134A. RF/Microwave Systems Design (3) Workshop-3 hours; laboratory - 6 hours. Prerequisites: course 130B or 110B or 150A. Class size limited to 24 students. Board-level RF design,
fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.-I. (I.) Liu, Momeni

134B. RF/Microwave Systems Design (3) Workshop-3 hours; laboratory-6 hours. Prerequisites: course 134A. Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. (Deferred grading only, pending completion of sequence.) $G E$ credit: SciEng | SE.-II. (II.) Liu, Momeni

## 135. Optical Communications I: Fibers (4)

 Lecture-4 hours. Prerequisite: course 130B. Principles of optical communication systems. Planar dielec tric waveguides. Optical fibers: single-mode, multimode, step and graded index. Attenuation and dispersion in optical fibers. Optical sources (LEDs and lasers) and receivers. Design of digital optical transmission systems. GE credit: SciEng | SE.-II. (II.)
## 136A. Electronic Design Project (3)

Workshop-1 hour; laboratory-6 hours. Prerequisite: Computer Science Engineering 30; courses 110A, 150A, 180A. Pass One restricted to major. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. (Deferred grading only, pending completion of sequence.) $G E$ credit: SciEng | SE.-I. (I.)

## 136B. Electronic Design Project (3)

Workshop-1 hour; laboratory-6 hours. Prerequisite: course 136A. Optical, electronic and communi-cation-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.-II. (II.)

## 140A. Principles of Device Physics I (4)

Lecture-3 hours; discussion-1 hour. Prerequisite:
Engineering 17; Physics 9D. Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p -n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals. GE credit: SE, SL.-I, II. (I, II.)
140B. Principles of Device Physics II (4) Lecture-3 hours; discussion-1 hour. Prerequisite: course 140A. Electrical properties, designs, models and advanced concepts for MOS, Bipolar, and Junction Field-Effect Transistors, including scaling, minority-carrier distributions, non-ideal effects, and device fabrication methods. MESFET and heterojunction bipolar transistors (HBTs). Fundamentals of solar cells, photodetectors, LEDs and semiconductor
lasers. GE credit: SciEng | SE. - III. (III.)

## 145. Electronic Materials (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 140B, Engineering 45. Electronic and physical properties of materials used in electronics, ICs, optoelectronics and MEMS. Semiconductors, dielectrics, metals, optical materials, organic semiconductive, optical and nonlinear properties, as well as their synthesis and deposition methods. GE credit: SciEng | SE.-I. (I.)

## 146A. Integrated Circuits Fabrication (3)

 Lecture-2 hours; laboratory-3 hours. Prerequisite: course 140A. Basic fabrication processes for Metal Oxide Semiconductor (MOS) integrated circuits. Laboratory assignments covering oxidation, photolithography, impurity diffusion, metallization, wet chemical etching, and characterization worktogether in producing metal-gate PMOS test chips which will undergo parametric and functional testing. GE credit: SciEng | SE.-I. (I.)

## 146B. Advanced Integrated Circuits

 Fabrication (3)Lecture-2 hours; laboratory-3 hours. Prerequisite: course 146A. Restricted to Electrical, Computer, and Electrical/Materials Science majors and Electrical Engineering graduate students. Non-majors accommodated when space available. Fabrication processes for CMOS VLSI. Laboratory projects examine deposition of thin films, ion implantation, process simulation, anisotropic plasma etching, sputter metallization, and C-V analysis. Topics include isolation, projection alignment, epilayer growth, thin gate oxidation, and rapid thermal annealing. GE credit: SciEng | SE. - II. (II.)
147. Microelectromechanical Systems (4) Lecture-2 hours; laboratory - 3 hours. Prerequisite: Chemistry 2A; Engineering 100 or course 100. Restricted to upper division standing in College of Engineering. Introduction to the theory and practice of micro-electromechanical systems (MEMS), including fundamentals of micro-nanofabrication, microscale sensing and actuation, self assembly, microfluidics and lab-on-a-chip. Weekly hands-on laboratory sections are emphasized on implementation and utilization of MEMS technologies. (Same course as Biomedical Engineering 118.) GE credit: SciEng | QL, SE. -II. (II.)

## 150A. Introduction to Signals and Systems I

 (4)Lecture-4 hours. Prerequisite: Engineering 6 or Mathematics 22AL (may be taken concurrently); course 100. Characterization and analysis of contin-vous-time linear systems. Fourier series and transforms with applications. Introduction to communication systems. Transfer functions and block diagrams. Elements of feedback systems. Stability of linear systems. GE credit: SciEng | QL, SE. - II. (II.)
150B. Introduction to Signals and Systems II (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 150A. Characterization and analysis of discrete time systems. Difference equation models. Ztransform analysis methods. Discrete and fast Fourier transforms. Introduction to digital filter design. GE credit: SciEng | QL, SE.-l. (I.)

## 152. Digital Signal Processing (4)

Lecture -2 hours; laboratory - 6 hours. Prerequisite: course 150B; course 70 or Computer Science Engineering 50. Theory and practice of real-time digital signal processing. Fundamentals of real-time systems. Programmable architectures including I/O, memory, peripherals, interrupts, DMA. Interfacing issues with $A / D$ and $D / A$ converters to a programmable DSP. Specification driven design and implementation of simple DSP applications. GE credit: SciEng | SE.—III. (III.)

## 157 A. Control Systems (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: course 100. Analysis and design of feedback control systems. Examples are drawn from electrical and mechanical systems as well as other engineering fields. Mathematical modeling of systems, stability criteria, root-locus and frequency domain design methods. GE credit: SciEng | SE.-I. (I.)

## 157B. Control Systems (4)

Lecture -3 hours; laboratory - 3 hours. Prerequisite: course 157A. Control system design; transfer-function and state-space methods; sampled-data implementation, digital control. Laboratory includes feedback system experiments and simulation studies. GE credit: SciEng | SE. - II. (II.)

## 160. Signal Analysis and Communications

 (4)Lecture -3 hours; discussion-1 hour. Prerequisite: course 150A. Signal analysis based on Fourier methods. Fourier series and transforms; time-sampling, convolution, and filtering; spectral density; modulation: carrier-amplitude, carrier-frequency, and pulse-amplitude. GE credit: SE.-I. (I.)

## 161. Probabilistic Analysis of Electrical \&

 Computer Systems (4)Lecture-3 hours; discussion-1 hour. Prerequisite: Mathematics 21 C . Probabilistic and statistical analysis of electrical and computer systems. Discrete and continuous random variables, expectation and moments. Transformation of random variables. Joint and conditional densities. Limit theorems and statistics. Noise models, system reliability and testing. GE credit: SciEng | QL, SE.-I, III. (I, III.)

## 165. Statistical and Digital Communication (4)

Lecture-3 hours; project-3 hours. Prerequisite: course 160, 161. Introduction to random process models of modulated signals and noise, and analysis of receiver performance. Analog and digitally modulated signals. Signal-to-noise ratio, probability of error, matched filters. Intersymbol interference, pulse shaping and equalization. Carrier and clock synchronization. GE credit: SciEng | SE. - II. (II.)
170. Introduction to Computer Architecture (4)

Lecture -3 hours; discussion- 1 hour. Prerequisite: course 180A; course 70 or Computer Science Engineering 50. Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course. GE credit: SciEng | SE.-I. (I.)

## 171. Parallel Computer Architecture (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 170 or Computer Science Engineering 154B. Organization and design of parallel processors including shared memory multiprocessors, cache coherence, memory consistency, snooping protocols, synchronization, scalable multiprocessors, message passing protocols, distributed shared memory and interconnection networks. GE credit: SciEng | SE. III. (III.)
172. Embedded Systems (4)

Lecture -2 hours; laboratory -6 hours. Prerequisite: course 170 or Computer Science Engineering 154A. Introduction to embedded-system hardware and software. Topics include: embedded processor and memory architecture; input/output hardware and software, including interrupts and direct memory access; interfacing with sensors and actuators; wired and wireless embedded networking. GE credit: SciEng | SE. - II, III. (II, III.)

## 173A. Computer Networks (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Computer Science Engineering 60; Computer Science and Engineering 132 or Electrical and Computer Engineering 161 or Mathematics 135A or Statistics 131A, or Statistics 120 or Statistics 32. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken course 157. (Same course as Computer Science Engineering 152A.) GE credit: SciEng | SE. $-\mathrm{I}, \mathrm{II}$, III. (I, II, III.)

## 173B. Design Projects in Communication Networks (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 173A or Computer Science and Engineering 152A. Advanced topics and design projects in communication networks. Example topics include wireless networks, multimedia networking, network design and management, traffic analysis and modeling, network simulations and performance analysis. Offered in alternate years. (Same course as Computer Science Engineering 152C.) GE credit: SciEng | SE. - III. (III.)

180A. Digital Systems I (5)
Lecture-3 hours; laboratory-6 hours. Prerequisite:
Physics 9C or 9HD. Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. GE credit: SciEng | SE. I, II. (I, II.)
180B. Digital Systems II (5)
Lecture-3 hours; laboratory - 6 hours. Prerequisite: course 180A. Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and fieldprogrammable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. GE credit:
SciEng | SE.—III. (III.)
181 A. Digital Systems Design Project (3) Workshop-1 hour; laboratory-6 hours. Prerequisite: courses 180B and either course 170 or Computer Science 122A. Digital-system and computerengineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.-II. (II.)
181 B. Digital Systems Design Project (3) Workshop-1 hour; laboratory-6 hours. Prerequisite: course 181A. Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype applica-tion-specific processor under given design constraints. This is a team project that includes a final presentation and report. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.-III. (III.)

## 183. Testing and Verification of Digital Systems (5)

Lecture-3 hours; laboratory-4 hours. Prerequisite: courses 170 and 180B. Computer aided-testing and design verification techniques for digital systems; physical fault testing; simulation-based design verification; formal verification; timing analysis. GE credit: SciEng | SE.-II. (II.)

## 189A-V. Special Topics in Electrical

Engineering and Computer Science (1-5)
Prerequisite: consent of instructor. Special Topics in (A) Computer Science; (B) Programming Systems; (C) Digital Systems; (D) Communications; (E) Signal Transmission; (F) Digital Communication; (G) Control Systems; (H) Robotics; (I) Signal Processing; (J) Image Processing; (K) High-Frequency Phenomena and Devices; (L) Solid-State Devices and Physical Electronics, (M) Systems Theory, (N) Active and Passive Circuits; (O) Integrated Circuits; (P) Computer Software; (Q) Computer Engineering; (R) Microprocessing; (S) Electronics; (T) Electromagnetics; (U) Opt-Electronics; (V) Computer Networks. May be repeated for credit when topic differs. GE credit: SciEng | SE.-I, II, III. (I, II, III.)

## 190C. Research Group Conferences in

 Electrical and Computer Engineering (1)Discussion-1 hour. Prerequisite: upper division standing in Electrical and Computer Engineering; consent of instructor. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SciEng | SE.-I, II, III. (II, II, III.)

## 192. Internship in Electrical and Computer

## Engineering (1-5)

Internship-3-15 hours. Prerequisite: completion of a minimum of 84 units; project approval before period of internship; consent of instructor. Supervised work experience in electrical and computer engineering. May be repeated for credit if project is different. (P/ NP grading only.) GE credit: SE.-I, II, III. (I, II, III.)

## 193A. Senior Design Project (3)

Workshop-1 hour; laboratory-6 hours. Prerequisite: course 196 (may be taken concurrently); consent of instructor. Restricted to senior standing in

Electrical or Computer Engineering. Team design project for seniors in Electrical or Computer Engineering. Team design project for seniors in Electrical or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project is supervised by a faculty member. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE.-I, II. (I, II.)

## 193B. Senior Design Project (3)

Workshop-1 hour; laboratory-6 hours. Prerequisite: course 193A. Team design project for seniors in Electrical Engineering or Computer Engineering. Team design project for seniors in Electrical Engineering or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project supervised by a faculty member. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE. - II, III. (II, III.)
195A. Autonomous Vehicle Design Project (3)

Workshop-1 hour; laboratory-6 hours. Prerequisite: course 180A, Computer Science and Engineering 30, and one of 110B, 157A, 180B, or Computer Science and Engineering 150. Pass One restricted to major. Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. (Deferred grading only pending completion of sequence.) GE credit:
SciEng | SE.-I. (I.)
195B. Autonomous Vehicle Design Project (3)

Workshop-1 hour; laboratory-6 hours. Prerequisite: course 195A. Design and construct an autonomous race car. Students work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. (Deferred grading only pending completion of sequence.) GE credit: SciEng | SE.—II. (II.)
196. Issues in Engineering Design (1)

Seminar-1 hour. Prerequisite: senior standing in Electrical or Computer Engineering. The course covers various electrical and computer engineering standards and realistic design constraints including economic, manufacturability, sustainability, ethical, health and safety, environmental, social, and political. GE credit: SciEng | SE.-I. (I.)
197T. Tutoring in Electrical and Computer Engineering (1-3)
Discussion-1 hour; discussion/laboratory-2-8 hours. Prerequisite: upper division standing; consent of instructor. Tutoring in Electrical and Computer Engineering courses, especially introductory circuits. For upper-division undergraduate students who will provide tutorial assistance. (P/NP grading only.) -I, II, III. (I, II, III.)
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. May be repeated three times for credit. (P/NP grading only.) GE credit: SE.

## 199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

201. Digital Signal Processing (4)

Lecture-4 hours. Prerequisite: course 150B; Statistics 120 or Mathematics 131 or Mathematics 167 recommended. Theory and design of digital filters. Classification of digital filters, linear phase systems, all-pass functions, FIR and IIR filter design methods and optimality measures, numerically robust structures for digital filters.-II. (II.)
202. Advanced Digital Signal Processing (4) Lecture-4 hours. Prerequisite: courses 201, 260, and 265, and Mathematics 167 are recommended. Multirate DSP theory and wavelets, optimal transform and subband coders in data compressions, advanced sampling theory and oversampled A/D
converters, transmultiplexers and precoders in digital communication systems, genomic signal processing. Offered in alternate years. - (III.)

## 205. Computational Methods in Biomedical

 Imaging (4)Lecture-4 hours. Prerequisite: Biomedical Engineering 105 or Statistics 120; Biomedical Engineering 108 or course 150A. Analytic tomographic reconstruction from projections in 2D and 3D; modelbased image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as Biomedical Engineering 252.) - II. (II.)

## 206. Digital Image Processing (4)

Lecture-3 hours; laboratory - 3 hours. Prerequisite: course 150B. Two-dimensional systems theory, image perception, sampling and quantization, transform theory and applications, enhancement, filtering and restoration, image analysis, and image processing systems. - (II.)
210. MOS Analog Circuit Design (3)

Lecture-3 hours. Prerequisite: courses 110B, 111B and 140B. Analysis and design of MOS amplifiers, bias circuits, voltage references and other analog circuits. Stability and compensation of feedback amplifiers. Introduction to noise analysis in MOS circuits. -I. (I.)
211. Advanced Analog Circuit Design (3)

Lecture-3 hours. Prerequisite: course 210; Statistics 131A and course 112 recommended. Noise and distortion in electronic circuits and systems. Application to communication circuits. Specific applications include mixers, low-noise amplifiers, power amplifiers, phase-locked loops, oscillators and receiver architectures.-II. (II.)

## 212. Analog MOS IC Design for Signal

 Processing (3)Lecture-3 hours. Prerequisite: course 210. Analysis and design of analog MOS integrated circuits. Passive components, single-ended and fully differential op amps, sampled-data and continuous-time fil-ters.-II. (II.)

## 213. Data-Conversion Techniques and

 Circuits (3)Lecture-3 hours. Prerequisite: course 210. Digital-to-analog and analog-to-digital conversion; component characteristics and matching; sample-and-hold, comparator, amplifier, and reference circuits. - III. (III.)

## 214. Computer-Aided Circuit Analysis and

 Design (3)Lecture-3 hours. Prerequisite: courses 110A, 110B and knowledge of FORTRAN or C. Network equation formulations. Nonlinear DC, linear AC, timedomain (both linear and nonlinear), steady-state (nonlinear) and harmonic analysis. DC, AC, and time-domain sensitivities of linear and nonlinear circuits. Gradient-based design optimization. Behavioral simulations. Extensive CAD project. - II. (II.)
215. Circuits for Digital Communications (3) Lecture-3 hours. Prerequisite: courses 150B and 210 (may be taken concurrently); course 165, 166 or 265 recommended. Analog, digital, and mixedsignal CMOS implementations of communication-circuit blocks; gain control, adaptive equalizers, sampling detectors, clock recovery. Offered in alternate years. - III.
216. Low Power Digital Integrated Circuit Design (3)
Lecture-3 hours. Prerequisite: course 118. IC design for low power and energy consumption. Low power architectures, logic styles and circuit design. Variable supply and threshold voltages. Leakage management. Power estimation. Energy sources, power electronics, and energy recovery. Applications in portable electronics and sensors. Thermodynamic limits. - II. (II.)
217. Biomedical Electronics (4)

Lecture-3 hours; project. Prerequisite: course 210 or consent of instructor. Special consideration and accommodation will be made for biomedical or signal processing majors who have not taken 210. Cir-
cuit design for medical applications including weak inversion amplifiers; integrated ULF filters; chopper stabilization; electrochemical interfaces; neurostimulation pulse generation; wireless powering of and communication with implantable devices. Electrophysiological signaling and aspects of signal processing for biomedical systems. - III. (III.)
219. Advanced Digital Circuit Design (3) Lecture-3 hours. Prerequisite: course 118 or 218A Analysis and design of digital circuits. Both bipolar and MOS circuits are covered. Dynamic and static RAM cells and sense amplifiers. Advanced MOS families. Multi-valued logic. - (III.)

## 221. Analog Filter Design (3)

Lecture-3 hours. Prerequisite: courses 100 and 150A. Design of active and passive filters including filter specification and approximation theory. Passive LC filter design will cover doubly-terminated reactance two-port synthesis. Active filter design will include sensitivity, op-amp building blocks, cascade, multi-loop, ladder and active-R filter design. Offered in alternate years. - (I.)

## 222. RF IC Design (3)

Lecture-3 hours. Prerequisite: course 132C and 210. Radio frequency (RF) solid-state devices, RF device modeling and design rules; non-linear RF circuit design techniques; use of non-linear computeraided (CAD) tools; RF power amplifier design
Offered in alternate years. - (III.)
228. Advanced Microwave Circuit and Device Design Techniques (4)
Lecture-3 hours; laboratory-3 hours. Prerequisite: course 132B. Theory, design, fabrication, analysis of advanced microwave circuits and devices. Wideband transformers, stripline/microstripline broadband couplers. Lumped and distributed filter synthesis. Broadband matching theory applied to microwave devices. Wideband and low noise FET/ HEMT amplifiers. Advanced microwave oscillator theory. Phase noise analysis. Offered in alternate years. - III.
230. Electromagnetics (3)

Lecture-3 hours. Prerequisite: course 130B. Maxwell's equations, plane waves, reflection and refraction, complex waves, waveguides, resonant cavities, and basic antennas.-I. (I.)

## 232A. Advanced Applied Electromagnetics I

 (3)Lecture-3 hours. Prerequisite: course 132B. The exact formulation of applied electromagnetic problems using Green's functions. Applications of these techniques to transmission circuits. Offered in alternate years. - II.
232B. Advanced Applied Electromagnetics II (4)
Lecture-3 hours; laboratory-3 hours. Prerequisite: course 132B. Advanced treatment of electromagnet ics with applications to passive microwave devices and antennas. Offered in alternate years. - (III.)
233. High Speed Signal Integrity (3) Lecture-3 hours. Prerequisite: course 130B. Design and analysis of interconnects in high-speed circuits and sub-systems; understanding of high-speed signal propagation and signal integrity concepts; electromagnetic modeling tools and experimental techniques. Offered in alternate years. - III.

## 235. Photonics (4)

Lecture-3 hours; project-1 hour. Prerequisite: course 230 (may be taken concurrently). Optical propagation of electromagnetic waves and beams in photonic components and the design of such devices using numerical techniques. Offered in alternate years. - II.
236. Nonlinear Optical Applications (3) Lecture-3 hours. Prerequisite: course 130B, course 230 (may be taken concurrently). Nonlinear optical interactions in optical communication, optical information processing and integrated optics. Basic concepts underlying optical nonlinear interactions in materials and guided media. Not open for credit to students who have completed course 233. Offered in alternate years. - (I.)

237 A. Lasers (3)
Lecture -3 hours. Prerequisite: course 130B or the equivalent and course 235. Theoretical and practical description of lasers. Theory of population inversion, amplification and oscillation using semiclassical oscillator model and rate equations. Description and design of real laser system (Not open for credit to students who have completed course 226A.) Offered in alternate years. - (I.)

## 237B. Laser Physics II (4)

Lecture -3 hours; extensive problem solving. Prereqvisite: course 237A or Applied Science Engineering 265A. Oscillation threshold. Coupled cavity/atomic rate equations, Linear pulse propagation; dispersion, broadening, compression. Nonlinear pulse propagation. Energy extraction. Optical beams, resonators, eigenmodes, axial/transverse modes. Paraxial ray optics, resonator stability, ABCD matrices. Laser dynamics; transients, spiking, Q-switching, active and passive modelocking. Not open for credit to students who have completed course 226B Offered in alternate years. - II. Heritage, Kolner

## 238. Semiconductor Diode Lasers (3)

Lecture-3 hours. Prerequisite: course 245A. Understanding of fundamental optical transitions in semiconductor and quantum-confined systems are applied to diode lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Offered in alternate years. - III.

## 239A. Optical Fiber Communications

 Technologies (4)Lecture-4 hours. Prerequisite: course 130B. Physical layer issues for component and system technologies in optical fiber networks. Sources of physical layer impairments and limitations in network scalability. Enabling technologies for wavelength-divi-sion-multiplexing and time-division-multiplexing networks. Optical amplifiers and their impact in optical networks (signal-to-noise ratio, gain-equalization, and cascadability).-l. (I.)

## 239B. Optical Fiber Communications

 Systems and Networking (4)Lecture-4 hours. Prerequisite: course 239A. Physical layer optical communications systems in network architectures and protocols. Optical systems design and integration using optical component technologies. Comparison of wavelength routed WDM,
TDM, and NGI systems and networks. Case studies of next generation technologies. Offered in alternate years. - (II.)
240. Semiconductor Device Physics (3)

Lecture-3 hours. Prerequisite: course 140B. Physical principles, characteristics and models of fundamental semiconductor device types, including P-N and Schottky diodes, MOSFETs and MESFETs Bipolar Junction Transistors, and light emitters/detec-tors.-l. (I.)
242. Advanced Nanostructured Devices (3) Lecture-3 hours. Prerequisite: courses 130A and 140A. Physics of nano-structured materials and device operation. Overview of new devices enabled by nanotechnology; fabrication and characterization methods; applications of nano-structures and devices. Offered in alternate years. - (I.)
244A. Design of Microelectromechanical Systems (MEMS) (3)
Lecture-3 hours. Prerequisite: course 140A, 140B or consent of instructor. Theory and practice of MEMS design. Micromechanical fundamentals, CAD tools, and case studies. A MEMS design project is required. The designs will be fabricated in a commercial foundry and tested in course 244B
Offered in alternate years. - (I.)
244B. Microsciences (4)
Lecture/discussion-4 hours. Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic mechanics, micromechanical properties, intermolecular interactions and micro tribology. (Same course as Biomedical Engineering 218.)-I. (I.)
246. Advanced Projects in IC Fabrication (3) Discussion-1 hour; laboratory-6 hours. Prerequisite: course 146B. Individualized projects in the fabrication of analog or digital integrated circuits.
Offered in alternate years. - II.
247. Advanced Semiconductor Devices (4) Lecture-3 hours; project. Prerequisite: graduate standing in Engineering. Semiconductor devices, including MOSFETs, heterojunction transistors, lightemitting diodes, lasers, sensors, detectors, power and high-voltage transistors, MEMS resonators, organic semiconductors and photovoltaics. All material is from recent literature, encouraging students to utilize search methods and critically assess the latest research. Offered in alternate years. - (I.)

## 249. Nanofabrication (3)

Lecture-3 hours. Prerequisite: graduate standing in Engineering. Theory and practices of nanofabrication used for producing ICs, electronic devices, optoelectronics, sensors, and microstructures. Major topics include electron-, photon-, and ion-beams and their interactions with solids, chemical vapor depositions, plasma processing and micromachining.
Offered in alternate years. - III.
250. Linear Systems and Signals (4)

Lecture -4 hours. Prerequisite: course 150A. Mathematical description of systems. Selected topics in linear algebra. Solution of the state equations and an analysis of stability, controllability, observability, realizations, state feedback and state estimation. Discrete-time signals and systems, and the Z-transform. - I. (I.)
25 1. Nonlinear Systems (3)
Lecture-3 hours. Prerequisite: course 250. Nonlinear differential equations, second-order systems, approximation methods, Lyapunov stability, absolute stability, Popov criterion, circle criterion, feedback linearization techniques. Offered in alternate years. - (III.)
252. Multivariable Control System Design (3)

Lecture-3 hours. Prerequisite: course 250. Modern control system design, theory, and techniques. Topics will include single-loop feedback design; stability, performance and robustness of multivariable control systems; LQG design; H-infinity design; frequency response methods; and optimization-based design. Offered in alternate years. - (II.)

## 254. Optimization (3)

Lecture-3 hours. Prerequisite: Mathematics 22A, knowledge of FORTRAN or C. Modeling optimization problems in engineering design and other applications; optimality conditions; unconstrained optimization (gradient, Newton, conjugate gradient and quasi-Newton methods); duality and Lagrangian relaxation constrained optimization. (Primal method and an introduction to penalty and augmented Lagrangian methods.) Offered in alternate years. II.
255. Robotic Systems (3)

Lecture-3 hours. Introduction to robotic systems. Mechanical manipulators, kinematics, manipulator positioning and path planning. Dynamics of manipu lators. Robot motion programming and control algorithm design. Offered in alternate years. - (II.)
256. Stochastic Optimization in Dynamic Systems (4)
Lecture-4 hours. Prerequisite: course 260 or the equivalent. Markov Decision Processes (MDP), dynamic programming, multiarmed bandit, Partially observable MDP, optimal stopping, stochastic scheduling, sequential detection and quickest change detection, competitive MDP and game theory, applications in dynamic systems such as queueing networks, communication systems, and multi-agent systems. Offered in alternate years. - (III.)
260. Random Signals and Noise (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Statistics 120, course 150A; course 250 recommended. Random processes as probabilistic models for signals and noise. Review of probability, random variables, and expectation. Study of correlation func-
tion and spectral density, ergodicity and duality between time averages and expected values, filters and dynamical systems. Applications.-I. (I.)

## 261. Signal Processing for Communications

 (4)Lecture-4 hours. Prerequisite: course 165, 260 or consent of instructor. Signal processing in wireless and wireline communication systems. Characterization and distortion of wireless and wireline channels. Channel equalization and maximum likelihood sequence estimation. Channel precoding and preequalization. OFDM and transmit diversity. Array processing. Offered in alternate years. - III.

## 262. Multi-Access Communications Theory

 (4)Lecture-3 hours; project. Prerequisite: Statistics 120 or equivalent; course 173A or Engineering Computer Science 152A. Maximum stable throughput of Poisson collision channels. Classic collision resolution algorithms. Carrier sensing multiple access and its performance analysis. System stability analysis. Joint design of the physical/medium access control layers. Capacity region of multi-access channels. Multi-access with correlated sources. Offered in alternate years. - (III.)

## 263. Optimal and Adaptive Filtering (4)

 Lecture-3 hours; discussion-1 hour. Prerequisite: course 260. Geometric formulation of least-squares estimation problems. Theory and applications of optimum Wiener and Kalman filtering. MAP and maximum likelihood estimation of hidden Markov models, Viterbi algorithm. Adaptive filtering algorithms, properties and applications. Offered in alternate years. - (III.)264. Estimation and Detection of Signals in Noise (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 260. Introduction to parameter estimation and detections of signals in noise. Bayes and Ney-man-Pearson likelihood-ratio tests for signal detection. Maximum-likelihood parameter estimation. Detection of known and Gaussian signals in white or colored noise. Applications to communications, radar, signal processing. -II. (II.)

## 265. Principles of Digital Communications

 (4)Lecture -4 hours. Prerequisite: courses 165 and 260, or consent of instructor. Introduction to digital communications. Coding for analog sources. Characterization of signals and systems. Modulation and demodulation for the additive Gaussian channel. Digital signaling over bandwidth-constrained linear filter channels and over fading multipath channels. Spread spectrum signals.-II. (II.)
266. Information Theory and Coding (3) Lecture-3 hours. Prerequisite: Statistics 120. Information theory and coding. Measure of information. Redundancy reduction encoding of an information source. Capacity of a communication channel, errorfree communications. Offered in alternate years.III.

## 267. Mobile Communications (4)

Lecture/laboratory-3 hours. Prerequisite: courses 260 and 265 (can be taken concurrently). Timevarying multi-path fading channel models and receiver performance in fading channels; multiple access techniques and multiple access receivers design and performance; optimum design and the capacity of wireless channels. Offered in alternate years. -II.

## 269A. Error Correcting Codes I (3)

Lecture-3 hours. Prerequisite: Mathematics 22A and course 160. Introduction to the theory and practice of block codes, linear block codes, cyclic codes, decoding algorithms, coding techniques.-I. (I.)

## 269B. Error Correcting Codes II (3)

Lecture -3 hours. Prerequisite: course 165 and 269A. Introduction to convolutional codes, turbo codes, trellis and block coded modulation codes, soff-decision decoding algorithms, the Viterbi algo-
rithm, reliability-based decoding, trellis-based decoding, multistage decoding. Offered in alternate years. - (II.)
270. Computer Architecture (3)

Lecture-3 hours. Prerequisite: course 170 or Computer Science Engineering 154B. Introduction to modern techniques for high-performance single and multiple processor systems. Topics include advanced pipeline design, advanced memory hierarchy design, optimizing pipeline and memory use, and memory sharing among multiprocessors. Case studies of recent single and multiple processor sys-tems.-II. (II.)

## 272. High-Performance Computer

Architecture and Implementation (3)
Lecture-3 hours. Prerequisite: course 170 or Computer Science Engineering 154A, 154B and course 270 or Computer Science Engineering 250A. Architectural issues in achieving high-performance via concurrent execution of instructions and associated problems and limitations. Specialized architectures. Offered in alternate years.-150A. Mechanical Design III. (III.)

## 273. Networking Architecture and <br> Resource Management (4)

Lecture-3 hours; project. Prerequisite: Computer Science Engineering 152A or course 173A; Computer Science Engineering 252 recommended. Design and implementation principles of networking architecture and protocols. Internet, ATM, and telephony case studies. Topics: Internet technology; application and services; resource management; Quality of Service (QoS) provisioning; traffic engineering; performance evaluation and future research issues. (Same course as Computer Science Engineering 258.)-II. (II.)
274. Internet Measurements, Modeling and Analysis (4)
Lecture-3 hours; project. Prerequisite: Computer Science Engineering 252 or course 273. Advanced topics in the theoretical foundations of network measurements, modeling, and statistical inferencing. Applications to Internet engineering, routing optimization, load balancing, traffic engineering, fault tolerance, anomaly detection, and network security. Individual project requirement. Offered in alternate years. - (III.)

## 276. Fault-Tolerant Computer Systems:

 Design and Analysis (3)Lecture-3 hours. Prerequisite: courses 170, 180A. Introduces fault-tolerant digital system theory and practice. Covers recent and classic fault-tolerant techniques based on hardware redundancy, time redundancy, information redundancy, and software redundancy. Examines hardware and software reliability analysis, and example fault-tolerant designs. Not open for credit to students who have completed course 276A. Offered in alternate years.-II.

## 277. Graphics Architecture (3)

Lecture-3 hours. Prerequisite: Computer Science Engineering 154B or course 170, Computer Science Engineering 175. Design and analysis of the architecture of computer graphics systems. Topics include the graphics pipeline with a concentration on hardware techniques and algorithms, exploiting parallelism in graphics, and case studies of noteworthy and modern graphics architectures. Offered in alternate years.-II.
278. Computer Arithmetic for Digital Implementation (3)
Lecture-3 hours. Prerequisite: courses 170, 180A. The design and implementation of computer arithmetic logic units are studied with particular emphasis on high-speed performance requirements. Addition (subtraction), multiplication and division operations are covered, and fixed and floating-point representations are examined. Offered in alternate years. - III.

## 281. VLSI Digital Signal Processing (4)

Lecture-3 hours; project. Prerequisite: courses 150B, 170, 180B or consent of instructor. Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms,
architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation.-II. (II.)
282. Hardware Software Codesign (3) Lecture-2 hours; discussion-1 hour. Prerequisite: course 170, 180B. Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design;
reconfigurable computing. - III.

## 283. Advanced Design Verification of

 Digital Systems (4)Lecture-3 hours; project. Prerequisite: courses 170 and 180A. Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Offered in alternate years. - II.
284. Design and Optimization of

## Embedded Computing Systems (4)

Lecture-4 hours. Prerequisite: courses 170 and 180B, or consent of instructor. Computer Science Engineering 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. II. (II.)
286. Introduction to Digital System Testing (3)

Lecture-3 hours. Prerequisite: course 180A; Statistics 120 or 131A. A review of several current techniques used to diagnose faults in both combinational and sequential circuits. Topics include path sensitization procedures, Boolean difference, D-algorithm random test generation, TC testing and an analysis of the effects of intermittent faults. Not open for credit to students who have completed course 276A. Offered in alternate years.-II.

## 289A-V. Special Topics in Electrical and

 Computer Engineering (1-5)Lecture/laboratory-1-5 units. Prerequisite: consent of instructor. Special topics in (A) Computer Science, (B) Programming Systems, (C) Digital Systems (D) Communications, (E) Signal Transmission, (F) Digital Communication, (G) Control Systems, (H) Robotics, (I) Signal Processing, (J) Image Processing, (K) High Frequency Phenomena and Devices, (L) Solid-State Devices and Physical Electronics, (M) Systems Theory, (N) Active and Passive Circuits, (O) Integrated Circuits, (P) Computer Software, (Q) Computer Engineering, (R) Microprocessing, (S) Electronics, (T) Electromagnetics, (U) Optoelectronics, (V) Computer Networks. May be repeated for credit when topic differs. - I, II, III. (I, II, III.)
290. Seminar in Electrical and Computer Engineering (1)
Seminar- 1 hour. Discussion and presentation of current research and development in Electrical and Computer Engineering. May be repeated for credit (S/U grading only.) -I, II. (I, II.)

## 290C. Graduate Research Group Conference in Electrical and Computer Engineering (1)

Discussion-1 hour. Prerequisite: consent of instructor. Research problems, progress, and techniques in electrical and computer engineering. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 291. Solid-State Circuit Research

 Laboratory Seminar (1)Seminar-1 hour. Prerequisite: graduate standing. Lectures on solid-state circuit and system design by various visiting experts in the field. May be repeated for credit. (S/U grading only.) - III. (III.)
292. Seminar in Solid-State Technology (1)

Seminar-1 hour. Prerequisite: graduate standing. Lectures on solid-state technology by various visiting experts in the field. May be repeated for credit. (S/ U grading only.) - III. (III.)

## 293. Computer Engineering Research

 Seminar (1)Seminar-1 hour. Prerequisite: graduate standing or consent of instructor. Lectures, tutorials, and seminars on topics in computer engineering. May be repeated for credit up to four times. (S/U grading only.) - III, III. (II, III.)
294. Communications, Signal and Image Processing Seminar (1)
Seminar-1 hour. Prerequisite: graduate standing. Communications, signal and image processing, video engineering and computer vision. May be repeated for credit. (S/U grading only.)-I, II, III.

## 295. Systems, Control and Robotics

## Seminar (1)

Seminar-1 hour. Prerequisite: graduate standing. Seminars on current research in systems and control by faculty and visiting experts. Technical presentations and lectures on current topics in robotics research and robotics technology. May be repeated for credit. (S/U grading only.) - II. (II.)
296. Photonics Research Seminar (1) Seminar-1 hour. Prerequisite: graduate standing. Lectures on photonics and related areas by faculty and visiting experts. May be repeated for credit. (S/ U grading only.) - II, III. (II, III.)
298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)
299. Research (1-12)
(S/U grading only.)

## Professional

390. The Teaching of Electrical Engineering

## (1)

Discussion-1 hour. Prerequisite: meet qualifications for teaching assistant and/or associate-in in Electrical Engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports.
May be repeated for credit. (S/U grading only.)-I. (I.)
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Engineering: Mechanical and Aerospace Engineering

## (College of Engineering)

C. P. (Case) van Dam, D. Engr., Chairperson of the Department
Benjamin D. Shaw, Ph.D., Vice Chairperson of the Department
Department Office. 2132 Bainer Hall

The Mechanical and Aerospace Engineering Undergraduate

## Programs

The Department of Mechanical and Aerospace Engineering administers three undergraduate programs in the College of Engineering: (1) Mechanical Engineering, (2) Mechanical Engineering/Materials Science and (3) Aerospace Science and Engineering.
For more information about our programs, please see http://mae.ucdavis.edu/ug.php.
The Mechanical Engineering/Materials Science program is not accepting new students.
Mission. The Department of Mechanical and Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.
Objectives. The objectives of the programs offered in Mechanical and Aerospace Engineering include the following: to prepare its graduates to practice mechanical and/or aerospace engineering in a broad range of industries, to enable interested graduates to pursue graduate education, to prepare its graduates to participate in research and development, and in other creative and innovative efforts in science, engineering, and technology and to allow interested graduates to pursue entrepreneurial endeavors.

Preparatory Requirements. In order to change to any major offered by the Department of Mechanical and Aerospace Engineering, students must:

- Be a registered student and have completed at least one quarter (minimum of 12 units) at UC Davis;
- Have completed not more than 135 cumulative units (excluding AP units);
- Be in good academic standing and meet minimum progress requirements;
- Have received a letter grade for all courses that satisfy Engineering degree requirements;
- Have: a) completed at least the following five courses: Mathematics 21A, B, C; Physics 9A and Chemistry 2A and b) have a GPA of 2.800 or better in all completed Mathematics, Physics, Biology and Chemistry courses required for your intended major, and have received a C - or better in each of these courses;
- Have no grade lower than a $C$ - in any completed engineering course required for your intended major(s) taken at UC Davis;
- Have a 2.800 UC GPA in completed engineering courses.

## Mechanical Engineering Undergraduate Program

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET; http://www.abet.org.
The mechanical engineer uses basic science in the design and manufacture of complex engineering systems, requiring the application of physical and mechanical principles to the development of machines, energy conversion systems, materials, and equipment for guidance and control.
Work in this broad field of engineering requires a thorough knowledge of mathematics, physics, chemistry, material science, applied mechanics, thermodynamics, heat transfer, mass transfer, electricity, manufacturing processes, and economics.
The Mechanical Engineering program is designed to provide knowledge in mechanical engineering and associated applied sciences so that graduates may practice in a broad range of industries, pursue gradvate studies, participate in research and development, and/or pursue entrepreneurial endeavors.

## Areas of Interest

Students spend their third year in further study of fundamental courses, and in the fourth year they may tailor their studies to their interests by selecting courses in controls and systems analysis, fluid mechanics, heat transfer, mechanical design or thermodynamics. Students can either prepare for graduate study in mechanical engineering or obtain a broad background for entering engineering practice.
Students may select elective courses from among the areas of interest listed below.
Mechanical Design. The creation and improvement of products, processes, or systems that are mechanical in nature are the primary activities of a professional mechanical engineer. The development of a product from concept generation to detailed design, manufacturing process selection and planning, quality control and assurance, and life cycle considerations are areas of study and specialization in the area of mechanical design.
Solutions to such major social problems as environmental pollution, the lack of mass transportation, the lack of raw materials, and energy shortages, will depend heavily on the engineer's ability to create new types of machinery and mechanical systems.
The engineer-designer must have a solid and relatively broad background in the basic physical and engineering sciences and have the ability to synthesize the information from such a background in creative problem solving. In addition to having technical competence, the designer must be able to
consider the socioeconomic consequences of a design and its possible impact on the environment. Product safety, reliability, and economics are other considerations.
Suggested technical electives:
Aerospace Science and Engineering 133, 139
Biological Systems Engineering 114, 120, 165
Biomedical Engineering 118/Electrical and Computer Engineering 147
Engineering 122, 160 (only one unit of credit towards Technical Electives requirement)
Materials Science and Engineering 180,
181, 182
Mechanical Engineering 121, 134, 150B,
151, 152, 154, 161, 163
Suggested Advisers. H.H. Cheng, R.T. Farouki, M.R. Hill, B.S. Linke, B. Ravani, M. Soshi, S. Velinsky, K. Yamazaki
Biomedical and Engineering Fluid Mechanics. This field of study is based on the fundamentals of fluid mechanics and their broad range of applications in the biomedical and engineering areas. Areas of current research include blood circulation and its potential role in the regulation of normal physiological function and in the development of disease; groundwater and atmospheric flows and their implications for pollutant transport and environmental concerns; aerodynamic flow around transportation vehicles and its impact on vehicle performance; and flow in combustion engines and other energy systems with considerations of efficiency and environmental impact. These areas are investigated both experimentally and computationally.
Suggested technical electives:
Aerospace Science and Engineering 138
Engineering 160 (only one unit of credit
towards technical requirements)
Chemical Engineering 161A, 161B
Civil and Environmental Engineering 144, 149
Mechanical Engineering 161, 163
Suggested Advisers. R.C. Aldredge, M. Hafez, I.M. Kennedy, S.K. Robinson, B.D. Shaw, C.P. van Dam, A.S. Wexler

## Combustion and the Environment. Combus-

 tion is widely used for energy generation, propulsion, heating, and waste disposal, as well as for many other applications. Mechanical engineers are often heavily involved with the design of combustion systems (internal combustion engines, gas turbines, furnaces, etc.) and deal with aspects of combustion ranging from increasing efficiencies to reducing pollutant emissions. This specialization is for those who would like to work in fields that use combustion, or that deal with pollution related to combustion. With the current increased emphasis on reducing pollutants while maintaining or increasing efficiency, the efforts of mechanical engineers in designing and improving combustion systems are becoming more important.Suggested technical electives:
Mechanical Engineering 161, 163
Civil and Environmental Engineering 149, 150
Suggested Advisers. R.C. Aldredge, R. Davis, P. A. Erickson, I.M. Kennedy, B.D. Shaw

Heat Transfer, Thermodynamics, and
Energy Systems. This specialization emphasizes the fundamentals of heat transfer and thermodynamics, and their application to the design of advanced engineering systems. The objective of the program is to introduce students to the fundamental processes of heat transfer and thermodynamics in complex engineering systems so that they are able to design more efficient, cost effective, and reliable systems with less environmental pollution and impact. An understanding of heat transfer and thermodynamics is required for the design of efficient, cost-effective systems for power generation, propulsion, heat exchangers,
industrial processes, refining, and chemical processing. This area of specialization is important to many industries-aerospace, defense, automotive-as well as to the thermal design of electronic and computer packages.
Suggested technical electives:
Aerospace Science and Engineering 138
Mechanical Engineering 161, 163
Suggested Advisers. R.C. Aldredge, R. Davis, P.A. Erickson, I.M. Kennedy, J.W. Park, B.D. Shaw

Manufacturing. Manufacturing is concerned with the conversion of raw materials into finished products by a variety of processes, such as machining, forming, casting, and molding. Modern manufacturing technology is increasingly dependent upon integration with computer-aided design systems and precision computer controls. State-of-the-art laboratories offer the opportunity for hands-on experience with a wide spectrum of manufacturing equipment. Manufacturing engineers must have expertise in design, materials, controls, statistical methods, computer software, and microprocessor applications.
Suggested technical electives:
Biomedical Engineering 118/Electrical and
Computer Engineering 147
Electrical and Computer Engineering 160
Materials Science and Engineering 180, 181
Mechanical Engineering 150B, 151, 154
Suggested Advisers. H.H. Cheng, R.T. Farouki, B.S. Linke, D.A. Horsley, V. La Saponara, M. Soshi, B. Ravani, K. Yamazaki

System Dynamics and Control. Engineers are increasingly concerned with the performance of integrated dynamics systems in which it is not possible to optimize component parts without considering the overall system.
System dynamics and control specialists are concerned with the modeling, analysis, and simulation of all types of dynamic systems and with the use of automatic control techniques to change the dynamic characteristics of systems in useful ways. The emphasis in this program is on the physical systems that are closely related to mechanical engineering, but the techniques for studying these systems apply to social, economic, and other dynamic systems.
Ongoing research includes projects on continuously variable transmissions, active and semi-active suspension systems, modeling and control of vehicle dynamics, electromechanical actuator design, electronically controlled steering, the analysis of fuel management systems, and the design of flight-control systems with humans in the loop.
Suggested technical electives:
Aerospace Science and Engineering 129,
139, 141
Electrical and Computer Engineering 160
Engineering 122
Mechanical Engineering 121, 134, 154
Suggested Advisers. F.O. Eke, R.A. Hess, S. Joshi
Ground Vehicle Systems. An important aspect of mechanical engineering is the design of more environmentally benign surface vehicles that provide efficient individual and public transportation. Innovations in the field require competence in vehicle dynamics, control of vehicle dynamics, power sources and power transmission, lightweight structures and systems, alternatively fueled power systems, including electrical drives and fuel cells, and mechanical systems.
Suggested technical electives:
Aerospace Science and Engineering 127,
129, 139
Civil and Environmental Engineering 130,
149, 160
Engineering 122, 160 (only one unit of credit
towards technical electives requirement)
Mechanical Engineering 121, 134, 152

Suggested Advisers. P. A. Erickson, M. Hill, J. Park, N. Sarigul-Klijn, S. Velinsky
Transportation Systems. As society recognizes the increasing importance of optimizing transportation systems to minimize environmental degradation and energy expenditure, engineers will need to consider major innovations in the way people and goods are moved. Such innovations will require competence in vehicle dynamics, propulsion and control, and an understanding of the problems caused by present-day modes of transportation. Vehicle control requires an understanding of sensors and actuators, and the integration of yet-to-be-proposed concepts into overall vehicular dynamics. Competence in these areas allows for the development of alternative propulsion concepts, such as electric, hybrid, and fuel cell.
Suggested technical electives:
Aerospace Science and Engineering 127,
129
Biological Systems Engineering 114, 120
Civil and Environmental Engineering 131,
149
Engineering 122, 160 (only one unit of credit
towards Technical Electives requirement)
Mechanical Engineering 134, 150B, 161, 163
Suggested Advisers. P.A. Erickson, J.W. Park, S.

## Velinsky

## Mechanical Engineering Program Requirements

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.
Exclusive of General Education units, the minimum number of units required for the Mechanical Engineering major is 157 .

## Lower Division Required Courses

> UNITS

Mathematics 21 A-21B-21C-21D ............ 16
Mathematics 22A-22B............................. 6
Physics 9A-9B-9C-9D ............................ 19
Chemistry 2A-2B or 2AH-2BH ............... 10
Engineering 4........................................ 3
Engineering 6 or Mechanical
Engineering 5
Engineering 17, 35, 45 (or 45Y).......... 12
Mechanical Engineering 50 ....................... 4
English 3 or University Writing Program 1, 1Y
or 1 V , or Comparative Literature 1, 2, 3, or
4, or Native American Studies 5
Communication 1 or 3

## Upper Division Required Courses

Engineering 100, 102, 103, 104, 105.. 19
Mechanical Engineering 106, 107A \& B,
150A, 165, 172
Mechanical Engineering 185A \& 185B
(taken in consecutive quarters), or Aerospace
Science and Engineering 130A \& 130B... 8
Engineering 190.
Select one course from the following Applied Mathematics Electives: Engineering 180;
Mathematics 128C; Mechanical Engineering
115; Statistics 131A
Select one course from the following System
Dynamics/Mechanical Design Electives:
Engineering 122, Mechanical Engineering
$121,150 \mathrm{~B}, 154$ or 171.
Select two courses from the following
Restricted Electives: Aerospace Science and
Engineering 129, 138, 139, 140, 141, 142;
Materials Science and Engineering 180,
182; Mechanical Engineering 134, 151,
152, 161, 163. Students may also choose
from Aerospace Science and Engineering
130A, 130B, Mechanical Engineering 150B,
154, 171 if these courses are not used in
satisfaction of other degree requirements .. 8
Technical Elective Requirement.

At least four units must be taken from any Upper Division Engineering course, which may include courses from the above System Dynamics/Mechanical Design or Restricted Elective lists if these courses are not used in satisfaction of other degree requirements.
Up to 4 units may be selected from Mechanical Engineering 185A/B or any engineering 192, 199 not used in satisfaction of other degree requirements. Courses that cannot be used are Biomedical Engineering 110L, Engineering 160, 191, 198 (Gearing up for Graduate School/ undergraduate research), Computer Science Engineering 188 or any 197T course.
Up to three units may be used from the following technical electives list:
Agricultural and Resource Economics 100A, 100B, 112
Applied Biological Systems Technology

## 101, 142, 165

Atmospheric Science 149, 160
Biological Sciences 2A, 2B, 2C
Chemistry $2 \mathrm{C}, 2 \mathrm{CH}, 8 \mathrm{~A}, 8 \mathrm{~B}$ and any upper division course except Chemistry 195 and 197
Economics 100, 101, 102, 103, 122
Engineering: Any upper division course offered in the college of engineering except Biomedical Engineering 110 L , Engineering 160, 191, 198 (gearing up for grad school/undergraduate research), Computer Science Engineering 188 or any 197T course
Environmental and Resource Sciences 100, 100L, 121, 131, 136, 185, 186, 186 L Exercise Biology 102
Fiber and Polymer Science 100 (same as
Materials Science Engineering 147)
Food Science and Technology 159, 160
Geology 17, 32, 35, 36, 50, 50L, 60,
100, 100L, 101, 101L, 130, 131, 160,
162, 163
Hydrologic Science 110, 124, 134, 141,
$142,143,144,146,151,182$
Management 11A, 11B, 100, 120, 140,
$150,160,170,180$
Mathematics: any upper division course except Mathematics 197TC
Physics 9HE and any upper division course except Physics 160 (restricted to one unit of technical elective), 195, 1971
Statistics: any upper division course except Statistics 100, 102, 103, 104, 106, 108
Upper Division Composition
Requirement $\qquad$ 0 or 4
One course from the following (a grade of Cor better is required): University Writing Program 101, 102E, 104A, 104E, 104T or passing the Upper-Division Composition Exam.

## The Mechanical Engineering/ Materials Science Undergraduate Program

The Mechanical Engineering/Materials Science program is not accredited by the Engineering Accreditation Commission of ABET; http://www.abet.org.
The Mechanical Engineering/Materials Science program is not accepting new students through Undergraduate Admissions or the change of major process.
The Mechanical Engineering/Material Science program is a combined major that offers students a unique interdisciplinary experience requiring work with mechanical engineering and material science and engineering students. In addition to performing work in portions of the mechanical engineering program described above, this program provides the background to understand the structure, properties, and behavior of materials and to pursue these fields in industry and/or graduate scholarship.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.
Exclusive of General Education units, the minimum number of units required for the Mechanical Engineering/Materials Science major is 170 .

## Lower Division Required Courses

Mathematics 21A-21B-21C-21D............ 16
Mathematics 22A-22B............................. 6
Physics 9A-9B-9C-9D............................ 19
Chemistry 2A-2B or 2AH-2BH ............... 10

## Upper Division Required Courses

Engineering 100, 102, 103, 104,
105 .................................................... 19
Mechanical Engineering 106, 107A, 107B,
150A, 165, 171, 172 ........................ 26
Mechanical Engineering 185A \& 185B or
Materials Science and Engineering 188A \& B
(taken in consecutive quarters) ................. 4
Materials Science and Engineering 160,
162, 164, 174 16
One course chosen from Materials Science
and Engineering 172, 180, 181, 182,
188A-B (if not used to satisfy above core requirement) ..
One laboratory course chosen from Science and Engineering 162L or 174L... 2 Select one course from: Engineering 180;
Mathematics 128C; Mechanical Engineering
115; Statistics 131A. .4
Engineering 190. 3
Technical Electives........................................... 10
One course must be chosen from the following System Dynamics/Mechanical Design electives: Engineering 122, Mechanical Engineering 121, 150B, 154.
Two courses must be chosen from Aerospace Science and Engineering 129, 130A, 130B, 138, 139, 189A, 189B; Materials Science and Engineering 147; Mechanical Engineering 134, 151, 152, 161, 163. Students may also choose from Mechanical Engineering 150B, 154 if not used for the System Dynamics/Mechanical Design elective requirement above. Students may also choose from Material Science and Engineering 180, 181, 182, if these courses are not used for a Materials Science and Engineering requirement above.
A combined maximum of 4 units of Mechanical Engineering 185A \& B, Materials Science and Engineering 188A \& B or any course numbered 192 or 199 not used in satisfaction of core requirements may be applied to the technical elective degree requirement.
Upper Division Composition
Requirement .................................. 0 or 4 One course from the following (grade of C - or better is required): University Writing Program 101, 102A, 102B, 102G, 102E, 104A, 104B, 104C, 104D, 104E, 104E, 104T or passing the Upper-Division Composition Exam.

## Division of Aerospace Science and Engineering

The Division of Aerospace Science and Engineering administers the Aerospace Science and Engineering Program within the Department of Mechanical and Aerospace Engineering.

## Faculty

Roger Davis, Ph.D., Professor
Jean-Pierre Delplanque, Ph.D., Professor
Fidelis O. Eke, Ph.D., Professor
Mohamed M. Hafez, Ph.D., Professor
Academic Senate Distinguished Teaching Award Ronald A. Hess, Ph.D., Professor
Sanjay S. Joshi, Ph.D., Associate Professor
Valeria La Saponara, Ph.D., Assistant Professor
Stephen K. Robinson, Ph.D., Professor
Nesrin Sarigul-Klijn, Ph.D., Professor
C. P. (Case) van Dam, D. Engr., Professor

## The Aerospace Science \& Engineering Undergraduate Program

The Aerospace Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET; http://www.abet.org.
Aerospace Science and Engineering majors learn to apply the principles of the physical sciences and engineering to the design of aerospace vehicles. Specific objectives include the design, development and manufacture of aerospace vehicles and other transportation systems through the integration of disciplines associated with aerodynamics, propulsion, structures and guidance/control.
Our Bachelor of Science degree in Aerospace Science and Engineering provides a broad background and fundamental education in mathematics, the physical sciences, and the engineering sciences. These fundamentals, when complemented by the required technical courses, prepare students for employment in government or industry, while simultaneously establishing an excellent foundation for graduate studies.
Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.
Exclusive of General Education units, the minimum number of units required for the Aerospace Science and Engineering major is 161 .

## Lower Division Required Courses

One course must be chosen from the following astronautics electives: Aerospace Science and Engineering 140, 141 or 142 The remaining units must be taken from any upper-division engineering course except Biomedical Engineering 110L, Engineering 160, 191, 198 (Gearing up for Grad School/undergraduate research), Computer Science Engineering 188 or any 197T course.
Upper Division Composition
Requirement..................................... 0 or 4

One course from the following (grade of C - or better is required): University Writing Program 101, 102E, 104A, 104E, 104T or passing the Upper-Division Composition Exam.

## The Graduate Program in Mechanical and Aeronautical Engineering

## M.S. and Ph.D.

530-752-0581
The defining element of graduate study in the Mechanical and Aeronautical Engineering Program is interdisciplinary design. Research within this graduate program advances design in diverse fields such as vehicles, plasma MHD propulsion, biomechanics, aerostructures, sensors, combustion, and energy systems. Graduate students acquire skills both to address fundamental issues in these areas and to design complex, multi-component systems. The highly collaborative environment fosters multidisciplinary research while drawing on the study of mathematics, experimental and space plasma science, electrical engineering, materials science, materials modeling, molecular dynamics and numerical analysis, bioengineering, space physics, and nanotechnology in addition to the core areas. Recruiters from industry are active here, knowing that, in addition to having hands-on design experience, our students are well grounded in engineering fundamentals. They study with professors who "wrote the book" on their discipline, and work on design projects with researchers who are international authorities in their field. Our graduate students are able to work closely with faculty in a friendly but demanding environment where teamwork and faculty mentoring are important, as is the cross-disciplinary, collaborative culture that is unique to UC Davis.

## Research Highlights:

- Aeronautics and aerostructures
- Spacecraft design and operation
- Space environmental studies
- Remote sensing
- Electrical propulsion
- Flight dynamics and control
- Computational fluid dynamics
- Experimental MHD turbulence studies
- Dynamic systems and controls
- Robotics
- Materials modeling
- Manufacturing and Mechanical design
- Reacting flows
- Heat transfer
- Automotive system dynamics
- Biosensors/Microelectromechanical Systems (MEMS)
- Molecular self-assembly
- Radiation effects in solids
- Nonlinear dynamics and phase-locking
- Biofluid mechanics
- Biosolid mechanics
- Sports biomechanics
- Energy Systems/Fuel Cell/Hybrid Vehicle Technology
- High energy density science and applications
- Nuclear fusion energy
- Wind energy

## Research Facilities and Partnerships:

- Center for Computational Fluid Dynamics
- Institute of Transportation Studies
- Center for Advanced Highway Maintenance and Construction Technology
- GATE Center for Hybrid Electric Vehicles
- Aeronautical Wind Tunnel Facility

Complete Information on our website at
http://mae.ucdavis.edu/grad_studies/.

## Courses in Engineering: Mechanical (EME)

Courses in Mechanical Engineering (EME) are listed below; courses in Aerospace Science and Engineering (EAE) are listed immediately following; graduate courses in Mechanical and Aeronautical Engineering (MAE) follow.

## Lower Division

1. Mechanical Engineering (1)

Lecture-1 hour. Description of the field of mechanical engineering with examples taken from industrial applications, discussions of the practice with respect to engineering principles, ethics, and responsibilities. (P/NP grading only.) -I. (I.)

## 5. Computer Programming for Engineering

 Applications (4)Lecture-3 hours; laboratory - 3 hours. Prerequisite: Mathematics 16A or 21 A (may be taken concurrently). Structured programming in C for solving problems in engineering. Introduction to MATLAB and comparison study of $\mathrm{C} / \mathrm{C}++$ with MATLAB. Not open for credit to students who have completed course 124. GE credit: QL, SE, SL, VL.-I. (I.) Cheng

## 50. Manufacturing Processes (4)

Lecture/discussion-3 hours; laboratory-3 hours. Prerequisite: C- or better in: Engineering 4 and Physics 9A. Restricted to Mechanical Engineering and Mechanical Engineering/Materials Science Engineering majors. Modern manufacturing methods, safety, manufacturing instructions, computer-aided manufacturing and their role in the engineering design and development process. GE credit:
SciEng | QL, SE, VL. -I, II, III. (I, II, III.) Linke, Soshi

## 92. Internship in Mechanical Engineering (1-5)

Internship. Prerequisite: lower division standing; approval of project prior to period of internship. Supervised work-study experience in engineering.
May be repeated for credit. (P/NP grading only.)
97TC. Mentoring and Tutoring Engineering in the Community (1-4)
Prerequisite: consent of instructor. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.)
99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor; lower division standing. (P/NP grading only.)

## Upper Division

106. Thermo-Fluid Dynamics (4)

Lecture-4 hours. Prerequisite: C- or better in Engineering 103 and 105. Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Inviscid incompressible flow, compressible flow, ideal gas mixtures, psychrometrics, reacting mixtures and combustion. GE credit: SciEng | SE.-I, II, III. (I, II, III.) Delplanque, Kennedy, Shaw
107A. Experimental Methods (3)
Lecture-2 hours; laboratory - 1.5 hours. Prerequisite: C- or better in Mechanical Engineering 106. Restricted to Mechanical Engineering, Aerospace Science \& Engineering and Mechanical/Materials Science Engineering Majors. Experiments to illustrate principles of thermal-fluid systems. Statistical and uncertainty analysis of data; statistical design of experiments; measurement devices; experiments involving thermodynamic cycles, combustion, compressible and incompressible flows. Two units of credit for students who have previously taken Chemical Engineering 155A; one unit of credit for students who have previously taken Chemical Engineering 155B; two units of credit for students who have previously taken Civil and Environmental Engineering 141L. GE credit: SciEng | QL, SE, VL. - I, II, III, IV. (I, II, III, IV.) Erickson, Kennedy, Park, Shaw

107B. Experimental Methods (3)
Lecture-2 hours; laboratory - 3 hours. Prerequisite: C- or better in Engineering 100 and Engineering 102; Engineering 104 recommended. Restricted to Mechanical Engineering, Aerospace Science \& Engineering and Mechanical/Materials Science \& Engineering. Experiments to illustrate principles of mechanical systems. Theory of measurements; Signal analysis; Demonstration of basic sensors for mechanical systems; Experimental project design; Experiments involving voltage measurement; strain gauges, dynamic systems of Oth, 1 st and 2 nd order. Only two units of credit for students who have previously taken Biomedical Engineering 111. Only one unit of credit for students who have previously taken Biological Systems Engineering 165. GE credit: SciEng | QL, SE, VL, WE.-I, III. (I, II, III.) Hill, Horsley, La Saponara

## 115. Introduction to Numerical Analysis and Methods (4)

Lecture-3 hours; lecture/discussion-1 hour. Prerequisite: C- or better in: Engineering 6 or course 5 or Computer Science Engineering 30 or Chemical and Materials Science Engineering 6; C- or better in: Mathematics $21 \mathrm{~A}, 21 \mathrm{~B}, 21 \mathrm{C}, 21 \mathrm{D}, 22 \mathrm{~A}, 22 \mathrm{~B}$; C- or better in: Physics 9A, 9B, 9C. Number representation, Taylor expansions, error and stability analysis, roots of nonlinear equations, sets of linear equations, numerical integration, ordinary differential equations. Not open for credit to students who have taken Applied Science Engineering 115. GE credit: SciEng | SE. - II. (II.) Jensen
121. Engineering Applications of Dynamics (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: C- or better in Engineering 102; C- or better in Engineering 6 or course 5 or Computer Science Engineering 30. Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Technical elective that revisits dynamic principles with emphasis on engineering applications; stressing importance of deriving equations of motion and setting these into format for computer solution with computer simulation lab, students gain experience with solving complex, real engineering applications. GE credit: SciEng | QL, SE, SL, VL. - III. (III.) Karnopp, Margolis

## 134. Vehicle Stability (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: C- or better in Engineering 102. Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Introduction to the static and dynamic stability characteristics of transportation vehicles with examples drawn from aircraft, high-performance automobiles, rail cars and boats. Laboratory experiments illustrate the dynamic behavior of automobiles, race cars, bicycles, etc. GE credit: SciEng | QL, SE. - III. (III.) Karnopp

## 150A. Mechanical Design (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: C- or better in: Engineering 45 or Engineering 45Y; C- or better in both Engineering 104 and course 50 (may be taken concurrently). Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering majors. Principles of engineering mechanics applied to mechanical design. Theories of static and fatigue failure of metals. Design projects emphasizing the progression from conceptualization to hardware. Experimental stress analysis and mechanical measurements using strain gages. GE credit: SciEng | QL, SE, VL, WE.-I, III, IV. (I, III, IV.) Farouki, Hill, Ravani, Schaaf

## 150B. Mechanical Design (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: C- or better in course 150A. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of engineering mechanics applied to the design and selection of mechanical components. Design projects, which concentrate on conceptual design, engineering analysis, methods of
manufacture, material selection, and cost. Introduction to Computer-Aided Design. GE credit: SciEng | QL, SE, VL. - II, III. (II.) Farouki, Linke, Ravani

## 151. Statistical Methods in Design and Manufacturing (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: C- or better in course 150A. Restricted to Restrictions on Enrollment Text: Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering Methods of statistical analysis with emphasis on applications in mechanical design and manufacturing. Applications include product evaluation and decision making, stress-strength interference, probabilistic design, systems reliability, and fatigue under random loading. GE credit: SciEng | QL, SE, VL.

## 152. Computer-Aided Mechanism Design

 (4)Lecture-3 hours; discussion-1 hour. Prerequisite: C- or better in Engineering 102; C- or better in course 5 or Engineering 6 or Computer Science Engineering 30. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of computer-aided mechanism design. Computer-aided kinematic, static, and dynamic analysis and design of planar mechanisms such as multi-ple-loop linkages and geared linkages. Introduction to kinematic synthesis of mechanisms. Offered in alternate years. GE credit: SciEng | QL, SE, VL.(II.) Cheng

## 154. Mechatronics (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: C - or better in each of the following: Engineering 100 and Engineering 102 and course 50. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Mechatronics system concept and overview, control system design ware architecture, microcontroller and interface technology for mechatronics control, sensor for mechatronics systems, actuator drives. GE credit: SciEng | QL, SE, VL. - III. (III.) Yamazaki
161. Combustion and the Environment (4) Lecture-3 hours; lecture/discussion-1 hour. Prerequisite: grade of C - or better in course 106. Introduction to combustion kinetics; the theory of premixed flames and diffusion flames; turbulent combustion; formation of air pollutants in combustion systems; examples of combustion devices which include internal combustion engines, gas turbines, furnaces and waste incinerators; alternative fuel sources. Offered in alternate years. GE credit: SciEng | QL, SE, VL. - (II.) Shaw

## 163. Internal Combustion Engines and

 Future Alternatives (4)Lecture-3 hours; laboratory-3 hours. Prerequisite: C - or better in course 50 and course 106. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Fundamentals of internal combustion engine design and performance. Future needs to adapt to environmental concerns, and the feasibility of better alternatives in the future. Offered in alternate years. GE credit: SciEng | QL, SE, VL.I. Erickson, Park

## 165. Heat Transfer (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: C- or better in course 5 or Engineering 6 or Computer Science Engineering 30; C- or better in Engineering 103 and 105. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Conduction, convection, and radiation heat transfer. Computational modeling of heat transfer in engineering. Applications to engineering equipment with the use of digital computers. GE credit: SciEng | QL, SE, VL.-I, III. (I, III.) Aldredge, Davis, Kennedy, Shaw
171. Analysis, Simulation and Design of Mechatronic Systems (4)
Lecture-3 hours; laboratory-3 hours. Prerequisite: C- or better in Engineering 100 and 102. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Modeling of dynamic engineering systems in various energy domains. Analysis and design of dynamic systems. Response of linear systems. Digital computer simulation and physical experiments. GE credit: SciEng \| QL, SE, VL.-II. (II.)

## Hubbard

## 172. Automatic Control of Engineering

 Systems (4)Lecture-3 hours; discussion-1 hour. Prerequisite: C- or better in Engineering 100 and 102. Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Classical feedback control; block diagrams; control systems performance specifications; steady state errors; rise and settling times; root locus; PID controllers; control design with Bode and Nyquist plots; stability; phase and gain margin; lead and lag compensators; state variable feedback controllers. GE credit: SciEng | QL, SE, VL. - II, III. (II, III.) Eke, Joshi

## 185A. Mechanical Engineering Systems

 Design Project (4)Lecture-1 hour; laboratory-3 hours. Prerequisite: C- or better in: course 150A and course 165 (may be taken concurrently); Communications 1 or 3 rec ommended; upper division composition recommended. Restricted to Senior standing in Mechanical Engineering (EMEC). Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints.
(Deferred grading only, pending completion of sequence.) GE credit: SciEng | OL, QL, SE, VL,
WE.-I, II. (I, II.) Davis, Velinsky

## 185B. Mechanical Engineering Systems

 Design Project (4)Lecture-1 hour; laboratory-3 hours. Prerequisite: course 185A and senior standing in the Department of Mechanical and Aerospace Engineering. Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. (Deferred grading only, pending completion of sequence.) GE credit: Sci OL, QL, SE, VL, WE. - II, III. (II, III.) Velinsky, C. Davis

## 189A-L. Selected Topics in Mechanical

 Engineering (1-5)Prerequisite: consent of instructor. Directed group study of selected topics in separate sections in (A) Energy Systems and the Environment, (B) Engineering Controls; GE credit: SE, (C) Engineering Dynam ics, (D) Biomechanics, (E) Fluid Mechanics, (F) Manufacturing Engineering, (G) Mechanical Engineering and Product Design, (H) Mechatronics Systems, (I) MEMS/Nanotechnology, (J) Solid and Structural Mechanics, (K) Thermodynamics, (L) Vehicle and Transportation Systems. May be repeated for credit when the topic is different.

## 192. Internship in Engineering (1-5)

Internship. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in mechanical engineering. May be repeated for credit. (P/NP grading only.)
197TC. Mentoring and Tutoring Engineering in the Community (1-4)
Prerequisite: upper division standing; consent of instructor. Mentoring, coaching, tutoring and/or supervision of students in K- 12 schools in Engineer-ing-related topics. May be repeated for credit. (P/ NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Courses in Aerospace Science and Engineering (EAE) <br> Lower Division <br> 1. Introduction to Aerospace Science Engineering (1)

Lecture -1 hour. Description of the field of aerospace engineering with examples from industry, gov ernment, and research. Aerospace engineering principles, ethics, and responsibilities. (P/NP grading only.) -l. (I.)
99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor and lower division standing. (P/NP grading only.)

## Upper Division

## 126. Theoretical and Computational

 Aerodynamics (4)Lecture-3 hours; discussion - 1 hour. Prerequisite: C- or better in course 127; C- or better in Engineering 180 or Applied Science Engineering 115 or Mechanical Engineering 115 or Mathematics 128C. Development of general equations of fluid motion. Study of flow field kinematics and dynamics. Flow about a body. Thin airfoil theory. Viscous effects. Applications of numerical methods to wing analysis and design. GE credit: SciEng | SE.-III. Hafez
127. Applied Aircraft Aerodynamics (4) Lecture-3 hours; discussion-1 hour. Prerequisite grade of C- or better in Mechanical Engineering 106. Experimental characteristics of wing sections. High-lift devices. Lift and drag at high Mach numbers. Drag aerodynamics. Total aircraft drag estimation. Aerodynamic design procedures. GE credit:

## QL, SE, SL, WE. -I. (I.) Robinson

## 129. Stability and Control of Aerospace Vehicles (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: grade of C- or better in Engineering 102. Restricted to upper division standing. Aircraft and spacecraft stability and control. Derivation of fundamental equations of motion for aircraft/spacecraft. Specialization of equations for aircraft. Fundamentals of feedback. Aircraft flight control systems. Specialization of equations of motion for orbiting spacecraft. Spacecraft attitude control systems. GE credit: QL, SE.-II. (II.) R. Hess
130A. Aircraft Performance and Design (4) Lecture-2 hours; discussion - 1 hour; laboratory - 3 hours. Prerequisite: C- or better in course 127; C- or better in course 129 (may be taken concurrently). Major aircraft design experience with multiple realistic constraints including aerodynamics, performance analysis, weight estimation, stability and control, and appropriate engineering standards. GE credit: SciEng | SE, QL, VL.-II. (II.) van Dam
130B. Aircraft Performance and Design (4) Lecture-2 hours; discussion - 1 hour; laboratory-3 hours. Prerequisite: grade of C - or better in course 130A. Restricted to upper division standing. Major aircraft design experience incorporating multiple realistic constraints including: refinement and iteration of initial design; cost analysis, detailed design, and analysis of aircraft structure; propulsion system; aerodynamics, stability, and control/handling qualities; manufacturing; or appropriate engineering standards. GE credit: OL, SE, SL, VL, WE. - III. (III.) van Dam
133. Finite Element Methods in Structures (4)

Lecture-3 hours; laboratory-3 hours. Prerequisites: grade of C- or better in Engineering 104. Open to College of Engineering Students. Introduction to the aerospace structural design process. History of aircraft and spacecraft materials. Effects of loading beyond elastic limit. Deflections and stresses
due to combined loading. Virtual work principles, and finite element methods. Applications to aerospace structures. GE credit: SE.-I. (I.) Sarigul-Klijn

## 135. Aerospace Structures (4)

Lecture-4 hours. Prerequisite: C- or better in Engineering 104; course 126 or 127 recommended. Analysis and design methods used in aerospace structures. Shear flow in open, closed and multicell beam cross-sections, buckling of flat and curved sheets, tension field beams, local buckling. GE credit: SciEng | QL, SE. - II. (II.) La Saponara

## 137. Structural Composites (4)

Lecture-3 hours; laboratory-1 hour. Prerequisite: grade of C- or better in Engineering 104. Overview of materials and technology for creating structures from fiber reinforced resin matrix composite material systems. Elementary design analysis and case studies emphasizing aeronautical applications. GE credit: SE.-La Saponara

## 138. Aircraft Propulsion (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: C- or better in Mechanical Engineering 106. Analysis and design of modern aircraft gas turbine engines. Development and application of cycle performance prediction techniques for important engine configurations. Introduction to the operation and design of inlets, compressors, burners, turbines, and nozzles. Cycle design studies for specific applications. GE credit: SciEng | QL, SE. - II. (II.) R. Davis

## 139. Structural Dynamics and

Aeroelasticity (4)
Lecture-3 hours; laboratory-3 hours. Prerequisite grade of C- or better in Engineering 102 and 103. Structural dynamics of flexible structures. Introduction to fluid-structure interaction. Design of subsystems or systems under aeroelastic constraints. Dynamics instabilities. Control effectiveness. Unsteady aerodynamics. Flutter. Aeroelastic tailoring in design, Applications to aerospace, mechanical and biomedical systems. GE credit: SE. - (III.) Sarigul-Klijn

## 140. Rocket Propulsion (4)

Lecture-4 hours. Prerequisite: grade of C- or better in Engineering 103 and 105. Restricted to upper division standing. Fluid and thermodynamics of rocket engines, liquid and solid rocket propulsion. Space propulsion concepts and space mission requirements. Not open for credit to students who have taken identical course 189A prior to Fall Quarter 2013. GE credit: SciEng | SE. - III, IV. (III, IV.) Hafez

## 141. Space Systems Design (4)

Lecture-2 hours; discussion-2 hours. Prerequisite: grade of C- or better in Engineering 102 and Mechanical Engineering 106. Introduction to space systems design including space project organization, requirements definition and specification, concepts formulation, system tradeoffs, subsystem design. Prototype space mission concepts are presented and a multidisciplinary mission design is developed that considers all relevant architecture elements. Offered in alternate years. GE credit: SciEng | SE.-I. (I.) Joshi

## 142. Orbital Mechanics (4)

Lecture-4 hours. Prerequisite: grade of C - or better in Engineering 102. Restricted to upper division standing. Satellite orbits, multistage rockets, current global boosters, and new technologies. Design application problems include satellites, trajectory optimizations, and interplanetary trajectories. Not open for credit to student who have completed course 189B prior to Fall Quarter 2013. GE credit: SciEng | SE.-IV. (III.)

## 189C. Flight Simulation and Testing in Design of Aircraft and Spacecraft (4)

 Lecture-3 hours; laboratory-3 hours. Prerequisite: Engineering 102; consent of the instructor. Teaches flight test techniques together with data analysis methods to prepare students for any type of flight testing including fixed wing, rotary wing and launch vehicles. Offered irregularly. GE credit:SciEng \| SE.-Sarigul-Klijn
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Courses in Mechanical and Aeronautical Engineering (MAE)

(Formerly courses in Aeronautical Science and Engineering and Mechanical Engineering.)

## Graduate

## 207. Engineering Experimentation and

 Uncertainty Analysis (4)Lecture-3 hours; discussion-1 hour. Prerequisite: Mechanical Engineering 107A and 107B. Design and analysis of engineering experiments with emphasis on measurement standards, data analysis, regressions and general and detailed uncertainty analysis, including statistical treatment of experimental data intervals, propagation of bias and precision errors, correlated bias approximations, and using jitter programs.-C. Davis
208. Measurement Methods in Fluid Mechanics and Combustion (4)
Lecture-3 hours; discussion - 1 hour. Prerequisite: course 165 and Engineering 103. Application of shadow, schlieren and other flow visualization methods. Introduction to optics and lasers. Measurement of velocity and concentrations in reacting and nonreacting flows with laser diagnostic techniques including LDV, Rayleigh, Raman and fluorescence scattering and CARS
210A. Advanced Fluid Mechanics and Heat Transfer (4)
Lecture-3 hours; discussion - 1 hour. Prerequisite: Engineering 103, 105 and Mechanical Engineering 165. Development of differential equations governing continuity, momentum and energy transfer. Solutions in laminar flow for exact cases, low and high Reynolds numbers and lubrication theory. Dynamics of inviscid flow. - Aldredge
210B. Advanced Fluid Mechanics and Heat Transfer (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 210A. Study of stability and transition to turbulence. Introduction to the physics of turbulence. Modeling of turbulence for numerical determination of momentum and heat transfer. - Aldredge

## 211 . Fluid Flow and Heat Transfer (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Engineering 103, 105 and Mechanical Engineering 165 or the equivalent. Design aspects of selected topics; heat conduction, fins; heat transport in ducts, boundary layers and separated flows; heat exchang-ers.-Erickson, Park

## 212. Biomedical Heat and Mass Transport

 Processes (4)Lecture-3 hours; discussion-1 hour. Prerequisite: Mechanical Engineering 165, Biological Systems Engineering 125, Chemical Engineering 153 or the equivalent. Application of principles of heat and mass transfer to biomedical systems related to heat exchange between the biomedical system and its environment, mass transfer across cell membranes and the design and analysis of artificial human organs. (Same course as Biomedical Engineering 212.)-Aldredge
213. Advanced Turbulence Modeling (4) Lecture-4 hours. Prerequisite: course 210B. Methods of analyzing turbulence; kinematics and dynamics of homogeneous turbulence; Reynolds stress and heat-flux equations; second order closures and their simplification; numerical methods; application to boundary layer-type flows; two-dimensional and three-dimensional hydraulic and environmental flows.-Aldredge
215. Biomedical Fluid Mechanics and Transport Phenomena (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: Engineering 103 or Chemical Engineering 150B or Civil and Environmental Engineering 141. Application of fluid mechanics and transport to biomedical systems. Flow in normal physiological function and pathological conditions. Topics include circulatory and respiratory flows, effect of flow on cellular processes, transport in the arterial wall and in tumors, and tissue engineering. (Same course as Biomedical Engineering 215.)
216. Advanced Thermodynamics (4)

Lecture-3 hours; discussion-1 hour. Prerequisite:
Engineering 105. Study of topics important to energy conversion systems, propulsion and other systems using high temperature gases. Classical thermodynamics and quantum statistical mechanics of nonreacting and chemically reacting gases, gas mixtures, and other substances.-Shaw

## 217. Combustion (4)

Lecture-3 hours; lecture/discussion-1 hour. Prerequisite: Engineering 103 and 105, Mechanical Engineering 106. Restricted to graduate students. Review of chemical thermodynamics and chemical kinetics. Discussion of reacting flows, their governing equations and transport phenomena; detonations; laminar flame structure and turbulent combustion. Aldredge, Kennedy, Shaw

## 218. Advanced Energy Systems (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Engineering 103 and 105, or the equivalent. Review of options available for advanced power generation. Detailed study of basic power balances, component efficiencies, and overall powerplant performance for one advanced concept such as a fusion, magnetohydrodynamic, or solar electric powerplant.
219. Introduction to Scientific Computing in Solid and Fluid Dynamics (4)
Lecture-3 hours; laboratory-3 hours. Prerequisite: Engineering 103 and 104. Scientific calculations with finite element and finite difference methods for multi-dimensional problems in solid and fluid dynamics are performed with examples in C, C++, FORTRAN, and MATLAB script files. Derivation of the basic equations of motion in finite volume form with applications to elasticity, waves.-Delplanque

## 220. Mechanical Vibrations (4)

Lecture-4 hours. Prerequisite: Engineering 122.
Multiple degrees of freedom; damping measures;
Rayleigh's method; vibration absorbers; eigenvalves and modeshapes; modal coordinates; forced vibrations; random processes and vibrations; autocorrelation; spectral density; first passage and fatigue failure; nonlinear systems; phase plane.

## 222. Advanced Dynamics (4)

Lecture-4 hours. Prerequisite: Engineering 102. Dynamics of particles, rigid bodies and distributed systems with engineering applications; generalized coordinates; Hamilton's principle; Lagrange's equations; Hamilton-Jacobi theory; modal dynamics orthogonality; wave dynamics; dispersion.

## 223. Multibody Dynamics (4)

Lecture-4 hours. Prerequisite: Engineering 102.
Coupled rigid-body kinematics/dynamics; reference frames; vector differentiation; configuration and motion constraints; holonomicity; generalized speeds; partial velocities; mass; inertia tensor/theorems; angular momentum; generalized forces; comparing Newton/Euler, Lagrange's, Kane's methods; computer-aided equation derivation; orientation; Euler; Rodrigues parameters. (Same course as Biomedical Engineering 223.)
225. Spatial Kinematics and Robotics (4) Lecture-3 hours; laboratory - 3 hours. Prerequisite: C Language and course 222. Spatial kinematics, screw theory, spatial mechanisms analysis and synthesis, robot kinematics and dynamics, robot workspace, path planning, robot programming, real-time architecture and software implementation. (Same course as Biomedical Engineering 225.) Offered in alternate years. - Ravani

## 226. Acoustics and Noise Control (4)

Lecture-4 hours. Prerequisite: Engineering 122 Description of sound using normal modes and waves; interaction between vibrating solids and sound fields; sound absorption in enclosed spaces; sound transmission through barriers; applications in design, acoustic enclosures and sound walls, room acoustics, design of quiet machinery. - Sarigul-Klijn
227. Research Techniques in Biomechanics (4)

Lecture-2 hours; laboratory -4 hours; term paper or discussion -1 hour. Prerequisite: Mathematics 22B and consent of instructor; Exercise Science 115 recommended. Experimental techniques for biomechanical analysis of human movement. Techniques evaluated include data acquisition and analysis by computer, force platform analysis, strength assessment, planar and three-dimensional videography, data reduction and smoothing, body segment parameter determination, electromyography, and biomechanical modeling. (Same course as Biomedical Engineering 227/Exercise Science 227.)—Williams, Hawkins
228. Introduction to BioMEMS (4) Lecture-3 hours; discussion-1 hour. Prerequisite: BS engineering discipline or consent of instructor. Ideal for beginning graduate or advanced undergraduate students interested in microelectromechanical systems (MEMS) topics related to biological applications. Covers topics from various disciplines related to BioMEMS: mechanical, electrical, biomedical, chemical engineering, and materials science. Offered in alternate years.-I. Davis

## 229. Design \& Analysis of Micro-

## Electromechanical Systems (4)

Lecture-4 hours. Prerequisite: consent of instructor; Engineering 45, 100, 104; Engineering 122 recommended. Mechanical design of micro-electronmechanical systems (MEMS). Device modeling: lumped parameter models; energy methods; nonlinearities; electrical and mechanical noise sources. Actuation and measurement methods: capacitive, piezoresistive, thermal, piezoelectric, and optical techniques Review of basic electronics: bridge circuits, amplitude modulation; lock-in detection.-Horsley

## 231. Musculo-Skeletal System <br> \section*{Biomechanics (4)}

Lecture-4 hours. Prerequisite: Engineering 102. Mechanics of skeletal muscle and mechanical models of muscle, solution of the inverse dynamics problem, theoretical and experimental methods of kinematic and kinetic analysis, computation of intersegmental load and muscle forces, applications to gait analysis and sports biomechanics. (Same course as Biomedical Engineering 231.)
232. Skeletal Tissue Mechanics (3)

Lecture-3 hours; laboratory-1 hour. Prerequisite: Engineering 104B. Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disease. The tissues covered include bone, cartilage and synovial fluid, ligament and tendon. (Same course as Biomedical Engineering 232.)-Fyhrie

## 234. Design and Dynamics of Road Vehicles (4)

Lecture-4 hours. Prerequisite: Mechanical Engineering 134. Analysis and numerical simulation of road vehicles with on design applications.-Velinsky

## 236. Aerodynamics in Nature and

## Technology (4)

Lecture-4 hours. Prerequisite: Engineering 103. Introduction to aerodynamics in nature, fundamentals of turbulence in atmospheric flows, planetary boundary layers, pedestrian-level winds in urban areas. Criteria for laboratory modeling of atmospheric flows, wind-tunnel testing.

## 237. Analysis and Design of Composite

## Structures (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Engineering 104 or equivalent. Modeling and analysis methodology for composite structures including
response and failure. Laminated plate bending theory. Introduction to failure processes. Includes discussion of aerospace structural analysis. - La Saponara

## 238. Advanced Aerodynamic Design and

 Optimization (4)Lecture-3 hours; discussion - 1 hour. Prerequisite: consent of instructor. Application of aerodynamic theory to obtain optimum aerodynamic shapes. Both analytic solutions and solutions obtained with numerical optimization techniques will be examined. Includes introduction to the calculus of variations and numerical optimization techniques. - van Dam

## 239. Advanced Finite Elements and

 Optimization (4)Lecture-4 hours. Prerequisite: Engineering 180 or Applied Science 115 or Mathematics 128C. Introduction to advanced finite elements and design optimization methods, with application to modeling of complex mechanical, aerospace and biomedical systems. Application of states of the art in finite elements in optimum design of components under realistic loading conditions and constraints. (Same course as Biomedical Engineering 239.)-Sarigul-Klijn

## 240. Computational Methods in Nonlinear

## Mechanics (4)

Lecture -4 hours. Prerequisite: Applied Science Engineering 115 or Mathematics 128B or Engineering 180. Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems. (Same course as Biomedical Engineering 240.)-Sarigul-Klijn
242. Stability of Thin-Walled Structures (4) Lecture-4 hours. Prerequisite: Engineering 104 or equivalent. Static stability of thin-walled aerospace structures treated from both theoretical and practical design perspectives. Both monolithic and composite construction considered. Buckling of stiffened panels, shells, and thin-walled beams, experimental methods and failure/crippling processes. - La Saponara
248. Advanced Turbomachinery (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Engineering 103 and 105. Preliminary aerodynamic design of axial and radial flow compressors and turbines. Design of diffusers. Selection of turbomachine and configurations and approximations to optimum dimensions and flow angles. Introduction to through flow analysis. Rotating stall and surge, and aeromechanical considerations. -I. R. Davis
250A. Advanced Methods in Mechanical Design (4)
Lecture-4 hours. Prerequisite: Mechanical Engineering 150A and 150B or the equivalents, or consent of instructor. Applications of advanced techniques of solid mechanics to mechanical design problems. Coverage of advanced topics in stress analysis and static failure theories with emphasis in design of machine elements. Design projects emphasizing advanced analysis tools for life cycle evaluation.Ravani

## 250B. Advanced Methods in Mechanical

 Design (4)Lecture-4 hours. Prerequisite: course 250A. Applications of advanced techniques of solid mechanics to mechanical design problems. Advanced topics in variational methods of mechanics with emphasis in design of machine elements. Design projects emphasizing advanced analysis tools. - Hill

## 250C. Mechanical Performance of

 Materials (4)Lecture-4 hours. Prerequisite: undergraduate course in stress analysis and mechanical behavior of materials. Occurrence, mechanisms, and prediction of fatigue and fracture phenomenon. Use of stress and strain to predict crack initiation. Use of fracture mechanics to predict failure and crack propagation. Effects of stress concentration, manufacturing, load sequence, irregular loading, and multi-axial loading. - Velinsky
251. Mechatronics System Design (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Mechanical Engineering 154 and 172 or Electrical and Computer Engineering 157A, 157B. Motion mechanism design, electric actuator, power electronics motion control, sensor technologies, personal computer-based control systems design, motion control general operating system and real time operating systems, motion control software design, discrete event control software design. Offered in alternate years. - II. Yamazaki

## 252. Information Processing for Autonomous Robotics (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Engineering 6, Mechanical Engineering 5, or equivalent programming experience, Mechanical Engineering 154, 171, or consent of instructor.
Computational principles for sensing, reasoning,
and navigation for autonomous robots.-Joshi
254. Engineering Software Design (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Mechanical Engineering 5, Engineering 180. Principle and design of engineering software. Advanced topics in engineering software design, applications of object-oriented programming, very high-level languages, real-time multi-thread computing and sensor fusion, Web-based network computing, graphics,
and GUI in engineering.-Cheng

## 255. Computer-Aided Design and

## Manufacturing (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: proficiency in a high level programming language such as Fortran, Pascal, or C. Representation and processing of geometrical information in design and manufacturing. Numeric and symbolic computations. Coordinate systems and transformations. Bezier and B-spline curves and surfaces. Interpolation and approximation methods. Intersections, offsets, and blends. Path planning for machining,
inspection, and robotics applications.-Farouki
258. Hybrid Electric Vehicle System Theory and Design (4)
Lecture-3 hours; laboratory-3 hours. Prerequisite: Mechanical Engineering 150B, graduate standing in Mechanical and Aeronautical Engineering. Advanced vehicle design for fuel economy, performance, and low emissions, considering regulations, societal demands and manufacturability. Analysis and verification of computer design and control of vehicle systems in real vehicle tests. Advanced engine concepts.

## 261. Gas Dynamics (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Engineering 103 or the equivalent. Flow of compressible fluids. Isentropic flow. Flow with friction, heat transfer, chemically reacting gas and particle mixtures. Normal and oblique shock waves, combustion, blast and expansion waves. Method of characteristics.

## 262. Advanced Aerodynamics (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Aeronautical Engineering 126. Study of invicid and viscous flows about aerodynamic shapes at subsonic, transonic and supersonic conditions. Application of aerodynamic theory to design for reduced drag and increased lift.—Hafez

## 263. Introduction to Computational Aerodynamics and Fluid Dynamics (4)

 Lecture-3 hours; discussion - 1 hour. Prerequisite: Engineering 103 or consent of instructor. Introduction to numerical methods for solution of fluid flow problems. Discretization techniques and solution algorithms. Finite difference solutions to classical model equations pertinent to wave phenomena, diffusion phenomena, or equilibrium. Application to the incompressible Navier-Stokes equation.264. Computational Aerodynamics (4) Lecture-4 hours. Prerequisite: Aeronautical Science and Engineering 126, Engineering 180, or consent of instructor. Numerical methods for aerodynamics flow simulation in the transonic regime. Solutions of steady and unsteady potential and compressible boundary layer equations. Numerical
schemes for mixed type equations and shock waves/numerical grid generation. Viscous/inviscid interaction and coupling procedures.-Hafez

## 266. Advanced Wind-Tunnel Testing (4)

Lecture-2 hours; discussion - 1 hour; laboratory - 3 hours. Prerequisite: undergraduate course in fluid dynamics. Aspects of low-speed wind-tunnel testing for solving aeronautical and non-aeronautical problems including tunnel corrections, scale effects, force and moment measurements, and flow visualiza-

## tion. - van Dam

## 267. Parallel Computations in Fluid/

Thermal Sciences (4)
Lecture-2 hours; discussion-2 hours. Prerequisite: Mechanical Engineering 106, 165, Engineering 180 or equivalent; or consent of instructor. Programming languages and constructs for engineering analysis on parallel computers including MPI
(distributed), OpenMP (shared), and Fortran95.
Graduate or junior/senior undergraduate as a technical elective-R. Davis

## 268. Wind Power Engineering (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Engineering 102 and 103, or equivalent, or consent of instructor. Fundamentals for understanding the conversion of wind power to mechanical power and electricity. Related engineering, economic and societal issues. - van Dam

## 269. Fuel Cell Systems (4)

Lecture-2 hours; discussion - 2 hours. Prerequisite: Mechanical Engineering 106, 107, 165, or equivalent, or consent of instructor; graduate or junior/ senior undergraduate as a technical elective. Basics of electrochemistry and fuel cell engines in mobile and stationary applications. Aspects of fuel cell energy converters and their subsystems including practice with existing fuel cell and hydrogen systems on campus. Limited enrollment. - Erickson

## 27 1. Advanced Modeling and Simulation of

 Mechatronic Systems (4)Lecture-3 hours; laboratory-3 hours. Prerequisite: Mechanical Engineering 172 or the equivalent. Multiport models of mechanical, electrical, hydraulic, and thermal devices; bond graphs, block diagrams and state space equations; modeling of multiple energy domain systems; three-dimensional mechanics; digital simulation laboratory.

## 272. Theory and Design of Control Systems

 (4)Lecture-4 hours. Prerequisite: Mechanical Engineering 172 or the equivalent. Mathematical representations of linear dynamical systems. Feedback principles; benefits and cost of feedback. Analysis and design of control systems based on classical and modern approaches, with emphasis on applications to mechanical and aeronautical systems. Horsley

## 274. Analysis and Design of Digital Control

 Systems (4)Lecture-3 hours; discussion-1 hour. Prerequisite: Mechanical Engineering 172. Discrete systems analysis; digital filtering; sample data systems; state space and transform design techniques; quantization effects; multi-input, multi-output systems. - Hess
275. Advance Aircraft Stability and Control (4)

Lecture-3 hours; discussion - 1 hour. Development and analysis of aircraft equations of motion. Flexible modes. Response to control actuation. Random inputs and disturbances. Stability and control augmentation system design. Handling qualities. - Hess

## 276. Data Acquisition and Analysis (4)

Lecture-3 hours; discussion - 1 hour. Application of computers for data acquisition and control. Topics include computer architecture, characteristics of transducers, hardware for laboratory applications of computers, fundamentals of interfaces between computers and experimental equipment, programming techniques for data acquisition and control, basic data analysis. - Hill

290C. Graduate Research Conference (1) Discussion-1 hour. Prerequisite: consent of instructor. Individual and/or group conference on problems, progress, and techniques in mechanical and aeronautical engineering research. May be repeated for credit. (S/U grading only.) -I , II, III. (I, II, III.)
297. Seminar (1)

Discussion-1 hour. Prerequisite: consent of instructor. Current topics in engineering including developments in mechanical and aeronautical engineering with presentations by students, faculty, and visitors. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
298. Group Study (1-5)
299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

390. The Teaching of Aeronautical Science and Engineering (1)
Discussion-1 hour. Prerequisite: meet qualifications for teaching assistant and/or associate-in in Aeronautical Science and Engineering. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
391. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated
for credit. (S/U grading only.) - I, II, III. (I, II, III.)

## English

(College of Letters and Science)
Elizabeth Miller, Ph.D., Chairperson of the Department
Department Office. 176 Voorhies Hall

## Faculty

Don P. Abbott, Ph.D., Professor
Gina Bloom, Ph.D., Associate Professor
Nathan Brown, Ph.D., Assistant Professor
Seeta Chaganti, Ph.D., Associate Professor Joshua Clover, M.F.A., Professor
Lucy Corin, M.F.A., Associate Professor
Gregory Dobbins, Ph.D., Associate Professor
Frances E. Dolan, Ph.D., Professor,
Academic Senate Distinguished Teaching Award
Margaret W. Ferguson, Ph.D., Professor
Kathleen Frederickson, Ph.D., Assistant Professor
Lynn R. Freed, Ph.D., Professor
Elizabeth S. Freeman, Ph.D., Professor
Danielle Heard, Ph.D., Assistant Professor
W. Jack Hicks, Ph.D., Senior Lecturer

Pam Houston, B.A., Professor
Hsuan Hsu, Ph.D., Associate Professor
Mark Jerng, Ph.D., Associate Professor
Alessa Johns, Ph.D., Associate Professor
Richard A. Levin, Ph.D., Professor
Academic Senate Distinguished Teaching Award
Yiyun Li, M.F.A., Professor
Desirée Martín Ph.D., Associate Professor
John Marx, Ph.D., Professor
Colin Milburn, Ph.D., Associate Professor
Elizabeth Miller, Ph.D., Associate Professor
Parama Roy, Ph.D., Professor
Scott C. Shershow, Ph.D., Professor
Scott Simmon, Ph.D., Professor
David Simpson, Ph.D., Professor
Matthew Stratton, Ph.D., Assistant Professor
Matthew Vernon, Ph.D., Assistant Professor
Claire Waters, Ph.D., Professor
Evan Watkins, Ph.D., Professor
Joe Wenderoth, M.F.A., Professor
Michael Ziser, Ph.D., Associate Professor

## Emeriti Faculty

Max Byrd, Ph.D., Professor Emeritus
Peter Dale, Ph.D., Professor Emeritus
Joanne F. Diehl, Ph.D., Professor Emerita
Sandra M. Gilbert, Ph.D., Professor Emerita Thomas A. Hanzo, Ph.D., Professor Emeritus John O. Hayden, Ph.D., Professor Emeritus Peter L. Hays, Ph.D., Professor Emeritus
Michael J. Hoffman, Ph.D., Professor Emeritus Robert H. Hopkins, Ph.D., Professor Emeritus Clarence Major, Ph.D., Professor Emeritus
Sandra J. McPherson, B.A., Professor Emerita Linda A. Morris, Ph.D., Professor Emerita
James J. Murphy, Ph.D., Professor Emeritus
Marijane Osborn, Ph.D., Professor Emerita
David A. Robertson, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award
Winfried Schleiner, Ph.D., Professor Emeritus
Gwendolyn Schwabe, M.S., Senior Lecturer Emerita Gary Snyder, B.A., Professor Emeritus
Raymond B. Waddington, Ph.D., Professor Emeritus
Alan B. Williamson, Ph.D., Professor Emeritus
Karl F. Zender, Ph.D., Professor Emeritus

## The Major Program

The study of English develops skills in reading analytically and perceptively and in writing clearly and effectively.
The Program. The English department offers three kinds of courses: composition courses, undergraduate courses, and graduate courses. Composition courses develop skills in reading analytically and in writing persuasively. Undergraduate and graduate courses cover the entire range of English and American literature, as well as creative writing. Students majoring in English may elect a creative writing emphasis or a literature, criticism, and theory emphasis. All majors take courses introducing them to the literatures of various periods and places, to critical theory, and to frontiers of literary expression, such as the relationship of literature to environmentalism or the emergence of new media. The creative writing emphasis focuses on fiction, poetry, and article writing. The literature, criticism, and theory emphasis focuses on advanced critical analysis and research. All majors have the opportunity to work with distinguished writers, critics, scholars, and teachers.
Career Alternatives. Graduates have found the major excellent pre-professional training for graduate study in English, as well as for careers in teaching, writing, law, medicine, and library work. Many graduates are employed in journalism, publishing, advertising, and public information. Others have worked in local, state, and federal government agencies, as well as in industry and agriculture Some have established their own businesses.

## A.B. Major Requirements:

Preparatory Subject Matter.................... 20
English 3 or University Writing
Program 1
......... 4
One course from: English 40, 43, 44,
45
.4

English 10A, 10B, 10C 4
.12

Depth Subject Matter .44
English 110A or 110B ........................... 4
Please note that English 110A or 110B is a
prerequisite for advanced study in the major.
Historical Distribution Requirements ........ 20
Three courses focusing on literature written in English before 1800, at least one of which must be on literature written primarily before 1500: Before 1500
English 111, 113A, 113 B
1500-1800
English 115, 117, 122, 123, 142,
150A, 155A

One course focusing on literature written in English between 1800 and 1900: English 130, 133, 143, 144, 155B, 158A, 181A
One course focusing on literature written in English between 1900 and present: English 137N, 138, 146N, 147, 150B, 155C, 156, 158B, 166, 167, 168, 181B
Non-Historical Distribution Requirements
One course on literature and ethnicity, literature and gender, or literature and sexuality:
English 125, 139, 140, 141, 166, 167, 178, 179, 181A, 181B, 185A, 185B, 185C, 186
One course in film and media studies, language studies, cultural studies and contexts, literature and science/technology, or literature and the environment:
English 105, 106, 107, 160, 161A,
161B, 162, 164/Science and
Technology Studies 164, 171A, 171B,
$173,175,180,182,183,184$; Linguistics 106; Science and Technology Studies 173
Please note that while some courses are
identified as fulfilling more than one
distribution requirement, a given course can only fulfill one such requirement.
Area of Emphasis (choose one)..... 12 Literature, Criticism, and Theory
One upper division English elective.
Two advanced courses, one of which can be a seminar:
English 149, 153, 159, 163, 165, 177,
187A, 188A, 189, 194H, 195H
Creative Writing
Three sections of English 100F, 100P,
100NF, 100FA, 100PA
Total Units for the Major
English Majors. Up to four upper division units in a national literature other than English or American, or in Comparative Literature, may count toward the requirements of the major.
Major Advisers. D. P. Abbott, G. Bloom, N. Brown, S. Chaganti, J. Clover, L. Corin, G. Dobbins, F. Dolan, M. Ferguson, K. Frederickson, L. Freed, E. Freeman, D. Heard, W.J. Hicks, P. Houston, H. Hsu, M. Jerng, A. Johns, R.A. Levin, Y. Li, D. Martín, J. Marx, C. Milburn, E. Miller, P. Roy, S. Shershow, S. Simmon, D. Simpson, M. Stratton, M. Vernon, C. Waters, E. Watkins, J. Wenderoth, M. Ziser
Major Advising. All new and prospective English majors are encouraged to see the undergraduate staff adviser, individually, once per year, at minimum.
Foreign Languages. Students who contemplate advanced study in English should prepare for foreign language requirements for higher degrees and should consult with the graduate adviser.
Undergraduate Adviser. See Department website at http://english.ucdavis.edu or the Departmental Advising Office in 177 Voorhies Hall.

## Minor Program Requirements:

UNITS
English
20
Five upper division courses, at least four of which will be literature courses .............. 20
Honors and Honors Program. A Senior Honors Program is available to an invited group of English majors, who prepare and write a Senior Thesis (either a research paper or creative writing) in their final year. The critical honors program consists of four units of 194 H and four units of 195 H , normally taken during Winter and Spring quarters of the senior year. The creative writing honors program consists of four units of 100FA or 100PA, normally taken during Spring quarter of the junior year, and four units of 195 H , normally taken Winter quarter of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation.

Eligibility criteria and application materials may be obtained at the Undergraduate Advising office in 177 Voorhies Hall or by accessing the Department website at http://english.ucdavis.edu. For more details, see Graduation Honors, on page 84.
Education Abroad Options. The department strongly encourages interested students to pursue their studies abroad. It is possible for students to complete significant portions of the English major provided that the course is evaluated as at least four UC Davis units; the course is considered upper division by the standards set forth by UC Davis Study Abroad; the student presents copies of the coursework, syllabus, and writing assignments to the department's advising staff.

## Teaching Credential Subject Representative.

 See the Teacher Education program.Graduate Study. The Department of English offers programs of study and research leading to the M.A. in literature and creative writing and the Ph.D. in literature. Detailed information may be obtained from the graduate adviser or the Chairperson of the Department.
The department's affiliation with the Critical Theory Program also provides the opportunity for students in English to prepare for the designated emphasis in Critical Theory (an interdisciplinary program in theories and methodologies in the humanities and social sciences).
Graduate Director. Mark Jerng, Ph.D.
Entry Level Writing. Students must have met the Entry Level Writing requirement before taking any course in English. C. Bates, Director.
Prerequisites. English 3 or University Writing Program 1 is required for admission into all preparatory courses $(40,43,44,45,10 \mathrm{~A}, 10 \mathrm{~B}, 10 \mathrm{C})$, and all upper division courses, unless otherwise stated in the course listings. Comparative Literature 1, 2, 3, or 4 or Native American Studies 5 may normally be substituted for English 3 or University Writing Program 1.

## Courses in English (ENL)

## Lower Division

## 3. Introduction to Literature (4)

Lecture/discussion-4 hours. Prerequisite: completion of Entry Level Writing requirement. Introductory study of several genres of English literature, emphasizing both analysis of particular works and the range of forms and styles in English prose and poetry. Frequent writing assignments will be made. GE credit: ArtHum, Wrt | AH, WE. - I, II, III. (I, II, III.)

## 4. Critical Inquiry and Literature: Freshman

 Seminar (4)Seminar-4 hours. Prerequisite: completion of Subject $A$ requirement and consent of instructor; enrollment limited to freshmen. Critical inquiry into significant literary texts. Emphasis on close reading, classroom dialogue, and the writing of several papers or a longer seminar paper. GE credit: ArtHum, Wrt | AH, WE.

## 5F. Introduction to Creative Writing: Fiction

 (4)Lecture/discussion-4 hours. Prerequisite: completion of Entry Level Writing requirement. Elementary principles of writing fiction. Write both in prescribed forms and in experimental forms of their own choosing. No final examination. May be repeated one time for credit. GE credit: ArtHum, Wrt \| AH, WE. - I, II, III. (I, II, III.)
5P. Introduction to Creative Writing: Poetry (4)

Lecture/discussion-4 hours. Prerequisite: completion of Entry Level Writing requirement. Elementary principles of writing poetry. Write both in prescribed forms and in experimental forms of their own choosing. No final examination. May be repeated one time for credit. GE credit: ArtHum | AH. - I, II, III. (I, II, III.)

10A. Literatures in English I: To 1700 (4) Lecture/discussion-3 hours; extensive writing. Prerequisite: course 3 or University Writing Program 1 or equivalent. Historical introduction to English language and literature from 800-1700. Linguistic borrowing, innovation, and change. Emergence of key literary genres. Colonial America as a new site of English literary production and consumption. GE credit: ArtHum | AH.-I, II, III. (I, II, III.)
10B. Literatures in English II: 1700-1900 (4) Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 10A. Historical introduction to English language and literature from 1700-1900. Linguistic borrowing, innovation, colonization, and change. Emergence and development of key literary genres. America, Britain, Ireland, Scotland, and India as important sites of English literary production and consumption. GE credit: ArtHum | AH. - I, II, III. (I, II, III.)
10C. Literatures in English III: 1900 to Present (4)
Lecture/discussion-3 hours; extensive writing. Prerequisite: course 10B. Historical introduction to English language and literature from 1900-present. Linguistic borrowing, innovation, and change. Emergence and development of key literary genres. Formal experimentation. Modernism as transnational phenomenon. GE credit: ArtHum | AH.-I, II, III. II, II, III.)
30A. Survey of American Literature (4) Lecture-3 hours; discussion - 1 hour. Prerequisite course 3 or University Writing Program 1 or the equivalent. American literature from the seventeenth century to 1865. GE credit: ArtHum, Div,
Wrt \| ACGH, AH, WE.

## 30B. Survey of American Literature (4)

 Lecture-3 hours; discussion-1 hour. Prerequisite: course 3 or University Writing Program 1 or the equivalent. American literature from 1865 to the present. GE credit: ArtHum, Div, Wrt | ACGH, AH, WE.
## 40. Introductory Topics in Literature (4)

Lecture/discussion -3 hours; extensive writing. Prerequisite: course 3 or University Writing Program 1 or equivalent. Study of a special topic. Literature written in English in any period or place or genre. Thematic, formal, or temporal focus. May be repeated two times for credit if content differs. GE credit: ArtHum, Wrt | AH, WE.-I.

## 42. Approaches to Reading (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 3 or University Writing Program 1 or the equivalent. Close reading and interpretation of literature from a variety of traditional and contemporary approaches. Topics include textual and historical approaches; new criticism; formalism; psychological criticism; feminism and gender; reader-response; materialist approaches. Frequent written assignments. 199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

200. Introduction to Graduate Studies in English (4)
Seminar-3 hours; term paper or discussion-1 hour. Prerequisite: graduate standing. Introduction to literary scholarship with special attention to the elements of professionalism and to different modes of literary investigation. (S/U grading only.)-I. (I.)
201. Anglo-Saxon Language and Culture (4)

Lecture-3 hours; conference and term paper. The language and culture of Anglo-Saxon England; readings in Old English prose and poetry.

## 206. Beowulf (4)

Discussion-3 hours; oral and written reports; conferences with students. Prerequisite: course 205 or the equivalent. A study of the poem and the Heroic Age of Germanic literature.

## 207. Middle English (4)

Discussion-3 hours; term paper. Study of the phonology, morphology, syntax, and lexicon between 1100 and 1500 with investigation of the regional dialects; pertinent facts on both the internal and external linguistic history; intensive reading of texts.
210. Readings in English and American Literature (4)
Seminar-3 hours; conference-1 hour. Prerequisite: upper division course in area studied. Content varies according to specialty of instructor. May be repeated if topic differs. -l.

## 225. Topics in Irish Literature (4)

Seminar-3 hours; conference-1 hour. Prerequisite: graduate standing. Varied topics, including the nine-teenth-century novel, contemporary Irish poetry, rise of the drama, or a study of a major author. May be repeated for credit if topic differs.

## 230. Study of a Major Writer (4)

Seminar-3 hours; conferences with individual students - 1 hour; research papers. Artistic development of one major writer and his intellectual and literary milieu. May be repeated for credit when a different writer is studied.-III.
232. Problems in English Literature (4)

Seminar-3 hours; conferences with individual students -1 hour. Selected issues in the current study and critical assessment of a limited period or topic in English literature. May be repeated for credit when different period or topic is studied.
233. Problems in American Literature (4) Seminar-3 hours; conferences with individual students - 1 hour; research papers. Selected topics for intensive investigation. May be repeated for credit when different topic or period is studied. -I , III.

## 234. Dramatic Literature (4)

Lecture-3 hours; conference-1 hour. Historical introduction to dramatic theory; the genres of tragedy, comedy, and tragicomedy. May be repeated for credit if topic differs.

## 235. Theory of Fiction (4)

Seminar-3 hours; conference-1 hour. Prerequisite: graduate standing. Theories of fiction as they relate to the professional writer's practice of the craft. For students in the Creative Writing Program. May be repeated for credit when focus differs.

## 236. Poetics (4)

Seminar-3 hours; conference-1 hour. Prerequisite: graduate standing. Theories of poetry as revealed in structure, prosody, and idiom of British and American poems, variably approached-through intensive study of a single poet, historically, or theoretically-
at the instructor's discretion. For students in the Creative Writing Program. May be repeated for credit when focus differs. - II.
238. Special Topics in Literary Theory (4) Seminar-3 hours; term paper. Prerequisite: course 237 or the equivalent. Advanced topics in literary theory and criticism. Preparation and evaluation of research paper. May be repeated for credit when topic and/or reading list differs. Offered in alternate years. - III.
240. Medieval Literature (4)

Seminar-3 hours; conference-1 hour. Studies of Medieval literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.-II.

## 242. Sixteenth-Century Literature (4)

Seminar-3 hours; conference-1 hour. Studies in sixteenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.-III.
244. Shakespeare (4)

Seminar-3 hours; conference-1 hour. Studies in Shakespeare. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.-II.
246. Seventeenth-Century Literature (4)

Seminar-3 hours; conference-1 hour. Studies in seventeenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.-l.

## 248. Eighteenth-Century Literature (4)

 Seminar-3 hours; conference-1 hour. Studies in eighteenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied. - II.
## 250. Romantic Literature (4)

Seminar-3 hours; conference-1 hour. Studies in Romantic literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

## 252. Victorian Literature (4)

Seminar-3 hours; conference-1 hour. Studies in Victorian literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.-II.

## 254. Twentieth-Century British Literature

 (4)Seminar-3 hours; conference-1 hour. Studies in twentieth-century British literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.
256. Early American Literature (4)

Seminar-3 hours; conference-1 hour. Studies in Early American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.
258. American Literature: 1800 to the Civil War (4)
Seminar-3 hours; conference-1 hour. Studies in American literature from 1800 to Civil War. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be
repeated for credit when a different topic is studied.
260. American Literature: Civil War to 1914 (4)

Seminar-3 hours; conference-1 hour. Studies in American literature from the Civil War to 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.
262. American Literature after 1914 (4)

Seminar-3 hours; conference-1 hour. Studies in American literature after 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.-Il.

## 264. Studies in Modern British and

## American Literature (4)

Seminar-3 hours; conference-1 hour. Studies in modern British and American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when a different topic is studied.

## 270. Studies in Contemporary World

## Literature (4)

Seminar-3 hours; conference-1 hour. Prerequisite: graduate standing, consent of instructor, with prefer ence given to those enrolled in the masters program in Creative Writing. Emerging global, international or transnational techniques, theories, and individual works of contemporary world prose or poetry. Discussion, seminar reports, research papers. May be repeated for credit when topic differs. - II, III.

## 285. Literature by Women (4)

Seminar-3 hours; conference-1 hour. Studies in literature by women and the theoretical approaches to literature by women. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic and/or reading list differs.
287. Topics in Literature and Media (4) Seminar-3 hours; film viewing-3 hours. Prerequisite: graduate standing. Study of a topic centered on film or other moving-image media. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs.-I.

## 288. Prospectus Workshop (2)

Conference-2 hours. Must have passed Departmental Preliminary Exam. Training in writing the dis sertation prospectus. Participation in group discussions of preparatory assignments and final proposal. (S/U grading only.)-III.
289. Article Writing Workshop (2)

Conference-2 hours. Prerequisite: consent of instructor. Class size limited to 12 students; nomination for admission by Dissertation Director. Training in preparing an article for publication. Participation in group discussions of article drafts. May be repeated one time for credit. (S/U grading only.) III.

290F. Seminar in Creative Writing of Fiction (4)

Seminar -3 hours; 1 additional hour of writing. Prerequisite: consent of instructor; graduate standing, with preference given to those enrolled in master's program in Creative Writing. Writing of prose. Evaluation of written materials and individual student conferences. May be repeated for credit. - I, II, III. (I, II, III.)

## 290NF. Seminar in Creative Writing of Non-

 Fiction (4)Seminar-3 hours; term paper. Prerequisite: consent of instructor, graduate standing, preference given to those enrolled in the master's program in Creative Writing. The writing of literary non-fiction, with
emphasis on autobiography, biography, memoir, the occasional or nature essay, or other non-fiction prose narratives. May be repeated for credit. - III.
290P. Seminar in Creative Writing of Poetry (4)

Seminar-3 hours; 1 additional hour of writing. Prerequisite: consent of instructor; graduate standing, with preference given to those enrolled in master's program in Creative Writing. Writing of poetry.
Evaluation of written materials and individual student conferences. May be repeated for credit. - I, II, III. (I, II, III.)
298. Directed Group Study (1-5)
(S/U grading only.)
299. Individual Study (1-12)
(S/U grading only.)

299D. Special Study for the Doctoral
Dissertation (1-12)
(S/U grading only.)

## Professional

391. Teaching Creative Writing (2)

Discussion-2 hours. Prerequisite: graduate standing; appointment as Teaching Assistant in the English. Designed for new instructors of English 5F or 5P; discussion of ways to facilitate creative writing workshops and to respond to student manuscripts. (S/U grading only.) - III. (III.)
393. Teaching Literature and Composition (2)

Discussion-2 hours. Prerequisite: graduate standing; appointment as Teaching Assistant in the English Department. Designed for new instructors of English
3 or the equivalent courses; discussion of problems related to teaching literature and composition to lower division students. (S/U grading only.) - III. (III.)
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated
for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Entomology and Nematology

Formerly the departments of Entomology and Nematology
(College of Agricultural and Environmental Sciences)
Michael P. Parrella, Ph.D., Professor, Chairperson of the Department
Edwin Lewis, Ph.D., Vice Chairperson
Department Office. 367 Briggs Hall
530-752-0492; http://entomology.ucdavis.edu

## Faculty

James R. Carey, Ph.D., Professor
Edward P. Caswell-Chen, Ph.D., Professor
Joanna Chiu, Ph.D., Assistant Professor
Howard Ferris, Ph.D., Distinguished Professor
Bruce D. Hammock, Ph.D., Distinguished Professor
Academic Senate Distinguished Teaching Award
Brian R. Johnson, Ph.D., Assistant Professor
Richard Karban, Ph.D., Professor
Lynn S. Kimsey, Ph.D., Professor
Sharon P. Lawler, Ph.D., Professor
Edwin Lewis, Ph.D., Professor
Steven A. Nadler, Ph.D., Professor
Michael P. Parrella, Ph.D., Professor
(Plant Sciences)
Jay Rosenheim, Professor
Academic Senate Distinguished Teaching Award
Thomas W. Scott, Ph.D., Professor
Diane E. Ullman, Ph.D., Professor
Philip S. Ward, Ph.D., Professor
Becky B. Westerdahl, Ph.D., Professor
Neal M. Williams, Ph.D., Associate Professor
Louie H. Yang, Ph.D., Assistant Professor
Frank G. Zalom, Ph.D., Distinguished Professor

## Emeriti Faculty

Oscar G. Bacon, Ph.D., Professor Emeritus
Peter S. Cranston, Ph.D., Professor Emeritus
Hugh Dingle, Ph.D., Professor Emeritus
John D. Edman, Ph.D., Professor Emeritus
Lester E. Ehler, Ph.D., Professor
Bruce F. Eldridge, Ph.D., Professor Emeritus
Norman E. Gary, Ph.D., Professor Emeritus
Jeffrey Granett, Ph.D., Professor Emeritus
Albert A. Grigarick, Jr., Ph.D., Professor Emeritus
Penelope J. Gullan, Ph.D., Professor Emeritus
Bruce A. Jaffee, Ph.D., Professor Emeritus (Nematology)
Charles L. Judson, Ph.D., Professor Emeritus
Harry K. Kaya, Ph.D., Professor Emeritus
(Entomology, Nematology)
Donald L. Mclean, Ph.D., Professor Emeritus

Robert E. Page Jr., Ph.D., Professor Emeritus
Christine Y. S. Peng, Ph.D., Professor Emeritus
Robbin W. Thorp, Ph.D., Professor Emeritus
Charles G. Summers, Ph.D., Professor Emeritus
Robert K. Washino, Ph.D., Professor Emeritus
Valerie M. Williamson, Professor Emeritus

## Affiliated Faculty

Anthony Cornel, Ph.D., AES Entomologist
Mary L. Flint, Ph.D., Specialist in Cooperative Extension
Larry Godfrey, Ph.D., Specialist in Cooperative Extension, AES Entomologist
Robert Kimsey, Ph.D., Lecturer
Shirley Luckhart, Ph.D. Adjunct Professor
(Medical Microbiology and Immunology; School of Medicine)
Eric C. Mussen, Ph.D., Specialist in Cooperative Extension
William K. Reisen, Ph.D., Research Entomologist (Pathology, Microbiology and Immunology; School of Veterinary Medicine)

## The Major Program

The Entomology major is a general biological science program. The curriculum is designed to develop an understanding of fundamental biological concepts by studying insects. Insects offer unique opportunities to study biological systems and are model experimental animals. Many insects are either pests, or beneficial species that have great importance to the economy, environment or public health. Students may focus on specific areas of interest including agricultural entomology, insect systematics and evolution; behavior and ecology; medical entomology; and insect molecular biology, physiology and toxicology.
The Program. Students begin their study in entomology with selected insect biology courses. After completing these courses, students may enroll in courses in their particular area of interest. The Entomology Faculty encourages students to do research internships in their laboratories.
Career Alternatives. Entomology graduates find careers in many different areas of applied or basic biology. Graduates have the opportunity to continue in professional graduate programs such as veterinary or human medicine, or get advanced degrees leading to careers in biotechnology, conservation biology, or academic teaching and research. Many graduates have participated in internship programs with the California Department of Food and Agriculture and found careers in insect diagnostic laboratories, conducting insect surveys, and/or developing entomological collections. Other graduates have worked in agriculture in the area of insect pest management. Graduates are prepared for managerial and technical positions with state and federal agencies and in agricultural production and supporting industries. Some entomology graduates pursue careers in primary, secondary, and college level science education.
B.S. Major Requirements:UNITS
Preparatory Subject Matter ..... 49-53
Biological Sciences 2A, 2B, 2C ..... 15
Chemistry 2A, 2B, 8A, 8B. ..... 16
Mathematics 16 A ..... $17 C$
or $21 \mathrm{~A}-21 \mathrm{~B}-21 \mathrm{C}$ ..... 9-12Physics 1A, 1B 6Statistics 13, 32, or Plant Sciences 120, 21or Engineering 53-4
Depth Subject Matter ..... 34-40
Microbiology 104, Plant Biology 148, PlantPathology 120 or Microbiology 162 ..... 3-5Biological Sciences 101.... 4Entomology 105, Environmental Science andPolicy 100 or Evolution and Ecology101.. 4
Evolution and Ecology 100. .....
Biological Sciences 102 and 103 or AnimalBiology 102 and 103.6-10

At least 7 units from Entomology 102, 103,
104, 107, 109, or 116 or Nematology 110................................................. 7
Restricted Electives34
Upper division Entomology and Nematologycourses14
Upper division electives related to student'sinterest with approval of adviser ............ 20Note: No more than a total of six units fromEntomology 192, 197T and 199 may counttoward fulfilling depth subject matter orrestricted elective units.
Total Units for the Major117-127
Major Adviser. S. Lawler, S. Nadler
Minor Program Requirements:The Department of Entomology has five minor pro-grams open to students in other disciplines who areinterested in rounding out their academic study witha concentration in the area of entomology.UNITS
Insect Biology ..... 19-23
Entomology 100, 100L ..... 6
At least seven units from Entomology 102,103, 104, 105 107, 109.At least two additional upper division
Entomology courses (except courses 192, ..... 192,198, 199)Agricultural Pest Management.21-23
Entomology 100, 100L, 110, 135 .. ..... 15
At least two courses from: Nematology 100,
Plant Sciences 105, 176, Plant Pathology120.Insect Ecology and Evolution20-2 1
Entomology 100, 100L, and Entomology 105
or 104 ..... 9-10
At least seven units from Entomology 103, ..... 03,
107, 109, 116, 158.
Science and Policy 121 149 or EnvironmentalMedical-Veterinary Entomology19
Entom
156. 56.......gy 100, 100L, 104, 153,At lea
At least four units from Entomology 156L,
158; Microbiology 162
Forensic Entomology.22
Entomology 100, 100L, 102, 158 ..... 13
Biological Science 2A. ..... 5
Entomology 105, Evolution and Ecology
101, or Environmental Science and Policy100.

Minor Adviser. S. Lawler, S. Nadler
Graduate Study. The Department of Entomology offers a program of study and research leading to the M.S. and Ph.D. degrees. See Graduate Studies, on page 111 and the Graduate Announcement, for further details.

## Graduate Advisers. See

http://entomology.ucdavis.edu/grad/.
Related Courses. See courses in Nematology.

## Courses in Entomology (ENT)

## Lower Division

1. Art, Science and the World of Insects (3)

Lecture-3 hours; laboratory-3 hours. Fusion of entomology and art to create an appreciation of insect biology, ecology, interactions with humans and importance in human culture. Multidisciplinary approaches in education and career paths in entomology and art. GE credit: ArtHum or SciEng or SocSci | AH or SE or SS, OL, VL, WE. - III. (III.) Ullman

## 2. Biodiversity (3)

Lecture-2 hours; lecture/discussion - 1 hour. Introduction to nature, scope and geographical distribution of biodiversity (the diversity of life, with
emphasis on plants and animals, especially insects). Humans and biodiversity-domestication, aesthetics, ethics and valuation. Species richness and "suc-
cess." Biodiversity through time; monitoring, evaluation and conservation. Biomes-global, continental and Californian. (Same course as Evolution and Ecology 2.) GE credit: SciEng, Wrt \| SE, SL, WE.I. (I.)

## 10. Natural History of Insects (3)

Lecture-3 hours. Designed for students not specializing in entomology. Not open for credit to students who have had course 100, but students who have taken this course may take course 100 for credit. An introduction to the insects detailing their great variety, structures and functions, habits, and their significance in relation to plants and animals including man. GE credit: SciEng \| SE, SL. - II. (II.) R. Kimsey, Parrella
90X. Special Topics in Entomology (2)
Seminar-2 hours. Freshman seminar course for indepth examination of a special topic within the subject area. May be repeated two times for credit. (P/ NP grading only.) -1, II, III.
92. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Work-learn experience on and off campus in all subject areas offered by the department, supervised by a member of the faculty. May be repeated up to 12 units of credit. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

## 100. General Entomology (4)

Lecture-3 hours; term paper. Prerequisite: Biological Sciences 1B. Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare. GE credit: SciEng,
Wrt | WE. -I, III. (II, III.) L. Kimsey
100L. General Entomology Laboratory (2) Laboratory-6 hours. Prerequisite: course 100 (may be taken concurrently). Anatomy, development, population ecology, methods of collecting, classification and identification of insects of all orders and of major families. GE credit: Wrt | VL. - I, III. (I, III.) Kimsey
101. Functional Insect Morphology (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: course 100. Study of the basic external and internal structures, organs and tissues of insects, with emphasis on functional systems. Functional anatomy, histology and fine structures of important organs and tissues will be discussed. GE credit: SciEng. - II. (II.)

## 102. Insect Physiology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 100 or course in physiology or invertebrate zoology. Processes by which insects maintain themselves, reproduce, and adapt to environment. Insects as models for basic/applied research through
detailed analysis of metabolic, physiological, and
behavioral processes. Emphasis on analysis of methodology, fact, and theory. GE credit: SciEng | SE, WE. - II. (II.) Chiu

## 103. Insect Systematics (3)

Lecture-2 hours; discussion - 1 hour. Prerequisite: introductory course in zoology or entomology. Principles and methods of systematics, with particular reference to insects. Emphasis on different theories of classification, and analysis of phylogenetic relationships. Offered in alternate years. GE credit: SciEng, Wrt. - III.

## 104. Behavioral Ecology of Insects (3)

Lecture-3 hours. Prerequisite: introductory biology or zoology. Basic principles and mechanisms of insect behavior and ecology. An evolutionary approach to understanding behavioral ecology of insects. GE credit: SciEng.-II. (II.) Lewis

## 105. Insect Ecology (4)

Lecture/discussion-3 hours; term paper. Prerequisite: Biological Sciences 2B. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. Emphasis on the scientific process: observing nature, asking
testable questions, and communication. Offered in alternate years. GE credit: SciEng | OL, SE, SL, WE.-I. (I.) Yang

## 107. California Insect Diversity (5)

Lecture-1 hour; laboratory-6 hours; fieldwork-6 hours. Prerequisite: an introductory course in entomology. Survey of the diversity of insects from selected ecological zones in California with emphasis on collection, identification, and natural history. Offered in alternate years. GE credit: SciEng,
Wrt | SE. - III. Ward

## 109. Field Taxonomy and Ecology (7)

Lecture-2 hours; laboratory - 36 hours; five-week course. Prerequisite: an introductory course in entomology or consent of instructor. The study of insects in their natural habitats; their identification and ecology. Offered in alternate years. GE credit: SciEng, Wrt | SE. - (IV.) Ward
110. Arthropod Pest Management (5)

Lecture-3 hours; laboratory-6 hours. Prerequisite: Biological Science 1B. Development of the ecological basis for the integrated pest management paradigm with emphasis on agriculture. Ecological and practical aspects of control tactics. Laboratory emphasizes identification of pests and beneficials of agriculture and urban situations. GE credit: SciEng, Wrt | SE, WE. - II. (II.) Godfrey
116. Freshwater Macroinvertebrates (3) Lecture-2 hours; laboratory-3 hours. Prerequisite: Biological Sciences 2B or equivalent. Biology, ecology and taxonomy of freshwater macroinvertebrates, including insects, crustaceans, molluscs, worms, leeches, flatworms and others. Adaptations to life in freshwater. Aquatic food webs. Uses of macroinvertebrates in water quality monitoring. Field trips during regular lab hours. Limited enrollment. GE credit: SciEng | SE, SL.-III. (III.) Lawler

## 116L. Aquatic Insect Collection (2)

Laboratory-4 hours; field work-2 hours. Prerequisite: high school biology recommended. Students will learn to collect aquatic insects and to identify them to Family and Genus levels. Collections will require two, one-day weekend field trips (by arrangement). Collection requirement is 40 Families, with 20 identified to Genus level. Limited enrollment. May not be taken for credit if students have completed the 5 -unit option for Entomology 116.-III. (III.) Lawler

## 117. Longevity (4)

Lecture-3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as Human Development 117.) GE credit: SciEng,
Wrt \| SE, SL, WE.-I. Carey

## 119. Apiculture (3)

Lecture-3 hours; papers. Prerequisite: Biological Sciences 1C recommended. Biology and behavior of honeybees; communication, orientation, social organization, foraging activities, honey production, pollination activities. GE credit: SciEng, Wrt|OL,

## VL, WE. - III. (III.) Johnson

## 123. Plant-Virus-Vector Interaction (3)

 Lecture-3 hours. Prerequisite: Biological Sciences 2A, Biological Sciences 101; Plant Biology 105, Plant Pathology 120, and course 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as Plant Biology 123 and Plant Pathology 123.) Offered in alternate years. GE credit: SE, SL, WE.(I.) Lucas, Gilbertson, Ullman135. Introduction to Biological Control (4)

Lecture -3 hours; laboratory - 3 hours. Prerequisite: course 100 or 110 . Principles of biological control of arthropod pests and weeds. Biology of pathogens, entomopathogenic nematodes, parasitoids, and predators. Implementation in classical and augmentative biological control. Role of biological control in pest management. Offered in alternate years-I. Kaya, Parrella

## 153. Medical Entomology (3)

Lecture-3 hours. Prerequisite: Biological Sciences $1 A, 1 B$, upper division standing in one of the biological sciences, or consent of instructor. Basic biology and classification of medically important arthropods with special emphasis on the ecology of arthropodborne diseases and principles of their control. Relationships of arthropods to human health. GE credit: SciEng, Wrt | SE, SL, WE.-II. (II.) Scott

## 156. Biology of Parasitism (3)

Lecture-3 hours. Prerequisite: Biological Sciences 1 A or consent of instructors. Lectures on the biological and ecological aspects affecting host-parasite relationships using selected examples from protozoan and metazoan fauna. GE credit:
SciEng | SE.-III. (III.) R. Kimsey, Nadler
156L. Biology of Parasitism Laboratory (1) Laboratory-3 hours. Prerequisite: course 156 (concurrently) or consent of instructor. Laboratory demonstrations using selected examples of protozoan and metazoan organisms along with various techniques used in parasitology to exemplify concepts presented in the lecture course. GE credit: SciEng, Wrt | SE. - III. (III.) R. Kimsey, Nadler

## 158. Forensic Entomology (3)

Lecture-2 hours; laboratory-4 hours. Prerequisite: Biological Sciences 1B or Entomology 100, upper division standing. Arthropods, their general biology, succession, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods, development of reasoning abilities, implication, development of opinions and evidence. GE credit: SciEng or SocSci, Wrt | WE. - III. (III.) R. Kimsey
180A. Experimental Ecology and Evolution in the Field (4)
Lecture/laboratory-3 hours; fieldwork-3 hours. Prerequisite: course 105, or Environmental Science and Policy 100; Evolution and Ecology 100; Evolution and Ecology 101. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as Evolution and Ecology 180A.) Offered in alternate years. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | QL, SE, VL. - (II.) Yang
180B. Experimental Ecology and Evolution in the Field (4)
Lecture/laboratory-3 hours; fieldwork-3 hours. Prerequisite: Evolution and Ecology or Entomology 180A; Evolution and Ecology 100, Evolution and Ecology 101, or Environmental Science and Policy 100; course 105. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as Evolution and Ecology 180B.) Offered in alternate years. (Deferred grading only, pending completion of sequence.) GE credit: SciEng \| QL, SE, VL WE. (III.) Yang

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Laboratory experience or fieldwork off and on campus in all subject areas offered in the Department of Entomology. Internships supervised by a member of the faculty. (P/NP grading only.)

197T. Tutoring in Entomology (1-3)
Discussion - $1-3$ hours. Leading small discussion groups. Preview assignments and prepare guidelines for discussion. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

212. Molecular Biology of Insects and Insect Viruses (3)
Lecture-3 hours. Prerequisite: consent of instructor. A molecular biological analysis of insect systematics, physiology, and defense mechanisms. Molecular biology of insect viruses. Baculovirus expression vectors and post-translation modification of expressed polypeptides. Biological control of using neuropeptides and toxin genes in insect viruses. Offered in alternate years. - II. (II.)

## 214. Vector-borne Infectious Diseases:

 Changing Patterns (2)Lecture/discussion-2 hours. Prerequisite: consent of instructor required. Restrictions: open to graduate students, MPVM and MPH students, DVM and medical students with second- or third-year standing. Open to upper division undergraduate students with consent of instructor(s). Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. Same course as PMI 214.-I. (I.) Lanzaro, Reisen

## 225. Terrestrial Field Ecology (4)

Seminar-1 hour; field work-12 hours. Prerequisite: introductory ecology and introductory statistics or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis and written and oral presentation of results. (Same course as Ecology 225/Population Biology 225.)-III. (III.) Karban
230. Advanced Biological Control (4)

Lecture-2 hours; laboratory - 6 hours. Prerequisite: graduate or upper division standing in biological science or consent of instructor. Principles and current issues in biological control of arthropod pests and weeds; laboratory devoted to identification and life history of the major groups of parasitic and predaceous arthropods. Offered irregularly. - (I.)
253. Advanced Medical Entomology (3) Lecture-2 hours; discussion-1 hour. Prerequisite: one upper division course in entomology (other than course 153) and one course in microbiology: course 153 strongly recommended. An analysis of several anthropod-borne human diseases with emphasis on the relationships of the biology of the vector to the ecology of the disease. Discussion includes demonstration of vectors and techniques. Offered irregularly. - (III.)
290. Exploratory Topics in Entomology (2)

Seminar-2 hours. Interdisciplinary topics in entomology, including innovative applications of entomological concepts to other fields of research and human endeavor (e.g. medicine, technology, art, criminology). May be repeated for up to 8 units of credit when topic differs. -I, II, III.

## 291. Current Topics in Medical and Veterinary Entomology (2)

Seminar-2 hours. Prerequisite: course 153. Discussion of parasitology, ecology and epidemiology. related to vectors of pathogens causing disease in humans and animals. May be repeated one time for credit. Offered irregularly. -I, II, III. R. Kimsey, Scott

## 292. Current Topics in Insect Physiology

## and Behavior (2)

Seminar-2 hours. Prerequisite: course 102 if topic is physiology, a course in behavior if topic is behavior, or either if topic bridges both. Analysis of contemporary advances in insect physiology,
biochemistry and/or behavior. Interpretation and description of physiological and behavioral mechanisms and functions. Application of general principles to solution of problems in the laboratory and field. May be repeated for up to 8 units of credit if topic differs. Offered irregularly. $-\mathrm{I}, \mathrm{II}$, III.

## 293N. Current Topics in Insect

Biotechnology and Genomics (2)
Seminar-2 hours. Prerequisite: course 212. Discussion of advances in insect biotechnology, including genetic engineering and genomics. May be repeated for up to 6 units of credit if topic differs.
Offered irregularly. - I, II, III. Hammock, Leal

## 294. Current Topics in Insect Ecology,

## Evolution, and Systematics (2)

Seminar-2 hours. Prerequisite: course 103, general course in ecology or evolution. Discussions of advanced topics in ecology, evolution and systematics with emphasis on analysis of factors influencing the distribution, abundance, adaptations and evolutionary relationships of insects. Includes consideration of applications of basic theory (e.g. biological control). May be repeated for credit up to eight units
if topics differs. Offered irregularly.-I, II, III.

## 295. Current Topics in Agricultural

Entomology and Bee Biology (2)
Seminar-2 hours. Prerequisite: course 110 if topic covers pests and beneficial predators, course 119 if topic is bee biology, or either if topic bridges both. Discussion of advanced topics about the biology, ecology, behavior, and management of pest and beneficial insects. May be repeated for up to 8 units of credit if topic differs. Offered irregularly.-I, II, III.

## 297N. Seminar in Entomology (1)

Seminar-1 hour. Weekly entomology seminar. May be repeated up to 9 units of credit if topic differs. (S/ U grading only.) -I, II, III. (I, II, III.)

## 298. Group Study (1-5)

(S/U grading only.)
299. Research (1-12)
(S/U grading only.)

## Environmental Geology

## (College of Letters and Science)

The minor in Environmental Geology examines the multidisciplinary factors of geology and related earth science fields, and planning and resources oriented programs. Students in the minor are encouraged to participate in internship programs that assist them in solidifying the Environmental Geology minor with their Geology major or other major field areas that include geologic components.
The minor is sponsored by the Department of Earth and Planetary Sciences in 2119 Earth and Physical Sciences Building.

## Minor Program Requirements:

UNITS
Environmental Geology .................... 25-26
Geology 130, 134, and Environmental
Science and Management 186................ 9
Soil Science 118.................................... 4
Hydrologic Science 141 or Civil and
Environmental Engineering 142 ..
.

Two courses chosen from Environmental
Science and Policy 160, 171, 179,
Hydrologic Sciences 144, 146 8-9
Minor Adviser. See Geology major advisers

## Environmental Horticulture

(College of Agricultural and Environmental Sciences) Faculty. See Plant Sciences, on page 476.
The Program. Students of Environmental Horticulture learn how plants improve the environment and the quality of our lives. Plants are used to revegetate and restore disturbed landscapes, control erosion, and reduce energy and water consumption. The ornamental use of plants to improve the aesthetic quality of urban and rural landscapes, recreational areas, and commercial sites is an important aspect of the study of environmental horticulture.
Students interested in Environmental Horticulture can obtain a B.S. degree in Environmental Horticulture and Urban Forestry and may specialize in Floriculture/Nursery Management, Urban Forestry, Landscape Management/Turf or Plant Biodiversity/ Restoration. Students can develop an individual major with the help of an Environmental Horticulture faculty adviser and approval of the College's Individual Major Committee. A minor in Environmental Horticulture or Landscape Restoration is available to students in other majors
Career Alternatives. Opportunities in this field include growing and/or managing plants in a variety of settings, including nurseries, golf courses and arboreta, consulting as an urban, landscape, or restoration horticulturist, business ownership, working for public agencies or private landscape firms/corporations, park management and landscape contracting. Students are encouraged to develop internships on or off campus to augment their activities in the classroom and laboratory.

## Minor Program Requirements: <br> Environmental Horticulture ............... 23-25 <br> Environmental Horticulture 6 and $105 \ldots \ldots$. <br> Plant Sciences 171.................................. <br> Select three courses from: Environmental <br> Horticulture 100, 120, 125, 130, <br> 133. <br> . 11-13

Related Undergraduate Programs. See the undergraduate majors in Ecological Management and Restoration, on page 229, Environmental Horticulture and Urban Forestry, on page 297, Plant Biology, on page 471, and Plant Sciences, on page 476.

Graduate Study. For graduate study related to this field, see the M.S. and Ph.D. degree programs in the graduate groups of Horticulture and Agronomy, Plant Biology, Ecology, and Genetics. Also see Graduate Studies, on page 111.
Related Courses. See Plant Biology and Plant Sciences.

## Courses in Environmental Horticulture (ENH)

Questions pertaining to the following courses should be directed to the instructor or to the Plant Sciences Advising Office in 1224 Plant and Environmental Sciences Building 530-752-7738.

## Lower Division

1. Introduction to Environmental Horticulture/Urban Forestry (3)
Lecture -3 hours. Introduction to the use of plants to enhance the physical, visual and social environment. The use of ecological principles in developing sustainable, low maintenance landscape systems will be presented. Career opportunities will be discussed. GE credit: SciEng, Wrt \| SE, SL, WE.-I. (I.) Volder
2. Introduction to Environmental Plants (4)

Lecture-1 hour; discussion - 2 hours; laboratory - 3 hours. Classification, nomenclature and variation of environmental plants. The use of floral and vegetative characteristics and terminology to key unknown plants. Characteristics of plant groups and basics of climate, soils and plant selection. Identification of 150 common landscape plants. GE credit: SciEng | SE, VL.-I. (I.) Young

## Upper Division

## 100. Urban Forestry (4)

Lecture-2 hours; laboratory-3 hours; term paper Prerequisite: Biological Sciences 1C or Plant Sciences 2. Principles and practices of planning and managing urban vegetation. Basics of tree
appraisal, natural resource inventory, and development of long term urban forest management plans. GE credit: SciEng | SE.-l. (I.) Cadenasso

## 101. Trees of the Urban Forest (2)

Lecture-1 hour; laboratory-2 hours. Prerequisite: course 6 or consent of instructor. Identification and evaluation of 200 tree species of the urban forest on campus, in the Arboretum, and in the city of Davis; appraised and aesthetic values, condition, and branch structure; contribution of trees to this ecosystem. Bicycle required. GE credit: SciEng | VL, SE. I. (I.) Harding

## 102. Physiological Principles in

Environmental Horticulture (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 1C. Physiological principles and processes essential to floriculture, nursery crop production, turfculture and landscape horticulture. Emphasis on the control of vegetative and reproductive development for a broad species range in greenhouse and extensive landscape environments. GE credit: SciEng | SE.-I. (I.) Gilbert
105. Taxonomy and Ecology of

## Environmental Plant Families (4)

Lecture-2 hours; laboratory-6 hours. Prerequisite: course 6 or consent of instructor. Classification and identification of introduced and native species used in urban forests, with emphasis on floral and vegetative characteristics of the prominent families of angiosperms and gymnosperms, adaptations to environmental variations in western landscapes, and horticultural classification. GE credit: SciEng | VL, SE.III. (III.) Harding
120. Management of Container Media (3) Lecture-2 hours; laboratory-3 hours. Prerequisite: Soil Science 10. Principles of soil science and practices related to management of container media are taught, emphasizing appropriate use of soils and amendments, irrigation, and fertilizers. Physical and chemical properties are tested and effects of management on crops are evaluated in the laboratory. GE credit: SciEng | QL, SE, WE.-I. (I.) Evans
125. Greenhouse and Nursery Crop Production (5)
Lecture-3 hours; discussion - 1 hour; laboratory-3 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C. Principles and techniques for the production of ornamental greenhouse and nursery crops. Hands-on experience producing greenhouse crops. Optional weekend field trip. GE credit: SciEng | SE, WE.
129. Analysis of Horticultural Problems (4) Lecture-1 hour; laboratory - 6 hours. Prerequisite: course 102, Entomology 110, Plant Pathology 120, and Soil Science 100 or the equivalents. Methods of analysis of common plant disorders seen in the landscape, greenhouse, and nursery. Diagnosis of plant disorders caused by soil, water, insects, disease, chemical agents, climatic conditions or cultural practices. Approaches to diagnosis that emphasize acquisition and integration of information. GE credit: SciEng | SE. - III. (III.) Durzan
130. Turfgrass and Amenity Grassland Utilization and Management (4)
Lecture-2 hours; discussion-1 hour; laboratory-3 hours. Prerequisite: Biological Sciences 1C or Plant
Sciences 2. Utilization and management of amenity
and landscape grassland systems. Emphasis on biology of grass species, ecology and culture practice of sports turf and landscape grassland systems, social and environmental benefits, environmental impacts, and integrated management systems. GE credit:
SciEng | SE.
133. Woody Plants in the Landscape: Growth, Ecology and Management (4) Lecture-3 hours; laboratory-2 hours; discussion1 hour. Prerequisite: Biological Sciences 1C or the equivalent preparation in plant biology. Principles and practices of managing trees and shrubs in the urban landscape and other managed environments. Topics include woody plant form; growth response and adaptation; tree management in relation to soil, moisture, climate; plant problems. GE credit: SciEng | SE. - II. (II.) Berry
150. Genetics and Plant Conservation: The Biodiversity Crisis (3)
Lecture/discussion-3 hours. Prerequisite: Biological Sciences 1C or the equivalent. Conservation of genic diversity, measurement of diversity, threats to diversity and reasons for protection, the process of extinction, distribution of diversity, determination of what to conserve and means of conservation. Examples drawn largely from forest tree species. GE credit: SciEng | SE, SL. - III. (III.) Neale

## 160. Restoration Ecology (3)

Lecture-3 hours. Prerequisite: Plant Biology/Evolution and Ecology 117 or Evolution and Ecology 121 or Plant Biology 147 or the equivalent. Conceptual bases of restoration ecology; tools used by restoration ecologists to solve practical problems; scope and success of actual restoration projects. GE credit: SciEng | SE, SL, WE. - III. (III.) Eviner
160L. Restoration Ecology Laboratory (1) Laboratory/discussion-3 hours. Prerequisite: course 160 (may be taken concurrently). Companion field course to course 160. A series of part-day and all day visits to various field sites, involving site evaluations, guest field presentations by local restorationists, and actual restoration activities. Not open for credit to students who completed course 160 prior to spring 2004. GE credit: SciEng \| SE, SL.III. (III.) Eviner

## Graduate

229. Analysis of Horticultural Problems (5) Lecture-1 hour; laboratory-8 hours; discussion - 1 hour; project. Prerequisite: equivalent of B.S. degree in Environmental Horticulture and Urban Forestry, Plant Biology, Agricultural Systems and Environment, or related major, or consent of instructor. Methods of analysis of common plant disorders seen in the landscape, greenhouse, and nursery. Diagnosis of plant disorders caused by soil, water, insects, disease, chemical agents, climactic conditions or cultural practices. Approaches to diagnosis that emphasize acquisition and integration of information. Not open for credit to students who have completed course 241.

## Environmental Horticulture and Urban Forestry

(College of Agricultural and Environmental Sciences)
Faculty. See Department of Plant Sciences, on page 476.

## The Major Program

Students majoring in Environmental Horticulture and Urban Forestry learn how plants improve the environment and the quality of our lives. The major focuses on the biological and physical concepts and horticultural principles of plant production, management of plants and plant ecosystems in landscape settings and sociological aspects of plant/people
interactions in the urban environment. Plants are used to revegetate and restore disturbed landscapes, control erosion and reduce energy and water consumption. The ornamental use of plants to improve the aesthetic quality of urban and rural landscapes, recreational areas, interiorscapes and commercial sites is an important aspect of this major. Students may select one or more of the following three areas of specialization: Floriculture/Nursery, Plant Biodiversity/Restoration, or Urban Landscape Management.
Internships and Career Opportunities. Students are encouraged to develop internships on or off campus to augment their activities in the classroom and laboratory. Internships are available with the department's greenhouse facility, the UC Davis Arboretum, landscape designers, government agencies or regional nurseries. Career opportunities in this field include growing and/or managing plants in a variety of settings, including nurseries and arboreta, consulting as an urban, landscape, or restoration horticulturist; business ownership; working for public agencies or private landscape firms/corporations; park management and landscape contracting.

## Environmental Policy Analysis and Planning

(College of Agricultural and Environmental Sciences)

## The Major Program

The major in environmental policy analysis and planning develops skills for designing and assessing policy in fields related to environmental quality and natural resource management and an understanding of governmental policy-making.
Any student in good standing is eligible to transfer to the major; to do so, please see the staff adviser, Melissa Whaley, in 2134 Wickson Hall, or the master adviser, Prof. J. Sanchirico, in 2102 Wickson Hall.
The Program. This major provides students with a strong background in policy analysis, including the evaluation of policy alternatives and the study of factors affecting policy formulation and implementation. Key components of this interdisciplinary training include a general background in the natural sciences relevant to environmental policy, economics, political science, statistics, and research methodology to quantitatively analyze environmental problems and policy options. In addition, students are encouraged to develop substantive knowledge in a specific field of environmental policy, such as urban and regional planning, water policy, transportation and energy, climate policy, or conservation management.
Careers. Environmental policy analysis and planning graduates are prepared for employment in environmental, natural resource, energy, and transportation focused public agencies, consulting firms, non-governmental organizations, and businesses, or as legislative aides for elected representatives. The major is also excellent preparation for students who want to go on to graduate work in law, planning, public policy, political science, economics, or business.

## Integrative Policy

Students choosing this individualized track must consult with a faculty adviser to identify an area of emphasis within this track and to select four upper division courses with a common theme. Possible areas of emphasis are marine policy, pollutants in the environment, planning in the presence of environmental hazards, sustainable development, or environmental and natural resource economics. If you are considering this track, please contact the major adviser as soon as possible.

## Water Management

Total Units for the Degree ............. 108-128
Major Adviser. J. Sanchirico (Environmental Science and Policy)

## Minor Program Requirements:

The faculty for environmental policy analysis and planning offers the following minor. The Environmental Policy Analysis minor is for natural and social science students desiring basic training in policy analysis theory and methods.

## Environmental Policy Analysis 23-25

UNITS
Preparation: Economics 1A; basic course in political science.
Environmental Science \& Policy 1............. 4
Environmental Science \& Policy 160, 161,
168A.
Select two courses from: Environmental
Science \& Policy 163, 165N, 166N, 167,
168B, 169, 171, 172, or $179 \ldots \ldots . . . . .6^{6}$

Minor Adviser. J. Sanchirico (Environmental Science and Policy)

## Environmental and Resource Sciences

(College of Agricultural and Environmental Sciences)
This major was discontinued as of Fall 2008; see
Environmental Science and Management, on page 298.

## Environmental Science and Management

(College of Agricultural and Environmental Sciences)

## The Major Program

The Environmental Science and Management (ESM) major is designed for students who are interested in solving environmental problems from an interdisciplinary perspective linking the natural and social sciences.

Students who choose this major will study the interaction of physical, biological, and social components of environmental problems. Students completing the program will understand the scientific basis for environmental decision making and the legal, economic, and political issues involved in management of the environment.
The Program. Courses in biology, chemistry, physics, economics, geology, and calculus form the lower-division preparatory foundation of the curriculum. These are then tied together with Environmental Science and Policy 1, "Environmental Analysis" which provides an inter-disciplinary analysis of several environmental problems. The upper-division core consists of foundation courses in physical, biological, and social sciences, as well as applied courses in environmental monitoring, GIS, impact reporting, and statistical analysis. In their junior year, students must choose a specialized track from the following six options:
(a) Ecology, Biodiversity, and Conservation
(b) Natural Resource Management
(c) Climate Change and Air Quality
(d) Geospatial Information Science
(e) Watershed Science
(f) Soils and Biogeochemistry

A capstone course is required for all seniors and serves to integrate the science, policy/management and biology aspects of the ESM major. All students gain practical experience through field courses and a required internship. Selected students may also pursue an honors thesis in their senior year.
The ESM major is jointly administered by the Departments of Environmental Science and Policy (ESP) and Land, Air and Water Resources (LAWR). Any student in good standing is eligible to transfer to the major; to do so, please see the student affairs officers in 2134 Wickson Hall or in 1150 Plant and Environmental Sciences Building.
Careers. Graduates from this program are prepared to pursue careers as practicing environmental scientists, resource analysts and planners working for public agencies and private firms specializing in environmental quality, natural resources or ecological research. The major is also an excellent preparation for graduate or professional training in physical and/or biological environmental science graduate programs, as well as in environmental law, administration and environmental policy.

course

Natural Resource Management
Track......................................................
Select three courses from: Environmental
Science and Policy 160, 165N, 166N, 167,
168A, 169, 171, 172 or 179 ............9-13
Select one course from: Environmental
Science and Policy 161 or Hydrologic
Science 150. ..3-4
Statistics 103 (or equivalent upper-division statistics) ... 4
Select two courses from: Entomology 104,
Environmental Science and Management
141, 144, Environmental Science and Policy
151, 155, Evolution and Ecology 115, Plant
Biology 117, Plant Sciences 130 or Wildlife,
Fish, and Conservation Biology 110, 111 ,
120 , or 134
.6-8
Select two courses from: Atmospheric Science
116, Environmental Science and
Management 121, 131 or Soil Science
100
..6-9
Environmental Science and Management 185
or 186 ............................................... 4
Climate Change and Air Quality
Track ..................................................32-4 1
Atmospheric Science 60 .......................... 4
Select three courses from: Atmospheric
Science 115, 116, 133, 160, Environmental
Science and Management 131 or Geology
108 .................................................9-12
Select two courses from: Environmental
Science and Management 100, 121,
Environmental Science and Policy 116N,
Hydrologic Science 143 or Soil Science
100 ....................................................6-6
Select one course from: Environmental
Science and Management 144,
Environmental Science and Policy 124,
150C, 151, 155, Evolution and Ecology 115
or Plant Sciences 130...........................3-4
Select one course from: Evolution and
Ecology 147 or 149.
..... 4
Select two courses from: Environmental
Science and Policy 163, 165N, 166N, 167,
171, 172 or 179
6-8
Geospatial Information Science
Track
Select two courses from: Applied Biological Systems Technology 181N, 182,
Environmental Science and Management
185 , or 186
Select two courses from: Environmental
Science and Policy $163,165 \mathrm{~N}, 166 \mathrm{~N}, 169$,
171,172 or 179
. 6-8
Select two courses from: Environmental
Science and Policy 121, Statistics 104, 106,
108,130 A, 130 B or 137
Other applicable information technology courses from the Engineering department including database management, digital
library science and network and Web
technologies may be substituted for spatial information with approval.
Select three courses from the following
options. Must cover both physical and
biological courses from Atmospheric Science
110, 116, 133, Soil Science 100,
Environmental Science and Policy 124,
150C, 151, 152, 155, Geology 136, Plant
Sciences 101 or Plant Biology 117 ......9-14
Soils and Biogeochemistry ................ 37-46
Soil Science 100
.5
Select four courses from: Environmental
Science and Management 100, Hydrologic
Science 134, Soil Science 102, 105, 107,
109,111 , or 120 $\qquad$
Select two courses from: Environmental
Science and Management 121,
Environmental Science and Policy 165N,
$166 \mathrm{~N}, 171,172$ or 179 ..................... 6
Select one course from: Environmental
Science and Management 185, Geology
134, Hydrologic Science 147, or Soil
Science 118

Select two courses from: Atmospheric Science
160, Environmental Science and
Management 144, Environmental Science and Policy 116 N, 150A, 150C, 151, 155, Geology 132, Plant Biology 117 or Plant Sciences 130
Watershed Science Track
Environmental Science and Management 121
or Hydrologic Science 10 3

Soil Science 100
Select two courses from: Environmental
Science and Management 100 or Hydrologic
Science 141 (but not both), Hydrologic
Science 142, 143 , Environmental Science
and Management 108 or Hydrologic Science
151 (but not both)
.6-8
Select one course from: Geology 35, 136,
139 , or 140
3-5
Select one course from: Applied Biological
Systems Technology 181N or 182............ 4
Select one course from: Soil Science 105,
118, or 120.
.. 4-5
Select two courses from: Environmental
Science and Policy 166N, 168A, 169, 172,
179, Hydrologic Science 150, or Landscape
Architecture 60
6-9
Atmospheric Science 133. .. 4

Select one course from: Entomology 116,
Evolution and Ecology 115, or Wildlife, Fish,
and Conservation Biology 120..............3-4
Total Units for the Major $\qquad$ 110-143
Major Advisers. Marcel Holyoak (Environmental Science and Policy) and Terrance Nathan (Land, Air and Water Resources)
Advising centers for the major, including peer advising, are located in both the Environmental Science and Policy and Land, Air and Water Resources departments.
Students whose last names begin with the letters A-L, please see Melissa Whaley in 2134 Wickson Hall.
Students whose last names begin with the letters
M-Z, please see Elizabeth Shull in 1150 Plant and Environmental Sciences.

## Courses in Environmental Science and Management (ESM) <br> Lower Division

8. Water Quality at Risk (3)

Lecture-2 hours; discussion-1 hour. Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination. (Same course as Science and Society 8.) Not open to students who have successfully completed Environmental and Resource Sciences 8. (Formerly Environmental and Resource Sciences 8.) GE credit: SciEng or SocSci, Wrt \| SE, SL, SS, WE. -II. (II.) Hernes

## 30. World Ecosystems \& Geography (3)

Lecture - 3 hours. Introduction to the earth's major geographic regions and associated ecosystems, such as deserts, temperate forests, and oceans with an examination of how climate, vegetation regimes, ecological processes, agriculture and other human activities interact in different regions of the world.
(Same course as Environmental Science and Policy 30.) Not open to students who have successfully completed Environmental and Resource Sciences 30. (Formerly Environmental and Resource Sciences 30.) Offered alternate years. GE credit: SciEng | SE, SL, WC. - (II.) Jackson

## 47. Watershed Processes and Water

## Quality in the Tahoe Basin (2)

Lecture/laboratory-21 hours; fieldwork-9 hours; discussion-3 hours; term paper. Prerequisite: basic knowledge of environmental, soil, or hydrologic sciences. Watershed processes, runoff water-quality management, restoration in Lake Tahoe Basin. Soils, precipitation-runoff, revegetation and adaptive management related to erosion control, effective solu-
tions, development of restoration strategies. Students develop field restoration. Course involves 3 days of instruction in Tahoe City. (Same course as Hydrologic Science 47.) Not open to students who have successfully completed Environmental and Resource Sciences 47. (Formerly Environmental and Resource Sciences 47.) GE credit: SciEng | QL, SE, SL.-IV. (IV) Grismer

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty. (P/NP grading only.) May be repeated for credit. - I, II, III. (I, II, III.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. Primarily for lower division students. May be repeated for credit. (P/NP grading only.) -I, II, III. (II, II, III.)

## Upper Division

## 100. Principles of Hydrologic Science (4)

 Lecture-4 hours. Prerequisite: Chemistry 2B, Mathematics 16B, and Physics 7A or 9A. Topics include hydrology (surface and ground water), hydraulic flow through porous media, water in the soil-plantatmosphere continuum, water quality, flow through open channels, and representative water-resource problems. Not open to students who have successfully completed Environmental and Resource Sciences 100. (Formerly Environmental and Resource Sciences 100.) GE credit: SciEng | QL, SE, SL.-I. (I.) Grismer
## 108. Environmental Monitoring (3)

Lecture/discussion-2 hours; laboratory-2 hours; fieldwork. Prerequisite: entry level course work in student's major; specifically, Evolution and Ecology 101 (Evolution and Ecology), Environmental Science and Policy 100 (Environmental Biology and Management), Environmental Toxicology 101 (Environmental Toxicology), Wildlife, Fish, and Conservation Biology 100 (Wildlife, Fish, and Conservation Biology), Environmental and Resource Sciences 100 (Hydrologic Science), Soil Science 100 (Soil Science, Environmental Horticulture 100 (Environmental Horticulture and Urban Forestry), Landscape Architecture 50 (Landscape Architecture) or the equivalent for any of these courses. Instrumentation and methods for environmental and ecological monitoring; GPS, sensors, datalogging, and GIS. Wide range of measurement techniques for environmental parameters. Not open to students who have successfully completed Environmental and Resource Sciences 108. (Formerly Environmental and Resource Sciences 108.) GE credit: SciEng | SE, SL. - III. (III.)

## 120. Global Environmental Interactions (4)

 Lecture-3 hours; discussion-1 hour. Prerequisite: one college level chemistry course; one college level biology course. Limited to 25 students per discussion section. Relationships among climate, hydrology, biogeochemical cycles, soils and vegetation distribution in diverse landscapes and biomes. Emphasis on physical, chemical, and biological processes affecting ecosystems from the poles to the equator, and human impacts on the environment. Not open to students who have successfully completed Environmental Resources Sciences 60 or 120. (Formerly Environmental Resources Sciences 60 and 120.)II. (II.) Houlton
## 121. Water Science and Management (3)

 Lecture-2 hours; discussion-1 hour. Prerequisite: Physics 10 or Geology 1. Role of water as an essential natural resource in contemporary society. Aspects of the scientific method, including descriptions of natural phenomena and underlying physical causes. Water for cities, agriculture, industry, wildlife and recreation; case studies of water management. Not open to students who have successfully completed Environmental and Resource Sciences121. (Formerly Environmental and Resource Sciences 121.) GE credit: SciEng \| QL, SE, SL.-I. (I.) Sandoval Solis

## 131. Air as a Resource (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: Chemistry 10. Degradation of the atmospheric resource, historical aspects and effects of air pollution examined. Evaluation of primary gaseous and particulate pollutants and discussion of their impact. Not open to students who have successfully completed Environmental and Resource Sciences 131 (Formerly Environmental and Resource Sciences 131.) GE credit: QL, SE, SL. - II. (II.) Zhang
141. Role of Fire in Natural Ecosystems (4)

Lecture-3 hours; term paper. Prerequisite: basic biological concepts: Biological Sciences 2A or Plant Sciences 2; ecology/evolution: Biological Sciences 2 A or 2C. Fire regimes and roles in major North American vegetation types, especially in the west. Physics of fire, fire effects on organisms and ecosystem functioning, reconstructing fire histories, fire in resource management, and fire use by indigenous people. Not open to students who have successfully completed Environmental and Resource Sciences 141. (Formerly Environmental and Resource Sciences 141.) GE credit: SciEng \| SE, SL, WE.-II. (II.) Latimer

## 144. Trees and Forests (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C. Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry. (Same course as Plant Sciences 144.) Not open for credit to students who have completed Plant Biology 144 or Environmental Horticulture 144 or Environmental and Resource Science 144. (Former course Plant Biology/Environmental Horticulture/ Environmental and Resource Science 144.) GE credit: SciEng \| SE, VL.-I. (I.) Berry, Dahlgren, Rice

## 185. Aerial Photo Interpretation and

 Remote Sensing (4)Lecture-2 hours; laboratory-4 hours. Prerequisite: upper division standing. Basics of remote sensing and photogrammetry, grids and map projections, aerial photo interpretation, sensors and platforms for aerial and space photography and non-photographic imaging systems, aerial thermography, microwave sensing, and introduction to remote sensing applications. Not open to students who have successfully completed Environmental Resource Science 185. (Formerly Environmental Resource Science 185.)-I. (I.) Whiting

## 186. Environmental Remote Sensing (5)

Lecture -3 hours; laboratory -6 hours. Prerequisite: Mathematics 16B and Physics 7C or 9B; upper division standing; Landscape Architecture 150 recommended. Overview of satellite, airborne, and ground-based remote sensing, building on properties of electromagnetic radiation. Applications include hydrologic processes, weather and climate, ecology and land use, soils, geology, forestry, and agriculture. Computer based analysis and visualization of images and processing techniques. Not open to students who have successfully completed Hydrologic Science 186 or Environmental and Resource Sciences 186. (Formerly Hydrologic Science 186 and formerly Environmental and Resource Sciences 186.) GE credit: SciEng | QL, SE, VL. - II. (II.) Ustin

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units; consent of instructor. Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty. (P/NP grading only.)-I, II, III. (I, II, III.)
194H. Senior Honor Thesis (2-6)
Independent study - 2-6 hours. Prerequisite: senior standing, overall GPA of 3.50 or higher and consent of master adviser. Independent study, guided
research on an environmentally related subject of special interest to the student. GE credit: SciEng \| SE, WE.
195. Integrating Environmental Science and Management (2)
Lecture/discussion-2 hours. Prerequisite: senior status in Environmental Science and Management major or other environmental science major (e.g Environmental Resource Science; Environmental Biology and Management; Environmental Toxicology; Environmental Policy Analysis and Planning, Wildlife, Fish, and Conservation Biology; Hydrologic Science.); consent of instructor. Practical aspects of environmental improvement through integrated analyses of contemporary issues or problems associated with advocacy, regulation, science and resource management from the perspectives of the physical and ecological sciences and current policy/management. May be repeated two times for credit. GE credit: SciEng or SocSci \| SS or SE. - II. (II.) Grismer
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only).-I, II, III. (I, II, III.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only).-I, II, III. (I, II, III.)

## Environmental Science and Policy

(College of Agricultural and Environmental Sciences) Susan Handy, Ph.D., Chairperson of the Department Marcel Holyoak, Ph.D., Vice Chairperson
Mark N. Lubell, Ph.D., Vice Chairperson
Department Office. 2132 Wickson Hall 530-752-3026

## Faculty

Gwendolyn B. Arnold, Ph.D., Assistant Professor
Marissa L. Baskett, Ph.D., Associate Professor
Edwin D. Grosholz, Ph.D., Professor, Specialist in Cooperative Extension
Susan L. Handy, Ph.D., Professor
Susan P. Harrison, Ph.D., Professor
Alan M. Hastings, Ph.D., Distinguished Professor
Robert Hijmans, Ph.D., Associate Professor
Marcel Holyoak, Ph.D., Professor
John L. Largier, Ph.D., Professor
C.-Y. Cynthia Lin, Ph.D., Associate Professor (Environmental Science and Policy, Agricultural and Resource Economics)
Mark N. Lubell, Ph.D., Professor
Steven G. Morgan, Ph.D., Professor
Joan M. Ogden, Ph.D., Professor
James F. Quinn, Ph.D., Professor
Eliska Rejmankova, Ph.D., Professor
James N. Sanchirico, Ph.D., Professor
Mark W. Schwartz, Ph.D., Professor
Academic Senate Distinguished Teaching Award
Andrew Sih, Ph.D., Professor
Daniel Sperling, Ph.D., Professor (Environmental Science and Policy, Civil and Environmental Engineering)
Michael Springborn, Ph.D., Assistant Professor
Thomas P. Tomich, Ph.D., Professor (Environmental Science and Policy, Human and Community Development)

## Emeriti Faculty

Howard V. Cornell, Ph.D., Professor Emeritus Charles R. Goldman, Ph.D., Professor Emeritus Distinguished Graduate Mentoring Award Robert A. Johnston, M.S., Professor Emeritus
Benjamin S. Orlove, Ph.D., Professor Emeritus
Seymour I. Schwartz, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award Peter J. Richerson, Ph.D., Professor Emeritus

## The Program of Study

Environmental Science and Policy is a teaching and research department offering courses, workshops, and directed group study classes that focus on the complex problems of human-environment relations. The department offers Bachelor of Science degrees in Environmental Science and Management and in Environmental Policy Analysis and Planning. Courses in Environmental Science and Policy also supplement major programs in a wide variety of established disciplines.
Current Information. Through its continuing contacts with many other departments and teaching divisions on the campus, the department develops a variety of special courses and workshops each year. Check with the Department office for up-to-date information about our courses and workshops.
Graduate Study. The Graduate Group in Ecology which is housed in Environmental Science \& Policy offers an M.S. and Ph.D. degree program. Further information about graduate programs in ecology should be obtained from the chairperson of the Graduate Group in Ecology.
Group Office. 1005 Wickson Hall 530) 7526752; http://ecology.ucdavis.edu/

## Courses in Environmental Science and Policy (ESP)

## Lower Division

## 1. Environmental Analysis (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: University Writing Program 1 or English 3 or equivalent; sophomore standing; Economics 1A and Biological Sciences 2B recommended. Analysis of the physical, biological, and social interactions which constitute environmental problems. Emphasis on analysis of environmental problems, the consequences of proposed solutions, and the interaction of environmental science and public policy in creating solutions. GE credit: SciEng or SocSci | SE or SS, SL. -I. (I.) Arnold, Barkett

## 10. Current Issues in the Environment (3)

 Lecture-3 hours. Prerequisite: elementary biology recommended. The science behind environmental issues, and policies affecting our ability to solve domestic and international environmental problems. Resources, environmental quality, regulation, environmental perception and conservation. Integrative case studies. Not open for credit to students who have completed course 1. GE credit: SciEng | SE or SS, SL., WE. - II. (II.) Holyoak
## 30. World Ecosystems \& Geography (3) <br> Lecture-3 hours. Introduction to the earth's major

 geographic regions and associated ecosystems, such as deserts, temperate forests, and oceans with an examination of how climate, vegetation regimes, ecological processes, agriculture and other human activities interact in different regions of the world. (Same course as Environmental Science and Management 30.) Not open to students who have successfully completed Environmental and ResourceSciences 30. (Formerly Environmental and Resource Sciences 30.) Offered in alternate years. GE credit: SciEng | SE, SL, WC.

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internship supervised by member of the faculty. (P) NP grading only.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)

## Upper Division

## 100. General Ecology (4)

Lecture-3 hours; discussion - 1 hour. Prerequisites: Biological Sciences 1A, 1B, 1C, Mathematics 16A, 16B; Statistics 13 recommended. Theoretical and experimental analysis of the distribution, growth and
regulation of species populations; predator-prey and competitive interactions; and the organization of natural communities. Application of evolutionary and ecological principles to selected environmental problems. GE credit: SciEng \| SE, SL.-I, II. (II, II.) Harrison, Sih
101. Ecology, Nature, and Society (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Anthropology 1 or 2 or course 30 or Evolution and Ecology 100 or Biological Sciences 101. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as Anthropology 101.) GE credit: SocSci, Div, Wrt | SS, WC, WE. - II. (II.)
105. Evolution of Societies and Cultures (4) Lecture-3 hours; discussion-1 hour. Prerequisite: Anthropology 1 or 2 or course 30 or Evolution and Ecology 100 or Biological Sciences 101. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only 2 units of credit to students who have completed course 101 or Anthropology 101 prior to fall 2004. (Same course as Anthropology 105.) GE credit: SocSci, Wrt \| QL, SS, WC, WE.

## (a) Environmental Science

110. Principles of Environmental Science (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Physics 1A or 7A, Mathematics 16B or 21B, and Biological Sciences 1A. Application of physical and chemical principles, ecological concepts, and systems approach to policy analysis of atmospheric environments, freshwater and marine environments, land use, energy supplies and technology, and other resources. GE credit: SciEng | QL, SE, SL. - II. (II.) Largier

## 111. Marine Environmental Issues (1)

Discussion-1 hour; seminar-2 hours. Prerequisite: upper division standing or consent of instructor; concurrent enrollment in at least one course from courses 124, 152, Evolution and Ecology 106, 110, 114; residence at or near Bodega Marine Laboratory required. Student must complete the application available at http://www.bml.ucdavis.edu. An examination of critical environmental issues occurring in coastal waters. Course links together material from concurrent courses at BML to develop an integrative understanding of marine environments and their conservation. Includes readings, group discussions, and interaction with visiting speakers. May be repeated two times for credit. (Same Course as Evolution and Ecology 111.) GE credit: SciEng I SE, SL. - IV. (IV.) Gaylord, Largier, Morgan, Sanford

## 116 N . Oceanography (3)

Lecture-2 hours; laboratory-3 hours; field work. Prerequisite: one of Geology 1, 2, 16 or 50. Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. Offered in alternate years. (Same course as Geology 116N.) GE credit: SciEng \| SE, SL. - (II.)

## (b) Ecological Analysis

121. Population Ecology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 1B, 1C, Mathematics 16A-16B. Development of exponential and logistic growth models for plant and animal populations, analysis of age structure and genetic structure, analysis of competition and predator-prey systems. Emphasis is on developing models and using them to make predictions and solve problems. GE credit: SciEng, Wrt | QL, SE, SL. - II. (II.) Baskett, Hastings

## 123. Introduction to Field and Laboratory

 Methods in Ecology (4)Lecture-2 hours; laboratory-6 hours. Prerequisite: course 100 or the equivalent, Statistics 102 or the equivalent. Introduces students to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis. GE credit: SciEng | SE, SL.- (III.) Grosholz
124. Marine and Coastal Field Ecology (3) Lecture-2 hours; discussion - 1 hour; laboratory - 3 hours; fieldwork - 3 hours. Prerequisite: upper division standing or consent of instructor. Introductory animal biology (Biological Sciences 1B) recommended; residence at or near Bodega Marine Lab required. Student must complete the application available at http://www.bml.ucdavis.edu. Ecology of marine populations and communities living in diverse habitats along the California coast. Handson learning using scientific process and tools of the biological trade to address ecological questions arising during field trips. Critical thinking through discussing scientific literature. Offered irregularly. GE credit: SciEng | SE, SL.

## 127. Plant Conservation Biology (4)

Lecture/discussion-3 hours; discussion - 1 hour; term paper. Prerequisite: Environmental Science and Policy 100 or equivalent upper division general ecology. Principles governing the conservation of plant species and plant communities, including the roles of fire, exotic species, grazing, pollination, soils, and population genetics; analytic and practical techniques for plant conservation; and introduction to relevant legal, ethical, and policy issues. Limited enrollment. Offered irregularly. GE credit: SciEng | SE, SL.

## (d) Aquatic Ecosystems Analysis 150A. Physical and Chemical Oceanography (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Environmental Science and Policy/Geology 116, Physics 9B, Mathematics 22C, Chemistry 1C; or upper division standing in a natural science and consent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as Geology 150A.) GE credit: SciEng | QL, SE. -I. (I.) McClain, Spero, Largier

## 150B. Geological Oceanography (3)

Lecture-3 hours. Prerequisite: Geology 50 or 116 . Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as Geology 150B.) GE credit: SciEng | SE. - II. (II.) McClain

## 150C. Biological Oceanography (4)

Lecture-3 hours; discussion-1 hour; fieldworkone weekend field trip required. Prerequisite: Biological Sciences 1A and a course in general ecology or consent of instructor. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. (Same course as Geology 150C.) GE credit: SciEng | SE, SL.-IV. (IV.)

## 151. Limnology (4)

Lecture-3 hours; discussion-1 hour; special project. Prerequisite: Biological Sciences 1A and junior standing. The biology and productivity of inland waters with emphasis on the physical and chemical environment. GE credit: SciEng | SE.

## 151 L . Limnology Laboratory (3)

Laboratory-6 hours; two weekend field trips. Prerequisite: course 151 (may be taken concurrently); junior, senior, or graduate standing. Limnological studies of lakes, streams, and reservoirs with interpretation of aquatic ecology. GE credit: SciEng | SE.
152. Coastal Oceanography (3)

Lecture-2 hours; discussion-1 hour; laboratory-3 hours; fieldwork-3 hours. Prerequisite: upper division standing or consent of the instructor; physics (Physics 9B), calculus (Mathematics 21B) and exposure to physical and chemical oceanography (Geology/Environmental Science and Policy 150A) are recommended; residence at or near Bodega Marine Laboratory required. Student must complete the application available at $\mathrm{http}: / /$ www.bml.ucdavis.edu. The oceanography of coastal waters, including bays, river plumes, nearshore and estuaries; focus on transport patterns, how they are forced and implications for ecological and environmental problems. Pertinent for students in oceanography, ecology, environmental engineering, geology and hydrology. GE credit: SciEng | SE, SL.-IV. (IV) Largier

## 155. Wetland Ecology (4)

Lecture -3 hours; discussion - 1 hour. Prerequisite: course 100 or Plant Biology 117 required; course 110 or 151 recommended. Introduction to wetland ecology. The structure and function of major wetland types and principles that are common to wetlands and that distinguish them from terrestrial and aquatic ecosystems. GE credit: SciEng | SE.-I. (I.) Rejmankova
155L. Wetland Ecology Laboratory (3)
Lecture-1 hour; laboratory - 6 hours; field-worktwo 1-day weekend field trips. Prerequisite: course 155 required (may be taken concurrently). Modern and classic techniques in wetland field ecology. Emphasis on sampling procedures, vegetation analysis, laboratory analytical procedures, and examples of successful wetland restoration techniques. GE credit: SciEng | SE, SL.-I. (I.) Rejmankova

## (e) Environmental Policy Analysis

## 160. The Policy Process (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Political Science 1; Economics 1A; intermediate statistics; course 172. Alternative models of public policymaking and application to case studies in the U.S. and California. GE credit: SocSci | SS. - III. (III.) Arnold

## 161. Environmental Law (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: upper division standing and one course in environmental science (course 1, 10, 110, Biological Sciences 1A, Environmental Toxicology 10, or Resource Sciences 100); Political Science 1 and University Writing Program 1 recommended. Introduction for non-Law School students to some of the principal issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA. GE credit: SocSci, Wrt | SS. - III. (III.)

