AMS 197T—Tutoring in American Studies (1-5)

Tutorial—1-5 hour(s). Prerequisite(s): Consent of Chairperson of American Studies Program. Tutoring in lower division American Studies courses, usually in small discussion groups. Periodic meetings with the instructor in charge; reports and readings. May be repeated for credit when the tutoring is for a different course. (P/NP grading only.) Effective: 1997 Winter Quarter.

AMS 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AMS 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of instructor and chairperson of American Studies Program. (P/NP grading only.) Effective: 1997 Winter Quarter.

AMS 220—American Folklore & Folklife (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Theory and methods for the study of the folklore and the folk customary behavior of Americans; contributions of folklore studies to scholarship in humanities and social science disciplines. Effective: 1997 Spring Quarter.

AMS 250—Cultural Study of Masculinities (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structure. (Same course as WMS 250.) Effective: 1997 Winter Quarter.

AMS 255—Food in American Culture (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Graduate standing or advanced undergraduate with consent of instructor. Interdisciplinary theories and methods for the study of food in American culture; food studies in relation to issues of identity (age, gender, ethnicity, religion, region, etc.), social relations, systems of production, and cultures of consumption. Effective: 2007 Fall Quarter.

AMS 298—Group Study (1-5)

Variable—1-5 hour(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

AMS 299—Individual Study (1-12)

Variable—1-12 hour(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

AMS 396—Teaching Assistant Training Practicum (1-4)

Variable—1-4 hour(s). Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANB—Animal Behavior

Courses in ANB:

ANB 201—Scientific Approaches to Animal Behavior Research (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Philosophical issues, goals, strategies and tools in field and laboratory research. May be repeated for credit. Effective: 1997 Winter Quarter.

ANB 210—History of Animal Behavior (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Classic, seminal papers in animal behavior. Discussion of readings and broader historical context in which papers were written. (S/U grading only.) Effective: 2002 Fall Quarter.

ANB 218A—Fundamentals of Animal Behavior (5)

Lecture/Discussion—4 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Upper division undergraduate introduction to the biology of behavior, such as PSC 101, PSC 122, PSC 123, NPB 102, NPB 150, NPB 152, WFC 141, ENT 104, or ANS 105. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as PSC 218A.) Effective: 2007 Fall Quarter.

ANB 218B—Fundamentals of Animal Behavior (5)

Lecture/Discussion—4 hour(s); Discussion—1 hour(s). Prerequisite(s): ANB 218A or PSC 218A; or ECL 218A; consent of instructor. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as PSC 218B.) Effective: 2007 Fall Quarter.

ANB 221—Animal Behavior, Ecology & Evolution (3)

Lecture—3 hour(s). Prerequisite(s): NPB 102; EVE 100; EVE 101; and Consent of Instructor. Or the equivalent, graduate standing. Interface between animal behavior, ecology and evolution. New developments in behavioral ecology development and testing of hypotheses in this discipline. (Same course as PBG 221.) Effective: 2002 Winter Quarter.

ANB 230A—Interdisciplinary Approaches to Animal Behavior (3)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Analysis of literature in behavior and an allied discipline or disciplines that offer the potential, in combination, to advance the understanding of a topic in animal behavior conceptually and empirically. Topics vary from year to year. Effective: 1997 Winter Quarter.

ANB 230B—Interdisciplinary Approaches to Animal Behavior (5)

Workshop—4 hour(s); Discussion—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): ANB 230A; Taken the previous quarter. Development of an empirical or theoretical interdisciplinary approach to research on a current topic in animal behavior. Effective: 1997 Winter Quarter.

ANB 270—Research Conference in Behavioral Ecology (1)

Conference—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Limited enrollment. Critical presentation and evaluation of current literature and ongoing research in behavioral ecology. May be repeated for credit. (S/U grading only.) Effective: 1997 Fall Quarter.

ANB 287—Advanced Animal Behavior (2)

Seminar—2 hour(s). Prerequisite(s): NPB 102; (EVE 100 or EVE 101); and Consent of Instructor. Or the equivalent; graduate standing. Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. May be repeated up to 2 time(s). (Same course as PBG 287.) Effective: 2002 Spring Quarter.

ANB 290—Seminar in Animal Behavior (1-3)

Seminar—1-3 hour(s). Prerequisite(s): Consent of Instructor. Selected topics in animal behavior. (S/U grading only.) Effective: 1997 Winter Quarter.

ANB 294—Seminar in Behavioral Ecology of Predators & Prey (3)

Seminar—2 hour(s). Prerequisite(s): Graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator-prey interactions. May be repeated up to 2 time(s). (Same course as WFC 294.) Effective: 2003 Winter Quarter.

ANB 298—Group Study (1-5)

Discussion—1-5 hour(s); Laboratory—5-15 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Lectures and/or discussion of current issues, problems, or techniques in animal behavior. Effective: 1997 Winter Quarter.

ANB 299—Research (1-12)

Laboratory—3-36 hour(s). Advanced research in one of the specialty areas in animal behavior (S/U grading only.) Effective: 1997 Winter Quarter.

ANB 396—Teaching Assistant Training Practicum (1-4)

Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANE—Anesthesiology

Courses in ANE:

ANE 192—Internship in Anesthesiology (1-6)

Internship—3-18 hour(s); Project (Term Project). Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in anesthesia and related fields. (P/F grading only.) Effective: 1997 Winter Quarter.

ANE 199—Special Study for Advanced Undergraduates (1-5)

Variable—3-15 hour(s). May be repeated for credit. (P/NP grading only.) Effective: 2007 Fall Quarter.

ANE 430—Intro to Anesthesiology & Perioperative Medicine (3-6)

Clinical Activity—40 hour(s). Prerequisite(s): Consent of Instructor. Introduction to anesthesiology during the MS3 year, with emphasis on introduction to the field of anesthesiology and the day-to-day practice of an anesthesiologist in the perioperative setting. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Fall Quarter.

ANE 435—Primary Care Multidisciplinary Pain Management (3)

Clinical Activity. Rotation will give 3rd year primary-care bound students an overview of the scope of Pain Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Fall Quarter.

ANE 455—Externship in Anesthesiology (3-6)

Clinical Activity. Prerequisite(s): Consent of Instructor. Away clinical rotation in Anesthesiology or Pain Medicine. (H/P/F grading only.) Effective: 2017 Summer Quarter.

ANE 460—Anesthesiology Clinical Clerkship (3-18)

Variable—30 hour(s); Practice—10 hour(s); Discussion—2 hour(s). Prerequisite(s): Consent of Instructor. Medical student. In-depth exposure to anesthesia through informal lectures and mentoring by anesthesiologists. Emphasis on understanding and applying anesthetic principles in managing administration of general, regional, and specialized areas. (H/P/F grading only.) Effective: 1997 Spring Quarter.

ANE 461—Perioperative Medicine (3-12)

Clinical Activity—30 hour(s). Prerequisite(s): Successful completion of third-year clerkships; consent of IOR. Two week rotation provides a broad exposure to various patient care services within the Department of Anesthesiology and Pain Medicine to apply medical knowledge to safely care for patients. (H/P/F grading only.) Effective: 2011 Spring Quarter.

ANE 462—Perioperative Management of the Obstetric Patient (3-6)

Variable—2 hour(s). Prerequisite(s): Consent of Instructor. Perioperative Management of Obstetric Patient advanced clinical clerkship will offer the medical student the chance to understand and be able to apply the principles of basic science into major improvements in obstetric anesthesia patient care. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

ANE 463—Multidisciplinary Pain Management (3-6)

Clinical Activity—30 hour(s); Lecture/Discussion—10 hour(s). Prerequisite(s): Senior medical student in good standing. Senior clerkship to expose students to all facets of treating pain in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures. (H/P/F grading only.) Effective: 2020 Spring Quarter.

ANE 464—Multidisciplinary Approach to the Neurosurgical Patient (3-9)

Clinical Activity—40 hour(s). Prerequisite(s): Consent of Instructor. Participate in the perioperative care of patients undergoing neurosurgical procedures while under the supervision of anesthesia, neurology and neurosurgical ICU residents and attending physicians. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Winter Quarter.

ANE 465—Away Acting Internship in Anesthesiology (3-18)

Clinical Activity—40 hour(s); Variable—3-18 hour(s). Prerequisite(s): Consent of Instructor. Satisfactory completion of Anesthesiology Clerkship. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Summer Quarter.

ANE 480—Brief Introduction to Clinical Anesthesiology & Chronic Pain Management (3)

Clinical Activity—30 hour(s). Prerequisite(s): Second-year medical student. Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthesia care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interaction with faculty anesthesiologists. (H/P/F grading only.) Effective: 1997 Spring Quarter.

ANE 493A—Applied Physiology & Pharmacology (6)

Lecture—5 hour(s); Lecture/Lab—10 hour(s); Laboratory—16 hour(s); Clinical Activity—4 hour(s). Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Review and demonstrate the application of basic physiology and pharmacology to patient care. There will be an in-depth analysis of the physiology and pharmacology of the cardiovascular, pulmonary, nervous, renal and endocrine systems. (H/P/F grading only.) Effective: 2007 Winter Quarter.

ANE 493B—Interdisciplinary Medicine in Pain Care (6)

Lecture—5 hour(s); Lecture/Lab—10 hour(s); Laboratory—16 hour(s); Clinical Activity—4 hour(s). Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Integrate applied and practical neuroanatomy, physiology, pharmacology, psychology/psychiatry and social medicine in the care of patients who are receiving care for pain caused by acute or chronic medical disease or trauma. (H/P/F grading only.) Effective: 2007 Spring Quarter.

ANE 498—Individual or Group Study (1-5)

Discussion—1-5 hour(s); Laboratory—2-10 hour(s). Prerequisite(s): Interns and residents with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

ANE 499—Anesthesiology Research (1-18)

Laboratory—12-54 hour(s). Prerequisite(s): Third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor. Problems in clinical and/or laboratory research. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

ANG—Animal Genetics

Courses in ANG:

Questions pertaining to the following courses should be directed to the instructor or to the Animal Science Advising Center in 1202 Meyer Hall; 530-754-7915.

ANG 101—Animal Cytogenetics (3)

Discussion/Laboratory—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): BIS 101; BIS 102; Or equivalent of BIS 102. Principles and techniques of cytogenetics applied to animal systems; chromosome harvest techniques, analysis of mitosis and meiosis, karyotyping, chromosome banding, cytogenetic mapping, chromosome structure and function, comparative cytogenetics. GE credit: SE. Effective: 2003 Spring Quarter.

ANG 105—Horse Genetics (3)

Lecture—3 hour(s). Prerequisite(s): BIS 101; ANS 015 recommended. Coat color, parentage testing, medical genetics, pedigrees, breeds, the gene map and genus Equus. Emphasis on understanding horse genetics based on the unity of mammalian genetics and making breeding decisions based on fundamental genetic concepts. GE credit: SE, SL. Effective: 2020 Spring Quarter.

ANG 107—Genetics & Animal Breeding (5)

Lecture—4 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIS 101. Pass One restricted to Animal Science or Animal Science & Management majors in senior standing. Principles of quantitative genetics applied to improvement of livestock and poultry. Effects of mating systems and selection methods are emphasized with illustration from current breeding practices. GE credit: SE. Effective: 2020 Winter Quarter.

ANG 111—Molecular Biology Laboratory Techniques (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): BIS 002C; BIS 101; (BIS 102 or ABI 102); (BIS 103 or ABI 103). Pass One restricted to Animal Science majors in Senior standing. Introduction to the concepts and techniques used in molecular biology; the role of this technology in both basic and applied animal research, and participation in laboratories using some of the most common techniques in molecular biology. GE credit: SE, SL, VL, WE. Effective: 2020 Winter Quarter.

ANG 185—Science of Captive Breeding & Reintroduction (1)

Lecture—1 hour(s). Prerequisite(s): BIS 002A; BIS 002B; BIS 002C. Explore peer-reviewed literature surrounding the latest advances in captive breeding and reintroduction biology. Effective: 2019 Fall Quarter.

ANG 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Selected topics relating to animal genetics. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANG 199—Special Study for Advanced Undergraduates (1-5)

Independent Study. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANG 204—Theory of Quantitative Genetics (3)

Lecture—3 hour(s). Prerequisite(s): ANG 107; Or the equivalent. Theoretical basis of quantitative genetics and the consequences of Mendelian inheritance. Concepts used to estimate quantitative genetic differences and basis for partitioning the phenotypic variance. Effective: 1997 Winter Quarter.

ANG 206—Advanced Domestic Animal Breeding (3)

Lecture—3 hour(s). Prerequisite(s): ANG 107; ANS 205; ANG 204 recommended. Procedures for the genetic evaluation of individuals to include selection indices and mixed model evaluation for single and multiple traits. Methods of estimating genetic trends. Effective: 1997 Winter Quarter.

ANG 208—Estimation of Genetic Parameters (3)

Lecture—3 hour(s). Prerequisite(s): ANG 107; ANS 205; ANG 204 and ANG 108 recommended. General methods for the estimation of components of variance and covariance and their application to the estimation of heritability, repeatability and genetic correlations are considered. Specific emphasis is given to procedures applicable to livestock populations under selection. Effective: 1997 Winter Quarter.

ANG 211—Genetic Engineering of Animals (2)

Lecture—1 hour(s); Lecture/Discussion—1 hour(s). Review of techniques for the genetic engineering of animals and their limitations and applications. Student-led discussions of recent papers in the field and possible future applications of genetically engineered animals in basic research and applied agricultural and medical research. (S/U grading only.) Effective: 1997 Winter Quarter.

ANG 212—Sequence Analysis in Molecular Genetics (2)

Lecture/Lab—2 hour(s). Prerequisite(s): BIS 101; Or the equivalent; graduate standing or consent of instructor. Use of computer algorithms and on-line databases to analyze nucleic acid and protein sequences in molecular genetics research. Effective: 2005 Winter Quarter.

ANG 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Lectures and discussions of advanced topics in animal genetics. (S/U grading only.) Effective: 1997 Winter Quarter.

ANG 299—Research in Animal Genetics (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ANS—Animal Science

Courses in ANS:

ANS 001—Domestic Animals & People (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Animal domestication and factors affecting their characteristics and distribution. Animal use for food, fiber, work, drugs, research and recreation; present and future roles in society. Laboratory exercises with beef and dairy cattle, poultry, sheep, swine, laboratory animals, fish, horses, meat and dairy products. GE credit: SE, WE. Effective: 1997 Winter Quarter.

ANS 002—Introductory Animal Science (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ANS 001 and BIS 002A recommended. Open to students in Animal Science, Animal Science and Management, Agricultural and Environmental Education, and Sustainable Agriculture and Food Systems majors. Growth, reproduction, lactation, inheritance, nutrition, and disease control in domesticated animals and species used in aquaculture; the application of sciences to animal production. GE credit: SE, SL, VL, WE. Effective: 2016 Fall Quarter.

ANS 012—Animal Science: Basic Principles & Application (3)

Lecture—3 hour(s). Overview of domestic and global animal industries. Exploration of production systems, animal biology, genetics, anatomy, physiology, reproduction, health, behavior, research, biotechnology and welfare. GE credit: SE. Effective: 2014 Fall Quarter.

ANS 015—Introductory Horse Husbandry (3)

Lecture—3 hour(s). Introduction to care and use of light horses emphasizing the basic principles for selection of horses, responsibilities of ownership, recreational use and raising of foals. GE credit: QL, SE, VL. Effective: 2016 Fall Quarter.

ANS 017—Canine Behavior: Learning & Cognition (3)

Lecture—3 hour(s). Domestic dog behavior from basic principles of learning to complex cognitive behaviors; interaction between learning and cognition including how these processes contribute to interactions with humans; basic genetic correlates of learning and cognition. Effective: 2012 Summer Session 1.

ANS 018—Introductory Aquaculture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Historical and contemporary aquacultural practices. Interaction between the aqueous culture environment and the biology of aquatic animals. Impact of economics and governmental policies on the development of aquaculture. Interaction of aquacultural practices with larger societal goals. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1997 Winter Quarter.

ANS 021—Livestock & Dairy Cattle Judging (2)

Laboratory—6 hour(s). Prerequisite(s): ANS 001 or ANS 002 recommended. Evaluation of type as presently applied to light horses, meat animals and dairy cattle. Relationship between form and function, form and carcass quality, and form and milk production. GE credit: OL, SE. Effective: 1997 Winter Quarter.

ANS 022A—Animal Evaluation (2)

Laboratory—3 hour(s); Fieldwork—30 hour(s). Prerequisite(s): ANS 021; Or equivalent. Attendance at 3 one-day weekend field trips required. Domestic livestock species with emphasis on visual appraisal, carcass evaluation, and application of performance information. Emphasis on accurate written and oral descriptions of evaluations. Prerequisite to intercollegiate judging competition. (P/NP grading only.) GE credit: OL, SE. Effective: 1999 Fall Quarter.

ANS 022B—Animal Evaluation (2)

Laboratory—3 hour(s); Fieldwork—30 hour(s). Prerequisite(s): ANS 022A; Or equivalent. Attendance at three one-day weekend field trips required. Continuation of ANS 022A with emphasis on specific species: swine, beef cattle and sheep. Application of animal science principles to selection and management problem-solving scenarios. Prerequisite to intercollegiate judging competition. (P/NP grading only.) GE credit: OL, SE. Effective: 2000 Winter Quarter.

ANS 041—Domestic Animal Production (2)

Lecture—2 hour(s). Principles of farm animal management, including dairy and beef cattle, sheep, and swine. Industry trends, care and management, nutrition, and reproduction. GE credit: SE. Effective: 1997 Winter Quarter.

ANS 041L—Domestic Animal Production Laboratory (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): ANS 041 (can be concurrent). Animal production principles and practices, including five field trips to dairy cattle, beef cattle, sheep, and swine operations and campus labs. (P/NP grading only.) GE credit: QL, SE, SL, VL, WE. Effective: 2016 Fall Quarter.

ANS 042—Introductory Companion Animal Biology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Companion animal domestication. Historical, contemporary perspectives. Legislation concerning companion animals. Selected topics in anatomy, physiology, genetics, nutrition, behavior and management. Scientific methods in studying the human-animal bond. Discussions: application of biological concepts to problems related to companion animals. GE credit: QL, SE, SL, WE. Effective: 1997 Winter Quarter.

ANS 049A—Animal Management Practices: Aquaculture (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049B—Animal Management Practices: Beef (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049C—Animal Management Practices: Dairy (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049D—Animal Management Practices: Goats (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049E—Animal Management Practices: Horses (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049F—Animal Management Practices: Laboratory Animals (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049G—Animal Management Practices: Meats (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049H—Animal Management Practices: Poultry (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049I—Animal Management Practices: Sheep (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049J—Animal Management Practices: Swine (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049K—Animal Management Practices: Captive & Companion Avian (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 2013 Winter Quarter.

ANS 090C—Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Restricted to lower division standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 092—Internship in Animal Science (1-12)

Internship—3-18 hour(s). Prerequisite(s): Consent of Instructor. Restricted to lower division standing. Internship off and on campus in dairy, livestock, and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval form must be met. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 098—Directed Group Study (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Restricted to lower division standing. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division standing. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 100—Animal Physiology (5)

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002A; CHE 002B. Pass One restricted to students in the Animal Science and Animal Science and Management majors. Basic principles of animal physiology in domesticated and captive animals with a comparative approach. Molecular, biochemical, chemical and physical aspects and their influences on function of physiological systems in animals. Not open for credit to students who have taken NPB 101. GE credit: SE. Effective: 2016 Spring Quarter.

ANS 103—Animal Welfare (4)

Lecture—2 hour(s); Discussion—2 hour(s). Prerequisite(s): ANS 104 or NPB 102 or WFC 141; or Consent of Instructor. Restricted to upper division standing. Application of principles of animal behavior and physiology to assessment and improvement of the welfare of wild, captive, and domestic animals. Topics include animal pain, stress, cognition, motivation, emotions, and preferences, as well as environmental enrichment methods. GE credit: SE, SL. Effective: 2016 Fall Quarter.

ANS 104—Principles & Applications of Domestic Animal Behavior (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANS 002 or BIS 002B. Pass One open to Animal Science majors only. Basic principles of animal behavior as applied to domesticated species. Emphasis placed on application of the principles of animal behavior. GE credit: SE. Effective: 2020 Winter Quarter.

ANS 106—Domestic Animal Behavior Laboratory (3) *Review all entries*

Laboratory—6 hour(s); Discussion—1 hour(s). Prerequisite(s): ANS 104 or NPB 102; or Consent of Instructor. Pass One restricted to Animal Science (AANS) majors in Senior standing. Research experience with the behavior of large domestic animals. Experimental design, methods of data collection & analysis, and reporting of experimental results. GE credit: QL, SE, SL, WE. Effective: 2020 Summer Session 1.

ANS 106—Domestic Animal Behavior Laboratory (3) *Review all entries*

Laboratory—6 hour(s); Discussion—1 hour(s). Prerequisite(s): ANS 104 or NPB 102; or Consent of Instructor. Research experience with the behavior of large domestic animals. Experimental design, methods of data collection & analysis, and reporting of experimental results. GE credit: QL, SE, SL, WE. Effective: 2020 Winter Quarter.

ANS 107—Zoo Biology & Research (3)

Lecture/Discussion—5 hour(s). Prerequisite(s): BIS 002B. Introduction to the modern zoo, including history, staffing structure, aspects of animal care such as housing, social management, and enrichment, research in genetics, health, nutrition, behavior, cognition, and guest perceptions. Requires a visit to the Sacramento Zoo and development of a project research proposal based on a specific exhibit at the zoo. GE credit: SE. Effective: 2018 Summer Session 2.

ANS 108—Equine Behavior & Welfare (3)

Lecture—3 hour(s). Improve the understanding and application of good welfare practices when managing, training, transporting, treating, or breeding equine. Recognize changes in behavior or causes related to compromised health or welfare. Effective: 2019 Fall Quarter.

ANS 112—Sustainable Animal Agriculture (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): BIS 002B or ANS 001; STA 100 or PLS 120 recommended. Current applications of sustainable animal agriculture including the challenges of animal production, animal needs, animal well-being, and protection of the environment and resources for future food supply systems. Various scenarios for meeting sustainability objectives are evaluated using computing modeling. GE credit: OL, QL, SE, SS. Effective: 2016 Fall Quarter.

ANS 115—Advanced Horse Production (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ANS 015; BIS 101; NUT 115; (ANS 100 or NPB 101); or Consent of Instructor. Feeding, breeding, and management of horses; application of the basic principles of animal science to problems of production of all types of horses. Designed for students who wish to become professionally involved in the horse industry. GE credit: QL, SE, SL, WE. Effective: 2016 Fall Quarter.

ANS 118—Fish Production (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): WFC 120. Current practices in fish production; relationship between the biological aspects of a species and the production systems, husbandry, management, and marketing practices utilized. Emphasis on species currently reared in California. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 119—Invertebrate Aquaculture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002B. Management, breeding and feeding of aquatic invertebrates; application of basic principles of physiology, reproduction, and nutrition to production of mollusks and crustaceans for human food; emphasis on interaction of species biology and managerial techniques on production efficiencies. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 120—Principles of Meat Science (3)

Lecture—3 hour(s). Prerequisite(s): ANS 002. Restricted to upper division standing. Anatomical, physiological, developmental, and biochemical aspects of muscle underlying the conversion of muscle to meat. Includes meat processing, preservation, microbiology, and public health issues associated with meat products. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 120L—Meat Science Laboratory (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): ANS 002; ANS 120 (can be concurrent). Restricted to upper division standing. Laboratory exercises and student participation in transformation of live animal to carcass and meat, structural and biochemical changes related to meat quality, chemical and sensory evaluation of meat, and field trips to packing plant and processing plant. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 123—Animal Growth & Development (4)

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): (ABI 103 or BIS 103); (ANS 100 or NPB 101). Growth and development of animals from conception to maturity, viewed from practical and biological perspectives; includes genetic, metabolic, nutritional control of cell and organism function. GE credit: OL, QL, SE, VL, WE. Effective: 2016 Fall Quarter.

ANS 124—Lactation (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 (can be concurrent) or BIS 103 (can be concurrent)). Consideration of the biochemical, genetic, physiological, nutritional, and structural factors relating to mammary gland development, the initiation of lactation, the composition of milk and lactational performance. GE credit: SE, SL. Effective: 2016 Fall Quarter.

ANS 124—Lactation (4) *Review all entries*

Lecture—3 hour(s); Laboratory—2 hour(s). Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 (can be concurrent) or BIS 103 (can be concurrent)). Biochemical, genetic, physiological, nutritional, and structural factors relating to mammary gland development, the initiation of lactation, the composition of milk and lactational performance. GE credit: SE, SL. Effective: 2020 Fall Quarter.

ANS 125—Equine Exercise Physiology (3)

Lecture—3 hour(s). Prerequisite(s): (NPB 101 or ANS 100); ANS 015. Basic and applied physiology of the exercising horse. Includes physiological systems, gait analysis, lameness, pharmacology, sports medicine; sport horse performance evaluation and conditioning. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 126—Equine Nutrition (3)

Lecture—3 hour(s). Prerequisite(s): ANS 015; NUT 115. Equine digestion, digestive physiology, diet development and evaluation, and the relationship of the topics to recommended feeding practices and nutritional portfolios. GE credit: SE. Effective: 2014 Fall Quarter.

ANS 127—Advanced Equine Reproduction (3)

Lecture—3 hour(s). Prerequisite(s): ANS 115; (ANS 100 or NPB 101). Reproductive physiology, anatomy and endocrinology of the mare and stallion. Emphasis on structure/function relationships as they are applied to improving equine reproductive management and efficiency. GE credit: SE, WE. Effective: 2016 Fall Quarter.

ANS 128—Agricultural Applications of Linear Programming (4)

Lecture—2 hour(s); Laboratory—2 hour(s); Discussion—1 hour(s). Prerequisite(s): PLS 021 or ECS 015; or Consent of Instructor. Restricted to upper division standing. Applications of linear programming in agriculture, emphasizing resource allocation problems and decision making. Problems include crop production, ration formulation, and farm management. Hands-on experience in developing linear programs and interpreting the results. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

ANS 129—Environmental Stewardship in Animal Production Systems (3)

Lecture—3 hour(s). Prerequisite(s): (BIS 010 or (BIS 002A, BIS 002B)), CHE 002A, CHE 002B, (CHE 008A, CHE 008B) or (CHE 118A, CHE 118B); and Consent of Instructor. Management principles of environmental stewardship for grazing lands, animal feeding, operations and aquaculture operations; existing regulations, sample analyses, interpretation and utilization of data, evaluation of alternative practices, and policy development. GE credit: SE, SL. Effective: 2017 Winter Quarter.

ANS 130—Endocrinology Laboratory (3) *Review all entries*

Lecture—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): ANS 100 or NPB 101. Experimental approaches used in animal endocrinology research. Introductions to a variety of topics to help assimilate many ideas from physiology courses, experimental approaches, and skills reading and interpreting scientific papers. Effective: 2019 Fall Quarter.

ANS 130—Endocrinology Laboratory (3) *Review all entries*

Lecture—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): ANS 100 or NPB 101. Pass One restricted to Animal Science (AANS) majors in Senior standing. Experimental approaches used in animal endocrinology research. Introductions to a variety of topics to help assimilate many ideas from physiology courses, experimental approaches, and skills reading and interpreting scientific papers. Effective: 2020 Summer Session 1.

ANS 131—Reproduction & Early Development in Aquatic Animals (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): MCB 150; WFC 120; or Consent of Instructor. Physiological and developmental functions related to reproduction, breeding efficiency and fertility of animals commonly used in aquaculture. GE credit: SE, WE. Effective: 2017 Winter Quarter.

ANS 132—Microbiology of Animal Systems Laboratory (3)

Laboratory—6 hour(s); Discussion—1 hour(s). Prerequisite(s): (BIS 002A or BIS 002B); (CHE 008B or CHE 118B). Pass One restricted to Animal Science majors in Senior standing. Basic microbiology techniques and the ability to produce recombinant proteins from genomic information. Importance of carbohydrate degrading enzymes in animal systems. Animal systems of interest range from the digestive tract of animals (e.g. rumen) to animal waste (e.g. manure). Effective: 2020 Fall Quarter.

ANS 133—Animal Cell Culture Laboratory (4) *Review all entries*

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): ABI 102; ABI 103; (ANS 100 or NPB 101); or Consent of Instructor. Pass One restricted to Animal Science (AANS) majors in Senior standing. Design, conduct, analyze, and present a research project involving cell culture. Effective: 2020 Summer Session 1.

ANS 133—Animal Cell Culture Laboratory (4) *Review all entries*

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): ABI 102; ABI 103; (ANS 100 or NPB 101); or Consent of Instructor. Design, conduct, analyze, and present a research project involving cell culture. Effective: 2019 Fall Quarter.

ANS 134—Animal Nutrition Laboratory (3) *Review all entries*

Lecture/Discussion—1 hour(s); Laboratory—3 hour(s); Project (Term Project). Prerequisite(s): ABI 103 (can be concurrent); (ANS 100 (can be concurrent) or NPB 101 (can be concurrent)); (STA 100 or PLS 120). Animal nutrition research experience for senior-level students. Forming a valid hypothesis, designing treatments, preparing for experiments, recording measurements in the field, summarizing results. Emphasis on developing essential research skills & proper techniques for collecting, summarizing, and presenting data. Effective: 2019 Fall Quarter.

ANS 134—Animal Nutrition Laboratory (3) *Review all entries*

Lecture/Discussion—1 hour(s); Laboratory—3 hour(s); Project (Term Project). Prerequisite(s): ABI 103 (can be concurrent); (ANS 100 (can be concurrent) or NPB 101 (can be concurrent)); (STA 100 or PLS 120). Pass One restricted to Animal Science (AANS) majors in Senior standing. Animal nutrition research experience for senior-level students. Forming a valid hypothesis, designing treatments, preparing for experiments, recording measurements in the field, summarizing results. Emphasis on developing essential research skills & proper techniques for collecting, summarizing, and presenting data. Effective: 2020 Summer Session 1.

ANS 135—Production Animal Laboratory (3)

Lecture/Discussion—1 hour(s); Laboratory—3 hour(s); Fieldwork. Prerequisite(s): ABI 102; ABI 103; (NPB 101 or ANS 100). Pass One restricted to Animal Science majors in senior standing. Biochemical methods for developing and conducting research with production animals, and interpreting and presenting data. Laboratory focus course which uses sheep as model. There may be one or two mandatory all day Saturday field trips. GE credit: SE. Effective: 2020 Winter Quarter.

ANS 136—Techniques & Practices of Fish Culture (3)

Lecture—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): ANS 002; BIS 002A; BIS 002B; BIS 002C; ((CHE 008A, CHE 008B) or (CHE 118A, CHE 118B)). Pass One restricted to Animal Science majors in Senior standing. Daily care and maintenance of fish in residential aquariums, research and commercial facilities. Biological and environmental factors important to sound management of fish. Laboratories focus on fish culture including growth trials and biochemical assays. Not open for credit to students who have previously completed ANS 136A or ANS 137. GE credit: QL, SE, SL, VL, WE. Effective: 2020 Winter Quarter.

