatistical and statistical settings. (Same course as Biostatistics 224.) - III. (III.)

## 225. Clinical Trials (4)

Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: course/Biosatistics 223 or consent of instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as Biostatistics 225.) Offered in alternate years. - III.
226. Statistical Methods for Bioinformatics (4)

Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: course 131C or consent of instructor; data analysis experience recommended. Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of omics data. (Same course as Biostatistics 226.) Offered in alternate years. - (II.)

## 231 A. Mathematical Statistics I (4)

Lecture-3 hours; discussion -1 hour. Prerequisite: course 131A-C, Mathematics 25 and Mathematics 125 A or equivalent. First part of three-quarter sequence on mathematical statistics. Emphasizes foundations. Topics include basic concepts in asymptotic theory, decision theory, and an overview of methods of point estimation.-l. (I.)
231 B. Mathematical Statistics II (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 231A. Second part of a three-quarter sequence on mathematical statistics. Emphasizes: hyposthesis testing (including multiple testing) as well as theory for linear models. - II. (II.)
231C. Mathematical Statistics III (4)
Lecture -3 hours; discussion -1 hour. Prerequisite: course 231A, 231B. Third part of three-quarter sequence on mathematical statistics. Emphasizes large sample theory and their applications. Topics include statistical functionals, smoothing methods and optimization techniques relevant for statistics. III. (III.)

232A. Applied Statistics I (4)
Lecture-3 hours; laboratory-1 hour. Prerequisite: courses 106, 108, 131A, 131B, 131C, and Mathematics 167. Estimation and testing for the general linear model, regression, analysis of designed experiments, and missing data techniques.-l. (1.)

## 232B. Applied Statistics II (4)

Lecture-3 hours; laboratory-1 hour. Prerequisite: courses 106, 108, 131A, 131B, 131C, 232A and Mathematics 167. Alternative approaches to regression, model selection, nonparametric methods amenable to linear model framework and their applicationss. - II. (II.)
232C. Applied Statistics III (4)
Lecture-3 hours; laboratory -1 hour. Prerequisite: courses 106, 108, 131C, 232B and Mathematics 167. Multivariate analysis: multivariate distributions, multivariate linear models, data analytic methods including principal component, factor, discriminant, canonical correlation and cluster analysis. - II. (II.)
233. Design of Experiments (3)

Lecture-3 hours. Prerequisite: course 131C. Topics from balanced and partially balanced incomplete block designs, fractional factorials, and response surfaces. Offered in alternate years. - (III.)
235A-235B-235C. Probability Theory (4-44)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: 235A-Mathematics 125B and 135A or course 131A or consent of instructor; 235BMathematics 235A/course 235A or consent of instructor; 235C-Mathematics 235B/course 235B or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional
expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Mathematics $235 \mathrm{~A}-235 \mathrm{~B}-235 \mathrm{C}$.) - $-\mathrm{III-III}$. (I-II-III.)

## 237A-237B. Time Series Analysis (4-4)

Lecture-3 hours; term paper. Prerequisite: course 131B or the equivalent; course 237A is a prerequisite for course 237B. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering.
Offered in alternate years. - (l-II.)
238. Theory of Multivariate Analysis (4) Lecture-3 hours; term paper. Prerequisite: courses 131 B and 135. Multivariate normal and Wishart distributions, Hotelling's T-Squared, simultaneous inference, likelihood ratio and union intersection tests, Bayesian methods, discriminant analysis, principal component and factor analysis, multivariate clustering, multivariate regression and analysis of variance, application to data. Offered in alternate years. - II.
240A-240B. Nonparametric Inference (4-4) Lecture-3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C recommended. Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology. Offered in alternate years. (II-III.)

## 241. Asymptotic Theory of Statistics (4)

Lecture-3 hours; term paper. Prerequisite: course 231C; courses 235A-235B-235C desirable. Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference.
Offered in alternate years. (III.)
242. Introduction to Statistical Programming (4)
Lecture-3 hours; laboratory - 1 hour. Prerequisite: courses 130A and 130B or equivalent. Essentials of statistical computing using a general-purpose statistical language. Topics include algorithms; design; debugging and efficiency; object-oriented concepts; model specification and fitting; statistical visualization; data and text processing; databases; computer systems and platforms; comparison of scientific programming languages. Offered in alternate years.II.

## 243. Computational Statistics (4)

Lecture-3 hours; laboratory-1 hour. Prerequisite: courses 130A and 130B or equivalent, and Mathematics 167 or Mathematics 67 or equivalent. Numerical analysis; random number generation; computer experiments and resampling techniques (bootstrap, cross validation); numerical optimization; matrix decompositions and linear algebra computations; algorithms (markov chain monte carlo, expec-tation-maximization); algorithm design and efficiency; parallel and distributed computing. Offered in alternate years.-II.

## 250. Topics in Applied and Computational Statistics (4)

Lecture-3 hours; lecture/discussion - 1 hour. Prerequisite: course 131A; course 232A recommended, not required. Resampling, nonparametric and semiparametric methods, incomplete data analysis, diagnostics, multivariate and time series analysis, applied Bayesian methods, sequential analysis and quality control, categorical data analysis, spatial and image analysis, computational biology, functional data analysis, models for correlated data, learning theory. May be repeated for credit with consent of graduate advisor. Offered irregularly. - I, II, III.

## 251 . Topics in Statistical Methods and

 Models (4)Lecture-3 hours; discussion-1 hour. Prerequisite: course 231 B or the equivalent. Topics may include Bayesian analysis, nonparametric and semiparametric regression, sequential analysis, bootstrap, statistical methods in high dimensions, reliability, spatial processes, inference for stochastic process, stochastic methods in finance, empirical processes, changepoint problems, asymptotics for parametric, nonparametric and semiparametric models, nonlinear time series, robustness. May be repeated for credit with consent of instructor. Offered irregularly. -II. (II.)
252. Advanced Topics in Biostatistics (4) Lecture-3 hours; discussion/laboratory-1 hour. Prerequisite: course 222, 223. Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit with consent of adviser when topic differs. (Same course as Biostatistics 252.) Offered in alternate years. - III.

## 280. Orientation to Statistical Research (2)

 Seminar-2 hours. Prerequisite: consent of instructor. Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member. May be repeated one time for credit. (S/U grading only.) - III. (III.)
## 290. Seminar in Statistics (1-6)

Prerequisite: consent of instructor. Seminar on advanced topics in probability and statistics. (S/U grading only.) -I, II, III. (I, II, III.)
292. Graduate Group in Statistics Seminar (1-2)
Seminar-1-2 hours. Prerequisite: graduate standing. Advanced study in various fields of statistics with emphasis in applied topics, presented by members of the Graduate Group in Statistics and other guest speakers. (S/U grading only.) - III. (III.)

## 298. Directed Group Study (1-5)

Prerequisite: graduate standing, consent of instructor.
299. Individual Study (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## 299D. Dissertation Research (1-12)

Prerequisite: advancement to candidacy for Ph.D., consent of instructor. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Professional

390. Methods of Teaching Statistics (2) Lecture/discussion-1 hour; laboratory-1 hour. Prerequisite: graduate standing. Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training. May be repeated for credit. (S/U grading only.) -I. (I.)
391. Teaching Assistant Training Practicum (1-4)
Prerequisite: consent of instructor; graduate standing. (S/U grading only.) $-I, I I$, III. (I, II, III.)

## Professional

401. Methods in Statistical Consulting (3)

Lecture-3 hours; discussion - 1 hour. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University clients. Students must be enrolled in the graduate program in Statistics or Biostatistics. May be repeated for credit with consent of graduate adviser. Offered irregularly. (S/U grading only.) -I, II, III. (I, II, III.)

## Faculty

Ethan Anderes, Ph.D., Associate Professor (Statistics) Alexander Aue, Ph.D., Associate Professor (Statistics)
Paul Baines, Ph.D., Assistant Professor (Statistics) Laurel Beckett, Ph.D., Professor
(Public Health Sciences)
Paul Baines, Ph.D., Assistant Professor (Statistics)
Prabir Burman, Ph.D., Professor (Statistics)
Colin Cameron, Ph.D., Professor (Economics)
Hao Chen, Ph.D., Assistant Professor (Statistics)
Christiana Drake, Ph.D., Professor (Statistics)
Thomas B. Farver, Ph.D., Professor
(Population Health and Reproduction) Peter Hall, Ph.D., Professor (Statistics)
Fushing Hsieh, Ph.D., Professor (Statistics)
Jiming Jiang, Ph.D., Professor (Statistics)
Oscar Jorda, Ph.D., Professor (Economics)
Thomas Lee, Ph.D., Professor (Statistics)
Hans-Georg Müller, M.D., Ph.D., Professor (Statistics)
Debashis Paul, Ph.D. Associate Professor (Statistics)
Jie Peng, Ph.D., Associate Professor (Statistics)
Wolfgang Polonik, Ph.D., Professor (Statistics)
David Rocke, Ph.D., Professor
(Public Health Sciences)
Naoki Saito, Ph.D., Professor (Mathematics)
Duncan Temple Lang, Ph.D., Professor (Statistics)
Chih-Ling Tsai, Ph.D., Professor
(Graduate School of Management)
Jane-Ling Wang, Ph.D., Professor (Statistics)

## Emeriti Faculty

Rudolph Beran, Ph.D., Professor Emeritus
P.K. Bhattacharya, Ph.D., Professor Emeritus Alan P. Fenech, Ph.D., Professor Emeritus George G. Roussas, Ph.D., Professor Emeritus Yue-Pok (Ed) Mack, Ph.D., Professor Emeritus Francisco J. Samaniego, Ph.D., Professor Emeritus Robert H. Shumway, Ph.D., Professor Emeritus Alvin D. Wiggins, Ph.D., Professor Emeritus

## Affiliated Faculty

Rahman Azari, Ph.D., Lecturer (Statistics)
Graduate Study. The Graduate Program in Statistics offers programs of study and research leading to the M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Facility in computer programming is essential for some of the course work. The supervised statistical consulting required of all M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for in-depth concurrent study in an applied field. For detailed information contact the Chairperson of the Program or the Graduate Adviser.
Preparation. Preparation for the graduate program requires a year of calculus, a course in linear algebra, facility with a programming language and upper division coursework in mathematics and/or statistics. For admission to the Ph.D. program, course work requirements for the master's degree, and at least one semester/two quarters of advanced calculus must be completed.
Graduate Adviser. Debashis Paul (Statistics)

Michael Ziser, Ph.D., Professor (English)
Graduate Study. The Graduate Group in the Study of Religion offers students classical training in the literatures of particular religious traditions, and they are encouraged to understand these traditions at the intersection of contemporary thematic and regional phenomena.
Students have the opportunity to concentrate primarily on one of three regional specializations: American religious cultures, Mediterranean religions, and Asian religions. An additional regional specialization typically serves as a secondary area of competence. Students further shape their scholarship through intensive engagement in one of the following thematic specializations: Values, Ethics, and Human Rights; Modernity, Science, and Secularism; Visual Culture, Media, and Technology; Language, Rhetoric, and Performance; Body and Praxis; Theory and Method.
This curriculum guides students through a rigorous course of study, providing the breadth and depth necessary to produce exciting, rigorous scholarship at forefront of the field of Religious Studies. Graduate Group training prepares students for careers in academia as well as in the government and the private sector.
Preparation. Admission to the Graduate Group requires a Bachelor's or Master's degree in a discipline relevant to the study of religion, as well as
preparation in at least one language relevant to the intended area of primary research. The group requires three letters of recommendation and a sample of recent written work. The general GRE is also required.
Graduate Adviser. Contact the Group office.

## Courses in Study of Religion (REL)

## Graduate

200A. Historical Roots of the Study of Religion (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Consideration of the historical and philosophical formation of religion as a concept. Treats the emergence of religion as a category of analysis and understanding from the Reformation through the Enlightenment.-I. (I.) Chin, Coudert, Elmore, Janowitz
200B. Foundational Theories of Religion (4) Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Survey of classical 19th and 20th century approaches to the study of religion. -II. (II.) Chin, Coudert, Elmore, Janowitz

## 200C. Contemporary Approaches to the

## Study of Religion (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Consideration of major themes, issues and methods in the contemporary study of religion. Perspectives from diverse cultural settings employed to consider modern historical, philosophical, and social contexts that inform understandings of religion. - III. (III.) Chin, Elmore, Janowitz
200D. Field Profile Seminar I and II (1-2)
Project. Prerequisite: graduate standing or consent of instructor. Individually guided research to survey the field of study, under the supervision of a faculty member. Four units total over two or more quarters are required by the end of the second year. May be repeated for credit. -I, II, III. (I, II, III.)
210A. Special Topics in American Religious Cultures (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in American religious cultures. May be repeated for credit when topic differs. - I, II, III. (I, II, III.)
210B. Special Topics in Asian Religious Cultures (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in Asian religious cultures. May be repeated for credit when topic differs. -I, II, III. (I, II, III.)

## 210C. Special Topics in Mediterranean

## Religious Cultures (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in Mediterranean religious cultures. May be repeated for credit when topic differs. - I, II, III. (I, II, III.)
230A. Thematic Topics-Body and Praxis (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to the body and praxis. May be repeated for credit when topic differs. - I, II, III. (I, II, III.)
230B. Thematic Topics-Language,
Rhetoric, and Performance (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to language, rhetoric, and performance. May be repeated for credit when topic differs. -I, II, III. (I, II, III.)

230C. Thematic Topics - Modernity, Science, and Secularism (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to modernity, science, and secularism. May be repeated for credit when topic differs. - I, II, III. (I, II, III.)
230D. Thematic Topics - Theory and Method (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to theory and method. May be repeated for credit when topic differs. - I, II, III. (I, II, III.)
230E. Thematic Topics-Values, Ethics, and Human Rights (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to values, ethics, and human rights. May be repeated for credit when topic differs.-I, II, III. (I, II, III.)
230F. Thematic Topics-Visual Culture, Media, and Technology (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to visual culture, media, and technology. May be repeated for credit when topic differs. - I, II, III. (I, II, III.)

## 231E. History, Theory and Criticism of

 Human Rights (4)Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar will engage with criticism of Human Rights and develop research and teaching within disciplinary and interdisciplinary frameworks. (Same course as Human Rights 200A.)-II. (II.) Watenpaugh
298. Group Study (1-5)

Prerequisite: graduate standing or consent of instructor. May be repeated for credit. ( $S / U$ grading only.) -I, II, III. (I, II, III.)
299. Research (1-12)

Prerequisite: graduate standing or consent of instructor. (S/U grading only.) -I, II, III. (II, II, III.)

## 299D. Dissertation Writing (1-12)

Prerequisite: advanced to candidacy for the Ph.D. program; consent of instructor. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Committee in Charge

Richard Sexton, Ph.D.
(Agricultural \& Resource Economics)
Anita Oberbauer, Ph.D. (Animal Science)
Michael Parrella, Ph.D.
(Entomology and Nematology)
Susan Handy, Ph.D.
(Environmental Science \& Policy)
Patsy Eubanks Owens, M.L.A
(Human Ecology)
David Campbell, Ph.D. (Human Ecology)
Randal Southard, Ph.D
(Land, Air \& Water Resources)
David Rizzo, Ph.D. (Plant Pathology)
Chris van Kessel, Ph.D. (Plant Sciences)

## The Major Program

The Sustainable Agriculture and Food Systems (SA\&FS) major serves students interested in improving the sustainability of agriculture and food systems. This major prepares graduates to understand the interdisciplinary and systems-based aspects of sustainability and provides them with the knowledge, leadership skills and experiences required to excel in agricultural and food systems professions.

## The Program

This program is designed to develop students' competencies for addressing the environmental, social, and economic challenges and opportunities associated with agricultural and food systems sustainability. The program emphasizes an experiential learning approach to sustainability education, allowing students to choose between three tracks within the major. Students in the Agriculture and Ecology track focus on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits. Students in the Food and Society track focus on issues related to the social, cultural, political and community development aspects of agriculture and food systems. Students in the Economics and Policy track focus on issues related to agricultural and resource economics, policy and management. The program provides students with practical experiences through courses with on- and off-campus fieldwork and through internship placements at sites related to students' interests and focus of study.

## Internships and Career Alternatives

Sustainable Agriculture and Food Systems students are required to complete an internship in the field before graduation. Internships have been arranged with local, county, and state agricultural agencies, production farms and commercial processors and retailers, domestic and international non-governmental organizations, and rural and urban community development programs. Graduates are prepared to pursue a broad range of careers related to agricultural production and food system management, rural and urban community services, education and development, and agricultural and environmental sciences, as well as careers in agricultural, environmental, and economic policy and analysis. Positions may be in private industry, government and public service agencies and in the non-profit sector, nationally and internationally. The major also prepares students for graduate studies in a wide range of fields related to agriculture and food systems.

B.S. Major Requirements:
English Composition Requirement ..... 4-8
See College requirement, must include
Communications 1.
Core Courses ..... 24-26
Plant Sciences 15 ..... 4
20 .....  4
Plant Sciences 150 ..... 4
121 ..... 4
Plant Sciences 190 ..... 2-4 191B ..... 6
Internship Requirement ..... 12Students must complete at least 12 units ofinternship, eight of which must be completedoff campus.
Applied Production ..... 6-9
Select 1 course from: Plant Sciences 49, PlantPathology 40, Viticulture and Enology 101A,
101B, 101C, Environmental Horticulture
120, Plant Science 131.........................2-3
Select course from. Animal Science 49A-J, ..... A-J,
Animal Science 41L
Select 1 course from: Applied Biological
Systems Technology 49, 52, 101, 142...2-3
Track I: Agriculture and EcologyFocuses on crop and animal production systems,ecology, and practices that mitigate negativeimpacts while producing environmental and socialbenefits.
Track I Adviser. William Horwath, Ph.D
Preparatory Subject Matter ..... 60-61
Mathematics 16A, 16B ..... 6
Plant Sciences 120 or Statistics 100 ..... 4
Chemistry 2A, 2B ..... 10
Physics 1A10
10
Biological Sciences 2A, 2B
Plant Sciences 2 ..... 4
Animal Sciences 1 or 2 ..... 4
Food Science 1 .....  3
Economics 1A4
Community and Regional Development 1.. 4Select one course from: Philosophy 14, 15
2415,
Select one course from: Anthropology 2,Political Science 4, Sociology 1,Sociology 34-5
Depth Subject Matter ..... 34-38
Agricultural and Resource Economics 120 or
147. ..... 3-4
Envir3-4
Soil Science 100 or Soil Science 109 ... 4-5
Select one course from: Animal Science 129,Environmental Horticulture 160 or,
Environmental Science and Policy 100,
Evolution and Ecology 101, Plant Sciences
105, 142, Wildlife, Fish, and Conservation
Biology 154. ..... 4-5
Additional upper-division restricted electives
chosen in consultation with the track facultyadvisor.20

## Track II: Food and Society

Focuses on issues related to the social, cultural, political and community development aspects of agriculture and food systems.
Track II Adviser. Ryan Galt, Ph.D.
Preparatory Subject Matter ..... 57-64
Philosophy 5 or 31 ..... 4
Select one course from: Philosophy 14, 15244
Sociology 46B or Statistics 13 .....  4
Select at least one course from: Communityand Regional Development 151, AppliedBiological Systems Technology 180,Landscape Architecture 150, Statistics 103,
Chemistry 2A. 5
Biological Scienc
Plant Sciences 2 ..... 5
Select one course from: Evolution and
Ecology 2 or Biological Sciences 2B or
Environmental Science and Policy 1 or 30 or
Wildlife, Fish, and Conservation Biology 10or 1110
$3-5$
or ..... 3-5
Soil Science 10 .....  3
Economics 1A. .....
Political Science 4 .....  4
Select one course from: Anthropology 2,Sociology 1, Sociology 3Community and Regional Development1, 24-5
1, 2 .....  8
Depth Subject Matter ..... 43-44
Agricultural and Resource Economics 112 or150 4
Select 1 course from: Agricultural and
Resource Economics 147, 176
Environmental Science and Policy 160, 161169, 172, 1793-4
Choose 12 units from: Anthropology 101,
102, Community and Regional Developmen
142, 152, Sociology 139, 144, 145A,145B12
Select 1 course from: American Studies
101C, 155, History 172 or PhilosophyAdditional upper-division restricted electivesadvisor

## Track III: Economics and Policy

Focuses on issues related to agricultural and resource economics, policy and management.
Track III Adviser. Tom Tomich, Ph.D.
Preparatory Subject Matter ..... 60-64
Mathematics 16A, 16B .....  6
Sociology 46B or Statistics 13.. .....  .4
Select 1 course from: Agricultural and
Resource Economics 106, Statistics 103, 4
Sociology 106
Chemistry 2A. .....  .4
Biological Sciences 2A or 10 .....
Plant Sciences 2 .....  4
Select 1 course from: Evolution and Ecology
2, Biological Sciences 2B, Environmental
Science and Policy 1, 30, Wildlife, Fish, and
Conservation Biology 10, 11 ..... and
$3-5$
Food Science 1 .....  3
Soil Science 10 .....  3
Economics 1A, 1B .....  8
Polifical Science
Select 1 course from: Anthropology 2,
Sociology 1, Sociology 3 .....  4-5
Community and Regional Development 1
24 24Depth Subject Matter43
Select one course from: Agricultural and
Resource Economics 112, 150, 157.
Select 11-12 units from: Agricultural and
Resource Economics 120, 130, 147, 176,
Environmental Science and Policy 160, 161
169, 172, 179 ..... 11-12
Select 8 units from: Anthropology 101, 102,Community and Regional Development 142,

Courses in Sustainable Agriculture and Food Systems (SAF)

## Lower Division

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Restricted to Sustainable Agriculture and Food Systems majors or with consent of instructor. Lower-division internship for students enrolled in the Sustainable Agriculture and Food Systems program of study. Enrollment for non-majors by consent of instructor. May be repeated up to 12 units for credit with consent of instructor. (P/NP grading only.) - I,
II, III. (I, II, III.) Galt, Horwath, Tomich, Van Horn

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Restricted to Sustainable Agriculture and Food Systems major or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. Offered irregularly. (P/NP grading only.) $-I$, II, III. (I, II, III.)
99. Special Study for Undergraduates (1-5) Independent study-3-15 hours. Prerequisite: consent of instructor. Under faculty supervision, students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only.)I, II, III. (I, II, III.)

## Upper Division

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: upper-division standing; consent of instructor. Restricted to Sustainable Agriculture and Food Systems majors or with consent of instructor. Upper-division internship for students enrolled in the Sustainable Agriculture and Food Systems program of study. Enrollment for nonmajors by consent of instructor. May be repeated up to 12 units for credit. (P/NP grading only.) $-\mathrm{I}, \mathrm{II}, \mathrm{III}$. (I, II, III.) Galt, Horwath, Tomich, Van Horn

## 197T. Tutoring in Sustainable Agriculture and Food Systems (1-5)

Tutorial-3-15 hours. Prerequisite: upper division standing; consent of instructor. Undergraduates assist the instructor by tutoring students in regularly scheduled courses that fulfill SA\&FS major requirements. May be repeated for credit. Offered irregularly. (P/NP grading only.) - I, II, III. (I, II, III.)

## 197TC. SA\&FS Tutoring in the Community

 (1-5)Tutorial-3-15 hours. Prerequisite: upper division standing; consent of instructor. Undergraduates assist the instructor by tutoring in the community in settings related to Sustainable Agriculture and Food Systems. May be repeated for credit. Offered irregularly. (P/NP grading only.) - I, II, III. (I, II, III.)

## 198. Directed Group Study (1-5)

Prerequisite: upper division standing; consent of instructor. Restricted to Sustainable Agriculture and Food Systems major or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. May be repeated for credit. Offered irregularly. (P/NP grading only.) - I, II, III. (I, II, III.)

## 199. Special Study for Advanced

## Undergraduates (1-5)

Independent study-3-15 hours. Prerequisite: upper division standing; consent of instructor. Under faculty supervision, advanced students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only.)-I, II, III. (I, II, III.)

## Sustainable Environmental Design

(College of Agriculture and Environmental Sciences) (Department of Human Ecology)
Patsy Eubanks Owens, M.L.A, Chairperson, Human Ecology

## Faculty

Elizabeth Boults, MLA Continuing Lecturer
David de la Pena, Ph.D., Assistant Professor
Steven E. Greco, Ph.D., Associate Professor
Eric Larsen, Ph.D., Associate Research Scientist Jeff Loux, Ph.D., Associate Adjunct Professor Brett Milligan, M.L.A., Assistant Professor
N. Claire Napawan, M.L.A., Assistant Professor Lorence Oki, Ph.D., Associate Specialist in

Cooperative Extension
Patsy Eubanks Owens, M.L.A., Professor
Michael Rios, Ph.D., Associate Professor
Sheryl-Ann Simpson, M.L.A., Assistant Professor Stephen Wheeler, Ph.D., Associate Professor

## The Major Program

The Sustainable Environmental Design major is intended to build student understanding and skills related to creation of sustainable communities and landscapes. Coursework emphasizes urban and environmental design, sustainable development theory and practice, green building, local government planning and decision-making, community dynamics and organizations, and written, graphic, and oral presentation of sustainability strategies.

## The Program

The Sustainable Environmental Design major is particularly suited for students who are interested in the physical form and design of communities and related public and private processes. It is focused on the physical environment of communities and the process of designing, planning for, and regulating the built landscape and the place-making considerations involved in creating sustainable communities.

## Career Alternatives

Graduates will choose to pursue work in government, community organizations, education, or the private sector. They will also be well-positioned to pursue graduate education in city and regional planning, landscape architecture, architecture, public policy, public administration, law, real estate, and related fields.

S. Haig Zeronian, Ph.D., Professor Emeritus (Textiles and Clothing)
Graduate Study. The Graduate Group in Textiles offers a program of study and research leading to the M.S. degree. Students in the program use an interdisciplinary approach emphasizing the physical and behavioral science aspects of textiles. Research areas include chemical, physical, biochemical, and mechanical properties of fibers and polymers as well
as fibrous assemblies, including composites, paper, and nonwovens; and psychological and sociological factors relating to perception and consumption of textiles and apparel. Extensive specialized fiber, polymer, and textiles research facilities and a behavioral research laboratory are available. For detailed information regarding the program, address the Chairperson of the Group.
Graduate Advisers. Y.L. Hsieh, G. Sun

## The Major Program

The textiles and clothing major emphasizes the connections among (a) the physical characteristics of textile products, (b) human perceptions of and behavior toward these products, and (c) global economic trends affecting the textile/apparel marketplace. An integrative knowledge base links textile products with people and processes, to focus on the production, distribution, and consumer use of textiles and apparel; see also Fiber and Polymer Science, on page 311
The Program. The textiles and clothing major offers two options: textile science and marketing/ economics. The Textile Science option provides students with a broad knowledge base in both the social and physical sciences. This base includes production, end-use applications and care of textiles and apparel, physical and chemical properties of textiles, and social-psychological and economic aspects of textiles and clothing. The Marketing/Economics option emphasizes social science and business course work, while also providing students with an awareness of the physical nature of textile products.
Internships and Career Alternatives. Textiles and clothing majors can pursue internships and careers in apparel production and merchandising, retail management, international marketing, textile testing and conservation, and textiles journalism. The majority of textiles and clothing graduates accept entry-level management and technical positions within the textile and apparel industry or in related fields; e.g., merchandising and marketing, production, research and development, technical service and design. Students may also pursue graduate studies in textiles, business, and other areas depending on their specific selections of restricted elective course work.

Minor Adviser. G. Sun

## Courses in Textiles and Clothing

 (TXC)Questions pertaining to the following courses should be directed to the instructor or to the Division of Textiles and Clothing. See also courses in Fiber and Polymer Science, on page 311.

## Lower Division

6. Introduction to Textiles (4)

Lecture-3 hours; laboratory-3 hours. Introduction to the structure and properties of textiles. Consumer use and fabric characteristics are emphasized. GE credit: SciEng |SE, SL, VL.-I. (I.) Sun

## 7. Style and Cultural Studies (4)

Lecture/discussion-3 hours; discussion/laboratory -1 hour. The multiple and overlapping influences of gender, sexuality, ethnicity, and class on constructions of identity and community are explored through the study of style in popular culture and everyday life. Continuity and change in clothing and appearance styles are interpreted. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC, WE.-III. (II.) Kaiser
8. The Textile and Apparel Industries (4)

Lecture-4 hours. Textile and apparel industries including fashion theory, production, distribution, and consumption of textile goods. GE credit: SocSci, Div | SS.

## 92. Internship in Textiles and Clothing

 (1-12)Internship-3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)
98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
99. Special Study for Lower Division

Students (1-5)
(P/NP grading only.)

## Upper Division

## 107. Social and Psychological Aspects of Clothing (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Sociology 2. Social and cognitive factors influencing management and perception of personal appearance in everyday life. Concepts and methods appropriate to the study of meaning of clothes in social and cultural contexts. GE credit: SocSci, Div,
Wrt | SS, VL, WE. -I. (I.)
162. Textile Fabrics (3)

Lecture-3 hours. Prerequisite: course 6. Properties of fabrics as related to serviceability, comfort, and appearance. GE credit: SciEng | SE, VL. - III. (III.) Pan
162L. Textile Fabrics Laboratory (1)
Laboratory-3 hours. Prerequisite: course 162 (may be taken concurrently). Laboratory methods and procedures employed in studying properties of textile fabrics as related to serviceability, comfort, and appearance. GE credit: SciEng | QL, SE, VL, WE.III. (III.) Pan
163. Textile Coloration and Finishing (3)

Lecture-3 hours. Prerequisite: course 6, Fiber and Polymer Science 110, or Chemistry 8B. Basic principles of textile dyeing, printing, and finishing; color theory; structure, properties, and application of dyes and finishes; factors affecting application and fastness; maintenance of dyed and finished textiles. GE credit: SciEng | SE, VL.-III. (III.) Sun

## 163L. Textile Coloration and Finishing

## Laboratory (1)

Laboratory-3 hours. Prerequisite: course 163 (may be taken concurrently). Demonstrates various aspects of dyeing, printing, and finishing of textile substrates including the effect of fiber and finish type, and physical and chemical variables on dyeing and finishing processes and on the properties of the resultant textile. GE credit: SciEng \| QL, SE, SL, WE. - III. (III.) Sun
164. Principles of Apparel Production (3) Lecture-3 hours. Prerequisite: course 6 or 8 . Overview of characteristics, technology, processes, and research in apparel manufacturing industries including study of government statistics, material utilization and fabrication, mechanization, management, and production engineering. GE credit: SocSci | OL, SS, VL.

## 165. Textile Processes (3)

Lecture/discussion-3 hours. Prerequisite: course 6. Physical processes involved in the production of textiles from the individual fiber to the finished fabric. Includes spinning, texturing, yarn formation, weaving preparation, weaving and knitting, tufting and fabric finishing. GE credit: SciEng | SE.

## 171. Clothing Materials Science (4)

Lecture-3 hours; laboratory/discussion-3 hours. Prerequisite: course 6, 8, and senior standing. The properties, characterization, and performance evaluation of clothing materials and structures for specific functional applications. Principles and methods related to wetting and transport properties, fabric hand and aesthetic properties, clothing comfort, and material and assembly technology. GE credit:
SciEng | SE, VL. - II. (II.) Hsieh
173. Principles of Fashion Marketing (3) Lecture-3 hours. Prerequisite: course 8, Economics 1A, Agricultural and Resource Economics 113 or 136. Study of basic elements of fashion marketing including philosophy and objectives, organization, merchandising, pricing, promotion and personnel. Offered in alternate years. GE credit: SocSci \| SS, VL. - III.

## 174. Introduction to World Trade in Textiles and Clothing (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 8. Structure of the global fiber/textile/ apparel complex and its distribution patterns with an overview of political, economic and technological factors that are changing these industries and their markets. GE credit: SocSci, Div \| SS, WC. - II. (II.)
180A-180B. Introduction to Research in Textiles (2-2)
Laboratory - 6 hours. Prerequisite: senior standing with textile-related major, and consent of instructor. Senior thesis on independent problems. Research begun in course 180 A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.) GE credit:
SocSci | SS, WE. -I, II, III. (I, II, III.)