## 162. Environmental Policy (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Economics 1A. Compares economic with socio-cultural approaches to understanding the causes of environmental problems and strategies for addressing them. Includes different approaches to the policy process, policy instruments, and environmental behavior. Applies these principles to several problems. GE credit: SocSci | SS.-II. (II.) Springborn

## 163. Energy and Environmental Aspects of Transportation (4)

Lecture-3 hours; extensive writing. Prerequisite: Economics 1A or Engineering 106. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models.
(Same course as Civil and Environmental Engineering 163.) Offered in alternate years. GE credit: SciEng or SocSci, Wrt | SE or SS, SL, WE.-I. Sperling
164. Ethical Issues in Environmental Policy (3)

Lecture-3 hours. Prerequisite: courses 160, 168A; seniors only in Environmental Policy Analysis and Planning or by consent of instructor. Basic modes of
ethical reasoning and criteria of distributive justice applied to selected topics in environmental policymaking. Offered irregularly. GE credit: SocSci | SS.

## 165N. Climate Policy (3)

Lecture/discussion-3 hours. Prerequisite: course 1, Economics 1A, or consent of instructor. Models, data and assumptions behind competing arguments regarding societal response to the prospect of climate change at the state, national and international level from economic, ethical and policy science perspectives. - III. (III.) Springborn
166N. Ocean and Coastal Policy (3)
Lecture-3 hours. Prerequisite: course 1 or consent of instructor. Limited enrollment. Overview of U.S. and International ocean and coastal policy, including energy, coastal land-use and water quality, protected areas and species. Offered in alternate years. GE credit: SocSci | SS. -II. Sanchirico

## 167. Energy Policy (4)

Lecture-4 hours; term paper. Prerequisite: Economics 1A, Mathematics 16B, or consent of instructor. Survey of primary energy resources (fossil, renewable, nuclear), energy conversion methods, future energy demand scenarios, and environmental impacts of energy. Overview of energy policy in the U.S. Analysis of policy alternatives for addressing energy-related environmental and national security issues. Offered in alternate years. GE credit: SocSci | SS. - (III.) Ogden
168A. Methods of Environmental Policy Evaluation (5)
Lecture-3 hours; discussion-1 hour; term paper. Prerequisite: Statistics 13; Economics 100 or Agricultural and Resource Economics 100A; Mathematics 16 B or 21 B ; course 1 ; upper division standing. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefitcost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation. GE credit: SocSci \| SS. -I. (I.) Ogden

## 168B. Methods of Environmental Policy Analysis (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: course 168A. Continuation of course 168A, with emphasis on examination of the literature for applications of research and evaluation techniques to problems of transportation, air and water pollution, land use, and energy policy. Students will apply the methods and concepts by means of a major project. GE credit: SocSci | SS.-III. (III.) Sanchirico

## 169. Water Policy and Politics (3)

Lecture-3 hours. Prerequisite: Economics 1A or Political Science 1. The governance of water, including issues of water pollution/quality and water supply. The politics of water decision-making and effectiveness of water policy. Broad focus on federal water policy, with case examples from nationally significant U.S. watersheds. GE credit: SocSci |SS.(III.) Lubell

## (f) Environmental Planning 170. Conservation Biology Policy (4)

 Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 and Economics 1A; Economics 100 or Agricultural and Resource Economics 100A recommended. Analysis of policies designed to conserve species and their habitats. Emphasis on how individval incentives affect the success of conservation policies. Valuation of endangered species and biodiversity. Criteria for deciding conservation priorities. GE credit: SciEng or SocSci | SE or SS. - (III.) Schwartz
## 171. Urban and Regional Planning (4)

 Lecture-3 hours; discussion - 1 hour; term paper. Prerequisite: course 1; a course in social science and a course in environmental science. How cities plan for growth in ways that minimize environmental harm. Standard city planning tools (general plan, zoning ordinance) and innovative new approaches. Focus on planning requirements and practices in California. Relationships between local, regional, state, and federal policy. GE credit: SocSci | SS, WE. - III. (III.) Handy172. Public Lands Management (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Economics 1A. Investigation of alternative approaches to public lands management by Federal and state agencies. The role each agency's legislation plays in determining the range of resource allocations. GE credit: SocSci | ACGH, SS.-I. (I.) Lubell
173. Land Use and Growth Controls (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Political Science 1, Economics 1A, intermediate statistics (Sociology 106 or Statistics 102 or the equivalent), and local government (Applied Behavioral Science 157, 158 or Political Science 100, 102 or 104.) Exposes students to the economic, political, and legal factors affecting land use and growth controls, and helps students critically evaluate written materials in terms of their arguments and supporting data. GE credit: SocSci | SS.
175. Natural Resource Economics (4) Lecture-3 hours; discussion-1 hour. Prerequisite: Agricultural and Resource Economics 100B or Economics 100 or the equivalent. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as Agricultural and Resource Economics 175.) GE credit: SocSci | SS. - III. (III.) Lin

## 178. Applied Research Methods (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Statistics 103 or Sociology 106 or the equivalent. Research methods for analysis of urban and regional land use, transportation, and environmental problems. Survey research and other data collection techniques; demographic analysis; basic forecasting, air quality, and transportation models. Collection, interpretation, and critical evaluation of data. GE credit: SocSci | QL, SS. - II. (II.) Handy
179. Environmental Impact Assessment (4) Lecture-3 hours; discussion-1 hour. Prerequisite: upper division standing and one course in environmental science (course 100, 110 or the equivalent) Introduction to the information resources and methods typically used in environmental impact analysis. Emphasis on how environmental information is applied to planning, environmental regulation, and public policymaking, with case studies from California land use and natural resource policy. GE credit: SocSci | SS.-II. (II.) Quinn
179L. Environmental Impact Reporting Using Geographic Information (2)
Laboratory/discussion-2 hours; laboratory-4 hours. Prerequisite: course 179 concurrently. Introduction to Geographic Information Systems (GIS) by using ArcView for assessment and environmental planning. Not open for credit to students who have completed Applied Biological Systems Technology 180, 181 or Agricultural Systems and Environment 132. GE credit: SciEng | SE.
(g) Other Courses
190. Workshops on Environmental

Problems (1-8)
Laboratory-2-16 hours. Prerequisite: consent of instructor. Workshops featuring empirical analyses of contemporary environmental problems by multidisciplinary student teams. Guided by faculty and lay professionals, the teams seek to develop an integrated view of a problem and outline a series of alternative solutions. Open to all upper division and graduate students on application. (P/NP grading
only.) GE credit: SE. -I, II, III. (I, II, III.)

## 191A. Workshop on Food System

## Sustainability (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: upper-division standing; Plant Sciences 15, Community and Regional Development 20, Agricultural and Resource Economics 121, Plant Sciences 150 or consent of the instructor. Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. First in a two-quarter senior capstone course sequence. Identify projects addressing specific problems and
opportunities of sustainable agriculture and food systems, form multidisciplinary teams, and identify and consult with key stakeholders to understand their needs and concerns. GE credit: SciEng | SE.-I. (I.) Tomich

## 191B. Workshop on Food System

## Sustainability (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: course 191A. Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. Continuation of course 191A. Student teams conduct analyses of a specific issue in sustainable agriculture or food systems, prepare a critical assessment of technological, economic, environmental, and social dimensions of options for action and present their results to stakeholders. GE credit: SciEng | SE.-II. (II.) Tomich

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.)
197T. Tutoring in Environmental Science and Policy (1-5)
Tutorial-2-6 hours. Prerequisite: upper division standing and consent of instructor. Experience in teaching under guidance of faculty member. (P/NP grading only.)
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

212A. Environmental Policy Process (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course in public policy (e.g., Environmental Science and Policy 160); environmental law (e.g., Environmental Science and Policy 161); course in bureaucratic theory (e.g., Political Science 187 or Environmental Science and Policy 166); course in statistics (e.g., Sociology 106 or Agricultural and Resource Economics 106). Introduction to selected topics in the policy process, applications to the field of environmental policy. Develops critical reading skills, understanding of frameworks of the policy process and political behavior, and an ability to apply multiple frameworks to the same phenomena. Offered in alternate years. (Same course as Ecology 212A.)-III. Lubell
$212 B$. Environmental Policy Evaluation (4)
Lecture-1 hour; discussion-1 hour; seminar-2 hours. Prerequisite: intermediate microeconomics (e.g., Economics 100); Statistics 108 or Agricultural and Resource Economics 106; policy analysis (e.g., Environmental Science and Policy 168A or the equivalent); Agricultural and Resource Economics 176. Methods and practices of policy analysis; philosophical and intellectual bases of policy analysis and the political role of policy analysis. (Same course as Ecology 212B.) Offered in alternate years. - (III.) Springborn

## 220. Tropical Ecology (3)

Lecture -2 hours; discussion - 1 hour. Prerequisite: advanced introductory ecology course-course 100, Evolution and Ecology 101, 117; Evolution and Ecology 138 recommended. Open to graduate and undergraduate students who meet requirement subject to consent of instructor. An overview of present status of knowledge on structure and processes of major tropical ecosystems. Differences and similarities among tropical and temperate systems stressed. Offered in alternate years. - (III.) Rejmankova

## 228. Advanced Simulation Modeling (3)

 Lecture-2 hours; discussion-1 hour. Prerequisite: courses 128-128L; Statistics 108 or Agricultural and Resource Economics 106. Advanced techniques insimulation modeling; optimization and simulation, dynamic parameter estimation, linear models, error propagation, and sensitivity testing. Latter half of course will introduce model evaluation in ecological and social system models.

## 252. Sustainable Transportation

## Technology and Policy (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: course 160 or the equivalent. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as Civil and Environmental Engineering 252.) - III. Sperling

## 275. Economic Analysis of Resource and

 Environmental Policies (4)Lecture/discussion-4 hours. Prerequisite: Agricultural and Resource Economics 204/Economics 204. Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as Agricultural and Resource Economics 275.) - III. (III.)

## 278. Research Methods in Environmental

 Policy (3)Lecture/discussion-3 hours. Prerequisite: Agricultural and Resource Economics 106 or the equivalent. Introduction to scientific research in environmental policy. Major issues in the philosophy of the social sciences. How to design research that acknowledges theoretical assumptions and that is likely to produce evidence in an intersubjectively reliable fashion with explicit recognition of its uncertainties.
298. Directed Group Study (1-5)
299. Research (1-12)

Prerequisite: graduate standing. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Environmental Sciences

See Agricultural Management and Rangeland Resources, on page 143; Atmospheric Science, on page 173; Environmental and Resource Sciences, on page 298;
Environmental Biology and Management, on page 295; Environmental Horticulture and Urban Forestry, on page 297; Environmental Policy Analysis and Planning, on page 297; Environmental Toxicology, on page 303; Hydrology, on page 348; Landscape Architecture, on page 365; Soil and Water Science, on page 511; and Wildlife, Fish, and Conservation Biology, on page 544.

## Environmental Toxicology

(College of Agricultural and Environmental Sciences) Ronald S. Tjeerdema, Ph.D., Chairperson of the Department
Department Office. 4138 Meyer Hall
530-752-1142; http://evtox.ucdavis.edu

## Faculty

Gary N. Cherr, Ph.D., Professor
(Environmental Toxicology, Nutrition)
Michael S. Denison, Ph.D., Professor
Nilesh Gaikwad, Ph.D., Assistant Professor Michele La Merrill, Ph.D., M.P.H., Assistant Professor Patricia Oteiza, Ph.D., Professor
(Environmental Toxicology, Nutrition)
Robert H. Rice, Ph.D., Professor
Takayuki Shibamoto, Ph.D., Distinguished Professor
Ronald S. Tjeerdema, Ph.D., Professor
Barry W. Wilson, Ph.D., Professor
(Animal Science, Environmental Toxicology) Andrew Whitehead, Ph.D., Assistant Professor Matthew J. Wood, Ph.D., Associate Professor Qi Zhang, Ph.D., Associate Professor

## Emeriti Faculty

Arthur Craigmill, Ph.D., Specialist in Cooperative Extension, Emeritus
Donald G. Crosby, Ph.D., Professor Emeritus
Dennis P. H. Hsieh, Sc.D., Professor Emeritus
James N. Seiber, Ph.D., Professor Emeritus
Michael W. Stimmann, Ph.D., Specialist in
Cooperative Extension, Emeritus
Dorothy E. Woolley, Ph.D., Professor Emeritus

## Affiliated Faculty

George V. Alexeeff, Ph.D., Adjunct Professor Deborah Bennett, Ph.D., Associate Professor (Public Health Sciences, School of Medicine) Matt Hengel, Ph.D., Assistant Adjunct Professor Dirk Holstege, Ph.D., Associate Adjunct Professor Norman Kado, Ph.D., Adjunct Professor
Sree Kanthaswamy, Ph.D., Associate Adjunct Professor
John Knezovich, Ph.D., Adjunct Professor
Charlie Li, Ph.D., Assistant Adjunct Professor
Melanie Marty, Ph.D., Associate Adjunct Professor
Alyson E. Mitchell, Ph.D., Professor
(Food Science and Technology)
Cecilia Von Beroldingen, Ph.D., Lecturer
(UC Davis Extension Forensics Program and Department of Justice)
Zachary A. Wong, Ph.D., Adjunct Professor

## The Major Program

Toxic agents found in the environment include pesticides, food additives, industrial waste, and metals as well as chemicals produced by animals, plants, fungi and bacteria. Students in the Environmental Toxicology major learn how toxicants produce adverse effects by understanding both their environmental fates and biological activities. They learn about monitoring concentrations and the distribution and persistence of agents found in water, soil, air and foods. Toxicity testing procedures and exposure assessments are used to help evaluate potential for harm to humans and other species. By understanding the cellular targets and biochemical mechanisms of perturbation by toxicants, toxicologists can better estimate adverse effects. Overall, students learn mechanisms by which toxic agents act, their origin and fate and how toxicologists evaluate the risk of adverse effects and balance them against the benefits of us.
The Program. Preparatory courses in biology, chemistry, mathematics, and physics are required to provide fundamental principles which underlie toxicology. Students in the major are expected to understand the environmental fates and biological activities of different classes of toxic substances, and the legislative issues which arise from chemical use. Opportunities are available to develop in-depth understanding in areas of emphasis through selection of electives.

## Specializations/Emphases. Elective course

 work in many disciplines can complement the required core courses. Providing a framework for selecting restricted electives, the major offers specializations in (1) Environmental Toxicology and Chemistry, (2) Forensic Science and Regulatory Toxicology, and (3) Molecular and Biomedical Toxicology. The first category includes topics in chemical fate, transport and degradation, as well as ecology, wildlife,and aquatic toxicology. The second category includes forensic science, environmental policy and management, and public health. The third category includes pharmacology, biotechnology, medicine, veterinary medicine, and food toxicology. Students are encouraged to select course work from these specializations and beyond to match their interests.
Internships and Career Alternatives. Occupations that use environmental toxicology include risk assessment, pharmaceutical development, food additive toxicity testing, managing regulatory compliance, residue or forensic analysis, pest control, monitoring and field sampling, industrial hygiene, and environmental health and safety. A substantial proportion of graduates elect to pursue advanced training in graduate or professional schools. Others with the B.S. degree have gone on to law, medical, pharmacy, or veterinary medical school, as well as to graduate degrees in pharmacology, toxicology, agricultural and environmental chemistry, or public health. During undergraduate study, optional internships or research projects are recommended to provide training and work experience to help students pursue future goals.

## B.S. Major Requirements:

Preparatory Subject Matter .............. 72-73
Biological Sciences 2A, 2B, 2C ........ 14-15 Note: Students transferring from community college with the equivalent of the Biological Sciences 1 series would receive credit on a case-by-case basis.
Chemistry 2A-2B-2C or $2 \mathrm{AH}-2 \mathrm{BH}-2 \mathrm{CH}$, and
$118 \mathrm{~A}-118 \mathrm{~B}-118 \mathrm{C}$ or $128 \mathrm{~A}-128 \mathrm{~B}-128 \mathrm{C}$, 129A.
Mathematics 17A-17B-17C or
$21 \mathrm{~A}-21 \mathrm{~B}-21 \mathrm{C}$ 12
Physics 7A-7B-7C ........................................... 12
Statistics 100, 102, 103, 104, 106, or 108. ... 4
Upper Division Writing; University Writing Program 101 or 104(A-I) ......................... 4
Preferably, the course should be taken prior to enrollment in Environmental Toxicology 102B and 103B.

Satisfaction of the General Education requirement to include courses selected with adviser's approval to complement the major; courses in agricultural economics, environmental studies, political science, psychology, and sociology are particularly recommended.
Depth Subject Matter 37-47
Biological Sciences 101 and 102 or 102 and 103. 6-7 Environmental Toxicology 101, 102A-102B, 103A-103B and three upper division Environmental Toxicology classes chosen from the following list: $104,120,127,128,130$ 131, 135, 138, and 146 .............. 31-40
Restricted Electives $\qquad$ 24-26
Electives selected for area of specialization/ emphasis with faculty adviser's approval with 6 unit combined maximum of 190, 192, 198, and 199 with advisor approval; see department website for details.
Total Units for the Major 133-146
Major Adviser. Takayuki Shibamoto
Advising Center for the major is in 4111 Meyer Hall. Contact the Academic Program Adviser at 530-752-1042.

## Minor Program Requirements:

Environmental Toxicology................. 18-26
Environmental Toxicology 101, 102A, 103A.12

Completion of two upper division
Environmental Toxicology elective courses six units minimum, selected from the following list: Environmental Toxicology 104, 120,

127, 128, 130, 131, 135, 138, and
146
6-14
Minor Adviser. M.S. Denison
Graduate Study. Programs of study leading to M.S. and Ph.D. degrees are available through related Graduate Groups such as Pharmacology and Toxicology; Biochemistry, Molecular, Cellular, and Developmental Biology; Agricultural and Environmental Chemistry; and the Forensic Science Master's Degree Program. For information on graduate study, contact the Advising Office or the appropriate graduate adviser; see Graduate Studies, on page 111.

## Courses in Environmental Toxicology (ETX)

## Lower Division

## 10. Introduction to Environmental

 Toxicology (3)Lecture-3 hours. Hazardous substances, their effects on humans and their actions and movement in the environment. Emphasis on substances of current concern. GE credit: SciEng | SE, SL.-I. (I.) Tjeerdema
20. Introduction to Forensic Science (3) Lecture-3 hours. Basic principles of forensic science, types of information on which investigations focus, how information is obtained and used in criminal investigations, types of scientific skills required to practice forensic science, guidance on training. Real cases discussed; demonstrations of methods provided. GE credit: SciEng, Wrt \| SE, SL, VL. - II. (II.) Kanthaswamy

## 30. Chemical and Drug Use and Abuse (3)

 Lecture-3 hours. An overview of chemical use and abuse in our society. The effects of chemicals (therapeutic drugs, pesticides, food additives, herbal remedies, environmental contaminants, and recreational drugs) on humans and other living systems. GE credit: SciEng | SE.-III. (III.) Wood
## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division standing and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty.
(P/NP grading only.) GE credit: SE.
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

## Upper Division

101. Principles of Environmental Toxicology (4)

Lecture - 3 hours; discussion -1 hour. Prerequisite: Chemistry $8 \mathrm{~B}, 118 \mathrm{~B}$, or 128 B and Biological Sciences 1A. Principles of toxicology with a focus on environmental, industrial, and natural chemicals. Topics include fate and effects of chemicals in organisms and the environment, air pollutants, insecticides, aquatic toxicology, endocrine disruptors, biomarkers and bioassays, and risk assessment. GE credit: SciEng | SE, SL.-I. (I.) Denison
102A. Environmental Fate of Toxicants (4) Lecture - 3 hours; discussion - 1 hour. Prerequisite: Chemistry 8B, 118B, 128B or consent of instructor. Properties of toxic chemicals influencing their distribution and transformations; action of environmental forces affecting toxicant breakdown, movement, and accumulation; sources and occurrence of major classes of environmental toxicants. Not open for credit to students who have completed course 112A. GE credit: SciEng | QL, SE, SL, VL, WE.-II. (II.) Tjeerdema
102B. Quantitative Analysis of Environmental Toxicants (5)
Lecture-3 hours; laboratory-3 hours; discussion1 hour. Prerequisite: course 102A. Sample preparation methods for trace analysis of environmental toxicants. Concept and techniques of advanced analytical instrumentation. Interpretation and use of
analytical data. Not open for credit to students who have completed course 112B. GE credit:
SciEng | SE, VL. - III. (III.) Hengel, Shibamoto

## 103A. Biological Effects of Toxicants (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 102; course 101 and Neurobiology, Physiology, and Behavior 101 recommended Biological effects of toxic substances in living organisms. Metabolism, cellular and tissue targets, mechanisms of action, and pathological effects. Not open for credit to students who have completed course
114A. GE credit: SciEng | SE. - II. (II.) Rice

## 103B. Biological Effects of Toxicants:

 Experimental Approaches (5)Lecture-3 hours; laboratory-3 hours; discussion1 hour. Prerequisite: course 103A. Experimental approaches for assessing the biological effects of toxicants. Not open for credit to students who have completed course 114B. GE credit: SciEng | SE, VL, WE.-III. (III.) Wood
104. Environmental and Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)
Lecture-3 hours; discussion - 1 hour. Prerequisite: Biological Sciences 101; Biological Sciences 103 or Animal Biology 103. Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/ regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as Nutrition 104.) GE credit: SciEng | OL, SE, SL.-I. (I.) Haj, Oteiza

## 110. Toxic Tragedies and Their Impact on Society (2)

Lecture-2 hours. Prerequisite: Biological Sciences 10 or the equivalent or consent of instructor; Chemistry 118A recommended. Examination of toxic tragedies, their origins, consequences, and effects on toxic regulation. GE credit: SciEng, Wrt \| OL, SE, SL, WE. - II. (II.) Rice
111. Introduction to Mass Spectrometry (3) Lecture-3 hours. Prerequisite: Chemistry 118C. Introduction to mass spectrometry, including ionization techniques, mass analyzers, interpretation of mass spectra, and applications of mass spectrometry. Emphasis on fundamental concepts of mass spec trometry necessary to identify and quantify organic molecules. GE credit: SciEng | SE.
120. Perspectives in Aquatic Toxicology (4) Lecture-3 hours; discussion-1 hour. Prerequisite: Chemistry 8B, 118B or 128B, Biological Sciences 1 A , or consent of instructor. Toxic substances, their fate in marine and freshwater systems, and their effects on aquatic organisms, populations, and ecosystems. Emphasis on substances and issues of current concern. Offered in alternate years. GE credit: SciEng | OL, SE, SL, VL, WE.-II. Cherr, Tjeerdema, Whitehead

## 127. Environmental Stress and

Development in Marine Organisms (10)
Lecture-4 hours; laboratory-12 hours; discussion -2 hours. Prerequisite: course 101 or Biological Sciences 102 or 104 or the equivalent; course 114A or Nutrition 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as Nutrition 127.) GE credit: SciEng | OL, QL, SE, SL, VL, WE. - IV. Cherr

## 128. Food Toxicology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 102 and 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as Food Science and Technology 128.) GE credit: SciEng | SE. - III. (III.) Gaikwad, Mitchell, Shibamoto

## 130. The Role and Applications of Toxicology in Modern Industry (3)

 Lecture-3 hours. Prerequisite: course 101 required; course 103A recommended. Role of toxicology in industry research and development, human health and environmental protection, hazard and risk evaluations, risk management and communications, product stewardship, and regulatory compliance. Scientific principles and methods of toxicology in chemical, energy, pharmaceutical, pesticide, biotechnology industries. GE credit: SciEng | OL, SE, SL, VL, WE. - III. (III.) Wong
## 131. Environmental Toxicology of Air <br> \section*{Pollutants (3)}

Lecture-3 hours. Prerequisite: Chemistry 8B (may be taken concurrently) or the equivalent; Biological Sciences 102 recommended. Field trip required. Toxicology of air pollutants in the ambient, indoor, and occupational environments. Health effects, sources, environmental fates, pulmonary responses, sampling and analyses, and air-quality criteria and standards. GE credit: SciEng \| SE, VL.-I. (I.) Kado

## 135. Health Risk Assessment of Toxicants

 (3)Lecture-3 hours. Prerequisite: course 101; course 114A recommended. Current practices of health risk assessment of environmental chemicals using toxicological principles and their application to regulatory control of these chemicals. GE credit: SciEng | QL, SE, SL, VL. -I. (I.) Marty

## 138. Legal Aspects of Environmental

## Toxicology (3)

Lecture -3 hours. Prerequisite: course 10 or 101 recommended. Federal and California legislation concerning air and water pollution, pesticide use, food and feed additives, consumer protection, and occupational exposure to toxic substances; roles of federal regulatory agencies; alternatives to government control. GE credit: SciEng | SE, VL, WE.-II. (II.) Alexeeff
146. Exposure and Dose Assessment (3) Lecture-3 hours. Prerequisite: course 112A; course 135 recommended. The exposure component of risk assessment; specifically, the presence and/or formation of toxic substances in environmental media, their movement within and between contaminated media, and the contacts of human populations with those media. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL. - IIII. (III.) Bennett

## 190. Seminar (1)

Seminar-1 hour. Prerequisite: consent of instructor. Selected topics presented by students, faculty, or outside speakers covering current research and instructional activities within environmental toxicology. Reports and discussion concerning oral and written presentations, literature sources, and career opportunities. (P/NP' grading only.) GE credit:
SciEng | SE. - I, II, III. (II, II, III.)
190C. Research Group Conference (1)
Discussion-1 hour. Prerequisite: consent of instructor. Weekly conference of advanced research methods and the interpretation of research results. (P/NP grading only.) GE credit: SE.-I, II, III. (II, II, III.)

## 190S. Environmental Toxicology Career

 Seminar (1)Seminar-1 hour. Careers in environmental toxicology; discussions with graduates from the Department of Environmental Toxicology and other experts in the field. (P/NP grading only.) GE credit: SE.-I. (I.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) GE credit: SE.

## 194HA-194HB. Honors Research (3-3)

Discussion - 1 hour; laboratory - 6 hours. Prerequisite: senior standing, minimum GPA of 3.250 , consent of instructor. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design,
learning new techniques, data analysis and interpretation of findings. (P/NP grading only; deferred grading pending completion of sequence.) $G E$ credit: SE.
194HC. Honors Research (3)
Laboratory-6-9 hours; discussion-1 hour. Prereqvisite: senior standing, minimum GPA of 3.250, and consent of instructor. Continuation of course 194HA194HB. (P/NP grading only.) GE credit: SE.

## 197T. Tutoring in Environmental Toxicology

 (1-5)Hours and duties will vary depending upon course being tutored. Prerequisite: advanced standing in Environmental Toxicology, a related major, or the equivalent experience and consent of instructor. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit up to a total of 5 units. (P/NP grading only.) GE credit: SE.
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

## 199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.) GE credit: SE.

## Graduate

## 203. Environmental Toxicants (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Chemistry 128C (or the equivalent), or Chemistry 8B and consent of instructor. Toxic chemicals: selected topics illustrating their occurrence, structure, and the reactions underlying detection, toxicity, fate, and ecological importance. Offered in alternate years.II. Beck, Seiber

## 214. Mechanisms of Toxic Action (3)

Lecture-3 hours. Prerequisite: Biological Sciences 102, 103, and consent of instructor. Chemical, biochemical, and molecular mechanisms underlying the adverse effects of toxic chemicals. Students are required to write a grant proposal and participate in a grant review panel. Offered in alternate years. III. Denison, Hammock

## 220. Analysis of Toxicants (3)

Lecture-3 hours. Prerequisite: coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as Forensic Science 220.)-1. (I.) Zhang

220L. Analysis of Toxicants Laboratory (2) Laboratory-6 hours. Prerequisite: course 220 (may be taken concurrently) and consent of instructor. Laboratory techniques for microanalysis of toxicants. Separation, detection, and quantitative determination of toxicants using chemical and instrumental methods.-I. (I.) Zhang

## 228. Gas Chromatography/Mass

## Spectrometry of Toxic Chemicals (3)

Lecture-1 hour; discussion - 1 hour; laboratory-3 hours. Prerequisite: course 220 and Chemistry 129C; or consent of instructor. Application of GC/ MS techniques to investigate toxic chemicals. Mass spectral fragmentations and their application to the structural elucidation. Practical application of GC/ MS in current research. Preference given to environmental toxicology graduate students. Offered in alternate years. - (II.) Holstege
234. Current Topics in Neurotoxicology (3) Lecture-3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribu-
tion of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as Molecular Biosciences 234 and Molecular, Cellular, and Integrative Physiology 234.) - III. (III.) Lein

## 240. Ecotoxicology (3)

Lecture-3 hours. Prerequisite: elementary course in toxicology and ecology or the equivalent, or consent of instructor. Principles of toxicology as applied to chemical action on natural populations, communities, and ecosystems. Physical, chemical, and biological characteristics which influence ecotoxic effects, modeling, and field research. Selected case histories are analyzed and presented in class. - III. (III.) Whitehead
250. Reproductive Toxicology (3)

Lecture-1.5 hours; lecture/discussion-1.5 hours. Prerequisite: Physiology 220 or Pharmacology-Toxicology 203. Application of toxicological principles in reproductive studies. Effects of toxicants on the male, female, and developing embryo/fetus. Critical evaluation of reproductive toxicity studies and development of mechanistic approaches to understanding how chemical exposure can adversely affect reproduction. Offered in alternate years.-II. Cherr, Golub

## 260. Immunotoxicology (3)

Lecture - 3 hours. Prerequisite: undergraduate or graduate introduction to immunology coursework recommended, but not required; graduate standing or consent of instructor. Provides students with skills and knowledge for evaluating and applying research on the impact of environmental toxicants on immunological function in human and wildlife populations. Offered in alternate years. - Golub

## 270. Toxicology of Pesticides (3)

Lecture-3 hours. Prerequisite: one course each in (a) Organic Chemistry, (b) Biochemistry, (c) Toxicology (course 101 or equivalent), or consent of instructor; graduate standing. Classification and chemical properties of pesticides, their mode of action, metabolism and disposition, pesticide resistance, effects on human health and ecological health and methods of risk benefit analyses. Offered in alternate years.

## 278. Molecular Techniques (3)

Lecture -3 hours. Prerequisite: graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as Forensic Science 278.) Offered in alternate years. - (I.) Denison, Rice

## 280. Forensic DNA Analysis (3)

Lecture-3 hours. Prerequisite: coursework in genetics and molecular biology. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as Forensic Science 280.)-II. (II.) Von Beroldingen

## 281. Principles and Practice of Forensic

 Serology and DNA Analysis (3)Lecture-2 hours; lecture/discussion-3 hours. Prerequisite: Forensics/course 278 or Forensics/course 280, or equivalent; consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA. (Same course as Forensic Science 281.) - III. (III.) Rice

## 284. Non-Human Forensic DNA-Theory

 and Casework Application (2)Lecture -2 hours. Prerequisite: consent of instructor required for all students not enrolled in the MS Forensics program; upper division Molecular Biology and Genetics or its equivalent. Restricted to graduate standing. Provides a comprehensive understanding of plant and animal forensic biology in terms of sam-
ple collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit. (Same course as Forensic Science 284.) Offered in alternate years. - I.

## Kanthaswamy

## 290. Seminar (1)

Seminar-1 hour. Current topics in environmental toxicology. (S/U grading only.) -I, II, III. (I, II, III.)

## 290C. Advanced Research Conference (1)

 Lecture/discussion - 1 hour. Prerequisite: consent of instructor. Presentation and critical discussion of advanced research methods and interpretation of research results. Designed primarily for graduate students. (S/U grading only.) $-\mathrm{I}, \mathrm{II}$, III. (I, II, III.)297T. Tutoring in Environmental Toxicology (1-5)
Hours and duties will vary depending upon course being tutored. Prerequisite: graduate standing in Environmental Toxicology, a related major, or the equivalent experience, and consent of instructor. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit up to a total of 5 units. ( $\mathrm{S} / \mathrm{U}$ grading only.)
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (II, II, III.)

## Epidemiology

See Medicine and Epidemiology
(VME), on page 539.

## Faculty

Sharif Aly, D.V.M., M.P.V.M., Ph.D., Assistant
Professor (Population Health and Reproduction)
E. Robert Atwill, D.V.M., Ph.D. Professor
(Population Health and Reproduction)
Rahman Azari, Ph.D., Lecturer (Statistics)
Heejung Bang, Ph.D., Associate Professor (Public Health Sciences)
Christopher M. Barker, Ph.D.
(Center for Vectorborne Diseases)
Laurel A. Beckett, Ph.D., Professor (Public Health Sciences)
Deborah Bennett, Associate Professor (Department of Public Health Sciences)
Walter Boyce, D.V.M., Ph.D., Professor (Population Health \& Reproduction)
Kenneth Brown, M.D., Professor (Nutrition)
Diana Cassady, Dr.P.H., Associate Professor (Department of Public Health Sciences) Munashe Chigerwe, M.P.H., Ph.D, Assistant Professor (Medicine and Epidemiology) Bruno Chomel, D.V.M., Ph.D., Professor (Population Health and Reproduction) Patricia Conrad, D.V.M., Ph.D., Professor (Pathology, Microbiology, and Immunology) Rosemary Cress, Ph.D., Associate Professor (Public Health Sciences)

Beate Crossley, Ph.D., Associate Professor (California Animal Health and Food Safety Laboratory)
Kathryn DeRiemer, Ph.D., Associate Professor (Public Health Sciences)
Lorien Dalrymple, M.D., M.P.H., Assistant Professor (Internal Medicine)
Kathryn Dewey, Ph.D., Professor (Nutrition)
Christiana Drake, Ph.D., Professor (Statistics)
Jonathan Ducore, M.D., Professor (Pediatrics)
Holly Ernest, D.V.M., Ph.D. Associate Professor (Population Health \& Reproduction)
Thomas B. Farver, Ph.D., Professor
(Population Health and Reproduction)
Janet Foley, M.S, D.V.M., Ph.D., Professor (Medicine and Epidemiology)
Lorena Garcia, M.P.H., Dr.P.H., Associate Professor (Department of Public Health Sciences)
Estella Geraghty, M.D., M.S., M.P.H., Assistant Professor (Internal Medicine)
David R. Gibson, Ph.D., Professor (Public Health Sciences)
Ellen Gold, Ph.D., Professor (Public Health Sciences)
Lynette Hart, Ph.D., Professor
(Population Health and Reproduction)
Danielle Harvey, Ph.D., Associate Professor (Public Health Sciences)
Irva Hertz-Picciotto, Ph.D., Professor (Public Health Sciences)
Ashley Hill, D.V.M., M.P.V.M., Ph.D., Assistant Professor (California Animal Health and Food Safety Laboratory)
Martin Hoffman, M.D., Professor
(Physical Medicine and Rehabilitation)
Ana-Maria losif, Ph.D. Associate Professor (Public Health Sciences)
Jiming Jiang, Ph.D., Professor (Statistics)
Philip Kass, M.P.V.M., D.V.M., Ph.D., Professor (Population Health and Reproduction)
Kyoungmi Kim, Ph.D. Associate Professor (Department of Public Health Sciences)
Sunny Kim, Ph.D., Associate Professor (Public Health Sciences)
Richard L. Kravitz, M.D., Professor (Internal Medicine)
Christine Kreuder-Johnson, Ph.D. Associate Professor (Wildlife Health Center)
Michele A. La Merrill, MPH, Ph.D., Assistant Professor (Environmental Toxicology)
Paul Leigh, Ph.D., Professor (Department of Public Health Sciences)
Chin-Shang Li, Ph.D., Professor
(Department of Public Health Sciences)
James Marcin, M.D., M.P.H, Professor (Pediatrics)
Beatriz Martinez Lopez, D.V.M., M.P.V.M., Ph.D., Assistant Professor (Medicine and Epidemiology)
Jonna Mazet, Professor, Ph.D. (Wildlife Health Center)
Stephen McCurdy, M.D., Professor
(Department of Public Health Sciences)
Joy Melnikow, M.D., M.P.H., Professor (Family and Community Medicine)
Diana L. Miglioretti, Ph.D., Professor (Public Health Sciences)
William Reisen, Ph.D., Professor (Center for Vectorborne Disease)
Lihong Qi, Ph.D., Associate Professor Department of Public Health Sciences)
David M. Rocke, Ph.D., Professor
(Department of Public Health Sciences)
Patrick Romano, M.D., M.P.H., Professor (Internal Medicine)
Joan Dean Rowe, M.P.V.M., D.V.M., Ph.D., Associate Professor (Population Health 'and Reproduction)
Christian Sandrock, M.D., M.P.H., Associate Professor (Internal Medicine)
Marc Schenker, M.D., Professor (Public Health Sciences)
Thomas Scott, Ph.D., Professor (Entomology)
Woutrina Smith, D.V.M., M.P.V.M., Ph.D., Associate Professor (Pathology, Microbiology and Immunology)
Christine Stewart, M.P.H, Ph.D., Assistant Professor (Department of Nutrition)
Robert Szabo, M.D., Professor (Orthopedic Surgery)

Daniel Tancredi, Ph.D., Assistant Professor (Pediatrics)
Xiaowei Yang, Ph.D., Assistant Professor (Department of Public Health Sciences)
Michael Ziccardi, Ph.D. (Wildlife Health Center)

## Emeriti Faculty

Robert Bondurant, D.V.M., Professor Emeritus James Case, D.V.M., Ph.D., Professor Emeritus
Nancy East, M.P.V.M., D.V.M., Professor Emeritus
Bruce Eldridge, Ph.D., Professor Emeritus
Neil Flynn, M.D., M.P.H., Professor Emeritus

Alvin Wiggins, Ph.D., Professor Emeritus
Graduate Study. The Graduate Group in Epidemiology offers programs of study and research leading to the M.S. and Ph.D. degrees. Areas of emphasis include environmental/occupational epidemiology; infectious disease epidemiology; zoonotic and vector-borne diseases; epidemiologic methods and biostatistics; health services and health economics; nutritional epidemiology; reproductive, perinatal, developmental and pediatric epidemiology; wildlife epidemiology; and social and behavioral epidemiology. For detailed information regarding the program, address the chairperson of the group or see the website.
Graduate Advisers. Janet Foley (Medicine and Epidemiology), Lihong Qi (Public Health Sciences), and William Reisen (Center for Vectorborne Diseases)

## Required Courses for the Program

Prerequisite Courses. Prerequisites may be taken concurrently with required courses below.
Mathematics 16A-16B or 21A-21B
Statistics 102, 106, and 108, or Preventive
Veterinary Medicine 402, 403
Required Courses. These courses are required of all students in the program; M.S. and Ph.D. degrees. These requirements cannot be waived and must be met before a student's Qualifying Examination.

Epidemiology 202, 203, 204, 205, 206,
207, 208 and 290
One course from: Population Health and
Reproduction 202 or Statistics 144
Relared Courses. For additional course work in Epidemiology, please see Medicine and Epidemiology, Preventive Veterinary Medicine, Population Health and Reproduction, Public Health Sciences, and Statistics.

## Courses in Epidemiology (EPI)

## Graduate

## 202. Quantitative Epidemiology I:

## Probability (5)

Lecture-4 hours; laboratory-2 hours. Prerequisite: Mathematics $16 \mathrm{~A} / \mathrm{B}$ or $17 \mathrm{~A} / \mathrm{B}$ or $21 \mathrm{~A} / \mathrm{B}$ or equiva lent; Statistics 102 and 108 or Population Health and Reproduction 402 and 403 or equivalent; concurrent or previous enrollment in a basic epidemiology course (e.g., course 205). Foundations in probability for epidemiologists. Emphasis on properties of and relationships between distributions and application of probability concepts to epidemiology. Includes a mathematical skills laboratory to assist in solution of epidemiologic problems.

## 203. Quantitative Epidemiology II: <br> Statistical Inference (4)

Lecture-3 hours; laboratory/discussion - 1 hour.
Prerequisite: course 202, or Statistics 130A, or
131A, or 133; basic course in Epidemiology (205 or equivalent). Provides the mathematical statistics foundation for statistical models, methods, and data analysis.

## 204. Quantitative Epidemiology III:

 Statistical Models (4)Lecture-3 hours; laboratory/discussion-1 hour. Prerequisite: course 203, or Statistics 130B, or 131B, or 133; Statistics 108 recommended; basic course in Epidemiology ( 205 or equivalent); consent of instructor. Introduces statistical models, methods, and data analysis in the areas of generalized linear model and survival analysis methodology.
204A. Foundation of Statistical Models, Methods, and Data Analysis for Scientists (4)

Lecture-3 hours; laboratory/discussion-1 hour. Prerequisite: Statistics 130A, or Statistics 131A, or Statistics 133, course 228 recommended. Provides the mathematical statistics foundation for statistical models, methods, and data analysis. - II. (II.) Bang
204B. Statistical Models, Methods, and Data Analysis for Scientists (4)
Lecture-3 hours; laboratory/discussion-1 hour. Prerequisite: course 204A; Statistics 108 recommended. Introduces statistical models, methods, and data analysis in the areas of generalized linear, survival, and correlated data methodology. - III. (III.) Li

## 205A. Principles of Epidemiology (4)

Lecture-4 hours. Prerequisite: Preventive Veterinary Medicine 402 or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Preventive Veterinary Medicine 405.)
206. Epidemiologic Study Design (4) Lecture-30 sessions; discussion-9 sessions; labo-ratory-2 sessions. Prerequisite: course 205 or consent of instructor. Builds on concepts presented in course 205. Concepts of epidemiologic study design-clinical trials, observational cohort studies, case control studies-introduced in course 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Preventive Veterinary Medicine 406A.) - Gold

## 207. Advanced Epidemiologic Methodology

 (4)Lecture/discussion-4 hours. Prerequisite: course 206. In-depth integration of advanced epidemiologic concepts, theory, methods, and applications for observational studies, including random and systematic error, confounding, causal inference, effect modification, internal and external validity, estimability and interpretation of effect measures, and advanced study designs. - Hertz-Picciotto, Kass
208. Analysis and Interpretation of

## Epidemiologic Data (3)

Lecture - 16 sessions; laboratory -21 sessions; project. Prerequisite: course 204 (may be taken concurrently) and 207, and either Statistics 144 or Population Health and Reproduction 202 and entry level skill in standard statistical software (e.g., SPSS, BMDP, SAS, Stata, MinTab, S-Plus). Application of theory and concepts of statistics and epidemiology to analysis and interpretation of data typically found in veterinary and human epidemiologic research.I. (I.) Beckett

## 220. Problems in Epidemiologic Study Design (4)

Lecture-3 hours; term paper. Prerequisite: Preventive Veterinary Medicine 405 and 406 or the equivalent; Population Health and Reproduction 207 concurrently; Statistics 102 and 106 or the equivalent. Design and development of research protocols and funding applications for peer review. Application of research methods data collection and management and statistical analysis in research
proposals. Methods of evaluating research proposals, mechanisms of funding, specifying human subjects considerations. - III. (III.) Gold

## 222. Epidemiological Modeling (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: Preventive Veterinary Medicine 405. Techniques of model building and simulation of infectious diseases will be explored. Epidemiologic modeling philosophy, construction and validation will be emphasized. Offered in alternate years.-II.

## 223. Spatial Epidemiology (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: Preventive Veterinary Medicine 405 or Environmental Studies 126 or Veterinary Medicine 409. Geographic Information Systems (GIS) and spatial statistics. Students are expected to complete a term project based on their graduate research. Offered in alternate years. -II.

## 224. Health and Ecological Risk Analysis

 (3)Lecture - 2 hours; laboratory -3 hours. Prerequisite: Preventive Veterinary Medicine 406 or consent of instructor; background in statistics, including multivariable techniques; a course in differential equations. A methodological approach to risk analysis for human and animal-related health and ecological issues. Basic principles of risk analysis, including perception, communication, assessment and management. Emphasis on the assessment of risk.-III. (III.)

## 225. Advanced Topics in Epidemiology Methods (2)

Discussion-2 hours. Prerequisite: courses 205B, 206, and 207 (or equivalents, with consent of instructor). An in-depth study of topics in epidemiology theory and methods, selected from: causal inference, confounding, study design, or other related areas, with year to year variation. Readings are assigned and students are expected to lead discussions on them. May be repeated for credit when topic differs. Offered irregularly. - III. Hertz-Picciotto

## 226. Methods for Longitudinal and

## Repeated Measurement Data (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: course 204 or consent of instructor. Mixed models for longitudinal data (LD)/repeated measurements; Mean and covariance models; General linear LD models; Random coefficients models; Linear mixed effects models for continuous outcome; Generalized linear mixed effects model for discrete outcome including binary, ordinal and count data.-l. (I.) Nguyen
229. Geographic Information Systems for Health Professionals (4)
Lecture-2 hours; laboratory - 6 hours. Emphasis on basic geographic and data management principles. Focus on software proficiency in application to analyzing/solving health-related problems. For graduate and professional students in epidemiology, public health, preventive veterinary medicine, health informatics with interest in spatial techniques in research. - III. (III.)
240. Principles of Injury Epidemiology (3) Lecture/discussion - 3 hours. Overview of the epidemiology of human injury, including general principles, surveillance methods, behavioral factors, environmental factors, treatment issues and engineering and legal interventions related to vehicular injuries, drownings, falls, fires and burns, poisonings, firearm injuries, and other intentional injuries.-II. (II.) Romano

## 250. Introduction to Clinical Research

 Design and Epidemiology (1)Lecture - 1 hour. Prerequisite: graduate standing or medical/nursing personnel. For medical personnel who are or will be involved in medical research.

Review of basics of clinical study design and analysis of clinical data. (S/U grading only.)-I. (I.) McCurdy, Romano

## 251. Environmental Epidemiology (3)

Lecture-3 hours. Prerequisite: Preventive Veterinary Medicine 405 (may be taken concurrently); upper division undergraduates who have completed Environmental Studies 126; or the equivalent. Examination of the human health effects and the risk of disease from community, occupational, and personal exposure to toxic substances. Offered in alternate years.-I. Schenker

## 252. Social Epidemiology (2)

Lecture/discussion-2 hours. Prerequisite: course 205A; consent of instructor. Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. (Same Course as Public Health Sciences 252.) - III. (III.)
260. Epidemiology of Chronic Diseases and Aging (3)
Lecture/discussion-3 hours. Overview of the epidemiology of chronic disease in old age. Topics include biology of aging, epidemiology of cardiovascular disease, neoplasms, osteoporosis and fractures, psychosocial factors and health in old age, dementias, functional status and prevention of disease. - II. (II.)

## 270. Research Methods in Occupational

 Epidemiology (3)Laboratory/discussion-3 hours. Prerequisite: Environmental Studies 126 or Preventive Veterinary Medicine 405; and Statistics 102 or Epidemiology and Preventive Medicine 402. Methods used in epidemiologic research on occupational hazards. Topics include design and analysis of cohort and case-control studies, sample size, measuring dose, choosing a control group, validation of employment and health data, interpreting negative studies, and analysis software. Offered in alternate years. - III.

## 272. Cancer Epidemiology (2)

Recitation-1 hour; discussion - 1 hour. Prerequisite: must have basic understanding of epidemiologic and statistical concepts that are covered in courses 205A, 205B, 206 (may be taken concurrently), and Statistics 102. We will cover the underlying concepts essential to understanding cancer epidemiology, such as trends in incidence and survival, epidemiologic methods used to assess cancer etiology, prevention and control, and an introduction to the cancerinitiation and progression multi-stage model. - II. (II.) Cress

## 290. Seminars in Epidemiology (1)

Seminar-1 hour. Students will actively participate in presentation and discussion of ongoing or published research projects in epidemiology. (S/U grading only.) - III. (III.)

## 291. Seminars in Human Health Services

Research and Clinical Epidemiology (1)
Seminar-1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as General Medicine 291.) (S/U grading only.) - I, II, III. (I, II, III.)
298. Group Study (1-5)

Seminar-1-5 hours. Group study in selected areas of epidemiology.

## 299. Research (1-12)

Research in selected areas of epidemiology. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Evolution and Ecology

## The Evolution, Ecology and Biodiversity Major Program

The major in Evolution, Ecology and Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.
The Program. The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology and Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives
within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.
Career Alternatives. A degree in Evolution, Ecology and Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter .............. 41-45
Biological Sciences 2A-2B-2C................ 15
Chemistry 2A-2B .................................. 10
Chemistry 8A-8B 10

Mathematics 17A-17B (17C recommended)
or 21A-21B (21C recommended) or Statistics
100 or 102 . 4-8
Physics 1A-1B. .. 6
Depth Subject Matter ............................... 36
Biological Sciences 101 .......................... 4
One course from: Evolution and Ecology 100;
Geology 107; Anthropology 151 ......... 3-4
One course from: Evolution and Ecology 101;
Environmental Science and Policy 100;
Wildlife, Fish, and Conservation Biology
151.
ional upper division course work in biological science to achieve a total of 36 or
more units. $\qquad$ 24-25
Include at least one course from each of the areas of study below.

## Areas of Study:

(1) Biodiversity: Entomology 103; Evolution and Ecology 105, 108, 112, 140; Microbiology 105; Nematology 110; Plant Biology 116, 148; Plant Sciences 147; Wildlife, Fish, and Conservation Biology 110, 111, 120, 134.
(2) Advanced Evolution and Ecology: Evolution and Ecology 102, 103, 104, 107, 115, 117, 119, 120, 131, 138, $141,147,149,150,161,180 \mathrm{~A}$ and 180B, 181.
Note: A maximum of four units of variable-unit courses (numbered 192, 198, 199) may be applied to upper division elective unit requirements. Courses numbered 197T are not applicable to the upper division elective unit requirement.
Total Units for the Major ................... 77-8 1
B.S. Major Requirements:

Depth Subject Matter ...............................
Biological Sciences 101, 105 (or 102+103),
104.............................................. 10-13

Evolution and Ecology 100, 101 ..................................................
Statistics 100, 102 or 130A-130B ........ 4-8
Additional upper division course work in biological science to achieve a total of 49 or more units, including at least a total of two units (6 hours per week) of laboratory or
fieldwork........................................ 20-27
Include at least one course from the
Biodiversity area of study and two courses
from the Advanced Evolution and Ecology areas of study below.

## Areas of Study:

(1) Biodiversity: Entomology 103;

Evolution and Ecology 105, 108, 112,
140; Microbiology 105; Nematology
110; Plant Biology 116, 148; Plant
Sciences 147; Wildlife, Fish, and
Conservation Biology 110, 111,120 , 134.
(2) Advanced Evolution and Ecology:

Evolution and Ecology 102, 103, 104
107, 115, 117, 119, 120, 131, 138,
$141,147,149,150,161,180 \mathrm{~A}$ and 180B, 181.
Note: A maximum of 4 units of variableunit courses (numbered 192, 198, 199)
may be applied to upper division elective unit requirements, but not to the upper division laboratory requirement. Courses numbered 197T are not applicable to the upper division elective unit requirement.
Total Units for the Major $\qquad$ 105-115

## Biological Sciences Electives

The following courses are acceptable toward the fulfillment of the upper division biological sciences requirement in the A.B. and B.S. major programs and may be selected without adviser approval. Other elective courses are approved on an individual basis by petition through an adviser.
Anatomy, Physiology and Cell Biology 100
Anthropology 151, 152, 153, 154A,
154BN, 154C, 154CL, 155, 156
Biological Sciences, all upper division courses
Chemistry 107A, 107B
Entomology, all upper division courses except 110
Environmental Science and Policy 110, 116,
121, 123, 150C, 151, 151L
Evolution and Ecology 190
Geology 107, 107L, 150C
Microbiology, all upper division courses
Molecular and Cellular Biology, all upper division courses
Nematology 110
Neurobiology, Physiology, and Behavior, all upper division courses
Nutrition 101, 111
Pathology, Microbiology, and Immunology
101, 126, 126L, 128
Philosophy 108
Plant Biology, all upper division courses
Psychology 121, 122, 127, 129
Wildlife, Fish, and Conservation Biology
120, 120L, 121

## Minor Program Requirements:

Evolution, Ecology and Biodiversity....... 18
Evolution and Ecology 100, 101 ............. 8
One course in Biodiversity .....................3-5
Entomology 103; Evolution and Ecology 105*, 108*, 112, 112L* $\ddagger, 114^{*}, 140^{*}$; Plant Biology 116*, 148*; Plant Sciences
147*; Wildllife, Fish and Conservation
Biology 110, 110L* $\ddagger, 111,111 L^{*} \ddagger, 120$,
120L* $\ddagger, 134,134 L^{*} \ddagger$; Microbiology 105,
105L* $\ddagger$; Nematology 110
Two courses in Advanced Ecology or
Evolution. .6-9
Evolution and Ecology 102, 103, 107,
$115,117^{*}, 119 *, 120,131,138,141$,
$147,149,150,161,180 A^{*}$ and $180 B^{*}$, 181
Laboratory or field course: At least one of the courses taken to fulfill these requirements must include a laboratory or field component.
*Appropriate courses from the above lists are indicated with an asterisk.

* $\ddagger$ These courses cannot be taken without the corresponding lecture course. Additional courses, if necessary, from above course lists to reach 18 units.

Major Advisers. Students transferring to UC Davis from another institution and majoring in Evolution, Ecology and Biodiversity must consult an adviser immediately upon matriculation so that their transfer credits can be applied to the major requirements. All new students in the major should contact the Biology Academic Success Center for adviser assignment. Substitutions of courses not on the above list for major requirements are arranged through the adviser.
Advising Center for the major is located at the Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC. Pre-professional students should establish contact with the Health Sciences Advising office in 111 South Hall, to learn what specific courses are required on their transcripts
Teaching Credential Subject Representative. Students planning for a teaching career should consult the School of Education in regard to preparation for certification; see the Teaching Credential/M.A. Program on page 115.

## Courses in Evolution and Ecology (EVE)

## Lower Division

## 2. Biodiversity (3)

Lecture-2 hours; lecture/discussion - 1 hour. Introduction to nature, scope and geographical distribution of biodiversity (the diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity-domestication, aesthetics, ethics and valuation. Species richness and "success." Biodiversity through time; monitoring, evaluation and conservation. Biomes-global, continental and Californian. (Same course as Entomology 2.) Offered irregularly. GE credit: SciEng, Wrt | SE, SL, WE.

## 10. Evolution for Non-Biologists (4)

Lecture-3 hours. Introduction to evolutionary biology for the general population. Offered in alternate years. GE credit: SciEng | QL, SE, SL. - (I.) Begun

## 11. Principles of Ecology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: elementary biology recommended. Ecological principles with emphasis on humans and their interactions with the environment; how humans affect and depend on natural ecosystems; the future of the Earth's biosphere. Offered irregularly. GE credit: SciEng | OL, SE, SL, WE.

## 12. Life in the Sea (3)

Lecture-3 hours. Diversity of life in the sea; adaptations to physical/chemical ocean environment; marine science research methods; utilization of living marine resources by humans; factors and processes that influence diversity of sea life, including humans. Limited enrollment. Offered in alternate years. GE credit: SciEng, Wrt \| SE, SL, WE. - III. Williams

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division standing; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Evolution and Ecology. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) - I, II, III. (II, II, III.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

## 99. Special Study for Lower Division

Students (1-5)
(P/NP grading only.) GE credit: SE.

## Upper Division

## 100. Introduction to Evolution (4)

Lecture - 3 hours; discussion - 1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; Biological Sciences 101; Mathematics 16A, 16B, 16 C or the equivalent; Statistics 13 or 100 (Statistics 100 recommended). A general survey of the origins of
biological diversity and evolutionary mechanisms. GE credit: SciEng | QL, SE, SL. -I, II, III. (I, II, III.) Begun, Coop

## 101. Introduction to Ecology (4)

Lecture-3 hours; lecture/discussion-1 hour. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; Mathematics 16A, 16B, 16C or the equivalent. A general survey of the principles of ecology. GE credit: SciEng | QL, SE, SL, VL. -I, II, III. (I, II, III.) Gaylord, Rejmanek, Schoener, Strong, Williams

101Q. Introduction to Computer Models in Ecology (1)
Autotutorial- 1.5 hours; extensive problem solving - 1.5 hours. Prerequisite: concurrent enrollment in course 101. Computational methods and mathematical models used to study ecological phenomena. Offered irregularly.
102. Population and Quantitative Genetics (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 101, and Statistics 100 or 102, and course 100. Evolution as caused by random mating, genetic drift, natural selection, inbreeding, migration, and mutation in theory and actuality. The resemblance between relatives and consequences of selection for quantitative traits. Application of these ideas to topics such as the evolution of sex. Offered in alternate years. GE credit: SciEng | SE. -I. Langley

## 103. Phylogeny, Speciation and

Macroevolution (4)
Lecture-3 hours; laboratory/discussion-3 hours. Prerequisite: course 100. Statistical inference of evolutionary patterns and processes above the species level. Topics include estimation of phylogenies and divergence times, character evolution, biogeographic history, and rates and patterns of lineage diversification, with an emphasis on the origin of species. Offered in alternate years. GE credit: SciEng | QL, SE, SL. - (II.) Moore, Turelli

## 104. Community Ecology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 101 or Environmental Science and Policy 100. Population growth and density dependence; predation; exploitative, interference and apparent competition; coexistence mechanisms; niches, spatial and temporal variation; stability, diversity, and productivity of food webs; applications to conservation and biological control. Emphasis on quantitative understanding through models, concepts, and empirical evidence. GE credit: SciEng \| SE, SL, VL.

## 105. Phylogenetic Analysis of Vertebrate

 Structure (4)Lecture-2 hours; laboratory-6 hours. Prerequisite: Biological Sciences 1A and 1B, or 2B and 2C. The structure of the classes and subclasses of vertebrates is described and interpreted in terms of phylogeny. Offered in alternate years. GE credit:

## SciEng | SE.-II. Wainwright

106. Mechanical Design in Organisms (3) Lecture-2 hours; discussion - 1 hour; laboratory - 3 hours; fieldwork -3 hours. Prerequisite: upper division standing or consent of instructor; introductory animal biology (Biological Sciences 1 B or 2 B ), invertebrate zoology (course 112), and/or ecology (course 101) are recommended; residence at or near Bodega Marine Lab required. Student must complete the application available at http:// www.bml.ucdavis.edu. Explores fundamental principles in the form and function of organisms, examining how basic properties of size, shape, structure, and habitat constrain ways in which plants and animals interact and cope with their physical surroundings. Offered in alternate years. GE credit:
SciEng | QL, SE, VL, WE.-IV. Gaylord

## 107. Animal Communication (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Biological Sciences 2B. How animals use songs, dances, colors, chemicals, electricity and vibrations to communicate. Mechanisms of signal production and detection (sensory systems), theory of information transfer and signal design, and the role of natu-
ral selection in shaping communication. Offered in alternate years. GE credit: SciEng \| QL, SE, VL. - (I.) Patricelli

## 108. Systematics and Evolution of Angiosperms (5)

Lecture-3 hours; laboratory-6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as Plant Biology 108.) GE credit: SciEng. - III. Doyle 110. Running, Swimming and Flying (3) Lecture-2 hours; discussion - 1 hour; laboratory - 3 hours; fieldwork -3 hours. Prerequisite: upper division standing or consent of instructor; introductory animal biology (Biological Sciences 1 B or 2 B ), invertebrate zoology (course 112), and/or ecology (course 101) are recommended; residence at or near Bodega Marine Lab required. Student must complete the application available at http:// www.bml.ucdavis.edu. Examines the bases of organism movement in terrestrial, aquatic, and aerial environments, emphasizing both the unifying principles underlying locomotion, as well as a range of strategies employed across diverse groups of organisms. Offered irregularly. GE credit: SciEng | QL, SE, VL, WE. - Gaylord
111. Marine Environmental Issues (1)

Discussion-1 hour; seminar-2 hours. Prerequisite: upper division standing or consent of instructor; concurrent enrollment in at least one course from Environmental Science and Policy 124, 152, course 106, 110, 114; residence at or near Bodega Marine Laboratory required. Student must complete the application available at http:// www.bml.ucdavis.edu. An examination of critical environmental issues occurring in coastal waters. Course links together material from concurrent courses at BML to develop an integrative understanding of marine environments and their conservation. Includes readings, group discussions, and interaction with visiting speakers. May be repeated two times for credit. (Same course as Environmental Science and Policy 111.) GE credit: SciEng | SE, SL.III, IV. (III, IV.) Gaylord, Largier, Morgan, Sanford

## 112. Biology of Invertebrates (3)

Lecture-3 hours. Prerequisite: Biological Sciences $1 B$, or $2 B$ and $2 C$; courses in systematics, ecology, and evolution recommended. Survey of the invertebrate phyla, emphasizing aquatic forms, and focusing on morphology, development, natural history, ecology, and phylogenetic relationships. Limited enrollment. Offered in alternate years. - (II.) Grosberg, Sanford
112L. Biology of Invertebrates Laboratory (2)

Laboratory-6 hours. Prerequisite: Biological Sciences 1 B , or 2 B and 2 C ; course 112 concurrently. Field and laboratory experience with representative members of the major invertebrate phyla discussed in course 112. Emphasis on comparative morphology, natural history, ecology, and behavior of living invertebrates. Two field trips required. Offered in alternate years. - (II.) Grosberg, Sanford
114. Experimental Invertebrate Biology (3) Lecture-2 hours; discussion - 1 hour; laboratory-3 hours; fieldwork-3 hours. Prerequisite: upper division standing or consent of instructor; introductory cell, animal and plant biology (Biological Sciences 1A, 1B and 1C), invertebrate zoology (Evolution and Ecology 112), ecology (Evolution and Ecology 101), and/or evolution (Evolution and Ecology 100) are recommended; residence at or near Bodega Marine Lab required. Student must complete the application available at http:// www.bml.ucdavis.edu. The biology, ecology, and evolution of local marine invertebrates with a focus on adaptations to environmental and biological factors encountered on the California coast. Hands-on field and laboratory learning with an emphasis on generating and testing hypotheses. GE credit: SciEng | QL, SE, VL, WE.-IV. (IV.) Sanford

[^1]115. Marine Ecology (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 101 or Environmental Science and Policy 100 or Biological Sciences 2B, or consent of instructor. Processes affecting the distribution, abundance, and diversity of plant and animal life in the sea. Introduction to marine habitat diversity and human impacts on marine ecosystems. Offered in alternate years. GE credit: SciEng \| SE, SL, VL, WE.-II. Stachowicz

## 117. Plant Ecology (4)

Lecture-3 hours; fieldwork-3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; Plant Biology 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as Plant Biology 117.)-I.

## (I.) Latimer, Rejmanek

## 119. Population Biology of Invasive Plants and Weeds (3)

Lecture-2 hours; laboratory - 3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; introductory statistics recommended. Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. (Same course as Plant Biology 119.) GE credit: SciEng | SE.-III. (III.) Rejmanek

## 120. Global Change Ecology (3)

Lecture/discussion - 3 hours. Prerequisite: course 100 and 101 or equivalents. Treatment of historical evolution of the biosphere resulting from physical, chemical, and biological influences. Special focus upon changes caused by humans. Topics pertain to biodiversity, resources, conservation, and ecosystem services. - (II.) Strong

## 131. Human Genetic Variation and Evolution (3)

Lecture-3 hours. Prerequisite: Biological Sciences 1B or 2B. Introduction to genome-wide nucleotide sequence variation in human populations and computational methods for its analysis. Topics to include forensics, disease gene mapping, and studies of human evolutionary history. Misuses, such as eugenics, and ethical/legal issues will be discussed. Offered in alternate years. - II. Rannala

## 138. Ecology of Tropical Latitudes (5)

Lecture-3 hours; discussion-1 hour; extensive writing. Prerequisite: one course in Biological Sciences, Entomology, Wildlife, Fish, and Conservation Biology, Geography, or tropical experience, or consent of instructor. Biological, physical, and human-related aspects of the ecology of low latitudes. Distribution, numbers, and relationships of tropical organisms. Problems of development and conservation in the context of ecological and evolutionary theory. Offered in alternate years. GE credit: SciEng,

## Wrt \| SE, SL, WE. - III. Shapiro

## 140. Paleobotany (4)

Lecture -3 hours; laboratory -3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C. Introduction to plant fossil record, beginning with invasion of land in the Silurian, emphasizing origin and evolution of major groups and adaptations and changing composition and distribution of floras in relation to plate tectonics and climatic change.Doyle

## 141. Principles of Systematics (3)

Lecture-2 hours; independent study. Prerequisite: Biological Sciences 1B or 1C or 2B; course 100 recommended. Historical background, philosophical rationale, contemporary approaches, and working rules of biosystematics, including International Code of Zoological Nomenclature. Offered in alternate years. GE credit: SciEng, Wrt \| OL, QL, SE, SL, VL, WE. - (III.) Shapiro

## 147. Biogeography (4)

Lecture -3 hours; term paper. Prerequisite: Biological Sciences 1A and 1B, or 2B. Movements of terrestrial organisms. The role of geologic, climatic, and biologic changes in the geographic distribution of organisms. Offered in alternate years. GE credit: SciEng | QL, SE, SL, VL, WE. - (I.) Shapiro
149. Evolution of Ecological Systems (4) Lecture-3 hours; term paper. Prerequisite: course 101 or Environmental Studies 100 (or the equivalent), and course 100 (or the equivalent). Evolution as an organizing force in natural communities. Coadaptation in trophic and competitive relationships. Ecology of polymorphisms, clines, and speciation. Offered in alternate years. GE credit: SciEng | SE, SL, WE. -I. Shapiro
150. Evolution of Animal Development (3) Lecture-3 hours. Prerequisite: Biological Sciences 101; and course 100 (may be waived for graduate students with consent of instructor). Comparative analysis of animal development and the genetic basis of morphological diversification. Offered in alternate years. GE credit: SE, WE. -II. Kopp
161. Microbial Phylogenomics-Genomic Perspectives on the Diversity and

## Diversification of Microbes (3)

Lecture-3 hours. Prerequisite: Biological Sciences $2 \mathrm{~A}, 2 \mathrm{~B}$, and 2 C or equivalent. Use of DNA and genomic sequencing in studies of the diversity of microorganisms. Diversity of microbes, phylogenetics, genome sequencing, comparative genomics, phylogenomics, lateral gene transfer, molecular ecology, metagenomics, and studies of the human microbiome. Offered in alternate years. GE credit: SciEng | SE. - (II.) Eisen

## 175. Computational Genetics (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: Biological Sciences 101 and Statistics 100 or 102. The use of computers to solve problems in genetics and evolution. Introduction to a general purpose computer language (Python), computational statistical methods, and applications such as QTL mapping, linkage detection, estimation of rates of evolution, and gene finding. Offered irregularly.
180A. Experimental Ecology and Evolution in the Field (4)
Lecture/laboratory-3 hours; fieldwork-3 hours. Prerequisite: course 100; course 101, or Environmental Science and Policy 100; Entomology 105. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as Entomology 180A.) Offered in alternate years. (Deferred grading only, pending completion of sequence.) GE credit:
SciEng | QL, SE, VL. - III) Yang
180B. Experimental Ecology and Evolution in the Field (4)
Lecture/laboratory-3 hours; fieldwork-3 hours. Prerequisite: Evolution and Ecology or Entomology 180A; course 100; course 101 or Environmental Science and Policy 100; Entomology 105. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as Entomology 180B.) Offered in alternate years. (Deferred grading only, pending completion of sequence.) GE credit:
SciEng | QL, SE, VL WE.-III.Yang

## 181. Ecology and Evolution of Animal-Plant <br> Interactions (4)

Lecture- 1.5 hours; lecture/discussion - 1.5 hours; term paper; extensive writing or discussion. Prerequisite: Biological Sciences $2 B$ and $2 C$ required; Biological Sciences 2C may be taken concurrently. Animal adaptations for eating plants, pollinating flowers, dispersing seeds. Plant adaptations to herbivore defense, attraction of mutualists; role of coevolutionary arms race, mutualists and cheaters in plant/animal speciation. Exploration through lec-
tures, original scientific literature, discussions and term paper. Offered in alternate years. GE credit: SciEng | OL, QL, SE, SL, WE.-I. Strauss

## 189. Introduction to Biological Research (1)

Discussion-1 hour. Prerequisite: upper division standing in Evolution and Ecology or related biological science; consent of instructor. Introduction to research methods in biology. Presentation and discussion of research by faculty, graduate, and undergraduate students. May be repeated for credit up to a total of 6 units. (P/NP grading only.) GE

## credit: SE. -I, II, III. (I, II, III.)

## 190. Undergraduate Seminar (2)

Seminar-2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: SE.-I. (I.) Shapiro

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Evolution and Ecology. Internships supervised by a member of the faculty. (P/NP grading only.)

## 194HA-194HB-194HC. Research Honors

Laboratory-6 hours. Prerequisite: Students who have completed 135 units and qualify for the honors program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty adviser. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, WE.

## 197T. Tutoring in Biological Sciences 2B

(1-2)
Tutorial-3-6 hours. Prerequisite: Biological Sciences $1 B$ or Biological Sciences $2 B$ with a grade of $B$ or better. Assisting the instructor by tutoring students in a Biological Sciences 2B laboratory. Tutoring is voluntary and is supervised by a Laboratory Teaching Assistant and the Biological Sciences 2B Laboratory Coordinator. May be repeated three times for credit. (P/NP grading only.) GE credit: SE.
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced

## Undergraduates (1-5)

(P/NP grading only.) GE credit: SE.-I, II, III. (I, II, III.)

## Graduate

210. Molecular Phylogenetic Analysis (3)

Lecture-2 hours; laboratory - 3 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as Nematology 210.) Offered irregu-larly.-Nadler

## 211 . Applied Phylogenetics (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: course 103 or 210 or Population Biology 200C or the equivalent, graduate standing. Applications of phylogenetic methods to fields outside of systematics. Core lectures/labs in remedial phylogenetics, phylogeography, conservation and comparative morphology. Special topics vary yearly. May be repeated one time for credit. - II. (II.) Moore, Wain-

## wright

220. Species and Speciation (3)

Lecture-2 hours; discussion - 1 hour. Prerequisite: course 100, Philosophy 108 or the equivalent; History and Philosophy of Science 130B recommended. Current status of species concepts, models of specia-
tion, current research on speciation, and relevance of species to conservation biology. Offered in alternate years.-II. Shapiro

## 231. Principles of Biological Data Analysis

 (3)Lecture-2 hours; laboratory-3 hours. Introduction to the principles of data analysis, experimental design, statistical modeling, inference, and hypothesis tests. Statistical methods of particular importance in biological applications will be emphasized. Examples will be presented from the fields of ecology and evolutionary genetics. Offered irregularly. (S/U grading only.)-Rannala

## 240. Paleobotany and Angiosperm

## Evolution (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Plant Biology 108, 116, or course 140. Critical analysis of the plant fossil record as a source of evidence on origin, evolution, and phylogeny of the angio-sperms, Cretaceous and Tertiary climates, geographic history of modern taxa, and origin of modern vegetation types. Offered irregularly.Doyle

## 290C. Research Conference (1)

Discussion-1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discussion of faculty and graduate student research in biology. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)
298. Group Study (1-5)
(S/U grading only.)
299. Research (1-12)
(S/U grading only.)

## Professional

390. Methods of Teaching (2)

Lecture-1 hour; discussion-1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching. Includes analyses of texts and supporting material, discussion of teaching techniques and preparing and conducting of laboratory and discussion sections. May be repeated for credit for a maximum of 8 units. (S/U grading only.) -I, II, III. (I, II, III.)

## Exercise Biology

See Neurobiology, Physiology, and Behavior, on page 443.

## Family and Community Medicine

See Medicine, School of, on page 396.

## Feminist Theory and Research

## Maxine Craig Ph.D., Advisor

Program Office. 2222 Hart Hall
530-752-6429;
http://wms.ucdavis.edu/wgssite/
Graduate Study. The Gender, Sexuality and
Women's Studies Program at UC Davis offers a Designated Emphasis in Feminist Theory \& Research. Currently graduate students in the following fourteen affiliated Ph.D. programs are eligible to participate: Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, Geogra-
phy, History, Native American Studies, Performance Studies, Psychology, Sociology, and Spanish.
The Designated Emphasis in Feminist Theory and Research affords graduate students in affiliated programs the opportunity to augment their Ph.D. in a given discipline with a specialization Feminist Theory and Research. Typically a doctoral student in good standing may seek admission to the Designated Emphasis in Feminist Theory and Research and enroll in Designated Emphasis in Feminist Theory and Research courses. Those students in affiliated Ph.D. programs who complete the requirements of the Designated Emphasis will have this noted on their transcripts and their a Ph.D. diploma will note the "Special Emphasis in Feminist Theory \& Research."
Students must complete all the requirements for the Ph.D. in their home department. The requirements for the Designated Emphasis in Feminist Theory and Research are the successful completion of the two core courses, Women's Studies 200A and Women's Studies 200B, and two additional courses focusing on women and gender, one in the student's home department and one outside their home department. A member of the DE affiliated faculty must be a member of the student's qualifying examination. Analysis of gender is expected to be a central component of both the student's qualifying examination and doctoral research.
Students should consult with the Chair of the Designated Emphasis in Feminist Theory and Research before enrolling in a graduate course for which they wish to receive credit to ensure that it will count toward fulfilling the requirements of the Designated Emphasis. If possible, please bring a copy of the syllabus or an expanded course description to your meeting.
Graduate Adviser. Contact Maxine Craig in 1101 Hart Hall 530-752-2-6429; mbcraig@ucdavis.edu.

## Fiber and Polymer Science

(College of Agricultural and Environmental Sciences)
Faculty. See under Textiles and Clothing, on page 525.

## The Major Program

The Fiber and Polymer Science major is concerned with the physical, chemical, and structural properties of fibers and polymers and how these relate to fiber and polymer performance and end-use.
The Program. All students in this major take a common core of course work in chemistry, physics, and mathematics, and depth subject matter in fiber and polymer science, organic and physical chemis try, and technical writing. In the restricted electives, students select courses from areas such as computer science and mathematics, chemistry, marketing and management, material and advanced fiber and polymer science, and textiles.
Career Alternatives. The major prepares the student for a career in a wide range of industries in the areas of research and development, technical marketing and management, production, quality control, and science teaching (on completion of an additional year in the teaching credential program). The companies employing Fiber and Polymer Science graduates are in the fiber, polymer, industrial product, textile and/or chemical business. Graduates are prepared to enter the graduate program in textiles or agricultural and environmental chemistry with a specialization in fiber and polymer chemistry, and fiber and polymer science programs at other universities.
B.S. Major Requirements:

UNITS

Preparatory Subject Matter
Chemistry 2A-2B-2C
Computer Science Engineering 15 or $30 \ldots 4$
Mathematics 16A-16B-16C or 21A-21B-
21C................................................9-12
Physics 7A-7B-7C or 9A-9B-9C............... 12
Statistics 13 or Plant Sciences 120............. 4
Textiles and Clothing 6 and 8 or
Engineering 45
Depth Subject Matter .........................37-39
Textiles and Clothing 163, 163L............... 4
Fiber and Polymer Science 100, 150, 161,
161L, 180A, 180B
Chemistry 128A, 128B, 128C, 129A,
129B, 110A and 110C or 107A and
107B.
19-21

## Restricted Electives

 30Select courses from the following: Computer Science and Mathematics: Plant Sciences 21; Applied Science Engineering 115, 116; Mathematics 22A, 22B Chemistry: Chemistry 108, 115, 120, 121, 124A, 124B, 124C, 131, 140 Marketing/Management: Agricultural and Resource Economics 100A, 100B, 113, 136, 157, Economics 1A, 1B, Statistics 103
Material and Advanced Fiber/Polymer Science: Aeronautical Science Engineering 137, Engineering 104, 104L, Textiles and Clothing 250A-F, 290, 293 Textiles: Textiles and Clothing 162, 162L, 164, 165, 173, 174
Total Units for the Degree. 119-124
Major Adviser. Y. L. Hsieh (Textiles and Clothing)
Advising Center for the major is located in 129B Everson Hall 530-754-8368.

## Minor Program Requirements:

Fiber and Polymer Science ..................... 18
Textiles and Clothing 6 or Engineering 45 ..
Courses selected from the following: Fiber and Polymer Science 100, 150, 161, 161L, 180A and 180B; and Textiles and Clothing 163 and 163L
.14
Minor Adviser. Y. L. Hsieh
Courses in Fiber and Polymer Science (FPS)
Upper Division
100. Principles of Polymer Materials Science (3)
Lecture-3 hours. Prerequisite: Chemistry 2A-2B; Chemistry 8A-8B or Engineering 45; introductory physics. The basic principles of polymer science are presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as Materials Science Engineering 147.) GE credit: SciEng | QL, SE. - II. (II.) Pan
110. Plastics in Society and the Environment (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: Chemistry 10 or introductory course in physical sciences. Basic concepts and methodologies in the study of plastics. Formation, classification, structure, properties, processing, and formulation. Their application to societal needs, and their impact on society and the environment. GE credit: SciEng or SocSci, Wrt \| SE, SL, SS, WE.
150. Polymer Syntheses and Reactions (3) Lecture-3 hours. Prerequisite: Chemistry 128B or 8B, and Chemistry 107A. Organic and physical chemistry aspects of polymer syntheses and reactions including polymerization mechanisms, kinetics
and thermodynamics for major types of organic high polymers. GE credit: SciEng | OL, QL, SE, SL, VL, WE. - III. (III.) Hsieh
161. Structure and Properties of Fibers (3) Lecture-3 hours. Prerequisite: Textiles and Clothing 6 and Chemistry 8B. The structure, properties and reactions of natural- and man-made fibers; the relations between molecular structure of fibers and their physical properties; interactions of fibers and detergents. GE credit: SciEng | OL, QL, SE, SL, VL, WE. -I. (I.) Hsieh

## 161L. Textile Chemical Analysis Laboratory

 (1)Laboratory-3 hours. Prerequisite: course 161 (may be taken concurrently). Laboratory methods and procedures employed in qualitative and quantitative analysis of textile fibers and auxiliaries. SciEng | GE credit: OL, QL, SE, SL, VL, WE.-I. (I.) Hsieh
180A-180B. Introduction to Research in Fiber and Polymer Science (2)
Laboratory/discussion-6 hours. Prerequisite: senior standing in major related to Fiber and Polymer Science, and consent of instructor. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | QL, SE, VL, WE. - I, II, III. (I, II, III.)

## 192. Internship in Fiber and Polymer Science (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Work experience off campus in a fiber and polymer science related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.)
197T. Tutoring in Fiber and Polymer Science (1-5)
Tutorial-3-15 hours. Prerequisite: upper division fiber and polymer science related major and consent of instructor. Tutoring of students in Fiber and Polymer Science courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring in another Fiber and Polymer Science course. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

## Graduate

250A-F. Special Topics in Polymer and Fiber Science (3)
Lecture-3 hours. Prerequisite: Fiber and Polymer Science 100 or consent of instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as Materials Science and Engineering 250AF.) - I, III. (I, III.) Hsieh, Pan, Sun
299. Research (1-12)

Independent study-3-36 hours. (S/U grading only.)
Professional
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) $-\mathrm{I}, \mathrm{II}$, III. (I, II, III.)

## Film Studies

See Cinema and Technocultural Studies, on page 195.

## First-Year Seminar Program

Formerly Freshman Seminar Program Christopher J. Thaiss, Ph.D., Program Director
Program Office. 1350 Surge III (Center for Excellence in Teaching and Learning); cet@ucdavis.edu; http://cetl.ucdavis.edu/courses-and-events/ first-year-seminars/

## Committee in Charge

Amy Clarke, Ph.D. (University Writing Program) Haruko Sakakibara, Ph.D.
(East Asian Languages \& Cultures) Yuuko Uchikoshi, Ph.D. (School of Education) W. Jeffrey Weidner, Ph.D.
(Neurobiology, Physiology and Behavior)

## Courses in First-Year Seminar (FRS)

Questions pertaining to the following course should be directed to the instructor or to the Center for Excellence in Teaching and Learning.

## Lower Division

## 1. First-Year Seminar (1)

Seminar-1 hour. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topic differs.-I, II, III. (I, II, III.)

## 2. First-Year Seminar (2)

Seminar-2 hours. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topic differs. - I, II, III. (I, II, III.)

## 3. First-Year Seminar (1)

Seminar-1 hour. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topic differs. (P/NP grading only.) -I, II, III. (I, II, III.)

## 4. First-Year Seminar (2)

Seminar-2 hours. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more
than one in any given quarter. May be repeated for credit if topic differs. (P/NP grading only.) -I, II, III. (I, II, III.)

## Fisheries

See Animal Science, on page 153;
Biological and Agricultural Engineering, on page 179; and Wildlife, Fish, and Conservation Biology, on page 544.

## Food Science

(College of Agricultural and Environmental Sciences)

## The Major Program

Food science is a discipline in which biological, physical, and sensory sciences are integrated for the study of foods to ensure their safety, quality, and healthful properties. The food science curriculum encompasses food chemistry and biochemistry, food safety and microbiology, food processing and preservation, and sensory and consumer sciences.
Career Alternatives. Opportunities for employment include positions in the food and allied industries, government agencies, and educational and research institutions. Graduate study for the food science student may lead to the M.S. or Ph.D. degree in food science, or in related fields such as agricultural chemistry, biochemistry, microbiology, and nutrition.

## B.S. Major Requirements:

Preparatory Subject Matter.................... 61
University Writing Program 102F, 104A, or
104E................................................... 4
Communication 1 ................................... 4
Mathematics 16A-16B-16C...................... 9
Biological Sciences 2A........................... 5
Chemistry 2A-2B-2C; 8A, 8B (or more
advanced series). 21
Physics 7A-7B-7C................................. 12
Food Science and Technology 50 ............ 3
Nutrition 10 (or approved substitute) ........ 3
Depth Subject Matter .............................. 49
Biological Sciences 102, 103 ................. 6
Statistics 100 ........................................ 4
Microbiology 101................................... 5
Food Science and Technology 100A, 100B,
101A, 101B, 103, 104, 104L, 110, 110 L
190.
.30
Food Science and Technology 117 or
Statistics 106 .4
Food Science and Technology 127 or 107.

## Select one of the following five options: <br> \section*{Food Science Option}

The Food Science option provides a broad exposure to food chemistry, food microbiology and food processing. Students find positions in quality assurance, product development, and food processing in the food industry.

## Restricted Electives for the Food Science option

The restricted electives can:
(1) Provide a broad exposure to students who would seek positions in quality assurance, product development, and processing in the food industry
(2) Prepare students for graduate study in food science or related programs,
(3) Prepare students for professional school in
the health sciences. Select courses from a
master list, which is available from the advising center for the major.

## Brewing Science Option

The Brewing Science option prepares students for careers in production or quality assurance within the brewing industry or other food fermentation industries (e.g., other alcoholic beverages, vinegar and cheese). The option also prepares students for graduate study in food science or related programs, and exposes the students to diverse topics, including chemistry, biochemistry, microbiology and processing.

## Specific course requirements.

$\qquad$ 18
Food Science and Technology 102A, 102B 109, 123.

18
Selected additional courses. $\qquad$
from the department Advising Center

## Total Units for the Degree . <br> $\qquad$ 132

Major Adviser. A.E. Mitchell (Food Science and Technology)
Advising Center for the major is located in 1208 RMI South Building 530-754-8368.
Graduate Study. A program of study and research leading to the M.S. and Ph.D. degrees in Food Science is available (see below). For further information on graduate study, contact the graduate adviser.

## Food Science (A Graduate Group)

Gary M. Smith, Ph.D., Chairperson of the Group
Group Office. 1204 RMI South Building
530-752-8035; Fax 530-752-0382;
http://www.foodscience.ucdavis.edu
Faculty. Includes members from twelve departments in the Colleges of Agricultural and Environmental Sciences and Engineering, and the Schools of Medicine and Veterinary Medicine.
Graduate Study. The interdepartmental Graduate Group in Food Science offers programs of study leading to the M.S. degree and to the Ph.D. degree. Graduate studies stress the application of the biological, chemical, physical, and behavioral sciences to the processing, preservation, quality evaluation, public health aspects, and utilization of foods. For the M.S. degree, there are four areas of specialization: chemistry-biochemistry, microbiology, engineer-ing-technology and sensory science. Individually designed programs are also acceptable. For the Ph.D., there are four areas of emphasis: biochemistry, chemistry, microbiology/fermentation, and sensory science. Detailed information regarding graduate study is available through the Group Chairperson or the Group office.
Graduate Advisers. Contact the Food Science Graduate Group office at jlblevins@ucdavis.edu.

## Food Science and Technology

(College of Agricultural and Environmental Sciences)
Michael J. McCarthy, Ph.D., Chairperson of the Department
Department Office. 1136 RMI North Building 530-752-1482; http://foodscience.ucdavis.edu

## Faculty

Charles W. Bamforth, Ph.D. D.Sc., Distinguished Professor
Daniela Barile, Ph.D., Assistant Professor

Charlotte Biltekoff, Ph.D., Assistant Professor (Food Science and Technology, American Studies)
Stephanie R. Dungan, Ph.D., Professor
(Food Science and Technology, Chemical Engineering and Materials Science)
J. Bruce German, Ph.D., Professor

Jean-Xavier Guinard, Ph.D., Professor
Maria L. Marco, Ph.D., Assistant Professor
Kathryn L. McCarthy, Ph.D., Professor
(Food Science and Technology, Biological and Agricultural Engineering)
Michael J. McCarthy, Ph.D., Professor
(Food Science and Technology, Biological and
Agricultural Engineering)
David A. Mills, Ph.D., Professor
(Food Science and Technology, Viticulture and Enology)
Alyson Mitchell, Ph.D., Professor
Nitin N. Nitin, Ph.D., Assistant Professor
(Food Science and Technology, Biological and Agricultural Engineering)
Michael A. O'Mahony, Ph.D., Professor
Robert Powell, Ph.D., Professor
(Food Science and Technology, Chemical
Engineering and Materials Science)
Moshe Rosenberg, Ph.D., Professor and Specialist in Cooperative Extension
Charles F. Shoemaker, Ph.D., Professor
Christopher Simmons, Ph.D., Assistant Professor
R. Paul Singh, Ph.D., Distinguished Professor (Food Science and Technology, Biological and Agricultural Engineering)
Carolyn L. Slupsky, Ph.D., Associate Professor (Food Science and Technology, Nutrition)
Gary M. Smith, Ph.D., Professor
Glenn M. Young, Ph.D., Professor

## Emeriti Faculty

Everett Bandman, Ph.D., Professor Emeritus
Ericka L. Barrett, Ph.D., Professor Emeritus
John C. Bruhn, Ph.D., Specialist in Cooperative
Extension Emeritus
Dieter W. Gruenwedel, Ph.D., Professor Emeritus
Norman F. Haard, Ph.D., Professor Emeritus
Jerald M. Henderson, D.Engr., Professor Emeritus
Walter G. Jennings, Ph.D., Professor Emeritus John M. Krochta, Ph.D., Professor Emeritus
(Food Science and Technology, Biological and Agricultural Engineering)
Michael J. Lewis, Ph.D., Professor Emeritus Academic Senate Distinguished Teaching Award R. Larry Merson, Ph.D., Professor Emeritus David M. Ogrydziak, Ph.D., Professor Emeritus Chester W. Price, Ph.D., Professor Emeritus David S. Reid, Ph.D., Professor Emeritus
Gerald F. Russell, Ph.D., Senior Lecturer Emeritus Barbara O. Schneeman, Ph.D., Professor Emeritus
(Food Science and Technology, Internal
Medicine, Nutrition)
Howard G. Schutz, Ph.D., Professor Emeritus
Charles F. Shoemaker, Ph.D., Professor Emeritus
Lloyd M. Smith, Ph.D., Professor Emeritus
Aloys L. Tappel, Ph.D., Professor Emeritus
John R. Whitaker, Ph.D., Professor Emeritus
Major Program and Graduate Study. See the major in Food Science, on page 312; and for gradvate study, see Graduate Studies, on page 111.
Related Courses. See courses in Consumer Science, Engineering, Molecular and Cellular Biology, Nutrition, Viticulture and Enology, Environmental Toxicology, Population Health and Reproduction, and Plant Biology.

## Courses in Food Science and <br> Technology (FST) <br> Lower Division

## 1. Principles of Food Science (3)

Lecture-2 hours; discussion-1 hour. Food science fundamentals. Fresh and processed food technologies; world food problems; food composition; food microbiological and toxicological safety; food laws; evaluation of acceptability and nutritional value. Not
open for credit to students who have completed any Food Science and Technology course except course 10. GE credit: SciEng | SE, VL.-II. (II.)

## 3. Introduction to Brewing and Beer (3)

Lecture-3 hours. Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. GE credit: SciEng | SE, SL. -I, II, III. (I, II, III.) Bamforth
10. Food Science, Folklore and Health (3) Lecture-3 hours. Ancient and modern food folklore in relation to health and well-being. Food safety, organic food, herbalism, food preservation, and nutritional enhancement. Not open for credit to students who have completed course 2. GE credit: SciEng or SocSci | SE, SL, SS, VL, WC.-I, II, III. II, II, III.) Smith, Young

## 47. Food Product Development Field Study

 (1)Discussion - 6 hours; fieldwork-2 days (course given between winter and spring quarters). Prerequisite: advance enrollment required in winter quarter with instructor; background knowledge in foods from such courses as Food Science and Technology 1. Commercial aspects of the large-scale development, distribution, and evaluation of food products intended for human consumption. (Former course Consumer Science 47.) (P/NP grading only.) GE credit: SE.
50. Introduction to Food Preservation (3) Lecture-2 hours; laboratory-2 hours. Prerequisite: Chemistry 2A, Biological Sciences 2A, Statistics 13. Restricted to Food Science Majors. Introduction to modes of fresh food preservation including use of chemicals and microbes, heat and energy, control of water and atmosphere, and by indirect approaches such as packaging, hygienic design and sanitation. GE credit: SciEng | QL, SE.-I. (I.) McCarthy
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

100A. Food Chemistry (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: Chemistry 8B; Biological Sciences 1A recommended. Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water. GE credit:
SciEng | SE, VL.-I. (I.) Dungan

## 100B. Food Properties (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 100A or consent of instructor. Sensory quality, chemical and microbial safety, and nutritional properties of foods. Effects of food processing and preparation on these properties. Selected properties of food commodities. GE credit: SciEng | QL, SE, VL. - II. (II.) German
101 A. Food Chemistry Laboratory (2) Lecture/laboratory - 4 hours. Prerequisite: course 100A (may be taken concurrently). Chemical aspects of food composition described in course 100A. GE credit: QL, SE, VL, WE.-I. (I.) Slupsky
101B. Food Properties Laboratory (2) Lecture/laboratory-1 hour/3 hours. Prerequisite: course 100B (may be taken concurrently). Study of properties of food described in course 100B. GE credit: SciEng | QL, SE, VL, WE. - II. (II.) Barile

## 102A. Malting and Brewing Science (4)

Lecture-4 hours. Prerequisite: Biological Sciences 102, 103; senior standing recommended. The technology of the malting, brewing and fermentation processes is integrated with the chemistry, biochemistry and microbiology that determine industrial practices and product quality. Not open for credit to students who have taken course 102. GE credit: SciEng | SE.-I. (I.) Bamforth

102B. Practical Malting and Brewing (4)
Lecture/discussion-2 hours; laboratory-6 hours. Prerequisite: course 102A and analytical experience beyond Chemistry 2C, such as Viticulture and Enology 123, Food Science and Technology 103, 123L, Molecular and Cellular Biology 120L. Open to seniors only in Fermentation Science or Food Science and Technology. Provides practical working knowledge of analytical methods used in malting and brewing and experience with brewing materials and processes, by analysis of samples that illustrate the range of values experienced in practice and pilot scale brewing. GE credit: SciEng | QL, SE. - II. (II.) Bamforth

## 103. Physical and Chemical Methods for

## Food Analysis (4)

Lecture-2 hours; discussion - 1 hour; laboratory-3 hours. Prerequisite: Chemistry 2C, 8B, Biological Sciences or Animal Biology 102 (may be taken concurrently), courses 100A, 101A (may be taken concurrently). Theory and application of physical and chemical methods for determining the constituents of foods. Modern separation and instrumental analysis techniques are stressed. GE credit: SciEng | QL, SE, WE.-II. (II.) Mitchell

## 104. Food Microbiology (3)

Lecture-3 hours. Prerequisite: Biological Sciences
1A, 102. Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry. GE credit:
SciEng | QL, SE, VL. - II. (II.) Marco
104L. Food Microbiology Laboratory (4)
Lecture-1 hour; discussion - 1 hour; laboratory-6 hours. Prerequisite: Biological Sciences 1A, course 104. Cultural and morphological characteristics of microorganisms involved in food spoilage, in foodborne disease, and food fermentation. Analysis of microbiological quality of foods. GE credit:
SciEng | QL, SE, VL, WE. - III. (III.) Young

## 107. Food Sensory Science (4)

Lecture-3 hours; laboratory - 3 hours. Prerequisite: Agricultural Management and Rangeland Resources 120 or course 117 (may be taken concurrently). Critical examination of techniques and theories of sensory measurement of food; measures of consumer perception and acceptance. An introduction to the sensory and cognitive systems associated with the perception of food. Not open for credit to students who have completed course 107A. GE credit:
SciEng | QL, SE, WE.-I. (I.) O'Mahony

## 108. Food Processing Plant Sanitation (2)

 Lecture-2 hours. Prerequisite: Chemistry 8B, Biological Sciences 1A, course 104 (may be taken concurrently) or consent of instructor. Sanitary control of food processing, including water treatment, chemical and physical sanitizing agents; principles of cleaning and hard surface detergency, metal corrosion, pest control, and waste disposal; role of regulatory agencies. GE credit: SciEng | SE.
## 109. Principles of Quality Assurance in

## Food Processing (3)

Lecture-2 hours; discussion - 1 hour. Prerequisite: Statistics 13 or Agricultural Management and Rangeland Resources 120. Quality assurance measurement techniques applied to selected food processed products emphasized. Rationale for establishing valid quality assurance programs including selection of samples at critical points. Statistical problems in quality assurance programs used by the food industry. GE credit: SciEng | QL, SE, SL, VL. III. (III.)

## 110. Food Processing (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Physics 7A, 7B, 7C or the equivalent; Mathematics $16 \mathrm{~A}, 16 \mathrm{~B}, 16 \mathrm{C}$ or the equivalent; course 50 (may be taken concurrently). Not open for credit to students enrolled in College of Engineering. Application of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, heat and mass transfer. Quantita-
tive analysis through problem solving and simulation. GE credit: SciEng | QL, SE, VL.-I. (I.) McCarthy

## 110A. Physical Principles in Food Processing (3)

Lecture-2 hours; laboratory-2 hours. Prerequisite: Physics 5A and 5B or 7A-7B-7C or the equivalent; calculus recommended. Not open for credit to students enrolled in College of Engineering. Applications of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, and problem solving. GE credit: SciEng | QL, SE, VL.-I. (I.) M. McCarthy
110B. Heat and Mass Transfer in Food Processing (3)
Lecture-2 hours; laboratory - 2 hours. Prerequisite: course 110A or the equivalent; Applied Biological Systems Technology 110 L recommended (may be taken concurrently). Rate processes: conduction, convection, and radiation heat transfer; microwave heating, refrigeration, freezing, psychrometrics; mass transfer during drying and storage. GE credit: SciEng \| QL, SE. - III. (III.) Singh

## 110 L. Food Processing Laboratory (2)

Laboratory-3 hours; discussion-1 hour. Prerequisite: course 110 (may be taken concurrently). Open to Food Science majors only. Laboratory exercises to gain experience with common food processing operations at the bench and pilot plant scales. GE credit: SciEng | QL, SE, SL, VL.-I. (I.) Ristenpart

## 117. Design and Analysis for Sensory Food Science (4)

Lecture-3 hours; discussion-1 hour. Methods of design and analysis for sensory food science. Experimental design strategies. Use of taste panels and consumer testing. Data analysis and computation including the relative merits and limitations of parametric and nonparametic approaches. Modifications for quality assurance. GE credit: SciEng | QL, SE.I. (I.) O'Mahony
119. Chemistry and Technology of Milk and Dairy Products (4)
Lecture-4 hours; demonstrations and a field trip. Prerequisite: Biological Sciences 1A and 102, or consent of instructor. Composition, structure and properties of milk and products derived from milk. Relates chemical, microbiological, and technological principles to commercial practices in processing of milk and its products. GE credit: SciEng | QL, SE, VL. - III. Rosenberg

## 120. Principles of Meat Science (3)

 Lecture-3 hours. Prerequisite: Biological Sciences 1A. Anatomical, physiological, developmental and biochemical aspects of muscle underlying the conversion of muscle to meat. Includes meat processing, preservation, microbiology and public health issues associated with meat products. (Same course as Animal Science 120.) GE credit: SciEng.
## 120L. Meat Science Laboratory (2)

Discussion-1 hour; laboratory-3 hours. Prerequisite: Biological Sciences 1A; course 120 (may be taken concurrently). Laboratory exercises and student participation in transformation of live animal to carcass and meat, structural and biochemical changes related to meat quality, chemical and sensory evaluation of meat, and field trips to packing plant and processing plants. (Same course as Animal Science 120L.) GE credit: SciEng | SE.

## 123. Introduction to Enzymology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 103. Principles of physical, chemical and catalytic properties of enzymes and their importance. Purification, characterization, and quantitative evaluation of reaction conditions on activity are stressed. Specificity and mechanism of action illustrated by use of selected enzymes. (Former course Biochemistry and Biophysics 123.) GE credit: SciEng | QL, SE, VL.III. (III.) G. Smith

## 123L. Enzymology Laboratory (2)

Lecture-1 hour; laboratory-3 hours. Prerequisite: Biological Sciences 103, course 123 (concurrently). Laboratory procedures involved in detection, purifi-
cation and characterization of enzymes. (Former course Biochemistry and Biophysics 123L.) GE credit: SciEng | QL, SE, VL, WE. -III. (III.) G. Smith
127. Sensory Evaluation of Foods (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Agricultural Management and Rangeland Resources 120 or course 117. A critical examination of methods of sensory measurement applied to food and beverage systems; descriptive analysis and consumer tests and their application to quality assurance, product development and optimization. GE credit: SciEng | QL, SE, WE.-II. (II.)

## 128. Food Toxicology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 102, 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as Environmental Toxicology 128.) GE credit: SciEng | SE.-III. (III.) Mitchell, Shibamoto

## 131. Food Packaging (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Chemistry 8B, Biological Sciences 1A, Physics 7C. Principles of food packaging. Functions of packaging. Properties of metal, glass, paper and plastic materials and packages. Design, fabrication, and applications of food packaging. Packaging of fresh and processed foods, including fruits and vegetables, dairy foods, beer and wine. GE credit: SciEng | SE.

## 151 Y. Food Freezing (1)

Discussion-1 hour; web virtual lecture. Prerequisite: course 110A or the equivalent. Mechanisms of ice crystallization, interpretation of freezing diagrams, and modes of heat transfer. Food properties at subfreezing temperatures, refrigeration requirements, and estimation of freezing times. Industrial systems used in freezing foods. GE credit: SciEng | QL, SE. - III. (III.) Singh
159. New Food Product Ideas (3)

Lecture-3 hours. Prerequisite: upper division standing with background course work in food science (course 50 or 100A), biological sciences (Biological Sciences 2A, 2B, 2C), or the physical sciences (Physics 7A, 7B, 7 C or Chemistry 2A, 2B, 2C). Create, refine, test and present viable ideas for new food products. Activities include trend monitoring, consumer research, idea generation, concept screening, and new product concept presentations. GE credit: ArtHum or SocSci \| AH or SS, OL, WE.-I. (I.) Biltekoff
160. Food Product Development (4)

Lecture-1 hour; discussion - 1 hour; laboratory-6 hours. Prerequisite: upper division standing with background course work in food science (course 50 or 100A), biological sciences (Biological Sciences
1A, 1B, 1C), or the physical sciences (Physics 5A, 5B, 5C or Chemistry 2A, 2B, 2C). Product implementation stage of food product development including preliminary product description, prototype development, product testing, and formal presentation of a new product development. GE credit:
SciEng | OL, SE, VL. - III. (III.)
190. Senior Seminar (1)

Seminar-1 hour. Prerequisite: senior standing or consent of instructor. Selected topics presented by students on recent advances in food science and technology. Reports and discussions concerning oral and written presentations, literature sources and career opportunities. GE credit: SciEng | OL, SE.II. (II.)
192. Internship for Advanced Undergraduates (1-12)
Internship-3-36 hours. Prerequisite: consent of instructor. Work experience on or off campus in the practical application of food science. (P/NP grading only.) GE credit: SE.

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.) GE credit: SE.

## Graduate

201. Food Chemistry and Biochemistry (4)

Lecture-4 hours. Prerequisite: undergraduate courses in organic chemistry and biochemistry; undergraduate course in food chemistry is recommended. Advanced topics in food chemistry and biochemistry, emphasizing the application of the basic principles of chemistry and biochemistry to food composition, properties, preservation and processing. Chemical structures, interactions, reaction mechanisms and experimental methods are stressed. -I. (I.) G. Smith
202. Chemical and Physical Changes in Food (4)
Lecture-3 hours; term paper. Prerequisite: Biological Sciences 103; Chemistry 107B. Fundamental principles of chemistry and physics are applied to a study of changes in water binding properties and activity, changes in proteins, nutrients, toxic constituents, and other compounds during storage, heating, freezing, dehydrating, and concentrating of food materials. - III. (III.) Dungan

## 203. Food Processing (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 110A, Physics 5C or 7C, Chemistry 107B, or consent of instructor. Principles of food engineering applied to food processing. Relationship of Newtonian and non-Newtonian fluid properties to heat and momentum transfer. Application of mass transfer in controlling kinetics and quality changes of foods.II. (II.) Nitin

## 204. Advanced Food Microbiology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 1C, 103, course 104 or a course in microbiology. Principles of and recent developments in food microbiology, including food pathogen virulence and detection, parameters of microbial growth in food, and the microbiology of food and beverage fermentations. - III. (III.) Marco, Young

## 205. Industrial Microbiology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 1A, 102, 103; Microbiology 130A-130B or Biological Sciences 101 recommended. Use of microorganisms for producing substances such as amino acids, peptides, enzymes, antibiotics and organic acids. Emphasis on metabolic regulation of pathways leading to fermentation products, on yeast fermentations, and on genetic manipulations (including recombinant DNA techniques) of industrial microorganisms. Offered in alternate years.

## 207. Advanced Sensory-Instrumental

## Analyses (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: course 107 and consent of instructor. Basic principles of measurement of color, texture, and flavor of foods by sensory and instrumental methods. Advanced statistical analysis of relation of colorimetry, texturometry, and chemistry of volatile compounds to perception of appearance, texture, flavor. Offered in alternate years.

## 210. Proteins: Functional Activities and

 Interactions (3)Lecture-3 hours. Prerequisite: Biological Sciences 103. The relationships of structure of proteins to their biological functions. Structural proteins, complexing proteins, and catalytic proteins in plant and animal materials and products.
211 . Lipids: Chemistry and Nutrition (3) Lecture-3 hours. Prerequisite: Biological Sciences 103, Chemistry 107B, 128B. Chemistry of lipids as it pertains to research in food and nutrition. Relations between lipid structure and their physical properties
in tissues and foods. Regulation of absorption, transport, and metabolism of lipids. Implications of dietary fats and health.-II. (II.) German

## 213. Flavor Chemistry of Foods and

 Beverages (3)Lecture/discussion-3 hours. Prerequisite: Chemistry 8B, Viticulture and Enology 123, Viticulture and Enology 123L or course 103 or consent of instructors. Students will become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods. Students will be required to read and critically evaluate flavor chemistry literature. (Same course as Viticulture and Enology 213). - III. (III.) Ebeler, Heymann

## 217. Advanced Food Sensory Science (3)

Lecture-3 hours. Prerequisite: course 107 (may be taken concurrently) or consent of instructor. Advanced study of the techniques and theory of the sensory measurement of food as an analytical tool and as a measure of consumer perception and acceptance. Advanced examination of the sensory and cognitive systems associated with the perception of food. -I. (I.) O'Mahony

## 219. Biochemistry, Microbiology and

 Technology of Cheeses of the World (4)Lecture-4 hours. Prerequisite: course 119 and Biological Sciences 103 or course 100A, 123, Biological Sciences 103, Chemistry 107B, 128B or consent of instructor. Restricted to graduate level students or senior undergraduate students with appropriate
background in biochemistry and microbiology. Compositional and physico-chemical aspects of milk and their implications on cheesemaking; enzymatic, microbiological and physical aspects of cheesemaking; cheese as a biological composite; designing cheese quality attributes; cheese aging. Cheese from all over the world will be tasted and discussed. Offered in alternate years. - (IIII.) Rosenberg

## 227. Food Perception and the Chemical

 Senses (2)Lecture-2 hours. Prerequisite: course 107B (may be taken concurrently), or consent of instructor. Examination of the anatomy and physiology of the chemical senses (taste, smell, and the trigeminal senses) and how they are involved in the perception of food and food intake.-III. Guinard
290. Seminar (1)

Seminar-1 hour. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
290C. Advanced Research Conference (1)
Discussion-1 hour. Prerequisite: graduate standing and consent of instructor. Critical presentation and evaluation of original research by graduate students. Planning of research programs and proposals. Discussion led by individual major instructors for their research group. (S/U grading only.) - I, II, III. (I, II, III.)
291. Advanced Food Science Seminar (1) Seminar-1 hour. Prerequisite: completion of at least one quarter of course 290. Oral presentation of student's original research, discussion, and critical evaluation. (S $/ U$ grading only.) - III. (III.)
298. Group Study (1-5)
(S/U grading only.)
299. Research (1-12)

Prerequisite: graduate standing. (S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

## Food Service Management

(College of Agricultural and Environmental Sciences) Faculty. See under the Department of Nutrition, on page 454.
The Major Program and Graduate Study.
Food Service Management is incorporated within the major of Clinical Nutrition. If you are interested in preparing for a career in commercial organizations such as hotels, restaurants, industrial cafeterias, or contract food services, as well as in public or private institutions such as hospitals, correctional institutions, schools, or colleges, consult the Department of Nutrition.
Related Courses. See Nutrition.

## Courses in Food Service Management (FSM)

Questions pertaining to the following courses should be directed to the instructor or to the Nutrition Department Advising office in 3202 Meyer Hall 530-752-2512.

## Upper Division

120. Principles of Quantity Food Production (4)

Lecture - 3 hours; independent study -1 hour. Prerequisite: Food Science and Technology 100B and 101B. Restricted to upper division Clinical Nutrition students only. Fundamental principles of food service management, including quantity food preparation, institutional equipment, receiving and storage, service, menu planning, merchandising, and safety. Students will earn food safety certification.-III. (III.) Frank
120L. Quantity Food Production Laboratory (2)

Laboratory-6 hours. Prerequisite: course 120. Laboratory experience in quantity food production and service. -I, III. (I, III.) Frank

## 122. Food Service Systems Management

 (3)Lecture -3 hours. Prerequisite: Agricultural and Resource Economics 112, courses 120, 120L, 121. Principles of quantity food production management: production schedules, portion control, financial management, layout and equipment planning, evaluation of alternative systems, and computer
applications. - II. (II.) Frank

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: one upper division course in Food Service Management and consent of instructor. Work experience on or off campus in practical aspects of food service management, supervised by a faculty member. (P/NP grading only.) - Steinberg
197T. Tutoring in Food Service Management (1-2)
Discussion/laboratory-3 or 6 hours. Prerequisite: Dietetics or related major; completion of the Food Service Management course in which tutoring is done. Tutoring of students in food service management, assistance with discussion groups or laboratory sections; weekly conference with instructor in charge of course; written evaluations. May be repeated if tutoring a different course. (P/NP grading only.) -Steinberg
198. Directed Group Study (1-5)
(P/NP grading only.)-Steinberg
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.) - Steinberg

# Forensic Science (A Graduate Group) 

Robert H. Rice, Ph.D., Chairperson of the Group
Group Office. 1909 Galileo Ct., Suite B
Davis, CA 95618; 530-747-3922;
http://forensicscience.ucdavis.edu

## Faculty

Faculty members are listed on the website.
Graduate Study. The Forensic Science Graduate Group offers the degree of MS in Forensic Science. This program, offering a Plan I-Thesis or a Plan IICapstone Project option, has two tracks, DNA or Criminalistics, enabling the student to take core courses emphasizing the physical or biological sciences. Each track requires the student to take eight to nine core courses, totaling 24-27 units, three units of seminar, and the appropriate number of elective/ research units, depending on the selection of Plan I or Plan II, for a total of 54 units. Students can take courses outside their specializations, but they must complete the courses required for their own track. The FOR seminar course in the fall quarter is required for new students. The FOR spring seminar can be taken in any spring quarter before graduation. Students must also take one additional Seminar course in another department or program.
Preparation. Appropriate preparation is an undergraduate degree in physical or natural sciences, engineering or a closely related field with a GPA of 3.000 or higher. Examples include Biochemistry, Chemistry, Molecular Biology, Biology, Genetics, and Engineering. Applicants must have completed at least one year each of general chemistry, organic chemistry, general physics and math through calculus. Other recommended courses include general biology, biochemistry, genetics and statistics.
Graduate Advisors. Ralph Aldredge (Mechanical and Aerospace Engineering), You-Lo Hsieh (Division of Textiles and Clothing), Christopher J. Hopkins (Forensic Science Graduate Program), Sree Kanthaswamy (Anthropology), Robert B. Kimsey (Entomology), Donald Land (Chemistry), Terence Murphy (Plant Biology), Ben Sacks (Population Health \& Reproduction/Canid Diversity and Conservation Laboratory-Center for Veterinary Genetics), Bahram Ravani (Mechanical \& Aeronautical Engineering), Moshe Rosenberg (Food Science and Technology), Matt Wood (Environmental Toxicology)

## Courses in Forensic Science (FOR)

## Graduate

200. Fundamental Concepts in Forensic Science (3)
Lecture-2 hours; fieldwork-0.25 hours; lecture/ laboratory -0.25 hours; seminar -0.5 hours. Overview of forensic science. Problem definition, strategies for problem solving, analytical tools, and professional and ethical considerations. - I. (I.) Sensabaugh

## 205. Microscopy and Microanalytical

Methods in Forensic Science (3)
Lecture-2 hours; seminar-1 hours. Prerequisite: consent of instructor. Introduction to optical and electron microscopy. Transmission, diffraction, reflection and absorption; polarized light and polarizing crystals; phase contrast. radiography; image recording, SEM analysis of gunshot residues, paints, glass. EDS, XRF analysis, signal-to-noise ratios, minimum detectable levels and homogeneity. Restricted to students enrolled in the M.S. in Forensic Science Program. As a minimum, year each of the following chemistry, organic chemistry, calculus, \& physics
Offered in alternate years. - (III.) van Benthem
207. Advanced Spectroscopy Methods in Forensic Science (3)
Lecture-3 hours. Restricted to Forensic Science Graduate program or consent of instructor. Discuss, evaluate and interpret advanced molecular spectra/
structure, Infrared Spectroscopy, such as chemical applications of spectroscopic methods, vibrational, rotational spectra; electronic spectra, photoelectron spectroscopy generated by various analytical instruments used in forensic science community. Offered in alternate years. - II. Wood
210. Personal Identification Methods in Forensic Science (3)
Lecture-3 hours. Prerequisite: restricted to students enrolled in the M.S. Forensic Science Program or consent of instructor. Methods for identifying individuals from evidence collected at crime scenes, suspects or victims, crime scene examination and analytical methods used to support such investigations. Topics include forensic anthropology and odontology; latent prints; shoe prints; facial reconstruction/recognition; eyewitness identifications; biometric systems. - III. (III.) Hopkins

## 212. Scientific Evidence and Courtroom

 Testimony (3)Lecture-2 hours; discussion - 1 hours. Prerequisite: graduate students enrolled in the MS Forensic Science program or by consent of instructor. Explores the relationship between science and the criminal justice system. Admissibility of scientific testimony and documentary proof during the trial, concepts of relevancy, hearsay and opinion rule, examination of expert witnesses, impact of Kelley-Fry and Daubert decisions \& court testimony. - II. (II.) Harmon, Maucieri

## 215. Forensic Fire and Arson Investigation

 (3)Lecture -3 hours. Prerequisite: open only to students enrolled in the M.S. Forensic Science program or by consent of the Forensic Science Program Director. Principles and techniques of scientific investigation of fires and related crimes; offer peer-reviewed protocols for processing fire and explosion scenes; discuss recognition, collection, analysis of physical evidence, and describe the scientific method for decision-making in fire/arson investigation. Offered in alternate years. - (III.) DeHaan

## 218. Technical Writing in Forensic Science

 (3)Lecture-2 hours; extensive writing or discussion - 1 hour. Prerequisite: consent of the instructor required for all students not enrolled in the Forensic Science program. Restricted to graduate standing in the Forensic Science program. How to write clear, credible forensic science reports and scientific articles, that (a) serve the ends of the justice system, (b) meet their readers' varying needs and (c) reflect well on the author. - III. (III.) Neumann

## 220. Analysis of Toxicants (3)

Lecture-3 hours. Prerequisite: coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as Environmental Toxicology 220.)-1. (I.) Zhang

## 221 L. Forensic Science Analytical

Instrumentation (2)
Lecture/discussion - 1 hour; laboratory -3 hours. Methodology and instruments used for the analysis of substances of interest in the discipline of Forensic Science. Practical experience with modern instrumental techniques \& methodologies used in the advanced forensic science laboratory. Limited to students accepted in the Forensic Science Graduate program or subject to the approval of the instructor if the student has the appropriate chemistry, calculus and physics courses required of students in the gradvate forensic science program. Offered in alternate years. - (I.) Land

## 240. Homicide Crime Scene Investigation

 (3)Lecture-2 hours; laboratory - 3 hours. Processing and evaluating complex homicide scenes. Functions and activities of police agencies. Recognition, documentation, identification, and collection of evidence.

Event sequence reconstruction. Evidence collection, preservation, report writing. Courtroom presenta-tion.-I. III. (I, III.) Hopkins

## 263. Forensic Computer Science Investigations (3)

Lecture-3 hours. Prerequisite: graduate student. Restricted to students in the Forensic Science Graduate program unless approved by instructor. Discuss the threats to the security of any kind of evidence that is captured, transmitted, or stored digitally and develop critical thinking and basic knowledge of computer forensic science issues in the evaluation of digital evidence. Offered in alternate years. - III. Peisert

## 268. Statistics in Forensic Science (3)

Lecture-3 hours. Prerequisite: consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Statistics that are used by the forensic scientist, their limitations/applications in presenting evidential results in such areas as DNASTR results, trace evidence correlation, fingerprint statistics, population sampling and the Bayes method. Offered in alternate years.-II. Land
277. Forensic Genetics; Next Generation Techniques and Applications (3)
Lecture-3 hours. Prerequisite: undergraduate courses in fundamental and applied principles of: genetics, biochemistry, and molecular biology, or consent of instructor. Restricted to Forensic Science Graduate students (GFOR) or consent of instructor. Review organization/function of the human genome, recent developments, next generation sequencing techniques including the preparation of DNA samples, principles of the new generation sequencing assay formats and biochemical reactions. Will include quality control parameter, and bioinformatic approaches. Offered in alternate years. -I. Kanthaswamy

## 278. Molecular Techniques (3)

Lecture-3 hours. Prerequisite: graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as Environmental Toxicology 278.) Offered in alternate years. - (I.) Denison, Rice
280. Forensic DNA Analysis (3)

Lecture-3 hours. Prerequisite: coursework in genetics and molecular biology. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as Environmental Toxicology 280.) - II. (II.) Von Beroldingen
281. Principles and Practice of Forensic Serology and DNA Analysis (3)
Lecture-2 hours; lecture/discussion-3 hours. Prerequisite: course/Environmental Toxicology 278 or course/Environmental Toxicology 280, or equivalent; consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA. (Same course as Environmental Toxicology 281.) - III. (III.) Rodzen

## 283. Forensic Biology (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science program or by consent of the Forensic Science Program Director. Overview of the foundational concepts in forensic biology: chemistry and molecular biology of biological evidence, genetic basis of biological uniqueness, evolutionary basis of species differences, patterns and dynamics of evidence deterioration, and the legal/professional considerations associated with biological evidence.-II. (II.) Sensabaugh
284. Non-Human Forensic DNA-Theory and Casework Application (2)
Lecture-2 hours. Prerequisite: consent of instructor required for all students not enrolled in the MS Forensics program; upper division Molecular Biology and Genetics or its equivalent. Restricted to graduate standing. Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit. (Same course as Environmental Toxicology 284.) Offered in alternate years. -I. Kanthaswamy

## 289. Survey in Forensic Science (3)

Lecture-3 hours. Analytical methods in contemporary forensic science. Clandestine laboratories in California, crime scene management, examination and analysis of human hair, forensic ballistics/trajectory reconstruction, shoe/tire print impressions, serial number restoration, forensic aspects of alcohol impairment, bloodstain pattern interpretation, microscopy of building materials, biological aspect of forensic science. May be repeated for credit when topic differs. -I, II, III. (I, II, III.) Hopkins

## 290. Seminar in Forensic Science (1)

 Seminar-3 hours. Students will be exposed to topical areas in Forensic Science by presentations conducted by expert guest speakers. The seminar will also serve as a medium whereby the exiting students will present the research conducted as part of their thesis requirement. May be repeated for credit when topic differs. Restricted to students enrolled in the M.S. in Forensic Science Program. ( $S / U$ grading only.) -I, III. (I, III.) Hopkins
## 290C. Graduate Research Conference in

 Forensic Science (1)Independent study - 1 hour. Individual and/or group conference on problems, progress and techniques in forensic science and research. May be repeated for credit when topic differs. (S/U grading only.) -I, II,

## III. Hopkins

## 293. Forensic Science Research <br> Methodology (2)

Lecture- 1.5 hour; extensive writing or discussion 0.5 hours. Prerequisite: graduate students enrolled in the MS Forensic Science program or by consent of instructor. Introduction to identification, formulation, and solution of meaningful scientific problems encountered in the Forensic Science area including experimental design and/or theoretical analysis of new and prevailing techniques, theories and hypotheses. Students will present and defend their thesis research/journal article proposals. Limited enrollment. (S/U grading only.) - III. (III.) Kimsey
298. Group Study in Forensic Science (1-5) (S/U grading only.)
299. Research in Forensic Science (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## French

## (College of Letters and Science)

Julia Simon, Ph.D., Chairperson of the Department
Department Office. 213 Sproul Hall
530-752-1219; http://french.ucdavis.edu

## Faculty

Jeff Fort, Ph.D., Associate Professor
Claire Goldstein, Ph.D., Associate Professor
Noah Guynn, Ph.D., Associate Professor
Eric Russell Webb, Ph.D., Associate Professor
Julia Simon, Ph.D., Professor
Toby Warner, Ph.D., Assistant Professor

## Emeriti Faculty

Claude Abraham, Ph.D., Professor Emeritus
Edward M. Bloomberg, Ph.D., Professor Emeritus
Simone Clay, Ph.D., Lecturer Emerita
Gerald Herman, Ph.D., Senior Lecturer Emeritus

Margo R. Kaufman, M.A., Senior Lecturer Emerita Manfred Kusch, Ph.D., Senior Lecturer Emeritus
(Comparative Literature, French and Italian) Marshall Lindsay, Ph.D., Professor Emeritus Maria I. Manoliu, Ph.D., Professor Emerita Michèle Praeger, Ph.D., Professor Emerita Leslie Rabine, Ph.D., Professor Emerita
(French and Italian, Women and Gender Studies) Ruth B. York, Ph.D., Senior Lecturer Emerita

## The Major Program

The major program assures proficiency in all four of the language skills-speaking, understanding, reading, and writing-and acquaints students with the intellectual and cultural contributions of the Frenchspeaking world through the study of its literature, traditions, and institutions.
The Program. The department encourages its students to work closely with the academic adviser in designing a major tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty. Each year, a substantial number of students with good preparation in French participate in the university's very popular Education Abroad Program, which maintains centers at four French universities.
Career Alternatives. Foreign language teachers, a cardiologist, a veterinarian, a naval commander at the Pentagon, a professor of Political Science, lawyers, sales representatives, journalists, speech pathologist, a law professor, translators, a senior applications programmer, travel agents, independent business owners, a senior museum curator, nurses, financial managers, stock brokers, and an industrial attaché for a French Trade Commission, all graduated with an A.B. in French from UC Davis and represent only a small fraction of the career choices documented in a recent survey of department graduates.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter.................4-34
French 1, 2, 3 (or the equivalent).........0-15
French 21, 22, 23. 15

Linguistics 1 or 4 .
0-15
Depth Subject Matter
French 100
4
Three French literature courses from among the following (at least one course must cover pre-revolutionary literature; such courses are marked with an asterisk): 101, 102, 103,
*115, *116, *117A, *117B, *118A,
*118B, 119A, 119B, 119C, 120, 121,
124, 125, 130, 140, 141 .................... 12
Two French culture courses from among the following: 107, 108, 127, 128 .............. 8

Two French linguistics and language science courses from among the following: 105, 109, 160, 161, 162 | 109 |
| :---: |

Elective courses in French literature,
language, or culture, to be chosen in
consultation with an undergraduate adviser
from among the following: 101, 102, 103,
104, 105, 106, 107, 108, 109, 110, 115,
116, 117A, 117B, 118A, 118B, 119A,
$119 \mathrm{~B}, 119 \mathrm{C}, 120,121,124,125,127$,
$128,130,133,140,141,160,161$,
162 .................................................. 12
Total Units for the Major . .48-78

## Recommended

French $107,108,109,160$ and 161 in addition to other upper division courses, for a total of 45 units for students interested in obtaining a "single subject" teaching credential in California.
Major Adviser. J. Fort

## Minor Program Requirements:

UNITS
French
. 24
French 100 ............................................. 4

One French literature course from among the following: 101, 102, 103, 115, 116, 117A,
$117 \mathrm{~B}, 118 \mathrm{~A}, 118 \mathrm{~B}, 119 \mathrm{~A}, 119 \mathrm{~B}, 119 \mathrm{C}$,
$120,121,124,125,130,140,141 \ldots . .4$
One French culture course from among the following: 107, 108, 127, 128 ..
One French linguistics and language science course from among the following: 105, 109, 160, 161, 162.
Two elective courses in French literature,
language, or culture from among the
following: 101, 102, 103, 104, 105, 106,
107, 108, 109, 110, 115, 116, 117A,
117B, 118A, 118B, 119A, 119B, 119C,
$120,121,124,125,127,128,130,133$,
140, 141, 160, 161, 162.
Honors Program. Candidates for high or highest honors in French must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in French 194H (4 units) and French 195H (4 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in French are in addition to the regular requirements for the major in French.
Education Abroad Program. The department of French and Italian encourages students to study abroad in the Summer Abroad program, the Quarter Abroad program, or the Education Abroad program. With the approval of a major adviser, applicable courses taken abroad may be accepted in the major or minor programs.
Teaching Credential Subject Representative. See the Teaching Credential/M.A. Program on page 115.
Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in French. Candidates for the Ph.D. have the option of enriching their degree program by preparing a designated emphasis in African American and African Studies, Critical Theory, Feminist Theory and
Research, Classics and Classical Reception, Second Language Acquisition, or Studies in Performance and Practice. Detailed information may be obtained from the graduate adviser or the department chairperson.

## Graduate Adviser. C. Goldstein

Prerequisite Credit. Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

## Courses in French (FRE)

Students offering high school language preparation as a prerequisite must take a placement test.
Course Placement. Students with two years of high school French normally take French 2, those with three years take French 3 and those with four years take French 21.

## Lower Division

## 1. Elementary French (5)

Discussion - 5 hours; laboratory - 1 hour. Not open for credit to students who have taken course 1A. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed French 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's $P / N P$ option, no petition is required. All other students will receive a letter grade unless a $\mathrm{P} / \mathrm{NP}$ petition is filed. GE credit: ArtHum | AH, WC. -I, II, III, IV. (I, II, III, IV.) Webb

## 1A. Accelerated Intensive Elementary

 French (15)Lecture/discussion-15 hours. Prerequisite: placement exam required. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Special 12-week, accelerated, intensive summer session course that combines the work of courses 1, 2, and 3 . Not open for credit to students who have completed course 1, 1S, 2, 2S, 3, or 3S. GE credit: ArtHum | AH, WC.-IV. (IV.) Simon

## 1S. Elementary French (5)

Discussion-5 hours; laboratory-1 hour. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Course is taught abroad. Students who have successfully completed French 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/ NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a $\mathrm{P} / \mathrm{NP}$ petition is filed. Not open for credit to students who have completed course 1 or 1A. GE credit: ArtHum | AH, WC.-I. (I.)

## 2. Elementary French (5)

Discussion-5 hours; laboratory-1 hour. Prerequisite: course 1. Continuation of course 1. Not open for credit to students who have taken course 1A. GE credit: ArtHum | AH, WC. -I, II, III, IV. (I, II, III, IV.) Webb

## 3. Elementary French (5)

Discussion - 5 hours; laboratory-1 hour. Prerequisite: course 2. Not open for credit to students who have taken course 1A. Continuation of course 2. GE credit: ArtHum | AH, WC--I, II, III, IV. (I, II, III, IV.) Webb

## 3S. Elementary French (5)

Discussion - 5 hours; laboratory-1 hour. Prerequisite: course 2 or 2 S . Not open for credit to students who have taken course 1A. Continuation of course 2. Course is taught abroad. Not open for credit to students who have completed course 1A or 3. GE credit: ArtHum | AH, WC.-I. (I.)

## 21. Intermediate French (5)

Lecture/discussion-4 hours; laboratory-1 hour. Prerequisite: course 1A, 3, or 3S. Review of grammar and vocabulary acquired in the elementary sequence, as well as the study of new grammatical structures and a continuing enrichment of vocabulary through oral work in class, written exercises, readings and compositions. Not open for credit to students who have completed course 21S. GE credit: ArtHum | AH, OL, WC, WE.-I, II, III. (I, II, III.) Simon

## 22. Intermediate French (5)

Lecture/discussion-4 hours; laboratory-1 hour. Prerequisite: course 21 or 21 S . Continuation of course 21 or 21 S . Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed course 22S. GE credit: ArtHum | AH, WC, WE.-I, II, III. (I, II, III.) Simon

## 22S. Intermediate French (5)

Lecture/discussion-4 hours; laboratory-1 hour. Prerequisite: course 21 or 21 S . Continuation of 21 or 21 S . Review of grammar and vocabulary, as well as, the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed course 22. GE credit: ArtHum | AH, OL, WC, WE.-I. (I.)

## 23. Intermediate French (5)

Lecture/discussion - 4 hours; laboratory- 1 hour. Prerequisite: course 22 or 22 S. Continuation of course 22 or 22 S . Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed course 23S. GE credit: ArtHum | AH, OL, WC, WE.-I, II, III. (I, II, III.) Simon

## 50. French Film (4)

Lecture-1 hour; discussion-2 hours; term paper. Introduction to the tradition of French cinema from its invention by Méliès and the Lumière brothers through New Wave (especially the works of Truffaut and Godard) and more recent developments in French and Francophone film. Taught in English. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WC, WE. - (I, II, III.)
51. Major Works of French Literature in Translation (4)
Lecture-2 hours; discussion-1 hour; term paper. Readings in English translation of key works of French and Francophone literature from the Middle Ages to the present. Particular attention is given to the long-standing interest of French writers in issues of social, regional, gender, sexual, and ethnic identity. GE credit: ArtHum, Div, Wrt | AH, WC, WE. II. (II.) Fort, Guynn

Lecture/discussion-3 hours; term paper. Prerequisite: course 100. Overview of major works and writ ers with particular attention to the historical context of the turbulent 16 th century. Writers to be read may include Rabelais, Marot, Ronsard, Du Bellay, Labé, Marguerite de Navarre, Montaigne, and D'Aubigné. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.-(III.)

## $117 A$. Baroque and Preclassicism (4)

Lecture/discussion-3 hours; term paper. Prerequi site: course 100. The literature and intellectual culture of the period between the Renaissance and French classicism. Offered in alternate years. GE credit: ArtHum | AH, WC, WE. - (II.) Simon

## $117 B$. The Classical Moment (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 100. Literature, culture, and politics in the Age of Louis XIV. May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: ArtHum | AH, WC, WE. - (III.) Guynn, Simon

## 118 A . The Age of Reason and Revolution

 (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 100. Literature and philosophy of the French Enlightenment. Readings from such authors as Bayle, Fontenelle, Montesquieu, Voltaire, Rousseau and Diderot. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE. - (II.) Simon
118B. Private Lives and Public Secrets: The Early French Novel (4)
Lecture/discussion-3 hours; term paper. Prerequisite: course 100. History of the French roman from the Middle Ages to the Revolution with particular emphasis on the novels of the 18th century. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.-II. Simon

## 119A. The Romantic Imaginary (4)

Lecture/discussion-3 hours; term paper. Prerequi site: course 100. Major concepts and themes of French Romanticism, such as dream and the supernatural, impossible love, exoticism, revolution, individualism, nature, the mal du siècle, Romantic irony, the creative imagination, the cult of ruin. Offered in alternate years. GE credit: ArtHum, Wrt|AH, WC, WE. -II.
119B. Realism, History and the Novel (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 100. Narrative and historical codes of French realist fiction, with emphasis on the representation of history in the realist novel, its depiction of social "realities" such as class and gender, and its relation to the historical situation of post-revolutionary society. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.-(III.)

## 119C. From Baudelaire to Surrealism (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 100. Study of the main poets and poetic movements from the mid-19th to the early 20th century, including Baudelaire, the Symbolists, and the Surrealists. Offered in alternate years. GE credit: ArtHum | AH, WC, WE. - (I.)

## 120. Modern French Thought (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 100. Overview of post-Second World War French intellectual currents from existentialism to structuralism and deconstructionism. Readings will include Sartre and de Beauvoir, Camus, Lévi-Strauss, Lacan, Barthes, Foucault, Derrida, Kristeva, Sollers, Cixous, and Irigaray. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE. - (I.) Fort

## 121. Twentieth Century French Novel (4)

Lecture/discussion -3 hours; term paper. Prerequisite: course 100. Novels and theories of the novel, from Proust to the Nouveau Roman and beyond. Readings from among Gide, Sartre, de Beauvoir, Camus, Breton, Beckett, Robbe-Grillet, Sarraute, Simon, Barthes, Duras, Tournier, Perec, Modiano, Guibert, Toussaint. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE. - (II.) Fort

## 122. French and Francophone Film (4)

Lecture/discussion-4 hours; extensive writing; field-work-3 hours. Prerequisite: course 100 or consent of instructor. French and Francophone film from the Lumière Brothers to the present. Topics may include analysis of film form and narrative, major filmmakers and filmic traditions, and film theory. May be repeated one time for credit. Offered in alternate years. GE credit: ArtHum | AH, VL, WC, WE.-(I.) Fort

## 124. Post-Colonialist and Francophone

 Literature (4)Lecture/discussion - 3 hours; term paper. Prerequisite: course 100. Post-Independence Black African and/or Caribbean and/or North African literatures written in French. Selected topics include: identity and subjectivity, the role of the intellectual, women's voices, languages and oral literatures, cultural syncretism, theories of post-colonialism. May be repeated one time for credit. Offered in alternate years. GE credit: ArtHum, Div \| AH, VL, WC, WE. - (III.) Adejunmobi
125. French Literature and Other Arts (4) Lecture/discussion - 3 hours; term paper. Prerequisite: course 100. Relationship between French literature and other arts-painting, music, cinema, architecture, opera-from different periods. May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Wrt | WC.-II. Guynn
125S. French Literature and Other Arts (4) Lecture/discussion - 3 hours; term paper. Prerequisite: course 100. Relationship between French literature and other arts, such as painting, music, cinema, architecture, or opera, from different periods. Taught abroad. May be repeated one time for credit when topic differs. GE credit: ArtHum, Wrt | AH, VL, WC, WE. -I. (I.)

## 127. Paris: Modernity and Metropolitan

 Culture (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 100. Representation of Paris in 19th and 20th century texts and its importance in defining the experience and art of modernity. Offered in alternate years. GE credit: ArtHum, Wrt \| AH, WC, WE.-(III.) Simon

## 128. Topics in French Culture (4)

Lecture-3 hours; extensive writing. Prerequisite: course 100 or consent of instructor. In-depth study of a particular topic in French culture. Topics may include the Court of Louis XIV, the French Revolution and Immigration. May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: WE.-Guynn, Simon

## 128S. Topics in French Culture (4)

Lecture -3 hours; extensive writing. Prerequisite course 100 or consent of instructor. In-depth study of a particular topic in French culture. Topics may include the Court of Louis XIV, the French Revolution, and Immigration. Taught abroad. May be repeated one time for credit when topic differs. GE credit: ArtHum | AH, WC, WE.-I. (I.)
130. From Page to Stage: Theatre and Theatricality (4)
Lecture/discussion-3 hours; term paper. Prerequisite: course 100. French theater as literature and performance. May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.-I. Guynn

## 133. Gender and Politics in French

 Literature and Culture (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 100. Thematic, theoretical and political tendencies in contemporary French fiction. Barthes, Foucault, Duras, Guibert, considered in terms of their writing on identity and gender. Offered in alternate years. GE credit: ArtHum, Div | AH, WC WE.-I.

## 140. Study of a Major Writer (4)

Lecture-3 hours; term paper. Prerequisite: course 100; consent of instructor. Concentrated study of works of a single author. May be repeated one time for credit if author-subject changes. GE credit: ArtHum | AH, WC, WE. - II. (II.)

## 141. Selected Topics in French Literature (4)

Lecture-3 hours; term paper. Prerequisite: course 100; consent of instructor. Subjects and themes such as satiric and didactic poetry of the Middle Ages, poetry of the Pléiade, theater in the eighteenth century, pre-romantic poetry, autobiography, literature and film, etc. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE. - II. (II.)

## 141S. Selected Topics in French Literature

 (4)Lecture-3 hours; term paper. Prerequisite: course
100; consent of instructor. Subjects and themes such as satiric and didactic poetry of the Middle Ages, poetry of the Pléiade, theater in the eighteenth century, pre-romantic poetry, autobiography, literature and film, etc. Taught abroad. May be repeated two times for credit when topic differs. GE credit:
ArtHum | AH, WC, WE.-I. (I.)
160. Linguistic Study of French-Sound and Form (4)
Seminar-3 hours; term paper. Prerequisite: course 109 and Linguistics 1, or consent of instructor. Introduction to the linguistic study of modern French, with focus on sound structure and form, inflection and derivation. GE credit: ArtHum or SocSci | AH or SS, WE. - II. (II.) Russell Webb

## 161. Linguistic Study of French-Form and

 Meaning (4)Seminar-3 hours; term paper. Prerequisite: one of course 104, 105, 160, 162 and Linguistics 1, or permission of instructor. Introduction to the linguistic study of modern French, with focus on sentence construction and constituency, meaning and discourse functions. GE credit: ArtHum or SocSci | AH or SS. - III. (III.) Russell Webb

## 162. History of the French Language (4)

 Lecture-3 hours; term paper. Prerequisite: one from course 105, 109, 160, or 161; Linguistics 1 or consent of instructor. Main periods in development of the French language, from Latin to contemporary popular aspects, with emphasis on relationship between socio-cultural patterns and evolution of the language. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE. - (II.) Webb
## 192. Internship (1-12)

Internship-3-36 hours; term paper. Prerequisite: upper division standing and consent of instructor Practical application of the French language through work experience in government and/or business, culminating in an analytical term paper on a topic approved by the sponsoring instructor. (P/NP grading only.)

## 194H. Special Study for Honors Students

 (4)Independent study-4 hours. Prerequisite: open only to French majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors
thesis on a topic in French literature, civilization, or language studies. (P/NP grading only.) GE
credit: AH, WC, WE.
195H. Honors Thesis (4)
Independent study - 4 hours. Prerequisite: course 194H. Writing of an honors thesis on a topic in French literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.) GE credit: AH, WC, WE.-I, II, III. (I, II, III.)

## 197T. Tutoring in French (1-4)

Seminar-1-2 hours; laboratory-1-2 hours. Prereqvisite: upper division standing and consent of Chairperson. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affili ated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)
197TC. Tutoring in the Community (2-4)
Seminar-1-2 hours; laboratory-1-2 hours. Prerequisite: upper division standing and consent of Chairperson. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
198S. Directed Group Study (1-5)
Group study on focused topics in French literature and culture. May be repeated for credit. (P/NP grading only.) - III. (III.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

200. Introduction to Graduate Study in French (2)
Seminar-2 hours. Prerequisite: graduate standing An introduction to a range of methodologies and critical practices in the field of French Studies, including literature, culture, and linguistics. The course will cover basic principles of bibliographic research in the humanities. ( $S / U$ grading only.)-l. (I.)

## 201. History of French (4)

Seminar-3 hours; term paper. Presentation of the main changes in the grammatical structures of French, from Latin to contemporary usage, involving textual analysis and sociolinguistic description. -I . (I.) Guynn, Russell Webb
202. Topics in French Civilization (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing. Interdisciplinary approach to the study of French and Francophone civilization from the Middle Ages to the present. Course content will vary by instructor. May be repeated for credit.-I. (I.) Simon

## 204. Topics in Medieval Literature (4)

Seminar-3 hours; term paper. Study of Medieval French literature, focusing on a particular period, milieu, literary movement, genre, or theoretical approach. May be repeated for credit when topic differs.-I. (I.) Guynn
205A. Sixteenth-Century Literature: The Humanists (4)
Seminar-3 hours. French humanism in its most varied forms. Although at different times Rabelais and Montaigne will be primarily studied, other leading intellectuals and religious writers will also receive attention. May be repeated for credit when different topic is studied.-I. (I.)

## 206A. Seventeenth-Century Literature: Theater (4)

Seminar-3 hours. Works of Corneille, Racine, Molière, and minor dramatists. One or more authors may be covered. May be repeated for credit with consent of instructor when different topics are studied. - II. (II.) Guynn

## 206B. Seventeenth-Century Literature:

 Prose (4)Seminar-3 hours; term paper and/or exposé. Works of authors such as Pascal, Descartes, Mme de Lafayette. One or more authors may be covered. May be repeated for credit with consent of instructor as different topics are studied from quarter to quar-ter.-l. (I.)
206C. Seventeenth-Century Literature: Poetry (4)
Seminar-3 hours; term paper and/or exposé. Studies of the works of one or more poets of the period. May be repeated for credit with consent of instructor. - III. (III.)

## 207A. Eighteenth-Century Literature:

 Philosophies (4)Seminar-3 hours; term paper. Not a course in philosophy, but an examination of the role of philosophy in the design and context of literary works Study of one or more authors. May be repeated for credit.-II. (II.) Simon

## 207B. Eighteenth-Century Literature: Novel

 (4)Seminar-3 hours. Rise of the novel. Study of narrative experiments in the context of the philosophical climate and new literary values. Course may treat one or more novelists of the period. May be repeated for credit when different topics are studied. - III. (III.) Simon

## 208A. Nineteenth-Century Literature:

 Fiction (4)Seminar-3 hours. Study of the works of one or several novelists and/or short-story writers of the period. May be repeated for credit with consent of instructor when different topics are studied.-l. (l.)

## 208B. Nineteenth-Century Literature:

## Poetry (4)

Seminar-3 hours. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor when different topics are studied. - III. (III.)
209A. Twentieth-Century: Prose (4)
Seminar-3 hours; term paper. Study of the works of one or several writers of the period. - II. (II.) Fort

## 209B. Twentieth-Century: Theater (4)

Seminar-3 hours; term paper. Study of the works of one or several dramatists of the period. May be repeated for credit with consent of instructor. - II. (II.) Fort

## 209C. Twentieth-Century: Poetry (4)

Seminar-3 hours; term paper. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor. - III. (III.)
210. Studies in Narrative Fiction (4) Seminar-3 hours. May be repeated for credit with consent of instructor when different topic is studied. -l. (I.)

## 211. Studies in Criticism (4)

Seminar-3 hours. May be repeated for credit with consent of instructor when different topic is studied. - II. (II.)

## 212. Studies in the Theater (4)

Seminar-3 hours. May be repeated for credit with consent of instructor when different topic is stud-ied.-l. (I.)

## 213. Studies in Poetry (4)

Seminar-3 hours. May be repeated for credit with consent of instructor when different topic is studied. -II. (II.)

## 214. Study of a Literary Movement (4)

Seminar-3 hours. May be repeated for credit with consent of instructor when different topic is studied. -III. (III.)
215. Topics in French and Francophone Film (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing. Aspects of French and Francophone film from the Lumière Brothers through the present. Topics may include a specific historical period of filmmaking, film theories and the analysis of film
form and narrative, and major filmmakers and filmic traditions. May be repeated two times for credit. III. (III.)
224. Francophone Literatures (4)

Seminar-3 hours; term paper. Study of cultural productions (literature, film, visual arts) by Francophone peoples such as found in North Africa, West Africa, the Caribbean, South-East Asia, the Americas, and Metropolitan France. May be repeated for credit when topic differs and with consent of instructor. Adejunmobi
250A. French Linguistics I (4)
Seminar-3 hours; term paper. Theoretical
approach to the forms and functions of French, with emphasis on phonology and morphology. Overview of current linguistic theories and their application to French. Offered in alternate years. - (II.) Russell Webb
250B. French Linguistics II (4)
Seminar-3 hours; term paper. Theoretical approach to the forms and functions of French, with emphasis on syntax and semantics. Overview of current linguistic theories and their application to French. Offered in alternate years. - (II.) Russell Webb

## 251. Topics in the Linguistic Study of French

 (4)Seminar-3 hours; term paper. Prerequisite: course 201, 250A or 250B, or consent of the instructor. Questions relevant to the linguistic study of French, such as language acquisition, sociolinguistics, or theoretical examination of structure. Intended for students in French Linguistics and those applying linguistic models to literature or teaching. May be repeated for credit when topic differs. - III. (III.) Rus sell Webb
291. Foreign Language Learning in the Classroom (4)
Seminar-3 hours; project. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as German 291 and Spanish 291.)-I, II. (I, II.)
297. Individual Study (1-5)
(S/U grading only.)
298. Group Study (1-5)

Seminar-1-5 hours. May be repeated for credit with consent of instructor.
299. Research (1-12)
(S/U grading only.)
299D. Dissertation Research (1-12)
(S/U grading only.)

## Professional

300. Teaching of a Modern Foreign

## Language (3)

Lecture/discussion-3 hours. Prerequisite: senior or graduate standing; a major or minor in a modern foreign language. - III. (III.)
390A. The Teaching of French in College (2) Lecture/discussion-2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. May be repeated for credit with consent of instructor. (S/U grading only.)-I. (I.) Russell Webb
390B. The Teaching of French in College (2) Lecture/discussion-2 hours. Prerequisite: graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.) - II. (II.) Russell Webb
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

# Fungal Biology and Ecology 

(College of Agricultural and Environmental Sciences) The minor in Fungal Biology and Ecology is open to all students interested in a concentrated exposure to and knowledge of the fungi and allied organisms.
The minor is sponsored by the Plant Pathology Department.

## Minor Program Requirements: <br> Fungal Biology and Ecology.............. 18-20 <br> Plant Pathology 130, 148, 150 . 18 <br> Select 7-9 units from Food Science and Technology 104, Plant Pathology 40, 135, 185, Science and Society 30, Soil Science 111; Plant Pathology 224 (available to advanced students with consent of instructor) 7-9

Minor Adviser. T. Gordon

## Genetics

See Molecular and Cellular Biology, on page 430; and Integrative Genetics and Genomics
(A Graduate Group), on page 352.

## Geographic Information Systems

(College of Agricultural and Environmental Sciences) The Department of Biological and Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnics, precision agriculture, archaeology, military exercises, and computer-aided design. Prerequisites include Mathematics 16A-16B, Statistics 13 or Plant Sciences 120 or Civil and Environmental Engineering 114, and Plant Sciences 21 or Computer Science Engineering 15.

## Minor Program Requirements:

Geographic Information Systems
Applied Biological Systems Technology/
Landscape Architecture 150, Applied
Biological Systems Technology 181N or 182,
Environmental Science \& Management 186,
186L
Select five or more units from:, Applied
Biological Systems Technology/Hydrologic
Science 181 N or 182 Environmental Science \& Management 108, 185 Environmental Science and Policy 168A, 168B, 171, 179 ... 5
Minor Adviser. S. K. Upadhyaya and S.G. Vougioukas (Biological and Agricultural Engineering Department)

## Geographic Studies

(College of Agricultural and Environmental Sciences)
The interdepartmental minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the earth's surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the earth's surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college and also with graduate programs in geography.
The minor is sponsored by the Department of Environmental Design.

## Geography

Gwen Arnold, Ph.D., Assistant Professor (Environmental Science and Policy)
Chris Benner, Ph.D., Associate Professor (Human Ecology)
Stephen Boucher, Ph.D, Associate Professor (Agricultural and Resource Economics)
Mary Cadenasso, Ph.D, Associate Professor (Plant Sciences)
Diana Davis, Ph.D. Associate Professor (History)
Adela de la Torre, Ph.D., Professor (Chicana/o Studies)
Natalia Deeb-Sossa, Ph.D., Associate Professor (Chicana/o Studies)
Patsy Eubanks Owens, M.L.A., Professor and Chair (Human Ecology)
Ryan Galt, Ph.D., Associate Professor (Human Ecology)
Steven Greco, Ph.D., Associate Professor (Human Ecology)
Luis Guarnizo, Ph.D, Professor (Human Ecology)
Erin Hamilton, Ph.D., Assistant Professor (Sociology)
Susan Handy, Ph.D., Professor
(Environmental Science and Policy)
Andrew Hargadon, Ph.D., Professor and Chair (Graduate School of Management)
Lynette Hart, Ph.D., Professor
(Population Health and Reproduction)
Robert Hijmans, Ph.D, Associate Professor
(Environmental Science and Policy)
Frank Hirtz, L.L.D., Ph.D., Sr. Lecturer SOE (Human Ecology
Suad Joseph, Ph.D., Professor (Anthropology) Carl Keen, Ph.D., Professor (Nutrition)
Martin Kenney, Ph.D., Professor (Human Ecology)
A. Peter Klimley, Ph.D., Adjunct Professor (Wildlife, Fish and Conservation Biology)
Frank Loge, Ph.D., Professor (Civil and Environmental Engineering)
Jonathan London, Ph.D, Assistant Professor (Human Ecology)
Jeff D. Loux, Ph.D., Assistant Adjunct Professor (Human Ecology)

Mark Lubell, Ph.D., Professor
(Environmental Science and Policy)
Jay R. Lund, Ph.D., Professor
(Civil and Environmental Engineering)
Amina Mama, Ph.D., Professor (Women and Gender Studies)
Beth Rose Middleton, Ph.D., Assistant Professor (Native American Studies)
Brett Milligan, Ph.D., Assistant Professor (Human Ecology)
Peter B. Moyle, Ph.D., Professor (Wildlife, Fish and Conservation Biology)
N. Claire Napawan, M.L.A., Assistant Professor (Human Ecology)
Bettina Ng'Weno, Ph.D., Associate Professor (African American and African Studies Program)
Deb Niemeier, Ph.D., Professor (Civil and Environmental Engineering)
James Quinn, Ph.D., Professor
(Environmental Science and Policy)
Michael Rios. Ph.D., Associate Professor (Human Ecology)
Lynn Roller, Ph.D., Professor (Classics, Art History)
Margaret Rucker, Ph.D., Professor (Textiles and Clothing)
Mark Schwartz, Ph.D., Professor
(Environmental Science and Policy)
Art Shapiro, Ph.D., Professor (Evolution and Ecology)
Janet Shibamoto-Smith, Ph.D., Professor (Anthropology)
Aaron Smith, Ph.D., Associate Professor (Agricultural and Resource Economics)
Daniel Sumner, Ph.D., Professor (Agricultural and Resource Economics)
Julie Sze, Ph.D., Associate Professor (American Studies)
Thomas P. Tomich, Ph.D., Professor (Human Ecology)
Susan Ustin, Ph.D., Professor (Land, Air and Water Resources)
M. Anne Visser, Ph.D., Assistant Professor (Human Ecology)
Charles Walker, Ph.D., Associate Professor (History)
Wesley W. Wallender, Ph.D., Professor (Land, Air and Water Resources) Academic Senate Distinguished Teaching Award
Karen Watson-Gegeo, Ph.D., Professor (School of Education)
Stephen Wheeler, Ph.D., Associate Professor (Human Ecology)
Diane Wolf, Ph.D., Professor (Sociology)
Truman Young, Ph.D., Professor (Plant Sciences)
Minghua, Zhang, Ph.D., Professor (Land Air and Water Resources)
Emeriti Faculty
Michael Barbour, Ph.D., Professor Emeritus (Plant Sciences)
David Boyd, Ph.D., Associate Professor Emeritus (Anthropology)
Cynthia Brantley, Ph.D, Professor Emeritus (History)
Stephen Brush, Ph.D., Professor Emeritus (Human and Ecology)
Thomas A. Cahill, Ph.D., Professor Emeritus
Dennis Dingemans, Ph.D., Associate Professor Emeritus (Geography)
Deborah Elliott-Fisk, Ph.D., Sr. Lecturer, SOE Emeritus (Wildlife, Fish and Conservation Biology)
Joan Florsheim, Ph.D., Associate Research Scientist, Emeritus (Geology)
Mark Francis, M.L.A., Professor Emeritus (Human Ecology)
Isao Fuijimoto, Ph.D., Sr. Lecturer SOE Emeritus (Human Ecology)
Charles Goldman, Ph.D., Professor Emeritus (Environmental Science and Policy) Distinguished Graduate Mentoring Award
James Grieshop, Ph.D., Specialist in Cooperative Extension Emeritus (Human Ecology)
Louis Grivetti, Ph.D., Professor Emeritus (Nutrition)
Joyce Gutstein, Ph.D., Director, Emeritus
(Public Service Research Program)
Richard Howitt, Ph.D., Professor Emeritus (Agricultural and Resource Economics)

Nguyen Kien, Ph.D., Professor Emeritus (Anesthesiology)
F. Thomas Ledig, Ph.D., Adjunct Professor Emeritus (Plant Sciences)
Dean MacCannell, Ph.D., Professor Emeritus (Human Ecology)
Heath Massey, M.L.A., Professor Emeritus (Human Ecology)
E. Steve McNiel, M.L.A., Sr. Lecturer, SOE Emeritus (Landscape Architecture)
Jay Mechling, Ph.D., Professor Emeritus (American Studies)
Patricia Mohktarian, Ph.D., Professor Emeritus (Civil and Environmental Engineering)
Janet Momsen, Ph.D., Professor Emeritus (Human Ecology)
Jeffrey Mount, Ph.D., Professor Emeritus (Geology)
Ben Orlove, Ph.D., Professor Emeritus (Environmental Science and Policy)
Richard Plant, Ph.D., Professor Emeritus (Plant Sciences)
David Robertson, Ph.D., Professor Emeritus (English)
Michael P. Smith, Ph.D., Professor Emeritus (Human Ecology)
Margaret Swain, Ph.D., Associate Adjunct Professor, Emeritus (Women and Gender Studies)
Robert L. Thayer, Jr., M.A., Professor Emeritus (Human Ecology)
Stefano Varese, Ph.D., Professor Emeritus (Native American Studies)
Geoffrey Wandesforde-Smith, Ph.D., Associate Professor Emeritus
Miriam J. Wells, Ph.D., Professor Emeritus (Human Ecology)
Affiliated Faculty
Dave C. Campbell, Ph.D., Specialist in Cooperative Extension (Human Ecology)
Joyce Gutstein, Ph.D., Director (Public Service Research Program-JMIE)
Eric Larsen, Ph.D., Associate Research Scientist (Human Ecology)
Greg McPherson, Ph.D., Lecturer and Associate in the Agricultural Experiment Station
Lorence Oki, Ph.D, Associate Specialist in Cooperative Extension (Plant Sciences and Human Ecology)
Hugh Safford, Ph.D., Regional Ecologist/Lecturer WOS (Environmental Science and Policy)
Kenneth Tate, Ph.D., Specialist in Cooperative Extension (Plant Sciences)
James Thorne, Ph.D. Research Scientist (Environmental Science and Policy) Joshua Viers, Ph.D, Associate Research Scientist (John Muir Institute of the Environment)
Graduate Study. The Graduate Group in Geography (GGG) offers programs of study and research leading to the M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. The wide faculty interests attract a diverse set of students in such areas as biogeography, urban forestry and related natural science and engineering fields, as well as human geography and related social science fields. A number of faculty members use and teach geographic information systems, remote sensing, and related geographic techniques, and most have a strong field orientation. The strengths of the Davis campus and its faculty enable the program to focus on important issues including people, place and power, community and regional identity and change, people-environment interaction, agricultural sustainability, landscape architecture, environmental change, biogeography, natural resource management, and technological innovations in computing and the use of geographic information systems. Students are mentored by faculty across the many colleges of the university.
Preparation. Most students considered for admission will have an undergraduate major in geography or in a closely related field. Generally, a student without an undergraduate degree in geography will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic
methods, plus any additional undergraduate coursework required as background for the student's research emphasis, as determined by the student's guidance committee.
Graduate Advisers. Chris Benner (Human Ecology), Ryan Galt (Human Ecology), Robert Hijmans (Environmental Science and Policy) and James Quinn (Environmental Science and Policy)

## Courses in Geography (GEO)

Graduate
200AN. Geographical Concepts (4)
Lecture/discussion - 3 hours; term paper. Prerequisite: graduate standing in Geography or consent of instructor. Concepts and thematic content of the discipline, including contemporary research questions. A brief review of the history of geographic thought and practice is done at the beginning of the course.-l. (I.)
200BN. Theory \& Practice of Geography (4) Lecture/discussion-4 hours. Prerequisite: graduate standing. Class size limited to 20. Development, application, and philosophical background of theory in discipline of geography and geographical knowledge production. Similarities and differences in theories employed in physical and human geography and cartography. Geographic contributions to interdisciplinary theory bridging biophysical sciences, social sciences, and humanities.-II. (II.) Galt, Rios

## 200CN. Quantitative Geography (4)

Lecture-2 hours; laboratory-6 hours. Class size limited to 25. Provides an overview of quantitative approaches in spatial data analysis. Overview of different approaches used for inference, modeling, and prediction. Also learn how to write computer programs to implement these methods. - III. (III.) Hijmans

## 200DN. Socio-Spatial Analysis in Geography (4)

Lecture/discussion-4 hours. Class size limited to 25. Introduction to methodologies of socio-spatial analysis in interviews, and ethnographic fieldwork. Students develop a critical understanding of different methodological and theoretical approaches, and their appropriate applications in overall research design. - II. (II.) Benner, Eubanks-Owens
200E. Advanced Research Design in Geography (2)
Lecture/discussion-2 hours. Prerequisite: graduate standing; courses 200AN, 200BN, 200CN and 200DN. Class size limited to 15. Helps Ph.D. students develop their research question, design their research plan and complete a full dissertation research proposal.-I. (I.) Benner
201. Sources and General Literature of Geography (4)
Discussion-4 hours. Prerequisite: graduate standing in geography; consent of instructor. Designed for students preparing for higher degrees in geography.
May be repeated for credit in one or more of the following subfields: physical, cultural, economic, urban, historical, political, conservation, and regional geography.

## 210. Topics in Biogeography (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: Evolution and Ecology 147 or Wildlife, Fish, and Conservation Biology 156 (may be taken concurrently) or equivalent; consent of instructor for undergraduates. Current topics in historical and ecological biogeography, including macroecology and areography, GIS and remote sensing, phylogeography, vegetation, plant and animal community and species geography. Systematics, climate change, and conservation will be addressed. Offered in alternate years.

## 211. Physical Geography Traditions and Methods (3)

Lecture/discussion-2 hours; term paper. Prerequisite: Introductory course in physical geography. Graduate-level standing in geography or related discipline. Course Description: Discussion of the physi-
cal science tradition in geography, including key concepts and current research in climatology, geomorphology, soils geography, biogeography, climate change, watershed science, and coastal studies. Research paradigms, programs, and methods as used by physical geographers will be discussed. May be repeated three times for credit. Offered in alternate years.-I.

## 212. Water Resource Management (3)

 Lecture-3 hours. Prerequisite: Civil and Environmental Engineering 114, 141, and 142; Civil and Environmental Engineering 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as Civil and Environmental Engineering 267.)-I. (I.) Lund214. Seminar in Geographical Ecology (2) Seminar-2 hours. Prerequisite: Evolution and Ecology 100 or 101 or consent of instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. (Same course as Population Biology 296.)(S/U grading only.) - III. (III.) Shapiro

## 230. Citizenship, Democracy, \& Public

## Space (4)

Seminar-4 hours. Prerequisite: graduate standing or consent of instructor. Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as Landscape Architecture

## 200.) - III. (III.) Rios

## 233. Physical Planning and Design (4)

Lecture-2 hours; discussion-2 hours. Limited to graduate students. Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals. (Same course as Landscape Architecture 205.) Offered irregularly. - Wheeler
236. Transportation Planning and Policy (4) Lecture/discussion-4 hours. Limited enrollment. Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies. Students taking this course previously as Transportation Planning and Policy 289 cannot repeat it for credit. Taking other Transportation Planning and Policy 289 offerings does not preclude taking Transportation Planning and Policy 220 for credit. (Same course as Transportation Planning and Policy 220.) Offered in alternate years. - III. Handy
240. Community Development Theory (4)

Lecture/discussion - 4 hours. Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects. (Same course as Community \& Regional Development 240.) - I. (I.)

## 244. Political Ecology of Community

## Development (4)

Lecture-4 hours. Prerequisite: graduate standing Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries. (Same course as Community and Regional Development 244.)-II. (II.) Galt
245. The Political Economy of Urban and Regional Development (4)
Lecture-4 hours. Prerequisite: Community and Regional Development 157, 244, or the equivalent. How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California. (Same course as Community \& Regional Development 245.) - III. (III.)
246. The Political Economy of Transnational Migration (4)
Lecture-4 hours. Prerequisite: graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as Community \& Regional Development 246.) - II. (II.) Guarnizo

## 248. Social Policy, Welfare Theories and Communities (4)

Seminar-4 hours. Prerequisite: graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context. Not open for credit to students having completed Community \& Regional Development 248A and 248B. (Same course as Community \& Regional Development 248.) Offered in alternate years. - (III.) Hirtz

## 252. Landscape and Power (4)

Seminar-4 hours. Prerequisite: graduate standing or consent of instructor. How various representations of landscape have historically worked as agents of cultural power. Course framework is interdisciplinary, including studies of landscape representation in literature, art, photography, cartography, cinema, and landscape architecture. (Same course as Landscape Architecture 260.)-I. (I.) Schenker
270. Experimental Design and Analysis (5) Lecture-3 hours; discussion/laboratory-2 hours. Prerequisite: Plant Sciences 120 or equivalent. Introduction to the research process and statistical methods to plan, conduct and interpret experiments. -II. (II.) Dubcovsky

## 271. Applied Multivariate Modeling in

Agricultural and Environmental Sciences (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: one of Plant Sciences 120, 205, Statistics 106,
108, or equivalent. Multivariate linear and nonlinear models. Model selection and parameter estimation. Analysis of manipulative and observational agroecological experiments. Discriminant, principal component, and path analyses. Logistic and biased regression. Bootstrapping. Exercises based on actual research by UC Davis students.-I. (I.) Laca

## 279. Discrete Choice Analysis of Travel

## Demand (4)

Lecture-4 hours. Prerequisite: Civil and Environmental Engineering 114. Behavioral and statistical principles underlying the formulation and estimation of discrete choice models. Practical application of discrete choice models to characterization of choice behavior, hypothesis testing, and forecasting.
Emphasis on computer exercises using real-world
data sets. (Same course as Civil and Environmental Engineering 254.) - III. (III.)
280. Field Studies in Geography (3)

Lecture-1 hour; fieldwork-6 hours. Prerequisite: undergraduate or graduate coursework in geography and consent of instructor. A topic or subdiscipline of geography will form the theme for the course in any given offering, with a focus on current research on this topic, field methodologies, and data analysis in human and physical geography. May be repeated two times for credit. Limited enrollment.
281. Transportation Survey Methods (4) Lecture-4 hours. Prerequisite: Statistics 13; Civil and Environmental Engineering 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have taken Civil and Environmental Engineering 255. (Same course as Transportation Technology and Policy 200.)-II. (II.)

## 286. Selected Topics in Environmental

 Remote Sensing (3)Discussion-2 hours; lecture-1 hour; project. Prerequisite: consent of instructor; Environmental and Resource Sciences 186 or equivalent required; Environmental and Resource Sciences 186 L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. Not open for credit to students who have taken Civil and Environmental Engineering 255. (Same course as Hydrologic Science 286.) May be repeated for credit. Offered irregularly. - Ustin

## 290. Seminar in Geography (1-3)

Seminar-1-3 hours. Prerequisite: Graduate standing or consent of instructor. The seminar will focus on specified topical areas within geography, which will vary quarter to quarter. Students will be expected to present an oral seminar on an aspect of the general topic under discussion. May be repeated six times for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 291. Seminar in Cultural Geography (4)

 Seminar-3 hours.
## 293. Graduate Internship (1-12)

Prerequisite: consent of instructor. Individually designed, supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
295. Seminar in Urban Geography (4) Seminar-3 hours. - II. (II.)
297. Graduate Group in Geography Seminar (2)
Lecture/discussion-1 hour; term paper. Prerequisite: graduate standing. Seminars by UC Davis faculty and prominent national and international
scholars; research presentations by Graduate Group in Geography Ph.D. candidates. May be repeated
for credit. (S/U grading only.)

## 298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)

## 299. Research (1-12)

(S/U grading only.)
299D. Individual Study (1-12)
Prerequisite: graduate student status in Geography and consent of instructor. ( $S / U$ grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)

## Geology

## (College of Letters and Science)

## The Major Programs

"Civilization exists by geological consent-subject to change without notice." - Will Durant
Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents and ocean basins, earthquakes and volcanoes, variations in global cli-
mate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of "deep time," a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences. A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification and mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification and mitigation of polluted ground water; land use planning; and the study of ancient and modern climate change.
The Program. Students interested in becoming professional geologists or continuing their geological studies at the graduate level should choose the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. Both programs allow students to emphasize an aspect of the field of particular interest to them. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study. Transfer students should have completed as much as possible of the preparatory subject matter listed below.
Internships and Career Alternatives. In recent years in California, the largest employers of geologists have been environmental and geotechnical consulting firms, with oil companies, research laboratories and government agencies also providing opportunities. Students graduating with a Bachelor's degree may get entry-level positions in the private sector or they may go on to attain their teaching credential to fill the growing need for science teachers at all pre-college levels. A Master's degree is the most versatile professional level degree, and a Ph.D. is generally required for research and academic positions. Internships are strongly encouraged for undergraduates and are a means of exploring potential career opportunities that can lead to positions after graduation. UC Davis students have interned at the California Division of Mines and Geology, the State Department of Water Resources, CAL-EPA, and various consulting firms.
Education Abroad Options. The department strongly encourages interested students to pursue a portion of their studies abroad. Within the constraints of the campus and College residence requirements, it is possible for students to complete significant portions of the Geology major at an international institution provided that the student consults with one of the undergraduate advisers and carefully plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Geology majors have spent their junior or senior years completing upper division coursework at EAP partner institutions in New Zealand, Ghana, Chile, and the United Kingdom.

## A.B. Major Requirements:

Preparatory Subject Matter ...............40-43
Geology 3, 3L, 50, 50L, 60................... 13
Mathematics 16A-16B or 21A-21B........6-8
Chemistry 2A-2B .................................. 10
Physics 7A-7B ......................................... 8
Statistics 13 or 13V or 32 or 100..........3-4
Depth Subject Matter ............................... 36
Geology 101, 101L, 103, 107, 107L, 108, 109, 109L
Additional upper division electives chosen
from upper division courses in geology.
Upper division courses in related fields may satisfy this requirement if approved in
advance by the major adviser
... 16
Total Units for the Major ...................76-79
Recommended. Chemistry 100 or Hydrologic Science 134, Physics 7 C.
B.S. Major Requirements:UNITS
Preparatory Subject Matter ..... 57-59
Geology 3, 3L, 50, 50L, 60, 62 ..... 15
Mathematics $21 \mathrm{~A}-21 \mathrm{~B}-21 \mathrm{C}$ ..... 12
Chemistry 2A-2B ..... 10
Select one of the following three options:
General Geology option:
Chemistry
2C or Geology 132 or Hydrologic Science ..... 5134
Statistics 32 or 100 ..... 3-4
Physics 7A-7B-7C or 9A-9B-9C ..... 12
Geochemistry/Petrology option:Chemistry 2C or Geology 132 orHydrologic Science 134.5-6
Statistics 32 or 100 ..... 3-4
Mathematics 21D. ..... 4
Physics 9A-9B ..... 10
Quantitative/Geophysics option: Mathematics 21D and 22A 7
Physics 9A-9B-9C ..... 15
Depth Subject Matter ..... 52
Geology 101, 101L, 103, 105, 106, 107,107L, 108, 109, 109L,110. .40Additional upper division electives chosenfrom Geology 130-194 courses (only one ofGEL/EDU 181 or GEL/EDU 183 may beapplied toward elective credit), HydrologicScience 144, 146 and related fieldsapproved in advance by major adviser. Nomore than three units upper division electivecredit for Geology 115-120 courses.Maximum of six units upper division electivecredit for Geology 192 or 194A-194B or194HA-194HB
.16
Total Units for the Major. ..... 107-111
English Composition Requirement. It is recom-mended that all majors complete the English compo-sition requirement (University Writing Program 101or 102 or 104 or the equivalent) before or concur-rently with the following courses: Geology 101,

105, 106, 108, 109L, 110.
Recommended. For the B.S. degree, one or more of the following courses are recommended for any of the options or to supplement the options as listed. Note that Mathematics 22A is not a necessary prerequisite to Physics 9C:
General Geology option: Mathematics 21D, 22A, 22B, Physics 9A-9B-9C instead of 7A-7B-7C, Statistics 104, 106, 108. Geochemistry/Petrology option: Mathematics 22A, Physics 9C, Hydrology 134 or Chemistry 2C or Chemistry 100 or Chemistry 110A or Geology 132.
Quantitative/Geophysics option:
Mathematics 22B, Statistics 32 or 100,
Hydrology 134 or Chemistry 2C or Chemistry 100 or Geology 132.
Major Advisers. K.M. Cooper, R. Motani, M. E. Oskin

## Minor Program Requirements:

Students majoring in Geology can acquire a minor in the related fields of Oceanography, Geophysics or Environmental Geology. The requirements for those minors are listed alphabetically in this Catalog.

UNITS
Geology ..... 19-24
Select one of the four emphases below.
General Geology emphasis ..... 19-20
Geology 50 (or 1) and 50L ..... 5-6
Geology 101, 107, 108, 109 ..... 11
Geology 116 or 134 .....  3
Minor A
Engineering Geology emphasis ..... 19-22
Geology 50 and 50L ..... 5
Civil Engineering 171, 171 L . .....  .5

Three courses from: Geology 134, 161,
162, Hydrologic Science 103, 144, 146
Soil Science 118, 120................... 9-12
Minor Advisers. Same as major advisers.
Geochemistry emphasis ................... 19-22
Geology 60 and either 146 or $148 \ldots . .7$
Chemistry 110A and 110B, or Materials
Science and Engineering 130 and
134.

Chemistry majors may substitute one of the elective courses for Chemistry 110B.
Two elective courses chosen from Chemistry
110C, Geology 108, 146, 148,
Hydrologic Science 134, Soil Science 102.

6-9
Chemistry 110C and Materials Science and Engineering 134 cannot both be counted toward the minor.
Minor Advisers. Same as major advisers.
Paleobiology emphasis .................... 20-2
Geology 107, 107L, 108 .................... 8
Geology 141 or 144........................... 3
At least nine additional units from:
Anthropology 151, 152, Evolution and Ecology 100, 101, 102, 105, 112, 112 L ,
140, 149, Geology 109, 150C ....... 8-9
Minor Advisers. R. Motani, G. Vermeij
Science Teaching Credential. Students who might wish to become a teacher should consult an advisor in the Mathematics and Science Teaching Program (MAST; http://mast.ucdavis.edu) at their first opportunity in order to combine the prereq uisites for a credential program with General Education requirements. MAST also offers seminars that give participants required experience in elementary, middle school, and high school classrooms. Students hoping to teach Earth and Planetary Science may prepare by satisfying the requirements for the B.S. degree in Natural Science (http:// naturalsciences.ucdavis.edu) or the A.B. degree in Geology (77-79 units) and 36 additional units of science as outlined below. Students may also prepare for the science credential by completing the B.S. degree in Geology (107-1 11 units) and an additional 24 units as indicated by the asterisks (*) below.

Biological Sciences 2A-2B-2C* ............... 15
Chemistry 2C ......................................... 5
Physics 7C ............................................. 4
Mathematics 16C ............................................ 3
Geology 36* ........................................ 4
Geology 116N*..................................... 3
Teaching Credential Subject Representative. H.W. Day. See also the Teaching Credential/M.A. Program on page 115.
Graduate Study. The Department of Earth and Planetary Sciences offers a program of study and research leading to the M.S. and Ph.D. degrees. For information regarding graduate study in geology, address the Graduate Adviser, Department of Earth and Planetary Sciences.
Graduate Advisers. M.L. Billen, E.S. Cowgill, Q. Yin

## Courses in Geology (GEL)

## Lower Division

## 1. The Earth (4)

Lecture-3 hours; discussion - 1 hour. Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have completed course 50 . Only 2 units of credit to students who have completed course 2. GE credit: SciEng | SE, SL, WE. -I, II, III. (I, II, III.) Osleger

## 2. The Blue Planet: Introduction to Earth

## Science (3)

Lecture -3 hours. Study of the solid and fluid earth and its place in the solar system. Holistic examination of how the solid earth interacts with the atmo-
sphere, hydrosphere, biosphere, and extraterrestrial environment. Not open for credit to students who have completed course 50 . Only 2 units of credit to students who have completed course 1. GE credit: SciEng | SE, SL. -I. (I.)

## 2G. The Blue Planet: Introduction to Earth

 Science Discussion (1)Discussion-1 hour. Prerequisite: course 2 concurrently. Small group discussion and preparation of short papers for course 2. GE credit: SciEng,
Wrt | SE. - I. (I.)
3. History of Life (3)

Lecture -3 hours. Prerequisite: course 1 recommended. The history of life during the three and onehalf billion years from its origin to the present day Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains. GE credit: SciEng | SE.-II. (II.) Motani

## 3G. History of Life: Discussion (1)

Discussion-1 hour. Prerequisite: course 3 concurrently. Small group discussion and preparation of short papers for course 3. GE credit: SciEng,
Wrt | SE, WE. - II. (II.) Motani

## 3L. History of Life Laboratory (1)

Laboratory - 3 hours. Prerequisite: course 3 concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution. GE credit: SciEng | SE. - II. (II.) Motani

## 4. Evolution: Science and World View (3)

Lecture-2 hours; discussion - 1 hour. Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines. GE credit: SciEng | SE, SL, WE.-I. (I.) Vermeij

## 10. Modern and Ancient Global

## Environmental Change (3)

Lecture-3 hours. Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of nonsustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history. GE credit: SciEng | SE,
SL, VL. - III. (III.) Montañez

## 12. Evolution and Paleobiology of Dinosaurs (2)

Lecture-2 hours. Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies. GE credit: SciEng | SE.l. (II.) Carlson

## 16. The Oceans (3)

Lecture-3 hours. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources. Not open for credit to students who have taken course 116. GE credit:
SciEng | SE, SL.-I, II, III. (I, II, III.) Hill, Sumner

## 16G. The Oceans: Discussion (2)

Discussion/laboratory-2 hours; term paper or discussion. Prerequisite: course 16 (concurrent). Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper. Not open for credit o students who have taken course 116G. GE credit: SciEng, Wrt | SE, WE.-II. (II.) Hill
17. Earthquakes and Other Earth Hazards (2)

Lecture -2 hours. Impact of earthquakes, tsunami, volcanoes, landslides, and floods on humans, structures, and the environment. Discussion of the causes and effects of disasters and catastrophes, and on prediction, preparation, and mitigation of natural hazards. GE credit: SciEng | SE, SL.-I, II, III. (I, II, III.) Kellogg
18. Energy and the Environment (3)

Lecture-3 hours. Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current
advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21 st century. GE credit: SciEng | SE,

## SL, WE.-II. (II.) Verosub

## 20. Geology of California (2)

Lecture-2 hours. The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. GE credit: SciEng \| SE, SL, VL. - II. (II.) Cowgill

## 25. Geology of National Parks (3)

Lecture-3 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. GE credit: SciEng | SE, SL, VL. -I. (I.) Osleger

## 28. Astrobiology (3)

Lecture-3 hours. Origin, evolution and distribution of life in our solar system and the Universe. Detecting habitable worlds, Drake equations, necessities and raw materials for life, philosophical implications of the search for life elsewhere. GE credit:
SciEng \| SE, SL. -I. (I.) Yin

## 30. Fractals, Chaos and Complexity (3)

Lecture/discussion-3 hours. Prerequisite: Mathematics 16 A or 21 A . Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. (Same course as Physics 30.) GE credit: SciEng | QL, SE. - (II.) Rundle
32. Volcanoes (3)

Lecture-3 hours. Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE credit:
SciEng | SE.-III. (III.) Cooper

## 35. Rivers (3)

Lecture-3 hours. Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips. GE credit: SciEng | SE, SL.

## 36. The Solar System (4)

Lecture-3 hours; discussion - 1 hour. Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course 113-113G.) GE credit: SciEng, Wrt | SE, VL, WE.-III. (III.) Osleger

## 50. Physical Geology (3)

Lecture-3 hours. Prerequisite: high school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for course 1 or the equivalent may receive only 2 units for course 50. GE credit: SciEng | SE, SL.-I. II. (I, II.) Billen, Lesher, Zierenberg

## 50L. Physical Geology Laboratory (2)

 Laboratory-6 hours. Prerequisite: course 50 (preferably taken concurrently). Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for course 1 L or the equivalent may receive only 1 unit for course 50L. GE credit: SciEng \| SE. - I, II. (I, II.) Billen, Lesher
## 60. Earth Materials: Introduction (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Chemistry 2A; Mathematics 16A or 21 A ; course 1 or $50,50 \mathrm{~L}$. Physical and chemical properties of
rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations.
GE credit: SciEng | SE.-I. (I.) Day
62. Optical Mineralogy (2)

Lecture-1 hour; laboratory-3 hours. Prerequisite: course 60 (may be taken concurrently); high school physics is strongly recommended. Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section. GE credit:
SciEng | SE, VL. - I. (I.) Day

## 81. Learning in Science and Mathematics

 (2)Lecture/discussion-2 hours; field work-2 hours. Limited enrollment. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning (Same course as Education 81.) (P/NP grading only.) GE credit: SS, VL, WE. -I, II, III. (I, II, III.)