ANS 137—Techniques & Practices of Avian Culture (3)

Lecture—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): ANS 002; BIS 002A; BIS 002B; BIS 002C; ((CHE 008A, CHE 008B) or (CHE 118A, CHE 118B)). Pass One restricted to Animal Science majors in senior standing. Daily care and maintenance of birds for research, commercial production and companion or hobby uses. Biological and environmental factors important to sound management of birds. Laboratories focus on bird husbandry, management and care and include growth trials and biochemical assays. Not open for credit to students who have previously completed ANS 136B or ANS 137. GE credit: QL, SE, SL, VL, WE. Effective: 2020 Spring Quarter.

ANS 138—Meat Quality & Safety Laboratory (3) *Review all entries*

Lecture—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): CHE 002B; ANS 120 recommended. Pass One restricted to Animal Science majors with Senior standing. Advanced hands-on experience with meat and food related research. Development of laboratory skills in chemistry, biochemistry, microbiology, and meat science. Effective: 2020 Fall Quarter.

ANS 138—Advanced Animal Biochemical Techniques (3) *Review all entries Discontinued*

Lecture—1 hour(s); Laboratory—6 hour(s). Theory and advanced practices of biochemistry techniques used in animal research. Topics include laboratory and radiation safety, experimental design, diet preparation, dose-response growth trial, recordkeeping, statistical analysis, biological sampling and instrumentation in radio-immuno-assay, enzyme-linked-immuno-sorbent-assay, spectroscopy, chromatography, electrophoresis, and reporting. GE credit: SE. Effective: 2010 Winter Quarter.

ANS 139—Experimental Animal Physiology (3)

Lecture—1 hour(s); Laboratory—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): ABI 102; BIS 101; or Consent of Instructor. Pass One restricted to Animal Science majors in senior standing. Combination of theory and hands-on experiences in animal physiology using various experimental techniques. Practical laboratory skill development from cellular level to whole animal, in areas such as genetics, endocrinology, histology and physiological function. GE credit: SE, WE. Effective: 2020 Winter Quarter.

ANS 140—Management of Laboratory Animals (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): NPB 101 or ANS 100. Laboratory animal management procedures in view of animal physiology, health and welfare, government regulations, and experimental needs. Clinical techniques using rodents and rabbits as models. GE credit: SE. Effective: 2017 Winter Quarter.

ANS 141—Equine Enterprise Management (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ANS 115; ECN 001A and ECN 001B recommended. Examination of the concepts and principles involved in the operation of an equine enterprise. Essential aspects of equine enterprise management, including equine law, marketing, cash flow analysis, and impact of state and federal regulations. GE credit: SS. Effective: 1997 Winter Quarter.

ANS 142—Companion Animal Care & Management (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANS 042; BIS 101; (NPB 101 or ANS 100); ((ABI 102 or BIS 102) and (ABI 103 or BIS 103)) recommended. Pass One restricted to Animal Science or Animal Science & Management majors in senior standing. Management and production of companion animals. Integration of the disciplinary principles of behavior, genetics, nutrition, and physiology as related to the care of companion animals. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2020 Winter Quarter.

ANS 143—Pig & Poultry Care & Management (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): NUT 115; (NPB 101 or ANS 100); ANS 041; or Consent of Instructor. Care and management of swine, broilers and turkeys as related to environmental physiology, nutrition and metabolism, disease management and reproduction. Saturday field trips. GE credit: SE, SL. Effective: 2017 Winter Quarter.

ANS 144—Beef Cattle & Sheep Production (4)

Lecture—3 hour(s); Laboratory—3 hour(s); Fieldwork—2 hour(s). Prerequisite(s): ANS 041; NUT 115; or Consent of Instructor. ANG 107 recommended. Genetics, physiology, nutrition, economics and business in beef cattle and sheep production. Resources used, species differences, range and feedlot operations. Emphasis on integration and information needed in methods for management of livestock enterprises. One or two Saturday field trips. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

ANS 145—Meat Processing & Marketing (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ANS 002; Consent of Instructor. Distribution, processing and marketing of meat and meat products. Meat and meat animal grading and pricing. Government regulations and social/consumer concerns. Future trends and impact on production management practices. Includes poultry. GE credit: SE. Effective: 2017 Winter Quarter.

ANS 146—Dairy Cattle Production (5)

Lecture—3 hour(s); Laboratory—3 hour(s); Fieldwork—1 hour(s); Discussion—1 hour(s). Prerequisite(s): NUT 115; or Consent of Instructor. ANG 107 recommended. Scientific principles from genetics, nutrition, physiology, and related fields applied to conversion of animal feed to human food through dairy animals. Management and economic decisions are related to animal biology considering the environment and animal well-being. Mandatory Saturday field-trip. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

ANS 147—Dairy Processing & Marketing (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): ANS 002; or Consent of Instructor. Restricted to upper division standing. Examination of distribution systems, processing practices, product quality, impact of government policy (domestic and foreign), marketing alternatives, and product development. GE credit: SE. Effective: 2017 Winter Quarter.

ANS 148—Enterprise Analysis in Animal Industries (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Restricted to students with upper division standing. Examination and application of decision making and problem solving in the production enterprise. Areas of production analysis, problem solving, risk analysis and cost-benefit analysis will be examined in terms of the total enterprise. GE credit: OL, QL, SS, WE. Effective: 2016 Fall Quarter.

ANS 149—Farrier Science (3)

Lecture—3 hour(s). Prerequisite(s): ANS 115. In-depth examination of the structure-function relationship of the equine hoof and how it relates to conformation, injury and performance. GE credit: SE. Effective: 2015 Winter Quarter.

ANS 149L—Farrier Science Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): ANS 149 (can be concurrent); or Consent of Instructor. Art and science of horseshoeing in equine related fields. Proper use of the tools, materials and techniques in the fabrication of shoes and safe preparation of the hoof for application of shoes. (P/NP grading only.) Effective: 1999 Spring Quarter.

ANS 150—Animal Health & Disease (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANS 002 or BIS 002B. Basic concepts of animal immunology, microbiology, parasitology, epidemiology, vaccination, and how the knowledge can be used to improve animal health and prevent animal infection & disease. Includes relevant health and disease issues. Effective: 2019 Fall Quarter.

ANS 160A—Stress & Reproduction I (2) *Review all entries*

Laboratory—3 hour(s); Project (Term Project). Prerequisite(s): NPB 121 (can be concurrent); ANS 104; or Consent of Instructor. Evaluation of the impact of chronic stress on male reproductive development. Isolation stress tests on young animals. Data collection of treatment and control groups. Biological laboratory techniques and analysis. Two-quarter course. Effective: 2019 Fall Quarter.

ANS 160A—Stress & Reproduction I (2) *Review all entries*

Laboratory—3 hour(s); Project (Term Project). Prerequisite(s): NPB 121 (can be concurrent); (ANS 104 (can be concurrent) or NPB 102 (can be concurrent)). Pass One restricted to Animal Science majors in Senior standing. Evaluation of the impact of chronic stress on male reproductive development. Isolation stress tests on young animals. Data collection of treatment and control groups. Biological laboratory techniques and analysis. Two-quarter course. Effective: 2021 Winter Quarter.

ANS 160B—Stress & Reproduction II (2)

Laboratory—6 hour(s). Prerequisite(s): ANS 160A. Evaluation of the impact of chronic stress on male reproductive development. Isolation stress tests on young animals. Data collection of treatment and control groups. Biological laboratory techniques and analysis. Two-quarter course. Effective: 2019 Fall Quarter.

ANS 170—Ethics of Animal Use (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Any basic course in composition or speech, or completion of college English requirement. Pass One open to Animal Science majors only. Ethical issues relating to animal use in contemporary society. Integration of philosophical theories with scientific evidence relating to animal behavior, mentality, and welfare. Uses of animals in agriculture, research, and as companions. Ethical responsibilities regarding wildlife and the environment. GE credit: SL, SS, WE. Effective: 2020 Winter Quarter.

ANS 190C—Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Advanced standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANS 192—Internship in Animal Science (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Internship off and on campus in dairy, livestock and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval Form must be met. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANS 194—Research in Animal Science (3)

Laboratory—6 hour(s); Discussion—1 hour(s). Prerequisite(s): ANS 106 or ANS 135 or ANS 136 or ANS 137 or ANS 139 or ANG 111; or ANS 133; and Consent of Instructor. Research with a faculty mentor. Weekly discussion and laboratory on specific research topic. May include a seminar to research group. Choose from sections: (1) Animal Behavior; (2) Animal Genetics; (3) Animal Nutrition; (4) Animal Physiology. May be repeated up to 4 time(s). Effective: 2016 Fall Quarter.

ANS 194HA—Undergraduate Honors Thesis in Animal Science (4)

Lecture—1 hour(s); Laboratory—9 hour(s). Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and Consent of Instructor. Minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee. Carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, write a thesis and present a public seminar describing his/her research. GE credit: OL, SE. Effective: 2016 Fall Quarter.

ANS 194HB—Undergraduate Honors Thesis in Animal Science (4)

Lecture—1 hour(s); Laboratory—9 hour(s). Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and Consent of Instructor. Minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee. Carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, write a thesis and present a public seminar describing his/her research. GE credit: SE, VL. Effective: 2016 Fall Quarter.

ANS 194HC—Undergraduate Honors Thesis in Animal Science (4)

Lecture—1 hour(s); Laboratory—9 hour(s). Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and Consent of Instructor. Minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee. Carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, write a thesis and present a public seminar describing his/her research. GE credit: SE, WE. Effective: 2016 Fall Quarter.

ANS 197T—Tutoring in Animal Science (1-2)

Tutorial—1-2 hour(s). Prerequisite(s): Consent of Instructor. Animal Science or related major; upper division standing. Tutoring of students in lower division Animal Science courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Selected topics relating to the animal sciences. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANS 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Restricted to students with upper division standing. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 200—Strategies in Animal Production (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Examines the forces and issues in animal agriculture through the strategic management process. Effective: 1997 Winter Quarter.

ANS 206—Models in Agriculture & Nutrition (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): MAT 016B; STA 108. Basic model building principles and techniques for statistical and systems simulation models. Optimization techniques for non-linear experimental designs and management models are presented. Quantitative analysis and evaluation of linear and non-linear equations used in agriculture and nutrition. Effective: 1997 Winter Quarter.

ANS 259—Literature in Animal Science (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Critical presentation and analysis of recent journal articles in animal science. May be repeated up to 9 time(s). (S/U grading only.) Effective: 2004 Fall Quarter.

ANS 290—Seminar (1)

Seminar—1 hour(s). Reports and discussions of topics of interest in genetics, nutrition, and physiology as they apply to animal science. (S/U grading only.) Effective: 1997 Winter Quarter.

ANS 290C—Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Graduate standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ANS 291—Current Research in Animal Science (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Current research in animal science explored at weekly seminars presented by guest lecturers. Discussion of research presented. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ANS 297—Supervised Teaching in Animal Science (2)

Variable—6 hour(s). Practical experience in teaching Animal Science at University level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. Evaluation letter sent to the graduate advisor with copy to the student. (S/U grading only.) Effective: 1997 Winter Quarter.

ANS 298—Group Study (1-5)

Lecture—1-5 hour(s); Discussion—1-5 hour(s). Prerequisite(s): Consent of Instructor. Lectures and discussions of advanced topics in the animal sciences. (Sect. 1, 2, 3-letter grading; from Sect. 4 on-S/U grading only.) Effective: 1997 Winter Quarter.

ANS 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ANT—Anthropology

Courses in ANT:

ANT 001—Human Evolutionary Biology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Processes and course of human evolution; primatology; biological and social diversity within Homo sapiens; human paleontology. GE credit: SE, SL, WE. Effective: 1999 Fall Quarter.

ANT 001Y—Human Evolutionary Biology (Hybrid Version) (4)

Web Virtual Lecture—1.5 hour(s); Lecture/Discussion—1.5 hour(s); Discussion/Laboratory—1 hour(s). Evolutionary theory and mechanisms of evolution; basic population and quantitative genetics; primatology; biological and cultural diversity within Homo sapiens; paleoanthropology. May not take both ANT 001 and ANT 001Y for credit. GE credit: SE, SL, WE. Effective: 2017 Winter Quarter.

ANT 002—Cultural Anthropology (5)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Introduction to cultural diversity in its many forms and methods used by anthropologists to account for it. Relational dynamic of culture, history, and power in constituting "social facts" and "realities." Critical thinking of contemporary concerns. GE credit: DD, SS, WC, WE. Effective: 2019 Winter Quarter.

ANT 003—Introduction to Archaeology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Development of archaeology as an anthropological study; objectives and methods of modern archaeology. GE credit: SE, SL, SS. Effective: 2015 Spring Quarter.

ANT 004—Introduction to Anthropological Linguistics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Exploration of the role of language in social interaction and world view, minority languages and dialects, bilingualism, literacy, the social motivation of language change. Introduction of analytical techniques of linguistics and demonstration of their relevance to language in sociocultural issues. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

ANT 005—Proseminar in Biological Anthropology (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. ANT 001 or ANT 001Y recommended. Primarily for majors. Integration of related disciplines in the study of biological anthropology through discussion and research projects. Principal emphasis in human adaptation to the environment. GE credit: OL, SE, WE. Effective: 2016 Fall Quarter.

ANT 013—Scientific Method in Physical Anthropology (4)

Lecture—2 hour(s); Discussion/Laboratory—1 hour(s); Fieldwork—1 hour(s). Skills for scientific thinking; designing, implementing, analyzing, interpreting, presenting, and criticizing research. Collection and analysis of original data. Basic statistical methods. GE credit: OL, SE, VL, WE. Effective: 2004 Fall Quarter.

ANT 015—From Birth to Death: The Evolution of the Human Life Cycle (5)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Introduction to the biology of birth, childhood, marriage, the family, old age, and death. Examines comparative characteristics of nonhuman primates and other animals as well as cross-cultural variation in humans by study of selected cases. GE credit: SE, SL, WC, WE. Effective: 2018 Winter Quarter.

ANT 020—Comparative Cultures (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to the anthropological study of cultural diversity. Case studies of eight societies will be presented to illustrate and compare the distinctive features of major cultural regions of the world. Concludes with a discussion of modernization. GE credit: ACGH, AH, DD, SS, WC, WE. Effective: 1997 Winter Quarter.

ANT 021—Zombies (2)

Lecture—2 hour(s). Figure of the zombie as window into ideas about race, economic exploitation, and what it means to be human. Zombie lore in the Afro-Atlantic world and its re-imagining in contemporary pop culture. GE credit: SS, WC, WE. Effective: 2019 Fall Quarter.

ANT 023—Introduction to World Prehistory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Broadly surveys patterns and changes in the human species' physical and cultural evolution from earliest evidence for "humanness" to recent development of large-scale complex societies or "civilizations." Lectures emphasize use of archaeology in reconstructing the past. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

ANT 024—Ancient Crops & People (4)

Lecture—3 hour(s); Discussion—1 hour(s). The archaeological evidence for domestication of plants and the origins of agricultural societies. Anthropological context of agriculture and the effects on sexual division of labor, social inequality, wealth accumulation, warfare, human health, and sedentism. GE credit: SS, WC, WE. Effective: 2005 Spring Quarter.

ANT 025—Ancient Animals & People (2)

Lecture—2 hour(s). History of human and animal relationships and how animals have influenced social and economic structures of past societies. Why, when and how humans used animals in the context of hunting, domestication, secondary products, ritual, companionship, and conservation. GE credit: SS. Effective: 2015 Winter Quarter.

ANT 026—Mummies of the Ancient World (2)

Lecture—2 hour(s). Archaeological approaches for studying mummies and the process of mummification in the ancient world. Analytical techniques used, environmental factors promoting mummification, and archaeological conservation of mummified bodies. GE credit: SS, WC. Effective: 2014 Fall Quarter.

ANT 027—Great Adaptations: Genetic & Cultural Evolution in the Spread of Humanity (2)

Lecture—2 hour(s). How humans adapted to diverse ecologies through cultural and genetic changes. Illustrations include evolution in response to disease, dietary, social, and communication challenges. GE credit: SE, SL, SS, WC. Effective: 2019 Winter Quarter.

ANT 028—Prehistoric Origins of Art (2)

Lecture/Discussion—2 hour(s). Interdisciplinary look at the earliest evidence for art and symbolic behavior. Method and techniques to investigate Prehistoric art. Interpretative framework and relevance for understanding the role of symbolic activities in traditional societies. GE credit: SS. Effective: 2015 Winter Quarter.

ANT 029—Vikings (2)

Lecture—2 hour(s). History of the Vikings through the Slavic and Mediterranean regions in the East and across the vast North Atlantic region to the west. Emphasis on archaeology and sagas to understand Viking culture from the 8th to 11th centuries. GE credit: SS, WC. Effective: 2016 Spring Quarter.

ANT 030—Sexualities (4)

Lecture/Discussion—4 hour(s). Introduction to the study of sexuality, particularly to the meanings and social organization of same-sex sexual behavior across cultures and through time. Biological and cultural approaches will be compared, and current North American issues placed in a wider comparative context. GE credit: ACGH, AH, DD, SS, WC. Effective: 2005 Fall Quarter.

ANT 032—Drugs, Science & Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine. (Same course as STS 032.) GE credit: SS, VL, WE. Effective: 2008 Fall Quarter.

ANT 034—Cultures of Consumerism (4)

Lecture/Discussion—4 hour(s); Term Paper. Aspects of modern consumer cultures in capitalist and socialist countries. Transformations of material cultures over the past century. Case studies on the intersections of gender, class, and culture in everyday consumption practices. GE credit: SS, WC. Effective: 2007 Fall Quarter.

ANT 036—Star Trek as Social Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Introduction to core concepts in anthropological and social theory using Star Trek as a teaching vehicle. Emphasis on thinking anthropologically about everyday life and popular culture. GE credit: SS. Effective: 2019 Fall Quarter.

ANT 054—Introduction to Primatology (4)

Lecture/Discussion—3 hour(s); Term Paper. Basic survey of the primates as a separate order of mammals; natural history and evolution of primates; consideration of hypotheses for their origin. GE credit: SE, SL, WE. Effective: 2007 Fall Quarter.

ANT 056—Introduction to Forensic Anthropology (3)

Lecture—2 hour(s); Discussion—1 hour(s). Survey of anthropological techniques as applied within the legal system, including scene documentation and recovery, human identification, and trauma analysis. Examination of error and uncertainty, ethics, and human rights in forensic anthropology. GE credit: SL, SS. Effective: 2020 Fall Quarter.

ANT 092—Internship in Anthropology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Work experience off and on campus in all subject areas offered in the Department of Anthropology under the supervision of a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2020 Winter Quarter.

ANT 098—Directed Group Study (1-5)

Variable. Primarily intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANT 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANT 100—Theory in Social-Cultural Anthropology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Discussion of the theoretical and philosophical developments in cultural anthropology from the 19th century to the present. GE credit: SS, WE. Effective: 2019 Winter Quarter.

ANT 101—Ecology, Nature, & Society (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as ESP 101.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 103—Indigenous Peoples & Natural Resource Conservation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 or GEL 001 or ESP 030 recommended. Integration of the interests of resident and indigenous peoples with the conservation of natural resources and ecosystems, using case study examples from both the developing and developed world. Not open for credit for students who have completed ANT 121N. (Former ANT 121N.). GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 104N—Cultural Politics of the Environment (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Political economy of environmental struggles. Relationship between social inequality (based on race, class and/or gender) and ecological degradation. Articulation of local peoples, national policy, and the international global economy in the contestation over the use of environmental resources. Not open for credit to students who have completed ANT 134N. (Former ANT 134N.). GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 107—Law, Power, Violence (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Cultural dimensions of law and political power. Colonial and postcolonial legal regimes, bureaucratic reason, legalized violence, sovereign power, and human rights. GE credit: SS, WC, WE. Effective: 2018 Fall Quarter.

ANT 109—Visualization in Science: A Critical Introduction (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ANT 002 or STS 001 or STS 020 recommended. Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make claims. (Same course as STS 109.) GE credit: SS, VL, WE. Effective: 2016 Fall Quarter.

ANT 120—Language & Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 004 or LIN 001 recommended; ANT 002 recommended. Culture, cognition, meaning, and interpretation; language and the classification of experience; communication and learning in crosscultural perspective. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 121—Special Topics in Medical Anthropology (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ANT 002 recommended. Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical encounters in a cross-cultural perspective. (Same course as STS 121.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 122A—Economic Anthropology (4)

Lecture—3 hour(s); Discussion—1 hour(s). The varieties of production, exchange, and consumption behavior in precapitalist economies, their interaction with culture and social-political organization, and the theories that account for these phenomena. The effects of capitalism on precapitalist sectors. Not open for credit to students who have completed ANT 122. (Former ANT 122.). GE credit: ACGH, DD, SS, WC, WE. Effective: 2001 Winter Quarter.

ANT 122B—Anthropology & Political Economy (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Survey of anthropological approaches to the study of political organizations; inter-relationships among political institutions, economic infrastructures and cultural complexity. Not open for credit to students who have completed ANT 123A. (Former ANT 123A.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 122B—Capitalism & Power (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Theorizations of economy and society. The rise of modern capitalism and new social and political formations. Relationships between value and violence, subjectivity, the unconscious, money, imperialism and different understandings of exchange and the political. GE credit: SS, WC, WE. Effective: 2020 Fall Quarter.

ANT 123AN—Resistance, Rebellion, & Popular Movements (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Analysis of popular protest in Third World and indigenous societies ranging from covert resistance to national revolts. Comparative case studies and theories of peasant rebellions, millenarian movements, social bandits, Indian "wars", ethnic and regional conflicts, gender and class conflicts. Not open for credit to students who have completed ANT 123B. (Former ANT 123B.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 124—Religion in Society & Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Discussion of anthropological theories of religion with emphasis on non-literate societies. Survey of shamanism, magic and witchcraft, ritual and symbols, and religious movements. Extensive discussion of ethnographic examples and analysis of social functions of religious institutions. GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.

ANT 125A—Structuralism & Symbolism (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Survey of anthropological approaches to understanding the logic of structuralism and symbolism in cultural analysis. Focus on how structural and symbolic interpretations relate to cultural and linguistic universals and to the philosophical basis of relativism in the social sciences. (Former ANT 125.) GE credit: SS, WC, WE. Effective: 2017 Winter Quarter.

ANT 125B—Postmodernism(s) & Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Crucial theories of modernity and post-modernity. How postmodernism is distinct from modernism, why it is related to the collapse of certainty about our collective reality and what it reveals about the status of reason, the self, and collective experience. Readings draw from various philosophical-theoretical, artistic and political literatures. GE credit: AH, SS, WC, WE. Effective: 2020 Winter Quarter.

ANT 126A—Anthropology of Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Theories of development and current critiques. Colonial legacies and post-colonial realities. Roles of the state and NGOs, population migrations, changing gender identities, cash-earning strategies, and sustainability issues. Stresses importance of cultural understandings in development initiatives. Case studies emphasizing non-industrial societies. Not open for credit to students who have completed ANT 126. (Former ANT 126.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 126B—Women & Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Current Third World and Western development issues concerning women in agriculture, industry, international division of labor, political movements, revolutions, politics of health, education, family and reproduction. Impact of colonialism, capitalism, the world system, and international feminism on women and development. No credit if taken ANT 131. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 127—Urban Anthropology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002; or Consent of Instructor. Survey of approaches to urban living: political structures, organization of labor, class relations, world views. The evolution of urban life and its contemporary dilemmas. Cross-cultural comparisons discussed through case studies. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

ANT 128A—Kinship & Social Organization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 001 and ANT 002 recommended. Comparative examination of personal kinship, descent, marriage, household and family organizations; the theories that account for variation, and recent advances in the treatment of these data. Not open for credit to students who have completed ANT 128. (Former ANT 128.). GE credit: SS, WC, WE. Effective: 2019 Spring Quarter.

ANT 128B—Self, Identity, & Family (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Exploration of self, identity, and family systems cross-culturally. Impact of class, gender, race, ethnicity, ruralization, urbanization, and globalization on notions of selfhood in different social/cultural systems. Not open for credit to students who have completed ANT 129. (Former ANT 129.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 129—Health & Medicine in a Global Context (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ANT 002 recommended. Recent works in medical anthropology and the science studies of medicine dealing with social and cultural aspects of global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical technologies, illness narratives, and others. (Same course as STS 129.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 130A—Cultural Dimensions of Globalization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Cultural dimensions of recent economic and political developments frequently termed "globalization." GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 130BN—Migration & the Politics of Place & Identity (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ANT 002 recommended. Internal and international migration from an anthropological perspective, including causes, processes, and political, economic, and cultural effects of spatial mobility and displacement. Emphasizes the interplay of identity, place, and power in diverse cultural and historical contexts. Not open for credit to students who have completed ANT 123D. (Former ANT 123D.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 131—Ecology & Politics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Analysis of the complex interactions between ecological dynamics and political processes employing the emerging approach of political ecology. Case studies of environmental degradation (e.g., desertification, logging, mineral extraction, petroleum, water) from various cultural and geographic regions. GE credit: SS. Effective: 2016 Fall Quarter.

ANT 132—Psychological Anthropology (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. History of the relationship between anthropology and psychoanalysis. Exploration of anthropology of emotions, colonial psychology, contemporary ethno-psychiatry, studies on personhood, possession, magic, altered states, subjectivity, and definitions of the normal and the pathological in different contexts and cultures. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 133—Anthropology of Ocean Worlds (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Exploration of various oceanic cultures and their engagement with the sea. Piracy, smuggling, exchange, maritime legal regimes, offshore policing, media infrastructures, and ocean ecologies. GE credit: SS, WC, WE. Effective: 2017 Winter Quarter.

ANT 134—Buddhism in Global Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Limited to 50 students. Buddhist meditation and ritual as a cultural system that adapts to global and local forces of change. Anthropological theory and method in understanding global culture transmission, including Buddhist reform movements in Asia and Buddhist practice in the West. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 135—Media Anthropology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Upper division standing. Examining human practices through their inscription in old and new media; evaluating the emergent fields of “cyber” and “digital” anthropology; and problematizing terms and concepts routinely deployed in studies of media worlds—platform, social media, hologram, algorithm, remediation, curation, animation. GE credit: AH, SS, VL, WC. Effective: 2017 Winter Quarter.

ANT 136—Ethnographic Film (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Overview of the use of film in anthropology and its advantages and limitations in comparison to written ethnographic descriptions. Essential features of ethnographic films. Film production in anthropological research and problems encountered in producing films in the field. GE credit: SS, VL, WC, WE. Effective: 2016 Fall Quarter.

ANT 137—Meditation & Culture (4)

Lecture/Discussion—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Limited to 50 students. Study and practice of the relation between meditation and cultural conditioning; comparison of Buddhist practice with other cultural constructions of mind, body, brain, thought, emotion, and self. Effective: 2016 Fall Quarter.

ANT 138—Ethnographic Research Methods in Anthropology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Basic concepts in and approaches to ethnographic field research. Problem formulation, research design, qualitative and quantitative data collection procedures, and techniques for organizing, retrieving, and analyzing information. Ethnographic description and constructed inference. Students will organize and conduct individual research projects. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 139AN—Race, Class, Gender Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Comparative analysis of class/race/gender inequality, concentrating on the ways in which beliefs about descent, “blood,” and biological difference interact with property and marital systems to affect the distribution of power in society. Not open for credit to students who have completed ANT 139. (Former ANT 139.). GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 139BN—Gender & Sexuality (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Gender and sexuality in foraging bands, horticultural and pastoral tribes, agricultural and industrial states. Debates on cultural evolution and distribution of gender hierarchies. Impact of politics, economics, religion, social practices, women's movements on gender and sexuality. Culture, nature and sexuality. Not open for credit to students who have completed ANT 130. (Former ANT 130.). GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 140A—Cultures & Societies of West & Central Africa (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Ethnographic survey of West Africa and Congo Basin with analyses of representative societies which illustrate problems of general theoretical concern. Major consideration will be the continuities and discontinuities between periods prior to European contact and the present. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 140B—Cultures & Societies of East & South Africa (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Ethnographic survey of Eastern and Southern Africa with analyses of selected societies which illustrate problems of interest to anthropologists. Major consideration will be given to continuities and discontinuities between periods prior to European contact and the present. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 141C—People of the Arctic: Contemporary & Historic Cultures of the Circumpolar Region (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 or ANT 003 recommended. Social, economic, political, and religious lives of Russian, American, Canadian, and Greenlandic Arctic people (Yup'ik, Iñupiat, Inuit). Topics include Arctic ecosystems, archaeological record of human occupation, ethnohistorical and ethnographic accounts, arctic people in popular culture, and contemporary issues. Effective: 2016 Fall Quarter.

ANT 142—Peoples of the Middle East (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Peoples of the Middle East (including North Africa). Discussions of class relations, kinship organization, sex/gender systems, religious beliefs and behavior, ethnic relations, political systems. Impact of world systems, political and religious movements and social change. (Former ANT 136.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 143A—Ethnology of Southeast Asia (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Patterns of culture and social organization from prehistory to the present, in the context of historical, ecological, economic, and political settings. Emphasis on the relation of ethnic minorities to national states. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 144—Contemporary Societies & Cultures of Latin America (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Introduction to contemporary social structure of Latin America. Origins, maintenance and changes in inequality: economic responses to poverty, sociocultural responses to discrimination, and political responses to powerlessness. GE credit: SS, WC, WE. Effective: 2017 Winter Quarter.

ANT 145—Performance, Embodiment, & Space in South Asia (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ANT 002; or Consent of Instructor. South Asian cultures and societies with a focus on performance, embodiment, and space from several disciplinary fields. Topics may include colonialism, nationalism, religious traditions, media, popular culture, cities, social movements, modernity, body-cultures, identity, gender, and diasporas. GE credit: AH, SS, WC, WE. Effective: 2005 Winter Quarter.

ANT 146N—Topics in the Anthropology of Europe (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 002 recommended. Recent ethnographies of different nation-states and socio-political spaces in Europe. Topics include the question of old and new boundaries, historical and contemporary constructions of Europe, migration and ethnicity, citizenship, belonging, multiculturalism, and post/socialisms. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 147—Modern South Asia Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): Upper division standing or consent of instructor. South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc. (Same course as MSA 131B, CTS 146B.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

ANT 148A—Culture & Political Economy in Contemporary China (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ANT 002 recommended. Examining contemporary Chinese culture and political economy through reading ethnographic studies on recent transformations in rural and urban Chinese society. Special attention is given to state power, popular culture, spatial mobility, city space, and gender. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 151—Primate Evolution (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 001 or BIS 002B or BIS 002C or EVE 010 recommended. Origin and relationships of the prosimians, monkeys, and apes. GE credit: SE, WE. Effective: 2016 Fall Quarter.

ANT 152—Human Evolution (5)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): ANT 001 recommended. Nature and results of the evolutionary processes involved in the formation and differentiation of humankind. GE credit: SE, WE. Effective: 2016 Fall Quarter.