## 192. Internship in Textiles and Clothing (1-12)

laboratory-3-36 hours. Prerequisite: consent of instructor. Work-learn experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)
197T. Tutoring in Textiles and Clothing (1-5) Discussion/laboratory-3-15 hours. Prerequisite: upper division textiles-related major and consent of instructor. Tutoring of students in Textiles and Clothing courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another textiles course. (P/NP grading only.)

## 198. Directed Group Study (1-5)

(P/NP grading only.)

## 199. Special Study for Advanced <br> Undergraduates (1-5)

(P/NP grading only.)

## Graduate

## 230. Behavioral Science Concepts in

 Textiles (3)Lecture-3 hours. Prerequisite: course 107, upper division or graduate course in statistics (e.g., Agricultural Management and Rangeland Resources 120) and one in a behavioral science (e.g., Psychology 145). Examination of theories and research concerning relationships between clothing and human behavior with emphasis on research techniques, including methods of measuring clothing variables. Offered in alternate years. - Kaiser

## 290. Seminar (1)

Seminar-1 hour. Critical review of selected topics of current interest in textiles. ( $S / U$ grading only.) -I, II. (I, II.)

290C. Research Conference (1)
Discussion-1 hour. Prerequisite: graduate standing; consent of instructor. Individual faculty members meet with their graduate students. Critical presentations of original research are made by graduate students. Research activities are planned. Discussions are led by major professors for their research groups. (S/U grading only.) - I, II, III. (I, II, III.)
293. Recent Advances in Textiles (3) Lecture-3 hours. Prerequisite: two upper division courses in Textiles and Clothing or consent of instructor. Critical reading and evaluation on selected topics of current interest in textiles. Multidisciplinary aspects of the topics selected will be stressed. May be repeated for credit. - (II.)
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Theatre and Dance

## The Dramatic Art Major Program

The A.B. degree in Dramatic Art provides students with an appreciation for and understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre, dance performance, and production. Students build significant skills in specific areas (including acting, directing, choreography, design, playwriting and devising, production skills and management) as well as achieving a broad knowledge of theatre and dance.

Productions and Facilities. Each year's schedule includes opportunities to work with professional directors and choreographers in three Granada Art-ists-in-Residence productions; the Main Stage Dance/Theatre Festival; the UC Davis Film Festival; projects generated through the Institute for Exploration in Theatre, Dance and Performance; and workshops and performance projects developed by M.F.A and Ph.D. students. These productions are staged in our proscenium (Main), thrust (Wyatt), black box (Arena), performance studio (Nelson Hall) and intimate laboratory theatre (Lab A), as well as in the Mondavi Center's Vanderhoef Studio Theatre and Jackson Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter.................... 24
Choose four units from: Dramatic Art 21A,
40A, 40B, 42A, 42B.
Dramatic Art 28, 55, 56A, 56B, 56C .... 20
Depth Subject Matter
42
Two courses from: Dramatic Art 142, 150,
155, 155A, 156A, 156B, 156C, 156D,
158, 159

Dramatic Art 180D................................. 2
Choose 4 additional units from: Dramatic Art
145, 180A, 180B, 180C, 180D, 180E,
180F, 180G.
Transfer Students. As described above, all students completing a major in Dramatic Art must participate in dramatic productions, including work in at least two of the following three areas: acting/dance; design (scenic, costume, lighting, painting, props, sound); directing/playwriting/stage management as well as crew assignments for a minimum of two productions while in residence at UC Davis. Transfer students should see the major adviser for an evaluation of your previous experience.
Guest Artists. The Granada Visiting Artists Program brings distinguished professional artists to the campus each year, to be in residence for a quarter. These working professional artists interact closely with students in the classroom and rehearsal halls and provide them excellent pre-professional experiences of theater practice.
Graduate Study. The Department of Dramatic Art offers programs of study and research leading to the M.F.A. in Dramatic Art (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies. Detailed information may be obtained by contacting the Graduate Program Administrators: Victoria Dye for the M.F.A. in Dramatic Art 530-752-8710 and Marian Bilheimer for the Graduate Group in Performance Studies 530-754-6973.

## Courses in Dramatic Art (DRA)

## Lower Division

## 1. Theatre, Performance and Culture (4)

Lecture-3 hours; discussion-1 hour. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." Not open to students who have completed course 1S. GE credit: ArtHum, Div, Wrt \| AH, DD, VL, WE. - II, III. (I, II, III, IV.) Bogad
1S. Theatre, Performance and Culture (4) Lecture-3 hours; discussion-1 hour. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." For Short Term Programs Abroad. Not open to students who have completed course 1. Offered irregularly. GE credit: ArtHum, Div, Wrt.

## 2. Acting: The Basics: History and Practice

 (4)Lecture-3 hours; discussion - 1 hour. Introduction to the historical evolution of the actor-from ancient Greece \& Asia to the Hollywood icon \& postdramatic performer-and the practical foundations of
acting for stage and screen. Onstage opportunities within lecture course structure. GE credit: AH, OL, VL. -I, II, III. (I, II, III.)

## 5. Understanding Performance:

Appreciation of Modern Theatre, Dance, Film and Performance Art (4)
Lecture/discussion-2 hours; discussion-5 hours; tutorial - 1 hour. Relevance of theatre and performance to modern culture and society. Approaches to theatre/dance/media/performance art, integrated into Mondavi Centre for the Arts and Theatre and Dance Department programs. GE credit: ArtHum, Div | AH, DD, OL, VL, WC.-I, II. (I, II, III.)

## 10. Introduction to Acting (3)

Laboratory/discussion-4 hours; term paper. Fundamentals of movement, speech, theatre games, and improvisation. Selected reading and viewing of theatre productions. Intended for students not specializing in Dramatic Art. GE credit: OL, VL. - I, II, III. (I, II, III.)
11. Introduction to Presentation Skills (2)

Lecture/laboratory -4 hours. Class size limited to 20 students. Development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a basic level.-I, III. (I, III.)
14. Introduction to Contemporary Dance (4) Lecture-3 hours; laboratory - 3 hours. Introduction to basic issues and methods in contemporary dance. Focus on preparing the student for dancing and dance-making through basic techniques of improvisation and composition. Consideration of dance as a cultural practice. GE credit: VL. -I, II, III. (I, II, III.)

## 20. Introduction to Dramatic Art (4)

Lecture-3 hours; discussion-1 hour. Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts. GE credit: ArtHum | AH, VL, WC, WE. -I, III. (I, II, III, IV.)

## 21 A. Fundamentals of Acting (4)

Lecture-2 hours; laboratory-4 hours. Prerequisite: course 20. Open to students planning to major in Dramatic Art. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of theatre productions. GE credit: OL, VL. I, II. (I, II.) Leavy, Merlin

## 21 B . Fundamentals of Acting (4)

Lecture-2 hours; laboratory-4 hours. Prerequisite: course 21 A and consent of instructor. Open to students planning to major in Dramatic Art. Theory and practice of acting with emphasis on character analysis, interpretation, and development. Acting in a stu-dent-directed project. Viewing of theatre
productions. GE credit: OL, VL.

## 24. Visual Aspects of Dramatic Art (4)

Laboratory/discussion -4 hours. Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup. GE credit: ArtHum | AH, VL. - lacovelli, Morgan, Munn

## 25. Technical Aspects of Dramatic <br> Production (3)

Lecture-3 hours. Technical principles of dramatic production emphasizing the three areas of scenic, costume and lighting studios. Subjects covered include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production

## 26. Performing Arts Production

## Management (3)

Lecture-3 hours. Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction, audience control, box office, promotion, safery, accommodations for persons with disabilities and emergency procedures.
28. Entertainment Engineering and Management: Stagecraft to Stage (4) Lecture/discussion-4 hours. Introduction to technical production and management in theatre and dance. Topics include stage management, theatrical mechanics, backstage protocols, scenic construction, properties, lighting, basic shop tools, costume shop use and construction, basic make-up, sound equipment, graphics and robotics for theatre. GE credit: ArtHum | AH. - I, II, III. (I, II, III.)
30. Theatre Laboratory (1-5)

Prerequisite: course 25 or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit up to 11 units. - I, II, III. (II, II, III.)
40A. Beginning Modern Dance (2)
Laboratory/discussion-4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated two times for credit. Non-dance majors can only repeat the course once. Dance majors may apply to the dance faculty adviser for permission to repeat more times. Dance is a repetitive practice that involves constant reiteration and demands this for improvement and better understanding of the somatic and proprioceptive skills. GE credit: AH, VL. -I, II, III, IV. (I, II, III, IV.)
40B. Intermediate Modern Dance (2)
Laboratory/discussion-4 hours. Prerequisite: course 40A. Open to students who have completed 14 and 40A, unless there is consent of instructor. Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history. May be repeated once for credit. For Dance majors, further repeats may be negotiated with faculty adviser in dance. GE credit:
ArtHum | AH, VL. - I, II, III, IV. (I, II, III, IV.)

## 41 A. Beginning Jazz Dance (2)

Laboratory/discussion-4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminol ogy and general overview of jazz dance history. May be repeated one time for credit with consent of instructor.

## 41 B. Intermediate Jazz Dance (2)

Laboratory/discussion-4 hours. Prerequisite: course 41 A . Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated one time for credit with consent of instructor.
42A. Beginning Ballet (2)
Laboratory/discussion-4 hours. Prerequisite: course 14 or consent of instructor. Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL.

## 42B. Intermediate Ballet (2)

Laboratory/discussion-4 hours. Prerequisite: courses 14 and 42A or consent of instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL.
43A. Contact Improvisation Dance (2)
Lecture/laboratory - 4 hours. Fundamentals of contact improvisation and its applications to all forms of dance, performance, sports, physical safety and health. Solo improvisation, safety, communication, alignment, basic lifting and weight-sharing, intuition,
developing relaxed readiness and personal expression. May be repeated two times for credit. Offered irregularly. GE credit: AH, VL.
43B. Intermediate Contact Improvisation (2) Lecture/laboratory-4 hours. Prerequisite: course 43A. Building on the fundamentals. Reviewing basics, extended improvising, skillfully working with partners of different sizes and abilities, advanced lifting, advanced safety practices, embracing risk and disorientation, subtle nuances of communication. May be repeated two times for credit. GE credit: ArtHum | AH, VL.-I, II, III, IV. (I, II, III, IV.)

## 44A. Beginning Hip Hop Dance (2)

Laboratory/discussion-4 hours. Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated one time for credit.
44B. Intermediate Hip Hop Dance (2)
Laboratory/discussion-4 hours. Prerequisite: course 44A or consent of instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences. May be repeated one time for credit.

## 55. Contemporary Local, National and

 Global Theatre, Dance and Performance (4) Lecture/discussion-4 hours. Introduction a range of contemporary theatre, dance and performance in local, national and international settings. Training in critical approaches to and aesthetic appreciation of these forms. Emphasis varies based on instructor. GE credit: ArtHum | AH, DD, VL, WC.-I, II, III. (I, II, III.)56A. History of Theatre and Dance I: Myth, Magic and Madness (4)
Lecture/discussion-4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from the origins to 1550. Examination of Greek, Roman, Sanskrit, Kathakali, Chinese, Japanese, Mesoamerican, Medieval European, and Indigenous theatre and dance including oral, ritual and shamanic performance. GE credit:
ArtHum | AH, VL, WC.-II, II, III. (I, II, III.)
56B. History of Theatre and Dance II: Romance, Revenge and Rebellion (4)
Lecture/discussion-4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from 1550 to 1850. Examination of genres related to romance, revenge and rebellion using European, North and South American, and Asian examples. GE credit: ArtHum | AH, VL, WC. -I, II, III. (I, II, III.)

## 56C. History of Theatre and Dance III: Sex,

 Society and the State (4)Lecture/discussion - 4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from 1850-1968. Examination of melodrama, popular theatre, naturalism, psychological realism, and the avant-garde using European, North and South American, Asian, and African examples. GE credit: ArtHum | AH, VL, WC. - I, II, III. (II, II, III.)

## 92. Internship in Dramatic Art (1-12)

Prerequisite: consent of instructor and department chairperson; lower division students (less than 84 units completed). Internship outside the Department of Theatre and Dance enabling students to practice their skills. May be repeated for credit up to 12 units. (P/NP grading only.)-I, II, III, IV. (I, II, III, IV.)

## 98. Directed Group Study (1-5)

Primarily for lower division students. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

111. Advanced Presentation Skills (2)

Lecture/laboratory - 4 hours. Class size limited to 20 students. Development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a competent to fluent level. GE credit: OL.

## 1115 . Representation and Identity in

 Culture and Cinema (4)Lecture/discussion-2 hours; film viewing-4 hours. Issues of personal and collective identity via study of film narratives from different cultures. Reflection of dominant cultural identities in film. Taught in Australia. GE credit: ArtHum, Div, Wrt.

## 114. Theatre on Film (4)

Lecture/discussion -3 hours; film viewing -2 hours; term paper. Prerequisite: consent of instructor; graduate standing; course 1, 14, 15. Study of six/eight plays on film, using mixed casts and raising issues of diversity. Focus: sociohistorical context for production and reception, interpretation and analysis of topics (gender, ethnicity, age, politics, philosophy), and filming, screenwriting, design, and acting/ directing for film. GE credit: ArtHum or SocSci, Div, Wrt \| VL.

## 115. Advanced Study of Major Film Makers

 (4)Lecture/discussion - 3 hours; film viewing -2 hours. Prerequisite: course 15. Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films. GE credit: VL.

## 116. Design on Screen (4)

Lecture/discussion-3 hours; film viewing - 3 hours. Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinematography. Introductory principles and practice, history. May be repeated two times for credit when topic differs. (Same course as Cinema and Technocultural Studies 116.) Offered irregularly. GE credit: ArtHum | AH, VL. - lacovelli, Morgan

## 120. Intermediate Acting/Gateway: The

 Actor's Toolkit (4)Lecture/laboratory-6 hours. Prerequisite: course 21 A or consent of instructor. Limited enrollment. Implementation of acting tools drawn predominantly from Stanislavsky's 'system'. Gateway into the Advanced Acting courses. GE credit: OL, VL.Leavy, Merlin
121 A. Advanced Acting: Scene Study and Script Analysis (4)
Lecture/laboratory-6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Indepth study, analysis and performance of texts from different eras, genres and styles. Implementation of tools to undertake independent preparation of character creation. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: OL, VL.

## 121 B. Advanced Acting: Rehearsal

Processes and Practices (4)
Lecture/laboratory-6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Development of rehearsal practice and etiquette, using a variety of scenes from different eras and genres. May be repeated up to eight units for credit. The course has been established to enable visiting artists in residence to undertake the instruction, as well as faculty. Therefore, this course may be taken twice, as students will be exposed to different professional practitioners' working processes. New etudes, scripts and scenes must be undertaken in the repetition. Offered irregularly. GE credit: OL, VL.

## 121C. Advanced Acting: Character and

 Style (4)Lecture/laboratory-6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Study of psycho-physical techniques to create characters with an emphasis on non-realistic styles. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: ArtHum | OL, VL.

## 122A. Advanced Acting: Devising anc

 Collaboration (4)Lecture/laboratory-6 hours. Prerequisite: course 120; consent of instructor. Study and practice of various devising techniques, to collaborate on and produce a series of short etudes and dramatic scenes/ short plays. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. Limited enrollment. GE credit: OL, VL.
122B. Advanced Acting: Shakespeare and His Contemporaries (4)
Lecture/laboratory-6 hours. Prerequisite: course 120 and consent of instructor. Limited enrollment. Study and performance of classical texts (monologues and dialogues), with a focus on Shakespeare and the Elizabethan world view. May be repeated up to eight units for credit. Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New monologues and scenes must be undertaken in the repetition. Offered in alternate years. GE credit: OL, VL.

## 122C. Advanced Acting: Special Topics in

 Acting (4)Lecture/laboratory-6 hours. Prerequisite: course 120 and/or consent of instructor. Dramatic Arts majors. Restricted to Dramatic Arts majors; limited enrollment. Intensive study and practical exploration of a specialized area (for example, World Theatre, Social Theatre, Physical Theatre, Musical Theatre, the Ancient Greeks, etc). May be repeated up to eight units for credit. Offered irregularly. GE credit: AH, OL, VL.
124A. Principles of Theatrical Design: Scenery (4)
Lecture/discussion-4 hours. Prerequisite: course 24 or consent of instructor. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction.
GE credit: ArtHum | AH, VL.-lacovelli

## 124B. Principles of Theatrical Design:

## Scenery (4)

Lecture/discussion-4 hours. Prerequisite: course 24 or consent of instructor. Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays. GE credit: ArtHum | AH, VL.-lacovelli
124C. Principles of Theatrical Design: Lighting (4)
Lecture/discussion-4 hours. Prerequisite: course 24 or consent of instructor. Theories of lighting the stage, equipment and control systems, execution of lighting plots. GE credit: ArtHum | AH, VL.-Munn
124D. Principles of Theatrical Design:

## Costume (4)

Lecture/discussion-4 hours. Prerequisite: course 24 or consent of instructor. Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern and period plays. GE credit: ArtHum | AH, OL, VL.-Morgan
124E. Costume Design for Film (4)
Lecture/discussion-4 hours. Prerequisite: for Dramatic Art majors; course 24 or 124D or consent of instructor. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Exe-
cution of designs for period and contemporary films. Viewing of current films. (Same course as Cinema and Technocultural Studies 124E.) GE credit:
ArtHum | AH, OL, VL. - Morgan

## 125. Scenic Painting: Studio (4)

Lecture-2 hours; studio-1 hour; laboratory-3 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio, or Design; or course 24 or 25, or consent of instructor. Scene painting techniques, practices and materials including color mixing and matching, wood graining, faux painting techniques, glazing, creating foliage, stone and brick. May be repeated one time with consent of instructor. Offered irregularly. GE credit: ArtHum | AH, VL.-lacovelli, Munn

## 126. Principles of Performing Arts Stage Management (4)

Lecture/discussion-3 hours; laboratory-3 hours. Stage management principles for theatre, dance, musical theatre, music, and concerts. The dynamical role of the stage manager in the performing arts, upper-management team. - II. (II.)

## 127A. Principles of Directing (4)

Lecture-2 hours; laboratory-4 hours. Prerequisite: courses $21 \mathrm{~A}, 26$; two of $156 \mathrm{AN}, 156 \mathrm{BN}, 156 \mathrm{CN}$; or consent of instructor. Director's creative approach to the play and to its staging. GE credit: VL.

## 127B. Principles of Directing (4)

Lecture-2 hours; laboratory-4 hours; rehearsal. Prerequisite: course 127A and consent of instructor for non-majors. Director's creative approach to the actor. GE credit: VL.

## 128. Principles of Theatre Sound (3)

Lecture/discussion-2 hours; laboratory-3 hours. Fundamentals of sound, sound equipment, and sound design as used in modern theatre and other performance venues. Assembly, set-up, and operation of basic theatre sound reinforcement system, recording system, and theatrical playback system.

## 130. Approaches to Theatrical Design:

 Practice and Theory (4)Seminar-2 hours; studio-4 hours. Prerequisite: upper division standing in Dramatic Art, Art Studio or Design; any class from course 124 series or consent of instructor. Advanced design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, scenery, lighting, costume, makeup, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres. May be repeated three times for credit when topic differs; when instructor differs. Offered irregularly. GE credit: ArtHum | AH, VL.

## 135. Voice in Performance (2)

Performance instruction-4 hours. Prerequisite: course 21B or consent of instructor. Progression of exercises to free, develop and strengthen the voice, as a human and then as an actor's instrument with emphasis on how the voice works, to freeing the channel for sound, to interpersonal communication. May be repeated two times for credit.
140A. Dance Composition (4)
Lecture-3 hours; laboratory-3 hours. Prerequisite: course 40A, 41A, and 42A, or consent of instructor. Introduction to the craft of choreography. Compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy. GE credit: VL.

## 140B. Dance Composition (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: course 140A. Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment.

## 140C. Dance Composition (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: courses 140A, 140B. Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it through creation of short dance studies.
141. Introduction to the Fundamentals of Movement (4)
Lecture/discussion-4 hours. Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of various body mind specialists including Laban, Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga. GE credit: VL.

## 142. History of Modern Dance (5)

Lecture-3 hours; laboratory-3 hours; extensive writing. The Modern Dance tradition in the U.S., focusing on its theorizations of individual and social identity. Students will write and choreograph analyses of principle dances in this tradition. Offered in alternate years.
143. Dance and Movement Studio (1-4)

Laboratory/discussion - 2-8 hours. Prerequisite: course 14 or consent of instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions. May be repeated up to eight units for credit. GE credit: AH, VL. -I, II, III, IV. (I, II, III, IV.)

## 144. Introduction to Traditional Chinese Physical Culture (4)

Lecture/discussion-4 hours. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: ArtHum or SocSci, DIV | AH, SS. - Hunter
144A. Introduction to Traditional Chinese

## Embodied Culture (4)

Laboratory/discussion-4 hours. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: AH or SS, DD, VL, WC.-Hunter
144B. Traditional Chinese Physical Culture (4)

Lecture/discussion-4 hours. Prerequisite: course 144A. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. May be repeated two times for credit when content and instructor varies and if student progression is required. GE credit: ArtHum or SocSci, Div | AH or SS, DD, VL, WC. - Hunter
144C. Daoist Philosophy in Traditional Chinese Movement Culture (4)
Lecture/discussion-4 hours. Prerequisite: course 144B. Daoist practices of movement and their relation to daoist philosophy, explored through work in dance laboratory conditions. Integration of practice with conceptual analysis, and critical philosophy around values and ethical action. May be repeated two times for credit when content or instructor varies and if student progression is required. GE credit: ArtHum | AH, DD, VL, WC.-Hunter
145. Directed Choreography Projects (4) Lecture/laboratory-6 hours. Prerequisite: courses 140A, 140B, 140C or consent of instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals. - Grenke
146A. Professional Track Modern Dance I (3)

Laboratory/discussion-6 hours. Prerequisite: course 40B; consent of instructor. Professionally oriented performance training. Rigorous, consistent training regimen based on traditional modern dance technique. Breath and voice, skeletal and muscular placement, moving from the spine, contraction technique, movement intention. May be repeated two times for credit.-Grenke

146B. Professional Track Modern Dance II (3)

Laboratory/discussion-6 hours. Prerequisite: courses 40 B and 146A; consent of instructor. Continvous of course 146A. Body and space relationships in solos, duets and group work; stylitic variations of Graham technique; works of Paul Taylor. May be repeated two times for credit. - Grenke

## 146C. Professional Track Modern Dance III

 (3)Lecture/discussion -6 hours. Prerequisite: courses
$40 \mathrm{~B}, 146 \mathrm{~A}$, and 146 B ; consent of instructor. Contin vation of course 146B. Time as a theatrical device, sustaining movement and non-movement, phrasing, musicality. May be repeated two times for credit. Grenke
150. American Theatre and Drama (4)

Lecture-4 hours. The history of the theatre from Colonial times to the present. Readings of selected plays. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, VL, WE.

## 151S. Australian Performance and Culture

 (4)Lecture/discussion-2 hours: seminar-2 hours.
Australian performance and theatre practices as a product of its culture of origin. Relationships between art and society. Taught in Australia. GE credit: ArtHum.

## 154. Asian Theatre and Drama: Contexts and Forms (4)

Lecture/discussion-4 hours. Prerequisite: upper division standing. Selected Asian plays and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; intercultural performance-the fusion of Asian and Western traditions. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.
155. Representing Race in Performance (4)

Lecture-4 hours. Representation and performance of "race" in American culture featuring different subheadings such as "African American Theatre" or "Asian-Americans on Stage." May be repeated one time for credit when topic differs. GE credit: ArtHum, Div, Wrt | AH, DD, WE.

## 155A. African American Dance and Culture

 in the United States, Brazil and the
## Caribbean (4)

Lecture/discussion-4 hours. Comparative study of the African American dance forms in the U.S.A.,
Brazil, Haiti, Cuba, Jamaica, Barbados, and Trini-
dad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as African American and African Studies 155A.) Offered in alternate years. GE credit: ArtHum | AH, VL, WC.

## 155B. Ancient and Contemporary Greek

 Theatre and Dance (6)Discussion/laboratory-10 hours; performance instruction - 10 hours; seminar - 13 hours. Origins of early theatres and the first actors, playwrights and dancers and their powerful influence on western performance and thought up to present day. Offered in Greece. GE credit: ArtHum | AH.-IV. (IV.)

## 156AN. Performance Analysis (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 1, 20, or consent of instructor. Performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE credit: ArtHum, Div, Wrt | AH, DD, WE.

## 156B. Theatre in History and Place: Local, National and Global Conditions for

 Production (4)Lecture-3 hours; discussion-1 hour. Prerequisite: course 1, course 20 or consent of instructor. Exploration of local, national and global issues in theatre production, with special attention to historical changes in social and political contexts for performance. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-Hunter

156C. Modern Aesthetic Movements in Performance (4)
Laboratory/discussion-3 hours; discussion-1 hour. Prerequisite: course 1, course 20 or consent of instructor. Important movements in performance, especially theatre and dance, from realism to the present. Primary emphasis on Western traditions though others may be studied. GE credit: ArtHum, Div, Wrt | AH, WE.-I, II, III. (I, II, III.)

## 156D. Theatre History through

## Shakespeare (4)

Lecture -4 hours; extensive writing. Shakespeare's plays, theatre history, and theatre today. European contexts from 1590-2004 and international theatre from 20th century. Stagecraft, different media (print, stage, film), social/political environments, design, and cultural change (gender, sexuality and ethnicity). May be repeated one time for credit. ArtHum,
Div, Wrt | AH, OL, WC, WE. - II, IV. (II, IV.)

## 158. Performance Studies Undergraduate Seminar (4)

Seminar-4 hours. Prerequisite: course 156A, B, or $C$, or consent of instructor. Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic issues as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry. May be repeated for credit. GE credit: Wrt.

## 159. Contemporary Experimental

## Performance, Theatre and Drama (4)

Lecture/discussion-3 hours; extensive writing. Evalvation and examination of the "New Theatre;" its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. May be repeated three times for credit when topic differs. GE credit: AH, DD, VL, WC, WE. - III. (III.)

## 159S. Contemporary Experimental

## Performance, Theatre and Drama (4)

Lecture/discussion-4 hours. Evaluation and examination of the "New Theatre" - its experimental and innovative nature since the 1960 s . Dance, film, stage, performance art and public acts of a performative nature. This course is offered in Sydney, Australia. Not open for credit to students who have completed course 159. Offered irregularly.
160A-160B. Principles of Playwriting (4-4) Lecture/seminar-4 hours. Prerequisite: two courses in Dramatic Art or related courses in other departments; course 160A prerequisite for 160B or consent of instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE.

## 170. Media Theatre (4)

Lecture-1 hour; rehearsal-2 hours; performance instruction - 1 hour. Prerequisite: upper division standing in Dramatic Art, Music, Art Studio, Design, Technocultural Studies, Film Studies, Computer Science, or Engineering: Computer Science, or consent of instructor. New media and application of in theatre devising and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation. May be repeated one time for credit. GE credit: ArtHum | AH, VL.

## 174. Acting for Camera (4)

Lecture/laboratory-6 hours. Prerequisite: consent of instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated eight times for credit when different instructor is assigned. (Same course as Cinema \& Technocultural Studies 174.) - III. (III.) Anderson, Merlin

## 180. Theatre Laboratory (1-5)

Prerequisite: upper division standing and course 25, or consent of instructor. Projects in acting, production, scene design, costuming, lighting, directing,
and playwriting. Participation in departmental productions. May be repeated for credit. - I, II, III. (I, II, III.)

180A. Theatre Laboratory: Performance (15)

Rehearsal- 12 hours. Prerequisite: consent of instructor. Limited enrollment. Rehearsal and performance of a production directed or choreographed by visiting Granada Artists-in-Residence and/or faculty, and/or the UG Edge Festival. May be repeated for credit. Since each production involves different scripts, directions, challenges of rehearsal practices and performance processes, it is possible for students to appear in a variety of productions in the course of their education. Admission by audition. $-I$, II, III. (I, II, III.)
180B. Theatre Laboratory: Design (1-4) Prerequisite: course $24,25,124 \mathrm{~A}, 124 \mathrm{~B}, 124 \mathrm{C}$, 124D and/or 130 or consent of instructor. Limited enrollment. Design-related participation in theatre and dance productions involves research, creation and implementation of design concept in collaboration with the director and other members of the production team. May be repeated for credit. Because each theatrical piece is conceived and produced afresh with new source material, scripts, and production style the challenges and assignments for the designers will be new each and every time they design a show. GE credit: ArtHum | AH, VL. -I, II, III. (I, II, III.)

180C. Theatre Laboratory: Management, Directing, other Production Team (1-5) Prerequisite: consent of instructor. Participation in theatre and dance production in management, direction, choreography, dramaturgy, writing or other production related role; research, creation and implementation of production concept in collaboration with members of the production team and cast. May repeat multiple times but only for a total of five units. Permission to repeat is required from the Dramatic Art department. GE credit: ArtHum | AH, VL. -I, II, III. (I, II, III.)

## 180D. Theatre Laboratory: Crew (2-4)

Laboratory-6-12 hours. Prerequisite: consent of instructor. Participation in theatre and dance productions as backstage running crew which will involve skill development, rehearsal and execution of performance. May be repeated for credit. - I, II, III. (I, II, III.)

180E. Theatre Laboratory: Scenic (1-4) Laboratory-3-12 hours. Prerequisite: consent of instructor. Practical experience working on scenery and properties for theatre and dance department productions. Study and execution of basic scenery and prop engineering, construction, painting, rigging. Study of techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement. May be repeated for credit. -I, II, III. (I, II, III.)
180F. Theatre Laboratory: Costume (1-4) Laboratory-3-12 hours. Prerequisite: consent of instructor. Practical experience working on costumes for theatre and dance department productions. Study and execution of basic costume construction techniques and materials, tools, and equipment use. Skills development, professional etiquette. Safety training requirement. May be repeated for credit. I, II, III. (I, II, III.)

## 180G. Theatre Laboratory: Lighting/ Sound/Projection (1-4)

Laboratory-3-12 hours. Prerequisite: consent of instructor. Practical experience working on lighting, sound or projections for theatre and dance department productions. Study and execution of basic techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement. May be repeated for credit. - I, II, III. (I, II, III.)

## 192. Internships in Theatre and Dance

(1-12)
Internship-3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or the-
atre/dance/physical theatre companies. May be repeated for credit for a total of 12 units. Not open to students who have completed course 192S.
(P/NP grading only.)

## 192S. Internships in Theatre and Dance

 (1-12)Internship-3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. This course is offered in Sydney, Australia. May be repeated for credit for a total of 12 units. Not open to students who have completed course 192. Offered irregularly. (P/NP grading only.)-McCutcheon
194HA-194HB. Special Study for Honors Students (3-3)
Independent study-9 hours. Prerequisite: qualification for Letters and Science Honors Program and admission to Dramatic Art Senior Honors Program. Preparation and presentation of a culminating proiect, under the supervision of an instructor, in one of the creative or scholarly areas of Dramatic Art. (Deferred grading only, pending completion of sequence).
195. Senior Capstone Experience (2)

Project; lecture/discussion - 1 hour. Open to Dramatic Art Majors who have completed 135 or more units. Capstone experience for majors. Examination, reflection and synthesis on development. Discussion of professional development and translatable skills. Individual project and development of portfolio. (P/ NP grading only.) GE credit: ArtHum | AH, WE.II, III. (II, III.)
197T. Tutoring in Dramatic Art (1-5)
Tutoring $-1-5$ hours. Prerequisite: upper division or graduate standing with major in dramatic art; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

200. Methods and Materials in Theatre

## Research (4)

Seminar-3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field.
211 . Advanced Voice and Speech (3)
Lecture-2 hours; laboratory -2 hours. Prerequisite: advanced senior undergraduate Acting major or graduate student. Open only to Dramatic Arts Students and Ph.D. students with an emphasis in Performance and Theatre. Review a progression of exercises to free, develop and strengthen the voice, first as a human instrument, and then as an actor's instrument using various texts such as Shakespeare, Ibsen and contemporary plays. Required for the M.F.A. degree in Acting. May be repeated two times for credit.
212. Advanced Stage Movement (3) Laboratory-6 hours. Prerequisite: graduate standing in the MFA Program. The application of modes of exploration, breath placement, and the use of imagery as well as Laban's effort/shape system as a method of analysis in classic and modern plays. Open to advanced undergraduates by consent of instructor. May be repeated for credit.
221. Special Problems in Advanced Acting (4)

Seminar-2 hours; laboratory -4 hours. Prerequisite: consent of instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit.