## 91. Geology of Campus Waterways (1)

 Lecture/discussion-1 hour; fieldwork-1 hour. Research characterizing geological processes in waterways on campus including links among hydrologic, atmospheric, physical, and human processes; carbon cycling and interpreting processes from sediments; field research techniques; research project design and implementation; implications of results for society and environmental policy. May be repeated for credit three times. (P/NP grading only.) GE credit: SE, SL. - Sumner
## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor; lower division standing. Work-learn experience on and off campus in all subject areas offered by the department. Internships supervised by a member of the faculty. May be repeated for credit up to 12 units. (P/NP grading only.) GE credit: SE. -I, II, III. (I, II, III.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. May be repeated for credit. May be repeated for credit up to three times. (P/NP grading only.) GE credit: SE. -I, II, III. (I, II, III.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor; lower division standing. (P/NP grading only.) GE credit: SE.

## Upper Division

## 101. Structural Geology (3)

Lecture-3 hours. Prerequisite: courses 50 and 50L, Physics 7A or 9A, Mathematics 16B or 21B, or consent of instructor. Study of processes and products of rock deformation. Introduction to structural geology through a survey of the features and geometries of faults and folds, techniques of strain analysis, and continuum mechanics of rock deformation. GE credit: SciEng | SE. - II. (II.) Cowgill, Oskin

## 101L. Structural Geology Lab (2)

Laboratory-6 hours; fieldwork-2 hours. Prerequisite: courses 50 and 50L, Physics 7A or 9A, and 101 (may be taken concurrently); or consent of instructor. Class size limited to 15 students per session. Laboratory study of the processes and products of rock deformation. Introduction to the practice of structural geology through observations and analysis of rock deformation, including field measurement techniques and geologic mapping. GE credit: SciEng | SE, VL.-II. (II.) Cowgill, Oskin

## 103. Field Geology (3)

Fieldwork and laboratory-9 hours; 7-8 days on weekends during quarter. Prerequisite: course 101L or consent of instructor. Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. GE credit: SciEng | SE, VL, WE. - III. (III.) Cowgill

## 105. Earth Materials: Igneous Rocks (4)

 Lecture-2 hours; laboratory-6 hours. Prerequisite: courses 60, 62; Mathematics 16A or 21A; Chemistry 2B (may be taken concurrently). Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Wrt \| SE,WE. - II. (II.) Cooper, Lesher

## 106. Earth Materials: Metamorphic Rocks

 (4)Lecture -2 hours; laboratory -6 hours. Prerequisite: course 105, Chemistry 2B, Mathematics 16A or 21 A . Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SciEng, Wrt | SE, WE.-III. (III.) Day

## 107. Earth History: Paleobiology (3)

 Lecture-3 hours. Prerequisite: courses 3-3L or Biological Sciences 1B. The evolution and ecological structure of the biosphere from the origin of life to the present. GE credit: SciEng | SE.-I, III. (II, III.) Carlson, Motani
## 107L. Earth History: Paleobiology

Laboratory (2)
Laboratory-6 hours. Prerequisite: courses 3-3L or Biological Sciences 1B; course 107 (may be taken concurrently). Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory. GE credit: SciEng | SE.—III. (III.) Carlson, Motani

## 108. Earth History: Paleoclimates (3)

Lecture-3 hours. Prerequisite: course 1 or Geology/Environmental Science and Policy 116; and Chemistry 2A; or consent of instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SciEng, Wrt \| SE, SL, WE.III. (III.) Spero, Montañez

## 109. Earth History: Sediments and Strata

 (2)Lecture - 2 hours. Prerequisite: courses 50-50L. Principles of stratigraphic and sedimentologic analysis. Evaluation of historical and modern global changes in sedimentation within terrestrial and marine environments. Examination of the plate tectonic, climatic and oceanographic factors controlling the distribution and exploitation of economic fluids within sedimentary rocks. GE credit: SciEng | SE. - II. (II.) Sumner

## 109L. Earth History: Sediments and Strata

 Laboratory (2)Laboratory-6 hours (includes four 1-day field trips). Prerequisite: course 109 (may be taken concurrently). Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit: SciEng, Wrt | SE, WE.-II. (II.) Sumner

## 110. Summer Field Geology (8)

Fieldwork-8 hours/day, 6 days/week for six weeks. Prerequisite: courses 103, 109; course 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. GE credit: SciEng, Wrt \| SE, VL, WE. -IV. (IV.) McClain, Oskin, Cowgill
115. Earth Science, History, and People (4) Lecture-3 hours; discussion-1 hour. Prerequisite: upper division standing; course 1. Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: SciEng or SocSci, Wrt | OL, SE, WE.-III. (III.) Verosub

116 N . Oceanography (3)
Lecture-2 hours; laboratory-3 hours; field work. Prerequisite: one of Geology 1, 2, 16 or 50. Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as Environmental Science \& Policy 116N.) GE credit: SciEng | SE, SL.-II. (II.) Hill, McClain, Spero
120. Origins: From the Big Bang to Today (3) Lecture-3 hours. Limited enrollment. Long-term and large-scale perspectives on the origins of the universe, stars and planets, life, human evolution, the rise of civilization and the modern world. Multi-disciplinary approach to 'Big History' involving cosmology, astronomy, geology, climatology, biology, anthropology, archeology and traditional history. GE credit: SciEng | SE.-II. (II.) Osleger

## 129. Sample Preparation and Techniques

 for Petrology (1)Laboratory-3 hours. Prerequisite: courses 60-60L. Introduction to petrographic laboratory techniques for petrographers. Topics covered may include thin and polished section preparation, rock crushing/ grinding, mineral separation, staining, and photomicroscopy. (P/NP grading only.) GE credit: SE.

## 130. Non-Renewable Natural Resources (3)

 Lecture-3 hours. Prerequisite: course 1. Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects. Offered in alternate years. GE credit: SciEng | SE, SL.-l. (I.) Verosub
## 131. Risk: Natural Hazards and Related

 Phenomena (3)Lecture-3 hours. Prerequisite: upper division standing. Risk, prediction, prevention and response for earthquakes, volcanic eruptions, landslides, floods, storms, fires, impacts, global warming. GE credit: SciEng | SE, SL.-I. (I.) Rundle

## 132. Introductory Inorganic Geochemistry

 (3)Lecture-3 hours. Prerequisite: course 60, may be taken concurrently; Chemistry 2B. Nucleosynthesis of chemical elements, physical and chemical properties of elements, ionic substitution, elemental partition, distribution and transport among planetary materials, basic thermodynamics and phase diagrams, isotopic geochronometers, stable isotope fractionation, mixing and dilution, advection and diffusion, geochemical cycles. - (I.) Yin

## 134. Environmental Geology and Land Use

 Planning (3)Lecture-3 hours. Prerequisite: one course in Geology, preferably course 50 or 1 , or consent of instructor. Geologic aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources. GE credit: SciEng, Wrt | SE, WE. - II. (II.) Montañez,

## 136. Ecogeomorphology of Rivers and

 Streams (5)Lecture-1 hour; discussion/laboratory-2 hours; fieldwork; term paper or discussion. Prerequisite: upper division or graduate standing in any physical science, biological science, or engineering, and consent of instructor. Integrative multidisciplinary field analysis of streams. Class project examines hydrology, geomorphology, water quality and aquatic and riparian ecology of degraded and pristine stream systems. Includes cooperative two-week field survey in remote wilderness settings with students from diverse scientific backgrounds. Restricted to advanced students in the physical sciences, biological sciences, or engineering. GE credit:
SciEng | SE, WE. - III. (III.)

## 138. Introductory Volcanology (4)

Lecture-2 hours; fieldwork-6 hours. Prerequisite: upper division standing, course 60 and 109 or the equivalents, or consent of instructor. Principles of physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field component. GE credit: SciEng | SE. - (I.) Zierenberg

## 139. Rivers: Form, Function and

## Management (4)

Lecture -3 hours; fieldwork - 3 hours. Prerequisite: courses 50,50L, or equivalent; Mathematics 16 B or 21 B recommended. Analysis of river form and processes, emphasis on fluvial geomorphology, and river and stream restoration; case studies to illustrate concepts and applications. Two weekend field trips required. GE credit: SciEng | SE. - (I.)

## 140. Introduction to Process

## Geomorphology (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: course 1 or 50 or equivalent; Mathematics 16 B or 21B, or equivalent; or consent of instructor. Quantitative description and interpretation of landscapes with emphasis on the relationships between physical processes, mass conservation, and landform evolution. Topics covered include physical and chemical weathering, hillslopes, debris flows, fluvial systems, alluvial fans, pedogenesis, eolian transport, glaciation and Quaternary geochronology. Offered in alternate years. - I. Oskin

## 141. Evolutionary History of Vertebrates (3)

Lecture-3 hours. Evolutionary history of vertebrates; fossil record and phylogeny; timing of major evolutionary events; appearance of major vertebrate groups; physical constraints in vertebrate evolution; paleobiogeography of vertebrates; effect of continental movement on vertebrate evolution; dinosaurs and other strange vertebrates. Offered in alternate years. GE credit: SciEng | SE. - (II.) Motani
141 L. Evolutionary History of Vertebrates Laboratory (1)
Laboratory-3 hours. Prerequisite: course 141 (may be taken concurrently). Augments lecture course 141 through handling of specimens enabling in-person examination of three dimensional features observed in vertebrate skeletons, both fossil and living.
Offered in alternate years. GE credit:
SciEng | SE. - (II.) Motani

## 142. Basin Analysis (3)

Laboratory - 3 hours; lecture-2 hours. Prerequisite: courses 50,50L, and 109. Analysis of sedimentary basins from initiation to maturity, including controls on sedimentary fill, subsidence analysis, sequence stratigraphy, core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered in alternate years. GE credit:

## SciEng | SE, VL.-(I.) Sumner

143. Advanced Igneous Petrology (5)

Lecture-3 hours; laboratory-6 hours. Prerequisite: course 105, Mathematics 16C or 21C, Chemistry 2C. Physical and chemical properties of magmatic environments and processes of igneous rock formation. Laboratory study of representative igneous rocks. GE credit: SciEng, Wrt \| SE. - Cooper, Lesher

## 144. Historical Ecology (3)

Lecture-3 hours. Prerequisite: upper division course in environmental science or ecology, or an introductory course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion, evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical perspective on the biosphere of future. GE credit: SciEng \| SE, WE. - II. (II.) Vermeij
145. Advanced Metamorphic Petrology (5) Lecture -3 hours; laboratory -6 hours. Prerequisite: course 106; Hydrologic Science 134 or Chemistry 2C; Mathematics 16C or 21C. Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites. Offered in alternate years. GE credit: SciEng, Wrt \| SE. - Day
146. Radiogenic Isotope Geochemistry and Cosmochemistry (3)
Lecture-3 hours. Prerequisite: Chemistry 2C, Physics 7C, and Mathematics 16C. Basic principles of nuclear chemistry and physics applied to geology to determine the ages of terrestrial rocks, meteorites, archeological objects, age of the Earth, to trace geological/environmental processes, and explain formation of the chemical elements in the Universe. Offered in alternate years. GE credit: SciEng | QL, SE. - (I.) Yin

## 147. Geology of Ore Deposits (4)

Lecture-3 hours; laboratory-3 hours; optional one-weekend field trip. Prerequisite: Chemistry 2C or Hydrologic Science 134, courses 60, 62, and 105. Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered in alternate years. GE credit: SciEng | QL, SE. - (III.) Zierenberg
148. Stable Isotopes and Geochemical Tracers (3)
Lecture-3 hours. Prerequisite: Chemistry 2C or Hydrologic Science 134; courses 50, 50L, 60. Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered in alternate years. GE credit: SciEng | QL, SE. - III. Zierenberg

## 149. Geothermal Systems (3)

Lecture-3 hours; fieldwork. Prerequisite: courses 50 and 50L, Chemistry 2B or consent of instructor. Geology, geochemistry, and geophysics of geothermal systems, including electrical power generation and direct use applications. Includes one day field trip on a weekend during the quarter. GE credit:
SciEng | SE.—II. (II.) Zierenberg

## 150A. Physical and Chemical

## Oceanography (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 116/Environmental Science and Policy 116; Physics 9B; Mathematics 21D; Chemistry 2C; or upper division standing in a natural science and consent of instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as Environmental Science and Policy 150A.) GE credit: SciEng | QL, SE.-I. (I.) McClain, Spero

## 150B. Geological Oceanography (3)

Lecture-3 hours. Prerequisite: course 50 or 116 Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as Environmental Science and Policy 150B.) GE credit: SciEng | SE. - II. (II.) McClain

## 150C. Biological Oceanography (4)

Lecture-3 hours; discussion-1 hour; fieldworkone weekend field trip required. Prerequisite: Biological Sciences 1A and a course in general ecology or consent of instructor. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. (Same course as Environmental Science and Policy 150C.) GE credit: SciEng | SE, SL. - IV. (IV.) Hill

## 152. Paleobiology of Protista (4)

Lecture-2 hours; laboratory-6 hours. Prerequisite: courses 107 or Biological Sciences 1A or consent of instructor. Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered in alternate years. GE credit: SciEng | SE. - Hill

## 156. Hydrogeology and Contaminant

## Transport (5)

Lecture-3 hours; laboratory-3 hours; term paper.
Prerequisite: Hydrologic Science 145, Civil and
Environmental Engineering 144 or the equivalent.

Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as Hydrologic Science 146.) GE credit: SciEng | SE.-II. (II.) Fogg

## 160. Geological Data Analysis (3)

Lecture/discussion-3 hours. Prerequisite: Mathematics 21 A or the equivalent. Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. Use of computer in lectures and homework. GE credit: SciEng | QL, SE. - (II.) Rundle

## 161. Geophysical Field Merhods (3)

Lecture/discussion-3 hours; term paper. Prerequisite: course 1 or 50, Mathematics 21C, Physics 7 C or 9C, or consent of instructor. Geophysical methods applied to determining subsurface structure in tectonics, hydrogeology, geotechnical engineering, hydrocarbon and mineral exploration. Theory, survey design and interpretation of gravity, electrical resistivity, electromagnetic, reflection and refraction seismology, and ground-penetrating radar
measurements. GE credit: SciEng | QL, SE.-I. Billen
162. Geophysics of the Solid Earth (3)

Lecture-3 hours. Prerequisite: Mathematics 21C, Physics 5C or 7C or 9C; or consent of instructor. Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered in alternate years. GE credit: SciEng | QL, SE. - (II.) Kellogg

## 163. Planetary Geology and Geophysics

 (3)Lecture-3 hours. Prerequisite: Mathematics 21C, Physics 7C or 9C, and course 50 or 36 or Astronomy 10, or consent of instructor. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. GE credit:
SciEng | QL, SE. - (III.) Yin

## 175. Advanced Field Geology (3)

Discussion-3 hours; fieldwork-6 hours. Prerequisite: consent of instructor. Advanced field studies of selected geologic terrains, interpretation and discussion of field observations. May be repeated two times for credit when instructors varies. (P/NP grading only.) GE credit: SE. - Cooper, Roeske
181. Teaching in Science and Mathematics (2)

Lecture/discussion-2 hours; field work-2 hours. Prerequisite: major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as Education 181.) (P/NP grading only.) GE credit: SS, WE. -I, II, III. (I, II, III.) Horn
182. Field Studies in Marine Geochemistry (2-8)
Lecture-3 hours; laboratory-1-3 hours; field-work-6-40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of seafloor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. GE credit: SciEng | SE.—Hill

## 183. Teaching High School Mathematics

 and Science (3)Lecture/discussion-2 hours; field work. Prerequisite: course $81 /$ Education 81 or course 181/Education 181 and major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as Education 183.) GE credit: SocSci | OL, SS, WE.-I, II, III. (I, II, III.) Passmore
190. Seminar in Geology (1)

Discussion-1 hour; seminar-1 hour; written abstracts. Prerequisite: major in Geology. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. May be repeated for credit. (P/NP grading only.) GE credit: SE. -I, II, III. (I, II, III.)
192. Internship in Geology (1-12)

Internship. Prerequisite: upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated for credit for a total of 10 units. (P/NP grading only.) GE credit: SE.

## 194A-194B. Senior Thesis (3-3)

Prerequisite: open to Geology majors who have completed 135 units and who do not qualify for the honors program. Guided independent study of a selected topic, leading to the writing of a senior thesis. (Deferred grading only, pending completion of course sequence.) GE credit: SciEng | SE, WE
194HA-194HB. Senior Honors Project (3-3) Independent study-9 hours. Prerequisite: open to Geology majors who have completed 135 units and who qualify for the honors program. Guided independent study of a selected topic, leading to the writing of an honors thesis. (Deferred grading only, pending completion of sequence.) GE credit: SciEng | SE, WE.
198. Directed Group Study (1-5)

Prerequisite: senior standing in Geology or consent of instructor. GE credit: SciEng | SE.

## 199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.) GE credit: SE.

## Graduate

205. Advanced Field Stratigraphy (3)

Lecture-1 hour; field work-2 hours. Prerequisite: courses 109 and 110 or consent of instructor; course 206 recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. May be repeated for credit. - (III.) Sumner

## 206. Stratigraphic Analysis (3)

Lecture-3 hours. Prerequisite: courses 109, 109L or consent of instructor; course 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. May be repeated for credit when topic differs. - II. (II.) Montañez

## 214. Active Tectonics (3)

Lecture/discussion - 3 hours. Prerequisite: graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation. - III. (III.) Oskin
216. Tectonics (3)

Lecture/discussion-3 hours. Prerequisite: course 101 or consent of instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth's deformed belts. Offered in alternate years. - Cowgill

## 217. Topics in Geophysics (3)

Lecture-1 hour; seminar-2 hours. Prerequisite: consent of instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. May be repeated for credit. - (I.) I. Billen, Kellogg, McClain
218. Analysis of Structures in Deformed Rocks (3)
Seminar-3 hours. Prerequisite: courses 100, 100L, 101, 101L, 170; or consent of instructor. Recent advances in the understanding and analysis of structures in brittlely and ductilely deformed rocks Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered in alternate years. - (l.) Cowgill
219. Fracture and Flow of Rocks (3)

Lecture-3 hours. Prerequisite: courses 100, 101, Mathematics 21 or 16, Physics 7 or 9 , or consent of instructor. Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered in alternate years. - (III.) Billen
220. Mechanics of Geologic Structures (3) Lecture-3 hours. Prerequisite: course 170, Mathematics 21 C , Physics 9 A or 5 A , or consent of instructor; Mathematics 21D and 22A recommended. Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic structures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered in alternate years.
226. Advanced Sedimentary Petrology (3) Lecture-2 hours; laboratory-3 hours. Prerequisite: course 144 or consent of instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. May be repeated for credit when topic differs. - Sumner
227. Stable Isotope Biogeochemistry (4) Lecture-2 hours; laboratory-6 hours. Prerequisite: graduate standing and consent of instructor. Discussion and application of stable isotope techniques for scientific research problems. Course emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory will develop basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes. - Spero
228. Topics in Paleoceanography (3)

Lecture-3 hours. Prerequisite: courses 108, 150A or consent of instructor. Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the geologic record. Topics vary. May be repeated for credit. Offered in alternate years. - (II.) Spero

## 230. Geomorphology and River Management (3)

Seminar-3 hours. Prerequisite: graduate standing, course 139 or equivalent. Impacts of management and land use activities on the geomorphology of rivers and streams. Evaluation and use of analytical tools for river assessment. Assessment of river and stream restoration strategies and emerging issues in river management. May be repeated for credit when topic differs.
232. The Oceans and Climate Change (3) Lecture/discussion-3 hours. Prerequisite: graduate standing or consent of instructor. Modern climate change and linkages between the ocean-atmo-spherecryosphere-terrestrial climate system. Importance of the ocean in forcing climate change, and the impacts of anthropogenic processes on the ocean. Topics vary. May be repeated three times for credit. Offered in alternate years. - (II.) Hill
235. Surface Processes (3)

Seminar-3 hours. Prerequisite: courses 50, 50L, 139; Mathematics 21 B or 16 B recommended. Recent advances in the analysis of landforms and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. May be repeated for credit when topic differs. - (III.) Oskin

## 236. Inverse Theory in Geology and Geophysics (3)

Lecture-3 hours. Prerequisite: consent of instructor. Inversion of data for model parameters. Evaluation of parameter uncertainties. Linear and nonlinear problems for discrete and continuous models. BakusGilbert inversion. Offered in alternate years. McClain

## 238. Theoretical Seismology (3)

Lecture-3 hours. Prerequisite: consent of instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. Offered in alternate years. (P/NP grading only.) - McClain
240. Geophysics of the Earth (3)

Lecture-3 hours. Prerequisite: Earth Sciences and Resources 201, Physics 9B, Mathematics 22B. Physics of the earth's crust, mantle, and core. Laplace's equation and spherical harmonic expression of gravity and magnetic fields. Elastic wave equation in geologic media. Body and surface seismic waves. Equations of state, thermal structure of the earth. Offered in alternate years. - (III.)

## 241. Geomagnetism (3)

Lecture -3 hours. Prerequisite: graduate standing Nature and origin of the Earth's magnetic field. Pres ent field and recent secular variation. Spherical harmonic analysis. Paleosecular variation. Polarity transitions and geomagnetic excursions. Statistics of polarity intervals. Dynamo theory. Planetary magnetism. Offered in alternate years.-Verosub

## 242. Paleomagnetism (3)

Lecture-3 hours. Prerequisite: graduate standing Principles and applications of paleomagnetism. Physical basis of rock and mineral magnetism. Field and laboratory techniques. Instrumentation. Analysis of paleomagnetic data. Statistical methods. Rock magnetic properties. Geological and geophysical applications. Offered in alternate years. - Verosub

## 246. Physical Chemistry of Metamorphic

 Processes (3)Lecture-3 hours. Prerequisite: course 145, Chemistry 110A, or consent of instructor. Physiochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered in alternate years. - Day

## 247. Metamorphic Petrology Seminar (3)

Seminar-3 hours. Prerequisite: course 145 or consent of instructor; course 246 recommended. Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). May be repeated for credit when topic differs. Offered in alternate years. ( $\mathrm{S} / \mathrm{U}$ grading only.)-Day
250. Advanced Geochemistry Seminar (3) Seminar-3 hours. Prerequisite: course 146 or consent of instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geology, origin and chemistry of the oceans.

Subject varies yearly depending on student interest. May be repeated for credit. Offered in alternate years.

## 251. Advanced Topics in Isotope

## Geochemistry and Cosmochemistry (3)

Lecture/discussion - 2 hours; term paper. Prerequisite: graduate standing or consent of instructor. Astrophysical context on origin of Solar System, synthesis of chemical elements, condensation sequence, star and planet formation, cosmochronology, building blocks of planets, development on planets' layered structure, atmosphere and hydrosphere and the role of comets/asteroids for volatile delivery. May be repeated three times for credit when topics differs. Offered in alternate years. - (II.) Yin
253. Current Topics in Igneous Petrology (3) Seminar-3 hours. Prerequisite: graduate standing in Geology; course 143 or consent of instructor. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis. May be repeated for credit when topic differs. (S/U grading only.) - II. Lesher, Cooper

## 254. Physical Chemistry of Igneous

## Processes (3)

Lecture-3 hours. Prerequisite: course 143 or consent of instructor; Chemistry 110A required; Chemistry $110 B$ and 110 C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered in alternate years. - Lesher

## 255. Experimental Petrology (3)

Lecture -2 hours; laboratory -3 hours. Prerequisite: course 143 or consent of instructor. Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered in alternate years.-Lesher

## 260. Paleontology (3)

Seminar-3 hours. Prerequisite: graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. May be repeated for credit when topic differs. -I. (III.) Vermeii
261. Paleobiology Graduate Seminar 1: Evolutionary aspects (3)
Lecture-1 hour; seminar-2 hours. Prerequisite: graduate standing in Geology or a biological science; qualified undergraduates accepted on an exception-only basis. This course will treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction and phylogeny, phylogeny of major phyla, and the relation between taxonomy and phylogeny. May be repeated for credit when topic varies. - (I.) Carlson

## 262. Paleobiology Graduate Seminar:

## Methodological Aspects (3)

Lecture-1 hour; seminar-2 hours. One or more major methods used in the study of fossils: Morphometrics and three-dimensional reconstruction of fossils, phylogenetic methodology, the application of geochemical techniques, and electron microscopy. May be repeated four times for credit if topic varies. -II. Motani

## 281 N . Instrumental Techniques for Earth

## Scientists (3)

Lecture - 2 hours; laboratory -3 hours. Prerequisite: Mathematics 21A, 21B, 21 C, Physics 7A, 7B, 7 C or 9A, 9B, 9C or consent of instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research.-III. Spero, Yin

## 285. Field Studies in Marine Geochemistry

 (2-8)Lecture-3 hours; laboratory - $1-3$ hours; field-
work-6-40 hours. Prerequisite: consent of instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-
floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. - Hill

## 290. Seminar in Geology (1)

Seminar-1 hour; discussion-1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. ( $S / U$ grading only.) -I, II, III. (I, II, III.)
291. Geology of the Sierra Nevada (1)

Seminar. Prerequisite: consent of instructor. Short oral presentations by students and faculty concerning results of their past work and plans for future work in the Sierra. A written abstract is required following the format required at professional meetings. (S/U grading only.)-Day
292. River Forum (1)

Seminar-1 hour. Prerequisite: graduate standing. Review and discussion of latest research and funda mental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. (S/U grading only.) - I, II, III. (II, II, III.)

## 293. Geologic Event of the Week (1)

Discussion -0.5 hours; seminar- 0.5 hours. Prerequisite: graduate standing. Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observafions, the physical processes behind each event, the geological setting, and societal consequences. May be repeated for credit three times for up to three
units. (S/U grading only.) -Kellogg
294. Structure/Tectonics Forum (1)

Seminar-1 hour. Prerequisite: graduate student in geology or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. (S/U grading only.) -I, II, III. (I, II, III.) Roeske
295. Advanced Problems in Geodynamics (3)

Seminar-3 hours. Prerequisite: courses 100 and 101 or consent of instructor. Seminar dealing with problems in geodynamics. Topics will vary (e.g., ductile deformation mechanisms, brittle fracture, earthquake prediction, driving forces for plate tectonics, mantle convection). Emphasis on recent literature. May be repeated for credit when topic differs. Offered in alternate years. ( $\mathrm{S} / \mathrm{U}$ grading only.)
296. Advanced Problems in Tectonics (3) Seminar-3 hours. Prerequisite: course 101 or consent of instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. May be repeated for credit. Offered in alternate years. (S/U grading only.)-I. Cowgill
297. Geophysics Forum (1)

Seminar-0.5 hours; discussion-0.5 hours. Prereqvisite: graduate student status in the Geology Department, or consent of instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. May be repeated three times for credit. (S/U grading only.) - I, II, III. (II, II, III.) Kellogg
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)

## Professional

## 390. Methods of Teaching Geology (2)

Extensive writing or discussion -2 hours. Prerequisite: graduate student standing in Geology. Introduction to graduate-level writing and undergraduatelevel teaching skills in geology. Persuasive (proposal) writing workshop; discussions on campus teaching resources, presenting information, managing class-
room dynamics, evaluating student performance Participation in teaching program required for Ph.D. in Geology. (S/U grading only.) -I. (I.) Billen

## 391. Ethical Issues in Earth Sciences (1)

Seminar-1 hour. Prerequisite: graduate standing in Geology or consent of instructor. Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. Offered in alternate years. ( $S / U$ grading only.)
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) - I, II, III. (I, II, III.)

## Geophysics

## (College of Letters and Science)

Geophysics is the study of the physical properties and processes within and surrounding the Earth. Many problems in the Earth Sciences require geophysical techniques for study. The interdisciplinary minor in geophysics is for students with backgrounds in the physical sciences, engineering and other fields who are interested in pursuing a graduate or professional career in geophysics, or those who desire a career in the energy, minerals, or environmental industries. The minor is sponsored by the Department of Earth and Planetary Sciences in 2119 Earth and Physical Sciences Building.

## Minor Program Requirements:

Geophysics........................................ 19-26
Engineering 6 or Computer Science
Engineering 30 or Mechanical
Engineering 5 $\qquad$
Choose two courses from the following:
Geology 160, 161, 162, 163 ................ 6
Applied Science Engineering 115............ 4
One course sequence chosen from the
following:
5-12
(a) Atmospheric Science 120, 121A, 121B or,
(b) Geology 101, 101 L or,
(c) Mathematics $118 \mathrm{~A}, 118 \mathrm{~B}, 118 \mathrm{C}$ or, (d) Physics 104A or Engineering 180; and Physics 105A; and Engineering 104 or Hydrology 103N or Physics 105C
Minor Adviser. Magali Billen, Department of
Earth and Planetary Sciences in 2129 Earth and
Physical Sciences Building 530-754-5696

## German

(College of Letters and Science)
Elisabeth Krimmer, Ph.D., Chairperson of the Department
Department Office. German and Russian
213 Sproul Hall 530-752-1219;
http://german.ucdavis.edu

## Faculty

Carlee Arnett, Ph.D., Associate Professor
Jaimey Fisher, Ph.D., Associate Professor
Gail Finney, Ph.D., Professor
Distinguished Teaching Award-Graduate/ Professional
Elisabeth Krimmer, Ph.D., Professor
Sven-Erik Rose, Ph.D., Assistant Professor
Chunjie Zhang, Ph.D., Assistant Professor

## Emeriti Faculty

Clifford A. Bernd, Dr.Phil., Professor Emeritus
John F. Fetzer, Ph.D., Professor Emeritus

Ingeborg Henderson, Ph.D., Senior Lecturer Emerita Academic Senate Distinguished Teaching Award Winder McConnell, Ph.D., Professor Emeritus Karl R. Menges, Dr.Phil., Professor Emeritus H. Guenther Nerjes, Ph.D., Associate Professor Emeritus
Fritz Sammern-Frankenegg, Dr.Phil., Lecturer Emeritus

## The Major Program

The German major explores in depth the literature and language, the culture and commerce of the Ger-man-speaking world (primarily Germany, Austria and Switzerland). The key to the major lies in the careful balance between solid core requirements and the possibility to explore German subject areas through the lens of other disciplines, such as music, art, philosophy, history, and economics.
The Program. The department offers courses that highlight literary figures, movements and themes. These courses form the core of upper-division literature electives, but we also offer courses that discuss contemporary culture and commerce in Germanspeaking countries. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper-division courses offered in German.
Career Alternatives. Completion of the major prepares students for graduate study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter.................0-27
German 1-2-3 (or the equivalent) .........0-15 German 20, 21, 22 ... 0-12

## Depth Subject Matter

## General Program

German 101A, 101B, 103.12

German 120 or 118E .............................. 4
Four courses chosen from upper-division
offerings taught in German ................... 16
Three additional upper division courses
selected from either 104-109 or
121-198.
12
Or courses in other disciplines that focus on
German history, thought, and culture, upon
approval of the major advisor. Electives
include, but are not limited to:
Art History 176C, 177A, 177B
Comparative Literature 138, 140-142, 147
Economics 110B, 116, 160A and 160B,
162
Film Studies 142, 176A, 176B
History 142A, and 142B, 144A and 144B
Music 110A, 110C, 110D, 110 E
Philosophy 170, 175
Political Science 117, 118C, 137
Note: Many of the above electives from other disciplines have prerequisites.
The total of 44 upper-division units may include units earned in the Education Abroad Program.

## Total Units for the Major

Minor Program Requirements:
The Department offers a German minor consisting of at least 20 upper-division units of courses taught in German. Students wishing to minor in German should consult the undergraduate advisor. UNITS
German .20
Major Adviser. C. Zhang
Honors and Honors Program. The honors program consists of two quarters of research (194H) terminating in an honors thesis. For details consult the
undergraduate major advisor. Graduation with high or highest honors requires participation in the honors program.
Graduate Study. The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German Literature. Additional degree options for a designated emphasis are available through departmental affiliations with the programs in Social Theory and Comparative History, Critical Theory, Feminist Theory, and Second Language Acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Adviser.
Graduate Adviser. SE.Rose
Prerequisite Credit. Credit normally will not be given on the lower-division level for a course that is the prerequisite of a course already successfully completed.

## Courses in German (GER)

Lower Division
Course Placement: Students with two years of high school German normally continue in German 2; those with three years, German 3; those with four years, German 20.

## 1. Elementary German (5)

Discussion-5 hours; laboratory-1 hour. Introduction to German grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed German 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only.
Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a $\mathrm{P} / \mathrm{NP}$ petition is filed. Not open to students who have taken course 1A. GE credit: ArtHum | AH, WC.-I, II, III. (I, II, III.) Arnett

## 1A. Accelerated Intensive Elementary German (15)

Lecture/discussion-15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to German grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed courses 1, 2, or 3.-IV. (IV.) Arnett

## 2. Elementary German (5)

Discussion - 5 hours; laboratory - 1 hour. Prerequisite: course 1. Continuation of course 1 in areas of grammar and basic language skills. Not open for credit to students who have taken course lA. GE credit: ArtHum | AH, WC.-I, II. (I, II.) Arnett

## 3. Elementary German (5)

Discussion - 5 hours; laboratory-1 hour. Prerequisite: course 2. Completion of grammar sequence and continuing practice of all language skills through cultural texts. Not open to students who have taken course 1A. GE credit: ArtHum | AH, WC. - I, II. (I, II.) Arnett

## 6. Conversational German (4)

Discussion-3 hours; term paper. Prerequisite: course 3 . Course 6 may be taken concurrently with course 20. Designed to develop intermediate language skills with special emphasis on communication and grammatical accuracy. GE credit:
ArtHum | AH.-II
10. German Fairy Tales from the Grimms to Disney (4)
Lecture/discussion - 3 hours; term paper. Introduction to the genre of fairy tale with a focus on the Brothers Grimm and Hans Christian Andersen in their respective political/cultural contexts. Discusses filmic adaptations by Disney, the East German DEFA and Hollywood. GE credit: ArtHum, Div, Wrt | AH, VL, WE.-I. (I.) Krimmer

## 40. Great German Short Stories (in English) (4)

Lecture/discussion-3 hours; extensive writing. Major German short stories from Goethe at the end of the eighteenth century to Thomas Mann at the beginning of the twentieth century. Offered in alternate years. GE credit: AH, OL, WC, WE. - II.

## 45. Vampires and Other Horrors in Film and Media (4)

Lecture-2 hours; discussion-1 hour; film viewing -3 hours. History of representations of vampires and horror generally from the 19th through 21 st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity. (Same course as Film Studies 45.) Offered in alternate years. GE credit:

ArtHum | ACGH, AH, DD, OL, VL, WC, WE. - II, III. Fisher

## 48. Myth and Saga in the Germanic Cultures (4)

Lecture-3 hours; term paper. Knowledge of German not required. Reading in English translation from the Norse Eddas, the Volsung and Sigurd-Siegfried cycles, and the Gudrun lays; literary mythology in German Romanticism culminating in Wagner's "total art-work" concept and The Ring of the
Nibelung cycle. May not be counted toward major in German. GE credit: ArtHum, Wrt | AH, WC,
WE.-I. (I.)

## 49. Freshman Colloquium (2)

Seminar-2 hours. Prerequisite: open only to students who have completed 40 or fewer quarter units of transferable college-level work. Readings, discussion and written projects treating topics such as com-munist-capitalist tension in German literary culture; masculine "versus" feminine authorial consciousness; disintegration and reconstitution of language reflecting cultural transformation; exorcising post-Holocaust national guilt and individual frustration-
Germany's new European "mission." - II. (II.)

## 92. Field Work in German (1-12)

Internship-3-36 hours. Prerequisite: lower division standing. Total immersion program in Germany or a German speaking setting in the U.S. to further develop students' proficiency in the German language. (P/NP grading only.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

101 A. Survey of German Literature, 8001800 (4)
Lecture/discussion-3 hours. Prerequisite: course 22. German literature from the Middle Ages to Classicism (800-1800) with an overview of major movements and authors. GE credit: ArtHum | AH, WC, WE. -I. (I.)
101 B. Survey of German Literature, 1800Present (4)
Lecture/discussion-3 hours. Prerequisite: course 22. German literature from the Age of Romanticism (1800) to the present with an overview of major movements and authors. GE credit: ArtHum | AH.II. (II.)
103. Writing Skills in German (4)

Lecture -3 hours; extensive writing. Prerequisite: course 22. Practice in different kinds of writing, such as abstracts, correspondence, lecture summaries, analysis of or response to short literary texts. GE credit: ArtHum | AH, WC, WE.

## 104. Translation (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 22. Exercises in German-to-English, English-to-German translation using texts from the areas of culture and commerce. Not open for credit
to students who have completed course 104A.
Offered in alternate years. GE credit: ArtHum | AH, OL, VL, WE.
105. The Modern German Language (4) Lecture/discussion-3 hours; extensive writing. Prerequisite: course 22. Introduction to the linguistic analysis of contemporary German, including its phonology, morphology, syntax and semantics, as well as sociolinguistic considerations. GE credit: ArtHum, Wrt | AH, OL, WC, WE. -I. (I.) Arnett

## 109A. Business German (4)

Lecture/discussion-3 hours; laboratory-1 hour. Prerequisite: course 22 or consent of instructor. Specialized language course using business-oriented information and publications as the basis for discussions, roleplay, reports, compositions and translations. Offered in alternate years.-II.
109B. Advanced Business German (4) Lecture/discussion-3 hours; laboratory/discus-sion-1 hour. Prerequisite: course 22 or consent of instructor. Specialized advanced language course providing in-depth study of major business topics with the help of authentic texts and videos. Offered in alternate years. - (II.)

## 112. Topics in German Literature (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: upper division standing or consent of instructor. Investigation of significant themes and issues within their European context. Knowledge of German is not required. May be repeated one time for credit. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC. - III.

## 113. Goethe's Faust (4)

Discussion-3 hours; term paper. Knowledge of German not required. Intensive study of Goethe's Faust in its entirety. Discussions and readings in English; reading the text in the original is encouraged. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE. - II, III.

## 114. From Marlene Dietrich to Run, Lola

 Run: German Women and Film (4)Lecture/discussion-3 hours; extensive writing. Knowledge of German not required. Women in German film from the Weimar Republic to present, with special emphasis on conceptualizations of gender, historical and political context, aesthetic and filmic innovations. GE credit: ArtHum, Wrt | AH, VL, WC, WE. - III. (III.)
Krimmer

## 115. German Literature Since 1945 (4)

Lecture -3 hours; extensive writing. Knowledge of German not required. Major writers of the post-war generation of Austria, Switzerland and Germany: novelists, such as Böll, Grass, Johnson, Walser, Handke; playwrights such as Frisch, Dürrentmatt and Hochhuth; and poets, such as Celan, Enzensberger, and Aichinger. May be repeated for credit in different topic area. GE credit: ArtHum, Wrt | AH, WC, WE.-I. (I.)

## 116. Readings in Jewish Writing and Thought in German Culture (4)

Lecture-3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German-speaking world; what it means to be "other" in the mainstream culture. No credit will be given to those students who have completed Humanities 121. May be repeated two times for credit if topic differs. Offered in alternate years. (Same course as Jewish Studies 116.) GE credit: ArtHum, Div, Wrt. | AH, OL, WC, WE.-(I.)

## 117. After the Catastrophe: Jews and

## Jewish Life in Post-1945 Germany (4)

Lecture/discussion-3 hours; term paper. Jews and Jewish culture in post-1945 Germany, with special attention given to literature, historical debates, photography, film, as well as websites and other new media. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, VL, WC, WE. -II, III. Fisher

118A. Vienna at the Turn of the Twentieth Century (The End of the Habsburg Empire) (4)

Lecture - 1 hour; discussion - 2 hours; extensive writing. Knowledge of German not required. Cultural ferment in Vienna, capital of the multinational Habsburg empire, at the turn of the century, with consideration of innovations in literature, music, graphic arts, architecture, philosophy and psychology, heralding European modernism. Offered in alternate years. GE credit: ArtHum, Wrt \| AH, WC.-I. Finney
118 B. Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism (4)
Lecture-1 hour; discussion-2 hours; extensive writing. Knowledge of German not required. Expressionism in graphic arts, literature, film, New Objectivity, Brecht and Bauhaus considered in the context of the failure of the German experiment in democracy, the Weimar Republic of 1919-33. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE. - III.
118C. Germany Under the Third Reich (4) Lecture/discussion-3 hours; term paper. Prerequisite: background in modern European history; course 118B recommended. No knowledge of German required. Interdisciplinary study of German society and culture during the Third Reich (193345); readings in aesthetics, history, and philosophy; study of Fascist culture in literature, film, architecture, and the graphic arts; focus on everyday life in Hitler's Germany. GE credit: ArtHum, Wrt | WC, WE. -I.
118 E . Contemporary German Culture (4) Lecture/discussion-3 hours. Prerequisite: course 22. The political, economic, social and cultural scene of Germany today. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE.-II.

## 119. From German Fiction to German Film

 (4)Lecture-3 hours; discussion-1 hour; term paper. Examines a number of film adaptations of major German prose works and plays to ascertain the types of changes involved in the shift in medium and the positive and negative effects achieved by such transferences. GE credit: ArtHum, Wrt \| AH, OL, VL, WC.-II. (II.)
120. Survey of German Culture (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 22. Major developments in German arts, philosophical thought, social institutions, and political history. GE credit: ArtHum | AH, WC, WE.-III. (III.) Bernd

## 121. The Medieval Period in German

 Literature (4)Discussion-3 hours; extensive writing. Prerequisite: course 22. Literary-philosophical profile of the Mittelhochdeutsche Blütezeit in terms of the significant epics, romances, and lyric poetry. Readings in German. Offered in alternate years. GE credit: ArtHum | AH.-II.
122. Reformation and Baroque (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 22. Exemplary literary works of the 16 th and 17th centuries tracing the principal lines of development and showing the reflection in literature of the social, as well as religious, scenes. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.-I.
123. Literature of the Classical Age (4)

Discussion-3 hours; term paper. Prerequisite: course 22. A critical assessment of principal works of Goethe and Schiller within the historical and philosophical context of their times. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.-I.

## 124. Major Movements in German

 Literature (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 22. Significant movements and schools in German literary history (e.g., the medieval troubadours, Storm and Stress, the romanticists, the George Circle, the expressionists), with emphasis on the broader cultural dynamics and ideologies as
these apply to individual literary works. May be repeated one time for credit when topic differs. Offered in alternate years. GE credit: ArtHum | AH, WC.-II.

## 125. Short Fiction: 1880-1914 (4)

Lecture-3 hours; term paper. Prerequisite: course 22. Reading of short German fiction from the fin-desiècle period and representative of various prose styles and cultural currents. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.-III.

## 126. Modern German Literature (4)

Discussion-3 hours; extensive writing. Prerequisite: course 22. Selections from significant works of major contemporary writers, such as Hesse, Mann, Kafka, Rilke, Brecht, Grass. May be repeated one time for credit with consent of adviser. GE credit: ArtHum | AH, WC, WE.-I. (I.) Finney

## 127. Major Writers in German (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 22. Examination of representative works by a major writer, set in the broader cultural context of the relevant period or movement. May be repeated one time for credit when topic differs.
Offered in alternate years. GE credit: ArtHum | AH, WC, WE. -I, III.

## 129. Postwar Women Writers (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: course 22. Major writers in both Germanies, Austria, and Switzerland since 1945. Topics include the concept of a feminist aesthetics, East vs. West German writers, and the status of minority women writers in Germany (Jewish, Turkish-German, Afro-German). GE credit: ArtHum, Div | AH, WC, WE.-I. (I.) Finney
131. German Lyric Poetry (4)

Lecture-3 hours; term paper. Prerequisite: course 22. Study of the genre of lyric poetry from the late Middle Ages through Renaissance, Baroque, Classical, Romantic, and Modern periods in correlation with other literary forms and the social climate of each period. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.-I.

## 132. The German Novelle (4)

Lecture-3 hours; term paper. Prerequisite: course 22. Inquiry into the art of the "Novelle" through analysis of the materials and formal devices of representative authors from Goethe to Kafka. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.-I.

## 133. The German Drama (4)

Lecture-3 hours; term paper. Prerequisite: course 22. Readings in the works of Germany's leading dramatists from the eighteenth century to the present day, such as Lessing, Goethe, Schiller, Kleist, Büchner, Hauptmann, Brecht. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE. - (III.)

## 134. Topics in German Intellectual History

 (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 22. Topics in German intellectual history with materials from a number of periods, genres, and disciplines. May be repeated two times for credit when topic differs. GE credit: ArtHum | AH, WC, WE.-I, III. (I, III.)

## 141. The Holocaust and its Literary

## Representation (4)

Lecture-2 hours; discussion-1 hour; term paper. Knowledge of German not required. Aesthetic representation and metaphorical transformation of the Holocaust in its human and historical perspectives. Offered in alternate years. GE credit: ArtHum,
Wrt \| AH, WC, WE. - (I.)

## 142. New German Cinema (4)

Lecture/discussion-3 hours; extensive writing. German filmmakers of the 1960 s -1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorf, Kluge, Wenders. Knowledge of German not required. May be repeated for credit with consent of instructor. (Same course as Film Studies 142) GE credit: ArtHum, Wrt \| AH, OL, VL, WC, WE.-I. (I.) Fisher
143. Language Through Media (4)

Lecture/discussion - 3 hours; term paper. Prerequisite: course 22. Study of contemporary German-language news media (press, video, film, CD-ROM, internet) for insight into political and cultural developments in the German-speaking countries. Offered in alternate years. GE credit: ArtHum | AH, OL, VL,

## WC, WE. - II. Arnett

## 144. Marx, Nietzsche, Freud (4)

Lecture/discussion-3 hours; term paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. Offered in alternate years. (Same course as Humanities 144.) GE credit: ArtHum, Wri | AH, WC.-III.

## 160. Love in the Middle Ages (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 22. Analysis of the phenomenon of love in selected medieval lyrical poems and romances of the twelfth and thirteenth century Blütezeit. Origins of courtly love, love and individualism, love and the Church, love and adultery. Offered irregularly. GE credit: ArtHum | WC, WE.-I.

## 168. Multiculturalism in German Literature

 (4)Lecture/discussion-3 hours; term paper or discus-sion-1 hour. Prerequisite: course 22. Examples of German Literature from the High Middle Ages to the present that explore the "encounter with the other" (people of color, different beliefs and cultures, and inner-German minorities). Offered in alternate years. GE credit: ArtHum, Div | AH, OL, VL, WC, WE.-II.

## 176A. Classic Weimar Cinema (4)

Lecture/discussion-3 hours; film viewing-3 hours. Prerequisite: Humanities 1. German Weimar (19191933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama. Not open for credit to students who have completed Humanities 176. Offered in alternate years. (Same Course as Film Studies 176A.) GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE.-I. Fisher

## 185. The Age of Bismarck (4)

Discussion-3 hours; term paper. Prerequisite: course 22. Notable literary repercussions of the zenith of Germany's international status at the time of Bismarck's Chancellorship. The poetry of Storm, the prose of Fontane, the drama of Hauptmann. Offered in alternate years. GE credit: ArtHum | AH, WC, WE. - II.
192. Field Work in German (1-12)

Internship-3-36 hours. Prerequisite: course 109A or consent of instructor. Total immersion program in Germany or a German speaking setting in the U.S. to further develop student proficiency in the German language. May be repeated two times or up to 12 units of credit with consent of instructor. (P/NP grading only.)
194HA-194HB. Honors Program (3-3)
Independent study -2 hours; term paper. Prerequisite: open only to majors with a 3.500 minimum GPA in at least 135 graduation units. (A) Research of an integrative nature (in either "General" or "Area Studies Emphasis" fields of major), guided by thesis advisor chosen by student; (B) Writing of Honors Thesis on topic selected by student in consultation with thesis advisor. (P/NP grading only. Deferred grading only, pending completion of course sequence.)

## 197T. Tutoring in German (1-4)

Tutorial-3-12 hours. Prerequisite: consent of German Program Director. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with department courses. May be repeated up to eight units of credit. (P/NP grading only.)
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

202. Middle High German (4)

Discussion-3 hours; lecture-1 hour. Outline of grammar; selections from Middle High German epic, romance, and lyric poetry. - II. (II.)
206. Cognitive Grammar for Applied Linguists (4)
Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing. Analysis of grammar and application of cognitive grammar to language instruction. Syntactical problems and analyses relevant to the language the student will teach. Offered irregularly. - III. Arnett
210. Techniques of Literary Scholarship (4)

Seminar-3 hours; term paper. The bibliographical, organizational, and methodological tools and resources for advanced, independent research.-I. (I.)

## 211. Concepts in Literary Theory (4)

Seminar-3 hours. Advanced course in concepts of literary theory and criticism. Discussion of the emergence of theoretical concepts and their impact on the understanding and appreciation of literary works. Discussion in German and English, readings in German. - II. (II.)
212. Contemporary Approaches to Literary Theory (4)
Seminar-3 hours; term paper. Study of contemporary theoretical approaches such as structuralism, deconstruction, feminism, Marxism/Frankfurt School, and reception theory in conjunction with the works of major authors. - III. (III.)
239. Narrative and Narrative Theory (4)

Seminar-3 hours; term paper. Studies, in a theoretical and literary historical context, major elements of 19th- and 20th-century narrative, such as techniques of framing, refraction, and montage; narrative perspective; mimesis; and self-consciousness. Focuses on paradigmatic prose texts alongside a spectrum of critical approaches. Offered in alternate years.-I. Finney

## 240. Forms of German Verse (4)

Seminar-3 hours; term paper. The development of German verse from the Middle Ages to the present, with special emphasis on different techniques of text analysis and interpretation. May be repeated for credit with consent of instructor. Offered in alternate years.-II. Bernd
241. The German Drama (4)

Seminar-3 hours; term paper. The major forms of German drama from its origins to the middle of the twentieth century. May be repeated for credit with consent of instructor. - I. (I.) Finney

## 242. The German Novelle (4)

Seminar-3 hours; term paper. The major German Novellisten, with particular emphasis on the flowering of this genre in the nineteenth century. May be repeated for credit with consent of instructor. - II. (II.)

## 243. Fontane and the Rise of the Modern

 German Novel (4)Seminar-3 hours; term paper. Fontane, the father of the modern German novel and the chief German representative of the European novel at its greatest, in the context of the nineteenth-century European political and social scene.-II. (II.)

## 244. Gender and Comedy (4)

Seminar-3 hours; term paper. Studies of genre and gender in German-language comedy by male and female writers from the 18 th century to the present. Authors treated include Lessing, Kleist, Büchner, Ebner-Eschenbach, Hauptmann, Hofmannsthal, Frisch, Langner, and Jelinek. Offered in alternate years. - III. Finney
252. The Writings of Lessing (4)

Seminar-3 hours; term paper. Study of Lessing's theory of literature with particular emphasis upon his critical attacks on French drama.-l. (I.)
253. Goethe (4)

Seminar-3 hours; term paper. Study of the origins of Goethe's thought in German Pietism, and his principal artistic, autobiographical, scientific, and philosophical works.-I. (I.)
254. Schiller (4)

Seminar-3 hours; term paper. A critical analysis of Schiller's major works and his impact on the intellectual climate in Germany during the late eighteenth and early nineteenth centuries. - III. (III.)
255. Aesthetics in the Age of Goethe (4) Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Emergence of aesthetic autonomy from eighteenth century normative poetics during the Age of Goethe. The shift from a model based on the imitation of nature (and the Ancients) to a new concept grounded in the individuality of aesthetic experience.-I.

## 257. Heinrich von Kleist (4)

Seminar-3 hours; term paper. Kleist's important dramatic and prose works; special attention will be given to the peculiar hermeneutic problems in modern German, French, and Anglo-American Kleist criticism. - III. (III.)

## 258. The Novels of Thomas Mann (4)

Seminar-3 hours; term paper. Reading of selected novels with emphasis on aesthetic techniques, originality, ethical and political views, and influence on the contemporary literary scene in Germany. - II. (II.)

## 259. Studies in Kafka (4)

Seminar-3 hours; term paper. Study of Kafka's narrative techniques with special emphasis in the shorter works on the existential development from its roots in Expressionism. - II. (II.)

## 260. The Poetry of Rilke (4)

Seminar-3 hours; term paper. Study of the principal motifs, myths, images, and problems in the poetry of Rainer Maria Rilke.-I. (I.)
261. Brecht and the Epic Theater (4)

Seminar-3 hours; term paper. A reading of Brecht's works with emphasis on the ideas which impelled the development of new literary forms and concepts. - III. (III.)
262. Studies in Turn-of-the-Century Culture (4)

Seminar-3 hours; term paper. Investigates literary currents in turn-of-the-century Germany and Austria against the background of contemporaneous developments in psychology, the visual arts, philosophy, and music. Authors treated include Hauptmann,
Holz and Schlaf, Schnitzler, T. Mann, Wedekind,
Musil, Hofmannsthal. Offered in alternate years.(II.) Finney
285. Middle High German Literature (4) Lecture/discussion-3 hours; term paper. Prerequisite: consent of instructor. Extensive reading of Middle High German texts in the original language. Examines linguistic and literary problems. May be repeated for credit when topic differs. - III. (III.)

## 288. The Renaissance and Reformation in

## German Literature (4)

Seminar-3 hours; term paper. The parabolic and didactic style in Germany's literature during the sixteenth century. May be repeated for credit with consent of instructor.-l. (I.)
289. German Literature of the Baroque (4) Seminar-3 hours; term paper. The "Elegantiaideal" and the varying methods used to portray it in seven-teenth-century German literature. May be repeated
for credit with consent of instructor.-I. (I.)

## 290. The Enlightenment in German

## Literature (4)

Seminar-3 hours; term paper. Revolt against the concept of the "Elegantiaideal," and evolution of a new literature based on reason and wit. May be repeated for credit with consent of instructor.-I. (I.)

## 291. Foreign Language Learning in the <br> Classroom (4)

Seminar-3 hours; project. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in
classroom practices across commonly taught foreign languages. (Same course as French 291 and Spanish 291.)-I, II. (I, II.) Anderson, Arnett, Blake, Iwasaki
292. Sentimentality and Sturm und Drang in German Literature (4)
Seminar-3 hours. Reaction to overemphasis on Reason: theories of Hamann and Herder and works of poets such as Lenz, Leisewitz, the early Goethe and Schiller. May be repeated for credit with consent of instructor. - III. (III.)

## 293. The Classical Age of German

Literature (4)
Seminar-3 hours; term paper. Inquiry into the aesthetic and humanistic qualities of Germany's greatest literary epoch. May be repeated for credit with consent of instructor. -III. (III.)
294. The Romantic Period in German Literature (4)
Seminar-3 hours; term paper. Survey of the works of early nineteenth-century authors in reaction against the age of classicism. May be repeated for credit with consent of instructor.-I. (I.)

## 295. Poetic Realism in German Literature

 (4)Seminar-3 hours; term paper. Outstanding figures in German literature between 1840 and 1890. Important phases in their developments will be treated. May be repeated for credit with consent of instructor. - I. (I.)
296. Twentieth-Century German Literature (4)

Seminar-3 hours; term paper. Considers the revolt of the Hauptmann generation, Symbolism, Expressionism, and the chief currents of the contemporary scene. May be repeated for credit with consent of instructor.-I. (I.)
297. Special Topics in German Literature (4)

Seminar-3 hours; term paper. Various special topics in German literature, which may cut across the more usual period and genre rubrics. May be repeated for credit when topic differs.
298. Group Study (1-5)
299. Individual Study (1-12)
(S/U grading only.)
299D. Special Study for the Doctoral
Dissertation (1-12)
(S/U grading only.)
Professional
390A. The Teaching of German (2)
Lecture-2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.)-I. (I.) Arnett
390B. The Teaching of German (2)
Lecture-2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) - II. (II.) Arnett
390C. The Teaching of German (2)
Lecture -2 hours. Prerequisite: graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) - III. (III.) Arnett
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.) Arnett

## Professional <br> 400. Tutorial and Instructional Internship (1-3)

Discussion-1-3 hours. Prerequisite: graduate standing. Apprentice training in ongoing undergraduate literature courses taught by regular staff, with supple-
mentary weekly critique sessions; intern leadership of discussion sections under staff supervision. May be repeated for credit. - I, II, III. (I, II, III.)

## Global and

 International Studies
## (College of Letters and Science)

The interdisciplinary minor in Global and International Studies will enable students to learn about global and international issues at UC Davis, as well as gain first-hand academic experience abroad. The minor is also designed to give recognition for upper division course work while studying abroad. However, the minor can also be completed with approved course work taken at UC Davis.
Students will be expected to work closely with an academic adviser in developing an intellectually coherent program of study. Each proposal must be approved by the Faculty Director of UC Davis Study Abroad.
The minor is sponsored by the Humanities
Program. For more information, see http:// studyabroad.ucdavis.edu/students/.

## Minor Program Requirements:

Global and International Studies............ 24

## Arts and Humanities Emphasis:

One course from: Anthropology 4, 20,
International Relations 1, Political Science 3 or Sociology 5 . ... 4
One upper division UC Davis general course
on global or international studies in the Arts and Humanities ...................................3-4
See program advisor for a list of approved courses.
Course cluster requirement .................16-17
The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies in the Arts and Humanities.
Suggested course clusters include:
(1) Country or region-specific courses:

Western Europe; Russian and East/Central
Europe; Asia and the Pacific; Latin and
South America; Africa and the Middle East; Jewish Studies; specific countries. or
(2) Courses clustered around a thematic
field in global and international studies: people and nationalities; the individual and society, arts, language, literature and culture.
Study Abroad and International Intern-
ships. The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in a UC Davis Study Abroad, UCEAP or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Those students who are unable to study abroad or participate in an international internship may fulfill the requirement by taking approved global/international courses at
UC Davis. Students must meet with the GIS advisor and complete a Course Cluster Worksheet to demonstrate subject interrelatedness.

## Social Science Emphasis:

One course from: Anthropology 20,
International Relations 1, Political Science 3,
or Sociology 5....................................... 4

One upper division UC Davis general course on global or international studies in the Social Sciences. 3-4
See program advisor for a list of approved courses.
Course cluster requirement $\qquad$ 16-17
The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies in the Social Sciences.
Suggested course clusters for the Social Science Emphasis:
(1) Country or region-specific courses in the Social Sciences: Western Europe; Russian and East/Central Europe; Asia and the Pacific; Latin and South America; Africa and the Middle East; Jewish Studies; specific countries. or
(2) Courses clustered around a thematic field in global and international studies: world trade and development; peace and security; global environment, health, and natural resources.

## Study Abroad and International Intern-

 ships. The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in a UC Davis Study Abroad, UCEAP or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Those students who are unable to study abroad or participate in an international internship may fulfill the requirement by taking approved global/international courses at UC Davis. Students must meet with the GIS advisor and complete a Course Cluster Worksheet to demonstrate subject interrelatedness.Restrictions. No more than two courses from a single UC Davis department may be offered in satisfaction of the minor requirements.
Foreign Language Study. Students are strongly encouraged to study a foreign language, particularly the language of the country in which and about which they intend to study. However, only upper division course work may be used to fulfill requirements for the minor.

## Faculty

Nicholas Anderson, Ph.D., Assistant Professor
(Pathology and Laboratory Medicine)
April Armstrong, M.D., M.P.H., Assistant Clinical Professor (Dermatology)
Aaron Bair, M.D., M.S.c., Associate Professor (Emergency Medicine)
Matt Bishop, Ph.D., Professor (Computer Science)

Dariusz Borys, M.D., Assistant Professor (Emergency Medicine)
Robert Cardiff, M.D., Ph.D., Professor (Pathology and Laboratory Medicine)
Mary Christopher, D.V.M., Ph.D., Professor (Pathology, Microbiology, and Immunology)
Cristina Davis, Ph.D., Assistant Professor (Mechanical and Aerospace Engineering)
Estella Geraghty, M.D., M.S., M.P.H, Assistant Professor of Clinical Internal Medicine (General Medicine)
Fred Gorin, M.D., Ph.D., Professor (Neurology)
Bernd Hamann, Ph.D., Professor (Computer Science)
Calvin Hirsch, M.D., F.A.C.P., Professor (Internal Medicine and Public Health Sciences)
Michael Hogarth, M.D., Associate Professor (Pathology and Laboratory Medicine)
Anthony Jerant, M.D., Associate Professor (Family and Community Medicine)
Tae Youn Kim, Ph.D., R.N., Associate Professor (Nursing)
Patrice Koehl, Ph.D., Associate Professor (Computer Science)
James Marcin, M.D., M.P.H., Associate Professor (Pediatrics)
Thomas Nesbitt, M.D., M.P.H., Professor (Family and Community Medicine)
Hien Nguyen, M.D., M.A.S, Assistant Professor (Infectious Diseases)
Alberto Odor, M.D., Adjunct Professor (Nursing)
Sean Peisert, Ph.D., Assistant Adjunct Professor (Computer Science)
Jason Roof, M.D., Assistant Clinical Professor (Psychiatry)
J. Anthony Seibert, Ph.D., Professor (Radiology)

Hendry Ton, M.D., M.S., Associate Professor (Psychiatry)
Xiaowei Yang, Ph.D., Assistant Professor (Biostatistics)
Peter Yellowlees, M.B.B.S., M.D, Professor (Psychiatry)
Heather Young, Ph.D., R.N., G.N.P., F.A.A.N., Associate Vice Chancellor (Nursing)

## Emeriti Faculty

Richard Walters, Ph.D., Professor Emeritus (Computer Science)

## Affiliated Faculty

Mark Carroll, M.P.H., Lecturer (Pathology and Laboratory Medicine)
Jim Greene, M.D, M.S., Faculty
(Pathology and Laboratory Medicine) Wasyl Malyi, Ph.D. (Pathology and Laboratory Medicine) Michael Minear, Chief Information Officer (UC Davis Health System)
Graduate Study. The Group currently offers an
M.S. degree in Health Informatics. The program is primarily designed for clinicians (M.D., D.O., D.V.M., V.M.D., M.P.H., Pharm.D., R.N., others) and healthcare IT professionals with Bachelor's degree. The course of study provides research-oriented training that spans the use of computer systems in medicine today, including methods for clinical data acquisition, storage, and retrieval, the development, use and implementation of the electronic medical record, management of clinical data, and the use of medical decision support systems. A research project and thesis are mandatory degree requirements.
Preparation. The Group encourages applications from clinicians and healthcare IT professionals who have had experience in the manipulation of clinical information. Basic qualifications include an advanced degree in a health-related field or the equivalent in work experience. Proof of proficiency in a programming language is required. Applicants with extensive computer science or information technology background but little knowledge of clinical information would need to gain considerable practical experience in dealing with clinical information to be competitive in applying to the program.

Graduate Advisors. M. Carroll (Pathology and Laboratory Medicine), E. Geraghty (General Medicine), M. Hogarth (Pathology and Laboratory Medicine), A.Odor (Nursing), P. Yellowlees (Psychiatry)

## Courses in Health Informatics (MHI)

## Graduate

202. Computer-Based Patient Records (4)

Lecture/discussion-3 hours; discussion-1 hour. Prerequisite: current enrollment within the Health Informatics graduate program or consent of instructor. Introduction and overview of computer-based clinical record systems. Topics include data modeling, health system standards and terminologies; security, privacy and confidentiality; workflow modeling; data visualization; legal; decision support; public health; and evidence-based practice. - III. (III.) Odor

## 207. Decision Support Systems (4)

Lecture/discussion-2 hours. Prerequisite: consent of instructor. Explores decision support systems for medical application. Topics include medical decision making, uncertainty, review of existing decision support systems, knowledge engineering, data mining, and knowledge based systems. - II. (II.) Malyi

## 208. Medical Informatics in Web-Based Enterprise Computing (4)

Lecture-2 hours; discussion-2 hours. Introduction to the decision making processes and technologies that are involved in developing Web-based distributed enterprise applications in medicine. Focus on the Informatician's role as a team member. - II. (II.) Hogarth
209. Data Acquisition and Analysis (4) Lecture-2 hours; discussion - 1 hour; laboratory-3 hours. Examines the nature, acquisition, and analysis of medical data. Data ranges from signals of electrical potentials, sounds, text, images (still and motion), and data from nucleic acid and protein expression and sequencing instruments.-I. (I.) Malyi
210. Introduction to Health Informatics (4) Lecture-3 hours; discussion-1 hour. Overview course to give the student a broad exposure to the field of Health Informatics. Topics covered include, but are not limited to, networking, information systems, coding, HL7, Security, and HIPPA.-I. (I.)

## 211 V . Telemedicine (4)

Web virtual lecture-3 hours; web electronic discussion - 1 hour. Issues for the development and maintenance of a successful telemedicine program with focus on strategic planning, clinical applications, project management, risk management and legal issues; reimbursement and contracting; human resources and program sustainability.-I, II, III. II, II, III.) Yellowlees

## 212. Computer Security in Health <br> Informatics (4)

Lecture-3 hours; project. Prerequisite: course 210; 202; 209. Critical thinking about basic concepts in computer security and privacy. How the computer security and privacy impact health informatics, ranging from electronic health records to telemedicine to remote, virtual surgery. - I, II. (I, II.) Peisert

## 215. Beginning and Intermediate

Programming in M (MUMPS) (3)
Lecture-3 hours. Project-oriented approach to fundamentals of programming in ANSI Standard M (MUMPS) language. Basic syntax, Hierarchical file structure; arrays and string subscripts, indirection and extrinsic functions. (S/U grading only.) - I, II, III. (I, II, III.) Walters

## 289A-E, G, I. Special Topics in Medical

 Informatics (1-5)Lecture, laboratory, or combination. Prerequisite: consent of instructor. Special topics in (A) Data Acquisition, (B) Electronic Medical Information, (C) Computer Based Patient Records, (D) Decision Support, (E) Medical Image Analysis, (G) Biostatistics, (H) Modeling Biological Systems, (I) Coding Systems. May be repeated for credit when topic differs. -I, II, III. (I, II, III.)

## 289F. Database and Knowledge <br> Management (4)

Lecture/discussion-3 hours; term paper. Prerequisite: consent of instructor. Course objectives include understanding the informatics techniques for data capture, information management, and knowledge generation that a student will use throughout their career. May be repeated for credit. - I, II, III. (I, II,

## III.) Lynch

289H. Modeling Biological Systems (4)
Lecture-3 hours; laboratory-1 hours. Class size limited to 20 students. Create awareness of how modern computer graphics have led to VR-Sim-Rob applications, and how they are modifying the teaching of medicine and in some cases the diagnosis and treatment of patients. - II. (II.) Odor
290. Seminar in Medical Informatics (1) Seminar-1 hour. Restricted to 20 students. Discussion of current graduate research and topics in Health Informatics. Oral presentations of individual study. (S/U grading only.) -I, II, III. (I, II, III.) Odor
299. Research in Health Informatics (1-12) Independent research in Health Informatics. (S/U grading only.) -I, II, III. (I, II, III.)

## The Major Program

The History major develops critical intelligence and fosters an understanding of ourselves and our world through the study of the past-both remote and recent.
The Program. A student electing a major in History may complete Plan I or Plan II. Plan I enables students to receive a broad education in histories of several geographic areas. Plan II encourages interested students, including those preparing for graduate work in history, to enroll in a seminar, to undertake independent work, and to study the history of historical thought as part of the major. Students preferring more active engagement in research and writing are encouraged to follow Plan II.
Career Alternatives. A degree in history is excellent preparation for a professional career such as teaching, law, journalism, public administration, or business management. Professional schools in these and related fields are looking for students who can weigh conflicting evidence, evaluate alternative courses of action or divergent points of view, and express conclusions logically in everyday language. These analytical skills are stressed in history classes, and their mastery gives the history student a solid preparation for subsequent training in a specialized career.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter
(Plan I or II)
20
Five lower division courses chosen from the
following six fields, including at least two
from one field, one from a second field, and one from a third field. The fitth course can be taken from any field
d............................. 20
(a) African and Middle East History: History 6, 15
(b) Asian History: History 6, 8, 9A, 9B
(c) European History: History 3, 4A, 4B, 4C (d) Latin American History: History 7A, 7B, 7C
(e) U.S. History: History 17A, 17B, 72A, 72B
(f) World History: History 10A, 10B, 10C

Depth Subject Matter-Plan I.............40-41
Four upper division courses from one of the
fields of concentration listed below......... 16
Two upper division courses from one of the other fields of concentration listed below.
wo upper division courses from a field fields other than those chosen to satisfy the two preceding requirements. $\qquad$ .. 8
One additional upper division course chosen from any of the fields................... 4 One course from the following: History 101 or 102 or 103 (in field of
concentration) .4-5
One of the courses taken to fulfill the above
requirements must deal with pre-modern history.
Total Units for the Major, Plan I.........60-61
Depth Subject Matter-Plan II................. 42
Four upper division courses from one of the
fields of concentration listed below. Include a
two-quarter sequence of courses ............ 16
Three upper division courses from one of the other fields listed.
History 101
.12
History 102 in field of concentration (in
exceptional circumstances, a student may,
with the permission of an adviser, take the
seminar in another field)
5
History 103 in field of concentration.
One of the courses taken to fulfill the above requirements must deal with pre-modern history.
Total Units for the Major, Plan II.

## Fields of Concentration

(a) Europe: History 102A, 102B, 102C,

102D, 102E, 102F, 102I, 102P, 102X,
109A, 109B, 110A, $111 \mathrm{~B}, 111 \mathrm{C}, 112 \mathrm{~A}$,
112B, 120, 121A, 121B, 121C, 122, 125
130A, 130B, 130C, 131A, 131B, 131C,
$132,133,134 \mathrm{~A}, 135 \mathrm{~A}, 135 \mathrm{~B}, 136,138 \mathrm{~A}$,
138B, 138C, 139A, 139B, 140, 141,
142A, 142B, 143, 144A, 144B, 145,
146A, 146B, 147A, 147B, 147C, 148A,
148B, 148C, 149, 151A, 151B, 151C,
151D, 160.
(b) United States History: History 102K,

102L, 102M, 102X, 120, 169A, 169B,
170A, 170B, 170C, 171A, 171B, 171D,
172, 173, 174A, 174B, 174C, 174D, 175,
176A, 176B, 177A, 177B, 178A, 178B,
179,180A, 180B, 180C, 181, 182, 183A,
183B, 184, 185A, 185B, 188, 189.
(c) Asian History: History 102G, 102H,

102N, 102Q, 102R, 102X, 109A, 109B,
$110,110 \mathrm{~A}, 111 \mathrm{~A}, 112 \mathrm{~A}, 112 \mathrm{~B}, 112 \mathrm{C}$,
113, 120, 190A, 190B, 190C, 190D,
191A, 191B, 191C, 191D, 191E, 191F,
193A, 193B, 193C, 194A, 194B, 194C,
194D, 194E, 195B, 196A, 196B.
(d) African History: 102O, 102X, 109A,

109B, 110, 110A, 112C, 115A, 115B,
115C, 115D, 115E, $115 \mathrm{~F}, 116$.
(e) Latin American History: History 102J,

102X, 109A, 109B, 110, 110A, 160, 162,
163A, 163B, 164, 165, 166A, 166B, 167, 168, 169A, 169B.
(f) Within broad fields, a student may wish to concentrate some of the courses on a
particular area or period, such as China or
Great Britain or Medieval Europe. Special approval is not required.
Major Advisers. See the department's website for updated information.
History and Philosophy of Science. Courses
from the History and Philosophy of Science program may count toward the History major. History and Philosophy of Science 130A fulfills upper division requirements in the field of pre-industrial Europe. History and Philosophy of Science 130B, 150, and
180 fulfill upper division requirements in either the U.S. or Modern Europe field.

Students can create a field in the History of Science upon consultation with a faculty adviser. They may draw upon the relevant History courses (History 85, $135 \mathrm{~A}, 135 \mathrm{~B}, 139 \mathrm{~A}, 139 \mathrm{~B}, 185 \mathrm{~A}$, and 185B) as well as History and Philosophy of Science offerings to do so.
Consult the History and Philosophy of Science program for a more detailed description of course offerings this area and the minor in History and Philosophy of Science.

## Minor Program Requirements:

The minor in History consists of five upper division courses chosen so that at least three courses are in one field and at least one course is in another field. The two fields shall be chosen from among those defined in the catalog for the major. However, students may also, in consultation with and with the authorization of a faculty adviser, define other thematic fields.

UNITS
History 20
At least 20 units of upper division history courses

20
Examples of minor with thematic emphasis: Pre-Law (British and American Political and Constitutional Development); The Twentieth Century; The History of Ideas in Society.
Minor Advisers. Same as major advisers.
Honors and Honors Program. A student becomes eligible for graduation with honors by meeting the minimum GPA (usually 3.500 ) and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the History Department honors program with a GPA of 3.500 or above and write a thesis that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project, interviews, and faculty recommendations. Students admitted into the program must complete the History 104A, 104B, 104C sequence of honors courses, which requires the completion of a senior honors thesis. Students who anticipate seeking admission to the honors program are urged to complete at least one History 102 (undergraduate seminar) before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year. Students may follow either Plan I or Plan II described above, and may substitute History 104B and 104C for any courses in their program other than History 102.
Students who anticipate pursuing graduate work in history or a teaching credential, and who do not wish to opt for the research emphasis embodied in the honors program, are encouraged to select Plan II of the major.
Study Abroad and the History Major. The department strongly encourages interested students to pursue their studies abroad. While there are no specific required courses or prerequisites, students are urged to take at least one history course that touches upon the geographic area where they plan to study abroad before departing. To receive a history degree from UC Davis, students must complete at least 18 upper division units in the history major at UC Davis (which can also include History 101, 102, 103). The remaining major requirements can be fulfilled abroad provided that (a) the course should be evaluated as at least four UC Davis units, (b) the course should be considered upper division by the standards set forth by the UC Davis Study Abroad Program, and (c) the course should be in the field of History. Students may present copies of the course work, syllabus, and writing assignments to the department's liaison person with the Study Abroad office for approval.

Note: students who wish to receive credit for courses taken abroad under programs other than UC Davis Study Abroad may petition the Undergraduate Program Committee to do so.
Teaching Credential Subject Representative. See the Teaching Credential/M.A. Program on page 115.
Preparing for Careers in Teaching. History majors can pursue rewarding careers in teaching. To ensure your undergraduate coursework prepares you for a subject matter competency test, please contact the History Project at 530-752-4383 or http:// historyproject.ucdavis.edu/.
Graduate Study. The Department of History offers programs of study and research leading to the M.A. and Ph.D. degrees in history. Detailed information may be obtained by contacting the Graduate Adviser.
Graduate Advisers. See the department's website for updated information.
American History and Institutions. This University requirement can be satisfied by passing any one of the following courses in History: 17A, 17B, 72A, 72B, 170A, 170B, 170C, 171A, 171B, 172, 173, 174A, 174B, 174C, 174D, 175, 176A, 176B, 177A, 177B, 178A, 178B, 180A, 180B, 181,183A,'183B, 184, 189. The upper division courses may be used only with the consent of the instructor; see also under University requirements.

## Courses in History (HIS)

## Lower Division

3. Cities: A Survey of World Cultures (4)

Lecture-3 hours; lecture/discussion - 1 hour. Survey of urban world cultures, focusing on up to ten cities selected by the instructor. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE.
4A. History of Western Civilization (4) Lecture-3 hours; discussion-1 hour. Growth of western civilization from late antiquity to the Renaissance. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.-I, II. McKee

## 4B. History of Western Civilization (4)

Lecture-3 hours; discussion-1 hour. Development of western civilization from the Renaissance to the Eighteenth Century. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. - II. Landau, Stuart

## 4C. History of Western Civilization (4)

Lecture-3 hours; discussion-1 hour. Development of Western Civilization from the Eighteenth Century to the present. GE credit: ArtHum or SocSci,
Wrt | AH or SS, WC, WE. -I, II, III. Campbell, Saler

## 6. Introduction to the Middle East (4)

Lecture-3 hours; discussion-1 hour. Survey of the major social, economic, political and cultural transformations in the Middle East from the rise of Islam (c. 600 A.D.) to the present, emphasizing themes in religion and culture, politics and society. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.-I. Teczan
7A. History of Latin America to 1700 (4) Lecture-3 hours; discussion - 1 hour. Introduction to the history of Spanish and Portuguese America from the late pre-Columbian period through the initial phase and consolidation of a colonial regime (circa 1700). Topics include conquest, colonialism, racial mixture, gender, and labor systems. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE.-I. (I.) C.F. Walker

## 7B. History of Latin America, 1700-1900

 (4)Lecture-3 hours; discussion - 1 hour. Latin America from colony to republic. The nature of Iberian colonialism, the causes for independence, the creation of nation states, the difficulties in consolidating these nations, and the rise of Liberalism and export economics in the nineteenth century. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. - II. (II.) Resendez

7C. History of Latin America, 1900-present (4)

Lecture-3 hours; discussion - 1 hour. Latin America since the beginning of the 20th century. Themes include export economies, oligarchic rule, crises of depression and war, corporatism, populism revolution and reform movements, cultural and ethnic issues, U.S.-Latin American relations, neo-liberal restructuring. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. - III. (III.) Langland

## 8. History of Indian Civilization (4)

Lecture-3 hours; discussion-1 hour; written reports. Survey of Indian civilization from the rise of cities (ca. 2000 B.C.) to the present, emphasizing themes in religion, social and political organization, and art and literature that reflect cultural interaction and change. GE credit: ArtHum or SocSci, Div | AH or SS, WC, WE.-II. Sen
9A. History of East Asian Civilization (4)
Lecture-3 hours; discussion-1 hour. Surveys traditional Chinese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary China are provided. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE. -I, III. Bossler

## 9B. History of East Asian Civilization (4)

 Lecture-3 hours; discussion - 1 hour. Surveys traditional Japanese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary Japan are provided. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. -II. Kim
## 10A. World History to 1350 (4)

Lecture-3 hours; discussion - 1 hour. Historical examination of the changing relationship of human societies to one another and to their natural settings through the year 1350, with particular attention to long-term trends and to periodic crises that reshaped the links of culture and nature on a global scale. GE credit: ArtHum or SocSci, Div, Wrt |AH or SS, WC, WE.-I. Anooshahr

## 10B. World History, c. 1350-1850 (4)

Lecture-3 hours; discussion - 1 hour. Major topics in world history from the 14th century to the beginning of the 19th century. Topics will vary but may include oceans as systems of human communication and conflict; the global consequences of "industrious revolutions" in Europe and Asia, etc. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE.-I. Harris, Stolzenberg

## 10C. World History III (4)

Lecture-3 hours; discussion - 1 hour. Major topics from world history of the 19th and 20th centuries, emphasizing the rise and fall of Western colonial empires; Cold War and the superpowers; the spread of the nation-states; and process of globalization. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. -II, III. Dickinson, El Shakry

## 11. History of the Jewish People in the Modern World (4)

Lecture-3 hours; discussion - 1 hour. Histories and cultures of the Jews since 1492. Topics include: the making of Jewish diasporas, roots of antisemitism, the Holocaust in images and texts, changing ideas of the self, Jews in America, contemporary visions of the Jewish past. Offered in alternate years. GE credit: ArtHum | AH, DD, VL, WC, WE. - (I.) Miller

## 12. Food and History (4)

Lecture-3 hours; discussion-1 hour. Survey of the ways humans have fed themselves from the dawn of humanity to the present. Transformation of plants and animals into food, cooking into cuisine, and ceremony into etiquette. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, OL, VL. - McKee, Resendez

## 15. Introduction to African History (4)

 Lecture-3 hours; discussion-1 hour. Examination of the long-range historical context as background to current conditions in Africa. Includes the early development of African civilizations, the slave trade andits abolition, 20th century colonization, and African independent states. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE. - II. Decker

## 17A. History of the United States (4)

Lecture-3 hours; discussion-1 hour. The experience of the American people from the Colonial Era to the Civil War. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. -I, II, III. (I, II, III.) Hartigan-O'Connor, Kelman, Smolenski, Taylor
17B. History of the United States (4) Lecture-3 hours; discussion-1 hour. The experience of the American people from the Civil War to the end of the Cold War. Not open for credit to students who have completed course 17C. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.-I, II, III. (I, II, III.) Olmsted, Oropeza, Rauchway

## 72A. Social History of American Women and the Family (4)

Lecture-3 hours; discussion - 1 hour. Social and cultural history of women, sex roles and the family from colonial America until the late nineteenth century emphasizing changes resulting from the secularization, commercialization, and industrialization of American society. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE.-II. HartiganO'Connor

## 72B. Social History of American Women and the Family (4)

Lecture-3 hours; discussion-1 hour. Social and cultural history of women, sex roles, and the family in twentieth-century America, emphasizing female reformers and revolutionaries, working class women, consumerism, the role of media, the "feminine mystique," changes in family life, and the emergent women's movement. GE credit: ArtHum or SocSci, Div, Wrt | ACGH, AH or SS, DD, WE. - III. Materson

## 85. Nature, Man, and the Machine in

## America (4)

Seminar-4 hours; term paper. Prerequisite: consent of instructor. History of the attitudes and behavior of Americans toward their natural environment and their technology, from colonial times to the present. No final examination. Limited enrollment. GE credit: ArtHum or SocSci | AH or SS, WE.

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

101. Introduction to Historical Thought and Writing (5)
Lecture/discussion - 4 hours; term paper. Prerequisite: consent of instructor. Study of the history of historical thought and writing, analysis of critical and speculative philosophies of history and evaluation of modes of organization, interpretation, and style in historical writing. GE credit: WE. - II. III. (III.) Saler, Stolzenberg
102A-S, X. Undergraduate Proseminar in History (5)
Seminar-3 hours; term paper. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. (A) Ancient; (B) Medieval; (D) Modern Europe to 1815; (E) Europe since 1815; (F) Russia; (G) China to 1800; (H) China since 1800; (I) Britain; (J) Latin America since 1810; (K) American History to 1787; (L) United States, 1787-1896; (M) United States since 1896; (N) Japan; (O) Africa; (P) Christianity and Culture in Europe, 50-1850; (Q) India; (R) Muslim Societies; (S) Education Abroad Program, GE credit: ArtHum, Wrt \| AH or SS, WE.; (X) Comparative History, selected topics in cultural, political, economic, and social history that deal comparatively with more than one geographic field. May be repeated for credit. Limited enrollment.-I, II, III. (I, II, III.)
102. Topics in Historical Research (4)

Discussion-3 hours; individual consultation with instructor; term paper. Prerequisite: consent of instructor. Individual research resulting in a research paper on a specific topic in one of various fields of history. May be repeated for credit. GE credit: WE.

## 104A. Introduction to Historical Research

 and Interpretation (4)Seminar-3 hours; term paper. Prerequisite: acceptance into History Department Honors Program. Directed reading and research aimed at preparing students to select appropriate topics and methodologies for a senior honors essay and to situate their topics within a meaningful, broad context of historical interpretations. Culminates in the submission of a full prospectus for an honors essay. GE credit:

## WE. -I. (I.) Anooshahr

## 104B. Honors Thesis (4)

Tutorial-4 hours. Prerequisite: course 104A. Research in preparation of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: WE. -II

## 104C. Honors Thesis (4)

Tutorial-4 hours. Prerequisite: course 104A and 104B. Completion of a senior honors thesis under the direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: WE. - III.
108. Global Environmental History (4) Lecture/discussion-3 hours; project. Global, comparative study of how environmental change, human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500, emphasis on critically analyzing many common ideas of environmental change. Not open for credit to students who have taken History 109A. GE credit: ArtHum or SocSci | AH or SS.-Davis
109A. Global Environmental History (4) Lecture/discussion-3 hours; project. Global, comparative study of how environmental change, human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500, emphasis on critically analyzing many common ideas of environmental change. GE credit: ArtHum, or SocSci | AH or SS.-Davis
109B. Environmental Change, Disease and

## Public Health (4)

Lecture/discussion-3 hours; term paper. Analysis of environmental changes from pre-history to the present and their influence on disease distribution, virulence and public health; many of these changes have been driven by human action and transformations of pathogens have accelerated under globalization. GE credit: SciEng or SocSci, Div | SE or SS, SL. -I. (I.) Davis

## 110. Themes in World History (4)

Lecture-3 hours; term paper. Prerequisite: upper division standing. Issues and topics in world history. Topics will emphasize the interaction of diverse regions of the world as well as common patterns of historical change. May be repeated for credit if topic and/or instructor differs. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

## 110 A . Colonialism and the Making of the

## Modern World (4)

Lecture-3 hours; term paper. History of the modern world, focusing on struggles between Europeans and colonized peoples; the global formation of capitalism; the creation of nation-states; and the constitution of bourgeois bodies and racial selves in modern societies. Offered in alternate years. GE credit: ArtHum | AH or SS, VL, WC, WE. - III. El Shakry
111 A. Ancient History (4)
Lecture-3 hours; discussion or paper (student option). History of ancient empires of the Near East and of their historical legacy to the Western world. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. -I. Spyridakis

111 B. Ancient History (4)
Lecture-3 hours; discussion or paper (student option). Political, cultural and intellectual study of the Greek world from Minoan-Mycenaean period to end of Hellenistic Age. GE credit: ArtHum or SocSci, Wrt \| AH or SS, WC, WE. - II. Spyridakis

## 111 C. Ancient History (4)

Lecture-3 hours; discussion or paper (student option). Development of Rome from earliest times. Rise and fall of the Roman Republic; the Empire to 476 A.D. GE credit: ArtHum or SocSci, Wrt | AH or SS, WC, WE. - II. (II.) Spyridakis
$112 A$. Topics in Pre-Modern Jewish History (4)

Lecture - 3 hours; term paper. Topics in the history of Jews from the Biblical era to the eras of Jewish emancipation. Topics can be framed chronologically (e.g., medieval Jewry) or thematically (e.g., trade and Jewish communities). May be repeated one time for credit. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE.
$112 B$. Topics in Modern Jewish History (4)
Lecture-3 hours; term paper. Topics in the history of Jews from the era of Jewish emancipation to the present. Topics can be framed chronologically or thematically (e.g. Zionism, assimilation, the post Holocaust Diaspora). May be repeated one time for credit. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE.
112C. History of Jews in the Muslim World (4)

Lecture-3 hours; term paper. Prerequisite: upper division standing recommended. History of Jewish communities in the lands of Islam from the time of the Prophet Muhammad to the present day. GE credit: SocSci | SS, WC, WE.-I. (I.) Miller

## 113. History of Modern Israel (4)

Lecture-3 hours; term paper. Topics include the rise and fall of utopian Zionism, the century-long struggle between Jews and Arabs, the development of modern Hebrew culture, the conflict between religious and secular Jews, and the nature of Israel's multicultural society. GE credit: ArtHum or SocSci, Div,
Wrt | AH or SS, WC, WE. - III. Biale
115A. History of West Africa (4)
Lecture-3 hours; term paper. Prerequisite: course 15 recommended. Introductory survey of the history of West Africa and/or the Congo region from the earliest times to the present. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.
115B. History of East and Central Africa (4) Lecture-3 hours; term paper. Prerequisite: course 15 recommended. Introductory survey of the history of east and central Africa from earliest times to the present. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. - Decker
115C. History of Southern Africa (4)
Lecture-3 hours; term paper. Prerequisite: course
15 recommended. Introductory survey of the history of Southern Africa (including South Africa) from earliest times to the present. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE. - Decker
115 D . History and Legacy of Colonialism in Africa (4)
Lecture-3 hours; term paper. Prerequisite: course 115A, 115B or 115C recommended. History of the implementation, development, and legacy of European Colonialism in Africa. A comparison of British, Belgian, French, and Portuguese colonial efforts and impacts. GE credit: ArtHum or SocSci, Div,
Wrt | AH or SS, WC, WE.
115 E . The African Slave Trade (4)
Lecture-3 hours; writing -1 hour. History of the African Slave trades, from the early Egyptian and Saharan trades in the pre-modern period to the trans-Atlantic trade ( 15 th-19th century) and the contemporary trafficking of humans. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. - III. (III.) Lawrance

115 F. History of North, Horn, Sudan and Nile Valley (North and North-East Africa) (4)

Lecture-4 hours; term paper. This course shall investigate the history of the north and northeast regions of continental Africa, encompassing the Mediterranean Coast, Maghreb, Sahara, Horn of Africa, the Nile Valley and the Sudan, covering the ancient period to the present. May be repeated up to four units for credit when instructor differs. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. - II. Miller

Lecture-3 hours; extensive writing. Middle Eastern history during the age of the Crusades and Mongol invasions. The idea of holy war, the Crusades, the Mongols as the bearers of Chinese arts, nomads and sedentary life, feudalism, mysticism, slavery, women in the medieval Middle East. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. - Tezcan

## 190C. Middle Eastern History III: The

 Ottomans, 1401-1730 (4)Lecture-3 hours; extensive writing. Middle Eastern history from the foundation of the Ottoman Empire on the borderlands of Byzantine Anatolia through its expansion into Europe, Asia, and Africa, creating a new cultural synthesis including the Arab, Greek, Islamic, Mongol, Persian, Slavic, and Turkish traditions. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. - Tezcan

## 190D. Middle Eastern History IV: Safavids

 Iran, 1300-1720 (4)Lecture-3 hours; term paper. Middle Eastern history focusing on Safavid Empire (present-day Iran, Iraq, Afghanistan, up to Georgia), beginning with the origins of the dynasty as a powerful religious family, to the establishment of the Empire, focusing on Social, Religious, Economic, and Political History. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE. - Anooshahr

## 191A. Classical China (4)

Lecture-3 hours; term paper. History of Chinese civilization from its origins through the establishment of city states and the flowering of classical philosophy, to the rise and fall of the First Empire. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.

## 191B. High Imperial China (4)

Lecture-3 hours; term paper. Political disunion and the influx of Buddhism; reunification under the great dynasties of T'ang, Sung, and Ming with analysis of society, culture and thought. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.-I. Bossler

## 191C. Late Imperial China (4)

Lecture-2 hours; discussion-1 hour; two long papers. Prerequisite: course 9A or upper division standing. Patterns and problems of Chinese life traced through the Ming and Ch'ing dynasties (c. 1500-1800), prior to the confrontation with the West in the Opium War. Readings include primary sources and novels portraying elite ethos as well as popular culture. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.
191D. Nineteenth Century China: The Empire Confronts the West (4)
Lecture-2 hours; discussion-1 hour; term paper. Prerequisite: course 9A, or upper division standing. The decline and fall of the Chinese Empire, with particular attention to the social and political crises of the 19th century, and the response of government officials, intellectuals, and ordinary people to the increasing pressures of Western imperialism. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.-Bossler

## 191E. The Chinese Revolution (4)

Lecture-2 hours; discussion - 1 hour; extensive writing. Prerequisite: upper division standing. Analysis of China's cultural and political transformation from Confucian empire into Communist state. Emphasis on emergence and triumph of peasant revolutionary strategy (to 1949), with some attention to its implications for post-revolutionary culture and politics. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE.-II.

## 191 F. History of the People's Republic of China (4)

Lecture-2 hours; discussion - 1 hour; extensive writing. Prerequisite: upper division standing. Comprehensive analysis of recent Chinese history, including
land reform, the Cultural Revolution, the post-Mao era, and the consequences of the new economic policies of the 1980s. Not open for credit to students who have completed course 190C. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE. - III.

## 191G. Special Topics in Chinese History to

 1800 (4)Lecture-3 hours; extensive writing. Prerequisite: course 9A or consent of instructor. Topics in the history of China from the beginning of the imperial period through the high Qing dynasty. Topics may be framed chronologically (e.g., the Ming Dynasty) or thematically (e.g., Trade in early Chinese history). May be repeated one time for credit when topic differs. Offered irregularly. GE credit: AH, WC, WE. Bossler, Javers

## 191H. Special Topics in Chinese History

 after 1800 (4)Lecture-3 hours; extensive writing. Prerequisite: course 9A or consent of instructor. Topics in the history of China since 1800. Topics may be framed chronologically (e.g., The Republican Period (19111948)) or thematically (e.g., The Modern Evolution of Chinese Law). May be repeated one time for credit when topic differs. Offered irregularly. GE credit: AH, WC, WE. - Bossler, Javers
191J. Sex and Society in Modern Chinese History (4)
Lecture-3 hours; term paper. Role of sex, gender, and family relations in the development of Chinese politics, society, and personal life in the modern period, 1900-present. Not open for credit to students who have completed course 190C. Offered irregularly. GE credit: ArtHum | AH, WC, WE. Bossler
192. Internship in History (1-12)

Prerequisite: enrollment dependent on availability of intern positions, with priority to History majors. Supervised internship and study as historian, archivist, curator, or in another history-related capacity, in an approved organization or institution. (P/NP grading only.)
193A. History of the Modern Middle East, 1750-1914 (4)
Lecture-3 hours; term paper. Prerequisite: course 6 recommended. Transformation of state and society within the Middle East from 1750 to 1914 under pressure of the changing world economy and European imperialism. Themes include colonialism, Orientalism, Arab intellectual renaissance, Islamic reform, state-formation, role of subaltern groups. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, VL, WC, WE.-El Shakry

## 193B. History of the Modern Middle East from 1914 (4)

Lecture-3 hours; term paper. Prerequisite: course 6 recommended. The Middle East from the turn of the 20th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, Palestine/Israel, Islamic revival, gender, revolutionary movements, politics of oil and war, cultural modernism, exile and diaspora. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, VL, WC, WE. - II. El Shakry
193C. The Middle East Environment:
Historical Change and Current Challenges (4)

Lecture/discussion-3 hours; project. Prerequisite: upper division standing recommended. Examines Middle East environment and human use of nature over last 10,000 years. Introduction to desert ecology, environmental history and current environmental problems. Case Studies of Egypt, Maghreb countries, Arabian peninsula/Gulf countries, desertification, water, indigenous knowledge, and national parks. GE credit: ArtHum or SocSci | AH or SS. Davis

193D. History of Modern Iran, From 1850 to Present (4)
Lecture-3 hours; term paper. Prerequisite: course 6 recommended. Modern Iran from the mid 19th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, modernization, Islamic revival, gender, revolutionary movements, politics of oil and war. Offered in alternate years. GE credit: SocSci, Div, Wrt | AH or SS, VL, WC, WE. - Anooshahr
194A. Aristocratic and Feudal Japan (4) Lecture-3 hours; term paper and/or discussion. Broad survey of the cultural, social, religious, and political aspects of Japanese history from mythological times through the sixteenth century emphasizing comparison of the organizations, values, and beliefs associated with the aristocratic and feudal periods. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.
194B. Early Modern Japan (4)
Lecture-3 hours; term paper and/or discussion. Survey of the cultural, social, economic, and political aspects of Japanese history from the seventeenth through the nineteenth centuries emphasizing the development of those patterns of thought and political organization with which Japan met the challenge of the nineteenth-century Western expansionism. GE credit: ArtHum or SocSci, Div | AH or SS, WC, WE.-Kim

## 194C. Modern Japan (4)

Lecture-3 hours; term paper and/or discussion. Survey of the cultural, social, economic, and political aspects of Japanese history in the twentieth century emphasizing labor and social movements, militarism and the Pacific war, and the emergence of Japan as a major economic power. GE credit: ArtHum or SocSci, Div \| AH or SS, WC, WE. -I. Kim
194D. Business and Labor in Modern Japan (4)

Lecture-3 hours; term paper. Survey of labor and management relations in Japan from the mid-eighteenth century to the present. Offered in alternate years. GE credit: ArtHum or SocSci \| AH or SS, WC, WE.
194E. Education and Technology in Modern Japan (4)
Lecture-3 hours; term papers. Survey of education and technology in Japan from the mid-eighteenth century to the present. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

## 195B. History of Modern Korea (4)

Lecture-3 hours; laboratory/discussion-1 hour. Prerequisite: upper division standing. History of Modern Korea, from Yi dynasty period to 1990s. Political and socioeconomic changes in 19th century, modernization under Japanese colonialism, postwar economic growth and effects of the Cold War. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.-I. Kim

## 196A. Medieval India (4)

Lecture-3 hours; discussion-1 hour; written reports. Survey of history of India in the millennium preceding arrival of British in the eighteenth century, focusing on interaction of the civilizations of Hinduism and Islam and on the changing nature of the state. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.-II. Sen

## 196B. Modern India (4)

Lecture-3 hours; discussion - 1 hour; written reports. Survey of cultural, social, economic, and political aspects of South Asian history from arrival of the British in the eighteenth century to formation of new independent states-India, Bangladesh, and Pakistan-in the twentieth century. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.-III. Sen

## 197T. Tutoring in History (2)

Discussion - 1 hour; laboratory-3 hours. Prerequisite: enrolled as a History major with senior standing and consent of department chairperson. Tutoring of students in lower division courses. Weekly meeting
with instructors in charge of courses. Written reports on methods and materials required. May be repeated one time for credit. No final examination. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor; upper division standing. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

201 A-N, P-Q, S-T, W, X. Sources and General Literature of History (4)
Seminar-3 hours; term paper. Prerequisite: consent on instructor. Designed primarily for students preparing for higher degrees in history. (A) Ancient; (B) Medieval; (C) Renaissance and Reformation; (D) Early Modern Europe; (E) Europe since 1815; (F) China to 1880; (G) China since 1880; (H) Britain; (I) Latin America since 1810; (J) American History to 1787; (K) United States, 1787-1896 (L) United States since 1896; (M) Middle East; (N) Modern Japan; (P) African Historiography; (Q) Cross-Cultural Women's History; (S) History of Science and Medicine; (T) Jewish History; (W) Sources and General Literature of History; (X) World History. May be repeated for credit when different subject area is studied.

## 202A-I. Major Issues in Historical

Interpretation (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing. Fundamental issues and debates in the study of history. (A) Ancient; (B) Medieval Europe;
(C) Modern Europe; (D) India; (E) Africa; (F) China; (G) Japan; (H) United States; (I) Latin America. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. -I, II, III. (I, II, III.)

203A. Research Seminar (4)
Seminar-3 hours; tutorial-1 hour. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. - I. (I.)

## 203B-203C. Research Seminar (4-4)

Seminar-3 hours; tutorial-1 hour. Prerequisite: course 203A. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. (Deferred grading only, pending completion of sequence.) - II, III. (II, III.)

## 204. Historiography (4)

Seminar-3 hours; term paper. Major issues in the philosophy and methodology of history. -I. (I.)

## 221. Medieval History (4)

Seminar-3 hours. Prerequisite: courses 121A, 121B, 121C recommended. Topics in the history of medieval and early Renaissance Europe.

## 245. Modern European History (4)

Seminar-3 hours. Prerequisite: course 201E. Primary sources and research methodologies in the history of modern France and Germany. May be repeated one time for credit. - III. (III.)
261. Latin American History (4)

Seminar-3 hours. Prerequisite: two courses in Latin American history; reading knowledge of Spanish or Portuguese. - I, II, III. (I, II, III.)

## 271 A-27 1 B. United States History (4-4)

Seminar-3 hours; term paper. Prerequisite: course 201J-L or 202H. Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. (Deferred grading only, pending completion of sequence.)

## 291 A. Chinese History (4)

Seminar-3 hours; term paper. Prerequisite: consent of instructor. Research on topics to be chosen by the students for the purpose of writing article-length papers. May be repeated for credit. (Deferred grading only, pending completion of sequence.)-Bossler
291 B. Chinese History (4)
Seminar-3 hours; term paper. Prerequisite: consent of instructor. Completion of article-length papers on topics chosen by students. May be repeated for credit. (Deferred grading only, pending completion of sequence.) - Bossler

## 291C. Methods and Issues in Chinese

 History (4)Seminar-2 hours; tutorial-1 hour. Prerequisite: reading knowledge of Chinese; consent of instructor. Readings in Chinese historical materials. Training in the use of Chinese reference works (including on-line resources). May be repeated for credit. -I. (I.) Bossler
292. College Teaching Internship (4)

Internship-4 hours. Prerequisite: course 300 (may be taken concurrently). Student prepares and teaches one lower division history course in a nearby community college under the supervision of a UC Davis instructor and a community college instructor. (S/U grading only.)
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)
299D. Individual Study (1-12)
(S/U grading only.)
Professional
389. Introductory Seminar for Teaching Assistants (1)
Seminar-1 hour. Prerequisite: must be enrolled in course 390. An introduction to the broad comparative and theoretical issues of teaching methods and techniques in history. ( $\mathrm{S} / \mathrm{U}$ grading only.) - I. (I.)

## 390. Teaching History in College (2)

Discussion-2 hours. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## History and <br> Philosophy of Science

(College of Letters and Science) Joseph Dumit, Ph.D., Program Director
Program Office. 1240 Social Sciences and Humanities Building
530-752-0703

## Committee in Charge

Thomas Beamish, Ph.D. (Sociology) Mario Biagioli, Ph.D. (Science and Technology Studies, School of Law)
Patrick Carroll, Ph.D. (Sociology)
Timothy Choy, Ph.D. (Anthropology, Science and Technology Studies)
Marisol de la Cadena, Ph.D. (Anthropology)
Joseph Dumit, Ph.D. (Anthropology, Science and Technology Studies)
James Griesemer, Ph.D. (Philosophy)
Caren Kaplan, Ph.D. (American Studies)
Colin Milburn, Ph.D. (English)
Roberta Millstein, Ph.D. (Philosophy)
Daniel Stolzenberg, Ph.D. (History)
Madhavi Sunder, J.D. (School of Law)

## Minor Program Requirements:

The interdisciplinary minor in the history and philosophy of science invites students to examine historical and contemporary problems in a variety of scientific disciplines, and to explore concepts and procedures basic to science and how they have evolved. The
minor is sponsored by the Program in Science and Technology Studies.

UNITS
History and Philosophy of Science. 24
Philosophy 30...
... 4
Five courses from those listed below. One course must be from each of three areas: (a) history, (b) philosophy, and (c) science and technology studies. s........................... 20
(a) History 102, 135A, 135B, 136, 139A,

139B, 185A, 185B, 188A, 188B;
(b) Philosophy 107, 108, 109, 110, 111 ;
(c) Science and Technology Studies 20,

130A, 130B, 131, 150, 180.
Minor Adviser. P. Carroll in 2272 Social Sciences and Humanities Building 530-752-5388.

## Horticulture and

 Agronomy (A Graduate Group)_Chairperson of the Group
Group Office. 1224 Plant and Environmental
Sciences Building

## Faculty

Douglas O. Adams, Ph.D., Professor
(Viticulture and Enology)
Kassim Al-Khatib, Ph.D., Professor (Plant Sciences)
Diane M. Beckles, Ph.D., Associate Professor (Plant Sciences)
Alan B. Bennett, Ph.D., Professor (Plant Sciences)
Alison M. Berry, Ph.D., Professor (Plant Sciences)
Arnold J. Bloom, Ph.D., Professor (Plant Sciences)
Eduardo Blumwald, Ph.D., Professor (Plant Sciences)
Kent J. Bradford, Ph.D., Professor (Plant Sciences)
Patrick H. Brown, Ph.D., Professor (Plant Sciences)
E. Charles Brummer, Ph.D., Professor (Plant Sciences)
Dario Cantu, Ph.D., Assistant Professor (Viticulture and Enology)
Abhaya M. Dandekar, Ph.D., Professor (Plant Sciences)
Theodore M. DeJong, Ph.D., Professor (Plant Sciences)
Jorge Dubcovsky, Ph.D., Professor (Plant Sciences)
Jan Dvorak, Ph.D., Professor (Plant Sciences)
Valerie T. Eviner, Ph.D., Associate Professor (Plant Sciences)
Albert J. Fischer, Ph.D., Professor (Plant Sciences)
Paul L. Gepts, Ph.D., Professor (Plant Sciences)
Matthew E. Gilbert, Ph.D., Assistant Professor (Plant Sciences)
Thomas M. Gradziel, Ph.D., Professor (Plant Sciences)
Robert Hijmans, Ph.D., Associate Professor (Environmental Science and Policy)
William Horwath, Ph.D., Professor
(Land, Air and Water Resources)
Kentaro Inoue, Ph. D., Professor (Plant Sciences)
Louise E. Jackson, Ph.D., Professor
(Land, Air and Water Resources)
Marie A. Jasieniuk, Ph.D., Associate Professor (Plant Sciences)
Judy Jernstedt, Ph.D., Professor (Plant Sciences) John M. Labavitch, Ph.D., Professor (Plant Sciences) Emilio A. Laca, Ph.D., Professor (Plant Sciences)
J. Heinrich Lieth, Ph.D., Professor (Plant Sciences)

Mark A. Matthews, Ph.D., Professor
(Viticulture and Enology)
Richard W. Michelmore, Ph.D., Professor (Plant Sciences)
David B. Neale, Ph.D., Professor (Plant Sciences) Michael P. Parrella, Ph.D., Professor (Entomology)
Daniel Potter, Ph.D., Professor (Plant Sciences)

Jeffrey S. Ross-Ibarra, Ph.D., Associate Professor (Plant Sciences)
Kate M. Scow, Ph.D., Professor
(Land, Air and Water Resources)
Kenneth A. Shackel, Ph.D., Professor (Plant Sciences)
David R. Smart, Ph.D., Associate Professor
(Viticulture and Enology)
Dina St. Clair, Ph.D., Professor (Plant Sciences)
Kenneth W. Tate, Ph.D., Professor (Plant Sciences)
Larry R. Teuber, Ph.D., Professor (Plant Sciences)
Li Tian, Ph.D., Assistant Professor (Plant Sciences)
Chris van Kessel, Ph.D., Professor (Plant Sciences)
Astrid Volder, Ph.D., Assistant Professor
(Plant Sciences)
M. Andrew Walker, Ph.D., Professor (Viticulture and Enology)
Larry E. Williams, Ph.D., Professor (Viticulture and Enology)
John I. Yoder, Ph.D., Professor (Plant Sciences)
Florence Zakharov, Ph.D., Associate Professor (Plant Sciences)
Maciej Zwieniecki, Ph.D., Associate Professor (Plant Sciences)

## Affiliated Faculty

Kendra Baumgartner, Ph.D., Lecturer and Research Plant Pathologist (Plant Pathology)
Marita Cantwell, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Roger T. Chetelat, Ph.D., Lecturer and Agronomist (Plant Sciences)
Carlos H. Crisosto, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Joseph M. DiTomaso, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Richard Y. Evans, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Steven A. Fennimore, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Louise Ferguson, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Matthew W. Fidelibus, Ph.D., Associate Specialist in Cooperative Extension (Viticulture \& Enology)
W. Douglas Gubler, Ph.D., Lecturer and Extension Plant Pathologist (Plant Pathology)
Bradley D. Hanson, Ph.D., Lecturer and Associate Specialist in Cooperative Extension (Plant Sciences)
Timothy K. Hartz, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
James E. Hill, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Stephen R. Kaffka, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Bruce D. Lampinen, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Bruce Linquist, Ph.D., Lecturer and Assistant Specialist in Cooperative Extension (Plant Sciences)
David J. Mackill, Ph.D., Adjunct Professor (Plant Sciences)
Andrew J. McElrone, Ph.D., Assistant Adjunct Professor (Viticulture and Enology)
Elizabeth J. Mitcham, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Jeffrey P. Mitchell, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Anita Oberholster, Ph.D., Lecturer and Assistant Specialist in Cooperative Extension (Viticulture and Enology)
Lorence R. Oki, Ph.D., Lecturer and Associate Specialist in Cooperative Extension (Plant Sciences)
Dan E. Parfitt, Ph.D., Lecturer and Pomologist (Plant Sciences)
Ann Powell, Ph.D., Lecturer and Researcher (Plant Sciences)
Daniel H. Putnam, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Johan W. Six, Ph.D., Adjunct Professor (Plant Sciences)
Kerri L. Steenwerth, Ph.D., Assistant Adjunct Professor (Viticulture and Enology)

Trevor V. Suslow, Ph.D., Lecturer and Specialist in Cooperative Extension (Plant Sciences)
Allen E. Van Deynze, Ph.D., Lecturer and
Biotechnology Specialist (Plant Sciences)
Mark Van Horn, M.S., Lecturer (Plant Sciences)

## Emeriti

David W. Burger, Ph.D., Professor Emeritus (Plant Sciences)
James A. Harding, Ph.D., Professor Emeritus (Plant Sciences)
W. Thomas Lanini, Ph.D., Emeritus Specialist in Cooperative Extension (Plant Sciences)
G. Stuart Pettygrove, Ph.D., Emeritus Soils Specialist (Land, Air and Water Resources)
Richard E. Plant, Ph.D., Professor (Plant Sciences)
Vito S. Polito, Ph.D., Professor (Plant Sciences)
Michael S. Reid, Ph.D., Professor (Plant Sciences)
James A. Wolpert, Ph.D., Emeritus Cooperative
Extension Specialist (Viticulture and Enology)
Graduate Study. The Graduate Group in Horticulture and Agronomy offers programs of study leading to the M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. These programs are designed to focus on a cropping system, such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science. Within that cropping system, the student can specialize in one of a number of areas, including agroecology, biotechnology, breeding and crop improvement, crop physiology, crop production, floriculture, landscape horticulture, mineral nutrition, modeling, nursery production, pest management, plant growth and development, postharvest physiology, revegetation/restoration, and water relations. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system.
Preparation. For both the M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate adviser, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.
Graduate Advisers. Consult the Group office.
Courses in Horticulture (HRT)

## Graduate

203. Research Perspectives in Horticulture

## (3)

Lecture-1 hour; lecture/discussion-2 hours. Prerequisite: Plant Biology 111 and 112, or Environmental Horticulture 102 or the equivalent. Following lectures/discussions of scientific methodology, students develop research proposals aided by classroom discussions and individual interactions with instructors. Lectures and critiques of "classical papers" provide a sense of the evolution of the current concepts in perennial plant biology. Offered in alternate years. - II. (II.) DeJong, van Kessel

## 25 1. Modeling Horticultural Systems (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Plant Sciences 142, calculus, or consent of instructor. Development and application of models. Emphasis on physiological and ecological models, with examples from areas of interest to class participants.
Applications to horticultural systems. Offered in alternate years. - (II.) Lieth
290. Seminar (1)

Seminar-1 hour. Prerequisite: graduate standing at UCD. Seminars presented by invited speakers, students, or faculty on selected topics in horticulture. (S/U grading only.) - III. (III.)
298. Group Study (1-5)

## Human and <br> Community Development

See Human Ecology, on page 342.

## Human Anatomy

See Courses in Cell Biology and Human Anatomy (CHA), on page 401.

## Human Development

(College of Agricultural and Environmental Sciences) Faculty
Jay Belsky, Ph.D., Distinguished Professor
Zhe Chen, Ph.D., Professor
Katherine Conger, Ph.D., Professor
Rand Conger, Ph.D., Distinguished Professor
Amanda Guyer, Ph.D., Associate Professor
Leah Hibel, Ph.D., Assistant Professor
Siwei Liu, Ph.D., Assistant Professor
Lisa Miller, Ph.D., Associate Professor
Adrienne Nishina, Ph.D., Associate Professor Beth A. Ober, Ph.D., Professor

## Emeriti Faculty

Keith Barton, Ph.D., Professor Emeritus
Brenda Bryant, Ph.D., Professor Emerita
Rosemarie Kraft, Ph.D., Lecturer SOE, Emerita
Lawrence V. Harper, Ph.D., Professor Emeritus
Richard Ponzio, Ph.D., Extension Specialist Emeritus
Emmy E. Werner, Ph.D., Extension Specialist Emerita

## Affiliated Faculty

Jennifer Gonzales, Child Development
Demonstration Lecturer
Julia Luckenbill, Child Development Demonstration Lecturer
Lenna Ontai Ph.D., Associate Specialist in Cooperative Extension
Martin Smith, Ph.D., Associate Specialist in Cooperative Extension
Kali Trzesniewski, Ph.D., Associate Specialist in Cooperative Extension
Kelly Twibell, Child Development Demonstration Lecturer, Continuing

## The Major Program

Human development explores the developmental process in humans throughout the life cycle. Biological, cognitive, and personality/sociocultural aspects of development are studied.
The Program. Human development majors com plete a group of preparatory courses in anthropology, general biology, genetics, history, philosophy, physiology, psychology, and statistics. Upper division students can design their programs in consultation with a faculty member to emphasize a particular interest. For instance, students can study the cognitive, social, and biological aspects of human development while emphasizing child or adult development.

Internships and Career Alternatives. At least one practicum course is required. A second practicum or supervised internship can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in schools, early childhood education or senior centers, hospitals, rehabilitation centers, probation offices, group foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development graduates fill a wide variety of positions in preschools, elementary and special educational settings, programs designed for parents, families, and the elderly, as well as governmental jobs related to social services for people of all ages. Students who emphasize bio logical aspects of human development can apply to medical school or pursue training for positions in the health sciences. Human development prepares students to pursue advanced degrees in behavioral and social sciences, education, social work, family law, or health sciences.
Preparatory Requirements. UC Davis students who wish to change their major to Human Development must complete the following courses with a combined grade point average of at least 2.500. All of the following courses must be taken for a letter grade:
Psychology 1
Statistics 10 or 13 or Psychology 41 or
Sociology 46A and 46B
One course from: Anthropology 1, 2 or 15
One course from: Biological Sciences 2A, 10, 10VMessianic01; Microbiology 10; Molecular and Cellular Biology 10; or
Neurobiology, Physiology, and Behavior 10, 12 or 101

## B.S. Major Requirements:

UNITS
Preparatory Subject Matter...............38-47
Two courses from: Anthropology 1, 2, or
15 ..................................................8-9
One course from: Biological Sciences 2A, 10,
10V, Microbiology 10, or Neurobiology,
Physiology, and Behavior 12.................3-5
One course from: Molecular and Cellular
Biology 10 or Biological Sciences $101 \dagger \ldots 4$
One course from: History 17A, 17B, 72A,
72B, or Political Science 1 ....................... 4
Two courses from: Philosophy 5, 30, 31, 32, or 38
One course from: Neurobiology, Physiology,
and Behavior 10, 101, or Psychology
101 ....................................................3-5
Psychology 1 3-5

One course from: Psychology 41 or Sociology 46A and 46B, or Statistics 10 or 13
Depth Subject Matter ......................... 50-55
Life Span: Human Development 100A, 100B,
100C ................................................... 12
Research Methods: Human Development
120 .....................................................
Biological Processes: one course from:
Biological Sciences 101†, Human
Development 117, Nutrition 111 AV, or
Psychology 121
3-5
Social-Cultural Processes: one course from:
Human Development 102, 110, 130, or 160.
.. 4
Cognitive Processes: one course from: Human
Development 101, 103, 132, 161 or 163 .4

Practicum: one course from: Human
Development 140-140L, or 141 or 142
or 143
Restricted Electives
Five additional upper division courses chosen from among Human Development courses or from a list of restricted electives in consultation with faculty adviser. May include only one practicum course.

At least one of the courses from the Depth Subject groups or Restricted Electives listed above must focus on childhood/adolescence $(101,102,103,110,130,132)$ and one on adulthood/aging (117, 143, 160, 161, 163).

## English Composition Requirement .. 4

In addition to the College English
Composition requirements, choose one from
University Writing Program 101, 102A,
102B, 102C, 102D, 102E, 102F, 102G,
102H, 104A, 104B, 104C, 104D, 104E,
104F..................................................... 4

## Total Units for the Major

$\qquad$ 92-106
$\dagger$ Biological Sciences 101 cannot be used to satisfy both the Preparatory Subject Matter and the Depth Subject Matter Requirements.
Major Adviser. Lisa Miller
Minor Program Requirements:
The Department of Human and Community Development offers two minors.

Aging and Adult Development 18-20
Three of following courses:
Human Development 100C, 117, 143, 160,
161, or 163
60
Two courses from the following: Human
Development 110; Exercise Biology 117,
Psychology 121, 123, 126, 130, or
155.

Minor Adviser. L. Miller, B. Ober
.6-8

UNITS
Human Development .............................. 20
Human Development 100A and 100B ...... 8
Human Development 100C or 110........... 4
Two courses from: Human Development
$101,102,103,130,132,161$ or 163 ... 8

## Minor Adviser. K. Conger

Graduate Study. Graduate study is available through a Master of Science degree in child development, and a Ph.D. degree in human development. See also Graduate Studies, on page 111.

## Courses in Human Development (HDE)

Questions pertaining to the following courses should be directed to the instructor or to the Human and
Community Development Advising Center in 1303
Hart Hall 530-752-2244.

## Lower Division

## 12. Human Sexuality (3)

Lecture-3 hours. Vocabulary, structure/function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing/maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction, cultural differences in attitudes towards sexuality. GE credit: SocSci, Div | ACGH, DD, SS. -I, III. (II, II, III.)

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: field work experience or at least one course (e.g., course 100A, 100B, 140 or 140L) related to fieldwork assignment; consent of instructor. Supervised internship, off campus and on campus, in community and institutional setting. May be repeated for credit for a total of 12 units or if involves progressively greater (supervised) participation in program delivery or assessment. (P/NP grading only.) -I, II, III. (I, II, III.)
98. Directed Group Study for

Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

100A. Infancy and Early Childhood (4)
Lecture-4 hours. Prerequisite: Psychology 1, Biological Sciences 1A, or 2A, or 10. Biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six. Two observations of preschool children required. - I, II. (I, II.) Chen, Hibel
100B. Middle Childhood and Adolescence (4)

Lecture-4 hours. Prerequisite: course 100A, 120, or the equivalent; introductory biology. Interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence. - II, III. (II, III.) Gueyer, Nishina
100C. Adulthood and Aging (4) Lecture-4 hours. Prerequisite: Psychology 1 or 15. Development during early, middle, and late adulthood; biological, cognitive, and psycho-social aspects of adult development. Emphasis on normative patterns of development which characterize "successful aging." -I, III. Miller, Ober

## 101. Cognitive Development (4)

Lecture-3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass One restricted to Human Development or Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/ nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as Psychology 141.) GE credit: Wrt | WE. -I, II, III. (I, II, III.) Chen, Gibbs, Goodman, Graf Estes, Lagattuta, Rivera

## 102. Social and Personality Development

 (4)Lecture -3 hours; term paper. Prerequisite: course 100A or 100B or Psychology 140. Pass One open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as Psychology 142.) GE credit: SocSci, Wrt | SS, WE. - I, II, III. (I, II, III.) Belsky, Gibbs, Hastings, Thompson
103. Cross-Cultural Study of Children (4) Lecture-4 hours. Prerequisite: course 100A or consent of instructor. Cross-cultural studies of children in developing countries and among minority groups in the U.S. GE credit: SocSci, Div | ACGH, DD, SS, WC. -I. (I.)
110. Contemporary American Family (4) Lecture-4 hours. Prerequisite: introductory psychology. Factors currently influencing American families including changing economic conditions, changing sex roles, divorce, and parenthood; theories and research on family interaction.-II. (I.) K. Conger

## 117. Longevity (4)

Lecture-3 hours; term paper. Prerequisite: upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as Entomology 117.) GE credit: SciEng, Wrt | SE, SL, WE.-I. (II.) Carey

## 120. Research Methods in Human Development (4)

Lecture-3 hours; laboratory - 3 hours. Prerequisite: Statistics 13 or Education 114 or Psychology 41 or Sociology 46A \& B. Scientific process, research designs, and experimental controls; APA manuscript style and scientific writing; statistical analysis and interpretation of results. Laboratory exercises to collect data, analyze and interpret results, and write scientific papers. GE credit: SocSci, Wrt \| SS, WE. -I, III. (I, III.) Nishina, Liu

## 121. Psychological Assessment (4)

Lecture-4 hours. Prerequisite: courses 100A-100B; elementary statistics. Current issues and methodology related to the process of psychological assessment with children.
130. Emotionally Disturbed Children (4) Lecture-3 hours; discussion-1 hour. Prerequisite: courses 100A and 100B or consent of instructor. Discussion of psychosis, neurosis, behavior disorders, and learning difficulties in children.
132. Individual Differences in Cognition (4) Lecture-4 hours. Individual differences in cognition, including learning disabilities and giftedness. Education implications and neurodevelopmental substrates of individual differences in cognition.

## 140. Communication and Interaction with Young Children (2)

Lecture-2 hours. Prerequisite: course 100A; concurrent enrollment in course 140L required; consent of instructor. Integration of research, theory and practice in child development, emphasizing the role of relationships in creating a growth-promoting environment for young children. Includes: peer relationships, emotional understanding and self regulation, attachment, communication and school readiness. To enroll, students must sign up for laboratory time at the Child and Family Studies Center located at 244 First Street, Davis, CA.-I, II, III. (I, II, III.) Chen

## 140L. Laboratory in Early Childhood (3-5)

Laboratory-6-15 hours; laboratory/discussion-3 hours. Prerequisite: course 140, must be taken concurrently for first 3 units of credit; students must contact the Center for Child and Family Studies to enroll. Application of theories of learning and development to interaction with infants, toddlers, and preschoolers at Early Childhood Laboratory. Applied skills in communication, guidance and curriculum. Limited enrollment. May be repeated two times for credit. (P/NP grading only.) -I, II, III. (I, II, III.) Chen

## 141. Field Study With Children and

## Adolescents (4-6)

Lecture-2 hours, fieldwork-6-12 hours. Prerequisite: course 100A or 100B; consent of instructor. Study of children's affective, cognitive and social development within the context of family/school environments, hospitals and foster group homes. May be repeated for credit for a total of 12 units. -I, III. (I, II, III.)

## 142. Field Study with Emotionally

Distressed Children and Adolescents (4-6) Discussion- 1.5 hours; fieldwork-6-12 hours. Prerequisite: course 130 (may be taken concurrently); consent of instructor. Field study with children who are identified as emotionally distressed, including those with internalizing and externalizing behavioral problems. May be repeated for credit for a total of 12 units following consultation with and consent of instructor.

## 143. Field Studies of the Elderly (4-6)

Discussion-2 hours; field work-6-12 hours. Prerequisite: course 100C or 160 may be taken concurrently. Apply theory and research on adult development and aging, work with older adults in a variety of settings, and develop skills relevant to that application. Develop a small research project.-I. Miller, Ober

## 160. Social Aspects of Aging (4)

Lecture-4 hours. Prerequisite: course 100C or Psychology 115 . How the social context affects adult development and aging. Emphasis on demography, social policy, culture, and adaptation. Oral histories as class projects. Offered in alternate years. GE credit: Div.-l.

## 161. Applied Cognition and Aging (4)

Lecture/discussion-4 hours. Prerequisite: introductory social sciences course, Human Development, Psychology 1, Education, or a related social science, or permission of instructor. Principles from cognition and aging and applies these to real-world concerns in areas including education, technology, job performance, and health. Considers physical and social
changes in later life that impact functioning. Offered in alternate years. GE credit: SocSci, Wrt | SS,
WE. - III. (I.) Miller

## 163. Cognitive Neuropsychology in

 Adulthood and Aging (4)Lecture/discussion-4 hours. Prerequisite: Psychology 1 ; course 100C recommended. Theories, methods, and findings concerning the relationship between cognitive processes and brain functioning. Readings, lectures, and in-class discussions cover research on normal younger and older adults, neuropsychological case studies, and selected patient groups (e.g., amnesia, schizophrenia, Alzheimer's disease).-I. (III.) Ober
190C. Introductory Research Conference (1) Discussion-1 hour. Prerequisite: involvement in ongoing research. Instructors lead discussions with undergraduate students who involve themselves in a research project. Research papers are reviewed and aspects of project proposals developed out of class are presented and evaluated. May be repeated for credit. (P/NP grading only.) -I, II, III. (I, II, III.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: upper division standing and consent of instructor. Supervised internship off and on campus, in community, and institutional settings. (P/NP grading only.)
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

200A. Early Development (4)
Lecture-3 hours; discussion - 1 hour. Prerequisite: graduate standing; basic biology or physiology; one upper division course in psychology or a related field; one upper division or graduate course in developmental psychology (may be taken concurrently). Theory and research on the biological, social, cognitive, and cultural aspects of development from conception to the age of five years.-I. Chen, Hibel

## 200B. Middle Childhood and Adolescence

 (4)Lecture-3 hours; discussion-1 hour. Prerequisite: graduate standing; basic biology or physiology, and at least two upper division or graduate-level courses in psychology or related fields. Theory and research on biological, cognitive, social, and cultural influences on behavioral development from age five years until late adolescence.-II. Nishina, Guyer
200C. Development in Adulthood (4)
Lecture/discussion-4 hours. Prerequisite: courses 200A and 200B. Theory and research focusing on social, personality, cognitive, and biological development from early to late adulthood. Emphasis is on theory development and continuity and change. - III. Ober, Miller
203. Adolescent Behavioral and Emotional Development (4)
Lecture/discussion-4 hours. Prerequisite: course 200B. Analysis of recent theories, research methods, and major findings on adolescent behavioral and emotional development, including contextual and genetic influences on adolescence, pubertal transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development. Offered in alternate years.
204. Developmental Neuroscience and Adolescent Psychopathology (4)
Lecture-4 hours. Prerequisite: graduate standing in Human Development, Psychology, Education, Neuroscience or consent of instructor. Introduction to human developmental neuroscience. Understanding of adolescence and its characterization as a time of risky and unhealthy behavior and vulnerability to onset of mental disorder as well as issues around plasticity of the adolescent brain and prevention/ intervention. Offered in alternate years. - II. (II.) Guyer
205. Path Analysis, Factor Analysis, and Structural Equation Modeling (4)
Lecture-4 hours. Prerequisite: Psychology 204B or equivalent graduate courses in statistics or permission of the instructor; familiarity with multiple regres sion and the basics of matrix algebra. Graduate standing in HDGG, Psychology, Sociology, Education, or a related social science, or permission of the instructor. Introduction of basic concepts, principles, and applications of structural equation modeling including path analysis, confirmatory factor analysis, multiple-group modeling, and latent growth curve modeling. Offered in alternate years.
207. Topics in Applied Cognitive Aging (4) Lecture/discussion-2 hours. Prerequisite: graduate standing in Human Development Graduate Group, Psychology, Education, or a related social science, or consent of the instructor. Apply principles from cognitive aging to real-world concerns in areas such as education, technology, job performance, and health. Examine how physical and social changes occurring in later life impact functioning. Offered in alternate years.-I. Miller

## 210. Theories of Behavioral Development

 (3)Lecture-2 hours; discussion-1 hour. Prerequisite: graduate standing in behavioral sciences. Consideration of enduring issues in theories of behavioral development; analysis of adequacy of major theoretical schools (e.g., social learning, Piagetian) as scientific theories. Offered in alternate years.

## 211 . Physiological Correlates of Behavioral

 Development (4)Seminar-4 hours. Prerequisite: consent of instructor. An overview of mechanisms of organismic development and the implications of developmental biology for the analysis of behavioral ontogeny; consideration of parallels between processes of organismic development and behavioral development in children and infra-human mammals. Offered in alternate years. - III.
220. Research Methods in Human Growth and Development (4)
Lecture-4 hours. Prerequisite: Statistics 13 or the equivalent and at least two upper division courses in Human Biology or Developmental Psychology. Overview of qualitative and quantitative approaches to empirical inquiry in the social sciences, with a focus on theory and research methods in biological growth and cognitive and social/emotional development from prenatal period to death. - III. (II.) Liu

## 232. Cognition and Aging (3)

Lecture/discussion-3 hours. Prerequisite: course 200C. The manner in which cognitive processes are affected by aging as well as an understanding of the changes in the central nervous system occurring with aging. Offered in alternate years.-Ober
234. Children's Learning and Thinking (3) Seminar-3 hours. Prerequisite: course 200A or Psychology 212 recommended. Analysis of theories, research methods, and major findings of children's higher-order cognition, including origins of knowledge, development of problemsolving skills, reasoning strategies, and scientific concepts, with an emphasis on the underlying mechanism involved in children's thinking and learning processes. Offered in alternate years. - Chen

## 238. The Context of Individual

## Development (3)

Lecture/discussion-3 hours. Prerequisite: graduate standing in Human Development, Child Development, Education, Psychology, Anthropology, Sociology, or consent of instructor. Analysis of human development within the context of daily life. Contextualizing theories and methods of developmental psychology will be distinguished from contextual theories and methods. Developmental psychology models will be distinguished from child psychology models. Offered in alternate years.
239. Developmental Trajectories in Typical and Atypical Children; Birth to Five (4) Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing in Human Development, Psychology, Sociology, a related social science, or permission of the instructor. Discuss theories of development in typical and atypical children from birth to five from a socio-cultural perspective including par-ent-child interaction, peer interactions, cultural contexts of learning, as well as theoretical and empirical issues for understanding continuities and discontinuities in development. Offered in alternate years. - III.

## 240. Peer Relationships During

## Adolescence (4)

Lecture/discussion-4 hours. Prerequisite: graduate standing in Human Development, Psychology, Education, or consent of instructor. Course examines the role of peer relationships in adolescent development including forms and functions at the individual, dyadic and group levels. Ethnicity and cross cultural research will be discussed. Emphasis on methodology, including surveys, peer nominations/sociometrics, experimental, and observational designs.Nishina

## 250. Current Research on Family

 Relationships (4)Lecture/discussion - 6 hours; term paper. Prerequisite: graduate standing in Human Development Graduate Group, Psychology, Sociology, a related social science, or permission of the instructor. Discussion of theories, methods, and current research on the nature and development of sibling, romantic, and parent-child relationships across the lifespan. Emphasis on interpersonal and family processes examined in ethnic/cultural contexts. Implications for individual development will be addressed. - III. K. Conger
252. Family Research, Programs and Policy (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing in Human Development, Psychology, Sociology, related social sciences, or consent of instructor. Course examines the competing interests of research, policy, and service on current issues of family functioning and individual well being. The course considers communication barriers between researchers, practitioners, and policy makers. Offered in alternate years. - (III.) K. Conger

## 290. Seminar (3)

Seminar-3 hours. Discussion and evaluation of theories, research, and issues in human development. Different topics each quarter. - I, II, III. (I, II, III.)

## 290C. Research Conference (1)

Discussion-1 hour. Prerequisite: graduate standing and consent of instructor. Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 291. Research Issues in Human

## Development (4)

Seminar-4 hours. Prerequisite: graduate standing in the Behavioral Sciences. In-depth presentations of research issues in particular areas of behavioral development. -I, II. (I. II.) R. Conger

## 292. Graduate Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of faculty (internship sponsor) and satisfactory completion of placement-relevant course work, for example: Education 213, 216 ; course 222, 242; Law 272, 273. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit up to 12 units if justified skill acquisition and promise of informing evaluation research. (S/U grading only.) -I, II, III. (I, II, III.)
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)

## Professional <br> 396. Teaching Assistant Training Practicum (1-4) <br> Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) - I, II, III. (I, II, III.)

## Human Development (A Graduate Group)

Katherine J. Conger, Ph.D., Group Chairperson
Group Office. 1315 Hart Hall

## Faculty

Len Abbedutto, Ph.D., Professor
(Psychiatry and Behavioral Sciences and Director, M.I.N.D. Institute)

Jay Belsky, Ph.D., Distinguished Professor (Human Ecology)
Zhe Chen, Ph.D., Professor (Human Ecology)
Katherine J. Conger, Ph.D., Professor (Human Ecology)
Rand Conger, Ph.D., Distinguished Professor (Human Ecology)
Nancy Erbstein, Ph.D., Assistant Researcher (Human Ecology)
Emilio Ferrer, Ph.D., Professor (Psychology)
Lorena Garcia, M.P.H., Dr.P.H., Assistant Professor (Public Health Sciences)
Kevin Gee, Ph.D., Assistant Professor (Education)
Beth Goodlin-Jones, Ph.D., Associate Professor (Psychiatry, M.I.N.D. Institute)
Gail Goodman, Ph.D., Professor (Psychology)
Katharine Graf Estes, Ph.D., Assistant Professor (Psychology)
Amanda Guyer, Ph.D., Associate Professor (Human Ecology, Center for Mind and Brain)
Randi Hagerman, M.D., Professor (M.I.N.D. Institute)

Robin L. Hansen, M.D., Professor (Pediatrics)
Lawrence V. Harper, Ph.D., Professor (Human Ecology)
Paul Hastings, Ph.D., Professor (Psychology)
David Hessl, Ph.D., Associate Clinical Professor (Psychiatry, M.I.N.D. Institute)
Leah Hibel, Ph.D., Assistant Professor (Human Ecology)
Ladson Hinton, M.D., Professor (Psychiatry and Behavioral Sciences)
Suad Joseph, Ph.D., Professor (Anthropology)
Penelope Knapp, M.D., Professor (Psychiatry, M.I.N.D. Institute)
Siwei Liu, Ph.D., Assistant Professor (Human Ecology)
McDonald, Craig, M.D., Professor (Physical Medicine Rehabilitation)
Lisa Miller, Ph.D., Associate Professor (Human Ecology)
Peter Mundy, Ph.D., Professor (Education, M I.N.D. Institute)
Adrienne Nishina, Ph.D., Associate Professor (Human Ecology)
Lisa Oakes, Ph.D., Professor (Psychology, Center for Mind and Brain)
Beth A. Ober, Ph.D., Professor (Human Ecology)
Lenna Ontai, Ph.D. Associate Specialist in Cooperative Extension (Human Ecology) Richard Ponzio, Ph.D., Emeritus Specialist in Cooperative Extension (Human Ecology)
Susan Rivera, Ph.D., Professor (Psychology, Center for Mind and Brain) Richard W. Robins, Ph.D., Professor (Psychology)
Sally Rogers, Ph.D., Professor (Psychiatry, M.I.N.D. Institute)
Julie Schweitzer, Ph.D., Associate Professor (Psychiatry, M.I.N.D Institute)
Phillip Shaver, Ph.D., Professor (Psychology)

Martin Smith, Ph.D., Associate Specialist in
Cooperative Extension (Human Ecology)
Emily Solari, Ph.D., Assistant Professor (Education)
Marjorie Solomon, Ph.D., Associate Professor (Psychiatry and Behavioral Sciences; M.I.N.D. Institute)
Tamara Swaab, Ph.D., Associate Professor (Psychology)
Ross A. Thompson, Ph.D., Professor (Psychology)
Susan Timmer, Ph.D., Clinical Specialist (Pediatrics)
Yuuko Uchikoshi Tonkovich, Assistant Professor (Education)
Brian Trainor, Ph.D., Associate Professor (Psychology)
Kali Trzesniewski, Ph.D., Associate Specialist in Cooperative Extension (Associate Director of Research for statewide 4-H Youth Development Program; Human Ecology)
Anthony Urquiza, Ph.D., Psychologist (Pediatrics)
Karen Watson-Gegeo, Ph.D., Professor (Education)
Distinguished Graduate Mentoring Award
Keith Widaman, Ph.D., Professor (Psychology)

## Affiliated Faculty

Kristin Alexander, Ph.D., Associate Professor (California State University, Sacramento)
Graduate Study. The interdisciplinary and interdepartmental Graduate Group in Human Development offers a program of study leading to the Ph.D. degree. The program provides lifespan study of human behavioral development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, to conduct research, and to be actively involved in public service in human behavioral development.
Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. See our website for more details.
Graduate Adviser. Contact the Group office.

Susette Min, Ph.D. (Asian American Studies) Pablo Ortiz, D.M.A. (Music)

## The Program of Study

The Humanities program is an undergraduate and graduate curriculum emphasizing innovative approaches to ideas that matter. Courses offered through the program are interdisciplinary in scope and aim to develop critical thinking and writing skills in three principal areas: major figures, works, and genres in world cultures; major themes in world literatures; and relationships between history, society, and culture.

## Courses in Humanities (HUM) <br> Lower Division

1. Humanities Forum (2)

Lecture -2 hours. Reading and discussion of a single work representative of a particular culture, historical period, or genre and significant for its ongoing cultural impact in the humanities, sciences, social sciences, technology, and popular arenas. Attention to provocative implications for contemporary society. May be repeated one time for credit if topic differs. GE credit: ArtHum | AH.

## 1D. Issues and Concepts in the Humanities

 (2)Discussion-2 hours. Prerequisite: course 1 concurrently. Small group discussions and preparation of short papers for course 1. May be repeated one time for credit if topic differs. GE credit: ArtHum, Wrt | AH, WE.

## 2A. Global Humanities Forum (4)

Lecture-3 hours; extensive writing. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in world arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated one time for credit if topic differs. GE credit:
ArtHum | AH, WC, WE.-I, II, III. (I, II, III.)
2B. American Humanities Forum (4)
Lecture-3 hours; extensive writing. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in American arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated one time for credit if topic differs. GE credit: ArtHum | ACGH, AH, WE. -I, II, III. (I, II, III.)

## 3. Medicine and Humanities (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: completion of Subject A requirement. Evolution of the "medical arts" into the "science of medicine." The culture of medicine in the context of society, medical ethics. GE credit: ArtHum or SocSci, Wrt \| AH or SS, WE.

## 4. Animals and Human Culture (2)

Lecture -2 hours. The meaning of human relations with animals studied across a variety of historical periods and culture and from a variety of humanistic perspectives. Offered in alternate years. GE credit: ArtHum, Wrt | AH
4D. Animals and Human Culture Discussion (2)

Discussion-2 hours. Prerequisite: concurrent enrollment in course 4. Small group discussions and preparation of short papers for course 4. Offered in alternate years. GE credit: ArtHum, Wrt \| AH, WE. -I.

## 7. Travel and Travel Literature (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: Subject A requirement. History of travel from the age of exploration to the modern era. Contemporary trends in travel, including mass tourism, adventure travel, and ecotravel. Social, economic, and cultural issues related to modern trends in travel. Analysis of literary representations of travel. GE credit: ArtHum, Div, Wrt \| AH, WC, WE.

## 8. Introduction to Perspectives on Narrative

 (4)Lecture/discussion-3 hours; extensive writing. Prerequisite: satisfaction of Subject A requirement. Interdisciplinary approach to the use of story across time, culture, and discipline. How the telling and retelling of particular stories reflect the values, concerns, and assumptions of their original audiences and genres. GE credit: ArtHum or SocSci, Div, Wrt | AH, WE
9. Don Quixote and the Modern World (2) Lecture-2 hours. Reading Don Quixote as emblem of modernity in the West. Issues of reality versus illusion, heroism, freedom and self-fulfillment, racial tolerance and love. Don Quixote in other cultural and popular media: film, dance, art, musical drama, and television. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC.

## 9D. Don Quixote and the Modern World

 Discussion (2)Discussion-2 hours. Prerequisite: course 9 concurrently. Small group discussions and preparation of short papers for course 9. Offered in alternate years. GE credit: ArtHum | AH, WC, WE.
13. Witches: Myth and Historical Reality (4)

Lecture - 3 hours; extensive writing. This course examines the historical construction of the witch. The four areas covered are: European pagan religions and the spread of Christianity; the "Burning' Times"
in early modern Europe; 17th-century New England and the Salem witch trials; and fairytales. GE credit: ArtHum, Div, Wrt \| AH, WC, WE.

## 15. Language and Identity (4)

Lecture/discussion-3 hours; extensive writing. Introduction to topics related to the construction of identity through language use, including geographical and social factors affecting language groups. Language ideology affecting linguistic groups, including bilinguals and non-native speakers of English. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WE.
18. Performance and the 21 st Century (4) Lecture/discussion-3 hours; extensive writing. Live performance and globalization in the twenty-first century. Consideration of the cultural context of performing arts and artists including their methods of creativity. GE credit: ArtHum or SocSci, Div,
Wrt | AH, WE.

## 60. Narrative and Argumentative

Approaches to Major Current Issues in the Media, Culture, and Society (4)
Lecture/discussion-3 hours; term paper. Prerequisite: English A or the equivalent. Interdisciplinary approach to contemporary issues (abortion, AIDS, civil rights, war and peace, welfare state) around which individuals, communities and institutions define themselves in American society, by applying principles of narrative theory to the narratives where those issues are embedded. GE credit: ArtHum or SocSci, Div, Wrt | AH, WE.
92. Internship (1-12)

Internship-3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.)

## Upper Division

144. Marx, Nietzsche, Freud (4)

Lecture/discussion-3 hours; term paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. Offered in alternate years. (Same course as German 144.) GE credit: ArtHum,
Wri | AH, WC.-I.
180. Topics in the Humanities (4)

Lecture/discussion-3 hours; term paper. Analysis of interdisciplinary issues in the Humanities. Topics will vary. May be repeated one time for credit. GE credit: ArtHum, Wrt \| AH, WE
192. Internship (1-12)

Internship-3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.)
198. Directed Group Study (1-4)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-4)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

250. Topics in the Humanities (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the humanities, selected by the instructor. May be repeated one time for credit.
292. Graduate Internship (1-15)

Lecture-3 hours; lecture/discussion-1 hour. Prerequisite: consent of instructor required. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit up to 15 units. (S/U grading only.)
298. Directed Group Study (1-5)
(S/U grading only.)
299. Individual Research (1-4)

Individual research in the humanities resulting in a formal written research report. (S/U grading only.)

## Professional <br> 396. Teaching Assistant Training Practicum (1-4) <br> Prerequisite: graduate standing. ( $S / U$ grading only.)

## Human Rights

## (College of Letters and Science)

http://humanrightsminor.ucdavis.edu
The interdisciplinary minor in Human Rights gives students a chance to explore human rights as both a specific issue and within larger contexts through a wide variety of disciplines and courses.
Courses in the minor provide students with an oppor tunity to approach human rights as a practical, as well as an intellectual problem. The minor will be of special interest to students majoring in area studies and those planning to pursue careers in public service, law and international relations. Students will take courses in which human rights problems are the central focus of the course and other courses, which while not having human rights as their central theme, include elements that address the history, theory, practice, violation, promotion and protection of human rights, or in which students have the opportunity to conduct research projects relevant to the study of human rights.
The minor is sponsored by the Religious Studies Program.

## Program Objectives

In addition to completing Religious Studies 90 or 134, students must take two additional Core Courses and two from the Elective Course list. Students must select courses from at least three different departments or programs to satisfy minor requirements.

## Minor Program Requirements:

## Human Rights

Religious Studies 90 or 134
Choose two core courses from the following*: History 142A, Religious Studies 131, Sociology 104, Spanish $159 \dagger \ldots . . . . . . . . .$.
Choose two elective courses from the following: American Studies 156,
Anthropology 123B, 126B, 130A, 131,
Chicana/o Studies 131/131S, 150, English
107, History 142A, 142B, 172, 177A,
177B, 183A, 183B, 189, Native American
Studies 115, 130B, 130C, 157, Religious
Studies 131, 167, Sociology 104, 130, 137,
157 160, 171, Spanish 159†, 175^,
Women's Studies 102, 140, 170, 182..... 8

* With prior permission of the

Interdisciplinary Minor in Human Rights advisor, students may substitute one course from the list of electives as a core course. $\dagger$ When taught as "Witnessing in Latin
America: Trauma, Violence and Memory."
$\wedge$ Only if topic is related to human rights.
Prior approval from minor adviser is required."
Advising. Religious Studies Program office, 213 Sproul Hall 530-752-1219

## Courses in Human Rights (HMR)

## Upper Division

120A. Art, Architecture, and Human Rights (4)

Lecture/discussion-4 hours. Prerequisite: consent of instructor. Study of human rights as they relate to art, architecture, and cultural heritage. Examines museums, art collections, and cultural-heritage management, their relation to the cultural prerogatives of communities and indigenous groups, and protection of cultural heritage during war and conflict. (Same
course as Art History 120A.) Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, DD, VL, WC.-III. Watenpaugh
130. Special Topics in Human Rights (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 134 or Religious Studies 134 recommended. Thematic study of human rights. Topics may include contemporary or historical issues in the promotion, protection, and violation of human rights; human rights and the arts, religion, literature are possible topical areas. No credit for students who have completed Religious Studies 90. (Same course as Religious Studies 134) May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum or SocSci \| AH or SS, WC, WE. - III. Watenpaugh
131. Genocide (4)

Lecture/discussion-3 hours; term paper or discus-sion-1 hour. Prerequisite: upper division standing. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. (Same course as Religious Studies 131.) Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, VL, WC,
WE. - (I.) Watenpaugh
134. Human Rights (4)

Lecture/discussion-3 hours; term paper or discussion - 1 hour. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. No credit for students who have completed Religious Studies 90. (Same course as Religious Studies 134.) Offered in alternate years GE credit: ArtHum or SocSci, Div, Wrt | AH or SS,
WC, WE. - (III). Watenpaugh
198. Directed Group Study (1-4)

Prerequisite: consent of instructor. Group study on focused topics in human rights. May be repeated for credit. (P/NP grading only.) - I, II, III, IV. (I, II, III, IV.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. Opportunity for advanced undergraduate students to work with a faculty member in a focused manner on a topic or topics of human rights. May be repeated for credit. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.)

## Graduate

200A. History, Theory and Criticism of Human Rights (4)
Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar will engage with criticism of Human Rights and develop research and teaching within disciplinary and interdisciplinary frameworks. (Same course as Study of Religion 231E.) Offered in alternate years. - II. (II.) Watenpaugh
200B. Memory, Culture, and Human Rights (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Restricted to graduate students. Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, intergroup conflicts, and human rights struggles. (Same course as Cultural Studies 210.) Offered in alternate years.-l. (I.) Lazzara

## Hydrologic Sciences (A Graduate Group)

Gregory Pasternack, Ph.D., Chairperson of the Group<br>Group Office. 1152 Plant and Environmental Sci-<br>ences Building 530-752-1669;<br>http://hsgg.ucdavis.edu

(Environmental Science and Policy)
Bryan Weare, Ph.D., Professor Emeritus

## Affiliated Faculty

Roger Bales, Ph.D., Professor
(UC Merced School of Engineering)
Philip Duffy, Ph.D., Adjunct Associate Professor (School of Natural Resources, U.C. Merced)
Stephen Grattan, Ph.D., Water Relations Specialist
Thomas Harter, Ph.D., Cooperative Extension Specialist
Pramod Pandey, Ph.D., Cooperative Extension Specialist (Population Health and Reproduction)
Richard Snyder, Ph.D., Biometeorologist Specialist
Kenneth Tate, Specialist in Cooperative Extension (Plant Sciences)
Josh Viers, Associate Professor (UC Merced)
Daniele Zaccaria, Ph.D., Cooperative Extension Specialist
Graduate Study. The Graduate Group in Hydrologic Sciences is an interdisciplinary program offer-
ing M.S. and Ph.D. degrees. Course work is
available from many programs, including Hydrologic Sciences, Civil and Environmental Engineering, Geology, and Soil Science. Education in the group
broadens the skills and knowledge of the physical
science or engineering student interested in the
occurrence, distribution, circulation and properties
of water on earth. Because of water's ubiquity and importance to physical, chemical and biological processes, hydrologic sciences involve the geologic, atmospheric and oceanic sciences, as well as engineering and other applied physical sciences. Basic to the program are core courses in fluid dynamics, hydrologic phenomena, hydrobiology, hydrogeochemistry, hydrologic techniques, and hydrologic policy. Students can pursue specializations in hydrogeochemistry, surface hydrology, subsurface hydrology, irrigation and drainage, watershed hydrology and water resources management. The subsurface hydrology specialization includes hydrogeology and vadose-zone hydrology.
Preparation. Applicants to the program are expected to have completed or to be completing an undergraduate degree in environmental or physical sciences, mathematics, or engineering. Undergraduate study must include one year each of calculus, of physics with calculus, and of chemistry. A second year of vector calculus, linear algebra and differential equations is recommended and will be required, before completion of graduate work. Additional courses in applied statistics, computer programming, and geology are recommended.
Specialization. Each student will pursue an individual program of advanced study under the direction of a group of faculty members with similar interests but diverse backgrounds. Course work in addition to the above is typically taken in the most appropriate departments.
Graduate Adviser. Graham Fogg, Ph.D., Peter Hernes, Ph.D., and Carlos Puente, Ph.D.
Graduate Admissions Adviser. Mark E. Grismer, Ph.D.

## Courses in Hydrologic Sciences (HYD)

## Graduate

200. Survey of Hydrologic Sciences (1) Seminar-1 hour; term paper. Prerequisite: open to students in the Hydrologic Sciences program. Seminar course exposes students to the diversity of sciences involved in the program. Students prepare a paper and presentation in their area of research interest. May be repeated two times for credit. (S/U grading only.)-I. (1.) Grismer

## 205. Continuum Mechanics of Natural <br> \section*{Systems (4)}

Lecture/discussion - 4 hours. Prerequisite: Mathematics 21 and 22B, Physics 9B. Continuum mechanics of static and dynamic air, water, earth and biological systems using hydraulic, heat and electrical conductivity; diffusivity; dispersion; strain; stress; deformation gradient; velocity gradient; stretch and spin tensors. (Same course as Biological Systems Engineering 205.) - III. Wallender

## 210. Vadose Zone Transport Processes and <br> Modeling (3)

Lecture/discussion-3 hours. Prerequisite: Soil Science 107, Mathematics 22B, programming language, or consent of instructor. Principles and modeling of water flow and chemical transport in the vadose zone, with specific applications to soils. Topics include hydraulic properties, finite difference application to unsaturated water flow, parameter optimization, diffusive and convective transport in gaseous and liquid phases. Offered in alternate years. -III. Hopmans

## 243. Water Resource Planning and <br> Management (3)

Lecture-3 hours. Prerequisite: course 141 or Civil and Environmental Engineering 142. Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as Biological Systems Engineering 243.) - (I.) Marino
252. Hillslope Geomorphology and Sediment Budgets (4)
Lecture-3 hours; fieldwork-3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmental Engineering 142 or consent of instructor. Exploration of theoretical and empirical foundations of sediment production on hillslopes using computer models and field experiments to promote an understanding of how watersheds evolve naturally and with human impacts. Offered in alternate years. - III. Pasternack

## 256. Geomorphology of Estuaries and

 Deltas (4)Lecture -3 hours; fieldwork - 3 hours. Prerequisite: course 141 or Geology 35 or Civil and Environmental Engineering 42 or consent of instructor. Survey of the processes and landforms associated with sediment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Offered in alternate years. - III. Pasternack

## 264. Modeling of Hydrologic Processes (3)

 Lecture-3 hours. Prerequisite: course 141 or the equivalent and Statistics 102 or the equivalent. Techniques used to model the spatio-temporal structure of rainfall and runoff are introduced. Procedures studied include those based on stochastic point processes, chaos theory, fractal geometry, and fractional noises. Offered in alternate years. - (III.) Puente
## 269. Numerical Modeling of Groundwater

 Systems (3)Lecture-3 hours. Prerequisite: course 145A or Civil Engineering 144 and course 145B, Mathematics 22B. Finite difference and finite element techniques in modeling groundwater flow and transport. Fundamentals of constructing and calibrating models with hands-on applications. Methods and limitations of numerical solution of transport equations. Model interpretation and ethics. - (III.) Fogg

## 273. Introduction to Geostatistics (3)

Lecture-3 hours. Prerequisite: Statistics 130A and 130B, or the equivalent. Statistical treatment of spatial data with emphasis on hydrologic problems. Topics include theory of random functions, variogram analysis, Kriging, co-Kriging, indicator geostatistics, and stochastic simulation of spatial variability. Demonstration and use of interactive geostatistical software included. Offered in alternate years. -I. Fogg

## 274. Practice of Groundwater Flow and Transport Modeling (3)

Lecture-2 hours; lecture/laboratory-0.5 hours; lecture/discussion-0.5 hours. Prerequisite: course 269, Civil and Environmental Engineering 272B, or Civil and Environmental Engineering 272C. Selecting and building groundwater flow and transport models. Planning, preparation, execution, presentation, and review of modeling projects. Review of methods, assumptions, and limitations of groundwater models; practicing with MODFLOW, MT3D, associated GUI, and with other groundwater modeling software of choice. Offered in alternate years. III. Harter

## 275. Analysis of Spatial Processes (3)

Lecture-3 hours. Prerequisite: Statistics 102 or the equivalent; course 273 or Statistics 273A recommended. Characterization of homogeneous random fields; extremes and spectral parameters; geometry of excursions, local averaging; scale of fluctuation; non-Gaussian and irregular random fields; geostatistical applications. Offered in alternate years. - (III.) Puente

## 286. Selected Topics in Environmental Remote Sensing (3)

Discussion-2 hours; lecture-1 hour; project. Prerequisite: consent of instructor; Environmental and Resource Sciences 186 or equivalent required; Environmental and Resource Sciences 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. (Same course as Geography 286) May be repeated for credit. Offered irregularly.-I. Ustin
290. Seminar in Hydrologic Science (1)

Seminar-1 hour. Prerequisite: graduate standing and background in Hydrologic Science, consent of instructor. Seminars and critical review of problems, issues, and research in hydrologic sciences. Oral presentations of research. Topics will vary. May be repeated for credit. (S/U grading only.) - III. (III.)

## 298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)
299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) $-\mathrm{I}, \mathrm{II}$, III. (II, II, III.)

## Professional

410. OSHA HAZWOPER Refresher Course (1)

Lecture-1 hour. Updates hazardous materials handling information for purposes of keeping certification current. Certification lapses until the refresher course is complete. (P/NP grading only.) - II. (II.) Grismer
440. Hazardous Waste Operations Training (3)

Lecture-2 hours; laboratory - 2 hours. Prerequisite: upper division standing in College of Agricultural and Environmental Sciences. Forty-hour course designed to meet the requirements of Federal OSHA regulation CFR 1910.120. Covers the health, regulatory, processing and safe handling issues/problems associated with working with hazardous materials. (P/NP grading only.) - III. (III.) Grismer

## Hydrology

(College of Agricultural and Environmental Sciences)
Faculty. See under Department of Land, Air and Water Resources, on page 364, Hydrology Section.

## The Major Program

Hydrology is the study of the occurrence, distribution, circulation, and behavior of water and waterborne materials in the environment of Earth. It includes practical measurement and technical analysis of water phenomena underground, on the Earth's surface, and in the atmosphere. Contemporary hydrologic problems costing society \$10-100 billion per year include environmental restoration, sustainability of groundwater and surface water resources, water pollution, and natural disasters such as floods, droughts, landslides, avalanches, and land subsidence. The management of these problems demands hydrologic scientists with the comprehensive, interdisciplinary education embodied in this program. Beyond its societal utility, hydrology can be an exciting science for the curious-minded. Hydrologists explore natural phenomena such as climate change, waterfalls, health of coral reefs, biogeochemical cycles, and aquifers.
The Program. A hydrologist needs a strong background across the basic sciences of physics, mathematics, chemistry, and biology. Breadth of understanding comes from exposure to ecology, geology, engineering, policy, and law. Depth of experience is provided by core hydrology courses, internship opportunities, and practical outdoor training. Students choose electives to match their interests and career goals. Transfer students should have completed as much as possible of the preparatory subject matter listed below.
Internships and Career Alternatives. Job opportunities in hydrology exceed the available supply of trained hydrologists. Students commonly obtain internships and jobs with state and federal
agencies, private consulting firms, environmental interest groups, irrigation districts, and utility companies. Federal agencies hiring hydrologists include the U.S. Geological Survey, U.S. Department of Agriculture (Fish and Wildlife, Agricultural Research, Forest Service, and National Resource Conservation Service), Environmental Protection Agency, and national research laboratories (Lawrence Livermore National Laboratory, Oak Ridge National Laboratory). State and local agency employers include California's Departments of Water Resources, Conservation, Fish and Game, and Toxic Substances as well as the Water Resources Control Board and Regional Water Quality Control Boards. To obtain higher levels of responsibility and salary, hydrologists often seek advanced degrees, and the hydrology major is designed to provide students with a highly competitive education to get into graduate school.

## Minor Program Requirements:

## Hydrology

The Hydrology Section of the Department of Land, Air and Water Resources offers the minor in Hydrology for environmental or natural science students who have an interest in water/environmental issues. The interested student should have completed preparatory course work in calculus (Mathematics 16B), chemistry (Chemistry 2A; Chemistry 2B recommended), physics (Physics 7A), and biology (Biological Sciences 2A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.

## Watershed Science

The Hydrology Program of the Department of Land, Air and Water Resources offers the minor in Watershed Science. This minor is intended for environmental, natural, or social science students who have an interest in the interfaces between hydrology, ecology, policy and management. The interested student should have completed preparatory course work in calculus (Mathematics 16B), chemistry (Chemistry 2A; Chemistry 2B recommended), physics (Physics 7A), and biology (Biological Sciences 2A). Course work in the minor provides fundamental skills and knowledge on science and management of watersheds in the context of current water resources and ecological problems.

ences Teaching Center in 113 Veihmeyer Hall or in
1150 Plant and Environmental Sciences Building 530-752-1603.

## Lower Division

10. Water, Power, Society (3)

Lecture-2 hours; discussion - 1 hour. Water
resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as Science and Society 10.) GE credit: SciEng or SocSci, Wrt \| SE or SS, SL. -III. (III.) Fogg

## 47. Watershed Processes and Water

## Quality in the Tahoe Basin (2)

Lecture/laboratory-21 hours; fieldwork -9 hours; discussion-3 hours; term paper. Prerequisite: basic knowledge of environmental, soil, or hydrologic sciences. Watershed processes, runoff water-quality management, restoration in Lake Tahoe Basin. Soils, precipitation-runoff, revegetation and adaptive management related to erosion control, effective solufions, development of restoration strategies. Students develop field restoration. Course involves 3 days of instruction in Tahoe City. (Same course as Environmental Science and Management 47.) Not open to students who have successfully completed Environmental and Resource Sciences 47. (Formerly Environmental and Resource Sciences 47 .) GE credit: SciEng | QL, SE, SL. -IV. (IV) Grismer

## 92. Hydrologic Science Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division student, consent of instructor. Work experience off and on campus in Hydrologic Science. Internship supervised by a member of the faculty. (P/NP grading only.)-I, II, III. (I, II, III.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Offered irregularly. (P/NP grading only.)

## Upper Division

103N. Fluid Mechanics Fundamentals (4) Lecture-4 hours. Prerequisite: Physics 9B. Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as Biological Systems Engineering 103.) Offered irregularly. GE credit: SciEng | QL, SE, VL.-I. (I.) Wallender
110. Irrigation Principles and Practices (3) Lecture-2 hours; laboratory-3 hours. Prerequisite: Physics 7A; Soil Science 100 recommended. General course for agricultural and engineering students dealing with soil and plant aspects of irrigation and drainage. Soil-water principles including water movement, plant responses to irrigation regimes, water use by crops; also irrigation systems and water quality. Not open for credit to students who have completed Water Science 110. Offered in alternate years. GE credit: SciEng | SE, SL. - (III.) Goldhamer, Grattan

## 124. Plant-Water-Soil Relationships (4)

 Lecture-3 hours; discussion-1 hours. Prerequisite: one upper division course in soil science, such as Soil Science 100; and one upper division course in plant science or plant biology, such as Plant Biology 111; or consent of instructor. Principles of plant interactions with soil and atmospheric water environments and practical applications to crop management (e.g., irrigation) and plant eco-physiology (e.g., drought). Not open for credit to students who have completed Water Science 104. GE credit: SciEng | QL, SE, SL. - III. (III.) Shackel
## 134. Aqueous Geochemistry (6)

Lecture-4 hours; laboratory-3 hours. Prerequisite: Chemistry 2B. Chemistry of natural waters; dielectric properties of water; thermodynamic and mass-action relations; metal hydrolysis; acid-base equilibria; metalcoordination chemistry; solubility calculations; electron-exchange reactions; sorptive partitioning; ion exchange; and dissolved organic matter. GE credit: SciEng | QL, SE. - III. (III.) Hernes, Parikh

## 141. Physical Hydrology (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Physics 9B, Mathematics 21B; course 100 recommended. Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quantitative description of the following processes: precipitation, infiltration, evaporation, transpiration, surface runoff, and groundwater runoff. GE credit: SciEng | QL, SE, SL, VL.-I. (I.) Puente

## 142. Systems Hydrology (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 141 or Civil and Environmental Engineering 142. General course considering hydrologic processes from a systems or statistical model perspective. General probability concepts are applied to frequency, time series and spatial data analysis. Linear systems are also considered in conjunction with Kalman filter techniques. GE credit: SciEng | OL, QL, SE. - II. (II.) Puente

## 143. Hydrological Processes in Ecosystems

 (3)Lecture-3 hours. Prerequisite: course 141 or Environmental and Resource Science 100. Movement and storage of water are integral parts of landscape and ecosystem functioning. Hydrological processes in individual ecosystems and the role of water linking the myriad components of the landscape. Offered in alternate years. GE credit: SciEng | QL, SE, SL. - (II.) Pasternack

## 144. Groundwater Hydrology (4)

Lecture-4 hours. Prerequisite: Mathematics 16B or 21 A ; course 103 or Engineering 103 recommended. Fundamentals of groundwater flow and contaminant hydrology. Occurrence, distribution, and movement of groundwater. Well-flow systems.

Aquifer tests. Well construction operation and maintenance. Groundwater exploration and quality assessment. Agricultural threats to groundwater quality: fertilizers, pesticides, and salts. (Same course as Hydrologic Science 144.) Offered alternate years.
GE credit: SciEng | QL, SE, SL, VL.-I. (I.)

## 146. Hydrogeology and Contaminant

Transport (5)
Lecture-3 hours; laboratory-2 hours; term paper. Prerequisite: course 144 or Civil and Environmental Engineering 144 or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic examples. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as Geology 156.) GE credit: SciEng | SE. - II. (II.) Fogg

## 147. Runoff, Erosion and Water Quality <br> Management in the Tahoe Basin (3)

Lecture/laboratory - 30 hours; fieldwork - 15 hours; discussion- 10 hours; term paper. Prerequisite: Physics 7 B or 9 B , Mathematics 16 C or 21 C , Civil and Environmental Engineering 142 or course 141 or Environmental and Resource Sciences 100. 5 days of instruction in Tahoe City. Practical hydrology and runoff water quality management from Tahoe Basin slopes. Development of hillslope and riparian restoration concepts, modeling and applications from physical science perspectives including precipi-tation-runoff relationships, sediment transport, and detention ponds. (Same course as Biological Systems Engineering 147.) GE credit: SciEng | QL, SE, SL. -IV. (IV.) Grismer

## 150. Water Law (3)

Lecture-3 hours. Prerequisite: Environmental and Resource Sciences 100 or 121 or consent of instructor. Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal/ state relations. Basic water quality acts, endangered species act, water transfers and current water issues. GE credit: SocSci | ACGH, SS. -II. (II.) Cahill

## 151. Field Methods in Hydrology (4)

Lecture-2 hours; laboratory - 3 hours; fieldwork - 3 hours. Prerequisite: Environmental and Resource Sciences 100 or course 141. Measurement methods and data analysis for evaluation of water storage, movement and contamination in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used. Offered in alternate years. GE credit: SciEng | QL, SE, SL. - II. Pasternack

## 182. Environmental Analysis using GIS (4)

Lecture-2 hours; laboratory-4 hours. Prerequisite: Applied Biological Systems Technology 180 or the equivalent GIS experience and skills; general biology and/or ecology courses recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. Offered in alternate years. (Same course as Applied Biological Systems Technology 182.) GE credit: SciEng | QL, SE, SL, VL. - II. (II.) Hijmans

## 192. Hydrologic Science Internship (1-12)

Internship-3-40 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in water science. Internship supervised by a member of the faculty. (P/NP grading only.) -I, II, III. (I, II, III.)

## 198. Directed Group Study (1-5)

(P/NP grading only.)-I, II, III. (I, II, III.)

## 199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: senior standing. (P/NP grading only.)-
I, II, III. (I, II, III.)

## Immunology (A Graduate Group)

Charles Bevins, M.D., Ph.D., Chairperson of the Group

Group Office. 5217 Vet Med 3A;
530-754-0103;
http://immunology.compmed.ucdavis.edu/

## Faculty

lannis Adamopoulos, Ph.D., Assistant Professor
(Rheumatology, Allergy and Clinical Immunology)
Paul Ashwood, Ph.D., Associate Professor
(Microbiology, and Immunology)
Nicole Baumgarth, D.V.M., Ph.D., Professor
(Center for Comparative Medicine and
Pathology, Microbiology and Immunology)
Andreas Baumler, Ph.D., Professor
(Microbiology, and Immunology)
Charles Bevins, M.D., Ph.D., Professor
(Microbiology, and Immunology)
Christopher L. Bowlus, M.D., Associate Professor (Gastroenterology)
Kiho Cho, Ph.D., Associate Adjunct Professor (Surgery)
Satya Dandekar, Ph.D., Professor and Chair (Microbiology, and Immunology)
Laurel J. Gershwin, D.V.M., Ph.D., Professor Pathology, Microbiology, and ÍImmunology)
Tzipora Goldkorn, Ph.D., Professor
(Pulmonary and Critical Care Medicine)
Leigh G. Griffiths, Vet.MB, MRCVS, Ph.D., Associate Professor (Veterinary Medicine and Epidemiology)
Richard W. Harper, M.D., Ph.D., Associate Professor (Pulmonary and Critical Care Medicine)
Volkmar Heinrich, Ph.D., Associate Professor (Biomedical Engineering)
James E.K. Hildreth, M.D., Ph.D., Professor and
Dean (Molecular and Cellular Biology)
Daniel Hwang, Ph.D., Adjunct Professor (Nutrition)
Kirk C. Klasing, Ph.D., Professor (Animal Science)
Kit S. Lam, M.D., Ph.D., Professor and Chief (Hematology and Oncology)
Pam Lein, Ph.D., Professor (Molecular Biosciences)
Patrick S.C. Leung, Associate Adjunct Professor (Rheumatology, Allergy and Clinical Immunology)
Shirley Luckhart, Ph.D., Professor
(Microbiology, and Immunology)
Emanual Maverakis, M.D., Assistant Professor (Dermatology)
Kimberley A. McAllister, Ph.D., Associate Professor (Neurology)
Stephen J. McSorley, Ph.D., Associate Professor (Center for Comparative Medicine and Anatomy Physiology and Cell Biology)
Lisa A. Miller, Ph.D., Associate Professor (Anatomy, Physiology and Cell Biology)
William J. Murphy, Ph.D., Professor (Dermatology)
Lorena Navarro, Ph.D., Assistant Professor
(Microbiology and Molecular Genetics)
Robert T. O'Donnell, M.D., Ph.D., Professor (Hematology and Oncology)
John Peters, Ph.D., Associate Professor-in-Residence (Internal Medicine)
Kent E. Pinkerton, Ph.D., Professor and Director (Anatomy, Physiology and Cell Biology) Distinguished Teaching Award-Graduate/ Professional
David Pleasure, M.D., Ph.D. Professor (Neurology and Pediatrics)
Siba Raychaudhuri, M.D., Clinical Assistant Professor and Chief Rheumatologist (Sacramento VA Medical Center)
Grace L. Rosenquist, Ph.D., Assistant Adjunct Professor (Neurobiology, Physiology, and Behavior)
Barbara Shacklett, Ph.D., Associate Professor
(Microbiology, and Immunology)
Scott I. Simon, Ph.D., Professor
(Biomedical Engineering)

Jay Solnick, M.D., Ph.D., Professor
(Center for Comparative Medicine and Medical
Microbiology and Immunology)
Athena Soulika, Ph.D., Assistant Professor (Dermatology)
Charles B. Stephensen, Ph.D., Adjunct Professor
(Western Human Nutrition Research Center)
Jeffrey L. Stott, Ph.D., Professor
(Pathology, Microbiology, and Immunology)
Yoshikazu S. Takada, M.D., Ph.D., Professor (Dermatology)
Suzanne S. Teuber, M.D., Professor (Rheumatology, Allergy and Clinical Immunology)
Jose V. Torres, Ph.D., Professor
(Microbiology, and Immunology)
Alfonso Tramontano, Ph.D., Adjunct Professor (Nephrology)
Renee M. Tsolis, Ph.D., Associate Professor (Microbiology, and Immunology)
Joseph M. Tuscano, M.D., Professor
(Hematology and Oncology)
Judy Van de Water, Ph.D., Professor-in-Residence (Rheumatology, Allergy and Clinical Immunology)
Andrew Vaughan, Ph.D., Professor
(Radiation Oncology)
Robert H. Weiss, M.D., Associate Professor (Nephrology)
Reen Wu, Ph.D., Professor
(Anatomy, Physiology and Cell Biology)
Heike Wulff, Ph.D., Associate Professor (Pharmacology)
Susan Zunino, Ph.D., Associate Adjunct Professor (Nutrition)
Huaijun Zhou, Ph.D., Assistant Professor (Animal Science)
Graduate Study. The Graduate Group in Immunology offers an interdisciplinary program of study in an exciting field of biology and medicine leading to the M.S. and Ph.D. degrees. Participating faculty from various Schools and Departments at UC Davis provide research opportunities in diverse areas of applied immunology. Areas of focus include infection and immunity (including host response regulation to parasites, viruses and bacteria), nutrition and immunity, autoimmunity, immune regulation, neuroimmunology, cancer therapy and immune mediators and their uses for diagnosis and treatment.
Preparation. Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry, biochemistry, molecular and cellular biology or related biological and medical sciences.
For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (a) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (b) zoological specialties (cell biology, endocrinology, embryology, proto-zoology, histology, cytology, physiology); (c) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (d) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (e) genetic specialties (developmental genetics, population genetics, cytogenetics, molecular genetics).

## Graduate Adviser. See the graduate

## program website at

http://immunology.compmed.ucdavis.edu/people/.

## Courses in Immunology (IMM)

Additional courses are available and listed under the individual sponsoring departments. Contact the Group office for information.

## Graduate

201. Introductory Immunology (4)

Lecture-4 hours. Prerequisite: graduate standing.
Comprehensive introduction to the principles of immunology. Limited enrollment. - I. (I.) Miller

## 201L. Advanced Immunology Laboratory

 Rotations (4)Laboratory/discussion - 12 hours. Laboratory assignment in two research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. Student writes a project outline and gives oral presentation. May be repeated two times for credit. (S/U grading only.) -I. (I.) Ashwood
202L. Advanced Immunology Laboratory Rotations (5)
Laboratory/discussion - 15 hours. Laboratory assignment in two research laboratories. One fourweek and one six week assignment in immunology research laboratories. Individual research problems with an emphasis on methodological/procedural experience and experimental design. May be repeated two times for credit. (S/U grading only.) II. (II.) Ashwood

## 203. Cancer Immunology (2)

Lecture - 1 hour; term paper. Covers concepts in cancer biology, progression and immune evasion. It will also cover topics such as: immune surveillance, immune effector mechanisms and current concepts in immune therapy. Offered in alternate years. - III. (III.) Murphy

## 204. Topics in Innate Immunity (2)

Extensive writing or discussion-1 hour; performance instruction-1 hour. Prerequisite: course 201 or equivalent; course 293 preferred. Restricted to first- or second-year GGI and MGG students; others with permission of instructor. Enrollment limited to 18 students. Covers current topics in the field of innate immunity through student seminar presentations and critical evaluation of the literature. Concepts include: pathogen recognition, intercellular communication, specialized cellular function and effector/signaling molecules. Offered in alternate years. - (IV.) Bevins
292. Immunotoxicology Seminar (2) Seminar-2 hours. Prerequisite: graduate standing in Pharmacology/Toxicology, Immunology, Physiology, or Biochemistry. Seminar presentations dealing with principles of xenobiotic effects on immune system functions and specific examples of drugs and environmental chemicals exerting toxic effects on the immune system. Offered in alternate years. (S/U grading only.)-I. Golub
293. Current Concepts in Immunology (4) Lecture/discussion-4 hours. Prerequisite: Pathology, Microbiology, and Immunology 126 or consent of instructor. Innate and acquired immunity as defense mechanisms against disease. Mechanisms regulating the distinct cell types driving these responses and current concepts in the literature. Offered in alternate years.-II. Baumgarth
294. Comparative Clinical Immunology (4) Lecture/discussion-4 hours. Prerequisite: Pathology, Microbiology, and Immunology 126 or consent of instructor. Clinical immunology in animals and man. Pathogenesis of representative infectious diseases, hypersensitive reactions, and autoimmunity. Emphasis on specific and nonspecific immune effector mechanisms to combat infections or mediate pathology. Not open for credit to students who have completed course 294A. Offered in alternate years.-Gershwin, Van de Water
295. Cytokines (3)

Lecture -2 hours; discussion - 1 hour. Prerequisite: course 293 or consent of instructor. Cytokines and their involvement in human and animal physiology/ disease, molecular mechanisms and receptor signaling. Immune and non-immune actions. Overlapping/ redundant functions (referred to as the "cytokine network"). Offered in alternate years. - IIII. Erickson
296. Advanced Topics in Immunology (2) Seminar-2 hours. Prerequisite: graduate standing or consent of instructor. Presentation, discussion, and analysis of faculty research topics in immunology. Required for Immunology Graduate Students every year until they have passed their qualifying exam. May be repeated for credit. (S/U grading only.)-I. (I.) Maverakis

## 297. Mucosal Immunology (2)

Lecture - 1 hour; discussion - 1 hour; term paper. Prerequisite: course 201 or equivalent. Basic concepts and current research topics in the field of mucosal immunology, with an emphasis on human immunology. Major emphases include innate and adaptive mucosal immunity, the gastrointestinal tract, the lung, lymphocyte trafficking, and mucosal vaccination. Offered in alternate years. -II. Shacklett

## Independent Study Program

Information. Chairperson, Committee on Courses of Instruction, c/o Academic Senate Office 530-752-2231
The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest.
A program qualifying as Independent Study will consist of one or more courses in the 190-199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.
The procedure for enrolling in an Independent Study Program is as follows:
(1) Develop, in general terms, a plan of study;
(2) Locate a faculty sponsor or panel of sponsors and with their help and approval develop a detailed plan;
(3) Complete a project proposal form (obtained from the Academic Senate office) and submit it to the Academic Senate
Committee on Courses of Instruction.
The deadline for applications is the tenth day of instruction of the term before; see the Academic Calendar, on page 1, for specific dates.
You must report the completion or termination of the project to the Committee on Courses of Instruction.

## Individual Major

(College of Agricultural and Environmental Sciences, College of Biological Sciences, and College of Letters and Science)

## The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by faculty advisers and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

## College of Agricultural and Environmental Sciences

The Individual Major in this College has been suspended indefinitely.
Program Office. 150 Mrak Hall
530-752-0108
http://caes.ucdavis.edu/Studlnfo/Advising/ undergraduate-advising

Student Proposal. An Individual Major may be organized by a student having a specific academic interest not represented by an established major. Each student wishing an Individual Major should submit a proposal to the Dean's Office, prior to reaching 120 units, for review by the Student Actions and Individual Major Subcommittee. This proposal must include (1) an essay describing the special educational aims of the student, including a statement indicating why the educational objectives cannot be met by existing majors; (2) a list of planned courses; and (3) faculty adviser recommendations. It is critical that students contact a college counselor in the Dean's Office for consultation and development of the proposal.

UNITS
Preparatory Subject Matter ........ (variable)
Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.
Depth Subject Matter ......................... 4
Upper division course work must include: (a) Interrelated courses of 45 upper division units from two or more areas of study;
(b) At least one of the two or more areas of study must be within the College of
Agricultural and Environmental Sciences;
(c) At least 30 of the 45 upper division units
that are required in the program must be
taken from courses provided by the College
of Agricultural and Environmental Sciences.
Unrestricted Electives .................. (variable)
Total Units for the Major ...................45-54
Master Adviser. Thomas Gordon, Ph.D. (Plant Pathology)

## College of Biological Sciences

Program Office. Biology Academic Success Center; 1023 Sciences Laboratory Building; 530-7520410
Student Proposal. A student who wishes to propose an individual major must submit the proposal to the Committee on Undergraduate Student Petitions prior to reaching 120 units. It is important for the student to make arrangements to speak with an adviser in the Biology Academic Success Center early in the development of his/her major as no individual major will be approved after a student has completed 120 units.