ANT 153—Human Genetics: Mutation & Migration (5)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): BIS 002B C- or better or MCB 010 C- or better. Introduction to human genetics. Principles of inheritance, the human genome, population genetics, mutation, genetic diversity, using DNA to study ancient human history, personal genomics. Human genetics as a tool to understand the patterns and processes of human migration. Introduction to the major concepts in human genetic and genomic research. GE credit: SE, SL, WE. Effective: 2020 Spring Quarter.

ANT 154A—The Evolution of Primate Behavior (5)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): ANT 001 or ANT 054 or EVE 010 recommended. Examines ecological diversity and evolution of social systems of prosimians, monkeys, and apes, placing the social behavior of the primates in the context of appropriate ecological and evolutionary theory. GE credit: SE, WE. Effective: 2018 Fall Quarter.

ANT 154B—Primate Evolutionary Ecology (5)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s); Term Paper. Prerequisite(s): ANT 001 or EVE 010 recommended. Examination of the ecology of primates within an evolutionary framework. Theoretical concepts in individual, population, and community ecology, illustrated with primate (and other vertebrate) examples, with additional discussion of primate and rainforest conservation. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

ANT 154C—Primate Behavior: Methods & Experimental Design (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): (ANT 054 or ANT 154A or ANT 154B or NPB 102); (STA 013 or STA 013Y or STA 032 or STA 100 or SOC 046B); ANT 154CL (can be concurrent). Pass One restricted to upper division ANT majors; concurrent enrollment in ANT 154CL required. Scientific methods of studying, describing and analyzing the behavior and ecology of primates. (P/NP grading only.) GE credit: QL, SE, SL. Effective: 2018 Spring Quarter.

ANT 154CL—Laboratory in Primate Behavior (4)

Laboratory—6 hour(s); Term Paper. Prerequisite(s): (ANT 054 or ANT 154A or ANT 154B or NPB 102); (STA 013 or STA 013Y or STA 032 or STA 100 or SOC 046B); ANT 154C (can be concurrent); Concurrent enrollment with ANT 154C required. Pass One restricted to upper division Anthropology majors only. Design and conduct of scientific "field studies" of the behavior of group-living primates at the California National Primate Research Center. GE credit: OL, SE, WE. Effective: 2018 Fall Quarter.

ANT 155—Primate Conservation Biology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 001 or ANT 054 recommended. Study of the taxonomic, ecological and cultural diversity of Primates and how human activities impact tropical ecosystems. Emphasis on case studies and applied research methods. Includes discussion about career opportunities in conservation. GE credit: QL, SL. Effective: 2018 Spring Quarter.

ANT 156A—Human Osteology (4)

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): ANT 001 or ANT 001Y recommended. Not open to students who have previously completed ANT 156. Human skeleton from archaeological, forensic, and paleontological perspectives, including anatomical nomenclature, variation with sex and age, function, evolution, growth, and development of bones and teeth. Hands-on study and identification of human skeletal remains. GE credit: SE. Effective: 2016 Fall Quarter.

ANT 156B—Advanced Human Osteology (4)

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): ANT 156A; Or equivalent. Human skeletons from archaeological, forensic, and paleontological contexts. Bone and tooth structure, growth, and development; measurement, statistics, and biomechanics; assessment of age, sex, weight, height, and ancestry; and indicators of illness, injuries, diet, and activities. GE credit: SE. Effective: 2009 Spring Quarter.

ANT 157—Advanced Human Genetics (2)

Lecture—2 hour(s). Prerequisite(s): ANT 153 or BIS 101 or EVE 102 or EVE 131 or EVE 175 or MCB 162 or MCB 182. Advanced concepts in human genetics and genomics. Identification of genes underlying human health and disease. Use of genomic data in clinical settings and examination of biases associated with "personalized medicine." Emphasis on current human genomic technology and critical reading of scientific papers. GE credit: SE, SL. Effective: 2020 Winter Quarter.

ANT 157L—Advanced Human Genetics Lab (4)

Discussion/Laboratory—4 hour(s). Prerequisite(s): ANT 153 or EVE 102 or EVE 131 or EVE 175 or MCB 162 or MCB 182; Concurrent enrollment in ANT 157 encouraged. Computer lab in human genetics and genomics. Emphasizes hands-on engagement with human genetic/genomic data. Ancestry analysis, pedigrees, de novo Mendelian disease. GE credit: QL, SE. Effective: 2020 Winter Quarter.

ANT 158—Evolution of Females & Males: Biological Perspective (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 001 recommended. Current theoretical frameworks for explaining the evolution of sex differences and for understanding the interrelationship between biological processes and cultural construction of gender roles. GE credit: OL, SE, WE. Effective: 2016 Fall Quarter.

ANT 160—Neandertals & Modern Human Origins (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 001 or ANT 001Y or equivalent recommended. Origins, evolution, and disappearance of Neandertals. Emergence of humans like us in both anatomy and behavior. Interpretation of the fossil and archaeological records of Europe and Africa. Genetics of living and fossil humans. GE credit: SE. Effective: 2016 Fall Quarter.

ANT 170—Archeological Theory & Method (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Introduction to history and development of archeological theory and method, with particular emphasis on the basic dependence of the latter on the former. Stress is on historical development of archaeology in the New World. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ANT 172—New World Prehistory: The First Arrivals (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Survey of data relating to the peopling of the New World. Cultural adaptation and development of early inhabitants of North and South America. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 174—European Prehistory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Survey of the prehistory of Europe from its earliest human inhabitants, to the Neandertals and first modern humans, and through early agricultural and complex societies. Analysis and interpretation of the European archaeological record for understanding human dispersals into Europe. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 175—Andean Prehistory: Archaeology of the Incas & Their Ancestors (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Prehistory of the Andean region, especially Peru, from the earliest hunting and gathering societies through the Inca. Focus on the use of archaeological data to reconstruct ancient human adaptations to the varied Andean environments. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 176—Prehistory of California & the Great Basin (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Description and analysis of the prehistoric peoples of California and the Great Basin from earliest times to European contact. GE credit: ACGH, DD, SS, WE. Effective: 2020 Winter Quarter.

ANT 177—African Prehistory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Survey of prehistory of Africa from early human ancestors, through modern human origins, and into early agricultural and complex societies and the Bantu expansion. Analysis and interpretation of the African archaeological record, incorporating human paleontology and genetics. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 178—Hunter-Gatherers (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Study and interpretation of the ancient and modern lifeway in which peoples support themselves with primitive technologies and without benefit of domesticated plants and animals. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 179—Asian Prehistory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Survey of the prehistory of Asia from the earliest human occupations to the rise of complex societies. Special focus on fossil and archeological records. GE credit: SS. Effective: 2016 Fall Quarter.

ANT 180—Zooarchaeology (4)

Lecture—2 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): ANT 001 or ANT 003 recommended. Restricted to junior or senior standing. Theories and methods for studying animal skeletal remains from archaeological sites. Identification and quantification of zooarchaeological material, cultural and natural processes affecting animal bones pre- and postburial, and use of faunal remains for determining past human diets and past environments. GE credit: SE. Effective: 2016 Fall Quarter.

ANT 181— Archaeological Field Methods (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): ANT 003. Survey of archeological field methods and techniques. Strategies for survey and site location, mapping of artifacts and features, geophysical techniques, and hand excavation and analysis of stratigraphy. GE credit: DD, SE, SL, SS. Effective: 2017 Fall Quarter.

ANT 181L—Field Course in Archeological Methods (4)

Fieldwork—5 session(s); Lecture/Discussion—5 session(s). Prerequisite(s): ANT 181; or Consent of Instructor. On-site course using archaeological methods and techniques held at a field location in the western United States, generally California or Nevada. Incorporates basic methods of archaeological survey, mapping, and excavation. GE credit: SE. Effective: 2017 Summer Special Session.

ANT 182—Archaeometry (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): ANT 003 recommended. Scientific techniques used to study the chemical and physical properties of archaeological materials. Types of anthropological questions that can be addressed with different methods. Preparation and analysis of archaeological materials. GE credit: QL, SE, VL, WE. Effective: 2016 Fall Quarter.

ANT 183—Laboratory in Archeological Analysis (4)

Lecture—2 hour(s); Laboratory—4 hour(s); Project (Term Project). Prerequisite(s): Consent of Instructor. ANT 003 recommended. Limited enrollment. Museum preparation, advanced field investigation, and guidance in preparation of museum material for publication. May be repeated for credit. GE credit: QL, SE, WE. Effective: 2019 Winter Quarter.

ANT 184—Prehistoric Technology: The Material Aspects of Prehistoric Adaptation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003 recommended. Examination of the role of lithic, ceramic, textile and wooden implements as elements in prehistoric survival and development. Emphasis is descriptive, but the significance of material resources as factors in prehistoric adaptation, settlement patterns, and culture change are discussed. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ANT 185—Lithic Analysis (4)

Lecture/Lab—4 hour(s). Prerequisite(s): ANT 003 recommended. Basic concepts of lithic analysis. General introduction on the place of stone tool technology in the archeological record. Physics, terminology and methodological concepts behind the study of stone tools. Review of the development of stone tool technology from its emergence. GE credit: SS. Effective: 2016 Fall Quarter.

ANT 186A—Museum Studies: Analysis of Native American Basketry (4)

Lecture/Lab—3 hour(s); Discussion/Laboratory—1 hour(s). Limited to 25 students. Study of ethnographic and prehistoric basketry from North America, especially California and Oregon, in a multidisciplinary anthropological context. Techniques for basketry attribution and textile analysis. GE credit: ACGH, AH, DD, OL, SS, VL, WE. Effective: 2015 Fall Quarter.

ANT 187—Cultural Resource Management in Archaeology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 003; or Consent of Instructor. ANT 170 recommended. Examination of legal foundations and goals of cultural resource management in the United States, with a focus on archaeological resources. Review of state and federal regulations, guidelines for assessing eligibility for listing in the National Register of Historic Places, professional practices to preserve and mitigate damage to resources, and public outreach practices. GE credit: ACGH, SS, WE. Effective: 2019 Fall Quarter.

ANT 191—Topics in Anthropology (4)

Term Paper; Lecture/Discussion—3 hour(s). Prerequisite(s): Upper division standing. Intensive treatment of a special anthropological topic or problem. May be repeated for credit. Effective: 2017 Fall Quarter.

ANT 192—Internship in Anthropology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Limited to Anthropology majors. Work experience off and on campus in all subject areas offered in the Department of Anthropology under the supervision of a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

ANT 194H—Special Study for Honors Students (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Open only to majors of senior standing who qualify for honors program. Independent study of an anthropological problem involving the writing of an honors thesis. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: WE. Effective: 1997 Winter Quarter.

ANT 197T—Tutoring in Anthropology (1-5)

Tutorial—1-5 hour(s). Prerequisite(s): Upper division standing with major in Anthropology and consent of Department Chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANT 198—Directed Group Study (1-5)

Discussion—3 hour(s). Prerequisite(s): Consent of Instructor. Directed reading and group discussion of selected anthropological problems. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANT 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANT 200—History of Anthropology (4)

Lecture/Discussion—2 hour(s); Term Paper. Historical development of socio-cultural theory within anthropology, from mid-19th to mid-20th centuries. Focus on original theory texts in context of historical developments in the field as a whole. Effective: 2007 Fall Quarter.

ANT 201—Critical Readings in Ethnography (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate student in Anthropology or consent of instructor. Critical readings of selected ethnographies that examine a wide range of important topics and analytical issues in social and cultural anthropology. Emphasis on how and why ethnographic writing has changed over time and its relationship with contemporary theoretical explorations. Effective: 2005 Spring Quarter.

ANT 202—History & Theory of Biological Anthropology (4)

Seminar—3 hour(s); Term Paper. History of thought in biological anthropology and analysis of major theoretical problems in the field. Suggested for all first-year graduate students lacking intensive preparation in biological anthropology. Effective: 1997 Winter Quarter.

ANT 203—History & Theory of Archaeology (4)

Seminar—3 hour(s); Term Paper. Generally restricted to graduate students; outstanding undergraduates with extensive training in archaeology with consent of instructor. History of archaeology and archaeological theory and analysis of archaeological research methodology. Effective: 2005 Fall Quarter.

ANT 204—Contemporary Issues in Anthropological Theory (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 002; ANT 137; or Consent of Instructor. Advanced consideration of fundamental issues in anthropological theory. Emphasis on critical examination of major contemporary debates between proponents of competing theories. Effective: 1997 Winter Quarter.

ANT 205—History & Theory in Anthropological Linguistics (4)

Seminar—3 hour(s); Term Paper. History of thought in anthropological linguistics. Consideration of the historical development of fundamental ideas in anthropological linguistics, of major theoretical issues, and of research methodology. Effective: 1997 Winter Quarter.

ANT 206—Research Design & Method in Social Anthropology (5)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Formulation of research problems and preparation of research proposals; relationships between theory and method, funding, pre-fieldwork preparations, entering the community, field research techniques, and problems of ethics; intensive work on proposal writing. May be repeated up to 1 time(s). Effective: 1997 Winter Quarter.

ANT 207—Ethnographic Writing (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 137; ANT 201; Or the equivalent. Relationship between conducting participant observation of others and writing it up, emphasizing the processual rift between the reality of fieldwork and its written representation. Study of various literary genres and textual strategies used in cultural anthropology. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 210—Aspects of Culture Structure (4)

Seminar—3 hour(s); Term Paper. Analysis of various phases of culture, such as religion, economics, law, and folklore. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ANT 212—Political Ecology (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Interdisciplinary seminar evaluating contributions from ecological anthropology, political economy, cultural constructivism, postmodernism, and feminism towards development of theories of political ecology. Historical relationships between local/global power structures, environmental degradation, and resistance movements. Case studies of desertification, deforestation, mining, conservation, development. Effective: 1999 Spring Quarter.

ANT 216—Problems in Archeological Method (4)

Seminar—3 hour(s); Term Paper. Techniques for analyzing archeological data; application to various prehistoric cultures. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

ANT 217—Quantitative Modeling in Archaeology (4)

Lecture/Discussion—3 hour(s); Term Paper. Examination of the nature of archaeological data with a focus on the quantitative and statistical techniques available to model, analyze, display, and make sense of such data. Effective: 2007 Fall Quarter.

ANT 218—Topics in New World Prehistory (4)

Seminar—3 hour(s); Term Paper. Advanced study on current problems in New World Prehistory and archaeology. May be repeated for credit only when material is unique for that student and with consent of instructor. Effective: 2008 Fall Quarter.

ANT 219—Topics in Old World Prehistory (4)

Seminar—3 hour(s); Term Paper. Advanced study on current problems in Old World prehistory and archaeology. May be repeated for credit only when material is unique for that student and with consent of instructor. Effective: 2008 Fall Quarter.

ANT 220—Field Course in Linguistics (4)

Seminar—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): ANT 110; ANT 111. Techniques of eliciting, recording, and analyzing; work with a native speaker. Effective: 1997 Winter Quarter.

ANT 221—Rural Transformation in Postcolonial Societies (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 223; ANT 265; or Consent of Instructor. Problems of rural transformation arising out of political and economic interaction between national elites and rural regional and local populations under varying conditions of induced change in postcolonial societies. Attention given to the implications of this interaction for rapid economic growth. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 222—Cities & Citizenship (4)

Seminar—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Explores the nature of modern cities, urban socioeconomic life, and urban culture and politics from an anthropological perspective. Effective: 2000 Fall Quarter.

ANT 223—Economic Anthropology (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 122; or Consent of Instructor. Selected current methodological and theoretical problems in the analysis of nonindustrial economic systems. Effective: 1997 Winter Quarter.

ANT 224—Problems in Comparative Religion (4)

Seminar—3 hour(s); Term Paper. Advanced study of current problems in the anthropological study of religion. Effective: 1997 Winter Quarter.

ANT 225—State & Nation in the Modern World (4)

Seminar—3 hour(s); Term Paper. A presentation of current anthropological theories of the origins and nature of the modern nation-state in both the First and Third Worlds, with special reference to state ideology (nationalism) and forms of control. Effective: 1997 Winter Quarter.

ANT 226—Consciousness & Resistance (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Completion of first-year graduate work or consent of instructor. Consideration of approaches to the study of social inequality, and responses of subordinated groups. Emphasis on situating approaches to contemporary social theory, concrete research problems, and political strategies. Topics: formation of consciousness and identity; collective action, accommodation to frontal resistance. Effective: 1997 Winter Quarter.

ANT 228—Culture & Power (4)

Seminar—3 hour(s); Extensive Writing. Prerequisite(s): Graduate standing or consent of instructor. Exploration of one of the core paradigms within contemporary anthropological inquiry, "culture and power." Focus on how distinct theoretical perspectives—Marxism, post-Marxism, structuralism, post-structuralism, and feminism—have examined the mutually constitutive nature of culture and power. Effective: 1999 Fall Quarter.

ANT 229—Gender, Identity, & Self (4)

Seminar—3 hour(s); Term Paper—1 hour(s). Intersections of gender, identity, and selfhood cross-culturally and historically. How the self is feminized and masculinized, and interfaces with sexual, race, class, work, national, minority, and majority identities under different historical, cultural, and social structural conditions. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 230—Family Systems & Reproduction: Theory & Comparisons (4)

Lecture—1.5 hour(s); Seminar—1.5 hour(s); Term Paper. Prerequisite(s): Graduate standing in one of the social sciences including History. Comparative examination of family systems in historical context and of reproductive behaviors and strategizing. A major theme is how family-system norms specify the relative desirability of differently configured offspring sets. Cases are drawn from Western Europe and South and East Asia. Effective: 1997 Winter Quarter.

ANT 232—Political Movements (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Completion of first-year graduate work recommended. Interdisciplinary approach to political movements of protest, reform, and revolution emphasizing historical comparison and evaluation of major theoretical approaches including world systems, resource mobilization, state & culture, rational choice, moral economy, social class and gender. Effective: 1997 Winter Quarter.

ANT 239—Problems in African Society & Culture (4)

Seminar—3 hour(s); Term Paper. Diachronic analyses of traditional institutions in sub-Saharan Africa. Effective: 1997 Winter Quarter.

ANT 241—Topics in North American Ethnology (4)

Seminar—3 hour(s); Term Paper. Advanced study on current problems in North American ethnography and culture history. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

ANT 245—Ethnology of Northern & Central Asia (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Reading knowledge of German, Russian, Chinese, or Japanese. Lectures on the culture aboriginally found north of the Caucasus-Korea line. Supervised study of the primary and secondary sources. Work with informants when available. Effective: 1997 Winter Quarter.

ANT 246—Ethnology of Europe (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Reading knowledge of a European language other than English. Supervised study of the primary and secondary sources dealing with the ethnography and ethnology of the peoples of Europe. Emphasis upon folk, peasant, and minority groups. Effective: 1997 Winter Quarter.

ANT 248—Topics in Chinese Culture & Society (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing in the social sciences, history, or the humanities. Selected topics in the anthropology of Chinese society. Focus on one or more of the following topics: state-society dynamics, family and gender, city formation and urban life, social movement, labor politics, and religion and ideology in Chinese society. May be repeated for credit when topic differs. Effective: 1999 Fall Quarter.

ANT 250—Behavioral Ecology of Primates (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 154A (can be concurrent); Or the equivalent, graduate standing. Concepts, issues, and hypotheses in primate behavioral ecology, with emphasis on the social and ecological determinants and consequences of variation in social organization for individuals. Effective: 2003 Fall Quarter.

ANT 252—Human Evolution Seminar (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 152; and Consent of Instructor. Or the equivalent of ANT 152. Study of selected topics in human evolutionary studies. Each year, focuses on one or more of the following: molecular evolution, primate evolutionary biology, Tertiary hominoids, Australopithecus, Homo erectus, archaic Homo sapiens, brain evolution. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 253—Seminar in Human Biology (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 153; ANT 157; or Consent of Instructor. Study of selected topics in human biology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ANT 254—Current Issues in Primate Sociobiology (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 154B; Or the equivalent. Analysis of primate behavior, with particular emphasis on preparation for field studies. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ANT 256—Primate Conservation Biology (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ANT 154; Graduate standing, or upper division undergraduates with consent of instructor. Limited to 10 students. Application of understanding of primate biology to conservation of primates and their habitat. Topics include evolutionary anthropology, behavioral ecology, biogeography, macroecology, population biology, and socio-ecology of primates. May be repeated up to 1 time(s) when term paper differs. (S/U grading only.) Effective: 2003 Spring Quarter.

ANT 261—Modeling the evolution of social behavior (4)

Lecture—3 hour(s); Extensive Problem Solving. Prerequisite(s): MAT 016C; or Consent of Instructor. Or equivalent of MAT 016C. Tools and topics in modeling the evolution of social behavior in humans and other animals. Game theory, basic population genetics, animal conflict, altruism, reciprocity, signaling, and group selection. Effective: 2003 Spring Quarter.

ANT 262—Evolution & Human Behavior (4)

Discussion—3 hour(s); Term Paper. Prerequisite(s): Graduate standing, or consent of instructor. Exploration of the links between behavioral ecological theory and human cultural variation, focusing on reproduction, marriage, parental investment and family structure; implications of evolutionary theory for social organization in human communities, historical and contemporary. Effective: 2005 Spring Quarter.

ANT 263—Human Applications of Foraging Theory (4)

Discussion—3 hour(s); Laboratory—3 hour(s). Foraging theory models and their use in ethnographic and archaeological analyses of human behavior, with a focus on hunter-gatherers and resource selection, patch use, population and habitat, central places, sharing, stochastic processes, population dynamics, and conservation behavior. Not open for credit to students who have completed ANT 258. Effective: 2004 Fall Quarter.

ANT 265—Language, Performance, & Power (4)

Seminar—3 hour(s); Term Paper. Restricted to graduate standing or consent of instructor. Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as LIN 265.) Effective: 2003 Fall Quarter.

ANT 270—Anthropology Colloquium Seminar (1)

Seminar—1 hour(s). Reports and discussions of recent advances in the four subfields of anthropology. Presented by guest speakers. May be repeated up to 2 time(s). (S/U grading only.) Effective: 1997 Winter Quarter.

ANT 280—Current Anthropology Journal Editorial Workshop (4)

Workshop—1 hour(s); Independent Study—3 hour(s). Prerequisite(s): Consent of Instructor. Students must enroll for all three quarters. Reading and offering workshop critiques of manuscripts submitted for publication, and reading and discussion of other relevant work in anthropology and human ecology. Track and edit published comments and authors' replies that accompany major features. Participation in the development of new sections for the electronic edition of the journal, including a "news and views" section and a debate section. May be repeated up to 12 unit(s) with consent of instructor. (Same course as ECL 280.) (S/U grading only.) Effective: 2000 Fall Quarter.

ANT 291—Advanced Topics in Human Behavioral Ecology (4)

Discussion—3 hour(s); Term Paper. Prerequisite(s): ANT 261 or ANT 262 or ANT 263; and Consent of Instructor. Or comparable experience in anthropology or related disciplines. Topically focused, critical discussion of current and emerging research in the field of human behavioral ecology, giving special attention to theory, concepts, models, and methods for the evolutionary analysis of ethnographic and archaeological evidence. May be repeated up to 1 time(s) when topic differs & material covered is substantially different. Effective: 2004 Fall Quarter.

ANT 292—Seminar in Linguistic Anthropology (4)

Seminar—3 hour(s); Term Paper—1 hour(s). Selected topics in linguistic anthropology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ANT 298—Group Study (1-4)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ANT 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ANT 299D—Dissertation Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ANT 390—Teaching Anthropology (4)

Seminar—3 hour(s); Practice—1 hour(s). Prerequisite(s): Graduate standing in Anthropology or closely related discipline. Intellectual and practical elements of college teaching in the field of Anthropology, from curriculum design and the syllabus through grading and course evaluations, including classroom and information technology methods, and problems and rewards of teaching in higher education. Effective: 2004 Fall Quarter.

ANT 396—Teaching Assistant Training Practicum (1-4)

Variable—3-36 hour(s). Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

APC—Anatomy, Physiology & Cell Biology

Courses in APC:**APC 092—Internship (1-12)**

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology & Cell Biology. Internships are supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2007 Winter Quarter.

APC 099—Special Study for Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2007 Winter Quarter.

APC 100—Comparative Vertebrate Organology (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002A, BIS 002B). Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as NPB 123.) Effective: 2015 Fall Quarter.

APC 192—Internship (1-15)

Internship—3-45 hour(s). Prerequisite(s): Upper division standing; approval of internship. Internship experience off and on campus in all subject areas offered in the Department of Anatomy, Physiology & Cell Biology. Internships are supervised by a member of the faculty. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2004 Spring Quarter.

APC 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

APC 199—Special Study for Advanced Undergraduates (1-5)

Laboratory—3-15 hour(s). Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

APC 286—Basics of Microscopy & Cellular Imaging (2)

Lecture—1 hour(s); Laboratory—2 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Limited to 20 students. Practical applications of basic microscope techniques used to image cells and tissues with the goal of using these techniques to generate publication quality images. Principles of light, epifluorescent, confocal and electron microscopy, their applications and limitations. Effective: 2005 Spring Quarter.

APC 290—Seminar (1)

Seminar—1 hour(s). Discussion and critical evaluation of advanced topics and current trends in research. (P/NP grading only.) Effective: 1997 Winter Quarter.

APC 291—Topics in Biology of Respiratory System (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Topics concerning structure and function of respiratory system. Possible topics include: lung growth, pulmonary reaction to toxicants, pulmonary inflammation, lung metabolism, biology of lung cells, tracheobronchial epithelium, nasal cavity structure and function. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

APC 298—Group Study (1-5)

Laboratory—6-15 hour(s). Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

APC 299—Research (1-12)

Laboratory—6-36 hour(s). Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ARB—Arabic

Courses in ARB:

ARB 001—Elementary Arabic 1 (5)

Lecture/Discussion—5 hour(s). Introduction to basic Arabic. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including the alphabet and basic syntax. Focus on standard Arabic with basic skills in spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 001A—Accelerated Intensive Elementary Arabic (15)

Lecture/Discussion—15 hour(s). Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 001, 002, and 003. Introduction to Modern Standard Arabic through development of all language skills in a cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed ARB 001, ARB 002, or ARB 003. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 002—Elementary Arabic 2 (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): ARB 001; or Consent of Instructor. Continuation of basic Arabic from ARB 001. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic and limited use of spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 003—Elementary Arabic 3 (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): ARB 002; or Consent of Instructor. Continuation of introduction to basic Arabic from ARB 001 and ARB 002. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic with limited use of spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 021—Intermediate Arabic 21 (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ARB 003; or Consent of Instructor. Builds on courses ARB 001, ARB 002, and ARB 003. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 021A—Accelerated Intensive Intermediate Arabic (15)

Lecture/Discussion—15 hour(s). Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 021, ARB 022, and ARB 023. Modern Standard Arabic through development of all language skills in a cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed ARB 021, ARB 022, or ARB 023. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 021C—Colloquial Egyptian Arabic (4)

Lecture/Discussion—3 hour(s); Lecture/Lab—1 hour(s). Prerequisite(s): ARB 003; or Consent of Instructor. Continuation of the Colloquial Egyptian Arabic covered in the first year of Arabic; ARB 001, ARB 002, and ARB 003. May be repeated up to 1 time(s) when instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 021L—Colloquial Levantine Arabic (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ARB 003; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in ARB 001, ARB 002 and ARB 003. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic, with reading and writing in Modern Standard Arabic that is related to Levantine cultural production and social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 022—Intermediate Arabic 22 (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ARB 021; or Consent of Instructor. Continuation of ARB 021. Interactive and integrated presentation of listening, speaking, reading, and writing, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 022C—Colloquial Egyptian Arabic (4)

Lecture/Discussion—3 hour(s); Lecture/Lab—1 hour(s). Prerequisite(s): ARB 021C; or Consent of Instructor. Continuation of the Colloquial Egyptian Arabic covered in first year of Arabic; courses ARB 001, ARB 002, and ARB 003 and the first quarter of Colloquial Arabic ARB 021C. May be repeated up to 1 time(s) when instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 022L—Colloquial Levantine Arabic (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ARB 021L; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in ARB 021L. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic; reading and writing in Modern Standard Arabic related to Levantine social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 023—Intermediate Arabic 23 (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ARB 022; or Consent of Instructor. Continuation of ARB 021 and ARB 022. Interactive and integrated presentation of Arabic listening, speaking, reading, and writing skills, including idiomatic expression. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 023C—Colloquial Egyptian Arabic (4)

Lecture/Discussion—3 hour(s); Lecture/Lab—1 hour(s). Prerequisite(s): ARB 022C; or Consent of Instructor. Continuation of Colloquial Egyptian Arabic covered in ARB 022C. May be repeated up to 1 time(s) when instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 023L—Colloquial Levantine Arabic (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ARB 022L; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in ARB 022L. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic; reading and writing in Modern Standard Arabic related to Levantine social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 098—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

ARB 099—Special Study for Undergraduates (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

ARB 101A—Readings in Arabic: 600-1850 (4)

Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ARB 123; or Consent of Instructor. Readings in Arabic. Poetry, prose literature, and selections from texts on religion, history, politics, science, philosophy and mysticism. May be repeated up to 1 time(s) when instructor decides there is benefit from additional practice working on the different selections from the same texts or if 50% or more of the texts are different. GE credit: AH, OL, SS, WC, WE. Effective: 2018 Fall Quarter.

ARB 121—Advanced Arabic (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ARB 023; or Consent of Instructor. Review, refinement, and development of skills learned in intermediate Arabic through work with texts, video, and audio on cultural and social issues. Integrated approach to reading, writing, listening, speaking primarily standard Arabic, with limited use of one colloquial dialect. May be repeated up to 2 time(s) when based on different readings. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 122—Advanced Arabic (4)

Lecture/Discussion—3 hour(s). Prerequisite(s): ARB 121; or Consent of Instructor. Continuation of ARB 121. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 123—Advanced Arabic (4)

Lecture/Discussion—3 hour(s). Prerequisite(s): ARB 122; or Consent of Instructor. Continuation of ARB 122. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 140—A Story for a Life: The Arabian Nights (4)

Lecture/Discussion—3 hour(s); Term Paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as COM 172, MSA 121C.) GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.

ARB 141—Readings in Modern Arabic Literature (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ARB 123; or Consent of Instructor. Readings of modern Arabic poetry and fiction in original format, assisted by instructor-prepared glossaries and other supplementary material. Readings to be followed by class discussion and short writing assignments in Arabic. Open to students at advanced proficiency in Arabic. May be repeated up to 1 time(s) if reading material changes. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 198—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Development of reading, writing, speaking, and listening skills in advanced Arabic. Materials may include al-Kitaab Part Two or Three, news articles and broadcasts, short stories, poetry, novels, essays, scripture, prophetic traditions, audio recordings, and television and film. May be repeated up to 4 time(s) when content differs. Effective: 2018 Fall Quarter.

ARB 297—Directed Independent Study (4)

Discussion—1 hour(s); Independent Study. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Directed Independent Study on a topic culminating in a term paper. Independent Study may only be arranged with consent of the instructor when graduate seminars are unavailable. Topic varies by instructor. May be repeated up to 5 time(s) when no graduate seminars are available and topic differs. Effective: 2018 Fall Quarter.