## 224A. Seminar in Theatrical Design:

Ancient Worlds-Early 17th Century (4) Seminar-2 hours; project-2 hours. Prerequisite: graduate standing. Group study while focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Greek, Medieval, Renaissance, Shakespearean, Jacobean, early 17th century. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.
224B. Seminar in Theatrical Design: Mid 17th Century to 1900 (4)
Seminar-2 hours; project-2 hours. Prerequisite: graduate standing; course 224A or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Cavalier, Restoration 18th century opera and ballet, 19th century drama. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.
224C. Seminar in Theatrical Design: the 20th Century (4)
Seminar-2 hours; project-2 hours. Prerequisite: graduate standing; course 224 A and 224 B or consent of instructor. Group study focusing primarily on one discipline-scenic, costume or lighting design. 20th century genres covered: Realism, Brecht, Musicals, Contemporary Dance, short narrative film. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills.
224D. Seminar in Theatrical Design:

## Contemporary Concepts (4)

Seminar-2 hours; project-2 hours. Prerequisite: graduate standing; course 224A, 224B, and 224C or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on contemporary design concepts for new works and classics: Shakespeare, modern dance, concept plays and musicals. Script and character analysis for design in performance, research, design projects.

## 224E. Seminar in Theatrical Design:

Advanced Concepts (4)
Seminar-2 hours; project-2 hours. Prerequisite: graduate standing; courses 224A, 224B, 224C, and 224 D or consent of instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on special issues in contemporary design concepts for new works and classics. Script and character analysis for design in performance, research, design projects.

## 225. Performance Design Studio: <br> \section*{Techniques and Media (2)}

Studio-2 hours. Prerequisite: graduate standing; must be taken concurrently with course 224 series. Exploration and development of techniques and skills in the performance design process. Drafting, model building, drawing, painting and rendering, costume drawing, color theory, lighting techniques, design portfolio preparation and presentation. May be repeated up to five times for credit.

## 228. Seminar in Directing Theory: NonRealism (4)

Seminar - 3 hours; term paper. Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays - Greek to the present; emphasis on textual analysis.
229. Special Problems in Directing (4)

Seminar-2 hours; laboratory-2 hours; rehearsal4 hours. Prerequisite: consent of instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated two times for credit. -I, II, III. (I, II, III.)
230. Advanced Problems in Choreography and Performance (2)
Laboratory/discussion-2 hours. Prerequisite: consent of instructor. Explores contemporary issues of choreography and performance in depth and how those issues pertain to performance work. Focus will
include contemporary thought on representation, legibility, new forms, and cultural attitudes. May be repeated six times for credit.

## 244. Critical Approaches to Traditional

 Systems of Body Movement (4)Discussion/laboratory-6 hours; project; term paper. Introduction to traditional systems for body movement, development of critical approaches to them, and experiments in how they inform training and practice in theatre, dance, and performance. May be repeated five times for credit. Offered irregularly.

## 250. Modern Theatre (4)

Seminar-3 hours; term paper. The theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced.
251. Scoring and Scripting in Performance (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: graduate standing. The process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists' "scores" will layer and transform the "script" into performance for specific time, place, spectators.

## 252. Performance: Concepts of Space,

 Place, and Time (4)Lecture - 3 hours; laboratory - 3 hours. Prerequisite: graduate standing. Innovative theories of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consideration of various tempi from music and movement.

## 253. Approaches to Collaboration (4)

Lecture - 3 hours; laboratory - 3 hours. Prerequisite: graduate standing. Exploration of different approaches to collaboration among artists in different media and their influence on the creative pro-cess.-I.
254. Performing Identities/Personae (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: graduate standing. Historical and contemporary theories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual orientation.
255. Composition in the Arts (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: graduate standing. Examine manner in which specific elements utilized by actors, dancers, directors, choreographers, and designers are combined or related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products. May be repeated one time for credit.
257. Interdisciplinary Seminar in Theatre, Dance and Performance (1)
Seminar- 1.5 hours; project- 1.5 hours. Prerequisite: consent of instructor. Students must be enrolled on the MFA in Dramatic Art. Students taking the PhD in Performance Studies or the DE in Studies in Performance and Practice may apply to join the class. Interdisciplinary seminar for first and second year MFA students in Dramatic Art. Topics range from current practice in dance, theatre, film and performance, to leading edge developments by outstanding practitioners in the field. May be repeated two times for credit. - II. (II.)

## 259. Topics in Contemporary Theatre and

 Performance (4)Seminar-3 hours; term paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship (e.g., "Brecht and After," "British Theater," "Race and Gender in Performance." May be repeated five times for credit.
260. Topics in Contemporary Theatre and Performance (4)
Seminar-3 hours; term paper; project. Prerequisite: admission to any graduate program in the University. Preference will be given to students enrolled in the Designated Emphasis in Studies in Performance and Practice. Instruction is offered a variety of disciplinary approaches and methodologies in Performance and Practice, with a focus is on crossdisciplinary learning and research. Usually offered each quarter. Maybe repeated for credit with different topical matter/instructor. Offered irregularly.

## 265A. Performance Studies: Modes of

## Production (4)

Seminar-3 hours; term paper; project. Introduces students to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory. Offered in alternate years. May be repeated three times for credit when topic differs.

## 265B. Performance Studies: Signification

 and the Body (4)Seminar-3 hours; term paper; project. Introduces students to analysis of the body in performance, drawing on theoretical models from several fields. Offered in alternate years. May be repeated three times for credit when topic differs.
265C. Performance Studies: Performance and Society (4)
Seminar-3 hours; term paper; project. Introduces students to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. Offered in alternate years. May be repeated three times for credit when topic differs.

## 265D. Performance Studies: Theory,

History, Criticism (4)
Seminar-3 hours; term paper; project. Introduction to the theory, history and criticism, informing performance studies. Offered in alternate years. May be repeated three times for credit when topic differs.
280. Theatre Laboratory (1-12)

Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit.-I, II, III. (I, II, III.)
298. Group Study (1-5)

Prerequisite: consent of instructor.
299. Individual Study (1-12)
(S/U grading only.)
299D. Dissertation Research (1-12)
(S/U grading only.)
Professional
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) $-\mathrm{I}, \mathrm{II}$, III. (II, II, III.)
Professional
413. Stage Make-up (1)

Lecture/laboratory-2 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up.

## Transportation Technology and Policy (A Graduate Group)

John Harvey, Ph.D., Chairperson of the Group
Group Office. 1605 Tilia, Suite 100
530-752-0247; http://www.its.ucdavis.edu

## Faculty

Ralph C. Aldredge, III, Ph.D., Professor
(Mechanical and Aerospace Engineering)

Gwen Arnold, Ph.D., Assistant Professor
(Environmental Science and Policy)
Alison Berry, Ph.D., Professor
(Environmental Horticulture)
David Bunch, Ph.D., Professor
(Graduate School of Management)
Paul Erickson, Ph.D., Associate Professor (Mechanical and Aerospace Engineering)
Yueyue Fan, Ph.D., Associate Professor (Civil and Environmental Engineering)
Y. Hossein Farzin, Ph.D., Professor (Agricultural and Resource Economics)
Susan Handy, Ph.D., Professor (Environmental Science and Policy)
John T. Harvey, Ph.D., Professor (Civil and Environmental Engineering)
Bryan Jenkins, Ph.D., Professor
(Biological and Agricultural Engineering)
Alissa Kendall, Ph.D., Associate Professor (Civil and Environmental Engineering)
Michael Kleeman, Ph.D., Professor
(Civil and Environmental Engineering)
Cynthia Lin, Ph.D., Associate Professor
(Agricultural and Resources Economics)
Mark Lubell, Ph.D., Professor
(Environmental Science and Policy)
Debbie A. Niemeier, Ph.D., Professor (Civil and Environmental Engineering)
Joan Ogden, Ph.D., Professor (Environmental Science and Policy)
Ahmet Palazoglu, Ph.D., Professor
(Chemical and Materials Science Engineering)
David Rapson, Ph.D., Assistant Professor (Economics)
Simon Sadler, Ph.D., Professor (Design)
Nesrin Sarigul-Klijn, Ph.D., Professor
(Mechanical and Aerospace Engineering)
Daniel Sperling, Ph.D., Professor (Civil and Environmental Engineering, Environmental Science and Policy)
Pieter Stroeve, Sc.D., Professor (Chemical Engineering and Materials Science)
Steven Velinsky, Ph.D., Professor
(Mechanical and Aerospace Engineering)
Stephen M. Wheeler, Ph.D., Associate Professor (Landscape Architecture)
James Wilen, Ph.D., Professor (Agricultural and Resource Economics) Distinguished Graduate Mentoring Award
Michael Zhang, Ph.D., Professor
(Civil and Environmental Engineering)

## Emeriti Faculty

Thomas Cahill, Ph.D., Professor Emeritus (Atmospheric Science and Physics)
Dan Chang, Ph.D., Professor Emeritus (Civil and Environmental Engineering)
Harry Dwyer, Ph.D., Professor Emeritus (Mechanical and Aerospace Engineering)
Mark Francis, M.L.A., Professor (Landscape Architecture)
Andrew A. Frank, Ph.D., Professor Emeritus (Mechanical and Aerospace Engineering)
Robert Johnston, Ph.D., Professor Emeritus (Environmental Science and Policy)
Patricia L. Mokhtarian, Ph.D., Professor Emeritus
(Civil and Environmental Engineering)

## Affiliated Faculty

Rahman Azari, Ph.D., Lecturer (Statistics)
Andrew F. Burke, Ph.D., Research Engineer (Institute of Transportation Studies)
Steven S. Cliff, Ph.D., Research Engineer (Applied Science)
Mark A. Delucchi, Ph.D., Research Ecologist (Institute of Transportation Studies)
Kenneth S. Kurani, Ph.D., Research Engineer (Institute of Transportation Studies)
Alan Meier, Ph.D., Professional Researcher (Institute of Transportation Studies)
Deborah Salon, Ph.D., Research Scientist (Institute of Transportation Studies)
Marshall Miller, Ph.D., Associate Engineer (Institute of Transportation Studies)
Thomas Turrentine, Ph.D., Research Anthropologist (Institute of Transportation Studies)

Christopher Yang, Ph.D., Research Scientist (Institute of Transportation Studies) Sonia Yeh, Ph.D., Research Scientist
(Institute of Transportation Studies)
Graduate Study. The Graduate Group in Transportation Technology and Policy offers the M.S. (Plan I-thesis; and Plan II-exam), and Ph.D. degrees in two areas of specialization: Transportation Technology; and Transportation Planning and Policy. The technology track is for students trained in engineering and the physical sciences and interested in sys-tems-level planning, analysis, management and design of advanced technologies (emphasizing vehicle propulsion and "intelligent transportation system" technologies) focusing on energy and environmental issues. The planning and policy track is aimed at students from a wider range of disciplines interested in the broader public policy issues concerning transportation systems. The curriculum for both tracks includes courses in civil, mechanical, and environmental engineering, economics, policy sciences, statistics, travel behavior, management, technology assessment and environmental studies.
Preparation. Applicants will normally be expected to have completed two courses in calculus, one course in linear algebra, and one course each in calculus level statistics and microeconomics. Additionally, students entering the technology track will need either to have an appropriate technical background or make up a relatively large number of prerequisite courses in order to be able to take the approved courses in that track.
Program of Study. Students will have the option of following either a technology or policy/management track. M.S. students complete 6 core courses plus electives. Ph.D. students take 7 courses from the same core, 3 additional courses from their chosen track, one more in the alternate track, plus electives. Master's degrees require a minimum of 36 quarter units and doctoral degrees require a minimum of 54 units. M.S. Plan I students may replace up to 6 units of regular course work with research (course 299) units. At least two thirds of all credits must be at the graduate level.
Graduate Advisers. YueYue Fan and Alissa Kendall

## Curriculum

Core Courses. Students in each track are required to take courses in a common set of core competencies, as well as (for Ph.D. students) some courses in the other track.

Knowledge areas core courses: M.S. and Ph.D. students take Transportation Technology (TTP 210), Transportation Policy (ECI 252 or TTP 220), and Transportation Systems (ECI 251).

Skill areas core courses: M.S. and Ph.D. students take one in the area of Research Design from the following: Transportation Survey Methods (TTP 200), Research Methods in Environmental Policy (ESP 278), Survey and Questionnaire Research Methods (PSY 207), Design and Analysis of Engineering Experiments (EBS 265), Experimental Design and Analysis (PLS 205), Engineering Experimentation and Uncertainty Analysis (MAE 207), or Statistical Methods for Research (STA 205);

Natural Resource Economics (ARE 175), Environmental Economics (ARE 176),
Microeconomic Analysis (ARE 204),
Economic Analysis of Resource and
Environmental Policies (ARE 275),
Environmental Economics (ARE 276), or
Infrastructure Economics (ECI 268), Energy
Economics (125);
Natural Resource Economics (ARE 175),
Environmental Economics (ARE 176),
Microeconomic Analysis (ARE 204),
Economic Analysis of Resource and
Environmental Policies (ARE 275),

Environmental Economics (ARE 276), or Infrastructure Economics (ECI 268), Energy Economics (125)

Integration and Breadth core courses: M.S. and Ph.D. students take ITS Seminars (TTP 281), Transportation Orientation Seminar (TTP 282), and Research (TTP 299).
Planning and Policy Courses. Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:

Agricultural and Resource Economics, 100B,
$130,136,144,175,176,204,275,276$
Anthropology 104N, 127, 211, 222
Civil and Environmental Engineering, 165,
244A, 252, 258, 268, 269
Civil and Environmental Engineering/
Environmental Science and Policy 163, 289A
Communication 170
Community and Regional Development 162,
171,240, 245
Ecology 213
Economics 101, 200D
Education 222
Engineering 250
Environmental Horticulture 110
Environmental Science and Policy 163, 167,
168A, 171, 179 212A
Geography 155
History 172
Landscape Architecture 180G, 180L, 180M,
181M, 201, 205, 220
Management 240, 251, 293
Political Science 175, 187, 208, 279
Psychology 155
Sociology 141, 143A, 143B, 160
Transportation Technology and Policy 200,
210, 220, 281, 282, 289A
Technology Courses. Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:
Applied Biological Systems Technology 180,
181N, 182
Atmospheric Science 116, 270
Applied Science Engineering 116, 220A,
220B
Biological Systems Engineering 216
Civil and Environmental Engineering 143,
$149,161,162,179,242,244,250,253$,
256, 257, 269, 282
Computer Science Engineering 168
Environmental and Resource Sciences 131,
186
Electrical and Computer Engineering 207
Geography, 200CN
Landscape Architecture 150
Mechanical Engineering 134, 161, 163,
$188,216,217,218,226,234,236,258$, 269
Other Courses. Approved courses in this area include the following; additional courses may be added upon approval by the Chairperson:
Agricultural and Resource Economics 106,
155, 252, 253, 254, 255, 256
Anthropology 138
Biological Systems Engineering 265
Civil and Environmental Engineering 153,
249, 254
Community and Regional Development 151, 151L
Economics 140, 240A, 240B, 240C, 256
Engineering, Applied Science 115
Engineering, Biological Sciences 265
Environmental Science and Policy 278
Graduate School of Management 249
Mathematics 108, 227, 258A, 258B
Mechanical and Aeronautical Engineering
207
Nutrition 492A
Plant Sciences 205, 206
Psychology 204A, 204B, 204C, 204D,
205A, 205B, 205C
Sociology 298

Statistics 106, 108, 130, 131A, 131B
131C, 135, 137, 138, 140, 142, 144, 205, 222, 223
Transportation Technology and Policy 200

## Courses in Transportation Technology and Policy (TTP) <br> \section*{Graduate}

200. Transportation Survey Methods (4) Lecture-4 hours. Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have taken Civil and Environmental Engineering 255. (Same course as Geography 281.)-II. (II.)

## 210. Fundamentals of Transportation

## Technology (4)

Lecture-2 hours; discussion - 2 hours. Prerequisite: consent of instructor; Mathematics 21 A, 21B, 22A; graduate or junior/senior undergraduate as a technical elective. Limited enrollment. Not open for credit to students who have completed Transportation Technology and Policy; Fundamentals of Transportation Technology 289. (Former course Transportation Technology and Policy; Fundamentals of Transportation Technology 289). - II. (II.)
220. Transportation Planning and Policy (4) Lecture/discussion-4 hours. Limited enrollment. Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies. Students having taken this course previously as course 289 cannot repeat it for credit; having taken other course 289 offerings does not preclude taking this course for credit. (Same course as Geography 236.) Offered in alternate years. - III. Handy
281. ITS Transportation Seminar Series (1) Seminar-1.5 hours. Transportation seminars by guest speakers, on varied topics. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.) Handy, Sperling

## 282. Transportation Orientation Seminar

 (1)Seminar-1 hour. Ten weeks of seminars, introducing various topics in transportation research and education, focusing on topics of particular interest at UC Davis. May be repeated for credit. (S/U grading only.) - I. (I.) Handy
283. Professionalism, Leadership, and

## Ethics (1)

Seminar-2 hours. Speakers from industry, government, academia, and NGOs will lead discussions about succeeding and performing in the professional world. They will address leadership, ethics, and other workplace issues. May be repeated for credit. (S/U grading only.) - III. (III.) Sperling
289A. Selected Topics in Transportation Technology and Policy (1-5)
Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out through lecture or laboratory, or a combination of both. May be repeated for credit. - I, II, III. (I, II, III.)

## 289B. Selected Topics in Transportation

 Technology and Policy (1-5)Lecture and/or laboratory. Prerequisite: consent of instructor. Directed group study of special topics with instruction carried out lecture or laboratory, or a combination of both. May be repeated for credit. (S/U grading only.) -I, II, III. (II, II, III.)

## 290C. Graduate Research Group Conference (1)

Discussion-1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in transportation. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 292. Internship in Transportation Technology and Policy (1-5)

Prerequisite: second year standing; approval of project prior to period of internship. Supervised work experience in transportation studies. May be repeated for credit if topic differs. (S/U grading only.) -I, II, III. (I, II, III.)

## 298. Group Study (1-5)

Discussion-1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)
299. Research (1-12)

Discussion-1-12 hours. Prerequisite: consent of instructor. (S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## UC Davis Study Abroad

Aliki Dragona, Ph.D., Fadi Fathallah, Ph.D., Faculty Directors
UC Davis Study Abroad
207 Third Street, Suite 130
530-297-4633; Fax 530-297-4695;
studyabroad@ucdavis.edu;
http://studyabroad.ucdavis.edu/
The opportunity to study abroad is one of the richest educational experiences a student can have. When students return from study abroad in places like Italy or Hong Kong, they describe their time abroad as an experience that changed their lives. Students study abroad to see the world, to study their academic interests in a global context, to learn a language, to prepare for a job in the global economy and to add distinction to an application for graduate or professional school.
UC Davis Study Abroad can help students decide which program is best for them, whether to study abroad for a summer, quarter, semester or full year and when to go abroad (freshman through senior years). UC Davis Study Abroad Coordinators also participate in freshman seminars, offer financial aid workshops and can advise on programs that have internship opportunities. UC Davis Study Abroad also administers the Global and International Studies (GIS) minor, which is sponsored by the Humanities Program in the College of Letters and Science.
UC Davis Study Abroad is home to UC Davis Quarter Abroad, UC Davis Summer Abroad, UC Davis Seminars Abroad and the University of California Education Abroad Program (UCEAP). UC Davis Study Abroad also provides advising for students interested in non-UC "independent" programs and administers the Non-UC Study Abroad leave program. Finally, UC Davis Study Abroad advises and provides student services for international UCEAP Reciprocity students.

## UC Education Abroad Program (UCEAP)

Fadi Fathallah, Ph.D., Faculty Director
UC Davis Study Abroad
207 Third Street, Suite 120
530-297-4633; Fax 530-297-4695;
http://studyabroad.ucdavis.edu/programs/uceap/
The UC Education Abroad Program (UCEAP) is one
of the premiere study abroad programs in the
nation. UCEAP offers international study programs in
association with nearly 140 host universities and institutions in some 32 countries around the world. Participating students remain registered at UC while studying abroad and receive full academic credit for their work. UCEAP students maintain their financial aid and scholarship eligibility while abroad. UCEAP has study abroad opportunities for undergraduates at all class levels as well as for qualified graduate students who have completed at least one full year of graduate work and have the support of their graduate program and graduate dean.
UCEAP offers year, semester, quarter, and summer programs for all majors. Over $50 \%$ of the programs are offered in English, while several programs allow students to learn a language while experiencing the culture first hand. Some programs include the possibility of internships or field research. In most cases, students attend courses taught by the faculty of the host institution.
UC faculty members serve as directors at most Study Centers abroad, providing in-country academic advising to students during their program. Full UC credit is granted for courses satisfactorily completed, and courses and grades are recorded on official UC transcripts. With careful planning, most UCEAP students make normal progress toward their UC degrees, even those students who study abroad for a full year. With approval of their major or college advisers, students may earn credit towards their major, minor and general education requirements.
Graduation Requirements. Il prospective applicants, particularly students who intend to study abroad during their senior year, should carefully plan their course programs for Davis and abroad in order to satisfy university, college, and major/minor requirements for their degree.
Although units and grade points earned while studying abroad through UCEAP are incorporated into the University transcript and GPA, departments and majors retain the right to determine which UCEAP courses will be accepted in satisfaction of major and minor requirements.
All degree candidates must meet the University residence requirement. Recognizing the special value of study abroad, the faculty have approved two exceptions to the usual residence requirement for students participating in the Education Abroad Program:

- Students planning to graduate immediately upon completion of their UCEAP program may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus preceding entry into the EAP,
or
- Students who have not finished all of their degree requirements following completion of their UCEAP program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCEAP, on the Davis campus within the final 90 units earned toward the degree. With this option, as many as 55 units taken abroad may be applied toward the unit requirement for graduation.
Students should consult with their college Dean's office early during the UCEAP planning process for information on the university residence requirement.
Students may satisfy GE requirements while on UCEAP, but should consult with the Education Abroad Center UC Davis Study Abroad and their college Dean's office prior to departure for information on the certification process.
Students may participate in UCEAP provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time on UCEAP study abroad program. Participants may only return to campus from UCEAP to complete any outstanding degree requirements provided that they can do so within 225 units.
Participants in programs that conclude in May or June who satisfy all degree requirements while
abroad and expect to graduate upon completion of the year abroad should file for candidacy to receive their degree in September; candidacy filing dates are established by the Office of the University Registrar. In most cases, transcripts from abroad may will not be received in time to be posted on the student's Davis transcript for UCEAP returnees to be included on the June degree list. Such returning students may register to participate in the June commencement ceremony,; however, their graduation date will be in September. Participants in programs that conclude in November or December should file for candidacy to receive their degree in March. Such returning students may be able register to participate in either the December or subsequent June commencement ceremony. Their graduation date will be in March.

## UC Davis Faculty-Led Programs

 AbroadAliki Dragona, Ph.D., Faculty Director
UC Davis Study Abroad
207 Third Street, Suite 120
530-297-4633; Fax 530-297-4695;
http://studyabroad.ucdavis.edu/programs
UC Davis Study Abroad offers a number of facultyled programs abroad, including UC Davis Quarter Abroad, UC Davis Summer Abroad, and UC Davis Seminars Abroad. These programs enable students to study abroad in small program cohorts taught by UC Davis faculty in over 30 countries around the world. Programs are specifically tailored to UC Davis disciplines and provide unique opportunities for study, field or lab work, research, internship and language learning in intimate and engaging environments.
Participants remain registered UC Davis students while abroad and receive UC Davis units for their academic work. Open to students from any major, these programs allow students to choose courses from a wide range of specializations.
Programs range from two-week seminars to fourweek summer offerings to quarter-long options. All programs allow students to experience the host country's unique culture through co-curricular activities, such as day-trips to surrounding areas, museum tours, and theatre visits. Many also include field work, internship, or service learning opportunities.
Financial aid and scholarships apply. Students may participate in UC Davis faculty-led programs as early as their freshman year, or as late as their senior year. Applicants must have a 2.000 GPA, be in good academic and disciplinary standing, and must fulfill any prerequisites specific to the program courses.
In preparation for UC Davis Quarter Abroad, UC Davis Summer Abroad, and/or UC Davis Seminars Abroad, students are urged to take Education Abroad Program (EAP) 90X or 190X.

## UC Davis Quarter Abroad

Aliki Dragona, Ph.D., Faculty Director
207 Third Street, Suite 120
530-297-4633; Fax 530-297-4695;
quarterabroad@ucdavis.edu;
http://quarterabroad.ucdavis.edu
Academic Focus. Students can earn 12-28 UC Davis quarter units through 3-6 courses taught abroad. Academic focus varies by program and may include subject area courses, language learning, lab work, internship/field work, and/or practical training experience. Programs range in length from 10 to 16 weeks. UC Davis faculty leaders teach one or more of the courses of the program, while other courses may be taught or co-taught by adjunct faculty of the host country, under supervision by UC Davis faculty. Students may be able to apply earned units towards their major, minor, language, or general education requirements.

## UC Davis Summer Abroad

Aliki Dragona, Ph.D., Faculty Director
207 Third Street, Suite 220
530-757-8308; Fax 530-297-7142;
summer-abroad@ucdavis.edu;
http://summer-abroad.ucdavis.edu
Academic Focus. Students earn 8 UC Davis quarter units through two courses taught abroad. All courses are taught by UC Davis faculty, sometimes with select supplemental lectures provided by local experts. Planned group activities and field trips enhance classroom instruction. Students may be able to apply earned units towards their major, minor, or general education requirements. Programs allow students to complete coursework in English in a wide variety of non-English-speaking locations.

## UC Davis Seminars Abroad

Aliki Dragona, Ph.D., Faculty Director
207 Third Street, Suite 120
530-297-4633; Fax 530-297-4695;
http://studyabroad.ucdavis.edu/programs
Academic Focus. Students earn 2-6 UC Davis quarter units through one or more courses taught abroad. These short courses are taught by UC Davis faculty and may be offered as stand-alone programs abroad, or as an international component to a course taught during a regular term on campus. A heavy focus on field trips, onsite projects and group activities enhance classroom instruction. Students many be able to apply earned units toward their major, minor, or general education requirements. Programs are typically offered in September, June, or during the winter break.

## Courses in Education Abroad Program (EAP)

## Lower Division

90X. International Education Seminar (1)
Seminar-1 hour. Prerequisite: open to lower division applicants for EAP or UC Davis study abroad and international internship programs. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only.) -I, III. (I, III.)

## Upper Division

180. Education Abroad: Special Topics (112)

Lecture/discussion-3-12 hours; laboratory/discussion -3 hours. Prerequisite: minimum GPA requirement for each study abroad program as specified in the written agreement between UC Davis and the host institution; prerequisites for language courses may also apply. Students who participate in approved international programs take this course up to 12 units while studying abroad. May be repeated for credit; credits will be reviewed by departments and Dean's Office to determine how they fulfill UC Davis requirements. Offered irregularly.-I, II, III, IV. (I, II, III, IV.)
190X. International Education Seminar (1)
Seminar-1 hour. Prerequisite: open to upper division applicants for EAP or UC Davis study abroad and international internship programs. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only.) -I , III. (I, III.)
192. Internship in Education Abroad (1-4) Internship-3-12 hours. Prerequisite: participation in a study abroad program. Internship related to education abroad. May take place at or away from the university. May be repeated for up to 12 units of credit. (P/NP grading only.) - I, II, III, IV. (II, II, III, IV.)

## UC Washington Program (UCDC)

Campus Program Office. 105 and 108 South Hall 530-752-6652;
http://washingtonprogram.ucdavis.edu
Residential Program Location. 1608 Rhode Island Avenue, NW, Washington, D.C. 20036 1608 Rhode Island Avenue, NW, Washington, D.C. 20036
The University of California hosts a system-wide academic and residential program for undergraduate students attending from each of the UC campuses. Housed within the UC Washington Center (UCDC), an 11-story, state of the art facility, convenient to public transportation and located in downtown D.C., the programs provide undergraduates opportunity to enrich their education while in residence for one quarter in the nation's capital. The program's principal activities include enrollment in credit-bearing courses, participation in academic internships, and opportunity to explore the many educational, cultural and historical activities in the Washington area.

## Program of Study

UCDC is open to undergraduates from all majors who will have upper-division standing by the start of the quarter in which they plan to participate although not required. A GPA of at least 3.000 is recommended for admission although not required. Applicants are also evaluated based on overall relevant employment, internship, and volunteer experiences, written statement, and letter(s) of recommendation (only one is required).
Academic Year Component ( 11 weeks). Students earn academic credit and continue to be registered as full-time UC Davis students during the quarter in which they participate.

- Internship. Students work up to five days per week as interns in Congress, federal agencies, interest groups, trade associations, research institutions, media corporations, museums, or in other organizations related to the interests and objectives of individual students.

Students can choose to take one of both courses below for academic credit.

- Research Seminar. Each student writes a research paper in consultation with Washington Program faculty and graduate fellows. To complete the assignment, students take advantage of the many unique research resources in Washington, DC.
- Elective Seminar Course. Each student may optionally enroll in one elective upper division seminar course taught at UCDC. These courses vary each quarter from among offerings that typically include international relations, history, political science, public policy and other social sciences; the arts and humanities; and science policy. In addition to regular instruction, seminars often include guest speakers, observations of congressional committees and federal agencies, and other relevant Washington experiences.
Courses are taught by UCDC faculty appointed by the various UC campuses, or visiting faculty from the Washington area.
Financial aid eligibility and awards as determined by the home campus is maintained while enrolled in the program, and the aid package can be adjusted to reflect the additional costs of the program.
Summer Component ( 10 weeks). UCDC also offers a 10-week Summer Program with a credit or non-credit option. The credit option allows students to enroll in courses in addition to working at an internship. Students pay the summer sessions rate per credit hour plus an application fee. The noncredit option (internship only) has no enrollment fee

Both options allow students to participate in many educational, cultural, historical and social activities.

## University Graduation Requirements

- All prospective applicants should carefully plan their course programs in order to satisfy university, college, and major/minor requirements for their degree.
- Although units and grade points earned at UCDC are incorporated into the University transcript and GPA calculation, departments and programs retain the right to determine which UCDC courses will be accepted in satisfaction of major and minor requirements.
- All degree candidates must meet the University residence requirement. Students should consult with their college Dean's office early during the UCDC planning process for information on the university residence requirement, particularly students who intend to study abroad or participate in UCDC during their senior year.

Recognizing the special value of UCDC, the faculty has approved two exceptions to the usual residence requirement for students participating in the Washington Program:

- Students planning to graduate immediately upon completion of participation in UCDC may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus immediately preceding entry into UCDC.
- Students who have not finished all of their degree requirements following completion of their participation in the UCDC program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCDC, on the Davis campus within the final 90 units earned toward the degree.

Students who will not meet the residency requirements outlined may petition their Dean's office requesting an exception to policy.