## A.B. and B.S. Major Requirements: <br> UNITS

Preparatory Subject Matter........ (variable)
Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements as determined by the Committee on Undergraduate Student Petitions.

## Depth Subject Matter .... 45 units minimum

Upper division course work must include:
(a) at least 30 units from courses offered by departments in the College of Biological Sciences;
(b) additional requirements as determined by the Committee on Undergraduate Student Petitions. See the Biology Academic Success Center for details.
(c) for the B.A. degree, a maximum of 80 units toward the major; for the B.S. degree, a maximum of 110 units toward the major.

## All University, General Education, and <br> College of Biological Sciences Bachelor's <br> degree requirements................... (variable) <br> Total Units for the Degree. 180 <br> Principal Adviser (selected by student).

A faculty member in a department or program in the College of Biological Sciences.

## College of Letters and Science

Program Office. 200 Social Sciences and Humanities Building (Undergraduate Education and Advising office); http://www.ls.ucdavis.edu/ students

## Committee in Charge

Karen L. Bales, Ph.D., Chairperson (Psychology) Prabir Burman. Ph.D. (Statistics)
Jocelyn Sharlet, Ph.D. (Comparative Literature)
Rajiv R.P. Singh, Ph.D. (Physics)
John Terning, Ph.D. (Physics)
Student Proposal. A student who wishes to propose an individual major must submit the proposal to the Faculty Committee on Individual Majors in the College of Letters and Science prior to reaching 120 units. The proposal must be submitted by the end of the fourth week of the quarter. This proposal will consist of (1) an essay, identifying the specific educational and professional objectives, including an indication of why the objectives cannot be met within existing majors, (2) a list of courses planned to complete the major, and (3) faculty adviser recommendations. The proposal will be reviewed and a decision provided the quarter of submittal. It is important that you carefully review the information in the Individual Majors Handbook; available at http://advising.ucdavis.edu/forms/default.aspx.

## A.B. and B.S. Major Requirements:

Preparatory Subject Matter ......... (variable)
Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

## Depth Subject Matter

Upper division units must include:
(a) interrelated and complementary courses from two or more departments which provide a unified pattern and focus; (b) at least 30 units from Letters and Science teaching departments or programs; (c) no more than 10 units in courses numbered 194H, 198 and 199;
(d) for the A.B. degree, a maximum of 80 units toward the major; for the B.S. degree,
a maximum of 110 units toward the major.
Total Units for Degree.
Major Advisers (selected by student). Principal Adviser: a faculty member in a teaching department or program in the College of Letters and Science in the major field of emphasis. Secondary Adviser: a faculty member from a secondary area of interest.
Honors Program. By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see College section), may petition the Individual Majors Committee for tentative acceptance into an honors program.
Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty adviser. The prospectus must be presented to the Committee by the end of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the satisfactory completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to three units of independent study in the program during each of two quarters in the senior year as course options.

## Integrative Genetics and Genomics (A Graduate Group)

Richard Michelmore, Ph.D., Professor (Plant Sciences)
Michael Miller, Ph.D., Assistant Professor (Animal Science)
Maria Mudryi, Ph.D., Associate Professor (Microbiology and Immunology)
James D. Murray, Ph.D., Professor (Animal Science)
Jeanette E. Natzle, Ph.D., Associate Professor (Molecular and Cellular Biology)
David Neale, Ph.D., Professor (Plant Sciences)
Jan Nolta, Ph.D., Professor
(Hematology and Oncology)
Anita M. Oberbaver, Ph.D., Professor
(Animal Science)
Dan E. Parfitt, Ph.D., Pomologist (Plant Sciences)
Niels Pedersen, Ph.D., D.V.M., Professor (VM: Medicine and Epidemiology)
Martin L. Privalsky, Ph.D., Distinguished Professor (Microbiology)

Carlos F. Quiros, Ph.D., Professor (Plant Sciences)
Kathryn L. Radke, Ph.D., Professor Emeritus (Animal Science)
Bruce Rannala, Ph.D., Professor (Evolution and Ecology)
Raymond Rodriguez, Ph.D., Professor (Molecular and Cellular Biology)
Pamela C. Ronald, Ph.D., Professor (Plant Pathology)
Alan Rose, Ph.D., Project Scientist (Molecular and Cellular Biology)
Lesilee Rose, Ph.D., Associate Professor (Molecular and Cellular Biology)
Jeffrey S. Ross, Ph.D., Assistant Professor (Plant Sciences)
Pablo J. Ross, Ph.D. Assistant Professor (Animal Science)
John Roth, Ph.D., Distinguished Professor (Microbiology)
Benjamin Sacks, Ph.D., Assistant Adjunct Professor (Population Health and Reproduction)
Carl W. Schmid, Ph.D., Professor Emeritus (Molecular and Cellular Biology)
David Segal, Ph.D., Associate Professor
(Pharmacology and Toxicology)
Michael F. Seldin, Ph.D., Professor (Biochemistry and Molecular Medicine)
Barbara L. Shacklett, Ph.D., Associate Professor (Microbiology and Immunology)
Frank Sharp, Ph.D., Professor (Neurology)
Douglas Shaw, Ph.D., Professor (Plant Sciences)
Justin B. Siegel, Ph.D., Assistant Professor
(Biochemistry and Molecular Medicine)
Neelima Sinha, Ph.D., Professor (Plant Biology)
Dina St. Clair, Ph.D., Professor (Plant Sciences)
Daniel Starr, Ph.D., Assistant Professor
(Molecular and Cellular Biology)
Venkatesan Sundaresan, Ph.D., Professor (Plant Biology)
Michael Syvanen, Ph.D., Professor
(Microbiology and Immunology)
Thomas Tai, Ph.D., Associate in AES (Plant Sciences)
Flora Tassone, Ph.D., Professor (Biochemistry and Molecular Medicine)
Larry R. Teuber, Ph.D., Professor (Plant Sciences)
Maria Torres Penedo, Ph.D., Associate Research Geneticist (Veterinary Genetics Laboratory)
Alison Van Eenennaam, Ph.D., Cooperative Extension Specialist (Animal Science)
M. Andrew Walker, Ph.D., Professor (Viticulture and Enology)
Craig H. Warden, Ph.D., Professor (Pediatrics)
Valerie Williamson, Ph.D., Professor (Nematology)
Reen Wu, Ph.D., Professor
(Pulmonary/Critical Care Med)
Lifeng Xu, Ph.D., Assistant Professor (Microbiology)
Ebenezer N. Yamoah, Ph.D., Professor (Medical Anesthesiology)
John I. Yoder, Ph.D., Professor (Plant Sciences)
Konstantinos Zarbalis, Ph.D., Assistant Professor
(Pathology and Laboratory Medicine)
Mark A. Zern, Ph.D., Professor (Internal Med: Transplant)
Chengii Zhou, Ph.D., Associate Professor
(Cell Biology and Human Anatomy)
Huaijun Zhou, Ph.D., Assistant Professor (Animal Science)
Graduate Study. The Graduate Group in Genetics offers programs of study and research leading to the M.S. and Ph.D. degrees. Students in the Genetics graduate program have the opportunity to apply genomic, molecular, and classical genetic approaches to study model organisms, a broad range of native and agricultural species, humans, and companion animals. The group integrates genetic research across campus and unites over 100 faculty members from more than 25 departments spanning the College of Biological Sciences, the College of Letters and Science, the College of Agricultural and Environmental Sciences, the School of Medicine, and the School of Veterinary Medicine Students experience an unsurpassed breadth of research and instructional opportunities from the most fundamental to applied aspects of genetics. For
additional information regarding the program, contact the group coordinator 530-752-4863.

## Courses in Genetics (GGG)

## Graduate

201 A. Advanced Genetic Analysis (5)
Lecture/discussion-5 hours. Prerequisite: Biological Sciences 101, Statistics 100 or the equivalent, graduate standing. Fundamentals of genetic analysis and chromosome structure using model organisms including mutation, transmission, complementation, suppression, and enhancement as well as epigenetic phenomena at the whole organism and molecular levels.-I. (I.)

## $201 B$. Genomics (5)

Lecture-3 hours; discussion-2 hours. Prerequisite: course 201A, 201C or the equivalent. Prokaryotic and eukaryotic genomes. Experimental strategies and analytical challenges of modern genomics research and the theory and mechanics of data analysis. Structural, functional, and comparative genomics. Related issues in bioinformatics.-I. (I.)
201C. Molecular Genetic Mechanisms in Disease (4)
Lecture/discussion-4 hours. Prerequisite: Biological Sciences 101 or the equivalent. Pass one restricted to graduate students in genetics, microbiology or biochemistry and molecular biology graduate groups. Exploration of how basic mechanisms of molecular biology contribute to health and disease. Diseases related to animals, plants, and microbes will highlight fundamental concepts in the assembly, function and regulation of DNA, RNA, and protein. - III. (III.) Segal

## 201D. Quantitative and Population

Genetics (5)
Lecture-5 hours. Prerequisite: course 201A or consent of instructor. Basic concepts of quantitative and population genetics including gene and genotypic frequencies, multiple factor hypothesis, phenotypic and genotypic values, heritability, selection, genetic variation, the detection of quantitative trait loci and evolution in populations. Experimental and analytical methods. - II. (II.)
205. Molecular Genetics Laboratory (5) Laboratory- 15 hours. Prerequisite: Biological Sciences 101 (may be taken concurrently) or the equivalent, enrolled in Genetics Graduate Group.
Students will conduct experiments in molecular genetics laboratories. Individual research problems will emphasize experimental design, experience with methodologies, and data interpretation. May be repeated up to three times for credit. (S/U grading only.) - I, II, III. (I, II, III.)

## 210. Horizontal Gene Transfer (3)

Lecture/discussion-3 hours. Prerequisite: background in basic microbiology and genetics required; introductory course in molecular biology, biotechnology and microbial and animal/plant genetics recommended. Transfer of genes between unrelated organisms in nature. Dissemination of foreign DNA from genetically engineered organisms, including plants and animals. Mechanisms by which genes are transferred horizontally, and between king-doms.-l. (I.)

## 211. Concepts in Human Genetics and

 Genomics (3)Lecture/discussion-3 hours. Prerequisite: course 201 A or the equivalent; course 201B, 201C or the equivalent recommended. Human genomic organization; genetic structure of populations; positional cloning, application of linkage, association, and haplotypes; quantitative trait loci analyses; integrative genetic studies of gene expression; DNA repair mechanisms in genetic disease; mutation analyses; epigenetics; mitochondrial disease; gene manipulation and therapy. - II.

## 220. Genomics and Biotechnology of Plant Improvement (3)

Lecture-3 hours. Prerequisite: Biological Sciences 101 or the equivalent. Integration of modern biotechnology and classical plant breeding including
the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. (Same course as Plant Sciences 220.)-II. (II.)

## 290A. Graduate Student Conference in

 Genetics (1)Conference - 1 hour. Restricted to Genetics Graduate Group students. Student-given seminars on topics in genetics, with critiques by instructor and peers. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.) Segal

## 291. Seminar in History of Genetics (2)

Seminar-2 hours. Prerequisite: Biological Sciences 101. The development of modern genetic theories beginning with Mendel. -I. (I.)

## 292. Seminar in Genomics and Epigenomics (1)

Seminar-1 hour. Topics of current interest in genomics and epigenomics. May be repeated for credit.
Offered in alternate years. ( $S / U$ grading only.)
293. Seminar in Animal Genetics (1-3)

Seminar-1-3 hours. Prerequisite: course 201A or consent of instructor. Emphasis on recent advances in the field of animal genetics, ranging from quantitative genetics to molecular biology as it relates to animals.-III.
294. Seminar in Human Genetics (2)

Seminar-2 hours. Prerequisite: course 201A and consent of instructor. May be repeated for credit up to five times if topic differs. Topics of current interest in human genetics and genomics. Offered in alternate years. - (II.)
295. Seminar in Molecular Genetics (1-3)

Seminar-1-3 hours. Prerequisite: course 201A or consent of instructor. Topics of current interest related to the structure, modification and expression of genes. - III.
296. Scientific Professionalism and Integrity (2)
Lecture-1 hour; seminar-1 hour. Prerequisite: graduate standing or consent of instructor. Review of basic skills required of contemporary scientists. Topics include scientific conduct, manuscript preparation, grant writing, seminar presentations, and time management. Emphasis on responsibilities of scientists to factually and thoughtfully communicate results. -l. (I.) Yoder

## 297. Seminar in Plant Genetics (1-3)

Seminar-1-3 hours. Prerequisite: course 201A or consent of instructor. Current topics in plant genetics will be examined in student-conducted seminars and discussion format. The integration of molecular, organismal and population genetics to address questions in plant biology will be emphasized. - (II.)
298. Group Study (1-5)

Prerequisite: consent of instructor. Group study of selected topics in genetics. ( $S / U$ grading only.)
299. Research (1-12)
(S/U grading only.)

## Professional

300. Methods in Teaching Genetics (1-3)

Lecture/discussion. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching genetics. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion or laboratory sections, formulating examinations under supervision of instructor. May be repeated for credit up to 3 times or 9 units if teaching in different genetics related course. (S/U grading only.) -I , II, III.

## Interior Design

See Design, on page 219.

# Internal Medicine 

See Medicine, School of, on page 396.

## International Agricultural Development

(College of Agricultural and Environmental Sciences) International Agricultural Development is an interdisciplinary major in the Plant Sciences department.
Faculty. Includes members from various departments across colleges.

## The Major Program

The goal of international agricultural development is to improve food production, nutrition, marketing, and health in less technically advanced countries Students in this major are trained in technical areas of agriculture that can be applied to the problems of world hunger and health.
The Program. Principle subjects of study within the major are Agricultural Production, Economic Development, Environmental Issues, Nutrition, Rural Communities, and Trade and Commodity Development. Courses are in social sciences, humanities, and economic environments in which agriculture operates in countries outside the United States.
Career Alternatives. The study of international agricultural development prepares a student for a variety of careers. Some students choose service through the Peace Corps. Others seek employment in international trade, while others choose to work for a governmental or private agency in a foreign nation. Religious groups and organizations also employ university-trained individuals for agricultural work in conjunction with missions and other types of human service work overseas. The major is also preparation for further graduate work in agricultural development.

## B.S. Major Requirements:

Preparatory Subject Matter .............. 36-38
International Agricultural Development
$10 \ldots \ldots . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . ~$ 4
Soil Sciences 10 or 100....................... 3-5
Economics 1A and 1B ............................. 8
Statistics 13 or Sociology 46B or Plant Sciences 120. 4

Math 16A ............................................. 3
Community and Regional Development 1 .. 4
Six units from: Agricultural and Resource
Economics 15, Animal Science 41, 41L,
Community and Regional Development 20,
Nutrition 10, Plant Sciences 1, 15, 49...... 6
Depth Subject Matter.
36
Agricultural and Resource Economics 147 or Plant Sciences 101 .................................. 3 Economics 115A.

3
Five units from: International Agricultural Development 142, 160, Plant Sciences 110A, 110C, $110 \mathrm{~L}, 112,130$$\ldots{ }^{5}$ International Agricultural Development 103 and International Agricultural Development 170.

Sociology 170 or Community and Regional
Development 141 or 162
. .4
Community and Regional Development 142 or 149 or 152
Political Science 123 or 124 or Sociology
145A or Anthropology 126A or 126B or 131.
Foreign Language Requirement ..... 0-15Students must complete three sequencedquarters ( 15 units) of courses in one foreignlanguage or its equivalent. Passing a foreignlanguage proficiency examination, a score of5,4 , or 3 on a foreign language AdvancedPlacement examination (except Latin), or ascore of 550 on the SATII: Subject Test willalso satisfy this requirement.
Internship Requirement ..... 4
Students must complete at least four units ofinternship. Internships can be chosen inconsultation with an adviser. Internshiprequirement waived for students enrolled inthe UC Education Abroad Program.
Areas of Specialization ..... 44-45
Agricultural Production Option ..... 45
Biological Sciences 2A and 2B ..... 10
Chemistry 2A and 2B ..... 10
5 units from: Animal Science 118,124136A, 136B, 143, 144, 145, 146, AvianSciences 121, Entomology 110, 135,Environmental Horticulture 100, 133,Environmental Science and Management100, Hydrology 124, InternationalAgricultural Development 142, 160, PlantPathology 120, Plant Sciences 110A,110C, $110 \mathrm{~L}, 112,113,114,130,150$,

## Courses in International

 Agricultural Development (IAD)Questions pertaining to the following courses should be directed to the instructor or to the Department of Plant Sciences Advising Center in 1220 Plant and Environmental Sciences 530-752-1715.

## Lower Division

## 10. Introduction to International

Agricultural Development (4)
Lecture-3 hours; discussion-1 hour. Theories, practices and institutions relating to agricultural development; the interaction of changing social, cultural and economic organization through successive stages of economic development; impact of new agricultural technology on underdeveloped regions GE credit: SocSci, Div, Wrt \| SS, WC, WE.-II. (II.) Brown
92. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) - I, II, III. (I, II, III.)

## Upper Division

## 103. Social Change and Agricultural

## Development (4)

Lecture/discussion-4 hours. Prerequisite: introductory social science course (Anthropology, Sociology, Economics, International Agricultural Development). How social and cultural factors influence technological change in agriculture; theories of diffusion of innovations; social impact analysis and technology assessment. GE credit: SocSci, Div \| SS, WE.

## 142. Equipment and Technology for Small

 Farms (2)Lecture-1 hour; laboratory-3 hours. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as Applied Biological Systems Technology 142.) GE credit: SciEng | QL, SE, VL. - III. (III.) Shafii

## 160. Agroforestry: Global and Local

 Perspectives (3)Lecture/discussion-3 hours. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C; Plant Sciences 142 or 150 or Biological Sciences 2 B or a general ecology course. Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have taken previously taken Agricultural Management and Rangeland Resources 160. (Former course Agricultural Management and Rangeland Resources 160.) (Same course as Plant Sciences 160.) Offered in alternate years. GE credit: SciEng | SE. -1 . Gradziel

## 170. Program Development for International Agriculture (4)

Lecture/discussion-4 hours. Prerequisite: course 10. Principles of leadership and management for international agricultural development. Organiza tions and organizational behavior, and the implications for planning and administering organizations involved in the global development effort.-l. (I.)

## 190. Proseminar in International

Agricultural Development (1)
Seminar- 1 hour. Presentation and discussion of current topics in international agricultural development by visiting lecturers, staff and students. May be repeated for credit. (P/NP grading only.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) - I, II, III. (I, II, III.)

## 195A. Field Study in Agricultural Development-California (3)

Lecture-2 hours; seminar-8 hours; fieldwork. Prerequisite: consent of instructor. Students will incur travel expenses. Observation of agricultural development strategies and effects on rural communities. Discussion with farmers, workers and organizational staff members. Study of farm commodities, institutions and experiences in dealing with agricultural development problems. International influence on
U.S. agriculture. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. Directed group study. (P/NP grading only.) - I, II, III. (I, II, III.)

## 199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: consent of instructor. Special study for advanced undergraduates. (P/NP grading only.) - I, II, III. (I, II, III.)

## Graduate

200N. Philosophy and Practice of Agricultural Development (5)
Lecture/discussion -5 hours; term paper. Introduces key elements of philosophy and practice of agricultural development in less developed countries; major paradigms of development; historical context within which these paradigms operate; various development techniques and initiatives emerging from agricultural production to institutional capacity building and management. Not open for credit to students who have completed former course 202. - I. (I.) Scow

## 201. The Economics of Small Farms and

 Farming Systems (4)Lecture-3 hours; discussion - 1 hour. Prerequisite: Agricultural and Resource Economics 100A. Economic perspective on small farm development. Establishes a basis for predicting farmers' responses to changes in the economic environment, and for proposing government policies to increase small farm production and improve farmer and national welfare. - II. (II.) Vosti

## 202N. Analysis and Determinants of

 Farming Systems (4)Lecture-3 hours; discussion-1 hour. Prerequisite: Plant Sciences 150 or the equivalent. Unifying concepts of cropping systems in temperate and tropical climatic zones; agroecosystems stability, diversity and sustainability; management strategies, resource use efficiency and their interactions; role of animals, their impact on energy use efficiency, nutrient cycling, and providing food and power. Not open for credit to students who have completed former course 200.-III. (III.) Bell, Van Kessel
203N. Project Planning and Evaluation (4) Discussion-1 hour; workshop-3 hours. Prerequisite: courses 200 N (or former course 202), 201, 202N (or former course 200). Interdisciplinary setting for application of student skills and specialization to a "real world" development project. Focus on team-building and effective interdisciplinary prob-lem-solving methods, with the objective of producing a project document and presentation within a specified deadline. Not open for credit to students who have completed former course 203. - III. (III.) Miller

## 217. Conservation and Sustainable

 Development in Third World Nations (4) Lecture/discussion-3 hours; fieldwork-2 hours. Prerequisite: at least one course from two of these three groups: a) Environmental Science and Policy 160, 161, 168A, 168B; b) Environmental Science and Policy 101, 133, International Agricultural Development 103, Geography 142; c) Anthropology 126, 131, Geography 141, Sociology 144, 145A, 145B. Examination of the patterns of resource ownership, control and management in agricultural lands, extractive zones (fisheries, forests)and wildlands, with emphases on conservation and sustainability. Comparison of industrial democracies and poorer nations. (Same course as Ecology 217.)

## 220. Food and Nutrition Strategies in

 Developing Countries (4)Lecture-3 hours; discussion-1 hour. Prerequisite: Agricultural and Resource Economics 100A. Identifies important topical problems in food and nutrition policy, develops theoretical frameworks suitable for their analysis, examines the empirical information relevant to the problems and, using theory data, draws appropriate policy implications. Offered in alternate years.
290. Seminar in International Agricultural Development (1-2)
Seminar-1-2 hours. Prerequisite: consent of instructor. Discussion and critical evaluation of advanced topics and issues in international agricultural development. May be repeated for credit. (S/U grading only.) - I, II, III. (II, II, III.) Scow, Van Horn

## 291. Topics in International Agricultural

 Development (1-3)Lecture/discussion-1-3 hours. Prerequisite: consent of instructor. Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content. May be repeated one time for credit. -I, II, III. (I, II, III.)

## 292. Graduate Internship (1-12)

Internship-3-36 hours. Prerequisite: participation in H. Humphrey Fellow Program or consent of instructor. Individually designed supervised internship, off or on campus, in community, business or institutional setting. Developed with advice of faculty mentor and Humphrey Coordinator. (S/U grading only.) -I, II, III. (I, II, III.)

## 298. Directed Group Study (1-5)

Prerequisite: consent of instructor. Directed group study. (S/U grading only.)-I, II, III. (I, II, III.)

## 299. Research (1-12)

Prerequisite: consent of instructor. Research. (S/U grading only.) -I, II, III. (II, II, III.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) $-I$, II, III. (I, II, III.)

## International Agricultural Development (A Graduate Group)

Kate Scow, Ph.D. Professor (Land, Air, and Water Resources) Chairperson of the Group
Group Office. 1220 Plant and Environmental Sciences Building, 530-752-1715;
http://iad.ucdavis.edu

## Faculty

Kassim Al-Khatib, Ph.D., Professor (Plant Sciences)
Roger Baldwin, Ph.D., Assistant Cooperative
Extension Specialist (Wildlife, Fish, and Conservation Biology)
Diane M. Barrett, Ph.D., Specialist in Cooperative Extension (Food Science and Technology) Mark Bell, Ph.D., Lecturer (Plant Sciences) Stephen Boucher, Ph.D., Associate Professor (Agricultural and Resource Economics)
Kenneth H. Brown, Ph.D., Professor (Nutrition) Patrick H. Brown, Ph.D., Professor (Plant Sciences) Colin A. Carter, Ph.D., Professor
(Agricultural and Resource Economics) Michael R. Carter, Ph.D., Professor
(Agricultural and Resource Economics)

Patricia A. Conrad, D.V.M., Ph.D., Professor (Pathology, Microbiology, and Immunology)
Kathryn G. Dewey, Ph.D., Professor (Nutrition)
Serge I. Doroshov, Ph.D., Professor (Animal Science)
Richard Evans, Ph.D., Specialist in Cooperative Extension (Plant Sciences)
James Fadel, Ph.D., Professor (Animal Science)
Steven Fennimore, Ph.D., Cooperative Extension Specialist (Plant Sciences)
Louise Ferguson, Ph.D., Specialist in Cooperative Specialist (Plant Sciences)
Howard Ferris, Ph.D., Professor (Nematology)
Albert Fischer, Ph.D., Professor (Plant Sciences)
Ryan E. Galt, Ph.D., Assistant Professor (Human and Community Development)
Paul L. Gepts, Ph.D., Professor (Plant Sciences)
Robert Gilbertson, Ph.D., Professor (Plant Pathology)
Rachael Goodhue, Ph.D., Associate Professor (Agricultural and Resource Economics)
Thomas Gradziel, Ph.D., Professor (Plant Sciences)
Richard D. Green, Ph.D., Professor (Agricultural and Resource Economics)
Luis Guarnizo, Ph.D., Professor (Human and Community Development)
Timothy K. Hartz, Ph.D., Specialist in Cooperative Extension and Lecturer (Plant Science)
James Hill, Ph.D., Agronomist (Plant Sciences)
Robert Hijmans, Ph.D., Associate Professor (Environmental Science and Policy)
Frank W. Hirtz, Ph.D., Senior Lecturer (Human and Community Development)
William Horwath, Ph.D., Professor (Land, Air and Water Resources)
Russell C. Hovey, Ph.D., Associate Professor (Animal Science)
Theodore Hsiao, Ph.D., Professor (Land, Air and Water Resources)
Silas S. O. Hung, Ph.D., Professor (Animal Science)
Lovell S. Jarvis, Ph.D., Professor
(Agricultural and Resource Economics)
Bryan M. Jenkins, Ph.D., Professor (Biological and Agricultural Engineering)
Marion Jenkins, Ph.D., Research Engineer (Civil and Environmental Engineering)
Suad Joseph, Ph.D., Professor (Anthropology, Women and Gender Studies)
Katrina Jessoe, Ph.D., Assistant Professor (Agricultural and Resource Economics)
Lucia Kaiser, Ph.D., Community Nutrition Specialist in Cooperative Extension (Nutrition)
Ermias Kebreab, Ph.D., Professor (Animal Science)
Kurt Kornbluth, Ph.D., Adjunct Professor (Biological and Agricultural Engineering)
Bruce Linquist, Ph.D., Professional Researcher (Plant Sciences)
Jay Lund, Ph.D., Professor
(Civil' and Environmental Engineering)
Travis Lybbert, Ph.D., Associate Professor (Agricultural and Resource Economics)
Miguel A. Marino, Ph.D., Professor (Land, Air and Water Resources; Civil and Environmental Engineering)
Philip E. Martin, Ph.D., Professor (Agricultural and Resource Economics)
Mark A. Matthews, Ph.D., Professor (Viticulture and Enology)
G. David Miller, M. Sci., Lecturer (Plant Sciences)

Elizabeth J. Mitcham, Ph.D., Specialist in Cooperative Extension (Plant Sciences)
Jeffrey P. Mitchell, Ph.D., Specialist in Cooperative Extension and Lecturer (Plant Sciences)
Dan Potter, Ph.D., Professor (Plant Sciences)
Daniel Putnam, Ph.D., Cooperative Extension Specialist, Agronomist and Lecturer (Plant Sciences)
Pamela C. Ronald, Ph.D., Professor (Plant Pathology)
Scott Rozelle, Ph.D., Adjunct Professor (Agricultural and Resource Economics)
Roberto D. Sainz, Ph.D., Professor (Animal Science)
Richard Sexton, Ph.D., Professor (Agricultural and Resource Economics)
Rajinder Paul Singh, Ph.D., Professor (Biological and Agricultural Engineering)
Michael P. Smith, Ph.D., Professor (Human and Community Development)

Christine Stewart, Ph.D., Assistant Professor (Nutrition)
Daniel A. Sumner, Ph.D., Professor (Agricultural and Resource Economics)
J. Edward Taylor, Ph.D., Professor
(Agricultural and Resource Economics)
Larry R. Teuber, Ph.D., Professor (Plant Sciences)
Li Tian, Ph.D., Assistant Professor (Plant Sciences)
Tom Tomich, Ph.D., Director (Sustainable Agriculture
Research and Education Program)
Cary Trexler, Ph.D., Associate Professor (School of Education)
Mark Van Horn, M.Sci., Lecturer (Plant Sciences)
Chris van Kessel, Ph.D., Professor (Plant Sciences)
Stephen Vosti, Ph.D., Associate Adjunct Professor (Agricultural and Resource Economics)
Karen Watson-Gegeo, Ph.D., Professor (School of Education) Distinguished Graduate Mentoring Award
Joshua Viers, Ph.D., Associate Research Ecologist (Environmental Science and Policy)
Aram A. Yengoyan, Ph.D., Professor (Anthropology)
Tilahun D. Yilma, Ph.D., Professor
(Pathology, Microbiology, and Immunology)
Glenn Young, Ph.D., Professor (Food Science and Technology)
Minghua Zhang, Ph.D., Associate Adjunct Professor (Land, Air and Water Resources)
Ruihong Zhang, Ph.D., Professor
(Biological and Agricultural Engineering)
Richard A. Zinn, Ph.D., Professor (Animal Science)

## Emeriti Faculty

Stephen Brush, Professor Emeritus
(Human and Community Development)
Alexander F. McCalla, Ph.D., Professor Emeritus
(Agricultural and Resource Economics)
E. Dean MacCannell, Ph.D., Professor Emeritus (Environmental Design)
Richard E. Plant, Ph.D., Professor Emeritus (Plant Sciences)
Graduate Study. The International Agricultural Development M.S. degree program prepares students for careers in global agricultural and rural development, especially, but not exclusively, of developing and less-industrialized regions. This is an interdisciplinary program designed to provide students with knowledge and skills that will enable them to implement, facilitate, and manage programs that enhance agricultural development, resource management, and rural life.
Students are prepared to realize biological and technological improvement in agricultural and natural systems to facilitate social innovation. Training in International Agricultural Development includes both breadth and depth components. Breadth components, required of all M.S. students, aim to establish an understanding of the issues in international development as they relate to agriculture and the environment. These include the history and philosophy of development, leadership and management techniques, fundamentals of farming systems, and agricultural economics. Students acquire depth in their own areas of specialization within the agricultural and social sciences. The areas include agricultural and resource economics, agricultural engineering, agronomy, animal science, anthropology, aquaculture, avian science, community development, ecology, economics, entomology, environmental design, environmental toxicology, food science, gender, geography, horticulture, nutrition, plant pathology, plant biology, plant protection and pest management, political science, preventive veterinary medicine, range science, sociology, soil science, sustainable agriculture, vegetable crops, viticulture, and water science.
Practical and on-site experience with development issues is encouraged and facilitated by guidance from the group's approximately 98 faculty members, who possess a wide range of experience in international development.

## Faculty

Lindsay H. Allen, Ph.D., R.D., Professor (Nutrition) Monique Borgerhoff-Mulder, Ph.D., Professor
(Anthropology)
Kenneth H. Brown, M.D., Distinguished Professor (Nutrition)
Caroline Chantry, M.D., Professor (Pediatrics)
Kathryn G. Dewey, Ph.D., Professor (Nutrition)
Lia C. H. Fernald, Ph.D., Associate Professor
(Public Health Nutrition, Community Health \&
Human Development, UC Berkeley)
Sonja Y. Hess, Ph.D. Associate Professor (Nutrition)
Lovell S. Jarvis, Ph.D., Professor
(Agricultural and Resource Economics)
Bo L. Lönnerdal, Ph.D., Distinguished Professor (Nutrition)
Christine P. Stewart, Ph.D., Assistant Professor (Nutrition)

## Emeriti Faculty

Louis E. Grivetti, Ph.D., Professor Emeritus Charles H. Halsted, M.D., Professor Emeritus
Janet King, Ph.D., Professor Emeritus
Ernesto Pollitt, Ph.D., Professor Emeritus
Fernando E. Viteri, M.D., Ph.D., Professor Emeritus

## Affiliated Faculty

Marjorie Haskell, Ph.D., Associate Researcher (Nutrition)
Sonja Y. Hess, Ph.D., Associate Project Scientist (Nutrition)
Sandra Huffman, Sc.D., Researcher (Nutrition)
Lucia Kaiser, Ph.D., Specialist in Cooperative Extension (Nutrition)
Charles B. Stephensen, Ph.D., Adjunct Professor (Nutrition)
Marta Van Loan, Ph.D., Adjunct Professor (Nutrition)
Steven A. Vosti, Ph.D., Associate Adjunct Professor (Agricultural and Resource Economics)
Graduate Study. The Program in International and Community Nutrition, an Organized Research Unit located in the Department of Nutrition, coordinates specialized course work and research leading to the Designated Emphasis in International and Community Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional problems in low-income countries and in disadvantaged groups in the United States. Students enrolled in the Designated Emphasis are expected to (1) complete the course requirements already established by their respective graduate programs, (2) participate in a weekly advanced seminar in international and community nutrition, (3) complete additional core courses in international nutrition (Nutrition 219A, 219B, 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research on a relevant topic under the supervision of a professor who is a member of the Program in International and Community Nutrition.
Students accepted into the following doctoral programs are automatically eligible to participate in the Designated Emphasis: Nutrition, Agricultural and Resource Economics, Epidemiology, Anthropology, and Human Development. Students from other programs may also be accepted by special request to the Program Director. Upon graduation, students receive a Ph.D. in their major field, with specific recognition for the Designated Emphasis in International and Community Nutrition.

## International Commercial Law (A Graduate Group)

Daniel L. Simmons, J.D., Chairperson of the Group
Beth Greenwood, J.D., Executive Director, International Programs, UC Davis School of Law
Group Office. International Law Programs, School of Law \& UC Davis Extension, 1333 Research Park Drive, Davis, CA 95618 530-757-8569;
lawinfo@ucde.ucdavis.edu
http://www.law.ucdavis.edu/international

## Faculty

Courses are taught by School of Law faculty from UC Davis and other University of California law schools, the Graduate School of Management, Departments of Economics and Agricultural and Resource Economics. Additionally, outstanding practitioners from private practice and government-lawyers, economists, bankers, businessmen-have acted as adjunct faculty to provide an applied perspective through lectures, simulations and case studies.

## Graduate Study

The Graduate Group in International Commercial Law offers a program of study and research leading to the LL.M. degree through a summer only program. Students are required to take 36 quarter units of study over two, three, four, or five summers. Thirty of the units must be UC Davis courses. The classes are taught in an intensive format of 20 hours per week or four hours per day, two hours of lecture in the morning, two hours in the afternoon. Students complete four core courses, starting with the Orientation to U.S.A. Law and followed by three specialized core courses in international commercial law. Elective courses then provide in-depth study in focused topics such as private international law, conflict of laws, intellectual property, business associations, antitrust, tax, securities and finance and the like. Students also complete a research paper.

## Preparation

Foreign applicants must present satisfactory evidence of the completion of legal academic training at an accredited educational institution. Domestic applicants must have completed at least six years of resident study at accredited colleges and law schools and must hold a professional degree from a law school approved by the American Bar Association.
Graduate Advisors. Beth Greenwood (International Programs, School of Law), Dan Simmons (School of Law)

## Courses in International

 Commercial Law (ICL)ICL courses are taught in an intensive format during the summer quarter. For more information, contact the International Law Programs at 530-757-8569 or email at lawinfo@ucde.ucdavis.edu.

## Graduate

201. Orientation in United States Law (7) Lecture/discussion-20 hours. Prerequisite: law school education or the equivalent. Investigation of the Common Law System of the United States. Includes structure of the U.S. government, Constitutional law, contracts, torts, real property, consumer law, securities law, intellectual property, antitrust, taxation, labor law, environmental law, ethics, remedies, legal research and trial practice.

## 201A. Fundamentals in United States Law

## (4)

Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent. Investigation of the Common Law System of the U.S. Includes the American constitutional system, the American judiciary,
the American civil trial, and foundational substantive and procedural law such as real property, torts, criminal law and procedure, civil procedure, and contracts.
201B. Advanced Topics in United States Law (3)
Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent. Orientation to advanced topics in U.S. law - Intellectual Property (including copyright and trademarks), Commercial and Consumer Law, Advanced Contracts, Antitrust, Taxation, Remedies, Labor Law, Environmental Law, Dispute Resolution, Remedies and introduction to trial techniques and legal research/writing.

## 202. Introduction to Contracts (4)

Lecture/discussion-20 hours. Prerequisite: Law school education or the equivalent. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.
202A. Introduction to Contracts Formation (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.

## 202AS. Introduction to Contracts Formation

 (2)Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.
Offered irregularly. - II, IV. (II, IV.)
202B. Contracts Performance (2) Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands.
202BS. Contracts Performance (2)
Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent; course 202A or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Offered irregularly.-III, IV. (II, IV.)

## 203. Civil Procedure (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or the equivalent. Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

## 204. International Joint Ventures (3)

Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent; course 201. International and U.S. business and legal transactions. Legal planning, problem solving, decision making and negotiations related to the break-up and dissolution of a major international joint venture. U.S. laws including finance, tax, bankruptcy, labor, antitrust, environmental, corporate structures and intellectual property.
205. Introduction to Constitutional Law (4)

Lecture/discussion-20 hours. Prerequisite: Law school education or the equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government.
Includes judicial review, jurisdiction, standing to sue,
federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.

## 205A. Overview of US Constitutional Law

 (2)Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.
205AS. Overview of US Constitutional Law (2)

Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government.
205B. Constitutional Law - Protection of Individual Rights (2)
Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent. Principles, doctrines and controversies regarding the U.S. Constitution Bill of Rights, including due process of law, equal protection, freedom of expression, freedom of religion, state action, and congressional legislation in aid of civil rights and liberties.

## 211. Negotiations and Alternative Dispute

 Resolution (1)Lecture/discussion-10 hours. Prerequisite: course 201, law school education or the equivalent. Mechanisms for resolving disputes including the alternatives to litigation such as negotiation, mediation, and arbitration. Advantages and disadvantages of each approach.

## 212. Introduction to Negotiation (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or the equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes.

## 2125 . Introduction to Negotiation (2)

Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes.

## 214. Advanced Negotiation (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or the equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements.

## 214S. Advanced Negotiation (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements.

## 215. Business Associations (4)

Lecture/discussion-20 hours. Prerequisite: course 201, law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships.

## 215 S. Business Associations (4)

Lecture/discussion - 20 hours. Prerequisite: Law School education or equivalent; course 201. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships. Offered irregularly.
216. International Business Transactions (2)

Lecture/discussion-20 hours. Prerequisite: course 201 and law school education or the equivalent. Legal problems arising from international business
transactions. Focus on international sales contracts, choice of law, forum selection clauses, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, reparriation of profits, foreign exchange problems, and national efforts to control imports.

## 217. Alternative Dispute Resolution (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or the equivalent. Introduces students to a wide variety of alternative dispute resolution procedures, with an in-depth emphasis on negotiation, mediation and arbitration.

## 219. Advanced Writing Project (4)

Project. Prerequisite: course 201, law school education or the equivalent. The completion of a written research project under the active supervision of a faculty member in satisfaction of the research-writing requirement. ( $S / \mathrm{U}$ grading only.)
220. United States Taxation of

## Multinational Investments (2)

Lecture/discussion-20 hours. Prerequisite: course 201, law school education or the equivalent. An analysis of the United States taxation of multinational investments including jurisdiction of tax, the U.S. tax system, foreign tax credits, treaties, and transfer pricing.
227. Criminal Procedure (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent. Federal constitutional limits on government authority to gather evidence and investigate crime. Includes Fourth
Amendment limits on search, seizure, and arrest; Fifth Amendment privilege against self-incrimination; Sixth Amendment right to counsel.
228A. Mergers and Acquisitions Law (2) Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.
228AS. Mergers and Acquisitions Law (2)
Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.

## 236. United States Securities Law and Regulation (2)

Lecture/discussion-20 hours. Prerequisite: course 201, law school education or the equivalent. Structural and jurisdictional issues associated with securities practice. Topics include the regulation of public offerings, transactions by corporate insiders, regulation of corporate disclosure and conduct, and the liabilities of corporations and individuals under antifraud provisions.

## 239. Mediation (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or the equivalent. Introduction to the mediation process. Development of communication skills, the ability to analyze disputes, to understand why mediations succeed or fail, and understand the advantages and limitations of mediation as a method of resolving disputes.
242. Private International Law (2) Lecture/discussion-20 hours. Prerequisite: course 201; Law School education or equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws.

## 242S. Private International Law (2)

Lecture/discussion-20 hours. Prerequisite: course 201; Law School education or equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking
of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws.

## 247. Banking Law (1)

Lecture/discussion - 10 hours. Prerequisite: course 201, law school education or the equivalent. Institutional features of international banking transactions, the structure of a large financial deal, and the mechanics of overseeing large loans. Emphasis on negotiable instruments such as bills of lading, letters of credit, standby letters of credit, and interbank transactions.

## 249. Comparative Law (1)

Lecture/discussion - 10 hours. Prerequisite: course 201 and law school education or the equivalent. A comparative study of the development of schools of legal thought, chiefly Common law systems and Civil law traditions. Attention to the historical reasons for their divergence, contemporary approaches to universal problems such as succession, torts, and contracts, the cross-fertilization of laws and difficulties commonly associated with importing foreign law into new territory.

## 250. International Trade Law (3)

Lecture/discussion-20 hours. Prerequisite: course 201, law school education or the equivalent. An investigation of global trading systems including international trade in goods and services, e-commerce, international intellectual property, international tax planning and investment. Includes substantive and procedural provisions of the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA). Offered in alternate years.
251. United States Litigation Issues (1)

Lecture/discussion - 10 hours. Prerequisite: course 201, law school education or the equivalent. Prevention and resolution of disputes in international commerce. Emphasis on preparing for a trial in the United States. Includes the study of pre-trial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies.

## 262. Antitrust (1)

Lecture/discussion - 10 hours. Prerequisite: course 201, law school education or the equivalent. Historical and institutional background of antitrust law in the United States. The statutory framework including price fixing, limits on distribution, monopolization and mergers, and reporting requirements. Offered in alternate years.

## 270. Financing International Transactions

 (3)Lecture/discussion-20 hours. Prerequisite: course 201 and law school education or the equivalent. How capital is raised in international markets. Investment strategies for U.S. markets. Taxation of financial investments, international currency regulation, and assessing rates of return on international investments.

## 274. Intellectual Property (2)

Lecture/discussion -20 hours. Prerequisite: Law School or equivalent; course 201. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition.

## 274S. Intellectual Property (2)

Lecture/discussion-20 hours. Prerequisite: Law School or equivalent; course 201. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition.

## 283. Contract Remedies (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under

## UCC Article II.

## 283S. Contract Remedies (2)

Lecture/discussion-20 hours. Prerequisite: Law School education or equivalent; course 202A, 202B or equivalent. Covers a range of remedies for con-
tract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II.

## 285. Environmental Law (2)

Lecture/discussion-20 hours. Prerequisite: Law school education or the equivalent. Introduction to federal and state environmental law. Historical development of environmental law; the role of courts, the legislature and the executive branch in the development and implementation of environmental policy. Review of major statutes.

## 289. Licensing Academy in Intellectual Property \& Technology (4)

Lecture/discussion-20 hours. Prerequisite: course 201. Law School education or equivalent. Intellectual property as it relates to current forms of legal protection and how new innovations fit into these models, including public-private technology transfer, patents, institutional objectives, technology transfer offices, startups, and licenses.

## 290. American Legal System Research Seminar (1)

Seminar-5 hours. Prerequisite: course 201, law school education or equivalent. American legal system and its structure. Legal research methodologies and presentation with attention to analysis, synthesis, organization, and editing techniques common to legal writing. ( $S / U$ grading only.)
291C. International Commercial Law Seminar (4)
Lecture/discussion-20 hours. Prerequisite: course 201. Law School education or equivalent. Advanced seminar on a current topic in International Commercial Law. Offered at the University of Cologne in Cologne, Germany for two weeks each summer. May be repeated three times for credit when topic differs.

## 292. International Commercial Law

## Seminar (1-4)

Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic will change each year the course is offered. May be repeated two times for credit when topic differs.

## 292S. International Commercial Law

 Seminar (1-4)Lecture/discussion-20 hours. Prerequisite: Law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic will change each year the course is offered. May be repeated two times for credit when topic differs.
299. Advanced Research in Legal Problems (1-4)
Prerequisite: course 201, law school education or the equivalent. Student individualized research projects under faculty supervision. ( $S / U$ grading only.)

## International Relations

(College of Letters and Science)
Ethan Scheiner, Ph.D., Program Director
Program Office. 464 Kerr Hall 530-754-8098

## Committee in Charge

Kyle Joyce, Ph.D. (Political Science)
Alison Ledgerwood, Ph.D. (Psychology)
Eric Schroeder, Ph.D. (University Writing Program) Deborah Swenson, Ph.D. (Economics)

## The Major Program

Problems of security, development, ethnic conflict, human rights, health, and the environment are increasingly confronted at a global rather than a national level. With its theoretical models and real-
world application, the study of international relations is an exciting and highly relevant interdisciplinary major.
The Program. Graduation with a major in international relations requires completion of introductory courses in political science, economics, statistics, and history. The major also requires fluency in English and a working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language. Students choose one of four tracks that encompass major topical areas in combination with an area studies emphasis:
(1) World Trade and Development;
(2) Peace and Security;
(3) Global Environment, Health, and Natural Resources;
(4) Peoples and Nationalities. Upper division course work for Tracks I, II and III is composed of twelve courses. Students choosing Track IV,
Peoples and Nationalities, are required to
study or work abroad for a minimum of one quarter; upper division course work is
reduced to nine classes in recognition of the experience gained through education abroad.
Programs, Internships, and Career Alterna-
tives. One program of special interest to international relations majors is the Education Abroad
Program, which provides insights into the life and culture of other countries. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center arranges internships and runs a full-credit academic program in Washington, D.C. with a full range of opportunities for International Relations majors (see also UC Washington Program (UCDC), on page 534). International relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations), foundations, and companies having interests in international business, trade, or finance. The stringent language requirement of the major program enhances career prospects in jobs which demand knowledge of the language and culture of other countries.
International Relations Abroad. International Relations strongly encourages all students to participate in the UC Education Abroad Program; those who choose to study Track IV, Peoples and Nationalities, must study or work abroad for a minimum of one quarter. A maximum of five courses taken abroad may be applied toward the 12 upper division courses in Tracks I, II, and III of the International Relations major. In Track IV, the four Area Studies courses may be done abroad. Courses are selected with the approval of an adviser for the International Relations program.
Preparatory Requirements. Before declaring a major in International Relations, students must complete the following courses with a combined GPA of at least 2.500 at the University of California or other four-year school (at least 3.000 for similar courses taken at community college). All courses must be taken for a letter grade.

Economics 1A or Anthropology 2 ............ 4
Economics 1B........................................ 4
History 4C or 10C.................................. 4
Political Science 3.................................. 4
Statistics 13 or Sociology 46B................. 4

## A.B. Major Requirements:

Note: The language curricula are subject to
change; please check with an adviser for
the major. A language not listed above may
be substituted only with prior written
approval of the International Relations
Program Committee.
Depth Subject Matter
Tracks I, II and II: Twelve upper division
courses
Track IV: Nine upper division courses
Choose one track below:
Track I: World Trade and Development
Emphasizes contemporary economic relations of industrialized and developing countries.

For Advanced Industrialized Focus:
Economics 100; 101; 160A-160B, Political
Science 123. 20
Two courses selected from Group A.......... 8
One course selected from Group B........... 4
Four courses to fulfill Area Studies
Requirement 16
For Developing Countries Focus:
Economics 115A-115B, 162 .12
Political Science 123, 124 ........................... 8
One course selected from Group A .......... 4
Two courses selected from Group B .......... 8
Four courses to fulfill Area Studies
Requirement $\qquad$ 16
Group A courses (Advanced Industrialized
Countries):
Agricultural and Resource Economics 138,
Anthropology 127, Community and
Regional Development 118, 141,
Economics 102, 110 B , International
Relations 104, Political Science 130,
140A, 140B, 140C, Sociology 138, 139, 141, 183
Group B courses (Developing Countries):
Anthropology 122A, 122B, 126A, 126B,
127, Community and Regional
Development 153A, 153B, 153C, 180,
Economics 110B, International Agricultural
Development 103, International Relations
104, Political Science 124, 126, 142A,
Science and Society 121, Sociology 138,
141, 145A, 145B

## Track II: Peace and Security

Focuses on political and security relationships among states and non-state actors, examining questions of war, peace, alliances, and diplomacy. Select five courses spanning two disciplines:
Economics 162, History 174B, 174C
Political Science 120, 121, 130, or
132..
... 20
Three additional courses from at least two departments selected from: Comparative
Literature 157, Economics 122, History 145,

146A, 146B, Philosophy 118, Political Science 112, 122, 124, 126, 131, 140A,
140B, 140C, Religious Studies 131, 134,
Sociology 100, 118,157 , Women's Studies 102.
. 12
Four courses to fulfill Area Studies
Requirement.
Track III: Global Environment, Health, and Natural Resources
Familiarizes students with new sources of global interdependence such as biodiversity, natural resource conflicts, population growth, and world health.

Note: Some courses shown below have additional prerequisites.
Economics 162
.4
Political Sci 123
.4
Environmental Science and Policy 161 or
162 ....................................................
Select one from Anthropology 101, 131,
Environmental Science and Policy 164,
Philosophy 120.
Select two from Agricultural and Resource
Economics 147, 175, 176, Anthropology
103, Applied Biological Systems Technology 182, Economics 115A, 125, Environmental Science and Policy 164, International
Agricultural Development 170, Philosophy
120, Physics 160, Political Science 107,
175, Sociology 160 ............................. 7
Select two from one of the following groups.

Atmospheric and Marine Environments:
Atmospheric Science 116, 149,
Environmental and Resource Sciences 131,
Environmental Science and Management
120, 121, Environmental Science and Policy 166N, Geology 116N
Land use and Energy Supply: Anthropology
104N, Community and Regional
Development 142, Environmental and
Resource Sciences 144, Environmental
Science and Policy 167, Geology 130,
134, Plant Sciences 101, 144, 150, 160,
Political Science 171
Health and Human Populations:
Anthropology 102, 121, 129, 131,
Environmental Science and Policy 121,
Environmental Toxicology 101, Internal
Medicine-Infectious Diseases 141, Nutrition
111 AV, $111 \mathrm{~B}, 118$, Sociology 170
Four courses to fulfill Area Studies
Requirement 16

## Track IV: Peoples and Nationalities

Examines social and cultural foundations of national development and international relations.
Select two courses from: Anthropology 102,
123AN, 130A, Sociology 118, 156, or
181
81 .....................................................
Select one course each from three of the
following four groups ............................ 12
The Mixing of Peoples: Anthropology
130BN, 139AN; Community and Regional
Development 176; International Relations
104; Political Science 126
Women: Anthropology 126B, 139BN;
Human Development 103; Sociology

Four courses to fulfill Area Studies
Requirement.
Education/Internship Abroad for a minimum of one quarter

## Area Studies Requirement

Four courses: Courses must incorporate at
least two of three groups (History, Social
Analysis, Culture and Literature); we
encourage students to take all four courses
from one region, but will accept a minimum of
three from one region and one from a
different region. Tracks I, II and III students
who choose to take advantage of an
Education Abroad experience may fulfill the
Area Studies requirement by completing three
courses instead of four; all three courses must be from one region.
Africa and the Middle East
History: History 113, 115A, 115B, 115C,
115D, 115F, 193B, 193C
Social Analysis: African American and
African Studies 107C, 110, 111,156 ,

Major Adviser. Daniel Kono (Political Science)

## Courses in International Relations <br> (IRE)

## Lower Division

1. Global Interdependence (4)

Lecture-3 hours; discussion-1 hour. Development of the concept of global interdependence along its political, economic, demographic, cultural, techno logical, and environmental dimensions. Focus on the ways societies and states interact. Course provides the foundation for upper division multidisciplinary work in international relations. GE credit:
SocSci | SS, WE.-II. (II.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

## 104. The Political Economy of International

## Migration (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: upper division standing. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as Sociology 104.) GE credit: SocSci \| QL, SL, SS.

## 190. Topics in International Relations (4)

 Lecture/discussion-4 hours. Prerequisite: consent of instructor. Selected topics in international relations. Variable content. May be repeated for credit when topic differs. GE credit: WE.
## 192. International Relations Internship (1-12)

Internship-3-36 hours (to be arranged). Prerequisite: upper division standing and consent of instructor. Work experience in international relations, with term paper summarizing the practical experience of the student. (P/NP grading only.) GE credit: SS, WE.
194HA-194HB. Special Study for Honors

## Students (4-4)

Seminar-2 hours; term paper. Prerequisite: open only to majors of senior standing who qualify for honors program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty adviser. (Deferred grading only, pending completion of sequence.) GE credit: SocSci | OL, SS, WE.-I, III. (I, III.)

## 198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

## International Science Studies

This interdisciplinary minor in International Science Studies will introduce College of Agricultural and Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provide an opportunity to gain first hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.
The minor assumes that the student will have a major in the sciences, and that classes taken under one of the three tracks in the minor will contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to
work closely with an academic advisor in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course can be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

## Minor Program Requirements: UNITS <br> International Science Studies 24

Global issue course requirement ............ 7-8
Focusing on broad range of global issues and their impacts on ecological and
environmental resources and biodiversity, in addition to international policy and
economics. Beyond the courses taken under each track, choose two out of the three courses listed below:
(1) Atmospheric Science 116
(2) Plant Sciences 150
(3) Agricultural and Resource Economics 115 B
Select one of the following tracks ...... 16-17
Education Abroad Program courses taught overseas and relevant international internship activities will count towards the minor requirement with advisor's approval. For each track, students can take a maximum of three units from EAP courses, with a valid transcript, and three units from relevant international internship activities. The international internship activities would require a pre-approved study plan with the academic advisor before the maximum of three units can be awarded. Language and culture related courses are encouraged, but not required for the minor.
(1) Ecological, environmental, and energy studies track: Select 16-17 units from Anthropology 103, Agricultural and Resource
Economics 147, Atmospheric Science 116,
133, Environmental Science and
Management 100, 121, 131, 144, 120, 30,
Environmental Science and Policy 100, 116,
151, Evolution and Ecology 147, Soil
Science 109, Hydrology 143
(2) Policy and management focus track:

Select 16-17 units from Agricultural and
Resource Economics 115A/B, Agricultural
and Resource Economics 138, International
Relations 190, Community and Regional
Development 156, 180, International
Agricultural Development 160, 162, 170,
Environmental Science and Policy 102, 175
(3) Agriculture, food, and fiber systems track:

Select 16-17 units from Anthropology 103,
130, Atmospheric Science 133, Community
and Regional Development 153A/B,
Environmental Science and Management
121, 131, Evolution and Ecology 138,
Hydrology 124, Plant Sciences 150, 160,
Food Science and Technology 108, 109,
Nutrition 119A/B, Textiles and Clothing 174
Minor Advisor. Shu-Hua Chen (Land, Air and
Water Resources) 530-752-1822,
shachen@ucdavis.edu

## Internship

See Internship Program, below; and UC Washington Program (UCDC), on page 534.

## Internship Program

Subhash H. Risbud, Ph.D., Director
Jeanne B. Shelby, Associate Director and Project Manager
Marcie Kirk Holland, Project Manager
Andrea Hanson, Project Manager
The Internship and Career Center
1st, 2nd and 3rd Floors, South Hall 530-752-2855

## Program Areas

Agricultural and Environmental Sciences, Career Recruiting Programs, Engineering and Physical Sciences, Graduate Student and Postdoctoral Career Services, Health and Biological Sciences, International Programs and Liberal Arts and Business

## Internship Experience

The Internship and Career Center facilitates a cam-pus-wide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports. The notation briefly describes the nature and location of the internship experience. Questions pertaining to academic credit and Transcript Notation may be directed to The Internship and Career Center.
Course Credit. Internship courses (numbered 92 and 192) are available for credit on a variable-unit and Passed/Not Passed grading basis. A maximum of 12 units of 92 and/or 192 courses may be counted toward the 180-unit minimum needed for graduation. To qualify for the 192 course, students must have acquired 84 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by The Internship and Career Center Staff.

## Faculty

Margherita Heyer-Caput, Ph.D., Professor
Juliana Schiesari, Ph.D., Professor
(Comparative Literature, French and Italian)

## Emeriti Faculty

JoAnn Cannon, Ph.D., Professor Emerita
Dennis Dutschke, Ph.D., Professor Emeritus
Gustavo Foscarini, M.A., Senior Lecturer Emeritus

## Affiliated Faculty

Antonella Bassi, M.A., Lecturer
Jay Grossi, M.A., Lecturer

## The Major Program

The major in Italian provides a solid language background which will enable the student to develop an appreciation for the numerous Italian contributions not only to the arts, but also to political theory, science, literature and other expressions of human creativity, which continue to influence our global world.
The Program. The Italian program is geared to the specific needs and interests of the students, who enjoy the advantages of a small classroom setting and the individualized mentoring of dedicated professors. While the use of Italian is stressed in language and literature courses, the Italian program is interdisciplinary in nature. Starting at the lower-division level, students collaborate closely with aca-
demic advisers in order to design a major or minor
curriculum which includes culture, film, art history,
history, food science and other courses in related fields offered on campus or in Italy. The Italian program actively participates in the UC-wide Education Abroad Program, the Quarter Abroad Program (Florence), the International Internships Program, and the Summer Sessions International (Rome), all of which offer opportunities for travel and study in Italy.
Career Alternatives. The Italian Program provides a solid foundation for a variety of career paths by offering training in Italian language and culture and developing skills that are vital in any professional setting: critical analysis, interpersonal skills, effective written and oral communication, and cultural sensitivity. In addition to specific career paths in Foreign Service and education, knowledge of the Italian language and culture enhances professional opportunities in a variety of fields, such as, viticulture and enology, food science, political science, medicine, architecture and engineering.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter................. 0-27
Italian 1, 2, 3, 4,5, and 9 (or the equivalent)
Depth Subject Matter .............................. 36
Italian 101 and 105............................... 8
Seven additional courses in Italian, literature,
cinema and culture .............................. 28
Must include at least one course from two of the following literary periods (taught in Italian):
(a) Early Italian Literature: Italian 112, 113 , 114, 145, if applicable
(b) Renaissance and Baroque Italian

Literature: Italian 115A, 115B, 115C,
115D, 141, 145, if applicable
(c) Modern and Contemporary Italian Literature: Italian 118, 119, 120A, 120B, $131,142,145$, if applicable
Upper division General Education courses in Italian may fulfill this requirement with approval of the major adviser.
The remaining five upper-division elective courses may include, but are not limited to, additional Italian literature or culture taught in Italian, Italian culture courses taught in English, and/or upper-division elective courses in related fields, such as Italian and Italian American Cinema (Italian 150, Italian/Film Studies 121, Film Studies 120), and other courses in Italian Studies taught in other departments and programs, subject to approval by the major adviser.
All upper division courses are to be chosen in consultation with the major adviser.
Total Units for the Major 36-63

## Recommended

Study abroad in Italy for a period of one year, one semester, or one quarter, and/or the study of Latin or another Romance Language.
Major Adviser. M. Heyer-Caput
Minor Program Requirements:
UNITS
Italian ..................................................... 20
Italian 101 and 105............................... 8
Three additional upper division courses in
Italian literature, cinema and culture ....... 12
One course chosen from two of the following three areas:
(a) Early Italian Literature: Italian 112, 113, 114, 145, if applicable
(b) Renaissance and Baroque Italian Literature: Italian 115A, 150B, 150C, 150D, 141, 145, if applicable (c) Modern and Contemporary Italian Literature: Italian 118, 119, 120A, 120B, $131,142,145$, if applicable).
The remaining two upper-division elective courses may include, but are not limited to, additional Italian literature or culture taught in Italian, such as Italian 104 and Italian 128,
and Italian culture and film courses taught in
English, such as Italian 150, Italian/Film
Studies 121, Film Studies 120, such to
approval by the minor adviser.

## Minor Adviser. M. Heyer-Caput

Honors and Honors Program. Candidates for high or highest honors in Italian must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in Italian 194H (3 units) and Italian 195H (3 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative gradepoint average of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Italian are in addition to the regular requirements for the major in Italian.
Education Abroad Program. The department of French and Italian strongly encourages students to study abroad in the Summer Abroad program (Rome), the Quarter Abroad Program (Florence), or the Education Abroad Program. Applicable courses taken on EAP are accepted for credit in the major or the minor programs
Teaching Credential Subject Representative. See the Major Adviser above; see the Teaching Credential/M.A. Program on page 115.
Prerequisite Credit. Credit will not normally be given for a course if it is a prerequisite of a course already successfully completed. Exceptions can be made only by the major adviser.
Quarter Abroad Program. The UC Davis Quarter Abroad Program and the Italian Program offer an exciting Italian Language and Culture Program in Florence, Italy. While studying abroad in Florence, students will earn 23-28 UC Davis quarter units and experience the richness and vitality of Italian and European culture.
Participants fulfill three-quarters-worth of Italian language study, enroll in culture and film courses, integrate in the Florentine community through
meaningful internships with transcript notation, and explore electives in areas such as art history, photography, and food science.
There is no language requirement, and all registered UC Davis students with 2.00 GPA and above, good academic standing, and good disciplinary standing are eligible to apply.
For more information, please contact Professor Margherita Heyer-Caput at mheyercaput@ucdavis.edu or see http://quarterabroad.ucdavis.edu.

## Courses in Italian (ITA)

## Lower Division

Students offering high school language preparation as a prerequisite must take a placement test.

## 1. Elementary Italian (5)

Discussion-5 hours; laboratory-1 hour. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed Italian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a $\mathrm{P} / \mathrm{NP}$ petition is filed. Not open for credit to students who have taken course 1A or 1S. GE credit:
ArtHum | AH, WC.-I, II. (I, II.)

## 1 A. Accelerated Intensive Elementary

## Italian (15)

Lecture/discussion-15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Italian grammar and development of all language skills in a cultural context with emphasis on
communicative ability. Not open for credit to students who have completed courses 1, 2, or 3.-IV. (IV.) Bassi, Grossi

## 1S. Elementary Italian (5)

Discussion-5 hours; laboratory-1 hour. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. Course is taught abroad. Students who have successfully completed Italian 2 or 3 in the 10th or higher grade in high school may receive unit credit for this course on a P/ NP grading basis only. Although a passing grade will be charged to the student's P/NP option, no petition is required. All other students will receive a letter grade unless a P/NP petition is filed. Not open for credit to students who have taken course 1 or 1A. GE credit: ArtHum | AH, WC.-I. (I.) HeyerCaput

## 2. Elementary Italian (5)

Discussion-5 hours; laboratory-1 hour. Prerequisite: course 1 or 1 S . Continuation of course 1 or 1 S . Review of grammar and vocabulary, and practice of all language skills through cultural texts. Not open for credit to students who have taken course 1A or
2S. GE credit: ArtHum | AH, WC. - II, III. (II, III.)
2S. Elementary Italian (5)
Discussion - 5 hours; laboratory-1 hour. Prerequisite: course 1 or 1 S . Continuation of course 1 or 1 S . Review of grammar and vocabulary, and practice of all language skills through cultural texts. Course is taught abroad. Not open for credit to students who have completed course 1A or 2. GE credit:
ArtHum | AH, WC.-I. (I.) Heyer-Caput

## 3. Elementary Italian (5)

Lecture/discussion-5 hours; laboratory-1 hour. Prerequisite: course 2 or 2 S . Continuation of course 2 or $2 S$. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Not open for credit to students who have taken course 1A or 3S. GE credit: ArtHum | AH, WC.-I, III. (I, III.)

## 3S. Elementary Italian (5)

Discussion-5 hours; laboratory-1 hour. Prerequisite: course 2 or 2 S . Continuation of course 2 or 2 S . Review of grammar and vocabulary, and practice of all language skills through cultural texts. Course is taught abroad. Not open for credit to students who have taken course 1A or 3. GE credit:
ArtHum | AH, WC.-I. (I.) Heyer-Caput

## 4. Intermediate Italian (4)

Lecture/discussion-3 hours; laboratory-3 hours. Prerequisite: course 3. Review of grammar and syntax through written exercises and short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. GE credit: WC. -I, II, III. (I, II, III.)

## 4S. Intermediate Italian (4)

Lecture/discussion - 3 hours; laboratory - 3 hours.
Prerequisite: course 3, 3S, or the equivalent. Review of grammar and syntax through written exercises and readings of short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. This course is taught abroad. Not open for credit to students who have completed course 4. GE credit: WC. -I, III. (I, III.)

## 5. Intermediate Italian (4)

Lecture/discussion-3 hours; laboratory-3 hours. Prerequisite: course 4. Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian. GE credit: WC. -I, II, III. (I, II, III.)

## 5S. Intermediate Italian (4)

Lecture/discussion - 3 hours; laboratory - 3 hours. Prerequisite: course 4 or 4 S . Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian. Course is taught abroad. Not open for credit to students who have completed course 5. GE credit: WC. -I, III. (I, III.)

8A. Italian Conversation (3)
Discussion-3 hours. Prerequisite: course 3 or the equivalent. Course designed to offer practice in speaking Italian. May be repeated one time for credit. (P/NP grading only.) GE credit: WC.-I, III. (I, III.)

## 8AS. Italian Conversation (3)

Discussion-3 hours. Prerequisite: course 3 or the equivalent. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8. (P/NP grading only.) GE credit: WC. - III.

## 8B. Italian Conversation (3)

Discussion-3 hours. Prerequisite: course 8A. Course designed to offer practice in speaking Italian. (P/NP grading only.) GE credit: WC.-II. (II.)

## 8BS. Italian Conversation (3)

Discussion-3 hours. Prerequisite: course 8A. Practice in the speaking of Italian. Course is taught abroad. May be repeated for up to 6 units of credit. Not open for credit to students who have completed course 8 B . (P/NP grading only.)-III.

## 9. Reading Italian (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 5. Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture.
Strengthening the student's command of the Italian language. GE credit: WC. -I, II, III. (I, II, III.)

## 9S. Reading Italian (3)

Lecture/discussion-3 hours; term paper. Prerequisite: course 5 or 5 S . Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture as well as strengthening the student's command of the Italian language. This course is taught abroad. Not open for credit to students who have completed course 9. GE credit: WC. -I, III. (I, III.)

## 50. Studies in Italian Cinema (4)

Lecture-2 hours; discussion-1 hour; term paper. Introduction to Italian cinema through its genres. Focus is on cinema as a reflection of and a comment on modern Italian history. Film will be studied as an artistic medium and as a form of mass communication. ArtHum, Wrt | AH, WC, WE.-II. (II.)

## 90X. Lower Division Seminar (1-2)

Seminar-1-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Italian language or culture (such as Italian culture seen through film, Italian feminism, literature, or politics) through shared readings, discussions, written assignments, or special activities such as film screening or laboratory work.

## 98. Directed Group Study (1-5)

Primarily intended for lower division students. (P/NP grading only.)

## 98S. Directed Group Study (1-4)

Prerequisite: consent of instructor. Group study on focused topics in Italian literature and culture. Varies according to instructor. This course is offered abroad. May be repeated for credit when topic differs. (P/NP grading only.) - III. (III.)

## 99S. Special Study for Advanced

 Undergraduates (1-5)Prerequisite: consent of instructor. Opportunity for a faculty member to work with an advanced undergraduate student in a focused manner on a topic or topics of mutual research/creative interest. This course is offered abroad. May be repeated for credit when topic differs. (P/NP grading only.) - III. (III.)

## Upper Division

101. Advanced Conversation, Composition, and Grammar (4)
Lecture-3 hours. Prerequisite: course 9 or consent of instructor. GE credit: ArtHum | AH, OL, WC,
WE.-I. (I.) Heyer-Caput

101S. Advanced Composition, Conversation and Grammar (4) Lecture-3 hours; extensive writing. Prerequisite: course 9. Instruction and practice in expository writing in Italian, with emphasis on advanced grammar, organization, and vocabulary building. Course will be taught in Italy. Not open for credit to students who have completed course 101. GE credit: ArtHum | AH, OL, WC, WE.-III.
104. Italian Translation and Style (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 101 or consent of instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. GE credit: AH, WC. - III. (III.)

## 104S. Translation and Style (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 101 or consent of instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. Course will be taught abroad. Not open for credit to students who have completed course 104. GE credit: ArtHum | AH, WC.-III.
105. Introduction to Italian Literature (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 101 or consent of instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance, and Early Modern periods in Italy. GE credit: ArtHum | AH, OL, WC.-II. (II.) Heyer-Caput, Schiesari
105ST. Introduction to Italian Literature (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 101 or consent of instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance and Early Modern periods in Italy. This course is taught abroad. Not open for credit to students who have completed course 105. GE credit: ArtHum, Div, Wrt | AH, OL, WC. - III.

## 107. Survey of Italian Culture and

 Institutions (4)Lecture-3 hours; term paper. Assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. GE credit: ArtHum or SocSci | AH, OL, SS, VL, WC, WE. - III. (III.)

## 107S. Survey of Italian Culture and

 Institutions (4)Lecture/discussion - 3 hours; term paper. An assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. Not open for credit to students who have completed course 107. GE credit: ArtHum or SocSci | AH, OL, SS, VL, WC, WE. - III. (III.)

## 108. Contemporary Issues in Italian Culture and Society (4) <br> Lecture/discussion-3 hours; term paper. Analysis of

 cultural issues in contemporary Italy: Myth and reality of imagined Italies, Italian identities; immigration and race relations; the media and popular culture. Taught in English. GE credit: ArtHum or SocSci, Div, Wrt | AH, OL, SS, VL, WC, WE. -I. (I.) Bassi
## 108S. Contemporary Issues in Italian

## Culture and Society (4)

Lecture/discussion - 3 hours; term paper. Analysis of cultural issues in contemporary Italy; myth and reality of imagined Italies; Italian identities; immigration and race relations; the media and popular culture. Taught in English. This course will be taught abroad. Not open for credit to students who have completed course 108. GE credit: ArtHum or SocSci, Div, Wrt \| AH, OL, SS, VL, WC, WE. - III. (III.)

## 112. Medieval and Renaissance Poetry:

 St. Francis to Petrarch (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the origins of Italian religious and secular poetry of the 13 th and 14 th centuries. A diversified poetry is illustrated in works of St. Francis, Dante, Cavalcanti, Petrarch, the Sicilian School, the Sweet New Style Poets, and other authors. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.-(I.)

## 113. Dante Alighieri, Divina Commedia

 (Inferno, Purgatorio, Paradiso) (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of Dante Alighieri's Divina Commedia, and its role in the development of Italian language and literature. Emphasis will be placed on reading the whole poem within the historical context of the Middle Ages. GE credit: ArtHum | AH, OL, WC, WE.-III. (III.)
## 114. Boccaccio, Decameron, and the

## Renaissance Novella (4)

Lecture/discussion - 3 hours; term paper. Prerequisite: course 9 or consent of instructor. Study of the development of the short story in Italy, as exemplified in Giovanni Boccaccio's Decameron, in his predecessors and Renaissance followers. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.-II.
115A. Studies in the Cinquecento (4)
Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Analysis of key texts from the high moment of the Italian Renaissance. The political and aesthetic legacy of humanism will be foregrounded in relation to authors such as Ficino, Ariosto, Machiavelli, Aretino, Castiglione, and Tasso. Offered in alternate years. GE credit: ArtHum | OL. - (III.) Schiesari
115 B . Italian Literature of the Renaissance and the Baroque: From Cellini to Marino (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 115A. Continued examination into the loss of an ideal. Emphasis on the conflicts in Michelangelo and Tasso leading to Marino, with an excursus on Galileo's role in the formation of a modern literary standard. GE credit: ArtHum | OL. - III. (III.)

## Schiesari

115C. Italian Drama from Machiavelli to

## the Enlightenment (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of comic and tragic forms as critical representations of their societal and historical contexts, i.e. Machiavelli and the logic of power, Baroque dramatists in the service of counter-reformation Italy, Goldoni's comedies and bourgeois social consciousness. Offered in alternate years. GE credit:

## ArtHum | OL. - I. Schiesari

## 115 D. Early Modern Italian Lyric (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Examination of the poetic tradition influenced by Petrarch. Consideration of the relation between gender and genre in such poets as Petrarch, Bembo, della Casa, Tasso, Marino, Gaspara Stampa, Veronica Franco, Isabella di Morra. Offered in alternate years. GE credit: ArtHum | WE.-I. Schiesari

## 118. Italian Literature of the Eighteenth

 Century (4)Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of modern Italian literature. Emphasis on the work of Goldoni, Bettinelli, Baretti, Parini, Alfieri and Vico. GE credit: ArtHum | OL.-I. (I.)

## 119. Italian Literature of the Nineteenth

## Century (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Romanticism in Italy, including Manzoni, Verga, and Verismo. GE credit: ArtHum | AH, OL, WC, WE. - II. (II.) HeyerCaput

120A. Italian Literature of the Twentieth Century: The Novel (4)
Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Development of the novel from Svevo to the present. Emphasis on the work of Svevo, Levi, Moravia, Pavese, and Vittorini. GE credit: ArtHum, Wrt \| AH, WC, WE. Cannon, Heyer-Caput
120B. Italian Literature of the Twentieth Century: Poetry and Drama (4)
Lecture/discussion-3 hours; term paper. Prerequisite: course 9 or consent of instructor. Italian poetry with emphasis on Hermeticism; the theater of Luigi Pirandello and its role in the development of contemporary Italian drama. GE credit: ArtHum | AH, WC, WE.-I. (I.) Heyer-Caput

## 121. New Italian Cinema (4)

Lecture/discussion-3 hours; film viewing-3 hours. Prerequisite: course 1 and upper-division standing, or consent of instructor. Italian cinema of the 21 st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. Offered in alternate years. (Same course as Film Studies 121.) GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE.-III. Heyer-Caput

## 1215. New Italian Cinema (4)

Lecture/discussion-3 hours; film viewing - 3 hours. Prerequisite: course 1 and upper-division standing, or consent of instructor. Italian cinema of the 21 st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as Film Studies 121S.) GE credit: ArtHum, Div, Wrt \| AH, OL, VL, WC,
WE. -I, III. (I, III.) Heyer-Caput

## 131. Autobiography in Italy (4)

 Lecture/discussion - 3 hours; term paper. Prerequisite: course 9 or consent of instructor. The development of representations of selfhood with particular attention to generic conditions, the confessional tradition and the problem of women's self-representation. Authors studied may included Petrarch, Tasso, Casanova, Alfieri, Zvevok, Sibilla Aleramo and Primo Levi. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.-III. Heyer-Caput, Schiesari
## 139B. Italian Literature in English:

 Boccaccio, Petrarch and the Renaissance (4) Lecture/discussion-3 hours; term paper. Petrarch and Boccaccio and their relations to the Middle Ages and the Renaissance; the Renaissance, with particular attention to the works of Lorenzo de' Medici, Leonardo da Vinci, Machiavelli, Ariosto, Michelangelo, and Tasso. GE credit: ArtHum | AH, OL, WC, WE. - II. (II.)
## 140. Italian Literature in English

Translation: Dante, Divine Comedy (4)
Lecture/discussion-3 hours; term paper. Prerequisite: any course from the GE Literature Preparation List. Reading of Dante Alighieri's Divine Comedy, through the otherworld realms of Inferno, Purgatory, and Paradise. GE credit: ArtHum, Wrt | AH, OL, WC, WE. -I. (I.)

## 141. Gender and Interpretation in the

 Renaissance (4)Lecture/discussion-3 hours; term paper. Prerequisite: completion of Subject A requirement, at least one course in literature, or consent of instructor. Critical analysis of Renaissance texts with primary focus on issues such as human dignity, education and gender politics; "high" and "low" culture and its relation to literary practices. (Same course as Comparative Literature 138.) GE credit: ArtHum, Div, Wrt | AH, WC, WE.-I. (I.) Schiesari

## 142. Masterpieces of Modern Italian Narrative (4)

Lecture- 1.5 hours; discussion-1.5 hours; term paper. Prerequisite: either English 3, Comparative Literature 2, or History 4C. Analysis of major works of Italian narrative fiction from unification of Italy to
present. Students will learn to use representative methods and concepts which guide literary scholarship. Consideration of works within European social and cultural context. Offered in alternate years. GE credit: ArtHum, Wrt | AH, WC, WE. - III.
145. Special Topics in Italian Literature (4) Lecture/discussion-4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth century theater, fascism, futurism, women and literature, and the image of America, etc. May be repeated for credit when topic differs. GE credit: ArtHum, Wrt | AH, OL, VL, WC, WE. - I, II, III. (I, II, III.)
145S. Special Topics in Italian Literature (4) Lecture/discussion-4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth-century theater, fascism, futurism, women and literature, the image of America, etc. This course is taught abroad. May be repeated for credit. Not open for credit to students who have completed course 145. GE credit: ArtHum, Wrt. - III.
145ST. Special Topics in Italian Literature (4) Lecture/discussion-4 hours. Prerequisite: course 9 or consent of instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth-century theater, fascism, futurism, women and literature, the image of America, etc. This course is taught abroad. May be repeated for credit. Not open for credit to students who have completed course 145. GE credit: ArtHUm, Wrt | AH, OL, VL, WC, WE. - III.
150. Studies in Italian Cinema (4) Lecture/discussion - 3 hours; film viewing -3 hours. Prerequisite: Humanities 10 or consent of instructor. Introduction to Italian cinema through its genres. Focus on cinema as a reflection or a comment on modern Italian history. Film as an artistic medium and as a form of mass communication. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.-II. (II.)

## 190X. Upper Division Seminar (1-2)

Seminar-1-2 hours. Prerequisite: upper division standing and consent of instructor. Examination of a special topic in Italian language or culture through shared readings, discussions, written assignments or special activities such as film screening or laboratory work. Limited enrollment. May not be repeated for credit. GE credit: ArtHum | AH, WC, WE.
192. Italian Internship (1-12)

Internship-3-36 hours. Prerequisite: upper division standing and consent of chairperson of Italian Department. Participation in government and business activities to gain work experience and to develop a better knowledge of Italian language and culture. (P/NP grading only.)
192S. Italian Internship (1-12) Internship-3-36 hours. Prerequisite: upper division standing, consent of instructor and UC Davis program director or chairperson of Italian Department. Participation in community service, teaching, government, and business activities to gain work experience and to develop a better knowledge of Italian language and culture. This course is offered abroad. (P/NP grading only.) -I. (I.)
194H. Special Study for Honors Students (3)

Independent study-3 hours. Prerequisite: open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Italian literature, civilization, or language studies. (P/NP grading only.) GE credit: AH, WC.
195H. Honors Thesis (3)
Independent study-3 hours. Prerequisite: course 194 H . Writing of an honors thesis on a topic in Italian literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.) GE credit: AH, WC, WE.

197T. Tutoring in Italian (1-4)
Seminar-1-2 hours; laboratory-1-2 hours. Prerequisite: upper division standing and consent of instructor. Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affili ated with departmental courses. May be repeated for credit for a total of 6 units. (P/NP grading only.)
197TC. Community Tutoring in Italian (1-5) Discussion - 1-2 hours; laboratory - 2-4 hours. Prerequisite: consent of instructor. Field experience as Italian tutors or teacher's aides. May be repeated for credit for a total of 10 units. (P/NP grading only.)
198. Directed Group Study (1-4)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

297. Individual Study (1-5)

Prerequisite: graduate standing or consent of instructor.
298. Group Study (1-5)

Prerequisite: graduate standing or consent of instructor.
299. Research (1-12)

Prerequisite: graduate standing or consent of instructor. (S/U grading only.)
299D. Dissertation Research (1-12)
Prerequisite: graduate standing or consent of instructor. (S/U grading only.)
Professional
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated
for credit. (S/U grading only.) - I, II, III. (I, II, III.)

Sven-Erik Rose, Ph.D. (German)
Diane Wolf, Ph.D. (Sociology)

## The Program of Study

The Program in Jewish Studies offers students the opportunity to explore Jewish history, communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction as well as the study of classical and modern Jewish texts in translation.
The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relation between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world have lived.

The Program in Jewish Studies will be of special interest to students in History, Religious Studies, Comparative Literature and Sociology as well as other fields in the Humanities and Social Sciences.

## Minor Program Requirements:

Jewish Studies
20
One course from: Jewish Studies 10 or
Religious Studies 21 or 23 ... 4

Four upper division courses selected from:
Comparative Literature 147, English 171A
German 116, 117, 141, Hebrew 100A,
100B, 100C, History 112A, 112B, 112C,
$113,142 \mathrm{~A}, 142 \mathrm{~B}$, Jewish Studies 101, 110 ,
111, 112, 120, 121, Political Science 135,
136, Sociology 174
16
Advising. Jewish Studies Program office; 530-754-7007; ;st@ucdavis.edu.

## Courses in Jewish Studies (JST)

## Lower Division

10. Introduction to Jewish Cultures (4)

Lecture-3 hours; term paper. Diverse Jewish cultures created over the past 2,000 years using examples from less-familiar communities such as India, China, and Ethiopia. Topics include the tensions between homeland/diaspora and questions of identity (race, nationality, culture, or religion). GE credit: SocSci, Div, Wrt \| SS, WC, WE.

## Upper Division

## 101. Topics in Jewish Thought (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: course 10 or Religious Studies 23 or consent of instructor. Selected themes in Jewish thought in historical and social perspective. This course traces the historical development of topics in Jewish thought such as Messianism, or focuses on one specific historical period, such as modern Jewish thought. May be repeated for credit when topic differs. GE credit: ArtHum, Div, Wrt \| AH, WC, WE.II. (II.)
110. Selected Topics in Jewish Literature (4) Lecture/discussion-3 hours; extensive writing. Prerequisite: one lower division literature or Jewish Studies course or consent of instructor. Literature written about the Jewish experience, treated in its historical and social context. Examines literature written in one language, such as English, Hebrew, or Yiddish, or a theme, such as gender or modern identities, as expressed in different literary traditions. May be repeated for credit when topic differs. GE credit: ArtHum, Div, Wrt | AH, WC, WE. - II. (II.)

## 111. Israeli Writing Since 1960 (4)

 Lecture/laboratory -3 hours; extensive writing. Prerequisite: one course in American or European literature. Contemporary Hebrew literature, in translation, in relation to post-independence debates about religious, social, and political identity of the Jewish state; literary reflections of Israeli ethnic diversity and changing gender relations; modern Hebrew poetry and postmodern experiments in fiction. Not open for credit to students who have completed Humanities 119. Offered in alternate years. GE credit: ArtHum, Div, Wrt \| AH, WC, WE.-II.
## 112. Readings in Jewish Writing and

## Thought in German Culture (4)

Lecture/discussion-3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German speaking world; what it means to be "other" in the mainstream culture. May be repeated for credit twice when topic differs. Not open for credit to students who have completed Humanities 121. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-I.

## 116. Readings in Jewish Writing and

 Thought in German Culture (4)Lecture-3 hours; term paper. Prerequisite: Religious Studies 23 or consent of instructor. Historical tradition of Jewish thought in the German cultural context;
unique contributions of Jewish writers to culture of the German-speaking world; what it means to be "other" in the mainstream culture. No credit will be given to those students who have completed Humanities 121. May be repeated two times for credit if topic differs. Offered in alternate years. (Same course as German 116.) GE credit: GE credit: ArtHum, Div, Wrt. | AH, OL, WC, WE.-(I.)
120. Cinema and the American Jewish Experience (4)
Lecture/discussion-3 hours; film viewing-3 hours. Prerequisite: course 10 recommended. Examination of American cinema to reveal how Jewish identity is expressed and submerged, tracing the relations between religion, identity, race, politics, and art. Not open for credit to students who have completed Humanities 122. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WE.-I.
121. Oral History and Jewish Life (4) Lecture/discussion-3 hours; term paper. Oral history methodologies and application to an in-depth oral history interview about Jewish life. Topics include oral history practices and ethics, immigration, migration, religious practice, ethnic relations, and community organization structures. Not open for credit to students who have completed Humanities 123. GE credit: SocSci, Wrt | SS. - III.

Donald W. Grimes, Ph.D., Lecturer Emeritus
Theodore C. Hsiao, Ph.D., Professor Emeritus
Allen W. Knight, Ph.D., Professor Emeritus
Miguel A. Mariño, Ph.D., Professor Emeritus
Donald R. Nielsen, Ph.D., Professor Emeritus
Frank E. Robinson, Ph.D., Lecturer Emeritus
Verne H. Scott, Ph.D., Professor Emeritus

## Affiliated Faculty

Stephen Grattan, Ph.D., Lecturer (Hydrologic Science) and Specialist in Cooperative Extension
Thomas Harter, Ph.D., Specialist in Cooperative Extension
Doug Mackay, Ph.D. Adjunct Professor (Hydrologic Science)
Lawrence J. Schwankl, Ph.D., Lecturer (Hydrologic Science) and Specialist in Cooperative Extension
Daniele Zaccaria, Ph.D., Assistant Specialist in Cooperative Extension (Hydrologic Sciences)
Minghua Zhang, Ph.D., Adjunct Professor (Hydrologic Science)

Land, Air and Water Resources is a multidisciplinary department with faculty who specialize in atmospheric, plant, environmental resource, soil, hydrology, and water engineering. Teaching and research focus on both agricultural forestry, natural ecosystems, climate change and environmental science. The faculty contribute to numerous other undergraduate and graduate programs in the Colleges of Letters and Science, Engineering, and Agricultural and Environmental Sciences.
Major Programs. Undergraduates in the department major in Atmospheric Science, Environmental and Resources Sciences, Environmental Science and Management, and Hydrology, and Soil and Water Science; see http://lawr.ucdavis.edu/ academic_programs.htm.
Undergraduate Advising Center is located in
1150 Plant and Environmental Sciences Building 530-752-1603.
Graduate Study. Graduate work is offered in the area of Atmospheric Science, Hydrologic Sciences, and Soils and Biogeochemistry. For detailed information, call 530-752-1669 or see http:// lawr.ucdavis.edu/academic_programs.htm.
Courses. See courses listed under Atmospheric Science, Hydrologic Sciences, Hydrology, Environmental and Resource Sciences, Environmental Science and Management, and Soil Science. See also the websites listed above.

Robert L. Thayer, Jr., M.A., Professor Emeritus

## The Major Program

Landscape architecture is the planning and design of land areas where human use requires adaptation or conservation of the environment. Students who study landscape architecture are concerned about the welfare of the environment and the people who use and shape it. They are capable of solving physical problems and are able to visualize and think in terms of spaces and three-dimensional concepts. The program is fully accredited by the Landscape Architecture Accreditation Board (LAAB) which is the only organization professionally sanctioned to grant land-
scape architectural accreditations in the United
States. The program was last reviewed in 2012.
The Program. The curriculum balances creativity and visual and spatial skills with technological expertise and a thorough background in physical, natural, and social sciences. Students develop proficiency at problem solving relating to design of parks, public spaces, energy-efficient neighborhoods, land reclamation projects, city and regional planning, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and other sensitive land areas. The program stresses a process-oriented approach to design and emphasizes environmental and community values.
Preparatory Requirements. Students are admitted to the landscape architecture major only after submitting a portfolio for review and selection by the faculty. Contact the Landscape Architecture Advising Office for further information in 135 Hunt Hall 530-754-8628.
Career Alternatives. Graduates may find jobs in private landscape architectural firms or public agencies, non-profit organizations, and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and designrelated fields.

Graduate Study. Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. Department faculty are active members of various graduate groups: Community Development, Geography, Transportation Technology and Policy and Ecology. Faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, city and regional planning, community participation in urban landscape design, landscape ecology, resource management, bioregionalism, and regenerative landscape systems.

Graduate students pursue more focused interests, expanding their professional expertise and/or conducting advanced research in landscape architecture or related disciplines.

## Courses in Landscape Architecture (LDA)

## Lower Division

1. Introduction to Environmental Design (4)

Lecture-3 hours; discussion-1 hour; term paper. Introduction to the role of design professionals in contributing to the built environment at a range of scales. Introduction to basic methods used by design professionals to evaluate, design, plan, and manage landscapes and the built environment. Not open for credit to students who have taken course 40. GE credit: ArtHum or SciEng or SocSci, Wrt | AH or SE or SS, VL, WC, WE. -I. (I.) Napawan
2. Place, Culture and Community (4) Lecture -4 hours. Introduction to recognizing and reading cultural landscapes, and the application of cultural landscape meaning to the creation of contemporary built environments. Topics include patterns and influences relating to agriculture, military, transportation, housing, wilderness, recreation and tourism. GE credit: SocSci, Wrt | ACGH, SS, VL, WC, WE. - II. (II.) Owens

## 3. Sustainable Development: Theory and

 Practice (4)Lecture-2 hours; extensive problem solving-2 hours, discussion-1 hour. Origins, theoretical perspectives, and practical applications of the concept of sustainable development at a number of scales (site, building, neighborhood, city, region, and nation) through lectures, sketch exercises, student projects, walking tours. GE credit: SocSci,
Wrt | ACGH, SS, VL, WE. - III. (III.) Wheeler
21. Environmental Design Visualization (5)

Lecture-3 hours; laboratory/discussion-3 hours.
Prerequisite: course 1. Restricted to Landscape Architecture majors. Idea expression through graphic media and drawing techniques for visual representation of the built environment, including conventional drafting and expressive techniques. Introduction to computerized graphics techniques. GE credit: ArtHum | AH, OL, VL.-I. (I.)

## 23. Computer Graphics for Landscape Architecture (4)

Studio-8 hours; two all-day field trips. Prerequisite: course 21 . Landscape architectural communications explored through the computer. Includes computerized drafting, drawing, rendering, desktop publishing, and photorealistic simulation.

## 30. History of Environmental Design (4)

 Lecture-3 hours; discussion - 1 hour. Prerequisite course 1. Pass one restricted to Pre-Landscape Architecture and Landscape Architecture majors or consent of instructor. History of Environmental Design across disciplines, including landscape architecture, planning, community and urban design. GE credit: ArtHum, Wrt | ACGH, AH, VL, WE.-II. (II.)
## 50. Site Ecology (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Biological Sciences 1A, 2A or 10 or an introductory course in biology, botany, or plant science; priority given to Landscape Architecture majors. Introduction to ecological concepts, including nutrient dynamics, population regulation, community structure, ecosystem function. Principles will be applied to human activities such as biological conservation, ecological restoration, landscape planning, and management. Weekly laboratory devoted to field exercises in local ecosystems. GE credit: SciEng | SE, VL, WE. - III.
(III.) Greco

## 60. Landform and Grading Studio (6)

Studio-8 hours; extensive problem solving. Prereqvisite: course 1, 21, 30, 70. Restricted to Landscape Architecture major. Introduction of landform and topography as landscape medium and utilization of grading and drainage to design meaningful and functional spaces. Introduction to site analysis, site planning, and the conventions of grading \& drain-
age, including contour manipulation and physical model building. GE credit: ArtHum or SciEng | AH or SE, OL, VL. - III. (III.) Napawan

## 61. AutoCAD for Landscape Architects (4)

Lecture-2 hours; laboratory-4 hours. Prerequisite: Agricultural Management and Range Resources 21 or equivalent with consent of instructor. Priority given to Landscape Architecture majors. Introduction of computer-aided drafting (CAD) techniques and their application to landscape design. Drawing set-up, layer control, basic drawing and editing commands, dimensioning and text styles, symbol libraries, and display commands used in the creation of landscape architectural drawings.

## 70. Introduction to Spacemaking (5)

Lecture - 3 hours; laboratory/discussion - 3 hours. Prerequisite: course 1, 21, 30. Restricted to PreLandscape Architecture and Landscape Architecture majors. Introduction to basic principles of design towards the creation of space. Introduction to design methodologies and skills necessary to define, manipulate, and represent the built environment. Workshops in 2D computer graphic techniques and 3D physical modeling making will reinforce design principles. GE credit: ArtHum | AH, OL, VL.-II. (II.) Rios

## 98. Directed Group Study in Landscape

## Architecture (1-5)

Prerequisite: consent of instructor. Directed group study. (P/NP grading only.)

## 99. Special Study for Undergraduates in

 Landscape Architecture (1-5)Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

## 102. Methods in Design and Landscape

## Research (4)

Seminar-4 hours; term paper. Prerequisite: course 170, 171, 172, 180. Restricted to Landscape Architecture majors with consent to pursue senior thesis project in the following quarter. Research, design, and planning methods employed in landscape architecture. Exercises allow students to design independent landscape research. Lectures provide a historical overview of research methodology. GE credit: ArtHum | AH, OL, VL, WE.-II. (II.) Owens

## 120. Advanced Computer Applications (4)

 Studio-8 hours; two all-day field trips. Prerequisite: course 23; open to majors in Landscape Architecture only. Studio work using computer-aided design, geographic information systems, and other advanced computer programs. - (III.) McNiel
## 140. Green Building, Design, and Materials

 (4)Lecture - 2 hours; laboratory - 4 hours. Prerequisite: course $21,30,50,70$. Restricted to Landscape Architecture majors only. Sustainable design and construction techniques at site and building scales. Emphasizes real-world case studies, analysis of opportunities for actual sites, and application of LEED and Sustainable Sites green rating systems. GE credit: ArtHum or SciEng | AH or SE, VL.-I. (I.)

## 141. Community Design \& Planning (6)

 Lecture -2 hours; studio- 6 hours. Prerequisite: course $21,30,50,70$. Restricted to Landscape Architecture majors. Introduction to community design and planning in landscape architecture projects. Incorporates social and cultural factors, public and community processes, theories and practices related to human-environment behavior; community involvement in design, social analysis, community engagement, accessibility, diversity and politics of place. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, OL, VL.-III. (II.) Owens
## 142. Applying Sustainable Strategies (4)

 Lecture-3 hours; laboratory-3 hours; extensive problem solving. Prerequisite: course 3, 21 30,50, 70, 140, 141. Open to Sustainable Environmental Design Majors or by permission of instructor. Capstone class examines case studies and techniques ofsustainable development. Student teams will develop detailed proposals for real-world sites. GE credit: ArtHum or SciEng or SocSci | AH or SE or SS, OL, VL, WE. - III. (III.)
150. Introduction to Geographic

Information Systems (4)
Lecture-3 hours; laboratory - 3 hours. Prerequisite: Plant Sciences 21 or equivalent with consent of instructor. Priority given to College of Agricultural and Environmental Science majors. Basic concepts, principles, and methods of GIS are presented. Data structures, database design, GIS data creation, GPS, and spatial analysis techniques are emphasized. Lab topics include: online data sources, aerial photography, GPS data input, suitability analysis, cartographic design, and graphic communication. Not open for credit to students who have completed Applied Biological Systems Technology 180/Plant Sciences 180 or Applied Biological Systems Technology 181 N . (Same course as Applied Biological Systems Technology 150.) GE credit: SciEng | SE, VL.-I. (I.) Greco, Upadhyaya

## 160. Design and Build Studio (6)

Studio-8 hours; extensive problem solving; fieldwork. Prerequisite: course 1, 2, 3, 21, 30,50, 70. Restricted to Landscape Architecture majors. Introduction to the spatial design and construction of small-scale projects. Hands-on approach to learning and understanding materials (including wood, concrete, and stone) and methods in landscape construction, and the application of technical skills (including detailing, cost estimation, and specifications). GE credit: ArtHum or SciEng | AH, OL, VL.I. (I.)

## 161. Technology 3: Professional Practice

 and Construction Documents (4)Studio-8 hours. Prerequisite: courses $21,23,60$ and 160. Legal and professional aspects of landscape architecture, including the development of construction documents (drawings and specifications), proposal writing, fee calculations, project management, cost estimation, and insurance.-II. (II.) McCulley
170. Site Planning and Design Studio (6)

Studio-8 hours. Prerequisite: course 21,30,50, 70. Open to Landscape Architecture majors. Application of place-making and problem-solving skills to local landscape sites. Analysis of social and environmental conditions in the field. Lectures link design projects to contemporary theories and practices. Includes workshops in computer-aided drafting. GE credit: ArtHum | AH, OL, VL. -I. (I.)
171. Urban Design and Planning Studio (6) Studio-8 hours. Prerequisite: course 21,30,50, 70, 170. Restricted to Landscape Architecture majors. Studio designing large-scale landscapes at regional, sub-regional, and neighborhood scales. Focuses on understanding complex social, economic, and environmental factors, developing sustainability priorities and strategies, and applying them through design and policy. GE credit:
ArtHum | ACGH, AH, OL, VL.-III. (III.)

## 180. Advanced Design and Planning Studio

 (6)Studio-8 hours; fieldwork; extensive problem solving. Prerequisite: course 60, 160, 170, 171, 172. Restricted to Landscape Architecture majors or consent of instructor. Application of advanced theories and methods of design and planning to real-world projects. May be repeated for up to 18 units of credit. GE credit: ArtHum or SciEng | AH, OL, VL.I, II, III. (I, II, III.)

## 180A. Special Topics in Landscape

Architecture: Postmodern Landscapes (2)
Lecture-2 hours. Prerequisite: upper division standing. Basic principles of critical theory and postmodern modes of analysis. Application to interpretation and change of designed environment. Offered in alternate years. Not open for credit to students who have taken course 185.

180C. Special Topics in Landscape
Architecture: Art of the Environment (2)
Lecture-2 hours. Prerequisite: courses 1 and 30. Priority given to Landscape Architecture and Design majors. Introduction to environmental art. Encouragement of critical thinking about the intersection of art, landscape and environmental issues. Offered in alternate years. - Massey Schenker

## 180F. Special Topics in Landscape <br> Architecture: Landscape Ecology (2)

Lecture-2 hours. Prerequisite: course 50 or an introductory course in Ecology. Theories, major concepts and research methods of landscape ecology. Spatial structure, function and dynamics of various landscape types. Biological conservation, ecological restoration, and landscape planning, design, and management. Not open for credit to students who have taken Landscape Architecture 183. Offered in alternate years. GE credit: SciEng \| SE, WE. - (II.) Greco

## 180G. Special Topics in Landscape <br> Architecture: Landscape and Regional Land

 Planning (2)Lecture-2 hours. Prerequisite: upper division standing. Theories, laws, and practices of community planning. Creation of livable and sustainable communities and natural landscapes, Smart growth, new urbanism, neo-traditional town planning, transit-oriented, and sustainable communities. Traditional master planning vs. participatory planning and design approaches. Offered in alternate years. GE credit: SocSci | ACGH, SS. - II. (II.) Loux, Wheeler
1801. Special Topics in Landscape

Architecture: Regenerative Landscape

## Systems (2)

Lecture-2 hours. Prerequisite: courses 1 and 30 .
Priority given to Landscape Architecture majors. Theories, basic techniques and applications for various systems by which landscapes regenerate and sustain life (both human and non-human) and culture over time. Offered in alternate years. GE credit: SL. - (II.) Wheeler, Lou
180J. Special Topics in Landscape Architecture: Community Participation in Design (2)
Lecture-2 hours. Prerequisite: upper division standing. History and role of community participation in landscape design; methods of community involvement, including workshop techniques. Introduction to design processes, including public participation. Offered in alternate years. GE credit:
SocSci | ACGH, DD, SS.-Owens
180K. Special Topics in Landscape
Architecture: Social Factors in Landscape

## Architecture (2)

Lecture-2 hours. Prerequisite: Psychology 155 and upper division standing. Concepts in environmental psychology as they relate to landscape architecture. Discussion of needs of various user groups of a land area. Introduction to post occupancy evaluations. Offered in alternate years. GE credit: SocSci | DD, SS, WE.-Owens
180L. Special Topics in Landscape

## Architecture: Public Open Space (2)

Lecture-2 hours. Prerequisite: upper division standing. Intensive study of public open spaces, including parks, plazas, playgrounds, greenways and community gardens. Current issues associated with design and management of the public environment of cities. Offered in alternate years.

## 180M. Special Topics in Landscape

Architecture: Urban and Community Design (2)

Lecture-2 hours. Prerequisite: upper division standing. Theories and methods of community and neighborhood design. Past and contemporary approaches including new urbanism, planned unit development, mixed use, pedestrian and transit-oriented development. Issues of open space and community form. Offered in alternate years.

180N. Special Topics in Landscape Architecture: Planting Design (2)
Lecture-2 hours. Prerequisite: upper division standing and Environmental Horticulture 6. Develop an understanding of the sensory, visual and functional importance of plants in the landscape. Visualization and design of planted landscapes. Development of planting plans. Offered in alternate years. Not open for credit to students who have taken course 156.
1800. Special Topics in Landscape

Architecture: Current Issues in Landscape Architecture (2)
Lecture-2 hours. Prerequisite: course 1 and 30. Priority will be given to Landscape Architecture and Design majors. Study of current issues in landscape architecture with emphasis on design and/or design history. Offered in alternate years.

## 180P. Special Topics in Landscape

Architecture: Water in Community Planning and Design (2)
Lecture-2 hours. Prerequisite: course 50 or equivalent with consent of instructor. Upper division standing or above. Priority given to Landscape
Architecture majors. Theories, policies, methods, and resources related to the integration of water resources management with urban/community plan ning and landscape design including water use/ demand, quality, treatment, conservation, and storm water/drainage. Offered in alternate years. - Loux

## 180Q. Historic Preservation (2)

Lecture-2 hours. Prerequisite: upper division standing. Priority given to Landscape Architecture majors. Roots and present focus of historic preservation movement; current philosophies and laws governing preservation, restoration, and revitalization as they affect landscape architects. Offered in alternate years. - (I, II, III.) McNiel
181 A. Postmodern Landscapes Design and Planning Studio (3)
Studio-6 hours; one field trip required. Prerequisite: course 170; course 180A concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180A. Offered in alternate years.
181C. Art of the Environment Design and Planning Studio (3)
Studio-6 hours; one field trip required. Prerequisite: course 170; course 180C concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180C. Offered in alternate years. - Massey Schenker

## 181 F. Landscape Ecology Design and

 Planning Studio (3)Studio-6 hours. Prerequisite: course 170; 180F must be taken concurrently. Priority to Landscape Architecture majors. Design theory and methods to real-world projects in ecology. Ecological principles and their application in biological conservation, ecological restoration, and landscape planning, design, and management. Field trip required. Offered in alternate years. GE credit: SciEng | OL, VL, SE.-I. Greco
181G. Special Topics in Landscape
Architecture: Landscape and Regional Land Planning Studio (3)
Studio-6 hours. Prerequisite: course 170, course 181G concurrently. Applications of recent models and practices of urban planning and design to create livable and sustainable cities, towns, villages, rural, and natural landscapes. Testing of models by creating plans and designs for new communities, and for urban infill, restoration or redevelopment projects. Field trip required. Offered in alternate years. GE credit: VL. - Loux, Wheeler
181 H . The Bioregional Landscape Design and Planning Studio (3)
Studio-6 hours; one field trip required. Prerequisite: course 170; course 180H concurrently. Priority given to Landscape Architecture majors. Application
of design theory and methods to real-world projects associated with course 180 H . Offered in alternate years.

## 1811. Regenerative Landscape Systems

 Design and Planning Studio (3)Studio-6 hours; one field trip required. Prerequisite: course 170; course 1801 concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 1801. Offered in alternate years. GE credit: VL.
181 J. Community Participation in Design: Design and Planning Studio (3)
Studio-6 hours; one field trip required. Prerequisite course 170; course 180J concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180J. Offered in alternate years. GE credit: DD, OL, VL. - Owens

## 180K. Special Topics in Landscape

Architecture: Social Factors in Landscape Architecture (2)
Lecture-2 hours. Prerequisite: Psychology 155 and upper division standing. Concepts in environmental psychology as they relate to landscape architecture. Discussion of needs of various user groups of a land area. Introduction to post occupancy evaluations. Offered in alternate years. GE credit: DD, SS,
WE. - Owens
181L. Public Open Space Design and Planning Studio (3)
Studio-6 hours; one field trip required. Prerequisite: course 170; course 180L concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180L. Offered in alternate years.

## 181M. Urban and Community Design:

 Design and Planning Studio (3)Studio-6 hours; one field trip required. Prerequisite course 170; course 180M concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180M. Offered in alternate years.
181 N. Planting Design and Planning Studio (3)

Studio-6 hours; one field trip required. Prerequisite course 170 and Environmental Horticulture 6; course 180N concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 180N. Offered in alternate years.
1810. Current Issues Design and Planning Studio (3)
Studio-6 hours; one field trip required. Prerequisite: course 170; course 1800 concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to real-world projects associated with course 1800. Offered in alternate years

## 181 . Special Topics in Landscape

Architecture: Water in Community Planning and Design Studio (3)
Studio-6 hours. Prerequisite: courses 50 and 61 (or equivalent courses with consent of instructor); course 170; course 180 concurrently. Priority given to Landscape Architecture majors. Application of design theory and methods to community and site scale projects associated with course 180P. Offered in alternate years. -II. Loux

## 181Q. Special Topics in Landscape

Architecture: Historic Preservation Studio (3)

Studio-6 hours. Prerequisite: junior standing in the Landscape Architecture program; course 180Q to be taken concurrently. Methods and tools currently used by professional preservation architects and planners, including inventory and evaluation methods and traditional planning and design
approaches. Field trip required. Offered in alternate years. - I, II, III. (I, II, III.) McNiel
190. Proseminar in Landscape Architecture (1)

Seminar-1 hour. Lectures and discussion of critical issues in landscape architecture. May be repeated three times for credit. (P/NP grading only.) -I, II, III. (I, II, III.)

## 191. Landscape Architecture Planning \&

 Design Studio (2-12)Seminar-1 hour; workshop-3 hours. Prerequisite: course 1, 70, and 170 or consent of instructor. Priority to Landscape Architecture majors. Faculty initiated workshops featuring advanced studies and applications of original work in landscape architecture. May be repeated for up to 20 units of credit. I, II, III. (I, II, III.)

## 192. Internship in Landscape Architecture

 (1-12)Internship. Prerequisite: senior standing in Landscape Architecture. Professional field experience in landscape architecture. May be repeated for a total of 12 units. (P/NP grading only.)

## 193A. Senior Project in Landscape

## Architecture (3)

Studio-6 hours. Prerequisite: senior standing in Landscape Architecture. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only.) - II. (II.)

## 193B. Senior Project in Landscape

## Architecture (4)

Studio-8 hours. Prerequisite: course 193A and senior standing in Landscape Architecture. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only.) III. (III.)

## 197T. Tutoring in Landscape Architecture

 (1-5)Tutoring-3-15 hours. Prerequisite: consent of instructor. Tutoring in Landscape Architecture courses. (P/NP grading only.)
198. Directed Group Study in Landscape Architecture (1-5)
Prerequisite: consent of instructor. Directed group study. (P/NP grading only.)

## 199. Special Study for Advanced Undergraduates in Landscape Architecture (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

200. Citizenship, Democracy, \& Public Space (4)
Seminar-4 hours. Prerequisite: graduate standing or consent of instructor. Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as Geography 230.) - III. (III.) Rios

## 201. Theory and Philosophy of the

Designed Environment (4)
Seminar-4 hours. Prerequisite: course 140 or the equivalent; graduate standing or consent of instructor. Examines the major theories of environmental design. Epistemology of design serves as framework to examine modern landscape architecture, architecture, urban design and planning. Normative theories of design are reviewed along with the social and environmental sciences. Offered in alternate years. - Il. Rios
202. Methods in Design and Landscape Research (4)
Seminar-4 hours. Prerequisite: Statistics 102 or the equivalent; graduate standing or consent of instructor. Explores many of the research and advanced design and planning methods employed in landscape architecture. Exercises provide the student
with a vehicle for designing independent landscape research and creative activities. Lectures provide an historical overview of research methodology.
Offered in alternate years.-Owens

## 204. Case Studies in Landscape Design and Research (4)

Seminar-4 hours; field trip required. Prerequisite: graduate standing in Landscape Architecture, Ecology, Geography or Community Development or consent of instructor. Real-world designed environment situations where creative activity and/or basic research is the primary product. May be repeated for credit for a total of 12 units. Offered irregularly.

## 205. Physical Planning and Design (4)

Lecture-2 hours; discussion-2 hours. Limited to graduate students. Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals. (Same course as Geography 233.) Offered irregularly. - Wheeler

## 210. Advanced Landscape Architecture <br> Studio (4)

Laboratory-8 hours. Prerequisite: course 113 or the equivalent; graduate standing or consent of instructor. Exposes students to real-world, designed-environment situations where creative activity and/or basic research is the primary product. Advanced landscape problems will be utilized at the site, urban or rural scale. Offered in alternate years.

## 220. Public Space and Culture (3)

Seminar-3 hours. Prerequisite: course 182 or the equivalent; graduate standing or consent of instructor. Explores the public environment of cities including their streets, parks, and squares. Public life and culture of American cities is examined and design responses to this culture evaluated. Typology is used to identify spaces. Offered in alternate years.

## 230. Landscape and Memory (4)

Seminar-4 hours; term paper. Prerequisite: graduate standing or consent of instructor. Theories of memory from other fields (critical theory, psychoanalysis, history) applied to landscape design, especially heritage and tourist sites. The relationships between place, memorial, and event. Offered in alternate years.

## 240. Historic, Cultural Landscapes: Concept, Perception, Preservation (4)

Seminar-4 hours. Prerequisite: graduate standing or consent of instructor. Historic cultural landscapes, as defined by the National Register of Historic Places. Identification and analysis of aerial extent, structured makeup, integrity, and historical significance using common and emerging methods and tools. Offered in alternate years.-McNiel
250. Life-Place: Bioregional Theory and
Principles (4) Principles (4)
Seminar-3 hours; tutorial-1 hour. Prerequisite: graduate standing or consent of instructor. The emerging concept of bioregionalism as a hypothesis for environmental quality; theoretical structures and practical methods by which individuals and groups identify with naturally-bounded "life-places" or "bioregions" and strive to live respectfully and reciprocally within them. Offered in alternate years.

## 260. Landscape and Power (4)

Seminar-4 hours. Prerequisite: graduate standing or consent of instructor. How various representations of landscape have historically worked as agents of cultural power. Course framework is interdisciplinary, including studies of landscape representation in literature, art, photography, cartography, cinema, and landscape architecture. (Same course as Geology 252.)-I. (I.) Schenker

## 270. Environment and Behavior (4)

Seminar-3 hours; tutorial-1 hour. Prerequisite: graduate standing or consent of instructor; Psychology 144 recommended. Factors that influence human's interaction with their surroundings and the mechanisms used for recognizing and addressing
general and specific human needs in community design and development decisions. Offered in alternate years. - Owens

## 280. Landscape Conservation (3)

Seminar-3 hours. Prerequisite: contact department for prerequisite courses; graduate standing or consent of instructor. Focus is on land planning, design, and management techniques to further the goal of resource preservation. Examines current critical theory in the establishment and management of conservation areas. Offered in alternate years.-II. Greco

## 290. Graduate Seminar in Landscape

 Architecture (2)Seminar-2 hours. Prerequisite: graduate standing and consent of instructor. Seminar on selected topics in landscape architecture research, analysis, planning, design, communication, or education. May be repeated for credit. (S/U grading only.)

## 297. Practicum in Landscape Architecture

 (1-10)Independent study - 1-10 hours. Prerequisite: graduate standing and consent of instructor. Opportunity for students to work directly in the field with academics at other institutions or with professionals in an office setting. Gives experience beyond the confines of campus and allows direct interaction with the community. ( $\mathrm{S} / \mathrm{U}$ grading only.)
298. Group Study (1-5)

Prerequisite: graduate standing and consent of instructor. ( $S / U$ grading only.)
299. Directed Individual Research for Graduate Students (1-12)
Requires consent of instructor. May be repeated for credit. (S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (II, II, III.)

## Landscape Restoration

(College of Agricultural and Environmental Sciences) This minor is of particular interest to students majoring in Wildlife, Fish, and Conservation Biology, Environmental Science and Management, Landscape Architecture, Biological Sciences, Evolution and Ecology and Plant Biology. Biological Sciences 1C or Plant Sciences 2 is a prerequisite to some courses in the minor. The minor is sponsored by the Department of Plant Sciences.

## Minor Program Requirements:

UNITS
Landscape Restoration. 19-25
Select one of Environmental Science and
Policy 155, Plant Biology 102, 117, 147,
Plant Sciences 144.
. 4-5
Select one of Environmental Horticulture 100,
130, 133, Plant Biology 119, Plant Sciences 176...

3-4
Soil Science 10 or 100 ............................. 3-5
Environmental Horticulture 160 and 160L. 4
Select one of Environmental Horticulture 150,
Environmental Science and Policy 155L,
Landscape Architecture 180F, 180H, 180I,
Plant Sciences 130, Wildlife, Fish, and
Conservation Biology 155
2-4
Plant Sciences 192.................................. 3
Minor Adviser. T.P. Young (Plant Sciences)
Advising Center is located in 1224 Plant and Environmental Sciences 530-752-7738.

## Latin

See Classics, on page 198.

## Latin American and Hemispheric Studies

(College of Letters and Science)
Charles F. Walker, Ph.D., Program Director
Program Office. Hemispheric Institute on the Americas, 1277 Social Sciences and Humanities Building 530-752-3046

## Committee in Charge

Jelmer Eerkens, Ph.D., Professor (Anthropology) Liza Grandia, Ph.D., Associate Professor
(Native American Studies)
Luis Guarnizo, Ph.D., Professor
(Human and Community Development)
Erin Hamilton, Ph.D., Assistant Professor (Sociology)
Robert Irwin, Ph.D., Professor
(Spanish \& Portuguese)
Robert Newcomb, Ph.D., Professor
(Spanish and Portuguese)
Bettina Ng'weno, Ph.D., Associate Professor
(African American \& African Studies)
Pablo Ortiz, Ph.D., Professor (Music)
Marc Schenker, Ph.D., Professor
(Medicine \& Public Health)
Charles Walker, Ph.D., Professor (History)
The minor in Latin American and Hemispheric Studies offers students the opportunity to explore connections throughout the Western Hemisphere from an array of perspectives across multiple academic fields.
The minor is made up of six courses, arranged in three tiers: Basic (one lower division course on the history of Latin America); Core (two introductory upper division courses chosen from a designated list of fields other than History); and Elective (three additional upper division courses from a designated list of courses that focus primarily on Latin American and/or Hemispheric issues). Students are strongly encouraged to develop proficiency in Spanish or Portuguese, either through course work (such as completion of Spanish 24 or 33 ), or through life experience such as study abroad.

## Minor Program Requirements:

UNITS
Latin American and Hemispheric
Studies
Basic Courses........................................ 4
One course from: History 7A, 7B, 7C core
courses................................................. 8
One course each from two of the following
categories:
(a) Anthropology 144;
(b) Native American Studies 115;
(c) Spanish 150 or 151;
(d) Political Science 143

Elective Courses. $\qquad$
Three courses selected from the following
list to achieve a total of 24 units: African
and African American Studies 107A, 155,
163, 172, 180; Anthropology 130C, 146;
Art History 151; Chicana/o Studies 130,
160; Comparative Literature 151, 152 ,
165; Film Studies 189; Music 127; Native
American Studies 110A, 110B, 110C,
110D, 120, 125, 133, 181A, 181B,
181C, 184; History 160, 162, 163A,
163B, 164, 165, 166A, 166B, 167, 168,
169A, 169B; Spanish 107A, 117, 149,
$151,153,154,155,156,157,158$,
$159,163,170,171,172,174,175$,
176, 177; Portuguese 100, 159, 161,
162, 163; Women's Studies 80, 102

Minor Adviser. HIA program coordinator in 1277 Social Sciences and Humanities Building (530-7523046) or Charles Walker in 1279 Social Science and Humanities Building (530-752-3046)

## Courses in Law (LAW)

Courses of Instruction. The courses listed below have all been taught at least once in the last three years. There is no guarantee that any given course will be taught within the next three years. The numbers in parentheses indicate the number of semester credits. Please see Law School Course Description Page for current information http://www.law.ucdavis.edu/current/registrar/ course-descriptions.html\#.

## Professional Curriculum

## First Year Courses

## 200. Introduction to Law (1)

Discussion - 1 hour. Introduction to basic concepts of the law, the historical roots of common law and equity, the precedent system in its practical operation, the modes of reasoning used by courts and attorneys, and the fundamentals of statutory interpretation. (S/U grading only.)

## 200A. Introduction to the Law of the United

 States (2)Discussion-2 hours. History and fundamental principles of the United State's legal system. Important current legal issues, developments and trends. Required for LL.M. students who have not attended a U.S. law school. Fall semester only. (S/U grading only.)

## 201. Property (4)

Discussion-4 hours. A study of doctrines and concepts of property law with primary emphasis on real property. Course coverage includes: the estates in land system; the landlord-tenant relationship, conveyancing, and private and public land use control.

## 202. Contracts (5)

Discussion-5 hours. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts or fails to adjust to changing social demands.

## 203. Civil Procedure (5)

Discussion -5 hours. A study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes.

## 204. Torts (5)

Discussion -5 hours. Familiarizes students with legal rules, concepts and approaches pertinent to the recovery for personal injuries, property damages and harm done to intangible interests.

## 205. Constitutional Law I (4)

Discussion-4 hours. The principles, doctrines and controversies regarding the basic structure of and division of powers in American government. Specific topics include judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among the branches of the federal government.

## 206. Criminal Law (3)

Discussion-3 hours. Study of the bases and limits of criminal liability. Coverage of the constitutional, statutory, and case law rules which define, limit, and provide defenses to individual liability for the major criminal offenses.
207. Legal Research and Writing I (2)

Discussion/laboratory-2 hours. This fall semester course taught by Wydick Fellowship Program faculty is an integrated legal research and writing skills course. Basic legal research resources and strategies are introduced and practiced.
207A. Legal Research (LLM) (1)
Discussion-1 hour. A description of the evolution and use of sources of law and secondary authority. LL.M. students only.
207B. Advanced Legal Research (2)
Seminar-2 hours. Restricted to 35 students. Will introduce students to advanced legal research tools and techniques used in practice, including efficient computer research techniques.

## 208. Legal Research and Writing II (2)

Discussion-2 hours. Focuses on persuasive writing and oral advocacy. Students will complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief, with oral arguments by all students.

## Second and Third Year Courses

(a) General/Topical Survey Courses: 224, 254A, 257, 277T, 281, 285C, 285D, 294A, 298
(b) Business Law: 215, 215A, 220, 228, 232, 236A, 236B, 242, 243, 247, 253, 255, 266A, 269A, 269C, 271A, 271B, 284, 286D, 291A, 291B
(c) Constitutional Law: 216A, 218, 240, 288, 288A
(d) Criminal Law: 210, 210A, 213, 213A, 227A, 245, 245T, 276, 286D
(e) Estate Planning: 214, 223, 221
(f) Environmental Law: 235, 235A, 256, 264, 264A, 265, 282, 285, 285A, 285B, 285C, 285T, 289A, 409, 450
(g) Family Law: 225, 242, 272, 435
(h) Health Law and Bioetics: $212 \mathrm{~A}, 226$, 286, 286, 286A, 286B, 286C, 286D, 286E
(I) Human Rights and Social Justice: 213A, 218, 220T, 222, 222A, 226, 231, 231A, 248B, $251 \mathrm{~T}, 251 \mathrm{~TB}, 254$, 254A, 259, 259P, 259T, 260, 267, 276, 277, 286B, 286D, 287A, 288, $292,408,420,440,450 \mathrm{~T}, 460$
(J) Individual and Group Study: 411A, $41 \mathrm{~B}, 416,417,418,419,498,499$
(k) Intellectual Property and Technology: 209A 217, 248A, 266A, 274, 274A, 274D, 285C, 286, 295A, 296, 296T, 460
(I) International, Comparative and Foreign Law: 210, 213A, 224, 230, 247A, 248, 248T1, 248B, 242, 252, 270, 274A, 291A, 291B, 292, 293, 440, 450T
(m) Labor and Employment Law: 231A, 248F, 251, 251T, 255, 260, 279, 285C, 285D, 455
(n) Legal Theories and Ethics: 220T, 237, 250, 258, 259, 284, 286C, 286D
(o) Medicine and Mental Health Law: 212, 241, 286, 286A, 286B, 286C
(p) Procedure and Jurisdiction: 242, 246, 257, 275, 281, 283, 297
(q) Public Law and Policy 210T, 235, 235T, 240, 240A, 248, 254, 257, 257A, 279, 281, 285T, 287A, 287T, 293, 408A, 445, 460
(r) Skills and Litigation: 211, 219, 219T, 228, 229, 239, 261, 263A, 271, 275, 278, 280, 297, 401A, 401B, 409, $410 \mathrm{~A}, 410 \mathrm{~B}, 410 \mathrm{C}, 412,413,414$, 415, 430, 451, 465
(s) Taxation: 214, 220, 220T, 247, 247B, 255, 271, 271A, 271B
(t) Clinical Programs-Externships: 425, 430, 445, 450, 455, 460, 470
(u) Clinical Programs-In-House Clinicals: $420,435,440,480,485$
(v) Individual and Group Study: 411, 411B, $416,417,418,419,495,499$

## 208A. Legal Research and Writing II (LLM)

 (2)Discussion -2 hours. Persuasive writing and oral advocacy. LLM section students complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief, with oral arguments by all students.

## 209A. Patent Law (3)

Discussion-3 hours. Prerequisite: course 274 or consent of instructor. Covers all essential aspects of patent law: patentable subject matter, novelty, utility, nonobviousness, enablement, prosecution, infringement, and remedies.

## 209AT. Patent Prosecution and Practice (2)

 Discussion-2 hours. Prerequisite: course 274 or consent of instructor. Essential aspects of patent prosecution: the role of the patent practitioner, claims and specification drafting, requirements, and strategy, appeals and post-grant proceedings, American Invents Act considerations, portfolio development and strategy, and litigation considerations.
## 210. Criminal Justice Administration

Seminar (2)
Seminar-2 hours. This course compares U.S. criminal procedure with that of other countries, particularly the differing roles of the prosecutor, defense counsel, and the judge. Limited enrollment.

## 210A. Policing Seminar (2)

Seminar-2 hours. Restricted to 10 students. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies.
210B. Sociology of Criminal Procedure (2) Seminar-2 hours. Limited enrollment. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies.

## 211. Negotiation (2)

Discussion-2 hours. Limited enrollment. Skills course teaches theoretical and empirical approaches to negotiation strategy for the purposes of making deals and resolving disputes. Students participate in simulations to hone their negotiation skills, and write analytical papers.

## 211 A. Advanced Negotiations Strategy and

 Client Counseling (3)Discussion-3 hours. Prerequisite: consent of instructor. Application Course. Must apply and secure professor approval to enroll. Will involve participating in discussions and a series of simulations. Your classmates will be counting on you to actively participate and be well prepared for every simulation. Do not apply to take this course unless you are willing and able to participate fully and can accept constructive feedback. If you anticipate missing more than two class sessions, do not apply to take this course. Understand the dynamics of interviewing and counseling process. Designed to be relevant to a broad spectrum of negotiation problems that are faced by legal professionals.
212A. Medical Liability Law and Policy (2)
Discussion-2 hours. This course will consider the many ways in which society seeks to establish and maintain quality in patient care.

## 213A. Transnational Criminal Law (3)

Discussion-3 hours. Prerequisite: course 205; course 206. Will examine the laws responses to a particular aspect of globalization, transnational crime. The course will explore the phenomenon of transnationality and how it affects the power of nationstates, acting alone or together, to prosecute certain crimes.

213T. Terrorism and International Law (2) Seminar-2 hours. International terrorism remains a pressing concern. Devising effective remedies for responding to it within the bounds of the law is critical. Therefore, the new generation of international lawyers needs to be familiar with the relevant law and standards.

## 214. Estate and Gift Tax (3)

Discussion-3 hours. Prerequisite: course 220; course 221 recommended. Fundamentals of federal transfer taxation, including the estate tax, the gift tax, and the generation-skipping transfer tax.

## 215. Business Associations (4)

Discussion-4 hours. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms.

## $215 A$. The Law of Corporate Governance

 Seminar (2)Seminar-2 hours. Prerequisite: course 215.
Advanced issues in the governance of publicly held corporations. Separation of ownership and control and how the law has addressed this issue at the theoretical level and in the context of topics such as the duties of corporate directors, shareholder voting rights, and competition among states to attract corporate charters.

## 215S. Special Session Business Associations

 (4)Discussion - 4 hours. Provides a broad survey of the legal rules and concepts applicable to business associations, both public and closely.

## 216A. Law and Religion (2)

Discussion-2 hours. Restricted to 20 students. Federal constitutional law relating to religion; the interpretation and application of the Free Exercise Clause and the Establishment Clause of the First Amendment.

## 217. Telecommunications Law (3)

Discussion-3 hours. Economic and administrative regulation of telephony, radio and television broadcasting, and video technologies such as cable and direct broadcast satellites. Emphasis on the recently enacted Telecommunications Reform Act and the role of the Federal Communications Commission, as well as other sources of regulation such as related antitrust law and state public utility regulation.

## 218. Constitutional Law II (4)

Discussion-4 hours. Students who have completed course 218A or course 218 B may not take this course. Principally covers the First Amendment and the Equal Protection Clause.

## 218A. Constitutional Law II-Equal

## Protection (2)

Discussion-2 hours. Students who have previously taken course 218 , or who plan to take course 218 for 4 units in Spring 2011, may not take this course. Students enrolled in this course will be given priority registration spring semester 2011 to enroll in course $218 B$. Focuses on the Equal Protection Clause of the Fourteenth Amendment.

## 218B. Constitutional Law II-First

## Amendment (2)

Discussion-2 hours. Students who have previously taken course 218 or who plan to take course 218 for 4 units in Spring 2011 may not take this course. Students not required to take course 218A in order to take this course. Principally covers the free speech clause of the First Amendment.
218T. Selected Topics in Constitutional Law (2)

Seminar-2 hours. Examines two core themes of Constitutional Law I and Federal Jurisdiction: federalism and separation of powers. Concentrates on habeas corpus and the Eleventh Amendment as vehicles for examining the constitutional themes in greater depth.

## 218 TA. Separation of Powers (2)

Discussion-2 hours. Study of the separation of powers in our federal government by focusing on certain historical events and their impact on constitutional law.

218TB. Law of War (3)
Discussion-3 hours. Surveys the law of armed conflict as it applies to today's battlefields.
218TC. Antidiscrimination Law (4)
Discussion-4 hours. Course offers an overview of federal constitutional and statutory antidiscrimination law in the United States.

## 219. Evidence (4)

Discussion - 4 hours. Covers rules regarding the admissibility of testimonial and documentary proof during the trial of civil and criminal cases, including rules governing relevancy, hearsay, the examination and impeachment of witnesses, expert opinion, and constitutional and statutory privileges.

## 219A. Advanced Evidence (3)

Discussion-3 hours. Prerequisite: course 219. Limited to six students; selected by professor. Interested students complete an application form; available in the Law Registrar's Office. Credit is contingent on attending all classes and participating in all exercises. Participation is crucial to the success of the course, as students will be working in teams of three. Do not take this course unless you are willing and able to participate fully and can accept criticism. Public interest lawyers often spend much time in the courtroom. Prosecution, defender, and legal aid offices usually don't have resources to train lawyers in trial work. Seeks to help remedy this deficiency by helping develop witness interrogation skills. (S/U grading only.)
220. Federal Income Taxation (4)

Discussion - 3 hours. Surveys the federal income tax system, with consideration of the nature of income, when and to whom income is taxable, exclusions from the tax base, deductions and credits, and tax consequences of property ownership and disposition.

## 220A. Federal Income Taxation (3)

Discussion-3 hours. Surveys the federal income tax system, with consideration of the nature of income, when and to whom income is taxable, exclusions from the tax base, deductions and credits, and tax consequences of property ownership and disposition.
220B. Tax and Distributive Justice (2)
Discussion - 3 hours. Advanced tax course designed to introduce students to issues of tax policy, with particular emphasis on tax distribution (i.e., who or what should pay taxes in society) and tax incidence (i.e., who or what ends up paying taxes in society).

220BT. Law of Banking and Financial

## Institutions (2)

Discussion-2 hours. Guide to dual regulatory system, and an understanding of banks and other financial institutions, such as thrifts, credit unions, industrial banks, finance companies, and money transmitters, as well as large versus community banks.

## 220S. Special Session Federal Income

## Taxation (2)

Discussion-2 hours. Introduction to the basic principles of federal income taxation using the American federal tax model. Topics include identification of income subject to taxation, gains and losses from property transactions, the timing of income and deductions and the identity of people subject to tax on particular items of income.

## 220T. State and Local Taxation (3)

Discussion - 3 hours. Introduction to fundamentals of state and local taxation. Beginning with historical and constitutional aspects, students will analyze recent developments in state and local taxation and their impact on client representation.
221. Trusts, Wills and Decedents' Estates (3) Discussion-3 hours. Study of the law of decedent's estates, wills, and trusts.

## 222. Critical Race Theory Seminar (3)

Discussion-3 hours. Examines race relations and racial discrimination in America through the perspectives of proponents of the Critical Race Theory

Quarter Offered: I=Fall, II=Winter, III=Spring, IV=Summer; 2015-2016 offering in parentheses
Pre-Fall 2011 General Education (GE): ArtHum=Arts and Humanities; SciEng=Science and Engineering; SocSci=Social Sciences; Div=Domestic Diversity; Wrt=Writing Experience Fall 2011 and on Revised General Education (GE): AH=Arts and Humanities; SE=Science and Engineering; SS=Social Sciences;
(CRT) movement, a collection of legal scholars who challenge both conservative and liberal political orthodoxies.
222A. Latinos and Latinas and the Law (2) Seminar-2 hours. Seminar analyzes some of the legal issues of particular relevance to the Latino community in the United States, including racial identity, immigration, language regulation, national and transnational identity issues, affirmative action, and civil rights.
222T. Asian Pacific Americans and Law (3)
Discussion-3 hours. Profound impact on how American Law has shaped Asian Pacific Americans demographics, experiences, and possibilities of Asian Americans will be examined.

## 223. Estate Planning Seminar (2)

Seminar-2 hours. Prerequisite: course 221. Selected topics in the estates and trusts area. Content varies with instructor. Satisfies the advanced legal writing requirement. Limited enrollment.

## 224. Animal Law Seminar (2)

Seminar-2 hours. An introduction to legal principles affecting animals and their use. GE credit: WE.

## 225. Marital Property (2)

Discussion-2 hours. The California community property system, including the rights of marital and domestic partners during the ongoing relationship, and upon the end of the relationship by death or divorce.
226. Disability Rights (2)

Discussion-2 hours. The Americans with Disabilities Act (A.D.A.) as it applies to employment, higher education, public accommodations, and government services and programs. Emphasis on the statutory definition of disability, entities subject to the A.D.A., the "otherwise qualified" requirement, forms of discrimination, reasonable accommodation, and defenses.

## 226T. Topics in Disability Rights (2)

Seminar-20 hours. Focuses on the Americans with Disabilities Act (ADA) as it applies to employment, higher education, public accommodations, and government services and programs. (P/NP grading only.)

## 227A. Criminal Procedure (3)

Discussion-3 hours. Federal constitutional limits on government authority to gather evidence and investigate crime. Topics include Fourth Amendment limits on search, seizure, and arrest; the Fifth Amendment privilege against self-incrimination; and the Sixth Amendment right to counsel.

## 227B. Advanced Criminal Procedure (3)

 Discussion-3 hours. Examines a range of issues, including bail, charging decisions, preliminary hearings, discovery, statute of limitations, venue, joinder and severance, pleas, plea bargaining, assistance of counsel, trial, double jeopardy, sentencing, appeal and collateral remedies.
## (2)

(2)

Seminar-2 hours. Advanced criminal law and procedure class aimed at students planning to practice criminal law in California, either as an extern or summer clerk, or after graduation
228. Business Planning and Drafting (3) Discussion -3 hours; extensive writing. Prerequisite: course 215 Business Associations (this prerequisite will not be waived, so do not register for the course unless you have completed Business Associations. Limited enrollment. Introduces students to a number of legal and business considerations relevant to forming and operating an emerging growth business (such as technology startup).
228A. Mergers and Acquisitions Law (3)
Discussion-2 hours. Prerequisite: course 215. Takes a practical approach to mergers and acquisitions, with an in-depth look at the planning, negotiation and completion of mergers and acquisitions.

228B. Accounting for Lawyers (2)
Discussion-2 hours. Exposes student to basic principles of accounting, from the perspective of the practicing attorney.

## 228C. Law and Statistics (3)

Discussion-3 hours. Introduction to fundamentals of statistical analysis and how statistical analysis is used in the law and public policy. Course goal is to help students become excellent consumers of statistical information and evidence.

## 229. Scientific Evidence (3)

Discussion-3 hours. Prerequisite: course 219. In addition to examining the evidence law governing the admission of scientific testimony, this course considers trial advocacy in presenting and attacking such testimony. Limited enrollment.
230. International Environmental Law (3)

Discussion-3 hours. Prerequisite: prior course work in environmental law and/or international law is helpful. Elective Course for Environmental Law Certificate Program. May satisfy Advanced Writing Requirement with professor's permission. Provides an overview of the structure and basic principles of international environmental law and policy.
230T. Free Trade and the Environment (2)
Seminar-2 hours. Free Trade and Environ. Course Description: Examines the relationship between legal rules relating to trade and rules for the protection of the environment.

## 231. Sex Based Discrimination (3)

Discussion-3 hours. Issues raised by legal and social distinctions between men and women. Explores potential remedies for discrimination drawn from constitutional law, statutory enactments, and common law developments. Subject matter areas include sex-based discrimination in constitutional law, family law, reproductive rights, educational opportunity, criminal law, and employment.

## 231A. Sexual Orientation, Gender Identity,

 and the Law (2)Discussion-2 hours. Examines the legal and social regulation of sexual orientation and gender identity.

## 232. Real Estate Finance (2)

Discussion-2 hours. An examination of the problems involved in the acquisition, financing, and development of real estate, and of lender remedies and debtor protections in the event of debtor default. The practical application of California legal doctrines.

## 232T. Property Law \& Race (2)

Seminar-2 hours. Seminar explores the extent to which property law (common law, federal, state, and local statutes, and administration regulations) historically impacted and currently shapes conceptions of race, racial groups, and racial relations.
235. Administrative Law (3)

Discussion-3 hours. Examines how the U.S. Constitution and the federal Administrative Procedure Act constrain and regulate decision making by government agencies and officials.

## 236. Securities Regulations (3)

Discussion-3 hours. Prerequisite: course 215. Regulation of the distribution of securities under the Securities Act of 1933 and SEC Rules adopted there under, registration and reporting provisions of the 1934 Securities Exchange Act.

## 236A. Securities Regulation (2)

Discussion - 2 hours. Prerequisite: course 215 or consent of instructor. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms.

## 236B. Securities Regulation II (2)

Discussion-2 hours. Prerequisite: course 215 or consent of instructor; course 236A recommended. Securities Exchange Act of 1934 and the regulation of securities markets. Topics covered include regulation of securities markets and securities professionals, responsibilities of securities lawyers, continuous reporting, transnational securities fraud, and enforcement of the securities acts.

236S. Securities Regulations (2)
Discussion-2 hours. Focuses on the Securities Act of 1933 and the Securities Exchange Act of 1934 as they affect international transactions involving US Securities. Topics include international public offerings, registration statements, exemptions from registration, secondary offerings, market regulation, liability provisions, the definition of a security, enforcement of the securities act, responsibilities of securities lawyers and international lawyers representing clients dealing in US securities.

## 237. Legal History (2)

Discussion - 2 hours. Course traces the development of the common law from its origins in medieval England through the twentieth-century.
239. Mediation: Theory and Practice (3) Discussion-3 hours. Prerequisite: course 211, 297. The basic, practical knowledge necessary to begin a mediation practice. Detailed understanding of the mediation process to counsel clients knowledgeably about the mediation option and represent clients ably in mediation. Communication skills, development of the ability to analyze disputes to understand why negotiations succeed or fail, and understanding of the advantages and limitations of mediation as a method of resolving disputes. The stages of a mediation: contracting (establishing contact with the parties and explaining the process), developing the issues, working the conflict, resolving the conflict, and closure. Limited enrollment.
240. Elections and Political Campaigns (2) Discussion-2 hours. Covers selected constitutional and statutory aspects of federal and state elections, including campaign finance, initiatives, and other topical issues. Limited enrollment.

## 240A. Law of the Political Process (3)

Discussion-3 hours. Covers many of the foundational issues in the "law of democracy," as that body of statutory and constitutional law has developed in the United States.

## 241 T. Voting Rights Seminar (2)

Seminar-2 hours. Seminar addresses current issues in the protection of voting rights, particularly the voting rights of racial and ethnic minorities.

## 242. Conflict of Laws (2)

Discussion-3 hours. Study of how law operates across state and national borders. Topics include choice of applicable law in transactions involving multiple jurisdictions, recognition of judgments, and the exercise of jurisdiction.
242S. Special Session Conflict of Laws (2)
Discussion-2 hours. Study of transactions with multi-state and international contracts. Topics include jurisdiction, recognition of foreign judgments, and choice of applicable law. Addresses problems that international lawyers encounter in a wide variety of deals with the emphasis on international commercial deals
243. Commercial and Bankruptcy Law (4) Discussion-4 hours. The business debtor who doesn't have enough money (or is unwilling) to pay his debts. Remedies available to creditors to force payment, along with devices that creditors may use to give themselves priority against limited assets. Examination of the role of bankruptcy. Bankruptcy both as a means for providing funds for creditors, and as a device for maximizing asset value.
243A. Secured Transactions (3)
Discussion-3 hours. Secured transactions are transactions where a lender takes an interest in debtor's property as "collateral," or security, for repayment of a loan. Covers secured transactions in personal property such as auto and bank loans against business inventory.
245. Corporate and White Collar Crime (3) Discussion-3 hours. The law of conspiracy, corporate criminal liability, mail and wire fraud, RICO, money laundering, and other business and environmental crimes and associated defenses.

245B. Death Penalty Seminar (2)
Seminar-2 hours. Offers overview of the constitutional law governing the death penalty in the United States. Limited enrollment.

## 246. Federal Jurisdiction (3)

Discussion-3 hours. Prerequisite: course 205. A study of subject-matter jurisdiction of federal courts.

## 247. Taxation of Partnerships and LLCs (2)

Discussion-2 hours. Prerequisite: course 220.
Study of the federal income tax treatment of partnerships and partners; including entities classified as partnerships.

## 247A. International Aspects of U.S. <br> Taxation (3)

Discussion-3 hours. Prerequisite: course 220. Completion or current enrollment in a course covering the domestic taxation of corporations is suggested but not required. Corporate Tax may be taken concurrently. Examine the U.S. income tax laws and policies related to the taxation of foreign income of U.S. persons and U.S. income of foreign person.

## 247B. Corporate Tax (3)

Discussion/laboratory-2 hours. Examination of the federal income tax relationship between corporations and their owners. Covers the transfer of funds into a corporation on formation and the re-transfer of money and property from the corporation to its shareholders.

## 248. Public International Law (3)

Discussion-3 hours. Introductory course covers basic international law concepts and the law-making process.

## 248A. Jurisdiction in Cyberspace Seminar

 (2)Seminar-2 hours. Review concepts in international law, conflicts of law, cyberlaw, and federal jurisdiction to address the growing multi-jurisdictional conflicts created by the Internet. Examine European efforts at crafting intra-Europe jurisdictional rules, as well as other international jurisdiction treaty projects such as those at the Hague. Limited enrollment. GE credit: Wrt.

## 248B. International Human Rights (2)

Discussion-2 hours. Introduces international human rights legal system through an examination of its historical origins and precursors and a review of its international legal backdrop, including the character and sources of international law, the UN Charter and the UN system.

## 248BT. Human Rights in the Former Soviet Union: Legal Tools for Repression and Redress: Part II (2)

Seminar (2) hours. This course first provides a historical context for the current political and human rights situation in the Former Soviet Union. It then analyzes the legal mechanisms and other strategies that some of the Former Soviet Union's countries governments employ to repress their own citizens. Finally, the class examines the ways in which citizens use the law to seek relief from remedies for the repression of their rights.

## 248D. Globalization and the Law (3)

Discussion-3 hours. Globalization of people, finance, goods, services, and information puts pressure on the nation-state form. In a world of diasporas and multinational corporations, what does citizenship mean? $n$ the absence of a world government, can we grapple with problems that now take on a global form? We will canvass a number of different approaches, including: the technical coordination of the Basel Accord on capital adequacy; the World Trade Organization regime universalizing substantive legal standards related to intellectual property; the Internet governance regime offered by ICANN, a California not-for-profit corporation; private and state-based efforts to support global health financing; and the Kyoto Protocol's cap-and-trade system for responding to a global problem where the sources, costs and benefits are not uniformly distributed. We will also consider issues of extraterritoriality, regulatory competition, and so-called Asian Values.

248G. Legal Spanish for Lawyers (2)
Discussion-2 hours. Designed for law students who are native Spanish-speakers or who have achieved proficiency in Spanish through study or experiences in a Spanish-speaking country. The course will provide a brief review of basic Spanish and then move into more complicated grammatical structures, all within a legal context. The legal context will be the representation of Spanish-speaking clients in the following areas of law: Family Law, Public Benefits (Social Security, Medi-Cal, etc.), Immigration, Employment, Torts, Civil Rights and Criminal Defense. Students will be encouraged to develop the vocabulary they will need for their own areas of interest/specialization (if known).Students will discuss issues of cultural and linguistic competency in serving Spanish-speaking clients. The course will include a unit on legal ethics surrounding translation, interpretation and communication with clients. It is vital that attorneys know when to call on a professional interpreter or translator. We will also discuss the ethics rules for attorneys surrounding legal translation and interpretation.

## 248T. Advanced International Law (3)

Discussion-3 hour. Prerequisite: basic course in international law or consent of instructor. Review books of international law; Hugo Grotius and Judge Rosalyn Higgins. Themes include peaceful resolutions of dispute, law of war and peace, and international legal process. GE credit: WE

## 248TC. International Economics Law (3)

Discussion-3 hours. This course will examine the architecture of the international economic system, with a focus on both trade and investment.
248TT. Theories of International Law (2)
Discussion-2 hours. International law, once critiqued as powerless and ineffective, is now challenged as a threat to American democracy. Introduction to competing theories of international law, including natural law, positivism, realism, liberalism, constructivism, fairness, legal process, and world public order.

## 249. Comparative Law (3)

Discussion-3 hours. The uses of comparative method, principal differences between common law and civil law and the styles of legal reasoning that prevail in these two great legal cultures. Topics include the evolution of the civil law, the phenomenon of codification, the structure of European civil codes and the interpretation of their provisions, the respective roles of counsel, judges and law teachers, civil law procedure, and the analysis of selected areas of substantive law. Knowledge of a foreign language is not required.
249S. Special Session Comparative Law (1) Discussion-1 hour. This course will provide a comparative perspective for students of American law. After an initial look at the uses of the comparative method, discussions will be centered around the main differences between common law and civil law and the different styles of legal thinking. Topics to be covered will be the evolution of the civil law and the idea of codification, the structure of European civil codes and the interpretation of their provisions, the personnel of the law and procedure in civil law countries, and the analysis of selected problems of substantive law. Knowledge of a foreign language will not be required.

## 250. Jurisprudence Seminar (2)

Seminar-2 hours. Deals principally with the question of how judges should decide "hard cases," where the content of the law is in doubt and competent arguments have or could be offered for mutually inconsistent decisions in favor of either party. Limited enrollment.

## 250AT. Legal Theory Workshop (2)

Seminar-3 hours. Introduction to cutting edge research by legal academics and professors in affiliated disciplines.

250BT. Writing Requirement Workshop (2)
Seminar-2 hours. Students who have written a course paper or an independent study paper and would like to take papers to the next level, producing a work of publishable quality. ( $S / U$ grading only.) GE credit: WE.
250T. Asian American Jurisprudence (3)
Discussion-3 hours. Legal, social, and political discourse on race relations has traditionally been framed in Black-White terms. This course disrupts the traditional view by taking Asian Americans seriously.

## 25 1. Labor Law (2)

Discussion-2 hours. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law. Historical development of labor law, the scope of national legislation, union organization and recognition, the legality of strikes, picketing, and the negotiation of collective bargaining agreements.

## 251 T. Labor Law I (2)

Discussion - 2 hours. Restricted to students who previously took Labor Law in Fall 2008 may not enroll in Labor Law I. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law.
25 1TB. Labor Law II (2)
Discussion-2 hours. Prerequisite: course 251 T preferred; not required. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law.

## 252. International Litigation and

## Arbitration (3)

Discussion-3 hours. Current developments in international law, conflict of laws, civil procedure, arbitration, and comparative law in the context of transactions and disputes that cut across national boundaries.

## 254. Housing Law (2)

Discussion-2 hours. Survey course covers legal and policy issues related to developing, protecting and preserving affordable, safe and accessible housing and sustaining viable, diverse communities.
254A. Law and Rural Livelihoods Seminar (2)

Seminar-2 hours. Provides broad overview of law as it relates and applies to rural people and places.

## 254T. Practicum in Rural Community

Advocacy (3)
Seminar-3 hours. Provides an opportunity to learn about Participatory Action Research (PAR) methods and community-based lawyering in the context of rural community development and advocacy. Using these skills and knowledge to serve rural California communities.
255. Pension and Employee Benefit Law (3)

Discussion-3 hours. Prerequisite: course 220. The federal regulation and taxation of private pensions and employee benefits. The Employee Retirement Income Security Act (ERISA), including such topics as coverage, forfeitures, spousal rights, creditor access, fiduciary duties, preemption of state law, remedies, and other litigation issues. Internal Revenue Code issues such as discrimination in favor of the highly compensated, limitations on contributions and benefits, rollovers, IRAs, early distribution penalties, and minimum distribution rules.

## 256. Land Use (2)

Discussion -2 hours. Local agencies, developers, environmental interest groups, and others who regularly deal with the administrative and legislative applications of land use planning and development laws. Topics include zoning, general plans, local government land use regulation, and related areas of litigation. The expanding role of the California Environmental Quality Act.

## 257. Legislative Process (2)

Discussion-2 hours. Fundamental elements of the legislative process, including legislative procedure; the legislature as an institution; lobbying; statutory interpretation, legislative-executive relations; and the legislature's constitutional powers and limitations.

257A. Legislative Intent Seminar (2)
Seminar-2 hours. Theories and principles of statutory and constitutional interpretation. Original intent vs. living constitution; permissible kinds of evidence for determining legislative intent; canons of construction; extent to which initiatives should be interpreted similarly to legislative enactments.
257B. Statutory Interpretation (3)
Discussion-3 hours. Elective course for Environmen tal Law Certificate Program. Provides an introduction to the theory and practice of statutory interpretation.

## 258. Professional Responsibility (2)

Discussion-2 hours. The American Bar Association's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the Multistate Professional Responsibility Examination, and the California Rules of Professional Conduct, which are tested on the California Bar Examination. Issues affecting the legal profession, including lawyers' ethical duties and responsibilities to clients, the courts, third parties, and the legal system.
258A. Legal Ethics and Corporate Practice (3)

Discussion - 3 hours. Focus on corporate practice to explore the ethical responsibilities of lawyers.

## 258BT. Mindfulness and Professional

 Identity (3)Seminar-3 hours. Introduction to the practice of mediation and connect it with readings about the legal profession.

## 259. Feminist Legal Theory (2)

Discussion-2 hours. Provides an overview of feminist legal theory and considers how its various strands inform legislative and judicial law making. Satisfies Advanced Writing Requirement.
259A. Women, Islam and the Law (2) Seminar-2 hours. This course will study legal and religious reform movements for women's rights within Muslim communities in the context of current scholarly and political debates about fundamentalism, democracy, equality, secularism, universalism, and multiculturalism. This is a limited enrollment seminar.
259P. Women and the Law Practicum (1)
Discussion/lecture. Prerequisite: prior or concurrent enrollment in course 259. Complements the content of the feminist legal theory course by providing students the opportunity to consider how feminist theory may be used to inform law-making.

## 260. Employment Discrimination (3)

Discussion-3 hours. Examine federal laws prohibiting employment discrimination, including Title VII of the Civil Rights Act of 1964, the Equal Pay Act, the Age Discrimination in Employment Act, the Americans with Disabilities Act, the Rehabilitation Act of 1973, and § 1981.

## 260AT. Employment Law (2)

Discussion-2 hours. Provides an overview of employment law, labor law and employment discrimination law and aims to serve as a foundation for understanding the law and policy (statutory and common law) that surround the employer-employee relationship.

## 261. Judicial Process (2)

Discussion-2 hours. Examines a variety of issues concerning the judicial process. Focus is on judge's role in the legal process, the administration of justice, ethical issues, decision making, bias, and critical examination of the strengths and weaknesses in our current judicial system.

## 262. Antitrust (3)

Discussion-3 hours. Focus of the course is the federal antitrust laws, concentrating on basic substantive areas of the Sherman and Clayton Acts.

## 262S. Special Session Antitrust (1)

Discussion - 1 hour. A study of the federal antitrust laws including price fixing, limits on distribution, tying arrangements, monopolization and mergers.

262T. Regulated Industries (2)
Discussion-2 hours. Examines regulation of business in sectors, traditionally described as "common carrier" and "utility" industries, where because of market failures normal competitive mechanism will not protect consumers from exercises of market power.

## 263A. Trial Practice I (3)

Discussion-2 hours; laboratory-1 hour. Prerequisite: course 219, may be taken concurrently. Introduction to the preparation and trial of cases, featuring lectures, videotapes, demonstrations, assigned readings and forensic drills. Laboratory held on Tuesday, Wednesday, and Thursday evening. Limited enrollment.

## 264. Water Law (2)

Discussion-2 hours. Property rights in surface waters, including riparian rights, prior appropriation, and public rights use of water bodies; environmental constraints on exercise of water rights; groundwater rights and management; federal allocation and control of water resources; legal aspects of interstate allocation.
264A. Ocean and Coastal Law (2)
Discussion - 2 hours. Introduction to the goals and challenges of coastal and ocean policy; the complicated web of public and private interests in coastal lands and ocean waters; regulation of coastal development; domestic and international fisheries management; and preservation of ocean resources.
265. Natural Resources Law Seminar (2) Seminar-2 hours. Topic varies each year. This year, we will take a close look at the challenges of managing the Sacramento-San Joaquin Delta, which is both the most important estuary on the west coast and the hub of California's water delivery system. Limited enrollment.
266A. Cyberlaw (2)
Discussion-2 hours. Emerging legal issues crucial to the conduct of business in cyberspace. Discussion of the evolution and current administration of the Internet and the World Wide Web.

## 267. Civil Rights Law (3)

Discussion-4 hours. Civil remedies for civil rights violations under the primary United States civil rights statute. Specifically, covers actions for constitutional and statutory violations under 42 USC §1983, affirmative defenses, and abstention doctrines.

## 267B. Civil Rights Seminar (2)

Seminar-2 hours. The social, political, legal and historical factors which led to the creation of the United States Commission on Civil Rights (USCCR) in 1957. The United States Commission on Civil Rights is a bipartisan, independent agency established by the Civil Rights Act. It is directed to investigate complaints alleging deprivations of the right to vote, and voter fraud; to study and collect information relating to discrimination and the denial of equal protection of the laws under the Constitution on the basis of race, color, religion, sex, age, disability, or national origin; and submit reports, findings and recommendations to the President and to Congress. The role that the USCCR has played and continues to play in American politics, legislative enactments and the national dialogue on equality, fairness and justice in the context of civil and human rights. Satisfies Advanced Legal Writing Requirement. Limited enrollment.

## 269. Basic Finance for Lawyers (2)

Discussion-2 hours. Prerequisite: students with a non-law basic finance course will not be admitted, except with consent of instructor. Basic techniques of analysis that are part of the core curriculum in a good business school. Gives background necessary for understanding and advising your clients and for understanding other business-related law school courses.

## 269A. Basic Finance (3)

Discussion-3 hours. Students with a non-law basic finance course must have instructor's permission. Basic techniques of analysis that are part of the core curriculum in a good business school are studied.

Purpose is to give you background necessary for understanding and advising clients and for understanding other business-related law courses.

## 269AT. The Financial Crisis: Law \& Policy and Inequality (2)

Seminar-2 hours. Examines the regulation of financial intermediaries. The stated goal of regulation is to ensure systemic stability and to pursue consumer protection. We will ask whether there is an imbalance between systematic stability and consumer protection before the crisis of 2008.

## 269C. Corporate Finance (3)

Discussion-3 hours. Prerequisite: course 215 or concurrent enrollment recommended. Focus on how corporations raise money, stocks and bonds, etc.; how deals are structured and why corporations use one strategy instead of another.
269D. Seminar on Financial Regulation (2) Seminar-2 hours. Introduction to the legal and regulatory issues presented by contemporary capital markets.
270. International Business Transactions (2) Discussion -2 hours. Select legal problems arising from international business transactions. Topics include the international sales contract, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, reparriation of profits, and foreign exchange problems.

## 270S. Special Session International

## Business Transactions (2)

Discussion-2 hours. A consideration of select legal problems arising from international business transactions. Topics include the international sales contract, letters of credit, transfers of technology, regulation of bribery, repatriation of profits, and national efforts to control imports.
270T. Life-Cycle Business Transactions (3)
Discussion-3 hours. Prerequisite: Business Associations and/or Trusts, Wills \& Estates are recommended for enhanced comprehension. Class focuses on analysis of contract drafting design for various types of transactions and actual transactional documents typically encountered.

## 271. Nonprofit Organizations and Drafting

 (3)Discussion-4 hours. Prerequisite: course 215 or consent of instructor. Legal rules and concepts applicable to nonprofit organizations.
271A. Nonprofit Organizations: State and Local Governance Issues (2)
Discussion-2 hours. Prerequisite: course 215 (may be taken concurrently) or consent of instructor. State and local laws applicable to nonprofit organizations, i.e., public interest, cultural, religious, educational, and other not-for-profit entities. Federal tax exemptions of nonprofits, state and local laws impacting nonprofits with respect to incorporation or charitable trust formation, operation and governance, dissolution, fiduciary obligations of trustees and officers and directors, management and investment obligations vis-à-vis trust assets, cy pres, rights of members of social clubs, trade associations and labor unions, enforcement of obligations and rights by the attorney general and others, and regulation of charitable solicitation. Topics may include local property tax and other tax exemptions, nonprofit accounting issues public/private partnerships and Federal antitrust and constitutional constraints.

## 271 B. Nonprofit Organizations: Tax Exemptions and Taxation Focus (2)

 Discussion-2 hours. Prerequisite: course 215 or consent of instructor; course 220 recommended. Conceptual basis and substantive law criteria for the federal and state income tax exemption of nonprofit organizations and those particular circumstances and activities which will result in income taxation or financial sanction, including qualifications for exempt status, the nondistribution constraint, the inurement and private benefit concepts, limitations on campaign activities, permissible lobbying expenditures, the unrelated business income tax, the deduction for charitable contributions, intermediatesanctions, the differences between private foundations and public charities, special excise taxes, the exemption application process and reporting and disclosure requirements. Topics may include nonprofit accounting issues, local property tax and other local tax exemptions, and public/private partnerships.

## 27 1T. Nonprofit Organizations-Key Legal

 Topics (2)Discussion-2 hours. Legal issues raised in operating and governing a nonprofit organization, primarily a public charity.

## 272. Family Law (3)

Discussion-3 hours. An introduction to the legal regulation of the family.

## 274. Intellectual Property (3)

Discussion - 3 hours. Provides a broad survey of intellectual property law.
274A. International Intellectual Property and Development (2)
Discussion-2 hours. In September 2007, the World Intellectual Property Organization adopted a development agenda that would rewrite that body's mandate, placing the concerns of the poor at the center of international intellectual property law and policy.

## 274AS. Summer Session Intellectual

 Property (2)Discussion - 2 hours This course provides a broad survey of the field of intellectual property. Areas covered will include trademarks, patents, trade secrets, idea protection, unfair competition, and copyright.
274BT. Law of Trade Secrets and Restrictive Covenants (2)
Discussion-2 hours. Focus is on the law of trade secrets, including the Uniform Trade Secret Act (UTSA), restrictive covenants not to compete, and current case law developments in the areas of employee mobility and raids, and corporate espionage.

## 274CT. Knowledge Commons,

Collaborative Authorship, Open Access (2)
Seminar-2 hours. Focuses on the increasingly global diffusion and success of collaborative forms of cultural and technoscientific production rooted in copyright-based licenses.

## 274D. Intellectual Property in Historical

 Context Seminar (2)Seminar-2 hours. How the legal system has adapted to earlier periods of rapid change by creating, delimiting, and expanding intellectual property rights (IPRs). Required paper satisfies advanced writing requirement.

## 274T. Theory and History of Intellectual Property (2)

Seminar-2 hours. Seminar traces development of intellectual property law in the U.S. and Europe because it is not possible to understand the logic and shape of current Intellectual Property concepts outside of their messy history.

## 275. Complex Litigation (2)

Discussion - 2 hours. Issues that frequently arise in large complex litigation involving multiple parties and multiple claims.

## 275TA. Intellectual Property Agreement Drafting for Biotech \& Pharma

Seminar-2 hours. Prerequisite: upper-division Business Law course or Intellectual Property course; priority given to students that have completed course 274. Covers the negotiation and drafting of intellectual property agreements common in the biotechnology and pharmaceutical arena.

## 276. Juvenile Justice Seminar (2)

Seminar-2 hours. Legal and philosophical bases of a separate juvenile justice process for crimes committed by minors; police investigation, apprehension, and diversion; probation intake and detention; juvenile court hearing and disposition; juvenile corrections. The role of counsel at each phase of the process is examined.
277. Native American Law (3)

Discussion-3 hours. Seminar focuses on legal relations between Native American tribes and the federal and state governments.

## 277T. Indian Gaming Law Seminar (2)

Seminar-2 hours. Examines unique historical, political and legal context in which Indian tribes operate casinos, including impacts on tribal sovereignty, relations between tribes, states and local governments and changing relationships among the tribes themselves members, with particular reference to experience of California.

## 278. Pretrial Skills (2)

Discussion - 2 hours. This course uses role-playing exercises, videotaped simulations, and related projects to introduce students to lawyering skills basic to the practice of law, including client interviewing, witness interviewing and discovery, including depositions. Limited enrollment.

## 279. Public Sector Labor Law (2)

Seminar-2 hours. Prerequisite: course 251 or consent of instructor. Application of private sector labor law doctrines to the public sector. Emphasis on the four California public sector statutes and the impact of constitutional law on public employees. Class presentation and seminar paper required. Satisfies advanced writing requirement. Limited enrollment.
280. Advanced Legal Writing: Analytical \& Persuasive Writing (2)
Seminar-2 hours. Prerequisite: consent of instructor. Develop essay writing skills and performance test drafting typically employed on the bar examination. (S/U grading only.)

## 280AT. Legal Analysis (2)

Discussion-2 hours. Selected enrollment by permission of professor; 2L's only. Focuses on skills critical to law school success, and ultimately, bar exam success. (S/U grading only.)

## 280BT. Problem Solving and Analysis (2)

Discussion-2 hours. Prerequisite: consent of instructor. Restricted to third-year Law students only. Skills focused on the development of legal analytical and organizational methods essential to successful completion of the Performance Test component of the California Bar Exam (and other states), and, by extension, to success in the practice of law. (S/U grading only.)

## 281 . Local Government Law (2)

Discussion-2 hours. Local Government Law explores the structure of state and local government through the lens of the virtues and flaws of the ideas of Madison and DeToqueville, i.e., centralized federal government vs. decentralized local government.

## 282. Energy Law Seminar (2)

Seminar-2 hours. The history, law, and public policy of energy regulation in the United States with an emphasis on economic and environmental regulation. Competitive restructuring of the natural gas and electric utility industries emphasized. The basic regulatory schemes for other energy sources such as hydroelectric power, coal, oil, and nuclear power explored. Recommended to anyone who has an interest in the energy sector, various models of economic regulation, or regulated industries.
282AT. Renewable Energy Seminar (2) Seminar-2 hours. Seminar will provide a broad overview of renewable energy law and policy with a particular focus on the California policy and institutional context.

## 283. Remedies (3)

Discussion-2 hours. Survey of modern American civil remedies law in both private and public law contexts. Topics addressed include equitable remedies, equitable defenses, contempt power, injunctive relief, restitution, and money damages in torts and contracts.

## 284. Law and Economics (4)

Discussion - 4 hours. Prior study of economics is not required. Introduces students to the economic analysis of law.
285. Environmental Law (4)

Discussion-4 hours. Introduction to environmental law focusing primarily on federal law.
285A. California Environmental Issues (2) Discussion-2 hours. The "Nation-state" of California has for many years been a national and global leader in environmental law and policy. Survey of key California environmental law and policy issues.

## 285B. Environmental Practice (3)

Discussion-3 hours. Prerequisite: course 285 recommended. Examines underlying theory and practice in securing compliance with our major environmental laws.

## 285BT. Food Justice (2)

Seminar-2 hours. Focus on the law and policy of the emerging "food justice movement," which combines the goals and principles of the environmental justice movement with some of the policy initiatives involved in "ethical consumption" and "sustainable agriculture" movements.
285C. Agricultural Law and Policy (3)
Discussion-3 hours. An introduction to agricultural law, focusing on legal principles and issues at the forefront of contemporary debates about agriculture in society.
285D. Farmworkers and the Law (2)
Discussion - 2 hours. Provides an overview of California and federal laws impacting farmworkers and how such laws have been applied to regulate working conditions in agriculture.
285E. Climate Change Law and Policy (3) Discussion -3 hours. Addresses the legal and public policy dimensions of climate change, perhaps the most important environmental issue of our time.
285F. Environmental Justice (2)
Discussion - 3 hours. Introduction to the field of environmental justice.

## 285T. Wine and the Law (2)

Seminar-2 hours. Surveys the legal landscape of this multi-billion dollar industry, focusing on contemporary debates and developments in judicial, legislative, and administrative arenas.

## 285TA. Environmental Law Seminar:

 Emerging Technologies and the
## Environment (2)

Seminar-2 hours. Examines legal regimes that might apply to various emerging technologies and consider governance mechanisms and reforms that might enable more foresighted and participatory development and management of technology.

## 286. Health Care Law (3)

Discussion-3 hours. Addresses legal issues raised in general areas: access to health care and health care financing. Course materials and discussion focus on both public and private aspects of these issue areas. GE credit: WE.
286A. Topical Issues in Health Law (2)
Seminar-2 hours. The course focuses on four-six issues at the interface of law, medicine, bioethics, and health policy that are currently the subject of major litigation, legislation, and/or contentious debate in the domains of bioethics and public policy. Limited enrollment.
286B. Public Health Law (2)
Discussion -2 hours. Restricted to 15 students. Public health law, seen broadly, is the government's power and responsibility to ensure the conditions for the population's health.
286C. Bioethics (3)
Discussion-3 hours. Course examines the ethical and legal issues that arise from biomedical research and use of medical technologies. Limited enrollment. GE credit: Wrt.
286D. Legal Psychology Seminar (2)
Seminar-2 hours. Examines how psychological theory and research can be used to shape laws and policies to make them better reflect what we know empirically about how individuals process information, make decisions and behave.

## 286E. Reproductive Rights, Law, and Policy

 (2)Seminar-2 hours. Addresses a variety of laws and practices that affect reproductive health and procreative decision making. Limited enrollment.
287. Public Land Law (3)

Discussion-3 hours. Legal aspects of federal land management, including the history of public land law, authority over federal lands and specialized law dealing with particular natural resources and uses found on federal lands (minerals, timber, range, wildlife, recreation and preservation).

## 287A. Public Benefits Law (2)

Seminar-2 hours. Will explore the theory and practice of law pertaining to the enactment and administration of public benefits programs for poor and other disadvantaged persons in our society. Limited enrollment.

## 287T. Law and Society Seminar (2)

Seminar-2 hours. Study of law and society challenges traditional legal scholarship by exploring multiple ways in which law both shapes and is shaped by societies and social interactions. Seminar will introduce students to important literature and debates in the field. Limited enrollment.
288. Advanced Constitutional Law Seminar (2)

Seminar-2 hours. Prerequisite: Prior or concurrent enrollment in course 218 or 218 A . Explores in-depth selected topics or problems in constitutional law and theory. Current focus is on the interpretation and application of the religion clauses of the First Amendment. Limited enrollment.

## 288B. Supreme Court Simulation Seminar

 (2)Seminar-2 hours. Consideration in depth of approximately nine cases involving constitutional law that will be decided during the present term of the U.S. Supreme Court. Limited enrollment.
289A. Biotechnology Law and Policy (2) Seminar-2 hours. Coverage includes the regulation of biotechnology research, including restrictions on cloning and fetal stem cell research; regulation of the products of biotechnology to protect human health or the environment, including restrictions on use or distribution of genetically modified organisms; the availability and scope of intellectual property protection for biotechnology products, including genes and engineered organisms; and the international law governing access to the natural resources that provide the starting materials for biotechnology and trade in bioengineered organisms or their products. Limited enrollment.

## 2901. International Trade Law (4)

Discussion-4 hours. Review existing landscape of trade regulation from the World Trade Organizations, to regional organizations such as NAFTA,
ASEAN, and the European Union.

## 291 A. International Finance (3)

Discussion-3 hours. How a framework of national and international laws and institutions regulates and fails to regulate the flow of money around the world.

## 291B. International Investment Dispute

## Seminar (2)

Seminar-2 hours. This seminar will examine the law of investor-State dispute resolution.
292. Immigration Law and Procedure (3) Discussion - 3 hours. Surveys the history of U.S. immigration law and policy.
292T. Advanced Topics in Immigration and Citizenship Law Seminar (2)
Seminar-2 hours. Conducts a closer examination of various topics and subject matters that relate to immigration and citizenship law.

## 293. Public Interest Law Seminar (2)

Seminar-2 hours. This class will examine the issues and problems associated with providing civil legal services to persons and interests in American society that typically have been unable to afford or otherwise obtain representation from the private bar.

## 293AT. Contemporary Issues in Economic

 Justice (2)Discussion-2 hours. Provides an introduction to the social justice critique of free markets.
293T. Public Interest Lawyering, Civil Rights and Employment Law (2)
Seminar-2 hours. Prerequisite: course 260; 260AT. Advanced course covers employment law issues through the lens of public interest lawyers and their constituencies.
294A. Law and Popular Culture (2)
Seminar-2 hours. This course examines works of popular culture, films, and legal texts. Each session will focus on a particular film and its cultural implications, particular problem or problems of law, law practice, legal ethics, traditional ethics, or public policy.-I. (1.)
295A. Trademark and Unfair Competition Law (2)
Discussion-2 hours. Prerequisite: course 274 recommended. We will take an intensive look at selected issues in Trademark Law, including the concepts of trademarks and unfair competition, acquisition and loss of trademark rights, infringement, trademarks as speech, and international aspects of trademark protection.
295T. Brands and Trademarks (2)
Seminar-2 hours. Explores the challenges brands pose to traditional trademark law. Taking a close, interdisciplinary look at branding: from the business schools' theories of brand management to semiotic analyses of brand meaning to art criticism of brand advertisements.

## 296. Copyright (3)

Discussion-3 hours. Thorough examination of the law of copyright, including its application to literature, music, films, television, art, computer programs, and the Internet. Issues addressed include copyright protection, the copyright owner's rights, the term of protection, copyright ownership and transfer,
infringement, and defenses to infringement.
296T. Entertainment Law (2)
Discussion-2 hours. Explores the many facets of Entertainment Law.

## 297. Alternative Dispute Resolution (3)

Discussion - 3 hours. Introduces students to a wide variety of alternative dispute resolution procedures, with an emphasis on negotiation, mediation and arbitration. Limited enrollment.
297 AT. Commercial Arbitration Seminar (2) Seminar-2 hours. Trace the development of commercial arbitration law, with a special emphasis on hot-button contemporary issues like consumer and employment arbitration, the separability doctrine, preemption of state law, and the arbitrability of statutory claims.

## 298. Sociology of the Legal Profession

 Seminar (2)Seminar-2 hours. Comprehensive look at the organization, operation, and ideology of the legal profession. Limited enrollment.

## Professional

400A. Study Abroad-University College Dublin, Ireland (12)
Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester away study abroad at the University College Dublin, Ireland. Enhance knowledge of international legal regimes and obtain a global legal educational experience. ( $\mathrm{S} / \mathrm{U}$ grading only.)
400B. Study Abroad-University of Cophengen, Denmark (12)
Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester study abroad at the University of Copenhagen, Denmark. Enhance knowledge of international legal regimes and obtain a global legal educational experience. ( $\mathrm{S} / \mathrm{U}$ grading only.)

400C. Study Abroad-China University of Political Science and Law (12)
Independent study. Students must apply and be accepted into the International Study Abroad Program. Semester-away study abroad at the China University of Political Science and Law. Enhance knowledge of international legal regimes and obtain a global legal educational experience.

## 400D. Study Abroad-University of

 Lausanne, Switzerland (12)Independent study. Student must apply and be accepted in the International Study Abroad Program. Semester-away study abroad at the University of Lausanne, Switzerland. Enhance knowledge of international legal regimes and obtain a global legal educational experience. ( $S / U$ grading only)
400S. Critical Topics in Environmental Law in a Comparative Perspective (2)
Seminar-2 hours. Enrollment by application only. Intensive, two-week program provides an opportunity for U.S. and international law students to study environmental law by examining and comparing European Union and U.S. environmental law policies and regulatory regimes. ( $S / U$ grading only)
408. Community Education Seminar (3) Seminar/clinic - 3 hours. Trains students to educate the community about basic legal rights and responsibilities. Students attend an initial four-hour orientation, followed by weekly seminars that will prepare students to teach in a local high school at least two times per week. Paper or journal required, to be determined by instructor. Limited enrollment. (S/U grading only.)
408A. Educational Policy and the Law Seminar (2)
Seminar-2 hours. Prerequisite: course 235 recommended. Examines the interaction between policy and the law of various educational themes such as the "right" to an education, financial equalization, merit and testing, privatization of education, and educational access. Limited enrollment.

## 409. Environmental Law Moot Court

Competition (1)
During the first eight weeks of fall semester, students research and submit briefs as appellants, respondents, or third parties on a problem of environmental law that is prepared by the National Environmental Law Moot Court Board. Students attend four to six classes (including guest lectures) on aspects of appellate advocacy, legal writing, and environmental law. Members of the spring environmental law moot court team will be selected on the basis of performance in class. ( $S / \cup$ grading only.)
410A. Appellate Advocacy I (2)
Discussion/laboratory. Basic appellate practice and procedure. Beginning instruction in oral advocacy skills and an opportunity to practice these skills in front of a moot court. Limited enrollment. (S/U grading only.)

## 4 10B. Appellate Advocacy II (Moot Court)

 (2)Practice-2 hours. Continuation of course 410A. Focuses on the development of effective appellate brief writing skills and the refinement of oral advocacy skills. Limited enrollment. ( $S / U$ grading only.)

## 411 . Journal of International Law and

 Policy (1-2)The Journal is a biannual journal produced by King Hall students with an interest in international law. The editor-in-chief of the journal receives two units of credit each semester. The managing editor receives one unit of credit each semester. (S/U grading only.)

## 411 A. International Law Journal (1-2)

The Editor in Chief of the Journal of International Law and Immigration receives two credits for each semester of service. Only one person may receive this credit in any one semester as editor in chief. Managing and executive editors receive one unit. ( $S / U$ grading only.)

411 B. Journal of Juvenile Law and Policy (1-2)
A biannual publication of the UC Davis School of Law that addresses the unique concerns of children in the American legal system. The editor-in-chief of the journal receives two credits each semester. Managing editors receive two credit each semester. (S/U grading only.)
411 C . UC Davis Business Law Journal (1-2)
Run by dedicated law students who are committed to providing current and valuable legal and business analysis. The Journal addresses a broad spectrum of issues that fall within the intersection of business and the law. May be repeated two times for credit. (S/U grading only.)

## 412. Carr Intraschool Trial Advocacy <br> Competition (1)

Competition - 1 hour. Named after the late Justice Frances Carr, this competition is open to secondand third-year students. A preliminary round is followed by quarter-finals, semi-finals, and a final round. Students participate in mock trials presided over by judges and critiqued by experienced litigators. Limited enrollment. ( $S / \mathrm{U}$ grading only.)

## 413. Interschool Competition (1-3)

Prerequisite: consent of appropriate faculty adviser. Participation in interschool moot court and lawyering skills competitions. Enrollment is limited to students actually representing the School in the interschool competitions. Competition must be authorized by the appropriate faculty adviser. The faculty adviser may condition the award of academic credit for any particular competition on the performance of such additional work as may be reasonable to justify the credit. May satisfy advanced legal writing requirement. (S/U grading only.)

## 414. Moot Court Board (1)

Prerequisite: courses 410A-410B. Members of Moot Court Board may receive one credit for each semester of service on the board, up to maximum of two. Credit awarded only after certification by Moot
Court Board and approval of the faculty advisers to Moot Court Board. Limited enrollment. (S/U grading only.)

## 414A. Negotiations Board (1)

Variable-1 hour. Prerequisite: consent of instructor. Members of the King Hall Negotiations Board assist in the administration of the King Hall Negotiation Team by performing a variety of tasks under the supervision of the course instructor. One unit of credit for each semester of service on the board, up to a maximum of two units per academic year. Credit is awarded only after approval by the instructor. (P/NP grading only.)

## 415. Trial Practice Honors Board (1)

Members of the Trial Practice Honors Board administer the Frances Carr competition. Members are nominated by their individual Trial Practice I adjuncts. Students receive one credit for serving on the Board, awarded upon approval of the faculty adviser. (S/U' grading only.)

## 416. Law Review Writer (1-3)

The writing of a law review article under the editorial supervision of editors of the UC Davis Law Review. Office hours (including but not limited to Bluebooking and cite-checking) are required. 1 or 2 units, maximum 3 total units. In the spring semester, credit is obtained only upon achieving status as a member of the UC Davis Law Review, which requires that the student has made substantial progress towards completing an editorship article. Credit is awarded only after certification by the editor in chief and approval of the faculty advisors. One unit of credit is earned the first semester. Two units are earned the second semester upon nomination and acceptance of nomination to the Editorial Board. One unit is earned second semester if only a membership draft and office hours are completed. May be repeated for credit. (S/U grading only.)

## 417. Law Review Editor (1-2)

Editors must have completed an editorship article and must perform editorial duties requiring a substantial time commitment. Credit awarded only after
certification by the editor-in-chief of the Law Review and approval of the faculty advisers to the Law Review. Students may receive four credits over two semesters for service as an editor. Deferred grading pending only, pending completion of sequence.)
418. Environmental Law and Policy Journal (1-2)
Independent study. Each year nearly 100 King Hall students work together to publish Environs. Getting involved with the journal will provide you with the chance to develop essential skills that will benefit you throughout school and career. ( $S / U$ grading only.)