ARB 299—Individual Study (1-12)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Restricted to graduate students. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

ARB 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Restricted to graduate students. May be repeated up to 18 time(s). (S/U grading only.) Effective: 2018 Fall Quarter.

ARE—Agricultural & Resource Economics

Courses in ARE:

ARE 001—Economic Basis of the Agricultural Industry (4)

Lecture—4 hour(s). Agriculture and man; the agricultural industry in U.S. and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing California. GE credit: SS. Effective: 1997 Winter Quarter.

ARE 001S—Economic Basis of the Agricultural Industry (4)

Lecture—4 hour(s). Agriculture and man; the agricultural industry in Australia and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing Australia. May be taught abroad in Australia under the supervision of a UC Davis faculty member. Not open for credit to students who have taken ARE 001. GE credit: SS, WC. Effective: 2004 Fall Quarter.

ARE 015—Population, Environment & World Agriculture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Economic analysis of interactions among population, environment, natural resources and development of world agriculture. Introduces students to economic thinking about population growth, its causes and consequences for world food demand, and environmental and technological limits to increasing food supplies. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

ARE 018—Business Law (4)

Lecture—4 hour(s). Prerequisite(s): Sophomore standing. General principles of business law in the areas of contracts, business organization, real property, uniform commercial code, sales, commercial paper, employment relations, and creditor-debtor against a background of the history and functioning of our present legal system. GE credit: SS. Effective: 1997 Winter Quarter.

ARE 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division students. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 099—Special Study for Undergraduates (1-5)

Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 100A—Intermediate Microeconomics: Theory of Production & Consumption (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ((ECN 001A C- or better or ECN 001AV C- or better); ECN 001B C- or better); ((MAT 016A C- or better, MAT 016B C- or better, MAT 016C C- or better) or (MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better)). Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM), and Textiles and Clothing (ATXC) Majors and Agricultural and Resource Economics (GARE), International Agricultural Development (GIAD), Viticulture and Enology (GVEN) and Transportation Technology and Policy (GTTP) Graduate Majors. Theory of individual consumer and market demand; theory of production and supply of agricultural products, with particular reference to the individual firm; price determination, and employment of resources under pure competition. Not open for credit to students who have completed ECN 100. GE credit: QL, SS. Effective: 2018 Winter Quarter.

ARE 100B—Intermediate Microeconomics: Imperfect Competition, Markets & Welfare Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; ((ECN 001A C- or better or ECN 001AV C- or better); ECN 001B C- or better); ((MAT 016A C- or better, MAT 016B C- or better, MAT 016C C- or better) or (MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better)). Pass One open to Managerial Economics Majors (AMGE) and Agricultural & Resource Economics (GARE) Graduate Majors. Price determination, and employment of resources under conditions of monopoly, oligopoly, and monopolistic competition. GE credit: QL, SS. Effective: 2018 Summer Session 1.

ARE 106—Econometric Theory & Applications (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better. Pass One open to Managerial Economics Majors (AMGE) and Agricultural & Resource Economics (GARE) Graduate Majors. Statistical methods for analyzing data to solve problems in managerial economics. Topics include the linear regression model, methods to resolve data problems, and the economic interpretation of results. Not open for credit to students who have enrolled in or completed ECN 140. GE credit: QL, SS. Effective: 2018 Summer Session 1.

ARE 107—Econometrics for Business Decisions (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; ARE 106 C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better. Pass One open to Managerial Economics majors; Pass Two open to majors in the College of Agricultural & Environmental Sciences. Covers state-of-the art econometric and statistical methods for causal and predictive modeling with applications to finance and marketing. GE credit: SS. Effective: 2020 Winter Quarter.

ARE 112—Fundamentals of Organization Management (4)

Lecture—4 hour(s). Prerequisite(s): Upper division standing recommended. Pass One restricted to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Role of organizational design and behavior in business and public agencies. Principles of planning, decision making, individual behavior, management, leadership, informal groups, conflict and change in the organization. May be taught abroad. GE credit: SS. Effective: 2018 Summer Session 1.

ARE 113—Fundamentals of Marketing Management (4)

Lecture—4 hour(s). Prerequisite(s): ECN 001A or ECN 001AV; For non-majors only. Nature of product marketing by the business firm. Customer-product relationships, pricing and demand; new product development and marketing strategy; promotion and advertising; product life cycles; the distribution system; manufacturing, wholesaling, retailing. Government regulation and restraints. Not open for credit to students who have completed ARE 136. GE credit: SS. Effective: 2018 Winter Quarter.

ARE 115A—Economic Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Major issues encountered in emerging from international poverty, problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization. (Same course as ECN 115A.) GE credit: SS, WC. Effective: 2018 Winter Quarter.

ARE 115B—Economic Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. (Same course as ECN 115B.) GE credit: SS, WC. Effective: 2018 Spring Quarter.

ARE 115BY—Economic Development (4)

Lecture—1.5 hour(s); Web Virtual Lecture—1.5 hour(s); Term Paper. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Pass One open to Economics, Managerial Economics, and International Relations Majors. Macroeconomic issues of developing countries. Problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Issues of policy concerning international borrowing and external debt of developing countries. (Same course as ECN 115BY.) GE credit: SS, WC. Effective: 2020 Fall Quarter.

ARE 118—Tax Accounting (4)

Lecture—4 hour(s). Prerequisite(s): MGT 011A; MGT 011B; ARE 018 recommended. Development and application of a framework to understand the tax effects of typical management decisions on both entities and their owners. Impacts that different methods of taxation have on business entities with emphasis on tax planning, using income and deduction strategies, retirement plans, and choice of business entity for tax minimization. Effective: 2000 Spring Quarter.

ARE 119—Intermediate Managerial Accounting (4)

Lecture—4 hour(s); Extensive Problem Solving—8 hour(s). Prerequisite(s): MGT 011A; MGT 011B. Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Use of accounting information by managers in decision making, planning, directing and controlling operations. Focuses on managerial/cost accounting theory and practice. Covers costing systems, budgeting, and financial statement analysis. GE credit: SS. Effective: 2016 Fall Quarter.

ARE 120—Agricultural Policy (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better. Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Analytical treatment of historical and current economic problems and governmental policies influencing American agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of American agriculture. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 120S—Agricultural Policy (4)

Lecture—4 hour(s). Prerequisite(s): ARE 100A; or Consent of Instructor. Analytical treatment of historical and current economic problems and governmental policies influencing agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of agriculture. May be taught abroad in Australia under the supervision of a UC Davis faculty member. Not open for credit to students who have taken ARE 120. GE credit: SS, WC. Effective: 2004 Fall Quarter.

ARE 121—Economics of Agricultural Sustainability (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 001A C- or better or ECN 001AV C- or better. Pass One open to Majors in the College of Agricultural & Environmental Sciences and Graduate Majors. Application of economic concepts to agro-environmental issues relevant to agricultural sustainability. Topics include market efficiency, production externalities, government policies, agricultural trade, product differentiation, all linked to sustainability issues. Case studies include biofuels, genetically modified foods and geographically differentiated products. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 130—Agricultural Markets (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 106 C- or better; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better. Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Nature, function, organizational structure, and operation of agricultural markets; prices, costs, and margins; market information, regulation, and controls; cooperative marketing. GE credit: SS. Effective: 2020 Winter Quarter.

ARE 132—Cooperative Business Enterprises (4)

Lecture—4 hour(s). Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); (UWP 104A or UWP 104AY or UWP 101). Pass One open to Managerial Economics (AMGE) and Animal Science & Management Majors (AANM) and Agricultural & Resource Economics (GARE) Graduate Majors. Study of cooperative business enterprise in the United States and elsewhere; economic theories of behavior, principles of operation, finance, decision-making, and taxation. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 133—Introduction to Behavioral Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); (STA 013 C- or better or STA 013Y C- or better). Pass One open to Managerial Economics majors. Inclusion of non-economic factors such as psychological principles in economic decisions and model predictions. Emphasis on behavioral principles, resulting strategies and implications for diverse market settings. Effective: 2018 Fall Quarter.

ARE 135—Agribusiness Marketing Plan Development (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Upper division standing. Fundamental components required to develop a marketing plan. Appreciation of the concept of marketing plans, appropriate research required, including the use of library, Internet, survey and interview instruments, government documents, market analysis, business proposition, action planning, financial evaluation and monitoring. (P/NP grading only.) GE credit: SS. Effective: 1999 Fall Quarter.

ARE 136—Managerial Marketing (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100B C- or better; ARE 106 C- or better; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better. Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Application of economic theory and econometrics to the study of marketing and consumer research. Emphasis on industry structure, history, regulatory aspects, integrated brand promotion, market segmentation, optimal product mix, message placement. GE credit: SS. Effective: 2020 Winter Quarter.

ARE 138—International Commodity & Resource Markets (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; ARE 100B C- or better. Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Basic nature and scope of international trade in agricultural commodities, agricultural inputs, and natural resources. Market dimensions and policy institutions. Case studies to illustrate import and export problems associated with different regions and commodities. GE credit: SS. Effective: 2019 Fall Quarter.

ARE 139—Futures & Options Markets (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better. Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. History, mechanics, and economic functions of futures and options markets; hedging; theory of inter-temporal price formation and behavior of futures and options prices; price forecasting; futures and options as policy tools. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 140—Farm Management (4)

Lecture—4 hour(s). Prerequisite(s): ECN 001A C- or better or ECN 001AV C- or better. Pass One open to Managerial Economics majors. Farm organization and resources; economic and technological principles in decision making; analytical techniques and management control; problems in organizing and managing the farm business. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 142—Personal Finance (3)

Lecture—3 hour(s). Prerequisite(s): ECN 001B. Management of income and expenditures by the household. Use of consumer credit, savings, and insurance by households. Principles of tax, retirement, and estate planning. GE credit: SS. Effective: 1997 Winter Quarter.

ARE 143—Investments (4)

Lecture—4 hour(s). Pass One open to upper division Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Survey of investment institutions, sources of investment information, and portfolio theory. Analysis of the stock, bond and real estate markets from the perspective of the investor. Not open for credit to students concurrently enrolled in or have completed ARE 171 or ARE 171A. GE credit: SS. Effective: 2019 Winter Quarter.

ARE 144—Real Estate Economics (4)

Lecture—4 hour(s). Prerequisite(s): ARE 100A C- or better. Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Economic theory, analysis, and institutions of real estate markets and related financial markets. Techniques for appraising property values. Cases drawn from the raw land, single family, multifamily, industrial and office real estate markets. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 145—Farm & Rural Resources Appraisal (4)

Lecture/Discussion—4 hour(s). Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Principles and procedures of the valuation process with emphasis placed on rural real estate. Includes identification of the major physical and economic determinants of value, the three primary appraisal approaches to valuation, discussion of appraisal activity and practice. GE credit: SS. Effective: 2016 Fall Quarter.

ARE 146—Business, Government Regulation, & Society (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; ARE 100B C- or better. Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Variety, nature and impact of government regulation: anti-trust laws and economic and social regulation. Nature of the legislative process, promulgation of regulations, and their impact, especially as analyzed by economists. GE credit: ACGH, SS. Effective: 2019 Fall Quarter.

ARE 147—Resource & Environment Policy Analysis (3)

Lecture—3 hour(s). Prerequisite(s): ECN 001A or ECN 001AV. Open to non-majors only. Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. Students who have had or are taking ARE 100A, ECN 100, or the equivalent, may receive only 2 units of credit, so must enroll in ARE 147M instead. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 147M—Resource & Environmental Policy Analysis (2)

Lecture—3 hour(s). Prerequisite(s): ECN 001A or ECN 001AV. Open to non-majors only. Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. Students who have had or are taking ARE 100A, ECN 100, or the equivalent, must enroll in this course for 2 units rather than ARE 147. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 150—Agricultural Labor (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Analysis of labor markets with focus on U.S. and world agriculture. Labor supply, demand, market equilibrium; why farm labor markets are different; global trends in farm labor; U.S. farm labor history; unions and collective bargaining; immigration policy. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 155—Operations Research & Management Science (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better. Pass One open to Managerial Economics (AMGE) and Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Introduction to quantitative methods used to analyze business and economic processes: decision analysis for management, mathematical programming, competitive analysis, and other methods. GE credit: QL, SS. Effective: 2018 Summer Session 1.

ARE 156—Introduction to Mathematical Economics (4)

Lecture—4 hour(s). Prerequisite(s): ARE 100B; ARE 155; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better. Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Linear algebra for economists; necessary and sufficient conditions in static optimization problems; implicit function theorem; economic methodology and mathematics; comparative statics; envelope theorem; Le Chatelier principle; applications to production and consumer models. GE credit: QL, SS. Effective: 2018 Fall Quarter.

ARE 157—Analysis for Operations & Production Management (4)

Lecture—4 hour(s). Prerequisite(s): ARE 155; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better. Pass One open to Managerial Economics (AMGE), Animal Science & Management (AANM) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Application of economic theory and quantitative methods to analyze operations and production management problems including process strategy, quality management, location and plant layout, and inventory management. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 165—Emerging Economies & Globalization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; ARE 115A; ARE 115B; Completion of ARE 106 & ECN 162 strongly recommended. Pass One open to Managerial Economics and graduate majors. Economic drivers and policy challenges in the major emerging markets, with an emphasis on the effects of rising incomes, population growth, urbanization, and relative wages on world markets and natural resources. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 166—Economics of Global Poverty Reduction: What Works & Why (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ARE 100B or ECN 100 or ECN 100B); (ARE 106 or ECN 140); (ARE 115A or ECN 115A). Pass One open to Managerial Economics (AMGE) and Economics (LECN) majors only. Application of microeconomic theory and econometrics to understand causes of poverty and critically evaluate poverty alleviation policies in low income countries. Effective: 2018 Fall Quarter.

ARE 171—Principles of Finance (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better; ARE 106 C- or better; MGT 011A; MGT 011B. Pass One open to Managerial Economics Majors and Agricultural & Resource Economics Graduate Majors. Principles of corporate financial management. Time value of money, interest rates, principles of valuation, NPV, risk and return, and cost of capital. Not open for credit to students who have completed ECN 134. Effective: 2020 Winter Quarter.

ARE 172—Financial Management of the Firm (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ARE 171A or ARE 171); ARE 106 C- or better; ARE 100A C- or better; MGT 011A; MGT 011B. Pass One open to Managerial Economics Majors and Agricultural & Resource Economics Graduate Majors. Financial analysis at the firm level: optimizing capital structure; minimizing the cost of capital; dividend policies; mergers and acquisitions; real options; and risk management. Effective: 2020 Winter Quarter.

ARE 173—Capital Markets (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ARE 171A or ARE 171); ARE 106 C- or better; ARE 100A C- or better; MGT 011A; MGT 011B. Pass One open to Managerial Economics majors and Agricultural & Resource Economics Graduate Majors. Introduction to asset pricing. Valuation and risk characteristics of financial assets, including stocks, bonds, futures, and options. Investors' attitudes toward risk, capital allocation, portfolio selection, the capital asset pricing model, and the efficient market hypothesis. Effective: 2020 Winter Quarter.

ARE 175—Natural Resource Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better. Pass One open to Managerial Economics (AMGE) and Environmental Policy Analysis & Planning (AEPP) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as ESP 175.) GE credit: SS. Effective: 2018 Fall Quarter.

ARE 176—Environmental Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better. Pass One open to Managerial Economics (AMGE) Majors and Agricultural & Resource Economics (GARE) Graduate Majors. Role of the environment in economic activity and methods for protecting and enhancing environmental quality; implications of market failures for public policy; design of environmental policy; theory of welfare measurement; measuring the benefits of environmental improvement. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 190—Topics in Managerial Economics (3)

Lecture—3 hour(s). Prerequisite(s): ARE 100A; STA 103; and Consent of Instructor. Selected topics in managerial economics, focusing on current research. May be repeated up to 4 time(s) when the topic differs. GE credit: SS. Effective: 2012 Fall Quarter.

ARE 192—Internship (1-6)

Internship—3-18 hour(s). Internship experience off and on campus in all subject areas offered in the Department of Agricultural & Resource Economics. Internships are supervised by a member of the staff. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 194HA—Special Study for Honors Students (4)

Independent Study—3 hour(s); Seminar—1 hour(s). Prerequisite(s): ARE 100B; ARE 106; ARE 155 (can be concurrent); and Consent of Instructor. Minimum GPA of 3.500; major in Agricultural & Managerial Economics or Managerial Economics; senior standing. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor. GE credit: QL, SS, WE. Effective: 2000 Winter Quarter.

ARE 194HB—Special Study for Honors Students (4)

Independent Study—3 hour(s); Seminar—1 hour(s). Prerequisite(s): ARE 100B; ARE 106; ARE 155 (can be concurrent); Minimum GPA of 3.500; major in Agricultural & Managerial Economics or Managerial Economics; senior standing. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor. GE credit: QL, SS, WE. Effective: 2000 Winter Quarter.

ARE 197T—Tutoring in Managerial Economics (1-3)

Variable. Prerequisite(s): Senior standing in Managerial Economics and consent of Department Chairperson. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. (P/NP grading only.) GE credit: SS. Effective: 2012 Fall Quarter.

ARE 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study. May be taught abroad. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 200A—Microeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as ECN 200A.) Effective: 2018 Winter Quarter.

ARE 200B—Microeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 200A. Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure. (Same course as ECN 200B.) Effective: 2018 Fall Quarter.

ARE 200C—Microeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 200B. Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as ECN 200C.) Effective: 2018 Fall Quarter.

ARE 202A—Introduction to Applied Research Methods (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): ARE 204A; ARE 200A (can be concurrent); ARE 256A. Study of philosophy and methodology of applied research in agricultural economics. Methods of conceptualization of researchable topics. Method of communication and constructive criticism. Effective: 2018 Fall Quarter.

ARE 202B—Applied Microeconomics: Consumer & Producer Behavior (4)

Lecture—4 hour(s). Prerequisite(s): ARE 200A; ARE 200B (can be concurrent); ARE 202A. Application of consumer and producer theory in models of individual behavior and market-level phenomena. Implications of consumer and producer theory for specification of empirical models of supply and demand for inputs and outputs and market equilibrium displacement models. Effective: 2020 Winter Quarter.

ARE 202C—Research Design for Applied Microeconomics (4)

Lecture—4 hour(s). Prerequisite(s): ARE 202B; ARE 240A. Third of three courses in the Ph.D. level applied microeconomics sequence. Examines the design of empirical research and the application of econometric theory. Effective: 2020 Winter Quarter.

ARE 204A—Microeconomic Analysis I (4)

Lecture—4 hour(s). Prerequisite(s): ARE 100B or ECN 100; Advanced undergraduates with consent of instructor. Behavior of consumers and producers and their interactions; tools and methods needed to analyze economic behavior in the marketplace. Application of those methods to real-world problems. Effective: 2006 Fall Quarter.

ARE 204B—Microeconomic Analysis II (4)

Lecture—4 hour(s). Prerequisite(s): ARE 204A; or Consent of Instructor. Behavior in imperfectly competitive markets—monopoly and price discrimination; oligopoly. Introduction to noncooperative game theory. Analysis of decisions made under risk and uncertainty and imperfect information. The economics of externalities and public goods. Effective: 2006 Fall Quarter.

ARE 214—Development Economics (4)

Lecture—4 hour(s). Prerequisite(s): ARE 100A; ARE 100B; ECN 101; ARE 204A and ECN 160A, ECN 160B recommended. Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts. (Same course as ECN 214.) Effective: 1997 Winter Quarter.

ARE 215A—Microdevelopment Theory & Methods I (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 200A or ARE 204A; ARE 240A recommended. Agricultural development theory, with a focus on microeconomics. Agricultural household behavior with and without imperfections and uncertainty. Analysis of rural land, labor, credit and insurance markets, institutions, and contracts. (Same course as ECN 215A.) Effective: 1999 Fall Quarter.

ARE 215B—Open Macroeconomics of Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ARE 200A or ARE 204A); (ARE 214 or ARE 215A); (ARE 200D or ARE 205). Models and policy approaches regarding trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. Basic analytical focus is real exchange rate and its impact on sectoral allocation of resources. (Same course as ECN 215B.) Effective: 1997 Winter Quarter.

ARE 215C—Microdevelopment Theory & Methods II (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 215A. Extension of development theory and microeconomic methods. Agricultural growth and technological change; poverty and income inequality; multisectoral, including village and regional models. Computable general equilibrium methods and applications. (Same course as ECN 215C.) Effective: 1999 Fall Quarter.

ARE 215D—Environmental & Economic Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 200A; (ARE 204A or ARE 275). Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics. (Same course as ECN 215D.) Effective: 1998 Spring Quarter.

ARE 222—International Agricultural Trade & Policy (4)

Lecture—4 hour(s). Prerequisite(s): (ARE 100B or ARE 204A); ECN 160A; Or the equivalent of ECN 160A. Analysis of country interdependence through world agricultural markets. Partial equilibrium analysis is used to study the impacts of national intervention on world markets, national policy choice in an open economy and multinational policy issues. Effective: 2014 Fall Quarter.

ARE 223—Economics of Agriculture (4)

Lecture—4 hour(s). Prerequisite(s): ARE 204A (can be concurrent); ARE 256A (can be concurrent); Or equivalent course(s) completed or concurrent required. Open to M.S. students in Agricultural & Resource Economics; Ph.D. students in Agricultural & Resource Economics and qualified students from other UC Davis graduate groups/ programs. Analytic treatment of the historical development and contemporary role of agriculture in the global, U.S. and California economies. Uses economic reasoning and evidence to develop historical and conceptual understanding of the economics of agriculture, agricultural issues, and related government policies. Effective: 2015 Fall Quarter.

ARE 231—Supply & Demand for Agricultural Products (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or Consent of Instructor. Analysis of supply and demand for agricultural commodities emphasizing the effective use of microeconomic theory with econometric methods, and other empirical procedures, in conducting applied analysis of supply and demand at the firm and industry level. Effective: 1999 Fall Quarter.

ARE 232—Agricultural Commodity Markets (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or Consent of Instructor. Economic analysis of industries that produce, market, transport, store, and process basic commodities. Analysis of market equilibrium under perfect and imperfect competition, with and without government involvement. Effective: 1999 Fall Quarter.

ARE 233—Agricultural Policy (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or Consent of Instructor. Nature, formation, evolution, and institutions of economic policy applied to food, agricultural, and rural issues. Examples for detailed consideration include food security, commodity issues, and trade policy. Analytical approaches include static and dynamic welfare analysis, policy design, and political-economic analysis. Effective: 1999 Fall Quarter.

ARE 239—Econometric Foundations (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Prepares students for econometric theory and empirical work by examining the statistical foundation of econometrics. Special attention is paid to problems specific to non-experimental data common to social sciences. Topics from matrix algebra are also covered. (Same course as ECN 239.) Effective: 2016 Fall Quarter.

ARE 240A—Econometric Methods (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 239; or Consent of Instructor. Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables. (Same course as ECN 240A.) Effective: 2017 Fall Quarter.

ARE 240B—Econometric Methods (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 240A. Topics include asymptotic theory and instrumental variables, pooled time-series cross-section estimation, seemingly unrelated regression, classical hypothesis tests, identification and estimation of simultaneous equation models, cointegration, error correction models, and qualitative and limited dependent variable models. (Same course as ECN 240B.) Effective: 2000 Spring Quarter.

ARE 240C—Time Series Econometrics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 240B; or Consent of Instructor. Probability theory; estimation, inference and forecasting of time series models; trends and non-standard asymptotic theory; vector time series methods and cointegration; time series models for higher order moments and transition data; state-space modeling; the Kalman filter. (Same course as ECN 240C.) Effective: 2016 Fall Quarter.

ARE 240D—Cross Section Econometrics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 240B; or Consent of Instructor. Estimation and inference for nonlinear regression models for cross-section data; models for discrete data and for limited dependent variables; models for panel data; additional topics such as bootstrap and semiparametric regression. (Same course as ECN 240D.) Effective: 2016 Fall Quarter.

ARE 240E—Topics in Time Series Econometrics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 240C; or Consent of Instructor. Modern econometric techniques for time series data. Expand on topics covered in ECN 240A, ECN 240B and ECN 240C. Contents vary from year to year. (Same course as ECN 240E.) Effective: 2016 Fall Quarter.

ARE 240F—Topics in Cross Section Econometrics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 240D; or Consent of Instructor. Modern econometrics techniques for cross-section data. Expand on topics covered in ECN 240A, ECN 240B and ECN 240D. Contents vary from year to year. (Same course as ECN 240F.) Effective: 2016 Fall Quarter.

ARE 252—Optimization with Economic Applications (4)

Lecture—3 hour(s); Discussion—1 hour(s). Microeconomic topics in the framework of mathematical programming. Effective: 2013 Winter Quarter.

ARE 254—Dynamic Optimization Techniques with Economic Applications (4)

Lecture—4 hour(s). Prerequisite(s): Elementary knowledge of ordinary differential equations. Necessary and sufficient conditions in the calculus of variations and optimal control, economic interpretations, the dynamic envelope theorem and transversality conditions, infinite horizon problems and phase diagrams, local stability and comparative statics of the steady state, comparative dynamics. Effective: 2018 Fall Quarter.

ARE 255—Applied Dynamic Structural Econometric Modeling (4)

Lecture—4 hour(s). Prerequisite(s): ARE 254. Covers structural econometric models of static games of incomplete information, single-agent dynamic optimization problems and multi-agent dynamic games, with a focus on applications to issues relevant to the environment, energy, natural resources, agriculture, and development. Effective: 2014 Fall Quarter.

ARE 256A—Applied Econometrics I (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 106 or ECN 140; or Consent of Instructor. First of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to topics in applied economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized. Effective: 2019 Winter Quarter.

ARE 256B—Applied Econometrics II (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 256A; or Consent of Instructor. Second of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to a variety of topics in applied economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized. Effective: 2019 Winter Quarter.

ARE 258—Demand & Market Analysis (4)

Lecture—4 hour(s). Prerequisite(s): ARE 204B; ARE 256B; or Consent of Instructor. Application of theoretical material covered in ECN 204A and ECN 204B, with particular focus on production theory/factor demand and imperfect competition/market power. Use of theoretical models as a foundation for empirical economic analysis, and empirical exercises. Independent research on chosen topics, with empirical application. Effective: 2018 Fall Quarter.

ARE 271—Financial Economics (4)

Lecture—4 hour(s). Prerequisite(s): ARE 204A; ARE 256A. Risk, aversion, choice under uncertainty. Arrow-Debreu securities. Valuation and risk characteristics of financial assets, capital allocation, portfolio selection, Capital Asset Pricing Model, efficient market hypothesis. Applications to topics in agricultural, resource and development economics. Effective: 2019 Fall Quarter.

ARE 275—Economic Analysis of Resource & Environmental Policies (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ARE 204A. Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as ESP 275.) Effective: 1999 Spring Quarter.

ARE 276A—Environmental Economics: Externalities (4)

Lecture—4 hour(s). Prerequisite(s): Students should have completed the first year graduate level sequence in microeconomics and econometrics. Introduces fundamental and recent research in environmental economics, focusing on the design, implementation and evaluation of environmental policy instruments to correct market failures. Exposure to economic theories and empirical techniques frequently used in this field. Effective: 2014 Fall Quarter.

ARE 276B—Environmental Economics: Non-Market Valuation (4)

Lecture—4 hour(s). Prerequisite(s): Students should have completed the first year graduate level sequence in microeconomics and econometrics. Second Ph.D. field course in environmental economics, covering theory and econometrics of methods for valuing non-market goods and environmental quality changes. Topics include revealed preference (travel cost, hedonics, sorting equilibrium) and stated preference (contingent valuation, choice experiments, conjoint analysis) techniques. Effective: 2014 Fall Quarter.

ARE 277—Natural Resource Economics (4)

Lecture—4 hour(s). Prerequisite(s): ARE 254; or Consent of Instructor. Application of capital theory and dynamic methods to issues of optimal use of renewable and nonrenewable resources. Examination of policy issues associated with forests, fisheries, groundwater, energy resources, watersheds, soil, global climate, and wildlife. Effective: 1999 Spring Quarter.

ARE 290—Topics in Agricultural & Resource Economics (3)

Lecture—3 hour(s). Selected topics in agricultural and resource economics, focusing on current research. May be repeated up to 4 time(s). Effective: 2002 Fall Quarter.

ARE 293—Analysis of California Agriculture & Resources (3)

Lecture—1.5 hour(s); Fieldwork—45 hour(s). Review and analysis of production, marketing, and resource issues facing agricultural firms in California. Application of economic theory and measurement to individual firm and industry decisions in an applied setting. Fieldwork-45 hours total, including one five-day summer field trip. (S/U grading only.) Effective: 1997 Winter Quarter.

ARE 298—Directed Group Study (1-5)

Variable. Advanced study through special seminars, informal group studies, or group research on problems for analysis and experimentation. Sections:(1) Managerial Economics; (2) Agricultural Policy; (3) Community & Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods & Quantitative Analysis. Effective: 1997 Winter Quarter.

ARE 299—Individual Study (1-12)

Variable. Sections: (1) Managerial Economics; (2) Agricultural Policy; (3) Community & Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods & Quantitative Analysis; and (7) Dissertation Research Prospectus. (S/U grading only.) Effective: 1997 Winter Quarter.

ARE 299D—Special Study for Doctoral Dissertation (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ARE 396—Teaching Assistant Training Practicum (1-4)

Variable—3-36 hour(s). Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ART—Art Studio

Courses in ART:

Various of the Professional courses (400+) are not offered each year.

ART 002—Beginning Drawing (4)

Studio—6 hour(s). Introduction to drawing using various black and white media to articulate forms and organize space, with reference to historical and contemporary works. GE credit: AH, VL. Effective: 2015 Winter Quarter.

ART 005—Beginning Sculpture (4)

Studio—6 hour(s). Basic sculpture techniques using a variety of media. Form in space using cardboard, plaster, and/or cement, wood and/or metal and other media. GE credit: AH, VL. Effective: 2015 Winter Quarter.

ART 007—Beginning Painting (4)

Studio—6 hour(s). Introduction to techniques and concepts in the practice of painting. GE credit: AH, VL. Effective: 2020 Winter Quarter.

ART 008—Beginning Ceramic Sculpture (5) *Review all entries*

Studio—6 hour(s). Introduction to ceramic sculpture construction and processes. Large scale hand-building, glazing, kilns and kiln firing technology. GE credit: AH, VL. Effective: 2020 Fall Quarter.

ART 008—Beginning Ceramic Sculpture (4) *Review all entries*

Studio—6 hour(s). Introduction to ceramic sculpture construction and processes. Large scale hand-building, glazing, kilns and kiln firing technology. GE credit: AH, VL. Effective: 2016 Spring Quarter.

ART 009—Beginning Photography (5)

Studio—6 hour(s). Introduction to visual language of photographic art and technique. Manual camera operation and printing techniques. Concept and practice of photography as an art form and creating photographic projects. GE credit: AH, VL. Effective: 2019 Fall Quarter.