- Students may satisfy GE requirements while at UCDC but should consult with their college Dean's office prior to departure for information on the certification process.
- Students with a large number of units may participate in the UCDC program provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time at UCDC. Participants may only return to campus from UCDC to complete any outstanding degree requirements provided that they can do so within the 225 unit restriction.

## Courses in UC Washington Center (WAS)

Optional elective courses listed at http://
www.ucdc.edu/academic/courses.

## Upper Division

175. Health Policy and Health Politics (4)

Seminar-3 hours; extensive writing or discussion1 hour. Restricted to students attending UC Washington Center program. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of model policies to address them. (Same course as Public Health Sciences 175W.) GE credit: SocSci, Wrt | ACGH, OL, SS, WE.

## 187. Gun Violence (4)

Lecture/discussion-4 hours. Gun violence, viewed from the perspectives of criminology and public health. Topics include personal and societal contributing factors and critical assessment of potential solutions. Offered in alternate years.

## 192. Internship in the UC Davis Washington Center Program (7)

Internship-28 hours. Prerequisite: junior or senior standing, admission in the UC Davis Washington Center undergraduate program, course 193 concurrently. Internship in Washington, DC with associated, supervised research project. (Same course as Political Science 192W.) (P/NP grading only.)
193. Washington Center Research Seminar (4)

Lecture/discussion - 1 hour; independent study - 3 hours; tutorial -0.5 hour. Prerequisite: course 192 concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as Political Science 193W.) GE credit: SocSci, Wrt | OL, SS, WE.

## University Honors Program

(formerly Honors Challenge and Integrated Studies Honors Program)
Ari Kelman, Ph.D., Program Director
Lolita Nelson-Adkins, Program Manager
Program Office. 1342 Surge III
530-752-9797; http://honors.ucdavis.edu/

## Faculty

Includes members from various departments across colleges.

## The Program of Study

The honors course of study is designed to enhance the undergraduate experience of highly motivated students in all academic pathways. The University Honors Program (UHP) is an interdisciplinary, cam-pus-wide honors program for top students interested in enhancing their education through special courses, close contact with faculty, and dynamic interaction with academic peers.
General Education Honors courses, seminars, and special study opportunities constitute the course offerings of the University Honors Program. First-year and second-year students in the UHP take six General Education honors courses during their first and second year. Upper division and transfer students complete a variety of research projects and service learning opportunities. All students who successfully complete the program receive transcript notation.
UHP courses and seminars are designed to foster critical thinking and analytic interpretation, improve oral, written and technical communication skills, enhance research skills, and provide experience with group dynamics and collaborative exploration of problems. Course enrollment is generally limited to 25 students.
Updated program information is available at the UHP website. A complete list of these courses, with course registration numbers, is made available to admitted students through the UHP office.
Only University Honors Program students may register for the courses in University Honors Program (HNR).

## Courses in Davis Honors Challenge (HNR)

## Lower Division

90X. Honors Discussion Section (1)
Discussion-1 hour. Prerequisite: open only to students in the Davis Honors Challenge. Examination of special topics in selected lower division courses through additional readings, discussions, term papers, collaborative work, or special activities,
including projects, field and laboratory experiences, computer simulations, creative works. May be repeated for credit.

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

## 94. Honors Seminar (4)

Seminar-4 hours. Open to students in the Davis Honors Challenge. Collaborative, multidisciplinary exploration of complex contemporary problem.
Focus on critical thinking and analytical interpretation, on oral and written communication, and on the use of electronic media in gathering information. May be repeated for credit. GE credit: Wrt | WE.I, II, III. (I, II, III.)

## 98. Directed Group Study (1-5)

Discussion-1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Independent study-1-5 hours. Prerequisite: student in the Davis Honors Challenge. (P/NP grading only.)

## Upper Division

## 190X. Honors Contract (1)

Independent study or discussion-3 hours. Prerequisite: open only to students in the Davis Honors Challenge. In-depth examination of material in an upper division course as defined in an Honors Contract Proposal submitted by the student. Contract must be approved by the instructor and the Honors Council of the Academic Senate. May be repeated for credit.

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated for credit for a total of 12 units. (P/NP grading only.)

## 194. Honors Seminar (3)

Seminar-3 hours. Open only to students in the Davis Honors Challenge. Team-based work on actual problems drawn from the public or private sector. Focus on critical thinking and analytical interpretation, oral and written communication skills, and development of practical solutions to real-world problems. GE credit: Wrt. - II, III. (II, III.)

## 195. Honors Thesis/Honors Project (1-3)

Independent Study-3-9 hours. Prerequisite: Open only to students in the Davis Honors Challenge. Guided independent study of a selected topic leading to the presentation of an honors thesis/honors project. May be repeated for credit up to 9 units.

## 198. Directed Group Study (1-5)

Discussion-1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Independent study-1-5 hours. Prerequisite: open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.)

## Courses in Integrated Studies (IST)

## Lower Division

## 8. Colloquium (1)

Discussion - 1 hour. Lectures, films, and readings on the interrelation between the arts and sciences. May be repeated for credit. (P/NP grading only.) -I. (I.)
8A. Special Topics in Natural Science and Mathematics (4)
Lecture-3 hours; discussion - 1 hour. Group study of a special topic in natural sciences and mathematics. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: SciEng, Wrt | SE, SL. - I, II, III. (I, II.)

## 8B. Special Topics in Humanities (4)

Lecture-3 hours; discussion - 1 hour. Group study of a special topic in humanities. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: ArtHum, Wrt | AH. - I, II, III. (II, II, III.)
8C. Special Topics in the Social Sciences (4)
Lecture-3 hours; discussion-1 hour. Group study of a special topic in social sciences. Course varies with topic offered. Limited enrollment. May be repeated for credit. GE credit: SocSci, Wrt \| SS. -I, II, III. (I, II, III.)

## 9. Seminar (1)

Lecture-1 hour. Preparation of a research report. Normally taken with course 8. May be repeated for credit. (P/NP grading only.) - I, II, III. (I, II, III.)

## 90. Seminar (1)

Seminar-1 hour. Prerequisite: course 9; consent of instructor; completion of 45 units with a minimum GPA of 3.250. Interrelation between the arts and sciences, focusing on a special topic. Limited to sophomores who participated in the Integrated Studies Honors Program during their freshman year and transfer students by consent of instructor. (P/NP grading only.) -1 . (I.)

## 94. Seminar (1)

Seminar-1 hour. Prerequisite: course 9, consent of instructor and completion of 45 units with a minimum GPA of 3.500 . Restricted to sophomores who participated in the Integrated Studies Honors Program during their freshman year and other students by consent of instructor. The nature of research at the undergraduate level. (P/NP grading only.)

## Upper Division

## 190. Topics in Integrated Studies (1)

Seminar-1 hour. Prerequisite: course 9. Discussion of the integration of the arts and sciences, focusing on a special topic. May be repeated three times for credit when topic differs. (P/NP grading only.)
194HA. Special Study for Honors Students (4)

Independent study -3 hours; seminar -1 hour. Prerequisite: course 9 , consent of instructor and completion of 90 units with a minimum GPA of 3.500 . A program of research culminating in the writing of a junior honors thesis under the direction of a faculty adviser. May be repeated one time for credit. (Deferred grading only, pending completion of sequence.) - I-II. (I-II.)

## 194HB. Special Study for Honors Students

 (4)Independent study-3 hours; seminar-1 hour. Prerequisite: course 9, consent of instructor and completion of 90 units with a minimum GPA of 3.500 . A program of research culminating in the writing of a junior honors thesis under the direction of a faculty adviser. May be repeated one time for credit. (Deferred grading only, pending completion of sequence.) - II. (II.)

## 197T. Tutoring in Integrated Studies (1-4)

Tutorial-1 hour. Prerequisite: consent of Director of Integrated Studies Honors Program. Tutoring in Integrated Studies courses, usually in small discussion groups. Weekly discussions with the instructor on the subject matter of the course being tutored and on the art and craft of teaching. May be repeated eight times for credit. (P/NP grading only.) -I, II, III. (I, II, III.)

## The Program

The University Writing Program (UWP) offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific disciplines, and writing in the professions. The Professional Writing Minor serves students from all majors who are planning careers as professional writers or editors, as well as those whose academic and professional careers demand advanced writing skills. The Program offers graduate courses in the teaching of writing and in composition theory, history, and research.

The Designated Emphasis in Writing, Rhetoric, and Composition Studies offers Ph.D. students in affiliated programs the opportunity to prepare for leadership roles in writing research, teaching, and program administration. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology of exemplary student writing, Prized Writing, and a journal for writing instructors, Writing on the Edge. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

## Minor Program Requirements:

UNITS

## Professional Writing .20

One course from each of the following four groups:
Group A: English 100NF, University Writing
Program 101, 102A, 102B, 102C, 102D,
102E, 102F, 102G, 102H, 102I, 102J,
102K, 102L, 102M
Group B: University Writing Program 104A, 104B, 104C, 104D, 104E, 104F, 104I,
104T, 110, $111 \mathrm{~A}, 111 \mathrm{~B}, 111 \mathrm{C}$
Group C: Anthropology 110, 120, Classics
110, Communication 101, 105, 152, Design
145, 149, English 105, English/Linguistics/
UWP 106, English/Science and Technology
Studies 164, History 101, Philosophy 137A,
137B, 137C, Technocultural Studies 191,
University Writing Program 100, 112A, 120, 121
Group D: University Writing Program 192 (or equivalent)
Additional units to achieve a total of 20 upper division units 4
One additional course from Groups A, B, or C above.
Note: At least twelve units must be from
University Writing Program courses.

## Courses in University Writing <br> Program (UWP)

## Lower Division

## 1. Expository Writing (4)

Lecture/discussion-4 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. GE credit: ArtHum, Wrt | AH, WE. -I, II, III, IV. (I, II, III, IV.)

## 1V. Expository Writing (4)

Web virtual lecture-2 hours; web electronic discus-sion-2 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open to students who have taken course 1 or 1Y. GE credit: ArtHum, Wrt \| AH,

## WE. -I, II, III, IV. (I, II, III, IV.)

## 1Y. Expository Writing (4)

Lecture/discussion-2 hours; web electronic discussion - 2 hours. Prerequisite: completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open to students who have taken course 1 or IV. GE credit: ArtHum, Wrt | AH, WE. -I, II, III, IV. (I, II, III, IV.)

## 10. Introduction to Professional Writing

## Studies (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or the equivalent. Introduction to writing as an object of study and to theories and research in the field. Survey of how writing is created, disseminated, and used in private, public, and academic contexts. GE credit: ArtHum | AH, WE.I. (I.)

## 11. Popular Science and Technology

 Writing (4)Lecture/discussion-3 hours; discussion-1 hour. Positioning of science and technology in society as reflected and constructed in popular texts. Topics include genre theory, demarcation, rhetorical figures, forms of qualitative and quantitative reasoning and the epistemic role of popularization in science. GE credit: ArtHum | AH, WE. - II. (II.)

## 18. Style in the Essay (4)

Lecture/discussion-4 hours. Prerequisite: course 1 or English 3 or the equivalent. Style, language, and structure in the essay. Analyzing style, developing a voice in writing, revising sentences, developing effective paragraphs and arguments, and writing with force and clarity. GE credit: ArtHum, Wrt \| AH, WE. -I, II, III. (I, II, III.)

## 19. Writing Research Papers (4)

Lecture/discussion-4 hours. Prerequisite: course 1 or English 3 or the equivalent. Critical reading, analysis, documentation, and writing research-based assignments. Formulation of research topics and development of effective arguments. Reading and writing assignments may focus on a single theme. GE credit: ArtHum, Wrt | AH, WE. - I, II. (I, II.)

## 21. Introduction to Reading and

 Composition for Non-Native Speakers (5) Lecture/discussion-5 hours. Prerequisite: admission by placement examination only. Provides undergraduate students whose native language is not English with intensive work in reading and in writing organized, coherent, and grammatically correct paragraphs and short academic essays. (P/NP grading only.) -1. (1.)
## 22. Intermediate Reading and Writing for Non-Native Speakers (4)

Lecture/discussion - 4 hours. Prerequisite: admission by placement examination, successful completion of course 21 , or by consent of instructor. Provides undergraduate students whose native language is not English with experience in writing essays in recognized rhetorical modes. Students will also read to develop fluency and critical thinking and will study grammar needed for academic writing. (P/NP grading only.) $-\mathrm{I}, \mathrm{II}$, III. (I, II, III.)
23. Advanced Reading and Composition for Non-Native Speakers (4)
Lecture/discussion - 4 hours. Prerequisite: admission by placement examination, successful completion of course 22, or by consent of instructor. Provides undergraduate students whose native language is not English with experience writing persuasive essays related to reading passages. Students will also read for tone, style, context, and assumptions and will study advanced grammar needed for persuasive essays. (P/NP grading only.) -I, II, III. (I, II, III.)

## 92. Internship in Writing (1-12)

Internship-3-36 hours. Prerequisite: course 1 or English 3. Internships in fields where students can practice their skills. May be repeated for credit for a total of 12 units. (P/NP grading only.)

## 98. Directed Group Study (1-5)

Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. May be repeated two times for credit. (P/NP grading only.) GE credit: AH, WE.
99. Special Study for Undergraduates (1-5)

Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. (P/NP grading only.) GE credit: AH, WE.

## Upper Division

100. Genre Theory and Professional

## Writing (4)

Lecture-3 hours; extensive writing or discussion - 1 hour. Prerequisite: course 1 or the equivalent; course 10. Introduction to discipline of professional writing. Examination of writing as a social practice, using genre theory as a conceptual framework. Analysis of how genres function rhetorically in specific contexts and how social systems both shape and are shaped by genres. GE credit: AH, WE. - II. (II.)

## 101. Advanced Composition (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Instruction in advanced principles of expository writing. Writing tasks within and beyond the University. Different writing modes, including narrative, analysis, explanation, argument, critique. GE credit: ArtHum, Wrt \| AH, WE.-I, II, III, IV. (I, II, III, IV.)

## 102A. Writing in the Disciplines: Special

 Topics (4)Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors or to students concurrently enrolled in an upper division course in a specific academic discipline or interdisciplinary field. Advanced instruction in writing in that discipline and practice in effective styles of communication. May be repeated one time for credit if taken in conjunction with a different subject-matter course. GE credit: ArtHum, Wrt | AH, WE.-I, II, III. (I, II, III.)

102B. Writing in the Disciplines: Biology (4) Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in a biological science or to students concurrently enrolled in an upper division biological science course. Advanced instruction in writing in biology. Not open for credit to students who have completed English 102B. GE credit: ArtHum, Wrt | AH, WE. - I, II, III. (I, II, III.)
102C. Writing in the Disciplines: History (4) Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in history or to students concurrently enrolled in an upper division course accepted for the history major.
Advanced instruction in writing in history. GE credit: ArtHum, Wrt | AH, WE.-II. (II.)
102D. Writing in the Disciplines:
International Relations (4)
Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in international relations or to students concurrently enrolled in an upper division course accepted for the major. Advanced instruction in writing in international rela tions. GE credit: ArtHum, Wrt | AH, WE.-II. (II.)
102E. Writing in the Disciplines:

## Engineering (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to upper division students in the College of Engineering and to students enrolled in an upper division engineering or computer science course for the major. Advanced instruction in writing in engineering. GE credit: ArtHum, Wrt | AH, WE. -I, II, III. (I, II, III.)

## 102F. Writing in the Disciplines: Food Science and Technology (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors in food science and technology and to students concurrently enrolled in an upper division course in food science and technology. Advanced instruction in writing in food science and technology. GE credit: ArtHum, Wrt | AH, WE. - III. (III.)

## 102G. Writing in the Disciplines:

## Environmental Writing (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to students with upper division coursework with an environmental focus. Advanced instruction in writing and practice in effective styles of communication in the fields of environmental study, policy, or advocacy. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt | AH, WE. - III. (III.)

102H. Writing in the Disciplines: Human Development and Psychology (4)
Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper division course in Human Development or Psychology. Advanced instruction in writing and practice in effective styles of communication in Human Development and Psychology. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt \| AH, WE.-I. (I.)

## 102I. Writing in the Disciplines: Ethnic

## Studies (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors in ethnic studies, or students with upper division coursework focusing on race and ethnicity. Advanced instruction in cross-disciplinary writing about race and ethnicity and practice in effective styles of communication. Not open for credit to students who have completed. GE credit: ArtHum, Wrt | AH, WE.-I. (I.)

## 102J. Writing in the Disciplines: Fine Arts

 (4)Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper division course in Art History, Art Studio, Design, Music, or Theater and Dance. Advanced instruction in writing about the arts and practice in effective styles of communication. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt | AH, WE. - I, III. (II, III.)

102K. Writing in the Disciplines: Sociology (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors in Sociology or to students concurrently enrolled in an upper division Sociology course. Advanced instruction in writing and practice in effective styles of communication in Sociology and related academic and professional fields. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt \| AH, WE. - III. (III.)

## 102L. Writing in the Disciplines: Film

 Studies (4)Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to majors and minors or to students concurrently enrolled in an upper division course in Film Studies, Technocultural Studies, English, American Studies, or any other upper division course that includes the analysis and understanding of film as a medium. Advanced instruction in writing about film and practice in effective styles of communication. Not open for credit to students who have completed course 102A in the same academic field. GE credit: ArtHum, Wrt \| AH, WE.-II. (II.)

## 102M. Writing in the Disciplines:

Community and Regional Development (4)
Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or the equivalent. Open to upper division Community and Regional Development majors and minors or upper division students concurrently enrolled in an upper division Community and Regional Development course. Advanced instruction in writing in the Community and Regional Development discipline and practice in effective styles of communication. GE credit: ArtHum | ACGH, AH, WE. - III. (III.)
104A. Writing in the Professions: Business Writing (4)
Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Effective communication in and for organizations, including businesses (corpo-
rations), government agencies, and non-profit organizations. Suitable for students entering careers that require substantial communications, such as management, public relations, and grant writing. GE credit: ArtHum | AH, WE.-I, II, III. (II, II, III.)
104B. Writing in the Professions: Law (4) Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced principles of critical thinking, argumentation, and style, with special emphasis on their application in the legal profession. Suitable for students planning careers in law, business, administration, or management. GE credit: ArtHum, Wrt | AH, WE. -I, II, III. (II, II, III.)

## 104C. Writing in the Professions:

## Journalism (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Non-fiction for magazines and newspapers, with attention to style and language. Emphasis on research, interviewing, market analysis, and query letters. GE credit: ArtHum, Wrt | AH, WE.-I, II, III. (I, II, III.)

## 104D. Writing in the Professions:

## Elementary and Secondary Education (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced expository writing in the contemporary American classroom. Strongly recommended for teaching credential candidates. GE credit: ArtHum, Wrt | AH, WE.-I, II, III. (I, II, III.)

104E. Writing in the Professions: Science (4) Lecture/discussion-3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing or enrollment in a graduate science curriculum. Writing abstracts, research proposals, scientific papers, other forms of scientific communication. Presenting data graphically. Primarily for students engaged in or planning careers in basic or applied research. GE credit: ArtHum,
Wrt | AH, WE. -I, II, III. (I, II, III.)
104F. Writing in the Professions: Health (4) Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Advanced expository writing common in the health professions, emphasizing effective communication between the writer and dif ferent audiences. Topics relate to health, disability, and disease. Suitable for students planning careers in professions such as medicine, dentistry, physical therapy, optometry. GE credit: ArtHum, Wrt | AH, WE. -I, II, III. (I, II, III.)

## 104I. Writing in the Professions: Internships

 (4)Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 1 or English 3 or the equivalent and upper division standing. Open to students concurrently enrolled in an internship and to Contemporary Leadership minors. Advanced instruction in writing in the workplace, including public and private sectors, government agencies, profit and non-profit organizations. Collaborative work and practice in effective styles of communication. Not open for credit to students who have completed course 102A. Offered irregularly. GE credit: ArtHum, Wrt | AH, WE. - III. (III.)

## 104T. Writing in the Professions: Technical Writing (4)

Lecture/discussion - 3 hours; extensive writing. Communicating effectively about technology and other technical subjects to varied audiences for varied purposes. Suitable for students entering professions that require communicating technical information to subject matter experts, managers, technicians, and non-specialists. Not open for credit to students who have taken course 104A prior to Fall 2012. GE credit: ArtHum | AH, WE.-I, II, III. (I, II, III.)

## 106. English Grammar (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or English 3 or Linguistics 1 or consent of instructor. Survey of present-day English grammar as
informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as English 106 and Linguistics 106.) GE credit: ArtHum | AH.

## 110. Specialized Genres in Professional

 Writing (4)Lecture/discussion-3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students who have satisfied the upper-division writing requirement. Counts toward the writing minor. Instruction in the elements and practices of professional writing in specialized genres. Offered irregularly. GE credit: ArtHum, Wrt | AH, WE.
111 A. Specialized Topics in Journalism (4) Lecture/discussion-3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism. Counts toward the writing minor. Instruction in the elements and practices of advanced journalism. May be repeated one time for credit if specialized journalism topic for each course differs. Offered irregularly. GE credit: ArtHum, Wrt | AH, WE.

## 111 B. Specialized Topics in Journalism: Investigative Journalism (4)

 Lecture/discussion - 3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism; counts toward the writing minor. Instruction in the elements and practices of in-depth investigative journalism. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WE. - (II.)
## 111 C. Specialized Topics in Journalism:

 Science Journalism (4)Lecture/discussion-3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students with a strong interest in journalism. Counts toward the writing minor. Instruction in the elements and practices of science journalism. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WE.-II.

## 112A. Introduction to Professional Editing

 (4)Lecture/discussion-3 hours; extensive writing. Prerequisite: satisfaction of the upper-division writing requirement. Restricted to upper-division students who have satisfied the upper-division writing requirement; counts toward the writing minor, Group C: Theory, History, and Design. Introduction to general editing practices and principles, with an emphasis on professional editing in organizational contexts, including academia and the workplace. Extensive practice in copy, comprehensive, and collaborative editing. Offered irregularly. GE credit: ArtHum, Wrt | AH, VL, WE.

## 121. History of Scientific Writing (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: upper division standing. History of scientific writing from the 17 th century to the present; origins and evolution of scientific genres; role of scientific writing in producing scientific knowledge; discursive differences between disciplines; emergence of English as a global language of science. Offered in alternate years. GE credit: ArtHum or SciEng | AH or SE, SL, WE. - (III.) Andersen, Perrault, Whithaus

## 192. Internship in Writing (1-12)

Internship-3-36 hours. Prerequisite: course 1 or English 3 or the equivalent. Internships in fields where students can practice their skills. May be repeated up to 12 units for credit. (P/NP grading only.) GE credit: AH.

## 197T. Tutoring in Writing (1-5)

Tutoring - 1-5 hours. Prerequisite: upper division standing; consent of instructor. Tutoring one-on-one or leading small voluntary discussion groups affiliated with a writing course. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit: AH.

## 197TC. Community Tutoring in Writing

 (1-4)Tutoring - 1-4 hours. Prerequisite: upper division standing; consent of instructor. Field experience, with individuals or in K-12 classroom instruction, focusing on reading- and writing-to-learn strategies in any subject area. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit: AH.

## 198. Directed Group Study (1-5)

Prerequisite: course 1 or English 3 or the equivalent; consent of instructor. May be repeated up to 10 units for credit. (P/NP grading only.) GE credit: AH, WE.
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH, WE.

## Graduate

250. Writing Assessment (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: graduate standing or consent of instructor Examines key testing and measurement concepts; the history of writing assessment; and relationships among writing tests and methods of teaching writing; the impacts of Information and Communication Technology (ICT), and how educational policies both drive and respond to writing assessments. Offered in alternate years. - (II.) Whithaus
255. Theory and Research in Response to Student Writing (4)
Discussion-3 hours; extensive writing: extensive writing or discussion; project. Restricted to graduate standing. Intensive focus on the critical topic of response or feedback to student writers. Coverage of philosophy, theory, and empirical research on teacher written feedback, teacher-student writing conferences, peer response, and error correction. Offered in alternate years. - II. (II.) Ferris

## 270. Literacy and Technology (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: graduate standing or consent of instructor. Examines how the physical qualities of texts offer different affordances during production and reception; grounds these discussions in the development of literacy practices and writing technologies from ancient to contemporary; creates frameworks for research into literacy, teaching, and textual technologies. Offered in alternate years. - (II.) Andersen, Whithaus
271. Second Language Writing (4)

Seminar-3 hours; extensive writing; project. Prereqvisite: graduate standing. Restricted to graduate standing. Traces the history of second language writing theory and research on second language writers in a variety of academic and professional contexts. Emphasis on writer characteristics, texts, and contexts. Offered irregularly. - II, III. (II, III.) Ferris
280. Journal Editing Workshop: Writing on the Edge (2)
Seminar-2 hours. Reading and critiquing manuscript submissions. Discussing relevant work in the field of writing studies. Applying principles of professional editing. Developmental editing, copy-editing, and typesetting of accepted manuscripts. Soliciting articles and communicating with contributors. Students encouraged to enroll both quarters. May be repeated for credit. (S/U grading only.) -I, II. (I, II.) Masiel
298. Directed Group Study (1-5)

Prerequisite: graduate standing; consent of instructor. (S/U grading only.)
299. Individual Study (1-12)

Prerequisite: consent of instructor; graduate stand-
ing. (S/U grading only.)

## Professional

390. Theory and Practice of Teaching University-Level Composition (4)
Seminar-3 hours; extensive writing. Open to gradvate students teaching course 1 in the fall quarter following this course. Examination of current theories and practices in teaching of writing. Practical appli-
cation to undergraduate writing courses. Emphasis on designing assignments and class sequences, and responding to student writing. Examination of impact of cultural, technological and theoretical changes on composition pedagogy. - II. (II.) Ferris
391. Teaching Expository Writing (2) Discussion-2 hours. Prerequisite: graduate standing, appointment as Teaching Assistant in the Composition Program; completion of course 390 or the equivalent. Discussion of problems related to teaching expository writing at the university level, with special emphasis on teaching reading and writing skills and responding to student papers. (S/U grading only.)-l. (I.)
392. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing; consent of instructor. May be repeated for credit. ( $S / U$ grading only.)-I, II, III. (I, II, III.)

## Urban Planning

## Departmental Courses <br> Anatomy, Physiology and Cell Biology (APC)

## Lower Division

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division standing; consent of instructor. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology \& Cell Biology. Internships are supervised by a member of the faculty. Offered irregularly. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

100. Comparative Vertebrate Organology (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite Biological Science 1 A and 1 B or 2 A and 2 B . Functional anatomy of major organ systems in verte-
brates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as Neurobiology, Physiology, and Behavior 123.)-II. (II.) Genetos

## 192. Internship (1-15)

Internship-3-45 hours. Prerequisite: upper division standing, approval of internship. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology and Cell Biology. Internships are supervised by a member of the faculty. May be repeated for credit if topic differs. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

286. Basics of Microscopy and Cellular Imaging (2)
Lecture-1 hour; laboratory-2 hours. Prerequisite: graduate standing. Practical applications of basic microscope techniques used to image cells and tissues with the goal of using these techniques to generate publication quality images. Principles of light, epifluorescent, confocal and electron microscopy, their applications and limitations. Restricted enrollment. Offered in alternate years. - III. Van Winkle

## 290. Seminar (1)

Seminar-1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (P/NP grading only.) -I, II, III. (I, II, III.)

## 291. Topics in Biology of Respiratory

 System (1)Seminar-1 hour. Prerequisite: graduate standing consent of instructor. Topics concerning structure and function of respiratory system. Possible topics include: lung growth, pulmonary reaction to toxicants, pulmonary inflammation, lung metabolism, biology of lung cells, tracheobronchial epithelium, nasal cavity structure and function. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.) Pinkerton, Wu
298. Group Study (1-5)

Laboratory-6-15 hours. Prerequisite: consent of instructor.
299. Research (1-12)

Laboratory-6-36 hours. Prerequisite: consent of instructor. (S/U grading only.)

Medicine and Epidemiology (VME) Upper Division
158. Infectious Disease in Ecology and Conservation (3)
Lecture-3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or Veterinary Medicine 409 or equivalent. Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and application to field data. Scientists' role in developing disease control policies. - II. (II.) Foley
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

201. Emerging Issues at the Interface of Ecosystem, Animal and Human Health (3) Lecture-1 hour; discussion-2 hours. Prerequisite: Active student status in MPVM, Master of Public Health programs or graduate groups in Epidemiology, Ecology, Public Health, Comparative Pathology, or consent of instructor. Restricted to 20 students. Principles of one health with emphasis on the rela tionships and interdependence of environmental, animal and human health. Exploration of critical data gaps needed to achieve sustainability in ecosystems and disease prevention. - II. (II.) Johnson

## 217. Evaluation and Application of

## Diagnostic Tests (2)

Lecture/discussion - 17 sessions; laboratory - 3 sessions. Prerequisite: introductory courses in probability (e.g., Preventive Veterinary Medicine 402 or Statistics 102) and epidemiology (e.g., Preventive Veterinary Medicine 405 or Epidemiology 205); a working knowledge of immunological principles beneficial but not essential to understanding technical material associated with diagnostic tests. Topics include sensitivity, specificity, predictive values, Bayes' Theorem, ROC analysis, measuring agreement between tests, series and parallel testing strategies. Emphasis on rational evaluation, interpretation and presentation of test results for individuals and aggregates. Offered in alternate years. - III.

## 225. Retroviral Pathogenesis Seminar/ Journal Club (1)

Discussion-1 hour. Prerequisite: graduate student status in the Comparative Pathology, Microbiology or Immunology graduate groups. Participatory seminar addressing the mechanisms of retroviral pathogenesis in a journal club format. Focus on the review of current scientific journal papers concerning viral pathogenesis, immunology and virology with a special focus on retroviruses. May be repeated 12 times for credit. (S/U grading only.) -I, II, III. (I, II, III.) George, Sparger

## 258. Infectious Disease in Ecology and

 Conservation (1)Discussion-2 hours. Prerequisite: course 158 (must be taken concurrently). Presentation, analysis and discussion of primary literature on the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Multidisciplinary approach combines perspectives of ecology and veterinary medicine. (S/U grading only.) - II. (II.) Foley
298. Group Study (1-5)

Prerequisite: student in School of Veterinary Medicine or consent of instructor. Group study in selected areas of the clinical sciences. ( $S / U$ grading only.)
299. Research (1-12)
(S/U grading only.)

## Molecular Biosciences (VMB)

## Lower Division

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)

## 101 Y. Principles of Pharmacology and Toxicology (3)

Laboratory/discussion - 1.5 hours; web virtual lec-ture- 1.5 hours; web electronic discussion-0.5 hour; autotutorial -5 hours. Prerequisite: upper division standing in a science major; Chemistry through organic chemistry and general biology, or consent from instructor; good standing with university; computing capability using MS Word, Excel, and PowerPoint, menu driven software programs, SmartSite; computer, or ready access to a computer, with broadband Internet access. Restricted to upper division undergraduate students in good standing with school and fulfill course prerequisites. Hybrid course provides training in core concepts of pharmacological and toxicological sciences. Develop higher-order problem solving and critical thinking skills. GE credit: OL, SE, SL. -III. (III). Puschne

## Upper Division

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Molecular Biosciences. Internships supervised by a member of the faculty. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

234. Current Topics in Neurotoxicology (3) Lecture-3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as Environmental Toxicology 234 and Molecular, Cellular, and Integrative Physiology 234.) - III. (III.) Lein
235. Metabolism of Toxicants and Drugs (2) Lecture-2 hours. Prerequisite: Pharmacology and Toxicology 201, 202, 203, general biochemistry or consent of instructor. Significance/chemical pathways of toxicants and drug metabolism, enzymology and molecular aspects of P450 and flavin monooxygenases, hydrolases and phase 2 transferases and experimental approaches for metabolism studies. Offered in alternate years. - II.