## 419. Advanced Writing Project (1-4)

The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. ( $S / U$ grading only.)
419A. Advanced Writing Project (1-4)
The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. ( $S / U$ grading only.)
419S. Special Session Advanced Writing
Project (1-4)
The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. ( $S / \mathrm{U}$ grading only.)

## 420. Civil Rights Clinic (2-6)

Clinical activity. Prerequisite: prior or concurrent enrollment in course 219; priority given to students enrolled in or have taken course 267. Clinic provides practical experience in providing legal services to indigent clients who have filed civil rights actions in state and federal trial and appellate courts. Students work on clinic cases under the supervision of the clinic director. Limited enrollment. May be repeated for credit. (S/U grading only.)
425. Judicial Clinical ( 2 to 6 or 12)

Clinical program. Prerequisite: course 261 required for full-time clinical students and recommended for part-time clinical students. Students may arrange judicial clerkship clinical programs with an approved list of state and federal judges through the

Clinical office and under the sponsorship of the faculty member in charge. All students must complete weekly time records and bi-weekly journals. Full-time clinical students must complete an evaluative final paper of approximately 10 pages. ( $S / U$ grading only.)

## 430. Federal and State Taxation Externship

 (2-6)Clinical activity $-2-12$ hours. Prerequisite: course 220. Students will have the opportunity to work with the Internal Revenue Service or other governmental tax agency. Journals and attendance at group meetings are required. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## 435. Family Protection Clinic (4)

Clinical activity. Prerequisite: course 219 (may be taken concurrently). Representation of low-income persons in family law and related matters arising out of situations involving family violence. Students are supervised by the staff attorney at the clinic's office located in Woodland at the Sexual Assault and Domestic Violence Center of Yolo County. (S/U grading only.)
440A. Immigration Law Clinic (4)
Clinical Activity-8 hours. Prerequisite: Prior or concurrent enrollment in course 292. Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. ( $S / U$ grading only; deferred grading only, pending completion of sequence.)
440B. Immigration Law Clinic (4)
Clinical Activity-8 hours. Prerequisite: Prior or concurrent enrollment in course 292. Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. (S/U grading only; deferred grading only, pending completion of sequence.)

## 445. Legislative Process Externship (2-5)

 Clinical activity. Prerequisite: course 240 (may be taken concurrently) or consent of instructor. Practical experience in the operation of the office of a legislator or a legislative committee. The major thrust of the program is to enable students to become familiar with the give and take realities of making laws, as contracted with their interpretation and enforcement. Journals are required. (S/U grading only.)
## 450. Environmental Law Externship (2-6)

 Clinical activity-2-6 hours. Prerequisite: course 285 or consent of instructor. Practical experience in environmental law. Students will work in an approved government, non-profit or private law office engaged in some form of environmental law work for a minimum of 8 hours per week. Students must prepare a journal describing and reflecting upon their clinical experience, and meet periodically with the instructor.
## 455. Employment Relations Externship (2-

 6)Clinical activity. Prerequisite: course 251 or 260 (may be taken concurrently). Practical experience in employment relations, including employment discrimination and public sector labor law. Work under the direct supervision of a government lawyer. Opportunity to participate in a range of with emphasis on observation and participation in actual investigation, interviewing, drafting pleadings, and attendance at hearings. ( $S / U$ grading only.)

## 460. Public Interest Law Clinical (2-6)

Clinical activity. Prerequisite: prior or concurrent enrollment in course 293 recommended. Students work with a public interest practitioner in a nonprofit organization. Journals and attendance at two group meetings are required. Clinical students must complete an evaluative final paper of approximately 8 pages. Hours completed in public interest setting
may be applied toward the practicum requirement for the Public Interest Law Program. (S/U grading only.)
465. Intellectual Property Externship (2-6) Clinical activity. Prerequisite: course 293 and Comparative Public Services recommended. Opportunity to work for government, academic, and nonprofit entities. ( $S / U$ grading only.)

## 470. Administration of Criminal Justice

 Externship (2-6 or 12)Clinical activity-2-12 hours. Prerequisite: Completion of, or concurrent enrollment, in courses 219 and 227; course 263A recommended. Gain practical experience working full or part time in a District Attorney's or Public Defender's office in one of several surrounding counties or in a federal Public Defender or U.S. Attorney's office. Students participate in the many activities associated with the office for which they extern: observation, interviewing, research, counseling, motion practice, and trials under State Bar rules. Limited enrollment. ( $\mathrm{S} / \mathrm{U}$ grading only.)
475. Washington UC-DC Law Program (10)

Clinical activity - 10 hours. Open to 2 L and 3 L students. Uniquely collaborative externship program in Washington, D.C., combining weekly seminars with full-time field placement offering students an unparalleled opportunity to learn how federal statutes, regulations, and policies are made, changed, and understood in the nation's capital. ( $\mathrm{S} / \mathrm{U}$ grading only.)
475A. Law Making and Law Changing in the Nation's Capital (3)
Seminar-3 hours. Companion seminar to the Washington UC-DC Externship. Designed to enhance the externship experience in three principal ways.
480. Clinical Program in Prison Law (2-6) Clinical program. Provides practical experience in providing legal services to real clients who have various problems related to their incarceration in state prison. The services require analysis and application of Constitutional Law, state statutory law, agency regulations, and the rules of professional responsibility. Students will work under the direct supervision of the Prison Law clinical director and will be assigned a portion of the director's caseload. Students will be required to follow the law office procedure of the clinic and employ skills such as interviewing, research, writing, negotiating, and possibly, the preparation of legal documents to be filed in court. (S/U grading only.)

## 485. California Supreme Court Clinic (6)

Clinical activity-6 hours. Class size limited to 6 students. California Supreme Court Clinic provides students with an immersive experience in litigating cases before the state's highest court.

## 490T. Aoki Federal Public Defender Clinic

 (4)Clinical activity-4 hours. Students submit applications for the course. Outgrowth of the work of the Aoki Center on Race and Nation. As part of its work, the Aoki Center provides educational opportunities to students interested in critical race perspectives in practice.

## 495. Legal Research and Writing I (2)

Discussion-2 hours. Integrated legal research and writing skills course. Basic legal research resources and strategies are introduced and practiced. (S/U grading only.)
498. Group Study (1-4)

Prerequisite: consent of instructor. Groups of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty. Class size limited to no fewer than 4 or more than 10 students. (S/U grading only.)
498A. Group Study (1-4)
Prerequisite: consent of instructor. Groups of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty.
499. Independent Research Project (1-4)

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. ( $S / U$ grading only.)
499A. Independent Research Project (1-4)
Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. Grading is on a Satisfactory/Unsatisfactory basis unless a request for letter grading has been made in advance.
499B. Law Students Study Away (10) Independent study. Students studying away from UC Davis, School of Law. (S/U grading only.)
499C. Joint Degree Student-GSM (10) Joint degree course for graduate School of Management students. (S/U grading only.)
499S. Special Independent Research Project (1-4)
Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member.

## 499SA. Special Session Independent

## Research Project (1-4)

Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. (Deferred grading only, pending completion of sequence.)
499SB. Special Session Independent Research Project (1-4)
Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than five students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member.

## The Major Program

Linguistics is the systematic study of human language. It focuses on theories of language structure, variation, and use, description of contemporary languages, and the examination of language change through time. Because of the pervasive influence of language in our everyday lives, work in linguistics interacts in important ways with studies carried out in many other fields, including psychology, anthropology, neuroscience, philosophy, computer science, sociology, literature, language teaching, communication and education.

The Program. An introductory lower division course provides students with basic concepts and some of the methods needed to analyze language in a systematic way. Upper division courses probe more deeply into specific aspects of language structure, language use, and the relationship of language to other realms of human activity.
Career Alternatives. Majors in linguistics find practical outlets for their linguistic training in a variety of fields: the computer science industry (software development); teaching English as a second language; foreign language teaching; elementary and secondary level bilingual-bicultural programs; lan-guage-oriented missionary work; bilingual-bicultural curriculum development (e.g., for publishing houses); legal work; speech therapy; lexicography (preparation of dictionaries). All of these types of employment share an interest in persons skilled in the analysis of language, spoken and/or written. Linguistics equips students with just such skills.

## A.B. Major Requirements:

Preparatory Subject Matter ..................4-24
Linguistics 1
................... 4
Foreign language, one course beyond the 15 -unit requirement of the College of Letters and Science in the same language used to
fulfill the college requirement.
. $0-20$
Depth Subject Matter
Linguistics 103A, 103B, 111, 131 ......... 16
Any three Linguistics courses from among
those numbered from 110 to $159 \ldots . . . . . . . .12$
One Linguistics course from among those numbered from 160 to 169 ..................... 4
One Linguistics course from among those numbered from 170 to 189 $\qquad$
At least eight upper division units from the following courses..................................... 8

Requirements listed above, African
American and African Studies 156,
Anthropology 110, 117, 119, 120,
Communication 105, Education 151,
English 105, 106 French 109, 160, 161,
162, German 105, Human Development
101, Native American Studies 107,
Philosophy 137A, 137B, 137C,
Psychology 132, Spanish $111 \mathrm{~N}, 112 \mathrm{~N}$,
$113,114 \mathrm{~N}, 115,115 \mathrm{~S}, 116,117,118$.

## Total Units for the Major. 48-68

## Major Adviser. R.Bayley

## Minor Program Requirements:

Linguistics offers two minor programs:
(1) General Linguistics, which provides the student with basic knowledge of language structure and linguistic analysis;
(2) Linguistics for Language Teachers, which especially complements the major in English with the
Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.

General Linguistics 24
Linguistics 1, 103A, 103B...................... 12
One course from: Linguistics 111, 112, 121,
131, 141, 151, 152 ..
Additional units selected from upper division Linguistics courses and other upper division courses listed in the major requirements in consultation with an adviser $\qquad$
Linguistics for Language Teachers.. 24
Linguistics 1, 106, 165......................... 12
English 105 ............................................... 4
Linguistics 160 or 163.
4
Linguistics 173 or Education 151
... 4
Minor Adviser. Same as Major adviser
Grading Recommendation. Though not
required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.
Honors and Honors Program. The honors program consists of six units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major adviser. For general information regarding graduation with honors and Dean's Honors Lists, please see Academic Information, on page 73.
Graduate Study. The Linguistics Graduate Group offers study and research leading to the M.A. and Ph.D. degrees. Please see Linguistics
(A Graduate Group), on page 380; more detailed information may be obtained from the Graduate Adviser or from the Chairperson of the Linguistics Group.
Graduate Adviser. R.Aranovich, J. Menard-Warwick

## Courses in Linguistics (LIN)

## Lower Division

## 1. Introduction to Linguistics (4)

Lecture-3 hours; discussion - 1 hour. Introduction to the study of language; its nature, diversity, and structure. GE credit: ArtHum or SocSci, Wrt | AH, SS. I, II, III. (I, II, III.)

## 1 Y. Introduction to Linguistics (4)

Web Virtual Lecture-3 hours; discussion-1 hour. Introduction to the study of language; its nature, diversity, and structure. GE credit: ArtHum or SocSci, Wrt | AH or SS. -I, II, III. (I, II, III.)

## 5. Global English and Communication (4)

Lecture-2 hours; discussion - 2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative
competence for a globalized world. (Same course as Communication 5.) GE credit: ArtHum or SocSci |AH or SS, OL. WC. - II. (II.) Farrell, Feng, Ramanathan

## 6. Language and Society (4)

Lecture-3 hours; discussion-1 hour. Language as a social phenomenon. Topics include linguistic diversity, language policy, language and identity, language and social structure, speech communities and social networks, the effect of social factors on language variation, linguistic consequences of language contact. GE credit: SocSci, Div,
Wrt | ACGH, DD, SS, WE.-II. Bayley, Ramana-

## than

## 20. Oral English for Undergraduate ESL

 Students (3)Lecture/discussion-3 hours. Prerequisite: consent of instructor; limited primarily to students who have fulfilled their Subject A requirement or have completed course 23. Intensive practice in oral English for undergraduate ESL students. Students will learn to identify and modify features of their pronunciation which limit their ability to communicate clearly. Students will also learn and practice strategies for effective participation in academic tasks. May be repeated one time for credit with consent of coordinator. (P/NP grading only.)
24. English Structures and Strategies in Academic Writing (4)
Lecture/discussion-4 hours. Prerequisite: course 23. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Open to students from language backgrounds other than English. - Samsel

## 25. English for International/ESL Graduate

 Students (4)Lecture/discussion - 4 hours. Prerequisite: admission by placement examination or consent of instructor. Open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). A multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.)-I. Lane

## 26. Writing for International Graduate Students (3)

Lecture-3 hours. Prerequisite: satisfactory completion of course 25 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.)
27. Academic Writing for ESL Students (4) Lecture/discussion-4 hours. Writing skills necessary for upper division courses, including skills crucial to writing lab and project reports, summaries, critiques, abstracts, and responses to exam questions. Includes practice with the syntax, grammar, and vocabulary characteristic of academic writing. Offered irregularly. - I.

## 28. Reading in Scientific and Technical Subjects for ESL Students (4)

Lecture/discussion-4 hours. Instruction and practice in reading scientific and technical texts. Techniques for comprehending and analyzing grammatical and organizational patterns. Notetaking skills, summarizing, vocabulary enrichment. (P/ NP grading only.)

## 96. Directed Group Study in English as a

 Second Language (1-5)Variable-1-5 hours. Prerequisite: consent of instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.)-I, II, III.

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Intended for lower division students. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. Intended for lower division students. (P/NP grading only.)

## Upper Division

103A. Linguistic Analysis I: Phonetics,

## Phonology, Morphology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 139. GE credit: ArtHum | AH.-I. Farrell, Orgun

## 103B. Linguistic Analysis II: Morphology,

 Syntax, Semantics (4)Lecture-3 hours; discussion-1 hour. Prerequisite: course 1. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed course 140. 103B GE credit: ArtHum | AH. - II. Farrell, Aranovich
105. Topics in Language and Linguistics (4) Lecture-3 hours; term paper. Prerequisite: course 1 and consent of instructor. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. Offered irregularly.

## 106. English Grammar (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or English 3 or University Writing Program 1 or consent of instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as English 106 and University Writing Program 106.) GE credit: ArtHum | AH.

## 111. Introduction to Phonological Theory

## (4)

Lecture -3 hours; discussion -1 hour. Prerequisite: course 103A. Contemporary phonological theory with emphasis on syllable structure, metrical struc-
ture, phonology-morphology interaction, and typo-
logical variation in these areas, from the perspective of optimality-theoretic approaches. GE credit:
ArtHum | AH.-II. Orgun
112. Phonetics (4)

Lecture-3 hours; term paper. Prerequisite: course 1. Detailed examination of articulatory and acoustic phonetics. GE credit: SciEng | SE.-I. Orgun

## 121. Morphology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: courses 103A, 103B. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components. GE credit: ArtHum | AH.-III. Aranovich

## 127. Text Processing and Corpus Linguistics

## (4)

Lecture -3 hours; extensive problem solving. Prereqvisite: course 1, course 5, course 6, or Anthropology
4. Investigation of the lexical organization of human languages through corpus linguistics. Application of principles of linguistic analysis, automatic text pro-
cessing, and statistical research to solving problems of textual evaluation and classification, as well as information retrieval and extraction. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, QL. - III. Aranovich

## 131. Introduction to Syntactic Theory (4)

 Lecture-3 hours; discussion-1 hour. Prerequisite: course 103B. Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argumentation, and problems of theory building in syntax. GE credit: ArtHum | AH. - III. Aranovich, Farrell
## 141. Semantics (4)

Lecture-3 hours; term paper. Prerequisite: course 103B. The linguistic study of meanings of words and phrases. Meanings expressed by lexical items and derivational and inflectional morphology. Contribution of argument structure, quantification, and coordination to meaning. GE credit: ArtHum,

## Wrt | AH.-I. Ojeda

150. Languages of the World (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or Anthropology 4. Survey of the world's languages, their geographical distribution and classification, both genetic and typological. Illustrative descriptions of several major languages from different geographical areas; pidgins and creoles, lingua francas and other languages of widespread use. Not open for credit to students who have completed course 50. GE credit: ArtHum or Socsci, Wrt | AH or SS, WC. - II.

## 151. Historical Linguistics (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 103A. Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change. Offered irregularly. GE credit:
ArtHum | AH.-Hawkins
152. Language Universals and Typology (4) Lecture-3 hours; term paper. Prerequisite: course 103B. Investigation into common features of all human languages and the classification of languages in terms of their structural features. Theories of universal grammar. Detailed discussion of non-Indo-European languages and comparison with English. GE credit: ArtHum, Wrt | AH. - III. Farrell, Hawkins

## 160. American Voices (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or Anthropology 4 or upper division standing recommended. Explores the forms of American English; traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation. The influence of language attitudes on perception of dialect speakers; dialect in media, education, and literature. GE credit: SocSci, Div, Wrt \| SS, WE. III. Ward
163. Language, Gender, and Society (4) Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or Anthropology 4. Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.-II. Timm, Menard-Warwick

## 165. Introduction to Applied Linguistics (4)

Lecture-3 hours; discussion - 1 hour. Applications of linguistic principles and the analysis of languagerelated issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media. GE credit: SocSci \| SS, WE. - (III.) Ramanathan
166. The Spanish Language in the United States (4)
Lecture-3 hours; term paper. Prerequisite: course 1 or Spanish 111 N ; and Spanish 23 or the equivalent. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: SocSci, Div, Wrt \| SS
171. Introduction to Psycholinguistics (4) Lecture-3 hours; discussion-1 hour. Prerequisite: course 1; courses 103A, 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. Offered in alternate years. GE credit: SS. - Corina

## 173. Language Development (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or consent of instructor; courses 103A 103B. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as Education 173.) GE credit: SocSci | SS. - (I.) Uchikoshi
175. Biological Basis of Language (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or consent of instructor. Overview of issues in the field of neurolinguistics and techniques used to explore representation of language in the human brain. GE credit: SciEng | SE.-I. Corina

## 177. Computational Linguistics (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 1 or consent of instructor. Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition and computer representations of cognitive processing. Not open for credit to students who have completed course 7. GE credit: SciEng or
SocSci | SE or SS.-II. Ojeda

## 180. Second Language Learning and Teaching (4)

Lecture/discussion-4 hours. Prerequisite: course 1 or equivalent. Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. Impact of sociocontextual factors (e.g., gender, ethnicity). Fieldwork requirement. GE credit: SocSci, Div, Wrt \| SS, WE.-I. (I.) Menard-Warwick

## 182. Multilingualism (4)

Lecture/discussion-4 hours. Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals. Limited enrollment. GE credit: GE credit: ArtHum or SocSci, Div, Wrt \| SS WC, WE. - III. Ramanathan, Timm

## 192. Internship in Linguistics (1-12)

Internship-3-36 hours; two written reports. Prerequisite: course 1 or the equivalent. Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of 4 units applicable toward major. (P/NP grading only.)
194H. Special Study for Honors Students (1-5)
Independent study - 1-5 hours. Prerequisite: open only to linguistics majors of senior standing who qualify for honors program. Guided research, unde the direction of a faculty member approved by the Program Director, leading to a senior honors thesis. May be repeated for credit for up to 6 units. (P/NP grading only.)

197T. Tutoring in Linguistics (1-4)
Discussion - 1-4 hours. Prerequisite: upper division standing, consent of instructor, and consent of department chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## Graduate

200A. Foundations of Linguistics I (4)
Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by pre-generative linguistics in the twentieth century, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed course 203A.
200B. Foundations of Linguistics II (4) Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by orthodox generative linguistics, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed course 203B.
200C. Foundations of Linguistics III (4) Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing. Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics.
205A-205B-205C-205D. Topics in Linguistic Theory and Methods (4)
Seminar-3 hours; term paper. Prerequisite: consent of instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs.

## 211 . Advanced Phonological Theory and Analysis (4)

Lecture-3 hours; term paper. Prerequisite: course 111. Critical examination of current phonological theories.-Orgun

## 212. Advanced Phonetics (4)

Lecture-3 hours; term paper. Prerequisite: course 112. Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. Offered in alternate years. - Orgun

## 231. Advanced Syntactic Theory and Analysis (4)

Lecture-3 hours; term paper. Prerequisite: course 131. Critical survey of contemporary theories of syntax. Offered in alternate years. - Aranovich

## 241. Advanced Semantic Theory and Analysis (4)

Lecture-3 hours; term paper. Prerequisite: course 141 or consent of instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Offered in alternate years. - II. Ojeda
251. Principles of Historical Linguistics (4) Lecture-3 hours; term paper. Prerequisite: course 151. Advanced analysis of the theory and methods of historical linguistics. Offered in alternate years.

## 252. Romance Linguistics (4)

Lecture-3 hours; term paper. Prerequisite: course
151. Examination of the development of the Romance languages from Proto-Romance to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. Offered irregularly.
260. Variation in Speech Communities (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 281 or consent of instructor. Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation; issues and methods in the quantitative
analysis of variation. Speech community, quantitative analytic methods, and the scope of sociolinguistic competence. - Bayley
263. Discourse Analysis: Text in Context (4) Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing. Introduction to and application of leading theoretical approaches to the analysis of discourse. Approaches to the analysis of (spoken and written) text in context, tools for analyzing different types of texts (narration, conversation, etc.). Theme/rheme, given/new, anaphora, discourse markers, and other lexical/grammatical features.

## 264. Current Issues in Language and

## Gender (4)

Seminar-3 hours; term paper; project. Prerequisite: graduate standing; prior coursework in Linguistics, Gender Studies, or Cultural Studies is desirable; no expectation of bilingual proficiency. Exploration of the construction and performance of gender through language in cross-cultural perspective and in a variety of contexts: informal conversations, narratives, workplaces, schools, households, the mass media. Special topics may include: language acquisition; multilingualism; ecofeminism; queer theory. May be repeated for credit one time when topic differs.
Offered in alternate years-Menard-Warwick, Timm

## 265. Language, Performance, and Power

 (4)Seminar-3 hours; term paper. Graduate standing or consent of instructor. Exploration of the intersection between linguistic and social theories in the lan-guage-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as Anthropology 265.) Offered in alternate years. - Shibamoto Smith

## 280. Theories of Second Language

## Acquisition (4)

Lecture/discussion-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning. -1 . Ramanathan

## 281. Research Methods in TESOL/SLD (4)

Lecture-3 hours; term paper. Prerequisite: course 280. Research methods in second language research; evaluation of research designs and methods of analyses, formulation of research questions and hypotheses and design of study with thought to various kinds of data. - II. Menard-Warwick, Bayley

## 282. Individual and Social Aspects of Bilingualism (4)

Lecture- 3 hours; term paper. Broad overview of biand multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states.-III. Timm

## 283. Politics of Bi and Multilingual <br> <br> Literacies (4)

 <br> <br> Literacies (4)}Lecture/discussion-3 hours; term paper. Anthropological, psycho-social, political, and educational perspectives on bi and multilingualism. Power, colonialism, "native/non-native" speakers, and varieties and the unequal distribution of social goods. Analysis of how competing factors keep peoples disenfranchised. - Ramanathan

## 289. Pedagogical Applications of Second Language Acquisition Theory (4)

Seminar-3 hours; term paper. Prerequisite: course 280. Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning.-Bayley

297T. English as a Second Language Teaching/Tutoring (1-4)
Tutoring-1-4 hours. Prerequisite: course 300, 301, or 302 (may be taken concurrently). Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. (S/U grading only.)
298. Directed Group Study (1-5)

Prerequisite: graduate standing. ( $\mathrm{S} / \mathrm{U}$ grading only.)
299. Research (1-12)
( $\mathrm{S} / \mathrm{U}$ grading only.)

## Professional

## 300. Language Pedagogy (4)

Lecture/discussion-4 hours. Prerequisite: graduate standing in Linguistics or consent of instructor; concurrent enrollment in course 297T recommended. Methods of teaching second languages to nonnative speakers, stressing particularly recent linguistic methodology and techniques, as related to teaching and tutoring in the UC Davis ESL program.-l. (I.) Menard-Warwick

## 301. Teaching Academic Literacy (4)

Seminar-3 hours; tutorial-14 hours; project; practice. Prerequisite: graduate standing; course 300 or consent of instructor. Methods of teaching advanced academic literacy in a second language, with a focus on ESL composition. Lesson development, teaching and tutoring in the UC Davis ESL pro-gram.-II. Ramanathan

## 302. Recent Research and Special Projects

 in TESOL (4)Lecture-4 hours. Prerequisite: courses 300 and 301. Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UC Davis ESL clinic. Each student also designs and reports on a classroom research project.

## 305. Second Language Literacy and

 Technology (4)Lecture/discussion-1.5 hours; web electronic discussion -1.5 hours. Prerequisite: course 2, or equivalent coursework/experience in second language pedagogy; consent of instructor; graduate students only. Exploration of literacy theory and critical pedagogy in relation to new instructional and communication technologies. Practicum experience in teaching second language literacy; reflection on connections between theory and practice. Limited enrollment. - Menard-Warwick
310. Language Pedagogy for Teacher Educators (4)
Seminar-3 hours; tutorial; project; fieldwork. Prerequisite: admission to Ph .D. program in Linguistics or Foreign Languages, or permission of instructor; significant language teaching experience. Current issues in second language pedagogy, with a focus on communicative methodology, participatory curriculum design, academic literacy, and the social contexts of teaching. Emphasis on reflective teaching and action research. May be repeated up to 12 units for credit.-I. Menard-Warwick, Ramanathan

## 391. Oral English for ESL Students (3)

Lecture-2 hours; laboratory-2 hours. Prerequisite: open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. (S/U grading only.)

## 396. Teaching Assistant Training Practicum (1-4)

Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)-I, II, III.

Karen A. Watson-Gegeo, Ph.D., Professor (Education) Distinguished Graduate Mentoring Award
Eric Russell Webb. Ph.D., Assistant Professor (French)
Aram Yengoyan, Ph.D., Professor (Anthropology)

## Emeriti Faculty

Wilbur A. Benware, Ph.D., Professor Emeritus David L. Omsted, Ph.D. Professor Emeritus Mary Schleppegrell, Ph.D., Professor Emerita Gwendolyn Schwabe, M.A., Senior Lecturer Emerita Maximo Torreblanca, Ph.D., Professor Emeritus Benjamin E. Wallacker, Ph.D., Professor Emeritus
Graduate Study. The Graduate Group in Linguistics offers a program of study leading to the M.A. and the Ph.D. degree. The M.A. places emphasis on applied linguistics, especially TESOL. The program offers a strong foundation in linguistics and in the linking of the theory with practice. Students have the choice of pursuing one of two sets of degree requirements. Plan I requires a total of 38 units of course work plus a thesis. Plan II requires 42 units of course work and an examination consisting of two papers.
The Ph.D. degree offers advanced training and research in linguistic theories and methods. Second language acquisition and development is a particular emphasis of the program. Detailed information on both the M.A. and the Ph.D. degrees can be obtained from the graduate advisor, from the chair of the Graduate Group or the departmental chair.
Graduate Advisers. Raul Aranovich (Linguistics), Julia Menard-Warwick (Linguistics)

## Literature in Translation

The following courses are open to students throughout the campus. The readings can be in English. See departmental listing for the course description.

| Chinese |  |
| :--- | :--- |
| 10. | Chinese American Literature (in <br> 11.$\quad$English) <br> Great Books of China (in English) <br> 50.$\quad$Introduction to the Literature of China <br> 100A. |
| and Japan (in English) |  |
| Daoist Traditions |  |

| 158. | The Detective Story as Literature |

| 180. | Selected Topics in Comparative |
|  | Literature |
| 194H. | Special Study for Honors Students |
| 195. | Seminar in Comparative Literature |

## Dramatic Art

20. Introduction to Dramatic Art
21. Asian Theatre and Drama: Contexts and Forms
156AN. Performance Analysis
156BN. Theatre in History and Place: Local, National and Global Conditions for Production
156CN. Modern Aesthetic Movements in Performance
22. Contemporary Experimental Theatre and Drama

## French

50. French Film
51. Major Works of French
52. France and the French-Speaking World

## German

48. Myth and Saga in the Germanic
49. Freshman Colloquium

112 Topics in German Literature
113. Goethe's Faust

115 German Literature since 1945
118A. Fin-de-siècle Vienna (The Swan Song of the Habsburg Empire)
118B. Weimar Culture: Defeat, the Roaring
Twenties, the Rise of Nazism
118C. Germany under the Third Reich
119. From German Fiction to German Film
141. The Holocaust and its Literary

Representation
142 New German Cinema: From
Oberhausen to the Present

## Italian

50. Studies in Italian Cinema
51. Survey of Italian Culture and

Institutions
108. Contemporary Issues in Italian Culture and Society
139B. Boccaccio, Petrarch and the
Renaissance
140. Italian Literature in English Translation:

Dante, Divine Comedy
141. Culture, Gender and the Italian

Renaissance
142. Masterpieces of Modern Italian

Narrative
150. Studies in Italian Cinema

Japanese
10. Masterworks of Japanese Literature (in English)
15. Introduction to Traditional Japanese

Culture
50. Introduction to the Literature of China and Japan
101. Japanese Literature in Translation: The

Early Period
102. Japanese Literature in Translation: The Middle Period
103. Japanese Literature in Translation: The Modern Period
104. Modern Japanese Literature: War and Revolution
105. Modern Japanese Literature: Hero and Anti-Hero
106. Japanese Culture through Films
107. Modern Japanese Autobiographies (in English)
108. Poetry of China and Japan
109. Japanese Popular Culture
152. Traditional Japanese Drama
156. Japanese Literature on Film

## Native American Studies

181A. Native American Literature (the novel and fiction)
181B. Native American Literature (non-fiction works by Native authors)
181C. Native American Literature (traditional and contemporary poetry)
184. Contemporary Indigenous Literature of Mexico
188. Special Topics in Native American Literary Studies

## Russian

45. Russian Fantasy
46. Nineteenth-Century Russian Prose
47. Twentieth-Century Russian Prose
48. The Russian Theater
49. Contemporary Soviet Culture
50. Dostoevsky
51. Tolstoy

## Spanish

149. Latin-American Literature in Translation

## Luso-Brazilian Studies

(College of Letters and Science)
The Department of Spanish and Portuguese sponsors the minor in Luso-Brazilian Studies, which offers students the opportunity to engage with the Portuguesespeaking world as a global space, as well as gain in-depth knowledge of Brazilian literature, culture and society. The minor is structured to facilitate engagement with Latin American, peninsular, and transatlantic topics, while ensuring that students master the essential skills of linguistic competence, and literary and cultural knowledge.

## Minor Program Requirements:

Luso-Brazilian Studies ........................23-24
Portuguese 100, 161 ............................... 8
Select one course in each of the following
categories:
Spanish 111 N, 115, or 116.............3-4
Portuguese 162 or 163 ......................... 4
Select one elective course in each of the
following categories:
Portuguese 159, 162, or 163 $\qquad$ History 159, 163A, or 163B ................. 4 Note: Consult a departmental adviser if any of these courses are to be taken abroad. Note: Additional courses may count toward the minor with prior approval by a departmental adviser.
Minor Advisers. L. Bernucci, R. Newcomb
Education Abroad Program Options.
We highly recommend that students participate in study abroad in Salvador, Brazil; see
http://studyabroad.ucdavis.edu. Courses taken abroad may count toward the Luso-Brazilian Studies minor.

The Graduate School of Management offers a minor in Technology Management to undergraduate students with majors in engineering, agricultural, biological and physical sciences. This minor complements students' undergraduate studies with courses in the ways in which engineering and sci-ence-based industrial enterprises manage and use knowledge from science, engineering and technology. The minor also provides students with business and management skills that should enable them to use their engineering and science education more effectively in a technology environment.
Due to limited enrollment, students must apply to the program and be admitted to the program before being allowed to enroll in courses. The primary admission process will be conducted quarterly.

## Minor Prerequisites:

Students must take these courses for a letter grade of $C$ - or better.

Management 11A .. 4
Mathematics 16A-16B, 17A-17B or 21 A -
21B

Statistics any 100 level course or 13 above.

## Minor Program Requirements:

UNITS
Technology Management........................ 20
Choose five courses from: Management 120, 140, 150, 160, 170, 180.................... 20

## Courses in Management

 (MGT/MGB/MGP)
## Lower Division

11 A. Elementary Accounting (4)
Lecture-3 hours; discussion-1 hour. Basic concepts of accounting; interpreting and using financial statements; understanding accounting principles. GE credit: SocSci | SS.-I, II. (I, II.)

## 11 B. Elementary Accounting (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 11A. Theory of product costing; Analyzing the role and impact of accounting information on decision making; planning and performance evaluation. GE credit: SocSci \| SS. - III. (III.)

## Upper Division

100. Introduction to Financial Accounting (3)

Lecture-3 hours. Course is open to all upper division undergraduate and graduate students, except those in the Graduate School of Management. Introduction to the concepts, methods, and uses of accounting and financial reporting. Preparation of financial statements, including balance sheet and statements of income and cash flow, as well as their analysis by investors and managers.

## 120. Managing and Using Information Technology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Introduction to computer hardware, systems software, and information systems. Management of information technology and the impact of information systems on modern management. - III.

## 140. Marketing for the Technology-Based

 Enterprise (4)Lecture-3 hours; discussion - 1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21 B , Statistics 100, 102, 103, or 108. Marketing in technol-ogy-based companies, with emphasis on how scientists, engineers, and business people interact to develop and market products and services. -II.

## 150. Technology Management (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Management of firms in high technology industries such as software development and biotechnology research. Motivating and managing workers, organizing for innovation, and making decisions.-III.
160. Financing New Business Ventures (4) Lecture-3 hours; discussion-1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Concepts and methods used to structure and finance new business ventures. Topics include the evaluation of new investment proiects, raising venture capital, the role of the venture capitalist, and the choice of organizational structure in new ventures. - II.

## 170. Managing Costs and Quality (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics 100, 102, 103, or 108. Designing cost systems in high technology organizations and managing operations to maximize quality and minimize costs. Topics include activity based costing and management, managing quality and time to create value, ethical issues in cost assignment, and differential costing for decision making. -1 .
180. Supply Chain Planning and Management (4)
Lecture-3 hours; discussion - 1 hour. Prerequisite: course 11A, Mathematics 16B, 17B, or 21B, Statistics $100,102,103$, or 108 . Quantitative techniques for analysis and management of modern supply chains for the production and delivery of goods and services. -I. Woodruff

## Graduate-Core Courses

200A. Financial Accounting (3)
Lecture -3 hours. Prerequisite: graduate student in the Graduate School of Management. Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations.-l. (I.) Yetman
200B. Managerial Accounting (3)
Lecture-3 hours. Prerequisite: graduate student in the Graduate School of Management. Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations. - II, IV. (II, IV.) Ramanan
201 A. The Individual and Group Dynamics (3)

Lecture-3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building.-I. (I.) Elsbach
201B. Organizational Structure and Strategy (3)
Lecture-3 hours. Prerequisite: graduate student in the Graduate School of Management. Analysis of structural properties of organization including differentiation and vertical and horizontal integration. Alternative structural arrangements including functional, divisionalized, matrix, and hybrid structures. Relationship between environment, structure, and strategic objectives. Organization life cycle and changes. - II. (II.) Biggart, Hsu

## 202A. Markets and the Firm (3)

Lecture-3 hours. Prerequisite: graduate student in the Graduate School of Management. Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied. -II. (II.)
202B. Business, Government, and the International Economy (3)
Lecture-3 hours. Prerequisite: course 202A. Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance. - II. (II.)
203A. Data Analysis for Managers (3)
Lecture-3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy.-II. (II.) Tsai

## 203B. Forecasting and Managerial

## Research Methods (3)

Lecture-3 hours. Prerequisite: course 203A. Practical statistical methods for managerial decision mak-
ing covers regression analysis, time series analysis and forecasting, design and analysis of experiments
in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy.-II. (II.) Tsai

## 204. Marketing Management (3)

Lecture-3 hours. Prerequisite: graduate student in the Graduate School of Management. Analysis of market opportunities, elements of market research development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales. - III. (III.)

## 205. Financial Theory and Policy (3)

Lecture-3 hours. Prerequisite: graduate student in the Bay Area MBA Program. Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging. - III. (III.) Barber

## 206. Decision Making and Management

 Science (3)Lecture-3 hours. Prerequisite: graduate student in the Graduate School of Management MBA program or consent of instructor. Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment. - II. (II.)
207. Management Information Systems (3) Lecture-3 hours. Prerequisite: graduate student or consent of instructor. Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security.-I, II, III. (II, II, III.) Bhargava, Woodruff

## 210T. Policing Seminar (2)

Seminar-2 hours. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies. Limited enrollment.

## Electives

Students must complete the Management core course requirement before enrolling in any of the following courses, or petition with consent of the instructor.
215. Business Law (3)

Lecture-3 hours. Prerequisite: completion of Administration core requirements or petition with consent of instructor. Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law. IV. (IV.)

## 216. Managing Professionals, Budgets,

 Controls and Ethics (3)Lecture-3 hours. Prerequisite: graduate standing Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants.-I. (I.) Suran
220. Management of Social Networks (3) Lecture/discussion-3 hours. Prerequisite: course 201A; open to MBA students only. Principles and applications of social network theory: coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, web-based diagnostic tools, and practical applications. Offered in alternate years. - (l.)

## 223. Power and Influence in Management (3)

Seminar-3 hours. Prerequisite: consent of instructor. Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics.-I. (I.) Palmer

## 224. Managing Human Resources (3)

Lecture/discussion-3 hours. Restricted to students in the MBA program. Explore choices firms make in managing workers; decisions as to wages, benefits, working conditions, and other management policies and practices. Analyze employment systems' fit with firms' environments and strategies, and consequences of choices managers make regarding policies and practices. Not open to students who have taken MGT/B 224.-II. (II.) Hsu

## 239. Digital Marketing (3)

Lecture/discussion-3 hours. Prerequisite: course 204. Course equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg , online privacy issues, e-commerce, social influence, social network theory, measurement of social influence, integrating social and traditional media. - III. (III.) Yoganarasimhan
240. Management Policy and Strategy (3) Lecture-3 hours. Prerequisite: first-year core courses of M.B.A. program. Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study. -I. (I.) Suran

## 241. New Product Development (3)

Lecture/discussion-3 hours. Prerequisite: course 249 or consent of instructor; restricted to graduate students in the Graduate School of Management. Disseminates state-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems. - III. (III.) Naik

## 242. Marketing Communications (3)

Lecture-3 hours. Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions. - III. (III.) Naik
244. New and Small Business Ventures (3) Lecture-3 hours. Emphasizes starting a new business venture or managing a small, ongoing business during its formative stages. The business plan. Legal forms, financial considerations, the management team. The entrepreneur. Students develop a detailed business plan.-IV. (IV.)
246. Negotiation and Team Building (3) Lecture-3 hours. Prerequisite: courses 202, 205. Teaches basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier. - II. III. (II, III.) Elsbach

## 247. Customer Service as a Marketing Tool

 (3)Lecture - 3 hours. Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement.-I. (I.)

## 248. Marketing Strategies (3)

Lecture-3 hours. Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of
new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing.-l. (I.) Rubel

## 249. Marketing Research (3)

Lecture-3 hours. Course addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications. - III. (III.) Bunch
250. Technology, Competition and Strategy (3)

Lecture-3 hours. Prerequisite: completion of firstyear core courses at the Graduate School of Management or the equivalent. Restricted to students in the MBA program. Why is software typically so defective? Why do many firms in the IT industry give away their best products free? This course helps you analyze questions like these by modeling competition and strategy in the network, technology and information industries. - II. (II.) Bhargava

## 251. Management of Innovation (3)

Lecture -3 hours. Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics.-l. (I.) Biggert

## 252. Managing for Operational Excellence

 (3)Lecture-3 hours. Open to students in the Graduate School of Management. Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations.-IV. (IV.) Woodruff
260. Corporate Finance (3)

Lecture -3 hours. Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure.-III. (III.) Scherbina

## 261. Investment Analysis (3)

Lecture-3 hours. Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance.-I. (I.) Chen
263. Derivative Securities (3)

Lecture/discussion-3 hours. The behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods. Open to students enrolled in the MBA program. - III. Edelen

## 264. Business Taxation (3)

Lecture-3 hours. Analysis of the impact of business taxation on investment, production, and finance decisions. Discussion of the relationship between business organization and tax liability. Course is not intended for tax specialists. - II. (II.) Yetman
266. International Finance (3)

Lecture-3 hours. Prerequisite: course 207 or the equivalent. Open economy macroeconomics, balance of payments theory, and financial decision making in multinational firms.-II. (II.)

## 267. Teams and Technology (3)

Lecture/discussion-3 hours. Restricted to working professional MBA students or consent of instructor. Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; impart-
ing interpersonal skills for implementing effective strategies; understanding how technological change affects team processes. - III. (III.)

## 268. Articulation and Critical Thinking (3)

Laboratory/discussion-3 hours. With commitment to this course, students will become competent public speakers, write well at a level expected in business, think efficiently and critically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit.-l. (I.)

## 269. Business Intelligence Technologies-

 Data Mining (3)Lecture/discussion-3 hours. Prerequisite: completion of core courses at the Graduate School of Management or the equivalent. Restricted to students in the MBA program. Data is a key source of intelligence and competitive advantage for business organizations. With the explosion of electronic data available to organizations and demand for better and faster decisions, the role of data driven intelligence is becoming central in organizations. - III. (III.) Y. Yang

## 270. Corporate Financial Reporting (3)

Lecture-3 hours. Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymak-ers.-IV. (IV.) Griffin

## 271. Strategic Cost Management (3)

Laboratory/discussion-3 hours. Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: target costing, process design for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives. - III. (III.) Anderson

## 272. Evaluation of Financial Information (3)

 Lecture - 3 hours. Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed. -III. (III.) Griffin
## 273. Accounting and Reporting for

## Government Nonprofit Entities (3)

Lecture-3 hours. Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agen-cies.-III. (III.)
274. Corporate Governance (3)

Lecture-3 hours. Prerequisite: restricted to full-time MBA students or consent of instructor. Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholder rights activists, and board members. II, III. (II, III.)

## 276. Real Estate, Finance and Development

 (3)Lecture-3 hours. Prerequisite: courses 201A and 207. Focus on single family, attached, detached, multi-family, and light commercial development. Students will study factors which make up successful real estate developments. Course will consider financial aspects involved in land acquisition, land development, construction, and project lending. - II. (II.)
281. Systems Analysis and Design (3) Lecture-3 hours. Design and specification of com-puter-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation.

## 282. Supply Chain Management (3)

Lecture/discussion-3 hours. Prerequisite: completion of first year core courses at the Graduate School of Management or the equivalent; knowledge of

Microsoft Excel. Restricted to students in the MBA program. Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive.-II. (II.) Chen

## 284. Applied Linear Models for <br> \section*{Management (3)}

Lecture -3 hours. Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy prob-lems.-Tsai
285. Time Series Analysis and Forecasting (3)

Lecture -3 hours. Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process con-trol.-Tsai

## 286. Telecommunications and Computer

 Networks (3)Lecture-3 hours. Prerequisite: course 280. Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks. - Topkis
287. Database Systems (3)

Lecture-3 hours. Prerequisite: course 280. Hierarchical, network, and relational models for database systems. Design and implementation of models. Performance evaluation and benchmarking. Query structures and languages. Data security and integrity. Application to managerial decision making and decision support systems.-III. (II.) Yang
288. Special Topics in Management of Information Systems (3)
Lecture-3 hours. Managerial aspects of information systems. Topics stressing applications in organizations chosen from: economics of computers and information systems, decision support systems, management of computer-based information systems, office automation. - Topkis

## 290. Topics in General Management (3)

 Seminar-3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in general management Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes. May be repeated for credit. - I, II, III. (I, II, III.) Woodruff291. Topics in Organizational Behavior (3) Seminar-3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes. May be repeated for credit. - II. (II.) O'Mahony
292. Topics in Finance (3)

Seminar-3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques. May be repeated for credit.-l. (I.)

## 293. Topics in Marketing (3)

Seminar-3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing,
hitech marketing, advertising, sales promotions, marketing through the Web. May be repeated for credit.-I. (I.)

## 294. Topics in Accounting (3)

Seminar-3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit.-l. (I.)
295. Topics in Information Technology (3) Seminar-3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field. May be repeated for credit.-I. (I.)
296. Topics in Technology Management (3)

Seminar-3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes. May be repeated for credit.III. (III.) Bhargava

## 297. Topics in International Management

 (3)Seminar-3 hours. Prerequisite: completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting. May be repeated for credit.-IV. (IV.)

## 298. Directed Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)
299. Individual Study (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

401. Crisis Management (1)

Laboratory/discussion - 1 hour. Establishes and explores the defining characteristics of crises. Will learn to anchor crisis management firmly within overall strategic management and also acquire a set of useful tools and techniques for planning for and handling actual crises. (S/U grading only.) -I. (I.) Biggs

## 402. Crisis Communications and Reputation

 Management (1)Laboratory/discussion - 1 hour. Intended to provide you with an understanding of the framework and tools necessary to successfully address communications and reputation management tasks in a variety of crisis situations. (S/U grading only.)-I. (I.) Friedman
403. Business Statistics Practicum (1)

Project-1 hour. Prerequisite: MGT, MGP, or MGB 203A is a pre-requisite. In addition, students must be concurrently enrolled in (or completed) MGT, MGP, or MGB 203B. Restricted to students in the MBA program. Applies techniques and concepts in business statistics to real case studies.-I. (I.) Tsai

## 404. Organizational Change Management

 (1)Laboratory/discussion - 1 hour. Challenges in getting significant changes made in organizations. Learn Organization Change Management (OCM) techniques and discuss case situations where OCM techniques play a role. (S/U grading only.) - II. (II.) Mathur
405. Business Literature (1)

Laboratory/discussion - 1 hour. Will examine Business history - historical trends that might influence contemporary business. Some argue that the recent
collapse of our financial system might have been averted if business leaders had a better sense of history. (S/U grading only.) - II. (II.) Biggart

## 406. Ethical Issues in Management (1)

Lecture/discussion - 1 hour. Explores the philosophical foundation of ethical theory and its recent applications to business situations. Professional codes of ethics, such as those promulgated by educational, managerial, engineering, scientific, medical and legal professional societies, are presented. (S/U grading only.) - II. (II.)
407. Storytelling for Leadership (1)

Lecture/discussion-1 hour. Internalize the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect. (S/U grading only.)-III. (III.)

## 408. The Business of the Media (1)

Lecture/discussion-1 hour. Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media - both news and entertainment. (S/U grading only.) - III, IV. (III, IV.)

## 409. Managing Multi-Asset Class

## Investment Portfolios (1)

Lecture/discussion-1 hour. Prerequisite: course 202A, 203A, 205. Covering a wide variety of investment principles, both theoretical and pragmatic. Helps prepare students to more thoughtfully approach investment decision-making. Topics include: Endowments, pension funds, family offices, sovereign wealth funds, and insurance companies. - III. (III.)

## 410. Corporate Governance (1)

Lecture/discussion - 1 hour. Covers recent and not-so-recent business and accounting scandals, discuss how corporations can better operate in the interests of shareholders and the public, and learn from people who rely on corporate governance in making investment decisions. ( $S / \cup$ grading only.) $-I, I I$, III, IV. (I, II, III, IV.) Maher

## 411. Turnaround Management (1)

Lecture/discussion - 1 hour. Evaluate the financial performance of a company, identify opportunities for improvement, propose real solutions to enhance performance, and most important inspire action in staff. (S/U grading only.) -I, II, III. (I, II, III.)

## 412. International Marketing (1)

Lecture/discussion-1 hour. Understanding basic concepts of international marketing. Understanding and managing heterogeneous, dynamic, and interdependent environments across countries. How to develop and implement an international marketing strategy: where and how to compete, how to adapt to your marketing mix.-III. (II.) Peters

## 413. Sustainable Business Ventures: Business and Energy (1)

Lecture/discussion - 1 hour. Introduction to sustainability goals, indicators, values, measurement techniques, and practice how it applies to large and small enterprise. -II. (II.) Jaffe

## 414. Multi-Channel Marketing (1)

Lecture/discussion - 1 hour. Mutli-channel marketing strategies empower managers to create value for different customer segments. Covers the necessary concepts to evaluate and select go-to market strategies in order to capitalize on the ubiquity of modern customers. (S/U grading only.) - II. (II.) Rubel
415. Climate Risks and Opportunities (1) Lecture/discussion-1 hour. Provide a working knowledge of the risks and opportunities arising from climate change and climate policy for businesses. (S/U grading only)-IV. (IV.) Mazzacurati 416. Topics in Private Equity (1)

Lecture-1 hour. Prerequisite: course 205. Restricted to students in the MBA program. Focuses on the finance principles related to the risk and return of the private equity (PE) industry, valuation of PE target companies, the structuring of leveraged buyouts (LBOs), and the management of portfolio companies. (S/U grading only.) - II. (II.) Yasuda

## 417. Incentives and Controls (1)

Lecture/discussion - 1 hour. Understand how organizations use financial and nonfinancial performance management and incentive systems to motivate people and manage resources. ( $\mathrm{S} / \mathrm{U}$ grading only) -I , II, III, IV. (I, II, III, IV.) Maher

## 418. Scientific Discovery and Business Innovation at Scale in the Food and

 Agriculture Sector (1)Lecture-3 hours. Restricted to students in the MBA program. Scientific discovery and business innovation within the food and agriculture sector profoundly influences the sustainability of society and enterprise competitiveness. Students will learn how business innovation models co-exist antagonistically or synergistically with scientific discovery and its influence on enterprise competitiveness. ( $S / U$ grading only) -I, II, III, IV. (I, II, III, IV.) Schmitz

## 424. Practicum for Managing People in Modern Organizations (1)

Project-1 hour. Prerequisite: course 224. Restricted to students in the MBA program. Provides solid grounding in the management of work and the employment relationship. Examines firms' interrelated policies and practices for managing people.II. (II.) Hsu

## 434. Practicum for Pricing (1)

Project-1 hour. Prerequisite: course 234. Restricted to students in the MBA program. Enhance understanding of the principles and concepts learned in Pricing by (1) teaching the necessary statistical and mathematical skills, and (2) requiring a report for a real Pricing case.-II. (II.) Jiang
440. Integrated Management Project (3) Project-3 hours. Prerequisite: first-year core courses of M.B.A. program. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. - III, IV. (III, IV.)
440A. Integrated Management Project (3) Lecture/discussion-3 hours. Prerequisite: first-year core courses of MBA program. Restricted to full-time (day) MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. (Deferred grading only, pending completion of sequence.) -I. (I.)
440B. Integrated Management Project (3) Project-3 hours. Prerequisite: first-year core courses of MBA program. Restricted to full-time (day) MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. (Deferred grading only, pending completion of sequence.) - II. (II.)

## 442. Practicum for Marketing <br> Communication (1)

Project-1 hour. Prerequisite: course 242. Restricted to students in the MBA program. Provides experience applying concepts learned in Marketing Communications to a realistic advertising or communication problem faced by firms. - III. (III.) Yoganarasimhan

## 443. Practicum for Customer Relationship

 Management (1)Project-1 hour. Prerequisite: course 243. Restricted to students in the MBA program. Hands-on training in applying Customer Relationship Management concepts and metrics to secondary data. Enhances ability to interpret results and decide the right type of marketing actions by requiring an executive report at the end of the quarter.-I. (I.) Aravindakshan
448. Practicum for Marketing Strategies (1) Project-1 hour. Prerequisite: course 248. Restricted to students in the MBA program. Provides opportuni ties to apply the concepts covered in the Marketing Strategies class through a group project involving
the analysis of strategic marketing decisions based on business-related issues, simulation and model-ing.-I. (I.) Rubel

## 449. Marketing Research Practicum (1)

Project-1 hour. Prerequisite: course 249. Restricted to students in the MBA program, or in some cases with permission of instructor. Provides opportunities to apply the concepts and methods covered in the Marketing Research class. Hands-on and projectbased, work could be either individual or in groups depending on enrollments and/or interests of students. - III. (III.) Bunch

## 450. Practicum for Technology Strategy

 and Competition (1)Project-1 hour. Prerequisite: course 250. Restricted to students in the MBA program. In-depth practicum project course. Apply theories, concepts, and models, learned in course 250 to a real-world business problem, through data collection, data analysis, simulation, modeling and post-model interpretation.-II. (II.) Bhargava

## 460. Practicum for Corporate Finance and Real Estate (1)

Project-1 hour. Prerequisite: course 260. Restricted to students in the MBA program. Work in groups to select and value a financial entity. It could be a firm, a sports player, a building, a project, or a patent. Grade based on an in-class presentation and a write-up. - III. (III.) Scherbina
461. Practicum for Investment Analysis (1)

Project-1 hour. Prerequisite: course 261. Restricted to students in the MBA program. Provides practical experience applying concepts learned in Investment Analysis to a realistic portfolio management setting via a hypothetical exercise. Produce a realistic executive summary and presentation of an investment proposal for a hypothetical client. - I. (I.) Chen
464. Practicum for Taxes and Business Strategy (1)
Project-1 hour. Prerequisite: course 264. Restricted to students in the MBA program. Practical application project drawing from the tax planning theory contained in course 264. Project consists of a business formation and operation, change in organization (incorporation), and movement into multinational and multi-jurisdictional tax.-I. (I.) Yetman

## 465. Practicum for Venture Capital (1)

 Project-1 hour. Prerequisite: course 265. Restricted to students in the MBA program. Provides an opportunity to apply concepts learned in Venture Capital in a realistic setting. Complete project analyzing a potential investment in a hypothetical venture and prepare an deal term sheet/investment agreement. - III. (III.) Yasuda
## 467. Practicum for Teams and Technology

 (1)Project-1 hour. Prerequisite: course 267. Restricted to students in the MBA program. Groups investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills. - III. (III.) Bechky

## 469. Practicum for Business Intelligence

## Technologies (1)

Project-1 hour. Prerequisite: course 269. Restricted to students in the MBA program. Projects applying concepts learned in Business Intelligence Technologies to real business problems. - III. (III.) Yang

## 482. Practicum for Supply Chain <br> Management (1)

Project-1 hour. Prerequisite: MGT, MGP, or MGB 282 is a pre-requisite or co-requisite. Restricted to students in the MBA program. Provides experience applying concepts learned in Supply Chain Management to a realistic management setting via a project.-l. (I.) Chen

## 490. Directed Group Study Management

 Practicum (3)Lecture/discussion - 3 hours. Prerequisite: consent of instructor; sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Pro-
vides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated for credit. Offered irregularly. -IV. (IV.)

## 498. Directed Group Study Management Practicum (1-12)

Project. Prerequisite: consent of instructor; sponsorship of a GSM Academic Senate faculty member, and approval of Graduate Adviser. Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. (S/U grading only.) -I, II, III. (I, II, III.)

## 499. Directed Individual Study <br> Management Practicum (1-12)

Project. Prerequisite: consent of instructor; sponsorship of a Graduate School of Management Academic Senate faculty member and approval of graduate advisor. Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other Graduate School of Management courses. (S/U grading only.) -I, II, III. (I, II, III.)

## Managerial Economics

(College of Agricultural and Environmental Sciences)
http://manecon.ucdavis.edu
Faculty. See Agricultural and Resource Economics, on page 143.
Major Advisers. Contact Department office.
Undergraduate Advising Center for the
major, minor, and course offerings (including peer advising) is located in 1176 Social Sciences and Humanities Building, 530-754-9536, http:// manecon.ucdavis.edu.

## The Major Program

The Managerial Economics major at UC Davis is a disciplinary program combining strong preparation in microeconomic theory and quantitative methods. It prepares students for the analysis of management and policy issues in business, finance, marketing, production, agriculture, food distribution, natural resources, the environment, resource allocation, and international trade and development. Students specialize in one of three options: (1) Managerial Economics focuses on the economic aspects of managerial decision-making. (2) Environmental and Resource Economics concentrates on issues related to the use of resources and environmental quality. (3) Agricultural Economics focuses on the economic and policy aspects of production and marketing of foods and fibers. Students in the Managerial Economics program develop valuable skills and strengths that lead to careers in business and government.
Internships and Career Alternatives. Students in managerial economics have opportunities to gain additional career information and preparation through internships in a variety of private business and governmental agencies. Graduates qualify for supervisory and management training positions in banking, finance, commodity and stock brokerages in the private sector, farm and ranch production, food and agricultural processing, agricultural sales and service, and a variety of agency career positions in local, state, and federal government. Graduates are well qualified to seek advanced degrees in agricultural and resource economics, economics, business administration, public policy, or law. For more information, see http://iccweb.ucdavis.edu.
Study Abroad. The Agricultural and Resource Economics department wishes to accommodate students who would like to complement their Managerial Economics degree with a study abroad experience. Up to eight units of upper division credit
(excluding core courses) from international campuses may be used towards the completion of the degree or the minor. To ensure that such courses will apply towards the Managerial Economics degree or minor, students need to select courses from the preapproved list at UC Davis Study Abroad or seek preapproval in the Agricultural and Resource Economics department for the courses they wish to complete.

## B.S. Major Requirements:

UNITS

## Major English Requirement

$\qquad$ .4
Choose one course from: English 3, University Writing Program 1, 18, 19, 101, 102A-G,
104A-F. (May not duplicate courses taken to meet the English Composition requirement for the College of Agricultural and Environmental Sciences.) NOTE: University Writing Program 104A is highly recommended.

## Preparatory Subject Matter

One course from: Plant Sciences 21,
Engineering Computer Science 10, 15 or 30 .3-4

Economics 1A-1B ......................................... 8
Management 11A-11B ........................... 8
Mathematics 16A-16B-16C, 17A-17B or
$21 \mathrm{~A}-21 \mathrm{~B}$
8-9
Statistics 13, 103
Major Breadth 37
Social Science, Natural Science, and
Agricultural Science. (Students allowed to
take major breadth courses for Passed/Not
Passed grading.)
*For a complete listing of approved subjects
for major breadth see http://
manecon.ucdavis.edu.
Total Depth Subject Matter ..................... 52
Core.
Agricultural and Resource Economics 100A,
100B, 106, 155 and Economics 101
Restricted Electives 32
Choose at least one of the options below:
Managerial Economics option
Agricultural and Resource Economics 18... 4 Choose at least 12 units from: Agricultural and Resource Economics 112, 118, 119 , 136, 157, 171A, 171B.
Select the remaining 16 units from the aforementioned courses or from Agricultural and Resource Economics 115A, 120, 121,
130, 132, 138, 139, 140, 143, 144, $145,146,150,156,175,176,194 \mathrm{HA}$ 194HB, Economics 115A, 121A, 121B, 151A, 151B, 160A, 160B
Environmental and Resource Economics option
Agricultural and Resource Economics 175,
176....................................................... 8 Choose at least 18 units from Agricultural and Resource Economics 15, 120, 138,
$145,146,150,156$, Economics 123, 125, 130, Environmental Science and Policy 168A, 168B, 178. Select the remaining 16 units from the aforementioned courses or upper division courses in Agricultural and Resource Economics and/or Economics, Environmental Science and Policy 160, $161,163,165,166,167,171,172$, 173, Environmental Toxicology 138.
Agricultural Economics option
Choose at least 15 units from Agricultural and Resource Economics 120, 121, 130, $132,138,139,140,145,150$. Select the remaining 17 units from the aforementioned courses, Agricultural and Resource Economics 18, or upper division courses in Agricultural and Resource Economics and/or Economics.
*Students must attain a major GPA of at least a $C$ average (2.000) in all core and upper-division restricted electives. These courses must be taken for a letter grade. (The Department does not average grades after 16 units of repeat, however, nonrepeated Fs are included in the major GPA calculation.)
Total Units for the Major 128-130

## Minor Program Requirements:

The Department of Agricultural and Resource Economics offers four minor program emphases open to students majoring in other disciplines who wish to complement their studies with a minor in Managerial Economics. Some courses have required prerequisites not included as part of the minor and students should plan accordingly. One upper division class to satisfy the minor may be taken for Passed/Not Passed grading. All minor courses must be taken in residence; no more than two pre-approved study abroad courses are allowed.
To qualify for a minor in Managerial Economics, a student must complete the following preparatory courses:

Economics 1 A and 1 B
Mathematics 16A-16B or
$21 \mathrm{~A}-21 \mathrm{~B}$. .6-8
Statistics 13
Managerial Economics ............................ 18
General emphasis
Agricultural and Resource Economics 100A
or the equivalent.
Additional upper division courses in
Agricultural and Resource Economics .. 14
Managerial Economics emphasis
Agricultural and Resource Economics 100A or the equivalent.
Additional upper division courses in
Agricultural and Resource Economics .. 14
Select 9 or more units from Agricultural and
Resource Economics 112, 118, 136, 157,
171A, 171B.
Select additional upper division Agricultural and Resource Economics courses to
complete the 18 -unit total for the minor.
Environmental and Natural Resource
Economics emphasis
Agricultural and Resource Economics 100A
or the equivalent.
Additional upper division courses in
Agricultural and Resource Economics .. 14
Select 9 or more units from Agricultural and
Resource Economics 112, 118, 119, 136,
157, 171A, 171B.
Select additional upper division Agricultural and Resource Economics courses to
complete the 18 -unit total for the minor.
Agricultural Economics emphasis
Agricultural and Resource Economics 100A
or the equivalent
. 4
Additional upper division courses in
Agricultural and Resource Economics .. 14
Select 9 or more units from Agricultural and
Resource Economics 120, 130, 132, 138,
139, 140, 145, 150.
Select additional upper division Agricultural
and Resource Economics courses to
complete the 18 -unit total for the minor
Graduate Study. Students who meet the admis-
sion requirements of Graduate Studies and the Department of Agricultural and Resource Economics may pursue studies leading to the M.S. and Ph.D. degrees. For information on admission to graduate study, degree requirements, consult the Graduate Program Coordinator in the Department of Agricultural and Resource Economics; also see http:// agecon.ucdavis.edu.

Marine and Coastal Science

The major in Marine and Coastal Science focuses on the interdisciplinary nature of marine sciences by exposing students to core, breadth, and focus area courses in the discipline, in addition to a strong foundation of science preparatory material. The major builds upon existing strengths at UC Davis in marine and coastal sciences as well as field-based courses offered at Bodega Marine Laboratory to provide students a unique, interdisciplinary, "hands on" education. Initial advising is provided by the Department of Earth and Planetary Sciences for interested students.
The Program. The major begins with introductory courses in mathematics, chemistry, physics, biology, and earth sciences. These are followed by core courses in Marine Science. The major requirements provide focus and breadth, so that each student gains mastery in one area and broad exposure to many facets of Marine and Coastal Science. Focus and Breadth areas include: Coastal Environmental Processes, Marine Ecology and Organismal Biology, Marine Environmental Chemistry, and Oceans and the Earth System.
In this major, students will be exposed to the foundation disciplines within marine science (biology, chemistry, geology, physics) as well as modern issues facing marine and coastal environments; e.g., climate change, pollution, carbon cycling, conservation. The major requires field experience, independent research or internship, and concludes with a capstone course featuring current research in marine science. These integrative experiences will require students to synthesize the interdisciplinary topics that they have encountered through this degree program. The mastery achieved provides a strong foundation for future careers in academic science, government, policy, and the private sector.
Internships and Career Alternatives. A B.S. in Marine and Coastal Science will provide students with knowledge and practical experience needed to pursue careers in marine science (government, private sector, research) and/or advanced degree programs. The major program includes both research and internship experiences to help prepare students for these career paths.

## Advising. Students majoring in Marine and

 Coastal Science are strongly encouraged to meet with their faculty advisor (assigned, based upon Focus Area choice) once per year to review their coursework plans. Staff advising is available through the Department of Earth and Planetary Sciences, and student peer advisors are available. Faculty advisors include: Tessa Hill (College of Letters and Science), Gary Cherr (College of Agricultural and Environmental Sciences), and Brian Gaylord (College of Biological Sciences).The student's chosen Focus Area will determine the college into which the student is admitted, the college where the degree is awarded, and the associated department:

- Coastal Environmental Processes. College of Agricultural and Environmental Sciences; Environmental Science \& Policy
- Marine Ecology \& Organismal Biology. College of Biological Sciences; Evolution \& Ecology
- Marine Environmental Chemistry. College of Agricultural and Environmental Sciences; Environmental Toxicology
- Oceans and the Earth System. College of Letters and Science; Earth and Planetary Sciences

## B.S. Major Requirements:

$\dagger$ denotes courses only offered at Bodega Marine Laboratory.

Preparatory Subject Matter................ 51-63
Biological Sciences 2A, B, C................. 15
Chemistry 2A, B, C............................ 15
Mathematics 16 A, B, C, 17A, B, C or 21 A,
B, C ................................................9-12
Note: Students in Marine \& Ecology \&
Organismal Biology focus area must take 17 series or 21A, B.
Physics 7A, B, C or 9A, B, C............. 12-15
Chemistry 8A, B for students in Marine
Ecology \& Organismal Biology focus
area ...................................... 6
Evolution \& Ecology 12 and Geology 16 are strongly recommended.
Depth Subject Matter ........................46-97
Geology 116 (Environmental Science \&
Policy 116) ........................................... 3
Statistics 100 or 102
Two courses from: Geology 150A
(Environmental Science \& Policy 150A),
Geology 150B, †Geology 150C
(Environmental Science \& Policy
150C) ..................................................7-8
Two courses from: Atmospheric Sciences 120,
Environmental Science and Policy 100, 110,
Environmental Toxicology 101, Evolution and
Ecology 100, 101, 112+112L, Hydrology
103N.................................................8-9
Evolution \& Ecology 111 (Environmental
Science and Policy 111).
Marine Ecology \& Organismal Biology focus area: Biological Sciences 101, 102+103 or 105, and 104.
Courses cannot be utilized to fulfill multiple
requirements, with the exception that any
Bodega Marine Laboratory course
simultaneously fulfills the field requirement below.

## Focus Area Requirement .. equal or greater

 than 12Complete at least four courses from one category below, totaling equal or greater than 12 units.

Coastal Environmental Processes. Emphasis on processes and environments of the coastal zone, and the strong physical-biological connection that exists here. Courses highlight the critical terrestrial-marine interface and fundamental physical processes in the coastal zone.
This focus area requirement can be fulfilled using: Atmospheric Sciences *121A, *121B, 158, Environmental Toxicology *102A, Environmental Science \& Policy $\dagger 152,155,155 \mathrm{~L}, 166$ N, Geology *156, 182, Hydrology 103N, 134, *143, * 144, Wildlife, Fish \& Conservation Biology *157.
*Some courses may require additional prerequisites, such as: Atmospheric Sciences 120, Math 21D, Chemistry 8B, Environmental Science and Policy 100, Hydrology 103N, Hydrology 141, Hydrology 145, Engineering: Civil and Environmental 144.

## Marine Ecology and Organismal Biology.

Focus on physiological adaptations to the marine environment, and the biology of marine species from the molecular to population levels. Courses include emphasis on the ecological processes that determine the distribution and abundance of marine organisms, and the patterns and mechanisms of evolution in the ocean.

The focus area requirement can be fulfilled using: Animal Science *131, Biological Sciences $\dagger 122$, $\dagger 122 \mathrm{P}$, Environmental Science \& Policy 100, 121, $\dagger 124$, * $155,155 \mathrm{~L}$, Evolution \& Ecology 100, 101, * †106, 112, $112 \mathrm{~L},{ }^{*} \dagger 114,115$, Environmental Toxicology * $\dagger 127$, Neurobiology, Physiology, and Behavior $\dagger 141$ and $\dagger 141 \mathrm{P}$, Wildlife, Fish and Conservation Biology 120, 120L, 121, 122, 130 *Some of these courses may require additional prerequisites, such as: Environmental Science and Policy 100, Evolution
and Ecology 112, Wildlife Fish Conservation 120, Environmental Toxicology 101.
Marine Environmental Chemistry. Emphasis on major themes in marine chemistry, geochemistry, the carbon cycle, and contaminant fate and transport.

The focus area requirement can be fulfilled using: Chemistry 100, Environmental Toxicology *101, *102A, * 120, * $\dagger 127$, Civil \& Environmental
Engineering 140, 140 L, Geology *148, 182,
Hydrology 134, 141, Wildlife, Fish and Conservation Biology 153
*Some courses may require additional prerequisites, such as: Chemistry 8B, Geology 50, 60,
Hydrology 145, Engineering: Civil and Environmental 144.
Oceans and the Earth System. A study of our changing oceans in the context of earth system history, including climate change, paleoceanography, ecological shifts, conservation, and marine policy.

The focus area requirement can be fulfilled using: Atmospheric Sciences 116, Environmental Sci-
ence and Management 120, 121, Environmental
Science \& Policy *110, 161, 162, 166N, *169,
198, Evolution \& Ecology * 120, Geology 107,
107L, 108, 109, 109L, 144, International Rela-
tions *131, Science \& Society 120, Wildlife, Fish and Conservation Biology 154
*Some courses may require additional prerequisites, such as: Atmospheric Sciences 60, Chemistry 8A,B, Geology 1, Economics 1A, Hydrology 145, Environmental Resource Sciences 100, International Relations 1

## Breadth Requirement ........equal or greater

 than 8Complete one course from each category below that is not the student's chosen Focus Area, totaling equal or greater than 8 units.
Coastal Environmental Processes. The breadth requirement can be fulfilled using the following courses: Atmospheric Sciences 158, Environmental Science \& Policy $\dagger 152, ~ * 155$, Geology 182, Wildlife, Fish \& Conservation Biology * 157

## Marine Ecology and Organismal Biology.

 The breadth requirement can be fulfilled using the following courses: Environmental Science \& Policy 124, * 155, Evolution \& Ecology * $\dagger 106$, * † 114 , 115, Environmental Toxicology * $\dagger 127$, Neurobiology, Physiology, and Behavior $\dagger 141+\dagger 141$ PMarine Environmental Chemistry. The breadth requirement can be fulfilled using the following courses: Environmental Toxicology *120, Chemistry 100, Geology 182, Hydrology 134, 141
Oceans and the Earth System. The breadth requirement can be fulfilled using the following courses: Atmospheric Sciences *116, Environmental Science \& Policy 166 N, Evolution \& Ecology * 120, Geology 107, 108, Wildlife, Fish and Conservation Biology 154
*Some courses may require additional prerequisites; see above.

## Field Requirement

The Field Requirement provides exposure to field techniques, experimental design, and the marine environment itself. It is highly recommended that students fulfill this requirement by residence at Bodega Marine Laboratory for one or more courses; see courses denoted with $\dagger$. Bodega Marine Laboratory courses may simultaneously fulfill an additional requirement in categories above.
Alternatively, students may fulfill the Field Requirement by taking two of the following courses; these courses cannot fulfill multiple requirements: Geology 109L, Evolution and Ecology 112L, 115, Environmental Science \& Policy 123, 151L, Geology 182, Wildlife, Fish \& Conservation Biology 100, 102L, 157.

Internship/Research ......... equal or greater than 3
The requirement can be fulfilled by enrollment in: Biological Sciences B124, Geology 192, Environmental Science \& Policy 192, Evolution and Ecology 192, 199 or equivalent. This requirement can be fulfilled at any time prior to graduation, but is recommended for Junior or Senior years.
Total Units for the Major (by chosen Focus
Area):
Coastal Environmental Processes ... 97-140
Marine Ecology \& Organismal
Biology
M .
Marine Environmental Chemistry ... 97-140
Oceans and the Earth System ........ 97-140

Courses in Master of Professional Accountancy (ACC)
201. Financial Reporting (4)

Lecture-4 hours. Restricted to Master of Professional Accountancy graduate students. Coverage includes the fundamentals of accounting and reporting economic events and transactions. Emphasizes the preparation of balance sheets, income statements, statements of cash flow, and statements of stockholders' equity. - I. (I.)
203. Intermediate Financial Reporting (4) Lecture-4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Focuses on the Preparation of complex financial statements. Topics include accounting recognition, measurement,
and disclosure, as well as the theoretical foundations of and motivations for financial reporting choices. II. (II.)
205. Advanced Financial Reporting (4)

Lecture-4 hours. Prerequisite: course 203.
Restricted to graduate students in the Graduate School of Management. Advanced treatment of recognition, measurement, and disclosure including pensions, accounting for income taxes, mergers and acquisitions, consolidations, special-purpose entities, and foreign subsidiaries. Includes accounting for governmental and nonprofit entities, as well as advanced treatment of international accounting stan-dards.-III. (III.)

## 211. Tax Reporting and Analysis (4)

Lecture-4 hours. Restricted to Master of Professional Accountancy graduate students. Introduction to the taxation of business entities and their related transactions, with an emphasis on the details of tax law and tax reporting requirements. Topics include individual, partnership, and corporate taxation, as well as tax theory. Not open for credit to students who have completed Management 264.-I. (I.)

## 213. Intermediate Tax Reporting and

 Analysis (4)Lecture-4 hours. Prerequisite: course 211 or Management 264. Restricted to graduate students in the Graduate School of Management. Detailed analysis of federal taxation of individuals. Topics include the timing of income recognition, deductions and credits for tax purposes, as well as the basics of property transactions. -II. (II.)
215. Advanced Tax Reporting and Analysis

## (4)

Lecture-4 hours. Prerequisite: course 213.
Restricted to graduate students in the Graduate School of Management. Advanced treatment of complex tax transactions and entities. Topics include aspects of federal taxation of entities and the applicable impact upon individual taxpayers. Coverage includes basis analysis as applicable to pass through entities and an introduction to professional responsi-bilities.-III. (III.)
217. Taxation of Individuals, Property, and Estates (4)
Lecture-4 hours. Prerequisite: course 213.
Restricted to graduate students in the Graduate
School of Management. In-depth analysis of individual income tax issues and property transactions including non-taxable exchanges, compensation,
gifts, and transfer taxes. Expanded analysis of multistate tax issues. Emphasis is on the interrelationships of complex individual transactions as well as planning techniques. - III. (III.)
219. Taxation of Business Entities (4)

Lecture-4 hours. Prerequisite: course 213.
Restricted to graduate students in the Graduate School of Management. Analysis of detailed business entity tax issues including basis calculations, alternative minimum taxation, multistate and multinational taxation, stock transactions, and mergers and acquisitions. Tax planning for entities and relationships between business entities and their owners.
Offered irregularly. - III. (III.)
231. Analysis and Use of Accounting

## Reports (4)

Lecture-4 hours. Prerequisite: course 203. Restricted to graduate students in the Graduate School of Management. Evaluation of complex financial accounting reports by managers and persons outside the firm, such as investors, creditors, and financial analysts. Topics include cash flow vs. income measurement, ratio and valuation analysis, and the effects of international accounting standards. Not open for credit to students who have completed Management 272. - III. (III.)

## 241. Auditing and the Accounting

Profession (4)
Lecture-4 hours. Prerequisite: course 201 or Management 200A. Restricted to Graduate School of Management students. Introduction to the audit environment, professional standards, the accounting profession, and the professional responsibilities of
accountants. Integrate audit topics across the areas of financial, cost, tax and systems accounting. (S/U grading only.) -I. (I.)
243. Auditing and Attestation Services (4)

Lecture-4 hours. Prerequisite: course 241.
Restricted to graduate students in the Graduate School of Management. Advanced treatment of the audit process and environment. Topics include audit planning and performance, evidence, internal controls, professional standards, and audit reports.
Reviews, compilations and attestation services are examined, as are governmental agency audits. - III. (III.)
251. Managerial Accounting and Controls (4)

Lecture-4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Analysis of management accounting systems including cost accounting, performance measurement, and compensation and reward systems. Focuses on the production of information useful for managerial decision-making, as well as the design of these systems. Not open for credit to students who have completed Management 27 1.-II. (II.)
253. Accounting Information and Control Systems (4)
Lecture-4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Analysis of information systems used for accounting, recordkeeping, and control. Topics include the regulatory requirements of accounting control systems as well as their implementation and auditing considerations. - III. (III.)

## 261. Communications for Professional

 Accountants (4)Lecture-4 hours. Prerequisite: course 201 or Management 200A. Restricted to graduate students in the Graduate School of Management. Overview of written and oral professional communications with an emphasis on structuring and documenting audits and reports, understanding audiences (investors, creditors, regulators, and other stakeholders), and consideration of ethical and regulatory responsibilities. - II. (II.)
271. Accounting Ethics (4)

Lecture-4 hours. Prerequisite: course 201 or Management 200A. Restricted to Graduate School of Management students. Analysis of accountants' professional responsibilities and ethics. Topics include the behavioral foundations of ethics in a business environment, how those elements affect accountants' integrity, objectivity, and independence. Professional standards related to accountants' conduct are also covered. -I. (I.)

## Courses in Preventive Veterinary Medicine (MPM) <br> Professional

## 402. Medical Statistics I (5)

Lecture- 37 sessions; laboratory- 13 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Statistics in clinical, laboratory and population medicine: graphical and tabular presentation of data; probability; binomial; Poisson, normal, t-, F-, and Chi-square distributions; elementary nonparametric methods; simple linear regression and correlation; life tables. Microcomputer applications of statistical procedures in population medicine.-l. (I.) Farver

## 403. Medical Statistics II (3)

Lecture-20 sessions; laboratory - 10 sessions. Prerequisite: Prerequisite: MPVM standing in the School of Veterinary Medicine and/or successful completion of course 402 (or equivalent) or consent of instructor. Analysis of variance in biomedical sciences; nonparametric methods; multiple regression; biomedical applications of statistical methods. Microcomputer applications to reinforce principles that are taught in lecture. Continuation of course 402.-II. (II.) Farver

## 404. Medical Statistics III (4)

Lecture-3 hours; laboratory-2 hours. Prerequisite: MPVM standing in the School of Veterinary Medicine and/or successful completion of course 403 (or equivalent) or consent of instructor. Continuation of course 403. Analysis of time dependent variation and trends, analysis of multiway frequency tables; logistic regression; survival analysis selecting the best regression equation; biomedical applications.III. (III.) Farver

## 405. Principles of Epidemiology (4)

Lecture-4 hours. Prerequisite: MPVM standing in the School of Veterinarian Medicine or consent of instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as Epidemiology 205A.)-l. (I.) Gold, Miller
405L. Epidemiology Laboratory (1)
Lecture-1 session; lecture/discussion - 1 session; laboratory- 1 session. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Practical application of epidemiological methods using the microcomputer as a tool to solve problems. Utilizes spreadsheets and databases as tools to organize and analyze data. Emphasize epidemiological methods introduced in course 405.
Data sets provided.-I. (I.) Lehenbaver
406A. Epidemiologic Study Design (3) Lecture-20 sessions; discussion-6 sessions; laboratory -4 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Builds on concepts presented in course 405. Concepts of epidemiologic study design-clinical trials, observational cohort studies, case contro studies-introduced in course 405 and covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as Epidemiology 206.) - II. (II.) Miller
408A. Veterinary Research: Planning and Reporting (2)
Lecture-20 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research.-Foley
408B. Veterinary Research: Planning and Reporting (1)
Lecture- 10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Planning, critical analysis, ethics, and written and oral communication of veterinary research.-I. (I.) Foley

408C. Veterinary Research: Planning and Reporting (1)
Discussion-10 sessions. Prerequisite: Master of Preventive Veterinary Medicine standing in the School of Veterinary Medicine or consent of instructor; completion of course 408A and course 408B. Planning, critical analysis, ethics, and written and oral communication of veterinary research. - II. (II.) Chomel

## 410. Animal Health Policy and Risk

## Communication (1)

Discussion -10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. International, national and state policy issues affecting veterinary medicine, how policy is made, organizational cultures, the role of science in policy-making, ten best practices in risk/crisis communication, message-mapping for the public and policy-makers, and effective meeting management. - I. (I.) Mazet

## 426. Applied Epidemiologic Problem Solving (1)

Laboratory - 10 sessions. Prerequisite: MPVM standing in the School of Veterinary Medicine or consent of instructor. Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation; descriptive statistical analysis using spreadsheets, database management, and Epi Info software. Builds on skills learned in courses 405L and 406. - II. (II.)

## Maternal and Child Nutrition (Department of Nutrition)

Francene M. Steinberg, Ph.D., Chairperson of the Department
Department Office. 3135 Meyer Hall
530-752-4630;
http://www.extension.ucdavis.edu/macnutrition

## Faculty

Faculty members are listed on the website.
Graduate Study. The Nutrition Department offers the degree of M.A.S. in Maternal and Child Nutrition. This program consists of three required six-unit core courses (Nutrition During Pregnancy, Lactation and Infant Nutrition, and Child and Adolescent Nutrition), six to eight units of special topics seminars, two units of electives, and a six-unit student project (produced in consultation with a three-member guidance committee) for a total of 36 units. Each of the core courses will comprise 10 weeks of inclass instruction twice per week for two-and-a-half hours per meeting. Classes will also include online discussion of related material and readings.
Each student will be assigned a three-member guidance committee consisting of two members of the teaching faculty and an additional qualified faculty member to advise the student in choosing an elective and identifying a student project.
Preparation. Admission to the program requires a bachelor's degree with prior course work that includes (or is comparable to): one year of general chemistry, two quarters of organic chemistry, a course in statistics, one course in general physiology, and two quarters of the biochemistry of nutrition.
Graduate Advisors. Kathryn G. Dewey, Ph.D.,
Professor (Nutrition), Jane Heinig, Ph.D., Academic Administrator (Nutrition)
Courses in Maternal and Child Nutrition.
See courses under Nutrition, on page 454.

## Mathematical and Physical Sciences

(College of Letters and Science)
Louise H. Kellogg, Ph.D., Program Director
Program Office. 118 Everson Hall

## Committee in Charge

Andreas J. Albrecht, Ph.D. (Physics)
Sheila David, Ph.D. (Chemistry)
Joel Hass, Ph.D. (Mathematics)
Isabel P. Montañez, Ph.D. (Earth and Planetary Sciences)
Motohico Mulase, Ph.D. (Mathematics)
Academic Senate Distinguished Teaching Award
Wolfgang Polonik, Ph.D. (Statistics)
Francisco J. Samaniego, Ph.D. (Statistics)
Academic Senate Distinguished Teaching Award
Howard J. Spero, Ph.D. (Earth and Planetary Sciences)
Xiangdong Zhu, Ph.D. (Physics)

## The Program of Study

The Division of Mathematical and Physical Sciences teaches students to use experimental studies and theoretical analyses to find solutions to real world problems. Students learn to address issues such as cleaning up the environment, preserving natural resources and creating innovative materials for the future. From the study of atoms to the examination of distant galaxies, from abstract number theory to the development of new chemical compounds, the division provides students with the skills to build the world of tomorrow.
The program in Mathematical and Physical Sciences provides an organizational structure within the College of Letters and Science for facilitating the development of innovative curricular initiatives across the mathematical and physical sciences, including offering broadly conceived, integrative undergraduateand graduate-level courses. The program also may house resident faculty pursuing interdepartmental research and teaching in this area of inquiry.

## Courses in Mathematical and

Physical Sciences (MPS)

## Lower Division

1. General Science: Science in the News (4) Lecture-3 hours; laboratory/discussion-1 hour. Prerequisite: lower division standing. Basic principles in science including numeracy, scale, energy, and time; the scientific method; good and bad science. Emphasis on science topics recently in the news. GE credit: SciEng.-III.

## 11A-11B. Mathematical and Physical

## Sciences Seminar (2-2)

Lecture-2 hours. Prerequisite: mentorship for undergraduate research participants in the physical and mathematical sciences. Research and writing in the mathematical and physical sciences. Presentations by various science faculty members. - $\mathrm{I}-\mathrm{II}$. (I-II.)

## Mathematics

See Mathematics; and Applied Mathematics (A Graduate Group), on page 165 .

John Chuchel, Ph.D., Lecturer
Ali Dad-del, Ph.D., Lecturer
Academic Federation Excellence in Teaching Award
Duane Kouba, Ph.D., Lecturer
Lawrence Marx, Ph.D., Lecturer

## The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.
The Program. Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty adviser. The upper division course offering is grouped into entry level, core, and enrichment courses. Entry level courses are designed to serve as a bridge between the concrete mathematics of the lower division and the more abstract concepts taught in upper division courses. The core classes are intended to provide basic mathematical techniques, whereas the enrichment choices allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.
Career Alternatives. A degree in mathematics provides entry to many careers in addition to teaching. For instance, operations research, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter............... 43-50
Mathematics 12 (or high school
equivalent).
.. 0-3
Mathematics $21 \mathrm{~A}, 21 \mathrm{~B}, 21 \mathrm{C}, 21 \mathrm{D}, 22 \mathrm{~B}$,
25 .................................................... 23
One of the following two options: (a)
Mathematics 22A and 108 OR (b)
Mathematics 67 ..
.4-7
Computer Science 30 or Engineering 6.... 4
Mathematics 22AL or equivalent MATLAB
knowledge.
..0-1
Additional non-Mathematics courses chosen
from natural sciences.
12
NOTE: Basic knowledge of MATLAB is
required for both Mathematics 67 and 22A.
Students can learn it on their own, enroll in
Engineering 6, Mechanical Engineering 5 or
in the one unit course Mathematics 22AL (can
be taken concurrently).
Depth Subject Matter ......................... 37-42
A. Entry Level (Optional) ...................... 0-4

Suggested choice; one course from:
Mathematics 108, 114, 115A, 141, 145
B. Core.............................................. 16

Mathematics 125A . .4
Mathematics 125B........................................ 4
Mathematics 135A ............................. 4
Mathematics 150A .................................... 4
C. Choose one Plan from the following two;
up to 4 of these 18 units may be approved
upper division courses outside of the
Department of Mathematics with extensive
use of mathematics..
18

Plan 1: General Mathematics
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser.
Plan 2: Secondary Teaching
Mathematics 111.
... 18

Mathematics 115A .4

Mathematics 141 4
Additional upper division mathematics units selected in consultation with and subject to approval of an adviser.
NOTE: Students who wish to satisfy the single subject matter waiver for the teaching credential should see an adviser as early as possible.
D. Capstone Course: Mathematics 189 or

192 (Internship in Applied Mathematics or
194 (Undergraduate Thesis) or 180 (Special Topics) or an approved substitute in consultation with the Undergraduate Vice
Chair.
Total Units for the Major ................... 80-92
Applied Mathematics

## B.S. Major Requirements:

Preparatory Subject Matter............... 42-52
Mathematics 12 (or high school
equivalent)0-3

Mathematics 21A, 21B, 21C, 21D,
22B, 25 .. 23
One of the following two options: (a)
Mathematics 22A and 108 OR (b)
Mathematics 67
4-7
Mathematics 22AL or equivalent basic
knowledge of MATLAB.0-1

Computer Science 30, 40 ....................... 8
One two-quarter sequence from Physics 9A-
9B; Biological Sciences 2A-2B; Chemistry 2A-
2B; Economics 1A-1B; Statistics 32, 100; or other applied preparatory courses approved by your adviser.

7-10
NOTE: Basic knowledge of MATLAB is required for both Mathematics 67 and 22A. Students can learn it on their own, enroll in Engineering 6, Mechanical Engineering 5 or in the one unit course Mathematics 22AL (can
be taken concurrently).
Depth Subject Matter ......................... 51-56
A. Entry Level (Optional) ...................... 0-4 Suggested choice; one course from: Mathematics 108, 114, 115A, 141, 145
B. Core.

Mathematics 150A
Mathematics 135A

Mathematics 125A
Mathematics 125B 4

Mathematics 119A
Mathematics 128A

## Total Units for the Major <br> $\qquad$ .86-98

Recommended Language Preparation. Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.
Major Advisers. For a current list of faculty and staff advisers, contact the Student Services office at studentservices@math.ucdavis.edu, or our see https://www.math.ucdavis.edu/undergrad/ advising/advisers/
Depth Subject Matter Requirements. Certain mathematically oriented courses given by other departments are admissible in partial satisfaction of the depth subject matter requirements with prior departmental approval. Up to three units of Mathematics 194 may be counted toward the depth subject matter requirements. Additionally, up to three units of Mathematics 198 or Mathematics 199, can be counted.

Statement of Objectives. As early as possible, but no later than the last quarter of the sophomore year or no later than the beginning of the first quarter of the junior year for transfer students, each prospective mathematics major, in consultation with a faculty adviser, should file a formal program of study in one of the majors offered in mathematics. Forms to be used for this are available on our website or from the Department office. Failure to file a formal program could lead to a delay in graduation.
Information for Undergraduates. Assistance in planning an undergraduate major program in mathematics is available on our website, as well as by consulting a faculty adviser. Information about the Department's faculty advisers can be found on our website.
Mathematics Placement Requirement. Students who wish to enroll in Mathematics 12, 16A, 17A, $21 \mathrm{~A}, 21 \mathrm{AH}$, and 36 must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics' website (http://www.math.ucdavis.edu/undergrad/ math_placement) well in advance of enrolling.
Department Honors. Students who have completed at least 135 units with a minimum GPA of 3.500 in courses counted towards their major will be considered for Department Honors. Students who are eligible will be notified of their standing by the department at the beginning of the fall quarter of their senior year.
Students who meet the minimum GPA requirement for honors at graduation for the College of Letters and Science and who complete a senior project as part of Math 194 or 199 units in consultation with their faculty adviser may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see our website at http:// www.math.ucdavis.edu.

## Minor Program Requirements:

UNITS

## Mathematics

 20Upper division units in mathematics; exclusive of Mathematics 192, 197TC, 198, 199.

Teaching Credential Subject Representative. Ali Dad-del
Graduate Study. The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

## Courses in Mathematics (MAT)

## Lower Division

## B. Elementary Algebra (no credit)

Lecture-3 hours. Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.)-I. (I.)

## C. Trigonometry (no credit)

Lecture-2 hours. Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.) - I. (I.)

## D. Intermediate Algebra (no credit)

Lecture-3 hours. Basic concepts of algebra, prepares student for college work in mathematics, such as course 16A or 21A. Functions, equations, graphs, logarithms, and systems of equations.

Offered only if sufficient number of students enroll. Not open to Concurrent student enrollment. (P/NP grading only.) $-I$, II. (I, II.)
12. Precalculus (3)

Lecture-3 hours. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Diagnostic Examination. Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic and trigonometric functions, sketching surfaces and solids. Not open for credit to students who have completed any of courses 16A, 16B, 16C, 17A, $17 \mathrm{~B}, 17 \mathrm{C}, 21 \mathrm{~A}, 21 \mathrm{~B}$, or 21 C with a C - or better. GE credit: SciEng | QL, SE, SL. -I, II, III. (I, II, III.)
Note: Mathematics 16A, 16B, and 16C are intended for students who will take no more Mathematics courses. Mathematics 17A, 17B, and 17C have the same level of rigor as 16A, 16B, and 16C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology students who do not wish to take more rigorous Mathematics courses.

## 16A. Short Calculus (3)

Lecture-3 hours. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed course 17B, 17C, $21 \mathrm{~A}, 21 \mathrm{~B}$, or 21 C . Only 2 units of credit to students who have completed course 17A. GE credit:
SciEng | QL, SE, SL.-I, II, III. (II, II, III.)

## 16B. Short Calculus (3)

Lecture-3 hours. Prerequisite: course 16A, 17A, or 21 A . Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not open for credit to students who have completed courses 17C, 21 B , or 21 C . Only 2 units of credit to students who have completed course 17B. GE credit: SciEng | QL, SE, SL.-I, II, III. (II, II, III.)

## 16C. Short Calculus (3)

Lecture-3 hours. Prerequisite: course 16B, 17B, or 21B. Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have completed course 21C. Only 2 units of credit to students who have completed course 17C. GE credit: SciEng | QL, SE, SL. -I, II, III. (I, II, III.)
Note: Mathematics 16A, 16B, and 16C are intended for students who will take no more Mathematics courses. Mathematics 17A, 17B, and 17C have the same level of rigor as 16A, 16B, and 16C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology students who do not wish to take more rigorous Mathematics courses.
17A. Calculus for Biology and Medicine (4) Lecture-3 hours; discussion-1 hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Not open for credit to students who have completed course 16B, $16 \mathrm{C}, 21 \mathrm{~A}, 21 \mathrm{~B}$, or 21 C ; only 2 units of credit to students who have completed course 16A. GE credit: SciEng | QL, SE, SL.-I, II, III. (I, II, III.)
17B. Calculus for Biology and Medicine (4) Lecture-3 hours; discussion-1 hour. Prerequisite: course 16A, 17A, or 21 A . Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration includ-
ing integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Not open for credit to students who have completed course 16C, 21 B, or 21 C . Only 2 units of credit for students who have completed course 16B. GE credit: SciEng | QL, SE, SL. - I, II, III. (I, II, III.)
17C. Calculus for Biology and Medicine (4) Lecture-3 hours; discussion-1 hour. Prerequisite: course 16B, 17B, or 21 B . Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Not open for credit to students who have completed course 21C; only 2 units of credit to students who have completed course 16C. GE credit: SciEng | SE, SL.-III. (III.)
21 A. Calculus (4)
Lecture-3 hours; discussion - 1 hour. Prerequisite: two years of high school algebra, plane geometry, plane trigonometry, and analytic geometry, and satisfying the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hopital's rule. Not open for credit to students who have completed course 16B, 16C, 17B, or 17C. Only 2 units of credit to students who have completed course 16A or 17A. GE credit: SciEng | QL, SE, SL.-I, II, III. (I, II, III.)

## 21 AH. Honors Calculus (4)

Lecture/discussion-4 hours. Prerequisite: a Precalculus Diagnostic Examination score significantly higher than the minimum for course 21 A is required. More intensive treatment of material covered in course 21A. Offered irregularly. GE credit: SciEng | QL, SE.
21 AL. Emerging Scholars Program Calculus Workshop (2)
Workshop-6 hours. Prerequisite: concurrent enrollment in course 21 A . Functions, limits, continuity.
Slope and derivative. Same course content as course 21 A . Enrollment for students in the Emerging Scholars Program by instructor's invitation only. Offered irregularly. (P/NP grading only.) GE credit: SE.
$21 B$. Calculus (4)
Lecture-3 hours; discussion - 1 hour. Prerequisite: course 21 A or 21 AH . Continuation of course 21 A . Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface of revolution. Only 2 units of credit to students who have completed course 16B, 16C, 17B, or 17C. GE credit: SciEng | QL, SE, SL. -I, II, III. (I, II, III.)

## 21 BH. Honors Calculus (4)

Lecture/discussion -4 hours. Prerequisite: a grade of $B$ or better in course 21 A or 21 AH . More intensive treatment of material covered in course 21B. Students completing 21 BH can continue with course 21 CH or the regular 21 C . Offered irregularly. GE credit: SciEng | SE.
21 BL. Emerging Scholars Program Calculus Workshop (2)
Workshop-6 hours. Prerequisite: course 21A or 21 AH ; concurrent enrollment in 21 B . Continuation of course 21A. Same course content as 21 B. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. Offered irregularly. (P/ NP grading only.) GE credit: SE.

## $21 C$ Calculus (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 16C, 17C, 21 B , or 21 BH . Continuation of course 21 B . Sequences, series, tests for convergence, Taylor expansions. Vector algebra, vector calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Applications to physical systems. GE credit: SciEng | QL, SE. -I, II, III. (I, II, III.)

21CH. Honors Calculus (4)
Lecture/discussion-4 hours. Prerequisite: a grade of B or better in course 21 B or 21 BH . More intensive treatment of material covered in course 21 C .
Offered infrequently. GE credit: SciEng | SE.
21 CL. Emerging Scholars Program Calculus Workshop (2)
Workshop-6 hours. Prerequisite: course 21B or 21 BH ; concurrent enrollment in 21 C . Continuation of course 21B. Same course content as course 21C. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) Offered irregularly. GE credit: SE.

## 21D. Vector Analysis (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 21 C or 21 CH . Continuation of course 21 C . Definite integrals over plane and solid regions in various coordinate systems. Line and surface integrals. Green's theorem, Stoke's theorem, divergence theorem. GE credit: SciEng | QL, SE. -I, II, III. (I, II, III.)

## 21M. Accelerated Calculus (5)

Lecture/discussion-4 hours; discussion/laboratory - 1 hour. Prerequisite: grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB exam, and obtaining the required score on the Precalculus Diagnostic Examination and its trigonometric component. Accelerated treatment of material from courses 21 A and 21B, with detailed presentation of theory, definitions, and proofs, and treatment of computational aspects of calculus at a condensed but sophisticated level. Not open for credit to students who have completed course 21 A or 21 B ; only 3 units of credit will be allowed to students who have completed course 16A and only 2 units of credit will be allowed to students who have completed course
16B. Offered irregularly. GE credit: SciEng | SE.
22A. Linear Algebra (3)
Lecture-3 hours. Prerequisite: nine units of college mathematics and Engineering 6 or knowledge of Matlab or course 22AL (to be taken concurrently). Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: SciEng | QL, SE.I, II, III. (I, II, III.)
22AL. Linear Algebra Computer Laboratory (1)

Laboratory-2-3 hours. Prerequisite: nine units of college mathematics. Introduction to Matlab and its use in linear algebra. (P/NP grading only.) GE credit: QL, SE. -I, II, III. (I, II, III.)

## 22B. Differential Equations (3)

Lecture-3 hours. Prerequisite: courses 21C; 22A or 67. Solutions of elementary differential equations. GE credit: SciEng | QL, SE.-I, II, III. (I, II, III.)

## 25. Advanced Calculus (4)

Lecture/discussion-4 hours. Prerequisite: course
21B. Introduction to the rigorous treatment of abstract mathematical analysis. Proofs in mathematics, induction, sets, cardinality; real number system, theory of convergence of sequences. Not open for credit to students who have completed former course 127A. GE credit: SciEng | SE.-I, III. (I, III.)

## 36. Fundamentals of Mathematics (3)

Lecture-3 hours. Prerequisite: satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. Not open for credit to students who have completed course 108. Offered irregularly. GE credit: SciEng. - IV.

## 67. Modern Linear Algebra (4)

Lecture/discussion-4 hours. Prerequisite: course 21A or consent of instructor. Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition and positive definiteness.

Only one unit of credit to students who have completed course 22A. GE credit: SciEng | SE. - I, II. II, II.)

## 71A-71B. Explorations in Elementary

 Mathematics (3-3)Lecture-2 hours; laboratory-3 hours. Prerequisite: two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. (Deferred grading only, pending completion of sequence.) Offered irregularly.

## 89. Elementary Problem Solving (1)

Lecture - 1 hour. Prerequisite: high school mathematics through precalculus. Solve and present solutions to challenging and interesting problems in elementary mathematics. May be repeated one time for credit. (P/NP grading only.) Offered irregularly.

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) -I, II, III. (I, II, III.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.) -I, II, III. (I, II, III.)

## Upper Division

108. Introduction to Abstract Mathematics (4)

Lecture/discussion-4 hours. Prerequisite: course 21B. A rigorous treatment of mathematical concepts with emphasis on developing the ability to understand abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SciEng, Wrt | SE. - I, III. (I, III.)

## 111. History of Mathematics (4)

Lecture-3 hours; term paper or discussion. Prerequisite: eight units of upper division Mathematics; one of the following: course $25,67,108,114,115 \mathrm{~A}$, 141, or 145. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SciEng | SE.-II. (II.)
114. Convex Geometry (4)

Lecture/discussion-4 hours. Prerequisite: courses $21 \mathrm{C} ; 22 \mathrm{~A}$ or 67 . Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper-division courses. Offered in alternate years. GE credit: SciEng | SE. - (II.)

## 115B. Number Theory (4)

Lecture -3 hours; extensive problem solving. Prereqvisite: courses 22A or 67 (or equivalent) and 115A (or equivalent). Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. Offered in alternate years. GE credit:
SciEng | QL, SE, SL. -II.

## 116. Differential Geometry (4)

Lecture -3 hours; extensive problem solving. Prereqvisite: course 125A. Vector analysis, curves, and surfaces in three dimensions. Offered in alternate years. GE credit: SciEng | SE.- (III.)
118A. Partial Differential Equations:

## Elementary Methods (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: courses 21D; 22B; 22A or 67.Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace's equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonhomogeneous equations. GE credit: SciEng | QL, SE.-I. (I.)

## 118B. Partial Differential Equations:

 Eigenfunction Expansions (4)Lecture -3 hours; extensive problem solving. Prerequisite: course 118A. Sturm-Liouville Theory; selfadjoint operators; mixed boundary conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains;
nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations. GE credit: SciEng | QL, SE. - II. (II.)

## 118C. Partial Differential Equations: <br> Green's Functions and Transforms (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: course 118B. Green's functions for one-dimensional problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace transform and solution of partial differential equations. Offered irregularly. GE credit: SciEng | QL, SE.
119A. Ordinary Differential Equations (4)
Lecture-3 hours; extensive problem solving. Prereqvisite: courses 21D; 22B; 22A or 67. Scalar and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Liapunov's method; limit cycles; Poincare Bendixon theory. GE credit: SciEng | QL, SE. - II. (II.)
119B. Ordinary Differential Equations (4) Lecture-3 hours; extensive problem solving. Prereqvisite: course 119A. Lorentz equations; Poincare maps; center manifolds and normal forms; scalar and planar maps; phase space analysis for iterated maps; period-doubling bifurcation; lyapunov exponent; chaos and symbolic dynamics; strange attractors; fractals. GE credit: SciEng | QL, SE.-III. (III.)
124. Mathematical Biology (4)

Lecture-3 hours; project. Prerequisite: courses 22A or 67; 22B. Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. Computer simulation methods applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB programming required. Offered in alternate years. GE credit: SciEng | QL, SE. - (III.)

## 124. Mathematical Biology (4)

Lecture-3 hours; project. Prerequisite: courses 22A or 67; 22B. Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. Computer simulation methods applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB programming required. Offered in alternate years. GE credit: QL, SE. - (III.)

## 125A. Real Analysis (4)

Lecture/discusssion-4 hours. Prerequisite: course 25. Functions, limits of functions, continuity and uniform continuity, sequences of functions, series of real numbers, series of functions, power series. Not open for credit to students who have completed former course 127B. GE credit: SciEng | SE.-I, II. (I, II.)

## 125B. Real Analysis (4)

Lecture/discusssion-4 hours. Prerequisite: course 67 and 125A. Theory of the derivative, Taylor series, integration, partial derivatives, Implicit Function Theorem. Not open for credit to students who have completed former course 127C. GE credit: SciEng | SE. - II, III. (II, III.)

## 128A. Numerical Analysis (4)

Lecture-3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; course 21C; Error analysis, approximation, interpolation, numerical differentiation and integration. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: SciEng | QL, SE.-I. (I.)

## 128B. Numerical Analysis in Solution of

 Equations (4)Lecture-3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; courses $21 \mathrm{C} ; 22 \mathrm{~A}$ or 67 . Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: SciEng | QL, SE. - II. (II.)

## 128C. Numerical Analysis in Differential

## Equations (4)

Lecture-3 hours; project. Prerequisite: Computer Science: Engineering 30 or equivalent; courses 22A or $67 ; 22 \mathrm{~B}$. Difference equations, operators, numerical solutions of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required. GE credit:
SciEng | QL, SE. - III. (III.)

## 129. Fourier Analysis (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: courses 21D; 22A or $67 ; 22 \mathrm{~B} ; 25$ or consent of instructor. Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and differential equations. GE credit: SciEng | QL, SE. - III. (III.)

## 133. Mathematical Finance (4)

Lecture -3 hours; extensive problem solving. Prereqvisite: courses 67; 135A. Analysis and evaluation of deterministic and random cash flow streams, yield and pricing of basic financial instruments, interest rate theory, meanvariance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required. Offered in alternate years. GE credit: SciEng | QL, SE, SL.III.

## 135A. Probability (4)

Lecture/discussion-4 hours. Prerequisite: course 125A. Probability space; discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal density functions; expectation, moments, variance, Chebyshev inequality; sums of random variables, random walk, large number law, central limit theorem. Not open for credit to students who have completed former course 131. GE credit: SciEng | QL, SE. -I, II. (I, II.)

## 135B. Stochastic Processes (4)

Laboratory/discussion - 4 hours. Prerequisite: courses 135A; 22A or 67. Generating functions, branching processes, characteristic function; Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queveing theory, martingales. Not open for credit to students who have completed former course 132A. GE credit: SciEng | QL, SE. - III. (III.)

## 141. Euclidean Geometry (4)

Lecture/discussion-4 hours. Prerequisite: courses $21 \mathrm{~B} ; 22 \mathrm{~A}$ or 67 . An axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SciEng | SE, VL. - III. (III.)

## 145. Combinatorics (4)

Lecture/discussion-4 hours. Prerequisite: course 21B. Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SciEng | QL, SE. - II. (II.)

## 146. Algebraic Combinatorics (4)

Lecture/discussion-4 hours. Prerequisite: courses 25; 22A or 67; 145. Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former course 149A. GE credit: SciEng | SE.-III. (III.)

## 147. Topology (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: courses 22A or 67; 125A. Basic notions of point-set and combinatorial topology. GE credit: SciEng | SE. - III. (III.)

## 148. Discrete Mathematics (4)

Lecture/discussion - 4 hours. Prerequisite: course 67; or courses 22A and 25. Coding theory, error correcting codes, finite fields and the algebraic con-
cepts needed in their development. Not open for credit to students who have completed former course 149B. GE credit: SciEng | QL, SE.-I. (I.)

## 150A. Modern Algebra (4)

Lecture/discussion-4 hours. Prerequisite: course 67. Basic concepts of groups, symmetries of the plane. Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction. GE credit: SciEng | SE.-I. (I.)

## 150B. Modern Algebra (4)

Lecture/discussion-4 hours. Prerequisite: course 150A. Bilinear forms, rings, factorization, modules. GE credit: SciEng | SE.-II. (II.)

## 150C. Modern Algebra (4)

Lecture/discussion-4 hours. Prerequisite: course 150B. Group representations, fields, Galois theory. GE credit: SciEng | SE.-III. (III.)
160. Mathematical Foundations of Database Theory, Design and Performance (4)

Lecture-3 hours; project. Prerequisite: course 22A or 67; one of the following courses: $25,108,114$, 115A, 141, or 145. Relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies. Separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; buffering; operating system contention; CPU intensive operations. Offered irregularly. GE credit: SciEng | QL, SE. - (III.)

## 165. Mathematics and Computers (4)

Lecture-3 hours; project. Prerequisite: Computer Science Engineering 30 or equivalent; course 22B and one of the following courses: $25,67,108$, 114, 115A, 141 or 145. Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers play in mathematical conjecture and experimentation. GE credit: SciEng | QL, SE.-I. (I.)

## 167. Applied Linear Algebra (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: course 22A or 67; knowledge of a programming language. Applications of linear algebra; LU and QR matrix factorizations, eigenvalue and singular value matrix decompositions. GE credit:
SciEng | QL, SE.-I, III. (I, III.)

## 168. Optimization (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: Computer Science: Engineering 30 or equivalent; courses 21 C or 25 ; 22 A or 67 . Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required. GE credit: SciEng | QL, SE. - III. (III.)

## 180. Special Topics (3)

Lecture-3 hours. Prerequisite: courses 25 and 67, or consent of instructor. Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topic differs. Offered irregularly. GE credit:
SciEng | SE.-I, II, III. (I, II, III.)

## 185A. Complex Analysis (4)

Lecture-3 hours; extensive problem solving. Prereq visite: courses 67, 125A. Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory. GE credit: SciEng | SE.-II. (II.)

## 185B. Complex Analysis (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: course 185A. Analytical functions, elementary functions and their mapping properties, applications of Cauchy's integral theorem, conformal mapping
and applications to heat flow and fluid mechanics. Offered in alternate years. GE credit:
SciEng | SE. - III.

## 189. Advanced Problem Solving (3)

Lecture-3 hours. Prerequisite: courses 21D; 22A or 67; 25 . Solution and presentation of advanced problem solving techniques. Solve and present interesting and challenging problems of all areas of mathematics. Offered irregularly. GE credit: SciEng,

## Wrt | OL, QL, SE, WE. - III. (III.)

## 192. Internship in Applied Mathematics (1-

## 3)

Internship; final report. Prerequisite: upper division standing; project approval by faculty sponsor prior to enrollment. Supervised work experience in applied mathematics. May be repeated for credit for a total of 10 units. (P/NP grading only.) -I , II, III. (I, II, III.)

## 194. Undergraduate Thesis (3)

Prerequisite: consent of instructor. Independent research under supervision of a faculty member. Student will submit written report in thesis form. May be repeated with consent of Vice Chairperson. (P/NP grading only.) GE credit: SE. -I, II, III. (I, II, III.)

## 197TC. Tutoring Mathematics in the

## Community (1-5)

Seminar-1-2 hours; laboratory-2-6 hours. Prerequisite: upper division standing and consent of instructor. Special projects in mathematical education developing techniques for mathematics instruction and tutoring on an individual or small group basis. May be repeated one time for credit. (P/NP grading only.)-I, II, III. (I, II, III.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)-I, II, III. (I, II, III.)

## 199. Special Study for Advanced

## Undergraduates (1-5)

(P/NP grading only.) GE credit: SE.-I, II, III. (I, II, III.)

## Graduate

200A-200B. Problem-Solving in Analysis

## (1-1)

Lecture - 1 hour; extensive problem solving. Prerequisite: courses 201 ABC . Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated two times for credit. (Deferred grading only, pending completion of sequence.) - III, I. (III, I.)

## 201A-201B-201C. Analysis (4-4-4)

Lecture-3 hours; term paper or discussion -1 hour. Prerequisite: graduate standing in Mathematics or Applied Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series.
Spectrum of bounded and compact linear operators. Linear differential operators and Green's functions. Distributions. Fourier transform. Measure theory. Lp and Sobolev spaces. Differential calculus and variational methods. - $\mathrm{I}-\mathrm{II}$-III. ( $\mathrm{I}-\mathrm{II}-\mathrm{III}$.

## 202. Functional Analysis (4)

Lecture - 3 hours; term paper. Prerequisite: courses 201A and 201B. Hahn-Banach, Open mapping, Closed graph, Banach-Steinhaus, and Krein-Milman. Subspaces and quotient spaces. Projections. Weak and weak-star topologies. Compact and adjoint operators in Banach spaces. Fredholm theory. Functions of operators. Spectral theory of self-adjoint operators. Offered in alternate years. - II.

## 205. Complex Analysis (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 185 or the equivalent, or consent of instructor. Analytic continuation, Riemann surfaces, conformal mappings, Riemann mapping theorem, entire functions, special functions, elliptic functions. - III. (III.)

205A. Complex Analysis (4)
Lecture-3 hours; term paper or discussion - 1 hour. Cauchy's theorem, Cauchy's integral formulas, meromorphic functions, complex logarithm, entire functions, Weierstrass infinite product formula, the gamma and zeta functions, and prime number theorem. - II. (II.)
205B. Complex Analysis (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 205A or consent of instructor. Conformal mappings, the Schwarz lemma, analytic automorphisms, the Riemann mapping theorem, elliptic functions, Eisenstein series, the Jacobi theta functions, asymptotics, Bessel functions, the Airy function, topics on special functions and Riemann surfaces. May be repeated two times for credit if topic varies - III. (III.)

## 206. Measure Theory (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: course 125B. Introduction to measure theory. The study of lengths, surface areas, and volumes in general spaces, as related to integration theory. Offered in alternate years. - III.
207A-207B-207C. Methods of Applied

## Mathematics (4-4-4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: graduate standing or consent of instructor. Ordinary differential equations and dynamical systems. Variational principles. Eigenfunctions, integral equations and Green's functions. Complex analysis and contour integration. Laplace's equation. Diffusion equations. Wave phenomena. Dimensional analysis and scaling. Asymptotic expansions and perturbation theory. Stochastic processes and Brownian motion. - $\mathrm{I}-\mathrm{II}-\mathrm{III}$. (I-II-III.)

## 215A-215B-2 15 C . Topology (4-4-4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Offered in alternate years. - (II-IIII.)

## 216. Geometric Topology (4)

Lecture-3 hours; extensive problem solving-1 hour. Prerequisite: course 215A. Introduction to measure theory. Topology of two- and three-dimensional manifolds. Surfaces and their diffeomorphisms. Dehn twists. Heegaard surfaces. Theory of 3-dimensional manifolds. Knots and knot theory. Hyperbolic manifolds and geometric structures. May be repeated one time for credit. Offered in alternate years. - (II.)

## 218A-218B-218C. Partial Differential

## Equations (4-4-4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: $218 \mathrm{~A}-201 \mathrm{ABC}$; $218 \mathrm{~B}-218 \mathrm{~A}$; $218 \mathrm{C}-218 \mathrm{~B}$; or consent of the instructor. A yearlong sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobelev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Offered in alternate years. -I-II-III. (I-II-III.)

## 221 A. Mathematical Fluid Dynamics (4)

Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 118B or consent of instructor. Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves. Offered in alternate years. - (I.)
221 B. Mathematical Fluid Dynamics (4) Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: course 118B or consent of instructor. Kinematics and dynamics of fluids. The Euler and Navier-Stokes equations. Vorticity dynamics. Irrotational flow. Low Reynolds number flows and the Stokes equations. High Reynolds number flows and boundary layers. Compressible fluids. Shock waves. Offered irregularly.-(II.)

## 226A. Numerical Methods: Fundamentals

 (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 128 AB or equivalent, or consent of instructor; familiarity with some programming language. Fundamental principles and methods in numerical analysis, including the concepts of stability of algorithms and conditioning of numerical problems, numerical methods for interpolation and integration, eigenvalue problems, singular value decomposition and its applications. Offered in alternate years. - (I.)

## 226B. Numerical Methods: Large-Scale

## Matrix Computations (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 167 or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for large-scale matrix computations, including direct and iterative methods for the solution of linear systems, the computation of eigenvalues and singular values, the solution of leastsquares problems, matrix compression, methods for the solution of linear programs. Offered in alternate years. - (II.)

## 226C. Numerical Methods: Ordinary

## Differential Equations (4)

Lecture-3 hours; term paper or discussion -1 hour. Prerequisite: course 22B or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for the solution of ordinary differential equations, including methods for initial-value problems and two-point boundary-value problems, theory of and methods for differential algebraic equations, dimension reduction of largescale dynamical systems. Offered in alternate years. - (III.)

## 227. Mathematical Biology (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: graduate standing or consent of instructor. Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis. Offered in alternate years. -1 .

## 228A-228B-228C. Numerical Solution of

 Differential Equations (4-4-4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 128C. Numerical solutions of initial-value, eigenvalue and boundary-value problems for ordinary differential equations. Numerical solution of parabolic and hyperbolic partial differential equations. Offered in alternate years. - $\mathrm{I}-\mathrm{II}$ IIII.

## 235A-235B-235C. Probability Theory

 (4-4-4)Lecture-3 hours; term paper or discussion - 1 hour. Prerequisite: 235 A -courses 125 B and 135 A or Statistics 131A or consent of instructor; 235Bcourse 235A/Statistics 235A or consent of instructor; 235C-course 235B/Statistics 235B or consent of instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from martingales, Markov chains, ergodic theory. (Same course as Statistics 235A-235B235C.) - I-IIIII. (I-II-III.)

## 236A. Stochastic Dynamics and

 Applications (4)Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 201C or course/Statistics 235B; course/Statistics 235A-235B-235C recommended. Stochastic processes, Brownian motion, Stochastic integration, martingales, stochastic differential equations. Diffusions, connections with partial differential equations, mathematical finance. Offered in alternate years. - I.

## 236B. Stochastic Dynamics and

## Applications (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 201C or course/Statistics 235B; course/Statistics 235A-235B-235C recommended.

Stochastic processes, Brownian motion, Stochastic integration, martingales, stochastic differential equations. Diffusions, connections with partial differential equations, mathematical finance. Offered irregularly.

## 239. Differential Topology (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: vector calculus, point-set topology, course 201A, or consent of instructor; course 250AB highly recommended. Topics include: differentiable manifolds, vector fields, transversality, Sard's theorem, examples of differentiable manifolds; orientation, intersection theory, index of vector fields; differential forms, integration, Stokes' theorm, deRham cohomology; Morse functions, Morse lemma, index of critical points.-l. (I.)
240A. Differential Geometry (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 201A and 239; 250AB highly recommended; intended primarily for 2nd-year graduate students. Riemannian metrics, connections, geodesics, Gauss lemma, convex neighborhoods, curvature tensor, Ricci and scalar curvature, connections and curvature on vector bundles.-II. (II.)
240B. Differential Geometry (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 240A; intended primarily for 2nd-year graduate students. Jacobi fields, conjugate points, completeness, Hopf-Rinow theorem, CartanHadamard theorem, energy, variation theorems and their applications, Rauch comparison theorem and its applications. - III. (III.)

## 245. Enumerative Combinatorics (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: course 145, 150 or the equivalent, or consent of instructor. Introduction to modern combinatorics and its applications. Emphasis on enumerative aspects of combinatorial theory. Offered in alternate years. -I.
246. Algebraic Combinatorics (4)

Lecture-3 hours; extensive problem solving. Prerequisite: course 245 or consent of instructor. Algebraic and geometric aspects of combinatorics. The use of structures such as groups, polytopes, rings, and simplicial complexes to solve combinatorial problems. Offered in alternate years-II.

## 248A. Algebraic Geometry (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: courses 250 ABC . Affine varieties and radical ideals. Projective varieties. Abstract varieties. Morphisms and rational maps. Smoothness. Algebraic curves and the Riemann-Roch theorem. Special topics. Offered in alternate years.- (I.)

## 248B. Algebraic Geometry (4)

Lecture -3 hours; extensive problem solving. Prereqvisite: course 248A. Complex varieties and the analytic topology. Sheaves and schemes. Fiber products. Separatedness and properness. Applications of scheme theory. Offered in alternate years. - (II.)
249A. Problem-Solving in Algebra (1)
Lecture-1 hour; extensive problem solving. Prerequisite: courses 250A \& B. Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated two times for credit. (Deferred grading only, pending completion of sequence.) -1 . (l.)

249B. Problem-Solving in Algebra (2)
Lecture-1 hour; extensive problem solving. Prerequisite: courses 250A \& B. Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated two times for credit. (Deferred grading only, pending completion of sequence.) - III.

## 250A-250B-250C. Algebra (4-4-4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: graduate standing in mathematics or consent of instructor. Group and rings. Sylow theorems, abelian groups, Jordan-Holder theorem. Rings, unique factorization. Algebras, and modules. Fields
and vector spaces over fields. Field extensions. Commutative rings. Representation theory and its applications. - $\mathrm{H}-\mathrm{II}-\mathrm{III}$. (I-II-III.)

## 258A. Numerical Optimization (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: courses 25, 167. Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods; largescale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems. Offered in alternate years. - (I.)

## 258B. Variational Analysis (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: courses 25 and 167, or consent of the instructor. Foundations of optimization theory. The design of solution procedures for optimization problems. Modeling issues, and stability analysis.
Offered in alternate years. - (II.)
261 A. Lie Groups and Their
Representations (4)
Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: courses 215A, 240A, 250A-250B or the equivalent or consent of instructor. Lie groups and Lie algebras. Classification of semi-simple Lie groups. Classical and compact Lie groups. Representations of Lie groups and Lie algebras. Root systems, weights, Weil character formula. Kac-Moody and Virasoro algebras. Applications. Offered in alternate years. - (II.)

## 261 B. Lie Groups and Their <br> Representations (4)

Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: courses 215A, 240A, 250A-250B or the equivalent or consent of instructor. Lie groups and Lie algebras. Classification of semi-simple Lie groups. Classical and compact Lie groups. Representations of Lie groups and Lie algebras. Root systems, weights, Weil character formula. Kac-Moody and
Virasoro algebras. Applications. Offered irregularly.
265. Mathematical Quantum Mechanics (4) Lecture-3 hours; term paper or discussion-1 hour. Prerequisite: course 201 or consent of instructor. Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral theory and perturbation theory. Applications to atoms and molecules. The Dirac equation. Offered in alternate years. - (I.)

## 266. Mathematical Statistical Mechanics

 and Quantum Field Theory (4)Lecture-3 hours; term paper or discussion-1 hour Prerequisite: course 265 or consent of instructor. Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamentals of quantum field theory. May be repeated one time for credit. Offered in alternate years. - (II.)
271. Applied and Computational Harmonic Analysis (4)
Lecture-3 hours; extensive problem solving. Prereqvisite: courses 125 B or 201 C ; and 128 B or 167 ; and 129 or equivalent, or consent of instructor. Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds. Offered in alternate years. - (II.)

## 280. Topics in Pure and Applied

## Mathematics (3)

Lecture-3 hours. Prerequisite: graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs. -I, II, III. (I, II, III.)
290. Seminar (1-6)

Seminar-1-6 hours. Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)
298. Group Study (1-5)
299. Individual Study (1-12)
(S/U grading only.)-I, II, III. (I, II, III.)
299D. Dissertation Research (1-12)
(S/U grading only.)-I, II, III. (I, II, III.)

## Professional

## 301 A-301B-301C. Mathematics Teaching

 Practicum (3-3-3)Fieldwork -5 hours; discussion -1 hour. Prerequisite: course 302A-302B-302C and 303A-303B303C concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.
302A-302B-302C. Curriculum Development in Mathematics (1-1-1)
Lecture/discussion-1 hour. Prerequisite: course 303A-303B-303C concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated one time for credit. Offered irregularly.
303A-303B-303C. Mathematics Pedagogy (1-1-1)
Lecture/discussion-1 hour. Prerequisite: course 302A-302B-302C or 210 L concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated one time for credit. Offered irregularly.
390. Teaching Assistantship Training (3)

Lecture-3 hours. Prerequisite: graduate standing in the Department of Mathematics. Experience in methods of assisting and teaching of mathematics at the university level. Includes discussion of lecturing techniques, running discussion sessions, holding office hours, preparing and grading of examinations, stu-dent-teacher interaction, and related topics.
Required of departmental teaching assistants. (S/U grading only.) -I . (I.)
399. Individual Study (2-4)

Independent study-2-3 hours; discussion - 1 hour. Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics. May be repeated one time for credit. (S/U grading only.)-I, II, III. (I, II, III.)

## Admission Requirements and Professional Curriculum

Detailed information can be obtained from the School of Medicine; see School of Medicine, on page 127

## Courses in the School of Medicine Curriculum for the School of Medicine

The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a blend of basic science training and clinical experience with opportunities for research.
The first year curriculum begins in August and extends into May and is organized into two blocks. The basic science portion of the first block includes courses in Molecular Biology, Cell and Tissue Biology, Gross Anatomy/Embryology/Radiology, and Human Physiology. The major organizing theme is structure-function along the continuum of hierarchical biologic structure from molecule to cell, tissue and major organ systems. The three year Doctoring curriculum begins with Doctoring 1, which is presented concurrently with the other courses. The focus of Doctoring 1 is physical examination training using standardized patients and models, correlated with concurrent gross anatomy and physiology by organ system. Behavioral medicine, epidemiology, biostatistics, cross-cultural medicine, and ethics are woven into the cases and didactic presentations and teambased learning modules. Students are required to attend preceptorships in the community and participate in home visits. Periodic quizzes and review sessions are used in the basic science courses throughout the block for formative assessment, and all courses administer comprehensive summative final examinations in December.
The second block of the first year curriculum begins in January and extends through April, with final exams in early May. There are two major threads, each of which is composed of several integrated courses. The Doctoring 1 course is offered concurrently. The Immunology/Microbiology/Pharmacology/Pathology thread presents an introduction to host defense, infection, basic pharmacologic principles, and general pathologic processes. The Endocrinology/Nutrition/Reproduction/Genetics (ENRG) thread covers essential concepts ingenetics, basic and clinical nutrition, reproductive medicine, and clinical endocrinology. The general pathology course also includes male-female $G U$ and endocrine pathology, and the pharmacology course covers antibiotics and endocrine pharmacology, with the goal of integration with concurrent courses. Periodic quizzes and review sessions provide formative feedback, and final examinations are used for summative assessment. The Doctoring 1 course continues with an emphasis on interviewing skills and clinical assessment. Cases are used in the problem-based learning approach for basic-science-clinical correlation, and for the exploration of psychosocial issues. Preceptorships and home visits continue. The Doctoring 1 course concludes with a comprehensive final examination, and also includes an observed complete history and physical examination.
The first year curriculum ends with a six week unscheduled block that may be used for vacation, remediation, electives, research, and international experiences.
The second year curriculum is composed of three blocks (Blocks 3-5). Block 3 begins in late June and extends through August with a neurosciences block composed of integrated neuroanatomy-clinical neurosciences. The latter emphasizes the pathophysiology of common neurological disorders. The systemic pathology curriculum continues with a focus on neuropathology, and the pharmacology course covers neuropharmacology. A clinical psychiatry course is also presented during this period. The Doctoring 2
course begins, focusing on advanced clinical skills and clinical reasoning using a combination of standardized patient assessments, problem-based learning, subspecialty physical examination sessions, preceptorships, and didactics in clinical epidemiology, medical economics, and socio-behavioral medicine. The remainder of the second year is devoted to composed of pathophysiology courses with tight integration of the systemic pathology and pharmacology courses. The courses are organized according to organ system (cardiovascular, pulmonary, renal, musculoskeletal system, hematology, gastroenterology, oncology, and dermatology). The Doctoring 2 curriculum continues concurrently with its focus on advanced clinical skills, epidemiology, ethics, and problem based assessment. History taking and physical diagnosis skills are correlated with the ongoing pathophysiology courses. Like the first year, all of the second year courses utilize periodic quizzes and review sessions and a comprehensive final examination. The Doctoring 2 course includes an objective structured clinical examination (OSCE) using standardized patients at the end of the course series.
The second year curriculum ends in February and is followed by a six week, unscheduled block for preparation for USMLE Step 1, remediation, electives, and vacation.
The third-year program begins in April and includes six required clerkship rotations in the clinical specialties: eight weeks each of surgery, medicine, obstetrics/gynecology, pediatrics, primary care (jointly administered by Family and Community Medicine and Internal Medicine) and psychiatry. Students may elect to defer one of the required clerkships to the fourth year. The third year Doctoring program consists of longitudinal small groups led by faculty members who remain with their group throughout the year as the students rotate through their clerkships. Doctoring 3 themes include advanced interviewing techniques, clinical reasoning, clinical epidemiology, evidence-based medicine, and ethics/jurisprudence. Students must take a comprehensive clinical skills examination at the end of the third year which features self-assessment and faculty feedback.
The fourth year curriculum features built-in flexibility to allow students to individualize their medical careers. The early start to the fourth year in May allows students to pursue electives for early exposure to clinical specialties or to complete clerkships which may have been deferred. All students are required to select a minimum of 32 weeks of clinical electives in addition to a single 4 -week special study module or scholarly project. The Special Study modules are designed to integrate basic sciences with clinical sciences, provide opportunities for students to practice and refine fundamental skills in critical appraisal and analysis of emerging scientific developments, and to allow students to focus in-depth on a multidisciplinary topic of special interest to the student. The Scholarly Project requires independent inquiry with faculty mentorship and leads to a publishable manuscript and student presentation of the project at a research forum held in the winter.
Individual student programs are designed under the guidance of college directors, mentors and faculty advisors, with the support of the Career Advising Office. Each student's fourth year program must be approved by the Fourth Year Oversight Committee to ensure appropriate breadth, depth, and vigor. There are strict guidelines for the choices and time allowed away from the home institution. To satisfy the M.D. degree program, the student must successfully complete the required course work, clerkships, and fourth year requirements. Students must pass USMLE Step 1, USMLE Step 2 CS and CK, and complete the fourth year clinical performance examination. In addition to the fourth-year elective program available, there is the opportunity for students to select from a variety of electives during the first two years. Examples include electives in history of ethics and medicine, medical Spanish and insights in clinical research. Most students also participate in one of several student-run, community clinics for elective credit during their first and second years.

## Coordination with other Advanced

 Degree ProgramsThe curriculum for the M.D. degree provides flexibility and encourages coordination with other advanced degree programs (Ph.D., M.S., M.A., M.B.A., and M.P.H.). These programs offer a wide breadth of study areas and draw upon the considerable expertise of the entire campus faculty. The Department of Public Health Sciences offers an M.P.H. program in conjunction with the M.D. program. This program is designed for students interested in disease prevention and community health, health professionals and State Health Department employees.
School of Medicine administrators enthusiastically support students interested in pursuing advanced degree programs. The dual-degree program for the M.D./Ph.D. is targeted to train physicians to meet, respond to and solve the broad diversity of problems and dilemmas facing current and future health care. Students are encouraged to seek degrees in any of the campus wide Ph.D. programs, including those in social sciences and humanities. The UC Davis School of Medicine awards competitive fellowships each year to students enrolled in the M.D./Ph.D. program.

## Required Curriculum for the M.D. Degree

The following listing is the typical sequencing of all courses required for earning the M.D. degree. Course descriptions are given under the individual departmental course offerings.

## First-Year Required Courses

## Year 1, Block 1

Molecular Medicine, BCM 410A
Gross-Radiologic-Developmental Anatomy,
CHA 400
Human Physiology, HPH 400
Human Microscopic Anatomy, CHA 402
Doctoring 1, MDS 411A

## Year 1, Block 2

Medical Immunology, MMI 480A
Medical Microbiology, MMI 480B
General and Endocrine Pathology, PMD
410A
Pharmacology, PHA 400A
Endocrine-Nutrition-Reproduction-Genetics, "ENRG", MDS 406
Doctoring 1, MDS 411B

## Second-Year Required Courses

## Year 2, Block 3

Neuroanatomy, CHA 403
Systemic Pathology, PMD 410B
Pharmacology, PHA 400B
Clinical Neurosciences, NEU 420
Fundamentals of Clinical Psychiatry, PSY 403
Doctoring 2, MDS 421A
Year 2, Block 4
Integumentary System, DER 420
Muscoloskeletal System, OSU 421
Doctoring 2, MDS 421B

## Year 2, Block 5

Cardiovascular System, IMD 420D
Pulmonary and Critical Care, IMD 420C
Nephrology, IMD 420E
Hematology, IMD 420A
Systemic Pathology, PMD 410C/D
Pharmacology, PHA 400C/D
Doctoring 2, MDS 421B
Oncology, HON 420
GI System, IMD 420B
Doctoring 2, MDS 421C

## Third- and Fourth-Year Required Courses Third-Year Clerkships

Internal Medicine
Clerkship-IMD 430 .................. 8 weeks
Surgery
Clerkship-SUR 430 ................... 8 weeks
Pediatrics
Clerkship-PED 430 ................... 8 weeks

Primary Care Clerkship-
FAP 430.................................... 8 weeks
Obstetrics and Gynecology
Clerkship-OBG 430 ................. 8 weeks
Psychiatry
Clerkship-PSY 430 .................. 8 weeks
Doctoring 3, MDS 430A-D
Fourth-Year Requirements
36 Weeks of Required Course work comprised of the following specifics:

- 4 weeks of an Inpatient Acting Internship from one of the following departments at UC Davis: Internal Medicine, OB-GYN, Pediatrics, Surgery, Family \& Community Medicine and Psychiatry
- 4 weeks of Inpatient or Ambulatory Acting Internship in any department/discipline
- 4 weeks of Special Studies Module or Scholarly Project
- 4 weeks of Undifferentiated Patient Experience (see 4th Year Guide for requirement guidelines)
- 20 weeks of additional Acting Internships, Advanced Clinical Clerkships or Clinical Didactics
- 16 weeks must be taken at UC Davis
- 28 weeks must be in direct patient care

## Medical Sciences (MDS) <br> Lower Division

## 99. Special Study in Medicine for

 Undergraduates (1-5)Independent study-3-15 hours. Prerequisite: consent of instructor. Participate in research projects relating to medicine with faculty in the School of Medicine. (S/U grading only.) -I, II, III, IV. (I, II, III, IV.)

## Upper Division

## 192. Medical Education Internship for

## Advanced Undergraduates (1-12)

Internship-3-36 hours. Prerequisite: competency with computers. Enrollment dependent on availability of intern positions. Participate in projects related to curriculum development in support of curriculum for M.D. degree. Gain work experience and appreciation for innovative approaches to learning in basic and clinical sciences of medical education. May be repeated for credit for up to 12 units. (P/NP grading only.) $-I$ III, III, IV. (I, II, III, IV.)

## Professional

401. Applications of Computers to Medical Practice (2)
Autotutorial-2 hours. Prerequisite: enrollment in medical school. Proficiency in computer applications relative to practice of medicine, with emphasis on email, literature searching, file transfer, and hospital information services. Course given online, at home or in lab; time and place determined by student. ( $\mathrm{H} /$ P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Huntley

## 405. Metabolism, Endocrinology,

## Reproduction and Nutrition (9.5)

Lecture-3.8 hours; discussion/laboratory-2.8
hours. Prerequisite: consent of instructor. Restricted to Medical school students. Basic and pathophysiologic processes involved in human metabolic and nutritional regulation and in reproductive and endocrine control systems across the lifespan. Integrate information across these systems and use clinical reasoning process to identify and understand relevant perturbations and diseases. (P/F grading only; deferred grading only, pending completion of sequence.) - II, III. (II, III.) Hou, Sweeney, Turgeon

## 406. Endocrinology, Nutrition,

## Reproduction and Genetics (9.5)

Lecture-3.8 hours; discussion/laboratory-2.8 hours. Prerequisite: Biological Chemistry 410A; Human Physiology 400. Restricted to Medical students only. Basic and pathophysiologic processes involved in human reproductive and endocrine control systems, nutritional regulation, and foundational
genetics across the lifespan. Integrate information across these systems and use clinical reasoning process to identify and understand relevant perturbations and diseases. May be repeated three times for credit. (P/F grading only; deferred grading only, pending completion of sequence.) - II, III. (II, III.) Hou, Segal, Turgeon

## 411 A. Doctoring 1 (4)

Discussion-1 hour; clinical activity- 1 hour; lec-ture/discussion-1 hour. Prerequisite: approval of committee on student progress. Medical students only. Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bioethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentations. (P/F grading only; deferred grading only, pending completion of sequence.) - II, III. (III, III.) Eidson-Ton, Henderson, Onate

## 411 B . Doctoring 1 (5)

Discussion- 1.5 hours; clinical activity - 1.5 hours; lecture/discussion-1.8 hours. Medical students only. Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bioethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentation. (P/F grading only; deferred grading only, pending completion of sequence.) - II, III. (II, III.) Eidson-Ton, Henderson, Onate

## 420. Multisystem Clinical Presentations (0.5)

Extensive problem solving- 15 hours; independent study - 6 hours. Prerequisite: completion of Pathophysiology Block; consent of instructor. Capstone course integrates coursework, knowledge, skills and experiential learning to enable the student to demonstrate a broad mastery of learning across the curriculum. (P/F grading only.) - III. (III.) Venugopal

## 421 A. Doctoring 2 (6)

Discussion-1 hour; lecture/discussion - 1 hour; internship -0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (Deferred grading only, pending completion of sequence. $\mathrm{P} / \mathrm{F}$ grading only.) -IV. (IV.) Lee, Molla, Sciolla

## 421 B. Doctoring 2 (6)

Discussion-1 hour; lecture/discussion-1 hour; internship- 0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social \& clinical science concepts to cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality, and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (Deferred grading only, pending completion of sequence. $P / F$ grading only.)-I. (I.) Lee, Molla, Sciolla

## 421C. Doctoring 2 (6)

Discussion-1 hour; lecture/discussion-1 hour; internship - 0.5 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (P/F grading only.)-II. (II.) Lee, Molla, Sciolla
430. Introduction to Doctoring 3 (1)

Discussion-2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Introductory course for the Doctoring 3 Program. All students enrolling in Medical

Sciences 430 A-D should complete this course prior to beginning their work in Doctoring 3. (H/P/F grading only.)-III. (III.) Wilkes
430A. Doctoring 3 (2)
Discussion -3 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.)-IV. (IV.) Wilkes

## 430B. Doctoring 3 (2)

Discussion - 2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social \& clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.)-I. (I.) Wilkes

430C. Doctoring 3 (2)
Discussion -2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social \& clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.) -II. (II.) Wilkes

430D. Doctoring 3 (2)
Discussion-2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social \& clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (Deferred grading only, pending completion of sequence. H/P/F grading only.) - III. (III.) Wilkes

440A. Doctoring 4 Teaching Fellowship (1) Discussion-0.5 hours; seminar-0.25 hours. Prerequisite: courses $430 A B C D$ and approval by Instructor of Record. Restricted to Medical students only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (Deferred grading only, pending completion of sequence. H/P/F grading only.) -IV. (IV.) Wilkes
440B. Doctoring 4 Teaching Fellowship (1) Discussion-0.5 hours; seminar-0.25 hours. Prerequisite: courses $430 A B C D$ and approval by Instructor of Record. Restricted to Medical students only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (Deferred grading only, pending completion of sequence. $\mathrm{H} / \mathrm{P} / \mathrm{F}$ grading only.)-I. (I.) Wilkes
440C. Doctoring 4 Teaching Fellowship (1)
Discussion-0.5 hours; seminar-0.25 hours. Prerequisite: courses $430 A B C D$ and approval by Instructor of Record. Restricted to Medical students only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (Deferred grading only, pending completion of sequence. H/P/F grading only.)-II. (II.) Wilkes

## 441. Combined Ophthalmology and

 Otolaryngology Clerkship (6)Clinical activity -4 weeks. Prerequisite: approval by Committee on Student Promotion and Evaluation. Fundamental knowledge of ophthalmology and otolaryngology for the treatment of eye, ear, nose and throat problems at a level of training of general phy-
sicians, including when to refer patients to a specialist. (H/P/F grading only.)-I, II, III, IV. (II, II, III, IV.) Brandt, Strong

## 450. Introduction to UC Davis Medical Center (1)

Seminar-20 hours total. Prerequisite: second-year medical student. Designed to assist medical student in transition from classroom to hospital setting. (H/ P/F grading only.) - III. (III.)
455. Student Run Clinics (1-3)

Clinical Activity-3-9 hours. Open to medical students in good standing. Will learn counseling, diag nosis and treatment of patients with chronic and acute disease under supervision of physician. Meet all requirements and prerequisites of the particular clinic within which they work. May be repeated for credit. (P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Latimore, Servis
460CR. Introduction to Clinical Research (2) Lecture-2 hours; independent study - 3 hours. Prerequisite: consent of instructor; completed one of the following degrees: M.D., D.D.S., D.M.D., O.D., N.D., D.O., Pharm.D., D.V.M., Ph.D. or D.N.S. in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (P/F grading only.) -IV. (IV.) Frederick
461 CR. Strategies for Grant Writing (2)
Lecture/discussion-2 hours. Prerequisite: consent of instructor; completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Practical skills and strategies to create successful grant proposals in the NIH style and format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (S/U grading only.) - IV. (IV.) Rutledge
462CR. Introduction to Clinical Epidemiology and Study Design (3) Lecture-25 hours; discussion - 10 hours. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into Clinical Research Graduate Group, K30 program. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (S/U grading only.) -IV. (IV.) McCurdy, Romano
463CR. Methods in Clinical Research (5) Lecture-3 hours; discussion-2 hours. Prerequisite: consent of instructor; completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into Clinical Research Graduate Group, K30 program. Overview of major approaches to clinical research, including health services research techniques, informatics, the GCRC, and preclinical methodologies to enhance clinical projects. Overview of UC Davis clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (S/U grading only.) - IV. (IV.) Berglund, Lloyd, Kravitz

## 464CR. Responsible Conduct of Research

 (3) Lecture-3 hours. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into Clinical Research Graduate Group, K30 program. The nine NIH-mandated modules: Data Acquisition and Reporting, Mentor Training, Publication Practices and Authorship, Peer Review/Grant Process, Collaborative Science, Human Subjects,Research with Animals, Conflict of Interest, Research Misconduct, and Entrepreneurship/Industry Collaborations/Intellectual Property/Technology Transfer. (S/U grading only.)-IV. (IV.) Wun
465CR. Introduction to Medical Statistics (4) Lecture-3 hours; laboratory-2 hours. Prerequisite: completed M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into Clinical Research Graduate Group, K30 program. Biomedical applications of statistical methods in clinical, laboratory and population medicine. Graphical/tabular data presentation, probability, binomial, Poisson, normal, $\mathrm{t}, \mathrm{F}$-, and Chi-square distributions, elementary nonparametric methods, simple linear regression/correlation, life tables. Microcomputer applications of statistical procedures in population medicine. (S/U grading only.)-IV. (IV.) Becket, Wegelin

## 468. Multidisciplinary International

## Preceptorship (1-12)

Clinical activity -30 hours. Prerequisite: medical students with consent of instructor. Multidisciplinary preceptorship in a foreign country. Participate in clinical and didactic learning experiences. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 470. Introduction to Dentistry (3-18)

Clinical activity - 34 hours; lecture-6 hours. Prerequisite: fourth-year medical student in good standing; consent of instructor. Introduction to Dentistry and basic Oral and Maxillofacial Surgery. Course is offered by the Oral and Maxillofacial Surgery department at UC San Francisco. (P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Pogrel, Wallach

## 480. Insights in Clinical Research (1)

Lecture-1 hour. Prerequisite: medical student in good standing. Seminars on research presented by Medical School faculty; overview of pertinent issues, including medical ethics, human subjects protocols, case control methods, etc. (P/F grading only.) - III.

## (III.)

481. Insights into Clinical Specialties (1) Lecture/discussion - 1 hour. Prerequisite: medical student in good standing. Exposure to various medical specialties, their residency programs and ways in which medical students can prepare for and improve their candidacy for such programs. (H/P/F grading only.) -IV. (IV.)
482. Lecture Series in Reproductive Health (1)

Lecture-1 hour. Psychosocial and public health aspects of providing quality reproductive health care and application in student-run free clinics and in 3rd year clerkships. May be repeated two times for credit. (P/F grading only.) - II. (II.) Paik

## 483. Insights in Political, Legal and

## Business Aspects of Medicine (1)

Lecture-1 hour. Prerequisite: medical students in good standing. The practical aspects of a medical career. May be repeated two times for credit. (P/F grading only) - III. (III.)
485. Health Policy Lecture Series (1)

Lecture-1 hour. Lecture series provides an overview of local, state, national and international health policy. The current challenges health care reform implementation is facing provides how medical students can successfully advocate for changes in health policy. May be repeated for credit. (P/F grading only.) - I. (I.) Romano

## 487. History and Ethics of Medicine (1)

Lecture- 1.25 hours. Introduction to ethical problems and events in health care in both modern and historical contexts. Historical topics in medicine and medical ethics. (P/F grading only.)-II. (II.) Fitzgerald

## 489. Directed Studies (1-9)

Prerequisite: consent of instructor; individual directed studies in extended preparation for modified curriculum, USMLE exams, and/or as required by Committee on Student Progress. Independent studies to accommodate modified curriculums, prepare for tak-
ing USMLE exams and for remediation course work directed by the Committee on Student Progress. May be repeated for credit. (P/F grading only.) -I , II, III, IV. (I, II, III, IV.)

## 489C. Clinical Reintroduction Experience

## (1-9)

Clinical activity-20 hours. Prerequisite: consent of instructor. Learn and practice basic clinical skills in a supervised clinical setting. Skills include patient interviewing, history, physical examination, diagnostic and clinical reasoning, case presentation, and medical records documentation. Direct observation and individual feedback on clinical skills development is provided. (P/F grading only.) - I, II, III, IV. (II, II, III, IV.) Servis

## 489QA. Improving Quality in Health Care

 (3)Lecture-8 hours; discussion/laboratory-10 hours, project- 10 hours. Prerequisite: consent of instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only; deferred grading only, pending completion of sequence.)I. (I.) Bakerjian, Shaikh

## 489QB. Improving Quality in Health Care

 (3)Lecture-8 hours; discussion/laboratory - 10 hours, project- 10 hours. Prerequisite: consent of instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only; deferred grading only, pending completion of sequence.)II. (II.) Bakerjian, Shaikh

## 489R. USMLE Directed Remedial Studies (19)

Independent study-20 hours. Prerequisite: recommendation by Committee on Student Progress. Independent studies to accommodate remediation for taking USMLE exams directed by the Committee on Student Progress. (P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Servis

## 490A. PRIME Seminar Series: Fall Quarter

 (1)Lecture -1 hour. Weekly seminar series covering the following areas: community engagement, Healthcare to rural and under served populations, health policy and advocacy, leadership, technology and health equity and disparity. May be repeated for credit. (P/F grading only.)-I. (I.) Eidson-Ton,
Fancher

## 490B. PRIME Seminar Series: Winter

## Quarter (1)

Lecture -1 hour. Weekly seminar series covering the following areas: community engagement, Healthcare to rural and under served populations, health policy and advocacy, leadership, technology and health equity and disparity. May be repeated for credit. (P/F grading only.) - II. (II.) Eidson-Ton,
Fancher

## 490C. PRIME Seminar Series: Spring

## Quarter (1)

Lecture - 1 hour. Weekly seminar series covering the following areas: community engagement, Healthcare to rural and under served populations, health policy and advocacy, leadership, technology and health equity and disparity. May be repeated for credit. (P/F grading only.) - III. (III.) Eidson-Ton, Fancher
490D. PRIME Seminar Series: Summer

## Quarter (1)

Lecture - 1 hour. Weekly seminar series covering the following areas: community engagement, Healthcare to rural and under served populations, health policy and advocacy, leadership, technology and health equity and disparity. May be repeated for credit. (P/F grading only.) -IV. (IV.) Eidson-Ton,
Fancher
493. Independent Special Study Module (312)

Prerequisite: consent of instructor. FYOC approval required. Away education experience that meets Special Study Module requirements. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 493A. International and Comparative

 Health Care-SSM (6)Discussion-20 hours; lecture-10 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the focal issue. SSM Component. (H/P/F grading only.) -I, II, III, IV.

## (I, II, III, IV.) Wilkes

## 493B. International and Comparative

## Health Care-Clinical (3-9)

Clinical activity -30 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the focal issue. Clinical Component. (H/ P/F grading only)-I, II, III, IV. (I, II, III, IV.) Wilkes

## 493QA. Improving Quality in Health Care

 (3)Lecture-8 hours; discussion/laboratory- 10 hours; project-10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Nursing 493A.) (H/P/F grading only; deferred grading only, pending completion of sequence.)-l. (I.) Bakeriian, Shaikh

## 493QB. Improving Quality in Health Care

 (3)Lecture-8 hours; discussion/laboratory- 10 hours; project- 10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Nursing 493B.) (H/P/F grading only; deferred grading only, pending completion of sequence.)-II. (II.) Bakeriian,

## Shaikh

## 493QC. Enhancing Patient Safety in Health

 Care (6)Seminar-6 hours; clinical activity-8 hours; discus-sion-6 hours. Prerequisite: fourth-year Medical student; consent of instructor. Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for interprofessional educational experience. (Same course as Nursing 493C.) (H/P/F grading only.) - II, III, IV. (II, III, IV.) Bakeriian, Natale

## 495. Medicine Literature Review (1-9)

Discussion-3-27 hours. Prerequisite: medical student in good academic standing and permission of the Associate Dean of Curricular Affairs. Independent study: topics for selection include, but are not restricted to, medical ethics, economics and jurisprudence, culture and medicine, ethnicity and medicine, gender and medicine, history of medicine, health manpower, and medical education. A prepared paper on the selected topic will be required. (H/P/F grading only.) $-I$, II, III, IV. (I, II, III, IV.)

## 497A. Scholarly Project (2)

Seminar- 0.25 hours; independent study - 0.5 hours. Prerequisite: project proposal must be accepted by the Scholarly Project Executive Committee (SPEC). Restricted to fourth year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary
of the project. (Deferred grading only, pending completion of sequence. H/P/F grading only.) -IV. (IV.) Schaefer

## 497B. Scholarly Project (2)

Seminar-0.25 hours; independent study-0.5
hours. Prerequisite: Project proposal must be accepted by the Scholarly Project Executive Committee (SPEC). Restricted to fourth year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project. (Deferred grading only, pending completion of sequence. H/P/F grading only.) -I. (I.) Schaefer

## 497C. Scholarly Project (2)

Seminar- 0.25 hours; independent study -0.5 hours. Prerequisite: Project proposal must be accepted by the Scholarly Project Executive Committee (SPEC). Restricted to fourth year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project. (Deferred grading only, pending completion of sequence. H/P/F grading only.) - II. (II.) Schaefer
499. Research in Medical Education and Curriculum Development (4-9)
Independent study-10-36 hours. Prerequisite: medical student in good standing and competency with computers. Research and development of an independent project related to expanding computerassisted resources in support of the MD curriculum at UC Davis. (H/P/F grading only.) -I, II, III, IV. (II, II, III, IV.)

## Departmental Courses:

Anesthesiology and Pain Medicine (ANE)

## Upper Division

192. Internship in Anesthesiology (1-6)

Internship-3-18 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in anesthesia and related fields. (P/NP grading only.)-I, II, III, IV. (I, II, III, IV.)
199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Professional

460. Anesthesiology Clinical Clerkship (318)

Prerequisite: medical student. In-depth exposure to anesthesia through informal lectures and mentoring by anesthesiologists. Emphasis on understanding and applying anesthetic principles in managing administration of general, regional, and specialized areas. (H/P/F grading only.) -I, II, III, IV. (II, II, III, IV.) Yao

## 461. Perioperative Medicine (3-12)

Clinical Activity - 30 hours. Prerequisite: successful completion of third-year clerkships; consent of IOR. Two week rotation provides a broad exposure to various patient care services within the Department of Anesthesiology and Pain Medicine to apply medical knowledge to safely care for patients. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Pitts

## 463. Multidisciplinary Pain Management

 (6)Clinical activity - 30 hours; lecture/discussion - 10 hours. Prerequisite: senior medical student in good standing. Senior clerkship to expose students to all facets of treating pain in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Singh

## 465. Away Acting Internship in

Anesthesiology (3-18)
Clinical Activity-40 hours. Prerequisite: satisfactory completion of Anesthesiology Clerkship; consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Yao

## 480. Brief Introduction to Clinical

 Anesthesiology and Chronic Pain Management (3)Clinical activity $-25-30$ hours (two weeks). Prerequisite: second-year medical student. Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthesia care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interaction with faculty anesthesiologists. (H/P/F grading only.)-II. (II.) Fishman
493A. Applied Physiology and
Pharmacology (6)
Lecture - 5 hours; lecture/laboratory - 10 hours; laboratory -16 hours; clinical activity -4 hours. Prereqvisite: consent of instructor; UC Davis School of Medicine students only. This course will review and demonstrate the application of basic physiology and pharmacology to patient care. There will be an indepth analysis of the physiology and pharmacology of the cardiovascular, pulmonary, nervous, renal and endocrine systems. Limited enrollment. (H/P/F grading only.) - II. (II.) Fleming
493B. Interdisciplinary Medicine in Pain Care (6)
Lecture-5 hours; lecture/laboratory - 10 hours; laboratory -16 hours; clinical activity- 4 hours. Prereqvisite: consent of instructor; UC Davis School of Medicine students only. This course will integrate applied and practical neuroanatomy, physiology, pharmacology, psychology/psychiatry and social medicine in the care of patients who are receiving care for pain caused by acute or chronic medical disease or trauma. Limited enrollment. (H/P/F grading only.) - III. (III.) Fishman
498. Individual or Group Study (1-5)

Discussion-1-5 hours; laboratory-2-10 hours. Prerequisite: interns and residents with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)
499. Anesthesiology Research (4-18)

Laboratory- 12-54 hours. Prerequisite: third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor. Problems in clinical and/or laboratory research. May be repeated for credit. (H/P/ F grading only for medical students.) - I, II, III, IV. (I, II, III, IV.)

## Biological Chemistry (BCM) <br> Lower Division

92. Internship in Biological Chemistry (1-12)
Internship-3-36 hours; final report. Prerequisite: consent of instructor. Supervised work experience in biological chemistry and related fields. (P/NP grading only.)

## Upper Division

192. Internship in Biological Chemistry (1-12)
Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to internship by preceptor. Supervised work experience in Biological Chemistry and related fields. (P/NP grading only.)

## 198. Group Study (1-5)

Prerequisite: consent of instructor. For undergraduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (P/NP grading only.)

## 199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

## 209. Prostaglandins/Leukotrienes and

 Related Lipids (2)Lecture-2 hours. Prerequisite: Biochemistry 101A101B or Physiological Sciences 101A-101B or Physiology 100A-100B. Oxidative desaturation/elongation of poyunsaturated fatty acids. Biosynthesis of prostaglandins/leukotrienes from polyunsaturated fatty acids. Chemistry, biochemistry, and metabolism. Nutritional regulation. Physiological/pathophysiological implications; pharmacological and clinical relevance. Offered in alternate years. - (II.) Ziboh

## 217. Molecular Genetics of Fungi (3)

 Lecture-3 hours. Prerequisite: graduate standing in a biological science; Biochemistry 101B; Genetics 100, 102A; Botany 119; Plant Pathology 130, 215X; Microbiology 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. Offered in alternate years. (Same course as Plant Pathology 217.)-II. Holland, Tyler222. Mechanisms of Translational Control (2)

Lecture-1 hour; discussion-1 hour. Prerequisite: Biochemistry 201C or consent of instructor. Molecular mechanisms of protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. An advanced gradu-ate-level treatment of topics of current interest, with readings and discussion of primary papers from the literature. Offered in alternate years.-II. Hershey
230. Practical NMR Spectroscopy and Imaging (1)
Lecture-1 hour. Prerequisite: Chemistry 107A107B, Physics 5A-5B-5C or 9A-9B-9C, or consent of instructor. Basic theory, experimental methods, and instrumentation of NMR. Enables students to understand NMR spectroscopy and imaging experiments. (S/U grading only.) - I. (I.)

## 231. Biological Nuclear Magnetic

## Resonance (3)

Lecture-3 hours. Prerequisite: Molecular and Cellular Biology 221A or the equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/ imaging, metabolic regulation, and cellular bioenergetics. (Same course as Biophysics 231.)-III. (III.) Jue

## 291. Seminar in Genetic Approaches to

 Pathogenesis of Human Disease (1)Seminar-1 hour. Prerequisite: student in Genetics Graduate Group of consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and nonMendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 491.) (S/U grading only.) -I, II, III, IV. (I, II, III, IV.)
298. Group Study (1-5)

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.

## 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

410A. Genetics and Molecular Medicine (4)
Lecture-3 hours; discussion-3 hours; web virtual lecture-1 hour. Prerequisite: consent of instructor. Medical Students only. Biochemistry of proteins and nucleic acids. Includes an introduction to cancer biology and a full discussion of carbohydrate metabolism. Introduction to medical genetics and the clinical consequences of genetic abnormalities.
Molecular aspects of human disease are highlighted throughout the course. (Same course as Pediatrics 420.) (P/F grading only; deferred grading only, pending completion of sequence.)-I, IV. (I, IV.) Segal, Sweeney
491. Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)
Seminar-1 hour. Prerequisite: student in Genetics Graduate Group of consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and nonMendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as course 291.) (H/P/F grading only.) -I , II, III, IV.
(I, II, III, IV.)
493. Medical Genomics (6)

Clinical activity - 4 hours; lecture-4 hours; laboratory -12 hours. Prerequisite: consent of instructor. Four-week module will focus on the clinical methods and applications of medical genomics. Topics will include an introduction to the human genome and human genomics, genetic and epigenetic variation and the ethics of medical genomics. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Herman, Segal
497T. Tutoring in Biological Chemistry (1-5) Tutoring-3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/ P/F grading only.)
498. Group Study (1-5)

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

## 499. Research (1-12)

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

## Courses in Cell Biology and Human Anatomy (CHA) <br> Upper Division

## 101. Human Gross Anatomy (4)

Lecture-4 hours. Prerequisite: Biological Sciences 2A, concurrent enrollment in Exercise Biology 106L or course 101 L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass 2 open to Seniors in any major; Open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as Exercise Biology 106.) GE credit: SciEng | SE. - II. (II.) Gross 101L. Human Gross Anatomy Laboratory (3)

Laboratory -9 hours. Prerequisite: Biological Sciences 2A; must take Exercise Biology 106 or course 101 concurrently (or have already completed). Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass 2 open to Seniors in any major; Open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of prosected human cadavers in small group format with extensive hands-on experience. (Same course as Exercise Biology 106L.) GE credit: SciEng \| SE.-II. (II.) Gross
192. Internship in Morphology (1-12)

Internship-3-36 hours; final report. Prerequisite: upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship. Experience of supervised internship in research laboratories of members of the department. (P/NP grading only.)

## 197T. Tutoring in Cell Biology and Human

 Anatomy (1-5)Discussion - 1 hour; laboratory-6-9 hours. Prereqvisite: completion of course 101 with a grade of $B$ or better and consent of instructor. Provides laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor. (S/U grading only.)

## 198. Directed Group Study (1-5)

Discussion - 1-10 hours. Prerequisite: consent of instructor. Directed reading, discussion, and/or laboratory experience on selected topics. (P/NP grading only.)

## 199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

200. Graduate Human Gross Anatomy (6) Lecture-4 hours; laboratory-6 hours. Prerequisite: consent of instructor. Lectures on human gross anatomy and cadaver dissection laboratory. Topics arranged by region; emphasis on osteology, neuromuscular anatomy, cardiovascular anatomy, gastrointestinal anatomy and anatomy of reproductive systems. Only two units of credit for students who have completed course 101. Open only to full-time graduate students. - II. (II.) Blankenship, Gross, Tucker
201. Human Microscopic Anatomy (5) Lecture-3 hours; laboratory - 6 hours. Examines the normal microscopic structure of the basic cells, tissues, and organs of the body. Lectures emphasize morphology and structure-function relationships. Accompanying laboratories involve analysis and identification of sectioned material at the light microscopic and ultrastructural levels. - II. (II.) Beck

## 203. Neurobiology (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: two upper division or one graduate course in Neurobiology, consent of instructor. Physiology and anatomy of the normal human nervous system in an integrated format. - III. (III.) Blankenship, Gross

## 290. Seminar (1)

Seminar-1 hour. Prerequisite: consent of instructor. (S/U grading only.) -I, III. (I, III.)
290C. Research Group Conference (1)
Discussion-1 hour. Prerequisite: graduate student with research experience (may be taken concurrently); consent of instructor. Discussion of problems, progress and literature relevant to current research undertaken by laboratory groups in Human Anatomy. (S/U grading only.) -I, II, III. (I, II, III.)

## 298. Advanced Group Study (1-5)

Prerequisite: consent of instructor.
299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

400. Developmental, Gross, and Radiologic Anatomy (7.5)
Lecture -3 hours; laboratory -5 hours. Prerequisite: consent of Committee on Educational Progress. Medical Students only. An integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth. (Deferred grading only, pending completion of sequence.) (P/F grading only.) -I, IV. (I, IV.) Tucker
401. Cell and Tissue Biology (4.5)

Lecture-2 hours; laboratory-4 hours. Prerequisite: approval of the Committee on Student Progress. Medical Students only. Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and identification of sectioned material at the light microscopic and ultrastructural levels. (Deferred grading only, pending completion of sequence.) (P/ F grading only.) -I, IV. (I, IV.) Beck

## 403. Medical Neuroanatomy (5)

Lecture-3 hours; laboratory-1 hour; discussion/ laboratory-1 hour. Prerequisite: successful completion of course 400, block 1; restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as Human Physiology 403.) (P/F grading only.) - IV. (IV.) Blankenship, Gross

## 493. Clinically-Oriented Anatomy Special

 Study Module (6)Lecture-5 hours; lecture/laboratory- 10 hours; laboratory -16 hours; clinical activity -4 hours. Prereqvisite: consent of instructor. Restricted to School of Medicine students only. Reviews aspects of the anatomy of the head and neck, thoracic cavity, abdomen, pelvis, extremities, vascular system, peripheral nervous system and central nervous system. Focus on the understanding of anatomy related to common surgical procedures. (Same course as Surgery 493.) (H/P/F grading only.) - III. (III.) Blankenship, Khatri

## 493B. Anatomy Medical Education Special

 Study Module (6)Seminar- 10 hours; clinical activity - 14 hours; autotutorial - 6 hours; independent study -10 hours. Prerequisite: consent of instructor; UC Davis School of Medicine students only. Attend all of the lectures and laboratory sessions for courses 400 and 402 during the four-week section (approximately seven anatomy labs and three to four histology labs); tutor first-year students during the laboratory sessions; prepare and present a clinical correlate session. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Beck, Gross, Fitzgerald, Tucker

## 497T. Tutoring in Human Anatomy (1-5)

Tutoring-3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine. (H/ P/F grading only.)

## 498. Advanced Group Study (1-12)

Prerequisite: medical students, interns, and residents with consent of instructor. Directed reading and group discussion and/or laboratory experience on selected topics. (H/P/F grading only.)

## 499. Research (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

## Clinical Research (CLH) <br> Graduate

200. Introduction to Clinical Research (3) Lecture-2 hours; independent study - 3 hours. Prerequisite: one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs; consent of instructor. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (Formerly Medical Science $460 C R$.) (S/U grading only.) -IV. (IV.) Meyers 201. Strategies for Grant Writing (2) Lecture-2 hours. Prerequisite: consent of instructor; completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in
nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training program. Practical skills and strategies to create successful grant proposals in NIH style/format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (Former course Medical Sciences 461CR.) (S/U grading only.) -IV. (IV.) Rutledge
201. Introduction to Clinical Epidemiology and Study Design (3)
Lecture-25 hours; discussion - 10 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, (K3O) program, or other SOM/CTSC training programs; consent of instructor. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (Formerly Medical Sciences 462CR.) (S/U grading only.) -IV. (IV.) McCurdy, Romano

## 203. Methods in Clinical Research (5)

Lecture-3 hours; discussion-2 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training programs; consent of instructor. Overview of major approaches to clinical research, including health services research techniques, informatics, GCRC, and preclinical methodologies to enhance clinical projects. Overview of UCD clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (Formerly Medical Sciences $463 C R$.) (S/U grading only.) -IV. (IV.) Berglund, Kravitz, Murphy
204. Responsible Conduct of Research (3) Lecture-3 hours. Prerequisite: consent of instructor; completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training program. The nine NIH-mandated modules: Data Acquisition and Reporting, Mentor Training, Publication Practices and Authorship, Peer Review/Grant Process, Collaborative Science, Human Subjects, Research with Animals, Conflict of Interest, Research Misconduct, and Entrepreneurship/Industry Collaborations/Intellectual Property/Technology Transfer. (Former course Medical Sciences 464CR.) (S/U grading only.) - IV. (IV.) Kon, Wun
205. Introduction to Medical Statistics (4) Lecture -3 hours; laboratory -2 hours. Prerequisite: completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training program; consent of instructor. Biomedical applications of statistical methods in clinical, laboratory, population medicine. Graphical/ tabular data presentation, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression/correlation, life tables. Microcomputer applications of statistical procedures in population medicine. (Formerly Medical Sciences 465CR.) (S/U grading only.) -IV. (IV.) Yang
220. Basics of Stem and Progenitor Cells (1) Lecture-1 hour. Prerequisite: Molecular, Cellular, and Integrative Physiology 200, 200L; consent of instructor; graduate standing. This is a lecture course designed for graduate students who have experience in cell culture techniques. It is designed to give
a broad overview of the field and current cells of interest to the greater research community. ( $\mathrm{S} / \mathrm{U}$ grading only.) - III. (III.) Tarantal
222. Ethical Issues in Stem Cell Biology (1) Lecture/discussion-1 hour. Prerequisite: consent of instructor; graduate standing. Critical presentation and analysis of recent articles in stem cell biology and small group discussions of the ethical issues surrounding this area of research. (S/U grading only.) - II. (II.) Ikemoto, Rich
230. Congestive Heart Failure, Mechanism of Disease (3)
Lecture/discussion-2 hours; project. Prerequisite: consent of instructor; graduate standing. Underlying mechanisms of cardiomyopathy and heart failure. Presentation of fundamental knowledge of and recent basic research on heart failure. Student team projects: investigation and presentation of a research topic and bench research project to advance research in the same area.-II. (II.) Knowlton

## 231. Current Techniques in Clinical Research (2)

Lecture - 1 hour; clinical activity-3 hours. Prerequisite: consent of instructor and graduate standing; completion of course 250. Current techniques used in clinical research such as electrophysiology, cardiovascular surgery, cardiac catheterization and echocardiography, team science, and patient management. Lectures are presented by experts on each technique, with an emphasis on use in translational research. (S/U grading only.) - I, II, III, IV. II, II, III, IV.)

## 233. Molecular Mechanisms of Disease:

 Cancer (3)Lecture/discussion - 2 hours; project-3 hours. Prerequisite: consent of instructor. Restricted to students pursuing the designated emphasis in Translational Research; graduate standing. Cutting edge of research on underlying mechanisms of cancer development, progression and prevention - clinical trials/ drug development, signaling pathways and molecular mechanisms of cancer development, recent basic research on cancer stem cells, genetics and epigenetic events and animal models used. - II. (II.) Goldkorn
240. Predoctoral Clinical Research Training Program Research Integration (1)
Seminar-0.5 hours; discussion-0.5 hours. Prerequisite: consent of instructor and enrollment in the Predoctoral Clinical Research Training Program in the CTSC, School of Medicine. Alternating sessions: journal club, seminar/discussion, and research integration sessions. May be repeated three times for credit (S/U grading only.) - I, II, III. (I, II, III.) Kenyon

## 250. Integrating Medicine Into Basic

 Science (6)Lecture-3.75 hours; discussion-6 hours; semi-nar-2.5 hours; clinical -8 hours. Prerequisite: consent of instructor; graduate standing; acceptance into HHMI Integrating Medicine into Basic Science program. Four-week summer institute consisting of didactic lectures, reading assignments, group discussions, and clinical rotations to acculturate students to the human medical environment; integrate medical principles, physiology and pathophysiology into basic research; introduce high-impact clinical studies related to medicine and health. ( $S / U$ grading only.) -IV. (IV.) Knowlton, Meyers, Robbins
290A. Hot Topics in Clinical Research (1) Seminar-1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
290B. Hot Topics in Stem Cell Biology (1)
Seminar-1 hour. Prerequisite: graduate standing. Seminars presented by guest lecturers on subjects of their own research. (S/U grading only.) -I, II, III. (II, II, III.)

290C. Literature in Translational Research (1)

Discussion - 1 hour. Prerequisite: graduate standing and consent of instructor. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.) - I, II, III. (I, II, III.) Knowlton

## 290D. Literature in Translational Research

 (1)Discussion - 1 hour. Prerequisite: consent of instructor; graduate standing. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.)-I. (I.) Knowlton
298. Group Study in Clinical Research (1-5) Prerequisite: consent of instructor. Special topics in Clinical Research appropriate for group study at the graduate level. Restricted to students enrolled in the Mentored Clinical Research Training Program. (S/U grading only.)
299. Clinical Research (1-5)

Prerequisite: consent of instructor. Independent research and special topics in clinical research appropriate for graduate level. Restricted to students enrolled in the Mentored Clinical Research Training Program. (S/U grading only.)

## Dermatology (DER)

## Upper Division

192. Internship in Cutaneous Biology (1-4) Internship-8-20 hours; final report. Prerequisite: upper division standing or consent of instructor. Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. (P/NP grading only.)-Isseroff, Izumiya, Liu, Murphy, Takada
193. Special Study in Cutaneous Biology (1-4)
Prerequisite: advanced undergraduate standing and/or consent of instructor. Special study by individual arrangement of specialized topics in biology of skin. Work may be assigned readings, laboratory research or a combination. (P/NP grading only.) Isseroff, Izumiya, Liu, Murphy, Takada

## Graduate

299. Research in Cutaneous Biology (1-12)

Laboratory-3-36 hours. Prerequisite: consent of
instructor. Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology. (S/U grading only.) Isseroff, Liu

## Professional

420. Integumentary System (2)

Lecture/discussion-3 hours: clinical activity-0.25 hours. Prerequisite: approval of School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must have passed all SOM Year 1 courses. Cell biology, pathology, and physical diagnosis of the skin. Recognition of normal variations, and common or important dermatoses. Patient demonstrations of select conditions. (P/F grading only.)-I. (I.) Eisen, Isseroff

## 460. Dermatology Clinical Clerkship (6)

Clinical activity (inpatient/outpatient service) - 40 hours for four weeks. Prerequisite: completion of three years of medical school; or consent of instructor. Observation and participation in dermatology clinics/practice and participation in Ward Rounds and Dermatology Clinics at UC Davis Medical Center, Kaiser, and private practitioner offices. Limited enrollment. - I, II, III, IV. (I, II, III, IV.) Fazel
465. Specialty Externship in Dermatology (3-16)
Clinical Activity - 30 hours. Prerequisite: consent of instructor. Externship provides in-depth exposure to one of a variety of subspecialties in Dermatology. May be repeated for credit. (H/P/F grading only.) I, II, III, IV. (I, II, III, IV.) Fazel

## 466. Away Acting Internship in

 Dermatology (3-18)Clinical Activity-40 hours; lecture-6 hours. Prerequisite: consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.) -

## , II, III, IV. (I, II, III, IV.) Fazel

470. Introduction to Dermatopathology (6)

Clinical-20 hours; independent study-20 hours; lecture/discussion-6 hours. Prerequisite: previous rotation in a Dermatology Clerkship; consent of instructor. Restricted to fourth year medical student. Integrated, multi-specialty approach to the microscopic diagnosis of inflammatory and neoplastic skin disorders. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Barr, Fung, Konia

## 480. Insights in Dermatology (1-3)

Clinical activity-3-9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.)
495. Wound Healing: From Bench to

## Bedside (6)

Clinical activity- 12 hours; laboratory - 8 hours; autotutorial- 15 hours; term paper. Prerequisite: medical students only. An integrated, multi-specialty approach to clinical soft tissue wound healing.-I, II, III, IV. (I, II, III, IV.) Isseroff

## 498. Special Topics in Clinical Dermatology

 (1-6)Independent study-3-18 hours. Prerequisite: medical students with consent of instructor. Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV) Armstrong
499. Research in Cutaneous Biology (1-12) Laboratory-3-36 hours. Prerequisite: consent of instructor. Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty. (H/P/F grading only.) - Armstrong

## Emergency Medicine (EMR)

## Lower Division

## 92. Emergency Medicine Clinical Research Internship (1-4)

Prerequisite: Undergraduate student in good academic standing at UC Davis; consent of instructor. This course is intended to give the undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students will learn the basics of conducting and developing clinical research studies, using examples from ongoing studies. May be repeated for credit up to four units. Units awarded will depend on hours worked. -I, II, III, IV. II, II, III, IV.) Panacek

## Upper Division

## 192. Emergency Medicine Clinical Research

 Internship (1-4)Internship-6-12 hours. Prerequisite: undergraduate student in good academic standing at UC Davis; consent of instructor. Intended to give the upper division undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students learn the basics of conducting and developing clinical research studies. May be repeated two times for credit. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.) Panacek

## 199A. Special Study for Advanced Undergraduates (4-12)

Prerequisite: open to experienced RA's who have successfully performed in the EMRAP program for a minimum of three quarters; consent of instructor. This course is for those are interested in working on specific EM projects in a more extensive way. Must com-
mit at least 4 hours per week for two quarters. Must have database skills. Deferred grading only, pending completion of sequence.) -I, II, III, IV. (II, II, III, IV.) Panacek

## Professional

401. Preceptorship in Emergency Medicine (1-6)
Clinical activity - 10 hours. Prerequisite: consent of instructor. Exposure to the specialty of Emergency Medicine and observation of a wide array of patients in the Emergency Department. May be repeated for credit. (P/F grading only.) -I , II, III, IV. (I, II, III, IV.) Bing
402. Introduction to Medical Toxicology (3-6)
Prerequisite: fourth-year medical student in good standing; consent of instructor. In-depth review of clinical and medical toxicologic emergencies. Rotation includes contact with toxicology trained emergency faculty, didactic lectures, journal club, simulation training and exposure to a very busy poison control center. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Ford

## 440. Emergency Medicine Clerkship (6)

Clinical activity-46 hours; lecture/discussion-4 hours. Prerequisite: satisfactory completion of Medicine, Surgery, and Pediatric Clerkship. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. (H/P) F grading only.) -I, II, III, IV. (I, II, III, IV.) Jones
445. Emergency Medicine Ultrasound for Fourth-Year Medical Student (3-6)
Prerequisite: fourth-year Medical Student in good standing; interest in Emergency Medicine or Critical Care is recommended; course 440 or equivalent is recommended prior to the rotation. Intended for students interested in learning both the technical and cognitive skills of bedside ultrasound. Emphasis will be on the use of ultrasound in emergency medicine as a diagnostic tool and in procedural guidance. Limited enrollment. (H/P/F grading only.) $-\mathrm{I}, \mathrm{II}, \mathrm{III}$, IV. (I, II, III, IV.) Kelley

## 450. Ambulatory Externship in Emergency

 Medicine (3-18)Credit will be given for approved non-Al Emergency Medicine courses at other institutions to which there is not an equal learning experience at UC Davis.
(H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Jones

## 465. Externship in Emergency Medicine

 (4.5-6)Clinical activity-36 hours; lecture/discussion-4 hours. Prerequisite: satisfactory completion of Medicine, Surgery and Pediatrics. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Jones

## 470. Pediatric Emergency Medicine <br> Clerkship (6)

Clinical activity - 36 hours; lecture/discussion - 4 hours. Prerequisite: satisfactory completion of Medicine, Surgery, Pediatrics. Restricted to fourth-year medical student in good standing only. See patients in the Pediatric area of the Emergency Department under the supervision of an Emergency Medicine Attending. Emphasis on recognition and management of the acutely ill pediatric patient and treatment of common pediatric complaints. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Vance

## 480. Emergency Medicine Health Policy (1-

 6)Lecture-4 hours; discussion - 16 hours; independent study- 10 hours. Prerequisite: consent of instructor. Current health policy issues affecting emergency medicine in California. Participation in policy discussions, attend meetings with California
legislators and staff, and work with lobbyists to understand how policy is made in California. (H/P/ F grading only.) -I, II, III, IV. (I, II, III, IV.) Moulin

## 490. Emergency Procedures Elective (3)

 Lecture/discussion-24 hours; web virtual lecture8 hours; tutorial-4 hours; independent study-4 hours. Prerequisite: current basic life support (BLS) certification. Restricted to fourth-year medical student in good standing only. Simulator-based skills training for emergency procedures. Topics include airway management, central venous access, chest tube placement, and general critical care resuscitation skills. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Barton493A. Teaching the Basic Sciences SSM (2) Lecture-6 hours; lecture/laboratory - 8 hours; laboratory -30 hours; tutorial -10 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a yearlong in progress court to teach lecture and discussion education technique and theory. (Deferred grading only, pending completion of sequence. H/ P/F grading only.) -IV. (IV.) Wilkes

## 493B. Cardiac Arrest, Resuscitation and

## Repurfusion SSM (3)

Lecture-5 hours; lecture/laboratory-10 hours; lab-oratory- 16 hours; clinical activity- 4 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course specific to the topics of Cardiac Arrest, Resusciatation and Repurfusion (Deferred grading only, pending completion of sequence. H/P/F grading only.)-II, III. (II, III.) Barnes, Laurin
493C. Teaching the Basic Sciences SSM (2) Lectrue-6 hours; lecture/laboratory-8 hours; laboratory -30 hours; tutorial -10 hours. Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a yearlong in progress court to teach lecture and discussion education technique and theory. (Deferred grading only, pending completion of sequence. H/ P/F grading only.) - II. (II.) Wilkes

## 499. Research (2-18)

Laboratory-full time ( 1 to 12 weeks). Prerequisite: consent of instructor. Elective where topics may be selected in either basic or clinical research areas of Emergency and/or Critical Care Medicine. The goals will be tailored to each individual student. Enrollment requires prior discussion and consent of instructor. (H/P/F grading only.)