ART 010—Fine Art Appreciation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Survey of contemporary artists since 1970. Topics explore contemporary thought within the visual arts using the forms and strategies of painting, sculpture, installation, performance, photography, and video in collaborative, ephemeral and multimedia approaches. Intended for Art and non-Art majors. GE credit: AH, VL. Effective: 2017 Winter Quarter.

ART 010D—Contemporary Art Appreciation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Survey of contemporary art since 1960; includes discussion. Explores contemporary thought within the visual arts using forms and strategies of painting, sculpture, installation, performance, photo and video in collaborative, ephemeral and multimedia approaches. For Art and non-Art majors. Not open for credit to students who have taken ART 010F. GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 010F—Contemporary Art Appreciation (4)

Lecture—3 hour(s); Fieldwork. Survey of contemporary art since 1960; includes fieldwork. Explores contemporary thought within the visual arts using forms and strategies of painting, sculpture, installation, performance, photo and video in collaborative, ephemeral and multimedia approaches. For Art and non-Art majors. Not open for credit to students who have taken ART 010D. GE credit: AH, VL. Effective: 2019 Fall Quarter.

ART 011—Beginning Printmaking (4)

Studio—6 hour(s). Introduction to printmaking techniques such as monography, relief, and intaglio. Investigation of personal imagery through use of these techniques. GE credit: AH, VL. Effective: 2015 Winter Quarter.

ART 012—Beginning Video (4)

Studio—6 hour(s). Production techniques of video shooting, editing, lighting, sound and effects. A conceptual framework for video-art techniques. GE credit: AH, VL. Effective: 2015 Winter Quarter.

ART 024—Introduction to Experimental Video & Film (4)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Evolution of moving image technologies. Shifts within avant-garde artistic practices. Conceptual and historical differences between film and video. Relationship of film and video to fine arts. GE credit: AH, VL, WE. Effective: 2013 Spring Quarter.

ART 030—Introduction to Contemporary Visual Culture (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Establishing visual literacy across the media of fine art, photography, advertising, television and film; media culture; focus on critical decoding of contemporary visual culture. GE credit: AH, VL. Effective: 1997 Winter Quarter.

ART 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ART 099—Special Study for Undergraduates (1-5)

Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ART 101—Intermediate Painting (4)

Studio—6 hour(s). Prerequisite(s): ART 002; ART 007. Individualized projects exploring color and space in a variety of subject matter and approaches. Builds on basic skills and concepts from beginning drawing and painting courses. Study of historical and contemporary art in relation to studio practice. May be repeated up to 1 time(s) when topic differs. GE credit: AH, VL. Effective: 2013 Fall Quarter.

ART 102A—Advanced Painting: Studio Projects (4)

Studio—6 hour(s). Prerequisite(s): ART 101. Pass One restricted to Art Studio majors. Sustained development of painting for advanced students. Approaches will vary according to the instructor. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 102B—Advanced Painting: Figure (4)

Studio—6 hour(s). Prerequisite(s): ART 101. Pass One restricted to Art Studio majors. Advanced painting using the human figure as subject. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 102C—Advanced Painting: Special Topics (4)

Studio—6 hour(s). Prerequisite(s): (ART 002, ART 007, ART 101); (ART 102A or ART 102B). Pass One restricted to Art Studio majors. Special topics in painting for upper division students. Emphasis on development of a personal practice of painting informed by awareness of contemporary issues in painting and their historical background. Topics will vary with instructor. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 102D—Painting & Installation Art (4)

Studio—6 hour(s). Prerequisite(s): ART 002 C or better; ART 007 C or better; ART 101 C or better; or Consent of Instructor. Upper division standing. Pass One restricted to Art Studio majors. Expanded fields of painting and installation art in the context of contemporary art practice. Painting's possibilities in relation to space and pushing the boundaries of two-dimensional art. May be repeated up to 1 time(s) when content differs. Effective: 2019 Fall Quarter.

ART 103A—Intermediate Drawing: Black & White (4)

Studio—6 hour(s). Prerequisite(s): ART 002. Pass One restricted Art Studio majors. Advanced study of drawing composition using black and white media. GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 103B—Intermediate Drawing: Color (4)

Studio—6 hour(s). Prerequisite(s): ART 002. Pass One restricted Art Studio majors. Study of drawing composition in color media. GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 103C—Intermediate Drawing: 3 Dimensions (4)

Studio—6 hour(s). Prerequisite(s): ART 002. Pass One restricted to Art Studio Major. Intermediate study of drawing composition using three dimensional media. GE credit: AH, VL. Effective: 2017 Fall Quarter.

ART 105A—Advanced Drawing: Studio Projects (4)

Studio—6 hour(s). Prerequisite(s): ART 002; (ART 103A or ART 103B). Pass One restricted to Art Studio majors. Exploration of composition and process in drawing. Emphasis on the role of drawing in contemporary art and on drawing as an interdisciplinary practice. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 105B—Advanced Drawing: Figure (4)

Studio—6 hour(s). Prerequisite(s): (ART 103A or ART 103B); ART 002. Pass One restricted Art Studio majors. Study of the figure through drawing of the model. Exploration of different methods and process of figure-drawing. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2018 Winter Quarter.

ART 110A—Intermediate Photography: Black & White Analog (4)

Studio—6 hour(s). Prerequisite(s): ART 009. Pass One restricted to Art Studio majors. Introduction to 35mm and medium format camera. Development of personal aesthetic and portfolio of black and white prints. GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 110B—Intermediate Photography: Digital Imaging (4)

Studio—6 hour(s). Prerequisite(s): ART 009. Pass One restricted to Art Studio majors. Comprehensive introduction to all elements of digital photography, including scanning, imaging software and printing. GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 110C—Intermediate Photography: Photographic Lighting (5)

Studio—6 hour(s). Prerequisite(s): ART 009; or Consent of Instructor. Pass One restricted to Art Studio majors. Effects of lighting on photographic image. Ability to read, utilize, modify natural lighting conditions. Studio lighting equipment, and use of photographic studio. Photographic production management. GE credit: AH, VL. Effective: 2019 Spring Quarter.

ART 110DA—The Photobook (5)

Studio—6 hour(s). Prerequisite(s): ART 009; or Consent of Instructor. Pass One restricted to Art Studio majors. History and practice of photographic book. Sequencing, use of text and image, page layout and book binding techniques. Development of major photographic project. GE credit: AH, VL. Effective: 2019 Summer Session 1.

ART 110DB—The Photobook (5)

Studio—6 hour(s). Prerequisite(s): ART 009; or Consent of Instructor. Pass One restricted to Art Studio majors. Second course in ART 110D series. History and practice of photographic book. Sequencing, use of text and image, page layout and book binding techniques. Development of major photographic project. GE credit: AH, VL. Effective: 2019 Summer Session 1.

ART 111A—Advanced Photography: Special Topics (4)

Studio—6 hour(s). Prerequisite(s): ART 009; (ART 110A or ART 110B). Pass One open to Art Studio majors. Special topics related to photography and contemporary art practice. Multiple projects in a variety of approaches. May be repeated up to 2 time(s) when topic differs. GE credit: AH, VL. Effective: 2013 Fall Quarter.

ART 111B—Advanced Photography: Digital Imaging (4)

Studio—6 hour(s). Prerequisite(s): ART 009; ART 110B. Pass One restricted to Art Studio majors. In-depth exploration of digital photography, including refined digital imaging techniques. Theoretical issues involved in digital media. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 112—Sound for Vision (4)

Studio—6 hour(s). Prerequisite(s): ART 012 or CDM 020 or CTS 020 or TCS 100. Pass One restricted to Art Studio majors. Sound composition and development of an audio databank. Study of repetition and phase shifts. Creation of descriptive acoustic space recordings in combination with other artistic media. Audio as stand alone or accompaniment. May be repeated up to 1 time(s). GE credit: AH. Effective: 2019 Winter Quarter.

ART 113—Interdisciplinary Art (4)

Studio—6 hour(s). Prerequisite(s): Upper division standing in Art Studio, Theater and Dance, Design, Technocultural Studies, or Music. Experimental interdisciplinary strategies. Use of various media in creation of collaborative or independent works. Production of participatory audio-visual works, installations, or two dimensional explorations. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 114A—Intermediate Video: Animation (4)

Studio—6 hour(s). Prerequisite(s): ART 012 or CTS 020 or CDM 020. Pass One restricted to Art Studio majors. Exploration of animation. Relationship between drawing, digital stills, and multiple images. Animation using traditional drawing techniques, collage, and digital processes. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2019 Spring Quarter.

ART 114B—Intermediate Video: Experimental Documentary (4)

Studio—6 hour(s). Prerequisite(s): ART 012 or CTS 020 or CDM 020. Pass One restricted to Art Studio majors. Experimental documentary practice. Use of interviews, voice-overs, and still and moving images. Production of alternative conceptual and visual projects. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 114C—Intermediate Video: Performance Strategies (4)

Studio—6 hour(s). Prerequisite(s): ART 012 or CTS 020 or CDM 020. Pass One restricted to Art Studio majors. Use of video to expand performance art production. Exploration of improvisation, direction, projection, and image processing in real time. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 117—Advanced Video & Electronic Arts (4)

Studio—6 hour(s). Prerequisite(s): ART 012 or CTS 020; (ART 112 or ART 114A or ART 114B or ART 114C or CDM 100 or CDM 104); (CDM 105 or TCS 100 or TCS 101 or TCS 104); Upper division standing Art Studio majors. Pass One restricted to Art Studio majors; upper division standing. Independently driven video, digital, and/or performance projects. Further development in the electronic arts ranging from video installation to performance. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 121—Reinterpreting Landscape (4)

Studio—6 hour(s). Prerequisite(s): ART 002; ART 007. Pass One restricted to Art Studio majors. Interpretation of landscape through painting, drawing, and related media. Emphasis on the integration of historical, cultural, natural, and artistic contexts. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 125A—Intermediate Printmaking: Relief (4)

Studio—6 hour(s). Prerequisite(s): ART 011. Pass One restricted to Art Studio majors. Woodcut linocut, metal-plate, relief, and experimental uses of other materials for printmaking. Additive and reductive relief techniques. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 125B—Intermediate Printmaking: Intaglio (4)

Studio—6 hour(s). Prerequisite(s): ART 011. Pass One restricted to Art Studio majors. Metal plate etching, aquatint, hard and soft ground, burin engraving and related printmaking techniques. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 125C—Intermediate Printmaking: Lithography (4)

Studio—6 hour(s). Prerequisite(s): ART 011. Pass One restricted to Art Studio majors. Stone and metal-plate lithography and other planographic printmaking methods. Exploration of the basic chemistry and printing procedure inherent in stone lithography. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 125D—Intermediate Printmaking: Serigraphy (4)

Studio—6 hour(s). Prerequisite(s): ART 011. Pass One restricted to Art Studio majors. Printmaking techniques in silk screen and related stencil methods. Development of visual imagery using the language of printmaking. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 129—Advanced Printmaking (4)

Studio—6 hour(s). Prerequisite(s): ART 011; ART 125A or ART 125B or ART 125C or ART 125D. Pass One restricted to Art Studio majors. Development of intermedia printmaking. Advanced modes in print technologies: relief, serigraphy, intaglio, surface, as well as addition of digitized imagery. Production of prints using multi-plate prints and other methods. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2018 Fall Quarter.

ART 138—The Artist's Book (4)

Studio—6 hour(s). Prerequisite(s): Completion of three upper division Art Studio (ART) courses. Pass One restricted to Art Studio majors. Creation of an artist's book in an edition of three. Use of a variety of media. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 142A—Intermediate Ceramic Sculpture: Industrial Production Methods (4)

Studio—6 hour(s). Prerequisite(s): ART 008. Pass One restricted to Art Studio majors. Ceramic sculpture creation using two forms of industrial processes: plaster mold design, fabrication and casting; and extrusion with dies, including die fabrication. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

ART 142B—Intermediate Ceramic Sculpture: Material Study (4)

Studio—6 hour(s). Prerequisite(s): ART 008. Pass One restricted to Art Studio majors. Study of ceramic materials and processes. Areas studied include clay and clay bodies; glaze materials through temperature, color and texture; history and technology of kilns and kiln firing. Examination of material properties and characteristics through experimentation. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

ART 142C—Intermediate Ceramic Sculpture: Special Topics (4) *Review all entries*

Studio—6 hour(s). Prerequisite(s): ART 008. Pass One restricted to Art Studio majors. Exploration of the ceramic surface for creative expression. Use of glazing techniques including china paint, decals, luster, and silkscreen with underglaze and overglaze as well as the use of common materials such as epoxy, paint, oil and wax. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

ART 142C—Intermediate Ceramic Sculpture: Ceramics & the Painted Surface (5)

Review all entries

Studio—6 hour(s). Prerequisite(s): ART 008. Pass One restricted to Art Studio majors. Exploration of the ceramic surface for creative expression. Use of glazing techniques including china paint, decals, luster, and silkscreen with underglaze and overglaze as well as the use of common materials such as epoxy, paint, oil and wax. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2021 Winter Quarter.

ART 142D—Intermediate Ceramic Sculpture: Special Topics (5)

Studio—6 hour(s). Prerequisite(s): ART 008. Pass One restricted to Art Studio majors. Studio work and professional practice practicum. Visit artist's studios, museums and galleries, and attend artist lectures. Both drawings and written journals are kept throughout the term. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2021 Winter Quarter.

ART 143—Advanced Ceramic Sculpture: Studio Projects (5) *Review all entries*

Studio—6 hour(s). Prerequisite(s): ART 008; (ART 142A or ART 142B or ART 142C). Pass One restricted to Art Studio majors. Experimentation with all techniques learned in prerequisite ceramics classes. Includes class projects in consultation with faculty. May be repeated up to 2 time(s) with consent of instructor required for taking the course a third time. GE credit: AH, VL. Effective: 2021 Winter Quarter.

ART 143—Advanced Ceramic Sculpture: Studio Projects (4) *Review all entries*

Studio—6 hour(s). Prerequisite(s): ART 008; ART 142A or ART 142B or ART 142C. Pass One restricted to Art Studio majors. Experimentation with all techniques learned in prerequisite ceramics classes. Includes class projects in consultation with faculty. May be repeated up to 2 time(s) with consent of instructor required for taking the course a third time. GE credit: AH, VL. Effective: 2017 Spring Quarter.

ART 147—Theory & Criticism of Photography (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): ART 009. Development of camera vision, ideas, and aesthetics and their relationship to the fine arts from 1839 to the present. GE credit: AH, VL. Effective: 2012 Fall Quarter.

ART 148—Theory & Criticism: Painting & Sculpture (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): ART 005 or ART 007 recommended. Study of forms and symbols in historic and contemporary masterpieces. (Same course as AHI 148.) GE credit: AH, VL, WE. Effective: 2014 Fall Quarter.

ART 149—Introduction to Critical Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Overview of 20th-century critical theories of culture and their relation to visual art and mass media culture. GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 150—Theory & Criticism of Electronic Media (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): ART 024 recommended. Study of electronic media, focusing on critique, application, and relationship to art practice. Analysis of the conceptual basis of electronic media as an artistic mode of expression. GE credit: AH. Effective: 2007 Fall Quarter.

ART 151—Intermediate Sculpture (4)

Studio—6 hour(s). Prerequisite(s): ART 005. Individualized explorations through multiple projects in a variety of sculpture media and techniques. Builds upon technical skills and concepts covered in ART 005. May be repeated up to 2 time(s) when topic differs. GE credit: AH, VL. Effective: 2013 Fall Quarter.

ART 152A—Advanced Sculpture: Studio Projects (4)

Studio—6 hour(s). Prerequisite(s): ART 005; ART 151. Pass One restricted to Art Studio majors. Sculpture for advanced students. Emphasis on concept, idea development and honing technical skills. Approaches and projects will vary according to the instructor. May be repeated up to 1 time(s) when topic differs. GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152B—Advanced Sculpture: Material Explorations (4)

Studio—6 hour(s). Prerequisite(s): ART 005; ART 151. Pass One restricted to Art Studio majors. Primary application and exploration of a single sculpture material chosen by the student. Examination of its properties, qualities, and characteristics for three-dimensional expression. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152C—Advanced Sculpture: Concepts (4)

Studio—6 hour(s). Prerequisite(s): ART 005; ART 151. Pass One restricted to Art Studio majors. Investigation of a specific idea chosen by the class. Relationship of idea to form and content. Individual development of conceptual awareness. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152D—Advanced Sculpture: Metals (4)

Studio—6 hour(s). Prerequisite(s): ART 005; ART 151. Pass One restricted to Art Studio majors. Technical aspects of the use of metals in contemporary art practice. Projects assigned to demonstrate the evolution of concepts and processes. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152E—Advanced Sculpture: Site Specific Public Sculpture (4)

Studio—6 hour(s). Prerequisite(s): ART 005; ART 151. Pass One restricted to Art Studio majors. Place and site specificity in contemporary sculpture. Individual and group work to conceive and fabricate sculpture in a public space. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152F—Advanced Sculpture: Figure (4)

Studio—6 hour(s). Prerequisite(s): ART 005; ART 151. Pass One restricted to Art Studio majors. Exploration of historical and contemporary approaches to the body in three-dimensions. Projects based on observational and conceptual strategies. Variety of media and techniques, including clay, wax, plaster, plastics, found objects, and others. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152G—Advanced Sculpture: The Miniature & Gigantic (4)

Studio—6 hour(s). Prerequisite(s): ART 005; ART 151. Pass One restricted to Art Studio majors. Exploration of scale, from the very small to the very large in a series of projects in a variety of media. Tools and techniques of enlargement and miniaturization. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 171—Mexican & Chicano Mural Workshop (4)

Studio—8 hour(s); Independent Study—1 hour(s). Prerequisite(s): CHI 070; and Consent of Instructor. The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques. May be repeated up to 1 time(s). (Same course as CHI 171.) GE credit: AH, VL. Effective: 1997 Winter Quarter.

ART 190—Seminar in Art Practice (4)

Studio—6 hour(s). Prerequisite(s): Upper division standing Art Studio major and completion of two upper division ART classes. Pass One restricted to Art Studio majors. Introduction to professional practices. Development of an artist's packet including a resume, cover letter, artist statement, and statement of purpose. Ongoing independent studio work with group critiques. Research on galleries and museums, and readings in contemporary theory and criticism. May be repeated up to 1 time(s) when instructor differs. GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 192—Internship (2-12)

Internship. Supervised program of internships in artists' studios and at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Fall Quarter.

ART 195—Expanded Field: Artist Lecture Series (1)

Lecture/Discussion—3 hour(s). Prerequisite(s): Consent of Instructor. Exploration of the expanded field of practice, theory and criticism in the visual arts. Presentations and discussions with professional practitioners in the field. May be repeated up to 12 unit(s) when topic differs. (P/NP grading only.) Effective: 2012 Fall Quarter.

ART 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ART 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ART 220—Research Methods for Artists (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Research methods for artists through critical reading and writing, studio practice, presentations, site-visits, and professional engagement related to the field of visual art. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 221A—Critical Exploration & Collaboration (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. During the first year of study, MFA graduate students take the Critical Exploration & Collaboration seminar. Explore and analyze a range of subjects in contemporary art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their own art practice. May be repeated up to 1 time(s) when topic differs. Effective: 2018 Fall Quarter.

ART 221B—Advanced Critical Exploration & Collaboration (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Advanced course for second-year graduate students. Explore and analyze a range of subjects in contemporary art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their own art practice. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 223—Concepts & Critique (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Focuses on research methods for artists through critical reading and writing, studio practice, presentations, site-visits, and professional engagement related to the field of visual art. Faculty-moderated group critique course to develop a sense of the theoretical foundations and implications of the work of each of the participants through class analysis and extended discussion. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 224—Theory & Concepts on Critical Issues in Contemporary Art (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Critical and conceptual foundations for graduate students. Political, social and cultural questions as they relate to the production and reception of art. Contemporary theories to develop verbal and analytical skills. May be repeated up to 1 time(s) when content differs. Effective: 2019 Fall Quarter.

ART 225—Professional Practice in Contemporary Art (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Fluctuating critical and cultural environment of the professional art world. New strategies to support the social and philosophical networks and frameworks that inform contemporary cultural production. Emphasis on new esthetics concepts, practices and technologies. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 226—Exhibition Strategy & Thesis Seminar (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Completion of a body of work and development of a thesis show. Curation, design, installation, documentation, contributing to catalog content and design, and promoting work in a public forum. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 227—Collaboration & Interdisciplinarity (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Explores methodologies in practice with emphasis on collaboration and interdisciplinarity. Artistic production and directed research supporting the development of site. Work across artistic mediums, academic disciplines, and social concerns. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290—Seminar (4)

Seminar—3 hour(s). Original works produced for group discussion and criticism; associated topics of a contemporary and historical nature. May be repeated for credit. Effective: 1997 Winter Quarter.

ART 290A—Critical Discourse in Contemporary Art (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Critical discourse in contemporary art and application to practice. Exploration of concerns in broader artistic and contemporary context. How artists look to shift prevalent expectations through critical analysis. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290B—Critical Discourse in Studio Practice (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Advanced course for second-year graduate students. Critical discussion and contemporary readings pertinent to studio practice and artwork, including video, installation, photography, interactive arts, performance, sculpture, painting, printmaking, ceramics, sound, and all other mediums. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290C—Critical Discourse in Materiality (4)

Seminar—3 hour(s). Open to Art Studio graduate students only, or with prior written consent of faculty member. Mid-year study focusing on individual work in the studio. Explores mediums, techniques, skill building, resourcing and problem solving. Defining the artists relationship to topics in contemporary art through speaking, writing, research and presentation. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290D—Critical Discourse in Context (4)

Seminar—3 hour(s). Open to Art Studio graduate students only; or with prior written consent of faculty member. Advanced course for second-year Graduate students. Discussion of social, political, cultural, and economic issues in a constantly changing world. How contemporary art practice are affected by global issues. May be repeated up to 1 time(s) when content differs. Effective: 2019 Fall Quarter.

ART 290E—Critical Discourse on Media (4)

Seminar—3 hour(s). Open to Art Studio graduate students only; or with prior written consent of faculty member. Critical discussion and contemporary readings pertinent to artwork that uses digital media including video, installation, photography, interactive arts, performance, sculpture, painting, printmaking, ceramics, sound, and all other mediums. May be repeated up to 1 time(s) when content differs. Effective: 2019 Fall Quarter.

ART 290F—Critical Discourse in Presentation (4)

Seminar—3 hour(s). Open to Art Studio graduate students only; or with prior written consent of faculty member. For second-year graduate students. Study focuses on individual performance work. Exploration extends into other mediums, techniques for props or sites, tapping the resources of peers, problem solving with the intention to deepen understanding and engagement with an audience. Exploration and analysis of subjects in cont. art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their performance art practice. May be repeated up to 1 time(s) when content differs. Effective: 2019 Fall Quarter.

ART 291—Seminar: Critical Evaluation (1)

Seminar—1 hour(s). May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ART 292—Seminar: Comprehensive Qualifying (1)

Seminar—1 hour(s). Further critical evaluation of the student's work to determine his eligibility to begin the Comprehensive Project. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ART 299—Individual Study (1-6)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ART 299D—Comprehensive Project (9)

Variable. An original body of work accompanied by a catalog summarizing the student's aesthetic position. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ART 401—Museum Training: Curatorial Principles (4)

Seminar—3 hour(s). Approved for graduate degree credit. Study of private and public collections. Museum personalities. Appraisal of works of art; ethics of appraisal. Auction and sales: methods and catalogues. Registration. Technical problems of the museum. Connoisseurship. Collateral reading. Visits to museums. Effective: 1997 Winter Quarter.

ART 402—Museum Training: Exhibition Methods (4)

Seminar—3 hour(s). Approved for graduate degree credit. History of exhibition methods in private and public collections. Comparisons of different types of museums and their exhibition problems. Lighting and techniques of display with emphasis on actual design. Experimentation with unusual presentation forms. Effective: 1997 Winter Quarter.

ASA—Asian American Studies

Courses in ASA:

Direct questions pertaining to the following courses to the instructor or to the Department of Asian American Studies in 3102 Hart Hall; 530-752-2069.

ASA 001—Historical Experience of Asian Americans (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to Asian American Studies through an overview of the history of Asians in America from the 1840s to the present within the context of the development of the United States. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 1997 Winter Quarter.

ASA 002—Contemporary Issues of Asian Americans (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to Asian American Studies through the critical analysis of the impact of race, racism, ethnicity, imperialism, militarism, and immigration since post-World War II on Asian Americans. Topics may include sexuality, criminality, class, hate crimes, and inter-ethnic relations. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 2017 Spring Quarter.

ASA 003—Social & Psychological Perspectives of Asian Americans (4)

Lecture—3 hour(s); Discussion—1 hour(s). Major psychosocial issues of Asian Americans. Theories and empirical research that address cultural values, behavioral norms, ethnic stereotypes, racism, acculturation, ethnic identity development, family communication, stressors and social support systems, academic achievement, interpersonal effectiveness, and psychopathology. GE credit: ACGH, DD, SS. Effective: 2003 Fall Quarter.

ASA 004—Asian American Cultural Studies (4)

Lecture—3 hour(s); Discussion—1 hour(s). Interdisciplinary course examines the multiple ways in which race, class, sexuality and gender, as well as the recent turn to transnationalism and postcolonial theory, have changed the ways we read Asian American literature and see art, theater and film. GE credit: ACGH, AH, DD, OL, VL, WE. Effective: 2006 Fall Quarter.

ASA 092—Internship (1-3)

Internship—3-9 hour(s). Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Supervised internship in community and institutional settings related to Asian American concerns. (P/NP grading only.) Effective: 1997 Winter Quarter.

ASA 098—Directed Group Study (1-5)

Lecture—1-5 hour(s). Primarily intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ASA 098F—Student Facilitated Course (1-4)

Variable—1-4 hour(s). Student-facilitated (taught) course intended for lower division students. (P/NP grading only.) Effective: 2016 Spring Quarter.

ASA 099—Special Study for Undergraduates (3-15)

Variable—3-15 hour(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

ASA 100—Asian American Communities (4)

Lecture/Discussion—4 hour(s). Survey and analysis of Asian American communities within both historical and contemporary contexts. Presentation of the analytical skills, theories, and concepts needed to describe, explain, and understand the diversity of Asian American communities within the larger, dominant society. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

ASA 102—Theoretical Perspective in Asian American Studies (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ASA 001 or ASA 002 or ASA 003 or ASA 004; or Consent of Instructor. Upper division standing. Explores major theories of race and its intersections with class, gender, and sexuality from interdisciplinary perspective. Introduces key theoretical developments, issues, debates. Through case studies, analyzes ways various theoretical frameworks and perspectives have been incorporated into range of scholarship. Effective: 2010 Winter Quarter.

ASA 112—Asian American Women (4)

Lecture/Discussion—4 hour(s). Experiences of Asian American women from major ethnic subgroups comparatively examined in their social, economic and historical contexts using theoretical perspectives from social sciences, humanities/arts: identity, racialization, immigration, gender, sexuality, labor, socialization, cultural expression, social movements and feminist theorizing. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

ASA 113—Asian American Sexuality (4)

Discussion/Laboratory—4 hour(s). Restrictive U.S. immigration laws, labor exploitation, race-based exclusionary laws, removal and internment, anti-miscegenation laws, and other examples of social control are surveyed to assess their role in shaping the sexuality of the different Asian American groups. GE credit: ACGH, AH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

ASA 114—Asian Diasporas (4)

Lecture—4 hour(s). Asian diasporic communities and the experiences of its members in the United States and internationally. Community building, cyberspace, gender issues, labor, transnational practices, effects of globalization, political organizing, homeland politics, humanitarian projects, citizenship and nationalism. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.

ASA 115—Multiracial Asian Pacific American Issues (4)

Lecture/Discussion—4 hour(s). Introduction to the experiences of biracial and multiracial Asian Pacific people in the U.S., concentrating on theories of race, racial identity formation, culture, media, and anti-racist struggles. Critical approaches to the analysis of popular media and academic representations. GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2016 Fall Quarter.

ASA 116—Asian American Youth (4)

Lecture—3 hour(s); Term Paper. Social experiences of diverse groups of Asian American youth. Ways in which youth themselves actively create cultural expressions and political interventions. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 2016 Fall Quarter.

ASA 121—Asian American Performance (4)

Lecture/Discussion—4 hour(s). Performance work by, for, and/or about Asian Pacific Americans including dramatic literature, performance art, dance, and film. Ethnicity, gender and sexuality, class and age as they intersect with Asian Pacific American identities in and through dramatic performance. GE credit: ACGH, AH, DD, OL, WE. Effective: 2016 Fall Quarter.

ASA 130—Asian American Literature (4)

Lecture/Discussion—4 hour(s). Works of Asian American literature by writers from the major ethnic subgroups, examined in their social, economic and historical contexts. Intertextual analysis of their thematic and formal elements to form an understanding of Asian American literary traditions. GE credit: ACGH, AH, DD, OL, WE. Effective: 2016 Fall Quarter.

ASA 131—Ethnicity, Culture, & the Self (4)

Lecture—3 hour(s); Discussion—1 hour(s). Cultural and social psychological influences on Asian Americans focusing on the individual. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

ASA 132—Health Issues Confronting Asian Americans & Pacific Islanders (4)

Lecture/Discussion—4 hour(s). Health issues confronting Asian Americans & Pacific Islanders. (Same course as SPH 132.) GE credit: SS. Effective: 2009 Winter Quarter.

ASA 141—Asian Americans & the Political Culture of Fashion in the U.S. & Asia (4)

Lecture/Discussion—4 hour(s); Term Paper; Project (Term Project). Historical, cultural and sociopolitical development of fashion in Asia and the U.S. as it relates to the Asian Diasporas. Specific aspects of material culture: textiles, clothing and fashion. GE credit: ACGH, AH, DD, OL, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

ASA 150—Filipino American Experience (4)

Discussion/Laboratory—4 hour(s). Examination of the relationship between the Filipino-American community, the Philippine home community and the larger American society through a critical evaluation of the historical and contemporary conditions, problems and prospects of Filipinos in the U.S. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.

ASA 150B—Japanese American Experience (4)

Lecture—3 hour(s); Term Paper. Different analytical approaches to understand Japanese American history, culture and society. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

ASA 150C—Chinese American Experience (4)

Lecture/Discussion—4 hour(s). Survey of the historical and contemporary experiences of Chinese in the United States, starting with the gold rush era and concluding with the present-day phenomenon of Chinese transnational movement to the United States and its diasporic significance. GE credit: ACGH, AH, DD, SS, VL, WC. Effective: 2016 Fall Quarter.

ASA 150D—Korean American Experience (4)

Lecture/Discussion—4 hour(s). Interdisciplinary survey of the historical and contemporary experiences of Koreans in the United States from the late-19th century to the present. GE credit: ACGH, AH, DD, SS, WC. Effective: 2016 Fall Quarter.

ASA 150E—Southeast Asian American Experience (4)

Lecture/Discussion—4 hour(s). Historical survey of Southeast Asian experiences with special focus on United States involvement and post 1975 migrations. Defines international and transnational conditions that led up to the large exodus and resettlement of Southeast Asians. GE credit: ACGH, AH, DD, OL, SS, WC, WE. Effective: 2016 Fall Quarter.