## 254. Toxicology of the Respiratory System

 (3)Lecture -3 hours; discussion. Prerequisite: Pharmacology and Toxicology 201, 202, 203, or consent of instructor. Survey of structure and function of the respiratory system, the pathophysiology of major lung diseases, the interactions of toxicants with the lung and response of this organ to injury. Offered in alternate years. - (II.) Pinkerton

## 255. Pharmacokinetics and

## Biopharmaceuticals (2)

Lecture -16 sessions; discussion -4 sessions. Indepth study of pharmacokinetics, including the fundamentals of pharmacokinetics, how to design a
pharmacokinetic study and how to use both compartmental and non-compartmental analysis to interpret the data. Offered in alternate years.-II. Knych

## 290. Seminar (1)

Seminar-1 hour. Prerequisite: graduate standing and consent of instructor Topics in nutrition, pharmacology/toxicology, and biochemistry. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
297T. Tutoring in Graduate Molecular Biosciences (1-5)
Prerequisite: graduate or professional student standing and consent of instructor. Assist in preparation and teaching of courses in Nutrition, Pharmacology and Toxicology, or other courses offered by the department under direct supervision of the instructor. Designed for graduate or professional students who desire teaching experience in graduate courses. May be repeated up to 5 units of credit. ( $\mathrm{S} / \mathrm{U}$ grading only.)-I, II, III. (I, II, III.)
298. Group Study (1-5)
(S/U grading only.)
299. Research (1-12)
(S/U grading only.)

## Professional

397T. Tutoring in Molecular Biosciences

## (1-5)

Discussion - 1-5 hours. Prerequisite: graduate or professional standing and consent of instructor. Experience in professional curriculum for graduate or professional students, not teaching assistants, under direct supervision of instructor. May be repeated up to 5 units of credit ( $\mathrm{S} / \mathrm{U}$ grading only.) -I , II, III. (II, II, III.).

## Pathology, Microbiology, and Immunology (PMI)

## Lower Division

99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

126. Fundamentals of Immunology (3) Lecture-3 hours. Prerequisite: Biological Sciences 102 or the equivalent or consent of instructor. Overview of immunology including components of the immune system, initiation and regulation of the immune response, infection and immunity, hypersensitivity and immune dysfunction. Clinical immunologic techniques, immunodeficiency and vaccinology.-II. (II.) Stott

## 126L. Immunology Laboratory (2)

Laboratory-6 hours. Prerequisite: course 126 or the equivalent (may be taken concurrently). Laboratory procedures in clinical immunology. Cells of the innate and adaptive systems. Quantitative and qualitative characterization of the immune response.-II. (II.) Stott
127. Medical Bacteria and Fungi (5)

Lecture-3 hours; laboratory-5 hours. Prerequisite: general microbiology (Microbiology 102 and 102L), basic immunology (course 126 or Medical Microbiology 188). An introduction to the bacterial and mycotic pathogens of man and animals, with emphasis on pathogenic mechanisms and ecologic aspects of infectious disease.-III. (III.) LeFebvre

## 128. Biology of Animal Viruses (3)

Lecture-3 hours. Prerequisite: Biological Sciences 102. Fundamental physical and chemical properties of animal viruses; methods of propagation, purification and assay. Mechanisms of viral replication and pathogenesis of viral infections in man and animals. Immunity to virus diseases and oncogenic properties of animal viruses. Two units of credit to students who have completed Microbiology 162. - III. (III.) Miller

129Y. One Health: Human, Animal \& Environment Interfaces (3)
Lecture/discussion-3 hours; web electronic discussion. Class size limited to upper division undergraduate students in good standing with the school and who fulfill the course prerequisites below. Enrollment limited to 100 students/term. Introduction to fundamentals, challenges, and opportunities in One
Health using local and global health case studies. Animal, human, and environmental health problems, along with tools and transdisciplinary approaches, will be introduced to foster innovative thinking that addresses complex issues. GE credit: SciEng or SocSci | OL, SE or SS, SL. - III. (III.) Miller, Papageorgiou
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced

Undergraduates (1-5)

## (P/NP grading only.)

## Graduate

201. Integrative Pathobiology Core I (5)

Lecture-3 hours; discussion-2 hours. Overview of molecular biology techniques, tissue structure and function, cell membrane pathology and cellular mechanisms of disease including cellular responses and adaptations to stress, cell cycle, cell death, cell biomechanics, vascular disturbances, and mechanisms of neoplasia and tumorigenesis. - II. (II.)
202. Integrative Pathobiology Core II (4) Lecture-2 hours; discussion-2 hours. The second required core course in the graduate group with topics in inflammation, host-pathogen interaction, regenerative medicine, integrative pathology and population and ecosystem health. - III. (III.) Foley

## 203. Experimental Design and Data

## Analysis in Pathobiology (2)

Lecture-1 hours; lecture/laboratory - 2 hours. Follows two required core courses in, courses 201 and 202, for Ph.D. and M.S. students. Goal is to bridge gap between statistics and real-world pathobiology to increase students' skills and independence in experiment design and data analysis.-I. (I.)

## 214. Vector-borne Infectious Diseases:

 Changing Patterns (2)Lecture/discussion-2 hours. Prerequisite: graduate student standing (PhD or MS). Restricted to 10 students. Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. Prerequisite: consent of instructor. ( $S / \cup$ grading

## only).-l. (I.) Lanzaro

## 221. Topics in Virus Research (1)

Discussion-1 hour. Prerequisite: graduate student standing (PhD or MS). Restricted to 10 students. Dis-cussion-based seminar covering graduate student virology research. Informal presentations and discussion of technical problems in research design and experimentation are encouraged. Current stage of the research project is not important. ( $S / \mathrm{U}$ grading only.) -l. (I.) Murphy
270. Advanced Immunology (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: Introductory course in immunology. Graduate student status in the Comparative Pathology Graduate Group. All other students will require consent of instructor. Current concepts of immunology with an emphasis on interactions between the host, the environment and the pathogen. These interactions will include those that are protective and successful for the host as well as those that are deleterious - II. (II.) Stott
290. Seminar (1)

Seminar-1 hour. Prerequisite: graduate level standing. Topics in pathology, microbiology or immunology. May be repeated for credit. (S/U grading only.) I, II, III, IV. (II, II, III, IV.)

291A. Seminar in Immunology (1)
Seminar-1 hour. Prerequisite: course 126 or the equivalent. Students choose topic for each quarter. Individual or pairs of students choose a paper for all to read and present a seminar based on the subject of the paper. All students participate in discussion. May be repeated for credit. (S/U grading only.)-I, III. (I, III.) Gershwin

## 293A. Seminar in Infectious Diseases (1)

Seminar-1 hour. Prerequisite: current enrollment in health science professional school or graduate standing in biological sciences. Discussion of current topics and cases of infectious diseases. May be repeated one time for credit if topic differs. ( $S / U$ grading only.) $-I$, II, III. (I, II, III.) Byrne

## 298. Group Study (1-5)

Prerequisite: consent of instructor.
(S/U grading only.)

## 299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Population Health and

Reproduction (PHR)

## Lower Division

## 92. Internship in Veterinary Science (1-4)

Discussion/laboratory-1-4 hours; clinic-3-36 hours; final report. Prerequisite: approval of project prior to period of internship by faculty sponsor. Supervised work experience in reproduction. (P/NP grading only.)-I, II, III. (I, II, III.)

## Upper Division

106. Human-Animal Interactions: Benefits and Issues (2)
Lecture- 18 sessions; fieldwork -1 session. Prereqvisite: upper division standing or consent of instructor. The contributions of animals to human society, including historic, anthropologic, developmental, human health and therapeutic perspectives, as well as effects of humans on animals. One field trip required. - II. (II.) Hart
107. Internship in Veterinary Science (1-12) Discussion/laboratory-1-12 hours; clinic-3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in Reproduction. May be repeated for credit. (P/NP grading only.)
108. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

## Undergraduates (1-5)

(P/NP grading only.)

## Graduate

202. Sampling in Health-Related Research (3)

Lecture-3 hours. Prerequisite: Preventive Veterinary Medicine 403 or the equivalent; consent of instructor. A very thorough coverage of simple random sampling, stratified sampling, cluster sampling, systematic sampling and other sampling methods applied extensively in epidemiology and other health-related disciplines. Emphasis on application of the sampling methods. Offered in alternate years. - II. Farver

## 203. Multivariate Biostatistics (3)

Lecture-3 hours. Prerequisite: Preventive Veterinary Medicine 403 and 404, or the equivalent; consent of instructor. Multivariate procedures covered are principal component analysis, factor analysis, Twogroup and k-group multivariate ANOVA, multivariate regression, Two-group and k-group discriminant analysis and repeated measures analysis, cluster analysis, and canonical analysis. Emphasis is on application of procedures. Offered in alternate years. - (II.) Farver

## 210. Epidemiological Approaches to

 Waterborne Zoonotic Pathogens (1) Lecture-1 hour. Waterborne zoonotic diseases remain a significant cause of human illness. Review key waterborne pathogens; their biology, fate and transport in aquatic systems; on-farm management practices for reducing microbial contamination of California's fresh and marine aquatic resources from livestock production systems. ( $S / U$ grading only.)II. (II.) Atwill212. Epidemiology of the Zoonoses (4) Lecture -35 sessions; discussion -5 sessions. Prerequisite: graduate standing or third-year standing in the School of Veterinary Medicine or consent of instructor. Epidemiological, biological and ecological features of some major infections shared by humans and other animals. Wildlife and domestic animals zoonoses of major health and economic significance are presented to illustrate how knowledge of zoonoses epidemiology is essential for implementing control measures. - II. (II.) Chomel

## 241 . Advanced Topics in Canine Genetics and Genomics (2)

Discussion-2 hours. Prerequisite: Genetics 201A, 201C (or equivalents, with consent of instructor). Indepth study of topics in canine genomics and genetics. Topics will vary annually, but can include positional cloning, whole genome association, complex traits and linkage disequilibrium. Students will lead discussions on assigned readings. May be repeated for credit when topic differs. Limited enrollment.
Offered in alternate years. - (III.) Bannasch

## 242. Ecological Genetics: Applied Genetics

 for Ecology, Health, and Conservation of Natural Populations (3)Lecture-2 hours; discussion-0.5 hours; laboratory -0.5 hours. Prerequisite: undergraduate genetics and ecology/conservation biology courses recommended. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. Limited enrollment. (Same course as Ecology 242.)-I. (I.) Ernest

## 243. Advanced Topics in Conservation Genetics (2)

Discussion-18 sessions; lecture-2 sessions. Prerequisite: undergraduate genetics and ecology or consent of instructor. Restricted to 16 students. Indepth study of topics related to the application of genetic tools to wildlife conservation. Topics will vary annually, but may include use of non-invasive methods of genetic assessment and monitoring of wildlife populations. Students will lead discussions on assigned readings. (S/U grading only.) -I. (I.) Sacks

## 251 . Food and Water Borne Safety (2)

Lecture/discussion-2 hours. Prerequisite: MPVM or graduate student standing. Direct experience with food and water borne diseases. Topics will cover bacteria, parasites, and toxins from environmental and animal sources that impact food and water safety at the interface of livestock health and the food chain. - III. (III.) Weimer

## 266. Applied Analytic Epidemiology (3)

 Lecture-2 hours; laboratory-2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as Master of Public Health 266.) - III. (III.) Kass
## 277. Mathematical Models in Epidemiology

 (3)Lecture/discussion-2 hours; laboratory-2 hours. Prerequisite: Preventive Veterinary Medicine 403 and Epidemiology 405; consent of instructor; although not required, students are encouraged to refresh their knowledge of high school calculus and differential equations. Class size limited to 30 students. Theory of epidemics and mathematical modeling concepts for infectious diseases to include
discrete and continuous time models, their use to explore disease dynamics and investigate prevention and control strategies for human and veterinary infectious diseases. (Same course as Epidemiology 277.) - III. (III.) Aly
298. Group Study (1-5)

Prerequisite: consent of instructor.
299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Surgical and Radiological Sciences (VSR)

## Lower Division

99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)
299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Viticulture and Enology

(College of Agricultural and Environmental Sciences) David E. Block, Ph.D., Chairperson of the Department
Department Office. 1162 RMI North Building 530-752-0380; http://wineserver.ucdavis.edu

## Faculty

Douglas O. Adams, Ph.D., Professor
Linda F. Bisson, Ph.D., Professor
David E. Block, Ph.D., Professor
(Viticulture and Enology, Chemical Engineering) Academic Senate Distinguished Teaching Award Roger B. Boulton, Ph.D., Professor
(Viticulture and Enology, Chemical Engineering) Dario Cantu, Ph.D., Assistant Professor
Susan E. Ebeler, Ph.D., Professor
Hildegarde Heymann, Ph.D., Professor
Mark A. Matthews, Ph.D., Professor
David A. Mills, Ph.D., Professor
David R. Smart, Ph.D., Associate Professor
M. Andrew Walker, Ph.D., Professor

Andrew L. Waterhouse, Ph.D., Professor
Larry E. Williams, Ph.D., Professor

## Emeriti Faculty

L. Peter Christensen, Specialist in Cooperative Extension, Emeritus
W. Mark Kliewer, Ph.D., Professor Emeritus

Lloyd A. Lider, Ph.D., Professor Emeritus
Carole P. Meredith, Ph.D., Professor Emerita
Ann C. Noble, Ph.D., Professor Emerita
Cornelius S. Ough, D.Sc., Professor Emeritus
Vernon L. Singleton, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award James A. Wolpert, Ph.D., Specialist in Cooperative Extension, Emeritus

## Affiliated Faculty

Matthew W. Fidelibus, Ph.D., Associate Specialist in Cooperative Extension
James T. Lapsley, Ph.D., Research Associate Andrew J. McElrone, Ph.D., Assistant Adjunct Professor

Anita Oberholster, Ph.D., Assistant Specialist in Cooperative Extension
Kerri L. Steenwerth, Ph.D., Assistant Adjunct Professor

## The Major Program

The Viticulture and Enology major provides an interdisciplinary education in the biological and physical principles underlying grape and wine production as well as practical knowledge of grape growing (viticulture) and wine making (enology). This program provides the knowledge base for problem-solving and decision-making in commercial grape and wine production.
Preparatory Requirements. Before transferring into the Viticulture and Enology major, students must complete the following courses with a grade of $C$ - or better and with a combined grade point average of at least 2.500 at the University of California (at least 3.000 for similar courses taken at community college) for these and all other preparatory courses. In addition, students' overall UC GPA must be 2.250 or higher. All courses must be taken for a letter grade.

## UNITS

Biological Sciences 1A or 2A ............... 4-5

| Chemistry 2A, 2B, 2C, $8 \mathrm{~A} \ldots \ldots \ldots \ldots \ldots . . . . . . . . . . . . . ~$ |
| :--- | :--- |

Mathematics 16A.................................. 3
Physics 1A, 1B or 7A........................... 4-6
Recommendations. Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into required upper division courses and may thus delay graduation. Some courses may be available at UC Davis during Summer Session:

UNITS
Chemistry 8B
. .4
Mathematics 16B .................................... 3
Biological Sciences 1C or Plant
Sciences 2 4-5
Biological Sciences 102. . 3
The Program. The curriculum builds upon a foundation of biology, chemistry, biochemistry and mathematics with specialized courses related to grape and wine production. To complete the program, students may choose to place particular emphasis on viticulture, enology or economics. Credit may also be earned for foreign language study and internships.
Career Alternatives. Graduates are qualified for a variety of vineyard and winery positions, including production management, quality control and research. Additionally they may work in related fields such as pest management, nursery production and analytical services.

## B.S. Major Requirements:

Preparatory Subject Matter ............. 44-5 1
Biological Sciences 1A or 2A and 1C or Plant
Sciences 2........................................ 8-10
Chemistry 2A-2B-2C
.15
Chemistry 8A, 8B. 15
Plant Sciences 21 or equivalent and adviser approval

0-3
Mathematics 16A-16B ............................. 6
Physics 1A, 1B or 7A..
.6
Viticulture and Enology 2, 3 ......................... 5
Depth Subject Matter ......................... 48-5
Biological Sciences 102, 103 or 105 .... 3-6
Microbiology 102, 102L or 101.......... 5-7
Plant Sciences 120 or Statistics 106......... 4
Viticulture and Enology 101A, 101B, 101C,
110, 118 ............................................ 15
Viticulture and Enology $123,124,125,126$,
128, 135 and in consultation with the adviser, choose 3 of the following courses: 123L, 124L, 125L, 126L, 128L. If more than 3 are taken, the extra courses will count as restricted electives in Area B. 21-22

## Restricted Electives

28
In consultation with adviser, choose 28 units from three of the following five areas. At least 12 units must be from one of the following areas: (A) Plant Science, (B) Food Science
and Microbiology, or (C) Economics and Business.
(A) Plant Science area: Applied Biological Systems Technology 142, 145, 147, 175, 180, Atmospheric Science 133, Biological Sciences 101, Biotechnology 160,
Entomology 110, Hydrologic Science 110,
124, Molecular and Cellular Biology 126, Nematology 100, Plant Biology 111, 112,
123, 143, 172, 172L, Plant Pathology
120, Plant Sciences 142, 146, 154, 157,
158, 171, 176, Soil Science 100, 102,
109, 118, Viticulture and Enology 111.
(B) Food Science and Microbiology area:

Biological Sciences 101, Food Science and Technology 102A, 102B, 104, 104L, 108,
109, 110A, $110 \mathrm{~B}, 127$, Microbiology
140, 150, 155L, Viticulture and Enology 140.
(C) Economics and Business area:

Agricultural and Resource Economics
100A, 112, 113, $118,130,140,150$,
Economics 1A, 1B, Management 11A,
11B, Viticulture and Enology 111, 130
(D) Language area: Maximum 12 units, not counting course 1, of one of the following languages: French, German, Italian,
Portuguese or Spanish. At least one course must be Intermediate or Conversational; qualifying Intermediate or Conversational courses are listed below:
French 8, 21, 22, 23, 38, German 6, 11 ,
20, 21,22 , Italian 4, 5, Spanish 8, 21 ,
22, 28, 31, 32, 33.
Courses taught in English will not count as restricted electives in this major.
(E) Internship area: A maximum of eight
units of Viticulture and Enology 190X, 192,
198, 199, 290 or 298 may be counted as restricted electives by prior arrangement
with adviser. May be increased to 12 units
in exceptional circumstances.
Total Units for the Major ..
120-133

## Major Adviser. M. Matthews

Related Major Programs. Food Science and Technology, and Plant Sciences.
Graduate Study. Several graduate groups offer programs of study leading to advanced degrees in the fields of viticulture and enology. For the M.S. or Ph.D. degree, see Agricultural and Environmental Chemistry (A Graduate Group), on page 141, Engineering: Chemical Engineering and Materials Science, on page 255, Ecology (A Graduate Group), on page 229, Food Science (A Graduate Group), on page 313, Integrative Genetics and Genomics (A Graduate Group), on page 352, Horticulture and Agronomy (A Graduate Group), on page 342, Microbiology (A Graduate Group), on page 425, Plant Biology (A Graduate Group), on page 473, Plant Pathology, on page 474, Soils and Biogeochemistry (A Graduate Group), on page 510, and Viticulture and Enology (A Graduate Group), on page 544.

## Courses in Viticulture and Enology (VEN) <br> Lower Division <br> 2. Introduction to Viticulture (2)

Lecture-2 hours. Fundamental principles of biology and culture of the grapevine including taxonomy, morphology, physiology, distribution, domestication, utilization, propagation, production systems, harvesting, and storage and processing of grapes. Successful completion of the course should prepare students for upper division courses in viticulture. GE credit: SE.-l. (I.) Cantu

## 3. Introduction to Winemaking (3)

Lecture-3 hours. Overview of the history of wine, viticulture, fermentation, winery operations, the physiology of wine consumption, wines produced in Cali-
fornia and other major wine-producing regions and the sensory evaluation of wine. GE credit: SE, SS. I, II, III. (I, II, III.) Heymann, Waterhouse, Adams

## 90X. Lower Division Seminar (2)

Seminar-1 hour; term paper (required)/discussion. Prerequisite: lower division standing and consent of instructor. Introduction to current issues surrounding wine and health as they relate to diet, nutrition, and toxicology. May not be repeated for credit. GE

## credit: Wrt.

99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

## 101A. Viticultural Practices (3)

Lecture-1.5 hours; discussion/laboratory-3.5
hours. Prerequisite: course 2. Identification, cultivation, and use of the major wine, table, raisin, and rootstock cultivars. Includes practices specific to the fall such as fruit contracts, maturity sampling, harvesting, cover crops, and soil-pests. One field trip required. GE credit: SE.-I. (I.) Walker
101B. Viticultural Practices (3)
Lecture- 1.5 hours; discussion/laboratory-3.5 hours. Prerequisite: course 2. Theory, principles, and practices of pruning and grapevine propagation. Plant materials and the certification process, weed control and weed identification, wood diseases, and frost protection. One field trip required. GE credit:

## SE. - II. (II.) Walker

101C. Viticultural Practices (3)
Lecture- 1.5 hours; discussion/laboratory-3.5 hours. Prerequisite: course 2. Field oriented experience in the principles and practices of grapevine production, including vineyard establishment, vine training, trellising, canopy management practices, irrigation and water management, and methods of crop adjustment for improvement of fruit quality. One field trip required. GE credit: SciEng | SE. - III. (III.) Smart
110. Grapevine Growth and Physiology (3) Lecture-3 hours. Prerequisite: course 2. Botanical aspects including morphology and domestication will precede lectures covering flower development and energy budget concepts. Impact of physiological variables such as photosynthesis translocation, mineral nutrition, and water relations on fruit ripening and composition will be covered. GE credit: SciEng | SE.—II. (II.) Matthews

## 111 . World Viticulture (3)

Lecture-3 hours. Prerequisite: upper division standing. Study of the diversity of viticulture, both geographical and historical. History of grape growing and its spread throughout the world will be covered, along with discussions of current viticultural practices in different parts of the world, including California. GE credit: SciEng | OL, SE, WE.

## 111 L. Critical Evaluation of Wines of the <br> World (1)

Laboratory/discussion-3 hours. Prerequisite: course 111 (must be taken concurrently), course 125 with a grade of $C$ or better. Critical analysis of wines produced in different parts of the world with emphasis on the relationship between sensory properties of the wines and factors associated with their place of origin. (P/NP grading only.) GE credit: SE.
115. Raisin and Table Grape Production (2) Lecture-2 hours. Prerequisite: course 2. Overview of the raisin and table grape industries in California and other production areas of the world. Cultural practices associated with raisin and table grape production will also be discussed. GE credit:
SciEng | SE.

## 118. Grapevine Pests, Diseases and

## Disorders (3)

Lecture-3 hours. Prerequisite: course 2. Various pests and diseases of vineyards throughout California. Pest/disease identification and control methods (to include sampling techniques) also will be discussed. Integrated management approach to pest control methods will be emphasized. GE credit: SciEng | SE.-I. (I.) Cantu
123. Analysis of Musts and Wines (2)

Lecture-2 hours. Prerequisite: Chemistry 2C and 8B or equivalent; Agricultural Management and Rangeland Resources 21 or equivalent. Students enrolled in the lecture only portion of the course will be required to enroll in 1 unit of course 199/299. Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. GE credit: SciEng | SE.-I. (I.) Waterhouse

## 123L. Analysis of Musts \& Wines

Laboratory (2)
Lab-3 hours; independent study - 3 hours. Prereqvisite: Chemistry 2C and 8B, or equivalent, Agricultural Management and Rangeland Resources 21, and course 123 (course 123 may be taken concurrently). Fundamental principles of analytical chemistry as they relate to specific methods used in winemaking. Laboratory exercises demonstrating various chemical, physical and biochemical methods. Data will be analyzed and results interpreted in weekly lab reports; includes student-designed independent project and written report. Enrollment restricted to upper division and graduate students in Viticulture \& Enology; others by approval of instructor. GE credit: SciEng, Wrt | QL, SE, VL, WE. -I. (I.) Waterhouse

## 124. Wine Production (2)

Lecture-2 hours. Prerequisite: course 3, 123 (may be taken concurrently), Biological Sciences 102. Principles and practices of making standard types of wines, with special reference to grape varieties used and methods of vinification. SciEng | GE credit: SE, WE.-I. (I.) Bisson

## 124L. Wine Production Laboratory (3)

 Laboratory-3 hours; independent study -3 hours; term paper. Prerequisite: course 124 (may be taken concurrently). Restricted to undergraduate students in fermentation science, viticulture and enology, biotechnology, microbiology, food science and applied plant biology or graduate students in food science, agricultural and environmental chemistry and horticulture. Current technologies used in production of California table wines; analysis and monitoring of impact of fermentation variables on microbial performance and product quality; student-designed independent research project. GE credit: SciEng | OL, SE, WE.-I. (I.) Bisson
## 125. Wine Types and Sensory Evaluation (2)

Lecture-2 hours. Prerequisite: course 124; Plant Sciences 120 or Statistics 106. Open to upper division and graduate students in Viticulture \& Enology; others by approval of instructor. Principles of sensory evaluation and application to wines. Factors influencing wine flavor, data from sensory analysis of model solutions. GE credit: SciEng | QL, SE. - III. (III.) Heymann

## 125L. Sensory Evaluation of Wine

## Laboratory (2)

Laboratory - 3 hours; term paper. Prerequisite: course 125 (may be taken concurrently). Restricted to upper division majors in fermentation science or viticulture and enology or graduate students in food science. Sensory evaluation of wines and model systems using discrimination tests, ranking, descriptive analysis and time-intensity analysis. Data analyzed by appropriate statistical tests and results interpreted in extensive weekly lab reports. GE credit:
SciEng | QL, SE, VL, WE. - III. (III.) Heymann

## 126. Wine Stability (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: course 124. Restricted to students in viticulture and enology, fermentation science, applied plant biology majors, or graduate students in food science, microbiology, horticulture, and horticulture and agronomy. Principles of equilibria and rates of physical and chemical reactions in wines; treatment of unstable components in wines by absorption, ion exchange, refrigeration, filtration, and membrane processes; and protein, polysaccharide, tartrate, oxidative, and color stabilities. GE credit: SciEng | SE. - II. (II.) Boulton

126L. Wine Stability Laboratory (2)
Laboratory -3 hours; independent study -3 hours. Prerequisite: course 126 (may be taken concurrently). Restricted to upper division fermentation science, viticulture and enology majors, or graduate students in food science, agricultural and environmental chemistry, microbiology or by consent of instructor. Practical application of principles of equilibria and rates of physical and chemical reactions to wine stability. GE credit: SciEng | SE, WE. - II. (II.) Boulton

## 128. Wine Microbiology (2)

Lecture-2 hours. Prerequisite: courses 123 and 124; Microbiology 102 and 102L, or Food Science and Technology 104 and 104L; courses 125 and 126 recommended. Nature, development, physiology, biochemistry, and control of yeasts and bacteria involved in the making, aging and spoilage of wine. GE credit: SciEng | SE.-II. (II.) Mills
128L. Wine Microbiology Laboratory (2)
Laboratory-6 hours. Prerequisite: course 123, 124, and 128 (may be taken concurrently), Microbiology 102L or Food Science and Technology 104 and 104L; course 125 and 126 recommended. Restricted to upper division students in fermentation science, viticulture and enology or graduate students in food science. Nature, development, physiology, biochemistry and control of yeasts and bacteria involved in the making, aging and spoilage of wine. GE credit: SciEng | SE, VL, WE.-II. (II.) Mills
135. Wine Technology and Winery Systems (5)

Lecture-3 hours; discussion/laboratory-2 hours. Prerequisite: course 124. Process technologies and process systems that are used in modern commercial wineries. Lectures, demonstrations, problem solving sessions, and possible field trips. Includes grape preparation and fermentation equipment; post-fermentation processing equipment; winery utilities, cleaning systems, and waste treatment. GE credit: SciEng | SE. - III. (III.) Block

## 140. Distilled Beverage Technology (3)

Lecture-3 hours. Prerequisite: Chemistry 8B; Food Science and Technology 110A. Distillation principles and practices; production technology of brandy, whiskey, rum, vodka, gin, and other distilled beverages; characteristics of raw materials, fermentation, distillation, and aging. Offered in alternate years. GE credit: SciEng | QL, SE. - (III.) Boulton

## 181. Readings in Enology (1)

Discussion-1 hour. Prerequisite: course 3. Critical evaluation of selected monographs in enology. Discussion leadership rotates among the students. May be repeated three times for credit. (P/NP grading only.) GE credit: SE. - III. (III.) Matthews

## 190X. Winemaking Seminar (1)

Seminar-1 hour; discussion-1 hour. Prerequisite: course 3. Open to Viticulture and Enology majors and graduate students. Outside speakers on a specific winemaking topic chosen for the quarter. Discussion with the speaker hosted by the faculty member(s) in charge. May be repeated for credit up to 3 times. (P/NP grading only.) GE credit: SE. - III. (III.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a member of the department or major faculty, but are arranged by the student. (P/NP grading only.) GE credit: SE.
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.) GE credit: SE.

## Graduate

200. Introduction to Scientific Methods (2) Lecture/discussion - 1 hour; term paper. Prerequisite: graduate standing or consent of instructor. Processes involved in conducting scientific research. Topics include conducing literature review, formulat-
ing hypotheses, and analyzing and reporting results. Annotated bibliography and written and oral research proposal.
201. Grape Development and Composition (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 102 and 103, or 105. Anatomy, physiology and biochemistry of grape berry development, with emphasis on the development of grape composition relevant to winemaking. Offered in alternate years. - III. Adams, Polito

## 213. Flavor Chemistry of Foods and

Beverages (3)
Lecture/discussion-3 hours. Prerequisite: Chemistry 8 B , course 123 , course 123 L or Food Science and Technology 103 or consent of instructors. Students will become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods. Students will be required to read and critically evaluate flavor chemistry literature. (Same course as Food Science and Technology 213). - III. (III.) Ebeler, Heymann

## 215. Sensometrics (3)

Lecture-3 hours. Prerequisite: Food Science and Technology 117 or the equivalent, course 125 and 125L or Food Science and Technology 107A or 107B. Experimental design and statistical analysis, including multivariate analysis, for both sensory and instrumental data in enology and food-related stud-ies.-I. (I.) Heymann

## 216. Sustainable Vineyard Development (5)

Lecture/discussion-3 hours; fieldwork-3 hours; term paper. Prerequisite: course 101A, 101B,
101C, and one of courses 115 and 118 or consent of instructor; course 110, Soil Science 100, Atmospheric Science 133 and Agricultural and Resource Economics 140 recommended. Application of plant, meteorological, soil, water, GIS, and economic sciences to sustainable vineyard development. Preparation of a comprehensive study to determine the viticultural and economic feasibility of a given site for raisin, table, or wine grape production.-I. (I.) Smart
217. Field and GIS Evaluation of Soils (3) Lecture/laboratory-4 hours; fieldwork - 3 hours. Prerequisite: Plant Sciences 120, 205 or 206; Soil Science 100, 105, or 107; course 101C; Applied Biotechnology 180 are recommended; consent of Instructor. Principles and practices used to evaluate agricultural soils in the field, including soil pits, soil cores, electrical conductivity meters, ground penetrating radar, geomorphology and surface terrain analysis. Use of geographic information sciences, soil databases, digital elevation models and geostatistics. Offered in alternate years. - (II.) Smart

## 219. Natural Products of Wine (3)

Lecture-3 hours. Prerequisite: courses 123 and 124, or natural products background and consent of instructor. Structure, occurrence, and changes due to wine production to the natural products found in wine. Chemicals with a sensory impact will be emphasized, including flavonoids and other phenolics, terpenes and norisoprenoids, pyrazines, oak volatiles and other wine constituents.-I. (I.) Waterhouse

## 223. Instrumental Analysis of Must and

 Wine (4)Lecture-2 hours; laboratory-3 hours; discussion1 hour. Prerequisite: course 123 or Food Science and Technology 103 required. Biological Sciences 102 and 103 or Biological Sciences 105, Chemistry 107B or Chemistry 115 recommended. Open to upper division students in Viticulture \& Enology, Food Science and Technology; students in Food Science, Ag \& Environmental Chemistry and Viticulture \& Enology graduate groups. Theory and practice of instrumental analysis of wines and musts. Emphasis on the principles of analytical techniques (e.g., CE, GC, HPLC, Mass Spectrometry) and factors determining correct choice of instrumental method. - III. (III.) Ebeler

## 224. Advances in the Science of

 Winemaking (3)Lecture-3 hours. Prerequisite: course 125, 126 and graduate standing or consent of instructor. Selected topics in the science and technology of winemaking. Topics drawn from current research of participating faculty. Critical analysis of the technical content of published material. - III. (III.)