## Family and Community Medicine (FAP)

## Lower Division

92C. Primary Care Clinics (2)
Clinical activity - $6-8$ hours; seminar-2 hours; lec-ture-1-2 hours. Prerequisite: consent of instructor, enrollment at the UC Davis campus, for freshman and sophomore students. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience exposes lower division students to health care delivery, patient histories, physical examinations, health promotion, disease prevention, diagnosis; treatment of episodic, acute, chronic illness; appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.)I, II, III, IV. (I, II, III, IV.) Edison-Ton, Hitzeman, Smith

## Upper Division

## 192C. Primary Care Clinics (1-2)

Clinical activity-6-8 hours; seminar-2 hours; lec-ture-1-2 hours. Prerequisite: consent of instructor, enrollment at the UC Davis campus, upper-division standing. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience introduces students to health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness,
basic laboratory testing and appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.) - I, II, III, IV. (II, II, III, IV.) Edison-Ton, Hitzeman, Smith

## 195. Health Care to Underserved

## Populations (1)

Lecture-1 hour. Prerequisite: sociology, political science, or applied behavioral science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations in California impacting their health; roles of family/interpersonal relationships in making health care decisions; and clinician's perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/NP grading only.) - III, III. (II, III.) Nesbitt

## Professional

401. Introductory Preceptorship in Family Practice (3-9)
Clinical activity-20-40 hours. Prerequisite: completion of first year of medical training. Preceptorship in family practice offered as an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician's office, doing patient interviews, historytaking, and performing physical exams. (H/P/F grading only.) - III, IV. (III, IV.) Eidson-Ton

## 405. The Healer's Art (1)

Lecture-0.6 hours; workshop-3 hours. Prerequisite: consent of instructor. Limited to first-year medical students. Learning to strengthen your humanity and remain open-hearted can make the difference between professional burnout and a fulfilling life. Opportunity to learn tools for self care, healing loss, finding meaning, strengthening commitment and becoming a true physician. (P/F grading only.)-II. (II.) Eidson-Ton, Neyhart

## 411. Selected Studies of Systems for

Chronic Illness Care (3)
Clinical activity -4 hours; discussion - 4 hours. Prerequisite: course 400A, 400B, 400C, medical students with consent of instructor. Understanding of chronic illness, particularly diabetes, participation in patient care, alternative techniques. May be repeated one time for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Fong

## 430. Primary Care Clerkship (12)

Clinical activity -45 hours; lecture-2 hours; workshop -2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week primary care clerkship for third year medical students. Four week primary care experience with an additional four weeks in Internal Medicine clinics. (H/P/F grading only.) - I, II, III, IV. Eidson-Ton
430FA. SJVP Longitudinal Primary Care Clerkship at UCSF (A) (4)
Clinical activity-45 hours; lecture-2 hours; work-shop-2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)-I. (I.) Eidson-Ton, Vierra

## 430FB. SJVP Longitudinal Primary Care

 Clerkship at UCSF (B) (6)Clinical activity-45 hours; lecture-2 hours; work-shop-2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)-II. (II.) Eidson-Ton, Vierra

430FC. SJVP Longitudinal Primary Care Clerkship at UCSF (C) (2)
Clinical activity -45 hours; lecture-2 hours; work-shop-2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.) - III. (III.) Eidson-Ton,

## Vierra

430TA. TeachMS Longitudinal Primary Care Clerkship (A) (4)
Clinical activity -45 hours; lecture-2 hours; work-shop-2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)-I. (I.) Eidson-Ton, Vierra

## 430TB. TeachMS Longitudinal Primary Care

 Clerkship (B) (6)Clinical activity -45 hours; lecture-2 hours; work-shop-2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.)-II. (II.) Eidson-Ton, Henderson, Holt, Vierra

## 430TC. TeachMS Longitudinal Primary Care

 Clerkship (C) (2)Clinical activity-45 hours; lecture-2 hours; work-shop-2 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only; deferred grading only, pending completion of sequence.) - III. (III.) Eidson-Ton, Henderson, Holt, Vierra
434. Primary Care Clinics-Clínica Tepati (312)

Clinical activity $-32-36$ hours; seminar $-0-2$ hours; lecture-1-2 hours. Open to medical students in all four years of medical school. Medical students will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Hitzeman
435. Primary Care Clinics-Imani Clinic (312)

Clinical activity $-32-36$ hours; seminar $-0-2$ hours; lecture-1-2 hours. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Smith

## 436. Continuity Clinic in Primary Care-

## Shifa Clinic (3-12)

Clinical activity $-32-36$ hours; seminar-0-2 hours; lecture-1-2 hours. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of vari-
ous ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Yasmeen

## 437. Primary Care Clinics-Knights Landing (3)

Clinical activity-2-3 hours; lecture - 1 hour. Must complete an application and interview prior to registering. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-leve populations in the community of Knights Landing.
May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Eidson-Ton

## 439D. Directed Clinical Studies in Family

## Medicine (1-12)

Clinical activity -40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 439R. Directed Studies in Family Medicine

 (1-12)Clinical activity - 30 hours; independent study - 10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.)-I, II, III, IV. (I, II, III, IV.)

## 444. Advanced Preceptorship in Family

## Medicine (3-18)

Clinical activity-40 hours. Prerequisite: completion of third-year primary care plus clerkship or consent of instructor. Preceptorships with primary care physicians in a variety of settings. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an out patient setting. May be repeated up to 18 units of credit. (H/P/F grading only.)-I, II, III, IV. Eidson-Ton

## 450. CAM in Family \& Community Health

 (3-18)Variable-20-40 hours. Intended to grant units for away rotations; not offered at the UC Davis Medical Center. Complementary and alternative medicine courses at away institutions that cover various aspects of integrative medicine, including but not limited to: botanicals, homeopathy, mind/body, naturopathy, nutrition, traditional Chinese medicine, osteopathy, and energy medicine. Offered irregularly. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Eidson-Ton
460. Geriatrics in Community Health (3-6) Fieldwork-24 hours; clinical activity- 12 hours; lecture-4 hours. Prerequisite: course 430. Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and case management specialists. Observation and participation in MMSE's, patient-family conferences, interdisciplinary team meetings,
neuropsychiatric testing and home visit evaluations. (H/P/F grading only.) -I, II, III, IV. Lin

## 468. International Preceptorship (3-12)

Clinical activity-40 hours. Prerequisite: medical student with consent of instructor. Preceptorship with a family practitioner in a foreign country (arranged by student contact or with assistance of the Family and Community Medicine Department.) Participate in clinical activities, analyze and report characteristics of the practice. May be repeated up to 12 units of credit. (H/P/F grading only.) -I, II, III, IV. Edison-Ton
469. Inpatient Acting Internship in Family Medicine (3-12)
Clinical activity -40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of inpatients on a family medicine hospital service. Available sites are universitybased family medicine residency programs and programs within the UC Davis Network of Affiliated

Family Medicine Residency Programs. May be repeated up to 12 units of credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Eidson-Ton

## 470. Inpatient Clinical Elective in Family

## Medicine (3-12)

Clinical activity-40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of patients on a family medicine hospital service. Usually includes inpatient and outpatient experience. May be repeated up to 12 units of credit. (H/P/F grading only.) $-I$, II, III, IV. (I, II, III, IV.) Eidson-Ton

## 475. Combined Inpatient/Outpatient

Clinical Elective in Family Medicine (3-12) Clinical activity -40 hours. Prerequisite: completion of third-year of medical school or consent of instructor. Open to Medical students only. Combined inpatient and outpatient elective. Consists of comprehensive primary medical care of patients on a family medicine hospital service and in a family medicine outpatient clinic. May be repeated up to 12 units for credit. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Eidson-Ton
488. Selected Studies in Family Practice (19)

Prerequisite: medical students with consent of instructor. Assigned readings in family practice to increase understanding on selected topics relating to family medicine and primary health care delivery; visits to and written analysis of selected health care programs; and/or exposure to family practice with a community physician preceptor who is a member of the clinical faculty. May be repeated up to 9 units of credit. -I, II, III, IV.

## 490. Health Care to Underserved

## Populations (1)

Lecture-1 hours. Prerequisite: Sociology, Political Science, or Applied Behavioral Science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations impacting health; roles of family/interpersonal relationships in making health care decisions; the nature of ethnic/racial/socioeconomic health care disparities; and clinicians' perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/F grading only.) -I, II. (I, II.) Nesbitt

## 493. Aging and Health (6)

Seminar-12 hours. Prerequisite: consent of instructor. Is disease and infirmity the inevitable consequence of aging? We will spend four weeks exploring this question by reviewing the biology of aging, physiologic changes seen in aged individuals and disease processes commonly found in elderly persons. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Lin, Neyhart

## 495. LGBTIQQA Healthcare Lecture Series

 (1)Lecture-6 sessions. Increase the awareness of medical issues surrounding the LGBTIQQA community and arm students with knowledge of the health disparities the community faces. Provide better quality care to the LGBTIQQA patients cared for as physicians. May be repeated for credit. (P/F grading only.) - II. (II.) Callahan, Latimore

## 498. Directed Group Study (1-5)

Variable-3-15 hours. Explore in-depth various topics in primary care. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Edi-son-Ton
499. Research (1-12)

Prerequisite: medical students with consent of instructor. Research in various aspects of the health care delivery system. (H/P/F grading only.)

## Human Physiology (HPH)

## Lower Division

99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor.
(P/NP grading only.)

## Upper Division

192. Internship in Human Physiology
(1-12)
Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in physiology and related fields. (P/NP grading only.)
193. Directed Group Study (1-5)

To be arranged. Prerequisite: consent of instructor. Directed reading, discussion and/or laboratory experience on selected topics. (P/NP grading only.)

## 199. Special Study for Advanced Undergraduates (1-5)

Laboratory-3-15 hours; undergraduate research project. Prerequisite: senior standing in biology, chemistry, physics, psychology, or engineering. (P/ NP grading only.)

## Graduate

210A. Advanced Physiology (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: Physiology Ph.D. program, or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as Physiology 210A.) -I. (I.) Cala, Payne

## 298. Group Study (1-5)

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved.
299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

400. Human Physiology (6)

Lecture-3 hours; laboratory - 2 hours. Medical student only. General and cellular physiology of neurons, muscle, and epithelial cells and systemic physiology of cardiovascular, respiratory, gastrointestinal, and renal systems. (Deferred grading only, pending completion of sequence.) ( $P / F$ grading only.) - I, IV. (I, IV.) Payne, Widdicombe

## 403. Medical Neuroanatomy (5)

Lecture-3 hours; laboratory-1 hours; discussion/ laboratory -1 hour. Prerequisite: Successful completion of course 400, block 1 ; restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as Cell Biology and Human Anatomy 403.) (P/F grading only.) - IV. (IV.) Blankenship, Gross

## 493. Physiological Principles in SICU SSM

 (6)Lecture - 5 hours; lecture/laboratory - 10 hours; lab-oratory- 16 hours; clinical activity- 4 hours. Prerequisite: consent of instructor; restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Care of the Critically III Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems. (Same course as Surgery 493C.) (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Cala, Holcroft

497T. Tutoring in Human Physiology (1-5) Tutoring-3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/ P/F grading only.)-Cala

## 498. Directed Reading and Group Study

 (1-4)Discussion -2-8 hours. Prerequisite: medical student. Directed reading and discussion on selected topics in human physiology. (H/P/F grading only.)

## 499. Research (1-6)

Prerequisite: medical students with consent of instructor. Laboratory investigation on selected topics. (H/ P/F grading only.)

## Internal Medicine (IMD)

## Lower Division

## 92. Internship (1-4)

Internship-3-12 hours. Prerequisite: lower division standing and consent of instructor. Supervised internship in internal medicine and related fields. (P/NP grading only.)-Last

## 98. Directed Group Study (1-2)

Seminar-1-2 hours. Prerequisite: lower division standing and consent of instructor. Directed group study in medicine and related fields. (P/NP grading only.) - Last

## 99. Undergraduate Research in Medicine:

 Molecular and Cell Biology (1-3)Prerequisite: consent of instructor. (P/NP grading only.) - Last

## Upper Division

## 164. Practicum in Community Health Clinic:

 Bayanihan Clinic (1-2)Clinical activity -5 hours. Through active participation in the medical aspects of community health clinics, the undergraduate student gains knowledge of the organization, administration, and problem-solving capabilities. May be repeated for credit. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.) Guerrero

## 192. Internship in Internal Medicine (1-12)

Internship-3-36 hours; final report. Prerequisite: upper division standing. Supervised work experience in internal medicine and related fields. (P/NP grading only.)
194. Practicum in Community Health Clinics
(1-3) (1-3)
Clinical activity $-5-15$ hours on Saturday mornings and during the week as necessary, excluding holidays. Prerequisite: consent of instructor. The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities. May be repeated for credit. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.) Kumagai

## 198. Directed Group Study (1-2)

Seminar-1-2 hours. Prerequisite: consent of instructor. Directed group study in medicine and related fields. (P/NP grading only.) - Last

## 199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

## Graduate

214. Topics in Medical Ethics (1)

Seminar - 1 hour. The complex moral, legal, and ethical dilemmas that patients, families, and health care providers face in today's clinics. May be repeated one time for credit. (S/U grading only.)-I.
220D. Cardiovascular System (2.5)
Lecture/discussion-5.5 hours. Prerequisite: Human Physiology 200, graduate student status and consent of instructor. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. - II. (II.) Laslett

## 250. Medicine and the Law (3)

Lecture/discussion-2 hours; project-2 hours.
Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (S/U grading only.) -II. Rich

290C. Controversies in Clinical Research (1) Seminar-3 hours. Clinical Research Study design and data analysis related to controversial research areas. Presentations assigned to and given by faculty/student teams. May be repeated for credit. (S/U grading only.) - III. (III.) Lane, Meyers

## Professional

414. One Health: A Course on Global Health (1)
Conference-8 hours. Global health problems are complex and require culturally-sensitive, sociallyacceptable, and action-oriented approaches to create practical and cost-effective solutions. Will examine major health problems created by the convergence of human, animal, and environmental influences. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Wilkes
415. Summer Institute on Race and Health (6)

Independent study-30 hours. Prerequisite: consent of instructor. Limited enrollment. Using field trips, media, readings, and clinical experiences, 8 - 10 first year medical students will explore issues of race, health disparities and related issues in a 4 week institute during the summer break. (P/F grading only.) - II. (II.) Fancher, Fernandez, Garcia, MurrayGarcia
420A. Hematology (2)
Lecture/discussion - 1 hour; discussion - 1 hour. Prerequisite: consent of instructor. Restricted to Medical students only. Malignant disorders of blood cells and transfusion therapy. Covers acute leukemia, myelodysplasia, myeloproliferative disorders, lymphoma, and myeloma. (P/F grading only.)-I. (I.) O'Donnell

## 420B. Gastrointestinal System (2.5)

Lecture-2 hours; discussion-2 hours. Prerequisite: approval of Committee on Student Progress; medical student only. Basic pathophysiologic principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiologic basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management. (P/F grading only.) - II. (II.) Terrado
420C. Pulmonary \& Critical Care Medicine (2.5)

Laboratory/discussion -5.5 hours. Prerequisite: approval of SOM's Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Clinical aspects of respiratory anatomy, physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases \& disorders, and critical care medicine. (P/F grading only.)-I. (I.) Stollenwerk
420D. Cardiovascular System (2.5)
Lecture/discussion-5.5 hours. Prerequisite:
Approval of the School of Medicine Committee on Student Promotions. Restricted to Medical students only; student mast pass all SOM Year 1 courses.
Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. (P/F grading only.)-I. (I.) Venugopal

## 420E. Nephrology (2)

Lecture-2 hours; discussion-2 hours; laboratory2 hours. Prerequisite: approval of Student Progress Committee. Fundamental aspects of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections. (P/F grading only.)-II. Yeun

## 430. Medicine Clerkship (12)

Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Clerkship is divided into two, four-week blocks, one each at UCDMC and at Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) -I, II, III, IV. Prescott

430FA. SJVP Longitudinal Medicine

## Clerkship at UCSF (A) (4)

Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)-I. (I.) Aronowitz, Johl

## 430FB. SJVP Longitudinal Medicine

## Clerkship at UCSF (B) (6)

Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)-II. (II.) Aronowitz, Johl

## 430FC. SJVP Longitudinal Medicine

## Clerkship at UCSF (C) (2)

Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence) - III. (III.) Aronowitz, Johl
430TA. TeachMS Longitudinal Medicine Clerkship (A) (4)
Clinical activity - 45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care sitvations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)-l. (l.) Aronowitz, Johl
430TB. TeachMS Longitudinal Medicine Clerkship (B) (4)
Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care sitvations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)-II. (II.) Aronowitz, Johl
430TC. TeachMS Longitudinal Medicine Clerkship (C) (2)
Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care sitvations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.) - III. (III.) Aronowitz, Johl'

## 439D. Directed Clinical Studies in Internal

 Medicine (1-12)Clinical activity-40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 439R. Directed Studies in Internal Medicine

 (1-12)Clinical activity - 30 hours; independent study - 10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) - I, II, III, IV. (II, II, III, IV.)
450A. Medicine and the Law (1.5)
Seminar-2 hours; discussion-2 hours. Prerequisite: consent of instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. Offered irregularly. (Deferred grading only, pending completion of sequence. H/P/F grading only.) - II. (II.) Rich
450B. Medicine and the Law (1.5)
Seminar-2 hours; discussion-2 hours. Prerequisite: consent of instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. Offered irregularly. (Deferred grading only, pending completion of sequence. H/P/F grading only.)-III. (III.) Rich
459. Oncology: Research and Treatment of Cancer (2)
Lecture/discussion-2 hours. Prerequisite: second-, third-, or fourth-year medical student and/or consent of instructor. Comprehensive review of current treatment practices of cancer and state-of-the-art research impacting treatment and prevention of cancer. Emphasis on epidemiology, molecular biology, and pharmacology. (H/P/F grading only.) - I. (I.) DeGreggio

## 460. Correctional Health Care Clerkship

 (1-4)Clinical activity-full time. Prerequisite: fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Silva

## 462. Medicine Wards AI (6)

Clinical activity-40 hours. Prerequisite: Medical Sciences 431; consent of instructor; demonstrated ability to accept responsibility. Limited enrollment. Assume role of acting intern and be primary physician on medical ward under direction of medical resident and staff. Teams I-V take call every fifth night. Emphasis on evidence-based inpatient care. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Johl

## 463. Acting Internship in Medicine Intensive Care Unit (MICU) (6)

Clinical activity-40 hours. Prerequisite: completion of third year in medical school; consent of Director of MICU. Limited enrollment. At UCDMC, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU. On call in hospital every fourth night. (H/P/F grading only.) -I , II, III, IV. (I, II, III, IV.) Sandrock

## 464. Bayanihan Primary Care Clinic (3)

 Clinical activity-6 hours. Prerequisite: consent of instructor. Restricted to medical students in all four years of medical school. Under the guidance and supervision of a physician, medical students will learn patient history taking, medical documentation, counseling, diagnosis and treatment of patients with chronic and acute disease. Provides exposure to the special needs of various ethnic and socioeconomic groups. May be repeated for credit. (P/F grading only.) - I, II, III, IV. (I, II, III. IV.) Guerrero
## 465. Medicos-Global Health Sciences (9)

Lecture-5 hours; clinical activity-25 hours; field-work-5 hours; project-5 hours. Prerequisite: consent of instructor; medical students only. Travel to
foreign country for four weeks to collaborate with faculty from local universities and work in urban and rural environments, including hands-on experience with clinic patients. Cultural exchange and awareness of global health care. (P/F grading only.) -IV. (IV.) Wilkes

## 468. Ambulatory Internal Medicine <br> Externship (3-18)

Clinical activity -40 hours. Prerequisite: course 430; consent of instructor; demonstrated ability to accept responsibility. Limited enrollment. Hands-on primary care clinical experience in the ambulatory setting supervised by a general internist. Emphasis on evidence-based outpatient care. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Henderson
470. Landmark Clinical Trials and EvidenceBased Medicine (3)
Lecture/discussion-10 hours; clinical activity-8 hours. Prerequisite: fourth-year medical student. Ten landmark clinical trials from a historical, clinical, and epidemiological/research perspective. Principals of evidence-based medicine. (H/P/F grading only.) - III. Kravitz, Amsterdam

## 480. Person Centered Assessment (1)

Lecture - 1 hour. Prerequisite: open to all medical students. Person-centered assessment modalities and diagnostic approaches with regards to Internal Medicine and its different subspecialties. (P/F grading only.)-I. Fitzgerald
494. Practicum in Community Health Clinics (1-3)
Clinical activity $-15-40$ hours. Prerequisite: medical student with consent of instructor. Students are assigned to clinical settings that demonstrate ethnic, urban/rural, or other related aspects of clinical community health. Through active participation in health care delivery, students are able to relate conceptual with practical aspects of primary health care. May be repeated for credit. (H/P/F grading only.) -I, II, III. (I, II, III.) Kumagai
497. Medicine, Bioethics and the Holocaust (3)

Lecture/discussion-10 hours. Prerequisite: medical students only, consent of instructor. The concept of "evil" and the role of collaborators, bystanders and participants exemplified by the holocaust and compared to problems physicians face in practice today. Demonstration that evil emerges incrementally until taken for granted. (P/F grading only.) Offered irreg-ularly.-I, II, III.

## 498. Group Study in Internal Medicine

 (1-18)Prerequisite: consent of instructor. Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care responsibility on campus, at UCDMC or off campus by specific arrangement. (H/P/F grading only.) -I , II, III, IV. (I, II, III, IV.)
499. General Medicine Research (1-18)

Independent study-20 hours. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Meyers

## Internal Medicine-Cardiology (CAR)

## Upper Division

192. Internship in Cardiology (1-12)

Internship-3-36 hours; final report. Prerequisite:
upper division standing; approval of project by preceptor prior to internship. Supervised work experience in cardiology. May be repeated for credit up to 12 units. (P/NP grading only.)

## 199. Cardiology Research (1-5)

Prerequisite: consent of instructor. Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions. (P/NP grading only.)

## Graduate

220. Basic Science in Cardiology (1)

Lecture-1 hour. Prerequisite: graduate or medical student status. Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural con-
trol of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current information in their areas. Offered in alternate years. (S/U grading only.) - III. Kaufman

## Professional <br> 401. Clinical Cardiology Clerkship: Kaiser (3-18)

Clinical activity ( 4 weeks) - $8-12$ hours (hospital); 1 5 hours (clinics). Prerequisite: third- and fourth-year medical students with advance approval by Division of Cardiology. Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CCU and elsewhere. The roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated. May be repeated for credit. Limited enrollment. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.)
460. Cardiology Clinical Clerkship (3-18)

Clinical activity-full time (2-12 weeks). Prerequisite: Internal Medicine 430, third- and fourth-year medical students in good academic standing with consent of instructor. Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiologic disorders. Two outpatient clinics per week. May be repeated for credit. Limited enrollment. (H/P/F grading only.) -I, II, III, IV.

## 461. Management of Coronary Artery

Disease: Coronary Care Unit (3-18)
Clinical activity (inpatient service) - full time (4 weeks). Prerequisite: completion of second year of medical school and advance approval by Division of Cardiology. Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment. Includes acute coronary care, hemodynamic monitoring, stress testing, cardiac catheterization, pathologic correlations and the modern approach to therapy, both medical and surgical, based on pathophysiologic mechanisms. May be repeated for credit. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 464. Preventive Cardiology (3-6)

Seminar-2 hours (for 2-4 weeks); clinical activityfull time ( $2-4$ weeks). Prerequisite: completion of third year of medical school. Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery services. (H/P/F grading only.) - II, III, IV. (II, III, IV.) Amsterdam

## 480. Insights in Cardiology (1-3)

Clinical activity-3-9 hours. Prerequisite: medical student in good academic standing and approval by Division of Cardiology. Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)
493. Gender Specific Medicine SSM (6)

Lecture-5 hours; lecture/laboratory - 10 hours; laboratory -16 hours; clinical activity -4 hours. Prereqvisite: consent of instructor; restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as Obstetrics \& Gynecology 493.) (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Sweet, Villablanca
498. Special Group Study: EKG Unit (1-12) Special study-2-week sessions. Prerequisite: medical students with advance approval by monthly attending faculty. Special group study in cardiology for medical students in EKG unit. May include lectures, directed reading, and/or discussion groups. May be repeated for credit. Limited enrollment. (H/ $\mathrm{P} / \mathrm{F}$ grading only.)

[^2]499. Research (1-12)

Prerequisite: approval by Division of Cardiology. (H/P/F grading only.)

## Internal Medicine-Endocrinology, Diabetes and Metabolism (ENM) <br> Upper Division

192. Internship in Endocrinology (1-12)

Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in endocrinology. May be repeated for credit up to 12 units. (P/NP grading only.)

## Graduate

299. Research (1-12)

Prerequisite: consent of instructor. Endocrinology research. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Professional

## 460. Endocrinology Clinical Clerkship

 (3-18)Clinical activity (inpatient-outpatient service) - full time ( 3 days per unit). Prerequisite: Internal Medicine 430 and/or consent of instructor. Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 465. Clinical Nutrition Clerkship (3-18)

Clinical activity-30 hours. Prerequisite: completion of Internal Medicine 430; consent of IOR. In-depth experience in assessment and monitoring of nutritional support of patients whose illnesses are complicated by malnutrition and of patients with problems in under-nutrition due to various illnesses. May be repeated for credit. (H/P/F grading only). -I, II, III, IV. (I, II, III, IV.) Prescott

## 480. Insights in Endocrinology (1-3)

Clinical activity - $3-9$ hours; oral presentation. Prerequisite: student in good academic standing and consent of instructor. First- or second-year students observe in morning Endocrine and Diabetes clinics and attend bi-weekly noon and afternoon endocrine conferences. They also give brief endocrine physiology oral presentation to the endocrine group. (H/P) F grading only). - I, II, III, IV. (I, II, III, IV.)

## 499. Research (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

## Internal Medicine-

Gastroenterology (GAS)

## Upper Division

192. Internship in Gastroenterology (1-12) Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in gastroenterology. May be repeated for credit up to 12 units. ( $\mathrm{P} / \mathrm{NP}$ grading only.)

## Graduate

## 299. Research (1-12)

Research in gastroenterology. (S/U grading only.)

## Professional

## 460. Gastroenterology Clinical Clerkship

 (3-18)Clinical activity -30 hours. Prerequisite: completion of third year of medical school. Work-up, manage, and follow-up new patients on active inpatient consulting service. Gastroenterology/Hepatology patients. Daily rounds with attending physician. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Terrado

## 480. Insights in Gastroenterology (1-3)

 Clinical activity - $3-9$ hours. Prerequisite: student in good academic standing and consent of instructor. To gain insight in clinical activities of Gastroenterology Division through attendance at any of the follow-ing: endoscopic procedures, ward rounds outpatient clinic, and G.I. grand rounds. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 499. Research (1-12)

Clinical activity-varied. Prerequisite: medical student status; consent of instructor. Part-time participation in active clinical and basic research projects. Some will involve both patient care and relevant laboratory procedures. Basic research includes liver metabolism, cancer markers, porphyrias diet and cancer, folate metabolism. May be repeated for credit. (H/P/F grading only.)

## Internal Medicine-General Medicine (GMD) <br> Upper Division

192. Internship in General Medicine (1-12) Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in general medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

## Graduate

291. Seminars in Human Health Services Research and Clinical Epidemiology (1) Seminar-1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as Epidemiology 291.) (S/U grading only.) - I, II, III. (I, II, III.)

## Professional

460. General Medicine Consults (1-18)

Clinical activity (inpatient-outpatient service)-40 hours. Prerequisite: fourth-year medical students with consent of instructor; a general medicine clerkship. Supervised opportunity to see entire spectrum of medical problems encountered by a general internist. Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consultation Service is particularly concerned with medical evaluation of surgical patients. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. II, II, III, IV.) Keenan

## 470. Health Care Ethics (3-9)

Lecture/discussion-2 hours; laboratory/discussio1 hour. Prerequisite: consent of instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as Nursing 470.) (S/U grading only.) - II, IV. (III, IV.) Loewy
485. Introduction to Health Care Ethics (1) Lecture- 10 weeks. Prerequisite: medical student in good standing. Introduction to concepts and methods of healthcare ethics. Emphasis on problems and methods. (H/P/F grading only.)-I. (I.) Loewy
493A. Teaching the Basic Sciences SSM (6) Lectrue-6 hours; lecture/laboratory-8 hours; laboratory -30 hours; tutorial -10 hours. Prerequisite: consent on instructor; concurrent registration in Medical Sciences 440. Restricted to UC Davis School of Medicine students only. Special Studies Module, a yearlong in progress court to teach lecture and discussion education technique and theory. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.)
499. General Medicine Research (1-18) Discussion-3 hours; clinical research - $8-40$ hours. Prerequisite: consent of instructor. Student will be involved in a clinical research problem within the areas, interest and expertise of members of Division of General Internal Medicine. Alternatively, the research effort will be directed toward investigation of a clinical problem of general medical interest. May be repeated for credit. (H/P/F grading only.)

## Internal Medicine- <br> Hematology-Oncology (HON)

## Upper Division

199. Research in Hematology-Oncology (1-5)
Laboratory-hours variable. Prerequisite: upper division standing and consent of instructor. Experience in laboratory research. (P/NP grading only.)-I, II, III, IV. (I, II, III, IV.)

## Graduate

298. Topics in Hematology (1-4)

Prerequisite: one year of graduate work and/or consent of instructor. Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics to be dictated by the interest and background of the students.
299. Research (1-12)

Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. ( $S / \cup$ grading only.)

## Professional

## 420. Oncology (4)

Lecture/discussion-2 hours. Prerequisite: approval by the SOM Committee on Student Promotions. Restricted to Medical student only; students must pass all Year 1 SOM courses. Covers the principles of oncology and the pathophysiology of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses. (P/F grading only; deferred grading only, pending completion of sequence.)-I, II. (I, II.) Welborn

## 420A. Oncology (4)

Lecture-2 hours. Prerequisite: consent of instructor. Restricted to Medical student only. Covers the principles of oncology and the pathophysiology of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses.
(P/F grading only.) - II. (II.) Welborn

## 460. Hematology-Oncology Acting Internship (6-18)

Clinical activity-full time (4-12 weeks). Prerequisite: fourth-year medical student in good academic standing. Acting intern on inpatient hematology/oncology ward service. May be repeated for credit. Limited enrollment. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.)

## 461. Hematology-Oncology Consult

Clerkship (6-12)
Clinical activity-full time (4-8 weeks). Prerequisite: fourth-year medical student in good academic standing. Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division. May be repeated for credit. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)
462. Hematology-Oncology Ambulatory Clerkship (3-18)
Clinical activity-30 hours. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Limited enrollment. Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.)

## 493. Cancer as a Process (1-6)

Seminar- 10 hours; clinical activity - 14 hours; autotutorial -6 hours; independent study -10 hours Prerequisite: consent on instructor. Restricted to UC Davis School of Medicine students only. Covers cancer as a process, beginning with risks and prevention, preneoplasia, microinvasion, treatment options, metastases and systemic therapy, pain medicine and palliative care, and cancer communication. Format includes traditional lectures, student-led case discussions, and problem-based learning. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Meyer, von Friederichs Fitzwater
499. Research (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

## Internal Medicine-Infectious Diseases (IDI)

## Upper Division

141. Infectious Diseases of Humans (1)

Lecture-1 hour. Prerequisite: introductory knowledge in biology and chemistry recommended. Course integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history. (P/NP grading only.)-I. (I.) Danekar

## 192. Research Internship in Internal

## Medicine (1-12)

Internship-3-36 hours; final report. Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings. May be repeated for credit up to 12 units. (P/NP grading only.)
199. Infectious Diseases Research (1-5)

Prerequisite: chemistry through organic chemistry (in addition, physical and biochemistry preferred), biology through basic bacteriology (in addition, microbiology and immunology preferred); and consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presentation. (P/NP grading only.)

## Graduate

211. Epidemiology and Prevention of Infectious Diseases (3)
Lecture-2 hours; discussion-1 hour. Prerequisite: Epidemiology 205B, 207 or Internal Medicine 421. Infectious disease epidemiology and prevention, with equal emphasis on human and veterinary diseases. Major categories of infectious diseases by mode of transmission. - III. DeRiemer, Sandrock
212. Research in Infectious Diseases (1-12) Prerequisite: consent of instructor. Laboratory investigation contributing to the dissertation for a graduate degree. ( $S / U$ grading only.)

## Professional

440. Introduction to AIDS and Related Disorders (1.5-6)
Clinical Activity - 30 hours; discussion - 10 hours. Prerequisite: first and second year medical students must be in good academic standing and have consent from the instructor. Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Students will interview patients, observe patient care and participate in ongoing clinic research as well as examine alternative lifestyles. May be repeated for credit. (H/ P/F grading only.) $-I$, II, IV.

## 450. Clinical and Social Care of the

## Injection Drug User (1-4)

Lecture-1 hour; clinical activity-3 hours. Prerequisite: first and second year medical students in good academic standing. Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users. May be repeated for credit up to 24 units. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 460. Infectious Diseases Clinical Clerkship

## (3-6)

Clinical activity. Prerequisite: successful completion of two years of study in an accredited medical school. Limited enrollment with priority to fourth-year medical students. Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Instruction in clinical
microbiology and the proper use of the laboratory will be provided. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Cohen

## 499. Research Topics in Infectious Disease

 (2-12)Prerequisite: successful completion of the first year of study in School of Medicine, graduate students (approved for graduate credit), and/or consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presentation. (H/P/F grading only.)

## Internal Medicine-Nephrology (NEP)

## Upper Division

192. Internship in Nephrology (1-12)

Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in nephrology. May be repeated for credit up to 12 units. (P/NP grading only.) -I, II, III, IV. (II, II, III, IV.)

## Graduate

299. Nephrology Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

444. Curriculum Design for Doctoring (1)

Project-2 hours; seminar-1 hour. Prerequisite: consent of instructor; second year standing in medical school. Design of Doctoring curriculum for medical students in focused topic areas to be announced annually. Students will design sessions, consider resource needs, and work with IORs to initiate the curriculum. (P/F grading only.) - IV. (IV.)
460. Nephrology and Fluid Balance (3-6) Clinical activity-4 completion of 3rd year medical school. Completion of Medicine Core Clerkship; consent of the instructor. Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UC Davis Medical Center covering the field of nephrology and fluidelectrolyte disorders. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Yeun

## 499. Research in Nephrology (3-18)

Prerequisite: individual arrangement and consent of instructor. Independent laboratory research on a specific problem related to biochemical or immunologic causes of renal disease and/or uremic disorders in humans or animals. (H/P/F grading only.)

## Internal Medicine-Pulmonary Medicine (PUL)

Upper Division

## 192. Internship in Pulmonary Medicine

 (1-12)Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in pulmonary medicine. May be repeated for credit up to 12 units. (P/NP grading only.)

## Graduate

299. Pulmonary Disease Research (1-12)

Laboratory. Prerequisite: by arrangement only. Pulmonary disease research activity with focus in inhalation toxicity, oxidants or lung biochemistry, and cell and molecular biology. (S/U grading only.) Cross

## Professional

460. Comprehensive Pulmonary Medicine Clerkship (3-6)
Clinical activity-40 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Rotation intended to provide a comprehensive student education in Pulmonary Medicine. Students will
participate in hands on clinical education, as well as completing an assigned curricula. Intended for students pursuing Internal Medicine \& Primary Care careers. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Stollenwerk

## 461. Critical Care Clinical Clerkship (3-6)

 Clinical activity-40 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine and Surgical Clerkships. Rotation intended to provide student education in the Critical Care Management of sub-specialty patients. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Stollenwerk
## 462. Pulmonary Clinical Clerkship (3-6)

Clinical activity- 35 hours. Prerequisite: completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Similar to course 460. Rotation designed for students interested in learning pulmonary medicine, but who desire more variety in their clerkships, and do not desire the comprehensive experience offered by a four-week pulmonary rotation. May be repeated for credit. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Stollenwerk
475. Encounters in Ethics in the ICU (3-6)

Clinical Activity- 12 hours; lecture/discussion-6 hours; independent study -6 hours. Prerequisite: 4 th year Medical Student. Care for critically ill adults with complex medical disease carries with it unique ethical roles and duties for the physician. (H/P/F grading only.)-I, II, III. (I, II, III.) Black

## 480. Pulmonary-Critical Care Medicine Insights (1-3)

Clinical activity -3-9 hours. Prerequisite: student in good academic standing and consent of instructor. Student will attend respiratory outpatient clinics and in-patient pulmonary consultation rounds and medical intensive care rounds. Introduction to diagnosis and treatment of common pulmonary problems. (H/ P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Albertson 499. Research (1-12)

Prerequisite: consent of instructor. (H/P/F grading only.)

## Internal Medicine-RheumatologyAllergy (RAL)

## Lower Division

99. Directed Research in Immunology (1-5)

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.) $-I, I I$, III, IV. (I, II, III, IV.)

## Upper Division

192. Internship in Rheumatology-Allergy (1-12)
Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project by preceptor prior to internship. Supervised work experience in rheumatology-allergy. May be repeated for credit up to 12 units. (P/NP grading only.)

## 199. Directed Research in Immunology (1-5)

Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.)

## Graduate

209. Current Topics in Immunology: From Presentations to Grants (3)
Lecture-1 hour; term paper or discussion - 1 hour; project-1 hour. Prerequisite: Immunology 201. Current developments in various aspects of immunology and their interrelationships. Focus on areas of immunology not currently covered in the basic and advanced immunology courses. Oral presentation, written review and grant preparation.-II. (II.) Van de Water
210. Topics in Rheumatology and Clinical Immunology (1-5)
Laboratory. Prerequisite: consent of instructor. Library and/or laboratory work as required. (S/U grading only.)-Gershwin

## 299. Research in Autoimmune Disease

 (1-12)Laboratory. Prerequisite: consent of instructor. Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, Siögren's syndrome, polymyositis and drug hypersensitivity. (S/U grading only.)

## Professional

## 460. Rheumatology Clinical Clerkship

 (1-18)Clinical activity $-2-40$ hours. Prerequisite: Medical Sciences 431 and consent of instructor. Participation with members of the subspecialty service in the diagnosis and therapeutic management of patients with rheumatologic diseases. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)
461. Allergy Clinical Clerkship (3-18)

Clinical activity (inpatient-outpatient service)-full time ( 2 to 12 weeks). Prerequisite: completion of second year of medical school and consent of instructor. Student will work with practicing allergist in daily work with patients and participate in weekly allergy clinic and teaching conferences. Study of the literature. Will see patients with problems in clinical immunology, immunodeficiency, asthma, allergic rhinitis. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.)
470. Practicum in Care of the Terminally III (3-6)
Clinical activity -35 hours; seminar -5 hours. Prerequisite: consent of instructor. Restricted to fourthyear Medical students in good standing. Work with hospice interdisciplinary team. Direct experience in the care of patients with illnesses where no cure is possible. Emphasis on symptom relief, end of life issues, physician assisted suicide. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) McMillian

## 480. Insights in Rheumatology (1-3)

Clinical activity-3-9 hours. Prerequisite: student in good academic standing and consent of instructor. Participation in rheumatology consultation rounds, rheumatic disease clinics and conferences with supervised readings in rheumatology. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Leek

## 499. Research (1-12)

Prerequisite: medical student with consent of instructor. Part-time participation in active clinical and basic research projects which can involve both patient care and relevant laboratory procedures. Students can gain experience in clinical medicine and clinical investigation. May be repeated for credit. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.)

## Medical Microbiology (MMI)

## Upper Division

## 130. Medical Mycology (2)

Lecture-2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 430.) - II. Pappagianis

## 188. Human Immunology (3)

Lecture-3 hours. Prerequisite: undergraduate level introductory biology course. Human immune system and mechanisms of immunity. Basic components and function of immune system. Molecular basis of immune response; basic cellular and molecular mechanisms. Interactions between cells of immune system producing immune responses; regulating molecules. - II. (II.) Torres
192. Internship in Medical Microbiology (1-12)
Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in medical microbiology and related fields. (P/NP grading only.) -I. II, III. (I, II, III.)
194H. Senior Honors Project in Medical Microbiology and Immunology (5)
Independent study - 15 hours. Prerequisite: course 199 and consent of instructor. Project in research related to immunology of medically important viruses. Development of a hypothesis-driven project, performance of experimental protocols and preparation of graphical representation of original data. Requires oral and written presentation of research results. May be repeated three times for credit with consent of instructor. (P/NP grading only.) -I, II, III. (I, II, III.)
198. Group Study in Medical Microbiology (1-5)
Prerequisite: upper division standing and consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics.
(P/NP grading only.)
199. Research in Medical Microbiology (1-5)
Prerequisite: upper division standing and consent of instructor. Individual research. (P/NP grading only.)

## Graduate

200D. Mechanisms for Microbial Interactions with Hosts (3)
Lecture/discussion-3 hours. Prerequisite: Microbiology 200A or consent of instructor. Study of mechanisms involved in microbial interactions within a host environment. The following principles are basic to understanding these interactions: host recognition, invasion, competition and growth, and host defense.-II. (II.) Baumler, Beaman
210A. Critical Analysis of Contemporary Research on Animal Models of Human (1) Lecture/discussion-1 hour. Prerequisite): students funded by the Animal Models of Infectious Diseases Training Grant; consent of instructor. Topics will include diverse vertebrate and invertebrate models of human infectious diseases. Limited enrollment. May be repeated for credit. (S/U grading only.) - II. (II.) Bevins, Solnick

210B. Comparative Analysis of Animal Models of Human Infectious Diseases (1) Lecture/discussion-1 hour. Compares the major vertebrate and invertebrate animal models that are used most commonly to study human infectious disease, including mouse, nonhuman primate, Caenorhabditis elegans, and drosophila. May be repeated for credit. Offered in alternate years. (S/U grading only.)-II. Bevins, Solnick
215. Medical Parasitology (3)

Lecture- 1.5 hours; discussion - 1.5 hours. Prerequisite: graduate student with consent of instructor. Epidemiology, pathogenesis, diagnostic methods and current literature discussion of protozoa, helminths and arthropods of medical importance.-III. (III.) Dawson, Luckhart

## 280. The Endogenous Microbiota in

 Lifespan Health and Disease (3)Lecture-3 hours. Prerequisite: graduate standing. Recent research into host-associated microbial communities has yielded important insights into the microbial communities inhabiting mucosal surfaces, and how the composition of these communities contributes to normal development, metabolism, education of the immune system, and disease susceptibility. Not open for credit to students who have completed Internal Medicine: Infectious Diseases 280. - III. (III.) Dandekar, Tsolis

## 291. Seminar in Microbiology and

 Immunology (1)Seminar - 1 hour. Restricted to students with upper division or graduate standing. Research seminars on current topics in microbiology and immunology. May be repeated for credit if topic differs. ( $S / U$ grading only.) - I, II, III. (I, II, III.) George, Sankaran, Torres
298. Group Study in Medical Microbiology and Immunology (1-5)
Prerequisite: consent of instructor; open to graduate students. Directed reading and discussion and/or laboratory investigation on selected topics. (Sections 1, 2, 4, 5: S/U grading only.)

## 299. Research (1-12)

Prerequisite: consent of instructor; open to graduate students. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.)

## Professional

410. Physician Scientist Molecular Medicine Journal Club (1)
Lecture-1 hour. Weekly seminars by students on research articles in current literature. Topics/articles to be selected by instructors to include a broad range of frontiers in biomedical literature. May be repeated for credit. (H/P/F grading only.) -I. (I.) Bevins
411. Medical Mycology (2)

Lecture-2 hours. Prerequisite: a course in pathogenic microbiology and consent of instructor. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. Offered in alternate years. (Same course as 130.) (H/P/F grading only.) - II. Pappagianis
480A. Medical Immunology (2.5)
Lecture-2 hours; laboratory/discussion-0.5 hours. Medical student only. Helping to understand the immune system, the nomenclature and functional significance of the tissues, cells, proteins and genes of the immune system, as well as the normal regulatory mechanisms and pathologic outcomes related to the immune response. (P/F grading only; deferred grading only, pending completion of sequence.) - II, III. (II, III.) Shacklett, Torres

## 480B. Medical Microbiology (5.5)

Lecture-2.75 hours; laboratory/discussion-
1 hour. Medical students only. Discussion of the diseases caused by infectious agents includes their pathogenesis, clinical manifestations, diagnosis, treatment epidemiology and prevention. Covers the general properties of and diagnostic techniques for bacteria, fungi and viruses. (P/F grading only; deferred grading only, pending completion of sequence.) - III, III. (III, III.) Luckhart, Mudryi, Tsolis

## 497T. Tutoring in Medical Microbiology

(1-5)
Tutoring-3-15 hours. Prerequisite: appropriate preparation in subject matter and consent of instructor. Assist instructor by tutoring medical students in one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.)
498. Group Study in Medical Microbiology and Immunology (1-5)
Prerequisite: medical students with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.)

## 499. Research (1-12)

Prerequisite: medical students with consent of instructor. (H/P/F grading only.)

## Master of Public Health (MPH)

The Department of Public Health Sciences offers the Master of Public Health (MPH) degree. The MPH
degree is accredited by the Council on Education for Public Health. Students apply for admission through the Office of Graduate Studies. The following listing is all required core course work for the degree.

Course descriptions are given under the individual course offerings. For Public Health Sciences courses, see the Public Health Sciences (SPH), on page 417.

UNITS
Required Units for Master of Public Health
Core courses ........................................ 40
Added-competence selectives .................. 6
Elective units......................................... 10
Total units required for the degree .......... 56
Core coursework
Biostatistics
Preventive Veterinary Medicine 402 ......... 5
Preventive Veterinary Medicine 403 ......... 3

## Medical Pharmacology and Toxicology (PHA)

## Lower Division

## 92. Internship in Pharmacology (1-12)

Internship-3-36 hours; final report. Prerequisite: lower division student with good academic standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: lower division standing. (P/NP grading only.)

## Upper Division

192. Internship in Pharmacology (1-12)

Internship-3-36 hours; final report. Prerequisite: upper division standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.) Despa

## Graduate

205. Problem Solving in Pharmacology (1) Lecture/discussion - 1 hour. Restricted to Graduate Students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students may be accepted with consent of instructor. Students will be introduced to a current biomedical problem that would benefit from a developing drug and will develop an experimental strategy for addressing the issue. Students will develop model systems for testing various classic and recent pharmacological approaches. May be repeated 12 times for credit. Course changes subjects every quarter; each course is unique and can be taken as often as desirable; certain students (Trainees of the Training Program in Pharmacological Sciences) must take course for at least three years. - I, II, III. (I, II, III.) Hell
206. Drug Discovery and Development (3) Lecture/discussion-2 hours; extensive writing-1 hour. Prerequisite: course 201, an equivalent course in general pharmacology, or knowledge of basic pharmacology. Intended for graduate students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students, including undergraduates, may be accepted with consent of instructors. Survey of the process by which a drug is discovered, developed and made available to the public. Topics include drug identification and optimization, safety testing, clinical evalvation, regulatory issues, intellectual property, formulation, and the global pharmaceutical industry. May be repeated for credit. - II. (II.) Horuk,
Rogawski, Wulff

## 208. Advanced Cardiac Physiology and

 Pharmacology (3)Lecture-2 hours; lecture/discussion-1 hour. Prerequisite: Pharmacology and Toxicology 201, Pharmacology and Toxicology 202, an equivalent course in general pharmacology or physiology (example, Biomedical Engineering 204), or knowledge of basic pharmacology/physiology. Open to graduate students from the Pharmacology and Toxicology, Molecular, Cellular and Integrated Physiology, Biomedical Engineering and Clinical Research Graduate Groups; other students (including
undergraduates) may be accepted upon consultation with the instructors. Detailed characterization of the mechanisms involved in cardiac excitation-contraction coupling, alterations that occur in heart disease and pharmacological interventions. Topics include cardiac contractile apparatus, action potential, Ca cycling, excitation-transcription coupling, cardiac inotropy, heart failure and arrhythmias.-III. (III.) Bossuyt, Despa, Ripplinger

## 225. Gene Therapy (3)

Lecture/discussion-3 hours. Prerequisite: Genetics 201C/Molecular and Cellular Biology 221C or equivalent. Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues.
Offered in alternate years. - II. Anderson, Baver, Nolta, Segal

## 250. Functional Genomics: From Bench to

 Bedside (3)Lecture/discussion-3 hours. Prerequisite: Genetics 201C, Molecular and Cellular Biology 214, or equivalent. Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery. - III. (III.) Diaz, LaSalle, Segal

## 291. Pharmacology Research Seminar

 Series (1)Seminar-1 hour; discussion-1 hour. Prerequisite: consent of instructor; upper division or graduate standing. Research seminars on current topics in Pharmacology. May be repeated for credit when topic differs. (S/U grading only.) -I, II, III. (I, II, III.) Wulff

## 298. Group Study (1-5)

Prerequisite: consent of instructor

## 299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

## 400A. Pharmacology (2)

Lecture - 1 hour; discussion/laboratory-0.3 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; medical students only. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (Deferred grading only, pending completion of sequence. P/F grading only.) - II, III. (II, III.) Gelli, Wulff

400B. Pharmacology (1.5)
Lecture- 1 hour; discussion- 0.25 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical students only. Principles in pharmacology, including autonomic pharmacology, general anesthetics, neuropharmacology and sedative/hypnotics. (P/F grading only.) - IV. (IV.) Diaz

400C. Pharmacology (1.5)
Lecture- 1 hour; discussion-0.25 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical student only. Topics taught include the treatment of respiratory and cardiovascular disease. Specific topics include: asthma, chronic obstructive pulmonary disease, hypertension, congestive heart failure, and the treatment of arrhythmias. (P/F grading only.)-I. (I.) Segal
400D. Pharmacology (2)
Lecture-3 hours. Prerequisite: approval by the School of Medicine Committee on Student Progress; medical student only. Pharmacology topics covered include central nervous system drugs, Gl drugs, toxicology/poisoning and cancer chemotherapy. Specific topics are: cancer chemotherapy, pain management, the treatment of depression and psychosis, acid reflux disease, irritable bowel syndrome, and general toxicology. ( $\mathrm{P} / \mathrm{F}$ grading only.) - II. (II.) Segal

## 445. Introduction to Integrative Medicine

 (1)Lecture/discussion-1 hour. Prerequisite: medical student in good standing. Basic principles of alternative medical systems (e.g., traditional Chinese, Ayurvedic, Tibetan), alternative practices (e.g., chiropractic, osteopathy, naturopathy, homeopathy, herbalism, guided imagery/meditation, massage therapy), and mind/body connection are presented as introduction to integrating alternative treatments into traditional medicinal practice. (H/P/F grading only.)-II. (II.) Diaz
490. Seminar in Pharmacology for Medical Students (1)
Seminar-1 hour. Prerequisite: consent of instructor. Seminar in pharmacology for medical students. (H/ P/F grading only.) - I, II, III, IV. (II, II, III, IV.)
497T. Tutoring in Pharmacology (1-5)
Tutoring - 3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/ P/F grading only.)

## 498. Special Study for Medical Students

 (1-5)Lecture, directed reading, and/or discussion groups -3-15 hours. Prerequisite: consent of instructor. Special study in pharmacology for medical students. (H/P/F grading only.)

## 499. Directed Research for Medical

 Students (1-12)Laboratory-3-36 hours. Prerequisite: consent of instructor. Directed research in pharmacology for medical students. (H/P/F grading only.)

## Neurology (NEU)

## Upper Division <br> 199. Individual Special Study and Research (1-4)

Prerequisite: consent of instructor. Individual special study in neurophysiology and biomedical engineering is offered to qualified students. Studies on psychophysics, single-unit electrophysiology and instrumentation are offered in Davis. (P/NP grading only.)

## Graduate

298. Group Study (1-5)

Prerequisite: consent of instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (S/U grading only.)
299. Individual Special Study and Research (1-12)
Laboratory - $3-36$ hours. Prerequisite: consent of instructor. Individual special study and research in Neurophysiology and Biomedical engineering is offered at both Davis and Sacramento Medical Center. (S/U grading only.)

## Professional

## 420. Clinical Neurosciences (2)

Lecture/discussion-1 hour; lecture-1.5 hours. Prerequisite: medical students only. Pathophysiology underlying neurological disorders, including disorders of development, muscle, nerve, cerebral circulation, metabolism, myelin, cortical function,
movement, cerebrospinal fluid, autonomic function and special senses. Anatomical basis of clinical testing, nervous system infection, neoplasia and trauma. (P/F grading only.)-IV. (IV.) Brass, Wheelock, Shahlaie
450. Clinical Neurology Clerkship (3-6)

Clinical activity-24 hours; conference-12 hours; seminar-4 hours; independent study -10 hours. Prerequisite: open to all fourth year medical students and third year medical students with consent of instructor. Restricted to six students per rotation. Critical elements of neurological clinical skills (history \& exam) and basic and clinical neurological concepts expected for general residency preparation. Active, didactic, experiential and independent learning to encourage maturation of general professional competencies. (H/P/F grading only.) $-\mathrm{I}, \mathrm{II}, \mathrm{III}$, IV. (I, II, III, IV.) Malhado-Chang

## 452. Advanced Clinical Neurology (6)

Clinical activity-full time (4 weeks). Prerequisite: completion of four-week Neurology selective and consent of instructor. Extension of basic Neurology clerkship. Designed for students with special interest in medical disorders of nervous system. By arrangement with department, student may serve as an acting intern. Principles of neurological differential diagnosis and therapeutics emphasized.
(H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.)

## 455. Child Neurology (6)

Clinical activity-full time ( 4 weeks). Prerequisite: satisfactory completion of Internal Medicine 430, Obstetrics and Gynecology 430, Pediatrics 430 and consent of instructor. Student exposed to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. This course satisfies the fourth year neuroscience requirement. (H/P/F grading only.) $-I$ III, III, IV. (I, II, III, IV.) Chang

## 498NE. Group Study in Neurology (1-6)

Prerequisite: medical students with consent of instructor. Directed readings and discussions with a comprehensive written examination at the end of course. (P/F grading only.) -I, II, III, IV.

## 499. Research (1-12)

Laboratory-2-24 hours. Prerequisite: consent of instructor. Approved for graduate degree credit. Laboratory investigation on selected topics. (H/P/F grading only for graduate and medical students.)

## Neurosurgery (NSU)

Upper Division

## 199. Special Study in Neurosurgery for

 Advanced Undergraduates (1-5)Prerequisite: advanced undergraduate standing with consent of instructor. Students may participate in ongoing neurosurgical projects or may pursue and design independent projects. (P/NP grading only.)

## Graduate

299. Neurosurgery Research (3-12)

Prerequisite: graduate student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Professional <br> 451. Neurosurgical Critical Care Clerkship (3)

Clinical activity-full time ( 2 weeks). Prerequisite: third- or fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Students participate in the care of neurosurgical patients in the NSICU and in the admission and surgical management of patients admitted through the Emergency Room. (H/P/F grading only.) - I, II, III. (I, II, III.)
455. Clinical Pediatric Neurosurgery (6)

Clinical activity-full time (4 weeks). Prerequisite: third- or fourth-year medical students who have satisfactorily completed course 460; consent of instructor. Admission and follow-up of pediatric patients. Neurological history, examination, and diagnostic procedures are emphasized. Students will participate in surgical procedures and are required to attend all pediatric neurosurgery conferences. (H/P) F grading only.) -I, II, III, IV. (I, II, III, IV.) Pang

## 460. Clinical Neurosurgery (6-18)

Clinical activity-full time (3 days per unit; 4 weeks minimum). Prerequisite: third- and fourth-year medical students; consent of instructor. Approved for graduate degree credit. Admission and follow-up of patients. Neurological history, examination and further diagnostic procedures emphasized. Students participate in meaningful aspects of surgical procedures and attend listed conferences, rounds, and seminars. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 464. Externship (6-18)

Clinical activity - full time (4-12 weeks). Prerequisite: fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Clerkship in neurosurgery to be arranged at another institution with accredited residency program in neurosurgery under proper supervision. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.)
470. Advanced Clinical Neurosurgery (6-18)
Clinical activity-full time (4-12 weeks). Prerequisite: fourth-year medical student in good academic standing. Student will function as acting intern on neurosurgery service. Admission and management of patients. Neurological history, examination, diagnostic procedures, and surgical management are emphasized. Students participate in meaningful aspects of surgical procedures and attend required conferences and rounds. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 480. Insights in Neurosurgery (1-3)

Clinical activity -3 to 9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Observation of neurosurgical care in emergency room, operating room and hospital floors, including manner of treatment of a variety of chronic and acute neurological diseases. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 499. Neurosurgery Research (1-18)

Prerequisite: medical student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. (H/P/F grading only.)

## Obstetrics and Gynecology (OBG)

## Upper Division

192. Shifa Clinic/Student Volunteer (1)

Conference-2 hours; clinical activity-6-8 hours; discussion-1-2 hours. Supervised work experience in obstetrics and gynecology. May be repeated up to 3 times for credit. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.) Yasmeen

## 194. Shifa Clinic Student Volunteer (1)

Conference- 1 hours; clinical activity -6 hours. Prerequisite: consent of instructor; the applications will be available for students. Selection of students will be made by selection committee of medical students coordinators and the IOR. Attend clinic every third

Sunday performing duties of receptionist, intake, translation, monitor. Students attend a meeting immediately after end of clinic. There is a mandatory Monday meeting with Clinic co-directors. Students are expected to participate on various committees. May be repeated three times for credit. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.) Yasmeen
198. Directed Group Study (1-5) Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

220. Genetics of Reproduction (3)

Lecture/discussion-3 hours. Introduction to genetics of mammalian reproduction for domestic species, species used in research, and the human. Mendelian and non-Mendelian modes of inheritance. Research paper. Offered in alternate years. - II. (II.)

## 290. Current Topics in Research (1)

Seminar-1 hour. Prerequisite: graduate standing and consent of instructor. Selected topics in reproductive biology. (S/U grading only.) -I, II, III, IV. (I, II, III, IV)
298. Group Study (1-5)

Prerequisite: graduate standing; consent of instructor.
299. Research (1-12)

Prerequisite: graduate standing; consent of instructor. ( $S / U$ grading only.)

## Professional

430. Obstetrics and Gynecology Clerkship (12)

Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCDMC and affiliated sites. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Hou
430F. SJVP OBGYN Clerkship at UCSF (12) Clinical activity - 45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCSF Fresno. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.) $-\mathrm{I}, \mathrm{II}$, III, IV. (I, II, III, IV.) Hou

## 439D. Directed Clinical Studies in OBGYN

 (1-12)Clinical activity -40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

439R. Directed Studies in OBGYN (1-12)
Clinical activity- 30 hours; independent study - 10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 460. Away Clinical Elective in OBGYN

 (3-18)Clinical activity -30 hours. Prerequisite: third- or fourth-year medical student; course 430 or the equivalent; consent of instructor. Active participation in inpatient and/our outpatient care. Attendance at specified conferences; student-faculty member informal conferences. May be repeated for credit. (H/P/ F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 465. Away Acting Internship in OBGYN

 (3-18)Clinical activity - 40 hours. Prerequisite: satisfactory completion of course 430 and other third-year core clerkships; consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Students are expected to provide direct patient management. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 470. Gynecologic Oncology Acting

Internship (3-18)
Clinical activity -40 hours. Prerequisite: satisfactory completion of course 430 and the third-year core clerkships; consent of instructor. Four week elective primarily involves direct inpatient management of women on the UCDMC Gyn/Onc service. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated up to 99 units for credit. (H/P/F grading only.) -I, II, III, IV. (II, II, III,

## IV.) Leiserowitz

## 471. Ambulatory Gynecology and Obstetrics Elective (3-18)

Clinical activity - 35 hours. Prerequisite: third- or fourth-year Medical Student having successfully completed course 430; consent of instructor of record. Conduct examinations, present patients and discuss treatment regimens at the following ambulatory clinics: General Obstetrics \& Gynecology, New and Return Obstetrics (including Post-Partum), High-Risk Obstetrics, Pre-Operative Clinic, and other sub-specially clinics as assigned. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.)

## 472. Family Planning and Reproductive

## Health (1-6)

Clinical activity -30 hours; seminar- 5 hours. Prerequisite: course 430; consent of instructor. Elective that will focus on the Gynecologic Subspecialty of Family Planning. Counseling and provision of contraceptive methods, experience with pelvic ultrasounds, management of spontaneous, inevitable and induced abortion and postabortion care by both surgical and medical techniques are included. May be repeated for credit. (H/P/F grading only) -I, II, III, IV. (I, II, III, IV.) Hou

## 475. Labor \& Delivery Acting Internship

 (3-18)Clinical activity -40 hours. Prerequisite: satisfactory completion of course 430 and the third-year core clerkships; consent of instructor. Four week elective primarily involves direct inpatient management of women on the UCDMC L\&D unit. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Finta

## 480. The Birthing Process (1)

Lecture/discussion-1 hour. Open only to UC Davis medical students. Training to assist in the birthing process as a Doula. Topics not covered in the summer course. ( $S / U$ grading only.)-I.
493. Gender Specific Medicine SSM (6)

Lecture-5 hours; lecture/laboratory-10 hours; laboratory -16 hours; clinical activity -4 hours. Prerequisite: consent of instructor; restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as Cardiology 493.) (H/P/F grading only.) - I, II, III, IV. (II, II, III, IV.) Sweet, Villablanca

## 494. Shifa Clinic (6)

Clinical activity -8 hours. Prerequisite: medical student in good standing; restricted to medical student only. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated up to three times for credit. (P/F grading only.)-I, II, III, IV. (II, II, III, IV.) Yasmeen

494A. Shifa Clinic (1)
Clinical activity -8 hours. Prerequisite: Medical student in good standing; consent of instructor. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. ( $\mathrm{H} / \mathrm{P} / \mathrm{F}$ grading only; deferred grading only, pending completion of sequence.) -IV. (IV.) Yasmeen
494C. Shifa Clinic (1)
Clinical activity-8 hours. Prerequisite: Medical student in good standing; consent of instructor. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. (H/P/F grading only; deferred grading only, pending completion of sequence.) - II. (II.) Yasmeen

## 498. Group Study (1-5)

Prerequisite: consent of instructor. Explore particular topics in-depth in Obstetrics and Gynecology. Extensive contact with and oversight by instructor. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 499. Research in Obstetrics and

## Gynecology (2-12)

Clinical activity. Prerequisite: consent of instructor; fourth-year medical student. Research in Obstetrics and Gynecology arranged with instructor. May be repeated eight times for credit. ( $H / P / F$ grading only.)

## Ophthalmology (OPT)

## Upper Division

## 192. Research Internship (1-12)

Internship-3-36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in ophthalmology research. Research staff in Ophthalmology have programs in cell biology, electron microscopy, biochemistry, immunology and visual psychophysics. (P/NP grading only.)

## 199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

299. Basic Research in Visual Science (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

442. Introduction to Ophthalmology (3)

Clinical activity- 40 hours. Prerequisite: third- or fourth-year Medical Student with consent of instructor; consent of advisor; completion of third-year clerkships in Medicine and Surgery; consult Course Coordinator. Ocular disease diagnosis and management relevant to the clinical practice of future primary care physicians and others. (H/P/F grading only.) -I, II, III, IV. (II, II, III, IV.) Baik

## 465. Advanced Subspecialty

Ophthalmology (3-6)
Clinical activity- 40 hours. Prerequisite: Medical students who have completed Internal Medicine 430 in third or fourth year; consent of instructor. Participation in disciplines of neuro-ophthalmology/pediatric ophthalmology, diseases of the cornea and external eye, glaucoma and retina. (H/P/F grading only.) -1 , II, III, IV. (I, II, III, IV.) Baik

## 498. Group Study (1-3)

Prerequisite: medical students with consent of instructor. Directed reading and discussion. (H/P/F grading only.)
499. Research in Ophthalmology (1-12)

To be arranged $-3-36$ hours. Prerequisite: medical students with consent of instructor. Individual research on selected topics in optics and visual physiology, cornea and external disease. (H/P/F grading only.)

## Orthopaedic Surgery (OSU) <br> Lower Division <br> 99. Special Studies for Undergraduates (1-4)

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)

## Upper Division

199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

## Professional

421. The Musculoskeletal System (2.5)

Lecture/discussion-4 hours; discussion-2 hours.
Prerequisite: consent of committee on student progress. Medical student only. Basic and clinical science of orthopaedic surgery and rheumatology. (P/NP grading only.) -I. (I.) Marder, VanDenBogaerde
428. Ambulatory and Emergency Room Orthopaedics (3-6)
Clinical activity -full time ( $2-4$ weeks). Prerequisite: 4th-year medical student in good academic standing and consent of instructor. Introduction to general orthopaedic problems and trauma and their management in an outpatient environment, including the emergency room. Student will conduct orthopaedic examinations, present patients to staff rotating through trauma, hand, pediatrics, adult and foot clinics. Orthopaedic physical examination and interpretation of $x$-rays. Limited enrollment. (H/P/F grading only.) - I, II, III, IV. (II, II, III, IV.) Yoo

## 462. Community Preceptorship (3-6)

Clinical activity-full time (2-4 weeks). Prerequisite: fourth-year medical student in good academic standing with consent of instructor. Acquaints student with private practice of orthopaedics in the community setting. Opportunity to observe and assist private practitioners in office, emergency room, operating room and inpatient environment. Student must provide own transportation. (H/P/F grading only.) II, III, IV. (I, II, III, IV.) Bovill, Yoo

## 464. Acting Internship (6)

Clinical activity-full time ( 4 weeks). Prerequisite: fourth-year medical student in good academic standing and consent of instructor. Rotation designed to increase basic knowledge of musculoskeletal abnormalities at clinical level. Attention focused on selective case material. For those students who
demonstrate proficiency, responsibility will be similar to that of intern. Limited enrollment. May be repeated for credit. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Yoo

## 465. Externship in Advanced Orthopaedics

 (3-6)Clinical activity - 40 hours. Prerequisite: fourth-year medical student in good academic standing and consent of instructor. Advanced Orthopaedic rotation done at an approved institution. Topics may include Trauma, Sports, Spine, Pediatrics, Joint and/ or Foot/Ankle. Students are expected to perform at the level of an Intern. (H/P/F grading only.) - I, II, III, IV. (II, II, III, IV.)
480. Insights in Orthopaedic Surgery (1-3) Clinical activity -3 -9 hours. Prerequisite: first- and second-year medical students in good academic standing; consent of instructor. Exposure to aims, methods and procedures in orthopaedic surgery via attendance at grand rounds, patient care conferences, and group discussions. ( $H / P / F$ grading only.)-I, II, III, IV. (II, II, III, IV.) Szabo

## 481. History of Medicine for Medical Students (1.5)

Lecture/discussion - 2.5 hours (for six weeks). Prerequisite: third- or fourth-year students in the School of Medicine or second-year students with consent of instructor. Overview of the history of medicine throughout the world to introduce medical students to landmark accomplishments and key figures in the development of health care and to provide an
expanded philosophical perspective on the everchanging field of modern medicine. (H/P/F grading only.)-I. (I.)

## 499. Orthopaedics Research (1-12)

Clinical activity - 3 hours to full time (to be arranged with individual faculty). Prerequisite: third- or fourthyear medical student in good academic standing; consent of instructor. Laboratory or clinical investigation on selected topics. May be repeated for credit. (H/P/F grading only.)

## Otolaryngology (OTO)

## Lower Division

192. Internship in Otolaryngology (1-12)

Internship-3 to 36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in otolaryngology and related fields. Final project report. (P/NP grading only.)
199. Special Study in Otolaryngology for Advanced Undergraduates (1-5)
Prerequisite: advanced undergraduate with consent of instructor. (P/NP grading only.)-I, II, III, IV.

## Graduate

## 290C. Research Conference in

 Otolaryngology (1)Lecture/discussion - 1 hour. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentation and discussion of faculty and student research in otolaryngology. (S/U grading only.) -I, II. (I, II.)

## 291. Principles of Speech, Hearing and

 Equilibrium (3)Lecture/discussion-3 hours. Prerequisite: graduate students; medical students; advanced undergraduates with consent of instructor. Presentations by faculty and guest lecturers on anatomy, physiology, and behaviors involved in speech production, hearing, and equilibrium. Each student will be expected to make one class presentation. - (I, II, III, IV.)
299. Individual Study in Otolaryngology for Advanced Graduate Students (1-12)
Prerequisite: advanced graduate student with consent of instructor. (S/U grading only.)

## Professional

## 403. Basic Principles of Reconstructive

 Surgery (1)Lecture-four 2-hour sessions; laboratory—one 2hour session ( 4 weeks). Prerequisite: third- or fourthyear medical student with consent of instructor. Formal presentations covering basic principles of reconstructive surgery, including wound healing, treatment of lacerations, skin and bone grafts, flaps, Z-plasties and revision of scars. Laboratory session utilizing animal tissues. - II. (II.)

## 440. Otolaryngology Required Clerkship

 (3-9)Clinical activity- 30 hours. Prerequisite: consent by Committee on Student Evaluation and Promotion. Provide fundamental knowledge of otorhinolaryngologic diagnosis and principles, develop facility with basic ENT instruments, provide an understanding of treatment for ear, nose and throat problems and provide knowledge of what patients should be referred for otorhinolaryngologic care. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Diaz

## 450. Fourth Year Otolaryngology Elective

 (6)Clinical activity -35 hours; lecture -2 hours; film viewing- 0.25 hours; discussion -1 hour. Prerequisite: third- or fourth-year medical student; consent of instructor. Participation in Otolaryngology Clinic and operating room. Evaluation and management of common Otolaryngologic diseases. (H/P/F grading only.) - (I, II, III, IV.) Diaz
460. Clinical Otolaryngology Elective (3-18) Clinical activity - full time. Prerequisite: third- and fourth-year medical students with consent of instructor; open to graduate students. Approved for gradu-
ate degree credit. Total involvement in clinical activities of the department. (H/P/F grading only.) (I, II, III, IV.) Diaz
490. Journal Seminar (1)

Lecture/discussion-10 hours total (course given three times per quarter). Prerequisite: fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Monthly review of current otolaryngologic and related literature and recent advances. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.)
498. Individual or Group Study (1-5)

Lecture/discussion - 1-2 hours; laboratory-1-4 hours. Prerequisite: consent of instructor. Introduction to basic research in Otolaryngology. Lectures, discussion and laboratory study of sensory and motor systems. (H/P/F grading only.) Diaz

## 499. Research (1-12)

Prerequisite: medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Participation in ongoing projects. (H/P/F grading only.)

## Pathology (PMD)

## Upper Division

192. Internship in Human Pathology (1-12)

Internship-3-36 hours; final project report. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in pathology and related fields. (P/NP grading only.)
199. Special Study in Pathology for

Advanced Undergraduates (1-5)
Prerequisite: advanced undergraduates and consent of instructor. ( $\mathrm{P} / \mathrm{NP}$ grading only.)

## Graduate

290C. Research Group Conferences (1)
Seminar-1 hour. Prerequisite: graduate level standing. Seminar. Topics on animal models of human disease and infectious diseases. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
298. Advanced Group Study (1-5)

Prerequisite: consent of instructor.
299. Research (1-12)

Prerequisite: consent of instructor. (S/U grading only.)

## Professional

405. Brain Cutting Conference (1-4)

Seminar-1-4 hours. Prerequisite: third- and fourthyear medical students or consent of instructor. Current specimens are sectioned, discussed, and clinical correlations proposed. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Ellis

## 407. Advanced Neuropathology (3)

Lecture/discussion-40 hours. Prerequisite: third or fourth year medical student and consent of instructor. Restricted to Medical students only. Presents an integrated introduction to mechanisms of the central and peripheral nervous system injury. Students will gain an understanding of pathological mechanisms underlying disease, the anatomic and molecular manifestations of pathologic processes of the CNS and PNS. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Lechpammer

## 410A. General and Endocrine Pathology

(2.5)

Lecture-4 hours; laboratory/discussion - 4.5 hours. Restricted to Medical students only. Pathologic mechanisms of human disease. Concepts of general pathologic processes, i.e., cell death, inflammation and neoplasia. Endocrine pathology in the context of clinical human disease. Emphasis on integration of clinical practice with gross and histologic images emphasizing team-based learning. (P/F grading only; deferred grading only, pending completion of sequence.) - II, III. (II, III.) Gandour-Edwards

410B. Systemic Pathology (1)
Lecture-1 hours; laboratory/discussion - 0.5 hours. Prerequisite: Approval by SOM Committee on Student Progress. Restricted to Medical students only Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include hematopathology and neuropathology. (Deferred grading only, pending completion of sequence. P/F grading only.)-IV (IV.) Gandour-Edwards

410C. Systemic Pathology (2)
Lecture-1 hour; discussion-2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include pulmonary pathology, cardiovascular pathology, hematopatology, oncologic pathology, and nephropathology. (Deferred grading only, pending completion of sequence. P/F grading only.)-I. (I.) Gandour-Edwards
410 D. Systemic Pathology (2.5)
Lecture-1 hour; discussion-2 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with emphasis on integration with clinical medicine Course content parallels concurrent clinical courses with integration of lectures and discussions. Topics include gastrointestinal and gynecologic pathology, hepatopathology, oncologic pathology and musculoskeletal pathology. (Deferred grading only, pending completion of sequence. P/F grading only.) - II. (II.) Gandour-Edwards

## 464. Anatomic Pathology (3-6)

Clinical activity-40 hours. Prerequisite: fourth-year Medical Students with consent of instructor.
Restricted to Medical Students only. Anatomic pathology with an emphasis on autopsy and surgical pathology with application to clinical practice. Specimen grossing, frozen sections, microscopic sign-out and conferences. Exposure to cytopathology, hema topathology, and clinical pathology is available. (H/ P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Bishop

## 465. Applied Clinical Laboratory Medicine

 (3-6)Prerequisite: consent of instructor. Emphasis upon laboratory techniques, procedures, and interpretation of laboratory results. Students will be expected to participate fully and in all laboratory operations including bench techniques, laboratory management, and quality control. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Gregg
470. Sub-Specialty in Didactic Pathology (316)

Lecture/laboratory-25 hours. Prerequisite: consent of instructor. Externship provides in-depth exposure to one of a variety of subspecialties in Pathology. May be repeated for credit. (H/P/F grading only.) I, II, III, IV. (II, II, III, IV.) Gandour-Edwards

## 474. Anatomic Pathology Acting Internship

 (6)Clinical activity - 40-80 hours. Prerequisite: fourthyear medical student or consent of instructor. Restricted to medical students only. Anatomic Pathology AI will permit students to gain skills needed for first year Pathology Residency. Students will perform autopsies and take full responsibility for a variety of surgical pathology cases. A mix of outpatient and inpatient cases is expected. (H/P/F grading only.) I, II, III, IV. (I, II, III, IV.) Bishop

## 475. Anatomic and Clinical Pathology

 AI (3-9)Clinical activity $-40-80$ hours. Prerequisite: fourthyear Medical Students or consent of instructor. Restricted to Medical Students only. Clerkship is to acquaint students contemplating a career in pathology with the activities of both anatomic (first two weeks) and clinical pathology (second two weeks). May be repeated for credit. (H/P/F grading only.) I, II, III, IV. (I, II, III, IV.) Bishop, Gregg

## 493. Interdisciplinary Study of

 Gastrointestinal Cancer (6)Lecture-5 hours; clinical activity- 12 hours; labora-tory-3 hours; discussion/laboratory-20 hours. Prerequisite: consent of instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as Surgery 493D.) (H/P/F grading only.) - II, III. (II, III.) Khatri, Olson, Ruebner

## 497T. Tutoring in Pathology (1-5)

Tutoring - 3-15 hours. Prerequisite: advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/ P/F grading only.)

## 498. Advanced Group Study (1-5)

Prerequisite: medical student and consent of instructor. Group study in variety of advanced topics in general, special, experimental, or comparative pathology. (H/P/F grading only.)

## 499. Research (1-18)

Prerequisite: medical student with consent of instructor. Research in experimental, molecular, comparative, and applied pathology. Limited enrollment. (H/ $P / F$ grading only.)

## Pediatrics (PED)

## Upper Division

## 199. Special Study in Pediatric Research

 (1-5)Prerequisite: undergraduate student with consent of instructor based upon adequate preparation as determined by instructor. (P/NP grading only.)

## Graduate

## 299. Pediatric Research (1-12)

Prerequisite: graduate students who are candidates for a degree in some area of biology or behavioral sciences; consent of instructor. (S/U grading only.)

## Professional

401. Preceptorship in Pediatrics (2)

Preceptorship-half time. Prerequisite: second-year medical student or first-year medical student with consent of instructor. Opportunity to observe and participate in primary medical care in a practicing pediatrician's office. Participation in history-taking and physical examination will be at discretion of preceptor and dependent on student's experience. Evaluation by student. (H/P/F grading only.)-I, II, III, IV. (II, II, III, IV.)

## 402. Clinical Experience in Private Practice

 (1-18)Clinical activity-full time ( 2 to 12 weeks). Prerequisite: third-or fourth-year medical student; course 430; consent of preceptor and Chairperson. Opportunity to participate in practice of preceptor, performing such tasks as history taking, physical examination, and patient management. (H/P/F grading only.) -I , III, III, IV. (I, II, III, IV.)

## 420. Human Genetics (2)

Lecture-3 hours; conference-2 hours. Restricted to Medical students only. Introduction to medical genetics and the clinical consequences of genetic abnormalities. (P/F grading only.)-I. (I.)

## 430. Pediatric Clerkship (12)

Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCDMC and affiliated clinical sites. Rounds, conferences, student presentations ongoing. (H/P/F grading only.) -I , II, III, IV. Butani, Plant

430F. SJVP Pediatric Clerkship at UCSF (12)
Clinical activity -45 hours. Prerequisite: approval by SOM Committee on Student Progress. Restricted to medical student only. Eight-week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCSF Fresno. Rounds, conferences, student presentations ongoing. (H/P/F grading only.) I, II, III, IV. (I, II, III, IV.) Butani, Plant

## 439D. Directed Clinical Studies in Pediatrics

 (1-12)Clinical activity-40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

439R. Directed Studies in Pediatrics (1-12)
Clinical activity-30 hours; independent study- 10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) - I, II, III, IV. (I, II, III, IV.)
460A. Acting Internship: General Inpatient Pediatric Clerkship (6-18)
Clinical activity-full time ( 4 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. The Ward Acting Intern functions in a manner similar to that of a pediatric intern. The Acting Intern takes admissions in the regular sequence and is expected to take night call. The Acting Intern can expect to manage between six and ten patients at a time. Limited enrollment. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Shah

## 460B. Acting Internship: Outpatient <br> Pediatrics (3-18)

Clinical activity-full time ( 2 to 12 weeks). Prerequisite: completion of course 430 with grade of B or better; letter of recommendation from Pediatrics faculty member. Supervised experience in pediatric care on outpatient service at UCDMC. Student functions as "Acting Intern" with appropriate supervision by residents and attending faculty. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Palmer

## 461. Pediatric Inpatient AI in Hematology/

 Oncology (6)Clinical activity -37.5 hours; lecture -7.5 hours. Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of oncologic and hematologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Pawar

## 462. Elective in Pediatric Endocrinology

 (3-18)Clinical activity-full time ( 2 to 12 weeks). Prerequisite: completion of second-year study or the equivalent; consent of instructor. Inpatient and outpatient experience in diagnosis and management of endocrine disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Styne
463. Medical and Mental Health Evaluation of Children at Risk for Maltreatment (3-9) Clinical activity-30 hours; discussion-4 hours. Elective for fourth-year medical students covers basic areas of knowledge needed for child abuse prevention and consultation. Rotation includes legals cases, abuse exams, child and parent interactive therapy and visits to community organizations. May be repeated for credit. (H/P/F grading only.) $-I$, II, III, IV. (I, II, III, IV.) Coulter, Urquiza
464. Acting Internship in Neonatology (6-18)
Clinical activity -full time ( 4 to 12 weeks). Prerequisite: completion of course 430 with grade of $B$ or better; letter of recommendation from Pediatrics faculty member. Diagnostic and therapeutic aspect of the medical and surgical high-risk neonate. Student expected to take night call. Limited enrollment. (H/ P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 465. Pediatric Specialty Clinic Elective

 (3-18)Clinical activity -full time ( 2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Supervised experience in a variety of pediatric subspecialty clinics. Limited enrollment. (H/ P/F grading only.) - I, II, III, IV. (I, II, III, IV.)
466. Elective in Pediatric Cardiology (3-18) Clinical activity - full time ( 2 to 12 weeks). Prerequisite: satisfactory completion of course 430. Inpatient and outpatient experience in diagnosis and management of cardiologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.) $-I$ III, III, IV. (II, II, III, IV.) Choy
467. Elective in Pulmonary Medicine (3-18) Clinical activity-full time ( 2 to 12 weeks); daily rounds, two weekly half-day clinics. Prerequisite: pediatric clerkship. Inpatient and outpatient management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other forms of chronic pulmonary diseases as well as congenital abnormalities. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Jhawar
468. Elective in Pediatric Nephrology (3-18) Clinical activity-full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of renal disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) -1 III, III, IV. (I, II, III, IV.) Butani

## 469. Elective in Pediatric Infectious Disease

 (3-18)Clinical activity-full time ( 2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and treatment of infectious disease of infants and children. Laboratory and clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Blumberg
470. Elective in Pediatric Neurology (3-18) Clinical activity-full time (2 to 12 weeks). Prerequisite: satisfactory completion of course 430, Internal Medicine 430, Obstetrics and Gynecology 430, and Pediatrics 430 and consent of instructor. Inpatient and outpatient experience in diagnosis and management of neurological disorders in children. Students will also participate in other pediatric subspecialty clinics which serve children with neurological disorders. This course does not satisfy the fourth year neurology requirement. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Chang
471. Elective in Pediatric Gastroenterology (3-18)
Clinical activity-full time ( 2 to 12 weeks). Prerequisite: satisfactory completion of course 430; consent of instructor. Inpatient and outpatient experience in diagnosis and management of gastroenterology disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Kawatu
472. Clinical Rotation in Adolescent Medicine (3-9)
Clinical activity-39 hours; lecture-1 hour. Prerequisite: fourth year Medical Student; consent of instructor. Under supervision, students will see patients in the UCD clinic and at a number of com-munity-based sites. Emphasis on the socially-mediated problems that face adolescents, including
substance abuse, STD's, pregnancy, depression and suicide. One hour of lecture each week. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Wilkes

## 473. Away Acting Internship in Pediatrics

 (6-18)Clinical activity-40 hours; lecture-6 hours. Prerequisite: satisfactory completion of Pediatrics Clerk ship; consent of instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. (H/ P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Butani
476. Acting Internship in Pediatric Intensive Care (6-18)
Clinical activity-full time ( 4 to 12 weeks). Prerequisite: completion of course 430 with grade of $A$ or consent of instructor of record; letter of recommendation from Pediatrics faculty member. Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation. Limited enrollment. (H/P/F grading only.) -1 III, III, IV. (I, II, III, IV.)
493. Ethical, Legal and Social Issues in Clinical Genetics (6)
Seminar- 12 hours; clinical activity - 18 hours; autotutorial -8 hours; independent study -2 hours. Prerequisite: consent of instructor. Restricted to UC Davis School of Medicine students only. Develop advanced knowledge, communication skills and attitudes necessary to provide compassionate, knowledgeable, and expert care to patients who may be at increased genetic risk for disease. Seminars cover ethical and legal principles, epidemiology, and genetics. (H/P/F grading only.) - II. (II.) Rich, Wilkes

## 493B. Living with Intellectual \&

Developmental Disability in the Community (1-6)
Clinical activity -4 hours; lecture- 10 hours; field-work-4 hours; seminar-4 hours. Prerequisite: consent of instructor. In-depth experience with Intellectual \& Developmental Disability across the lifespan. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Hansen

## 498. Directed Group Study (1-5)

Variable-3-15 hours. Explore in-depth various topics in Pediatrics. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 499. Research Topics in Pediatrics (1-18)

Prerequisite: student in Medical School with consent of instructor. Individual research project in pediatric subspecialty areas (cardiology, endocrinology, hematology, metabolism, newborn physiology and others) may be arranged with faculty member. Independent research by student will be emphasized and long-term projects are possible. (H/P/F grading only.)

## Physical Medicine and <br> Rehabilitation (PMR)

## Upper Division

## 100. Research Approaches to Disability and Rehabilitation (2)

Lecture/discussion-2 hours. Discussion and evaluation of research approaches to medical rehabilitation, community integration, and quality of life of disabled persons, with a focus on the progressive disabilities associated with neuromuscular diseases. Intent is to encourage interest in professions that serve the disabled community and increase awareness of rehabilitation goals.-II.

## 198. Directed Group Study (1-5)

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

## Graduate

299. Research (1-12)

Prerequisite: consent of instructor. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Professional

440. Rehabilitation Medicine Clerkship (3)

Clinical activity-36 hours; lecture/discussion-4 hours. Prerequisite: consent of instructor; completion of Internal Medicine 430, Surgery 430. Rehabilitation and comprehensive care of physically disabled and physical medicine management of neurologic, neuromuscular and musculoskeletal disorders. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries and neuromuscular disease. Emphasis on inpatient rehabilitation, pediatrics, spine or sports possible. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Davis

## 461. Rehabilitation Medicine (6)

Clinical activity-36 hours; lecture/discussion-4 hours. Prerequisite: consent of instructor; completion of Internal Medicine 430, Surgery 430. Four-week rotation designed as broad overview of PM\&R practice for students interested in residency training in the specialty. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries, neuromuscular disease, neurological and non-operative orthopedic problems requiring rehabilitative management. (H/P/F grading only.) -I, II, III, IV. II, II, III, IV.) Davis

## 462. Rehabilitation Medicine Clinical

 Elective (5-18)Clinical activity-full time. Prerequisite: Internal Medicine 430, Surgery 430; completion of third year in Medical School. Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Physical Medicine and Rehabilitation at off-campus facility must be approved by Chairperson. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 493. Applied Musculoskeletal Anatomy:

 Sports \& Spine SSM (6)Lecture - 5 hours; lecture/laboratory - 10 hours; laboratory -16 hours; clinical activity -4 hours. Prereqvisite: consent of instructor; restricted to UC Davis School of Medicine students only. This four week module will review the anatomy and biomechanics of the musculoskeletal system as well as its associated pathology. The students will be instructed on appropriate musculoskeletal exam techniques and logical approach to the patient in the clinical setting. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Shin
498. Advanced Group Study (1-5)

Prerequisite: consent of instructor. Study and experience for medical students in any of a number of areas in physical medicine and rehabilitation. ( $\mathrm{H} / \mathrm{P}$ ) F grading only.)
499. Research for Medical Students (1-12)

Prerequisite: consent of instructor. Research on any of a variety of topics in physical medicine and rehabilitation. (H/P/F grading only.)

## Psychiatry (PSY)

## Lower Division

## 92. Willow Clinic (1-2)

Clinical activity $-2-6$ hours; seminar-1-2 hours. Open to lower division undergraduate students. Student run clinic for undergraduate students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/NP grading only.) - I, II, III, IV. (I, II, III, IV.) Han, McCarron

## Upper Division

192. Willow Clinic (1-2)

Clinical activity - $2-6$ hours; seminar $-1-2$ hours; lec ture-1-2 hours. Prerequisite: consent of instructor; UC Davis enrollment; upper-division standing. Student run clinic for upper division students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/NP grading only.)-I, II, III, IV. (I, II, III, IV.) Han, McCarron
198. Directed Group Study (1-5)

Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: advanced standing and consent of instructor. (P/NP grading only.)

## Graduate

298. Directed Group Study For Graduate Students (1-5)
Prerequisite: graduate standing and consent of instructor.
299. Special Study for Graduate Students (1-12)
Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Professional

403. Fundamentals of Clinical Psychiatry (3)

Clinical activity - 1 hour; lecture-3 hours. Prerequisite: approval of SOM Committee on Student Progress; restricted to medical students only. Psychiatric interviewing, Mental Status Exam and diagnosis. Major child and adult disorders, including substance abuse and dependence. Weekly student interviews of psychiatric patients in small group format. (P/F grading only.)-II. (II.) Hah, Newman

## 412. Psychiatry Grand Rounds (1)

Lecture-1 hour. Prerequisite: medical students or staff or other qualified mental health professionals with consent of instructor. Weekly conference at UCDMC for presentation of selected clinical cases, presentation of lecture and research reports. (H/P/F grading only.) - II, III, IV. (II, III, IV.) Scher
413. Outpatient Psychiatry Clerkship (6) Clinical activity- 36 hours; conference -2 hours; lecture-2 hours. Prerequisite: course 430 and/or consent of coordinator. Experience in clinical management/treatment of adult outpatients with psychiatric and substance abuse disorders; crisis management/intervention, evaluation/development of diagnosis and treatment plan; emphasis on outpatient psychopharmacology/brief psychotherapy; observation of group therapy. Individual supervision by faculty/residents. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Ton

## 414. Psychosomatic Medicine Clerkship

 (3-12)Clinical activity -32 hours; discussion -8 hours. Prerequisite: Psychiatry Clerkship or consent of instructor; medical students only. A large university hospital service in which the student functions as a member of the team in evaluation, management and psychiatric liaison with other medical specialties. Intensive supervision from senior staff and psychiatric residents. May be repeated two times for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Scher
415. Telemedicine Clinical Elective (3-9) Clinical activity-20 hours. Prerequisite: MS 4 with consent of Instructor. Fourth-year medical student elective in Telemedicine focusing on psychiatric issues. Align with University, School and Center for Health and Technology mission of rural outreach and public health, particularly in primary care. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Hilty, Ton
416. Child Psychiatry Clerkship (6)

Clinical activity-36 hours; lecture/discussion-2 hours; conference-2 hours. Prerequisite: course 430 and/or consent of instructor. Didactic and clinical inpatient, outpatient, and consultation-liaison experiences with children, adolescents and families. Clinical observations, diagnostic assessment, and treatment will be undertaken with close supervision. Literature review and case conferences presented on a regular basis. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Ton

## 417. Jail Psychiatric Clerkship (6)

Clinical activity-28 hours; conference-8 hours; lecture-4 hours. Prerequisite: course 430 and/or consent of course coordinator. Students gain experience, under close faculty supervision, assessing acute and chronic mentally ill inmates in both inpatient and clinic settings. (H/P/F grading only.) -I , II, III, IV. (I, II, III, IV.) Ton

## 418. Off-Campus Clinical Experience

 (3-9)Clinical activity-20-40 hours. Prerequisite: fourthyear medical students; consent of instructor. Clinical or research elective in off-campus medical school or mental approval of instructor and individual in charge of off-campus setting. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (II, II, III, IV.)

## 420. Acting Internship in Psychiatry (62)

Clinical activity - 40 hours. Prerequisite: course 430 and/or consent of course coordinator. Acting intern position with close faculty supervision with emphasis on biological psychiatry, psychopharmacology and psychodynamic aspects appropriate to diagnostic and long-term patient management. ( $\mathrm{H} / \mathrm{P} / \mathrm{F}$ grading only.) - I, II, III, IV. (I, II, III, IV.)

## 421. Combined Medicine-Psychiatry Clerkship (3-6)

Clinical activity - 32 hours; discussion-8 hours. Prerequisite: Psychiatry Clerkship or consent of instructor; medical students only. Students will rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Internal Medicine/Family Practice Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients. May be repeated for credit two times. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Han, Scher

## 422. Readings in Psychiatry (1-3)

Readings/discussion - 3 -9 hours. Independent reading of a selected topic in psychiatry. Supervision and discussion with a psychiatry faculty member. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Scher

## 423. Willow Clinic (3-12)

Prerequisite: open to medical students in all four years of medical school. Student run clinic for medical students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/F grading only.) -I, III, III, IV. (I, II, III, IV.) Han, McCarron
424. Functional Genomics (2)

Lecture-1 hour; discussion-1 hour. Prerequisite: graduate standing or consent of the instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (H/P/F grading only.) - II. (II.) Choudary

## 430. Psychiatry Clinical Clerkship (12)

Clinical activity-45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Assigned to clinical settings, students build upon the skills gained in preclinical years; emphasis on diagnostic, therapeutic and interpersonal skills. Areas of focus include patient management, interviewing skills, mental status exam, differential diagnosis, basic psychopharmacology, crisis assessment, intervention and case referrals. (H/P/F grading only.) -I, II, III, IV. Cox
430FA. SJVP Longitudinal Psychiatry Clerkship at UCSF (A) (4)
Clinical activity-45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)-I. (I.) Ton

## 430FB. SJVP Longitudinal Psychiatry

 Clerkship at UCSF (B) (6)Clinical activity-45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are
required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence)-II. (II.) Ton

## 430FC. SJVP Longitudinal Psychiatry

Clerkship at UCSF (C) (2)
Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks at UCSF Fresno. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence) - III. (III.) Ton

## 430TA. TeachMS Longitudinal Psychiatry

 Clerkship (A) (4)Clinical activity-45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required (H/P/F grading only; deferred grading only, pending completion of sequence.) -l. (I.) Ton

## 430TB. TeachMS Longitudinal Psychiatry

 Clerkship (B) (6)Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.)-II. (II.) Ton

## 430TC. TeachMS Longitudinal Psychiatry

 Clerkship (C) (2)Clinical activity-45 hours. Prerequisite: approval by School of Medicine Committee on Student Promotions; consent of instructor. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required May be repeated for credit. (H/P/F grading only; deferred grading only, pending completion of sequence.) - III. (III.) Ton

## 439D. Directed Clinical Studies in

 Psychiatry (1-12)Clinical activity-40 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

439R. Directed Studies in Psychiatry (1-12) Clinical activity-30 hours; independent study- 10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) - I, II, III, IV. (I, II, III, IV.)

## 480. Insights in Psychiatry (1-3)

Clinical activity-3-9 hours. Prerequisite: first- or second-year medical student in good academic standing; consent of instructor. On individual basis, student provided with an opportunity for gaining insight into various clinical activities in the practice of psychiatry. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Cox

## 488. Acting Internship in Inpatient

 Psychiatry, Away Rotation (6)Clinical activity-40 hours. Prerequisite: Psychiatry Clerkship and/or consent of course coordinator. Inpatient acting internship at approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with a smaller number of
patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 489. Acting Internship in Ambulatory

 Psychiatry, Away Rotation (6)Clinical activity-40 hours. Prerequisite: Psychiatry Clerkship and/or consent of course coordinator. Outpatient acting internship at an approved nonUCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)
493. Culture, Medicine and Society (6) Seminar- 12 hours; clinical activity - 16 hours; independent study-8 hours; discussion-4 hours. Prerequisite: consent of instructor; UC Davis School of Medicine students only. Students will learn about the epidemiological significance of health disparities and barriers to access to health care. The course will cover (1) Epidemiology/Health Disparities; (2) Society and Medicine; (3) Cinemeducation; (4) Reflection/Integration. (H/P/F grading only.) - III. (III.)

## 498. Directed Group Study (1-5)

Prerequisite: consent of instructor. Approved for graduate degree credit. Medical students desiring to explore particular topics in depth. (H/P/F grading only for graduate or medical students.)

## 499. Research (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. Individual research on selected topics or research projects. (H/P/F grading only for graduate or medical students.)

## Public Health Sciences (SPH)

Lower Division
92. Internship in Community Health (1-12) Internship-3-36 hours. Prerequisite: lower division standing; consent of instructor. Students apply theory and concepts learned in the classroom through field work in a community health agency. (P/NP grading only.)

## Upper Division

101. Perspectives in Community Health (3) Lecture-3 hours. Prerequisite: undergraduate standing. Covers comprehensively the responsibilities, obligations, roles and professional activities of various health care disciplines in the community; provides students with perspectives on preventive medicine in society. - III. (III.)
102. Health Issues Confronting Asian Americans and Pacific Islanders (4)
Lecture/discussion-4 hours. Health issues confronting Asian Americans and Pacific Islanders. (Same course as Asian American Studies 132.) GE credit: SocSci | SS.-II. (II.)

## 160. General Health Education and Prevention (5)

Lecture-4 hours; discussion - 1 hour. Restricted to students in the internship program for the Health Education Program only. Topics include addiction, substance abuse/prevention, nutrition, stress management, physical fitness, body image, reproductive anatomy and physiology, contraceptive options, safer sex, sexual health, healthy relationships, and other general wellness/health promotion topics. Practice in peer counseling and outreach presentations. Limited enrollment. (P/NP grading only.) -IV. (IV.) Ferguson

## 161. Campus Alcohol/Drug Abuse

 Prevention Program Peer Educator Training (4)Lecture/discussion -3 hours; practice -1 hour. Prerequisite: course 160 (may be taken concurrently); consent of instructor. Preparation for internship in campus and community substance abuse prevention and educational intervention. Addiction and other physiological responses to alcohol and other drugs. Harm-reduction strategies for individuals and target
populations. High risk behaviors. Practice in peer counseling skills and outreach presentations to small and large groups. (P/NP grading only.) - III. (III.)

## 162. Health Advocates Peer Educator

 Training (4)Lecture/discussion-3 hours; practice-1 hour. Prerequisite: course 160 (may be taken concurrently); consent of instructor. Preparation for internship in campus and community health promotion and risk reduction. Nutrition, stress management, physical fitness, body image and disordered eating, skin cancer prevention, and other general wellness/health promotion topics. (P/NP grading only.) - III. (III.)
175W. Health Policy and Health Politics (4) Seminar-3 hours; extensive writing or discussion1 hour. Restricted to students attending UC Washington Center program. Following the model of a Congressional subcommittee, identification of four salient health policy issues for study, research, and development of model policies to address them. (Same Course as UC Davis Washington Center 175.) GE credit: SocSci, Wrt \| ACGH, OL, SS, WE. - III. (III.) Wintemute

## 190C. Research Conference in Community

 and International Health (1)Discussion-1 hour. Prerequisite: consent of instructor. Weekly conference on research problems, progress, and techniques in Community and International Health. Critical discussion of recent journal articles. May be repeated for credit. (P/NP grading only.) I, II, III. (II, II, III.)

## 192. Internship in Community Health Practice (1-12)

Internship-3-36 hours. Prerequisite: upper division and graduate students; consent of instructor. The student, through fieldwork in a community health agency, learns to apply theory and concepts learned in the classroom. (P/NP grading only.)
198. Study in Community and International Health (1-5)
Prerequisite: undergraduate standing and consent of instructor. Study and experience for undergraduate students in any number of areas in community and international health. (P/NP grading only.)

## 199. Research in Community and

## International Health (1-5)

Prerequisite: undergraduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health pro motion and wellness, women's health, and health demographics. (P/NP grading only.)

## Graduate

201. Introduction to Public Health (3)

Lecture-3 hours; laboratory/discussion - 2 hours. Prerequisite: graduate standing or consent of instructor. Provides an overview of public health. Covers the history of public health in the U.S.; defines its major functions and constituencies; and, introduces fundamental principles of epidemiology, biostatistics, behavioral sciences, environmental health, infectious diseases, and reducing health disparities May be repeated one time for credit. - IV. (IV.) Garcia

## 203. Learning and Teaching in Public

Health Contexts (2)
Lecture/discussion-2 hours. Prerequisite: graduate standing or consent of instructor. Aimed at current and future public health professionals interested in learning more about the educational potential for interactions with community members and other health professionals-all stakeholders in improving the health of communities. - III. (III.) Cassady, Ziegahn

## 210. Public Health Informatics (2)

Lecture-2 hours; laboratory-2 hours. Restricted to upper division or graduate standing. Collection, verification, and utilization of data related to populations; infrastructure, functions, and tools used to
generate public health knowledge supporting public health practices and policy development/dissemination. (S/U grading only.)-IV. (IV.) Hogarth

## 211. Infectious Diseases and Global Health

 (3)Lecture-2 hours; discussion - 1 hour. Infectious disease epidemiology and prevention, with emphasis on human and veterinary diseases of global health importance. Major global health epidemics and challenges of infectious diseases, by mode of trans-mission.-II. (II.) DeRiemer, Sandrock

## 212. Migration and Health (3)

Lecture/discussion-3 hours. Prerequisite: graduate standing. Principles of migration and health. Topics will include demographics, public health invention programs, health care delivery, occupational health, and effects of international migration on the health in communities of origin, transit and destination. Guest presentations by outside experts. Offered in alternate years. - (III.) Schenker
222. Social \& Behavioral Aspects of Public Health (3)
Lecture/discussion-3 hours. Prerequisite: consent of instructor required; graduate standing, Statistics 102 and 106. Theories and strategies of health behavior change at the individual, group, community, and environmental levels. Examples include: transtheoretical model, social networks, and social marketing.
Theories are applied to solve common public health problems (cancer, obesity, smoking, and HIV/
AIDS. - II. (II.) De Vogli

## 232. Health Communication (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Health communication theories and research traditions. Topics include consumer health information seeking; physi-cian-patient interaction; information, social marketing, "edutainment," and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery. (Same course as Communication 232.) Offered in alternate years. - (III.) Bell
244. Introduction to Medical Statistics (4) Lecture/discussion-6 hours; laboratory/discussion - 3 hours. Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only one unit of credit for students who have completed Statistics 100 or Preventive Veterinary Medicine 402. -IV. (IV.) Yang

## 245. Statistical Analysis of Laboratory Data

 (4)Lecture-3 hours; laboratory/discussion-1 hour. Prerequisite: course 244 and 247; consent of instructor. Priority given to K30 training program in the School of Medicine. Analysis of data and design of experiments for laboratory data with an emphasis on gene expression arrays and other high-throughput biological assay technologies. Offered in alternate years. - III. Rocke
246. Biostatistics for Clinical Research (4) Lecture-3 hours; laboratory/discussion - 1 hour. Prerequisite: courses 244 and 247. Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians. May be repeated for credit. -II. (II.) Qi

## 247. Biostatistics for Epidemiology (4)

Lecture-3 hours; laboratory/discussion-1 hour.
Prerequisite: courses 246. Introduction to the principles and methods of statistical inference for categorical data and survival data in epidemiological studies. The major topics include contingency table methods, logistic regression, Kaplan-Meier and logrank methods, and Cox regression. -I. (I.) Kim
252. Social Epidemiology (2)

Lecture/discussion-2 hours. Prerequisite: Epidemiology 205A; consent of instructor. Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. (Same Course as Epidemiology 252.) - III. (III.) Gibson
255. Human Reproductive Epidemiology (3) Lecture-3 hours. Prerequisite: Preventative Veterinary Medicine 405, 406, Physics 220, Physiology 222 or equivalents, or consent of instructor. Human reproductive effects and risk of reproductive disorders, examined from macro- and micro-environmental exposures in community and occupational settings, epidemiologic study designs and analyses. Offered in alternate years.-I. Hertz-Picciotto

## 262. Principles of Environmental Health

 Science (3)Lecture-3 hours. Prerequisite: consent of instructor required. Principles, approaches and issues related to environmental health. Recognizing, assessing, understanding and controlling the impact of people on their environment and the impact of the environment on the public.-I. (I.) Bennett
264. Public Health Econometrics (2)

Laboratory/discussion - 3 hours. Prerequisite: consent of instructor. Principles of demand and supply; elasticity; benefits and costs; least squares regression; stepwise regression; economic and statistical significance; fixed and random effects; longitudinal data; non-linear relations; continuous and binary variables; instrumental variables; attrition bias; tobit regression; Two-part cost model. (S/U grading only.) - III. (III.) Leigh

## 266. Applied Analytic Epidemiology (3)

 Lecture-2 hours; laboratory-2 hours. Prerequisite: Preventive Veterinary Medicine 404 or consent of instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as Population Health and Reproduction 266.) - III. (III.) Kass
## 273. Health Services Administration (3)

 Laboratory - 3 hours. Prerequisite: consent of instructor required. Structure and function of public and private medical care. Topics include categories and trends in national medical spending, predictors of patient use, causes of death, managed care, HMOs , Medicare, Medicaid, costs of technology, and medical care in other countries. Limited enrollment.-II.
## (II.) Leigh

290. Topics in Public Health (1)

Seminar. Prerequisite: consent of instructor. Open to students in Master of Public Health program, or permission of instructor. Seminar on key issues and current topics in public health. Course begins in August SSII. Students must enroll in August, then Fall and Winter. The course is a series but grades and units are given at end of each quarter. May be repeated four times for credit. (S/U grading only.) - I, II, III, IV. (I, II, III, IV.) Kass, McCurdy

## 295. International Health (2)

Lecture/discussion-2 hours. Prerequisite: graduate standing or consent of instructor. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. ( $\mathrm{S} / \mathrm{U}$ grading only.) - III. (III.) Koga, Schenker

## 297. Public Health Practicum (1-16)

Prerequisite: consent of instructor. Open to Master of Public Health students. Practical fieldwork experience in public health. Placement site will vary based on the interest and experience of each student. May be repeated four times for credit. (S/U grading only.) - I, II, III, IV. (I, II, III, IV.) McCurdy
298. Study in Community and International Health (1-5)
Prerequisite: graduate student in good academic standing; consent of instructor. Study and experience for graduate students in any number of areas in community and international health. (S/U grading
only.) -I, II, III, IV. (I, II, III, IV.)
299. Research in Community and International Health (1-12)
Prerequisite: graduate standing; consent of instructor. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, womens health, and health demographics. (S/U grading only.) - I, II, III, IV. (II, II, III, IV.)

## Professional

402. Introductory Medical Spanish (2)

Lecture-2 hours. Prerequisite: medical student or consent of instructor. The vocabulary needed to conduct a basic history and physical examination in Spanish. (H/P/F grading only.) - III. (III.)
461. Clerkship in Community Health Group Practice (3-9)
Clinical activity - full time ( $2-6$ weeks). Prerequisite: third- or fourth-year medical student. Overview of local community health in group practice situations. Students participate in treatment at several clinic sites in Yolo County. Topics include primary care, environmental health, maternal and child health, jail health, and preventive health care for the aged. (S/U grading only.) -I, II, III, IV. (I, II, III, IV.)
465. Community Health Preceptorship (3-18)
Clinical activity $-5-40$ hours. Prerequisite: fourthyear medical student; consent of instructor. Participate at state or county health department or other public health organization in on-going investigations into current public health problems, e.g., birth defects, cancer control, diabetes, hypertension, injury control, infectious diseases, aging, Alzheimer's disease, and smoking and tobacco use control. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) McCurdy

## 466. Occupational and Environmental

 Medicine Elective (6-12)Clinical activity; laboratory. Prerequisite: fourth-year medical student in good academic standing; consent of instructor. Participate in activities of Occupational and Environmental Health Unit. Major activity is involvement in an epidemiologic research project of the University. Participate in Occupational and Environmental Medicine Clinic at UC Davis Medical Center and other sites, as arranged. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) McCurdy
470. Clinical Selective in Occupational and Environmental Medicine (3-6)
Clinical activity-9-18 hours. Prerequisite: fourthyear medical student in good academic standing; consent of instructor. Outpatient clinical experience in Occupational and Environmental Medicine at UCDMC and other sites, as arranged. Gain experience in evaluating occ/env medical conditions, use of medical literature resources, the worker's compensation system, and toxicological principles. Students may take up to four weeks for six units. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) McCurdy

## 480. Insights in Occupational and

## Environmental Medicine (1-3)

Clinical activity - 3-9 hours. Prerequisite: first- or sec-ond-year medical student in good academic standing; consent of instructor. Observe and participate in research and clinical activities in occupational and environmental medicine which include conferences, occupational and environmental medicine clinical activities and field visits. Develop and present small individual research projects. (P/F grading only.) -I , II, III, IV. (I, II, III, IV.) McCurdy
495. International Health (2)

Lecture/discussion-2 hours. Prerequisite: medical student in good academic standing; consent of instructor. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (H/P/F grading only.) - III. (III.) Koga, Schenker
496. Current Issues in Public Health (1) Lecture/discussion - 1 hour. Topical issues in public health. Speakers from the local public health community address issues such as disease control programs, access to care. May be repeated up to three times for credit. (P/F grading only.) - III. (III.)
McCurdy
498. Study in Public Health Sciences (1-6)

Prerequisite: medical student in good academic standing and consent of instructor. Study and experience for medical students in areas in community and international health. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 499. Research in Public Health Sciences

 (1-9)Prerequisite: medical students with consent of instructor. Work with faculty member in areas of research interest, including but not limited to public health, injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.)

## Radiation Oncology (RON)

Upper Division

## 199. Special Study for Advanced Undergraduates; Research in Radiation Biology (1-5)

Prerequisite: undergraduate standing; consent of instructor. Radiation Oncology is a unique discipline combining elements of clinical practice linked to complex physics based dosimetry and treatment planning. Included within this clinical environment is a strong basis in biology that underpins the clinical effectiveness of radiation treatment. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.) Vaughan

## Graduate

211. Introduction to Radiation Oncology Physics (3-6)
Prerequisite: consent of instructor; restricted to physics and engineering graduate students and senior undergraduate physics majors. Not more than three students total enrolled in course 211 at a time. Introduction to radiation oncology physics. Overview of treatment methodologies. Medical physics equipment. Treatment machine dosimetry, including calibration. Machine quality assurance. Patient dosimetry. Treatment planning. Simulation and treatment. Treatment quality assurance, including calculation checks and chart checks. Brachytherapy. (S/U grading only.) -I, II, III, IV. (I, II, III, IV.) Stern

## 299. Independent Study and Research

 (1-12)Laboratory - 3-40 hours. Prerequisite: enrollment with a Graduate Group for Ph.D. candidacy and consent of Group Advisor and Sponsor. Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. degree. (S/U grading only.) -I, II, III, IV. (I, II, III, IV.) Coleman, Li, Vaughan

## Professional

420. Radiobiology Lecture Course (1)

Lecture-1 hour. Prerequisite: Biological Sciences 1A, Mathematics 12, Physics 1A. Radiobiology lectures are designed to engage the physician residents, physics residents and medical students in learning Radiobiology principles and concepts during the year the Radiation Physics course is taught. May be repeated two times for credit. (H/P/ F grading only.)-I, II, III, IV. (I, II, III, IV.) Coleman, Li, Vaughan
463. Radiation Oncology Clerkship (3-9)

Clinical activity-30 hours. Prerequisite: completion of Medical Sciences 430, 431; third-year clinical clerkship, consent of instructor required. Introduction to radiation oncology. Students will participate in workup and treatment planning for radiation oncology patients and will be introduced to the concepts involved in clinical radiation oncology, radiation biology, and radiation physics. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Chen
499. Independent Study and Research in Therapeutic Radiology (1-12)
Prerequisite: consent of instructor. Advanced-level research seminar in clinical and/or translational radiation oncology. Work with the course instructor to generate a testable hypothesis. (H/P/F grading only.) - I, II, III, IV. (II, II, III, IV.) Coleman, Fragoso, Li, Mayadev, Monjazeb, Vaughan

## Radiology—Diagnostic (RDI) Professional

413. Radiological Diagnosis II (Physics of Diagnostic Radiology) (5)
Lecture-49 hours total; laboratory - 6 hours total. Prerequisite: consent of instructor. Physics of diagnostic imaging; $x$-ray production and interaction; image formation; modulation transfer function; fluoroscopy; cine fluoroscopy; stereoscopy; xeroradiography; computerized and geometrical tomography; magnetic resonance and ultrasound. Principles of radiation protection in imaging will be covered. $(\mathrm{H} /$ P/F grading only.) -1 . (I.) Seibert, Boone

## 414. Medical Radiation Biology (3)

Lecture-27 hours total. Prerequisite: consent of instructor. Medical radiation biology; molecular cellular and organ system response to acute and chronic irradiation; radiation carcinogenesis and genetic effects; radiation risk assessment; diagnostic ultrasound and magnetic resonance imaging health effects. Medical/legal considerations of radiation exposure. Offered in alternate years. (H/P/F grading only.) - III. Bushberg
461. Advanced Clinical Clerkship in Diagnostic Radiology (3-6)
Clinical activity - 35 hours; conference- 4 hours; discussion/laboratory-1 hour. Prerequisite: satisfactory completion of second year medical school curriculum and of third-year clerkships in Internal Medicine and General Surgery; consent of instructor. Restricted to eight students per rotation; open to visiting medical students from accredited programs. Work with clinical Radiologists in image interpretation fluoroscopy angiography image-guided intervention cardiac stress testing radionuclide therapy. Daily conferences in Radiology Diagnosis and Therapy Health Physics Radiation Safety. Prepare two clinical cases for in-class presentation. Assigned readings. May be repeated for credit. (H/P/F grading only)-I, II, III, IV. (I, II, III, IV.) Bateni, Shakeri

## 462. Diagnostic Imaging of Acquired and

 Congenital Heart Disease (2)Lecture/discussion-5 hours (for 3 weeks). Prerequisite: fourth-year medical student in good academic standing and course 461 (may be taken concurrently). Main emphasis on radiology of acquired and congenital heart disease, but also on magnetic resonance, nuclear medicine, and echocardiography of heart diseases. (H/P/F grading only.) - III. (III.)

## 473. Advanced Clinical Clerkship in

 Neuroradiology (3-6)Clinical activity -35 hours; conference- 4 hours; independent study -1 hour. Prerequisite: fourth-year medical student with interest in Diagnostic Radiology, Neuroradiology, Neurology, Neurosurgery, Psychiatry, Psychology, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Work with Neuroradiologists in image interpretation of CT, MRI, and fluoroscopy. Opportunity to participate in assessment of Neurointerventional patients, and to observe Neurointerventional procedures. Daily conferences in

Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks May be repeated for credit. (H/P/F grading only)I, II, III, IV. (II, II, III, IV.) Bobinski

## 474. Advanced Clinical Clerkship in

## Pediatric Radiology (3-6)

Clinical activity - 30 hours; conference -5 hours; film viewing -3 hours; independent study -2 hours. Prerequisite: fourth-year medical students with interest in Radiology and/or Pediatrics; interested thirdyear medical students who have successfully completed Pediatrics clinical clerkships may enroll, given availability and consent of the instructor of record; prior completion of course 461, or the equivalent, encouraged. Restricted to two students per two-week or four-week rotation. Participation in the radiological care of Pediatric patients; evaluate the patient receiving the radiographic study, including pertinent historical/physical findings. Student expected to write up case files on interesting cases encountered during their rotation. Credit limited to 3 units for 2 weeks, or 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only)-I, II, III, IV. (I, II, III, IV.) Gorges

## 475. Advanced Clinical Clerkship in

## Musculoskeletal Radiology (MSK) (3-6)

Clinical activity -35 hours; conference- 4 hours; discussion/laboratory-1 hour. Prerequisite: fourthyear medical student with interest in Musculoskeletal Radiology, Orthopedic Surgery, Sports Medicine, PMNR, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Work with Musculoskeletal Radiologists in interpretation of CT, MRI, radiography, and fluoroscopy. Opportunity to assess patients for, and to observe imageguided procedures. Daily conferences in Musculoskeletal Imaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. Credit limited to 3 units for 2 weeks, 6 units for 4 weeks. May be repeated for credit. (H/P/ F grading only)-I, II, III, IV. (II, II, III, IV.) Bateni

## 476. Advanced Clinical Clerkship Vascular/

 Interventional Radiology (IR) (3-6)Clinical activity - 35 hours; conference -4 hours; discussion/laboratory-1 hour. Prerequisite: fourthyear medical student with interest in Diagnostic Radiology, Vascular/Interventional Radiology, Cardiovascular Imaging, Cardiology, Cardiovascular Surgery, Surgical Oncology, General Surgery, or related field; satisfactory completion of course 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Medical student will work with Vascular/Interventional Radiologists in the evaluation of patients for interventional procedures. There will be opportunities to Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. Credit limited to 3 units for 2 weeks, 6 units for 4 weeks. May be repeated for credit. (H/P/ F grading only)-I, II, III, IV. (I, II, III, IV.) Link

## 477. Advanced Clinical Clerkship in Ultrasound Radiology (3-6)

Clinical activity -30 hours; conference -5 hours; film viewing -3 hours. Prerequisite: fourth-year medical student with interest in Radiology, OB/GYN, or in other medical or surgical subspecialties employing ultrasound in their clinical practice; prior completion of course 461, or the equivalent, is encouraged. Restricted to two students per $2 / 4$ week rotation.
Participation as an active team member on a busy clinical ultrasound service. Credit limited to 3 units for 2 weeks, 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only) $-I$ III, III, IV. (II, II, III, IV.) McGahan

## 478. Advanced Clinical Clerkship <br> Abdominal Imaging (3-6)

Clinical activity -35 hours; conference -4 hours; discussion/laboratory-1 hour. Restricted to two students per 2/4 week rotation. Work with clinical Radiologists on abdominal and pelvic CT, MR, ultrasound, digital radiography, gastrointestinal and genitourinary procedures, image-guided intervention.

Offered as a 2-week rotation for third-year medical students and a 2/4-week rotation for fourth-year medical students. Credit limited to 3 units for 2 weeks, 6 units for 4 weeks. May be repeated for credit. (H/P/F grading only) -I , II, III, IV. (II, II, III, IV.) Lamba

## 479. Specialty Externship in Radiology (3-

 16)Clinical activity-25 hours; discussion-10 hours. Prerequisite: consent of instructor. Externship provides in-depth exposure to one of a variety of subspecialties in Radiology. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (II, II, III, IV.) Hagge
498. Group Study in Diagnostic Radiology (1-12)
Prerequisite: consent of instructor. (H/P/F grading only.)
499. Research in Diagnostic Radiology (1-12)
Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

## Radiology-Nuclear Medicine <br> (RNU)

## Upper Division

198. Directed Group Study (1-5)

Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: upper division standing and consent of instructor. (P/NP grading only.)

## Graduate

299. Research: Special Study for Graduate Students (1-12)
Prerequisite: graduate standing and consent of instructor. (S/U grading only.)

## Professional

401. Biomedical Radiochemistry (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: open to graduate and medical students; consent of instructor. Approved for graduate degree credit. Course is designed to combine basic nuclear physics, chemistry, and biology into a comprehensive and vigorous lecture-laboratory experience in biomedical nuclear chemistry. Subjects include choice and purification of appropriate gamma and beta radioisotopes, compounding biological pharmacodynamics and radioimmunoassay. (H/P/F grading only.)-III. (III.)

## 41 1. Radiological Physics I (Physics of Nuclear Medicine) (5)

Lecture-43 hours total; laboratory - 12 hours total. Prerequisite: consent of instructor. Physics of diagnostic and therapeutic nuclear medicine, nuclear physics, radioactive decay; interaction of ionizing radiation; dosimeters; attenuation; internal and external dosimetry; health physics; radiation detection and imaging, scintillation cameras, computerized planar and tomographic imaging. Offered at UC Davis Medical Center. Offered in alternate years. (H/P/F grading only.) - (I.) Bushberg, Vera
463. Clinical Clerkship in Nuclear Medicine (3-8)
Clinical Activity - full time ( $2-6$ weeks). Prerequisite: satisfactory completion of second-year medical school; Radiology—Diagnostic 461 recommended; consent of instructor. Clerkship correlates radioisotopic methods with clinical, pathophysiological, and other diagnostic aspects of the patient's care. Each patient reviewed with student by faculty member. Reading assignments, informal projects, and research techniques available. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Shelton

## 498. Group Study in Nuclear Medicine

 (1-12)Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)
499. Research in Nuclear Medicine (1-12)

Prerequisite: consent of instructor. Approved for graduate degree credit. (H/P/F grading only for medical students.)

## Surgery (SUR)

## Lower Division

## 99. Cardiovascular Tissue Engineering

## Research (1-5)

Laboratory-3-15 hours. Multidisciplinary research in cardiovascular tissue engineering and regeneration for acquired and congenital cardiovascular disease. (P/NP grading only.) - I, II, III, IV. (II, II, III, IV.) Si

## Upper Division

192. Internship in General Surgery (1-12)

Internship-3-36 hours. Prerequisite: upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in general surgery and related fields. (P/NP grading only.)
199. Special Study in General Surgery for Advanced Undergraduates (1-5)
Prerequisite: advanced undergraduate student with consent of instructor. (P/NP grading only.)

## Graduate

## 299. Research (1-12)

Prerequisite: graduate standing and consent of instructor. ( $\mathrm{S} / \mathrm{U}$ grading only.)

## Professional

430. Surgery Clerkship (12)

Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCDMC. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.) -I, II, III, IV. Wisner
430F. SJVP Surgery Clerkship at UCSF (12)
Clinical activity -45 hours. Prerequisite: approval by School of Medicine Committee on Student Progress. Eight-week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCSF Fresno. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.) -I, II, III, IV. (II, II, III, IV.) Wisner

## 439D. Directed Clinical Studies in Surgery

(1-12)
Clinical activity-40 hours. Prerequisite: partial completion of a Clinical Rotation; consent of instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) -I, II, III, IV. (II, II, III, IV.)

439R. Directed Studies in Surgery (1-12)
Clinical activity-30 hours; independent study-10 hours. Prerequisite: consent of instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) - I, II, III, IV. (I, II, III, IV.)
460A. Clinical Surgical Elective (6-18)
Clinical activity-full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Rotation through Surgery Specialty Clinics: Vascular, GI, GU, Thoracic, Plas-
tic, Radiotherapy. Student works up one new and two return visit patients. Presents consult to on-site faculty. Weekly review with preceptor and course director. Reading assignments to add perspective for in-depth discussions. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.) Young

## 461. Surgery Burn Unit Clerkship (6 or 9)

 Clinical activity-full time ( 4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430 .Externship in the eight-bed Burn Unit, and the 80 bed Shriners Hospital for Children. Principles of critical care, fluid and electrolyte resuscitation and management of surgical wounds in both adults and children. (H/P/F grading only.) - I, II, III, IV. II, II, III, IV.) Greenhalgh

## 462. Surgery Trauma Service Clerkship (6 or 9)

Clinical activity-full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student works as an extern on one of the two general surgery Trauma teams, participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on, and 24 hours off. (H/ P/F grading only.) - I, II, III, IV. (II, II, III, IV.) Phan, Salcedo
463. Surgery Intensive Care Unit (6 or 9) Clinical activity-full time (4 or 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student participates in direct supervision of critically ill surgical patients in a twelve-bed surgery ICU. Each student is closely supervised. Provides in-depth experience with management of critically ill patients. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Cocanour

## 467. Surgical Oncology (3-9)

Clinical activity_full time (2 to 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Students actively participate in management of patients requiring surgery for cancer, endocrine disease and selected general surgical problems. Cases include malignant melanoma, sarcomas, gastrointestinal cancer, head and neck pathology, and metastatic malignancies. Attending rounds daily. Four teaching conferences weekly. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Bold
468. Cardiothoracic Surgery Clerkship (6-9)

Clinical activity-full time ( 4 to 6 weeks). Prerequisite: fourth-year medical student, or third-year medical student with completion of course 430. Student works as an extern on the Cardiothoracic Surgical Service, participating in perioperative management and operations on the heart, lungs, mediastinum, and other thoracic structures. Regularly scheduled teaching conferences are conducted. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Young
471. Gastrointestinal Surgery (3-9)

Clinical activity-full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430. Student participates on the GI Surgery Service, working under the immediate supervision of the faculty and surgical housestaff, involving the full spectrum of gastrointestinal diseases performed by the medical student. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Ho

## 472. Vascular Surgery (3-9)

Clinical activity-full time. Prerequisite: fourth-year medical student or third-year medical student with completion of course 430, Internal Medicine 430 and Pediatrics 430. Student participates on the vascular surgery service and in the management and operations of arterial and venous system, exclusive of diseases that require cardiopulmonary bypass for treatment. Includes patient care responsibilities with appropriate supervision. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.) Dawson

## 475. Pediatric Surgery (6-9)

Clinical activity-full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Care of patients with neonatal congenital surgical problems. Fluid and electrolyte management in infants. General experience with acquired surgical diseases in children. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Marr

## 476. Surgical Consult Service (6-9)

Clinical activity-full time (4-6 weeks). Prerequisite: fourth-year medical student or third-year medical student with completion of course 430. Students function as acting interns working in parallel with the interns on the service. They consult on all non-trauma patients in the emergency room and on the wards and also participate in the operating room. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Wisner

## 477. Clinically Oriented Anatomy (3)

Clinical activity-40 hours. Prerequisite: completion of three years of medical school. Anatomy of selected regions of the body using cadaver dissection, prosections and interactive CD-ROMs. Anatomical relationships relevant to common surgical procedures. Surgical and interventional radiology procedures. (H/P/F grading only.) - II. Khatri

## 478. Surgical Preceptorship: Off Campus

 (6-18)Clinical activity-full time. Prerequisite: fourth-year medical student and consent of instructor. Student participates in the preoperative, operative and postoperative care of surgical patients under the supervision of attending staff. (H/P/F grading only.) $-I$ III,
III, IV. (I, II, III, IV.) Holcroft
480. Insights in Surgery (1-3)

Clinical activity-3-9 hours. Prerequisite: medical student in good academic standing and consent of instructor. Individualized activities, including ward rounds, subspecialty clinics and conferences, grand rounds, and observation of a variety of surgical procedures. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.)

## 481 . Interactive Clinical Case Presentation (ICCP) (3)

Clinical activity - 1 hour. Prerequisite: fourth year medical students; open for third and fourth year student observers; maximum of 10-15 students in good standing. Case presentation of common clinical scenarios (i.e. chestpain/MI; fever/pneumonia; abdo pain/chlecy stites, etc.) from various discipline held in an auditorium with real patients exposure. Interactive session to review history, physical findings and case management. Students will be asked to perform H\&P. Course taught as one session (4 hours) per month for three quarters (July to March). The students who enroll can earn up to three credits and the minimum requirements will be to attend at least six sessions. Students can do all nine sessions and work toward an honor. For the written part students will have to pick two of the nine case presentations and write a detailed paper with a literature review on "The Current management" of that disease-this can in fact be a manuscript submitted for publication with a faculty member as an advisor. (H/P/F grading only.) -I, II, IV. (I, II, IV.) Khatri
493. Clinically-Oriented Anatomy Special Study Module (6)
Lecture - 5 hours; lecture/laboratory - 10 hours; laboratory -16 hours; clinical activity -4 hours. Prereqvisite: consent of instructor. Restricted to School of Medicine students only. Reviews aspects of the anatomy of the head and neck, thoracic cavity, abdomen, pelvis, extremities, vascular system, peripheral nervous system and central nervous system. Focus on the understanding of anatomy related to common surgical procedures. (Cell Biology and Human Anatomy 493.) (H/P/F grading only.) - III. (III.) Blankenship, Khatri

## 493. Interdisciplinary Study of

## Gastrointestinal Cancer (6)

Lecture - 5 hours; clinical activity - 12 hours; labora-tory-3 hours; discussion/laboratory-20 hours. Prerequisite: consent of instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as Pathology 493.) (H/P/F grading only.) - II, III. (II, III.) Khatri, Olson, Ruebner
493B. Critically Ill Surgical Patients SSM (6) Lecture - 5 hours; lecture/laboratory - 10 hours; laboratory -16 hours; clinical activity -4 hours. Prerequisite: consent of instructor; UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Application of Basic Cardiopulmonary Physiology to Problems Encountered in Critically III Surgical Patients. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Holcroft
493C. Physiological Principles in SICU SSM (6)

Lecture-5 hours; lecture/laboratory - 10 hours; lab-oratory- 16 hours; clinical activity -4 hours. Prereqvisite: consent of instructor; restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems. (Same course as Human Physiology 493C.) (H/P/F grading only.) -I, II, III, IV. (II, II, III, IV.) Cala, Holcroft

## 493D. Interdisciplinary Study of

## Gastrointestinal Cancer (6)

Lecture-5 hours; clinical activity - 12 hours; labora-tory-3 hours; discussion/laboratory-20 hours. Prerequisite: consent of instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer.
Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as Pathology 493.) (H/P/F grading only.) - II, III. (II, III.) Khatri, Olson, Ruebner

## 494H. Fourth-Year Surgical Honors

Program (18)
Prerequisite: completion of third year of medical school with superior performance on course 430; consent of instructor. To provide intensive and comprehensive training in surgery to students interested in a postgraduate surgical career, that would enable them to succeed during the internship and residency training. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Holcroft

## 495. Intense Introduction to Cardiac Surgery (3)

Clinical activity - 16 hours; lecture/discussion-4 hours. Prerequisite: consent of instructor. Restricted to Medical student between first and second year. Close contact with vascular surgeon for two-week period. Includes Sunday mornings. 100\% mandatory attendance. Physiology of going on and off cardiopulmonary bypass. Atherosclerotic cardiovascular disease, structural and valvular heart disease and electrical and rhythmic heart disease. May be repeated one time for credit. (P/F grading only.) -IV. (IV.) Jan

## 498. Group Study (1-5)

Prerequisite: medical student; consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.) - I, II, III, IV. (I, II, III, IV.)
499. Laboratory Research (1-12)

Laboratory-3-36 hours. Prerequisite: completion of second year of medical school; 6consent of instructor. Laboratory research on surgically related problems. Participation in projects to include the following: burn, nutrition, oncology, transplant and others. (H/P/F grading only.)-I, II, III, IV. (I, II, III, IV.)

## Surgery-Plastic Surgery (PSU)

## Professional

460. Clinical Plastic Surgery Elective (1-18)

Clinical activity-full time (approximately 40 hours per week). Prerequisite: third- or fourth-year medical students; Surgery 430; consent of instructor. Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation. (H/P/F grading only.) $-I$, II, III, IV. (I, II, III, IV.) Wong

## Urology (URO)

## Upper Division

199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) -

## Professional

## 400. Office Urology (1)

Clinical activity - 4 hours in afternoons ( 6 weeks). Prerequisite: fourth-year medical students with consent of instructor. Introduction to ambulatory care of urologic patients including basic therapeutic and diagnostic procedures from case material referred to private clinic. Management of urinary tract infection will be emphasized. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.)

## 460. Urology Clinical Clerkship (5-18)

Clinical activity-full time. Prerequisite: second-year medical student; physical diagnosis or the equivalent; consent of instructor. Clinical experience in diagnosis and treatment of urologic disease. Student will work closely with house staff, participate in conferences and surgery, and perform initial patient evaluation on new patients. May be repeated for credit. Limited enrollment. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Low

## 461. Externship in Urology (5-18)

Clinical activity-full time. Prerequisite: fourth-year medical students with consent of instructor. Under supervision, student acting as intern will assume full inpatient responsibility including admission history, physical examination, management of hospitalization, and participate in surgical procedures, outpatient clinic and learning diagnostic and therapeutic procedures. May be repeated for credit. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Low

## 499. Research in Urology (1-12)

Research-3-36 hours. Prerequisite: medical or veterinary medical students with consent of instructor. Research in oncology, male infertility, urodynamics, neurogenic bladder. Unique opportunity to apply recent technologies (nuclear medicine resonance, flow cytometry, recombinant DNA) in investigation, diagnosis and treatment of GU cancer, infectious disease, male infertility and development of genitourinary bioprosthetics. (H/P/F grading only.) -I, II, III, IV. (I, II, III, IV.) Ghosh, Kurzrock

## Committee in Charge

Emily Albu, Ph.D. (Classics)
Carlson Arnett, Ph.D. (German/Russian)
Seeta Chaganti, Ph.D. (English)
A. Katie Harris, Ph.D. (History)

Sally McKee, Ph.D. (History)
Baki Tezcan, Ph.D. (History/Religious Studies)

## The Major Program

The major in Medieval and Early Modern Studies examines the intellectual, political, and cultural forces that shaped modern European civilization during the period from the end of Ancient Rome (fifth century) to the beginning of the Enlightenment (mideighteenth century). An interdisciplinary and interdepartmental program, the major includes studies in history, art history, philosophy, literature, drama, music, national languages, religion, rhetoric, and political theory.
The Program. The major requires interdisciplinary work, while allowing the student to focus on the early Middle Ages, the High Middle Ages, the Renaissance, or the Baroque. The series of medieval and early modern courses in the program provides the foundation for the major and prepares students for advanced work within the individual disciplines. On the upper-division level, students may choose course work in specific areas of History, Comparative Literature, English, French, German, Italian, Spanish, and Latin, philosophy and religion, arts and language, and political thought. In addition, each student may elect to complete a senior thesis on a selected aspect of medieval and/or early modern culture.
Career Alternatives. The major in Medieval and Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

## Medieval and Early Modern Studies

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter ................... 22
Medieval Studies 20A, 20B 10
Three additional courses chosen from: Art History 1B, 1C, 1E; Comparative Literature 2, 10A, 10B, 10C, 10D, 10E; English 10A, 46A; German 48; History 4A, 4B; Humanities 1*, 9; Philosophy 21, 22 .. 12 Language proficiency is a desideratum. Courses in Latin and other European languages are strongly recommended, particularly for students planning to pursue graduate studies in the medieval or early modern field.

## Depth Subject Matter

$\qquad$ 44
In consultation with the undergraduate adviser, students select a total of eleven courses from the following disciplines with at least three courses each from the medieval and early modern periods:

Art History 155, 156, 178A, 178B, 178C, 179B, 190B, 190C Classics 110
Comparative Literature 139, 164A, 164B, 164C, 166A, 180* English 111, 113A, 113B, 115, 117, 122, 150A, 153*, 165*, 185A*, 188*, 189* French $115, ' 116,117 \mathrm{~A}, 118 \mathrm{~B}, 141^{\prime}$ * German 101A, 112*, 120, 121, 122, 124*, 131, 134*, 160

History 102B, 102D, 121A, 121B, 121C,
122, 125, 130A, 130B, 131A, 131B,
$131 \mathrm{C}, 132,135 \mathrm{~A}, 136,139 \mathrm{~A}, 144 \mathrm{~A}$,
$148 \mathrm{~A}, 151 \mathrm{~A}, 151 \mathrm{~B}, 190 \mathrm{~B}, 190 \mathrm{C}$
Italian 105, 112, 113, 114, 115A, 115B,
115C, 115D, 118, 139B, 140, 141
Latin $100,101,102,103,104,105$,
$106,108,109,110,112,114,115$,
$116,118,119,120,121,125,130$
Medieval Studies 130A, 130B, 131, 189, 190
Music 121*, 124A, 124B
Philosophy 105, 145, 168, 170, 172
Political Science 115, 116, 118 A
Religious Studies 102, 115, 130*
Spanish 130, 133N, 134A, 134B, 142*
Total Units for the Major

* Prior approval by Undergraduate Adviser necessary.
Major Adviser. See Program office.
Minor Program Requirements:
Medieval and Early Modern Studies...... 24
The minor in Medieval and Early Modern Studies is a coherent program of interdisciplinary study. Medieval Studies units may be taken in one or more of the traditional fields of concentration, including art, history, literature, music, national languages, philosophy, political theory, and religious studies. Courses must be upper-division with at least two courses each from the medieval and early modern periods. Students may also select a minor with a thematic emphasis.
Although there is no foreign language requirement for the minor, knowledge of Latin or a modern European language is recommended.
The minor must be designed in consultation with the Undergraduate Adviser.
Minor Adviser. See Program office.
Courses in Medieval Studies (MST)

## Lower Division

20A. Early Medieval Culture (5)
Lecture-3 hours; discussion - 1 hour; extensive writing. Readings (in translation) in medieval culture, such as Codes of Justinian, Confessions of Saint
Augustine, Beowulf, the Nibelungenlied, The Song of Roland, the Summa Theologica of Thomas Aquinas, the Chronicles of Froissart, Chaucer's Canterbury Tales, and Dante's Divine Comedy. GE credit: ArtHum, Wrt | AH, WC, WE.-I. (I.)
20B. The Culture of the High Middle Ages (5)

Lecture-3 hours; discussion-1 hour; extensive writing. Great transformations that created the modern world: Constitutional Government, the Hundred Years War, the Black Death, and the Peasants Revolts, the Renaissance, Reformation and CounterReformation, and the Baroque. GE credit: ArtHum,
Wrt | AH, WC, WE. - II. (II.)
98. Directed Group Study (1-5)
(P/NP grading only.)
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

130A. Special Themes in Medieval Cultures (4)

Lecture-3 hours; discussion-1 hour. Each offering concentrates on an interdisciplinary aspect of medieval culture in the Middle East and Europe: the idea of the hero, mysticism, urban development. Extensive readings focused on medieval source material. May be repeated for credit. GE credit: ArtHum, Wrt | AH, WC, WE
130B. Special Themes in Renaissance Culture (4)
Lecture-3 hours; discussion - 1 hour. Each theme illuminates an interdisciplinary aspect of Renaissance culture in the eastern and western hemi-
spheres: exploration, medical pathology, daily life, baroque culture. Immersion in source material from 1500-1650. May be repeated for credit. GE credit: ArtHum, Wrt | AH, WC, WE.

## 131. Cross-Cultural Relations in the

 Medieval and/or Early Modern World (4) Lecture/discussion-3 hours; extensive writing. Prerequisite: course 20A or 20B or consent of instructor. Medieval and/or Renaissance aspects of cross culturalism. Relations between Christians, Jews, and Muslims: Europeans, Africans, and Asians; Old World and New World. Offered irregularly. GE credit: WC, WE.189. Seminar in Medieval and Early Modern Culture (4)
Seminar-3 hours; term paper. Prerequisite: course 20A or 20B or consent of instructor. Focus on a particular problem or issue in the Medieval or Early Modern periods. Seminar topics might include (but not limited to) monasticism, origins of the university, chivalry, exploration, the role of women in the Medieval and Early Modern world. Offered in alternate years. GE credit: WE.

## 190. Senior Thesis (4)

Seminar-4 hours. Prerequisite: senior standing and major in Medieval Studies. Preparation of a research paper dealing with a selected aspect of medieval culture, under supervision of three members of the Committee in Charge. - I, II, III. (I, II, III.)
197T. Tutoring in Medieval Studies (1-4)
Seminar-2 hours. Prerequisite: courses 20A and 20B; upper division standing; consent of instructor and chairperson of curriculum committee. Tutoring in Medieval Studies 20A and 20B, including leadership in small discussion groups affiliated with the course. May be repeated for credit for a total of 6 units. (P/NP grading only.)
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.)

## The Major Program

Microbiology is the branch of biology that deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology and molecular genetics, and spawned the new industry of biotechnology.
The Program. The Microbiology Undergraduate Program offers Bachelor of Science and Bachelor of Arts degrees in the College of Biological Sciences. Both degrees are designed to provide students with quantitative skills and knowledge across the breadth of Biological Sciences, while maintaining a focus on the biology of microorganisms. The B.S. degree offers more training in mathematics, biochemistry and laboratory methodology; the A.B. degree incorporates more exposure to the liberal arts. The choice of a major program and its suitability for particular career options should be discussed with a major adviser.

Career Alternatives. A bachelor's degree in microbiology serves as the foundation for advanced study in microbiology, entry into the professional schools of all health sciences, or immediate employ-
ment in biotechnology, health care and food science industries.
A.B. Major Requirements:UNITS
Preparatory Subject Matter ..... 44-56
Biological Sciences 2A-2B-2C ..... 14
Chemistry 2A-2B ..... 10Chemistry 8A-8B or 118A-118B-118C.6-12İ12
Mathematics 17A-17B or $21 \mathrm{~A}-21 \mathrm{~B}$
6-12
Physics 1A-1B or 7A-7B-7C. 36
Depth Subject Matter(or $102+103$ )
7-10
Microbiology 104, 104L, 105, 105L. .....  .13
Select at least one course from each of theareas of study below.
Areas of Study:

1. Molecular Microbiology: Microbiology
115, 150, 170 Mion
2. Medical Microbiology: Microbiology162; Medical Microbiology andImmunology 188; Pathology,
Microbiology and Immunology 126128.3-4
Restricted electives ..... 6-10
Select from:
Upper division Microbiology courses noused in satisfaction of any otherrequirement; or Biological Sciences 104,181, 183. Food Science and Technolog104; Molecular Cellular Biology 120L,
121, 160L, 182; Plant Pathology 120130, 148, 150; Plant Sciences 174;Pathology Microbiology and Immunology126L, 127; Soil Science 111Note: Although a course may be listed inmore than one category, that course maysatisfy only one requirement in the entiremajor.
Total Units for the Major ..... 80-92
B.S. Major Requirements: ..... UNITS
Preparatory Subject Matter ..... 55-65
Biological Sciences 2A-2B-2C ..... 14
Chemistry 2A-2B-2C ..... 15
Chemis 6-12
Mathematics 17A-17B-17C or 21A-21B (21C
recommended) ..... 8-12
Physics 7A-7B-7C ..... 12
Microbiology 91 or 191
$\qquad$45
Depth Subject Matter ..... )
3. ..... 10-13
Statistics* 100 or 102
*Transfer students admitted prior to Fall2013 and current students admitted prior toFall 2010 may also use STA $13,13 \mathrm{~V}$, or 32to satisfy this requirement.
Microbiology 104, 104L, 105, 105L.. .....  13
Select at least one course from each of thareas of study below.
Areas of Study:
4. Molecular Microbiology: Microbiology
115, 150, 170 ..... ogy
5. Medical Microbiology: MicrobiImmunology 188; Pathology
Microbiology and Immunology 126,
6. .....  .4
Restricted electives ..... 8-12
Select from:
Upper division Microbiology courses noused in the satisfaction of any otherrequirement; or Biological Sciences 180L,181, 183; Food Science and Technology104; Molecular Cellular Biology 120L,121, 160L, 182; Plant Pathology 120,

130, 148, 150; Plant Sciences 174;

Pathology Microbiology and Immunology 126L, 127; Soil Science 111 Note: Although a course may be listed in more than one category, that course may satisfy only one requirement in the entire major.
Total Units for the Major............... 101-111
Master Adviser. Su-Ju Lin, Ph.D.
Advising. Biology Academic Success Center
(BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC

## Honors and Honors Program. Su-Ju Lin, Ph.D.

Teaching Credential Subject Representative.
Su-Ju Lin, Ph.D; see the Teaching Credential/M.A Program on page 115.
Graduate Study. The Graduate Group in Microbiology offers programs of study and research leading to the M.S. and Ph.D. degrees.
Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate adviser or the Chairperson of the Group.
Related Courses. The offerings of the Department of Microbiology and Molecular Genetics are augmented by courses in Food Science and Technology; Medical Microbiology; Molecular and Cellular Biology; Pathology, Microbiology, and Immunology; Plant Pathology; and Soil Science.
Faculty of the Department of Microbiology and Molecular Genetics also teach or participate in the following courses: Biological Sciences 2A, 101104 and 181 .

## Courses in Microbiology (MIC)

## Lower Division

## 10. Natural History of Infectious Diseases

 (3)Lecture-3 hours. Topics in the natural history of infectious diseases principally affecting humans. Introduction to infectious microbial agents, ecology, epidemiology, and induction of disease. Focus on diseases of a contemporary nature. Not open for credit to students who have completed course 101, course 102, or course 104. GE credit:

## SciEng | SE.-I. (I.)

## 91. Introduction to Research (1)

Seminar-1 hour. Prerequisite: Biological Sciences 1 A or 2 A or consent of instructor. Discussion of faculty research focusing on the biochemistry, genetics, and cell biology of microorganisms, along with ways undergraduates can participate in research projects of faculty members. May be repeated three times for credit. (P/NP grading only.) GE

## credit: SE. - III. (III.) Hunter

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

101. Introductory Microbiology (5)

Lecture-3 hours; discussion - 1 hour; laboratory - 3 hours. Prerequisite: Biological Sciences 1A, or 2A; Chemistry 2B (may be taken concurrently). Survey of microorganisms emphasizing their interactions with humans and diseases. Topics include microscopy, survey of various microbes, the immune system, food microbiology, microbial pathogens, and mechanisms of disease transmission. Designed for students requiring microbiology for professional schools. Not open for credit to students who have completed courses 102, 102L, 104, or 104L. GE credit:
SciEng | SE, SL. -I, II, III. (II, II, III.)
104. General Microbiology (4)

Lecture -4 hours. Prerequisite: Biological Sciences 101; 103 or 105. Designed for students continuing in microbiology or using microorganisms as tools for the study of genetics and biochemistry. Biology of microorganisms, including viruses, archaea, bacteria and eukaryotic microbes. Topics include microbial structure, growth, antibiotics, pathogenesis, immunology, and epidemiology. Only two units of credit for students who have taken course 101. Not open for credit to students who have completed course 102. GE credit: SciEng \| QL, SE.-I. (I.) Stewart
104L. General Microbiology Laboratory (3) Lecture - 1 hour; laboratory - 6 hours. Prerequisite: course 102 or 104 (may be taken concurrently); consent of instructor. Students must complete a petition for consideration of enrollment; petition available on department of Microbiology website. Introduction to principles and laboratory methods in microbiology. Designed for students continuing in microbiology or using microorganisms as tools for the study of genetics and biochemistry. In combination with course 104, fulfills the microbiology requirement for professional schools. Only two units of credit allowed to students who have completed course 101. Not open to students who have completed course 102L. GE credit: SciEng \| SE, WE.-I. (I.) Igo, Nelson

## 105. Microbial Diversity (3)

Lecture-3 hours. Prerequisite: course 102 or 104; Biological Sciences 103 or 105. Survey of microbial diversity in the three domains of Life: Bacteria, Archaea, and microbial eukaryotes. Emphasizes microbial evolution and phylogeny, physiology and metabolism, global biogeochemical cycles, environmental adaptations, and genomic methods for analyzing culture-independent microbial diversity and microbial communities. GE credit: SciEng | SE. - II. (II.) Dawson, Parales

## 105L. Microbial Diversity Laboratory (3)

 Lecture -1 hour; laboratory -6 hours. Prerequisite: course 102 or 104; 102L or 104L; 105 (may be taken concurrently); Biological Sciences 103 or 105. Students must complete a petition for consideration of enrollment; petition available on department of Microbiology website. Classical enrichments for the isolation of metabolically diverse microbes; modern molecular methods for the identification of isolates; cultivation independent analysis of microbial communities from local environmental samples. GE credit: SciEng | SE, WE. - II. (II.) Dawson, Parales
## 115. Recombinant DNA Cloning and

Analysis (3)
Lecture-3 hours. Prerequisite: Biological Sciences 101 or equivalent. Cloning and analysis of recombinant DNA, with emphasis on Escherichia coli hostvector systems. DNA-modifying enzymes; vectors and their use; manipulation and expression of insert DNA; polymerase chain reaction; and sequence annotation. Graduate students see course 215. GE credit: SciEng | SE.-I. (I.) Xu

## 120. Microbial Ecology (3)

Lecture-3 hours. Prerequisite: course 105, Biological Sciences 102 or 105. Interactions between nonpathogenic microorganisms and their environment, emphasizing physiological and metabolic characteristics of various groups and their adaptation to and modification of specific habitats. Offered irregularly. GE credit: SciEng | SE.—Nelson

## 140. Bacterial Physiology (3)

Lecture -3 hours. Prerequisite: Biological Sciences 101, 102, 103 ( 103 may be taken concurrently), or Biological Sciences 101, 105; Microbiology 102 recommended. Fundamentals of bacterial growth and bacterial responses to environmental stresses. Topics will include carbon and nitrogen regulation, growth rate control, post-exponential growth, and motility and chemotaxis. Not open for credit to students who have completed course 130A. Offered irregularly. GE credit: SciEng | SE.
150. Bacterial Genetics (3)

Lecture-3 hours. Prerequisite: Biological Sciences 101, 102, Biological Sciences 103 or course 140; course 102 recommended. Molecular genetics of enterobacteria and their viruses. Isolation of mutants; genetic exchange and mapping; complementation; suppression; transposons; gene expression and regulation; and genomics. Examples will illustrate appli cations to molecular cloning of recombinant DNA, and to the study of bacterial pathogenesis. Offered irregularly. GE credit: SciEng | SE.

## 155L. Bacterial Physiology Lab (4)

Lecture/discussion - 1 hour; laboratory - 8 hours. Prerequisite: course 140 or $150,102 \mathrm{~L}$, consent of instructor. Physiology and genetics of bacteria. Isolation and characterization of mutant strains. Mapping of mutations by conjugation and transduction studies of control of enzyme synthesis by induction, repression, and catabolite repression. Offered irregularly.

## 162. General Virology (4)

Lecture-4 hours. Prerequisite: Biological Sciences 102 or 105. Integrated presentation of the nature of animal, bacterial, and plant viruses, including their structure, replication and genetics. Only three units to students who have completed Pathology, Microbiology, and Immunology 128. GE credit: SciEng | SE.-II. (II.)
170. Yeast Molecular Genetics (3)

Lecture-3 hours. Prerequisite: Biological Sciences 101 and 102; course 102 or 140 (may be take concurrently) strongly recommended. Survey of the genetics, cell biology and technologies in yeasts and related lower eukaryotes. Topics include diversity of yeasts; cell structure; metabolism; cell cycle; genetic approaches and genomics; gene expression; yeasts as models to study higher eukaryotes; and contemporary techniques. GE credit: SciEng | SE.-III. (III.) Lin

## 190C. Undergraduate Research Conference

 (1)Discussion-1 hour. Prerequisite: upper division standing and consent of instructor, course 199 concurrently. Presentation and critical discussion of staff research activities: designed for advanced undergraduate students. May be repeated for credit. (P/ NP grading only.) - I, II, III. (I, II, III.)

## 191. Introduction to Research for Advanced

 Undergraduates (1)Seminar-1 hour. Prerequisite: Biological Sciences
1 A or 2 A or consent of instructor. Discussion of faculty research focusing on the biochemistry, genetics, and cell biology of microorganisms, along with ways undergraduates can participate in research projects of faculty members. May be repeated three times for credit. (P/NP grading only.) GE
credit: SE. - III. (III.) Hunter

## 192. Internship (1-12)

Internship-3-36 hours. Technical and/or professional experience on or off campus. Supervised by a member of the Microbiology Section faculty. (P/NP grading only.)
194H. Microbiology Honors Research (2) Independent study-6 hours. Prerequisite: senior standing; eligibility for college honors; completion of six units of 199 in microbiology; consent of section. Continuation of an individual microbiological research project culminating in writing of a senior thesis under a faculty director. (P/NP grading only.) -I, II, III. (I, II, III.)
197T. Tutoring in Microbiology (1-12)
Prerequisite: upper division standing and consent of instructor. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.) I, II, III. (I, II, III.)
198. Directed Group Study (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)-I, II, III. (I, II, III.)

## Graduate

200B. Advanced Bacteriology (3)
Lecture-3 hours. Prerequisite: course 200A Intended for first year graduate students in microbiology and closely related fields. Advanced topics in phylogeny, physiology, and diversity of bacteria.
Offered irregularly.-Dawson, Parales

## 215. Recombinant DNA (3)

Lecture-3 hours. Prerequisite: Biological Sciences 101, 102, 103 or the equivalent. Application of recombinant DNA technology to modern problems in biology, biochemistry, and genetics, emphasizing molecular cloning strategies, choice of vectors, preparation of insert DNA, and selection proce-dures.-I. (I.) Privalsky

## 262. Advanced General and Molecular

 Virology (3)Lecture -3 hours. Prerequisite: graduate standing. Advanced integrated presentation of animal, bacterial, and plant viruses, including their structure, modes of regulation, expression and replication, and effects on host cells and organisms. Offered in alternate years. -II. Luciw

## 263. Principles of Protein-Nucleic Acid

## Interactions (3)

Lecture-3 hours. Prerequisite: advanced graduate standing and completion of one year of basic graduate course work in biochemistry, biophysics, chemistry, genetics, microbiology, or molecular biology. Physical basis of protein-nucleic acid interaction. Topics include nucleic acid recognition by proteins, thermodynamics of protein-nucleic acid stability, and kinetics of binding process for both non-specific and sequence-specific nucleic acid binding proteins. Emphasis on systems that represent paradigms in protein-nucleic acid interactions. Offered irregularly. Offered irregularly.-Kowalczykowski
274. Seminar in Genetic Recombination (1) Seminar - 1 hour. Prerequisite: graduate standing; consent of instructor. Biochemical and genetic aspects of genetic recombination in prokaryotes and eukaryotes. Mechanisms of recombination and biochemical and genetic characteristics of recombination proteins. Proteins include DNA strand exchange, DNA helicases, and Holliday junction resolving proteins. May be repeated for credit. Offered irregularly. (S/U grading only.) -Kowalczykowski

## 275. Seminar in DNA Repair and

## Recombination (1)

Seminar-1 hour. Prerequisite: consent of instructor; graduate standing in Microbiology or closely related field. Review and discussion of current research and literature in DNA repair and recombination with presentations by individual students and invited speakers. May be repeated for credit. (S/U grading only.) - II, III. (I, III.) Heyer

## 276. Advanced Concepts in DNA <br> Metabolism (3)

Lecture-3 hours. Prerequisite: Molecular and Cellular Biology 221C or Genetics 201C or equivalent course recommended. DNA damage checkpoints, homologous recombination, and meiotic recombination. An advanced treatment of the clinical and current literature to discuss emerging principles and current models in these research areas. Offered in alternate years. - (II.) Hunter
290C. Advanced Research Conference (1) Discussion/conference - 1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
291. Selected Topics in Microbiology (1)

Seminar-1 hour. Prerequisite: graduate standing and consent of instructor. Current progress in microbiology and cellular and molecular biology. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 292. Seminar in Bacterial Physiology and

## Genetics (1)

Seminar-1 hour. Prerequisite: consent of instructor, graduate standing in microbiology or closely related field. Review and discussion of current research and literature in bacterial physiology and genetics, with presentations by individual students. ( $\mathrm{S} / \mathrm{U}$ grading only.) - I, II, III. (I, II, III.)
298. Group Study (1-5)

Prerequisite: consent of instructor. ( $S / U$ grading only.) -I, II, III. (I, II, III.)
299. Research (1-12)
(S/U grading only.)-I, II, III. (I, II, III.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

## Microbiology <br> (A Graduate Group)

Glenn Young Ph.D., Chairperson of the Group
Group Office. 3143 Tupper Hall (Medical: Microbiology and Immunology Dept.)

## Faculty

David Asmuth, M.D., Ph.D., Assistant Professor (UCDHS: Infectious Diseases, Div. of)
Shota Atsumi, Ph.D., Assistant Professor (Chemistry)
Enoch P. Baldwin, Ph.D., Associate Professor (Molecular and Cellular Biology)
Nicole Baumgarth, D.V.M., Ph.D., Professor (Center for Comparative Medicine)
Andreas Baumler, Ph.D., Professor (Medical Microbiology and Immunology)
Charles L. Bevins, Ph.D., Professor (Medical Microbiology and Immunology)
Linda F. Bisson, Ph.D., Professor (Viticulture and Enology)
Barbara A. Byrne, D.V.M., Ph.D., Associate Professor (Pathology, Microbiology, and Immunology)
R. Holland Cheng, Ph.D., Professor (Molecular and Cellular Biology)
Kiho Cho, Ph.D., Associate Professor (Surgery and Pediatric Regenerative Medicine)
Patricia A. Conrad, Ph.D., Professor (Pathology, Microbiology, and Immunology)
Satya Dandekar, Ph.D., Professor (Medical Microbiology and Immunology)
Scott Dawson, Ph.D., Professor (Microbiology)
Katherine DeRiemer, Ph.D., M.P.H., Associate Professor (Medical Microbiology \& Immunology)
Jonathan Eisen, Ph.D., Professor
(Evolution \& Ecology and Medical Microbiology \& Immunology)
Julia Fan, Ph.D., Assistant Professor (Biological \& Agricultural Engineering)
Heather Fritz, D.V.M., Ph.D., Lecturer, Assistant Research Scientist (Pathology, Microbiology \& Immunology)
Angela Gelli, Ph.D., Associate Professor (Pharmacology and Toxicology)
Volkmar Heinrich, Ph.D., Associate Professor (Biomedical Engineering)
Wolf-Dietrich Heyer, Ph.D., Professor (Microbiology)
Neil Hunter, Ph.D., Professor (Microbiology)
Michele M. Igo, Ph.D., Professor (Microbiology)
Stephen C. Kowalczykowski, Ph.D., Professor (Microbiology)

Rance B. LeFebvre, Ph.D., Professor (Pathology, Microbiology, and Immunology)
Johan Leveau, Ph.D., Assistant Professor (Plant Pathology)
Su-Ju Lin, Ph.D., Associate Professor (Microbiology)
Bo Liu, Ph.D., Professor (Plant Biology)
Frank Loge, Ph.D., Professor
(Civil and Environmental Engineering)
Paul Luciw, Ph.D., Professor (Medical Pathology)
Shirley Luckhart, Ph.D., Professor
(Medical Microbiology and Immunology)
Maria Marco, Ph.D. Assistant Professor (Food Science \& Technology)
John C. Meeks, Ph.D., Professor Emeritus (Microbiology)
Christopher J. Miller, Ph.D., Professor (Pathology, Microbiology, and Immunology)
David A. Mills, Ph.D., Professor (Viticulture and Enology)
Lorena Navarro, Ph.D., Assistant Professor (Microbiology)
Douglas C. Nelson, Ph.D., Professor (Microbiology)
Rebecca E. Parales, Ph.D., Professor (Microbiology)
Niels C. Pedersen, Ph.D., Professor (Medicine and Epidemiology)
Martin L. Privalsky, Ph.D., Professor (Microbiology)
Pamela Ronald, Ph.D., Professor (Plant Pathology)
John R. Roth, Ph.D., Professor (Microbiology)
Michael A. Savageau, Ph.D., Professor (Biomedical Engineering)
Barbara L. Shacklett, Ph.D., Associate Professor (Medical Microbiology and Immunology)
Mitchell H. Singer, Ph.D., Professor (Microbiology)
Jay V. Solnick, M.D., Ph.D., Professor (Internal Medicine)
Jeffrey L. Stott, Ph.D., Professor (Pathology, Microbiology, and Immunology)
Dawn Sumner, Ph.D., Professor (Earth and Planetary Sciences)
Michael Syvanen, Ph.D., Professor (Medical Microbiology and Immunology)
Ilias Tagkopoulos, Ph.D., Assistant Professor (Computer Science)
George Thompson, M.D., Assistant Professor (Medical Microbiology \& Immunology)
Jose V. Torres, Ph.D., Professor (Medical Microbiology and Immunology)
Renee Tsolis, Ph.D., Associate Professor (Medical Microbiology and Immunology)
Bart Weimer, Ph.D., Professor
(Population Health \& Reproduction)
Stefan Wuertz, Ph.D., Professor (Civil and Environmental Engineering)
Lifeng Xu, Ph.D., Assistant Professor (Microbiology)
Tilahun D. Yilma, Ph.D., Professor (Pathology, Microbiology, and Immunology)
Glenn M. Young, Ph.D., Associate Professor (Food Science and Technology)
Huaijun Zhou, Ph.D., Associate Professor (Animal Science)

## Affiliated Faculty

Kathryn DeRiemer, Ph.D., MPH, Adjunct Associate Professor (Medical Microbiology \& Immunology)
Patrick S. C. Leung, Ph.D., Adjunct Professor (Internal Medicine)
Woutrina Miller, Ph.D., Assistant Adjunct Professor (VM: Pathology, Microbiology, and Immunology) Ellen E. Sparger, Ph.D., Associate Adjunct Professor (VM: Medicine and Epidemiology)
Graduate Study. The Graduate Group in Microbiology offers study and research leading to the M.S. and Ph.D. degrees. Strong preference is given to doctoral applicants. The group offers study in modern molecular approaches to microbiological problems. Areas of research span fundamental, applied, and pathogenic microbiology, including bacterial and viral pathogenesis, eukaryotic microbiology, microbial genomics and genetics, microbial physiology and development, microbial ecology and environmental microbiology, cancer biology, and bioengineering and bioremediation. For information on the graduate study and undergraduate
preparation for the program contact a graduate adviser or the Chairperson of the Group.
Graduate Advisers. S. Dawson (Microbiology), L.F. Bisson (Viticulture and Enology), R.E. Parales (Microbiology), E.E. Sparger (Vet Med: Medicine), R. Tsolis (Med:Microbiology \& Immunology), B. Weimer (VM:Pop Health \& Repro)

## Courses in Microbiology (MIB) Graduate

200A. Microbial Biology (3)
Lecture-3 hours. Prerequisite: course Microbiology 102 or equivalent; prior coursework in Microbiology. Designed to provide an overview of various aspects of microbiology and microbial processes. Topics will include microbial genetics and genomics, microbial metabolism, signaling, and adaptations.I. (I.)

## 201L. Advanced Microbiology Laboratory

 Rotations (5)Laboratory - 15 hours. Two five-week assignments in microbiology research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated two times for credit. -I, II, III. (I, II, III.)

## 210. Microbial Interactions (2)

Lecture-2 hours. Prerequisite: course 200A or consent of instructor. Analysis at the molecular level of the interactions of microbes with the environment, microbes with other microbes, and microbes in symbiotic and/or pathogenic associations with eukaryotic hosts. Topics discussed will vary. May be repeated two times for credit. - I, II, III. (II, II, III.)
290C. Advanced Research Conference (1)
Discussion/conference-1 hour. Prerequisite: graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. (S/U grading only.) - I, II, III. (I, II, III.)
299. Research (1-12)

Research under the guidance of dissertation committee. (S/U grading only.)

## Middle East/South Asia Studies

(College of Letters and Science)
Baki Tezcan, Ph. D., Program Director
Program Office. 1272 Social Science \& Humanities 530-754-4926;
http://mesa.ucdavis.edu

## Committee in Charge

Ali Anooshahr, Ph.D. (History)
Omnia El Shakry, Ph.D. (History)
Suad Joseph, Ph.D.
(Anthropology, Women and Gender Studies) Noha Radwan, Ph.D. (Comparative Literature) Susan Miller, Ph.D. (History)
Sunaina Maira, Ph.D. (Asian American Studies) Sudipta Sen, Ph.D. (History)
Smriti Srinivas, Ph.D. (Anthropology)

## The Major Program

A study of the Middle East and South Asia as a whole allows students to explore a unique set of issues of both historical and contemporary importance. In order to guide students in comparative analysis, faculty help majors deepen their inquiries through coursework on antique, medieval, and early modern empires and political systems. Given the dynamism of modern cultural contexts, majors are invited to concentrate their studies on a wide range of variables including the evolution of states along with new understandings of citizenship, the rise and development of nationalist movements, political con-
flicts informed by religious majorities, the nuclearization of India and Pakistan, the growth of information societies and computer industries, the production of oil and its social and cultural legacies, labor migrations, urbanization, the emergence of sizeable middle classes, transnational literary movements using sophisticated media technologies, the expansion and intrusion of global security regimes into everyday life, and peace initiatives that shape struggles for justice across the world. Our program's focus on both the Middle East and South Asia is a pioneering achievement in the United States rivaled by only four other colleges or universities.
By the end of their studies, majors will have acquired an in-depth understanding of the common historical experience shared by many peoples in these regions, and of the legacies of culture, social exchange, power and empowerment across diverse settings. Students are also required to complete at least two years of training in a language appropriate to their area of expertise.
The major in Middle East/South Asia Studies at UC Davis offers a unique opportunity to study exchanges, complementarities, and correspondences in such fields as history, political economy, culture, literature and film, religion, family structures, gender relations, media, anthropology, law, international relations, development, diasporas, and urbanism. Students who complete our major will be well suited to embark on careers in non-governmental organizations, journalism and media industries, education and research, governmental service and diplomacy, and business.
Programs, Internships, and Career Alternatives. Many internship opportunities are available for the Middle East/South Asia Studies major and minor, consult with your advisor.
Middle East/South Asia Studies Abroad
Program. University of California Education Abroad Program. More information can be found at http://eap.ucop.edu/ and http:// summer-abroad.ucdavis.edu/.

## A.B. Major Program Requirements: <br> UNITS

Preparatory Subject Matter ................ 8-38
History 6, 8
Two years (or the equivalent) of Arabic,
Hebrew, or Hindi/Urdu (other Middle East/
South Asia Studies regional languages
accepted with petition). Arabic 1, 2, 3, 21 ,
22, 23; Hebrew 1, 2, 3, 21, 22, 23; Hindi/
Urdu 1, 2, 3, 21, 22, 23
30
Depth Subject Matter 40-42
Middle East/South Asia Studies 100........ 4
Middle East/South Asia Studies 180........ 4
Two courses from: Anthropology 142;
Comparative Literature 166; History 113,
190A, 190B, 190C, 193A, 193B; Political
Science 135, 136; Religious Studies 160,
162; Women's Studies 178A, 184 .......... 8
Two courses from: Anthropology 145; History
102Q, 196A, 196B; Religious Studies 170;
Women's Studies 178B.
8
Additional Electives from Core Course list
(below)
Total Units for Major 48-80

## Core Course List:

Anthropology 142, 145; Arabic 1, 2, 3, 21 , 22, 23; Art History 1E, 155; Asian American Studies 150F, 189E; Classics 1; Comparative Literature 53B, 53C, 166; Hebrew 1, 2, 3,
21, 22, 23; Hindi/Urdu 1, 2, 3, 21, 22, 23;
History 102Q, 102R, $113,190 \mathrm{~A}, 190 \mathrm{~B}$,
190C, 193A, 193B, 196A, 196B; Middle
East/South Asia Studies 92, 98, 99, 180,
192, 198, 199; Music 129B, 148; Political Science 135, 136; Religious Studies 21, 23, 60, 65C, 68, 160, 161, 162, 170;
Women's Studies 178A, 178B, 184.
Note: With prior consultation with an
advisor, students can petition in the

Program Committee in advance to accept other elective courses toward the major program, including language courses. Note: While some courses are identified as fulfilling more than one requirement, a given course can only fulfill one such requirement
Restriction: No more than six units of MSA
92, 98, 99, 192, 198, 199 may be offered in satisfaction of the major requirements. However, students must have completed at least 40 units of upper division course work in satisfaction of the major requirements.
Major advisor. Consult the Middle East/South Asia Studies Program in 1272 Social Science \& Humanities 530-754-4926 or the Middle East/South Asia Studies website at http://mesa.ucdavis.edu.

## Minor Program Requirements:

UNITS
Middle East/South Asia Studies........ 20-24
Middle East/South Asia Studies 100........ 4
Choose one course from: Anthropology 142;
Asian American Studies 189E; Comparative
Literature 166; History 113, 190A, 190B,
190C, 193A, 193B; Music 129B; Religious
Studies 160, 161, 162; Women's Studies
178A, 184
Choose one course from: Anthropology 145;
Asian American Studies 150F, 189E; History
102Q, 196A, 196B; Music 129B, 148;
Religious Studies 168, 170; Women's Studies 178B.
Additional Electives from Core Course list for major (above).
Note: With prior consultation with an
adviser, students can petition the Program
Committee in advance to accept other
elective courses toward the minor program.
Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor. Note: With prior consultation with an adviser, students can petition the Program Committee to accept more than four units of Middle East/South Asia Studies 192, 198, and/or 199 towards the minor program.
Note: While some courses are identified as
fulfilling more than one requirement, a
given course can only fulfill one such requirement.
Minor Adviser. Consult the Middle East/South
Asia Studies Program in 1272 Social Science \&
Humanities 530-754-4926 or the Middle East/South
Asia Studies website at http://mesa.ucdavis.edu.

## Courses in Middle East/South Asia <br> Studies (MSA)

## Lower Division

92. Internship in Middle East/South Asia

Studies (3-15)
Internship. Prerequisite: consent of instructor. Work experience on and off campus in all subject areas offered as part of the ME/SA Studies program. Internship supervised by a member of the ME/SA faculty. May be repeated for credit up to 15 units. (P/NP grading only.) -I, II, III, IV. (I, II, III, IV.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor (P/NP grading only.)
99. Special Study for Undergraduates (1-5)

Prerequisite: consent of instructor (P/NP grading

## only.)

## Upper Division

## 100. Middle East and South Asia:

## Comparative Perspectives (4)

Lecture-3 hours; extensive writing. Ethnographic and historical points of intersection and divergence in various aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies.

Anthropological, historical, and theoretical debates surrounding the region. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE

## 111 A. Great Cities of Arab Middle East and

 South Asia (4)Lecture-3 hours; extensive writing. Prerequisite: some knowledge of Islamic/Middle Eastern history is very useful; consent of instructor. In-depth examination of the great cities of North Africa, the Middle East and South Asia as cultural and historical artifacts. Topics include: the concept of the Islamic city, processes of modernity, and representations that reinforce imagination, memory and personal identity. Offered irregularly. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, WC, WE.-I, II. (I, II.) Miller

## 112. History of South Asian Islam (4)

Lecture-3 hours; discussion-1 hour. Comparative study of Muslim communities of South Asia. Commonalities in cultural identity and historical experience. Rise and spread of Islam, comparative history of Islamic Empires, colonial rule, and post-colonial nationalism. Offered irregularly.-II. Sen

## 121A. A Story for a Life: The Arabian

## Nights (4)

Lecture/discussion-3 hours; term paper. In-depth investigation of the best-known work of pre-modern Arabic literature, taught in translation. Not open for credit to students who have taken Arabic 140. (Same course as Arabic 140.) Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE. - (I.) Sharlet

## 122A. Themes in the Arabic Novel (4)

Lecture/discussion-3 hours; independent study; extensive writing. Class size limited to 30 students. Select modern Arabic fiction (novels and short stories) in translation. Thematically connected readings supplemented by non-fictional writings when appropriate. May be repeated two times for credit if the texts/theme of required course readings sufficiently change. Offered in alternate years. GE credit: ArtHum | AH, OL, WC, WE.-I, IV. (I, IV.) Radwan

## 131A. Modern Iranian Cinema (4)

Lecture/discussion-3 hours; film viewing-3 hours. Prerequisite: upper-division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required. Offered in alternate years. (Same course as Cinema \& Technocultural Studies 146A.) GE credit: ArtHum, Div, Wrt | AH, OL, VL, WC, WE. - (III.)

## 150. Women and Islamic Discourses (4)

Lecture/discussion-4 hours. Prerequisite: Women's Studies 50 or comparable course. Introduction to the debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East \& South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion, comportment, human rights, feminist and religious movements. Offered irregularly. (Same course as Women's Studies 185.) GE credit: ArtHum or SocSci | AH or SS, WC.-Joseph
151 A. Iranian Society \& Culture (4)
Lecture-2 hours; discussion - 1 hour; term paper. Prerequisite: some knowledge of Islamic/Middle Eastern history is very useful; consent of instructor. Indepth investigation of modern Iranian society and culture. Exploration of structures of Iranian society: family, gender, religion, minorities, economy, politics, and state. Iran's role in the globalizing world, and the role of Iranian diasporas. Offered in alternate years. GE credit: ArtHum | AH, OL, VL, WC, WE. - (II.) Joseph
180. Topics in Middle East and South Asian

## Studies (4)

Lecture-3 hours; extensive writing. Comparative perspective on the Middle East and South Asia. Topics may include modernity, religious traditions, colo-
nialism, subalternity and social movements, gender and sexuality, history and memory, science and development, ritual and performance, public culture, diasporas. May be repeated one time for credit. GE credit: ArtHum or SocSci, Div, Wrt \| AH or SS, WC, WE. - I, II, III. (I, II, III.)
181 A. Topics in Regional ME/SA Studies (4) Lecture-3 hours; term paper. Iranian/Persianate topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated three times for credit. GE credit: ArtHum or SocSci |AH or SS, WC, WE.

## 181 B. Topics in Regional ME/SA Studies (4)

Lecture-3 hours; term paper. Indian/South Asia topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated three times for credit. GE credit: ArtHum or SocSci | AH or SS, WC, WE.

## 181C. Topics in Regional ME/SA Studies:

 Arab Studies (4)Lecture-3 hours; term paper. Arab Studies topics. May be repeated three times for credit when different topics and themes are studied. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS. - III. (III.)

## 182A. Undergraduate Proseminar in

 Middle East/South Asia (4)Seminar-3 hours; term paper. Prerequisite: course 100 recommended. Class size limited to 15 students. Seminar in Iranian/Persianate topics specializing in region-specific Middle East and South Asia studies. May be repeated three times for credit. -II. (II.)

## 182B. Undergraduate Proseminar in Middle East/South Asia (4)

Seminar-3 hours; term paper. Prerequisite: course 100 recommended. Class size limited to 15 students. Seminar in India/South Asia topics specializing in region-specific Middle East and South Asia studies. May be repeated three times for credit when different topics and themes are studied. - II. (II.)

## 182C. Undergraduate Proseminar in

Middle East/South Asia: Arab Studies (4)
Seminar-3 hours; term paper. Prerequisite: course 100 recommended. Class size limited to 15 students. Seminar in Arab Studies topics. May be repeated three times for credit. GE credit: WE. - III. (III.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: course 100 Supervised internship on and off campus in the area of Middle East and South Asia Studies. May be repeated for up to 12 units of credit. (P/NP grading only.)

## 194H. Special Study for Honors Students

 (1-5)Prerequisite: open only to majors of senior standing who qualify for honors program; consent of instructor. Independent study of a problem in Middle East/ South Asian studies involving the writing of an honors thesis. - I, II, III. (I, II, III.)

## 198. Directed Group Study (1-5)

Prerequisite: course 100. (P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: course 100. (P/NP grading only.)

Military Science

## Reserve Officers' Training Corps (ROTC), Army

Patrick Rose, Lt. Col., Chairperson of the Department
Department Office. 125 Hickey Gymnasium 530-752-5211

## Faculty

Major Aimee Myrick, Assistant Professor Lt. Col. Patrick Rose, Professor

## Program of Study

The Military Science Department offers hands-on training in management and leadership. The program stresses the following Army Values: loyalty, duty, respect, selfless-service, honor, integrity, and personal courage. The program also stresses leadership dimensions as taught in the classes. Also stressed are current events, national and international politics, military affairs, ethics training, and human relations with emphasis on eliminating racial and gender discrimination. Management and leadership are taught using the U.S. Army as a model. Military skills (such as drill and ceremony, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. Students learn by doing. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.
The department offers two program tracks: (1) a purely academic track; (2) a pre-commissioning track for those desiring a commission in the U.S. Army. The academic track entails no obligation to the military and is open to all students. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the pre-commissioning process. Activities for all students include the Ranger Club (a club designed for adventure activities such as rappelling, white-water rafting, orienteering, and patrolling) and intramural sports teams.
Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extracurricular activities designed to enhance their leadership and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students participating in the upper division pre-commissioning program incur a military obligation. See below for details. Extra-curricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

## Department Programs

Students are enrolled in Military Science under one of two programs.