ASA 150F—South Asian American History, Culture, & Politics (4)

Lecture/Discussion—4 hour(s). South Asian American experiences, focusing on the histories, cultures, and politics of Indian, Pakistani, Bangladeshi, and Sri Lankan communities in the U.S. Interdisciplinary approaches to migration, labor, gender, racialization, ethnicity, youth, community mobilization. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 2016 Fall Quarter.

ASA 155—Asian American Legal History (4)

Lecture/Discussion—4 hour(s). Legal history of Asian Americans, from the mid-19th century to present. Laws and administrative policies affecting Asian American communities, including those governing immigration, social and economic participation, WWII internment, and affirmative action. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

ASA 189A—Topics in Asian American Studies: History (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies; history. May be repeated for credit when topic differs. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.

ASA 189B—Topics in Asian American Studies: Culture (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies; culture. May be repeated for credit when topic differs. GE credit: AH, SS. Effective: 2016 Fall Quarter.

ASA 189C—Topics in Asian American Studies: Physical & Mental Health (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies; physical and mental health. May be repeated for credit when topic differs. GE credit: SS. Effective: 2016 Fall Quarter.

ASA 189D—Topics in Asian American Studies: Policy & Community (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies: policy and community. May be repeated for credit when topic differs. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

ASA 189E—Topics in Asian American Studies: Comparative Racial Studies (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies: comparative racial studies. May be repeated for credit when topic differs. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 2016 Fall Quarter.

ASA 189F—Topics in Asian American Studies: Asian Studies & Asian American Studies (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies: asian studies and asian american studies. May be repeated for credit when topic differs. GE credit: SS. Effective: 2016 Fall Quarter.

ASA 189G—Topics in Asian American Studies: Race, Class, Gender, & Sexuality (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies: race, class, gender, and sexuality. May be repeated for credit when topic differs. GE credit: SS. Effective: 2016 Fall Quarter.

ASA 189H—Topics in Asian American Studies: Society & Institutions (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies: society and institutions. May be repeated for credit when topic differs. GE credit: AH, SS. Effective: 2016 Fall Quarter.

ASA 189I—Topics in Asian American Studies: Politics & Social Movements (4)

Lecture—4 hour(s). Intensive treatment of a topic in Asian American Studies: politics and social movements. May be repeated for credit when topic differs. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 2017 Spring Quarter.

ASA 192—Internships (1-5)

Internship—3-15 hour(s). Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern position with priority to Asian American Studies minors; consent of instructor. Supervised internship in community and institutional settings related to Asian American concerns. (P/NP grading only.) Effective: 1997 Winter Quarter.

ASA 194—Asian American Studies Capstone Course (4)

Lecture/Discussion—4 hour(s); Project (Term Project); Extensive Writing. Open to junior or senior level standing in Asian American Studies or consent of instructor. Synthesis of the approaches and methods learned by students in Asian American Studies and development of specialization in their areas of interest. Development of a research proposal for thesis project. Effective: 2017 Winter Quarter.

ASA 195—Asian American Studies Senior Thesis Seminar (4)

Lecture/Discussion—3 hour(s); Extensive Writing; Project (Term Project). Restricted to junior and senior level standing in Asian American Studies. Completion of ASA 194 required. Synthesis of the approaches and methods learned in Asian American Studies. Production of an original research paper on a topic of student's interest, building on the research proposal submitted in the capstone seminar. Effective: 2016 Fall Quarter.

ASA 197T—Tutoring in Asian American Studies (1-5)

Tutorial—1-5 hour(s). Prerequisite(s): Consent of Instructor. Tutoring in lower division Asian American Studies courses in small group discussion. Weekly meetings with instructor. May be repeated up to 1 time(s) for a given course and also for a different course. (P/NP grading only.) Effective: 2016 Fall Quarter.

ASA 198—Directed Group Study (1-5)

Lecture—1-5 hour(s). Prerequisite(s): Consent of Instructor. Primarily intended for upper division students. (P/NP grading only.) Effective: 2016 Fall Quarter.

ASA 198F—Student Facilitated Course (1-4)

Variable—1-4 hour(s). Student-facilitated (taught) course intended for upper division students. (P/NP grading only.) Effective: 2017 Fall Quarter.

ASA 199—Special Study for Advanced Undergraduates (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) Effective: 2016 Fall Quarter.

ASA 199FA—Student Facilitated Course Development (1-4)

Variable—1-4 hour(s). Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F. (P/NP grading only.) Effective: 2016 Spring Quarter.

ASA 199FB—Student Facilitated Teaching (1-4)

Variable—1-4 hour(s). Prerequisite(s): ASA 199FA. Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F. (P/NP grading only.) Effective: 2016 Spring Quarter.

AST—Astronomy

Courses in AST:

AST 010G—Introduction to Stars, Galaxies, & the Universe (3)

Lecture—3 hour(s). Non-mathematical introduction to astrophysics of the Universe beyond our solar system using concepts of modern physics. Not open for credit to students who have taken AST 002, the former AST 010, any quarter of PHY 009 or PHY 009H, or any upper division physics course (other than PHY 137 or PHY 160). GE credit: SE, SL, VL. Effective: 2007 Summer Session 1.

AST 010L—Observational Astronomy Lab (1)

Laboratory—2.5 hour(s). Introduction to observations of the night sky using small telescopes in nighttime laboratory. Not open for credit to students who have taken AST 002 or AST 010. GE credit: SE, VL. Effective: 2018 Winter Quarter.

AST 010S—Astronomy of the Solar System (3)

Lecture—3 hour(s). Introduction to naked eye and telescopic observations of events in the night sky: positions of sun, moon, planets throughout the year. Historical perspective on how our understanding of the solar system evolved to current non-mathematical astrophysical interpretation of planetary systems. Not open for credit to students who have taken AST 002, any quarter of PHY 009 or PHY 009H, or any upper division PHY course (other than PHY 137 or PHY 160). GE credit: SE, SL, VL. Effective: 2007 Summer Session 1.

AST 025—Introduction to Modern Astronomy & Astrophysics (4)

Lecture—3 hour(s); Discussion/Laboratory—2.5 hour(s). Prerequisite(s): Good facility in high school physics and mathematics (algebra and trigonometry). Description and interpretation of astronomical phenomena using the laws of modern physics and observations by modern astronomical instruments. Gravity, relativity, electromagnetic radiation, atomic and nuclear processes in relation to the structure and evolution of stars, galaxies and the universe. Not open to students who have received credit for AST 002, AST 010G, or AST 010L. GE credit: SE, SL, VL. Effective: 2007 Fall Quarter.

ATM—Atmospheric Science

Courses in ATM:

Questions pertaining to the following courses should be directed to the instructor or to the Land, Air & Water Resources Teaching Center in 1150 Plant & Environmental Sciences Building; 530-752-1603.

ATM 005—Global Climate Change (3)

Lecture—2 hour(s); Discussion—1 hour(s). Scientific concepts needed to understand climate and climate change. Principles of regional variations in climate. Understanding observed seasonal, decadal and millennial changes. Analysis of the Antarctic ozone hole, El Nino and human-induced global warming. GE credit: QL, SE, SL, VL. Effective: 2007 Spring Quarter.

ATM 006—Fundamentals of Atmospheric Pollution (3)

Lecture—3 hour(s). Effects of human emissions on the atmosphere: smog, ozone pollution, and ozone depletion; indoor air pollution; global warming; acid rain. Impacts of these problems on the earth, ecosystems, and humans. Strategies to reduce atmospheric pollution. GE credit: SE, SL, VL. Effective: 2003 Fall Quarter.

ATM 010—Severe & Unusual Weather (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): High school physics. Introduction to physical principles of severe and unusual weather: flood, blizzards, thunderstorms, lightning, tornadoes, and hurricanes. Emphasis on scientific perspective and human context. Not open to students who have received credit for ATM 100. (Former ATM 100.) GE credit: QL, SE, SL, VL. Effective: 1997 Spring Quarter.

ATM 060—Introduction to Atmospheric Science (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (MAT 016A or MAT 021A); (PHY 007A or PHY 009A). Fundamental principles of the physics, chemistry, and fluid dynamics underlying weather and climate. Solar radiation, the greenhouse effect, and the thermal budget of the Earth. Clouds and their formation, convection, precipitation, mid-latitude storm systems. GE credit: QL, SE, VL. Effective: 2011 Fall Quarter.

ATM 092—Atmospheric Science Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 099—Special Study for Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 110—Weather Observation & Analysis (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ATM 060. Acquisition, distribution and analysis of meteorological data. Vertical sounding analysis, stability indices, probability of local severe weather, weather map analysis. Use of National Weather Service analyses and forecast products. Laboratory makes use of computer-generated analyses. GE credit: OL, QL, SE, VL. Effective: 1997 Winter Quarter.

ATM 111—Weather Analysis & Prediction (3)

Lecture—3 hour(s). Prerequisite(s): ATM 110; ATM 121B; (ATM 111L (can be concurrent) or ATM 111LY (can be concurrent)); Knowledge of a programming language. Tools for analyzing observed properties of mid-latitude weather systems. The analysis-forecast system, including various weather forecast models. General structure and properties of mid-latitude weather systems. GE credit: QL, SE, VL. Effective: 2018 Winter Quarter.

ATM 111LY—Weather Analysis & Prediction Laboratory (2)

Laboratory—2 hour(s); Web Virtual Lecture—4 hour(s). Prerequisite(s): ATM 111 (can be concurrent). Subjective and objective analysis of weather data. Web-based learning of the analysis-forecast system and various weather forecasting situations. Weather map interpretation and forecast discussions. (P/NP grading only.) GE credit: OL, QL, SE, VL. Effective: 2013 Fall Quarter.

ATM 112—Weather Forecasting Practice (2)

Discussion—2 hour(s); Laboratory—1 hour(s). Prerequisite(s): ATM 110. Formal practice in preparing local weather forecasts. Analysis of current weather conditions and recent model performance. Verification and discussion of prior forecast. Interpretation of current forecast model guidance. Posting of forecast. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 1999 Fall Quarter.

ATM 115—Hydroclimatology (3)

Lecture—3 hour(s). Prerequisite(s): ATM 060. Examination of climate as the forcing function for the hydrologic system. Emphasis on seasonal variations in the relationship between precipitation and evapotranspiration for meso-scale areas. Watershed modeling of floods and drought for evaluating the effects of climatic fluctuations. GE credit: SE, SL. Effective: 1997 Winter Quarter.

ATM 116—Modern Climate Change (3)

Lecture—3 hour(s). Factors that determine the Earth's climate, including natural and human-caused changes. Impacts of climate change. Possible future climates and policies to reduce human emissions of greenhouse gases. GE credit: QL, SE, SL, VL. Effective: 2017 Fall Quarter.

ATM 120—Atmospheric Thermodynamics & Cloud Physics (4)

Lecture—3 hour(s); Extensive Problem Solving—3 hour(s). Prerequisite(s): MAT 021C; PHY 009B; ATM 060 (can be concurrent). Atmospheric composition and structure, thermodynamics of atmospheric gases, thermal properties of dry and moist air, atmospheric stability; cloud nucleation, cloud growth by condensation and collision, cloud models. GE credit: QL, SE, VL. Effective: 2000 Fall Quarter.

ATM 121A—Atmospheric Dynamics (4)

Lecture—3 hour(s); Extensive Problem Solving. Prerequisite(s): ATM 120; MAT 021D; PHY 009B. Fundamental forces of atmospheric flow; noninertial reference frames; development of the equations of motion for rotating stratified atmospheres; isobaric and natural coordinate systems; geostrophic flow; thermal wind; circulation and vorticity. GE credit: QL, SE. Effective: 2001 Winter Quarter.

ATM 121B—Atmospheric Dynamics (4)

Lecture—3 hour(s); Extensive Problem Solving. Prerequisite(s): ATM 121A. Dynamics of fluid motion in geophysical systems; quasi-geostrophic theory; fundamentals of wave propagation in fluids; Rossby waves; gravity waves; fundamentals of hydrodynamic instability; two-level model; baroclinic instability and cyclogenesis. GE credit: QL, SE. Effective: 2001 Spring Quarter.

ATM 124—Meteorological Instruments & Observations (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): ATM 060. Modern meteorological instruments and their use in meteorological observations and measurements. Both standard and micrometeorological instruments are included. GE credit: QL, SE, SL, VL. Effective: 1997 Winter Quarter.

ATM 128—Radiation & Satellite Meteorology (4)

Discussion/Laboratory—3 hour(s); Extensive Problem Solving—1 hour(s). Prerequisite(s): ATM 060; PHY 009B; MAT 022B; MAT 021D. Concepts of atmospheric radiation and the use of satellites in remote sensing. Emphasis on the modification of solar and infrared radiation by the atmosphere. Estimation from satellite data of atmospheric variables such as temperatures and cloudiness. GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

ATM 133—Biometeorology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 016B; one course in a biological discipline or consent of instructor. Atmospheric and biological interactions. Physical and biological basis for water vapor, carbon dioxide and energy exchanges with the atmosphere associated with plants and animals, including humans. Microclimate of plant canopies and microclimatic modification such as frost protection and windbreaks. GE credit: QL, SE, SL, VL. Effective: 2001 Winter Quarter.

ATM 149—Air Pollution (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better). Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ECI 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ATM 150—Introduction to Computer Methods in Physical Sciences (4)

Lecture—3 hour(s); Discussion/Laboratory—2 hour(s). Prerequisite(s): MAT 022B; PHY 009B; computer programming course such as ECS 030; additional courses in fluid dynamics (ATM 121A or ENG 103) and in Fourier transforms (MAT 118C or PHY 104A) helpful but not required. Enrollment limited to 12, preference to Atmospheric Science majors. Computational techniques used in physical sciences. Integral and differential equation numerical solution: mainly finite differencing and spectral (Fourier transform) methods. Time series applications (time-permitting). Specific applications drawn from meteorology. Accelerated introduction to FORTRAN including programming assignments. (P/NP grading only.) GE credit: SE. Effective: 2005 Fall Quarter.

ATM 158—Boundary-Layer Meteorology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ATM 121A. Dynamics of the atmosphere nearest the Earth's surface. Friction and heat transfer. Properties of turbulent flows; statistical and spectral techniques; use and interpretation of differential equations. Emphasis on the importance to weather, air pollution, and the world's oceans. GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

ATM 160—Introduction to Atmospheric Chemistry (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 002B. Quantitative examination of current local, regional and global problems in atmospheric chemistry (including photochemical smog, acid deposition, climate change, and stratospheric ozone depletion) using fundamental concepts from chemistry. Basic chemical modeling of atmospheric reaction systems. GE credit: QL, SE, SL, VL. Effective: 2000 Winter Quarter.

ATM 192—Atmospheric Science Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Three upper division units in Atmospheric Science. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Three upper division units in Atmospheric Science and at least an overall B average. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 215—Advanced Hydroclimatology (3)

Lecture—3 hour(s). Prerequisite(s): ATM 115. Theoretical and applied aspects of energy and mass fluxes linking the earth's surface, atmosphere, and hydrologic system. Emphasis on regional scale analysis and modeling, spatial data representation, and climate change influences on precipitation and its hydroclimatic expression. Effective: 1998 Spring Quarter.

ATM 221—Advanced Atmospheric Dynamics (3)

Lecture—3 hour(s). Prerequisite(s): ATM 121B. Conditions for instability in stratified atmospheres; baroclinic instability; forced topographic Rossby Waves; wave-mean flow interaction theory; tropical dynamics; stratospheric dynamics. Effective: 1997 Winter Quarter.

ATM 223—Advanced Boundary-Layer Meteorology (3)

Lecture—3 hour(s). Prerequisite(s): ATM 230. Characteristics of the atmospheric boundary layer under convective and nocturnal conditions. Heat budget at the surface and boundary layer forcing. Similarity theory and scaling of the boundary layer. Measurement and simulation techniques. Effective: 1997 Winter Quarter.

ATM 230—Atmospheric Turbulence (3)

Lecture—3 hour(s). Prerequisite(s): ATM 121B or ATM 158. Dynamics and energetics of turbulence in the atmosphere including vorticity dynamics. Statistical description of turbulence; Eulerian and Lagrangian scales, spectral analysis, conditional sampling techniques. Turbulent diffusion; the closure problem, gradient-diffusion and second-order methods. Effective: 1997 Winter Quarter.

ATM 231—Advanced Air Pollution Meteorology (3)

Lecture—3 hour(s). Prerequisite(s): ATM 160; ATM 149A; course in fluid dynamics. Processes determining transport and diffusion of primary and secondary pollutants. Models of chemical transformation, of the atmospheric boundary layer and of mesoscale wind fields, as applicable to pollutant dispersion problems. Effective: 1997 Spring Quarter.

ATM 233—Advanced Biometeorology (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): ATM 133; or Consent of Instructor. Current topics in biometeorology. Physical and biological basis for water vapor, other gases, and energy exchange with the atmosphere. Topics include modeling and measuring turbulent transport from plant canopies, surface temperatures and energy budgets, bio-aerosol physics and aerobiology. Effective: 1997 Winter Quarter.

ATM 240—General Circulation of the Atmosphere (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ATM 121B. Large-scale, observed atmospheric properties. Radiation, momentum, and energy balances derived and compared with observations. Lectures and homework synthesize observations and theories, then apply them to understand the large-scale circulations. Effective: 2000 Winter Quarter.

ATM 241—Climate Dynamics (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): ATM 121B. Dynamics of large-scale climatic variations over time periods from weeks to centuries. Description of the appropriate methods of analysis of atmospheric and oceanic observations. Conservation of mass, energy and momentum. Introduction to the range of climate simulations. Effective: 1997 Winter Quarter.

ATM 244—Cloud & Precipitation Physics (3)

Lecture—3 hour(s). Restricted to Atmospheric Science graduate group students or consent of instructor. Observations and modeling of clouds and precipitation. Physics and parameterization of cloud microphysical processes including nucleation, condensation/evaporation, deposition/sublimation, collision-coalescence and sedimentation. Effective: 2020 Spring Quarter.

ATM 245—Climate Change, Water & Society (4)

Lecture—4 hour(s). Limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as HYD 245, ECL 245.) Effective: 2015 Spring Quarter.

ATM 250—Meso-Scale Meteorology (3)

Lecture—3 hour(s). Prerequisite(s): ATM 150; Graduate standing; course in partial differential equations or consent of instructor. The study of weather phenomena with horizontal spatial dimensions between 2.5 and 2500 kilometers. Methods of observational study and numerical modeling of the structure and temporal behavior of these weather systems. Effective: 1997 Winter Quarter.

ATM 255—Numerical Modeling of the Atmosphere (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): ATM 121B; ENG 005; ATM 150 recommended. Principles of numerical modeling of the dynamic, thermodynamic and physical processes of the atmosphere. Hands-on experiments on model development using the shallow water equations and the primitive equations. Operational forecast models. Effective: 1997 Winter Quarter.

ATM 260—Atmospheric Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): ATM 160. Chemistry and photochemistry in tropospheric condensed phases (fog, cloud, and rain drops and aerosol particles). Gas-drop and gas-particle partitioning of compounds and effects of reactions in condensed phases on the fates and transformations of tropospheric chemical species. Effective: 1998 Spring Quarter.

ATM 265—The Art of Climate Modeling (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): ATM 121A. Over the past fifty years, global models have given us incredible insight into the Earth system. Provides an introduction to these models, with a focus on their design and the science questions they have been built to address. Effective: 2020 Winter Quarter.

ATM 270A—Topics in Atmospheric Science: Meteorological Statistics (1-3)

Discussion—1-3 hour(s). Applications and concepts in meteorological statistics. Effective: 1997 Winter Quarter.

ATM 270B—Topics in Atmospheric Science: Computer Modeling of the Atmosphere (1-3)

Discussion—1-3 hour(s). Applications and concepts in computer modeling of the atmosphere. Effective: 1997 Winter Quarter.

ATM 270C—Topics in Atmospheric Science: Design of Experiments & Field Studies in Meteorology (1-3)

Discussion—1-3 hour(s). Applications and concepts in design of experiments and field studies in meteorology. Effective: 1997 Winter Quarter.

ATM 270D—Topics in Atmospheric Science: Solar & Infrared Radiation in the Atmosphere (1-3)

Discussion—1-3 hour(s). Applications and concepts in solar and infrared radiation in the atmosphere. Effective: 1997 Winter Quarter.

ATM 270E—Topics in Atmospheric Science: Aerosol & Cloud Physics (1-3)

Discussion—1-3 hour(s). Applications and concepts in aerosol and cloud physics. Effective: 1997 Winter Quarter.

ATM 270F—Topics in Atmospheric Science: Atmospheric Chemistry (1-3)

Discussion—1-3 hour(s). Applications and concepts in atmospheric chemistry. Effective: 1997 Winter Quarter.

ATM 270G—Topics in Atmospheric Science: General Meteorology (1-3)

Discussion—1-3 hour(s). Applications and concepts in general meteorology. Effective: 1997 Winter Quarter.

ATM 280A—Air Quality Policy in the Real World (4)

Project (Term Project). Prerequisite(s): (ATM 149 or ECI 149); ECI 242; Consent of Instructor. Or equivalent of ECI 242. In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing. Effective: 2007 Winter Quarter.

ATM 280B—Air Quality Policy in the Real World (4)

Project (Term Project). Prerequisite(s): ATM 280A; and Consent of Instructor. In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing. Effective: 2007 Winter Quarter.

ATM 290—Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing in Atmospheric Science or related field. Current developments in selected areas of atmospheric research. Topics will vary according to student and faculty interests. (S/U grading only.) Effective: 1997 Winter Quarter.

ATM 291A—Research Conference in Atmospheric Science: Air Quality Meteorology (1-3)

Lecture/Discussion—1-3 hour(s). Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Air Quality Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291B—Research Conference in Atmospheric Science: Biometeorology (1-3)

Lecture/Discussion—1-3 hour(s). Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Biometeorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291C—Research Conference in Atmospheric Science: Boundary Layer Meteorology (1-3)

Lecture/Discussion—1-3 hour(s). Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Boundary Layer Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291D—Research Conference in Atmospheric Science: Climate Change (1-3)

Lecture/Discussion—1-3 hour(s). Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Climate Change. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291E—Research Conference in Atmospheric Science: General Meteorology (1-3)

Lecture/Discussion—1-3 hour(s). Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in General Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291F—Research Conference in Atmospheric Science: Atmospheric Chemistry (1-3)

Lecture/Discussion—1-3 hour(s). Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Atmospheric Chemistry. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ATM 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ATM 393—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

AVS—Avian Sciences

Courses in AVS:

AVS 011—Introduction to Poultry Science (3)

Lecture—3 hour(s). The mosaic of events that have tied poultry science to other scientific disciplines and poultry to humans. Poultry science techniques and production methods from the time of domestication to the present. One field trip required. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 013—Birds, Humans & the Environment (3)

Lecture—2 hour(s); Discussion—1 hour(s). Restricted to students with lower division standing. Interrelationships of the worlds of birds and humans. Lectures, discussions, field trips and projects focus on ecology, avian evolution, physiology, reproduction, flight, behavior, folklore, identification, ecotoxicology and conservation. Current environmental issues are emphasized. Half-day field trip. GE credit: SE, SL. Effective: 2017 Winter Quarter.

AVS 014L—Management of Captive Birds (2)

Fieldwork—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. One weekly discussion and field trip to study practical captive management (housing, feeding, equipment, marketing, diseases). Visit facilities rearing birds such as commercial parrots, hobbyist exotics, ostrich, raptors, waterfowl, game birds, poultry and pigeons. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 015L—Captive Raptor Management (2)

Laboratory—3 hour(s); Independent Study—3 hour(s). Hands-on experience handling birds of prey. Students are taught all of the skills required to handle and care for raptors, including husbandry, biology, habitat requirements, cage design, veterinary care, rehabilitation methods, research potential and long-term care requirements. One Saturday fieldtrip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LA—Raptor Migration & Population Fluctuations (2)

Fieldwork—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LB—Raptor Migration & Population Fluctuations (2)

Fieldwork—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LC—Raptor Migration & Population Fluctuations (2)

Fieldwork—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 092—Internship in the Avian Sciences (1-12)

Variable—3-36 hour(s). Prerequisite(s): Consent of Instructor. Sophomore standing preferred. Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential. (P/NP grading only.) Effective: 1997 Winter Quarter.

AVS 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Fall Quarter.

AVS 099—Special Study for Undergraduates (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AVS 100—Avian Biology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; BIS 002B; ANS 002 preferred. Biology of domesticated poultry, specifically chickens and turkeys. Avian genetics, immunology, reproduction, growth and development, broiler and layer management. GE credit: SE. Effective: 2016 Spring Quarter.

AVS 103—Avian Development & Genomics (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; BIS 002B. Unique features of avian development and genomics: Incubation; Staging; Egg Structure/Function; Fertilization; Pre-oviposital; Oviposition, Cold Torpor; Post-oviposital Development; Organogenesis, Growth; Sexual Differentiation; Extraembryonic Membranes; Mortality/Hatching; Genome Organization; Comparative Avian Genomics; Telomere Biology; Sex Chromosomes/Sex Determination; Advanced Technologies; Genome Manipulation; Mutations. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 115—Raptor Biology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; Or equivalent. Study of birds of prey: classification, distribution, habits, migration, unique anatomical and physiological adaptations, natural and captive breeding, health and diseases, environmental concerns, conservation, legal considerations, rehabilitation, and falconry. Includes two Saturday field trips. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 121—Avian Reproduction (2)

Lecture—2 hour(s). Prerequisite(s): BIS 002A; BIS 002B. Breeding cycles and reproductive strategies, egg and sperm formation, incubation, sexual development, imprinting, hormonal control of reproductive behavior and song. Species coverage includes wild and companion birds. Course has a physiological orientation. GE credit: SE, SL. Effective: 2016 Fall Quarter.

AVS 123—Management of Birds (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; BIS 002B. Captive propagation of birds, including reproduction, genetic management, health, feeding, artificial incubation, artificial insemination, and related legal aspects, including trade and smuggling. Emphasis on exotic species and the role of captive propagation in conservation. GE credit: SE, SL, WE. Effective: 2016 Fall Quarter.

AVS 149—Egg Production Management (2)

Lecture—2 hour(s). Prerequisite(s): AVS 011; or Consent of Instructor. Management of commercial table egg flocks as related to environment, nutrition, disease control, economics, housing, equipment, egg processing and raising replacement pullets. Offered in alternate years. One Saturday field trip required. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 150—Nutrition of Birds (1)

Lecture—1 hour(s). Prerequisite(s): ABI 103 (can be concurrent) or BIS 103 (can be concurrent). Principles of nutrition specific to avian species, including feedstuffs, feed additives, nutrient metabolism, energy systems, and nutritional support of egg production and growth. Use of computers for feed formulation to support production. GE credit: QL, SE. Effective: 2016 Fall Quarter.

AVS 160—Designing & Performing Experiments in Avian Sciences (2)

Laboratory—6 hour(s). Prerequisite(s): AVS 100 or WFC 111; or Consent of Instructor. Experiments in current problems in avian biology. Introduction to experimental design. Students choose a project, design a protocol, perform an experiment and report their findings. May be repeated for credit with consent of instructor. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 170—Advanced Avian Biology (4)

Lecture/Discussion—3 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): AVS 100 or WFC 111. Ecology, behavior, functional morphology and lifehistory evolution of birds. Emphasis on the importance of body size as a principle determinant of most aspects of avian performance from lifespan to reproduction and species abundance. Analytical synthesis and critical thought emphasized. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 190—Seminar in Avian Sciences (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

AVS 192—Internship in Avian Sciences (1-12)

Laboratory—3-36 hour(s). Prerequisite(s): Consent of Instructor. Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential. (P/NP grading only.) Effective: 2016 Fall Quarter.

AVS 195—Topics in Current Research (1-3)

Variable—1-3 hour(s); Lecture/Discussion. Prerequisite(s): Consent of Instructor. Discussion of topics of current interest in avian sciences. May be repeated up to 3 time(s). Effective: 1997 Winter Quarter.

AVS 197T—Tutoring in Avian Sciences (1-3)

Tutorial—1-3 hour(s). Prerequisite(s): Consent of Instructor. Tutoring of students in lower division avian sciences courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures. (P/NP grading only.) Effective: 2016 Fall Quarter.

AVS 198—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Restricted to upper division students. Directed group study. (P/NP grading only.) Effective: 2017 Winter Quarter.

AVS 199—Special Study for Advanced Undergraduates (1-5)

Variable—1-5 hour(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

AVS 203—Advanced Avian Development & Genomics (1)

Discussion—1 hour(s). Prerequisite(s): AVS 103 (can be concurrent); Graduate standing. In consultation with the instructor, students develop a lecture and associated instructional materials, i.e., lesson plan, including justification, reading and presentation and evaluation aids. Topic must complement a topic covered in AVS 103. Effective: 2013 Fall Quarter.

AVS 290—Seminar (1)

Seminar—1 hour(s). Reports and discussions of recent advances and selected topics of current interest in avian genetics, physiology, nutrition, and poultry technology. Effective: 1997 Winter Quarter.

AVS 290C—Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion. (S/U grading only.) Effective: 1997 Winter Quarter.

AVS 297T—Supervised Teaching in Avian Sciences (1-4)

Tutorial—1-4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Tutoring of students in lower, upper division, and graduate courses in Avian Sciences; weekly conference with instructor in charge of course; written critiques of teaching methods in lectures and laboratories. (S/U grading only.) Effective: 1997 Winter Quarter.

AVS 298—Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

AVS 299—Research (1-12)

Variable—1-12 hour(s). Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

BAX—Business Analytics

Courses in BAX:**BAX 400—Foundations of Analytics (4)**

Lecture—3 hour(s). Focuses on teaching the fundamentals of R and SQL. Introduces the topic of numerical optimization, and review the concepts of linear algebra and calculus. Effective: 2019 Fall Quarter.

BAX 401—Introduction to Business Analytics (3)

Lecture—3 hour(s). Introduction to the process of analyzing raw data to gain profitable business insight. Applications selected across organizational functions include prediction, process improvement, and general operational decision-making. Effective: 2019 Fall Quarter.

BAX 402—Organizational Issues in Implementing Analytics (3)

Lecture—3 hour(s). Review the evolution of analytics in business, how to assemble and manage analytics teams, and the decision life-cycle. Emphasis on structuring communications to improve buy-in from peers and non-quantitatively-inclined colleagues. Effective: 2019 Fall Quarter.

BAX 403—Organizational Effectiveness Workshop (2)

Lecture—2 hour(s). Examine leadership, communication, and project management within the business, legal and societal contexts in which analytics is applied. Emphasis on privacy, data security, responsibility, and ethics. Effective: 2017 Fall Quarter.

BAX 411—Problem Structuring (2)

Lecture—2 hour(s). Synthesize data-rich business challenges using analytic frameworks and techniques for modeling business problems. Emphasis on modeling uncertainty, optimizing multiple criteria, and building consensus. Effective: 2017 Fall Quarter.