## 225. Advanced Sensory Analysis of Wines

 (3)Lecture/discussion-2 hours; laboratory - 4 hours.
Prerequisite: courses 124 and 125 (or Food Science and Technology 107) and Agricultural Management and Rangeland Resources 120 or the equivalent.
Sensory descriptive analysis experiments will be designed and conducted using standard sensory science methods. Data will be analyzed by analyses of variance, principal component analyses and generalized Procrustes analysis to evaluate the judge's performance and interpret the significance of the results. - III. Heymann

## 235. Winery Design (4)

Lecture-2 hours; discussion-1 hour; independent study. Prerequisite: course 124, 135 or consent of instructor. Design of wineries. Includes process calculations, equipment selection, process layout and building choice and siting. Project scheduling, capital costs, and ten-year cash flow analysis for the winery. One field trip required. Offered in alternate years.-II. Boulton

## 270. Critical Evaluation of Scientific

## Literature (2)

Discussion-2 hours. Prerequisite: consent of instructor. Contemporary research topics in biological sciences. Discussion of recent research articles in a special topic area. Intended to develop skills in critical evaluation of scientific publications. May be repeated for credit. (S/U grading only.) - II, III. (II,
III.) Bisson
290. Seminar (1)

Seminar-1 hour. Prerequisite: consent of instructor. (S/U grading only.) -I, III. (I, III.)
290C. Advanced Research Conference (1) Discussion - 1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

## 291. Advanced Viticulture (2)

Lecture/discussion-2 hours. Prerequisite: course 110, 116, 124, 125; course 210 recommended. Critical evaluation of scientific and popular literature on selected topics of current interest that relate viticulture to fruit or wine sensory attributes or quality. May be repeated one time for credit. Offered in alternate years. - (II.) Matthews

## 292. Advanced Internship (1-15)

Internship-3-45 hours. Prerequisite: courses 123,
123L, 124, 124L, 125, 125L, 126, 126L, 128, 128L; consent of instructor. Restricted to Viticulture \& Enology Graduate Group graduate students. Work experience related to Fermentation Science (Enology) or Plant Science (Viticulture) majors. Internships must be approved and supervised by a graduate group faculty member or students major professor, but are arranged by the student. May be repeated 12 units for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 297T. Tutoring in Viticulture and Enology

 (1-5)Prerequisite: graduate standing and consent of instructor. Designed for graduate students who desire teaching experience, but are not teaching assistants. Student contact primarily in laboratory or discussion sections, and under direction of a faculty member. (S/U grading only.)
298. Group Study (1-5)
(S/U grading only.)
299. Research (1-12)
(S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) I, II, III. (I, II, III.)

## Viticulture and Enology (A Graduate Group)

David A. Mills, Ph.D., Chairperson of the Group
Group Office. 1204 RMI South
530-752-1852; Fax 530-7582-032;

## Faculty

Douglas O. Adams, Ph.D., Professor (Viticulture and Enology)
Charles W. Bamforth, Ph.D., Professor (Food Science and Technology)
Linda F. Bisson, Ph.D., Professor
(Viticulture and Enology)
David E. Block, Ph.D., Professor
(Viticulture and Enology, Chemical Engineering)
Academic Senate Distinguished Teaching Award
Roger B. Boulton, Ph.D., Professor
(Viticulture and Enology, Chemical Engineering)
Dario Cantu, Ph.D. Assistant Professor (Viticulture and Enology)
Susan E. Ebeler, Ph.D., Professor (Viticulture and Enology)
Jean-Xavier Guinard, Ph.D., Professor (Food Science and Technology)
Hildegarde Heymann, Ph.D., Professor (Viticulture and Enology)
Maria Marco, Ph.D., Assistant Professor
(Food Science and Technology
Mark A. Matthews, Ph.D., Professor
(Viticulture and Enology)
David A. Mills, Ph.D., Professor
(Viticulture and Enology, Food Science and Technology)
Kenneth A. Shackel, Ph.D., Professor (Plant Sciences)
David R. Smart, Ph.D., Associate Professor (Viticulture and Enology)
Li, Tian, Ph.D., Assistant Professor (Plant Sciences)
M. Andrew Walker, Ph.D., Professor
(Viticulture and Enology)
Andrew L. Waterhouse, Ph.D., Professor (Viticulture and Enology)
Larry E. Williams, Ph.D., Professor (Viticulture and Enology)

## Affiliated Faculty

Matthew W. Fidelibus, Ph.D., Associate Specialist in Cooperative Extension (Viticulture and Enology)
W. Douglas, Gubler, Ph.D., Specialist in Cooperative Extension (Plant Pathology)
Andrew J. McElrone, Ph.D. Assistant Adjunct Professor (Viticulture and Enology)
Anita Oberholster, Ph.D., Assistant Specialist in Cooperative Extension (Viticulture and Enology) Kerri L. Steenwerth, Ph.D., Assistant Adjunct Professor (Viticulture and Enology)
Graduate Study. The M.S. program offers advanced studies in viticulture and enology, ranging from the genetics, physiology and biochemistry of grapevines to the chemistry, microbiology and sensory science of wines and the chemical engineering of winemaking. Applications must be submitted online by January 15.
Ph.D. studies are not offered by the Graduate Program in Viticulture and Enology.
Preparation. Applicants to the program are required to have a level of competence equivalent to that of a strong science undergraduate program.

This includes coursework in biology, general chemistry, organic chemistry, calculus, statistics (analysis of variance), biochemistry, microbiology, and economics.
Specific requirements are outlined in detail and may be obtained by visiting http://vengg.ucdavis.edu.
Graduate Advisers. H. Heymann, A.J. McElrone

## War-Peace Studies

(College of Letters and Science)
The interdisciplinary minor in War-Peace Studies examines the causes and dynamics of intra- and international wars and efforts to prevent and settle such conflicts.
Students in the minor are encouraged to participate in the educational activities of the Davis Program of the UC Institute on Global Conflict and Cooperation (IGCC).
The minor is sponsored by the International Relations Program.

## Minor Program Requirements:

UNITS
War-Peace Studies.............................. 19-20
One or two courses from each of the
following areas:
Approaches: Anthropology 123AN, 126B,
Comparative Literature 157, Philosophy
115,118 , Political Science 121, 123 ,
124, 132, 176, Sociology 157, Women's
Studies 102
Northern and Western Regions: History
134A, 138C, 142A, 143, 144A, 144B,
145, 170B, 171B, 174B, Native American
Studies 130B, Political Science 130, 131
Southern and Eastern Regions:
Anthropology 142, 143A, 143B, 144,
History 165, 191F, 194C, Native
American Studies 120, Political Science

## 142A

Restriction. No more than two courses from a single department may be offered in satisfaction of the minor requirements.
Advising. International Relations Program
530-754-8098

Nann A. Fangue, Ph.D., Assistant Professor
Douglas A. Kelt, Ph.D., Professor
A. Peter Klimley, Ph.D., Adjunct Professor

Peter B. Moyle, Ph.D., Professor

Brian D. Todd, Ph.D., Assistant Professor
Andrea K. Townsend, Ph.D., Assistant Professor Dirk H. Van Vuren, Ph.D., Professor

## Emeriti Faculty

Daniel W. Anderson, Ph.D., Professor Emeritus Joseph J. Cech, Jr., Ph.D., Professor Emeritus Christopher M. Dewees, Ph.D., Specialist in Cooperative Extension Emeritus Deborah L. Elliott-Fisk, Ph.D., Senior Lecturer Emerita Don C. Erman, Ph.D., Professor Emeritus
Nancy A. Erman, M.S., Specialist Emerita
E. Lee Fitzhugh, Ph.D., Specialist in Cooperative Extension Emeritus
Walter E. Howard, Ph.D., Professor Emeritus
Rex E. Marsh, A.B., Specialist Emeritus
Terrell P. Salmon, Ph.D., Specialist in Cooperative
Extension Emeritus

## Affiliated Faculty

Roger A. Baldwin, Ph.D., Assistant Specialist in
Cooperative Extension
Lisa C. Thompson, Ph.D., Specialist in Cooperative Extension

## The Major Program

The Wildlife, Fish, and Conservation Biology major deals with the relationships between the requirements of wildlife and the needs of people. Understanding these relationships is vital for the maintenance of ecological diversity, recreational resources, and food supplies. Students completing the major possess a broad knowledge of ecology and natural history, but with the quantitative skills to use this knowledge in critical thinking and decisionmaking.
The Program. The major emphasizes broad training in biological sciences, with specialization in one of five areas. The major is primarily for students interested in becoming professionals in the diverse fields of wildlife, fish, and conservation biology including veterinary and wildlife health sciences. The breadth of course requirements, when combined with electives also make this an excellent preparatory major for secondary school teaching. Certification by professional societies such as The Wildlife Society, American Fisheries Society, or the Ecological Society of America, or preparation for graduate studies may also be achieved by careful planning of electives with a faculty adviser careful planning of electives with a faculty adviser.
Career Alternatives. The major prepares students to excel in the dynamic fields of environmental and conservation biology emphasizing vertebrate animals in their natural environments, as well as resolution of conflicts between humans and wild animals. Positions now held by graduates in this major include wildlife biology, fisheries biology, wildlife damage management, and resource biologists and managers with local, state, and federal agencies. Many graduates are biologists or consultants with private industries such as environmental consulting firms, commercial fishing businesses, electrical utilities, sporting clubs or businesses, and aquaculture operations, while others are veterinarians, medical physicians, and professors/researchers who teach and/or conduct research in academic institutions.

## B.S. Major Requirements:

Statistics 100, 102, or Plant Sciences
120 ..................................................... 4
Wildlife, Fish, and Conservation Biology 10,
11, or 50

Students graduating with this major are required to attain at least a $C$ average
(2.000) in all courses taken at the university in depth subject matter
Environmental Science and Policy 100 or
Evolution and Ecology 101 ..................... 4
Evolution and Ecology 100 ...................... 4
Biological Sciences 101 .......................... 4
Wildlife, Fish, and Conservation Biology 121 or 130
Neurobiology, Physiology, and Behavior 102
or Wildlife, Fish, and Conservation Biology 141
Wildlife, Fish, and Conservation Biology 122 4
Wildlife, Fish, and Conservation Biology
154 ................................................... 4
Choose three lecture courses and two
(laboratory) courses from: Wildlife, Fish, and
Conservation Biology 110, (110L), 111,
(111L), 120, (120L), or 134, (134L) .. 12-15
Choose one course (two recommended) from
Statistics 104, 106, or 108..................... 4
Wildlife, Fish, and Conservation Biology
100 , or 101 \& 101L, or 102 \& 102L.....4-7
Strongly recommended, but not required,
Landscape Architecture $150 .$.
...................
Anatomy, Physiology and Cell Biology
100
3

Restricted Electives
15-24
Choose one from the five Areas of Specialization shown below. Students must maintain a $C$ average (2.000 GPA) and pass all course work in their chosen specialization.

## Areas of Specialization

(1) Conservation Biology: Complete Wildlife,

Fish, and Conservation Biology 155 \& 155L.
Choose one course from: Environmental
Science and Policy 161, 170, or 171.
Choose two courses from: Environmental
Horticulture 160, Environmental Science and Policy 127, Evolution and Ecology 115, 117, 138, 147, Wildlife, Fish, and
Conservation Biology 152, 156, or 157.
Choose one course from: Animal Science
103, 170, Nature and Culture 120, 140 , or Veterinary Medicine 170.
(2) Fish Biology: Complete Wildlife, Fish, and

Conservation Biology 120 \& 120L.
Choose one course from: Entomology 116
or Evolution and Ecology 112 \& 112L.
Choose three courses from: Animal Science
118, Environmental Science and Policy
116 N, 150C, 151, 151L, Evolution and Ecology 115, Environmental Science and Management 100, Hydrology 143,
Wildlife, Fish, and Conservation Biology 155 \& 155L, or 157.
Choose one course from: Hydrology 150,
Environmental Science and Policy 161,
169, or Landscape Architecture 150.
(3) Wildlife Biology: Complete Wildlife, Fish,
and Conservation Biology 151.
Choose one course from: Plant Biology
102, Plant Sciences 144, 147 \& 147L or 178.

Choose one course from: Environmental
Horticulture 160, Environmental Science
and Policy 155, Plant Sciences 130,
Wildlife, Fish, and Conservation Biology
155 \& 155L, 156 , or 157.
Choose two courses from: Animal Science
104, Environmental Science and Policy
121, Environmental Toxicology 101,
Evolution and Ecology 107, Landscape
Architecture 150, Medical Microbiology

116, Wildlife, Fish, and Conservation Biology 136, 141 (cannot be used to simultaneously satisfy the Depth Subject Matter requirement), or 152 .
Note: Students interested in certification as a Wildlife Biologist from The Wildlife Society should consider additional courses in plant sciences. Recommended courses include Plant Biology 108, 117, 118, 119, 148, Plant Sciences 131, 144, 145, or 178.
(4) Wildlife Health: Complete either

Biological Sciences 102 and 103 or Animal
Biology 102 and 103.
Choose one course from: Wildlife, Fish, and Conservation Biology 136, 151, 152, or $155 \& 155 \mathrm{~L}$.
Choose one course from: Animal Science 103 or 170.
Choose one course from: Anatomy,
Physiology, and Cell Biology 100, Animal Science 104, Medical Microbiology 115, 116, Microbiology 102, Molecular and Cell Biology 150, Neurobiology,
Physiology, and Behavior 101, 126, 127, 128, 140, or Veterinary Medicine and Epidemiology 158. Note that this AOS recommends additional preparatory courses; prerequisites for admission to Veterinary Medicine vary among schools and students should confirm the specific requirements of the school(s) to which they wish to apply. Additional Preparatory (recommended, not required): Chemistry 2C, 118A, 118B, 118C, Physics 7A, 7B, 7 C .
(5) Individualized: Students may, with prior approval of their adviser and the curriculum committee, design their own individualized specialization within the major. The specialization will consist of five upper
division courses with a common theme.

## Total Units for the Degree

 119-136Major Adviser. N. A. Fangue
Students transferring to UC Davis from another institution or new students declaring the major of Wildlife, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. Contact the Department in 1088 Academic Surge Building or telephone 530-754-9796.

## Minor Program Requirements:

The minor in Wildlife, Fish, and Conservation Biology is for students interested in basic training and understanding of the ecology and conservation of wild terrestrial and aquatic vertebrates, emphasizing birds, mammals, and fish, but with relevance and application to all life forms.

UNITS

## Wildlife, Fish, and Conservation Biology. <br> 20-32

Wildlife, Fish, and Conservation Biology
100,151 , either 154 or $155 \& 155 \mathrm{~L}$, and
choose one course from: 110, 111, 120 or
134 .................................................15-16
Two-four upper division elective courses
chosen from the Wildlife, Fish, and
Conservation Biology curriculum, excluding
Wildlife, Fish, and Conservation Biology
190, 191, 192, 195, 197T, 198, \&
199.

Minor Adviser. N. A. Fangue
Graduate Study. Faculty in Wildlife, Fish, and Conservation Biology are active members of several graduate programs, including the Ecology, Population Biology, Genetics, Animal Behavior, and Avian Science graduate groups. Students interested in graduate studies should see Graduate Studies, on page 111.

## Courses in Wildlife, Fish, and

## Conservation Biology (WFC)

## Lower Division

## 10. Wildlife Ecology and Conservation (4)

 Lecture-3 hours; discussion - 1 hour. Introduction to the ecology and conservation of vertebrates. Complexity and severity of world problems in conserving biological diversity. GE credit: SciEng, Div,Wrt | SE, SL, WE.-I, III. (II, III.) Fangue, Moyle, Kelt

## 11. Introduction to Conservation Biology (3)

 Lecture-3 hours. Introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats for students with no background in biological sciences. Offered in alternate years. GE credit: SciEng, Wrt \| SE, SL. - III. Caro
## 50. Natural History of California's Wild Vertebrates (3)

Lecture-2 hours; discussion-1 hour. Examination of the natural history of California's wild vertebrates (fish, amphibians, reptiles, birds, and mammals), including their biogeography, systematics, ecology and conservation status. GE credit: SciEng,
Wrt \| SE, SL, WE. - II. (II.) Townsend

## 92. Internship (1-6)

Internship-3-18 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. Special study for undergraduates. (P/NP grading only.)-I, II, III. (I, II, III.)

## Upper Division

## 100. Field Methods in Wildlife, Fish, and Conservation Biology (4)

Lecture-2 hours; laboratory-3 hours; fieldwork-3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 and consent of instructor. Introduction to field methods for monitoring and studying wild vertebrates and their habitats, with an emphasis on ecology and conservation. Required weekend field trips. GE credit:
SciEng | SE. - III. (III.) Eadie, Kelt, Todd, Van Vuren

## 101. Field Research in Wildlife Ecology (2)

Lecture/discussion-2 hours. Prerequisite: Consent of instructor and one upper division course in each of ecology, statistics, and ornithology, mammalogy, or herpetology. Field research in ecology of wild vertebrates in terrestrial environments; formulation of testable hypotheses, study design, introduction to research methodology, oral and written presentation of results. Limited enrollment. Offered in alternate years. GE credit: SciEng \| Wrt \| SE, VL, WE. - I. Eadie, Kelt, Todd, Van Vuren

## 101L. Field Research in Wildlife Ecology:

 Laboratory (4)Lecture/discussion-2 hours; field work-15 hours. Prerequisite: consent of instructor, course 101 (may be taken concurrently), and one upper division course in each of ecology, statistics, and ornithology, mammalogy, or herpetology. Field research in ecology of wild vertebrates in terrestrial environments; testing ecological hypotheses through field research, application of research methodology, supervised independent research projects. Held between Labor Day and fall quarter. Limited enrollment. Offered in alternate years.-I. Eadie, Kelt, Todd, Van Vuren

## 102. Field Studies in Fish Biology (1)

Lecture/discussion - 1 hour. Prerequisite: upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Emphasis on theory of quantitative fish capture methods and design of individual research projects on ecology, behavior, physiology or population biology of fishes. Offered irregularly. - III. Moyle

## 102L. Field Studies in Fish Biology: Laboratory (6)

Fieldwork-15 hours; laboratory - 12 hours; discus-sion/laboratory-3 hours. Prerequisite: course 102, upper division course in each of ecology, aquatic biology, fish biology, and statistics, and consent of instructor. Field investigations of fish biology are emphasized including quantitative capture methods and individual research projects on ecology, behavior, physiology or population biology of fishes at the field site in relation to their habitats. Offered irregularly. (Deferred grading only, pending completion of projects.) GE credit: SciEng, Wrt \| SE, WE.-III. Moyle

## 110. Biology and Conservation of Wild

Mammals (3)
Lecture-3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Origins, evolution, diversification, and geographical and ecological distributions of mammals. Morphological, physiological, reproductive, and behavioral adaptations of mammals to their environment. - III. (III.) Kelt

## 110 L . Laboratory in Biology and <br> Conservation of Wild Mammals (3)

Laboratory-6 hours. Prerequisite: course 110 (may be taken concurrently); consent of instructor. Laboratory exercises in the morphology, systematics, species identification, anatomy, and adaptations of wild mammals to different habitats. Limited enrollment. III. (III.) Kelt

## 111. Biology and Conservation of Wild

 Birds (3)Lecture-3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Phylogeny, distribution, migration, reproduction, population dynamics, behavior and physiological ecology of wild birds. Emphasis on adaptations to environments, species interactions, management, and conservation. GE credit: SciEng | SE.-I. (I.) Eadie
111 L . Laboratory in Biology and
Conservation of Wild Birds (3)
Laboratory-6 hours; fieldwork-3 hours. Prerequisite: course 111 (may be taken concurrently); consent of instructor. Laboratory exercises in bird species identification, anatomy, molts, age and sex, specialized adaptations, behavior, research, with emphasis on conservation of wild birds. Several weekend field trips, after class bird walks, and independent bird study are required. Limited enroll-ment.-l. (I.) Eadie
120. Biology and Conservation of Fishes (3) Lecture -3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C. Evolution, ecology, and conservation of marine and freshwater fishes.-I. (I.) Moyle

## 120L. Laboratory in Biology and Conservation of Fishes (2)

Laboratory-3 hours. Prerequisite: course 120 (may be taken concurrently). Limited enrollment. Morphology, taxonomy, conservation, and identification of marine and freshwater fishes with emphasis on California species. -I. (I.) Moyle

## 121. Physiology of Fishes (4)

Lecture -3 hours; laboratory -3 hours. Prerequisite: upper division courses in nutrition and physiology or consent of instructor. Comparative physiology, growth, reproduction, behavior, and energy relations of fishes. Offered irregularly. GE credit: SciEng, Wrt | SE, WE. - II. (II.)

## 122. Population Dynamics and Estimation (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Mathematics 16A-16B; Statistics 13 or the equivalent; an upper division course in ecology. Description of bird, mammal and fish population dynamics, modeling philosophy, techniques for estimation of animal abundance (e.g., mark-recapture, change-inratio, etc.), mathematical models of populations (e.g., Leslie matrix, logistic, dynamic pool, stockrecruitment); case histories. - III. (III.) Botsford
130. Physiological Ecology of Wildlife (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Principles of physiological ecology, emphasizing vertebrates. Ecological, evolutionary, and behavioral perspectives on physiological mechanisms used by animals to adapt to their environment, including consideration of climate-change and other threats to biodiversity. Tropical, temperate, and polar ecosystems are highlighted. GE credit: SciEng | SE. - II. (II.) Fangue 134. Herpetology (3) Lecture-2 hours; term paper. Prerequisite: Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent upper division course recommended. Evolution and ecology of the world's diverse reptiles and amphibians. Emphasis on adaptations to environments, species interactions, management, and conservation. Offered in alternate years. - (II.) Todd
134L. Herpetology Laboratory (3)
Laboratory-6 hours. Prerequisite: Biological Sciences 2A, 2B, 2C; Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent upper division course recommended; course 134 concurrently; consent of instructor. Diagnostic characteristics and functional attributes of amphibians and reptiles, emphasizing ecological, bio-geographic and phylogenetic patterns. Field experience with common species of reptiles and amphibians in the Davis area. Offered in alternate years. - (II.) Todd
136. Ecology of Waterfowl and Game Birds (4)

Lecture-3 hours; laboratory - 3 hours; fieldwork - 1 hour. Prerequisite: course 111, 111L or the equivalent, or consent of instructor. Detailed examination of distribution, behavior, population dynamics, and management of waterfowl and upland game birds. Offered in alternate years. - (II.) Eadie
141. Behavioral Ecology (4)

Lecture-3 hours; film viewing - 1 hour. Prerequisite Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course. Basic theories underlying the functional and evolutionary significance of behavior, and the role of ecological constraints. Supporting empirical evidence taken mainly from studies of wild vertebrates. Offered in alternate years. GE credit: SciEng | SE. - (II.) Caro
150. Urban Wildlife Ecology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 2A, 2B, 2C, or the equivalent. Introduction to the behavior, ecology, and evolution of wild animals in urban environments. Effects of urbanization on disease, fitness, and dynamics of animal populations. Conservation and conflict management efforts in urban settings. Offered in alternate years.-II. Townsend

## 151. Wildlife Ecology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 2A, 2B, 2C or equivalent. Ecology of wild vertebrates, including habitat selection, spatial organization, demography, population dynamics, competition, predation, herbivory, energetics, and community dynamics, set in the context of human-caused degradation of environments in North America. -I. (l.) Van Vuren
152. Ecology of Human-Wildlife Conflicts (3)

Lecture-3 hours. Prerequisite: Biological Sciences $2 \mathrm{~A}, 2 \mathrm{~B}, 2 \mathrm{C}$, or the equivalent. Ecological
approaches to managing wild vertebrates that come into conflict with agriculture, public health, or the conservation of biodiversity. Offered in alternate years. - II. Van Vuren

## 153. Wildlife Ecotoxicology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: introductory courses in organic chemistry, ecology, and physiology, or consent of instructor; Environmental Toxicology 101 recommended. Various forms of environmental pollution in relation to fish and wildlife, the effects and mechanisms of pollutants, effects on individuals and systems, laboratory and field eco-
toxicology, examples/case histories, philosophical/ management considerations. Offered irregularly. GE credit: SciEng, Wrt \| SE, WE

## 154. Conservation Biology (4)

Lecture-3 hours; term paper (will be one or more book reviews). Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or the equivalent. An introduction to conservation biology and background to the biological issues and controversies surrounding loss of species and habitats. GE credit: SciEng | SE, WE.-I. (I.) Todd
155. Habitat Conservation and Restoration (3)

Lecture-3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course; course 154 and Environmental Horticulture 160 recommended. Analysis of the characteristics of wildlife and fish habitats, the conservation of habitats, and restoration. GE credit: SciEng, Wrt \| SE, VL, WE.-II. (II.)
155L. Habitat Conservation and Restoration Laboratory (2)
Fieldwork-3 hours; laboratory-3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or equivalent course; course 155 (may be taken concurrently). Analysis of the characteristics of wildlife and fish habitats, application of restoration methods, and evaluation of conservation and restoration projects in the field. Students will also participate during the term in a restoration project. -II. (II.)

## 156. Plant Geography (4)

Lecture-3 hours; laboratory-3 hours; term paper. Field trips will be substituted for some in-lab activities. Prerequisite: Environmental Science and Policy 100 or Evolution and Ecology 101; Plant Biology 102 or 108 strongly recommended. Survey of the geographical distribution of vegetation types and habitats, with consideration of the environmental and historical factors that determine these patterns. Conservation and management approaches. Analytical field and lab techniques introduced. Not offered every year. GE credit: SciEng, Wrt \| SE, VL, WE.III.

## 157. Coastal Ecosystems (4)

Lecture-3 hours; laboratory/fieldwork - 3 hours. Prerequisite: Environmental Studies 100 or Evolution and Ecology 101; course work in organismal biology, physical geography, and geology recommended. Overview of coastal ecosystems, physical and biological elements and processes, and coastal zone dynamics, including sandy, rocky and muddy shorelines, estuaries, dunes and coastal watersheds. Discussion of the role of historical factors and conservation, restoration, and management approaches. Not offered every year. GE credit: SciEng | SE, VL. - (III.)

## 158. Infectious Disease in Ecology and

 Conservation (3)Lecture-3 hours. Prerequisite: Evolution and Ecology 101 or Environmental Science and Policy 100 or Veterinary Medicine 409 or the equivalent. Introduction to the dynamics and control of infectious disease in wildlife, including zoonotic diseases and those threatening endangered species. Basic epidemiological models and their applications. Role of scientists in developing disease control policies.
Offered irregularly.
190. Departmental Research Seminar (1)

Seminar-1 hour. Prerequisite: upper division standing in the biological sciences. Reports and discussions of recent advances related to wildlife and fisheries biology. May be repeated for credit up to 3 times. (P/NP grading only.) - I, II, III.

## 191. Museum Science (2)

Lecture-1 hour; laboratory-3 hours. Prerequisite: upper division standing and consent of instructor. Principles and methods required to preserve and present biological specimens for research, teaching collections, and museums. Offered irregularly. (P/NP grading only.)-II. Engilis

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the department. Internships supervised by a member of the faculty. (P/NP grading only.)
195. Field and Laboratory Research (3) Laboratory-6 hours; discussion - 1 hour. Prerequisite: course 110L, 1111 , or 120L; 121 or 130; Evolution and Ecology 101 or the equivalent; and consent of instructor. Critique and practice of research methods applied to field and/or laboratory environments of wild vertebrates. Students work independently or in small groups to design experimental protocol, analyze data, and report their findings. May be repeated two times for credit. GE credit: SciEng | SE. -I, II, III. (I, II, III.)

## 197T. Tutoring in Wildlife and Fisheries

 (1-5)Prerequisite: major in Wildlife, Fish, and Conservation Biology and consent of instructor. Experience in teaching under guidance of faculty member. (P/NP grading only.)
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

222. Advanced Population Dynamics (3)

Lecture-3 hours. Prerequisite: graduate standing; advanced course in ecology (e.g., Evolution and Ecology 101), population dynamics (e.g., course 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended. Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research. Offered irregularly. - II. (II.) Botsford

## 223. Conservation Biology and Animal

 Behavior (3)Lecture-1.5 hours; discussion - 1.5 hours. Prerequisite: Ecology 208 or Animal Behavior 221. Influences of concepts of animal behavior (functional, evolutionary, developmental, mechanistic, and methodological issues) on conservation biology theory and practice. Offered in alternate years. (III.) - Caro
290. Seminar (1-3)

Seminar-1-3 hours. Prerequisite: consent of instructor. Seminar devoted to a highly specific research topic in any area of wildlife or fisheries biology. Special topic selected for a quarter will vary depending on interests of instructor and students. ( $S / U$ grading only.) - I, II, III. (I, II, III.)
290C. Research Group Conference (1)
Discussion-1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, prog ress and techniques in wildlife and fishery sciences. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
291. Seminar in Aquatic Ecology (2)

Seminar-2 hours. Prerequisite: graduate standing in biology. Presentation and analysis of assigned topics in aquatic ecology emphasizing fish, fisheries and aquatic conservation. Offered in alternate years. (S/U grading only.)-III. (III.) Moyle

## 292. Physiology of Fishes Seminar (1)

 Seminar-1 hour. Prerequisite: graduate standing and at least two courses in physiology; consent of instructor. Seminar devoted to current topics concerning the physiological functioning of fishes. May be repeated two times for credit. Offered irregularly. (S/U grading only.) -I. (I.)
## 294. Behavioral Ecology of Predators and

 Prey (3)Seminar-2 hours. Prerequisite: graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals,
antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator prey interactions. May be repeated two times for credit. (Same course as Animal Behavior 294.) Offered in alternate years. - II. Caro
295. Seminar in Wildlife Ecotoxicology (3) Seminar-2 hours; term paper. Prerequisite: graduate standing in biology. Presentation and analysis of assigned and searched research papers on transport, exposure, and effects of environmental contaminants on wildlife-associated ecosystem components, especially at individual/population levels. Specific subjects vary each offering. Offered irregularly. (S/ U grading only.)
297T. Supervised Teaching in Wildlife and Fisheries Biology (1-3)
Tutorial-3-9 hours. Prerequisite: meet qualifications for teaching assistant; graduate standing; and consent of instructor. Tutoring and teaching students in undergraduate courses in Wildlife, Fish, and Conservation Biology. Weekly conferences with instructor; evaluations of teaching; preparing for and conducting demonstrations, laboratories, and discussions; preparing and grading examinations. May be repeated for a total of 6 units when a different course is tutored. (S/U grading only.)
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)
Students transferring to UC Davis from another institution or new students declaring the major of Wildlife, Fish, and Conservation Biology must consult the Master Adviser so that their program can be evaluated and a faculty adviser assigned. Contact the Department in 1088 Academic Surge Building or telephone 530-752-6586.