## Four-Year Program

There is no military obligation associated with attendance in lower division courses. Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately because of their military service experience, upon approval by the Department Chairperson.
Juniors receive $\$ 450$ subsistence per month, and Seniors $\$ 500$ per month, after executing a contract agreeing to complete the courses and accept a commission in the U.S. Army upon graduation. During
the course, all Military Science text books, uniforms and equipment are provided without cost. Students are given leadership development experience at the Leader Development and Assessment Course (LDAC) between their third and fourth years of the course. Emphasis is on individual participation, leadership development and the capability to function effectively in positions of significant responsibility.

## Two-Year Program

The two-year program is for students, including graduate students, who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer program, Leaders Training Course (LTC) which is voluntary and carries no military obligation. Applicants are paid and transportation costs covered. Applications are accepted at anytime prior to the student's iunior year; graduate students are also accepted. All other provisions explained above for the upper division course apply to the two-year program.

## Scholarship Program

The U.S. Army offers four, three-, and two-year Active Duty scholarships, two-year Reserve Forces Duty, and two-year Dedicated National Guard scholarships to students planning to attend or attending UC Davis. The U.S. Army ROTC scholarship package pays tuition. Also included in all scholarships is a flat rate of $\$ 1200$ per year for textbooks.
The Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. A deadline of 10 January is set for submission of the four-year scholarship application. As high school seniors, students compete for the scholarship by submitting their complete application at http://www.goarmy.com/rotc/ or contact UC Davis, Department of Military Science at 530-7546707.

The three-year Active Duty and two-year Reserve Forces Duty scholarships are awarded to college students who are already attending UC Davis or transferring from a junior college to UC Davis. Students apply for and are awarded these Army scholarships through the Military Science Department.

## Leadership Laboratory

During the course of the school year, two hours per week are spent conducting practical exercises. Classes emphasize adventure activities including offense, defense and patrolling techniques, weapons familiarization, rappelling, rope bridging, obstacle courses, leadership reaction course, and land navigation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at LDAC, held at Fort Lewis, Washington.

## Academic Credit

College of Agricultural and Environmental
Sciences. The Bachelor of Science degree in agriculture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.
College of Biological Sciences. The Bachelor of Science degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.
College of Engineering. Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unrestricted elective units available in the curriculum being followed.
College of Letters and Science. The Bachelor of Arts degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.
School of Veterinary Medicine. The number of Military Science units acceptable toward the Bachelor of Science degree in Veterinary Medicine is on an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree
may apply for direct commission in the United States Army Veterinary Corps.

## Aerospace Studies (Air Force)

The Air Force Reserve Officer's Training Corps (AFROTC) is an educational program providing training in leadership, management, communications and military proficiency on college and university campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and enter the active duty forces after you complete a bachelor's or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.
The program is normally four years long, but a flexible design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participation. Until you accept a scholarship or enter your junior year of the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.
UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacramento campus.

## Qualifications

Freshmen/Sophomore applicants must:

- Be full-time college students in good academic standing
- Have good moral character
- Be in strong physical condition
- Be at least 14 years old

Additionally, Juniors/Seniors/Scholarship recipients must:

- Be United States citizens or in the process of applying for citizenship
- Be 18 years old (or 17 years old with consent of parent or guardian)
- Pass the Air Force Officer Qualifying Test
- Pass a medical examination
- Be under the age of 31 at time of graduation (may be waived)

## Scholarships

Opportunities for four-year and three-year undergraduate scholarships are better than ever. Scholarships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes $\$ 300-\$ 500$ monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local AFROTC detachments for a scholarship application. Applications are also available from local Air Force recruiters or your high school guidance counselors.
All scholarships are merit-based and consider a variety of factors: cumulative GPA, class standing, SAT/ ACT scores, academic awards/achievements, leadership ability, athletic involvement, extracurricular activities, community service and letters of recommendation. A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet
AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registration. The program is available at more than 1,000 universities and colleges nationwide.
If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and łwo-year full tuition scholarships are available for all academic majors, especially scientific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for nontechnical majors are slightly higher. Applicants are pri-
marily evaluated on their leadership ability and academic performance.

## Challenging Careers

All commissioned officers enter the Air Force as second lieutenants for a 4 -year active duty service commitment. Pilots and navigators serve longer commitments, based on training requirements. Once on active duty, you'll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 fighter, supervising 150 aircraft maintainers on the flightline, or caring for sick personnel in the emergency room, you will be rewarded knowing that you are making a difference.
Air Force ROTC is offered through the Aerospace Studies departments at California State University Sacramento and U.C. Berkeley. Scholarships (including tuition, book allowance, and stipend) are available for qualified students. Students may enroll and attend one course per semester at the U.C. Berkeley or CSU Sacramento campus at no cost. Topics covered in AFROTC courses include Basic Military knowledge (1-credit), Military History (1-credit), Leadership Training (3-credits), and U.S. National Security Affairs and Preparation for Active Duty (3credits). Additional components of the AFROTC program include 2 hours per week of fitness activities, 2 hours per week of Leadership Lab, and a 4 -week Summer Field Training between the Sophomore and Junior years. Upon completion of the program and granting of 4 -year degree, students will commission as Second Lieutenants in the United States Air Force. To be eligible for AFROTC, applicants should be a full time student and meet additional fitness, GPA, testing, and other requirements. Interested students, please contact their department of choice:
For CSU Sacramento: http://www.csus.edu/afrotc 916-278-7315; det088@maxwell.af.mil
For U.C. Berkeley: http://airforcerotc.berkeley.edu (510) 642-3572; airforce@berkeley.edu

## Naval ROTC

Department of Naval Science
152 Hearst Gymnasium, UC Berkeley

## Berkeley, CA 94270-3640

(510) 642-3551; http://navyrotc.berkeley.edu

UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student who satisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S. Marine Corps or an Ensign in the U.S. Navy. Navy option students take the following courses:
Freshman year:
NS 1 Introduction to Naval Science
NS 2 Sea Power and Maritime Affairs
Sophomore year:
NS 3 Leadership and Management
NS 10 Naval Ship Systems I
Junior year:
NS 12A Navigation and Naval Operations I
NS 12B Navigation and Naval Operations II

## Senior year:

NS 401 Naval Ship Systems II
NS 412 Leadership and Ethics
In lieu of NS401, NS10, NS12A and NS12B,
Marine Corps students participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of Warfare (or a designated equivalent).
Scholarship students are required to complete a num-
ber of other courses at Davis, including one year
each of calculus, physics, and English, and one
quarter each of computer science, and military history or national security policy.
Interested students should contact the Department of Naval Science at UC Berkeley at the address above to obtain information and apply.

## Courses in Military Science (MSC)

## Lower Division

11. Roles and Organization of the U.S. Army (1)
Lecture/discussion-2 hour. Constitutional and legal basis of the Army, organization and strategic roles in time of war and peace. Surveys the duties and responsibilities of junior Army Officers studied in the context of current problem.-IV. (IV.)

## 12. Introduction to Tactical Military Leadership (1)

Lecture-1 hours. Prerequisite: lower division standing. Military leadership fundamentals to include setting direction, problem-solving, presenting briefs, and using effective writing skills. Basic military tactics, orienteering and land navigation. Dimensions of leadership values, attributes, skills, and actions. II. (II.)

## 13. Introduction to Basic Military

Operations (1)
Lecture-1 hour. Prerequisite: lower division standing. Basic military tactical theories and their application at the individual and squad level. Military tactical operations and basic military first aid. - III.

## (III.)

## 14A. Introduction to Military Leadership

 Skills (0.5)Laboratory-2 hours. Prerequisite: lower division standing and consent of instructor. Personal and organizational leadership skills introduced in leadership laboratory. Extensive supervised leadership experiences conducted in a military environment. Basic military skills necessary to function in a leadership role. (P/NP grading only.)-I. (I.)

## 14B. Introduction to Military Leadership

 Skills (0.5)Laboratory-2 hours. Prerequisite: lower division standing; consent of instructor. Continuation of development of leadership and military skills introduced in course 14A. Emphasis on the role of the individual, the basic organizational element of the Army, the squad. Supervisory controls reduced as students gain capabilities. (P/NP grading only.)-II. (II.)

## 14C. Introduction to Military Leadership

 Skills (0.5)Laboratory-2 hours. Prerequisite: lower division standing; consent of instructor. Development of skills required for promotion to junior non-commissioned officer level. Chain of command from company through individual levels. Interrelationship of squad and platoon organization. (P/NP grading only.) - III. (III.)

## 21. Military History, Study of Battles (2)

Lecture-2 hours. Prerequisite: course 22B or consent of instructor. Application of the nine Principles of War to key battles in American and World history. Tactics on a strategic and operational level. Evaluation of leadership and decision-making processes of key leaders. - III. (III.)

## 22A. Innovative Team Leadership (2)

Lecture-2 hours. Prerequisite: lower division standing or consent of instructor. Leadership values, attributes and theories. Use of basic military skills such as land navigation and squad operations to enhance understanding of the Army. Types of military briefings. Practice in interpersonal skills. Presentation of a briefing.-I. (I.)

22B. Foundations of Tactical Leadership (2)
Lecture-2 hours. Prerequisite: course 22A or consent of instructor. Leadership of tactical teams in complex operating environment. Self-assessment of leadership style. Basic military skills: terrain analysis, patrolling and operations orders. Dynamics of adaptive leadership in the context of military operations. - II. (II.)

## 24A. Individual Military Leadership Skills

 (0.5)Laboratory-2 hours. Prerequisite: courses 14A, B and $C$, enrolled in course 22A or consent of instructor. Develop and practice personal military leadership skills in extensive supervised leadership labs. Cadets perform basic military skills, improve on troop leading procedures and lead subordinates in tactical situations. Begin with drill and ceremony, land navigation and individual movement techniques. (P/NP grading only.) -I. (I.)
24B. Individual Military Leadership Skills (0.5)

Laboratory-2 hours. Prerequisite: courses 14A, B and $C$, enrolled in course 22B or consent of instructor. Development and practice of personal military leadership skills in extensive supervised leadership labs. Performance of basic military skills, improvement on troop-leading procedures, leadership of subordinates in tactical situations. (P/NP grading only.) - II. (II.)
24C. Individual Military Leadership Skills (0.5)

Laboratory-2 hours. Prerequisite: courses 14A, B and $C$, enrolled in course 21 or consent of instructor. Develop and practice personal military leadership skills in extensive supervised leadership labs. Begin with drill and ceremony, land navigation and individual movement techniques. Cadets perform basic military skills, improve on troop leading procedures and lead subordinates in tactical situations. (P/NP grading only.) - III. (III.)

## Upper Division

## 131. Military Leadership and Management

 (2)Lecture-2 hours. Prerequisite: upper division standing and consent of instructor. Leadership and management in organizational context. Team dynamics, leadership styles, professional ethics, development of a leadership framework. Management skills for planning, decision making, and organizing developed through definition of problems, development of courses of action, implementation of solutions. -I. (I.)

## 132A. Advanced Military Operations (2)

 Lecture-2 hours. Prerequisite: upper division standing, course 131 or consent of instructor. Military small unit tactical theory as the basis for leadership development. Principles of war, contemporary operating environment, Geneva Law of Land Warfare, military offensive and defensive operations. Emphasis on development of critical thinking, problem solving, and communication skills.-II. (II.)
## 132B. Applied Leadership (2)

Lecture-2 hours. Prerequisite: upper division standing, course 132A or consent of instructor. Military small unit tactical theory and application as basis for leadership development. Application of leadership styles and skills to complete problem-solving exercises and the development of an adaptable framework applicable to a variety of shifting environments and situations. - III. (III.)
134A. Adaptive Tactical Leadership (0.5) Laboratory-2 hours. Prerequisite: upper division standing, course 131 or consent of instructor. Small unit tactical operations serve as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises. (P/NP grading only.)-I. (I.)

134B. Adaptive Tactical Leadership (0.5) Laboratory-2 hours. Prerequisite: upper division standing, course 132A or consent of instructor. Small unit tactical operations as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises. (P/NP grading only.) - II. (II.)
134C. Adaptive Tactical Leadership (0.5) Laboratory-2 hours. Prerequisite: upper division standing, course 132B or consent of instructor. Small unit tactical operations are taught, serve as basis for students exploration, development. Serve in variety of leadership roles in which leadership attributes, skills, actions are closely assessed and developed while they are faced with series of problem solving exercises. (P/NP grading only.)-III. (III.)

## 141. Ethical Leadership (2)

Lecture-2 hours. Prerequisite: upper division standing; consent of instructor. Direct influence of leaders on individual motivation and group processes. The complexities of balancing moral, legal, and ethical obligations while applying fundamental business principles in determining the best possible outcome from competing solutions. - I. (I.)

## 142. Military Law (2)

Lecture -2 hours. Prerequisite: division standing and course 141, or consent of instructor. The United States Constitution and the Military Justice System. Basic law of war, with an emphasis on issues that might arise on the battlefield or during a national emergency. - II. (II.) Connelly
143. U.S. Army Management Systems (2) Lecture -2 hours. Prerequisite: division standing and course 142 or consent of instructor. Leadership and management, focusing on four management systems: planning, organizing, leading and controlling. Practical methodologies for assessing management decisions while balancing competing ethical, economic, infrastructure and future growth trade-offs. III. (III.)

## 144A. Military Training Leadership Skills

 (0.5)Laboratory-2 hours. Prerequisite: upper division standing, course 141 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for the student exploration and development. (P/NP grading only.) -I. (I.)
144B. Military Training Leadership Skills (0.5)

Laboratory-2 hours. Prerequisite: upper division standing, course 142 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations serve as the basis for student exploration and development. (P/NP grading only.) - II. (II.)

## 144C. Military Training Leadership Skills

 (0.5)Laboratory-2 hours. Prerequisite: upper division standing, course 143 or consent of instructor. Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for student exploration and development. (P/NP grading only.)-III. (III.)
191. Special Studies in Military Science (2) Independent study-6 hours. Prerequisite: consent of department chair, and courses 131, 132A, 132B, 141, 142, 143. Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, principles of war, air-land battle imperatives, military strategy, the operational art and professional ethics, May be repeated two times for credit when topic differs. (P/NP grading only.)

Daniel A. Starr, Ph.D., Associate Professor
David K. Wilson, Ph.D., Professor

## Secondary Section Members

John J. Harada, Ph.D., Professor
Academic Senate Distinguished Teaching Award
Wolf-Dietrich Heyer, Ph.D., Professor
Stephen C. Kowalczykowski, Ph.D., Distinguished Professor
William J. Lucas, Ph.D., Professor
Brian Mulloney, Ph.D., Professor
Sharman O'Neill, Ph.D., Professor
Martin L. Privalsky, Ph.D., Professor
Steven M. Theg, Ph.D., Professor
Larry N. Vanderhoef, Ph.D., Professor
Martin Wilson, Ph.D., Professor

## Emeriti Faculty

Peter B. Armstrong, Ph.D., Professor Emeritus Sterling Chaykin, Ph.D., Professor Emeritus James S. Clegg, Ph. D., Professor Emeritus Eric E. Conn, Ph.D., Professor Emeritus

Academic Senate Distinguished Teaching Award,
UC Davis Prize for Teaching and Scholarly Achievement
Richard S. Criddle, Ph.D., Professor Emeritus
John H. Crowe, Ph.D., Professor Emeritus
Michael E. Dahmus, Ph.D., Distinguished Professor Emeritus
David W. Deamer, Ph.D., Professor Emeritus

Roy H. Doi, Ph.D., Distinguished Professor Emeritus Academic Senate Distinguished Teaching Award Gordon J. Edlin, Ph.D., Professor Emeritus Carol A. Erickson, Ph.D., Distinguished Professor Emeritus
Richard H. Falk, Ph.D., Professor Emeritus
Leslie D. Gottlieb, Ph.D., Professor Emeritus
Melvin M. Green, Ph.D., Professor Emeritus
Robert D. Grey, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award
Jerry L. Hedrick, Ph.D., Professor Emeritus
Distinguished Graduate Mentoring Award
John A. Kiger, Ph.D., Professor Emeritus
Mark G. McNamee, Ph.D., Professor Emeritus
Diana G, Myles, Ph.D., Professor Emeritus
Carl W. Schmid, Ph.D., Professor Emeritus
Irwin H. Segel, Ph.D., Distinguished Professor Emeritus
Che-Kun J. Shen, Ph.D., Professor Emeritus
Larry R. Sprechman, Ph.D., Senior Lecturer Emeritus

## Lecturers

Benjamin F. Edwards, Ph.D., Lecturer
Kenneth L. Hilt, Ph.D., Lecturer
Judith A. Kjelstrom, Ph.D., Academic Coordinator/ Lecturer
Seanna Martin, Ph.D., Lecturer
Larry Z. Morand, Ph.D., Academic Coordinator/ Lecturer
Mark F. Sanders, Ph.D., Lecturer Emeritus
Molecular and Cellular Biology offers three major programs: Biochemistry and Molecular Biology, Cell Biology, and Genetics and Genomics.

## The Biochemistry and Molecular Biology Major Program

The Biochemistry and Molecular Biology major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find this major a rewarding field of study.
The Program. The biochemistry and molecular biology program begins with the four-course, upper division common curriculum that provides an introduction to the principles of biochemistry, genetics, and cell biology. Majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper division courses in biochemistry and molecular biology examine detailed aspects of these subjects. Students are also required to take courses in other biological sciences and a full year of physical chemistry.
Career Alternatives. The biochemistry and molecular biology program provides a solid scientific background for students seeking a research, teaching, or service career in the life sciences. Positions are open to biochemists in bio-medical, biotechnological, pharmaceutical, agricultural research and chemical industries. Also, university-affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

752-0410; http://www.biosci.ucdavis.edu/BASC.
Graduate Study. See Biochemistry, Molecular,
Cellular and Developmental Biology, on page 177.

## The Cell Biology Major Program

The Cell Biology major program provides students with a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms.
The Program. To understand living organisms, the biologist must understand the cell. Hence, cell biology lies at the core of the biological sciences. Students taking this major gain a solid foundation in biological principles. The major emphasizes how cellular organization and function contribute to the development, maintenance and reproduction of adult organisms. The major illustrates the ways in which principles derived from the physical sciences, genetics, biochemistry, molecular biology and physiology are integrated in the study of living cells and emphasizes the experimental nature of the study of cell biology.
Career Alternatives. The major provides an excellent background for students wishing to enter postgraduate and professional programs in biological, health sciences or veterinary sciences; for students pursuing careers involving teaching or research in the biological sciences; for students interested in careers in the biotechnological or pharmaceutical industries; or for students interested in careers related to the administrative, legal or commercial aspects of biomedical science.

## The Genetics and Genomics Major Program

The Genetics and Genomics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity, gene expression and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.
The Program. The genetics and genomics program begins with the four-course, upper division core curriculum that provides an introduction to the principles of genetics, biochemistry, and cell biology. Students then take additional upper division courses in specialized areas of modern genetics including gene expression, evolution, development, human genetics and genomics, as well as a laboratory courses in the principles of genetics and genomics. Additional upper division courses in biological sciences, as well as internship/research coursework can be chosen to fulfill required elective units.
Career Alternatives. The genetics and genomics degree provides suitable preparation for a wide variety of careers, including teaching, research, work with biotechnology companies, medicine, and all the health sciences. It is also an excellent background for students wishing to continue their education in a graduate program, a teacher-training program, medical school, veterinary school, or other professional schools.

## Courses in Molecular and Cellular Biology (MCB)

## Lower Division

## 10. Introduction to Human Heredity (4)

Lecture-3 hours; discussion-1 hour. Topics in human heredity and human gene structure and function, including the genetic basis of human development, causes of birth defects, mental retardation, genetic diseases, sexual determination, development, and behavior. GE credit: SciEng | QL, SE, SL. - III. (III.) Engebrecht, Rannala

## 99. Special Study (1-5)

Independent study-3-15 hours. Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

## Upper Division <br> 120L. Molecular Biology and Biochemistry Laboratory (6)

Laboratory-10 hours; lecture-2 hours; laboratory/discussion - 1 hour. Prerequisite: Biological Sciences 103 (may be taken concurrently). Restricted enrollment. Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Designed for students who need experience in the use of molecular biology and biochemical techniques as research and analytical tools. GE credit: SciEng | QL, SE, SL, VL, WE.-I, II, III. (I, II, III.)
121. Advanced Molecular Biology (3) Lecture-3 hours. Prerequisite: Biological Sciences 101 and 102 or 105 or Animal Biology 102 (may be taken concurrently, prior completion recommended). Structure, expression, and regulation of eukaryotic genes. Chromosome structure and replication; gene structure, transcription, and RNA processing; protein synthesis and translation control; development, immune system, and oncogenes. Not open for credit to students who have completed Molecular and Cellular Biology 161. GE credit SciEng | QL, SE, SL. -I, II, III. (II, II, III.) Burgess, Gasser, Harmer, Powers
123. Behavior and Analysis of Enzyme and Receptor Systems (3)
Lecture-3 hours. Prerequisite: Biological Sciences 103. Introduction to the principles of enzyme kinetics and receptor-ligand interactions with emphasis on metabolic regulation and data analysis. Topics include simultaneous equilibria, chemical and steady-state kinetics, allosteric enzymes, mulitreactant systems, enzyme assays, membrane transport and computer-assisted simulations and analyses. GE credit: SciEng | QL, SE. -I, III. (I, III.) Fraser, Wilson

## 124. Macromolecular Structure and

 Function (4)Lecture-4 hours. Prerequisite: Biological Sciences 103, Chemistry 118C. An in-depth investigation into protein and nucleic acid structure and thermodynamics and how these properties influence their biological functions. Key examples of important functional classes of these molecules will be examined. Not open for credit to students who have completed course 122 or Chemistry 108. GE credit:
SciEng | SE. -I, II. (I, II.) Baldwin
126. Plant Biochemistry (3)

Lecture-3 hours. Prerequisite: Biological Sciences 103 or 105. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, includ-
ing use of transgenic plants. (Same course as Plant Biology 126.) GE credit: SciEng | SE, SL. - II. (II.) Callis, Tian

## 138. Undergraduate Seminar in Biochemistry (1)

Seminar-1 hour. Prerequisite: Biological Sciences 103. Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated two times for credit when topic differs. (P/NP grading only.) GE credit: OL, SE. -I, II, III. (II, II, III.) Callis, Gasser, Nunnari
140L. Cell Biology Laboratory (5)
Lecture-2 hours; laboratory - 6 hours; discussion 1 hour. Prerequisite: Biological Sciences 104 (may be taken concurrently). Exercises illustrating the principles of cell biology with emphasis on light microscopy. GE credit: SciEng | OL, QL, SE, SL, VL. - II. (II.) Kaplan

## 142. Advanced Cell Biology: Contractile and Motile Systems (4)

Lecture-3 hours; term paper. Prerequisite: Biological Sciences 102, 104 (may be taken concurrently); Mathematics 16B. Advanced cell biology with emphasis on molecular, biophysical and cellular properties of contractile and motile systems. GE credit: SciEng | SE.
143. Cell and Molecular Biophysics (3) Lecture-3 hours. Prerequisite: Biological Sciences 101, 102, 103, 104. Physical chemical principles by which molecules form living, moving, reproducing cells. Physical nature of cytoplasm; molecular structure/bonding in macromolecules, macromolecular assemblies and protein machines. Physical techniques and modeling of cytoskeletal polymer-motor dynamics and function during intracellular transport, mitosis and motility. GE credit: SciEng | QL, SE. - III.

## (III.) Al-Bassam

## 144. Mechanisms of Cell Division (3)

Lecture-3 hours. Prerequisite: Biological Sciences 101, 102, 104. The molecules and mechanisms that allow eukaryotic cells to coordinate cell growth, DNA replication, segregation of chromosomes and cell division. GE credit: SciEng | SE, WE. - II. (II.) McNally

## 145. Assembly and Function of Cell Signaling Machinery (3)

Lecture-3 hours. Prerequisite: Biological Sciences 101, 102, 104. Molecular basis of cell signaling, including positioning of cellular machinery, components of various signaling pathways, and downstream effects of signaling on cell adhesion, cell differentiation, and programmed cell death. GE credit: SciEng | SE.-III. (III.) Erickson

## 148. Undergraduate Seminar in Cell Biology (2)

Seminar-2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE.

## 150. Developmental Biology (4)

Lecture-4 hours. Prerequisite: Biological Sciences 101. Analysis of the mechanistic basis for animal development with a focus on experimental evidence and the relevant fundamental experimental strategies. Fertilization and early development, morphogenesis and patterning, cell differentiation,
regulation of cell proliferation and tissue growth. GE credit: SciEng | SE, SL. - III. (III.) Armstrong, Draper, Edwards, Natzle

## 158. Undergraduate Seminar in Developmental Biology (2)

Seminar-2 hours. Prerequisite: upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate
research may be included. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE. - I, II, III. (I, II, III.)

160L. Principles of Genetics Laboratory (5 Laboratory-6 hours; lecture-2 hours, discussion/ laboratory-1 hour. Prerequisite: Biological Sciences 101. Laboratory work in basic and molecular genetics including gene mapping, isolation and characterization of mutants in eukaryotic model systems, reverse genetics, gel electrophoresis, recombinant DNA techniques, and PCR. Not open for credit to students who have completed Genetics 100L. GE credit: SciEng | QL, SE, VL, WE. -I, II, III. (II, II, III.) Engebrecht, Kiger, Natzle, Rose, Sanders, Sundaresan

## 162. Human Genetics and Genomics (3)

Lecture-3 hours. Prerequisite: course 121 or equivalent. Human molecular genetic variation, molecular basis of metabolic disorders, chromosome aberrations and consequences, analysis of the human genome, and computational techniques of genetic \& genomic analyses. GE credit: SciEng | QL, SE, SL.-I. (I.) Chedin

## 163. Developmental Genetics (3)

Lecture-3 hours. Prerequisite: course 121. Current aspects of developmental genetics. Historical background and current genetic approaches to the study of development of higher animals. GE credit:
SciEng | SE.-II. (II.) Natzle, Rose
164. Advanced Eukaryotic Genetics (3) Lecture-3 hours. Prerequisite: course 121. Five basic operations of genetic analysis: mutation, segregation, recombination, complementation, and regulation. Emphasis on the theory and practice of isolating and analyzing mutations, as well as understanding mechanisms underlying both Mendelian and epigenetic inheritance. GE credit: SciEng \| SE, SL. - III. (III.) Burgess, Engebrecht

## 178. Undergraduate Seminar in Molecular

 Genetics (1)Seminar-1 hour. Prerequisite: upper division standing, completion of Biological Sciences 101, and completion or concurrent enrollment in course 121 Discussion of current topics in molecular genetics to show advanced applications of basic principles and to highlight professional career opportunities. May be repeated one time for credit when topic differs. (P/NP grading only.) GE credit: SciEng | OL, SE.I, II, III. (I, II, III.) Chedin, Engebrecht, Rodriguez

## 182. Principles of Genomics (3)

Lecture-3 hours. Prerequisite: Biological Sciences 101. Fundamentals of genomics, including structural genomics, functional genomics, proteomics, and bioinformatics, focusing on the impact of these disciplines on research in the biological sciences. Social impacts of genomic research. GE credit:
SciEng | SE.-II. (II.) Burtis, Korf
190C. Undergraduate Research Conference (1)

Discussion-1 hour. Prerequisite: upper division standing and consent of instructor; concurrent enrollment in course 193 or 199. Presentation and discussion of current research by faculty and students. May be repeated for credit. (P/NP grading only.) GE credit: SE. -I, II, III. (I, II, III.)

## 191. Introduction to Research (1)

Seminar-1 hour. Prerequisite: Biological Sciences 102 (may be taken concurrently) or consent of instructor. Various topics in molecular and cellular biology including biochemistry, genetics, and cell biology will be discussed, along with ways undergraduates can participate in research projects of faculty members. May be repeated for credit. (P/NP grading only.) GE credit: SE. - I, II, III. (I, II, III.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Technical and/or practical experience on and off campus, supervised by a member of the Section of Molecular and Cellular Biology faculty. (P/NP grading only.) GE credit: SE.
193. Advanced Research (3)

Laboratory-6 hours; discussion - 1 hour. Prerequisite: upper division standing, completion of an upper division Molecular and Cellular Biology laboratory course and consent of instructor. Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments on a weekly basis with faculty sponsor. May include presentation of a seminar to a research group. May be repeated for credit. (P/NP grading only.) GE credit: SE. -I, II, III. (I, II, III.)

## 194H. Research Honors (3)

Independent study-9 hours. Prerequisite: 6 units of course 193 and/or 199 with faculty director; senior standing; GPA of at least 3.250; consent of Section. Honors project. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: OL, SE, WE.

## 197T. Tutoring in Molecular and Cellular

## Biology (1-5)

Tutorial-2-6 hours. Prerequisite: upper division standing, completion of course to be tutored, and consent of instructor. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.) GE credit: SE. -I, II, III. (I, II, III,)
198. Directed Group Study (1-5)

Variable-1-5 hours. Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.
199. Special Study for Advanced Undergraduates (1-5)
Independent study-3-15 hours. Prerequisite: consent of instructor. (P/NP grading only.) GE
credit: SE.

## Graduate

210. Molecular Genetics and Genomics (3) Lecture/discussion-3 hours. Prerequisite: Biological Sciences 101 and Molecular \& Cellular Biology 121, or equivalent. Pass One restricted to graduate students. Emphasizes molecular genetic and genomic approaches to address fundamental biological questions. Introduces and emphasizes the strengths of prokaryotic and eukaryotic model systems and serves as building block for the BMCDB core courses, which use model systems to develop their themes. May be repeated one time for credit. I. (I.) Engebrecht

## 211 . Macromolecular Structure and Interactions (3)

Lecture-3 hours. Prerequisite: Biological Sciences 102, or the equivalent, or consent of instructor. Pass One restricted to graduate students. Conceptual and quantitative basis for macromolecular structurefunction relationships. Investigation of the paradigm form follows function. Review of key elements of protein, nucleic acid, and membrane structure. Exploration of specific macromolecular associations by analyzing chemical structure and physical-chemical behavior. No credit for students that have taken course 221A.-I. (I.) Baldwin, Segal, Wilson

## 212. Cell Biology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 104, or equivalent, or consent of instructor. Pass One restricted to graduate students. Analysis of basic processes governing cell organization, division, and transport. Study of the integration and regulation of cell behavior in response to changes in cellular environment. No credit for students that have taken course 221D.-II. (II.) McNally

## 213. Developmental Biology (3)

Lecture-3 hours. Prerequisite: undergraduate biology course or consent of instructor. Pass One restricted to graduate students. Fundamental principles in embryonic development that guide application of modern cellular and genetic approaches to understand developmental mechanisms. Emphasis on experimental approaches used to critically address scientific questions.-II. (II.) Erickson

## 214. Molecular Biology (3)

Lecture-3 hours. Prerequisite: course 211 , or equivalent, or consent of instructor. Pass One restricted to graduate students. Investigation of the basic cellular processes in prokaryotes and eukaryotes that govern the central dogma of molecular biology (DNA-RNAprotein). No credit for students that have taken course 221C. - III. (III.) Heyer
215. Graduate Reading Course (2)

Discussion - 10 hours. Prerequisite: graduate standing or consent of instructor. Pass One restricted to graduate students. Development of critical reading skills through study of major paradigm advances in specialized fields of biochemistry, molecular, cell, and developmental biology. Emphasis on active learning and student participation. Guided analysis of literature and major advances in field of study. May be repeated two times for credit if topic dif-fers.-III. (III.) Kaplan
220L. Advanced Biochemistry Laboratory Rotations (5)
Laboratory-15 hours. Prerequisite: course 210 and 211 (may be taken concurrently) and 120 L or the equivalent. Two five-week assignments in BMCDB research laboratories. Individual research problems with emphasis on methodological/procedural experience, experimental design, proposal writing and oral communication of results. May be repeated two times for credit. -I, II, III. (I, II, III.) Nunnari, Starr

## 241. Membrane Biology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 102, 103, 104 or consent of instructor. Advanced topics on membrane biochemistry and biophysics. Relationship of the unique properties of biomembranes to their roles in cell biology and physiology. (Same course as Biophysics 241.)-III. (III.) Longo, Voss
248. Seminar in Cell Biology (2)

Seminar-2 hours. Prerequisite: consent of instructor Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems. May be repeated for credit.-l.

## 25 1. Molecular Mechanisms in Early

 Development (3)Lecture-3 hours. Prerequisite: graduate standing or consent of instructor; introductory background in developmental biology and/or cell biology recommended. Analysis of the early events of development including: germ cells and other stem cells, gametogenesis, meiosis, imprinting, fertilization, geneticallyengineered organisms, egg activation and establishment of embryonic polarity with focus on cellular events including gene regulation and cell signaling. Offered in alternate years. - (I.) Draper
255. Molecular Mechanisms in Pattern Formation and Development (3)
Lecture-3 hours. Prerequisite: graduate standing or consent of instructor; introductory background in developmental biology and/or genetics recommended. Genetic and molecular analysis of mechanisms that control animal development after fertilization. Establishment of embryonic axes, cell fate and embryonic pattern; induction, apoptosis, tissue patterning. Critical reading of current literature in C.elegans, Drosophila, and mouse genetic model systems. Offered in alternate years. - III. Natzle, Rose
256. Cell and Molecular Biology of Cancer (2)

Lecture - 1 hour; term paper. Prerequisite: course in cell or developmental biology (e.g., course 150, 141, 163, or Biological Sciences 104). Analysis at the cellular and molecular levels of the regulation of normal and neoplastic tissue growth; tumor dissemination; identification and characterization of oncogenic agents; characterization of oncogenes and tumor-suppressor genes.-l. (I.)

## 257. Cell Proliferation and Cancer Genes

 (3)Lecture- 1.5 hours; seminar- 1.5 hours. Prerequisite: course 221 C and 221 D or the equivalent. Genetic and molecular alterations underlying the conversion of normal cells to cancers, emphasizing regulatory mechanisms and pathways. Critical reading of the current literature and development of experimental approaches.-I. (I.) Carraway

## 258. Seminar in Development (2)

Seminar-2 hours. Prerequisite: consent of instructor. Reports and discussion on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit.-III. (II.) Erickson

## 259. Literature in Developmental Biology

 (1)Seminar-1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in developmental biology. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.) Erickson

## 263. Biotechnology Fundamentals and

## Application (2)

Lecture -2 hours. Prerequisite: Biological Sciences 101, 102 and Microbiology 102 or consent of instructor. Must be a graduate student in good standing. Fundamentals of molecular biology and chemical engineering involved in recombinant DNA technology. Topics: principles of rate processes of biological systems, optimization of bioreactors, and issues related to overexpression and production of recombinant molecules. Participation in studentdirected team projects. - II. (II.) McDonald, Privalsky, Rodriguez, VanderGheynst

## 282. Biotechnology Internship (7-12)

Internship-21-36 hours. Prerequisite: graduate standing and consent of instructor. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program. (S/ U grading only.) -I, II, III. (I, II, III.) Dandekar
290C. Research Conference (1)
Discussion-1 hour. Prerequisite: graduate standing and consent of instructor. Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology. May be repeated for credit. (S/U grading only.) - I, II, III. (I, II, III.)

## 291. Current Progress in Molecular and

## Cellular Biology (1)

Seminar-1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subject of their own research activities. May be repeated for credit. (S/U grading only.)-I, II, III. (II, II, III.)
294. Current Progress in Biotechnology (1) Seminar-1 hour. Prerequisite: graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as Chemical Engineering 294.) (S/U grading only.) -I, II, III. (I, II, III.) Kjelstrom, McDonald, Rodriguez

## 295. Literature in Molecular and Cellular Biology (1)

Seminar-1 hour. Prerequisite: graduate standing and consent of instructor. Critical reading and evaluation of current literature in molecular and cellular biology disciplines. Papers will be presented and discussed in detail. May be repeated for credit. (S/ U grading only.)-I, II, III. (I, II, III.) Baldwin, Fisher, Privalsky, Wilson
298. Group Study (1-5)

Variable-1-5 hours. Prerequisite: consent of instructor. (S/U grading only.)

## 299. Research (1-12)

Independent study-3-36 hours. (S/U grading only.)

## Professional

390. Methods of Teaching (1)

Discussion-1 hour. Prerequisite: graduate standing and consent of instructor. Practical experience in the methods and problems of teaching biochemistry/
genetics/cell biology. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion and laboratory sections, formulating examinations under supervision of instructor. Participating in the teaching program required for Ph.D. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Molecular, Cellular, and Integrative Physiology (A Graduate Group)

## Catherine VandeVoort, Ph.D., Chairperson of the Group

Group Office. Life Sciences Building

## Faculty

Sean H. Adams, Ph.D., Research Physiologist (USDA WHNRC)
Paul Allen, Ph.D., Professor (Molecular Biosciences)
Keith Baar, Ph.D., Associate Professor
(Neurobiology, Physiology, and Behavior)
Linda Barter, Ph.D., Assistant Professor
(VM: Surgical and Radiological Sciences)
Trish J. Berger, Ph.D., Professor (Animal Science)
Bers, Donald M., Ph.D., Professor
(Medical Pharmacology)
Sue Bodine, Ph.D., Professor
(Neurobiology, Physiology, and Behavior)
Laura Borodinsky, Ph.D., Assistant Professor (Physiology \& Membrane Biology)
Julie Bossuyt, Ph.D., Assistant Professor (Medical Pharmacology)
Robert Brosnan, Ph.D., Associate Professor (VM: Surgical \& Radiological Sciences)
Peter M. Cala, Ph.D., Professor (Physiology and Membrane Biology)
Christopher C. Calvert, Ph.D., Professor (Animal Science)
Earl E. Carstens, Ph.D., Professor (Neurobiology, Physiology, and Behavior)
Gretchen Casazza, Ph.D., Assistant Adjunct Professor (Exercise Biology)
Ernest S. Chang, Ph.D., Professor (Bodega Marine Laboratory)
Chao-Yin Chen, Ph.D., Associate Professor (Medical Pharmacology)
Tsung-Yu Chen, Ph.D., Associate Professor (Med: Neurology)
Gary N. Cherr, Ph.D., Professor (Bodega Marine Laboratory)
Nipavan Chiamvimonvat, M.D., Professor (Cardiovascular Medicine)
Alan J. Conley, D.V.M, Ph.D., Professor (Population Health and Reproduction)
Gino Cortopassi, Ph.D., Professor (Molecular Biosciences)
Carroll E. Cross, M.D., Professor (Internal Medicine, Human Physiology)
Fitz-Roy E. Curry, Ph.D., Professor (Physiology and Membrane Biology)
Wenbin Deng, Ph.D., Associate Professor (Cell Biology and Human Anatomy)
Elizabeth Disbrow, Ph.D., Associate Adjunct Professor (Medical Neurology)
Michael J. Ferns, Ph.D., Professor (Anesthesiology and Pain Medicine)
Alla F. Fomina, Ph.D., Assistant Professor (Physiology and Membrane Biology)
Charles A. Fuller, Ph.D., Professor (Neurobiology, Physiology, and Behavior)
J. David Furlow, Ph.D., Professor (Neurobiology, Physiology, and Behavior) Damian Genetos, Ph.D., Assistant Professor (VM Anatomy, Physiology and Cell Biology) Aldrin Gomes, Ph.D., Assistant Professor (Neurobiology, Physiology, and Behavior)

Leigh Griffiths, Ph.D., Assistant Professor (VM: Medicine and Epidemiology)
Fawaz Haj, Ph.D., Associate Professor (Nutrition)
Peter J. Havel, D.V.M., Ph.D., Professor (Molecular Biosciences)
Barbara A. Horwitz, Ph.D., Professor (Neurobiology, Physiology, and Behavior)
Andrew T. Ishida, Ph.D., Professor
(Neurobiology, Physiology, and Behavior)
Lee-Way Jin, Ph.D., Associate Professor (MIND Institute)
James H. Jones, D.V.M., Ph.D., Professor (Surgical and Radiological Sciences)
George A. Kaysen, M.D., Professor (Internal Medicine)
Anne A. Knowlton, M.D., Professor (Cardiovascular Medicine)
Dietmar Kueltz, Ph.D., Professor (Animal Science)
Pamela Lein, Ph.D., Professor (Molecular Biosciences)
Yu-Fung Lin, Ph.D., Associate Professor (Physiology and Membrane Biology)
K.C. Kent Lloyd, D.V.M., Ph.D. Professor (VM: Anatomy, Physiology and Cell Biology)
Veronica Martinez-Cerdeno, Ph.D., Assistant Professor (Pathology)
Stuart A. Meyers, Ph.D., Professor (VM: Anatomy, Physiology and Cell Biology)
Manuel Navedo, Ph.D., Assistant Professor (Medical Pharmacology)
Martha E. O'Donnell, Ph.D., Professor (Physiology and Membrane Biology)
Anita M. Oberbaver, Ph.D., Professor (Animal Science)
John A. Payne, Ph.D. Professor (Physiology and Membrane Biology)
Isaac N. Pessah, Ph.D., Professor (Molecular Biosciences)
Helen E. Raybould, Ph.D., Professor (Anatomy, Physiology and Cell Biology)
Janet F. Roser, Ph.D., Professor (Animal Science)
John C. Rutledge, M.D., Professor (Internal Medicine)
Jon Sack, Ph.D., Assistant Professor (Physiology and Membrane Biology)
Saul Schaefer, M.D., Professor (Internal Medicine)
Edward S. Schelegle, Ph.D., Associate Professor (VM: Anatomy, Physiology and Cell Biology)
David Segal, Ph.D., Associate Professor (Genome Center)
Frank Sharp, Ph.D., Professor (Med. Neurology)
Charles L. Stebbins, Ph.D., Professor (Internal Medicine, Physiology and Membrane Biology)
Danielle Stolzenberg, Ph.D., Assistant Professor (Psychology)
Brian C. Trainor, Ph.D., Associate Professor (Psychology)
Catherine VandeVoort, Ph.D., Adjunct Professor (Obstetrics and Gynecology)
Amparo Villablanca, M.D., Professor (Internal Medicine)
Peter C. Wainwright, Ph.D., Professor (Evolution and Ecology)
W. Jeffrey Weidner, Ph.D. Professor (Neurobiology, Physiology, and Behavior)
Robert H. Weiss, M.D., Professor (Internal Medicine)
Barry W. Wilson, Ph.D., Professor (Animal Science)
Dennis W. Wilson, Ph.D., Professor (VM: Pathology, Microbiology, and Immunology)
John Wingfield, Ph.D., Professor (Neurobiology, Physiology, and Behavior)
Vladimir Yarov-Yarovoy, Ph.D., Assistant Professor (Physiology and Membrane Biology)
Clare E. Yellowley, Ph.D., Professor (VM: Anatomy, Physiology and Cell Biology)
Konstantinos Zarbalis, Ph.D., Assistant Professor (Pathology)
Jie Zheng, Ph.D., Associate Professor (Physiology and Membrane Biology)

## Emeriti Faculty

Irwin Feinberg, M.D., Professor Emeritus
John M. Horowitz, Ph.D., Professor Emeritus
Graduate Study. The Graduate Group in Molecu-
lar, Cellular, and Integrative Physiology offers pro-
grams of study and research leading to the M.S. and Ph.D. degrees and participates in joint Ph.D./M.D. and Ph.D./D.V.M. programs. The programs emphasize broad training in the fundamental principles of cellular, molecular, and integrative physiology.
Graduate Advisers. Gretchen Casazza, Master Adviser; J. David Furlow, Nipavan Chiamvimonvat, Chao-Yin Chen

## Courses in Molecular, Cellular, and Integrative Physiology (MCP)

(Formerly courses in Physiology)

## Graduate

200L. Animal Cell Culture Laboratory (4)
Discussion-2 hours; laboratory - 6 hours. Prerequisite: courses in undergraduate biochemistry, cell biology, or general physiology, or consent of instructor. Techniques of cell culture, with emphases on cell physiology and the actions of drugs and toxicants on cultured somatic cells. Design, performance and interpretation of experiments with animal cells in vitro.-II. (II.) B. Wilson, R. Wu

## 210A. Advanced Physiology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Physiology Ph.D. program, or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as Human Physiology 210A.)-I. (I.) Zheng

## 210B. Advanced Physiology (6)

Lecture -5 hours; discussion -1 hour. Prerequisite: Physiology 210A; Physiology Ph.D. program, or consent of instructor. Advanced course on general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. - II. (II.) Stebbins

## 210C. Advanced Physiology (5)

Lecture-5 hours. Prerequisite: doctoral student in the Molecular, Integrative and Comparative Physiology Graduate Group, or consent of instructor. Gradvate level instruction in the general principles of physiology and the neural and humoral control of the cardiovascular, renal, respiratory, gastrointestinal, sensory, musculoskeletal, and reproductive systems. - III. (III.) Navedo, Xiang
210L. Physiology Laboratory Rotations (5) Laboratory - 15 hours. One mandatory rotation and up-to two voluntary rotations. Students learn techniques and perform experiments related to particular research problems. At the end of the rotations students give a short talk and hand in a research paper. May be repeated two times for credit. (S/U grading only.)-I, II. (I, II.) Sack, Yarov-Yarovoy

## 216. Neurophysiology Literature (3)

Lecture-1 hour; discussion-2 hours. Lectures covering experimental and theoretical methods in studying cell membrane ion channels and the resulting characterization of the physiological functions and structure/function relationships of some of the most important channel types. Discussion of classical and current original papers.-I. (I.)

## 219. Muscle Growth and Development (3)

Lecture-2 hours; seminar-1 hour. Prerequisite: Biological Sciences 103, Biological Sciences 104 or Molecular and Cellular Biology 150, or consent of instructor. Integration of growth and development of skeletal muscle; morphology, biochemistry, neural control mechanisms, circulatory and nutritional factors. Prenatal and neonatal differentiation of fiber types. Experimental and hereditary myopathies. Offered in alternate years. - III. Bodine, Carlsen

## 220. General and Comparative Physiology of Reproduction (3)

Lecture-3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 110, 110 L; Biological Sciences 101,103. Basic phenomena of sexual and asexual reproduction and comparisons of processes in a wide variety of animals; gamete formation, structure, and metabolism; fertilization; neuroendocrine mechanisms in maturation and reproductive cycles; behavioral aspects. - III. (III.) Adams, Berger, Conley
222. Mammalian Gametogenesis and Fertilization (3)
Lecture/discussion-3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 121 or the equivalent. Course will emphasize our current
understanding of events in mammalian gametogenesis and the fertilization process. Published results, conclusions drawn from these results, and their contribution to our understanding will be discussed. - III. (III.) Berger
230. Advanced Endocrinology (2)

Lecture-2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 130 or the equivalent, and graduate standing. Focus on timely topic of endrocrine research. Critical review of current literature and discussion of future research strategies in the area. May be repeated for credit when topic differs.

## 231. Neuroendocrinology (3)

Lecture-3 hours. Prerequisite: Neurobiology, Physiology, and Behavior 110 or the equivalent course in systemic physiology; Neurobiology, Physiology, and Behavior 130 or the equivalent course in endocrinology. Neural-endocrine interactions; neural regulation of the endocrine system, especially in relation to reproduction; the role of hormones and growth factors in sexual differentiation of the brain.
234. Current Topics in Neurotoxicology (3) Lecture-3 hours. Prerequisite: core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as Environmental Toxicology 234 and Molecular Biosciences 234.) Offered in alternate years. - II. P. Lein

## 242. Biological Rhythms (3)

Lecture-2 hours; lecture/discussion-1 hour. Prerequisite: Neurobiology, Physiology, and Behavior 110 or the equivalent. General aspects and basic mechanisms of biological rhythms; the importance of rhythm desynchronization in areas of pharmacology and space medicine; telemetry; mathematical methods; chronometry; daily, reproductive, and annual periods; shift-work, jet lag and sleep disorders.
Offered in alternate years. - (I.) Fuller
255. Physiology of the Stress Response (2) Lecture/discussion-2 hours. Prerequisite: graduate student status. Definition of Stress; Physiological mechanisms of adaptation to stress; Hormonal control of the systemic stress response; Mechanisms of the cellular stress response; Discussion of current trends in stress physiology and current methods for studying the stress response. (Same course as Animal Biology 255.) - III. (III.) Kueltz

## 261 A. Topics in Vision: Eyes and Retinal Mechanisms (2)

Lecture/discussion-2 hours. Prerequisite: graduate standing, Neurobiology, Physiology, and Behavior 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neuroscience 261A and Neurobiology, Physiology, and Behavior 261A.) (S/U grading only.) - II. (II.) Ishida
$261 B$. Topics in Vision: Systems,
Psychophysics, Computational Models (2)
Lecture/discussion-2 hours. Prerequisite: consent of instructor; course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system.
(Same course as Neuroscience 261B and Neurobiology, Physiology, and Behavior 261B.) (S/U grading only.) Offered in alternate years. - II. Britten

## 261C. Topics in Vision: Clinical Vision

 Science (2)Lecture/discussion-2 hours. Prerequisite: courses 261A and 261B, or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neuroscience 261C and Neurobiology, Physiology, and Behavior 261C.) (S/U grading only.) Offered irregularly. - III. Werner

## 275. Neurohumoral Regulatory

## Mechanisms of Thermogenesis (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: Biological Sciences 104 or the equivalent; Biological Sciences 102 or the equivalent; consent of instructor. Designed for graduate and advanced undergraduate students, this course will examine thermogenic systems in homeotherms (primarily mammals) with respect to regulation (hormonal and central nervous control) and effector mechanisms (basis of heat generation at the target cell).
290. Seminar (1)

Seminar-1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (S/U grading only.) -I, II, III. (I, II, III.)

## 290C. Research Conference in Physiology

 (1)Discussion-1 hour. Prerequisite: graduate standing and consent of instructor. Presentation and discussion of faculty and graduate student research in physiology. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 291B. Seminar in Cellular Mechanisms of Adaptation (1)

Discussion-0.5 hour; seminar-0.5 hour. Prerequisite: Neurobiology, Physiology, and Behavior 100B; Biological Sciences 103; consent of instructor.
Review and evaluation of current literature and research in cellular adaptations to the environment. May be repeated for credit when topic differs. (S/U grading only.)

## 291D. Research Approaches in Physiology

 (2)Seminar-2 hours. Prerequisite: graduate standing in Graduate Group in Physiology or consent of instructor. Current research in physiology. Overall design of experiments and particular research areas. (S/U grading only.)-I. (I.) Calvert
293. Current Progress in Physiology (1) Seminar-1 hour. Prerequisite: graduate standing and consent of instructor. Seminars presented by guest lecturers describing their current research activities. May be repeated for credit. (S/U grading only.)
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)

## Professional

300A-300B. Pedagogical Aspects of Physiology in Higher Education (3-3)
Lecture, discussion, or laboratory, or combination. Prerequisite: meet qualifications for teaching assistant in physiology. Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Course meets teaching requirements for Ph.D. program in Physiology. (S/U grading only.) I, II, III. (I, II, III.)
390. The Teaching of Physiology (1)

Discussion-1 hour. Prerequisite: Teaching Assistant assignment to a physiology lecture course and consent of instructor. Practical experience in methods and problems of teaching physiology lecture courses. May include analyses of texts and support
ing material, discussion of teaching techniques, preparing for and conducting discussion sessions, and formulation of topics and questions for examinations under supervision of instructor. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

Phebe Craig, M.M., Lecturer
Sam Nichols, Ph.D., Lecturer
Academic Federation Award for Excellence in Teaching
Robert Sabino, Lecturer
Amelia Triest, B.A., Lecturer

## Faculty Affiliates in Applied Music

Lois Brandwynne, M.A., Lecturer (piano)
Tod Brody, B.A., Lecturer (flute)
Scott Choate, Lecturer (tuba)
Bruce Chrisp, M.M., Lecturer (trombone)
Susan Lamb Cook, M.A., Lecturer (cello)
Phebe Craig, M.M., Lecturer (harpsichord)
Thomas Derthick, B.M., Lecturer (double bass) Daniel Flanagan, M.M., Lecturer (violin) Jolán Friedhoff, M.M., Lecturer (violin)
Christopher Froh, M.M., Lecturer (percussion)
Michael Goldberg, M.A., Lecturer (guitar)
David Granger, M.M., Lecturer (bassoon)
Sam Griffin, D.M.A., Lecturer (Jazz)
Ann Lavin, D.M.A., Lecturer (clarinet)
Scott Macomber, M.M., Lecturer (trumpet)
Zoila Muñoz, M.M. Lecturer (voice)
Jonathan Nadel, M.M., Lecturer (voice)
Peter Nowlen, B.M., Lecturer (French horn)
Michael Seth Orland, A.B., Lecturer (piano)
Laura Reynolds, M.M., Lecturer (oboe)
Ellen Ruth Rose, M.M., Lecturer (viola)
Rita Sahai, M.A., Lecturer (Hindustani vocal music)
Michael Sand, M.M., Lecturer (violin)
Marilyn Swan, B.M., Lecturer (piano)

## The Major Program

The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills neces-
sary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks in the major: (1) composition, (2) music history, theory, and ethnomusicology, or (3) performance. After a common core of courses in the lower division, students pursue their chosen track with specialized courses leading to an appropriate senior project.

All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year (Music 195). Music majors who intend to pursue graduate studies in music are encouraged to satisfy the requirements of one of the honors programs in music
Study Abroad and the Music major. The department encourages students to pursue a portion of their studies abroad. In close collaboration with their undergraduate advisers, students plan a course of study abroad that complements their coursework at Davis. UC Davis Music majors have completed upper division coursework at EAP partner institutions in Australia, England, France, Germany, and Italy; Music faculty members lead a summer program in Argentina.
The Program. A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, history, or performance during the last two years of undergraduate work.
Career Alternatives. Students who graduate with a B.A. in music from UC Davis have gone on to careers as composers and performers, in academia, and in the concert, media, and computing industries. Others have continued in medicine, law and business.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter............... 27-45
Music 6A, 6B, 6C.
Plus Music 2A, 2B, 2C ............................... ${ }^{(0-6)^{*}}$
And Music 16A, 16B, 16C ............ (0-6)*
Music 7A, 7B, 7C.................................. 9
Plus Music 17A, 17B, 17 C ................. $(0-6)^{*}$
Music 24A, 24B, 24C
.... 9

* May be excused by diagnostic
examination at the beginning of each quarter.
Depth Subject Matter ......................... 36-40
Choose upper division courses from one of the following tracks:
Track 1: Music Composition ................... 39
Music 124A, 124B .............................. 6
Music 121 or 122 .............................. 4
Music 131 (one year).......................... 6
Music 195 ........................................... 2
At least 6 units selected from:
Music 140-150 .6
Music 101A, 101B ...................................... 8
Music 103 .......................................... 3
At least 4 further units selected from: Music
102, 107A, 107B, 108A, 108B, 113,
$114,121,122,192,198,199 \ldots \ldots \ldots .4$
Track 2: Music History, Theory, and
Ethnomusicology .................................. 40
Music 124A, 124B .6
Music 121 and/or $122 \ldots \ldots \ldots \ldots \ldots . . . . . . . . . . . . . . . . . . . . . . ~ 8 ~ 8 ~$
Need eight units of seminar courses chosen from above in any combination. Note: Music 121 and 122 may be repeated for credit.
Music 131, one year............................ 6
Music 195 .......................................... 2
At least 6 units selected from:
Music 140-150.
At least 12 further units selected 6

Music 101A, 101B, 102, 108A, 108B,
$113,114,121,122,192,198$,
199 ................................................ 12

Track 3: Music Performance .................... 37
Music 124A, 124B. .. .6
Music 121 or 122 ........................................ 4
Music 131 (one year)............................ 6
Music 195 ........................................... 2
At least 13 units selected from:
Music 131, 140-150 .13
At least 6 further units selected from: Music
101A, 101B, 102, 108A, 108B, 113,
$114,121,122,192,198,199$.......... 6
Total Units for the Major ....................64-8
Note: A maximum of 19 units in performance courses (Music 131, 140-150) apply toward the degree; see Unit Credit Guidelines, College of Letters and Science degree requirements section. Fac ulty of the College of Letters and Science bylaws makes it possible for students to take more than 19 units of performance classes without those additional units counting toward the 225 -unit cap on units:
Composition Honors ........................ 43-47
Music 101A, 101B.............................. 6
Music 124A, 124B............................... 8
Music 103 .......................................... 3
Music 121 or 122 ................................ 4
Music 131 (one year)............................ 6
At least six units selected from: Music
140-150..
Two quarters of Music 194H for a total of
at least six units resulting in a Senior
thesis.
.. 6
At least four-eight further units from: Music
102, 103, 107A, 107B, 107C, 108A,
108B, 113, 114, 121, 122, 192, 198, 199
Music History, Theory and Ethnomusicology
Honors
4-8

Honors is 24
Music 124A, 124 B
44
Music 121 or 122 (twice) ......................... 8
Music 131 (one year)............................ 6
At least 6 units selected from: Music
140-150.. $\qquad$
Two quarters of Music 194H for a total of
at least 6 units resulting in a Senior
thesis..
At least 12 further units select...........................................
Music 101A, 101B, 102, 108A, 108B,
$113,114,121,122,192,198$,
199
A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a portfolio that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of Music 121 or 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.
Major Advisers. C. Reynolds (A-F), A. Triest (GM), L. San Martin (N-Z)

## Minor Program Requirements:

Music
.22
A minimum of 16 units of upper division
Music courses........................................ 16
Courses chosen from: Music 105, 106, 107A, 107B, 110A-G, 115, 126, 129A-D
A minimum of six units in upper division music
performance courses ............................... 6
Courses chosen from: Music 140, 141,
142, 143, 144, 145, 146, 147, 148,'
149, 150

Foreign Language. Students contemplating gradvate study in music are advised to consider pursuing foreign language study beyond the elementary level.
Diagnostic Exams are given before admission into Music 6A-6B-6C. As an alternative Music 3A-3B may be recommended. Diagnostic exams are also given for Music 16A-16B-16C and 17A-17B-17C at the beginning of each year. Transfer students should take the Music 6 diagnostic exam given during the first class meetings.
Beginning and transfer students are required to take Music 2A-2B-2C (Keyboard Competence) unless they can pass out of one or more of the classes by demonstrating proficiency through a diagnostic exam given at the beginning of each quarter. Students learn (1) four-part keyboard harmony in all major and minor keys; (2) moderate fluency with figured bass at the keyboard; (3) major and minor scales with proper fingering; ability to sight read simple piano music and Bach chorales.
Student Performing Activities. The Department of Music presents over 100 concerts each year, offering performance opportunities for both majors and non-majors in the UC Davis Symphony Orchestra, University Chorus, Concert Band and Wind Ensemble, Early Music Ensemble, Baroque Chamber Orchestra, Jazz Band, world music ensembles (Gamelan, Samba School, Hindustani Vocal Ensemble, Korean Drumming Ensemble) and numerous chamber ensembles. There is a close relationship with the Robert and Margrit Mondavi Center for the Performing Arts, where several of the ensembles are resident.
Chamber ensembles perform frequently in the popular weekly Thursday Noon Concerts. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified nonmajors.
Faculty and Facilities. The faculty is noted for its achievements in a variety of areas. The music scholars are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally. The journal, 19th-Century Music, is housed in the department.
The regular faculty is joined throughout the year by visiting Artists-in-Residence, distinguished performers who give public concerts and lectures and who work with students informally.
The Empyrean Ensemble, a professional new music ensemble, is in residence at UC Davis, where it annually premieres the work of student composers. The American Bach Soloists, an ensemble of professional singers and instrumentalists specializing in music of the late 18th and early 19th centuries, is affiliated with the Department of Music.
The department's facilities include a large collection of Renaissance, Baroque, and modern instruments, along with non-western instruments including a Sundanese gamelan. The arts quadrangle houses the Computer and Electronic Music Studio, practice and rehearsal rooms, and an excellent music library with well over 12,000 CDs, several hundred videos and a collection of music reference materials. Scores and music monographs are housed in the Peter J. Shields Library, adjacent to the Music Building. A partnership of campus libraries affords online access to more than 100,000 tracks of classical and world music by streaming audio.
Graduate Study. The Department of Music offers programs of study and research leading to the M.A. degree in composition/theory, musicology, ethnomusicology, and conducting, and the Ph.D. degree in composition/theory, musicology, and ethnomusicology. Detailed information regarding graduate study may be obtained from the Graduate Adviser.
Graduate Advisers. R. Bauer, C. Hess

## Courses in Music (MUS) <br> Lower Division

2A. Keyboard Competence, Part 1 (2)
Performance-2 hours. Prerequisite: course 6A and 16A concurrently; consent of instructor. Training to meet the minimum piano requirements for the major in music. Scales and simple harmonic progressions in twelve keys, both major and minor. (P/NP grading only.) GE credit: AH.-I. (I.) Triest

## 2B. Keyboard Competence, Part 2 (2)

Performance-2 hours. Prerequisite: courses 6 B and 16B concurrently; successful completion of course 2A or demonstration of required keyboard proficiency level on diagnostic exam; consent of instructor. Training to meet the minimum piano requirements for the major in music. Harmonic progressions, modulations and score reading at the piano. (P/NP grading only.) GE credit: AH. - II. (II.) Triest
2C. Keyboard Competence, Part 3 (2)
Performance-2 hours. Prerequisite: course 6C and 16C concurrently; successful completion of course 2 B or demonstration of required keyboard proficiency level on diagnostic exam; consent of instructor. Training to meet the minimum piano requirements for the major in music. Harmonic progressions, figured bass realization, sight reading and keyboard repertory. (P/NP grading only.) GE credit: AH. - III. (III.) Triest
3A. Introduction to Music Theory, Part I (4) Lecture-1 hour; recitation-3 hours. Fundamentals of music theory, ear-training, harmony, counterpoint, and analysis directed toward the development of listening and writing techniques. Intended for the general student. GE credit: ArtHum \| AH. - I, II. (I, II.) Triest
3B. Introduction to Music Theory, Part II (4) Lecture-1 hour; recitation-3 hours. Prerequisite: completion of course 3 A or permission of the instructor. Continuation of course 3A. Development of melodic and harmonic writing skills. Basic analysis training. Intended for the general student. GE credit: ArtHum | AH.-III, III. (II, III.) Triest

## 6A. Elementary Theory, Part 1 (3)

Lecture-3 hours. Prerequisite: Admission by examination given during first class meeting; concurrent enrollment in course 16A and 2A or demonstration of required proficiency level on diagnostic exam. Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertory. Intended primarily for music majors. GE credit: ArtHum | AH.-I. (I.) Nichols

## 6B. Elementary Theory, Part 2 (3)

Lecture-3 hours. Prerequisite: course 6A; concurrent enrollment in course 16 B and 2 B or demonstration of required proficiency level on diagnostic exam. Continuation of course 6A. GE credit: ArtHum | AH.-II. (II.) Nichols

## 6C. Elementary Theory, Part 3 (3)

Lecture-3 hours. Prerequisite: course 6B; concurrent enrollment in course 16C and 2C or demonstration of required proficiency level on diagnostic exam. Continuation of courses 6A-B. GE credit: ArtHum | AH. - III. (III.) Nichols

## 7A. Intermediate Theory, Part 1 (3)

Lecture-3 hours. Prerequisite: course 6C; course
17B concurrently. Homophonic music of the Classical era with a focus on analysis of music by Haydn, Mozart, and Beethoven. Composition of pieces in the homophonic forms such as minuet and trio, theme and variations, rondo and sonata. Intended for music majors. GE credit: ArtHum | AH.-I. (I.) San Martin

## 7B. Intermediate Theory, Part 2 (3)

Lecture-3 hours. Prerequisite: course 7A; course
17B concurrently. Nineteenth-century harmony and voice leading through the music of the Romantic era. Focus on analysis of music by Chopin, Schumann,

Brahms, Wagner, and Wolf. Composition of charac ter pieces and songs. Intended for Music majors. GE credit: ArtHum | AH. - II. (II.) San Martin

## 7C. Intermediate Theory, Part 3 (3)

Lecture-3 hours. Prerequisite: course 7B; course
17C concurrently. The music of the first thirty years of the twentieth century and various analytical tools pertaining to it. Works of Debussy, Stravinsky,
Schoenberg, Berg, and others. Composition of small pieces for solo instruments, voice and piano.
Intended for Music majors. GE credit:
ArtHum | AH. - III. (III.) San Martin
10. Introduction to Musical Literature (4)

Lecture-3 hours; listening - 1 hour. Introduction to composers and major styles of Western music. Lectures, listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE.-I, II, III. (I, II, III.) Hess, Levy, Pelo, San Martin

## 11. Musics of the World (4)

Lecture-3 hours; listening section - 1 hour. Survey of selected art, folk, and popular music cultures from different parts of the world. Emphasis on understanding relationship of musical style, aesthetic principles, and performance practice to wider cultural contexts. GE credit: ArtHum, Div | AH, VL, WC.-I, III. (I, III.) Lee, Spiller
16A. Elementary Musicianship, Part 1 (2)
Lecture/laboratory-2 hours. Prerequisite: concurrent enrollment in course 6A is required; students must pass a short diagnostic exam, at the beginning of the quarter, in order to be admitted into the course. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH.-I. (I.) Triest
16B. Elementary Musicianship, Part 2 (2) Lecture/laboratory-2 hours. Prerequisite: concurrent enrollment in course 6B is required; course 16A or demonstration of required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH.-II. (II.) Triest
16C. Elementary Musicianship, Part 3 (2) Lecture/laboratory-2 hours. Prerequisite: concurrent enrollment in course 6C is required; course 16B or demonstration of required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH. - III. (III.) Triest
17A. Intermediate Musicianship, Part 1 (2) Lecture/laboratory-2 hours. Prerequisite: course 7A concurrently; successful completion of course 16C or demonstrate required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH-I. (I.) Craig
17B. Intermediate Musicianship, Part 2 (2) Lecture/laboratory-2 hours. Prerequisite: course 7B concurrently; successful completion of course 17A or demonstrate required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH-II. (II.) Craig
17C. Intermediate Musicianship, Part 3 (2) Lecture/laboratory-2 hours. Prerequisite: course 7 C concurrently; successful completion of course 17B or demonstrate required proficiency level on diagnostic exam. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: ArtHum | AH—III. (III.) Craig

24A. Introduction to the History of Music I (3)

Lecture - 3 hours. Prerequisite: course 6A (may be taken concurrently). History of music from the late Baroque to Beethoven. Intended primarily for majors in music. GE credit: ArtHum, Wrt \| AH, VL, WE.-I.

## 24B. Introduction to the History of Music II

 (3)Lecture-3 hours. Prerequisite: course 24A, course 6 B (may be taken concurrently). The history of music from the Romantic Period to the nineteenth century. Intended primarily for majors in music. GE credit: ArtHum, Wrt | AH, VL, WE.-II.
24C. Introduction to the History of Music III (3)

Lecture -3 hours. Prerequisite: course 24B, course 6C (may be taken concurrently). The history of music of the 20th century. Intended primarily for majors in music. GE credit: ArtHum, Wrt|AH, VL, WE. - III.

## 28. Introduction to African American Music

 (4)Lecture/discussion-3 hours; discussion-1 hour; listening; project. Survey of African American music, such as spirituals, blues, ragtime, jazz, theater, gospel, R\&B, rap, and art music. Emphasis on historical and sociocultural contexts, as well as African roots. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, VL, WE. - III. (III.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH.
99. Special Study for Undergraduates (1-5) (P/NP grading only.) GE credit: AH.

## Upper Division

101 A. Advanced Theory, Part 1 (4)
Lecture-3 hours; lecture/laboratory - 1 hour. Prerequisite: course 7C. Twentieth-century music from 1930 through 1950 and the various analytical tools pertaining to it. Works of Copland, Sessions, Schoenberg, Bartók, and Stravinsky. Composition of small pieces for piano and voice. GE credit:
ArtHum | AH.-I. (I.) San Martin

## 101B. Advanced Theory, Part 2 (4)

Lecture-3 hours; lecture/laboratory-1 hour. Prerequisite: course 101A. Music from 1950 to the present and the analytical tools pertaining to it. Works of Babbit, Carter, Dallapiccola, Ligeti, Messiaen, Reich and others. Composition of small pieces for ensemble. GE credit: ArtHum | AH.-III. (II.) San Martin

## 102. Tonal Counterpoint (4)

Lecture-3 hours; practice -1 hour. Prerequisite: course 7C. Imitative tonal counterpoint with an analytical focus on the Two-Part Inventions and fugues from the The Well-Tempered Klavier by J. S. Bach. Composition of exercises and short pieces using contrapuntal techniques. Intended for music majors. GE credit: ArtHum | AH.-I. (III.) Baver

## 103. Workshop in Composition (3)

Workshop-3 hours. Prerequisite: course 7C. Workshop in musical composition for undergraduates who are interested in pursuing serious compositional studies and intending to follow the composition track of the major. Course will explore the techniques and materials of musical composition. May be repeated for credit. GE credit: ArtHum | AH.-I, II, III. (I, II, III.) Ortiz, Rohde, San Martin

## 105. History and Analysis of Jazz (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 10, 3A-3B, or 28. Jazz and the evolution of jazz styles in historical and cultural context. For nonmajors. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE. -I. Baver

## 106. History of Rock Music (4)

Lecture -3 hours; discussion -1 hour. Prerequisite: course 3A-3B, 10. Rock and the evolution of rock styles in historical and cultural context. For nonmajors. GE credit: ArtHum, Wrt | ACGH, AH, VL, WE.-Reynolds

107 A. Computer and Electronic Music (3)
Lecture-3 hours; laboratory-1 hour. Prerequisite: consent of instructor. Studies in electronic and computer music composition. The principles and procedures of composition in various electronic media are explored through compositional exercises. Limited enrollment. GE credit: ArtHum | AH.-I. (I.) Nichols
107 B. Computer and Electronic Music (3)
Lecture-3 hours; laboratory-1 hour. Prerequisite: course 107A and consent of instructor. Continuation of course 107A. Limited enrollment. GE credit: ArtHum | AH.-(II.) Nichols
108A-108B. Orchestration (2-2)
Lecture-2 hours. Prerequisite: 108A-course 7C; 108B-course 108A. Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations. GE credit: ArtHum | AH, VL. - II-III. (IIIIII.) Ortiz

## 110A. The Music of a Major Composer:

## Beethoven (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 10 or $3 A-3 B$. The work of Beethoven will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE.-I. Reynolds
110B. The Music of a Major Composer: Stravinsky (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 10 or 3A-3B. The work of Stravinsky will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE.-(II.) Baver

## 110C. The Music of a Major Composer:

 Bach (4)Lecture-3 hours; discussion-1 hour. Prerequisite: course 10 or $3 \mathrm{~A}-3 \mathrm{~B}$. The work of Bach will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit:
ArtHum, Wrt | AH, VL, WC, WE.-II. San Martin
110 D . The Music of a Major Composer: Mozart (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 10 or 3A-3B. The work of Mozart will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt | AH, VL, WC, WE. - (I.) Busse Berger

## 110 E . The Music of a Major Composer:

 Haydn (4)Lecture-3 hours; discussion-1 hour. Prerequisite: course 10 or $3 A-3 B$. The work of Haydn in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ArtHum, Wrt \| AH, VL, WC, WE.

## $110 F$. American Masters (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 10 or $3 A-3 B$. An overview of American concert music by master composers from Charles lves to the present. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | ACGH, AH, DD, VL, WE. - (III.)
110G. Music of a Major Composer-Handel (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 10 or $3 \mathrm{~A}-3 \mathrm{~B}$. Work of Handel in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. Offered in alternate years. GE credit: ArtHum, Wrt | AH, VL, WC, WE. - III. Thomas

## 113. Introduction to Conducting (2)

Lecture-1 hour; performance-1 hour. Prerequisite: consent of instructor; course 7C. Principles and tech niques of conducting as they apply to both choral and instrumental ensembles. Offered irregularly. GE credit: ArtHum | AH.-I, II. Baldini, Thomas
114. Intermediate Conducting (2)

Lecture-1 hour; performance-1 hour. Prerequisite: course 113. Intermediate conducting with a continued focus on principles and techniques as they apply to both choral and instrumental ensembles. GE credit: ArtHum | AH.-II. Baldini, Thomas

## 115. History of Film Music (4)

Lecture-3 hours; film viewing - 3 hours. Prerequisite: courses $3 A$ and $3 B$, or course 10 . Film music from silent films to movies of the past decade. How music supports and shapes film narrative and structure. Use of jazz, rock and classical music in film. Offered in alternate years. Offered irregularly. GE credit: ArtHum, Wrt | AH, VL, WE. - II. Ortiz

## 116. Introduction to the Music of The

## Beatles (4)

Lecture-3 hours; listening - 1 hour. Prerequisite: course 3A; course 10; course 11; or consent of instructor. Survey of music of The Beatles, focusing on the songs of Lennon and McCartney. Emphasis on understanding their evolution as musicians, composers and cultural figures. Discussion of their musical influences in wider cultural contexts. GE credit: AH, VL, WC. - III. (III.) Reynolds

## 121. Topics in Music Scholarship (4)

Seminar-4 hours. Prerequisite: courses 7C and 24C, or consent of instructor. Sources and problems of a historical period or musical style selected by the instructor and announced in advance. May be repeated for credit. GE credit: ArtHum | AH, OL.I, II, III. (I, II, III.)

## 122. Topics in Analysis and Theory (4)

 Seminar-4 hours. Prerequisite: course 7C and course 24C, or consent of instructor. Analysis of works of a composer or musical style selected by the instructor and announced in advance. Consideration of theoretical issues. May be repeated for credit. GE credit: ArtHum | AH, OL.-I, II, III. (I, II, III.)124A. History of Western Music: Middle Ages to 1600 (3)
Lecture-3 hours. Prerequisite: course 6 C and 24 C . Historical survey of composers and musical styles from the Middle Ages to the beginning of the 17th century. GE credit: ArtHum, Wrt | AH, VL, WE. -I. Berger

## 124B. History of Western Music: 1600-

 1750 (3)Lecture-3 hours. Prerequisite: course 124A. Historical survey of composers and musical styles from the late 1500s to the mid-18th century. GE credit: ArtHum, Wrt | AH, VL, WE. - II. Busse Berger

## 126. American Music (4)

Lecture -3 hours; listening -1 hour. Prerequisite: course 10 or $3 \mathrm{~A}-3 \mathrm{~B}$ or consent of instructor. Introductory survey of American musics, including Native American music, Hispanic polyphony, New England psalmody, and selected 20th-century composers and styles. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, WE. - (II.) Levy

## 127. Music from Latin America (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: consent of instructor. Examination of music from Latin America. Characteristic music (i.e., tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in Spanish. Not open to students who taken Spanish 171 and 171S. (Same course as Spanish 171) Offered in alternate years. May be repeated one time for credit when topic differs. GE credit: ArtHum | AH, WC.-II. Irwin, Ortiz

## 129A. Musics of the Americas (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: course 11 or 3A-3B. Survey of music cultures from North, Central, and South America, including the Caribbean, with emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered in alternate years. GE credit: ArtHum, Div,
Wrt | AH, DD, VL, WC, WE. - Spiller

129B. Musics of Africa, Middle East, Indian Subcontinent (4)
Lecture-3 hours; discussion-1 hour. Prerequisite: course 11 or 3A-3B. Survey of music cultures with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.Lee
129C. Musics of East and Southeast Asia (4) Lecture-3 hours; discussion-1 hour. Prerequisite: course 11 or 3A-3B. Survey of music cultures from Japan, China, Korea, Vietnam, and Indonesia, with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.Lee, Spiller

## 129D. Folk Musics of Europe (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 11 or 3A-3B. Survey of folk musics from all of Europe, with emphasis on the role of music in society and on the elements of music (instruments, genres, form, etc.). Introduction to ethnomusicological theory, methods, approaches. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, VL, WC, WE.

## 130A-R, U. Applied Study of Music:

## Advanced (1)

Performance instruction - 1 hour. Prerequisite: open to Music majors with ability to perform scales and short compositions from standard repertoire; admission by audition and consent of instructor. Class instruction, arranged by section: (A) Voice (prerequisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumper; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (U) Recorder. May be repeated for credit. Offered as demand indicates. - I, II, III. (II, II, III.)

## 131A-R, U. Applied Study of Music: Advanced (Individual) (2)

Performance instruction-0.5 hour; independent practice-5 hours. Prerequisite: open to Music majors only. Admission by audition and consent of instructor. Individual instruction in (A) Voice (prereqvisite of course 1 or the equivalent); (B) Piano; (C) Harpsichord; (D) Organ; (E) Violin; (F) Viola; (G) Cello; (H) Double Bass; (I) Flute; (J) Oboe; (K) Clarinet; (L) Bassoon; (M) French Horn; (N) Trumpet; (O) Trombone; (P) Tuba; (Q) Percussion; (R) Classical Guitar; (U) Saxophone. May be repeated for credit. -I, II, III. (I, II, III.)

## 132. Singing for Actors (1)

Performance-1 hour. Prerequisite: consent of instructor. The elements of basic singing techniques, through selected exercises, vocalises, and songs. May be repeated for credit. (P/NP grading only.) GE credit: AH.

## 140. University Jazz Band (2)

Rehearsal-4 hours. Prerequisite: consent of instructor. Open to students in any major. Rehearsal, study, and performance of jazz band music and full variety of jazz band styles, including swing, be-bop, and contemporary jazz styles. May be repeated for credit. (P/NP grading only.) -I, II, III. (I, II, III.) Griffin

## 141. University Symphony (2)

Rehearsal-4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Sight-reading, rehearsal and performance of music from the orchestral literature. May be repeated for credit. (P/ NP grading only.) GE credit: AH.-I, II, III. (I, II, III.) Baldini

## 142. University Chamber Singers (2)

Rehearsal-3 hours. Prerequisite: admission subject to audition before first class meeting. Rehearsal and performance of works for small choral group. May be repeated for credit. (P/NP grading only.) GE credit: AH. - (I, II, III.) Thomas
143. University Concert Band (2)

Rehearsal-4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Rehearsal and performance of music for band. May be repeated for credit. (P/NP grading only.) GE credit: AH. - I, II, III. (I, II, III.) - Nowlen

## 144. University Chorus (2)

Rehearsal-4 hours. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University. Rehearsal and performance of choral music. May be repeated for credit. (P/NP grading only.) GE credit: AH. -I, II, III. (II, II, III.) Thomas

## 145. Early Music Ensemble (2)

Rehearsal-4 hours. Prerequisite: admission subject to audition before first class meeting. Rehearsal and performance of Medieval, Renaissance, and Baroque music for vocal ensemble and historical instruments. May be repeated for credit. (P/NP grading only.) GE credit: AH. -I, II, III. (I, II, III.)

## 146. Chamber Music Ensemble (1)

Rehearsal-2 hours; student practice - 1 hour. Prerequisite: admission subject to audition before first class meeting. Open to any student in the University whose proficiency meets the requirements of concert performance. Study, rehearsal, and performance of ensemble music for strings, winds, voice, piano, harpsichord, and organ. May be repeated for credit. (P/NP grading only.) GE credit: AH. -I, II, III. (II, II, III.) Baldini
147. University Wind Ensemble (2)

Rehearsal-4 hours. Prerequisite: consent of instructor. Rehearsal, study, and performance of a full variety of wind ensemble music; and to have students share their work in public performances. May be repeated for credit. (P/NP grading only.) GE credit: AH. - (I.) Nowlen

## 148. Hindustani Vocal Ensemble (2)

Rehearsal-2 hours. Basics of Hindustani music through theory and practice. Fundamentals of raga (mode) and tala (rhythms) with special emphasis on improvisation, a central feature of khyal (singing style). Five ragas each quarter. May be repeated up to six times for credit. (P/NP grading only.) GE credit: AH. -I, II, III. (I, II, III.) Sahai

## 149. Indonesian Gamelan Ensemble (2)

 Rehearsal-2 hours. Prerequisite: consent of instructor. Indonesian music practice. Basic instrumental technique and repertory. Focus on two styles of Sundanese gamelan (tuned percussion orchestras): salendro and degung. May be repeated for credit. (P/NP grading only.) GE credit: AH. -I, II, III. (I, II, III.) Spiller
## 150. Brasilian Samba School (2)

Rehearsal-2 hours. Prerequisite: consent of instructor. Practice of Brasilian music. Basic instrumental technique and repertory. Focus on the percussion traditions of Rio de Janeiro and Bahia. May be repeated up to six times for credit. (P/NP grading only.) GE credit: ArtHum | AH. - I, II, III. (I, II, III.) Froh

## 151. Korean Percussion Ensemble (2)

Rehearsal-2 hours; listening-2 hours; practice-2 hours. Prerequisite: consent of instructor. Class size limited to 20 students. Practice of Korean percussion styles. Basic instrumental technique and repertory. Focus on the percussion traditions of samulnori and basic concepts of p'ungmul. (P/NP grading only) May be repeated six times for credit. GE credit: AH. -I, II, III. (I, II, III.) Lee

## 192. Internship in Music (1-4)

Internship-3-12 hours. Prerequisite: consent of instructor and academic advisor or department chairperson. For Music majors. Internship outside the university related to music. Student must submit a written proposal to an appropriate Music Department instructor. May be repeated up to eight units of credit. (P/NP grading only.) GE credit: AH. -I, II, III, IV. (I, II, III, IV.)

194HA-194HB. Special Study for Honors Students (2-4)
Independent study-6-12 hours. Prerequisite: course 7C, 124B. Open only to students who qualify for the honors program and admission to Music Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music. (Deferred grading only, pending completion of sequence.) GE credit: ArtHum | AH.-I, II, III. (I, II, III.)

## 195. Senior Project (2)

Project-6 hours. Prerequisite: Consent of instructor and undergraduate advisor. Preparation of a senior project in music composition (public presentation of a new work), in music performance (a public recital), or in music history and theory (public presentation of research results). Restricted to music majors with senior standing. GE credit:
ArtHum | AH. - I, II, III. (II, II, III.)
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: AH.

## 199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.) GE credit: AH.

## Graduate

202. Notation (4)

Seminar-3 hours; term paper. Study of musical notation; investigation of techniques for editing Medieval and Renaissance music.-I. Busse Berger

## 203. Music Composition (4)

Seminar-3 hours; term paper. Technical projects that explore compositional problems, the skill and techniques with which to solve them, and free composition. May be repeated for credit. - I, II, III. II, II, ill.) Baver, Ortiz, Rohde, San Martin

## 204. Advanced Conducting (3)

Tutorial-2 hours; practice. Prerequisite: courses 113 and 114 or equivalent; keyboard skills appropriate to graduate standing. Open to graduate students in conducting. This course covers the technical aspects of conducting and the broader issues in music history and analysis that conductors must face before leading a rehearsal or performance. May be repeated for credit. -I, II, III. (II, II, III.) Baldini, Thomas
207. Advanced Electronic and Computer Music (4)
Seminar-2 hours. Prerequisite: courses 107A-107B-107C. Advanced composition of computer and electronic music.-I. (I.) Pelo

## 210A. Proseminar in Music (Theory and

 Analysis) (4)Seminar-3 hours; term paper. Voice-leading analysis of tonal music derived from Schenker and pitchclass set theory. Recent work on compositional design, generalizations of the concept of interval, psychologically oriented music theory, and theories of durational structure and timbre.-l. Baver
210B. Proseminar in Music (Musicology and Criticism) (4)
Seminar-3 hours; term paper. Issues and concepts of music history, including performance practice questions for specific repertoires and periods; principles, aims, and methods of archival study; historical theory; evolution of musical styles; philosophical debates about goals and aims of the discipline in general. - III. Levy
210C. Proseminar in Music
(Ethnomusicology) (4)
Seminar-3 hours; term paper. Introduction to ethnomusicology through its intellectual history, theoretical approaches, analytical techniques, and methodolo-gies.-I. (I.) Spiller

## 212. Ethics of Musical Ethnography (4)

Seminar-3 hours; fieldwork. Prerequisite: course 210C. The role, methodology, perception, and assumptions of the ethnomusicologist in ethno-
graphic scholarship. Examination of complex ethical and political questions in relation to practical fieldwork techniques. Offered in alternate years. - Lee

## 213. Transcription and Notation (4)

Seminar-3 hours; project. Prerequisite: course
210C. Practical instruction in the transcription and analysis of primarily non-Western musics. Analytical and theoretical issues, the politics of representation, and the cultural values and ideologies implicit in notation. Offered in alternate years.
214. Recent Issues in Ethnomusicology (4) Seminar-3 hours; term paper. Prerequisite: course 210C. Issues, schools of thought, and basic literature in ethnomusicology from the 1980s to present. Emphasis on theory and methodology. Offered irreg ularly. - Spiller

## 221. Topics in Music History (4)

Seminar-3 hours. Studies in selected areas of music history and theory. May be repeated for credit. -I, II, III. Levy, Musicology faculty

## 222. Techniques of Analysis (4)

Seminar-3 hours. Analysis and analytical techniques as applied to music of all historical style periods. May be repeated for credit. - III. Composition faculty
223. Topics in Ethnomusicology (4)

Seminar-4 hours. Intended for graduate students in Music; Anthropology students may enroll with consent of instructor. In-depth ethnomusicological studies of selected cultures and their musics; study of historical, theoretical, contextual, and cultural features. Offered irregularly. - Ethnomusicology faculty

## 299. Individual Study (1-12)

(S/U grading only.)

## The Major Program

Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider issues of cultural diversity, sovereignty, and indigenous knowledge systems in preparation for living in a world of constantly increasing social and cultural complexity.
The Program. Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native experience in North America (north of Mexico). Plan II encourages interested students to focus upon Meso-America with some course work integrating Meso-America with North America and South America. Plan III focuses upon South America
with some course work integrating that region with areas to the north.
Career Alternatives. Native American Studies is excellent preparation for a scholarly career or professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

## A.B. Major Requirements:

UNITS
Preparatory Subject Matter............... 16-24
Native American Studies 1; 10 or 12....... 8
One or two courses from: Native American
Studies 5, 12, 32, 33, 34 ....................4-8
One or two courses from: African American and African Studies 12, 52, Anthropology 2, 20, 24, Asian American Studies 1, 2, 4, Chicana/o Studies 10, 21, 23, Comparative Literature 25, Community and Regional Development 2, Environmental Science and Policy 10, History 7A, 7B, 7C 17A,
Linguistics 1, Religious Studies 90,
Technocultural Studies 2 . 4-8
Depth Subject Matter 24
Native American Studies 130A, 130B or
130C, 157, and 180 or 135................ 12
Three course from: Native American Studies
101, 107, 108, 115, 119, 122, 125
130A, 130B, 130C, 133A, 133B, 135,
146, 161, 162, 180, 181A, 181B, 181C,
$185,188,191$
Note: If a course is counted for either Plans I, II, or III (below), it cannot also be counted as part of the 24 units of Depth Subject Matter.

## Areas of Specialization (complete one plan)

Plan I-North American Emphasis ......... 20
Native American Studies 107 or 108...... 4
Two courses from: Native American Studies
$101,115,119,122,125,130 \mathrm{~A}, 130 \mathrm{~B}$,
$130 \mathrm{C}, 135,146,161,162,181 \mathrm{~A}, 181 \mathrm{~B}$,
181C, 185, 188, 191 ........................... 8
One course from: American Studies 100,
Anthropology 103, 136, 172, 173, 175,
176, African American and African Studies
100, 107B, 145B, 152, 153, 163, 172,
176, 181, Asian American Studies 102,
112, 115, 121, Chicana/o Studies 100,
110, Sociology 128, Women's Studies
102, 160, 162, 170, 178F, 180, $182 \ldots .4$
One other upper division Native American
Studies course, selected in consultation with
adviser ...................................................... 4
Plan II-Mexico-Central America
Emphasis
Native American Studies 107, 133 or 133B.
Two courses from: American Studies 100, History 110A, 160, 165, 166A, 166B,
African American and African Studies 107A,
180, Anthropology 144, Chicana/o Studies 111, 112, 125S, 130, 135S, 147S, Native American Studies 122, 133A, 184 (Study Abroad), 185, Political Science 143B,
Sociology 158, Spanish 177 ................. 8
One course from: Art History 151, Native American Studies 181B, 181C, or, if student's work is specifically focused upon a Meso-American language or topic, from
Native American Studies 188, 191......... 4
Plan III-South American Emphasis ....... 20
Two courses from Native American Studies 107, 110A, 110B, 110C, 1 10D, 120 (Study Abroad).
Two courses from: African American and African Studies 107A, 155A, 163, 180, Anthropology 103, 144, 175, History 162, 165, Political Science 143A, Sociology 104, Spanish 170 170S, 171, 171S (Summer Abroad.

One course from History 163B, 164, 167, Political Science 143A
Total Units for the Major 60-68

## Major Adviser. Z. Mendoza

Major Advising. All new and prospective Native American Studies majors are encouraged to see the Student Affairs Officer individually, once per year, at minimum.

## Minor Program Requirements:

The Native American Studies minor provides an introduction to the Native experience in the Americas by means of exposure to course work dealing with some of the major aspects of Indian life, including history, values, politics, literature, and art.

UNITS
Native American Studies
.24
Native American Studies 1 or 10 or $12 \ldots .4$
Five upper division courses, at least one of which is chosen from each of the following
groups................................................. 20 Ethno-History: Native American Studies 130A, 130B, 130C, or 133B Philosophy and Values: Native American Studies 107, 108, 110A, 110B, 110C, 110D, 157, 180.
Politics and Current Affairs: Native
American Studies 115, 118, 119, 120, 122, 161, 162, 191. Art and Literature: Native American Studies 101, 125, 181A, 181B, 181C, 184, 185. One other upper division course selected in consultation with adviser.
Study Off Campus. Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student's plan must be approved by the student's adviser and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed; and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program or Short-Term Programs Abroad.
Graduate Study. The Department offers a program of study leading to the M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.
Graduate Advisers. Elisabeth Rose Middleton
Courses in Native American Studies (NAS)

## Lower Division

1. Introduction to Native American Studies (4)

Lecture-3 hours; discussion - 1 hour. Introduction to Native American Studies with emphasis upon basic concepts relating to Native American historical and political development. GE credit: SocSci ,
Div | ACGH, DD, SS, WC, WE. -I, II, III. Crum, Middleton
5. Introduction to Native American

## Literature (4)

Lecture/discussion-4 hours. Prerequisite: completion of Subject A requirement. Intensive focus on analysis of Native American literary texts, with fre-
quent writing assignments to develop critical thinking and composition skills. GE credit: ArtHum, Div, Wrt | AH, DD, OL, WE. -I, II, III, IV.

## 10. Native American Experience (4)

Lecture-3 hours; discussion - 1 hour. Introduction to the diverse cultures of Native American peoples from North, Central, and South America. Emphasis on Native American voices in the expression of cultural views and in the experience of conflicting values. GE credit: ArtHum or SocSci, Div, Wrt | AH or SS, DD, WC, WE.-I, II, III, IV. Hernandez-Avila, Mendoza
12. Native American/Indigenous Film (4) Lecture-3 hours; film viewing; discussion-1 hour. Survey and analysis of the visual colonization of Native American peoples and the contemporary responses by Native American/Indigenous filmmakers claiming visual sovereignty. Examines a range of filmic genres including documentary, features, shorts, festivals, tv and internet screening. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, VL, WC, WE. - Tsinhnahjinnie
32. Native American Music and Dance (4) Lecture/discussion-4 hours. Introduction to the music and dance of the native peoples of the Americas. Students will study secular native music and dance from a cross-section of regions and tribes. GE credit: Div.-I.
33. Introduction to Native American Art (4) Lecture-4 hours. Introduction to Native American Art from throughout North America, inclusive of traditional forms, techniques and designs in a range of media including ceramics, basketry, fiberwork, carving, painting, sculpture and photography within a context of social and political history. GE credit: ArtHum, Div | ACGH, AH or SS, DD, OL, VL, WE.-I. (I.) Tsinhnahjinnie

## 34. Native American Art Studio (4)

Lecture-2 hours; studio-6 hours. Prerequisite: consent of instructor; course 33 recommended. Limited enrollment. Studio projects to be influenced by contemporary and traditional Native American arts. Examples of designs and media presented in lectures will be of indigenous origin. Introduction and familiarized with various materials and techniques. GE credit: ArtHum | ACGH, AH, DD, OL, VL, WC. - Tsinhnahjinnie

## 46. Orientation to Research in Native American Studies (4)

Lecture/discussion-3 hours; term paper. Prerequisite: Native American Studies major or minor, or consent of instructor. Introduces students to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis is upon learning to use documentary resources or other collections of data. Students will carry out individual projects. Limited enrollment. GE credit: SocSci, Div, Wrt.

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

101. Contemporary Native American Art (4)

Lecture-3 hours; extensive writing. Examination of contemporary artworks by selected Native American and Indigenous Master artists, in a wide range of media, including ceramics, metal arts, photography, video, painting, installation and performance within a context of political and social histories. Offered in alternate years. GE credit: ArtHum, Div | ACGH, AH or SS, DD, OL, VL, WE. - Tsinhnahjinnie

## 107. Special Topics in Native American

 Languages (4)Lecture/discussion-4 hours. Prerequisite: consent of instructor. Investigation of various subjects in contemporary and historical Native American language
studies. May be repeated for credit when a different topic is studied. GE credit: Div. - II, III. Mendoza, Spence

## 108. Indigenous Languages of California

 (4)Lecture/discussion-3 hours; term paper. Prerequisite: a course in Native American Studies, or Linguistics 1, or Anthropology 4. Survey of the indigenous languages of the California region: linguistic prehistory, languages at first European contact, subsequent language loss, current efforts at language and cultural revitalization, indigenous languages of recent immigrants to California. GE credit: ArtHum or SocSci | ACGH, AH or SS, DD, WE. - II. Spence

## $110 A$. Quechua Language and Society,

## Beginning Level 1 (4)

Lecture/discussion-4 hours. Introduction to Quechua language and society emphasizing the practical use of the language. Provides the student with some basic Quechua communication skills and with an initial knowledge about contemporary Andean society and the status of Quechua language today. Not available for students who took NAS 107 in the Fall quarter of 2007. GE credit: SocSci \| SS.-Mendoza
110B. Quechua Language and Society, Beginning Level 2 (4)
Lecture/discussion-4 hours. Prerequisite: course 110A. Second Level of the teaching of Quechua language and society. Emphasis on development of conversational and reading skills. Continuation of the study of aspects of contemporary Andean society and the status of Quechua language today. Offered in alternate years. GE credit: SocSci | SS.-II. Mendoza

## 110C. Quechua Language and Society,

 Intermediate Level 1 (4)Lecture/discussion-4 hours. Prerequisite: courses $110 A$ and B. Third level of the teaching of Quechua language and society. Emphasis on development of conversational and reading skills. Introduction to more complex grammatical structures. Continuing the study of contemporary Andean society and the status of Quechua language today. Offered in alternate years. GE credit: SocSci | SS.-II. Mendoza
110D. Quechua Language and Society, Intermediate Level 2 (4)
Lecture/discussion - 4 hours. Prerequisite: course 110A, B and C. Fourth level of the teaching of Quechua language and society. Emphasis on complex structural patterns while emphasizing conversational skills and improving reading competence. Study of different sociopolitical processes that have affected Andean identity and the status of Quechua language. Offered in alternate years. GE credit:
SocSci | SS. - III. Mendoza

## 115. Native Americans in the <br> Contemporary World (4)

Lecture/discussion-4 hours. Prerequisite: course 1, 10. Important issues facing Native Americans in the contemporary world. Focus primarily on the diverse ways of life, histories and realities of indigenous people throughout the Americas as they develop their own cultural and political institutions. GE credit: ArtHum or SocSci, Div \| AH or SS, ACGH, DD, OL, WE.-II.

## 116. Native American Traditional

## Governments (4)

Lecture-4 hours. Prerequisite: course 1; Anthropology 2. Study of selected Native American Tribal Governments, confederations, leagues, and alliance systems. Offered in alternate years. GE credit: SocSci, Div.

[^3]
## 118. Native American Politics (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: course 117. Examination of the various interest groups and movements found among Native people and how they relate to the determination of Indian affairs. Study of political action available to Native groups, and local communities, along with relevant theory relating to underdevelopment. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WC, WE.-Crum
119. Introduction to Federal Indian Law (4) Lecture-3 hours; term paper. Introduction to the foundational cases and statutes of federal Indian law, from European Contact through the 20th century. GE credit: SocSci | ACGH, SS, WE. - III. Middleton

## 120. Ethnopolitics of South American

 Indians (4)Lecture/discussion-4 hours. Prerequisite: course 1, 10 or 55 . Social, political, cultural movements of indigenous South Americans in response to establishment, expansion of European colonialism, post-colonial nation-states. Ethnopolitical processes developed through interactions between Indians, Euroamericans. Socioethnographic analysis of main indigenous areas and the development of national societies. GE credit: SocSci, Div, Wrt.

## 122. Native American Community

Development (4)
Lecture-4 hours. Prerequisite: course 1 or 10 .
Application of community development theory and techniques to the development problems of Native American communities. Offered in alternate years.
(Former course 161.) GE credit: ACGH, DD, OL, SS, WE.

## 125. Performance and Culture Among

 Native Americans (4)Lecture -3 hours; film viewing -3 hours. Prerequisite: upper division standing in division of humanities or social sciences or consent of instructor. Interdisciplinary study of public expressive forms among
Native Americans. Comparison and analysis of music, dances, rituals, and dramas from throughout North, Central, and South America in their social and cultural contexts. Not open for credit to students who have completed Music 125. Offered in alternate years. GE credit: ArtHum or SocSci | AH or SS, WC, WE. - Mendoza
130A. Native American Ethno-Historical Development (4)
Lecture-4 hours. Prerequisite: course 1 or 10; History 17A recommended. Study of Native American ethno-history in North America before 1770s. GE credit: SocSci, Div, Wrt \| ACGH, DD, SS, WC,
WE.-I. Crum

## 130B. Native American Ethno-Historical

 Development (4)Lecture/discussion-4 hours. Prerequisite: course 1; History 17A-17B recommended. Study of Native American ethno-history in North America, 17701890. GE credit: SocSci, Div, Wrt | ACGH, DD, SS, WE.-II. Crum

## 130C. Native American Ethno-Historical

 Development (4)Lecture/discussion-4 hours. Prerequisite: course 1; History 17A-17B recommended. Study of Native American ethno-history in North America after 1890. GE credit: SocSci, Div, Wrt \| ACGH, DD, SS, WE. - III. Crum

## 133. Ethnohistory of Native People of

 Mexico and Central America (4)Lecture/discussion-4 hours. Prerequisite: course 1, 10 or 55. Ethnohistorical development of pre-colonial, colonial, post-colonial Mexican and Central American indigenous people; the impact of economic and political factors on the process of cultural adaptation. Attention is given to the questions of nation-building, forced assimilation, indigenous resistance, organized political responses. GE credit: SocSci, Div.

133A. Ethnoshistory of Native Peoples of Mexico and Central America to 1500 (4) Lecture/discussion-4 hours; term paper. Prerequisite: course 1 or course 10 or consent of instructor. Ethnohistorical development of the indigenous peoples of Mexico and Central America up to and including the earliest period of European contact. Focus is on indigenous written historical records of the Maya, Mixtec, and Nahuatl peoples. May be repeated one time for credit. This course can be repeated provided the student chooses a new topic for the term paper/project and for the PowerPoint presentations. The material is so extensive that more than one exposure to it can be very beneficial to students wanting to focus on ancient Mesoamerica. GE credit: ArtHum or SocSci, Div | AH or SS, VL, WC, WE.-III.
133B. Ethnohistory of Native Peoples of Mexico and Central America 1500 to 2000 (4)

Lecture/discussion-4 hours; term paper. Prerequisite: course 1 or 10 , or consent of instructor. Ethnohistory of indigenous peoples of Mexico and Central America from 1500 to contemporary times. Focus on social and cultural dynamics, particularly the role of indigenous people in the process of nation-state building in Mexico and Central America. Offered in alternate years. GE credit: ArtHum or SocSci, Div, Wrt | AH, OL, SS, WE.

## 134. Race and Sex: Race Mixture and

 Mixed Peoples (4)Lecture-4 hours. Prerequisite: one course chosen from Anthropology 1 or 2, Native American Studies 10, Chicana/o Studies 110, African American and African Studies 100 or Asian American Studies 110. The phenomena of racial, ethnic and interreligious intermixture and marriage, and of multi-ethnic peoples. Emphases on the Americas and upon the sociocultural effects of intermixture and on the lives of bicultural and multi-ethnic persons. (Same course as Anthropology 134.) GE credit: SocSci, Div, Wrt.-II.

## 135. Gender Construction in Native

 Societies (4)Lecture-4 hours. Prerequisite: one course from course 1, 10, Anthropology 30, Chicana/Chicano Studies 111, African American and African Studies 17, Asian American Studies 112 or 113, or Women's Studies 50 or 70. Historical and traditional Native American constructions of feminine and masculine genders as well as third, fourth, and fifth genders. Examines gender roles and statuses. Addresses the problems with contemporary terminologies and impacts of colonization on contemporary constructions of gender identities. Offered in alternate years. GE credit: ArtHum or SocSci|AH or SS, DD, OL, WE. - Perea

## 146. Orientation to Research in Native

 American Studies (4)Lecture/discussion-4 hours; term paper. Prerequisite: Native American Studies major or minor, or consent of instructor. Limited enrollment. Introduction to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis on learning to use documentary resources or other collections of data. Students will carry out individual projects. GE credit: SocSci | ACGH, DD, SS, WE. - II. Crum

## 157. Native American Religion and

 Philosophy (4)Lecture/discussion-4 hours. Prerequisite: upper division standing; course 1,5, or 10. Religious and philosophical traditions of Native American/indigenous peoples of the Americas. Offered in alternate years. GE credit: ArtHum, Div | AH, OL, WE. -Hernández-Ávila

## 161. California Indian Environmental Policy I (4)

Lecture/discussion-4 hours; term paper. Prerequisite: course 1 or course 10 or consent of instructor. Contemporary California Indian environmental policy issues, with a focus on water, minerals, contami-
nation, and alliance-building. Issues will be placed within historical and political context, drawing on theories of Native environmental ethics, environmental justice, and Federal Indian law. Offered in alternate years. GE credit: ACGH, DD, SS, WE. Middleton
162. California Indian Environmental Policy II (4)
Lecture/discussion-4 hours; term paper. Contemporary California Indian environmental policy issues, with a focus on planning, site protection, and collaborative structures. Issues will be placed within historical and political context, drawing on theories of Native environmental ethics, environmental justice, and Federal Indian law. Offered in alternate years. GE credit: SocSci | ACGH, DD, SS, WE. - Middleton

## 180. Native American Women (4)

Lecture/discussion - 4 hours. Prerequisite: course 1, 10, or Women's Studies 50. Native American women's life experiences, cross-cultural comparisons of gender roles, and Native women's contemporary feminist thought. Utilizes texts from literature, social science, and autobiography/biography. GE credit: ArtHum or SocSci | AH or SS, DD, OL, WE.-II.
181 A. Native American Literature (4)
Lecture/discussion-4 hours. Prerequisite: one from course 5, English 3, Comparative Literature 1, 2, 3. Works of fiction (short story, novel) by contemporary Native American authors, with an emphasis on writers from the United States. Offered in alternate years. GE credit: ArtHum, Div, Wrt | ACGH, AH, DD, OL, WE. - Hernández-Avila

## 181 B. Native American Literature (4)

Lecture/discussion - 4 hours. Prerequisite: one from course 5, english 3, Comparative Literature 1, 2, 3. Works by or about Native Americans including nonfiction novels, biographies and autobiographies.
Explore ways Native Americans create and recreate their culture through the creative process in literature. Examine from a critical perspective autobiographies and testimonial literature. Offered in alternate years. GE credit: ArtHum, Div, Wrt \| AH, DD, OL, WE.-Hernandez-Avila

## 181C. Contemporary Native American Poetry (4)

Lecture-4 hours. Prerequisite: one of the following: course 5, English 3, Comparative Literature 1, 2, 3. Works of poetry by contemporary Native American/ indigenous poets, with some attention to traditional cultural poetic expressions. GE credit: ArtHum, Div, Wrt | AH, DD, OL, WE.-I, II, III. Hernández-Avila 184. Contemporary Indigenous Literature of Mexico (4)
Lecture/discussion - 4 hours. Prerequisite: course 1 or 10; course 181A or 181C recommended; reading knowledge of Spanish required. Contemporary indigenous literature of Mexico, with a focus on the genres (poetry, fiction, drama, essay); analysis of cultural, historical, and spiritual themes, imagery, styles and performances; biographies of and influences on the Native writers themselves. Offered irregularly. GE credit: ArtHum or SocSci | AH or SS, OL, WC.-IV. Hernández-Avila

## 185. Native American Literature in Performance (4)

Performance instruction-4 hours. Prerequisite: consent of instructor. Performance of contemporary Native American literature onstage, through adaptations of selected literature as well as the creation of original pieces. Offered in alternate years. May be repeated up to four units for credit. GE credit: ArtHum or SocSci |AH, DD, OL, WC.-HernándezAvila
188. Special Topics in Native American Literary Studies (4)
Lecture/discussion-4 hours; term paper. Prerequisite: upper division standing and one of the following recommended: course 5, 10, 181A, 181C. Special topics drawn from Native American literature. May be repeated for credit when topic differs. Offered irregularly. GE credit: ArtHum, Div, Wrt | AH, DD, OL, WE.-III, IV. Hernández-Ávila
190. Seminar in Native American Studies (2)

Discussion-2 hours. Prerequisite: senior standing. Seminar of critical issues faced by Native American people. (P/NP grading only.)
191. Topics in Native American Studies (4) Lecture/discussion-4 hours. Prerequisite: upper division standing. Selected topics in Native American Studies related to indigenous knowledges and worldviews from a historical, cultural, hemispheric perspective. May be repeated for credit when topic differs and/or when offered by a different instructor. Offered irregularly. GE credit: ArtHum or SocSci. Div | AH or SS, DD, OL, WE--I, II, III. HernandezAvila
192. Internship (1-12)

Internship-1 hour. Supervised internship in the CN Gorman Museum, community, and institutional settings related to Native American concerns. May be repeated up to 12 units for credit including 192 and other internships taken in other departments and institutions. (P/NP grading only.) GE credit:
ArtHum | AH.-I, II, III, IV. Tsinhnahjinnie
194HA-194HB. Special Studies for Honors Students (4-4)
Independent study - 12 hours. Prerequisite: senior qualifying for honors. Directed reading, research and writing culminating in the completion of a senior honors thesis or project under direction of faculty adviser. (Deferred grading only, pending completion of sequence.)
195. Field Experience in Native American Studies (12)
Field work-36 hours. Prerequisite: senior standing and major in Native American Studies, completion of lower division major requirements, and course 161. Field work with governmental and community groups, under supervision of faculty adviser and sponsor. Knowledge acquired in other courses to be applied in field work. (P/NP grading only.) - I, II, III.

## 196. Senior Project in Native American

 Studies (4)Discussion-1 hour; independent study-3 hours.
Prerequisite: senior standing and major in Native American Studies, course 195 (may be taken concurrently), and consent of instructor. Guided research project that enables student to apply the theory and research principles from major course work. Final product is to be a major senior project or thesis. (P/NP grading only.)-I, II, III.

## 197TC. Community Tutoring in Native

 American Studies (1-5)Tutorial-3-15 hours. Prerequisite: consent of major committee; upper division standing with major in Native American Studies. Supervise tutoring in community. (P/NP grading only.) -1 , II, III.
198. Directed Group Study (1-5)

Prerequisite: upper division standing; consent of instructor. (P/NP grading only.)

## 199. Special Study for Advanced Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

200. Basic Concepts in Native American Studies (4)
Seminar-4 hours. Prerequisite: graduate standing and consent of instructor. Analysis of the characteristics of the discipline of Native American Studies. Concentration is on both traditional and contemporary native scholarship and thought as well as the theoretical and methodological consequences derived from application of these ideas. Offered in alternate years. - (I.) Crum, Hernández-Ávila, Middleton

## 202. Advanced Topics in Native American

 Studies (4)Seminar-4 hours. Prerequisite: graduate standing. Advanced study of selected topics or themes relevant to the field of Native American studies. Topics will
be announced at the time of offering. May be repeated for, credit when topic differs. - II, III. Hernández-Ávila, Perea

## 207. Leadership Skills and Strategies in California Language Documentation \& <br> Revitalization (4)

Seminar-3 hours; term paper. Introduction to the indigenous languages of the Americas, with a focus on California; an examination of how contemporary Native communities document and revitalize their heritage languages. Learn to assist and administer language programs. - III. Spence

## 212. Community Development for <br> Sovereignty and Autonomy (4)

Seminar-4 hours. Prerequisite: graduate standing and consent of instructor. Examines a sample of contemporary indigenous communities from south, central and north America with the goal of understanding and evaluating the strategies adopted by Native American communities to develop and implement forms of sovereignty or autonomous selfmanagement. Offered in alternate years. - Grandia

## 213. Native Criminality and Deviance (4)

Seminar-4 hours. Prerequisite: graduate standing. Examination of "deviance" in Native communities with focus on Native criminality in North America. Analysis of the concept of deviance from several different world views. Readings from a range of theories to incorporate varying theoretical perspective on criminality and deviance.

## 217. Public Law 83-280: Colonial Termination (4)

Seminar-4 hours. Prerequisite: graduate standing, including school of law students. Examination of the signature law of the Termination Era, Public Law 83280. Discussions to include termination, societal conformity, political consent, jurisdiction, self-determination \& decolonization, and colonial relationship between Native Peoples and the United States. -I, II, III. Crum

## 220. Colonialism/Racism and Self- <br> \section*{Determination (4)}

Seminar-3 hours; term paper. Prerequisite: graduate standing. Study of imperial/colonial systems and their psychosocial impacts upon oppressors and oppressed, of racism as the outgrowth of colonialism, and of nationalism, ethnic conflict and self-determination. Focus on indigenous peoples, but other groups will also be considered. Offered in alternate years. - Grandia

## 224. Performance in the Americas (4)

 Seminar-3 hours; term paper. Prerequisite: graduate standing. Ethnomusicological and anthropological approaches to study of public performance in the Americas. New ways of looking at music, dance, rit vals and other forms of public expressive forms normally called "folklore" or "popular culture." Not open for credit to students who have completed Music 224. (Former course Music 224.) - Mendoza
## 233. Visual Sovereignty (4)

Seminar -3 hours; film viewing -2 hours; term paper. Extensively examine the field of contemporary Native American and Indigenous photography, film and performance through research of artworks, writings by artists, theorists, and material in museum collections. May be repeated two times for credit when topic differs. Offered in alternate years. Tsinhnahijinnie

## 237. Native American Art Collections and

## Museums (4)

Seminar-3 hours; term paper. Research and examination of regional Native American art held in museums and other public institutions, as well as pri-vately-held collections. Includes onsite viewing and research of museum collections and archives.
Offered in alternate years. - Tsinhnahjinnie

## 240. Native American Public Health: Topics

 and Issues (4)Seminar-3 hours; term paper. Introduction to Native American public health issues and contributing causal factors (including environmental justice and historical trauma); the dimensions of cultural
competency in diagnosis and service provision; the structure of Native health care institutions; and debates in Native treatment modalities. -II. Middleton

## 250. Indigenous Critique of Classic Maya

 Ethnographies (4)Seminar-4 hours. Prerequisite: graduate standing or consent of instructor. Construction of the Maya world through ethnographic writing during the present century. Deconstruction of ethnographies about the Mayans considering the modern theories and social/anthropological critiques of modern ethnographies. Offered in alternate years.
280. Ethnohistorical Theory and Method (4) Seminar-3 hours; term paper. Discussion of the ethnohistorical method; the utilization of diverse types of data, especially documentary sources, to reconstruct socio-cultural history. Particular attention to the applied area of ethnohistory in the solution of contemporary social problems. Offered in alternate years.-Crum
298. Group Study for Graduate Students (1-5)
Prerequisite: graduate standing, consent of instructor. (S/U grading only.)
299. Special Study for Graduate Students (1-12)
Prerequisite: graduate standing, consent of instructor. (S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III.

## Natural Sciences

## (College of Letters and Science)

Advising Center. 104 Everson Hall 530-754-9621;
http://naturalsciences.ucdavis.edu/

## Committee in Charge

Howard W. Day, Ph.D., Chair
(Earth and Planetary Sciences)
Tessa Hill, Ph.D. (Earth and Planetary Sciences)
Susan Keen, Ph.D. (Evolution and Ecology)
J. Richard Pomeroy, Ph.D. (Education)

Neil Schore, Ph.D. (Chemistry)
David Webb, Ph.D. (Physics)

## The Major Program

Natural Sciences is an interdisciplinary major that provides significant breadth in biology, chemistry, earth sciences, physics and mathematics while offering additional depth in two of the natural sciences. It is especially designed to meet the needs of prospective science teachers, but will also serve students who wish to acquire training in more than one science. The major is sponsored by the Department of Earth and Planetary Sciences.
The Program. The Natural Sciences curriculum offers an unusually broad training in science and mathematics. All students must complete a one year sequence in calculus, a course in statistics and one year sequences in chemistry, earth science, life science and physics. Each student will complete depth courses in two of these sciences. Prospective teachers may use these depth courses as preparation for primary and supplementary teaching credentials in science. Students who might wish to prepare for a teaching credential program should consult an advisor at their first opportunity in order to combine the prerequisites with General Education requirements.
Career Alternatives. Students whose goals include business, journalism, law, or medicine may acquire a broad background in science through this curriculum. The study of natural sciences also prepares a student to meet the subject matter require-
ments for primary and supplementary science teaching credentials in California. Students who might wish to become a teacher should consult an advisor in the Mathematics and Science Teaching Program (MAST, http://mast.ucdavis.edu) at their first opportunity. MAST advisors can help students combine the prerequisites for a credential program with General Education requirements. The program also offers seminars that give participants experience in elementary, middle school, and high school classrooms.

## B.S. Major Requirements:

UNITS
Preparatory Subject Matter............... 68-74
Chemistry 2A, 2B, 2C.......................... 15
Biological Sciences 2A, 2B, 2C............. 15
Geology 2, 3, 3L, 50L, 60.................... 13
Mathematics 16A, 16B, 16 C or 17A, 17B,
17 C or $21 \mathrm{~A}, 21 \mathrm{~B}, 21 \mathrm{C}$.....................9-12
Physics 7A, 7B, 7C or 9A, 9B, 9C .... 12-15
Statistics 100
Depth Subject Matter
Concentration (chosen from among the four
fields of concentration listed below)........ 27
Supplementary Field; chosen from among the four fields listed below. May not include the same field as the concentration. The same course may not be used to fulfill the requirements for both a Concentration and a Supplementary Field.

## Total Units for the Major 110-116

## Fields of Concentration:

Chemistry
.27-36
Chemistry 105 ................................ 4 Chemistry 107A-107B or 110A-110B-
110C ............................................6-12
Chemistry 118A-118B or 128A-128B-
129A-129B.................................... 8-10
Chemistry 124A ................................. 3
One course from Chemistry 100, 104,
118C, 128C....................................3-4
Three units from Chemistry 197, 199 or
Education/Geology 181, 183.............. 3
Earth Science ...................................... 27
Geology 62, 101, 101L, 105, 109, 109L, 116N, 163..................................... 21
Once course from Geology 107, 108, 131
Three units from Geology 199 or
Education/Geology 181, 183.............. 3
Life Science .....................................27-33
Chemistry 8A, 8B or 118A, 118B,
118C ...........................................6-12
Biological Sciences $101 \ldots \ldots . . . . . . .$.
Evolution and Ecology 100, 101 or
approved electives and Biological Sciences
105 .................................................. 8
Neurobiology, Physiology, and Behavior
101 .................................................. 5
Four units from Biological Sciences 199,
Evolution and Ecology 199, Molecular and
Cellular Biology 199, or Neurobiology,
Physiology, and Behavior 199 or
Education/Geology 181, 183.............. 4
Supplementary Fields:
Chemistry
.15-17
Chemistry 100 .................................. 3
Chemistry 104 or 105.......................3-4
Chemistry 107A ................................. 3
Chemistry 118A or 128A..................3-4
Chemistry, 124A ................................ 3
Other Chemistry or related science courses may be substituted with the prior approval of the major adviser.
Earth Science ....................................... 15
Geology 108, 109, 109L, 116 N ....... 10
Geology 138 or 140
Approved elective ......................................... 1
Other Geology or related science courses may be substituted with the prior approval of the major adviser.
Life Science 15
Biological Sciences 101*

Evolution and Ecology 100 4
Neurobiology, Physiology, and Behavior
101
Approved electives
Other Biological Sciences or related science courses may be substituted with the prior approval of the major adviser.
Physics..
15
Physics 108........................................ 3
Chemistry 107A ................................ 7
Geology 161, 162, 163 ..................... 9
Approved electives............................... 2
Other Physics or related science courses
may be substituted with the prior approval of the major adviser.
*Note: Students pursuing a concentration in earth science or physics may not have had the necessary prerequisites in organic chemistry.
Major Advisers. H. W. Day (Earth and Planetary Sciences), T. Hill (Earth and Planetary Sciences)

## Nature and Culture

(College of Letters and Science)
This major was discontinued effective June 30, 2011.

## Courses in Nature and Culture (NAC)

Upper Division
192. Internship in Nature and Culture (1-12)
Internship-3-36 hours. Prerequisite: course 1. Internship in natural sciences, social sciences, or humanities on or off campus in which students use and improve their interdisciplinary skills and perspectives gained through the Nature and Culture curriculum. Supervised by a faculty member. May be repeated for credit. (P/NP grading only.)

## Nematology

Please see the department of Entomology and Nematology, on page 293, for further information.
(College of Agricultural and Environmental Sciences)
Michael Parrella, Ph.D., Chairperson of the Department
Edwin Lewis, Ph.D., Vice Chairperson of the
Department
Department Office. 367 Briggs; 530-752-0300
Faculty
Edward P. Caswell-Chen, Ph.D., Professor
Howard Ferris, Ph.D., Professor
Edwin E. Lewis, Professor
Steven A. Nadler, Ph.D., Professor
Becky B. Westerdahl, Ph.D., Professor
Emeriti Faculty
Bruce A. Jaffee, Ph.D., Professor Emeritus
Harry K. Kaya, Ph.D., Professor (Entomology)

## Minor Program Requirements:

Nematology ....................................... 18-20
Nematology 100, 110, and Soil Science
100.................................................... 10

Two or three courses from one of the
following areas: ................................ 8-10
(a) Plant Science: Microbiology 102;

Entomology 100, 135, 153, 156, 156L;
Evolution and Ecology 112; Plant Pathology
120, 148; Plant Biology 121; Soil Science
111,112
(b) Entomology: One upper division Entomology course; Evolution and Ecology
112; Microbiology 102; Plant Biology
121; Plant Pathology 120, 148; Soil
Science 102, 111,112
Minor Adviser. S. Lawler
Graduate Study. Graduate degrees specializing in Nematology are offered through the Departments of Entomology and Plant Pathology, and through various Graduate Groups (Biochemistry, Ecology, Genetics, Plant Protection and Pest Management). Refer also to the Graduate Studies chapter of this catalog.

## Courses in Nematology (NEM)

Related Courses. See Entomology and Nematology, on page 293.

## 10V. General Biology (4)

Web virtual lecture-3 hours; web electronic discussion - 1 hour. Concepts and issues in biology. Emphasis on composition and structure of organisms; regulation and signaling; heredity, evolution and the interaction and interdependence among life forms and their environments. Significant writing is required. Designed for students not specializing in biology. Not open for credit to students who have completed course Biological Sciences 1A, 1B, 1C,
2A, 2B, 2C or 10. (Same course as Biological Sciences 1OV.) GE credit: SciEng, Wrt |SE, SL, WE.III. (III.) Westerdahl

## Upper Division

## 100. General Plant Nematology (4)

Lecture - 2 hours; laboratory - 6 hours. Prerequisite: Biological Sciences 1B or 10. An introduction to the classification, morphology, biology, and control of the nematodes attacking cultivated crops. GE credit: SciEng | SE.-I. (I.) Ferris

## 110. Introduction to Nematology (2)

Lecture-2 hours. Prerequisite: Biological Sciences
1B or the equivalent or consent of instructor. The relationship of nematodes to human environment. Classification, morphology, ecology, distribution, and importance of nematodes occurring in water and soil as parasites of plants and animals. GE credit: SciEng | SE. - II. (II.) Caswell-Chen, Nadler

## 199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)

## Graduate

201. Molecular and Physiological Plant Nematology (2)
Lecture-1 hour; discussion-1 hour. Prerequisite: Biological Sciences 101; Plant Pathology 120, course 100 or 110. Molecular biology and physiology of nematodes using Caenorhabditis elegans as a model, but with emphasis on plant-parasitic species. Plant responses to nematodes. Discussion of current literature emphasized. Offered in alternate years.-II. Williamson
202. Ecology of Parasitic Nematodes (2) Lecture-1 hour; discussion-1 hour. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 101 or Plant Biology 117. Major concepts in population and community ecology of ani-mal- and plant-parasitic nematodes. Current advances in techniques, theory, and basic information about nematode-host dynamics, and application to management of nematode diseases. Offered in alternate years. - (III.) Caswell-Chen

## 204. Management of Plant-Parasitic

Nematodes (2)
Lecture-1 hour; laboratory-3 hours. Prerequisite: course 100 or 110. Theory, foundation, principles and practices of nematode management. Techniques and equipment used to manage nematodes and methods used to analyze their effectiveness. Offered in alternate years.-III. Westerdahl

## 205. Insect Nematology and Biological

 Control (2)Lecture-1 hour; discussion-1 hour. Prerequisite: courses 100 and 110, Entomology 100 or 110. The biology of insect-parasitic nematodes, their effect on the host, and their potential as biological control agents of insect and other invertebrate pests. Application of ecological theory in classical and augmentative biological control. Offered in alternate years. - (I.) Kaya, Lewis

## 206. Nematode Systematics and Evolution

 (2)Lecture - 1 hour; laboratory - 3 hours. Prerequisite: course 100 or 110 or Entomology 156; Evolution and Ecology 100 recommended. Nematode diversity as revealed by morphological and molecular evidence. Laboratory experience focuses on structural features used in taxonomy. Phylogenetic relationships based on morphological and molecular data used to consider patterns of character change among taxa. Offered in alternate years. - (I.) Nadler
210. Molecular Phylogenetic Analysis (3) Lecture-2 hours; laboratory-3 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as Evolution and Ecology 210.)
Offered in alternate years. - (II.) Nadler
245. Field Nematology (1)

Fieldwork-6 days. Prerequisite: course 100. Sixday demonstration and field study in applied nematology including diagnosis and prediction of nematode field problem strategies for control field plot design, and establishment in association with diverse California crops. (S/U grading only.) -I. (I.) 290. Seminar (1)

Seminar-1 hour. (S/U grading only.) - II, III. (II, III.)
290C. Advanced Research Conference (1)
Discussion - 1 hour. Prerequisite: graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. (S/U grading only.)
298. Group Study (1-5)
(S/U grading only.)
299. Research (1-12)
(S/U grading only.)

## Neurobiology, <br> Physiology, and Behavior

William C. Adams, Ph.D., Professor Emeritus Marylynn S. Barkley, Ph.D., M.D., Associate Professor Emerita
James M. Boda, Ph.D., Professor Emeritus
Edmund M. Bernauer, Ph.D., Professor Emeritus Leo M. Chalupa, Ph.D., Distinguished Professor

Emeritus (Ophthalmology \& Vision Science) Jack M. Goldberg, Ph.D., Senior Lecturer Emeritus Robert G. Holly, Ph.D., Senior Lecturer Emeritus John M. Horowitz, Ph.D., Professor Emeritus Academic Senate Distinguished Teaching Award Williard S. Lotter, Ph.D., Senior Lecturer Emeritus Peter R. Marler, Ph.D., Professor Emeritus Verne E. Mendel, Ph.D., Professor Emeritus Brian C. Mulloney, Ph.D., Distinguished Professor Emeritus
Pamela A. Pappone, Ph.D., Professor, Emerita E. Dean Ryan, Ed.D., Professor Emeritus Arnold J. Sillman, Ph.D., Professor Emeritus

Academic Senate Distinguished Teaching Award Martin C. Wilson, Ph.D., Professor Emeritus Dorothy E. Woolley, Ph.D., Professor Emerita

## Affiliated Faculty

Erwin A. Bautista, Ph.D., Lecturer
Gretchen Casazza, Ph.D., Assistant Adjunct
Professor (Sports Medicine Program)
Ann V. Hedrick, Ph.D., Adjunct Professor
Lauren C. Liets, Ph.D., Lecturer
Paul B. Salitsky, Ph.D., Lecturer
James D. Shaffrath, M.D., Lecturer
Marilyn Ramenofsky, Ph.D., Adjunct Professor
Grace L. Rosenquist, Ph.D., Assistant Adjunct Professor

## The Exercise Biology Major Program

Admissions suspended for 2015-2016.
The admission of new and continuing undergraduate students to the major in Exercise Biology will be suspended for 2015-2016 and the college is pursuing discontinuation of this major. The Neurobiology, Physiology and Behavior major is undergoing revision to encompass some parts of the previous Exercise Biology curriculum.
The Program. The focus is on both the acute and adaptive effects of physical activity (and inactivity). Exercise biology deals with the mechanisms and consequences of activity from the molecular to the organismal (human ecological) level. We examine these mechanisms and consequences during growth, development, aging, disease and in altered environ-
mental conditions. The exercise biology major encompasses the critical aspects of an integrative program in applied human biology. The Bachelor of Arts program provides a greater breadth of knowledge in the humanities and social sciences and is more appropriate for those who wish to apply their knowledge within the human community. The Bachelor of Science program is appropriate for students who desire a strong preparation in human biology.
Advising and Career Alternatives. Meet with an Exercise Biology staff advisor in the Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http:// www.biosci.ucdavis.edu/BASC, to learn more about the best course sequences to take to prepare you for careers in basic exercise physiology, applied exercise physiology, or biomechanics; for graduate study in exercise physiology or biomechanics; or for professional programs in medicine, or physical therapy, athletic training or occupational therapy. Students with further academic or professional interests in medicine and other health sciences, community service, business, sales, communications, education or coaching might find the Bachelor of Arts program attractive. The Bachelor of Science could lead to further graduate study in any field related to human biology as well as careers in medicine and other health sciences (e.g., physical therapy), biomechanics and biomedical engineering and medical equipment and pharmaceutical development and sales.

## A.B. Major Requirements:

Master Adviser. Paul Salitsky for the Exercise Biology Major and Exercise Biology Minor

## The Neurobiology, Physiology, and

 Behavior Major ProgramNeurobiology, Physiology, and Behavior is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions-they grow, reproduce, move, respond to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organ system, and the organism.
The Program. In the freshman and sophomore years, students majoring in Neurobiology, Physiology, and Behavior build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology, and Behavior courses and related upper division courses. Students can participate in a number of advanced laboratory courses or may design an individual, independent project guided by a member of the faculty.

Career Alternatives. Completion of the Neurobiology, Physiology, and Behavior major provides the foundation for advanced study leading to careers in high school teaching, college level teaching or research. It also serves as the basis for further training in the health professions, including but not limited to human and veterinary medicine, medical technology, physical therapy, pharmacy, nursing, dentistry and optometry. The major is also appropriate for those intending to seek careers in biotechnology or other biologically related industries.

## B.S. Major Requirements:

Statistics 100. $\qquad$ $\ldots 4$
Additional Neurobiology, Physiology, and
Behavior depth unit requirement............. 12 All other Neurobiology, Physiology, and Behavior courses not used in satisfaction of any other requirement; or Anthropology 154A, 154BN; or Entomology 104; or Exercise Biology 101, 102, 111. Courses 192, 197T, 199 may not be used to satisfy the depth unit requirement.
One course from: Anthropology 151,
Evolution and Ecology 100, Geology 107
Total Units for Major 99-115
Minor Program Requirements:
Human Physiology ................................. 20
Exercise Biology 101 .............................. 4
Neurobiology, Physiology, \&
Behavior 101
..................... 5
(102, 110,
111, 113, 116, 117, 125
One course from: Neurobiology, Physiology,
\& Behavior 112, $113,114,122,130,132$,
168
One course from: two of the following areas: Functional Anatomy: Cell Biology and Human Anatomy 101; Anthropology 156 Genetics And Development: Anthropology 153; Human Development 100C, 101, 117; Molecular and Cellular Biology 162 Immunology: Medical Microbiology 188 Nutrition: Nutrition 111 B

## Neuroscience.

Neurobiology, Physiology, \& Behavior
100
.. 4
Five courses from:
Choose at least four from the following:
Neurobiology, Physiology, \& Behavior 107,
112, 124, 126, 160, 161, 162, 164,
$165,166,167,168,169$
One of the following may be completed to
fulfill the course requirement:
Psychology 113, 121, 129, 135,
Linguistics 175, Philosophy 103, Human Development 163
The following courses are cross-listed and either offering can be used to fulfill the course requirement: Neurobiology, Physiology, \& Behavior 124/Neuroscience

124, Neurobiology, Physiology, \& Behavior 160/Neuroscience 160
Master Adviser. Dr. Hwai-Jong Cheng, M.D., Ph.D., Dr. Kenneth H. Britten, Ph.D.
Advising Center. Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/ BASC
Graduate Study. Information on graduate study in neuroscience, physiology or behavior may be obtained by writing the Graduate Adviser, College of Biological Sciences, Graduate Academic Programs. See also the graduate course offerings listed under Animal Behavior (A Graduate Group), on page 149, Molecular, Cellular, and Integrative Physiology (A Graduate Group), on page 433, Neuroscience, on page 450 and Physiology, on page 471. See also Graduate Studies, on page 111.

## Courses in Exercise Biology (EXB)

## Lower Division

10. Exercise and Fitness: Principles and Practice (3)
Lecture-3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have completed an upper division Exercise Biology course. GE credit: SciEng, Div \| SE, SL. - I, II. (I, II.) Barr, Shaffrath

## 90C. Research Conference (1)

Discussion-1 hour. Prerequisite: lower division standing in Exercise Biology or related biological science and consent of instructor; concurrent enrollment in course 99. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.)-I, II, III. (I, II, III.)

## 90X. Lower Division Seminar (1-2)

Lecture-1-2 hours. Prerequisite: lower division standing and consent of instructor. Gives freshman or sophomore level students the opportunity to study a special topic in the general area of Exercise Biology in a small class setting. GE credit: SciEng | SE.
92. Exercise Biology Internship (1-5) Internship-3-15 hours. Prerequisite: consent of instructor, dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated one time for credit. (P/NP grading only.)-I, II, III. (I, II, III.)
97T. Tutoring in Exercise Biology (1-5)
Tutorial-3-15 hours. Prerequisite: lower division standing and consent of instructor. Assisting the professor by tutoring students in exercise biology course-related projects. May be repeated for credit for 10 units including courses 97TC, 197T and 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) - I, II, III. (I, II, III.)

97TC. Tutoring Exercise Biology in the Community (1-5)
Tutorial-3-15 hours. Prerequisite: consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated one time for credit. (P/NP grading only.)-I, II, III. (I, II, III.)

## 98. Directed Group Study

Prerequisite: consent of instructor and chairperson. (P/NP grading only.)-I, II, III. (I, II, III.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.) -I, II, III. (I, II, III.)

## Upper Division

## 101. Exercise Physiology (4)

Lecture-4 hours. Prerequisite: Neurobiology, Physiology, and Behavior 101. Physiologic responses to acute exercise, and physiologic adaptations to both chronic exercise (training) and selected environmen-
tal stresses. Emphasis on the muscular, metabolic, cardiovascular, respiratory and renal responses and adaptations to exercise. Only 1 unit of credit allowed to students who have completed Exercise Science 101. Only 3 units of credit allowed to students who have completed Exercise Science 102. Not open for credit to students who have completed Exercise Science 101 and 102 (Former Exercise Science 101 and 102). GE credit: SciEng | SE, SL. -1 . (I.) Bodine, Shaffrath

## 102. Introduction to Motor Learning and

 the Psychology of Sport and Exercise (4)Lecture-4 hours. Prerequisite: Psychology 1 recommended. Theoretical and practical issues in motor learning, sport psychology, and exercise psychology. Emphasis on how motor skills are acquired and retained, and on the application of social psychology and human motivation studies to human performance. Only 2 units of credit allowed to students who have completed Exercise Science 104. Only 2 units of credit allowed to students who have completed Exercise Science 105. Not open for credit to students who have completed Exercise Science 104 and 105. (Former Exercise Science 104 and 105.) GE credit: SocSci | SS.-I, II. (I, II.) Salitsky

## 103. Analysis and Control of Human

 Movement (4)Lecture -4 hours. Prerequisite: Cell Biology and Human Anatomy 101 and 101L, Physics 7A and 7B. Neurobiology, Physiology, and Behavior 101 recommended. Introduction to functional anatomy, neurophysiological basis of motor control, and biomechanics of human movement. Human movement understood in the context of body structures, basic principles of physics, and functional characteristics of nerve and muscle. Only 1 unit of credit allowed to students who have completed Exercise Science 103. Only 3 units of credit allowed to students who have completed Exercise Science 104. Not open for credit to students who have completed Exercise Science 103 and 104. (Former Exercise Science 103 and 104.) GE credit: SciEng | QL, SE. - III. (III.) Williams
104L. Exercise Biology Laboratory (3)
Laboratory-3 hours; lecture-1 hour; discussion - 1 hour. Prerequisite: course 101, 102, 103 (the last course may be taken concurrently). Principles and analytical procedures for assessing fundamental physiological, biomechanical, motor learning and motor control factors which underlie human movement and performance. Only 1 unit of credit allowed to students who have completed Exercise Science 101L. Only 1 unit of credit allowed to students who have completed Exercise Science 103. Not open for credit to students who have completed Exercise Science 101L and 103. GE credit: SciEng, Wrt | SE, WE.-I, III. (I, III.) Shaffrath

## 106. Human Gross Anatomy (4)

Lecture-4 hours. Prerequisite: Biological Sciences 2A; concurrent enrollment in course 106L or Cell Biology and Human Anatomy 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass 2 open to Seniors in any major; Open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as Cell Biology and Human Anatomy 101.) GE credit: SciEng | SE.-II. (II.) Gross

## 106L. Human Gross Anatomy Laboratory (3)

Laboratory-9 hours. Prerequisite: Biological Sciences 2A; must take course 106 or Cell Biology and Human Anatomy 101 concurrently (or have already completed). Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass 2 open to Seniors in any major; Open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of prosected human cadavers in small group format with
extensive hands-on experience. (Same course as Cell Biology and Human Anatomy 101L.) GE credit: SciEng | SE.-II. (II.) Gross

## 110. Exercise Metabolism (3)

Lecture-3 hours. Prerequisite: course 101 or Neurobiology, Physiology and Behavior 101. Exercise metabolism, with emphasis on skeletal muscle and cardiac muscle metabolism during activity and inactivity. Basics of bioenergetics, substrate utilization, and cell signaling; mechanisms that regulate these properties, and differences between skeletal muscle and cardiac muscle metabolism. GE credit:
SciEng | SE.-III. (III.) Gomes

## 111. Environmental Effects on Physical

## Performance (3)

Lecture-2 hours; discussion/laboratory-3 hours. Prerequisite: courses 101 or consent of instructor. The effects of thermal, barometric and gravitational conditions on physiological function and physical performance of humans. Acute and chronic effects, emphasizing physiological adaptations and limitations, will be studied. GE credit: SciEng | QL, SE.II. (II.) Shaffrath

## 112. Clinical Exercise Physiology (4)

Lecture-3 hours; laboratory/discussion - 3 hours. Prerequisite: courses 101 or consent of instructor. Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods. GE credit: SciEng | SE, SL. -II. (II.) Harris, Shaffrath

## 113. Growth and Development in Human

 Performance (3)Lecture-3 hours. Prerequisite: Cell Biology and Human Anatomy 101, and Neurobiology, Physiology, and Behavior 101. Development of human performance potential from conception to old age, including influence of exercise, athletic participation, and preventive medicine. Alterations in motor skill patterns, morphology, and body composition, and physiological capacities with aging. GE credit: SciEng | SE.

## 115. Biomechanical Bases of Movement (3)

 Lecture-2 hours; laboratory-3 hours to alternate weekly with discussion-1 hour. Prerequisite: course 103 or consent of instructor. Biomechanical bases of human movement investigated; topics include mus-culo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application made to sport, clinical, and work environments, including extensive analysis of locomotion. GE credit: SciEng | QL, SE, VL, WE.-I. (I.) Liets116. Nutrition for Physically Active Persons (3)

Lecture-3 hours. Prerequisite: course 101, Neurobiology, Physiology, and Behavior 101. The role of nutrition and exercise in modifying metabolism, body composition, performance and health of humans. GE credit: SciEng | SE.

## 117. Exercise and Aging in Health and

## Disease (3)

Lecture-2 hours; discussion - 1 hour. Prerequisite: course 101 or 113 (concurrently). Etiology of and standard therapy for various diseases associated with aging (e.g., cardiovascular, pulmonary, and renal diseases, diabetes, obesity, lipemias, etc.). Exercise will then be considered as a protective and/or therapeutic modality. GE credit:
SciEng | SE. - III. (III.) Shaffrath

## 120. Sport in American Society (3)

Lecture - 3 hours. Sociological approaches to the study of sport and contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as Physical Education 120.) GE credit: SocSci, Div | SS. -I, III. (I, III.)
121. Advanced Sport Psychology (3) Lecture-3 hours. Prerequisite: course 102; Psychology 1 recommended. Advanced study and consideration of major theoretical and practical issues in sport psychology. Emphasis on practical application to sport and human performance.-Salitsky

## 122. Psychological Effects of Physical Activity (3)

Lecture-3 hours. Prerequisite: Psychology 1; upper division standing. Physical activity is evaluated in terms of its ability to enhance the quality of life. Topics studied include: individual factors (self concept, type A); special populations (elderly, cardiovascular); and mental health changes (depression, anxi-ety).-Salitsky

## 124. Physiology of Maximal Human Performance (4)

Lecture-3 hours; practice-4 hours. Prerequisite: course 101 or permission of instructor; Biological Sciences 101, 102, and 103 recommended. Molecular mechanisms underlying adaptation to training. Learn how to exercise to maximize their own performance as well as learning how the frequency, intensity and timing of exercise and nutrition affect the molecular signals that underlie performance. GE credit: SciEng | SE. - II. (II.) Baar

## 125. Neuromuscular and Behavioral Aspects of Motor Control (3)

Lecture-2 hours; lecture/discussion-2 hours. Prerequisite: course 101. Factors which affect control of movement from neuropsychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and closed loop theories, motor programming, cognitive learning strategies, and the effects of biochemical and biomechanical influences. GE credit: SciEng | SE.-Bodine

## 126. Tissue Mechanics (3)

Lecture-2 hours; laboratory/discussion-3 hours. Prerequisite: course 103 or Engineering 45 or consent of instructor. Structural and mechanical properties of biological tissues including bone, cartilage, ligaments, tendons, nerves, and skeletal muscle. (Same course as Biomedical Engineering 126.) GE credit: SciEng | QL, SE, SL, WE. - II. (II.) Hawkins

## 148. Theory and Practice of Exercise

 Testing (1)Lecture/discussion-1 hour. Prerequisite: course 112 (may be taken concurrently). Theory and practice of exercise testing applied to older adult populations. Physiological responses to and limitations of exercise testing. Application of exercise testing and training to healthy and diseased populations. (P/NP grading only.) GE credit: SE.-Casazza

## 148L. Adult Fitness Testing Laboratory (1)

 Laboratory-3 hours. Prerequisite: courses 148 (concurrently). Testing symptomatic and asymptomatic older adults for functional aerobic capacity, body composition, blood lipids, pulmonary function, and cardiovascular disease risk. Counseling adults in appropriate exercise programs and lifestyle modifications. Two quarters minimum; third quarter permitted. May be repeated two times for credit. (Former course Physical Education 148L) (P/NP grading only.) GE credit: QL, SE. - Casazza
## 179. Frontiers in Exercise Biology (3)

Lecture-2 hours; discussion - 1 hour. Prerequisite: courses 101, 102 and 103 (may be taken concurrently); 104L recommended. Lectures by leading authorities and discussion of the latest research in newly emerging areas in exercise biology. Offered every fourth year. GE credit: SciEng | SE. - III.
189. International Perspectives in Exercise Biology (4)
Lecture-4 hours. Prerequisite: course 10 or upper division standing in Exercise Biology; consent of instructor: students will be accepted based upon academic merit, personal experience, and academic discipline in order to provide multidisciplinary perspectives. Compare and contrast exercise science issues between the US and an international location. Identify political, economic, cultural, technological
and environmental issues that impact human exercise, physical activity, wellness, and sport from a global perspective. Limited enrollment. Offered irregularly.
190C. Research Conference (1)
Discussion-1 hour. Prerequisite: upper division standing in Exercise Biology or related biological science and consent of instructor; concurrent enrollment in course 199. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) - I. II, III. (I. II, III.)
192. Exercise Biology Internship (1-12) Internship-3-36 hours. Prerequisite: consent of instructor, dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required. May be repeated up to 15 units of credit, including course 92. (P/NP grading only.) -I, II, III. (I, II, III.)

## 194H. Research Honors (2)

Independent study-6 hours. Prerequisite: senior standing, minimum of 6 units of course 199, 3.500 GPA or greater in major courses, consent of honors thesis adviser. Completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty adviser, culminating in written honors thesis. (P/NP grading only.) GE credit: SE.-I, II, III. (I, II, III.)
197T. Tutoring in Exercise Biology (1-5) Tutorial-3-15 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in exercise biology course-related projects. May be repeated up to 10 units of credit including courses 97T, 97TC and 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.)-I, II, III. (I, II, III.)

197TC. Tutoring Exercise Biology in the Community (1-5)
Tutorial-3-15 hours. Prerequisite: consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 10 units of credit including courses 97T, 97TC, 197T. (P/NP grading only. - I, II, III. (I, II, III.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor and chairperson.
(P/NP grading only.) GE credit: SE.-I, II, III. (I, II,

## III.)

199. Special Study for Advanced

## Undergraduates (1-5)

Prerequisite: consent of chairperson. (P/NP grading only.)-I, II, III. (I, II, III.)

## Courses in Neurobiology, <br> Physiology, and Behavior (NPB)

## Lower Division

## 10. Elementary Human Physiology (3)

Lecture-3 hours. Introduction to physiology for nonscience majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health. Not open for credit to students who have completed course 101. GE credit: SciEng. - II. (II.) Bautista, Mogilner

## 12. The Human Brain and Disease (3)

 Lecture -3 hours. Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson's, Alzheimer's, leprosy, amnesia and schizophrenia. Intended for non-science majors. Not open for credit to students who have completed courses 100, 101, 112, or Psychology 121. GE credit: SciEng.-I. (I.) Cheng, Recanzone
## 14. Illusions: Fooling the Brain (3)

Lecture-3 hours. Introduction to perceptual processing in the human nervous system; illusions. GE credit: SciEng \| QL, SE, SL.-II. (II.) Ditterich

## 15. The Biology and Physiology of Aging

 (4)Lecture-3 hours; discussion - 1 hour. Broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. Some age-associated diseases will also be examined. Not open for credit to students who have completed course 15 V . GE credit: SciEng \| SE.
15V. The Biology and Physiology of Aging (4)

Web virtual lecture-3 hours; web electronic discussion -1 hour. Broad examination of the biological and physiological basis of aging in animals and plants. Concepts in demographic, evolutionary, genetic, and cell aging. Major human organ systems, age-related alterations in system function, and age-related diseases. Intended for non-science majors. Not open for credit to students who have completed course 15. GE credit: SciEng | SE, SL.III. (III.) McDonald

## 68. Biology of Drug Addiction and Abuse (3)

Lecture -3 hours. Broad examination of addictive substances and their use/abuse. Topics include historical perspective, physiological effects, etiology, neurobiology of addiction and the impact of drugs on contemporary society. Intended for non-science majors. Not open for credit to students having completed course 168. GE credit: SciEng. - (III.) Bautista
90A. Lower Division Seminar: Issues in Body Weight Regulation (2)
Seminar-2 hours. Prerequisite: lower division standing, consent of instructor. Critical examination of issues in body weight regulation through shared readings, discussions, written assignments, debates and oral presentations. Limited enrollment.-C. Warden

## 90B. Human Color Perception (2)

Seminar-2 hours; term paper. Prerequisite: lower division standing. The neural determinants of color appearance, and why we see the world in the way we do. Discussions center around demonstrations of color phenomena and what they tell us about the human brain. Limited enrollment. - Werner
90C. Current Issues in Animal Behavior (2) Seminar-2 hours. Prerequisite: lower division standing. The mechanisms and outcomes of sexual selection (mate choice and mate competition). Theory, current models and evidence that supports or refutes the models. Limited enrollment. - II. (II.) Hedrick

## 90D. Lower Division Seminar: Current

 Issues in Reproductive Endocrinology (2) Seminar-2 hours. Prerequisite: lower division standing. The integrative roles of reproductive hormones in mammalian reproduction and health. Current theory and models regarding hormone function and use in reproductive health and contraception, and evidence that supports or refutes the models. Offered irregularly.
## 90E. Biology of Aging (2)

Seminar-2 hours. Prerequisite: freshman standing. Current theories on the biology of aging covering genetic, biochemical, and physiological aspects.
Emphasis on critical evaluation of controversial and contemporary issues. Offered irregularly.

## 90F. Visual Impairment and Blindness: A

## World Wide Problem (2)

Seminar-2 hours. Prerequisite: lower division standing. Examination of various abnormalities of the eye and the important geographic and cultural factors that influence the epidemiology of those abnormalities. Offered irregularly.

## 91C. Research Conference (1)

Discussion - 1 hour. Prerequisite: Lower division standing in Neurobiology, Physiology, and Behavior or related biological science and consent of instructor; concurrent enrollment in course 99. Research findings and methods in neurobiology, physiology,
and/or behavior. Presentation and discussion of research by faculty and students. (P/NP grading only.) - I, III, III. (II, II, III.)

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: lower division standing; consent of instructor. Work experience off and on campus in all subject areas offered in the Department of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) -I, II, III. (II, II, III.)

## 98. Directed Group Study (1-5)

Prerequisite: lower division standing and consent of instructor. (P/NP grading only.)-I, II, III. (I, II, III.)
99. Special Study for Undergraduates (1-5) Prerequisite: lower division standing and consent of instructor. (P/NP grading only.) - I, II, III. (II, II, III.)

## Upper Division

## 100. Neurobiology (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Biological Sciences $1 A B$ or $2 A B C$; Physics $9 A B C$ or $7 A B C$. Brains and nervous systems, neurons and neural circuits. Coordination of movement. Development of nervous systems. Vision, hearing, and feature extraction by the central nervous system. The cell biology of learning and memory. Not open for credit to students who have completed course 112, 160,161 or 162 , or Neuroscience 221 or 222. GE credit: QL. -I, II, III. (II, II III.) Carstens, Cheng, Miller, Sutter, Zito

## 100L. Neurobiology Laboratory (3)

Lecture-1 hour; laboratory - 3 hours; extensive writing or discussion. Prerequisite: course 100 (may be taken concurrently). Experimental basis of neurobiology principles discussed in course 100. Topics include neurophysiology, sensory systems, motor systems, cellular neuroscience, cognitive neuroscience, and quantitative data analysis and modeling techniques. GE credit: SciEng|SE.-III. (III.) Goldman

## 100Q. Quantitative Foundations of

## Neurobiology (1)

Autotutorial-1.5 hours; extensive problem solving - 1.5 hours. Prerequisite: course 100 (may be taken concurrently). Computational methods and mathematical models used to study phenomena in neurobiology. Offered irregularly. GE credit: QL, VL. - Mogilner, Sutter

## 101. Systemic Physiology (5)

Lecture-5 hours. Prerequisite: Biological Sciences 1 A , or 2 A and Chemistry 2 B ; Physics 1 B or 7 C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. GE credit: SciEng | SE. -I, II, III. (I, II, III.) Bautista, Debello, Fuller, Furlow, Gomes, Ishida, Liets Usrey, Weidner
101L. Systemic Physiology Laboratory (3) Laboratory-3 hours; discussion - 2 hours; term paper. Prerequisite: course 101. Selected experiments to illustrate functional characteristics of organ systems discussed in course 101. - I, II, III. (II, II, III.) Bautista, Liets

## 102. Animal Behavior (3)

Lecture-3 hours. Prerequisite: Biological Sciences $1 A, 1 B, 1 C$, or $2 A, 2 B, 2 C$. Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed course 155. (Former course 155.) GE credit: SL. - II, III. (II, III.) Britten, Hahn, Nevitt

## 102Q. Quantitative Topics in Animal

## Behavior (1)

Autotutorial -1.5 hours; extensive problem solving - 1.5 hours. Prerequisite: Mathematics 16B; course 102 (may be taken concurrently). Study of
the quantitative concepts and exemplar models used in animal behavior. Offered irregularly. GE credit: SciEng.—Hahn
103. Cellular Physiology/Neurobiology (3) Lecture-3 hours. Prerequisite: Biological Sciences 103 or 105 , and 104; Physics 7 C recommended. Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells, and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed course 100B (Former course 100B.) Offered irregularly.

## 104L. Cellular Physiology/Neurobiology Laboratory (4)

Lecture - 1 hour; laboratory - 3 hours; discussion - 1 hour; term paper or discussion. Prerequisite: courses 101 and 101L; Biological Sciences 103 or 105 Experiments in the physical and chemical processes of cells and tissues. GE credit: Wrt. - II. (II.) Horwitz
105. Introduction to Computer Models (4) Lecture-3 hours; lecture/laboratory-1 hour. Prerequisite: Mathematics 16C or the equivalent, Physics $7 C$, Chemistry $2 C$, and course 100 or 101 . Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applications include membrane transport, ionic channels, action potentials, $\mathrm{Ca}^{2+}$ oscillations, respiration, and muscle contraction. Offered irregularly.

## 106. Experiments in Neurobiology, <br> Physiology, and Behavior: Design and

 Execution (3)Laboratory-7.5 hours; discussion-0.5 hours. Prerequisite: course 100 or 101 or 102 , and 199 and consent of instructor. Design and execution of experiments in neurobiology, physiology, and/or behavior. Students choose and design a project in consultation with the sponsoring faculty member. May be repeated one time for credit to complete the project, with consent of instructor. An additional repeat is permitted for a different project under the guidance of another faculty member. (P/NP grading only.) GE credit: OL, QL, VL, WE. -I, II, III. (II, II, III.) Rosenquist

## 107. Cell Signaling in Health and Disease

 (3)Lecture-3 hours. Prerequisite: Biological Sciences 102 or 105 . Basics of cell signaling pathways, their disruption in disease, and their current utility and future potential as therapeutic targets. Focus is on signaling pathways specific to nervous, endocrine and immune systems, and those fundamental to all cells. GE credit: SL. - II. (II.) Trimmer

## 111 C. Advanced Systemic Physiology

## Laboratory (3)

Lecture - 1 hour; laboratory -6 hours. Prerequisite: courses 101, 101L, Statistics 13; course 112, 113, or 114 recommended. Interfacing physiological recording equipment with microcomputers; data acquisition and analysis using the microcomputer; data interpretation within the framework of physiological concepts. Offered irregularly. GE credit: QL, VL, WE.

## 111 L. Advanced Systemic Physiology Laboratory (4)

Lecture - 1 hour; discussion -2 hours; laboratory - 6 hours; term paper. Prerequisite: courses 101 and 101L. Selected comprehensive experiments in the autonomic nervous system and the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches in demonstrating the physiology of organ systems. GE credit: Wrt. - II. (II.) Liets

## 112. Neuroscience (3)

Lecture -3 hours. Prerequisite: course 100 or 101 . Presentation of concepts in neuroscience including sensory systems, motor systems, and higher neural integration. Emphasis on mammalian nervous system. Offered irregularly. GE credit: SL.
113. Cardiovascular, Respiratory, and Renal Physiology (4)
Lecture-4 hours. Prerequisite: course 101; Chemistry 8 B , Physics 7 B and 7 C recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance.

## 114. Gastrointestinal Physiology (3)

Lecture-3 hours. Prerequisite: course 101; Biological Sciences 105 or 103 recommended, 105 preferred. Gastrointestinal anatomy and physiology. Digestion, secretion, absorption, motility, comparative physiology and pathology. Strong emphasis on neural and hormonal regulation and on cellular mechanisms of secretion and absorption.-I. (I.) Bautista, Horwitz

## 117. Avian Physiology (3)

Lecture-3 hours. Prerequisite: Biological Sciences $1 B$, or $2 A$ and $2 B$ and Chemistry $2 B$; course 101 strongly recommended. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems. - III. (III.) fion, excretion,
Hahn, Klasing

## 121. Physiology of Reproduction (4)

Lecture-4 hours. Prerequisite: course 101. Physiological mechanisms related to reproduction, breeding efficiency and fertility, with special reference to domestic animals. GE credit: QL, SL. - II. (II.) Berger

## 121L. Physiology of Reproduction <br> \section*{Laboratory (1)}

Laboratory -3 hours. Prerequisite: course 121 recommended (may be taken concurrently). Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.) - II. (II.) Berger

## 122. Developmental Endocrinology (3)

 Lecture-3 hours. Prerequisite: course 101. Hormonal control of development, maturation and senescence from the cellular to organismal level, with emphasis on the human. Prenatal and neonatal life, childhood and adolescence, adulthood and pregnancy, as well as the endocrinology of aging. Offered irregularly.
## 123. Comparative Vertebrate Organology

 (4)Lecture-3 hours; laboratory-3 hours. Prerequisite: Biological Science 1 A and 1 B or 2 A and 2 B . Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as Anatomy, Physiology and Cell Biology 100.) - II. Ginetos

## 124. Comparative Neuroanatomy (4)

 Lecture-3 hours; laboratory - 2 hours. Prerequisite: Psychology 101, or course 100 or 101. Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124.) GE credit: SL. - II. (II.) Krubitzer, Recanzone
## 125. Comparative Physiology:

Neurointegrative Mechanisms (3)
Lecture-3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: neurointegrative mechanisms of integration including aspects of phylogenetic development at both neuronal and systemic levels. Offered irregularly.

## 126. Comparative Physiology: Sensory Systems (3)

Lecture-3 hours. Prerequisite: course 100 or 101. Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanosensitive systems (audition, lateral lines, touch, echolocation, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electroreception, and pain. Emphasis on receptors. Offered irregularly.
127. Comparative Physiology: Circulation (3)

Lecture-3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: circulation. Comparative approach to cardiovascular function in vertebrates and invertebrates. Offered irregularly. GE credit: SL, VL.

## 128. Comparative Physiology:

## Endocrinology (3)

Lecture-3 hours. Prerequisite: course 101. Comparison of physiological functions in the animal kingdom: animal hormones and their functions. - II. (II.) Furlow, Chang

## 129. Comparative Physiology: Respiration

 (3)Lecture-3 hours. Prerequisite: course 101. Comparisons of physiological functions in the animal kingdom: respiration.

## 130. Physiology of the Endocrine Glands

 (4)Lecture-4 hours. Prerequisite: course 101.
Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease. GE credit: VL.-I. (I.) Adams

## 132. Nature vs. Nurture: Physiological

 Interactions Among Genes, Nutrients and Health (3)Lecture-3 hours. Prerequisite: Biological Sciences 1 A or 2A or consent of the instructor. Biochemical, physiological, genetic, and nutritional causes of important medical problems such as obesity, anorexia, heart disease and diabetes. One unit of credit allowed to students who have completed course 131. GE credit: SciEng.-I. (I.) Phinney, Warden

## 139. Frontiers in Physiology (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: courses 100 and 101; 102 (may be taken concurrently). Lectures by leading authorities and discussion of the latest research in newly emerging areas in physiology. Offered every fourth year. Offered irregularly. GE credit: SciEng \| QL, SE.
140. Principles of Environmental Physiology (3)
Lecture-3 hours. Prerequisite: course 101; Biological Sciences 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels.
Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.) GE credit: WE. - II. Fuller

## 141. Physiological Adaptation of Marine

 Organisms (3)Lecture-2 hours; laboratory-3 hours. Prerequisite: upper division standing; consent of the instructor; residence at Bodega Marine Laboratory required. Students must submit application available at http:// www.bml.ucdavis.edu. Physiological adaptation to the environment among organisms in marine and estuarine habitats. GE credit: QL, VL, WE. - III. (III.) Chang, Cheng, Cherr

## 141 P. Physiological Adaptation of Marine

 Organisms/Advanced Laboratory Topics (5) Laboratory- 12 hours; discussion - 1 hour. Prerequisite: course 141 concurrently; residence at Bodega Marine Laboratory required. Students must submit application available at http:// www.bml.ucdavis.edu. Training in scientific research from hypothesis to publication, including methods of library research. Research related to a topic covered in course 141. GE credit: VL, WE.-III. (III.) Chang, Cherr150. Advanced Animal Behavior (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: course 102 or Psychology 101. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and
analysis of the behavior of captive and free-living animals. (Same course as Psychology 122.) Offered irregularly. - Hahn
152. Hormones and Behavior (3)

Lecture-3 hours. Prerequisite: course 101, and either course 102 or Psychology 101. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as Psychology 123.) - III. (III.) Bales, Furlow, Hahn, Trainor, Wingfield

## 159. Frontiers in Behavior (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: courses 100, 101, 102. Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. Offered irregularly. GE credit: SciEng | QL, SE.

## 160. Molecular and Cellular Neurobiology

 (3)Lecture- 1.5 hours; discussion- 1.5 hours. Prerequisite: course 100, Biological Sciences 101 and consent of instructor. Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intracellular signal transduction pathways, synaptic physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neuromodulation of synaptic circuitry. (Same course as Neuroscience 160.) GE credit: VL.

## 160L. Advanced Cellular Neurobiology

 Laboratory (4)Laboratory-12 hours. Prerequisite: course 160, Physics 7C recommended. Students will learn to record neural activity, to interpret their recordings, and to label neurons with antibodies against neurotransmitters.
161. Developmental Neurobiology (3) Lecture-3 hours. Prerequisite: course 100 or 101. Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives. GE credit: SciEng | SE. - II. (II.) McAllister, Zito
162. Neural Mechanisms of Behavior (3) Lecture-3 hours. Prerequisite: course 100 or 101. The relationship between brain and behavior. Identification and analysis of the relevant neural circuits involved. Examples of systems to be considered are birdsong, locomotion, echolocation. - III. (III.) Britten

## 163. Systems Neuroscience (3)

Lecture-3 hours. Prerequisite: course 100 or equivalent basic neuroscience training with consent of instructor. Concepts and techniques in systems neuroscience: e.g., measuring and manipulating neural activity, structure of neocortex, sensory processing, motor control, short-term and long-term storage of information, neural codes, neural mechanisms underlying cognitive functions. GE credit: SE. - III. (III.) Ditterich

## 164. Mammalian Vision (4)

Lecture -3 hours; discussion -1 hour. Prerequisite: course 100, 112, or Psychology 101. Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision.-II. (II.) Britten, Werner
165. Neurobiology of Speech Perception (3) Lecture-3 hours. Prerequisite: course 100 or 101, or consent of instructor. Interdisciplinary approach to speech perception with emphasis on functional neuroanatomy and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development, and hearing impairment. GE credit: SL. - III. (III.) Miller
166. Math Tools for Neuroscience (4)

Lecture-4 hours. Prerequisite: course 100 or permission of instructor; Math 16A, B, C or equivalent; Physics 7C strongly recommended. Introduction to mathematics techniques used in neuroscience. Applications to neuroscience of differential equations, linear algebra, Fourier transforms, correlation and convolution, and probability theory. GE credit:

## QL. - Goldman

## 167. Computational Neuroscience (5)

Lecture-4 hours; lecture/laboratory-3 hours. Prerequisite: course 100 or permission of instructor; Math 17A, 17B, 17C, or equivalent; Physics 7A, B, $C$ or equivalent strongly recommended; consent of instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. Offered in alternate years. GE credit: SciEng | SE, QL. - (I.) Goldman
168. Neurobiology of Addictive Drugs (4) Lecture/discussion-4 hours. Prerequisite: course 100 or 101 or the equivalent. Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opiates (morphine, heroin, methadone), amphetamines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and antidepressants. GE credit: SL, VL. - III. (III.) Liets

## 169. Frontiers in Neurobiology (3)

Lecture-2 hours; discussion-1 hour. Prerequisite: courses 100 and 101, course 102 (may be taken concurrently). Lectures by leading authorities and discussion of the latest research in newly emerging areas in neurobiology. Offered every fourth year. Offered irregularly. GE credit: QL.
190C. Research Conference (1)
Discussion-1 hour. Prerequisite: upper division standing in Neurobiology, Physiology, and Behavior or related biological science and consent of instructor; concurrent enrollment in course 199. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) -I, II, III. (I, II, III.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Work experience off and on campus in all subject areas offered in neurobiology, physiology, \& behavior. May be repeated for credit. (P/NP grading only.) -I, II, III. (II, II, III.)
194HA-194HB-194HC. Neurobiology, Physiology, and Behavior-Honors (1-4-2) Laboratory-3-12 hours. Prerequisite: senior standing; minimum 3.500 GPA in courses counted toward major; approval by the Master Adviser. Honors proj ect in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) $-I$ II, III. (I, II, III.)
197T. Tutoring in Neurobiology, Physiology, and Behavior (1-5)
Discussion-2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit. (P/NP grading only.) - I, II, III. (I, II, III.)
198. Directed Group Study (1-5)
(P/NP grading only.) -I, II, III. (I, II, III.)
199. Special Study for Advanced Undergraduates (1-5)
(P/NP grading only.) -I, II, III. (I, II, III.)

## Graduate

211. Advanced Topics in Neuroimaging (2) Seminar-2 hours. Prerequisite: Psychology 210 or consent of instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. (Same course as Neuroscience 211 and Psychology 211.) (S/U grading only.) - II. (II.) Miller
212. Light and Fluorescence Microscopy (2) Lecture-2 hours. Prerequisite: consent of instructor. Restricted to maximum 16 students. Theory and practical application of light and fluorescence microscopy in the biological sciences. (S/U grading only.) - II. (II.) Zito

## 217. Advanced Avian Physiology (1)

Project-1 hour. Prerequisite: graduate standing and concurrent enrollment in course 117; consent of instructor. Study in depth of a topic in avian physiology through development of a lecture with associated instructional materials such as lesson plan, readings, presentation, and evaluation aids. - III.

## (III.) Millam

## 222. Systems Neuroscience (5)

Lecture-4 hours; discussion - 1 hour. Prerequisite: graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as Neuroscience 222.) - II. (II.) DeBello, Ditterich, Usrey

## 245. Computational Models of Cellular

## Signaling (3)

Lecture-3 hours. Prerequisite: consent of instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits. Offered irregularly.

## 247. Topics in Functional Neurogenomics

 (2)Lecture-1 hour; discussion - 1 hour. Prerequisite: graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as Neuroscience 247 .)

## 261 A. Topics in Vision: Eyes and Retinal

 Mechanisms (2)Lecture/discussion-2 hours. Prerequisite: graduate standing, course 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neuroscience 261A and Molecular, Cellular, and Integrative Physiology 261A.) (S/U grading only.) - (I.) Ishida

## 261 B. Topics in Vision: Systems,

Psychophysics, Computational Models (2)
Lecture/discussion-2 hours. Prerequisite: consent of instructor, course 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Neurobiology, Physiology, and Behavior 261B and Molecular, Cellular, and Integrative Physiology 261B.) (S/U grading only.) Offered in alternate years. - (II.) Britten

## 261C. Topics in Vision: Clinical Vision Science (2)

Lecture/discussion-2 hours. Prerequisite: courses 261 A and 261B or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neuroscience 261C and Molecular, Cellular, and Integrative Physiology 261C.) Offered irregularly. (S/U grading only.) - (III.) Werner
263. Modeling in Systems Neuroscience (4) Lecture-3 hours; lecture/laboratory-1 hour. Prerequisite: consent of instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electroreception, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity. Offered in alternate years.
267. Computational Neuroscience (5)

Lecture-4 hours; lecture/laboratory-3 hours. Prerequisite: one course in general neuroscience at the level of course 100; one year college-level Calculus at level of Math 16A, B, C; one year Physics at the level of Physics 7A, B, C, strongly recommended; students from other departments should contact the instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. Offered in alternate years. (Same course as Neuroscience 267.) - (I.) Goldman

## 270. How to Write a Fundable Grant

 Proposal (3)Lecture/discussion-3 hours. Prerequisite: graduate standing in a life science and consent of instructor. Familiarization with the skills required to craft a successful grant proposal submitted to extramural agencies such as NIH and NSF.
285. Literature in Visual Neuroscience (2) Seminar-2 hours. Literature in Visual Neuroscience. (Same course as Neuroscience 285.) May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.) Britten, Ditterich, Goldman, Usrey
287A. Topics in Theoretical Neuroscience (2) Seminar-2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. Offered in alternate years. May be repeated for credit. (Same course as Neuroscience 287A.) (S/U grading only.) -I. Ditterich, Goldman
287B. Topics in Theoretical Neuroscience (2) Seminar-2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same Course as Neuroscience 287B.) (S/U grading only.)-III. Ditterich, Goldman
291. Auditory Neuroscience (1)

Seminar- 0.5 hours; discussion- 0.5 hours. Prerequisite: course 100 or 112 or Neuroscience 222 or the equivalent. Exploration of various important aspects of auditory physiology, behavior and psychophysics through review of original literature. New topic each quarter. May be repeated for credit with consent of instructor. (S/U grading only.) -I, II, III. (I, II, III.) Recanzone, Sutter

## Faculty

Leonard J. Abbeduto, Ph.D., Professor
(Psychiatry and Behavioral Sciences)
David Amaral, Ph.D., Professor
(Psychiatry and Behavioral Sciences)
Julie Barkmeier-Kraemer, Ph.D., Professor (Otolaryngology)
Robert Berman, Ph.D., Professor (Neurological Surgery)
Laura Borodinsky, Ph.D., Assistant Professor (Physiology and Membrane Biology)
Kenneth H. Britten, Ph.D., Professor (Neurobiology, Physiology, and Behavior)
Marie Burns, Ph.D., Professor
(Ophthalmology and Vision Science)
Earl E. Carstens, Ph.D., Professor (Neurobiology, Physiology, and Behavior)
Cameron Carter, M.D., Protessor
(Psychiatry and Behavioral Science)
Tsung-Yu Chen, M.D., Ph.D., Professor (Neurology)
Hwai-Jong Cheng, M.D., Ph.D., Professor
(Neurobiology, Physiology, and Behavior)
Gino Cortopassi, Ph.D., Professor (Molecular Biosciences)
Jacqueline Crawley, Ph.D., Professor (Psychiatry)
William DeBello, Ph.D., Associate Professor (Neurobiology, Physiology, and Behavior)
Charlie DeCarli, M.D., Professor (Neurology)
Wenbin Deng, Ph.D., Associate Professor (Cell Biology and Human Anatomy)
Elva Diaz, Ph.D., Associate Professor (Pharmacology)
Jochen Ditterich, Ph.D., Assistant Professor
(Neurobiology, Physiology, and Behavior)
Arne Ekstrom, Ph.D., Assistant Professor (Psychology)
Michael Ferns, Ph.D., Professor
(Anesthesiology and Pain Medicine)
Joy Geng, Ph.D., Assistant Professor (Psychology)
Mark Goldman, Associate Professor
(Neurobiology, Physiology and Behavior)
Qizhi Gong, Ph.D., Associate Professor (Cell Biology and Human Anatomy)
Fredric Gorin, M.D., Ph.D., Professor (Neurology)
John Gray, M.D., Ph.D., Assistant Professor
(Neurology)
Paul Hagerman, M.D., Ph.D., Professor
(Biochemistry and Molecular Medicine)
Randi Hagerman, M.D., Professor (Pediatrics)
Johannes Hell, Ph.D., Professor
Andrew T. Ishida, Ph.D., Professor
(Neurobiology, Physiology, and Behavior)
Petr Janata, Ph.D., Associate Professor (Psychology)
Lee-Way Jin, Ph.D., Professor (Pathology)
Paul S. Knoepfler, Ph.D., Associate Professor
(Cell Biology and Human Anatomy)
Leah Krubitzer, Ph.D., Professor (Psychology)
Janine LaSalle, Ph.D., Professor
(Medical Microbiology and Immunology)
Pamela Lein, Ph.D., Professor
(Molecular Biosciences)
Steven Luck, Ph.D., Professor (Psychology)

Bruce Lyeth, Ph.D., Professor
(Neurological Surgery)
G. R. Mangun, Ph.D., Professor (Psychology)
Martinez-Cerdeno, Veronica, Ph.D., Assistant Professor (Pathology)
A. Kimberley McAllister, Ph.D., Professor (Neurology, and Neurobiology, Physiology and Behavior)
Lee Miller, Ph.D., Associate Professor (Neurobiology, Physiology, and Behavior)
Brian Mulloney, Ph.D., Professor
(Neurobiology, Physiology, and Behavior)
Liping Nie, Ph.D., Assistant Professor
(Otolaryngology)
Stephen Noctor, Ph.D., Assistant Professor
(Psychiatry and Behavioral Sciences)
John Olichney, M.D., Professor (Neurology)
Isaac N. Pessah, Ph.D., Professor
(Molecular Biosciences)
David Pleasure, M.D., Professor (Neurology and Pediatrics)
Edward N. Pugh, Ph.D., Professor (Physiology and Membrane Biology)
J. Daniel Ragland, Ph.D., Professor
(Psychiatry and Behavioral Sciences)
Charan Ranganath, Ph.D., Professor (Psychology)
Gregg H. Recanzone, Ph.D., Professor (Neurobiology, Physiology, and Behavior)
David Richman, M.D. Professor (Neurology)
Susan Rivera, Ph.D., Professor (Psychology)
Kiarash Shahlaie, M.D., Ph.D., Assistant Professor (Neurological Surgery)
Frank Sharp, M.D., Professor (Neurology)
Tony Simon, Ph.D., Professor
(Psychiatry and Behavioral Sciences)
Danielle Stolzenber, Ph.D., Assistant Professor (Psychology)
Mitchell L. Sutter, Ph.D., Professor (Neurobiology, Physiology, and Behavior)
Diane Swick, Ph.D., Associate Adjunct Professor (Neurology)
Lin Tian, Ph.D., Assistant Professor (Biochemistry and Molecular Medicine)
Brian Trainor, Ph.D., Associate Professor (Psychology)
James Trimmer, Ph.D., Professor
(Neurobiology, Physiology, and Behavior)
W. Martin Usrey, Ph.D., Professor (Neurobiology, Physiology, and Behavior and Neurology)
Ana Elena Vazquez, Ph.D., Associate Adjunct Professor (Otolaryngology)
John S. Werner, Ph.D., Professor (Ophthalmalogy and Vision Science)
Brian Wiltgen, Ph.D., Assistant Professor (Psychology)
David Woods, Ph.D., Adjunct Professor (Neurology)
Yang (Kevin) Xiang, Ph.D., Associate Professor (Pharmacology)
Ebenezer Yamoah, Ph.D., Professor (Otolaryngology)
Andrew Yonelinas, Ph.D., Professor (Psychology)
Konstantinos Zarbalis, Ph.D., Assistant Professor (Pathology)
Min Zhao, M.D., Ph.D., Professor (Dermatology)
Chengii Zhou, Ph.D., Assistant Professor (Cell Biology and Human Anatomy)
Karen Zito, Ph.D., Assistant Professor
(Neurobiology, Physiology, and Behavior)

## Emeriti Faculty

Leo M. Chalupa, Ph.D., Professor
(Neurobiology, Physiology, and Behavior)
Edward G. Jones, M.D., Ph.D., Professor (Psychiatry)
Karen Sigvardt, Ph.D., Adjunct Professor (Neurology)
Graduate Study. The Graduate Group in Neuroscience offers programs of study leading to the Ph.D. degree. Neuroscience is a broad, interdepartmental program with faculty interests ranging from molecu-
lar biophysics of channels to cortical organization and cognition. A major goal of the program is to prepare students for careers as research scientists. Details of the program may be obtained from the Group office.
Graduate Advisers. R. Berman (Neurological Surgery), A. Ekstrom (Psychology), A.K. McAllister (Neurology and Neurobiology, Physiology, and Behavior), W. M. Usrey (Neurobiology, Physiology, and Behavior), B. Wiltgen (Psychology)

## Courses in Neuroscience (NSC) <br> Upper Division

160. Molecular and Cellular Neurobiology (3)

Lecture- 1.5 hours; discussion- 1.5 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100, Biological Sciences 101 and consent of instructor. Selected topics in neurobiology. Topics include channel biophysics, action potential propagation, intracellular signal transduction pathways, synaptic
physiology and quantal analysis, cellular mechanisms of synaptic plasticity, and neuromodulation of synaptic circuitry. (Same course as Neurobiology,
Physiology, and Behavior 160.) GE credit: VL.-III.