BAX 421—Data Management (2)

Lecture—2 hour(s). Introduction to the extraction, assembly, storage and organization of data in IT systems. Effective: 2017 Fall Quarter.

BAX 422—Data Design & Representation (2)

Lecture—2 hour(s). Introduction to business applications involving standard, streaming, and network data. Emphasis on scalable technologies for processing and analyzing big data for diverse applications. Effective: 2019 Fall Quarter.

BAX 423—Big Data (3)

Lecture—3 hour(s). Learn computational reasoning about data representations by mapping conceptual data models to relational structures and analyzing database architectures and design trade-offs. Effective: 2019 Fall Quarter.

BAX 431—Data Visualization (2)

Lecture—2 hour(s). Extract insights using visualization tools in R, Python, ManyEyes, HTML/CSS, etc. Standard (histograms, boxplots, and dashboards) and specialized (3D, animation, word clouds) formats are covered. Effective: 2017 Fall Quarter.

BAX 441—Statistical Exploration & Reasoning (3)

Lecture—3 hour(s). Introduction to statistical reasoning and inference extraction from large data-sets. Learn to obtain preliminary insights and form initial hypotheses through exploratory data analysis (EDA). Effective: 2019 Fall Quarter.

BAX 442—Advanced Statistics (3)

Lecture—3 hour(s). Continue exploring statistical reasoning using maximum likelihood estimation, Bayesian models, nonparametric models, Monte Carlo Markov Chain, time series, model specification, model selection, and dimension reduction. Effective: 2017 Fall Quarter.

BAX 443—Analytic Decision Making (3)

Lecture—3 hour(s). Using spreadsheets and specialized modeling tools, explore structured problem solution through meta-heuristics, Monte Carlo simulation, and mathematical optimization. Effective: 2017 Fall Quarter.

BAX 452—Machine Learning (3)

Lecture—3 hour(s). Construct algorithms for learning from data and analyze the process for deriving business intelligence. Coverage of supervised and unsupervised learning, neural networks, etc. Effective: 2017 Fall Quarter.

BAX 453—Application Domains (3)

Lecture—3 hour(s). Students explore contemporary and emerging domains for high-yield applications of analytics. Topics: social network analytics, search analytics, health care analytics, Internet of things, supply chain/operations analytics, and marketing analytics. Effective: 2017 Winter Quarter.

BAX 461—Practicum Initiation (3)

Lecture—3 hour(s). Students form teams, scope their project in light of team capability and business opportunity, create a preliminary structure and solution approach for the core problem, and assess data quality and project risks. Effective: 2019 Fall Quarter.

BAX 462—Practicum Elaboration (2)

Lecture—2 hour(s). Building on problems chosen in BAX 461, teams refine the business opportunity and draw insights from exploratory data analysis. Effective: 2019 Fall Quarter.

BAX 463—Practicum Analysis & Implementation (3)

Lecture—3 hour(s). Focus on completing project deliverables by polishing statistical and non-statistical quantitative analysis, generating insights for technical and business stakeholders, integrating proposed solutions into partner workflows and organizations, and disseminating the findings and outcomes through presentations and publications. Effective: 2019 Fall Quarter.

BAX 464—Practicum Implementation (4)

Lecture—2 hour(s); Project (Term Project); Term Paper; Discussion. Project teams complete analysis, plan deployment and obtain client buy-in. Culminates in a project presentation, preferably including representatives from the client organization. Effective: 2017 Fall Quarter.

BAX 493—People Analytics (3)

Lecture—2 hour(s). Open to students enrolled in the Masters in Business Analytics Program only. Students develop an understanding of how to position themselves as strategic partners in a company's talent management efforts. Explore a range of topics related to people analytics, including hiring and selection, performance evaluation, training/development, promotion, compensation, social networks, diversity, and retention. Effective: 2020 Spring Quarter.

BAX 493A—Topics in Business Analytics—Cloud Computing (1)

Lecture—1 hour(s). Open to students enrolled in the MSBA program only. Covers the foundations of cloud computing models including (IaaS) Infrastructure as a Service, (PaaS) Platform as a Service, and Software as a Service (SaaS). Effective: 2019 Summer Quarter.

BAX 493B—Topics in Business Analytics—Implementing Machine Learning on the Cloud (1)

Lecture—1 hour(s). Open to students enrolled in the MSBA program only. Covers the four layers of Machine Learning in the cloud: AI services, ML services, ML Engines & Frameworks, and Infrastructure & Serverless Environments and how to implement solutions on all of the layers by using the best abstraction for the task at hand. Effective: 2019 Summer Quarter.

BCB—Biochemistry, Molecular, Cellular & Developmental Biology

Courses in BCB:

BCB 210—Molecular Genetics & Genomics (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): BIS 101; MCB 121; or equivalent courses. Pass One restricted to graduate students. Emphasizes molecular genetic and genomic approaches to address fundamental biological questions. Introduces and emphasizes the strengths of prokaryotic and eukaryotic model systems and serves as building block for the BMCDB core courses, which use model systems to develop their themes. Effective: 2015 Fall Quarter.

BCB 211—Macromolecular Structure & Interactions (3)

Lecture—3 hour(s). Prerequisite(s): BIS 102; Or the equivalent, or consent of instructor. Pass One restricted to graduate students. Conceptual and quantitative basis for macromolecular structure-function relationships. Investigation of the paradigm form follows function. Review of key elements of protein, nucleic acid, and membrane structure. Exploration of specific macromolecular associations by analyzing chemical structure and physical-chemical behavior. No credit for students that have taken BCB 221A. Effective: 2014 Fall Quarter.

BCB 212—Cell Biology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 104; Or the equivalent, or consent of instructor. Pass One restricted to graduate students. Analysis of basic processes governing cell organization, division, and transport. Study of the integration and regulation of cell behavior in response to changes in cellular environment. No credit for students that have taken BCB 221D. Effective: 2014 Fall Quarter.

BCB 213—Developmental Biology (3)

Lecture—3 hour(s). Prerequisite(s): Undergraduate biology course or consent of instructor. Pass One restricted to graduate students. Fundamental principles in embryonic development that guide application of modern cellular and genetic approaches to understand developmental mechanisms. Emphasis on experimental approaches used to critically address scientific questions. Effective: 2014 Fall Quarter.

BCB 214—Molecular Biology (3)

Lecture—3 hour(s). Prerequisite(s): BCB 211; Or the equivalent, or consent of instructor. Pass One restricted to graduate students. Investigation of the basic cellular processes in prokaryotes and eukaryotes that govern the central dogma of molecular biology (DNA-RNA-protein). No credit for students that have taken BCB 221C. Effective: 2014 Fall Quarter.

BCB 215—Graduate Reading Course (2)

Discussion—10 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Development of critical reading skills through study of major paradigm advances in specialized fields of biochemistry, molecular, cell, and developmental biology. Emphasis on active learning and student participation. Guided analysis of literature and major advances in field of study. May be repeated up to 2 time(s) when topic differs. Effective: 2014 Fall Quarter.

BCB 220L—Advanced Biochemistry Laboratory Rotations (5)

Laboratory—15 hour(s). Prerequisite(s): BCB 210; BCB 211 (can be concurrent); BCB 120L or the equivalent. Open to graduate students. Two five-week assignments in BMCDB research laboratories. Individual research problems with emphasis on methodological/procedural experience, experimental design, proposal writing and oral communication of results. May be repeated up to 2 time(s). Effective: 2014 Summer Session 1.

BCB 251—Molecular Mechanisms in Early Development (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing or consent of instructor; introductory background in developmental biology and/or cell biology recommended. Analysis of the early events of development including: germ cells and other stem cells, gametogenesis, meiosis, imprinting, fertilization, genetically-engineered organisms, egg activation and establishment of embryonic polarity with focus on cellular events including gene regulation and cell signaling. Effective: 2014 Fall Quarter.

BCB 255—Molecular Mechanisms in Pattern Formation & Development (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing or consent of instructor; introductory background in developmental biology and/or genetics recommended. Genetic and molecular analysis of mechanisms that control animal development after fertilization. Establishment of embryonic axes, cell fate and embryonic pattern; induction, apoptosis, tissue patterning. Critical reading of current literature in *C.elegans*, *Drosophila*, and mouse genetic model systems. Effective: 2014 Fall Quarter.

BCB 256—Cell & Molecular Biology of Cancer (3)

Lecture—1.5 hour(s); Seminar—1.5 hour(s). Prerequisite(s): BCB 210; BCB 212; BCB 213; BCB 214. Analysis of the pathologic alterations of cancer cells and therapeutic opportunities; with emphasis on animal models, tumor immunotherapy, stress response, metabolism, epigenetics, microRNAs and non-coding RNAs, and microbiota and inflammation. Effective: 2018 Spring Quarter.

BCB 257—Cell Proliferation & Cancer Genes (3)

Lecture—1.5 hour(s); Seminar—1.5 hour(s). Prerequisite(s): BCB 221C & BCB 221D or equivalent courses. Genetic and molecular alterations underlying the conversion of normal cells to cancers, emphasizing regulatory mechanisms and pathways. Critical reading of the current literature and development of experimental approaches. Effective: 2015 Fall Quarter.

BCB 290—Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Consent of instructor and/or graduate standing. Presentation and discussion of faculty and graduate-student research. (S/U grading only.) Effective: 2011 Fall Quarter.

BCB 298—Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Group Study (S/U grading only.) Effective: 2011 Fall Quarter.

BCB 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Research (S/U grading only.) Effective: 2011 Fall Quarter.

BCB 396—Methods of Teaching (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Teaching assistant training practicum. (S/U grading only.) Effective: 2020 Spring Quarter.

BCM—Biological Chemistry

Courses in BCM:

BCM 092—Internship in Biological Chemistry (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Supervised work experience in biological chemistry and related fields (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 192—Internship in Biological Chemistry (1-12)

Internship—3-36 hour(s). Prerequisite(s): Upper division standing; approval of project prior to internship by preceptor. Supervised work experience in Biological Chemistry and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 198—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. For undergraduate students desiring to explore particular topics in depth. Lecture and conferences may be involved. (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 209—Prostaglandins/Leukotrienes & Related Lipids (2)

Lecture—2 hour(s). Prerequisite(s): (BCP 101A and BCP 101B) or (PHC 101A and PHC 101B) or (PGG 100A and PGG 100B). Oxidative desaturation/elongation of polyunsaturated fatty acids. Biosynthesis of prostaglandins/leukotrienes from polyunsaturated fatty acids. Chemistry, biochemistry, and metabolism. Nutritional regulation. Physiological/pathophysiological implications; pharmacological and clinical relevance. Effective: 1997 Winter Quarter.

BCM 217—Molecular Genetics of Fungi (3)

Lecture—3 hour(s). Prerequisite(s): PLP 130; PLP 215X; BCP 101B; BOT 119; GGG 100; GGG 102A; Graduate standing in a biological science; MIC 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. (Same course as PLP 217.) Effective: 1997 Winter Quarter.

BCM 222—Mechanisms of Translational Control (2)

Lecture—1 hour(s); Discussion—1 hour(s). Prerequisite(s): BCP 201C or Consent of Instructor. Molecular mechanisms of protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. An advanced graduate-level treatment of topics of current interest, with readings and discussion of primary papers from the literature. Effective: 1997 Winter Quarter.

BCM 230—Practical NMR Spectroscopy & Imaging (1)

Lecture—1 hour(s). Prerequisite(s): CHE 107A; CHE 107B; (PHY 009A, PHY 009B, PHY 009C; or PHY 005A, PHY 005B, PHY 005C) or consent of instructor. Basic theory, experimental methods, and instrumentation of NMR. Enables understanding of NMR spectroscopy and imaging experiments. (S/U grading only.) Effective: 1997 Winter Quarter.

BCM 231—Biological Nuclear Magnetic Resonance (3)

Lecture—3 hour(s). Prerequisite(s): MCB 221A; Or equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as BPH 231.) Effective: 1997 Winter Quarter.

BCM 291—Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)

Seminar—1 hour(s). Prerequisite(s): Student in Genetics Graduate Group or consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as BCM 491.) (S/U grading only.) Effective: 1999 Fall Quarter.

BCM 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. Effective: 1997 Winter Quarter.

BCM 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

BCM 410A—Molecular Medicine (4)

Lecture—3 hour(s); Discussion—3 hour(s); Web Virtual Lecture—1 hour(s). Prerequisite(s): Consent of Instructor. Restricted to Medical Students only. Biochemistry of proteins and nucleic acids. Includes an introduction to cancer biology and a full discussion of carbohydrate metabolism. Molecular aspects of human disease are highlighted throughout. (P/F grading only.) Effective: 2015 Summer Quarter.

BCM 491—Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)

Seminar—1 hour(s). Prerequisite(s): Student in Genetics Graduate Group or consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as BCM 291.) (H/P/F grading only.) Effective: 1999 Fall Quarter.

BCM 493—Medical Genomics (6)

Clinical Activity—4 hour(s); Lecture—4 hour(s); Laboratory—12 hour(s). Prerequisite(s): Consent of Instructor. Four-week module will focus on the clinical methods and applications of medical genomics. Topics will include an introduction to the human genome and human genomics, genetic and epigenetic variation and the ethics of medical genomics. (H/P/F grading only.) Effective: 2012 Spring Quarter.

BCM 497T—Tutoring in Biological Chemistry (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

BCM 498—Group Study (1-5)

Variable. Prerequisite(s): Medical students with consent of instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

BCM 499—Research (1-12)

Variable. Prerequisite(s): Medical students with consent of instructor. Research with Department of Biological Chemistry. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

BIM—Engineering Biomedical

Courses in BIM:

BIM 001—Introduction to Biomedical Engineering (2)

Lecture—1 hour(s); Laboratory—3 hour(s). Pass One open to freshmen. Introduction to the field of biomedical engineering with emphasis on design, careers, and specializations, including (1) medical devices (2) cellular & tissue engineering, (3) biomechanics, (4) systems & synthetic biology, and (5) biomedical imaging. GE credit: SE. Effective: 2016 Fall Quarter.

BIM 020—Fundamentals of Bioengineering (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (CHE 002B C- or better or CHE 002BH C- or better); MAT 021D C- or better; PHY 009B; ENG 006. Basic principles of mass, energy and momentum conservation equations applied to solve problems in the biological and medical sciences. Only 2 units of credit to students who have previously taken ECH 051, ENG 105. GE credit: QL, SE, VL. Effective: 2019 Fall Quarter.

BIM 020L—Graphics Design for BME (2)

Lecture—1 hour(s); Laboratory—2 hour(s). Prerequisite(s): (CHE 002B or CHE 002BH C- or better); MAT 021D C- or better; PHY 009B; ENG 006; BIM 020 (can be concurrent). Computer-aided design and its application to problems in Biomedical Engineering. No credit for students who have previously taken ENG 004. GE credit: SE. Effective: 2020 Spring Quarter.

BIM 088V—Introduction to Research (2)

Web Virtual Lecture—2 hour(s). Introduction to types of research, including the basics of joint research with a faculty mentor. Self-assessments to identify areas of interest, priorities, and fit. Literature search and library skills used in early stages of research. Research safety, integrity, and intellectual property. GE credit: SS. Effective: 2020 Spring Quarter.

BIM 089A—Topics in Biomedical Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Restricted to lower division students. Topics in Biomedical Engineering. (A) Cellular and Molecular Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2012 Spring Quarter.

BIM 089B—Topics in Biomedical Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Restricted to lower division students. Topics in Biomedical Engineering. (B) Biomedical Imaging. May be repeated for credit when topic differs. GE credit: SE. Effective: 2012 Spring Quarter.

BIM 089C—Topics in Biomedical Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Restricted to lower division students. Topics in Biomedical Engineering. (C) Biomedical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2012 Spring Quarter.

BIM 099—Special Study for Undergraduates (1-5)

Variable. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2003 Winter Quarter.

BIM 102—Cellular Dynamics (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIS 002A; CHE 008B or CHE 118B. Open to College of Engineering students only. Fundamental cell biology for bioengineers. Emphasis on physical concepts underlying cellular processes including protein trafficking, cell motility, cell division and cell adhesion. Current topics including cell biology of cancer and stem cells will be discussed. Only 2 units of credit for students who have completed BIS 104. GE credit: SE. Effective: 2017 Spring Quarter.

BIM 105—Probability & Statistics for Biomedical Engineers (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 021D C- or better; ENG 006 (can be concurrent). Concepts of probability, random variables and processes, and statistical analysis with applications to engineering problems in biomedical sciences. Includes discrete and continuous random variables, probability distributions and models, hypothesis testing, statistical inference and Matlab applications. Emphasis on BME applications. GE credit: QL, SE, VL. Effective: 2013 Fall Quarter.

BIM 106—Biotransport Phenomena (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIM 020 C- or better; (BIM 116 or NPB 101); PHY 009B; (MAT 022B or MAT 027B). Open to Biomedical Engineering majors only. Principles of momentum and mass transfer with applications to biomedical systems; emphasis on basic fluid transport related to blood flow, mass transfer across cell membranes, and the design and analysis of artificial human organs. GE credit: QL, SE, SL, VL. Effective: 2020 Winter Quarter.

BIM 107—Manufacturing Processes for BME (2) *Review all entries*

Lecture/Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIM 020 C- or better. Open to BME majors only. Manufacturing processes and computer numerical control methods applied to the design and fabrication of biomedical devices. No credit for students who have previously taken EME 050. GE credit: SE. Effective: 2020 Fall Quarter.

BIM 107—Mathematical Methods for Biological Systems (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 006 C- or better; BIM 020; MAT 022B. Restricted to Biomedical Engineering majors only. Mathematical and computational modeling to solve biomedical problems. Topics include stochastic processes and Monte Carlo simulations, and partial differential equations. Introduced to numerical techniques in MATLAB. GE credit: QL, SE, VL. Effective: 2013 Fall Quarter.

BIM 108—Biomedical Signals & Control (4)

Lecture—4 hour(s). Prerequisite(s): ENG 006; ENG 017; (MAT 022B C- or better or MAT 027B C- or better). Restricted to Biomedical Engineering majors only. Systems and control theory applied to biomedical engineering problems. Time-domain and frequency-domain analyses of signals and systems, convolution, Laplace and Fourier transforms, transfer function, dynamic behavior of first and second order processes, and design of control systems for biomedical applications. No credit for students who have taken EEC 150A; 2 units of credit for students who have taken EME 171. GE credit: QL, SE. Effective: 2020 Winter Quarter.

BIM 109—Biomaterials (4)

Lecture—4 hour(s). Prerequisite(s): BIS 002A; CHE 002C or CHE 002CH; BIM 106. Restricted to upper division Engineering majors. Introduce important concepts for design, selection and application of biomaterials. Given the interdisciplinary nature of the subject, principles of polymer science, surface science, materials science and biology will be integrated into the course. GE credit: SE, SL, VL. Effective: 2018 Fall Quarter.

BIM 110A—Biomedical Engineering Senior Design Experience (3) *Review all entries*

Lecture/Discussion—1 hour(s); Project (Term Project)—6 hour(s). Prerequisite(s): BIM 110L (can be concurrent); BIM 111 (can be concurrent). Restricted to senior Biomedical Engineering majors (or by consent of instructor). Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a problem. Design may be geared towards current applications in biotechnology or medical technology. Continues in BIM 110B. GE credit: OL, SE, SL, VL. Effective: 2017 Spring Quarter.

BIM 110A—Biomedical Engineering Senior Design Experience (3) *Review all entries*

Lecture/Discussion—2 hour(s); Project (Term Project)—6 hour(s). Prerequisite(s): BIM 105; BIM 106; BIM 108; BIM 109; (BIM 116 or NPB 101). Restricted to senior Biomedical Engineering majors or by consent of instructor. Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a biomedical problem. Continues in BIM 110B. GE credit: SE, VL. Effective: 2020 Fall Quarter.

BIM 110B—Biomedical Engineering Senior Design Experience (3) *Review all entries*

Lecture/Discussion—2 hour(s); Project (Term Project)—6 hour(s). Prerequisite(s): BIM 110A. Restricted to senior Biomedical Engineering majors or by consent of instructor. Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a biomedical problem. GE credit: SE, VL. Effective: 2020 Fall Quarter.

BIM 110B—Biomedical Engineering Senior Design Experience (3) *Review all entries*

Lecture/Discussion—1 hour(s); Project (Term Project)—6 hour(s). Prerequisite(s): BIM 110A. Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a problem. Design may be geared towards current applications in biotechnology or medical technology. GE credit: OL, SE, SL, VL. Effective: 2014 Spring Quarter.

BIM 110L—Biomedical Engineering Senior Design Lab (2)

Laboratory—3 hour(s); Discussion/Laboratory—2 hour(s). Prerequisite(s): BIM 105; BIM 106; BIM 108; BIM 109; (BIM 116 or NPB 101). Restricted to Biomedical Engineering majors. Manufacturing processes, safety, computer-aided design techniques applied to fabrication of biomedical devices. GE credit: SE. Effective: 2020 Winter Quarter.

BIM 111—Biomedical Instrumentation Laboratory (6)

Lecture—4 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): BIM 105; BIM 108; (ENG 100 or EEC 100); (BIM 116 or NPB 101). Open to Biomedical Engineering majors only. Basic biomedical signals and sensors. Topics include analog and digital records using electronic, hydrodynamic, and optical sensors, and measurements made at cellular, tissue and whole organism level. GE credit: SE. Effective: 2015 Fall Quarter.

BIM 116—Physiology for Biomedical Engineers (5)

Lecture—2 hour(s); Discussion—3 hour(s). Prerequisite(s): BIS 002A C- or better; PHY 009C; MAT 022B recommended. Basic human physiology for the nervous, musculoskeletal, cardiovascular, respiratory, gastrointestinal, renal, and endocrine systems. Emphasis on small group design projects and presentations in interdisciplinary topics relating biomedical engineering to medical diagnostic and therapeutic applications. GE credit: OL, SE, SL, VL, WE. Effective: 2013 Fall Quarter.

BIM 117—Modeling Strategies for Biomedical Engineering (4)

Lecture—2 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): BIS 002A C- or better; MAT 022A C- or better. Restricted to upper division standing. Non-simulation strategies for modeling biomedical engineering systems, including natural and synthetic systems at the cell and molecular level. Formulating and testing hypotheses by translating real-world problems into appropriate mathematical models, translating mathematical results into real-world understanding, and gaining appreciation for how models contribute to the development cycle of biomedical engineering applications. GE credit: SE. Effective: 2018 Spring Quarter.

BIM 118—Microelectromechanical Systems (4)

Lecture—2 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 002A; ENG 017. Pass One restricted to upper division standing in Biomedical Engineering. Introduction to the theory and practice of microelectromechanical systems (MEMS), including fundamentals of micro-nanofabrication, microscale sensing and actuation, self assembly, microfluidics and lab-on-a-chip. Weekly hands-on laboratory sections are emphasized on implementation and utilization of MEMS technologies. GE credit: SE. Effective: 2017 Winter Quarter.

BIM 120—Introduction to Materials Science for Biomedical Engineers (4) *Review all entries*

Lecture—4 hour(s). Prerequisite(s): BIM 020 C- or better or ENG 105 C- or better; PHY 009C; MAT 022B recommended. Open to upper division BME students only. Historical perspective on materials usage in the body. Fundamental properties of materials and key considerations needed for material selection in the context of biomedical applications. Case studies of commonly used biomaterials spanning a range of material types. GE credit: SE. Effective: 2019 Winter Quarter.

BIM 120—Introduction to Materials Science for Biomedical Engineers (4) *Review all entries*

Lecture—4 hour(s). Prerequisite(s): (BIM 020 C- or better or ENG 105 C- or better); PHY 009C; MAT 022B or MAT 27B recommended. Open to upper division Biomedical Engineering students only. Historical perspective on materials usage in the body. Fundamental properties of materials and key considerations needed for material selection in the context of biomedical applications. Case studies of commonly used biomaterials spanning a range of material types. GE credit: SE. Effective: 2022 Winter Quarter.

BIM 125—Introduction to Design & Analysis of Experiments for BME (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIM 105 or STA 100. Basic concepts and methods in design of experiments with biomedical engineering applications. Statistical concepts and methods to study strategies to design efficient industrial experiments that can improve data quality and simplify data analysis. GE credit: SE. Effective: 2018 Winter Quarter.

BIM 126—Tissue Mechanics (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): EXB 103 or ENG 045 or ENG 045Y. Structural and mechanical properties of biological tissues, including bone, cartilage, ligaments, tendons, nerves, and skeletal muscle. GE credit: SE. Effective: 2018 Spring Quarter.

BIM 140—Protein Engineering (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002A. Introduction to protein structure and function. Modern methods for designing, producing, and characterizing novel proteins and peptides. Design strategies, computer modeling, heterologous expression, in vitro mutagenesis. Protein crystallography, spectroscopic and calorimetric methods for characterization, and other techniques. GE credit: QL, SE, SL, VL. Effective: 2013 Fall Quarter.

BIM 140L—Protein Engineering Laboratory (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIM 140 (can be concurrent); Concurrent enrollment in BIM 140 required. Optional hands-on laboratory for BIM 140. Students use the engineering design process to design, build, and test a solution to a practical problem in the field of protein engineering. Problems change each offering. GE credit: SE. Effective: 2017 Spring Quarter.

BIM 141—Cell & Tissue Mechanics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): PHY 009B; ENG 006; ENG 035. Mechanical properties that govern blood flow in the microcirculation. Concepts in blood rheology and cell and tissue viscoelasticity, biophysical aspects of cell migration, adhesion, and motility. GE credit: QL, SE, VL. Effective: 2013 Fall Quarter.

BIM 142—Principles & Practices of Biomedical Imaging (4)

Lecture—4 hour(s). Prerequisite(s): BIM 108 (can be concurrent); (MAT 022B or MAT 027B). Basic physics, engineering principles, and applications of biomedical imaging techniques including x-ray imaging, computed tomography, magnetic resonance imaging, ultrasound and nuclear imaging. GE credit: SE. Effective: 2020 Winter Quarter.

BIM 143—Biomolecular Systems Engineering: Synthetic Biology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002A; (MAT 016C or MAT 017C or MAT 021C). Includes analysis, design, construction and characterization of molecular systems. Process and biological parts standardization, computer aided design, gene synthesis, directed evolution, protein engineering, issues of human practice, biological safety, security, innovation, and ethics are covered. GE credit: SE. Effective: 2014 Fall Quarter.

BIM 143L—Synthetic Biology Laboratory (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIM 143 (can be concurrent); Concurrent enrollment in BIM 143 required. Optional hands-on laboratory for BIM 143. Students solve a practical problem in the field of synthetic biology by designing, building, and testing an appropriate solution or product. Problems change each offering. GE credit: SE. Effective: 2017 Spring Quarter.

BIM 144—Fundamentals of Biophotonics & Bioimaging (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): PHY 009B; (MAT 022B or MAT 027B); or Consent of Instructor. BIM 108 or equivalent helpful; Biology or Physiology course recommended. Biophotonics and bioimaging, emphasizing quantitative description of light propagation & light tissue interactions. Key technologies and illustrative applications in basic research, clinical diagnostics and therapy. GE credit: SE. Effective: 2020 Winter Quarter.

BIM 145—Immuno-Engineering (4)

Lecture—4 hour(s). Prerequisite(s): BIM 161A or BIS 102. Basic immunology and immunological tools. Survey of current immuno-therapeutic strategies. Ongoing research efforts to engineer the immune system for positive diagnostic and therapeutic outcomes. GE credit: SE. Effective: 2018 Fall Quarter.

BIM 151—Mechanics of DNA (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; MAT 022B. Structural, mechanical and dynamic properties of DNA. Topics include DNA structures and their mechanical properties, in vivo topological constraints on DNA, mechanical and thermodynamic equilibria, DNA dynamics, and their roles in normal and pathological biological processes. GE credit: OL, QL, SE. Effective: 2012 Fall Quarter.

BIM 152—Molecular Control of Biosystems (4)

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): BIS 002A; PHY 009B; (MAT 022B or MAT 027B). Fundamentals of molecular biomedicine covering state-of-the-art methods for quantitative understanding of gene regulation and signal transduction networks at different levels of organization in health and disease. Topics include classic genetic systems, synthetic circuits, networks disrupted in disease and cancer. GE credit: OL, SE. Effective: 2020 Winter Quarter.

BIM 154—Computational Genomics (4)

Lecture—4 hour(s). Prerequisite(s): ENG 006 C- or better; MAT 021D C- or better; (MAT 022A C- or better or MAT 027A C- or better); BIM 105 C- or better. Fundamental computational and probabilistic modeling techniques underlying analytical approaches to recent problems in functional genomics and molecular biology; DNA sequencing technologies; sequencing-based genomic assays; genomics and molecular biology lab techniques; gene expression quantification; nucleic acid structure; statistical inference and parameter estimation; resampling methods; simulations of genomic big data sets. GE credit: SE. Effective: 2020 Spring Quarter.

BIM 161A—Biomolecular Engineering (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002A; CHE 008B or CHE 118B. Restricted to upper division standing. Introduction to the basic concepts and techniques of biomolecular engineering such as recombinant DNA technology, protein engineering, and molecular diagnostics. Only 3 units of credit for students who have taken BIM 161S. GE credit: QL, SE. Effective: 2017 Spring Quarter.

BIM 161L—Biomolecular Engineering Laboratory (3)

Laboratory—4.5 hour(s); Lecture/Discussion—1.5 hour(s). Prerequisite(s): BIM 161A or BIS 101. Introduction to the basic techniques in biomolecular engineering. Lectures, laboratory, and discussion sessions will cover basic techniques in DNA cloning, bacterial cell culture, gene regulation, protein expression, and data analysis. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

BIM 161S—Biomolecular Engineering: Brief Course (1)

Lecture—1 hour(s). Prerequisite(s): BIS 002A; CHE 008B; BIM 161L (can be concurrent). Basic concepts and techniques in biomolecular analysis, recombinant DNA technology, and protein purification and analysis. Not open for credit to students who have taken BIM 161A. GE credit: QL, SE. Effective: 2012 Summer Session 2.

BIM 162—Introduction to the Biophysics of Molecules & Cells (4)

Lecture—4 hour(s). Prerequisite(s): PHY 009C C- or better; (MAT 022B C- or better or MAT 027B C- or better). Introduction to fundamental physical mechanisms governing structure and function of bio-macromolecules. Emphasis on a quantitative understanding of the nano- to microscale biomechanics of interactions between and within individual molecules, as well as of their assemblies, in particular membranes. GE credit: QL, SE, SL. Effective: 2020 Winter Quarter.

BIM 163—Bioelectricity, Biomechanics, & Signaling Systems (4)

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): (BIM 116 or NPB 101); (MAT 022B C- or better or MAT 027B C- or better). Fundamentals of bioelectricity in cells, the calcium signaling system, and mechanical force generation in muscle. Combination of lecture and projects to promote learning of important concepts in hands-on projects using neurons and muscle as microcosms. GE credit: QL, SE. Effective: 2020 Winter Quarter.