## The Major Program

Women's Studies is an interdisciplinary major founded on the understanding that the social production of gender is inseparable from that of race, sexuality, class, nationality, ability and other categories of difference. Our curriculum places feminist concerns within a transnational context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional and community practices, and the principles we bring to our classrooms. Women and Gender Studies offers a wide range of classes that use the lens of gender to examine colonialism and post colonialism, globalization, history, sexuality, queer theory, literature, popular culture, feminist video production, area studies, film fashion and food. The Women and Gender Studies Program offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social and Ethnic Relations, and an undergraduate concentration in transnational production and consumption.
The Program. One of the most exciting and challenging aspects of the Women and Gender Studies Program is that students, in consultation with the peer and faculty advisors, can pursue their particular academic interests and design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American and African Studies, American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German and Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textiles and Clothing, and other related disciplines.
In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Women and Gender Studies Program affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.
Students design a program of study in consultation with an adviser that is in accordance with their individual career goals. Many Women and Gender Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the program will graduate with a Bachelor of Arts Women's Studies.
Career Alternatives. A degree in Women's Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, and encourages social advocacy.
Pre-professional students will discover that a major in Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or genderrelated work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media or politics. will also find Women's Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural
studies, economics, education, ethnic studies, English, film studies, history, languages and literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong undergraduate background in critical theory, social analysis, history, feminist social theory, and a sound understanding of cultural representation and narratives of difference.
Increasingly, media and cultural institutions, corporations, and personnel firms are hiring specialists in women and gender studies trained in understanding the complex cultural challenges and demands arising from diverse communities. State and federal agencies need people who have special understanding of the problems that diverse groups of women face in society, industry, and the professions. Educational institutions across the spectrum need specialists to develop and administer women and gender studies programs, multi-cultural community centers and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.
Some of our alumni have developed careers other than those described above. Talking to your Women and Gender Studies faculty and peer advisor can give you even more ideas about possible future careers. Doing internships related to your coursework allows you to integrate theory with hands-on practice and service in the community.

## Women's Studies

A.B. Major Requirements:

UNITS
Preparatory Subject Matter .................... 20
Two courses from: Women's Studies 20, 50, 60, 70... 8
Three courses selected from the following:
African American and African Studies 10,
15, American Studies 1E, 1F, Anthropology
2, 20, 21, Art History 15, Asian American
Studies 1, 2, Chicana/o Studies 10, 50,
Classics 15, Comparative Literature 12,
Dramatic Art 1, English 30A or 30B, 45, 46A
or $46 B$ or 46 C, History 72A, $72 B$,
Humanities 10, Native American Studies 1,
10, Nature and Culture 1, Political Science 7,
Psychology 1, Science and Society 1, 15,
Sociology 1, 2, 3, Textiles and Clothing 7,
Women's Studies 80............................. 12
Depth Subject Matter .
Women's Studies 103, 104, 190 and one additional upper division Women's Studies
course ................................................ 16
Cross-Cultural Requirement..................... 16
Choose four courses (at least one from each category). Courses used to meet this requirement may not duplicate those used to meet other Women's Studies major requirements. The list that follows represents a partial list of options; other courses may be included with the consent of the Women's Studies Adviser.
Ethnic Studies: Women of Color in the United States: African American and African Studies 123, 133, Anthropology 139BN, Asian American Studies 112, Chicana/o Studies 111, 122, 131, Native American Studies 134, 180, Sociology 134, 172, Women's Studies 160, 180. Cultures Outside the United States: Anthropology 130A, Comparative Literature 135, 138, 159, English 185A, 185B, German 129, History 102G, 102H, 148A, 148B, Women's Studies 102, 182, 184.

Historical Material Prior to 1900: African American and African Studies 123, Asian American Studies 112, English 185A,
History 148A, 148B, Italian 141, Native American Studies 180, Women's Studies 102.

Gender-based courses ........................... 12

Choose one of two tracks: Disciplinary or Thematic. Courses used to meet this requirement may not duplicate those used to meet other Women's Studies major

## requirements.

## Disciplinary track

Choose three courses from one of the
following focus groups:
Anthropology focus: Anthropology 129,
130, 131, 134, 139, 148B, 158,
Women's Studies 102, 182, 184.
History focus: African American and
African Studies 123, Asian American
Studies 112, English 185A, History 102H,
102G, 110C, 116, 132, 148A, 148B,
159, 173, 176B, 177B, 184, 193A,
Italian 141, Native American'Studies 180.
Literature and Language focus:
Comparative Literature 135, 138, 159,
English 185A, 185B, French 133,
German 129, Italian 141, Linguistics 163,
Russian 142, Women's Studies 129.
Sociology and Psychology focus:
Anthropology 129, Chicana/o Studies
122, Psychology 149, Sociology 131,
132, 134, 145B, 172, Women's Studies 187.

## Thematic track

In consultation with a Women's Studies adviser, choose three courses that form a thematic cluster (for example, Gender and Race in the United States; The Cultural Representations of Gender; Gender and Public Policy; Gender and Global Issues; Gender and Autobiography; The Body,
Theory and Representation; Sexualities; Gender and Science). Other clusters may be developed in consultation with a
Women's Studies adviser.
Total units for the major ......................... 64
Major Adviser. All Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.
Minor Program Requirements:
Women's Studies ..................................... 24
Women's Studies $20,50,60,70$ or $80 \ldots$
Choose one from: African American and
African Studies 123, 133, Anthropology
139, Asian American Studies 112,
Chicana/o Studies, 111, 122, 131, Native
American Studies 134, 180, Sociology 134,
172, Women's Studies 160, $180 \ldots \ldots \ldots \ldots . .4$
Choose one from: Anthropology 148B,
Comparative Literature 135, 138, 159,
English 185A, 185B, 129, History 102G,
102H, 148A, 148B, Women's Studies 102,
182, 184
Additional Electives from approved list of
upper division cross-listed and Women's
Studies courses.
12
Note: With prior consultation with an adviser, other upper division courses may be accepted toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.
Minor Adviser. All Women's Studies majors and minors must consult with a faculty adviser, individually, at least once each academic year.
Graduate Study. The Women and Gender Studies Program offers a designated emphasis in Feminist Theory and Research for students enrolled in the Ph.D. programs of twelve other affiliated departments.

## Courses in Women's Studies (WMS) <br> Lower Division

20. Cultural Representations of Gender (4)

Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major. Interdisciplinary investigation of how specific cul-
tures represent gender difference. Examine a variety of cultural forms and phenomena including film, tele vision, literature, music, popular movements, and institutions. GE credit: ArtHum or SocSci, Div,
Wrt \| ACGH, AH or SS, DD, VL, WC, WE. - III. (III.) Craig

## 25. Gender and Global Cinema (4)

Lecture-3 hours; film viewing-3 hours. The role gender plays in film history/culture in various geographical contexts and in aspects of contemporary globalization. Films from nations such as China, Colombia, Cuba, Ethiopia, India, Iran, Korea, New Zealand, and the U.S. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.-II. (II.) Constable

## 50. Introduction to Critical Gender Studies

 (4)Lecture-3 hours; discussion - 1 hour. Introduction to interdisciplinary, critical gender studies. Addresses the emergence of women's, gender and feminist studies internationally, its links to women's movements, and its influence within the various arts,
humanities and social science disciplines. GE credit: ArtHum or SocSci, Div, Wrt I ACGH, AH or SS, DD, VL, WE. -I, II, III, IV. (II, II, III, IV.)

## 60. Feminist Critiques of Western Thought

 (4)Lecture/discussion - 4 hours. Prerequisite: consent of instructor. Critical introduction to major traditions of social thinking in the West from a feminist perspective. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.Craig

## 70. Theory and History of Sexualities (4)

Lecture/discussion-4 hours. Key issues in the social construction, organization, and reproduction of sexvalities such as the intersection of sexual identity with gender, race, ethnicity, and class, and the relation between movements for sexual liberation and the regulation of the body. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE.-I. (I.) Constable

## 80. Special Topics in Women's Studies (4)

Lecture/discussion-4 hours. In-depth examination of a women's studies topic related to the research interest of the instructor. May be repeated for credit when topic differs. Limited enrollment.-Constable, Ho, Kaiser, Nettles-Barcelón

## 90X. Lower Division Seminar (2)

Seminar-2 hours. Examination of a special topic in Women's Studies through shared readings, discussions, and written assignments. Offered in alternate years. - Constable, Kaiser, Nettles-Barcelón
91. Research Seminar in the Transnational Production and Consumption of Fashion

## (1-2)

Seminar-1-2 hours. Preparation for a research conference. May be repeated for credit when topic varies. -II. (II.) Kaiser

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) -Constable Ho, Joseph, Kaiser, Nettles-Barcelón, Swain
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.) - Constable, Craig, Ho, Joseph, Kaiser, Net-tles-Barcelón, Swain

## Upper Division

102. Gender and Post Colonialism (4) Lecture/discussion-4 hours; term paper. Prerequisite: course 50, 60. Explores changing configurations of race, gender, sexuality, class and implications for governmentality in one or more colonial or postcolonial regimes in one or more societies. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, DD, WC, WE.-I. Mama
103. Introduction to Feminist Theory (4) Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major. Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race,
identity politics, and the social construction of women's experience. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE.-I. (I.)
104. Feminist Approaches to Inquiry (4) Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major. Feminist applications and transformations of traditional disciplinary practices; current issues and methodologies in feminist interdisciplinary work. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE. - II. (II.) Nettles-Barcelón
105. Feminism and the Politics of Family

## Change (4)

Lecture/discussion -4 hours. Prerequisite: any Women's Studies course or Sociology 131 or 132. Examination of contemporary conflicts over family values and the changing family from a feminist perspective. Offered in alternate years. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD, WE. - (II.)
136. Topics in Gender, Production, Consumption and Meaning (4)
Lecture/discussion-3 hours; term paper Construction of gender through production and consumption of goods and services. Transnational movement of peoples and products. Topics may include fashion, film, food, and technology. May be repeated for credit. GE credit: ArtHum or SocSci, Div,
Wrt | ACGH, AH or SS, DD, WC, WE.-Constable, Ho, Kaiser, Nettles-Barcelón

## 137. Feminist Interpretations of

Contemporary Western Thought (4)
Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Introduction to deciphering, demystifying, and interpreting poststructuralist, postmodern, and postcolonial thought from a feminist perspective: applications to gender, race, sexuality, and class. Offered irregularly. GE credit: ArtHum or SocSci, Div,
Wrt | ACGH, AH or SS, DD, WE.

## 138. Critical Fashion Studies (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies, or Textiles and Clothing 7. Feminist cultural studies of style-fashion-dress through transnational circuits, personal subjectivities. Fashion as means of gender oppression and liberation. Histories and discourses of masculinities and femininities. Clothing works on global assembly line. Use of dress in construction / regulation of identities. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, VL, WC, WE.-Kaiser

## 139. Feminist Cultural Studies (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies or American Studies. The histories, theories, and practices of feminist traditions within Cultural Studies. (Same as course American Studies 139.) GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, VL, WE. -I, II (I, II.)

## 140. Gender and Law (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies. Exploration of women's legal rights in historical and contemporary context, discussing a variety of legal issues and applicable feminist theories. Topics include constitutional equal protection, discrimination in employment and education, sexual orientation discrimination, and the regulation of abortion. GE credit: SocSci, Div | ACGH, DD, SS. - III. (III.)

## 145. Women's Movements in Transnational

 Perspective (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 50, 60, consent of instructor. Class size limited to 90 students. Transnational perspectives on twentieth and twenty-first century women's movements in Western, colonial and post-colonial contexts, examining movement's forms and political orientations and relationships between women's movements and other forces for change. Offered in alternate years. GE credit: ArtHum or SocSci, Div | AH or SS, OL, WC, WE. - III, IV. (III, IV.) Craig, Mama
148. Science, Gender, and Social Justice (4) Lecture/discussion-4 hours; term paper. Prerequisite: course 50 or consent of instructor. Class size limited to 60 students. Critical reading and reflection on the history of Western science, scientific institutions and the changing role of science in relation to inequalities of class, race, gender and sexuality, and global struggles for equality and justice. Offered irregularly. GE credit: ArtHum or SocSci, Div | AH or SS, DD, WC, WE. - III. (III.) Craig, Kaiser, Mama
158. Contemporary Masculinities (4) Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major. A multicultural study of contemporary trends in masculinity and the economic, social and political forces that have shaped them. Topics may include men's movements, ethnic nationalist masculinities, and images of masculinity in popular culture. GE credit: ArtHum or SocSci, Div | ACGH, AH or SS, DD,
WE. -I, III. (I, III.) Craig, Maxine, Ho, Wendy
160. Women, 'Race' and Sexuality in Postcolonial Cinema (4)
Lecture/discussion -3 hours; film viewing - 3 hours. Prerequisite: course 20 or 50 . Class size limited to 90 students. Feminist analysis of race, sexuality and class in the representation of women in commercial and/or independent films. Offered in alternate years. GE credit: ArtHum, Div, Wrt \| AH, VL, WC, WE. - (III.) Mama
162. Feminist Film Theory and Criticism (4) Lecture/discussion - 3 hours; film-viewing - 3 hours. Prerequisite: one course from the Women's Studies major and Humanities 10 or consent of instructor. Historical overview of and contemporary issues in feminist film theory, including representation, spectatorship, and cultural production. Film stars, women filmmakers, and the intersections of gender, race, sexuality, and class in films and their audiences. Offered in alternate years. GE credit: ArtHum,
Div | ACGH, AH, DD, VL, WC, WE. - III. Constable

## 164. Topics in Gender and Cinematic

 Representation (4)Lecture/discussion-3 hours; film-viewing-3 hours. Prerequisite: one course from the Women's Studies major and Humanities 10 or consent of instructor. Examination of a specific topic within the broad rubric of gender and cinema. Possible topics include Latinas in Hollywood; gender, nation, cinema; and gender and film genre. Topics vary. May be repeated two times for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Div | AH, VL, WC, WE. - Constable, Kuhn

## 165. Feminist Media Production (6)

Lecture/discussion - 3 hours; laboratory - 3 hours; fieldwork-6 hours. Prerequisite: one course in Women and Gender Studies or consent of instructor. Basic media production and community service. Video, audio and photography instruction; feminist community documentary; video ethnography; video journals; alternative representations of fashion and women's bodies. Fundamentals of camera and microphone operation, interviewing techniques, and editing. May be repeated two times for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci, Div \| ACGH, AH or SS, DD, VL. - Constable

## 170. Queer Studies (4)

Lecture/discussion-4 hours. Prerequisite: course 20, or 50, or 70, or consent of instructor. Study of queer sexualities, identities, theories, practices. Alternative sexualities as historical, social, and cultural constructions in intersections with race, gender, class, nationality. Interdisciplinary exploration of sexual liberation and the regulation of sexuality through history, theory and expressive cultural forms. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. - Constable
175. Gender and Experience of Race (4) Lecture/discussion-4 hours. Prerequisite: course 50,60, or consent of the instructor. Exploration of the co-construction of "race" and gender in comparative national historical contexts and contemporary lived experience. Study of intersections of race and
gender in identities and how institutions, labor migration, social movements and consumption shape racialized gendered identities. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. - III. (III.) Ho, Nettles

## 178A-G. Women Writers and the

## Transnational Imaginary (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women's writing in specific geographic/ national locations and their diasporas: (A) The Arab World; (B) Asia; (C) The Caribbean; (D) Africa; (E) Diasporic Women Writers in Europe. Offered irregularly. GE credit: ArtHum, Div, Wrt|AH, WC, WE. - Constable, Ho, Mama, Nettles-Barcelón
178F. Transnationalism and Writing by Women of Color (4)
Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Writings by women of color in a transnational frame work, understood in their cultural, socio-economic, and historical contexts. The interrelation among gender, writing, nationalism, and transnationalism, with focus on women's writing in specific geographic/ national locations and their diasporas: (F) Topics on Women Writers of Color. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-Consta ble, Ho, Nettles-Barcelón

## 179. Gender and Literature (4)

Lecture/discussion-4 hours. Prerequisite: one course in Women's Studies, or consent of instructor. Role of literature, especially novels, in constructing, challenging, and transforming normative genders in society. Transhistorical and transnational focus on gender in its intersections with race, class, sexuality, and politics. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, WC, WE. - Constable, Ho

## 180. Women of Color Writing in the United

 States (4)Lecture/discussion-4 hours. Prerequisite: course 20 or 50. Literature, especially novels, written by contemporary women of color in the United States, understood in their socio-economic, cultural and historical contexts. GE credit: ArtHum, Div | ACGH, AH, DD, WE. - II. (II.) Ho, Mama
182. Globalization, Gender and Culture (4) Lecture/discussion-4 hours. Prerequisite: course 50; consent of instructor. Critical gender analysis of globalization as a process of interconnected cultural, social and economic transformations inflected by gender, nation, class and race/ethnicity. Critical selfreflection and social observation skills. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, OL, WC, WE. - III. Mama

## 184. Gender in the Arab World (4)

 Lecture/discussion-4 hours. Prerequisite: course 50. Examination of the history, culture, and social/ political/economic dynamics of gender relations and gendering in the Arab world. GE credit: SocSci, Div, Wrt \| SS, WC, WE. - II. (II.)185. Women and Islamic Discourses (4) Lecture/discussion-4 hours. Prerequisite: course 50 or comparable course. Introduction to the debates/ discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East \& South Asia. Comparative study of debates/discourses on family, work law, sexuality, religion, comportment, human rights, feminist and religious movements. Offered irregularly. (Same course as Middle East/South Asia Studies 150.) GE credit: ArtHum or SocSci \| AH or SS, WC.
186. Gender and Social Policy (4)

Lecture/discussion-3 hours; term paper. Prerequisite: upper division standing and a course in Women's Studies. Role of gender in the creation of social policies, especially with respect to issues brought into the policy arena by contemporary feminism. Offered in alternate years. GE credit: SocSci, Div | ACGH, DD, SS, WE.-(III.) Craig, Nettles-Barcelon

## 189. Special Topics in Critical Gender

 Studies (4)Lecture/discussion-4 hours. Prerequisite: one course specified for the Women's Studies major. Indepth examination of a women's studies topic related to the research interests of the instructor. May be repeated one time for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, WE. -I.

## 190. Senior Seminar (4)

Seminar-4 hours. Prerequisite: senior standing in Women's Studies. Capstone course for senior Women's Studies majors, which focuses on current issues on feminism as they impact theory, public policy, and practice. GE credit: ArtHum or
SocSci | ACGH, AH or SS, DD. - III. (III.)

## 191. Capstone Seminar (4)

Seminar-4 hours. Prerequisite: course 104 or Tex tiles and clothing 107, and course 194HA, course 199, or Textiles and Clothing 199, or consent of instructor. Revision, completion, and presentation of senior research or creative project. Creating a multimedia Web site for publishing research and creative projects. GE credit: ArtHum or SocSci,
Wrt | ACGH, AH or SS, DD, WE.-III. (III.) Kaiser
192. Internship in Women's Studies (1-12) Internship-3-36 hours; written report. Prerequisite: completion of a minimum of 84 units and consent of instructor; enrollment dependent on availability of intern positions with priority to Women's Studies majors. Supervised internship and study in positions/institutional settings dealing with genderrelated problems or issues, as for example, a women's center, affirmative action office, advertising agency, or social welfare agency. Final written report on internship experience. (P/NP grading only.) - Constable, Craig, Ho, Kaiser, Nettles-Barcelón, Swain

## 193. Feminist Leadership Seminar (2)

 Seminar-2 hours. Prerequisite: course 50, 192. Use feminist methods to critically reflect on the ethical, methodological and strategic aspects of an organization, project, campaign, movement or other social change initiative. May be repeated for credit. Offered irregularly. (P/NP grading only.) GE credit: ArtHum or SocSci ACGH, AH or SS, DD, WE.(III.)194HA-194HB. Senior Honors Project in Women's Studies (4-6)
Independent study - 12 hours. Prerequisite: senior standing, Women's Studies major, and adviser's approval. In consultation with an adviser, students complete a substantial research paper or significant creative project on a Women's Studies topic. (Deferred grading only, pending completion of sequence.) GE credit: ArtHum or SocSci| AH or SS WE. - Constable, Craig, Ho, Joseph, Kaiser, Mama, Nettles-Barcelón

## 195. Thematic Seminar in Critical Gender and Women's Studies (4)

Seminar-4 hours. Prerequisite: course 50, 60. Limited enrollment. Group study of a topic, issue or area in feminist theory and research involving intensive reading and writing. May be repeated for credit. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.

197T. Tutoring in Women's Studies (1-4)
Tutoring -3-12 hours. Prerequisite: upper division standing and consent of director. Leading small, voluntary discussion groups affiliated with a Women's Studies course. May be repeated for credit for a total of 8 units. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.) - Constable, Joseph Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

## 199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: upper division standing; consent of instructor. (P/NP grading only.) - Constable, Joseph, Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

## Graduate

200A. Current Issues in Feminist Theory (4)
Seminar-4 hours. Current issues in feminist theory techniques employed to build feminist theory in various fields. - I. (I.) Ho
200B. Problems in Feminist Research (4)
Seminar-4 hours. Prerequisite: course 200A with a grade of $\mathrm{B}+$ or better. Application of feminist theoretical perspectives to the interdisciplinary investigation of a problem or question chosen by the instructor(s) May be repeated for credit when subject area differs. - II. (II.) Mama
201. Special Topics in Feminist Theory and Research (4)
Lecture/discussion-4 hours. Explores in depth a topic in feminist theory and research related to the research interests of the instructor. May be repeated for credit when topic differs. Limited enrollment. (III.) Constable, Craig, Ho, Joseph, Kaiser, Mama Nettles-Barcelón, Swain
250. Cultural Study of Masculinities (4) Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and nationa identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structures. (Same course as American Studies 250.) Craig, Ho
299. Special Study for Graduate Students (1-12)
S/U grading only.) - Constable, Craig, Ho, Joseph, Kaiser, Nettles-Barcelón, Swain
299D. Dissertation Research and Writing (4)

Prerequisite: courses 200A and 200B; fulfillment of course requirements for the DE in Feminist Theory and Research, advancement to candidacy. ( $\mathrm{S} / \mathrm{U}$
grading only.) - Constable, Ho, Joseph, Kaiser, Kaplan, Kuhn, Mena, Nettles-Barcelón, Swain

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.) Constable, Craig, Ho, Joseph, Kaiser, Kuhn, Mama, Mena, Nettles-Barcelón, Swain

## Zoology

See Evolution and Ecology, on page 308.

GENERAL EDUCATION OPTIONS/COURSES

## NEW GENERAL EDUCATION COURSES; FALL 2011 AND ON

The following section pertains to students who matriculated to UC Davis for the first time in Fall 2011 or later. Students who matriculated prior to Fall 2011 should refer to the Former General Education Courses; Pre-Fall 2011, on page 576.

For the most up-to-date General Education courses, use the class search tool at http://classes.ucdavis.edu/.

## TOPICAL BREADTH

These courses satisfy the GE requirement for Topical Breadth.

## FORMER GENERAL EDUCATION COURSES; PRE-FALL 2011

The following section pertains to students who matriculated to UC Davis prior to Fall 2011. Students who matriculated for the first time in Fall 2011 or later should refer to the New General Education Courses; Fall 2011 and On, on page 552.

For the most up-to-date General Education courses, use the class search tool at http://classes.ucdavis.edu/.

## TOPICAL BREADTH

These courses provide GE credit for topical breadth. Many of these courses also satisfy the GE requirement for social-cultural diversity (indicated by $\mathbf{D}$ ) and/or provide GE credit for writing experience (indicated by $\mathbf{W}$ ). Complete lists of the courses that satisfy the social-cultural diversity requirement and the courses that provide writing experience credit follow this list.

## TOPICAL BREADTH ASSIGNED SUBJECT AREAS FOR MAJORS AND MINORS; PRE-FALL 2011

The following section only pertains to students who matriculated to UC Davis prior to Fall 2011.

## Arts \& Humanities

## Majors

African American and African Studies
American Studies
Art History
Art Studio
Asian American Studies
(Humanities emphasis)
Chicana/Chicano Studies (Cultural emphasis)
Chinese
Classical Civilization
Comparative Literature
Design
Dramatic Art
English
Film Studies
French
German
History
Italian
Japanese
Landscape Architecture
Medieval and Early Modern Studies
Music
Native American Studies
Philosophy
Religious Studies
Russian
Spanish
Technocultural Studies
Women's Studies

## Minors

African American and African Studies
American Studies
Art History
Art Studio
Asian American Studies
Chicana/Chicano Studies
Chinese
Classical Civilization
Comparative Literature
Dramatic Art
English
Film Studies
French
German
Global and International Studies
(Arts and Humanities Emphasis)

## Greek

History
Italian
Japanese
Jewish Studies
Landscape Restoration
Latin
Luso-Brazilian Studies
Medieval and Early Modern Studies
Music

Native American Studies
Philosophy
Professional Writing
Religious Studies
Russian
Sexuality Studies
Social and Ethnic Relations
Spanish
Women's Studies

## Science \& Engineering

## Majors

Agricultural \& Environmental
Education
Animal Biology
Animal Science
Animal Science \& Management
Anthropology (B.S.degree only)
Applied Mathematics
Applied Physics
Atmospheric Science
Biochemistry and Molecular Biology
Biological Sciences
Biotechnology
Cell Biology
Chemistry
Clinical Nutrition
Computer Science
Ecological Management and Restoration
Engineering (all majors)
Entomology
Environmental Horticulture \& Urban Forestry
Environmental Science \& Management
Environmental Toxicology
Evolution, Ecology \& Biodiversity
Exercise Biology
Fiber and Polymer Science
Food Science
Genetics
Geology
Hydrology
Mathematical and Scientific Computation
Mathematical Analytics and Operations Research
Mathematics
Microbiology
Natural Sciences
Neurobiology, Physiology, and Behavior
Nutrition Science
Physics
Plant Biology
Plant Sciences
Psychology (B.S. degree)
Statistics
Sustainable Agriculture \& Food Systems
Technology Management

Viticulture \& Enology
Wildlife, Fish, \& Conservation
Biology

## Minors

Agri Computing \& Info Systems
Agricultural Pest Management
Agricultural Systems \&
Environment
Animal Science-Animal Biology
Animal Science-Animal Genetics
Animal Science-Aquaculture
Animal Science-Dairy/Livestock
Animal Science-Equine
Anthropology (Evolutionary emphasis)
Apiculture
Applied Computing \& Info Systems
Atmospheric Science
Avian Sciences
Biological Sciences
Chemistry
Community Nutrition
Computer Science
Construction Engineering and Management
Engineering (all majors)
Environmental Geology
Environmental Horticulture
Environmental Toxicology
Exercise Biology
Fiber and Polymer Science
Forensic Entomology
Fungal Biology \& Ecology
Geographic Information Systems
Geographic Studies
Geology
Geophysics
Hydrologic Science
Hydrology
Insect Biology
Insect Ecology \& Evolution
International Science Studies
Landscape Restoration
Mathematics
Medical-Veterinary Entomology
Nematology
Nutrition Science
Nutrition and Food
Oceanography
Physics
Plant Biology
Precision Agriculture
Quantitative Biology and
Bioinformatics
Science and Society
Soil Science
Statistics
Watershed Science
Wildlife, Fish, and Conservation
Biology

## Social Sciences

## Majors

Anthropology (A.B. degree)
Asian American Studies (Social Science emphasis)
Chicana/Chicano Studies (Social/ Policy Studies emphasis)
Communication
Community and Regional Develop
East Asian Studies
Economics
Environmental Policy Analysis \&
Planning
Human Development
International Agricultural
Development
International Relations
Linguistics
Managerial Economics
Middle East/South Asia Studies
Political Science
Political Science-Public Service
Psychology (A.B. degree)
Science \& Tech Studies
Sociology
Sociology-Organizational Studies
Textiles \& Clothing

## Minors

Aging and Adult Development
Anthropology (General emphasis)
Anthropology (Sociocultural emphasis)
Coaching Principals and Methods
Community Development
Contemporary Leadership
East Asian Studies
Economics
Education
Energy Policy
Environmental Policy Analysis
Global and International Studies
(Social Science emphasis)
History \& Philosophy of Science
Human Development
India and South Asia Studies
International Agricultural
Development Latin American
and Hemispheric Studies
Linguistics
Linguistics for Language Teachers
Managerial Economics
Middle East/South Asia Studies
Political Science
Psychology
Science and Society
Sociology
Technology Management
Textiles \& Clothing
War-Peace Studies

[^20]
## GENERAL EDUCATION THEME OPTIONS

The following section only pertains to students who matriculated to UC Davis prior to Fall 2011.
General Education theme options are sets of GE courses sharing a common intellectual theme. These GE theme options are not a separate element of the GE requirement, but a way of selecting your GE courses so that you may benefit from a coherent focus of study while completing the GE requirement. Completion of a theme satisfies the GE requirement for students with majors assigned to the GE topical breadth area of Arts and Humanities. Students with majors assigned to the topical breadth area of either Science and Engineering or Social Science will need to complete additional GE courses in Arts and Humanities to satisfy the campus GE requirement.

## Global Population and Environmental Issues

For centuries, there have been concerns and predictions about population growth and its potential effects on the environment and the quality of life. Perspectives on population and environmental issues often vary based on such factors as gender, social class, culture, nation, race/ethnicity, and religion. In this group of courses, students will learn about the complex interplay among environmental, economic, and ethical issues through the study of global population patterns. They will learn how science addresses the use of natural resources by humans, along with the fundamentals of environmental impacts such as global warming. This option group of courses explores diverse perspectives on global population and environmental issues by examining biological, physical, and social processes that influence the everyday lives of people around the world.
Topics might include the social, economic, and environmental challenges of population growth; and the ethics and dilemmas of natural resource use.

| Global Population <br> Atmospheric Science 5 [or 10] | SciEng, Wrt |
| :--- | :--- |
| Human Development 117 | SciEng, Wrt |

## Biodiversity and Cultural Diversity

The nations with the greatest biodiversity often have tremendous ethnic and cultural diversity. This option examines diversity in many interrelated contexts: biological diversity and the impact of contemporary humans; values and cultural practices in regard to production and consumption; the clothes people wear; creation and use of social spaces; and the preservation of genetic resources for food, fiber, and pharmaceuticals.
Topics might include conservation biology; integration of human and natural systems; cultural expression through clothing and appearance; and discussion of what are cultural and social rights.

| Biodiversity and Cultural Diversity |  |
| :--- | :--- |
| Wildlife, Fish and Conservation Biology 10 | SciEng, Div, Wrt |
| Plant Biology 11 | SciEng, Wrt |
| Textiles and Clothing 7 | SocSci, Div, Wrt |
| Community and Regional Development 2 | SocSci, Div, Wrt |
| Landscape Architecture 2 | SocSci, Wrt |

## Food and Fiber

This option focuses on food and fiber systems, from their plant, animal , or synthetic sources to their ultimate use by humans for health, safety, communication, and pleasure. Understanding these systems enables students to see the connections between the food and clothes that are part of our everyday lives and the scientific, social, and cultural issues that make them so significant to society as a whole.
Topics might include food and clothing safety, quality, and availability; media and consumer perceptions; and cultural histories, values, and meanings.

| Science and Society 1 | SciEng or SocSci, |
| Viticulture and Enology 3 | Div, Wrt |

## Changing Agriculture

Changing demographics, environmental issues, and social-political trends in California all play a role in public perceptions and policies related to our food and fiber systems, natural resources, and community values. These perceptions, policies, and values need to be critically examined in the context of larger global economic trends and environmental health and safety. In this group of courses, students can explore a range of challenging issues related to the complex interplay between rural and urban needs and values.

Topics might include holistic approaches to agriculture; international migration and agricultural development; and how plants and animals influence the course of history.

[^21]

APPENDIX

## RESIDENCE FOR TUITION INFORMATION

## Policy Governing Residence

The determination of residence for tuition purposes at the University of California is governed by the UC Residence Policy and Guidelines. Under the UC Residency Policy, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors and that establish exemptions. The UC Residence Policy establishes the Residence Determination Date for each term as the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester. All of the UC requirements for residency must be met prior to the Residence Determination Date for classification as a resident. Documentary evidence may be required and all relevant indications will be considered in determining residence classifications.
You are cautioned that this summary is not a complete explanation of the regulations regarding residence. Please note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date.