## (III.) Burns, Mulloney

## Graduate

200LA. Laboratory Methods in

## Neurobiology (6)

Laboratory- 18 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated three times for credit. ( $S / U$ grading only.) -I, II, III. (I, II, III.)
200LB. Laboratory Methods in

## Neurobiology (3)

Laboratory - 9 hours. Prerequisite: graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member.
Research problems emphasize the use of contemporary methods and good experimental design. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 201. Neuroanatomy (3)

Lecture-2 hours; laboratory/discussion-1 hour. Prerequisite: consent of instructor. Mix of lectures, demonstrations, and dissections, emphasizing functional significance of neuroanatomy from a biological perspective, with comparisons between human and non-human brains. Emphasis placed on functional anatomy of the nervous system, integrated with cellular, molecular, cognitive, and developmental concepts. Limited enrollment.-I. (I.) Amaral
211 . Advanced Topics in Neuroimaging (2) Seminar-2 hours. Prerequisite: Psychology 210 or consent of instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of $\operatorname{FMRI}$ with EEG/MEG. (Same course as Neurobiology, Physiology, and Behavior 211 and Psychology 211.) (S/U grading only.) - II. (II.) Miller

## 220. How to Give a Scientific Seminar (3)

 Lecture/discussion-3 hours. Prerequisite: consent of instructor. Presentation of effective seminars. Student presentations of selected neuroscience topics in seminar format. Must be taken in two consecutive quarters. Offered in alternate years. - II, III. (II, III.)
## DeBello, McAllister

## 221. Cellular Neurophysiology (4)

Lecture-4.5 hours. Prerequisite: graduate standing or consent of instructor. Physiological aspects of cellular and subcellular organization of the nervous system. Neuronal cell biology, the structure and function of ion channels, electrical excitability, signaling cascades, sensory transduction and, mechanisms of synaptic transmission, and the cellular basis of learning and memory.-I. (I.) Burns

## 222. Systems Neuroscience (5)

Lecture-4 hours; discussion - 1 hour. Prerequisite graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as Neurobiology, Physiology, and Behavior 222.)-II. (II.) DeBello, Ditterich, Usrey

## 223. Cognitive Neuroscience (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as Psychology 261.) - III. (III.) Swaab

## 224A. Molecular and Developmental

 Neurobiology (2)Lecture/discussion-2 hours. Prerequisite: consent of instructor. Key issues in developmental and molecular neurobiology. Discussion emphasis on critical evaluation of the experiments and methods described in research papers. Readings of seminal, primary research papers, reviews, and book chapters. Reading materials will be distributed one week in advance.-II. (II.) Cheng, Diaz

## 224B. Molecular and Developmental

 Neurobiology (2)Lecture/discussion-2 hours. Prerequisite: course 224 A or consent of instructor. Continuation of course 224A. Key issues in developmental and molecular neurobiology, focusing on developmental topics. Discussion emphasis on critical evaluation of experiments and methods described in associated lit-erature.-III. Cheng, Diaz

## 225. Translational Research in the

Neurobiology of Disease (2)
Lecture-1 hour; discussion-1 hour. Prerequisite: Past or concurrent enrollment in Neuroscience courses 221, 222, 223, or permission of instructor; restricted to current graduate student enrollment or permission of instructor. This course will provide an overview of major neuropsychiatric and neurological disorders from both the clinical and fundamental science perspectives. Offered in alternate years.-II. McAllister

## 226. Molecular and Developmental Neurobiology (4)

Lecture/discussion-4 hours. Prerequisite: consent of instructor. Introduction to molecular and developmental neurobiology. Topics range from neurulation to development of sensory systems and include modern molecular methods and their application in developmental neuroscience.-II. (II.) McAllister

## 243. Topics in Cellular and Behavioral

## Neurobiology (2)

Discussion-1 hour; seminar-1 hour. Prerequisite: consent of instructor. An advanced examination of several current problems in neurobiology. Topics will vary in different years; may be repeated for credit. (S/U grading only.) - III. (III.) Ishida

## 247. Topics in Functional Neurogenomics

 (2)Lecture-1 hour; discussion - 1 hour. Prerequisite: graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as Neurobiology, Physiology, and Behavior 247.)-II. Choudary

## 250. Biology of Neuroglia (2)

Lecture/discussion-1.5 hours. Prerequisite: consent of instructor. The properties and functions of non-neuronal or neuroglial cells in the mammalian central nervous system with relevance to neuronal development, physiology and injury response. Offered in alternate years. (Same course as Cell Biology and Human Anatomy 250.) (S/U grading only.)-III.

## 261 A. Topics in Vision: Eyes and Retinal

 Mechanisms (2)Lecture/discussion-2 hours. Prerequisite: graduate standing, Neurobiology, Physiology, and Behavior 100 or 112 or the equivalent. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as Neurobiology, Physiology, and Behavior 261A and Molecular, Cellular, and Integrative Physiology 261A.) (S/U grading only.) Offered in alternate years.-I.

## 261B. Topics in Vision: Systems,

Psychophysics, Computational Models (2) Lecture/discussion-2 hours. Prerequisite: consent of instructor, course 261 A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as Neurobiology, Physiology, and Behavior 261B and Molecular, Cellular, and Integrative Physiology 261B.) (S/U grading only.) Offered in alternate years. - II. Britten

## 261C. Topics in Vision: Clinical Vision

## Science (2)

Lecture/discussion-2 hours. Prerequisite: courses 261 A and 261B, or consent of instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as Neurobiology, Physiology, and Behavior 261C and Molecular, Cellular, and Integrative Physiology 261C.) (S/U grading only.)
Offered in alternate years. - III. Werner
267. Computational Neuroscience (5)

Lecture-4 hours; lecture/laboratory-3 hours. Prerequisite: one course in general neuroscience at the level of course 100; one year college-level Calculus at level of Math 16A, B, C; one year Physics at the level of Physics 7A, B, C, strongly recommended; students from other departments should contact the instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. Offered in alternate years. (Same course as Neurobiology, Physiology \& Behavior 267.) - (I.) Goldman

## 283. Neurobiological Literature (1)

Seminar-1 hour. Prerequisite: consent of instructor. Critical presentation and analysis of recent journal articles in neurobiology. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
284. Development of Sensory Systems (1) Seminar-1 hour. Prerequisite: consent of instructor. Presentation and discussion of recent literature on the development of sensory systems. May be repeated for credit. (S/U grading only.) - II, III. (II, iII.) Cheng

## 285. Literature in Visual Neuroscience (2)

Seminar-2 hours. Critical presentation and discussion of current literature in visual neuroscience. (Same course as Neurobiology, Physiology, and Behavior 285.) May be repeated for credit if topic differs. (S/U grading only.) - I, II, III. (I, II, III.) Usrey, Britten
287 A. Topics in Theoretical Neuroscience (2)
Seminar-2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit.
(Same course as Neurobiology, Physiology \& Behavior 287A.) (S/U grading only.) - (I.) Ditterich, Goldman

287B. Topics in Theoretical Neuroscience (2)
Seminar-2 hours. Prerequisite: consent of instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit.
(Same Course as Neurobiology, Physiology \&
Behavior 287B.) (S/U grading only.) - III. (III.) Ditterich, Goldman

## 289. Topics in Molecular and <br> Developmental Neurobiology (2)

Seminar-2 hours. Analysis and discussion of seminal and current research papers in molecular and developmental neurobiology. Different topics will be covered each quarter. In the past topics have included, "Synaptic vesicle dynamics," "Neuronal polarity," and "Glutamate receptors." May be repeated ten times for credit when topic differs. (S/U grading only.) - II, III. (II, III.) Diaz, Zito

## 290C. Research Conference in

 Neurobiology (1)Discussion-1 hour. Prerequisite: graduate standing in Neuroscience or consent of instructor; course 299 (concurrently). Presentation and discussion of faculty and graduate student research in neurobiology. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
292. Cortical Plasticity and Perception (2) Lecture/discussion-2 hours. Prerequisite: Neurobiology, Physiology, and Behavior 100 or 112 or equivalent or consent of instructor. Examination of research articles on cortical plasticity and changes in perception. Examples drawn from studies of the somatosensory, visual, auditory, and motor cortex. (Same course as Neurobiology, Physiology, and Behavior 292.) Offered in alternate years. (S/U grading only.) - (II.)
298. Group Study (1-5)
(S/U grading only.)
299. Research (1-12)
(S/U grading only.)

## Nursing, School of, Betty Irene Moore

Heather M. Young, Ph.D., R.N., F.A.A.N.;<br>Associate Vice Chancellor for Nursing, UC Davis, and Dean, Betty Irene Moore School of Nursing<br>Deborah Ward, Ph.D., R.N., F.A.A.N., Associate Dean for Academics and Clinical Professor<br>Jill G. Joseph, M.D., Ph.D., M.P.H.; Associate Dean for Research and Professor<br>4610 X St., Suite 4202<br>Sacramento, CA 95817<br>916-734-2145<br>http://nursing.ucdavis.edu<br>\section*{Mission Statement}<br>The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through

immersive, interprofessional and interdisciplinary education and research in partnership with the communities serves. Faculty, staff and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

## Nursing Science and Health-Care Leadership Graduate Degree Program

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The fulltime, academic, doctoral program prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master's-degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master'sdegree leadership program are prepared for healthcare leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the mas-ter's-degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

## Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide crosssection of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields. For a complete list of faculty, see http://nursing.ucdavis.edu.

## Courses in Nursing (NRS)

Doctoral and master's-degree leadership core courses are listed below.
Current course listings for the master's-degree physician assistant and master's-degree nurse practitioner programs are listed at the School of Nursing website. For more information, see http:// nursing.ucdavis.edu.
Core Courses. For a current listing of courses offered through the School of Nursing, please see http://nursing.ucdavis.edu.

## Graduate

201. Health Status and Care Systems (4)

Lecture/discussion-3 hours; laboratory/discussion; project. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Comparative health status data, major current health issues globally, nationally, regionally. Theoretical perspectives on social, political, economic determinants of health. Health-care systems examined, linked to data, and evaluated in regards to outcomes. Aging, rural, ethnic minority populations highlighted.-I. (I.)

## 202. Implementation Science (4)

Lecture/discussion-4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Change processes in health care from political, historic, economic and sociologic frameworks. Historic and current examples of transformative change in the health-care system. Skills for system transformation through health policy, practice, research and education are emphasized.-III. (III.)

## 203. Leadership in Health Care (4)

Lecture/discussion-3 hours; fieldwork. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Critical examination of leadership from a variety of theoretical and philosophical perspectives and focuses on specific challenges in health care and leadership at various levels, e.g., patient, organizational, and policy levels.-II. (II.)
204. Research Skills for Nursing Science and Health-Care Leadership (4) Lecture/discussion-3 hours; laboratory/discus-sion-1 hour. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Foundation for analyzing research, health, and systems data to answer clinical, systems, or policy questions. Use and examine multiple sources of data and information as a basis for planned change and transformation in health care.-II. (II.)

## 205. Research Design in Nursing and Health Care (4)

Lecture/discussion-4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Major types of quantitative and qualitative research design and their application to nursing and health-care research. Implications of choosing alternative research designs and critical analysis of philosophical underpinnings. Evaluation of control and validity, sampling, instruments to measure health concepts. - III. (II.)
206. Community Connections (2-5)

Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only. Community-based learning and experiences including community participation, assessment, data collection and analysis using multiple approaches, community health improvement projects, collaborative leadership practice, all with the guidance of community members and nursing faculty. May be repeated for credit. -I, II, III. (I, II, III.)
210Y. Applied Health Informatics (4)
Lecture/discussion-1 hour; web virtual lecture-3 hours. Open to current student in NSHL graduate programs or consent of instructor. Within the conceptual framework of the Foundation of Knowledge model, this course integrates nursing science, information science, computer science and cognitive science to acquire, process, generate and disseminate knowledge.-I, II. (I, II.)
290. Master's Seminar (2)

Discussion-2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only or by consent of course instructor of record. Subject varies from quarter to quarter. Current knowledge and issues relevant to one of two fields of emphasis: population health or health systems. May be repeated 10 times for credit. - I, II, III. (I, II, III.)

## 291. Doctoral Seminar (2)

Discussion-2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care. May be repeated 10 times for credit. - I, II, III. (I, II, III.)

## 291 D. Doctoral Seminar (2)

Discussion-2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care. May be repeated 10 times for credit.-I, II, III. (I, II, III.)
298. Special Topics in Nursing Science and Health-Care Leadership (1-4)
Lecture/discussion-1-2 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of
science, or other related areas, with year to year variation. May be repeated for credit. Offered irregularly. - I, II, III. (II, II, III.)

## 298V. Online Special Topics in Nursing

Science and Health-Care Leadership (1-4)
Web virtual lecture-1-4 hours; web electronic dis-cussion-1-4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Offered irregularly.-I, II, III. (I, II, III.)
299. Research and Writing (1-12)

Extensive writing or discussion-3-36 hours. Prerequisite: consent of instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) -I, II, III. (II, II, III.)

## 299D. Dissertation Research and Writing

 (1-12)Extensive writing or discussion - $3-36$ hours. Prereqvisite: consent of instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct dissertation research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Professional

301. Methods for Teaching Nursing and Health Sciences: Use of Simulation (4) Lecture/discussion-4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Simulation education reviewed as a teaching tool in nursing and health sciences; explores how to integrate simulation into individual courses. Emphasis placed on simulations that include clinical judgment, teamwork, and interdisciplinary
communication. Offered in alternate years. - I.
302. Methods for Teaching Nursing and Health Sciences: Curriculum and Instruction (4)

Lecture/discussion-4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Best practices in adult learning, performancebased curriculum models and instructional design. Experience in planning student-centered learning activities that are engaging and effective in achieving desired student performance. Use of distance technologies, case-based teaching, clinical teaching, role of clinical teacher. Offered in alternate years. II.
303. Methods for Teaching Nursing and Health Sciences: Assessment/Evaluation of Learning (4)
Lecture/discussion-4 hours. Prerequisite: current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Application of approaches, processes, and tools for assessing adult learning, especially those that assess the student's ability to use knowledge/skills in practical situations. Other topics include: design of performance evaluation tasks, instructional rubrics, use of portfolios, grading, and reporting. Offered in alternate years. - (III.)

## Professional

400. Basic Clinical Skills (1-4)

Lecture/laboratory-1-4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Instruction and practice of the fundamental clinical skills necessary for patient care comprise this course with a primary focus on principles of effective communication in establishing the therapeutic provider-patient relationship. - I, II, III, IV. (I, II, III, IV.)
401. Basic Clinical Skills (1-4)

Lecture/laboratory - 1-4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content. -I, II, III, IV. II, II, III, IV.)

## 410A. Advanced Clinical Skills (1-4)

Lecture/laboratory - 1-4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with
advanced/specialized content. -I, II, III, IV. II, II, III, IV.)

410B. Advanced Clinical Skills (1-4)
Lecture/laboratory-1-4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. -I, II, III, IV. (I, II, III, IV.)

## 410C. Advanced Clinical Skills (1-4)

Lecture/laboratory - 1-4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. - I, II, III, IV. (I, II, III, IV.)
410D. Advanced Clinical Skills (1-4)
Lecture/laboratory - 1-4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. -I, II, III, IV. (I, II, III, IV.)

## 410E. Advanced Clinical Skills (1-4)

Lecture/laboratory - 1-4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. - I, II, III, IV. (I, II, III, IV.)

## 410F. Advanced Clinical Skills (1-4)

Lecture/laboratory - 1-4 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. -I, II, III, IV. (I, II, III, IV.)
440. Supervised Clinical Hours (1-3)

Clinical Activity -36 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty. - I, II, III, IV. (I, II, III, IV.)

## 450A. Supervised Clinical Practice-Primary

 Health Care (1-16)Clinical activity-48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. -I, II, III, IV. II, II, III, IV.)

450B. Supervised Clinical Practice-Primary Health Care (1-16)
Clinical activity - 48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice expe-
rience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. -I, II, III, IV. (I, II, III, IV.)

450C. Supervised Clinical Practice-Primary Health Care (1-16)
Clinical activity-48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. - I, II, III, IV. II, II, III, IV.)

## 450D. Supervised Clinical Practice-Primary

 Health Care (1-16)Clinical activity- 48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rota-
tions is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. - I, II, III, IV. II, II, III, IV.)

## 450E. Supervised Clinical Practice-Primary

 Health Care (1-16)Clinical activity -48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. - I, II, III, IV. II, II, III, IV.)

## 45 1. Supervised Clinical Practice-Pediatrics

 (1-16)Clinical activity - 48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Pediatric Medicine provider per accreditation requirements. - I, II, III, IV. (I, II, III, IV.)

## 452. Supervised Clinical Practice-Women's

 Health (1-16)Clinical activity - 48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based women's health and prenatal care provider per accreditation requirements. -I, II, III, IV. (II, II, III, IV.)

## 453. Supervised Clinical Practice-Mental

 Health (1-16)Clinical activity-48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based psychiatrist, psychiatric/mental health provider per accreditation requirements. - I, II, III, IV. (I, II, III, IV.)

## 454. Supervised Clinical Practice-

## Emergency Medicine (1-16)

Clinical activity-48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate Emergency Medicine provider per accreditation requirements. - I, II, III, IV. (I, II, III, IV.)

## 455. Supervised Clinical Practice-Inpatient Surgery (1-16)

Clinical activity-48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical experience under the supervision of an appropriate surgical provider per accreditation requirements. -I, II, III, IV. (II, II, III, IV.)
456. Supervised Clinical Practice-Inpatient Medicine (1-16)
Clinical activity-48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate inpatient provider per accreditation requirements. -I, II, III, IV. (I, II, III, IV.)

## 459. Supervised Clinical Practice-Other

 Specialties (1-16)Clinical activity -48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Two four-week selective rotations are available to accommodate student interest and/or accommodate a student's clinical deficits identified by the program. -I, II, III, IV. (I, II, III, IV.)

## 470. Health Care Ethics (3-9)

Lecture/discussion-2 hours; laboratory/discus-sion-1 hour. Prerequisite: consent of instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as General Medicine 470 .) (S/U grading only.) -I, II, III, IV. (I, II, III, IV.) Loewy 471. Supervised Clinical Practice-Geriatrics (1-16)
Clinical activity-48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Geriatric Medicine provider per accreditation requirements. -I, II, III, IV. (I, II, III, IV.)

## 475. Supervised Clinical Practice-Acute <br> \section*{Care (1-16)}

Clinical activity-48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. A two to four week rotation focus on providing acute care in inpatient settings. Students will work directly with specific inpatient units.-I, II, III, IV. (I, II, III, IV.)

## 480. Supervised Clinical Practice-Rural

 Health (1-16)Clinical activity - 48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Rural health rotations focus on providing care in medically underserved rural sites. Students will experience care across the continuum in ambulatory, inpatient, and community based settings. -I, II, III, IV. (I, II, III, IV.)

## 490. Supervised Clinical Practice-Quality

 and Safety (1-16)Clinical activity -48 hours. Open to Graduate Students in the Nursing Science and Health-Care Leadership Graduate Degree programs, or by consent of instructor. Clinical rotation that allow students to work directly with patient safety and quality improvement committees in a various organizations.-I, II, III, IV. (I, II, III, IV.)
493A. Improving Quality in Health Care (3) Lecture - 8 hours; discussion/laboratory - 10 hours; project-10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Medical Sciences 493QA.) (S/U grading only; deferred grading only, pending completion of sequence.)-I. (I.)

493B. Improving Quality in Health Care (3) Lecture-8 hours; discussion/laboratory - 10 hours; project-10 hours. Prerequisite: consent on instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (Same course as Medical

Sciences 493QB.) (S/U grading only; deferred grading only, pending completion of sequence.)-II. (II.)

## 493C. Enhancing Patient Safety in Health Care (3)

Seminar-1 hour; clinical activity-1 hour; discus-sion-1 hour. Prerequisite: Nursing Science and Health-Care Leadership graduate students; consent of instructor. Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for inter-professional educational experience. (Same course as Medical Sciences 493QC.) (S/U grading only.) - III. (III.)

## Nutrition

See Clinical Nutrition, on page 203; Food Service Management, on page 315; Nutrition; Nutritional Biology (A Graduate Group), on page 457; Nutrition Science, on page 458.

## Nutrition

(College of Agricultural and Environmental Sciences) Francene M. Steinberg, Ph.D., RD., Chair of the Department
Lucia Kaiser, Ph.D., Vice Chairperson of the Department
Department Office. 3135 Meyer Hall

## Faculty

Elizabeth Applegate, Ph.D., Senior Lecturer (SOE)
Academic Senate Distinguished Teaching Award Gary Cherr, Ph.D., Professor
(Nutrition, Environmental Toxicology)
Kathryn G. Dewey, Ph.D., Distinguished Professor
Nilesh W. Gaikwad, Ph.D., Assistant Professor (Nutrition, Environmental Toxicology)
Fawaz G. Haj, Ph.D., Associate Professor (Nutrition, Internal Medicine)
Carl L. Keen, Ph.D., Distinguished Professor (Nutrition, Internal Medicine)
Bo L. Lönnerdal, Ph.D., Distinguished Professor (Nutrition, Internal Medicine)
Roger McDonald, Ph.D., Professor
Patricia Oteiza, Ph.D., Professor
(Nutrition, Environmental Toxicology)
Carolyn M. Slupsky, Ph.D., Associate Professor (Nutrition, Food Science \& Technology)
Francene M. Steinberg, Ph.D., R.D., Professor and Chair
Christine Stewart, Ph.D., Assistant Professor Angela Zivkovic, Ph.D., Assistant Professor

## Emeriti Faculty

Lindsay H. Allen, Ph.D., Professor Emeritus Kenneth H. Brown, M.D., Professor Emeritus Andrew J. Clifford, Ph.D., Professor Emeritus Louis E. Grivetti, Ph.D., Professor Emeritus Janet King, Ph.D., Professor Emeritus
Robert B. Rucker, Ph.D., Professor Emeritus Barbara O. Schneeman, Ph.D., Professor Emeritus Judith S. Stern, Sc.D., R.D., Professor Emeritus

## Affiliated Faculty

Sean Adams, Ph.D., Associate Adjunct Professor Ellen Bonnel, Ph.D., Academic Administrator Betty Burri, Ph.D., Adjunct Professor
Britt Burton-Freeman, Ph.D., Associate Research Nutritionist
Joan Frank, M.S., R.D., Academic Coordinator/ Lecturer
Ellen Fung, Ph.D., R.D., Associate Adjunct Professor
Robert M. Hackman, Ph.D., Research Nutritionist

Mariorie Haskell, Ph.D., Associate Researcher Peter Havel, Ph.D., D.V.M., Professor
Wayne Hawkes, Ph.D., Assistant Adjunct Professor M. Jane Heinig, Ph.D., Academic Administrator Sonja Hess, Ph.D., Associate Project Scientist
Liping Huang, Ph.D., Associate Adjunct Professor
Daniel Hwang, Ph.D., Adjunct Professor
Lucia Kaiser, Ph.D., R.D., Specialist in Cooperative Extension
Nancy Keim, Ph.D., Adjunct Professor
Darshan Kelley, Ph.D., Adjunct Professor
Kevin Laugero, Ph.D., Assistant Adjunct Professor
Lovise Lanoue, Ph.D., Associate Project Scientist
Roy Martin, Ph.D., Adjunct Professor
John Newman, Ph.D., Associate Adjunct Professor
Charles Stephensen, Ph.D., Adjunct Professor
Marilyn S. Townsend, Ph.D., R.D., Specialist in Cooperative Extension
Janet Uriu-Adams, Ph.D., Associate Researcher Marta Van Loan, Ph.D., Adjunct Professor
Sheri Zidenberg-Cherr, Ph.D., Specialist in
Cooperative Extension
Susan Zunino, Ph.D., Associate Adjunct Professor
Major Programs. See the majors in Clinical Nutrition, on page 203 and Nutrition Science, on page 458.

## Minor Program Requirements:

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.
Note: If the student's major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor. Each program below lists replacement courses to fulfill the minimum unit requirement.

UNITS
Community Nutrition ............................. 20
Preparation. Plan in advance to include the required course prerequisites.
Nutrition 111 AV and 111 B ...................... 5
Nutrition 118, 192 (2 units) ..................... 6
Nutrition 120AN or 120BN ..................... 4
Neurobiology, Physiology, and Behavior 101.

Replacement courses; see note above:
Nutrition 114, 116A-116B, $116 \mathrm{AL}-116 \mathrm{BL}$.
Food Service Management
.. 25
Preparation. Plan in advance to include the required course prerequisites.
Food Science and Technology 100A-100B,
101A-101B......................................... 12
Food Service Management 120, 120L,
122....................................................... 9

Agricultural and Resource Economics
112. .9

Replacement courses; see note above
Nutrition 10, $111 \mathrm{AV}, 111 \mathrm{~B}, 114,116 \mathrm{~A}$ -
$116 \mathrm{~B}, 120 \mathrm{AN}$, or 120 BN , Economics 1A-
1 B .
Nutrition and Food
Preparation. Plan in advance to include the required course prerequisites.
Nutrition 111 AV and $111 \mathrm{~B} . . . . . . . . . . . . . . . . . . . . ~ 5$
Nutrition 120AN or 120BN.................... 4
Food Science and Technology 100A,
100B.
Neurobiology, Physiology, and Behavior
101.

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the Nutrition Graduate Group.

## Courses in Nutrition (NUT) <br> Lower Division

## 10. Discoveries and Concepts in Nutrition

 (3)Lecture-3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. GE credit: SciEng | SE, SL. - I, II, III. (II, II, III.) Applegate

## 11. Current Topics and Controversies in

 Nutrition (2)Discussion-1.5 hours; term paper. Exploration of current applications and controversies in nutrition. Students read scientific journal articles and write summaries, as well as give brief oral presentations. Topics change to reflect current interests and issues. GE credit: SciEng, Wrt | OL, SE, WE.-I, II, III. (I, II, III.) Applegate

## 99. Individual Study for Undergraduates

 (1-5)Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

## Upper Division

104. Environmental \& Nutritional Factors in Cellular Regulation and Nutritional

## Toxicants (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Biological Sciences 101; Biological Sciences 103 or Animal Biology 103. Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/ regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabo-
lism. (Same course as Environmental Toxicology
104.) GE credit: SciEng | OL, SE, SL.-I. (I.) Haj, Oteiza
105. Nutrition and Aging (3)

Lecture-3 hours. Prerequisite: course 111 AV and Animal Biology 103 or the equivalent. Role of nutrition in the aging process from both an organismal/ cell perspective, including demographics, theories of aging, nutrition and evolution, nutritional manipulation and life-span extension, and nutrition's impact on the diseases of aging. GE credit: SciEng | SE. III. (III.) McDonald

## 111 AV. Introduction to Nutrition and

## Metabolism (3)

Web virtual lecture-3 hours. Prerequisite: Chemistry 8B, Neurobiology, Physiology, and Behavior 101 or the equivalent. Introduction to metabolism of protein, fat and carbohydrate; the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status. Not open for credit to students who have completed course 101. E credit:
SciEng | SE. - III. (III.) McDonald
111 B. Recommendations and Standards for Human Nutrition (2)
Lecture-2 hours. Prerequisite: Chemistry 8B, Neurobiology, Physiology, and Behavior 101 or the equivalent. Critical analysis of the development of nutritional recommendations for humans. Topics include history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition
recommendations in other countries and cultures. Not open for credit to students who have completed course 111.-III. (III.) Zidenberg-Cherr

## 112. Nutritional Assessment: Dietary,

Anthropometric, and Clinical Measures (3)
Lecture-2 hours; laboratory-3 hours. Prerequisite: Animal Biology 102 and 103 or course 101, course 111 (may be taken concurrently), Statistics 13. Methods of human nutritional assessment, including dietary, anthropometric, biochemical and hematological techniques, and physical examination. Principles of precision, accuracy, and interpretation of results for individuals and populations. GE credit: SciEng | QL, SE. - III. (III.) Stewart

## 114. Developmental Nutrition (4)

 Lecture-4 hours. Prerequisite: Animal Biology 102 and 103 or course 101; course 111. Role of nutritional factors in embryonic and postnatal development. GE credit: SciEng, Wrt \| SE. - II. (II.) Keen
## 115. Animal Nutrition (4)

Lecture-3 hours; laboratory-3 hours. Prerequisite: Chemistry 8B. Comparative differences among animals in digestion and metabolism of nutrients. Nutrient composition of feeds, digestive systems, digestion, absorption, feeding strategies. GE credit: SciEng, Wrt | OL, QL, SL, VL, WE.-II. (II.) DePeters

## 116A. Clinical Nutrition (3)

Lecture-3 hours. Prerequisite: courses 111, 112 and Neurobiology, Physiology, and Behavior 101 or the equivalent. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SciEng | SE.-I. (I.) Steinberg
116AL. Clinical Nutrition Practicum (3)
Lecture-1 hour; laboratory-3 hours; discussion - 1 hour. Prerequisite: course 116A (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A. GE credit: SciEng | SE.-I. (1.) Frank

## 116B. Clinical Nutrition (3)

Lecture-3 hours; discussion-1 hour. Prerequisite: courses 111, 112 and Neurobiology, Physiology, and Behavior 101 or the equivalent. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SciEng | SE. - II. (II.) Zivkovic

## 116BL. Clinical Nutrition Practicum (3)

Lecture-1 hour; laboratory-3 hours; discussion - 1 hour. Prerequisite: courses 116AL, and 116B (may be taken concurrently). Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116B. Continuation of course 116AL. GE credit: SciEng | SE.-II. (II.) Steinberg

## 117. Experimental Nutrition (6)

Lecture-3 hours; laboratory-6 hours; extensive writing. Prerequisite: courses 111, Biological Sciences 102 and 103, and a laboratory course in nutrition or biochemistry. Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: SciEng, Wrt | SE, WE.-I. (I.) Gaikwad

## 118. Community Nutrition (4)

Lecture-4 hours. Prerequisite: course 101 or 111, and 116A. Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education. GE credit: SciEng | SE, SL. - II. (II.) Heinig

## 119A. International Community-Based

## Nutritional Assessment (1)

Lecture/discussion-1 hour. Prerequisite: course 112 (may be taken concurrently) and consent of instructor. Issues and problems related to communitybased nutritional assessment in a low-income country, major nutritional problems in low-income countries; ethical issues in human investigation; survey design, data collection techniques, and data analy-
sis; preparation for international travel; cross-cultural communication, health, and safety while living abroad.

## 119B. International Community-Based Nutritional Assessment (6)

Lecture-2 hours; fieldwork-12 hours. Prerequisite: course 119A and consent of instructor. A sixweek summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection of the study sample, collection and verification of data, and analysis and interpretation of the results; the project will be carried out by paired participation of students and faculty members of UC Davis and the collaborating foreign institution.
120AN. Nutritional Anthropology (4) Lecture-3 hours, discussion-1 hour. Prerequisite: course 2 or Geography 2 recommended. Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications. GE credit: SciEng or SocSci, Div \| SE, SS. -IV. (IV.) Kurtz

## 120BN. Nutritional Geography (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: Geography 2 recommended. Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. GE credit: SciEng or SocSci, Div | SE, SS.

## 122. Ruminant Nutrition and Digestive

 Physiology (4)Lecture-3 hours; laboratory-3 hours. Prerequisite: upper division standing; Animal Biology 103 or consent of instructor; Neurobiology, Physiology, and Behavior 101, Biological Sciences 1C, and Mathematics 16B recommended. Study of nutrient utilization as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises GE credit: SciEng | QL, SE. - III. (III.) Fadel
123. Comparative Animal Nutrition (3) Lecture-3 hours. Prerequisite: Animal Biology 103. Restricted to upper division or graduate students. Comparative nutrition of animals; including laboratory, companion, zoo, and wild animals. Digestion and metabolic adaptations required for animal species to consume diverse diets ranging from grasses and leaves to nectar to insects and meat. Relation of nutrition to metabolic adaptations and physiological states, including growth, reproduction, and diseases. GE credit: SciEng | SE. - III. (III.) Klasing

## 123L. Comparative Animal Nutrition

 Laboratory (1)Laboratory-3 hours. Prerequisite: Animal Biology 103, course 123 (may be taken concurrently). Laboratory exercises leading to written reports on establishment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals.-III. (III.) Klasing
124. Nutrition and Feeding of Finfishes (3) Lecture-3 hours. Prerequisite: Biological Sciences 103 and Wildlife, Fish, and Conservation Biology 121. Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species. GE credit: SciEng | QL, SE, SL.

## 127. Environmental Stress and

Development in Marine Organisms (10)
Lecture - 4 hours; laboratory - 12 hours; discus-sion-2 hours. Prerequisite: Environmental Toxicology 101 or Biological Sciences 102 or 104 or the equivalent; Environmental Toxicology 114A or course 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine
organisms. Emphasis on advanced experimental methods. (Same course as Environmental Toxicology 127.) GE credit: SciEng | OL, QL, SE, SL, VL, WE.-IV. (IV.) Cherr
129. Journalistic Practicum in Nutrition (3) Lecture-2 hours; discussion-1 hour. Prerequisite: course 111; a course in written or oral expression or consent of instructor. Critical analysis and discussion of current, controversial issues in nutrition; the use of journalistic techniques to interpret scientific findings for the lay public. Students will be required to write several articles for campus media. Course may be repeated one time for credit. GE credit:
SciEng | OL, SE, SL, WE
130. Experiments in Nutrition: Design and Execution (2)
Laboratory- 6 hours. Prerequisite: consent of instructor; course 101, 110, 111 , or 114 recommended. Experiments in current nutritional problems. Experimental design: students choose project and, independently or in groups of two-three, design a protocol, complete the project, and report findings. May be repeated for credit up to six times (three times per instructor) with consent of instructor. GE credit: SciEng | SE.-I, II, III, IV. (I, II, III, IV.)
190. Proseminar in Nutrition (1)

Seminar-1 hour. Prerequisite: senior standing; course 111 . Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic problems of community, national and international scope. May be repeated two times for credit with consent of instructor. GE credit: SciEng | OL, SE, VL. - I, II, III. (I, II, III.) Zidenberg-Cherr

190C. Nutrition Research Conference (1) Discussion-1 hour. Prerequisite: upper division standing in Nutrition or related biological science; consent of instructor. Introduction to research findings and methods in nutrition. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) GE credit: SE. -I, II, III. (I, II, III.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: one upper division course in nutrition and consent of instructor. Work experience on or off campus in practical application of nutrition, supervised by a faculty member. (P/NP grading only.)
197T. Tutoring in Nutrition (1-2)
Discussion/laboratory-3 or 6 hours. Prerequisite: Nutrition Science, Clinical Nutrition or related major. Completion of course 101. Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections, weekly conference with instructor in charge of course: written evaluations. May be repeated if tutoring a different course. (P/NP grading only.)
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
(P/NP grading only.) GE credit: SE.

## Graduate

201. Vitamin and Cofactor Metabolism (3) Lecture-2 hours; discussion - 1 hour. Prerequisite: one upper division nutritional biochemistry and physiology course. Review of studies and relationships involving the metabolic functions of vitamins. Comparative nutritional aspects and the metabolism and chemistry of vitamins and vitamin-like compounds.
202. Advanced Nutritional Energetics (2) Lecture-2 hours. Prerequisite: Animal Biology 102, 103, Neurobiology, Physiology, and Behavior 101 or the equivalent. History of nutritional energetics. Evaluation of energy transformations associated with food utilization. Energy expenditures at cellular, tissue, and animal levels as affected by diet and physiological state. Current and future feeding systems.
203. Advanced Protein and Amino Acid Nutrition (3)
Lecture-2 hours; discussion - 1 hour. Prerequisite: one upper division nutritional biochemistry and physiology course. Nutritional significance of protein and amino acids, including studies of the influence of dietary protein on digestion, absorption, metabolism, resistance to disease, and food intake. Study of dietary requirements and interrelationships among amino acids.

## 204. Mineral Metabolism (2)

Lecture-2 hours. Prerequisite: upper division nutrition or biochemistry course. Studies of metabolic functions and nutritional interrelationships involving minerals.

## 219A. International Nutrition (3)

Lecture -3 hours. Prerequisite: graduate standing; undergraduates only admitted with consent of instructor after completion of course 111 AV . Epidemiology, etiology, and consequences of undernutrition, with particular focus on the nutritional problems of children and women in low income populations. Offered in alternate years. - II. Dewey

## 219B. International Nutrition (3)

Lecture-3 hours. Prerequisite: course 219A. Intervention programs to prevent or ameliorate nutritional problems in low-income populations. Planning, implementing, and evaluating nutrition intervention programs. Offered in alternate years. - III. Dewey

## 230. Experiments in Nutrition: Design and

 Execution (2)Laboratory-6 hours. Prerequisite: consent of instructor; courses 201, 202, 203, 204, or the equivalent recommended. Student selected projects to enhance laboratory skills. Independently, or in groups of twothree students, design a protocol, carry out the project, analyze the results and report the findings. May be repeated for credit up to six times (limit of three times per instructor) with consent of instructor. -I, II, III. (I, II, III.)

## 250. Metabolic Homeostasis (3)

Lecture-2 hours; discussion - 1.5 hours. Prerequisite: passing the Nutrition Graduate Group Preliminary Examination or consent of instructor. Preference given to students with advanced standing in the Nutrition Graduate Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition energy balance.

## 25 1. Nutrition and Immunity (2)

Lecture/discussion-2 hours. Prerequisite: Pathology, Microbiology, and Immunology 126, Medical Microbiology 107 or the equivalent, Animal Biology 102. Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer. Offered in alternate years. - (II.) Klasing, Erickson, Stephensen

## 252. Nutrition and Development (3)

Lecture-3 hours. Prerequisite: courses 201, 202,
203, 204. Relationship of nutrition to prenatal and early postnatal development. - II. (II.) Keen, Oteiza

## 253. Control of Food Intake (3)

Lecture-2 hours; discussion - 1 hour; 2 or 3 laboratory demonstrations per quarter. Prerequisite: course 201 or 202 or consent of instructor. Comprehensive study of the biochemical, nutritional, behavioral, and physiological mechanisms controlling food intake. Subject matter will be approached through lectures, laboratory demonstration and discussions where students and staff will critically evaluate the literature. Offered in alternate years.

## 254. Applications of Systems Analysis in Nutrition (3)

Lecture-2 hours; discussion - 1 hour. Prerequisite: course 202, Physiological Sciences 205A-205B or the equivalent. Quantitative aspects of digestion and
metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research. Offered in alternate years.

## 257. Selected Topics in Nutritional and

 Hormonal Control of Nitrogen Metabolism (2) Lecture-2 hours. Prerequisite: courses 201 through 204; Physiological Sciences 205A-205B or the equivalent. Quantitative and qualitative aspects of nitrogen metabolism; critical evaluation of dietary intake, hormones and diet-hormone interactions which affect nitrogen metabolism, including protein synthesis-degradation, amino acid synthesis-catabolism, nitrogen transport-excretion, depending on current literature. Offered in alternate years.
## 258. Field Research Methods in

## International Nutrition (3)

Lecture/discussion-3 hours. Prerequisite: graduate standing or consent of instructor. Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues.
Offered in alternate years. - (II.) Dewey

## 259. Nutrition and Aging (2)

Lecture-2 hours. Prerequisite: three of courses 201, 202, 203 and 204. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging. Offered in alternate years.
260. Nutrition During Pregnancy (6)

Lecture-5 hours; term paper. Prerequisite: acceptance into the Master's Degree program of Advanced Studies in Maternal and Child Nutrition. Overview of the anatomical, physiological and biochemical changes that occur during pregnancy and early development. Discussion and evaluation of nutritional/lifestyle factors associated with pregnancy outcomes and nutrition programs/interventions for pregnant women. - (I.) Heinig

## 261. Lactation and Infant Nutrition (6)

 Lecture-5 hours; discussion-1 hour. Prerequisite: course 260. Overview of the physiological and biochemical processes underlying human lactation and nutritional needs of both mother and infant. Development of skills in assessment, nutrition counseling, education and support of new mothers and their families. - II. (II.) Heinig262. Child and Adolescent Nutrition (6) Lecture-5 hours; discussion-1 hour. Prerequisite: course 261. Relationships among nutrition, growth, and development during childhood and adolescence. Nutritional assessment for normal and high risk groups; psychological, social, and economic factors contributing to nutritional status. Nutritional needs and interventions for special groups, including obese children/adolescents, athletes, and eating disordered. - (III.) Heinig

## 263. Applied Research Methods in Maternal and Child Nutrition (4)

 Lecture-3 hours; term paper. Prerequisite: graduate standing; restricted to students enrolled in the MAS program and graduate students by consent of instructor. Application of epidemiological principles to the study of maternal and child nutrition. Topics include quantitative and qualitative study procedures, including study design, data collection, and related analytical techniques. - (I.) Heinig264A. Current Topics in Maternal and Child Nutrition: Principles of Adult Education (2) Seminar-2 hours. Prerequisite: graduate standing; restricted to students enrolled in the MAS program and graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition in adult education settings. Topics include
methods and theories of adult education and critical thinking skills related to research evaluation. - II. Heinig
264B. Current Topics in Maternal and Child Nutrition: Epidemiology and Evidence-

## Based Practice (2)

Seminar-2 hours. Prerequisite: graduate standing; restricted to students enrolled in the MAS program and graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition. Topics include epidemiology, evidencebased practice, breast feeding promotion, and nutritional assessment of populations. -II. Heinig
264C. Current Topics in Maternal and Child Nutrition: Public Policy Development and Implementation (2)
Seminar-2 hours. Prerequisite: graduate standing; restricted to students enrolled in the MAS program and graduate students by consent of instructor. Current scientific literature related to Maternal and Child Nutrition. Topics include nutrition surveillance and monitoring, as well as public policy development and implementation. - III. Heinig

## 270. Scientific Ethics in Biomedical Studies:

## Emphasis on Nutrition (3)

Lecture-1 hour; discussion-1 hour; term paper. Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest, human and animal research protections. Not open for credit to students who have completed course 492B. - Steinberg
290. Beginning Nutrition Seminar (2) Lecture/discussion-1 hour; seminar-1 hour. Prerequisite: first year graduate standing. Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics.-I. (I.)
290C. Research Conference (1)
Discussion-1 hour. Prerequisite: graduate standing and consent of instructor. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style. (S/U grading only.) -I, II, III. (I, II, III.)
291. Advanced Nutrition Seminar (1)

Seminar-1 hour. Prerequisite: second-year graduate standing. Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 293A. Current Topics in Obesity, Food

 Intake and Energy Balance (3)Lecture-1 hour; seminar-1 hour; discussion-1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of

## instructor.

293B. Current Topics in Obesity, Food Intake, and Energy Balance with Special

## Topics (3)

Lecture-1 hour; seminar-1 hour; discussion - 1 hour. Prerequisite: graduate standing or course 129. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor.
294A. Current Topics in Developmental

## Nutrition (2)

Seminar-2 hours. Prerequisite: course 114 or 252 or consent of instructor. Effects of nutrition on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit when topic differs.-I. (I.)

297T. Supervised Teaching in Nutrition (1-3)
Teaching under faculty supervision-3-9 hours. Prerequisite: graduate standing in nutrition or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. ( $S / U$ grading only.)
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)

## Professional

492A. Professionalism: An Academic Perspective (2)
Lecture/discussion-2 hours. Prerequisite: graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences.

## 492C. Grant Writing (3)

Lecture- 1.5 hours; discussion-1.5 hours. Prerequisite: graduate standing in Nutrition or consent of instructor. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application. May be repeated one time for credit with consent of instructor. Offered in alternate years.

## Nutritional Biology (A Graduate Group)

Sheri Zidenberg-Cherr, Ph.D., Chairperson of the Group
Graduate Group Office. 1249 Meyer Hall 530-754-7684;
http://nutritionalbiology.ucdavis.edu

## Faculty

Lars Berglund, Ph.D., Professor (Endocrinology)
Kenneth H. Brown, M.D., Professor (Nutrition)
C. Christopher Calvert, Ph.D., Professor (Animal Science)
Andrew J. Clifford, Ph.D., Professor (Nutrition)
Douglas E. Conklin, Ph.D., Associate Professor (Animal Science)
Edward J. DePeters, Ph.D., Professor (Animal Science)
Kathryn G. Dewey, Ph.D., Professor (Nutrition)
Kent L. Erickson, Ph.D., Professor
(Cell Biology and Human Anatomy)
James G. Fadel, Ph.D., Professor (Animal Science)
Andrea J. Fascetti, D.V.M, Ph.D., Associate Professor (Molecular Biosciences)
J. Bruce German, Ph.D., Professor
(Food Science and Technology)
M. Eric Gershwin, M.D., Professor (Internal Medicine)
Ralph Green, M.D., Professor (Pathology)
Jean-Xavier Guinard, Ph.D., Professor
(Food Science and Technology)
Fawaz G. Haj, Ph.D., Assistant Professor (Nutrition)
Silas S. O. Hung, Ph.D., Professor (Animal Science)
Thomas Jue, Ph.D., Professor (Biological Chemistry)
Sidika E. Kasim-Karakas, M.D., Professor
(Internal Medicine)
George A. Kaysen, M.D., Ph.D., Professor (Internal Medicine)
Carl L. Keen, Ph.D., Distinguished Professor
(Nutrition, Internal Medicine)
Kirk C. Klasing, Ph.D., Professor (Animal Science)
Jennifer A. Larsen, Ph.D., Assistant Professor of
Clinical Nutrition (Molecular Biosciences)
Bo L. Lönnerdal, Ph.D., Professor
(Nutrition, Internal Medicine)

Stanley L. Marks, B.V.Sc., Ph.D. Associate Professor (Medicine and Epidemiology)
Roger B. McDonald, Ph.D., Associate Professor (Nutrition)
Alyson Mitchell, Ph.D., Professor (Food Science and Technology)
Patricia Oteiza, Ph.D., Associate Professor (Nutrition, Environmental Toxicology)
Anthony F. Philipps, M.D., Professor (Pediatrics)
Jon J. Ramsey, Ph.D., Associate Professor (Molecular Biosciences)
Helen E. Raybould, Ph.D., Professor (Anatomy, Physiology and Cell Biology)
John C. Rutledge, Ph.D., Professor (Endocrinology)
Roberto D. Sainz, Ph.D., Associate Professor (Animal Science)
Jose Santos, Ph.D., Associate Professor (VMTRC)
Francene M. Steinberg, Ph.D., R.D., Professor (Nutrition)
Charles Stebbins, Ph.D., Professor (Cardiovascular Medicine)
Judith S. Stern, Sc.D., R.D., Distinguished Professor (Nutrition, Internal Medicine)
Christine P. Stewart, Ph.D., Assistant Professor (Nutrition)
Natalie Torok, Ph.D., Associate Professor (Gastroenterology \& Hepatology)
Craig H. Warden, Ph.D., Associate Professor (Neurobiology, Physiology, and Behavior)
Vincent A. Ziboh, Ph.D., Professor (Dermatology, Biological Chemistry)
Angela M. Zivkovic, Ph.D., Assistant Professor (Nutrition)

## Emeriti Faculty

Harry W. Colvin, Jr., Ph.D., Professor Emeritus
Robert E. Feeney, Ph.D., Professor Emeritus
Richard A. Freedland, Ph.D., Professor Emeritus
William N. Garrett, Ph.D., Professor Emeritus
Dorothy W. Gietzen, Ph.D., Professor Emeritus
C. Richard Grau, Ph.D., Professor Emeritus

Louis Grivetti, Ph.D., Professor Emeritus
Charles H. Halsted, M.D., Professor Emeritus
Robert J. Hansen, Ph.D., Professor Emeritus
Jiro J. Kaneko, D.V.M., Ph.D., D.V.Sc. (hc), Professor Emeritus
Janet King, Ph.D., Professor Emeritus
Verne E. Mendel, Ph.D., Professor Emeritus
James G. Morris, Ph.D., Professor Emeritus
Ernesto Pollitt, Ph.D., Professor Emeritus
Quinton R. Rogers, Ph.D., Professor Emeritus
Barbara O. Schneeman, Ph.D., Professor Emeritus
Howard G. Schutz, Ph.D., Professor Emeritus
Donal A. Walsh, Ph.D., Professor
Bruce M. Wolfe, M.D., Professor Emeritus
Frances J. Zeman, Ph.D., Professor Emeritus

## Affiliated Faculty

Lindsay H. Allen, Ph.D., RD, Professor (Nutrition)
Betty Burri, Ph.D., Associate Adjunct Professor (Nutrition)
Britt Burton-Freeman, Ph.D., Assistant Research Nutritionist (Nutrition)
Paul A. Davis, Ph.D., Research Nutritionist (Nutrition)
Cesar Fraga, Ph.D., Research Chemist (Nutrition)
Wayne Chris Hawkes, Ph.D., Assistant Adjunct Professor (Nutrition)
Peter J. Havel, D.V.M., Ph.D., Professor (Molecular BioSciences)
Liping Huang, Ph.D., Assistant Adjunct Professor (Nutrition)
Daniel Hwang, Ph.D., Adjunct Professor (Nutrition)
Amy Block Joy, Ph.D., Specialist in Cooperative Extension
Lucia Kaiser, Ph.D., RD, Specialist in Cooperative Extension (Nutrition)
Nancy L. Keim, Ph.D., R.D., Adjunct Professor (Nutrition)
Darshan S. Kelley, Ph.D., Adjunct Professor (Nutrition)

Kevin Laugero, Ph.D., Assistant Adjunct Professor (Nutrition)
Joshua W. Miller, Ph.D., Associate Adjunct Professor (Pathology)
John Newman, Ph.D., Assistant Adjunct Professor (Nutrition)
James W. Oltjen, Ph.D., Management Systems Specialist (Animal Science)
Peter H. Robinson, Ph.D., Associate Extension Specialist (Animal Science)
Charles B. Stephensen, Ph.D., Adjunct Professor (Nutrition)
Marta D. Van Loan, Ph.D., Adjunct Professor (Nutrition)
Sheri A. Zidenberg-Cherr, Ph.D., Specialist in Cooperative Extension (Nutrition)
Susan Zunino, Ph.D., Associate Adjunct Professor (Nutrition)
Graduate Study. The Graduate Group in Nutritional Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education.
Graduate Advisers. Consult the Nutritional Biology Graduate Group office.

## Courses in Nutritional Biology (NUB)

## Graduate

210A. Advanced Nutrition I: Nutrition and Metabolism, Macronutrients (5)
Lecture-4 hours; discussion-1 hour. Prerequisite: admission to the Nutritional Biology Graduate
Group or consent of instructor. Class size limited to 30 students. Advanced general nutritional concepts. Integrating nutrition with biological systems, population nutrition issues, and research approaches. Advanced concepts on lipid and protein metabo-lism.-I. (I.) Oteiza
210C. Advanced Nutrition III: Nutrition in Health and Disease (5)
Lecture-4 hours; discussion-1 hour. Prerequisite admission to the Nutritional Biology Graduate Group or consent of instructor. Class size limited to 30 students. Integration of biochemical, physiological, and genetic aspects of nutrition in the context of clinical and epidemiological observations related to health and disease, including obesity and diabetes, cancer, vascular and neurodegenerative diseases, osteoporosis, and birth defects. Review and consideration of governmental. - III. (III.) Miller
290C. Research Group Conference (1)
Discussion-1 hour. Prerequisite: graduate standing. Weekly conference on research problems, progress and techniques in animal sciences. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## 298. Directed Group Study (1-5)

Prerequisite: graduate standing in Nutritional Biology Graduate Group, or consent of instructor. May be repeated three times for credit when topics differs and consent of instructor. -I, II, III. (I, II, III.)

## 299. Research (1-12)

Prerequisite: consent of instructor. May be repeated
for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Nutrition Science

(College of Agricultural and Environmental Sciences)

## Faculty

See the Department of Nutrition, on page 454.

## The Major Program

The study of nutrition encompasses all aspects of the consumption and utilization of food and its constituents. Key areas of study include: the biochemical reactions important to the utilization of nutrients and food constituents; the impact of diet on health and disease; and, nutrition-related policy and public health issues. The nutrition science major includes two options for studying these areas: nutritional biology and nutrition in public health.
The Program. Nutrition as it is taught on the Davis campus is a biological science and requires a complete background in chemistry and biology, along with calculus and physics (nutritional biology option) or economics (nutrition in public health option). These courses are generally completed during the first two years, and along with biochemistry, must be completed before most nutrition classes can be taken. During their junior and senior years, students in the nutritional biology option take additional course work in biochemistry, physiology, and toxicology. Students in the nutrition in public health option take additional course work in social and healthrelated sciences.

Career Alternatives. Both options are excellent preparation for professional or graduate training in medicine, public health, or other health sciences. The nutritional biology option also provides preparation for technical work in nutrition in the animal, food, and pharmaceutical industries. The nutrition in public health option prepares students for jobs in administrative, teaching, or public health/public service positions.
B.S. Major Requirements:UNITS
Preparatory Subject Matter ..... 63-66
Biological Sciences 2A, 2B \& 2C ..... 15
Chemistry 2A-2B-2C and 8A-8B, or 118 A -
118 B , or $128 \mathrm{~A}-128 \mathrm{~B}$ and 129 A . ..... 21-23

Nutrition 10 ..| .. |
| :--- |

Plant Sciences 120 ..... 4
Sociology 46A or Psychology 41 ..... 4
The remaining preparatory subject matter isbased on which major option you choose.
Nutritional Biology option:
Anthropology 2 or Psychology 1 orSociology 1 or 34-5
Mathematics 16A-16B ..... 4-5
Physics 1A-1B .....  .6
Nutrition in Public Health option
Anthropology 2 or Sociology 1 or ..... 4-5
Economics 1A-1B .....  8
Psychology 1 .....  4
Depth Subject Matter ..... 76-85
Biological Sciences 101 .....  4
Food Science and Technology 100A and100B$\ldots 8$
Microbiology 101 .....  5
Neurobiology, Physiology, and Behavior
101, 101L 8
Nutrition $111 \mathrm{AV}, 11 \mathrm{~B}, 112,116 \mathrm{~A}$ .....  11
The remaining depth subject matter is basedon which major option you chose whencompleting your preparatory courses.
Nutritional Biology option
Biological Sciences 102, 103 .....  .....  6
Molecular and Cellular Biology .....  .6
. .6
Neurobiology, Physiology, andBehavior 114$\ldots 3$
Nutrition 104, 117 ..... 10

Selection of courses must be made in consultation with a faculty advisor prior to or upon reaching the 120 unit level:
Exercise Biology 110; Nutrition 99, 105,
$114,115,116 \mathrm{~B}, 118,120 \mathrm{AN}, 120 \mathrm{BN}$,
$122,123,124,127,130,190,192,199$
Nutrition in Public Health option:
Animal Biology 102, 103 .................. 10
Exercise Biology 110............................ 3
Nutrition 118 ...................................... 4
Nutrition Restricted Electives .......... 15-20
Selection of courses must be made in
consultation with a faculty advisor prior to
or upon reaching the 120 unit level:
Food Service Management 120, 122;
Nutrition 99, 104, 105, 114, 116B, 117,
120AN, 120BN, 129, 130, 190, 192, 199
Restricted Electives........................... 8-12
Choose one of the following areas to
complete the restricted elective units in:
Agricultural and Health Policy:
Agricultural \& Resource Economics 15,
120, Public Health Sciences 175W, or Political Science 109
Cultural Diversity \& Community Change:
African American and African Studies 100,
American Studies 55, Agricultural and
Resource Economics 112, Communication
136, Community \& Regional Development
2, 152, 176, International Agricultural
Development 10, 103, Science and Society
130, or Sociology 181
Community Health and Education:
Communication 165, Education 110, 120,
153, Psychology 126, 130 or Sociology 154
Natural and Applied Sciences:
Chicano Studies 140A, Community \&
Regional Development 20, Environmental
Toxicology 101, 128, Exercise Biology
101, 102, 113, 117, Human Development
100A, 100B, 100C, Neurobiology,
Physiology \& Behavior 132, Philosophy 15,
Plant Sciences 151, Science and Society 2,
$15,90 \mathrm{C}$, or 90 F
Total Units for the Degree 139-151
Major Adviser. B. L. Lönnerdal
Advising Center for the major is located in 3202
Meyer Hall 530-752-25 12.
Dietetics Internship. To fulfill the academic requirements for an internship in Dietetics, students are strongly advised to declare the Clinical Nutrition major. Within the Nutrition in Public Health option, students should also take: English 3 or University Writing Program 1 and Communication 1.The following courses must also be added (some of which may meet restricted elective requirements): Agricultural and Resource Economics 112; Nutrition 116B, $116 \mathrm{AL}-\mathrm{BL}$; Food Service Management 120, 120L,
122. Students intending to apply for admission to a dietetic internship should contact the Advising Center no later than the first quarter of the junior year for information on procedures.
Graduate Study. The Department of Nutrition offers programs of study and research leading to the M.S. and Ph.D. degrees in Nutrition. For information on graduate study contact the graduate adviser. See Graduate Studies, on page 111.

## Obstetrics and Gynecology

## Oceanography

(College of Letters and Science)
Oceanography is the study of the earth's oceans, investigating connections between geological, biological, chemical and physical processes in the marine realm, and the interactions between the Earth's ocean/atmosphere system. The interdisciplinary minor in oceanography is for students with backgrounds in any of these fields, as well as those interested in marine policy and conservation. The curriculum reflects the integrative nature of oceanography, with core courses covering the major disciplines in oceanography and elective courses that allow students to cater the minor to their interests. The oceanography minor includes courses taught at the Davis campus and courses offered at Bodega Marine Laboratory.
The minor is sponsored by the Department of Earth and Planetary Sciences in 2119 Earth and Physical Sciences Building.

## Minor Program Requirements:

UNITS
Oceanography .................................. 22-24
Geology 150A/Environmental Science and
Policy 150A.
... 4
Geology 150B/Environmental Science and
Policy 150B
3
Geology 150C/Environmental Science and
Policy 150C.
.4
Environmental Science and Policy $152 \ldots . .3$
An electives sequence, with one course from
group (a) and one to two additional electives
from either groups (a) or (b): ...............8-10
(a) Geology $116 \mathrm{~N} /$ Environmental Science
and Policy 116 N , Atmospheric Science
158, Wildlife, Fish, and Conservation
Biology 120, 157, Environmental
Toxicology 120, Evolution and Ecology
112, 115;
(b) Atmospheric Science 121A, 121B,

Geology 108, 109, 152, Evolution and
Ecology 106, 114 , Environmental Science and Policy 124, Environmental Toxicology 127
Note. Courses Geology 150C/
Environmental Science and Policy 150C,
Environmental Science and Policy 124, 152,
Environmental Toxicology 127, and Evolution
and Ecology 106 and 114 are taught at
Bodega Marine Laboratory.

## Performance Studies (A Graduate Group)

## Maxine Craig, Chairperson of the Group Marian Bilheimer, Graduate Coordinator

Arts Group Graduate Office. 216B Art Building; 530-754-6973; mlbilheimer@ucdavis.edu http://performancestudies.ucdavis.edu/
Faculty. Executive: Maxine Craig (Women and Gender Studies), Joseph Dumit (Science and Technology Studies, Anthropology), Peter Lichtenfels (Theatre and Dance), Halifu Osumare (African American and African Studies)
There are over 45 affiliated faculty in departments throughout HArCS and other faculty, all of whom offer courses relevant to the discipline.

Graduate Study. The Ph.D. in Performance Stud ies is a four-year program. In the first two years of study, students develop an understanding of performance by drawing from a range of regular course offerings in the field to identify, explore, and define a field or fields of research. Students are required to complete four core courses out of five in performance studies, and one colloquium course. Each individual program is then built from seminar and/or practice as research courses, as well as independen or group studies, developing one or more of the four strands of the program: Comparative Medias, Embodiments, Cultures/Ecologies, and History/Text. A wide range of affiliated faculty offer courses throughout the HArCS faculty, and Designated Emphases are available in Studies in Performance and Practice, African American and African Studies, Critical Theory, Feminist Theory and Research, Native American Studies, and Writing, Rhetoric and Composition Studies. Students are required to complete a minimum of 60 units before taking the qualifying examination. No more than 12 units may be taken below the graduate level unless specifically approved by the Ph.D. graduate program adviser.
Main Program Adviser. Lynette Hunter (Theatre and Dance)
Graduate Advisers. Emily Albu (Spanish \& Classics), Susan Avila (Design), Seeta Chaganti
(English), Maxine Craig (Women and Gender Studies), Halifu Osumare (African American and African Studies), Kriss Ravetto (Cinema and Technocultural Studies), Henry Spiller (Music), Archana Venkatesan (Comparative Literature, Religious Studies), Hegnar Watenpaugh (Art, Art History)
Courses in Performance Studies (PFS)

## Graduate

200. Methods and Materials in Theatre Research (4)
Seminar-3 hours; term paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field. -I. (I.)
201. Topics in Contemporary Theatre and Performance (4)
Seminar-3 hours; term paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship; e.g., "Brecht and After," "British Theater," "Race and Gender in Performance." May be repeated five times for credit. - I, II, III. (I, II, III.
265A. Performance Studies: Modes of Production (4)
Seminar-3 hours; term paper. Introduction to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based looking at cultural, aesthetic, rhetorical and political theory. May be repeated three times for credit when topic differs. Offered in alternate years.

## 265B. Performance Studies: Signification

 and the Body (4)Seminar-3 hours; term paper. Introduction to analysis of the body in performance, drawing on theoretical models from several fields. May be repeated three times for credit when topic differs. Offered in alternate years.
265C. Performance Studies: Performance and Society (4)
Seminar-3 hours; term paper. Introduction to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. May be repeated three times for credit when topic differs. Offered in alternate years.

265D. Performance Studies: Theory, History, Criticism (4)
Seminar - 3 hours; term paper. Introduction to the theory, history and criticism, informing performance studies. May be repeated three times for credit when topic differs. Offered in alternate years.
270A. Individually Guided Research in Performance Studies (4)
Discussion-1 hour; independent study; extensive writing. Prerequisite: course 200; one from course 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.
270B. Individually Guided Research in Performance Studies (4)
Discussion-1 hour; independent study; extensive writing. Prerequisite: course 200; one of courses 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project, to produce a dissertation prospectus.
270C. Individually Guided Research in Performance Studies (4)
Discussion/laboratory-2 hours; fieldwork; term paper. Prerequisite: course 200; one of courses 265A, B, C, or D; consent of instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus.
290. Colloquia in Performance Studies (4) Lecture/discussion-2 hours; discussion/laboratory - 1 hour; term paper. Prerequisite: registration in Performance Studies Graduate Group and prior to Qualifying Examination. Designed to provide cohort identity and faculty exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative new, exchange of information and make announcements. Course must be taken every year that a Performance Studies graduate is registered, prior to taking the Qualifying Examination. May be repeated four times for credit. Limited to four units per year. (S/U grading only.) - III. (III.)

## 298. Group Study (1-5)

Independent study-1-5 hours. Prerequisite: consent of instructor. - I, II, III. (I, II, III.)

## 299. Individual Study (1-12)

Prerequisite: consent of instructor. ( $S / \mathrm{U}$ grading only.) -I, II, III. (I, II, III.)
299D. Dissertation Research (1-12)
Prerequisite: consent of instructor and Advancement to Candidacy. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

## Professional

459. Approaches to Theatre and Dance (4)

Seminar-3 hours; term paper; project. Prerequisite consent of instructor; advanced graduate students. Work on approaches to theatre, dance, film/video, design and performance, with a focus on methodology and professional development. May be repeated five times for credit. Offered irregularly

## Pharmacology and Toxicology

See Medical Pharmacology and Toxicology (PHA), on page 411; Molecular Biosciences (VMB), on
page 540; and Pharmacology and Toxicology (A Graduate Group), on page 460.

## Pharmacology and Toxicology (A Graduate Group)

## Pamela J. Lein, Chairperson of the Group

Group Office. 4117 Meyer Hall (Department of Environmental Toxicology 530-752-4516;
http://www.envtox.ucdavis.edu/ptx
Faculty. The more than 90 faculty in the graduate group represent at least 25 academic departments and organized research units within the College of Agricultural and Environmental Sciences, the College of Biological Sciences, the School of Medicine and the School of Veterinary Medicine.
Graduate Study. The program, which offers both the M.S. and Ph.D. degree, emphasizes an interdisciplinary approach that combines coursework and experimental training in modern approaches to pharmacological and toxicological problems. Areas of research span fundamental and translational research in a broad spectrum of areas within pharmacology and toxicology, including cardiovascular pharmacology, cancer therapeutics, neuropharmacology, drug discovery and design, neurotoxicology, pulmonary toxicology and environmental toxicology. Students complete core courses in pharmacology and toxicology and carry out research rotations during their first year of study. All Ph.D. students receive financial support. For detailed information on the program, contact the Group office, graduate advisers, or the Group chairperson.
Graduate Advisers. K. Carraway (Biochemistry \& Molecular Medicine), A. Gelli (Pharmacology), R Harper (Pulmonary Medicine), P. Henderson (Hematology \& Oncology), Mary Horne (Pharmacology), H. Knych (Molecular Biosciences), J.A. Last (Pulmonary Medicine), P. Lein (Molecular Biosciences), L. Miller (Anatomy, Physiology \& Cell Biology), K. Pinkerton (Center for Health and Environment), B Puschner (Molecular Biosciences), Heike Wulff (Pharmacology)

## Courses in Pharmacology and Toxicology (PTX)

Additional courses that satisfy the breadth and depth requirements of the program are taught under departments of faculty in the group.

## Graduate

## 201. Principles of Pharmacology and

 Toxicology I (5)Lecture-5 hours. Prerequisite: Biological Sciences 102 and Neurobiology, Physiology, and Behavior 101. First of three courses presenting fundamental principles of pharmacology and toxicology. Introductory overview of basic concepts in pharmacology/ toxicology, followed by in-depth blocks on fate processes of chemicals in the body, fate processes in tissue selective responses, selective toxicity employed therapeutically.-I. (I.) Puschner, Knych

## 202. Principles of Pharmacology and

 Toxicology II (4)Lecture-4 hours. Prerequisite: course 201. The second of three courses presenting fundamental principles of pharmacology and toxicology. Principles of pharmacodynamics and mechanisms of drug/toxicant actions. -III. (II.) Angelastro, Eiserich
203. Principles of Pharmacology and Toxicology III (4)
Lecture-4 hours. Prerequisite: courses 201 and 202. Integrated physiological systems, cardiovascular and nervous systems and how drugs and toxicants act to perturb function. - III. (III.) Berman, Gelli
230. Advanced Topics in Pharmacology and Toxicology (1-3)
Lecture/discussion/seminar-1 hour each (course format can vary at option of instructor). Prerequisite: course 201 and consent of instructor. In-depth coverage of selected topics for graduate students in Phar-macology-Toxicology and related disciplines. Topics determined by instructor in charge for each quarter. -I, II, III. (I, II, III.)

## 277. Life and Death Decisions at the

 Cellular Level (2)Lecture-2 hours. Prerequisite: undergraduate or graduate introductory course in cell biology (such as Biological Sciences 104), and general biochemistry (Molecular and Cellular Biology 121 or 122) required; restricted to graduate standing or consent of instructor. Fundamental concepts in cell signaling; signaling pathways as related to cell death and a variety of human diseases including cancer, Alzheimer's, and Parkinson's. - III. (III.) Goldkorn

## 290. Seminar (1)

Current topics in pharmacology and toxicology. (S/ U grading only.) - I, II, III. (I, II, III.)
290C. Advanced Research Conference (1) Lecture/discussion. Provide credit for participation in and attendance at research conferences. May be repeated three times for credit. ( $\mathrm{S} / \mathrm{U}$ grading only.)-I, II, III. (I, II, III.) Puschner
299. Research (1-12)
(S/U grading only.)

Michael V. Wedin, Ph.D., Professor Emeritus George Wilson, Ph.D., Professor Emeritus

## The Major Program

Philosophy addresses problems and questions that arise in all areas of human thought and experience and in all disciplines. Recurring questions about the nature of value, the good life, right conduct, knowledge, truth, language, mind, and reality are central to philosophical study. Philosophy also investigates the methodologies and assumptions of the major dis
ciplines in the university in order to deepen our understanding of the sciences, of mathematics, art, literature, and history, and of religion and morality. It leads us to address issues about the nature of these subjects, about the methods of reasoning characteristic of them, and about the contributions they make to our understanding of ourselves and our world. Philosophy contributes to the liberal education of its students. The department emphasizes an analytic approach to philosophical questions, which trains students to understand and evaluate arguments and to think and write precisely and clearly. These skills are of immense value in a variety of careers.
The Program. The Department of Philosophy offers courses in such areas as the theory of knowledge, metaphysics, logic, ethics, and political philosophy. In addition, upper division courses are offered in moral and political philosophy, and aesthetics, and in the philosophy of religion, of mind, of language, of mathematics, of law, and of the physical, biological, and social sciences.
The problems of philosophy have important roots in past. The history of philosophy is important not only as part of the heritage of educated persons, but also because it is relevant to contemporary issues. For these reasons, the department places great emphasis on the history of philosophy, providing courses on the major figures and traditions of western philosophy.
Career Alternatives. Students of philosophy learn to understand and evaluate arguments and to think and write precisely and clearly. These analytical skills are assets in any career. Many of our majors have pursued graduate study in philosophy and have become philosophers in their own right. Others have pursued academic careers in related disciplines in the humanities and social sciences. Philosophy majors are well prepared for law, business, or other professional schools and have found careers in computer programming, government service, teaching, the ministry, and social work.

## A.B. Major Requirements:

```
            UNITS
Preparatory Subject Matter.................... 16
    One course from any three of the following
    areas................................................... 12
```

        (a) General Philosophy: Philosophy 1
        (b) Ancient Philosophy: Philosophy 21
        (c) Early Modern Philosophy: Philosophy 22
        (d) Philosophy of Mind: Philosophy 13 and
        13G
        (e) Ethics: Philosophy 14, 15 or 24
        (f) Philosophy of Science: Philosophy 30,
        31, 32 or 38
        (g) Philosophy of Language: Philosophy 17
        (h) Metaphysics: Philosophy 101
        (i) Theory of Knowledge: Philosophy 102
    Philosophy 12
    Depth Subject Matter ............................... 36
Upper division units in Philosophy .......... 36
Note: Philosophy 101 and 102 may not be
counted toward both preparatory and
depth subject matter units.
Total Units for the Major52

Major Advisers. G.J. Mattey, Marina Oshana
Advising Office. 1240 Social Science and Humanities

## Minor Program Requirements:

Students wishing to minor in Philosophy may choose a general minor or a minor specializing in logic. There are no specific courses required for the general minor, so students may create a program to suit their own interests. The range of choice in the logic specialization is limited to the courses listed.

UNITS
Philosophy-General 20
Twenty upper division units in philosophy Philosophy 12 may be substituted for four of the upper division units.Philosophy-Logic
Philosophy 12 or Mathematics 108 .......... 4
Philosophy 112.
Select units from Philosophy 113, 131, 134,
135, 189K20

Minor Advisers. G.J. Mattey, Marina Oshana
Honors Program. The department offers an honors program, which gives qualifying majors the opportunity to work closely with faculty and graduate students.
Courses for Non-Majors. Students majoring in most disciplines in the university will find courses relevant to their educational or career goals. Philosophy 1 is the introductory course for non-majors. Philosophy 5 teaches critical thinking. The following courses are recommended:
(1) Pre-law: 12, 14, 24, 30, 102, 112, 115,

116, 118 and, especially, 119;
(2) Pre-medical: $14,15,30,38,108,114$,

115, 116 ;
(3) Business: 14, 102, 112, 114, 115, 116, 117, 118, 119;
(4) Social Policy: 14, 24, 101, 102, 114,

115, 116, 117, $118,119,120$;
(5) Social Sciences: 12, 30, 31, 32, 101 ,

102, 103, 109, 118, 131;
(6) Physical Sciences: $12,30,31,32,101$,

102, 107, 112, 131;
(7) Biological Sciences: 30, 31, 32, 38, 101, 102, 108, 120;
(8) Humanities and the Arts: 14, 21, 22, 24, 101, 102, 103, 105, 114, 116, 118, 123, 141 through 175;
(9) Agricultural and Environmental Science and Policy: 5, 14, 24, 30, 31, 114, 115,

## 116, 118, 120.

Department Activities. The Philosophy department sponsors a lecture series with well-known philosophers who present papers in their fields of expertise. The department also operates ongoing faculty and graduate student workshops. Undergraduate students are welcome to attend and join these discussions. Information can be obtained in the Department office.
Graduate Study. The Department of Philosophy offers programs of study leading to the M.A. and Ph.D. degrees. Detailed information may be obtained by writing to the Graduate Adviser.
Graduate Adviser. Cody Gilmore

## Courses in Philosophy (PHI)

## Lower Division

## 1. Introduction to Philosophy (4)

Lecture-3 hours; discussion-1 hour. Problems of philosophy through major writings from various periods. Problems are drawn from political, aesthetic, religious, metaphysical, and epistemological concerns of philosophy. GE credit: ArtHum, Wrt \| AH,

## WE. -I, II, III. (I, II, III.)

## 5. Critical Reasoning (4)

Lecture-3 hours; discussion - 1 hour. Criteria of good reasoning in everyday life and in science. Topics to be covered may include basic principles of deduction and induction; fallacies in reasoning; techniques and aids to reasoning; principles of scientific investigation; aids to clarity. Not open to students who have completed course 6. GE credit:
Wrt | WE

## 7. Philosophical Perspectives on Sexuality

 (3)Lecture -3 hours. Philosophical issues related to sexvality, including, but not limited to, ethical and social issues regarding sexual practice, orientation, classification and identity. GE credit: ArtHum | AH.-II.

## (II.) Sennet

## 11. Asian Philosophy (4)

Lecture-3 hours; discussion - 1 hour. Survey of the main philosophical systems of south and east Asia: Hinduism, Buddhism, Confucianism, and Taoism. Topics include the nature of reality, including God, the universe and the human self, human knowledge,
and the proper conduct of human life. Offered in alternate years. GE credit: ArtHum, Div, Wrt | AH, WC, WE.-I. Mattey
12. Introduction to Symbolic Logic (4) Lecture-3 hours; discussion-1 hour. Syntax and semantics of the symbolic language sentence logic. Syntax and semantics of the symbolic language sentence logic. Symbols of sentence logic. Translation between sentence logic and English. Truth table interpretation of sentence logic. Proof techniques. Application of truth tables and proof techniques to arguments in English. Not open for credit to students who have taken course 112,113,134, or 135 and passed with a grade of C or better. GE credit: AH. I, IV. (I, IV.) Antonelli, Gilmore, Landry, Mattey

## 13. Minds, Brains, and Computers (4)

Lecture-3 hours; discussion-1 hour. Contemporary theories of the nature of the mind. The mind as a brain process and as a computer process. Ways in which neuroscience, artificial intelligence and psychology seek to understand the mind. GE credit: SciEng or SocSci, Wrt | SE, SL, SS, WE. - Molyneux
13G. Minds, Brains, and Computers Discussion (1)
Discussion-1 hour. Restricted to concurrent enrollment in course 13. Small group discussion and preparation of short papers for course 13. GE credit: WE. - Molyneux

## 14. Ethical and Social Problems in Contemporary Society (4)

Lecture-3 hours; discussion-1 hour. Philosophical issues and positions involved in contemporary moral and social problems. Possible topics include civil disobedience and revolution, racial and sex discrimination, environment, population control, technology and human values, sexual morality, freedom in society. GE credit: ArtHum, Div, Wrt \| AH, WE.

## 15. Bioethics (4)

Lecture-3 hours; discussion-1 hour. Critical analysis of normative issues raised by contemporary medicine and biology. Possible topics include
euthanasia, abortion, reproductive technologies, genetic engineering, practitioner/patient relationships, allocation of medical resources, experimentation on human subjects. GE credit: ArtHum,
Wrt \| AH, WE.

## 16. Philosophical Foundations of American

## Democracy (4)

Lecture-3 hours; discussion-1 hour. The philosophical underpinnings of democratic government and the tension between the goals of providing security and of preserving democracy and civil liberties. Illustration of the tension through focus on issues related to war and terrorism. GE credit: ACGH, AH, WE.-I. Copp

## 17. Language, Thought, and World (4)

Lecture-3 hours; discussion-1 hour. Puzzles in the philosophy of language, such as what language is, how language conveys thoughts, whether we each speak our own private language, and what we can learn about the world by studying language. GE credit: SocSci, Wrt \| SS, WE.-May
21. History of Philosophy: Ancient (4) Lecture-3 hours; discussion - 1 hour. Survey of Greek philosophy with special attention to the PreSocratics, Plato, and Aristotle. GE credit: ArtHum, Wrt | WE.-Szaif
22. History of Philosophy: Early Modern (4) Lecture-3 hours; discussion - 1 hour. Survey of major figures in philosophy of the seventeenth and eighteenth centuries, with emphasis on Descartes, Hume, and Kant. GE credit: ArtHum, Wrt | WC.II. (II.) Mattey

## 24. Introduction to Ethics (4)

Lecture-3 hours; discussion - 1 hour. Reading of historical and contemporary philosophical works in ethics. Topics include the nature of morality, the justification of moral claims, and major ethical theories, such as consequentialist, deontological, and virtue theories. GE credit: ArtHum, Wrt | AH, WE. - III. (III.) Mattey, Oshana

## 30. Introduction to Philosophy of Science

 (4)Lecture-3 hours; discussion-1 hour. Basic problems in the philosophy of science, common to the physical, biological, and social sciences. Analysis of explanation, confirmation theory, observational and theoretical terms, the nature of theories, operationalism and behaviorism, realism, reduction. Not open for credit to students who have taken course 104. GE credit: ArtHum or SciEng, Wrt | AH or SE, SL, WE. - Landry, Millstein

## 31. Appraising Scientific Reasoning (4)

Lecture-3 hours; discussion - 1 hour. Introduction to scientific hypotheses and the kinds of reasoning used to justify such hypotheses. Emphasis on adequate justification, criteria, and strategies for distinguishing scientific from pseudoscientific theories. Concrete historical and contemporary cases. GE credit: ArtHum or SciEng | AH or SE, SL, WE.-Griesemer
32. Understanding Scientific Change (4) Lecture-3 hours; discussion-1 hour. Concepts of scientific change in historical and philosophical perspective. Survey of models of growth of knowledge, 17th century to present. Relationship between logic of theories and theory choice. Kuhn's revolution model. Examples from various sciences. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.-Griesemer
38. Introduction to Philosophy of Biology (4)

Lecture-3 hours; discussion-1 hour. Non-technical introduction to philosophical, social, and scientific ideas, methods and technologies in contemporary biological fields such as evolution, genetics, molecular biology, ecology, behavior. Philosophical consideration of determinism, reductionism, explanation, theory, modeling, observation, experimentation. Evaluation of scientific explanations of human nature. GE credit: ArtHum, Wrt | AH or SE, SL, WE.-Griesemer, Millstein

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

(Certain upper division courses may not be offered every year.)

## 101. Metaphysics (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: one course in philosophy recommended. Theories of being. Such topics as reality, substance, universals, space, time, causality, becoming, body, experience, persons, freedom, and determinism. Views of the nature and method of metaphysics. Anti-metaphysical arguments. GE credit: ArtHum, Wrt \| AH, WE. - Gilmore

## 102. Theory of Knowledge (4)

Lecture-3 hours; extensive writing or discussion. Prerequisite: one course in philosophy. Analysis of the concept of knowledge. The relation between knowledge, belief and truth. Development of foundationalist, coherentist and externalist theories of justified belief. Examination of skepticism. GE credit: ArtHum, Wrt | AH, WE. - Mattey

## 103. Philosophy of Mind (4)

Lecture/discussion-3 hours; term paper. The relation between mind and body, our knowledge of other minds, and the explanation of mental acts. Dis cussion of such concepts as action, intention, and causation. GE credit: ArtHum, Wrt | AH, WE.Molyneux

## 104. The Evolution of Mind (4)

Lecture/discussion-3 hours; term paper. Prerequisite: one previous Philosophy course or instructor permission. The interpretation of human thought and behavior through the lens of evolutionary theory. Topics include the nature/nurture debate concerning
cognitive and other mental capacities and traits, and the interaction between evolution, learning and development. GE credit: SocSci | SS, WE.

## 105. Philosophy of Religion (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: one course in philosophy recommended. Logical, metaphysical, epistemological, and existential aspects of selected religious concepts and problems. GE credit: ArtHum, Wrt | AH, WE.-Gilmore, Szaif
107. Philosophy of the Physical Sciences (4) Lecture-3 hours; discussion - 1 hour. Prerequisite: one philosophy course or a science background recommended. Nature of testability and confirmation of scientific hypotheses; nature of scientific laws, theories, explanations, and models. Problems of causality, determininism, induction, and probability; the structure of scientific revolutions. GE credit: ArtHum or SciEng, Wrt | AH or SE, WE.-Landry, Molyneux
108. Philosophy of the Biological Sciences (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: one course in biology or one course in philosophy. Scientific method in biology. Nature of biological theories, explanations, and models. Problems of evo lutionary theory, ecology, genetics, and sociobiology. Science and human values. GE credit: ArtHum or SciEng, Wrt | AH or SE, SL, WE.-Griesemer, Millstein
109. Philosophy of the Social Sciences (4) Lecture-3 hours; discussion-1 hour. Prerequisite: one course in philosophy or a social science recommended. The nature of the social sciences, their subject matter and methods. Similarities to and differences from natural and life sciences. Predicting and explaining human behavior. Behaviorism. Reduction, holism, and individualism. Related moral issues. The social sciences and philosophy. GE credit: ArtHum or SocSci, Wrt | AH or SS, WE. 111. Philosophy of Space and Time (4) Lecture/discussion - 3 hours; term paper. Prerequisite: one upper division philosophy course. Philosophical problems of space and time. The philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include the nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory. GE credit: AH, WE.-Gilmore

## 112. Intermediate Symbolic Logic (4)

Lecture/discussion-4 hours. Prerequisite: course 12 or consent of instructor. Predicate logic syntax and semantics. Transcription between predicate logic and English. Proof techniques. Identity, functions, and definite descriptions. Introduction to concepts of metatheory. GE credit: AH. - II. (II.) Landry, Mattey

## 113. Metalogic (4)

Lecture/discussion-4 hours. Prerequisite: course 112, Mathematics 108, or the equivalent. The metalogic of classical propositional and first-order predicate logic. Consistency, soundness and completeness of both propositional and predicate logic. The Löwenheim-Skolem theorem for predicate logic. Undecidablity of predicate logic. GE credit:

## AH. - (III.) Antonelli

## 114. History of Ethics (4)

Lecture/discussion-4 hours. Prerequisite: one philosophy course. Study of some classic texts from the history of philosophical writing on central problems of ethics, taking the form either of a survey or concentrated examination of selected historical figures. Readings from such philosophers as Aristotle, Butler, Hume, Kant, Mill. GE credit: ArtHum, Wrt | WC.Mattey, Oshana

## 115. Problems in Normative Ethics (4)

 Lecture/discussion - 3 hours; term paper. Prerequisite: one course in philosophy. Moral philosophy studied through examination of moral problems and the moral principles and common sense intuitions that bear on them. Problems discussed may include: animal rights, fetal rights, euthanasia, justice andhealth care, war, nuclear deterrence, world hunger, environmental protection. GE credit: ArtHum, Wrt \| AH, WE.-Millstein

## 116. Ethical Theories (4)

Lecture/discussion-3 hours; term paper. Prerequisite: one course in philosophy; one course in ethics recommended. Study of fundamental concepts and problems in ethical theory through an examination of classical and contemporary philosophical theories of ethics. Among the theories that may be discussed are utilitarianism, virtue theory, theories of natural rights, Kantian ethical theory, and contractarianism. GE credit: AH, WE. - Copp

## 117. Foundations of Ethics (4)

Lecture/discussion-3 hours; term paper. Prerequisite: one of courses $114,115,116,101$, or 137. Advanced investigation of questions about the nature and foundations of morality. Among the topics that may be discussed are moral realism and anti-realism, cognitivism and non-cognitivism, types of relativism, moral skepticism, normative language and normative belief. GE credit: AH, WE. - Copp

## 118. Political Philosophy (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: one course in philosophy. Intensive examination of some central concepts of political thought such as the state, sovereignty, rights, obligation, freedom, law, authority, and responsibility. GE credit: SocSci, Div, Wrt | AH, WE. - Oshana

## 119. Philosophy of Law (4)

Lecture-3 hours; discussion-1 hour. Prerequisite: one course in philosophy or consent of instructor. Philosophical theories of the nature of law, legal obligation, the relation of law and morals. Problems for law involving liberty and justice: freedom of expression, privacy, rights, discrimination and fairness, responsibility, and punishment. GE credit: SocSci, Div, Wrt | AH, WE.-Oshana

## 120. Environmental Ethics (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: one course in philosophy. Conceptual and ethical issues concerning the environment. Extension of ethical theory to animals, all life, and ecosystem wholes. Topics may include contemporary environmental issues such as global warming, sustainability and biodiversity. Not open for credit for students who have completed course 115 prior to Fall 2011. GE credit: ArtHum | AH, WE.-Millstein

## 123. Aesthetics (4)

Lecture/discussion - 3 hours; term paper. Prerequisite: one course in philosophy recommended. Nature of art, of artistic creation, of the work of art, and of aesthetic experience; nature and validity of criticism; relations of art to its environment. GE credit: ArtHum, Wrt \| AH, WE.

## 125. Theory of Action (4)

Lecture-3 hours; extensive writing or discussion - 1 hour. Prerequisite: one course in Philosophy. Survey of prominent contemporary approaches to leading problems in action theory. Problems include issues about the nature of intentional action and the conceptual character of explanations of actions in terms of the agent's reasons. GE credit: ArtHum,
Wrt | AH, WE.-Oshana

## 128. Rationality (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: at least one course in philosophy. Philosophical issues concerning rationality in its various forms. Focus is on theoretical and practical reasoning and conditions for rational belief, choice, and action. Possible additional topics include rationality and human limitations; paradoxes of rationality; varieties of irrationality; rationality and objectivity. GE credit: AH. - Antonellil

## 129. Knowledge and the A Priori (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in philosophy. Self-evidence, intuition, the (in)fallibility and (in)defeasibility of a priori methods. Analytic, formalist and Kantian accounts of how knowledge can be acquired
through reasoning and intuition alone, without recourse to empirical methods. Offered in alternate years. GE credit: AH, WE.-III. Molyneux

## 131. Philosophy of Logic and Mathematics

 (4)ecture/discussion-3 hours; term paper. Prerequisite: course 12 or one course for credit in mathematics. Nature of formal systems and mathematical theories. Selected topics include logical and semantical paradoxes; foundations of mathematics; set theory, type theory, and intuitionistic theory; philosophy of geometry; philosophical implications of Gödel's incompleteness results. GE credit: AH, WE. - Landry

## 134. Modal Logic (4)

Lecture/discussion-4 hours. Prerequisite: course 112 or Mathematics 108 or the equivalent. Survey of the main systems of modal logic, including Lewis systems S4 and S5. "Possible worlds" semantics and formal proofs. Applications to epistemology, ethics, or temporality. GE credit: AH. - Antonelli

## 135. Alternative Logics (4)

Lecture/discussion -4 hours. Prerequisite: course 12, Mathematics 108, or the equivalent. Alternatives to standard truth-functional logic, including many-valued logics, intuitionist logics, relevance logics, and non-monotonic logics. GE credit: AH.Antonelli

## 136. Formal Epistemology (4)

Lecture/discussion-4 hours. Prerequisite: course 12. Formal (mathematical) approaches to belief revision, knowledge and deduction, meta-knowledge, (multi-agent) epistemic logic, Bayesian confirmation, Bayes nets, epistemic and probabilistic paradoxes. Offered irregularly. GE credit: AH.-I. Molyneux
137A. Philosophy of Language: Theory of Reference (4)
Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics. Survey of issues and views concerning reference, or how words refer to things. Topics include names and descriptions, the distinction between sense and reference, the puzzle of non-referring terms, causal theories of reference, and possibility and necessity. Only two units of credit for students who have completed course 137. GE credit: AH, WE.-May, Sennet
137B. Philosophy of Language: Truth and Meaning (4)
Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics. Comparative treatment of theories about the relationship between truth and meaning. Topics include: the identification of meaning with truth conditions, the nature of propositions, theories of linguistic understanding, the roles of mind and world in determining meaning. Only two units of credit for students who have completed course 137. GE credit: AH, WE.May, Sennet
137C. Philosophy of Language: Semantics and Pragmatics (4)
Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in philosophy or linguistics. Philosophical issues and positions concerning the meaning and use of language. Topics include the distinction between meaning and implication, the roles of context and convention in language use, speaker meaning versus linguistic meaning and speech act theory. Only two units of credit for students who have completed course 137. GE credit: AH, WE. - May, Sennet
141. Socrates and the Socratic Dialogue (4) Lecture/discussion-3 hours; term paper. Prerequisite: course 21 recommended, or one course in philosophy, or consent of instructor. The philosophy of Socrates as found in the Socratic dialogues of Plato. Topics include the Socratic practice of refutation, its method, epistemological foundation, and moral purpose; Socratic eudaimonism and Socratic virtue theory; the paradoxes of Socratic intellectualism. GE credit: AH, WE.-Szaif

## 143. Hellenistic Philosophy (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 21 recommended, or other course in philosophy. Positions and arguments of the major philosophical schools of the Hellenistic period: Stoicism, Epicureanism, and Scepticism. Focus is on eth ical, epistemological and metaphysical questions and their interconnectedness. GE credit: AH, WE.Szaif

## 145. Medieval Philosophy (4)

Lecture/discussion-4 hours. Prerequisite: course 21 or other course in ancient philosophy. Major philosophers in the medieval Christian, Islamic, and Jewish traditions. Offered in alternate years. GE credit: AH, WC. - Szaif

## 151. Nineteenth Century European Philosophy (4)

Lecture/discussion-4 hours. Prerequisite: course 22 N . Survey of the main movements in nineteenth century philosophy on the European continent. Idealism in Schopenhaver and Hegel, dialectical materialism in Marx, irrationalism in Kierkegaard, Nietzsche and Dostoessky. Offered irregularly. GE credit: ArtHum | AH, WE.-Mattey
156. Contemporary Analytic Philosophy (4) Lecture/discussion - 3 hours; term paper. Prerequisite: one course in philosophy. Consideration of central issues such as meaning/reference, analytic/ synthetic, reductionism, formal and ordinary language, essential properties, ontological commitment, possible world semantics; influential works by philosophers such as Russell, Moore, Wittgenstein, Austin, Carnap, Quine, Putnam, Kripke, van Fraassen. GE credit: AH, WE. - Antonelli

## 157. Twentieth Century European

## Philosophy (4)

Lecture/discussion-4 hours. Prerequisite: one course in Philosophy. Survey of the main movements in twentieth century philosophy on the European continent, including phenomenology, existentialism, post-structuralism and post-modernism. Philosophers covered are Husserl, Heidegger, Sartre, Foucault, Derrida. GE credit: ArtHum | AH, WE.-Mattey

## 160. Pre-Socratics (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 21. Study of the metaphysical views of such pre-Socratic figures as the Milesians, the Pythagoreans, Heracleitus, Parmenides, Empedocles, Anaxagoras, and the atomists. GE credit: AH, WE. - Szaif

## 161. Plato (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 21 . Examines Plato's most important contributions in metaphysics, epistemology, psychology, cosmology, ethics and political philosophy. Dialogues will be selected from Plato's middle and later writings. GE credit: AH, WE.-Szaif

## 162. Aristotle (4)

Lecture/discussion-3 hours; term paper. Prerequisite: course 21. An overview of Aristotle's most central and influential writings. Topics selected from fields such as metaphysics, physics, ethics, logic, and psychology. GE credit: AH, WE. - Szaif

## 168. Descartes (4)

Lecture/discussion-4 hours. Prerequisite: course 22N. The philosophical writings of Renè Descartes. Topics include the refutation of skepticism, the nature and existence of mind and body, the existence of God, and the foundations of science. Offered irregularly. GE credit: AH, WE.-Mattey

## 170. Leibniz (4)

Lecture/discussion-4 hours. Prerequisite: course 22 N . Survey of the philosophical writings of Gotffried Wilhelm Leibniz. Topics include Leibniz's logic, the existence of God, human freedom, substance, and the relation between science and metaphysics. Offered irregularly. GE credit: AH, WE.Mattey

## 172. Locke and Berkeley (4)

Lecture/discussion-4 hours. Prerequisite: course $22 N$. Principal metaphysical works of John Locke and George Berkeley. Topics include abstract ideas,
existence of matter, primary and secondary qualities, essence, substance, the existence of God, and the nature of scientific knowledge. May be repeated for credit. Offered irregularly. GE credit: AH, WE.Mattey
174. Hume (4)

Lecture/discussion-4 hours. Prerequisite: course 22N. David Hume's Treatise of Human Nature and related writings. Topics include empiricism, space, causality, belief, skepticism, the passions, and morality. Offered irregularly. GE credit: AH, WE. - Mattey
175. Kant (4)

Lecture/discussion-4 hours. Prerequisite: course 22N. Immanuel Kant's Critique of Pure Reason and related writings. Topics include the nature of human cognition, space and time, a priori concepts, substance, causality, human freedom, and the existence of God. Offered irregularly. GE credit: AH, WE.Mattey

## 178. Frege (4)

Lecture/discussion - 3 hours; extensive writing. Prerequisite: one upper-division course in philosophy or permission of instructor. Development of Gottlob
Frege's views about language and logic. Formulation of his grand mathematical idea known as logicism and how it led to the philosophy of language. GE credit: AH, WE.-May

## 189A. Special Topics in Philosophy (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic Special topics in (A) History of Philosophy. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH, WE.

## 189B. Special Topics in Philosophy (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (B) Metaphysics. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH, WE.

## 189C. Special Topics in Philosophy (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (C) Theory of Knowledge May be repeated up to eight units of credit. Offered irregularly. GE credit: WE.

## 189D. Special Topics in Philosophy (4)

Lecture/discussion -3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (D) Ethics. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH, WE.

## 189E. Special Topics in Philosophy (4)

Lecture/discussion -3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (E) Political Philosophy. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH, WE.

## 189F. Special Topics in Philosophy (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (F) Philosophy of Law. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH, WE.

## 189G. Special Topics in Philosophy (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic. (G) Aesthetics. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH, WE.

## 189H. Special Topics in Philosophy (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (H) Philosophy of Mind. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH, WE.

## 1891. Special Topics in Philosophy (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (I) Philosophy of Science. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH or SE, WE.

189J. Special Topics in Philosophy (4)
Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (J) Philosophy of Language. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

## 189K. Special Topics in Philosophy (4)

Lecture/discussion-3 hours; extensive writing. Prerequisite: one course in the area of the special topic. Special topics in (K) Logic. May be repeated up to eight units of credit. Offered irregularly. GE credit: AH.

## 194HA-194HB. Honors Research Project

 (4-4)Tutoring - 3 hours; term paper. Prerequisite: consent of instructor; open to students who are members of the honors program in Philosophy. Completion of honors research project under direction of an instructor. Consult departmental major adviser for list of instructors available in a given quarter.
198. Directed Group Study (1-5)
(P/NP grading only.)
199. Special Study for Advanced

Undergraduates (1-5)
Prerequisite: consent of instructor.
(P/NP grading only.)

## Graduate

200A. Proseminar I (4)
Seminar-3 hours; term paper. Prerequisite: consent of instructor; open only to students in their first quarter of the Philosophy Ph.D. program. Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work. -I. (I.)

## 200B. Proseminar II (4)

Seminar-3 hours; term paper. Prerequisite: consent of instructor; only for students in their first quarter of Philosophy Ph.D. program. Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work. Limited enrollment.-l. (I.)
201. Metaphysics (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics vary from quarter to quarter and may include the following: What are things? Do names refer to things? If so, how? Do things have essential properties? What is the nature of necessity? May be repeated for credit when topic differs and with consent of instruc-tor.-Gilmore
202. Theory of Knowledge (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Topics vary from quarter to quarter. Sample topics include belief, skepticism, justification, externalism, naturalized epistemology. May be repeated for credit with consent of instructor. - Mattey, Molyneux

## 203. Philosophy of Mind (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the philosophy of mind such as the mind-body problem, mental representation, consciousness, intentionality. May be repeated for credit with consent of instruc-tor.-Molyneux
203P. Philosophy of Mind Practicum (4)
Practicum-12 hours. Prerequisite: consent of instructor. Specific research conducted and prepared for publication by advanced students in a team setting. Topics include knowledge representation and learning in neural networks, the nature and formal properties of mental representation. May be repeated for credit when topic differs and with consent of instructor. (S/U grading only.)

## 207. Philosophy of Physics (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing in Philosophy or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of physics, such as foundations of spacetime theories, the interpretation of quantum mechan-
ics, or foundations of statistical mechanics. May be repeated for credit when topic differs and with consent of instructor. - Landry

## 208. Philosophy of Biology (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of biology, such as foundations of evolutionary theories, reductionism in biology, sociobiology and cultural evolution. May be repeated for credit when topic differs and with consent of instructor.-Griesemer, Millstein

## 210. Philosophy of Science (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Treatment of one or more general topics of current interest in philosophy of science. Topics may include scientific explanation, theories of confirmation, scientific realism, reduction in physics and biology. May be repeated for credit when topic differs and with consent of instructor.-Griesemer, Landry, Millstein

## 212. Philosophy of Logic and Mathematics

 (4)Seminar-3 hours; term paper. Prerequisite: course 112 or 113 or Mathematics 108 or 125 or the equivalent. Philosophical issues in logic and math. Topics may include nature of logical and mathematical truth or knowledge, correctness of logical systems, foundations of mathematics, metaphysical and epistemological presuppositions, applications to philosophical problems and formalization of philosophical theories. May be repeated for credit when topic differs and with consent of instructor. - Antonelli, Landry

## 213. Advanced Logic for Graduate Students

 (4)Lecture/discussion-3 hours; extensive problem solving. Prerequisite: graduate standing in Philosophy. Enrollment in the Philosophy Ph.D. program. Intensive study of advanced logic, including set theory, metatheory of predicate logic, and modal logic. May be repeated two times for credit when topic dif-fers-I. (I.) Antonelli, Mattey

## 214. Ethics (4)

Seminar-3 hours; term paper Prerequisite: graduate standing in philosophy or consent of instructor. Topics may include morality and motivation, objectivity in ethics, the relationship between the factual and the moral. Topics vary from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor.-Copp, Oshana

## 217. Political Philosophy (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced studies in political philosophy. Topics vary but may include distributive justice, enforcement of morality by the state, equality, obligation to obey the law, social contract theory. May be repeated for credit when topic differs and with consent of instructor.Copp, Oshana

## 220. Environmental Ethics (4)

Lecture-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Intensive treatment of one or more topic(s) in environmental ethics, such as biodiversity, sustainability, composition of the moral community, invasive species, endangered species, applications of ethical theories to contemporary environmental issues.-Millstein

## 237. Philosophy of Language (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Study of philosophical issues raised by language, such as the nature of semantic content, proper semantics for verbs of propositional attitude, feasibility and limitations of formal semantics and pragmatics for natural languages. May be repeated for credit when topic differs and with consent of instructor. - May, Sennet

## 238. Philosophy of Language Workshop (4)

 Seminar-3 hours; extensive writing. Discussion of recently published, unpublished and in-progress research in philosophy of language, including work on the relation of language and mind, of languageand logic, and linguistic theory. Open to graduate students only. May be repeated for credit when topic differs. - May

## 261. Plato (4)

Seminar-3 hours; term paper. Prerequisite; graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Plato's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor.-Szaif

## 262. Aristotle (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Aristotle's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor. - Szaif

## 275. Kant (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing in philosophy or consent of instructor. Intensive study of a topic in the philosophy of Kant, in such areas as metaphysics, theory of knowledge, ethics. May be repeated for credit with consent of instructor.-Mattey

## 290. History of Philosophy (4)

Seminar-3 hours; term paper. Prerequisite: graduate standing or consent of instructor. Topics in the history of philosophy. Topics vary according to instructor from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor.-Mattey, Szaif
298. Group Study (1-5)
299. Research (1-12)
(S/U grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) - I, II, III. (I, III, III.)

## Physical Education

James Les, B.S. Lecturer/Coach
Daniel Leyson, M.A., Lecturer/Coach
Ron Manara, B.A., Lecturer
Bill Maze, M.B.A., Lecturer/Coach
Peter Motekaitis, M.A., Lecturer/Coach
Kevin Nosek, M.S., Lecturer/Coach
Maryclaire Robinson, M.S., Lecturer
Anthony Schifano, B.A. Lecturer/Coach
Dwayne Shaffer, M.A., Lecturer/Coach
Sandy Simpson, M.S., Lecturer
Eric Steidlmayer, J.D, Lecturer/Coach
Danielle Stines, M.S. Lecturer/Coach
Anna Temple, B.A., Lecturer/Coach
Lisa Varnum, B.S., Athletic Trainer/Lecturer
Matt Vaughn, M.A., Lecturer/Coach
Andrew Wartenburg, B.A. Lecturer/Coach
Robert Watts, M.A., Lecturer/Coach
Cy Williams, M.A.T., Lecturer/Coach
Jamey Wright, J.D., Lecturer/Coach
Karen Yoder, M.A., Lecturer/Coach
Karen Zufelt, Ph.D, Lecturer

## The Program of Study

The Program in Physical Education facilitates the development and offering of non-major courses related to physical activities and education, fitness and health, athletic training, teacher education, and organized sport. The Program is available as part of a student's general educational experience to enhance and broaden the understanding and experience of physical activity in the maintenance of lifetime health and fitness.
The basic activities series includes Physical Education 1, fitness, lifetime, and sports skills. The PE 1 activity courses are instructional in nature, designed to introduce new skills to beginners or to improve existing skills. Physical Education 6 is offered for students participating in intercollegiate athletics. Additional lower division courses include those in special skill areas, such as life-saving and water safety, health and fitness, and athletic training. Upper division courses include advanced classes in coaching, sociology of sports, and a series of courses that meet the mandated requirements for students pursuing teacher preparation and certification.
Teaching Credential Subject Representative. W.J. Weidner

Class and Recreational Use of Facilities. The incidental fee payable by all students at the time of registration entitles students to the use of the gymnasium, pool, showers, towels, lockers, tennis courts, and athletic fields. Equipment for games and sports are available for classes. Lockers must be turned in on the last day of class, i.e., before the final examination period. Fines are imposed for each formal transaction necessitated by failure of the student to comply with the regulations of the program.

## Courses in Physical Education (PHE)

## Lower Division

## 1. Physical Activities (0.5)

Laboratory-2 hours. Sections in: (a) sports skills, rules and strategy; (b) physical fitness and personal health; (c) recreation; (d) aerobic dance. May be repeated along with course 6 for a combined total of 6 units. (P/NP grading only.) - I, II, III. (I, II, III.)

## 6. Preparation and Participation in ICA

## Competition (1)

Discussion/laboratory-10-20 hours. Prerequisite: consent of instructor (coach). Preparation and participation in Intercollegiate Athletics. Development of fundamental and advanced individual and team skills. In-depth knowledge of rules and strategy.

Advanced sports competition and Conference and NCAA levels. May be repeated along with course 1 for a combined total of 6 units. ( $\mathrm{P} / \mathrm{NP}$ grading only.)-I, II, III. (I, II, III.)

## 7. Professional Physical Education

Activities: Men and Women (1)
Lecture-1 hour; or laboratory-2 hours. Fundamental skills for: (a) coaching competitive athletics; (b) classroom teaching and coaching, and (c) classroom teaching and officiating. May be repeated for a total of six units. -I, II. (I, II.)
8. Student-Athlete Life Skills (1)

Lecture-1 hour. Prerequisite: consent of instructor. Open to intercollegiate student-athletes only. For intercollegiate student-athletes. Balancing academic and athletic demands. Academic, psychological, and sociocultural issues which influence success as a college student-athlete. (P/NP grading only.)-I, II. (III.)

## 15. Administration of Intramural Sports (2)

 Lecture -2 hours. Planning and administering intramural sports programs at the high school and college level.25. Theory of Lifesaving and Water Safety (2)

Lecture-1 hour; laboratory - 2 hours. Prerequisite: sound physical condition, and no physical handicap that would render student unable to perform the required skills and ability to pass preliminary swimming test. Provides the student with the knowledge, organizational procedures, and skill development necessary to provide for water safety and save his/ her own life or the life of another in an aquatic emergency. (American Red Cross Advanced Lifesaving Certificate awarded upon successful completion of necessary requirements.) - III. (III.) Jahn

## 27. Training Course for Water Safety

 Instructors (2)Lecture-1 hour; laboratory - 2 hours. Prerequisite: advanced swimming (course 1) or consent of instructor; course 5 and current Advanced Life-Saving Certificate. Theoretical knowledge and practical experience necessary for the organization and teaching of swimming and lifesaving classes. (American Red Cross Water Safety Instructor's Certificate awarded upon successful completion of necessary requirements.) - III. (III.) Jahn

## 40. Drugs and Society (2)

Lecture-2 hours; fieldwork-2 hours total; film-viewing - 5 hours total. Pharmacology, methods of use, and effects of use of psychoactive and performanceenhancing drugs. Historical overview of drug use. Identification of behavior of "at-risk" and "user" populations. (P/NP grading only.) - II, IV. (II, IV.)
44. Principles of Healthful Living (2)

Lecture-2 hours. Application of scientific and empirical knowledge to personal, family, and community health problems. (P/NP grading only.) -I, II, III, III, IV. (II, III, IV.)
92. Physical Education Internship (1-5) Internship-3-15 hours; written project proposal and evaluation. Prerequisite: consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Biology majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for credit once but no internship units will be counted toward Exercise Biology major. (P/ NP grading only.)
97T. Tutoring in Physical Education (1-5) Tutorial-1-5 hours. Prerequisite: lower division standing and consent of Program Director. Tutoring of students in lower division physical activity courses. Weekly meetings with instructor in charge of courses. Written reports on methods and materials required. May be repeated one time for credit. (P/ NP grading only.)

97TC. Tutoring in the Community (1-5)
Tutorial-2-15 hours; discussion-1 hour. Prerequisite: lower division standing and consent of Program Director. Tutoring in the community in physical activity related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated one time for credit. (P/NP grading only.)

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor and Program Director. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) (P/NP grading only.)

## Upper Division

100. Field Experience in Teaching Physical Education (2)
Discussion-1 hour; fieldwork-4 hours. Prerequisite: upper division standing and appropriate course 1 or 7. Tutoring or teacher's aide in physical educafion activities, including athletic coaching, in public schools under the guidance of a regular teacher with supervision by a departmental faculty person. May be repeated one time for credit. (P/NP grading only.) -I, II, III. (I, II, III.)
101. Sport in American Society (3)

Lecture-3 hours. Sociological approaches to the study of sport and contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as Exercise Biology 120.) GE credit: SocSci, Div | SS. - II, IV. (II, IV.)
131. Physical Activity and the Disabled (4) Lecture-3 hours; laboratory-3 hours. The study of the diverse and complex nature of individuals with disabilities and how they adapt to their disabilities in daily living. Integration of individuals with disabilities into the community, schools, and physical activity and recreational programs. Not open for credit to students who have completed Exercise Biology 131.
133. Prevention and Care of Sports Injuries (3)

Lecture-2 hours; laboratory-3 hours. Prerequisite: Cell Biology and Human Anatomy 101 (may be taken concurrently). Prevention, care, and rehabilitation of injuries incurred by athletes. Laboratory on anatomy, emergency care, physical therapy methods, and taping techniques. Not open for credit to students who have completed Exercise Biology 133.-IV. (IV.)
135. Advanced Procedures in Evaluation and Management of Athletic Injuries (3) Lecture-3 hours. Prerequisite: course 133 or Exercise Biology 133, Cell Biology and Human Anatomy 101, consent of instructor. Advanced study of the evaluation and management of athletic injuries, including mechanism of injury, biomechanics and pathophysiology. Current topics in athletic training. Not open for credit to students who have completed Exercise Biology 135.
141. Coaching Principles and Methods (3) Lecture/discussion-3 hours. Prerequisite: upperdivision standing; course 143. Technical, tactical, and strategic aspects of coaching. Methods for organizing and delivering effective information in coaching. Biomechanical basis of motor skills and motor learning principles applied to coaching. Classroom development of coaching skills and outside observations of coaching required. -III. (III.) Bronzan

## 142. Physical Education in the Public

 Schools (3)Lecture-3 hours. Analysis and study of the principles and methods basic to teaching physical education at the elementary and secondary levels.

## 143. Coaching Effectiveness (3)

Lecture-3 hours. Prerequisite: upper division standing; 3 units of courses 1 and 6 combined. Synthesis and application of basic components of sport psy-
chology, sport pedagogy, and sport physiology and basic management and administration of athletics in public high schools. (P/NP grading only.) -I, II, IV. (I, II, IV.) Bronzan

## 144. Principles of Health Education (2)

 Lecture-2 hours. Prerequisite: course 44 and upper division standing or consent of instructor. Principles of teaching health education in the public schools. (P/NP grading only.)150. Recreation in the Community (3)

Lecture-2 hours; discussion - 1 hour; two Saturday field trips - 8 hours. The nature and scope of commu nity recreation programs in California emphasizing low income, highly populated areas, and poor rural communities.

## 192. Physical Education Internship (1-12)

Internship-3-36 hours; written project proposal and evaluation. Prerequisite: upper division standing and consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Science majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated for a total of 12 units (including course 92) but no internship units will be counted toward Exercise Science major. (P/NP grading only.) - I, III III. (I, II, III.)
197T. Tutoring in Physical Education (1-5) Tutorial-1-5 hours. Prerequisite: consent of chairperson. Tutoring of students in lower division physical activity courses. Written reports on methods and materials required. May be repeated one time for credit. (P/NP grading only.)
197TC. Tutoring in the Community (1-5) Tutorial-2-15 hours; discussion - 1 hour. Prerequisite: upper division standing and consent of Department Chairperson. Tutoring in the community in physical education related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated one time for credit. (P/ NP grading only
198. Directed Group Study (1-5)

Prerequisite: consent of instructor and Department Chairperson. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Professional

300. The Elementary Physical Education

Program (2)
Lecture-1 hour; laboratory-2 hours. Prerequisite: consent of instructor. Restricted to senior standing or credential student. Introduction to principles, theories, material, and practices of elementary school physical education program. - III. (III.)

## 380. Methods of Teaching Physical

## Education (3)

Lecture - 1 hour; laboratory - 6 hours. Prerequisite: course 142 and six units of course 7; or consent of instructor. The methods of teaching group and individual activities for grades K-12; program planning, class management, organization, and evaluation. (P/NP grading only.)

## Physical Medicine and Rehabilitation

Ramona Vogt, Ph.D., Adjunct Professor

## The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and highenergy particle accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.
The Program. The Department of Physics offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.
Career Alternatives. Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduatelevel work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science

## Physics

A.B. Major Requirements:

Preparatory Subject Matter .............. 41-47
Physics 9A, 9B, 9C, 9D or 9HA, 9HB,
9HC, 9HD, 9HE .............................. 19-25
Mathematics $21 \mathrm{~A}, 21 \mathrm{~B}, 21 \mathrm{C}, 21 \mathrm{D}, 22 \mathrm{~A}$,
22B.
Depth Subject Matter ......................... 35-3
Physics 104A, 105A, 110A, 110B, 112,
115A, 122A or 122B .......................... 28
At least one course from: 129A, 130A,
140A, 151, 152, or 153 ........................
Physics 102 (1 unit) waived if 104B
taken.
. 0-1
At least one additional fixed-unit upper
division Physics course excluding 160 ... 3-4
Total Units for the Major ................... 76-84
B.S. Major Requirements:

UNITS
Preparatory Subject Matter ............. 50-56
Physics 9A, 9B, 9C, 9D or 9HA, 9HB,
9HC, 9HD, 9HE

Mathematics 21A, 21B, 21C, 21D
22A, 22B
22
Computer Science Engineering 30 (or
equivalent programming course)
Chemistry 2A or 2HA (2B-2C or
2HB-2HC highly recommended)
.5
Depth Subject Matter
59-62
Physics 104A, 105A, 105B, 110A,
110B, 110C, 112, 115A, 115B.
Physics 102 (1 unit) or 104B. 36

Physics 122A or 122B or
$116 \mathrm{~A}, \mathrm{~B}$ and C $\qquad$ 4-12
Two courses from one specialty (General Relativity/Astrophysical Applications,
Condensed Matter, or Nuclear/Particle
Physics) and one course from a different
specialty. Lists of courses in each specialty are
available from the department............... 12
Additional upper division Physics courses
excluding 160, for a total of 15 upper
division Physics courses of three or more units each. With prior departmental approval, one course from mathematics, engineering, or natural science may be used to meet this requirement. May include only one course
from: 194H, 195, 198, 199. $\qquad$ 0-9

## Total Units for the Major

 109-118
## Astrophysics Emphasis

Preparatory Subject Matter............... 50-56
Physics 9A, 9B, 9C, 9D or 9HA, 9HB,
9HC, 9HD, 9HE .
Mathematics $21 \mathrm{~A}, 21 \mathrm{~B}, 21 \mathrm{C}, 21 \mathrm{D}$
22A, 22B ......................................... 22
Computer Science Engineering 30 (or
equivalent programming course) .............. 4
Chemistry 2A or 2HA (2B-2C or 2HB-2HC
highly recommended).
Depth Subject Matter ......................... 59-65
Physics 104A, 105A, 108, 108L, 110A,
110B, 112, 115A, 115B, .................... 32
Physics 102 or 104B............................1-4
Physics 122A or 122B or 157 ................ 4
Physics 151, 152, 153, 156. 16
Two elective courses from: Physics 105B,
110C, 116A, 129A, 130A, 130B, 150 (only with an astrophysics topic and prior
departmental approval), 154, 155, Geology
163; may include only one course from:
Physics 194H, 195, or 199
Total Units for the Major $\qquad$ 109-121

## Recommended

Computer Science Engineering 40;
Astronomy 25

## Applied Physics

## B.S. Major Requirements:

Preparatory Subject Matter................49-56
Physics 9A, 9B, 9C, 9D or 9HA, 9HB,
9HC, 9HD, 9HE
Mathematics $21 \mathrm{~A}, 21 \mathrm{~B}, 21 \mathrm{C}, 21 \mathrm{D}$
22A, 22B ......................................... 22
Computer Science Engineering 30 (or
equivalent programming course) ...
Depending on area of concentration:
Chemistry 2A or 2HA (2B-2C or 2HB-2HC
highly recommended)
Computer Science Engineering 40 or
Mathematics 22AL ............................4-5
Depth Subject Matter .........................57-64
Physics 104A, 105A, $110 \mathrm{~A}, 110 \mathrm{~B}, 112$,
115A, 116A, 116B............................. 32
Physics 102 (1 unit) or 104B...................1-4
Physics 122A or 122B or 116 C ............. 4
Further courses from approved lists within
one of the following concentrations chosen in consultation with a major adviser, to
bring total number of three to five unit
Depth courses to 15 $\qquad$ 20-24 in atmospheric physics, chear computational physics, geophysics,
materials science, physical electronics, and physical oceanography are available from the Physics Department.
Total Units for the Major $\qquad$ 106-121

## Recommended Electives

Astronomy: Astronomy 25
Computer and numerical analysis:
Mathematics 128A or Applied Science
Engineering 115
Statistics: Statistics 131A
Advanced mathematics: Mathematics 108,
$118 A B$, 119AB 127ABC 185AB
Program Variance. Courses from other departments may be submitted for courses in the depth subject matter requirements by obtaining written permission from the Undergraduate Curriculum Committee Chairperson, as approved by the Department.
Major Advisers. Contact Departmental Undergraduate Majors office in 174 Physics Building, for adviser assignment.

## Minor Program Requirements:

All courses in the minor have prerequisites equivalent to Mathematics 21A-21B-21C-21D and 22A22B and Physics 9A-9B-9C-9D. Students considering the possibility of a minor should consult with a Physics major advisor before beginning course work in the minor program.

## Physics

 24At least 6 upper division courses in Physics
(excluding Physics 160, 197T, \& 199).... 24
Graduate Study. The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.
Astronomy. In addition to the introductory Astronomy courses listed, upper division and graduate courses in Astronomy, Astrophysics and Cosmology are listed under Physics.

## Courses in Astronomy (AST)

## Lower Division

## 10G. Introduction to Stars, Galaxies, and

 the Universe (3)Lecture-3 hours. Non-mathematical introduction to astrophysics of the Universe beyond our solar system using concepts of modern physics. Not open for credit to students who have taken Astronomy 2, the former Astronomy 10, any quarter of Physics 9 or 9 H , or any upper-division physics course (other than 137 or 160). GE credit: SciEng | SE, SL, VL. - I, II, III. (I, II, III.)

10L. Observational Astronomy Laboratory (1)

Laboratory-2.5 hours. Prerequisite: course 10G or 1OS (may be taken concurrently). Introduction to observations of the night sky using small telescopes in nighttime laboratory. Not open for credit to students who have completed course 2 or 10. GE credit: SciEng | SE, VL.-I, III. (I, III.)
10S. Astronomy of the Solar System (3) Lecture-3 hours. Introduction to naked eye and telescopic observations of events in the night sky: positions of sun, moon, planets throughout the year. Historical perspective on how our understanding of the solar system evolved to current non-mathematical astrophysical interpretation of planetary systems. Not open for credit to students who have taken course 2, Physics 9 or 9 H , or any upper-division physics course (other than 137 or 160). GE credit: SciEng | SE, SL, VL. - I, II, III. (I, II, III.)

## 25. Introduction to Modern Astronomy and Astrophysics (4) <br> Lecture-3 hours; lecture/discussion-2.5 hours.

 Prerequisite: good facility in high school physics and mathematics (algebra and trigonometry). Description and interpretation of astronomical phenomena using the laws of modern physics and observations by modern astronomical instruments. Gravity, relativity, electromagnetic radiation, atomic and nuclear processes in relation to the structure and evolution of stars, galaxies and the universe. Not open to students who have received credit for course 2, 10G, or 10L. GE credit: SciEng \| SE, SL, VL.-I. (I.) Fassnacht, Lubin
## Courses in Physics (PHY)

Physics 10 is primarily a concept-oriented one-quarter lecture/discussion course requiring relatively little mathematical background.
Physics 1 is a two-quarter sequence requiring some mathematics (trigonometry). Either 1A alone or both quarters may be taken. The sequence is not intended to satisfy entrance requirements of a year of physics for professional schools, but will satisfy requirements of 3 or 6 units of physics.
Physics 7 is a one-year (three-quarter) introductory physics course with laboratory intended for students majoring in the biological sciences. It has a calculus prerequisite. If you don't want a full year of introductory physics, you should take one or two quarters of Physics 1 instead. Read the following information carefully if you are using Physics 7 to complete an introductory course you have already begun.
The sequence of material in Physics 7 is different from that in most traditionally taught introductory physics courses. Physics 7 B is most like the first quarter or semester of traditionally taught courses which treat classical mechanics. Physics 7C is most like the last quarter or semester which, in traditionally taught courses, treats optics, electricity and magnetism, and modern physics. The content and sequence of Physics 7A is unlike that of most other traditionally taught courses.
If you have completed one introductory quarter or semester of a traditionally taught physics course and want to continue with Physics 7, you should first take (and will receive full credit for) Physics 7A. Then, either skip 7B, but self-study the last three weeks of material, or take 7B and receive reduced credit. Finally, take 7C for full credit.
If you have taken two quarters of a year-long introductory physics course and have not had extensive work in optics, electricity and magnetism, and modern physics, you should take Physics 7C. In no case should you take Physics 7B without first taking Physics 7A. All other situations should be discussed directly with a Physics 7 instructor.
Students not intending to take the entire sequence should instead take Physics 1.
Physics 9 is a four-quarter sequence using calculus throughout and including laboratory work as an integral component. The course is primarily for students in the physical sciences and engineering.
Physics 9 H is a five-quarter honors physics sequence, which may be taken instead of Physics 9 It is intended primarily for first-year students with a strong interest in physics and with advanced placement in mathematics to Mathematics 21B. Students who plan to major in physics, and also motivated non-majors, should take Physics 9H instead of Physics 9 if they are ready to begin MAT21B in fall quarter. In course requirements and prerequisites, Physics 9HA-9HE can be substituted for Physics 9A-9D. Students may not switch between the 9 H and 9 series beyond 9HA or 9A.

## Lower Division

## 1A. Principles of Physics (3)

Lecture-3 hours. Prerequisite: trigonometry or consent of instructor. Mechanics. Introduction to general principles and analytical methods used in physics with emphasis on applications in applied agricul-
tural and biological sciences and in physical education. Not open to students who have received credit for course 7B, or 9A. GE credit: SciEng | SE.-I. (I.)

## 1B. Principles of Physics (3)

Lecture-3 hours. Prerequisite: course 1A or 9A. Continuation of course 1A. Heat, optics, electricity, modern physics. Not open for credit to students who have received credit for course 7A, 7B, 7C, 9B, 9C, or 9D. GE credit: SciEng | SE.-II. (II.)

## 7A. General Physics (4)

Lecture- 1.5 hours; discussion/laboratory-5 hours. Prerequisite: completion or concurrent enrollment in Mathematics 16B, 17B , or 21 B . Introduction to general principles and analytical methods used in physics for students majoring in a biological science. Only two units of credit allowed to students who have completed course 1B or 9B. GE credit:
SciEng | SE.-I, II, III. (I, II, III.)

## 7B. General Physics (4)

Lecture- 1.5 hours; discussion/laboratory-5 hours. Prerequisite: course 7A. Continuation of course 7A. Only two units of credit allowed to students who have completed course 9A, or 1A. GE credit:

## SciEng | SE. - I, II, III. (I, II, III.)

## 7C. General Physics (4)

Lecture- 1.5 hours; discussion/laboratory-5 hours. Prerequisite: course 7B. Continuation of course 7B. Only two units of credit allowed to students who have completed course 9C or 5C. GE credit:
SciEng | SE.-I, II, III. (I, II, III.)

## 9A. Classical Physics (5)

Lecture-3 hours; laboratory-2.5 hours; discus-sion-1 hour. Prerequisite: Mathematics 21 B. Introduction to general principles and analytical methods used in physics for physical science and engineering majors. Classical mechanics. Only 2 units of credit to students who have completed course 1A or 7B. Not open for credit to students who have completed course 9HA. GE credit: SciEng | SE.-I, III. (I, III.)

## 9B. Classical Physics (5)

Lecture-3 hours; laboratory-2.5 hours; discus-sion-1 hour. Prerequisite: course 9A, Mathematics 21C, 21 (may be taken concurrently). Continuation of course 9A. Fluid mechanics, thermodynamics, wave phenomena, optics. Only 2 units of credit to students who have completed course 7A. Not open for credit to students who have completed course 9HB, 9HC, or Engineering 105. GE credit: SciEng | SE.-I, II. (I, II.)

## 9C. Classical Physics (5)

Lecture-3 hours; laboratory-2.5 hours; discus-sion-1 hour. Prerequisite; course 9B, Mathematics 21D, 22A (may be taken concurrently). Electricity and magnetism including circuits and Maxwell's equations. Only 3 units of credit to students who have completed course 7C. Not open for credit to students who have completed course 9HD. GE credit: SciEng | SE. - II, III. (III, III.)

## 9D. Modern Physics (4)

Lecture-3 hours; discussion-1.5 hours. Prerequisite: course 9C and Mathematics 22A; Mathematics 22B recommended (may be taken concurrently). Introduction to physics concepts developed since 1900. Special relativity, quantum mechanics, atoms, molecules, condensed matter, nuclear and particle physics. Not open for credit to students who have completed course 9HB, 9HC, or 9HE. GE credit:
SciEng | SE. - I, III. (I, III.)

## 9HA. Honors Physics (5)

Lecture-3 hours; discussion/laboratory-4 hours. Prerequisite: Mathematics 21B (may be taken concurrently) or consent of instructor. Classical mechanics. Same material as course 9A in greater depth. For students in physical sciences, mathematics, and engineering. Only 2 units of credit to students who have completed course 7B. Not open for credit to students who have completed course 9A. GE credit: SciEng | SE.-I. (I.)

## 9HB. Honors Physics (5)

Lecture-3 hours; discussion/laboratory - 4 hours. Prerequisite: Physics 9HA or 9A, Mathematics 21C (may be taken concurrently). Special relativity, ther-
mal physics. Continuation of course 9HA. Only 2 units of credit to students who have completed course 7A. Not open for credit to students who have completed course 9B or 9D. GE credit:
SciEng | SE. - II. (II.)

## 9HC. Honors Physics (5)

Lecture-3 hours; discussion/laboratory - 4 hours. Prerequisite: course 9HB and Mathematics 21D (may be taken concurrently). Waves, sound, optics, quantum physics. Continuation of Physics 9HB. Only 2 units of credit to students who have completed course 7C. Not open for credit to students who have completed course 9B or 9D. GE credit:
SciEng | SE.-III. (III.)
9HD. Honors Physics (5)
Lecture-3 hours; discussion/laboratory-4 hours. Prerequisite: course 9HC and Mathematics 21D. Electricity and magnetism. Continuation of Physics 9 HC . Not open for credit to students who have completed course 9C. GE credit: SciEng | SE.-I. (I.) 9HE. Honors Physics (5)
Lecture-3 hours; discussion/laboratory - 4 hours. Prerequisite: course 9HD and Mathematics 22B (may be taken concurrently). Application of quantum mechanics. Not open for credit to students who have completed course 9D. GE credit: SciEng | SE.-II. (II.)
10. Topics in Physics for Nonscientists (4) Lecture-3 hours; discussion-1 hour. Prerequisite: high school algebra. Emphasis varies: survey of basic principles or a deeper exploration of some particular branch. Past topics included black holes, space time, and relativity; physics of music; history and philosophy; energy and the environment; and natural phenomena. Check with the Department office for the current emphasis. No units of credit allowed if taken after any other physics course. GE credit: SciEng, Wrt | SE.

## 12. Visualization in Science (3)

Lecture-3 hours. Class size limited to 20-50 students. Production, interpretation, and use of images in physics, astronomy, biology, and chemistry as scientific evidence and for communication of research results. GE credit: SciEng \| SE, VL.-l. (I.)

## 30. Fractals, Chaos and Complexity (3)

 Lecture/discussion-3 hours. Prerequisite: Mathematics 16A or 21A. Modern ideas about the unitying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. (Same course as Geology 30.) GE credit: SciEng | QL, SE. - (II.) Rundle49. Supplementary Work in Lower Division Physics (1-3)
Students with partial credit in lower division physics courses may, with consent of instructor, complete the credit under this heading. May be repeated for credit. GE credit: SciEng | SE. - I, II, III. (I, II, III.)

## 90X. Lower Division Seminar (2)

Seminar-2 hours. Prerequisite: lower division standing and consent of instructor. Examination of a special topic in Physics through shared readings, discussions, written assignments, or special activities such as laboratory work. May be repeated for credit. Limited enrollment. GE credit: SciEng | SE.

## 98. Directed Group Study (1-5)

Prerequisite: consent of instructor; primarily for lower division students. (P/NP grading only.) GE credit: SE.

## 99. Special Study for Undergraduates (1-5)

 Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.
## Upper Division

## 102. Computational Laboratory in Physics (1)

Laboratory-4 hours. Prerequisite: Mathematics 21D, 22AB; Computer Science Engineering 30; course 9D or 9HD; course 104A concurrently. Introduction to computational physics and to the compu-
tational resources in the physics department
Preparation for brief programming assignments required in other upper division physics classes. Not open to students who have completed course 104B or 105AL. GE credit: S SciEng | E.-I. (I.)

## 104A. Introductory Methods of

## Mathematical Physics (4)

Lecture-3 hours; extensive problem solving. Prereq visite: courses 9B, 9C, 9D and Mathematics 21D, 22 A , and 22 B with grade C - or better or consent of instructor. Introduction to the mathematics used in upper-division physics courses, including applications of vector spaces, Fourier analysis, partial differential equations. - I. (I.)

## 104B. Computational Methods of

## Mathematical Physics (4)

Lecture-3 hours; extensive problem solving. Prereq visite: course 104A with grade C- or better and course 105AL or consent of instructor. Introduction to the use of computational techniques to solve the mathematical problems that arise in advanced physics courses, complementing the analytical approaches emphasized in course 104A. GE credit: SciEng | SE.-II. (II.)
104C. Intermediate Methods of Mathematical Physics (4)
Lecture-3 hours; extensive problem solving. Prereq visite: course 104A with grade C- or better or consent of instructor. Applications of complex analysis, conditional probability, integral transformations and other advanced topics. Offered in alternate years. III. (III.)

105A-105B. Analytical Mechanics (4-4) Lecture-3 hours; extensive problem solving. Prereqvisite: courses 9B, 9C, 9D and Mathematics 21D, 22 A , and 22B passed with grade C - or better; or consent of department; course 104A and 105A passed with a grade C - or better or consent of department required for 105B. Principles and applications of Newtonian mechanics; introduction to Lagrange's and Hamilton's equations. GE credit: SciEng | SE. $-\mathrm{I}-\mathrm{II}$. (I-II.)

## 105C. Continuum Mechanics (4)

Lecture-3 hours. Prerequisite: 104A and 105A passed with a grade of C - or better, or consent of department. The continuum hypothesis and limitations, tensors, isotropic constitutive equations, and wave propagation. Applications such as elastic solids, heat flow, aerodynamics, and ocean waves. Offered irregularly. GE credit: SciEng | SE.—III. (III.) 108. Optics (3)

Lecture -3 hours. Prerequisite: course 9 or 7 sequence and Mathematics 21 sequence or consent of instructor. The phenomena of diffraction, interference, and polarization of light, with applications to current problems in astrophysics, material science, and atmospheric science. Study of modern optica instrumentation. Open to non-majors. GE credit: SciEng | SE. - III. (III.) Zhu
108L. Optics Laboratory (1)
Laboratory - 3 hours. Prerequisite: course 108 concurrently. The laboratory will consist of one major project pursued throughout the quarter, based on modern applications of optical techniques. GE credit: SciEng | SE. - III. (III.) Zhu

## 110A. Electricity and Magnetism (4)

Lecture-3 hours. Prerequisite: courses 9B, 9C, 9D and Mathematics 21D, 22A, and 22B with grade C or better, or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SciEng | SE.-II. (II.)

110B. Electricity and Magnetism (4)
Lecture -3 hours. Prerequisite: courses 110A and 104A with a grade of C- or better or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SciEng | SE.—III. (III.)

110C. Electricity and Magnetism (4)
Lecture-3 hours. Prerequisite: course 110B with a grade of C - or better, or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SciEng | SE.-I. (I.)

## 112. Thermodynamics and Statistical

 Mechanics (4)Lecture-3 hours; extensive problem solving. Prereqvisite: course 115A or the equivalent. Introduction to classical and quantum statistical mechanics and their connections with thermodynamics. The theory is developed for the ideal gas model and simple magnetic models and then extended to studies of solids, quantum fluids, and chemical equilibria. GE credit: SciEng | SE.-I. (I.)
115A. Foundation of Quantum Mechanics (4)

Lecture -3 hours; extensive problem solving. Prereqvisite: courses 104A and 105A passed with a grade of C- or better, or consent of department. Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics. Extensive problem solving. GE credit: SciEng | SE. - III. (III.)

## 115B. Applications of Quantum Mechanics

 (4)Lecture -3 hours; extensive problem solving. Prereqvisite: course 115A passed with a grade of C- of better, or consent of department. Angular momentum and spin; hydrogen atom and atomic spectra; perturbation theory; scattering theory. GE credit: SciEng | SE.-I. (I.)
116A. Electronic Instrumentation (4)
Lecture - 3 hours; laboratory -3 hours. Prerequisite: course 9C and Math 22B or consent of instructor. Experimental and theoretical study of important analog electronic circuits. Linear circuits, transmission lines, input impedance, feedback, amplifiers, oscillators, noise. GE credit: SciEng | SE, VL. - I. (I.)

## 116B. Electronic Instrumentation (4)

Lecture - 3 hours; laboratory - 3 hours. Prerequisite: course 9C or 9HD or consent of instructor. Continuation of course 116A. Introduction to the use of digital electronics and microcomputers in experimental physics. Nonlinear electronics, integrated circuits, analog-to-digital and digital-to-analog converters, transducers, actuators. GE credit: SciEng | SE.—II. (II.)

116C. Introduction to Computer-Based Experiments in Physics (4)
Lecture-3 hours; laboratory-3 hours. Prerequisite: course 9D or 9HD, 116B, Mathematics 22B or consent of instructor. Introduction to techniques for making physical measurements using computer-based instrumentation. GE credit: SciEng | SE, WE.-III (III.)

122A. Advanced Laboratory in Condensed Matter Physics (4)
Laboratory-8 hours. Prerequisite: course 104A, 105A, 110B, 115A and 112 (may be taken concurrently) or consent of the department. Experimental techniques and measurements in solid-state physics. Student performs three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SciEng | SE, WE. - II. (II.)
122B. Advanced Laboratory in Particle Physics (4)
Laboratory-8 hours. Prerequisite: course 104A, 105A, 110B, 115A and 112 (may be taken concurrently) or consent of the department. Experimental techniques and measurements in nuclear and particle physics. Students perform three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SciEng | SE, WE.-II. (II.)

## 123. Signals and Noise in Physics (4)

Lecture-3 hours; project-1 hour. Prerequisite:
courses 9A, B, C, D and 104A, or consent of instructor. Techniques of measurement and analysis designed to avoid systematic error and maximize
signal/noise ratio. Illustrative examples of optimal filters ranging from condensed matter to cosmology. Not open to students who have completed this course previously as course 198. Offered irregularly. GE credit: SciEng | SE. - III. (III.) Tyson

## 129A. Introduction to Nuclear Physics (4)

 Lecture-3 hours. Prerequisite: course 115A passed with a grade of C - or better or consent of instructor. Survey of basic nuclear properties and concepts requiring introductory knowledge of quantum mechanics: nuclear models and forces, radioactive decay and detecting nuclear radiation and nuclear reaction products, alpha, beta and gamma decay. GE credit: SciEng | SE. - III. (III.) Calderon
## 129B. Nuclear Physics, Extensions and Applications (4)

Lecture-3 hours; term paper. Prerequisite: course 129A. Continuation of course 129A. Nuclear reactions, neutrons, fission, fusion accelerators, introduction to meson and particle physics, nuclear astrophysics, and applications of nuclear physics and techniques to mass spectrometry, nuclear medicine, trace element analysis. Offered irregularly. GE credit: SciEng | SE.
130A-130B. Elementary Particle Physics (4-4)
Lecture -3 hours; extensive problem solving. Prereqvisite: course 115A passed with a grade of C- or better or consent of instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. GE credit: SciEng | SE.-III, III. (II, III.)

## 140A-140B. Introduction to Solid State Physics (4-4)

Lecture-3 hours; extensive problem solving. Prereqvisite: course 115A or the equivalent passed with a grade of C- or better or consent of instructor. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity. GE credit: SciEng | SE. - II-III. (II-III.)

## 150. Special Topics in Physics (4)

Lecture-3 hours; project. Prerequisite: courses 9A,
B, C, D or 9HA, HB, HC, HD, HE or consent of instructor. Topics vary, covering areas of contemporary research in physics. May be repeated for credit. Offered irregularly. GE credit: SciEng | SE.-I, II, III. (I, II, III.)
151. Stellar Structure and Evolution (4)

Lecture-3 hours; project. Prerequisite: courses 9A, B, C, D or consent of instructor. The chemical composition, structure, energy sources and evolutionary history of stars, with equal emphasis on both the observational data and theoretical models, including black holes, neutron stars and white dwarfs and the formation of substellar masses. Offered in alternate years. GE credit: SciEng | SE. - (I.) Becker, Boeshaar

## 152. Galactic Structure and the Interstellar

 Medium (4)Lecture-3 hours; project. Prerequisite: courses 9A, B, C, D and 105A concurrently or consent of instructor. The structure, contents, and formation of our Milky Way galaxy, viz. its shape and size, the nature of the interstellar medium, stellar populations, rotation curves, mass determination and evidence of dark matter. Offered in alternate years. GE credit: SciEng | SE.-I. Boeshaar, Knox

## 153. Extragalactic Astrophysics (4)

Lecture-3 hours; project. Prerequisite: courses 9A,
B, C, D, 104A and 105A or consent of instructor. Structure and evolution of galaxies and clusters of galaxies, including distance and mass determination, galaxy types and environments, active galactic nuclei and quasars, gravitational lensing and dark matter, global cosmological properties. Not open to students who have completed course 127. Offered in alternate years. GE credit: SciEng | SE. - (II.) Fassnacht

## 154. Astrophysical Applications of Physics

 (4)
## Lecture-3 hours; project. Prerequisite: course

105AB, 110A; 110B and 115A concurrently; 112 or consent of instructor. Applications of classical and quantum mechanics, thermodynamics, statistical mechanics, and electricity and magnetism to astrophysical settings such as the Big Bang, degenerate white dwarf and neutron stars, and solar neutrinos. Not open to students who have completed this course previously as course 198. Offered in alternate years. GE credit: SciEng | SE. - (III.) Knox
155. General Relativity (4)

Lecture-3 hours; project. Prerequisite: course 104A and $105 \mathrm{~A} ; 105 \mathrm{~B}$ and 110 A or consent of instructor. Definition of the mathematical frame work for the description of the gravitational field, introduction of the dynamical equations of Einstein governing its evolution and review of the key solutions, including black holes and expanding universes. Offered in alternate years. GE credit: SciEng | SE. - II. (II.) Kaloper

## 156. Introduction to Cosmology (4)

Lecture-3 hours; project. Prerequisite: courses 9A, B, C, D and 105A concurrently or consent of instructor. Contemporary knowledge regarding the origin of the universe, including the Big Bang and nucleosynthesis, microwave background radiation, formation of cosmic structure, cosmic inflation, cosmic acceleration and dark energy. Offered in alternate years. Not open to students who have completed course 126. GE credit: SciEng | SE.-II. Albrecht

## 157. Astronomy Instrumentation and Data

 Analysis Laboratory (4)laboratory-8 hours. Prerequisite: course 104A, 105A, 110A; 115A and 110 B may be taken concurrently. Open to Astrophysics Specialization majors; consent of instructor required. Experimental techniques, data acquisition and analysis involving laboratory astrophysics plus stellar, nebular and galaxy digital imaging, photometry and/or spectroscopy. Students perform three experiments. Individual work stressed. Minimum 10-15 page journal style articles of two experiments are required. Offered in alternate years. GE credit: SciEng | SE, WE. - (III.) Boeshaar, Tyson
160. Environmental Physics and Society (3) Lecture-3 hours. Prerequisite: course 9D or 7C; or course 10 or 1 B and Mathematics 16 B or the equivalent. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. (Same course as Engineering 160.) GE credit: SciEng or SocSci | SE or SL. - III. (III.)

## 185. Alumni Seminar Series (1)

Seminar-1 hour. Weekly guest speakers (usually a physics alumnus or alumna) tell students about their careers. Speakers use their experience to give students valuable perspectives on life after a degree in physics. May be repeated two times for credit. (P/ NP grading only.) GE credit: SciEng \| SE. - III. (III.)

## 190. Careers in Physics (1)

Seminar-2 hours. Overview of important research areas in physics, discussions of research opportunities and internships, strategies for graduate school and industrial careers, the fellowship and assistantship selection process, preparation of resumes, personal statements, and letters of recommendation. Physics and Applied Physics majors only. (P/NP grading only.) GE credit: SE.-I. (I.)

## 194HA-194HB. Special Study for Honors Students (4-4)

Independent study-12 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. (Deferred grading only, pending completion of sequence). GE credit: SciEng | SE.
195. Senior Thesis (5)

Independent study-15 hours. Prerequisite: consent of instructor required. Open only to Physics and Applied Physics majors with senior standing. Preparation of a senior thesis on a topic selected by the student with approval of the department. May be repeated for a total of 15 units. GE credit:
SciEng | SE.-I, II, III. (II, II, III.)

## 197T. Tutoring in Physics and Astronomy

 (1-5)Tutoring of students in lower division courses. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. Weekly meeting with instructor. (P/NP grading only.) GE credit: SE.-I, II, III. (I, II, III.)
198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.) GE credit: SE.

## 199. Special Study for Advanced <br> Undergraduates (1-5)

(P/NP grading only.) GE credit: SE.

## Graduate

200A. Theory of Mechanics and
Electromagnetics (4)
Lecture - 3 hours; independent study -1 hour. Prerequisite: courses 104B, 105B, and 110C or the equivalent; course 204A concurrently. Theoretical approaches in classical mechanics including the use of generalized coordinates and virtual work; variational calculus; Lagrange equations; symmetries, conservation laws, and Noether theorem; Lagrangian density; Hamilton formalism; canonical transformations; Poisson brackets; and Hamilton-Jacobi equations.-I. (I.)

## 200B-200C. Theory of Mechanics and

 Electromagnetics (4-4)Lecture -3 hours; independent study -1 hour. Prerequisite: course 200A, and course 204B concurrently. Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity. - II-III. (IIIIII.)

## 204A-204B. Methods of Mathematical Physics (4-4)

Lecture - 3 hours; independent study -1 hour. Prerequisite: courses 104A and 104B or the equivalent. Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Green's functions, calculus of variations, introduction to numerical analysis. - I-II. (I-II.)
210. Computational Physics (3)

Lecture-3 hours. Prerequisite: knowledge of Fortran or $C$. Analytic techniques to solve differential equations and eignevalue problems. Physics content of course will be self-contained, and adjusted according to background of students. Offered irregularly.

## 215A-215B-215C. Quantum Mechanics (4-

 4-4)Lecture - 3 hours; independent study -1 hour. Prerequisite: course 115B or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation. - I-II-III. (I-II-III.)
219A. Statistical Mechanics (4)
Lecture-3 hours; extensive problem solving. Prerequisite: course 215 B or the equivalent. Foundations of thermodynamics and classical and quantum statistical mechanics with simple applications to properties of solids, real gases, nuclear matter, etc. and a brief introduction to phase transitions. - III. (III.)

## 219B. Statistical Mechanics (4)

Lecture-3 hours; extensive problem solving. Prereqvisite: course 219A. Further applications of thermodynamics and classical and quantum statistical mechanics. The modern theory of fluctuations about the equilibrium state, phase transitions and critical phenomena.-I. (I.)

223A. Group Theoretical Methods of Physics-Condensed Matter (3)
Lecture-3 hours. Prerequisite: courses 215A, 215B (215C is corequisite) or consent of instructor. Theory of groups and their representations with applications in condensed matter. Offered irregularly.

## 223B. Group Theoretical Methods of

## Physics-Elementary Particles (3)

Lecture-3 hours. Prerequisite: courses 215A, 215B (215C is corequisite) or consent of instructor. Theory of groups and their representations with applications in elementary particle physics. Offered irregularly.

## 224A. Nuclear Physics (3)

Lecture-3 hours. Prerequisite: course 215B. Comprehensive study of the nucleon-nucleon interaction including the deuteron, nucleon-nucleon scattering, polarization, determination of real parameters of Smatrix, and related topics. Offered irregularly.

## 224B. Nuclear Physics (3)

Lecture-3 hours. Prerequisite: course 224A. Study of nuclear models, including shell model, collective model, unified model. Energy level spectra, static momenta, and electromagnetic transition rates. Offered irregularly.

## 224C. Nuclear Physics (3)

Lecture-3 hours. Prerequisite: course 224B. Study of nuclear scattering and reactions including the optical model and direct interactions. Beta decay and an introduction to weak interactions. Offered irregularly.

## 229A. Advanced Nuclear Theory (3)

Lecture-3 hours. Prerequisite: course 224C
Advanced topics in nuclear theory; theory of quan-tum-mechanical scattering processes. Exact formal theory and models for two-body scattering. Offered irregularly.
229B. Advanced Nuclear Theory (3)
Lecture-3 hours. Prerequisite: course 229A.
Advanced topics in nuclear theory; theory of quan-tum-mechanical scattering processes. Exact formal theory and models for three-body scattering. Offered irregularly.
230A. Quantum Theory of Fields (3)
Lecture-3 hours. Prerequisite: course 215C. Relativistic quantum mechanics of particles; techniques and applications of second quantization; Feynman diagrams; renormalization.-I. (I.)
230B. Quantum Theory of Fields (3)
Lecture-3 hours. Prerequisite: course 230A. Continuation of 230A, with selected advanced topics, such as S-matrix theory, dispersion relations, axiomatic formulations. - II. (II.)

## 230C. Quantum Theory of Fields (3)

Lecture-3 hours. Prerequisite: course 230A and B, or consent of instructor. Renormalization theory and applications, including dimensional regularization, Ward identities, renormalization group equations, coupling constant unification, and precision electroweak calculations. May be repeated for credit with consent of instructor.-II. (II.)

## 240A. Condensed Matter Physics A (3)

Lecture-3 hours. Prerequisite: course 215C, 219A; course 140AB or equivalent recommended. Topics in condensed matter physics: Crystal structure; oneelectron theory; transport and optical properties of semiconductors; phonons, electron-phonon scattering. - I. (I.)
240B. Condensed Matter Physics B (3)
Lecture-3 hours. Prerequisite: course 240A. Topics in condensed matter physics: transport and optical properties of metals and quantum structures; experimental measurement the Fermi surface and of phonon spectra. - II. (II.)
240C. Condensed Matter Physics (3)
Lecture-3 hours. Prerequisite: course 240AB.
Review of second quantization. Interacting electron gas, electron-phonon interaction and effects, including instabilities of electronic systems. Topics in the theory of superconductivity and magnetism. - III (III.)
241. Advanced Topics in Magnetism (3) Lecture -3 hours. Prerequisite: courses 240A-240B and $240 \mathrm{C}-240 \mathrm{D}$, or consent of instructor. Topics chosen from areas of current research interest. Offered irregularly.
242. Advanced Topics in Superconductivity (3)

Lecture-3 hours. Prerequisite: courses 240A-240B and $240 \mathrm{C}-240 \mathrm{D}$, or consent of instructor. Topics chosen from areas of current research interest. Offered irregularly.

## 243A-243B-243C. Surface Physics of

 Materials (3-3-3)Lecture-3 hours. Prerequisite: courses 140A-140B, 115A-115B or the equivalents; courses 215A, 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Offered in alternate years-I, II, III.

## 245A. High-Energy Physics (3)

Lecture -3 hours. Prerequisite: course 230A. Phenomenology and systematics of strong, electromagnetic, and weak interactions of hadrons and leptons; determination of quantum numbers; quarks and quarkonia; deep inelastic scattering; the quark parton model; experiments at hadron colliders and elec-tron-positron colliders.-l. (I.)
245B. High-Energy Physics (3)
Lecture-3 hours. Prerequisite: course 245A. Electroweak interactions; phenomenology of the Standard Model of $\mathrm{SU}(2)_{\mathrm{L}} \times \mathrm{U}(1)$; weak interaction experiments; properties of and experiments with $W$ and $Z$ vector bosons; Glashow-Weinberg-Salam model and the Higgs boson; introduction to supersymmetry and other speculations.-II. (II.)

## 245C. Collider Physics (3)

Lecture-3 hours. Prerequisite: course 245A; course 252B taken previously or concurrently; or consent of instructor. Collider physics. Topics include quark and gluon distribution functions and the computation of cross sections; Large Hadron Collider and International Linear Collider phenomenology; collider and detector characteristics; extracting models from data; software tools for analyzing experimental data. May be repeated for credit with consent of instructor. - III. (III.)
246A. Supersymmetry: Theory and Phenomenology (3)
Lecture -3 hours. Prerequisite: courses 230A-230B, 245A-245B recommended, or consent of instructor. Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergravity. Collider phenomenology of supersymmetry. Dark matter phenomenology. Offered irregularly. - III. (III.)
246B. Advanced Supersymmetry (3)
Lecture-3 hours. Prerequisite: course 246A.
Advanced topics in supersymmetry. Topics include holomorphy, the Affleck-Dine-Seiberg superpotential, Seiberg duality for SUSY QCD, dynamical SUSY breaking, Seiberg-Witten theory, superconformal field theories, supergravity, anomaly and gaugino mediation, and the AdS/CFT correspondence. Not offered every year-l. (I.)
250. Special Topics in Physics (3)

Lecture-3 hours. Prerequisite: consent of instructor. Topic varies. May be repeated for credit. Not offered every quarter. - I, II, III. (I, II, III.)

## 252A. Techniques of Experimental Physics

 (3)Lecture-3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from condensed matter research will be utilized. Offered irregularly.

## 252B. Techniques of Experimental Physics

 (3)Lecture-3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from nuclear and particle research will be utilized. - I. (I.)
252C. Statistics and Data Analysis for

## Particle Physics (3)

Lecture - 3 hours. Introduction to statistical data analysis methods in particle physics. Theoretical lectures combined with practical computer laboratory work.-II. (II.)
253. Signals and Noise in Physics (3)

Lecture -3 hours. Techniques for extracting signals from noise, systematic error. Offered irregularly. - II. (II.)
256. Natural Computation and SelfOrganization: The Physics of Information Processing in Complex Systems (3)
Lecture-3 hours. Prerequisite: course 200A or Mathematics 119A/B or Mathematics 219; course 204A or Mathematics 119A/B or Mathematics 219; course 219A or Mathematics 135A/B or Mathematics 235A. Explores intrinsic unpredictability (deterministic chaos) and the emergence of structure in natural complex systems. Using statistical mechanics, information theory, and computation theory, the course develops a systematic framework for analyzing dynamical and stochastic processes in terms of their causal architecture.-II. (II.) Crutchfield
260. Introduction to General Relativity (3)

Lecture-3 hours. Prerequisite: courses 200A, 200B. An introduction to general relativity. Differential geometry and curved spacetime; the Einstein field equations; gravitational fields of stars and black holes; weak fields and gravitational radiation; experimental tests; Big Bang cosmology.-I. (I.)

## 262. Early Universe Cosmology (3)

Lecture-3 hours. Prerequisite: second year standing in Physics graduate program or consent of instructor. Introduction to early universe cosmology: the Big Bang, inflation, primordial nucleosynthesis, dark matter, dark energy, and other topics of current interest. Offered irregularly. - II. (II.)

## 263. Cosmic Structure Formation (3)

Lecture -3 hours. Prerequisite: course 260. Growth of structure from small density inhomogeneities in the early universe to the diverse structures observable today. Use of observable properties (cosmic microwave background, gravitational lensing, peculiar velocities, number density, etc.) to constrain models of structure formation and fundamental physics. Offered irregularly. - III. (III.)

## 265. High Energy Astrophysics and

## Radiative Processes (3)

Lecture-3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course covering galactic and extragalactic X-ray and gamma-ray astronomy, radiative processes, and techniques of high-energy astrophysics.-I.

## 266. Data Analysis for Astrophysics (3)

Lecture-3 hours. Prerequisite: graduate standing in physics or consent of instructor. Survey course covering measurement and signal analysis techniques for astrophysics and cosmology throughout the electromagnetic spectrum. Offered in alternate years. - II.

## 267. Observational Extragalactic <br> Astronomy \& Cosmology (3)

Lecture -3 hours. Prerequisite: graduate standing in physics or consent of the instructor. Survey course covering current areas of research on extragalactic objects, their physical properties, origin, evolution, and distribution in space. Offered in alternate years. - III.
270. Current Topics in Physics Research (3) Lecture/discussion-3 hours. Prerequisite: graduate standing in Physics or consent of instructor. Reading and discussion to help physics graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit. (S/U grading only.) -I, II, III. (II, II, III.)
280. Seminar in Ethics for Scientists (2)

Seminar-2 hours. Prerequisite: graduate standing in any department of Science or Engineering. Studies of topical and historical issues in the ethics of science, possibly including issues such as proper authorship, peer review, fraud, plagiarism, responsible collaboration, and conflict of interest. Limited enrollment. (Same course as Chemical Engineering and Materials Science 280 and Chemisitry 280.) (S/U grading only.) - III. (III.)
285. Careers in Physics (1)

Seminar- 1.5 hours. Prerequisite: graduate standing in Physics. Designed to give Physics graduate students an in-depth appreciation of career opportunities with a graduate degree in physics. Professional physicists, mainly from outside academia, will give seminars describing both research and career insights. May be repeated for credit. Offered irregularly. (S/U grading only.) -I. (I.)
290. Seminar in Physics (1)

Seminar-1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in physics. Topics will vary weekly and will cover a broad spectrum of the active fields of physics research at a level accessible to all physics graduate students.
May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)
291. Seminar in Nuclear Physics (1)

Seminar-1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in nuclear physics. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

## 292A. Seminar in Elementary Particle

 Physics (1)Seminar-1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in elementary particle physics. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
292B. High Energy Frontier Initiative And Cosmology Theory Seminar (1)
Seminar-1 hour. Prerequisite: Physics graduate students. May be repeated five times for credit. (S/U grading only.) -I, II, III. (I, II, III.)
293. Seminar in Condensed Matter Physics (1)

Seminar-1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in condensed matter physics. May be repeated for credit. (S/U grading only.) $-\mathrm{I}, \mathrm{II}$, III. (I, II, III.)
294. Seminar in Cosmology (1)

Seminar-1 hour. Prerequisite: graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in Cosmology. May be repeated for credit. (S/U grading only.)-I, II, III. (I, II, III.)

## 295. Introduction to Departmental <br> \section*{Research (1)}

Seminar-1 hour. Seminar to introduce first- and sec-ond-year physics graduate students to the fields of specialty and research of the Physics staff. (S/U grading only.) - II. (II.)

## 297. Research on the Teaching and

## Learning of Physics (3)

Seminar-3 hours. Prerequisite: graduate standing in Physics or consent of instructor. Discussion and analysis of recent research in how students construct understanding of physics and other science concepts and the implications of this research for instruction. - III. (III.) 7
298. Group Study (1-5)

Prerequisite: consent of instructor. (S/U grading only.)
299. Research (1-12)
(S/U grading only.)

## Professional <br> 371 . Teaching in an Active-Engagement Physics Discussion/Lab Setting (1)

Lecture/discussion - 1 hour. Prerequisite: course 9D or equivalent; consent of instructor; open to graduate students only. Analysis of recent research on science/physics teaching and learning and its implications for teaching labs, discussions, and discussion/labs with an emphasis on differences between conventional and active-engagement instructional settings. The appropriate role of the instructor in specific instructional settings. May be repeated two times for credit. I, II, III. (I, II, III.)
390. Methods of Teaching Physics (1) Lecture/discussion - 1 hour. Prerequisite: graduate standing in Physics; consent of instructor. Practical experience in methods and problems related to teaching physics laboratories at the university level, including discussion of teaching techniques, analysis of quizzes and laboratory reports and related topics. Required of all Physics Teaching Assistants. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)
396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing. May be repeated for credit. (S/U grading only.) -I, II, III. (I, II, III.)

## Physiology

See Anatomy, Physiology and Cell Biology (APC), on page 539; Human Physiology (HPH), on page 405; Molecular, Cellular, and Integrative Physiology (A Graduate Group), on page 433; and Neurobiology, Physiology, and Behavior, on page 443.

## Plant Biology

See Agricultural Management and Rangeland Resources, on page 143; Crop Science and Management, on page 218; Environmental Horticulture, on page 296; Plant Biology, on page 471; Plant Biology (A Graduate Group), on page 473; and Vegetable Crops, on page 539.

## Committee in Charge of the Major

Bo Liu, Ph.D
Anne Britt, Ph.D.
Steven Theg, Ph.D

## Faculty

Faculty includes members of the Departments of
Plant Biology, Molecular and Cellular Biology, and
Evolution and Ecology in the College of Biological Sciences.
Primary Department Members
Siobhan Brady, Assistant Professor
Anne Britt, Ph.D., Professor
Luca Comai, Ph.D., Professor
Katayoon Dehesh, Ph.D., Professor
S. P. Dinesh-Kumar, Professor

John J. Harada, Ph.D., Professor
Academic Senate Distinguished Teaching Award
Stacey Harmer, Ph.D., Professor
Bo Liu, Ph.D., Professor
William J. Lucas, Ph.D., Professor
Julin Maloof, Ph.D., Professor
Sharman O'Neill, Ph.D., Professor
Neelima Sinha, Ph.D., Professor
Venkatesan Sundaresan, Ph.D., Professor
Steven M. Theg, Ph.D., Professor

## Secondary Department Members

Judy Callis, Ph.D., Professor
Academic Senate Distinguished Teaching Award James A. Doyle, Ph.D., Professor
Marilynn E. Etzler, Ph.D., Professor
Charles S. Gasser, Ph.D., Professor
J. Clark Lagarias, Ph.D., Professor

Marcel Rejmanek, Ph.D., Professor
Raymond L. Rodriguez, Ph.D., Professor

## Emeriti Faculty

David E. Bayer, Ph.D., Professor Emeritus
Bruce A. Bonner, Ph.D., Professor Emeritus
Deborah Canington, Ph.D., Lecturer
Academic Federation Excellence in Teaching Award
Paul A. Castelfranco, Ph.D., Professor Emeritus
Deborah P. Delmer, Ph.D., Professor Emerita
Emanuel Epstein, Ph.D., Professor Emeritus
Richard H. Falk, Ph.D., Professor Emeritus
Donald W. Kyhos, Ph.D., Professor Emeritus
Norma J. Lang, Ph.D., Professor Emerita
Terence M. Murphy, Ph.D., Professor Emeritus
Thomas L. Rost, Ph.D., Professor Emeritus
Academic Senate Distinguished Teaching Award Alan J. Stemler, Ph.D., Professor Emeritus Larry N. Vanderhoef,' Ph.D., Professor Emeritus Kenneth Wells, Ph.D., Professor Emeritus

## Affiliated Faculty

John L. Bowman, Ph.D., Professor
Andrew Groover, Ph.D., Adjunct Associate Professor Joel Ledford, Ph.D., Academic Coordinator

## The Major Program

As organisms that sequester carbon and convert solar energy to usable forms, plants are the primary source of food on the planet as well as important buffers against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms and interact with their environment. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell and molecular biology, development, genetics and genomics.
The Program. The plant biology major consists of a Biosciences core covering the general principles of biology plus four plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Two required electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and majors in Plant Biology are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology makes an excellent minor or second major for student in these fields.
Career Alternatives. A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research and
teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

## A.B. Major Requirements:

## UNITS

Preparatory Subject Matter ................... 34
Biological Sciences 2A-2B-2C.. 14
Chemistry 2A-2B, 8A-8B ............................ 16
Statistics 13 or 100 or 102 (or Plant
Sciences 120).
$\ldots . .4$
Depth Subject Matter ........................ 41-42
Biological Sciences 101 .......................... 4
Plant Biology 102 or 108......................... 5
Evolution and Ecology 140 or Plant
Biology 116 4-5
Plant Biology $105,111,112,117 \ldots \ldots . .15$
Additional upper division units in Plant
Biology or related natural science
courses.
13
Total Units for the Major 75-76

## Recommended

Chemistry 2C, Evolution and Ecology 100, and Plant Biology 148.
For students with interests in specialized areas of plant biology (e.g. agricultural botany, ecology, systematics and evolution, morphology, plant physiology, etc.), certain substitutions, including courses in other departments, may be allowed upon prior consultation with a Plant Biology major adviser.

## B.S. Major Requirements:

|  | UNITS |
| :---: | :---: |
| Preparatory Subject Matter ............. 55-65 |  |
| Biological Sciences 2A-2B-2C | 14 |
| Chemistry 2A-2B-2C | 15 |
| Chemistry 8A-8B or 118A-118B |  |
| 118C | 6-12 |
| Mathematics 17A-17B-17C or |  |
| $21 \mathrm{~A}-21 \mathrm{~B}$ (21C recommended) .. | 8-12 |
| Physics 7A-7B-7C |  |
| Recommended |  |
| Biological Sciences 20Q |  |
| Depth Subject Matter. | .. 43-46 |

Biological Sciences 101, 105
(or 102+103), 104 or equivalent...... 10-13
Statistics 100 or 102
Plant Biology 105, 111,112 .
.. 11
Research internship: Plant Biology 92,
99, 189, 192, 199 or equivalent..
Restricted electives.................................. 15
Upper division courses in plant biology or other fields relevant to the student's interest chosen from the lists below. The student's academic advisor may approve additional courses as "restricted electives" at their discretion.

## Total Units for the Major. <br> $\qquad$ 98-111

## Course Lists

## Ecology

Environmental Science and Policy 121, 123, 124, 150C, 151, 151L, 155, 155L; Evolution and Ecology 101, 131, 138; Hydrologic Science 124; Plant Biology 117, 119; Plant Pathology 150; Plant Sciences 112, 130, 131, 134, 135, 142, 144.

## Evolution and Diversity

Evolution and Ecology 100, 102, 108, 140, 149; Plant Biology 102, 108, 116, 143, 148.

## Plant Genetics

Evolution and Ecology 100, 102; Molecular and Cellular Biology 161, 164; Plant Biology 113; Plant Pathology 123; Plant Sciences 152.

## Plant Physiology, Development, and Molec-

 ular BiologyBiotechnology 160, 161A, 161B; Molecular and Cellular Biology 126; Plant Biology 113, 126; Plant Pathology 123, 130; Plant Sciences 153, 157, 158.

Master Adviser. Steve Theg, Plant Biology Depart ment office in 2165 Life Sciences

## Minor Program Requirements:

$\qquad$
Minor Requirements 18
Upper division units, including at least one course from each of the following four groups 18
(a) Anatomy and Morphology:

Evolution and Ecology 140; Plant Biology
105, 116
(b) Physiology and Development:

Plant Biology 111, 112, 123; Plant
Pathology 130
(c) Evolution and Ecology:

Evolution and Ecology 100; Plant Biology
102, 108, 117, 143
(d) Biochemistry and Molecular Genetics:

Biotechnology 160; Plant Biology 113,
126; Plant Sciences 152, 154, 171, 172
Minor Adviser. Same as for major above.
Honors and Honors Programs. Students on the honors list may elect to include a maximum of 5 units of 194 H in their major programs. Refer to the Academic Information chapter and the appropriate College section for Dean's Honors List information.
Graduate Study. Consult the Plant Biology Graduate Group listing.

## Courses in Plant Biology (PLB) <br> Lower Division <br> 90X. Plant Science Seminar (1-4)

Prerequisite: consent of instructor. Examination of a special topic in a small group setting. Not open for credit to students who have completed course Plant Sciences 90X. (Former course Plant Sciences 90X.)

## 92. Internship (1-12)

Internship-3-36 hours. Prerequisite: consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology faculty. (P/NP grading only.)
98. Directed Group Study (1-5)

Prerequisite: consent of instructor. Primarily for lower division students. (P/NP grading only.)
99. Special Study for Undergraduates (1-5) Prerequisite: consent of instructor. (P/NP grading only.)

## Upper Division

For questions about courses numbered 102 through 126, see the Plant Biology Department office in 1002 Life Sciences. For questions concerning courses numbered 1, 12, 140 through 188 and 196, see the Plant Science Advising Center in 1220 Plant and Environmental Sciences.

## 102. California Floristics (5)

Lecture-3 hours; laboratory-8 hours. Prerequisite: Plant Sciences 2, Biological Sciences 1C, 2C, or equivalent course in Plant Sciences. Survey of the flora of California, emphasizing recognition of important vascular plant families and genera and use of taxonomic keys for species identification. Current understanding of relationships among families. Principles of plant taxonomy and phylogenetic systematics. One Saturday field trip. (Same course as Plant Sciences 102.) GE credit: SciEng | SE, VL.III. (III.) Potter

## 105. Developmental Plant Anatomy (5)

Lecture-3 hours; laboratory-6 hours. Prerequisite: Biological Sciences 2C or other similar preparation in plant biology. Restricted to 50 students; split equally into two lab groups. Structural anatomy of
vascular plants. Training in basic tissue sectioning, staining, and use of the compound microscope. GE credit: SciEng |SE.-I. (I.) O'Neill

## 108. Systematics and Evolution of Angiosperms (5)

Lecture-3 hours; laboratory-6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C.
Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as Evolution and Ecology 108.) GE credit: SciEng. III. (III.) Doyle
111. Plant Physiology (3)

Lecture-3 hours. Prerequisite: Biological Sciences 1 C , or $2 \mathrm{~A}, 2 \mathrm{~B}$, and 2 C ; Chemistry 8 B and Physics 7C (either may be taken concurrently); Plant Biology 105 recommended. The plant cell as a functional unit. The processes of absorption, movement, and utilization of water and minerals. Water loss, translocation, photosynthesis, respiration.-l. (I.) Dehesh, Lucas

## 111 D. Problems in Plant Physiology (1)

Discussion-1 hour. Prerequisite: course 111 concurrently. Discussion of problems and applications relating to principles presented in course 111. Students will be assigned problems each week showing novel applications of principles described in course 111 and will prepare answers to be delivered orally during the class period. (P/NP grading only.) -l. (I.) Lucas, Dehesh
112. Plant Growth and Development (3) Lecture-3 hours. Prerequisite: Biological Sciences 1 C , or $2 \mathrm{~A}, 2 \mathrm{~B}$ and 2 C ; Chemistry 8 B . Introduction to the mechanisms and control systems that govern plant growth and development and the responses of plants to the environment. Strong emphasis on vegetative development of flowering plants. GE credit:
SciEng | QL, SE, SL. - II. (II.) Harada, Sundaresan
112 D . Problems in Plant Growth and Development (1)
Discussion-1 hour. Prerequisite: course 112 concurrently. Discussion of problems and applications relating to principles presented in course 112. Students will be assigned problems each week showing novel applications of the principles described in course
112 and will prepare answers to be delivered orally during class period. (P/NP grading only.) - II. (II.) Harada, Sundaresan

## 113. Molecular and Cellular Biology of

 Plants (3)Lecture-3 hours. Prerequisite: Biological Sciences 1 A and 1 C , or $2 \mathrm{~A}, 2 \mathrm{~B}, 2 \mathrm{C}$; 101; Biological Sciences 102 or 105 recommended. Molecular and cellular aspects of the growth and development of plants and their response to biological and environmental stresses. Primary focus on processes unique to plants. Experimental approaches will be emphasized. GE credit: QL, SL, VL. - III. (III.) Harada

## 113D. Problems in Molecular and Cellular

 Biology of Plants (1)Discussion-1 hour. Prerequisite: course 113 concurrently. Discussion of topics and applications related to principles presented in course 113. Assigned topics each week show novel applications of the principles described in course 113; discussion of topics during class period. (P/NP grading only.) - III. (III.) Harada
116. Plant Morphology and Evolution (5)

Lecture-3 hours; laboratory-6 hours. Prerequisite: introductory plant biology (e.g., Biological Sciences 1 C , or $2 \mathrm{~A}, 2 \mathrm{~B}$, and 2 C ); plant anatomy recommended (e.g., Plant Biology 105). Introduction to the form, development and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. GE credit: SciEng.-II. (II.) Jernstedt

## 117. Plant Ecology (4)

Lecture-3 hours; fieldwork-3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; Plant Biology 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as Evolution and Ecology 117.)-I. (I.)
119. Population Biology of Invasive Plants and Weeds (3)
Lecture-2 hours; laboratory-3 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C; introductory statistics recommended. Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. (Same course as Evolution and Ecology 119.) GE credit: SciEng | SE.-III. (III.) Rejmanek
123. Plant-Virus-Vector Interaction (3) Lecture-3 hours. Prerequisite: Biological Sciences 2A, Biological Sciences 101; course 105, Plant Pathology 120, and Entomology 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as Entomology 123 and Plant Pathology 123.) Offered in alternate years. GE credit: SE, SL, WE. - (I.) Lucas, Gilbertson, Ullman

## 126. Plant Biochemistry (3)

Lecture-3 hours. Prerequisite: Biological Sciences 103 or 105. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as Molecular and Cellular Biology 126.) GE credit:
SciEng | SE, SL. - II. (II.) Callis, Tian
143. Evolution of Crop Plants (4)

Lecture-3 hours; discussion - 1 hour. Prerequisite: Plant Sciences 2 or Biological Sciences 1C or 2C. Origins of crops and agriculture, including main methodological approaches, centers of crop biodiversity, dispersal of crops, genetic and physiological differences between crops and their wild progenitors, agriculture practiced by other organisms, and role and ownership of crop biodiversity. GE credit: SciEng or SocSci, Div, Wrt \| SE or SS, SL, WE. - III. (III.) Gepts

## 148. Introductory Mycology (4)

Lecture-2 hours; laboratory-6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as Plant Pathology
148.) GE credit: SE.-I. MacDonald, Rizzo
189. Experiments in Plant Biology: Design and Execution (3)
Laboratory/discussion-6 hours. Prerequisite: Biological Sciences 1A, 1B, 1C, or 2A, 2B, 2C, or the equivalent courses in Plant Sciences, and consent of the instructor. Provides an opportunity for undergraduate students to formulate experimental approaches to current questions in plant biology and to carry out their proposed experiments. May be repeated for credit for a total of 12 units. (P/NP grading only.) I, II, III. (I, II, III.)

## 190C. Research Conference in Plant Biology

 (1)Discussion-1 hour. Prerequisite: upper division standing in Plant Biology or related discipline; consent of instructor. Introduction to research methods in plant biology. Design of field or laboratory research projects, survey of appropriate literature, and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) - I, II, III. (I, II, III.)

## 192. Internship (1-12)

Internship-3-36 hours. Prerequisite: completion of 84 units and consent of instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology Department faculty. May be repeated for credit. (P/NP grading only.) - I, II, III, IV. (I, II, III, IV.)
194H. Special Study for Honors Students (1-5)
Prerequisite: open only to majors of senior standing on honors list. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.)

## 197T. Tutoring in Plant Biology (1-5)

Discussion -2-6 hours. Prerequisite: upper division standing and consent of instructor. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit (P/NP grading only.) - I, II, III. (I, II, III.)

## 198. Directed Group Study (1-5)

Prerequisite: consent of instructor. (P/NP grading only.)
199. Special Study for Advanced Undergraduates (1-5)
Prerequisite: consent of instructor. (P/NP grading only.)

## Professional

396. Teaching Assistant Training Practicum (1-4)
Prerequisite: graduate standing; consent of instructor. Practical experience in acting as teaching assistant in Plant Biology courses. Learning activity: hands on experience in preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. May be repeated for credit. ( $\mathrm{S} / \mathrm{U}$ grading only.) - I, II, III, IV. (I, II, III, IV.)

Diane Beckles, Ph.D., Associate Professor (Plant Sciences)
Alan Bennett, Ph.D., Professor (Plant Sciences)
Alison Berry, Ph.D., Professor (Plant Sciences)
Arnold Bloom, Ph.D., Professor (Plant Sciences)
Eduardo Blumwald, Ph.D., Professor (Plant Sciences) Richard Bostock, Ph.D., Professor (Plant Pathology)
Kent Bradford, Ph.D., Professor (Plant Sciences)
Siobhan Brady, Ph.D., Assistant Professor
(Plant Biology)
Anne Britt, Ph.D., Professor (Plant Biology)
Patrick Brown, Ph.D., Professor (Plant Sciences)
Judy Callis, Ph.D., Professor/Vice Chair
(Molecular and Cellular Biology) Academic
Senate Distinguished Teaching Award
Gitta Coaker, Ph.D., Associate Professor
(Plant Pathology)
Luca Comai, Ph.D., Professor (Plant Biology)
Douglas Cook, Ph.D., Professor (Plant Pathology)
Carlos Crisosto, Ph.D., Professor (Plant Sciences) Abhaya Dandekar, Ph.D., Professor (Plant Sciences) Katayoon Dehesh, Ph.D., Professor (Plant Biology)
Theodore Dejong, Ph.D., Professor (Plant Sciences)
Savithramma Dinesh-Kumar, Ph.D., Professor (Plant Biology)
Georgia Drakakaki, Ph.D. Assistant Professor (Plant Sciences)
Jorge Dubcovsky, Ph.D., Professor (Plant Sciences)
Albert Fischer, Ph.D., Professor
(Plant Sciences)

Charles Gasser, Ph.D., Professor (Molecular and Cellular Biology)
Paul Gepts, Ph.D., Professor (Plant Sciences)
Edmund Gilbert, Ph.D., Assistant Professor (Plant Sciences)
David Gilchrist, Ph.D., Professor (Plant Pathology)
Sham Goyal, Ph.D., Agronomy Specialist (Plant Sciences)
Thomas Gradziel, Ph.D., Professor (Plant Sciences)
Andrew Groover, Ph.D., Assistant Professor (Plant Biology)
John Harada, Ph.D., Professor (Plant Biology) Academic Senate Distinguished Teaching Award
Stacey Harmer, Ph.D., Professor (Plant Biology)
Kentaro Inoue, Ph.D., Professor (Plant Sciences)
Marie Jasienuik, Ph.D., Associate Professor (Plant Sciences)
Judy Jernstedt, Ph.D., Professor (Plant Sciences)
Daniel Klienbenstein, Ph.D. Professor (Plant Sciences)
John Labavitch, Ph.D., Professor (Plant Sciences)
Clark Lagarias, Ph.D., Professor (Molecular and Cellular Biology)
J. Heiner Lieth, Ph.D., Professor (Plant Sciences)

Bo Liu, Ph.D., Professor (Plant Biology)
William Lucas, Ph.D., Professor/Chair (Plant Biology)
Julin Maloof, Ph.D., Professor (Plant Biology)
Mark Matthews, Ph.D., Professor (Viticulture and Enology)
Karen McDonald, Ph.D., Professor and Associate Dean (Chemical Engineering and Materials Science)
Richard Michelmore, Ph.D., Professor (Plant Sciences)
Terence Murphy, Ph.D., Professor (Plant Biology)
David Neale, Ph.D., Professor (Plant Sciences)
Sharman O'Neill, Ph.D., Professor (Plant Biology)
Kyaw Tha Paw, Ph.D., Professor
(Land, Air and Water Resources)
Anne Powell, Ph.D., Associate Researcher (Plant Sciences)
Carlos Quiros, Ph.D., Professor (Plant Sciences)
Marcel Rejmanek, Ph.D., Professor (Evolution and Ecology)
Eliska Rejmankova, Ph.D., Professor (Environmental Science and Policy)
Pamela Ronald, Ph.D., Professor (Plant Pathology)
Alan Rose, Ph.D., Project Scientist
(Molecular and Cellular Biology)
Jeffery Ross-lbarra, Ph.D., Assistant Professor (Plant Sciences)
Ken Shackel, Ph.D., Professor (Plant Sciences)
Neelima Sinha, Ph.D., Professor (Plant Biology)
Dina St. Clair, Ph.D. Professor (Plant Sciences)
Venkatesan Sundaresan, Ph.D., Professor (Plant Biology)
Thomas Tai, Ph.D., Associate in the Agricultural Experiment Station (Plant Scientist)
Steve Theg, Ph.D., Professor (Plant Biology)
Li Tian, Ph.D., Assistant Professor (Plant Sciences)
Allen Van Deynze, Ph.D., Professional Researcher (Plant Sciences)
M. Andrew Walker, Ph.D., Professor (Viticulture and Enology)
John Yoder, Ph.D., Professor (Plant Sciences)
Florence Zakharov, Ph.D., Assistant Professor (Plant Sciences)

## Emeriti Faculty

Don Durzan, Ph.D., Professor (Plant Sciences)
David Gilchrist, Ph.D., Professor Emeritus (Plant Pathology)
Donald J. Nevins, Ph.D., Professor (Plant Sciences)
Donald Phillips, Ph.D., Professor (Plant Sciences)
Carlos Quiros, Ph.D., Professor (Plant Sciences)
Michael Reid, Ph.D., Professor (Plant Sciences)
M W Silk, Ph.D., Professor Emeritus (Land, Air and Water Resources)
T Hsiao, Ph.D., Professor Emeritus (Land Air Water Resources)

## Affiliated Faculty

John Bowman, Ph.D., Professor (Plant Biology)

Carlos Crisosto, Ph.D., Pomologist and Specialist (Plant Sciences)
Matthew Fidelibus, Ph.D., Associate Cooperative Extension Viticulture Specialist (Viticulture \& Enology)
Sham Goyal, Ph.D., Agronomy Specialist (Plant Sciences)
Andrew Groover, Ph.D., Associate Adjunct Professor (Plant Biology)
Cai-Zhong Jiang, Research Plant Physiologist (Crops Path \& Genetic Research)
Takao Kasuga, Ph.D., Molecular Geneticist (Plant Pathology)
Elizabeth Mitcham, Ph.D., Cooperative Extension and Pomologist Specialist (Plant Sciences)
Ann Powell, Ph.D., Professional Research Biochemist (Plant Sciences)
Alan Rose, Ph.D., Associate Project Scientist (Molecular \& Cellular Biology)