## Office of the General Counsel

Requirements for Resident Classification, Rules Applying to Minors and Exemptions from Nonresident Supplemental Tuition can be found published as the "UC Residency Policy and Guidelines" available at Office of the General Counsel website under Educational Affairs and Campus Services.
Read the full text of UC Residency Policy-Residency
Guidelines for Purposes of Tuition and Fees at http://www.ucop.edu/ general-counsel/.

## Nonresident Supplemental Tuition Fee for Nonresident Students

If you have not met all of the UC requirements for residency prior to the Residence Determination Date each term in which you propose to attend the University, you must pay Nonresident Supplemental Tuition in addition to all other fees.

## Resident Determination Process

California residence for tuition purposes is determined for each student under the UC Residence Policy and Guidelines based on information provided to a campus Residence Deputy on the Statement of Legal Residence. Additional information and documentation in support of your claim of resident status for tuition purposes may be requested as needed. Applicants and students are
responsible for submitting ALL RELEVANT DOCUMENTATION AND INFORMATION to the campus Residence Deputy in support of their in-state residency request. Information or documents requested but not made available to the Residence Deputy will NOT be considered or reviewed on appeal.

## Incorrect Classification

If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all Nonresident Supplemental Tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the campus Residence Deputy.

## Appeals

Any student, following a final decision on their residence classification by the Residence Deputy may apply for an appeal with the Office of the General Counsel within 30 days of notification of the Residence Deputy's final decision.

All inquiries regarding the appeal process should be addressed to the Office of the General Counsel at Residency.Appeal@ucop.edu.

## Petitions for Classification to Resident Status

Nonresident students may apply for a change of classification to resident status once all the requirements have been met. Petitions for Classification to Resident Status from continuing UC Davis students classified as nonresident for tuition purposes in a prior quarter must be filed during the filing period and no later than the published deadline for the term they wish to classify as a Resident. Deadline exceptions will only be made in the cases of a documented medical illness, death in the immediate family, or an administrative error on the part of the university. Petition supporting documents will not be accepted after the 10th day of instruction unless an extension has been granted by a Residence Deputy.

## Inquiries

Inquiries regarding residence requirements, determination, classification and recognized exceptions should be directed to Residence Deputy, Office of the University Registrar, One Shields Avenue, Davis, California 95616 or residencedeputy@ucdavis.edu.
Inquiries regarding the UC Residence Policy and Guidelines or appeals, should be directed to Office of the General Counsel at Residency.Appeal@ucop.edu.
RESIDENCE DEPUTIES ARE THE ONLY AUTHORIZED UNIVERSITY PERSONNEL TO PROVIDE INFORMATION REGARDING RESIDENCE REQUIREMENTS.

## UNIVERSITY POLICY ON NONDISCRIMINATION, SEXUAL HARASSMENT/SEXUAL ASSAULT, DISABILITY ACCOMMODATIONS, STUDENT RECORDS AND PRIVACY

Nondiscrimination. The University of California, in accordance with applicable Federal and State law and University policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (including pregnancy, childbirth, and medical conditions related to pregnancy or childbirth), physical or mental disability, age, medical condition (cancerrelated or genetic characteristics), ancestry, marital status, citizenship, sexual orientation, or service in the uniformed services (includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services) status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment, including sexual assault. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Discrimination, Harassment, or Arbitrary Treatment. If students have questions about student-related nondiscrimination policies or concerns about possible discrimination, harassment, or arbitrary treatment, they may contact Student Judicial Affairs for information and assistance 530-752-1128. Additional resources for students include the UC Davis Chief Compliance Officer (ADA and Title IX Officer) 530-752-9466 or the dean's office for their college. Graduate students may also contact the Office of Graduate Studies 530-752-0650 or the Graduate Students Association 530-752-6108. Students are encouraged to seek assistance as soon as possible, as time limits may apply to grievance processes.
Campus policies provide for a prompt and effective response to student complaints. This response may include early resolution procedures or, as appropriate, an administrative review or investigation. The student will be informed of the results of the review.
Sexual Harassment/Sexual Assault. Sexual harassment and sexual assault are prohibited by law and by university policy and will not be condoned. Campus policy (PPM Section 380-12 at http:// manuals.ucdavis.edu/ppm/380/380-12.pdf) describes campus procedures for responding to reports of sexual harassment and sexual assault. Under this policy, sexual assault is considered an extreme form of sexual harassment. UC Davis' response to reports of sexual harassment and sexual assault may include interim actions, early resolution, and formal investigation procedures. If a complaint of sexual harassment or sexual assault is substantiated, the campus will take appropriate remedial action, including discipline. The Harassment and Discrimination Assistance and Prevention Program 530-752-9255 works with students to resolve complaints of sexual harassment, including sexual assault; and provides referrals to other campus resources. Students may report sexual harassment to deans, supervisors, managers, the Campus Sexual Harassment Officer and other campus officials, including Student Judicial Affairs, Student Housing, and the Chief Compliance Officer (Title IX Officer). With the exception of certain confidential resources, University officials receiving a report of sexual harassment or sexual assault must immediately consult with the Sexual Harassment Officer. Students may seek confidential advice and support from

Counseling and Psychological Services 530-752-0871, the Campus Violence Prevention Program 530-752-3299, the Lesbian, Gay, Bi-Sexual, and Transgender, Queer, Intersex Asexual Resource Center 530-752-2452, and the Women's Resources and Research Center 530-752-3372. Consultation with these resources will not lead to an official report unless additional action is taken by the individual seeking advice.
Accommodations for Students with Disabilities. Students with documented disabilities may be entitled to reasonable accommodations to gain access to the University's academic programs. More information about academic accommodations can be obtained by contacting the Student Disability Center 530-752-3184 or http://sdc.ucdavis.edu. Questions or concerns about accommodations that are not related to academic programs should be directed to the UC Davis Compliance Director (ADA Officer) 530-752-9466, For complaints of alleged discrimination on the basis of disability under PPM Section 280-05, contact Student Judicial Affairs 530-752-1128 or the UC Davis Compliance Director.
Disclosures from Student Records. Students have the right to review records that relate to themselves in their capacity as students and to request corrections of records believed to be inaccurate. Most disclosures from student records to outside parties require prior consent from the student.
Under the Family Educational Rights and Privacy Act of 1974 and University and campus policies, UC Davis students have the following rights:
A. To review their own student records within 45 days after the student submits a written request for access to the University Registrar or other department in possession of the records. That office will make arrangements for access and notify the student when and where the records may be reviewed. If the records requested are in a different office, the request will be redirected and the student notified. The campus maintains several types of student records in various locations. Questions about how to obtain records should be referred to Student Judicial Affairs at 530-752-1128.
B. To request amendment of their own student records if they believe the records are inaccurate or misleading, students should submit a written request to the office that maintains the records specifying the portion of the record the student wants changed and why it is believed to be inaccurate or misleading. That office has 45 days to determine whether the record should be changed and notify the student of the decision, If a student wishes to contest this decision, the student should contact Student Judicial Affairs.
C.To restrict the disclosure of personally identifiable information contained in student records, except when law and policy permit disclosure without consent. Examples of circumstances in which the student's consent is not required for disclosure of student records include the following:

- Disclosure of "directory" or "public" information including the student's name; local and/or permanent address(es), email addresses and telephone number(s); dates of attendance; major field(s) of study [major, minor, concentration, specialization, and similar designations]; grade level; enrollment status (undergraduate/graduate, full time or
part time, number of enrolled course units) degrees and honors received; most recent previous educational institution attended; participation in officially recognized activities, including Intercollegiate Athletics (ICA), and the name, weight and height of participants on ICA teams.
- To prevent disclosures of telephone numbers and/or addresses, students must submit a Directory Confidential Update Form to the Office of the University Registrar. To prevent disclosure of their email address, students must follow instructions at https://computingaccounts.ucdavis.edu/, and select the Change your directory information option.
- Students may designate all information about themselves as confidential and withhold it from public disclosure by filing a request with the Office of the University Registrar in 12 Mrak Hall. If all information is designated confidential, UC Davis cannot respond to requests for verification of student status or degrees, make public any honors, or include the student's name in the commencement program without the student's specific written consent.
- Disclosure to campus officials (for example faculty, staff, student employees, or those under contract with the University) having a legitimate educational interest in the records. Legitimate educational interest means the information is relevant and necessary to a task or determination that is (a) an employment responsibility or an assigned subject matter for the inquirer and/or related to (b) the inquirer's participation in the student's education; (c) the discipline of a student; or (d) providing a service or benefit related to a student or student's family (such as health care, counseling, job placement, or financial aid).
- Disclosure of appropriate student records, including academic records, disciplinary records, and other student records, to other educational institutions in which a student seeks or intends to enroll, or is currently enrolled, so long as the disclosure is for purposes related to the student's enrollment or transfer
For more information, see UC Davis Policy and
Procedure Manual Section 320-21 at http://manuals.ucdavis.edu/ ppm/320/320-21.pdf.
Contact Student Judicial Affairs 530-752-1128 for questions about these rights and requirements. Student complaints regarding alleged violations of privacy rights should be submitted to Student Judicial Affairs.
Students may also contact the U.S. Department of Education concerning alleged violations of these requirements, addressed to the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC. 20202-4605. See Section 99.63 at http://www.ed.gov/policy/gen/guid/ fpcolferpa/index.html.
Social Security Numbers. A student's Social Security number is used to verify personal identity in the UC Davis Student Records System. Students are mandated to disclose their social security number to UC Davis. In compliance with state law, Social security numbers are confidential and are not used as student identifiers.

Release of Registration Material and Grades. In compliance with student privacy rights under federal and state law and University policy, the Office of the University Registrar may not release a students grades, registration material, and/or identification card to anyone other than the student without specific written authorization signed by the student. The person to whom the information, material, or card is released must be designated by name and must present proof of identity. The signed authorization is kept in the "Record of Disclosures" in the student's file.

## CAMPUS SECURITY, CRIME AWARENESS, AND ALCOHOL AND DRUG ABUSE PREVENTION

In accordance with federal law, UC Davis annually provides students and employees with information regarding campus security, crime statistics, and alcohol and drug abuse prevention, pursuant to the Student Right to Know and Campus Security Act of 1990 and the Drug Free Schools Act of 1989. The UC Davis Police and Campus Administration make continual efforts to reduce crime on campus. A well-informed community is better served and safer.
For a copy of the complete UC Davis security and crime prevention report, including crime statistics, campus security measures and crime reporting procedures, applicants for admission or prospective employees may contact the UC Davis Campus Violence Prevention Office, located in the UC Davis Police Department, contact 530-752-3299, or mkspangler@ucdavis.edu.

## ACCREDITATION

The University of California, Davis is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501 (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

UC Davis is also accredited by the Accreditation Board for Engineering and Technology, Accreditation Council for Graduate Medical Education, Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), American Association for Accreditation of Laboratory Animal Care, American Bar Association, American Chemical Society, American Dietetic Association, American Psychological Association, American Society of Crime Lab Directors Laboratory Accreditation Board (ASCLD/LAB); American Society of Landscape Architects, Association of American Law Schools, Association of American Medical Colleges, Association to Advance Collegiate Schools of Business,; Commission on Collegiate Nursing Education; Commission on Teacher Credentialing, Computer Science Accreditation Commission, Council on Education and Public Health, the Council on Education of the American Veterinary Medical Association, Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL), and the Liaison Committee on Medical Education.
Students interested in reviewing WASC accreditation documents may do so at $h t t p: / /$ wasc.ucdavis.edu. Those interested in reviewing profession-specific accreditation documents should contact the relevant Dean's office.

## THE BOARD OF REGENTS

Governance of the University of California is entrusted to a corporation called the Board of Regents. Of the individuals composing the board, eighteen are California citizens appointed by the governor, and seven, including the president of the University and the governor of California, serve ex officio. A Student Regent is selected each year from a list of names submitted to the board by the Student Body Presidents' Council.
The Regents delegate authority in academic matters to the Academic Senate of the faculty, which determines academic policy and supervises the instructional activities of the entire University. All of the permanent faculty, as well as key administrators, are members of the Senate.

The Regents delegate authority for the organization of the University to the president. Janet Napolitano is President and head of the Universitywide administration. Authority for the administration of each campus is delegated to a chancellor.

## THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

## Regents Ex Officio

Jerry Brown
Governor of California and President of the Regents
Gavin Newsom
Lieutenant Governor of California
John A. Pérez
Speaker of the Assembly
Tom Torlakson
State Superintendent of Public Instruction
Janet Napolitano
President of the University
Ken Feingold
President of the Alumni Associations of the University of California
Van Schultz
Vice President of the Alumni Associations of the University of California

## Appointed Regents

Current term expires on March 1 of year indicated.
Richard C. Blum, 2026
William De La Peña, 2018
Russell Gould, 2017
Eddie Island, 2017
George Kieffer, 2021
Sherry L. Lansing, 2022
Monica Lozano, 2022
Hadi Makarechian, 2020
Norman J. Pattiz, 2026
Bonnie Reiss, 2020
Fred Ruiz, 2016
Richard Sherman, 2025
Bruce D. Varner, 2018
Paul Watcher, 2016
Charlene Zettel, 2021
Student Regent
Cinthia Flores, 2014
Faculty Representatives
William Jacob, 2014
Mary Gilly, 2015

## Principal Officers of the Regents

## Charles F. Robinson

General Counsel
Jagdeep Singh Bachher Chief Investment Officer
Marsha Kelman Secretary and Chief of Staff
Sheryl Vacca
Chief Compliance and Audit Officer

## ADMINISTRATIVE OFFICERS OF THE UNIVERSITY

Janet Napolitano
President of the University
Aimee Dorr
Provost and Executive Vice President—Academic Affairs
Nathan Brostrom
Executive Vice President—Business Operations
Kimberly S. Budil Vice President-Laboratory Management
Peter J. Taylor Executive Vice President-Chief Financial Officer
Daniel M. Dooley
Senior Vice President-External Relations
Patrick J. Lenz Vice President—Budget and Capital Resources
John D. Stobo
Senior Vice President—Health Sciences and Services
Judy Sakaki
Vice President—Student Affairs
Anita Gursahani
Associate Vice President—Laboratory Operations
David McCallen Acting Associate Vice President—Laboratory Programs
Steven V.W. Beckwith
Vice President-Research and Graduate Studies

## UNIVERSITY CHANCELLORS

Nicholas B. Dirks Chancellor at Berkeley
Linda P. B. Katehi Chancellor at Davis
Michael V. Drake Chancellor at Irvine
Gene D. Block Chancellor at Los Angeles
Dorothy Leland Chancellor at Merced
Kim A Wilcox Chancellor at Riverside
Pradeep K. Khosla Chancellor at San Diego
San Hawgood Chancellor at San Francisco

Henry T. Y. Yang Chancellor at Santa Barbara

George R. Blumenthal
Chancellor at Santa Cruz

## ADMINISTRATIVE OFFICERS-UC DAVIS

## Chancellor

Linda P. B. Katehi, Ph.D.
Chancellor Emeriti (and years served)
Larry N. Vanderhoef, Ph.D. (1994-2009)
Theodore L. Hullar, Ph.D. (1987-1994)
Provost and Executive Vice Chancellor
Ralph J. Hexter, Ph.D.
Vice Chancellors
Harris A. Lewin, Ph.D. Vice Chancellor-Research
John Meyer, M.P.A. Vice Chancellor-Administrative and Resource Management
Julie Ann Freischlag, M.D.
Vice Chancellor-Human Health Sciences
Shaun B. Keister, Ph.D.
Vice Chancellor—Development and Alumni Relations
Adela de la Torre, Ph.D. Vice Chancellor—Student Affairs

## Vice Provosts

Maureen L. Stanton, Ph.D. Vice Provost—Academic Affairs
William B. Lacy, Ph.D. Vice Provost-University Outreach and International Programs
Prasant Mohapatra, Ph.D. Interim CIO and Vice Provost—Information and Educational Technology
Patricia A. Turner, Ph.D. Vice Provost—Undergraduate Education

Associate Chancellor
Karl M Engelbach, M.B.A. Associate Chancellor-Office of the Chancellor
Luanne M. Lawrence, B.S., M.Ed. Associate Chancellor-Strategic Communications
Associate/Assistant Vice Chancellors and Vice Provosts
Rahim Reed, M.P.A., J.D.
Associate Executive Vice Chancellor-Campus Community Relations
Emily Galindo, M.B.A. Associate Vice Chancellor-Student Affairs (Divisional and Auxiliary Services)
Milton Lang, Ed.D.
Associate Vice Chancellor—Student Affairs (Student Life, Campus Community and Retention Services
Lora Jo Bossio, M.A. Associate Vice Chancellor-Student Affairs (Enrollment, Wellness and Technology Services)
J. Michael Allred, M.B.A. Associate Vice Chancellor-Administrative and Resource Management (Accounting and Financial Services-Finance/Controller)
Jill Parker, B.S. Associate Vice Chancellor—Administrative and Resource Management (Safety Services)
Susan Gilbert, M.S.
Associate Vice Chancellor-Administrative and Resource Management (Human Resources)
Kelly Ratliff, M.B.A.
Associate Vice Chancellor-Administrative and Resource Management (Budget and Institutional Analysis)
Cindy Kiel, J.D.
Executive Associate Vice Chancellor—Research Administration
Paul Dodd, Ph.D.
Associate Vice Chancellor—Research (Interdisciplinary Research and Strategic Initiatives)
Dushyant Pathak
Associate Vice Chancellor-Research (Technology Management and

Corporate Relations
Heather Young, Ph.D., R.N., F.A.A.N. Associate Vice Chancellor-Betty Irene Moore School of Nursing
Karl Mohr, M.A.
Assistant Executive Vice Chancellor-Office of the Provost
Marjorie M. Dickinson, B.A.
Assistant Chancellor-Government and Community Relations
Richard R. Engel, M.A.
Assistant Vice Chancellor-Alumni Relations
Allen Tollefson
Assistant Vice Chancellor-Administrative and Resource Management (Facilities Management)
Clayton Halliday, A.I.A.
Assistant Vice Chancellor—Administrative and Resource Management (Design and Construction Management-Campus Architect)
Diane Davies-Conley, C.P.A., M.B.A.
Assistant Vice Chancellor-Administrative and Resource Management (Chief Operating Officer)
Robert Segar, M.L.A.
Assistant Vice Chancellor—Administrative and Resource Management (Campus Planning and Community Resources)
Sid England, Ph.D.
Assistant Vice Chancellor-Administrative and Resource Management
(Environmental Stewardship and Sustainability)
Adrienne Martin, Ph.D
Associate Vice Provost-University Outreach and International Programs (International Programs)
Marc Schenker, M.D., M.P.H. Associate Vice Provost—University Outreach and International Programs (Outreach and Engagement)
Gary Ford, Ph.D.
Associate Vice Provost—Undergraduate Education
Robert Kerr, Ph.D.
Assistant Vice Provost—University Outreach and International Programs
(Development)
Chief Campus Counsel
Jacob A. Appelsmith, J. D.

## Chief Executive Officer-Medical Center

Ann Madden Rice, M.A.

## Ombuds

Susan Kee-Young Park, J.D.
University Librarian
MacKenzie Smith
Registrar
Elias S. Lopez, Ph.D.

## Directors

Roger Beachy, Ph.D.
Director, World Food Center
Terrance J. Tumey
Director, Intercollegiate Athletics
Jeremiah Maher
Director, Internal Audit Services
Trina Wilson
Interim Director, Financial Aid
Richard R. Engel, M.A.
Executive Director, Cal Aggie Alumni Association
Emily Galindo, M.B.A.
Executive Director, Student Housing
Michelle Famula, M.D.
Executive Director, Student Health \& Wellness Center
Elias S. Lopez, Ph.D.
Executive Director, Student Affairs Office of Technology
Don Roth, Ph.D.
Executive Director, Mondavi Center

## College of Agricultural and Environmental Sciences

Helene Dillard, Ph.D., Dean
Vacant, Executive Associate Dean
Jan Hopmans, Ph.D., Associate Dean
Mary Delany, Ph.D., Associate Dean
Vacant, Associate Dean-Undergraduate Academic Programs
James E. Hill, Ph.D., Associate Dean-International Programs
Tom Kaiser, Executive Assistant Dean-Administration
Julie Fritz-Rubert, Assistant Dean-College Personnel
Christine Schmidt, Assistant Dean-College Advancement

## College of Biological Sciences

James E.K. Hildreth, Ph.D., M.D., Dean
Susan L. Keen, Ph.D., Associate Dean-Undergraduate Academic
Programs
Peter Wainwright, Ph.D., Executive Associate Dean
John Harada, Ph.D., Associate Dean for Academic Affairs
Donna Watkins Olsson, M.P.P., Executive Assistant Dean
Dan Isidor, M.S., Assistant Dean—Development and External Relations

## College of Engineering

Enrique J. Lavernia, Ph.D, Ph.D, Dean
Bruce Hartsough, Ph.D., Associate Dean—Academic Personnel and Planning
Jean S. VanderGheynst, Ph.D., Associate Dean—Graduate Studies and Research
Jean-Pierre Delplanque, Ph.D., Associate Dean-Undergraduate Studies
Jeff Lefkoff, Ph.D., M.B.A., Executive Assistant Dean—Administration and Finance
Bruce White, Ph.D, Executive Associate Dean

## College of Letters and Science

Vacant, Dean-Division of Humanities, Arts, and Cultural Studies
Ian Blake, Assistant Dean-Division of Humanities, Arts, and Cultural Studies
Alexandra Navrotsky, Ph.D., Interim Dean—Division of Mathematical and Physical Sciences
Tracy Ligtenberg, Assistant Dean—Division of Mathematical and Physical Sciences
George R. Mangun, Ph.D., Dean-Division of Social Sciences
Steven Roth, M.B.A., M.A., Assistant Dean-Division of Social Sciences
James S. McClain, Ph.D., Associate Dean-Undergraduate Education
Maureen Miller, Assistant Dean-College Relations and Development

## School of Education

Harold G. Levine, Ph.D., Dean
Paul E. Heckman, Ph.D., Associate Dean
Damian Chapman, MBA, Assistant Dean-Finance, Administration and Strategy Development
Vacant, Executive Director, Development and External Relations

## Graduate School of Management

Steven C. Currall, Ph.D., Dean
Kimberly Elsbach, Ph.D., Associate Dean—Academic Affairs
Paul Griffin, Ph.D., Associate Dean-Academic Personnel
Carl Gayden, M.B.A., Assistant Dean-Business and Finance and Strategy
Judy Nagai, Ph.D., Assistant Dean—Development and External Relation
James Stevens, M.B.A., Assistant Dean—Student Affairs

## Graduate Studies

Jeffery Gibeling, Ph.D., Vice Provost-Graduate Education and DeanGraduate Studies
Lenora Timm, Ph.D., Associate Dean
Chris Calvert, Ph.D., Associate Dean
Richard Shintaku, Ph.D., Assistant Dean

## School of Law

Kevin Johnson, J.D., Dean
Vikram D. Amar, J.D., Associate Dean-Academic Affairs
Craig Compton, J.D., Assistant Dean-Career Services
Karen L. Charney, Senior Director of Development
Hollis L. Kulwin, J.D., Senior Assistant Dean—Student Affairs
Kristen Mercado, J.D., Assistant Dean-Admission and Financial Aid
Brett C. Burns, Senior Assistant Dean-Administration

## School of Medicine

Julie Ann Freischlag, M.D., Vice Chancellor of Human Health Sciences and Dean
Fred Meyers, M.D., M.A.C.P., Vice Dean
David Acosta, M.D., Associate Vice Chancellor for Equity, Diversity and Inclusion
Thomas Nesbitt, M.D., M.P.H., Associate Vice Chancellor for Strategic
Technologies and Alliances
Heather Young, Ph.D., R.N., F.A.A.N., Associate Vice Chancellor for Nursing
Aaron Bair, M.D., M.S., Associate Dean for Continuing Medical Education
Lars Berglund, M.D., Ph.D., Senior Associate Dean for Clinical Research
William Cahill, M.D., Associate Dean for Veterans Affairs
Edward Callahan, Ph.D., Associate Dean for Academic Personnel
Ralph de Vere White, M.D., Associate Dean for Cancer Center
James Goodnight, M.D., Associate Dean for Clinical Affairs and Director of Practice Management Group
Penelope Herbert, M.S., Assistant Dean of Administration
Mark Henderson, M.D., Associate Dean for Admissions and Outreach Lee Jones, M.D., Associate Dean for Student Affairs
Jana Katz-Bell, M.P.H., Assistant Dean for Interprofessional Education Darin Latimore, M.D., Associate Dean for Student and Resident Diversity James Nuovo, M.D., Associate Dean for Graduate Medical Education Andreea Seritan, M.D., Associate Dean for Student Wellness
Mark Servis, M.D., Senior Associate Dean for Curriculum and Competency Development
Frank Sousa, M.D., Assistant Dean for Admissions and Student Development
Ted Wun, M.D., Associate Dean for Research

## Betty Irene Moore School of Nursing

Heather M. Young, Ph.D., R.N., F.A.A.N., Associate Vice Chancellor for Nursing \& Dean
Deborah Ward, Ph.D., R.N., F.A.A.N., Associate Dean for Academics Jill G. Joseph, M.D., Ph.D., M.P.H., Associate Dean for Research Jana Katz-Bell, M.P.H., Assistant Dean for Interprofessional Programs Sallie-Grace Tate, Assistant Dean for Development

## School of Veterinary Medicine

Michael D. Lairmore, D.V.M., Ph.D., Dean
John R. Pascoe, B.V.Sc., Ph.D., Executive Associate Dean
Jan E. Ilkiw, B.V.Sc., Ph.D., Associate Dean-Academic Programs
Terry Lehenbauer, D.V.M., Ph.D., Associate Professor and Director-
Veterinary Medicine Teaching and Research Center, Tulare
Rance LeFebvre, Ph.D., Associate Dean-Student Affairs
K.C. Kent Lloyd, D.V.M., Ph.D., Associate Dean for Research and Graduate Education
W. David Wilson, B.V.M.S., M.R.C.V.S, Associate Dean for Clinical

Programs and Director-Veterinary Medical Teaching Hospital
Donald J. Klingborg, D.V.M., Associate Dean-Extension
Bruno Chomel, D.V.M., M.S., Ph.D., Co-Director-Masters of Preventive Veterinary Medicine Program

## UC Davis Health System Leadership; Medical Center, School of Medicine, Betty Irene Moore School of Nursing

Claire Pomeroy, M.D., M.B.A., Vice Chancellor-Human Health Sciences and Dean
Heather Young, Ph.D., R.N., F.A.A.N., Associate Vice Chancellor-Nursing
Thomas S. Nesbitt, M.D., M.P.H., Associate Vice Chancellor-Strategic Technologies and Alliances
Ann Madden Rice, Chief Executive Officer-UC Davis Medical Center Fred Meyers, M.D., M.A.C.P., Executive Associate Dean
Michael Minear, Chief Information Officer
Timothy Maurice, M.B.A., Chief Financial Officer

UC Davis Extension
Dennis Pendleton, Ph.D., Dean
Rita Bunch, M.B.A., Assistant Dean/COO

## PROPORTION OF UC DAVIS GRADUATES FINDING WORK IN THEIR FIELDS OF CHOICE

The percent of alumni whose full-time job is in the field of their choice is shown by field of study. Figures do not include the five percent of graduates who had not decided on a career field at the time of the survey.

|  | Field of Study ${ }^{2}$, Percentage finding work in field of choice |
| :--- | :--- |
| Agricultural Sciences, 75\% | Humanities, Arts and Cultural Studies, $65 \%$ |
| Biological Sciences, $69 \%$ | Human Sciences, 81\% |
| Engineering, $85 \%$ | Mathematical and Physical Sciences, $79 \%$ |
| Environmental Sciences, $72 \%$ | Social Sciences, $64 \%$ |

## Total, 71\%

'Source: A 2012 survey of June 2010-11 graduates conducted by Institutional Analysis-Student Research and Information. ${ }^{2}$ Fields of Study are groups of related undergraduate majors as organized into UC Davis colleges or divisions.

## RETENTION DATA AND GRADUATION RATES AT UC DAVIS

## Freshmen*

(Retention and graduation rates through Summer 2013 for all undergraduates entering UC Davis as freshmen.)

| Fall Quarter of <br> Initial Enrollment: | Number <br> of Students** | Percent Returned <br> for Second Year | Percent Graduating <br> in Four Years | Percent Graduating <br> in Five Years | Percent Graduating <br> in Six Years |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1998 | 3616 | $90 \%$ | $39 \%$ | $72 \%$ | $78 \%$ |
| 1999 | 3816 | $90 \%$ | $42 \%$ | $75 \%$ | $80 \%$ |
| 2000 | 4319 | $90 \%$ | $43 \%$ | $76 \%$ | $81 \%$ |
| 2001 | 4400 | $90 \%$ | $43 \%$ | $73 \%$ | $79 \%$ |
| 2002 | 4653 | $91 \%$ | $47 \%$ | $77 \%$ | $81 \%$ |
| 2003 | 4775 | $90 \%$ | $50 \%$ | $75 \%$ | $80 \%$ |
| 2004 | 4258 | $91 \%$ | $51 \%$ | $78 \%$ | $82 \%$ |
| 2005 | 4375 | $90 \%$ | $51 \%$ | $77 \%$ | $82 \%$ |
| 2006 | 5505 | $90 \%$ | $52 \%$ | $77 \%$ | $81 \%$ |
| 2007 | 4949 | $90 \%$ | $51 \%$ | $76 \%$ | $81 \%$ |

## Transfer Students

(Retention and graduation rates through Summer 2013 for all undergraduates transferring to UC Davis from California community colleges.)

| Fall Quarter of <br> Initial Enrollment: | Number <br> of Students** | Percent Returned <br> for Second Year | Percent Graduating <br> in Two Years | Percent Graduating <br> in Three Years | Percent Graduating <br> in Four Years |
| :--- | :---: | :---: | :---: | :---: | :---: |
| 2000 | 1596 | $88 \%$ | $39 \%$ | $75 \%$ | $82 \%$ |
| 2001 | 1609 | $89 \%$ | $40 \%$ | $75 \%$ | $83 \%$ |
| 2002 | 1671 | $90 \%$ | $46 \%$ | $78 \%$ | $84 \%$ |
| 2003 | 1583 | $90 \%$ | $47 \%$ | $78 \%$ | $83 \%$ |
| 2004 | 1734 | $89 \%$ | $48 \%$ | $78 \%$ | $85 \%$ |
| 2005 | 1589 | $88 \%$ | $53 \%$ | $79 \%$ | $84 \%$ |
| 2006 | 1618 | $90 \%$ | $49 \%$ | $80 \%$ | $85 \%$ |
| 2007 | 1650 | $88 \%$ | $48 \%$ | $77 \%$ | $84 \%$ |
| 2008 | 1704 | $90 \%$ | $49 \%$ | $80 \%$ | $86 \%$ |
| 2009 | 1990 | $89 \%$ | $48 \%$ | $79 \%$ | $85 \%$ |

Retention is defined as enrollment at the third week census point of the fall term one year from initial fall term.
Graduation is defined as having received a degree from UC Davis (does not include students who transferred to another institution to complete their degree).
*Retention and graduation tracking limited to students enrolled full-time in their initial term of enrollment.
**Students excluded from these counts include those who are now deceased or participated in any of the following: Military Service, Foreign Service, Religious Mission.

    Faculty. The Group includes faculty from 12 departments in five schools and colleges.
    Graduate Study. The Ph.D. program in Animal Behavior is an interdepartmental program focusing on the mechanisms underlying and evolution of behavior, and applications of animal behavior to current problems in conservation biology and animal welfare. The program trains students for teaching and research in a variety of areas, including anthropology, animal science, ecology, entomology, neurobiology, psychology, physiology, veterinary science, wildlife biology, and zoology. Resources available to students, in addition to various departmental facilities, include those of the California National Primate Research Center, Bodega Marine Laboratory, and the UC Natural Reserve System.