BIM 167—Biomedical Fluid Mechanics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIM 106 C- or better; NPB 101 or BIM 116. Theories of fluid mechanics, including Navier Stokes Equation and Conservation Laws, will be presented to understand dynamics of human circulatory systems. Fluid dynamics will be analyzed using partial differential equations. GE credit: SE. Effective: 2017 Spring Quarter.

BIM 170—Aspects of Medical Device Design & Manufacturing (2)

Lecture—2 hour(s). Prerequisite(s): Consent of Instructor. Open to upper division Biomedical Engineering majors only. Survey of medical device design & impact on manufacturing operations. Introduction to medical device design process & product lifecycle. Principles of Design for Manufacturability, Design for Lean Manufacturing, and quality management systems. GE credit: SE. Effective: 2017 Winter Quarter.

BIM 171—Clinical Applications for Biomedical Device Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIM 116 C- or better or NPB 101 C- or better; NPB 101 recommended. Restricted to Biomedical Engineering majors only. Clinical applications for biomedical devices with emphasis in the pathophysiology of common diseases as it relates to the biodesign process, biosensors principles, in vitro diagnostics, needs assessment, and regulatory considerations. GE credit: SE. Effective: 2017 Fall Quarter.

BIM 173—Cell & Tissue Engineering (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIM 106 C- or better; BIM 109 C- or better. Engineering principles to direct cell and tissue behavior and formation. Cell sourcing, controlled delivery of macromolecules, transport within and around biomaterials, bioreactor design, tissue design criteria and outcomes assessment. GE credit: OL, SE, SL, WE. Effective: 2012 Fall Quarter.

BIM 174—Microcontroller Applications Lab (2)

Laboratory—3 hour(s); Lecture—1 hour(s). Prerequisite(s): ENG 017 C- or better. Restricted to upper division BME students. Hands-on design module to introduce microcontroller platforms, e.g., Arduino; programming microcontroller development board, use of external programs to support development of controlled systems, design of simple control systems. No credit for students who have previously taken EEC 010. GE credit: SE. Effective: 2019 Winter Quarter.

BIM 176—Microfluidic Lab (2)

Lecture—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 002A; ENG 017. Upper division standing. Theory and practice of microfluidic and lab-on-a-chip (LOC) systems. Microfluidic theories, microfluidic functions and operations, microfluidic sensing, and organ-on-a-chip development. Laboratory sections emphasize implementation and utilization of modern microfluidic devices, interfacial phenomena, and digital and droplet microfluidics. GE credit: SE. Effective: 2019 Winter Quarter.

BIM 189A—Topics in Biomedical Engineering: Cellular & Molecular Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Topics in Biomedical Engineering: Cellular & Molecular Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2004 Fall Quarter.

BIM 189B—Topics in Biomedical Engineering: Biomedical Imaging (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Topics in Biomedical Engineering: Biomedical Imaging. May be repeated for credit when topic differs. GE credit: SE. Effective: 2004 Fall Quarter.

BIM 189C—Topics in Biomedical Engineering: Biomedical Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Topics in Biomedical Engineering: Biomedical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2004 Fall Quarter.

BIM 190A—Upper Division Seminar in Biomedical Engineering (1)

Seminar—1 hour(s). Restricted to upper division standing. In depth examination of research topics in a small group setting. Question and answer session with faculty members. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2006 Spring Quarter.

BIM 192—Internship in Biomedical Engineering (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Restricted to upper division majors. Supervised work experience in the Biomedical Engineering field. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

BIM 198—Directed Group Study (1-5)

Variable—3-15 hour(s). May be repeated up to 3 time(s) when content differs. (P/NP grading only.) GE credit: SE. Effective: 2005 Fall Quarter.

BIM 199—Special Study for Advanced Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

BIM 201—Scientific Communication for Biomedical Engineers (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Designed to improve the written and oral communication skills of first-year graduate students through writing fellowship proposals, analyzing data, and critically reviewing research papers. (S/U grading only.) Effective: 2016 Fall Quarter.

BIM 202—Cell & Molecular Biology for Engineers (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIS 104 or MCB 121. Preparation for research and critical review in the field of cell and molecular biology for biomedical or applied science engineers. Emphasis on biophysical and engineering concepts intrinsic to specific topics including receptor-ligand dynamics in cell signaling and function, cell motility, DNA replication and RNA processing, cellular energetics and protein sorting. Modern topics in bioinformatics and proteomics. Effective: 2000 Fall Quarter.

BIM 204—Physiology for Bioengineers (5)

Lecture—4 hour(s). Prerequisite(s): BIS 001A; Or equivalent; graduate standing or consent of instructor. Basic human physiology of the nervous, muscular, cardiovascular, respiratory, and renal systems and their interactions; Emphasis on the physical and engineering principles governing these systems, including control and transport processes, fluid dynamics, and electrochemistry. Effective: 2007 Fall Quarter.

BIM 209—Scientific Integrity for Biomedical Engineers (2)

Lecture—1 hour(s); Discussion—1 hour(s). Open to Biomedical Engineering majors only. Scientific integrity and ethics for biomedical engineers, with emphasis and discussion on mentoring, authorship and peer review, use of humans and animals in biomedical research, conflict of interest, intellectual property, genetic technology and scientific record keeping. (S/U grading only.) Effective: 2006 Spring Quarter.

BIM 210—Introduction to Biomaterials (4)

Lecture—4 hour(s). Prerequisite(s): ENG 045 or ENG 045Y; or Consent of Instructor. Mechanical and atomic properties of metallic, ceramic, and polymeric implant materials of metallic, ceramic, and polymeric implant materials; corrosion, degradation, and failure of implants; inflammation, wound and fracture healing, blood coagulation; properties of bones, joints, and blood vessels; biocompatibility of orthopaedic and cardiovascular materials. Effective: 2018 Spring Quarter.

BIM 211—Design of Polymeric Biomaterials & Biological Interfaces (4)

Lecture—4 hour(s). Prerequisite(s): ENG 045 or ENG 045Y; or Consent of Instructor. Open to upper division undergraduates or graduate students. Design, selection and application of polymeric biomaterials. Integration of the principles of polymer science, surface science, materials science and biology. Effective: 2018 Spring Quarter.

BIM 212—Biomedical Heat & Mass Transport Processes (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EME 165; EBS 125; ECH 153; Or equivalent. Application of principles of heat and mass transfer to biomedical systems related to heat exchange between the biomedical system and its environment, mass transfer across cell membranes and the design and analysis of artificial human organs. (Same course as MAE 212.) Effective: 2000 Winter Quarter.

BIM 213—Principles & Applications of Biological Sensors (4)

Lecture—4 hour(s). Prerequisite(s): CHE 002C. Biological sensors based on principles of electrochemical, optical and affinity detection. Methods for integration of sensing elements (e.g. enzymes) into biosensors and miniaturization of biosensors. Effective: 2007 Fall Quarter.

BIM 214—Continuum Biomechanics (4)

Lecture—4 hour(s). Prerequisite(s): BIM 141; ENG 102; Or equivalent. Continuum mechanics relevant to bioengineering. Concepts in tensor calculus, kinematics, stress and strain, and constitutive theories of continua. Selected topics in bone, articular cartilage, blood/circulation, and cell biomechanics will illustrate the derivation of appropriate continuum mechanics theories. Effective: 2017 Fall Quarter.

BIM 216—Advanced topics in Cellular Engineering (4)

Lecture—4 hour(s). Prerequisite(s): BIM 214; or Consent of Instructor. Advanced research strategies and technologies used in the study of immune function and inflammation. Static and dynamic measurements of stress, strain, and molecular scale forces in blood and vascular cells, as well as genetic approaches to the study of disease. Effective: 2000 Spring Quarter.

BIM 217—Mechanobiology in Health & Disease (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIM 106; BIS 101; NPB 101; Or equivalents. Principles by which biomechanical forces affect cell and tissue function to impact human health and disease. Emphasis on cardiovascular system: structure and function, biofluid mechanics and mechanotransduction, disease mechanisms and research methods. Cartilage, bone and other systems; current topics discussed. Effective: 2008 Spring Quarter.

BIM 218—Microsciences (4)

Lecture/Discussion—4 hour(s). Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic mechanics, micromechanical properties, intermolecular interactions and micro tribology. (Same course as EEC 244B.) Effective: 2011 Fall Quarter.

BIM 221—Drug Delivery Systems (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIM 204 recommended but not required. Fundamental engineering and biotechnology principles critical for the formulation and delivery of therapeutic agents, including peptide/protein drugs and small molecules. Effective: 2017 Winter Quarter.

BIM 222—Cytoskeletal Mechanics (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIM 202. Current topics in cytoskeletal mechanics including physical properties of the cytoskeleton and motor proteins, molecular force sensor and generator, cytoskeletal regulation of cell motility and adhesion. Effective: 2010 Fall Quarter.

BIM 223—Multibody Dynamics (4)

Lecture—4 hour(s). Prerequisite(s): ENG 102. Coupled rigid-body kinematics/dynamics; reference frames; vector differentiation; configuration and motion constraints; holonomicity; generalized speeds; partial velocities; mass; inertia tensor/theorems; angular momentum; generalized forces; comparing Newton/Euler, Lagrange's, Kane's methods; computer-aided equation derivation; orientation; Euler; Rodrigues parameters. (Same course as MAE 223.) Effective: 2000 Winter Quarter.

BIM 225—Spatial Kinematics & Robotics (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIM 222; C Language. Spatial kinematics, screw theory, spatial mechanisms analysis and synthesis, robot kinematics and dynamics, robot workspace, path planning, robot programming, real-time architecture and software implementation. (Same course as MAE 225.) Effective: 2000 Winter Quarter.

BIM 228—Skeletal Muscle Mechanics: Form, Function, Adaptability (4)

Lecture—4 hour(s). Prerequisite(s): ENG 035; (ENG 045 or ENG 045Y); MAT 021D; Basic background in biology, physiology, and engineering; NPB 101 recommended. Basic structure and function of skeletal muscle examined at the microscopic and macroscopic level. Muscle adaptation in response to aging, disease, injury, exercise, and disuse. Analytic models of muscle function are discussed. Effective: 2018 Spring Quarter.

BIM 232—Skeletal Tissue Mechanics (3)

Lecture—3 hour(s); Laboratory—1 hour(s). Prerequisite(s): Engineering 104B. Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disuse. (Same course as MAE 232.) Effective: 1997 Winter Quarter.

BIM 233—Soft Tissue Mechanics (4)

Lecture—4 hour(s). Presentation of structure and function of musculoskeletal soft tissues: cartilage, tendon, ligament, meniscus, and intervertebral disc. Instruction in engineering principals governing the mechanical behavior of these tissues: viscoelasticity, quasilinear viscoelasticity, and biphasic theory. Effective: 2013 Fall Quarter.

BIM 239—Advanced Finite Elements & Optimization (4)

Lecture—4 hour(s). Prerequisite(s): ENG 180 or MAT 128C or EAD 115. Introduction to advanced finite elements and design optimization methods, with application to modeling of complex mechanical, aerospace and biomedical systems. Application of states of the art in finite elements in optimum design of components under realistic loading conditions and constraints. (Same course as MAE 239.) Effective: 2007 Fall Quarter.

BIM 240—Computational Methods in Nonlinear Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): MAT 128B or ENG 180 or EAD 115. Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems. (Same course as MAE 240.) Effective: 1999 Winter Quarter.

BIM 241—Introduction to Magnetic Resonance Imaging (3)

Lecture—3 hour(s). Prerequisite(s): PHY 009D; MAT 022B. Equipment, methods, medical applications of MRI. Lectures review basic, advanced pulse sequences, image reconstruction, display and technology and how these are applied clinically. Lecture complements a more technical course. BIM 246 can be taken concurrently. Effective: 1999 Fall Quarter.

BIM 242—Introduction to Biomedical Imaging (4)

Lecture—4 hour(s). Prerequisite(s): PHY 009D; Electrical and Computer Engineering 106 or consent of instructor. Basic physics and engineering principles of image science. Emphasis on ionizing and nonionizing radiation production and interactions with the body and detectors. Major imaging systems: radiography, computed tomography, magnetic resonance, ultrasound, and optical microscopy. Effective: 2004 Fall Quarter.

BIM 243—Radiation Detectors for Biomedical Applications (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): PHY 009D; MAT 021D; MAT 022B. Radiation detectors and sensors used for biomedical applications. Emphasis on radiation interactions, detection, measurement and use of radiation sensors for imaging. Operating principles of gas, semiconductor, and scintillation detectors. Effective: 2005 Winter Quarter.

BIM 246—Magnetic Resonance Technology (3)

Lecture—3 hour(s). Prerequisite(s): PHY 009D; MAT 022B. Covers MRI technology at an advanced level with emphasis on mathematical descriptions and problem solving. Topics include spin dynamics, signal generation, image reconstruction, pulse sequences, biophysical basis of T1, T2, RF, gradient coil design, signal to noise, image artifacts. Effective: 1997 Winter Quarter.

BIM 251—Medical Image Analysis (4)

Lecture—4 hour(s). Prerequisite(s): EEC 106. Techniques for assessing the performance of medical imaging systems. Principles of digital image formation and processing. Measurements that summarize diagnostic image quality and the performance of human observers viewing those images. Definition of ideal observer and other mathematical observers that may be used to predict performance from system design features. Obtain hands-on experience in computer vision by completing individual Matlab assignments that they select from topics in the course. Effective: 2001 Spring Quarter.

BIM 252—Computational Methods in Biomedical Imaging (4)

Lecture—4 hour(s). Prerequisite(s): (BIM 105 or STA 120); (BIM 108 or EEC 150A). Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as EEC 205.) Effective: 2011 Fall Quarter.

BIM 254—Statistical Methods in Genomics (4)

Lecture—4 hour(s). Statistical approaches to problems in computational molecular biology and genomics; formulation of questions via probabilistic modeling, statistical inference methods for parameter estimation, and interpretation of results to address biological questions; application to high-impact problems in functional genomics and molecular biology. Effective: 2017 Winter Quarter.

BIM 255—Nanoscale Imaging for Molecular Medicine (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): BIM 202 highly recommended; graduate standing. Current and emerging technologies to visualize biological structures and processes at size scales = 100 nanometers – and their application towards the advancement of molecular medicine. Technologies include superresolution optical microscopy, electron microscopy and tomography. Emphasis on quantitative imaging. (Same course as BPH 255.) Effective: 2017 Spring Quarter.

BIM 257—Fundamentals of Tissue Optics & Biomedical Applications (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Fundamentals of optical properties of tissue. Range of optical technologies and their applications to tissue characterization and diagnostics. Effective: 2011 Fall Quarter.

BIM 258—Advanced Biophotonics & Bioimaging (4)

Lecture—4 hour(s). Prerequisite(s): BIM 108; PHY 108; Or an equivalent undergraduate optics course to PHY 108. Quantitative basis for biophotonics and bioimaging, with an emphasis on the physical and mathematical description of optics, light propagation, and light-tissue interactions. Advantages and limitations of various optical imaging and sensing technologies. Illustrative applications in diagnostics, basic research, and therapy. Effective: 2017 Winter Quarter.

BIM 262—Cell & Molecular Biophysics for Bioengineers (4)

Lecture—4 hour(s). Prerequisite(s): BIM 284; Or equivalent; graduate standing; undergraduate students by consent of instructor. Introduction to fundamental mechanisms governing the structure, function, and assembly of bio-macromolecules. Emphasis is on a quantitative understanding of the nano-to-microscale interactions between and within individual molecules, as well as of their assemblies, in particular membranes. Not open for credit to students who have completed BIM 162. (Same course as ECH 269.) Effective: 2017 Winter Quarter.

BIM 263—Optical Microscopy Hands-On (4)

Lecture/Discussion—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): Consent of Instructor. Informed use of an optical research microscope. Analysis of digitized images. Optical image formation and its limitations. Laboratories on modern microscope usage and videomicroscopy techniques including optimization of recorded images and quantification of microscopic distances and displacements. Effective: 2018 Fall Quarter.

BIM 264—Synthetic & Systems Engineering of Cells (4)

Lecture—4 hour(s). Introduction to the design, engineering, and control of biological systems for biotechnological applications and biological studies. Effective: 2016 Fall Quarter.

BIM 270—Biochemical Systems Theory (4)

Lecture—4 hour(s). Prerequisite(s): BIM 202 (can be concurrent); or Consent of Instructor. Systems biology at the biochemical level. Mathematical and computational methods emphasizing nonlinear representation, dynamics, robustness, and optimization. Case studies of signal-transduction cascades, metabolic networks and regulatory mechanisms. Focus on formulating and answering fundamental questions concerning network function, design, and evolution. Effective: 2004 Winter Quarter.

BIM 271—Gene Circuit Theory (4)

Lecture—4 hour(s). Prerequisite(s): BIM 270 or BIM 202; and Consent of Instructor. Analysis, design, and construction of gene circuits. Modeling strategies, elements of design, and methods for studying variations in design. Case studies involving prokaryotic gene circuits to illustrate natural selection, discovery of design principles, and construction of circuits for engineering objectives. Effective: 2004 Winter Quarter.

BIM 272—Tissue Engineering (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): BIS 104 or MCB 121. Based on morphogenetic signals, responding stem cells and extracellular matrix scaffolding. Design and development of tissues for functional restoration of various organs damaged/lost due to cancer, disease and trauma. Fundamentals of morphogenetic signals, responding stem cells and extracellular matrix scaffolding. Effective: 2007 Winter Quarter.

BIM 273—Integrative Tissue Engineering & Technologies (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIM 202; BIM 204; Or equivalent; strongly encourage completion of BIM 272 although not a prerequisite. Restricted to graduate standing. Engineering principles to direct cell and tissue behavior and formation. Contents include controlled delivery of macromolecules, transport within and around biomaterials, examination of mechanical forces of engineered constructs, and current experimental techniques used in the field. Effective: 2007 Spring Quarter.

BIM 281—Acquisition & Analysis of Biomedical Signals (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 100; STA 130A. Restricted to upper division engineering. Basic concepts of digital signal recording and analysis; sampling; empirical modeling; Fourier analysis, random processes, spectral analysis, and correlation applied to biomedical signals. Effective: 2002 Fall Quarter.

BIM 283—Advanced Design of Experiments for Biomedical Engineers (4)

Lecture—4 hour(s). Open to graduate students only. Provides biomedical engineering graduate students with the tools to properly design experiments, collect and analyze data, and extract, communicate and act on information generated. Not open for credit to students who have taken EBS 265. Effective: 2017 Spring Quarter.

BIM 284—Mathematical Methods for Biomedical Engineers (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): MAT 022B; STA 130A; Or consent of instructor; upper division biomedical engineering majors, and graduate students in sciences and engineering; priority given to Biomedical Engineering graduate students. Theoretical applications of linear systems, ordinary and partial differential equations, and probability theory and random processes that describe biological systems and instruments that measure them. Students will be introduced to numerical solution techniques in MATLAB. Effective: 2007 Fall Quarter.

BIM 286—Nuclear Imaging in Medicine & Biology (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIM 243; or Consent of Instructor. Radioactive decay, interaction of radiation with matter, radionuclide production, radiation detection, digital autoradiography, gamma camera imaging, single photon emission computed tomography, positron emission tomography and applications of these techniques in biology and medicine. Effective: 2005 Spring Quarter.

BIM 287—Concepts in Molecular Imaging (4)

Lecture—2 hour(s); Lecture/Discussion—2 hour(s); Term Paper. Prerequisite(s): CHE 002C; MAT 021C; PHY 009D; and Consent of Instructor. Current techniques and tools for molecular imaging. Emphasis on learning to apply principles from the physical sciences to imaging problems in medicine and biology. Effective: 2004 Spring Quarter.

BIM 288—Living Matter: Physical Biology of the Cell (3)

Lecture—3 hour(s). Open to any student possessing general background in any disciplines of physical or biological sciences and engineering. Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability. (Same course as EMS 288, BPH 288.) Effective: 2017 Winter Quarter.

BIM 289A—Selected Topics in Biomedical Engineering: Cellular & Molecular Systems Engineering (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Selected topics in Cellular and Molecular Systems Engineering. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 289B—Selected Topics in Biomedical Engineering: Biomedical Imaging (1-5)

Variable. Prerequisite(s): Consent of Instructor. Selected topics in Biomedical Imaging. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 289C—Selected Topics in Biomedical Engineering: Computational Bioengineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Selected topics in Computational Bioengineering. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 289D—Selected Topics in Biomedical Engineering: Cell & Tissue Biomechanics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Selected topics in Cell and Tissue Biomechanics. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 289E—Selected Topics in Biomedical Engineering: Analysis of Human Movement (1-5)

Variable. Prerequisite(s): Consent of Instructor. Selected topics in Analysis of Human Movement. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 290—Seminar (1)

Seminar—1 hour(s). Seminar in biomedical engineering (S/U grading only.) Effective: 1997 Winter Quarter.

BIM 290C—Graduate Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Individual and/or group conference on problems, progress, and techniques in biomedical engineering research. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

BIM 295—Literature in Neuroengineering (2)

Seminar—2 hour(s). Open to graduate students only. Critical presentation and discussion of current literature in neuroengineering. May be repeated for credit. (Same course as NSC 295.) (S/U grading only.) Effective: 2018 Fall Quarter.

BIM 298—Directed Group Study (1-5)

Variable—1-5 hour(s). Open to graduate students in the Biomedical Engineering Graduate Group, or consent of instructor. Directed group study in Biomedical Engineering. May be repeated for credit. (S/U grading only.) Effective: 2011 Fall Quarter.

BIM 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

BIM 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS—Biological Sciences

Courses in BIS:

BIS 002A—Introduction to Biology: Essentials of Life on Earth (5)

Lecture—3 hour(s); Discussion—2 hour(s). Essentials of life including sources and use of energy, information storage, responsiveness to natural selection and cellularity. Origin of life and influence of living things on the chemistry of the Earth. May be taught abroad. Not open for credit to students who have completed BIS 001A with a grade of C- or better. GE credit: SE. Effective: 2013 Winter Quarter.

BIS 002B—Introduction to Biology: Principles of Ecology & Evolution (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Introduction to basic principles of ecology and evolutionary biology, focusing on the fundamental mechanisms that generate and maintain biological diversity across scales ranging from molecules and genes to global processes and patterns. May be taught abroad. Not open for credit to students who have completed BIS 001B with a grade of C- or better. GE credit: QL, SE, SL, VL. Effective: 2017 Fall Quarter.

BIS 002C—Introduction to Biology: Biodiversity & the Tree of Life (5)

Lecture—4 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIS 001B C- or better or BIS 002B C- or better. Introduction to organismal diversity, using the phylogenetic tree of life as an organizing theme. Lectures and laboratories cover methods of phylogenetic reconstruction, current knowledge of the tree of life, and the evolution of life's most important and interesting innovations. May be taught abroad. Not open for credit to students who have completed BIS 001C with a grade of C- or better. GE credit: OL, QL, SE, SL, VL. Effective: 2010 Fall Quarter.

BIS 002D—Introduction to Biology: Principles of Cell Biology & Physiology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A C- or better. Introduction to the essential principles underlying cellular organization and function, how the properties of cells give rise to complex cellular behaviors that contribute to tissue organization/function and the physiological paradigms that govern complex life. Not open for credit to students who have taken BIS 104 and NPB 110A. GE credit: SE. Effective: 2020 Winter Quarter.

BIS 005—Exploring Biological Sciences (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Enrollment limited to first year CBS students. Introduction to biology at UC Davis through discussions with faculty and speakers from industry and medicine. (P/ NP grading only.) Effective: 2015 Fall Quarter.

BIS 010—Everyday Biology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Everyday biological concepts using contemporary readings for non-scientists. Key topics include: personal genomics; food and health; climate and evolution; brain biology and the law. Innovative projects apply biological concepts to current events. For students not specializing in biology. Not open for credit to students who have completed BIS 002A, or 002B, or 002C, or 010V or NEM 010V or equivalent. GE credit: SE, SL, WE. Effective: 2016 Winter Quarter.

BIS 011—Issues in the Life Sciences (2)

Lecture—1 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Enrollment limited to BUSP students. The range of subjects and approaches in the field of biology, including both basic and applied research topics. Effective: 2002 Fall Quarter.

BIS 011L—Basic Life Sciences Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Limited to Biology Undergraduate Scholars Program (BUSP) students. Basic laboratory skills in life sciences research, including microbiology, molecular biology, and genetics. Effective: 2018 Winter Quarter.

BIS 015L—Introduction to Data Science for Biologists (2)

Lecture—1 hour(s); Laboratory—3 hour(s). Introduction to data science with a focus on developing practical computational skills for biologists. Data management, transformation, visualization, and analysis using R. Fundamentals of the UNIX shell including navigation and automation. Computational resources for biologists with emphasis on the management of genomic data. Effective: 2020 Winter Quarter.

BIS 020Q—Modeling in Biology (2)

Lecture—1 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 016B C- or better (can be concurrent) or MAT 017B C- or better (can be concurrent) or MAT 021B C- or better (can be concurrent) or MAT 021BH C- or better (can be concurrent). Introduction to the application of quantitative methods to biological problems. Use a mathematical software package to tackle problems drawn from all aspects of biology. Effective: 2020 Winter Quarter.

BIS 023A—Genome Hunters (3)

Lecture—1 hour(s); Laboratory—3 hour(s); Extensive Problem Solving. Prerequisite(s): MAT 017A (can be concurrent) or MAT 021A (can be concurrent). Hands-on, project-based introduction to genome-centric biology with specific focus on quantitative elements of associated experimental approaches. Measurement error and error estimation, experimental design, data analysis, model generation and fitting, and model-guided hypothesis generation and testing. Content covered through quarter-long interactive experiment to isolate an organism, quantitatively characterize its behavior, and sequence its genome. GE credit: SE. Effective: 2018 Fall Quarter.

BIS 023B—Genome Hunters (3)

Lecture—1 hour(s); Laboratory—3 hour(s); Extensive Problem Solving. Prerequisite(s): BIS 023A; (MAT 017C (can be concurrent) or MAT 021C (can be concurrent)). Hands-on, project-based introduction to modern computational and bioinformatics analyses using genome sequence data generated in BIS 023A. Genome sequence assembly and alignment, genome annotation, and genetic correlates of behavior. Additional topics may include scientific and societal implications of the availability and usage of genome information and genome manipulation, and real-life applications of genome analysis. GE credit: SE. Effective: 2019 Spring Quarter.

BIS 027A—Linear Algebra with Applications to Biology (4)

Lecture—3 hour(s); Laboratory—2 hour(s). Prerequisite(s): MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better. Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems. Only 1 unit of credit for students who have completed MAT 022A. (Same course as MAT 027A.) GE credit: SE. Effective: 2019 Winter Quarter.

BIS 027B—Differential Equations with Applications to Biology (4) *Review all entries*

Lecture—3 hour(s); Laboratory—2 hour(s). Prerequisite(s): BIS 027A C- or better or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)). Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems. Only 1 unit of credit for students who have completed MAT 022B. (Same course as MAT 027B.) GE credit: SE. Effective: 2019 Spring Quarter.

BIS 027B—Differential Equations with Applications to Biology (4) *Review all entries*

Lecture—3 hour(s); Laboratory—2 hour(s). Prerequisite(s): (BIS 027A C- or better or MAT 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or ECS 032A C- or better or ECS 036A C- or better or ECH 060 C- or better or EME 005 C- or better)). Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems. Only 1 unit of credit for students who have completed MAT 022B. (Same course as MAT 027B.) GE credit: SE. Effective: 2020 Summer Session 1.

BIS 092—Internship in Biological Sciences (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Restricted to lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS 099—Special Study for Undergraduates (1-5)

Independent Study—3-15 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Restricted to lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS 101—Genes & Gene Expression (4)

Lecture—4 hour(s). Prerequisite(s): (BIS 002A C- or better, BIS 002B C- or better); (CHE 008A or CHE 118A or CHE 128A); ((STA 013 or STA 013Y) or STA 100 or STA 102 or STA 130A); STA 100 preferred. Nucleic acid structure and function; gene expression and its regulation; replication; transcription and translation; transmission genetics; molecular evolution. May be taught abroad. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

BIS 101D—Genes & Gene Expression Discussion (1)

Discussion—1 hour(s). Prerequisite(s): BIS 101 (can be concurrent); and Consent of Instructor. Discussion and problem solving related to fundamental principles of classical and molecular genetics as presented in BIS 101. (P/NP grading only.) Effective: 2000 Fall Quarter.

BIS 102—Structure & Function of Biomolecules (3)

Lecture—3 hour(s). Prerequisite(s): (BIS 001A or BIS 002A); (CHE 008B or CHE 118B or CHE 128B). Structure and function of macromolecules with emphasis on proteins, catalysis, enzyme kinetics, lipids, membranes, and proteins as machines. May be taught abroad. Only 1 unit of credit for students who have completed ABI 102; only 1.5 units of credit for students who have completed BIS 105. GE credit: QL, SE. Effective: 2014 Winter Quarter.

BIS 103—Bioenergetics & Metabolism (3)

Lecture—3 hour(s). Prerequisite(s): BIS 102. Fundamentals of the carbon, nitrogen, and sulfur cycles in nature, including key reactions of biomolecules such as carbohydrates, amino acids, lipids, and nucleotides, and of energy production and use in different types of organisms. Principles of metabolic regulation. 1.5 units of credit for students who have completed BIS 105; 1 unit of credit if students who have completed ABI 103. GE credit: SE. Effective: 2013 Winter Quarter.

BIS 104—Cell Biology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 101; (BIS 102 or BIS 105). Membrane receptors and signal transduction; cell trafficking; cell cycle; cell growth and division; extracellular matrix and cell-cell junctions; cell development; immune system. GE credit: SE. Effective: 2011 Spring Quarter.

BIS 105—Biomolecules & Metabolism (3)

Lecture—3 hour(s). Prerequisite(s): ((BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C)); (CHE 008B or CHE 118B or CHE 128B). Fundamentals of biochemical processes, with emphasis on protein structure and activity; energy metabolism; catabolism of sugars, amino acids, and lipids; and gluconeogenesis. 1.5 units of credit for students who have completed BIS 102 or BIS 103; no credit for students who have completed both BIS 102 and BIS 103; 1 unit of credit for students who have completed ABI 102 or ABI 103; no credit for students who have completed both ABI 102 and ABI 103. GE credit: QL, SE. Effective: 2014 Fall Quarter.

BIS 107—Probability & Stochastic Processes with Applications to Biology (4)

Review all entries

Lecture—3 hour(s); Laboratory—2 hour(s). Prerequisite(s): (BIS 027A C- or better or MAT 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)). Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes' formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques. Only 2 units of credit for students who have completed MAT 135A or STA 131A. (Same course as MAT 107.) GE credit: SE. Effective: 2019 Spring Quarter.

BIS 107—Probability & Stochastic Processes with Applications to Biology (4)

Review all entries

Lecture—3 hour(s); Laboratory—2 hour(s). Prerequisite(s): (BIS 027A C- or better or MAT 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or ECS 032A C- or better or ECS 036A C- or better or ECH 060 C- or better or EME 005 C- or better)). Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes' formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques. Only 2 units of credit for students who have completed MAT 135A or STA 131A. (Same course as MAT 107.) GE credit: SE. Effective: 2020 Summer Session 1.

BIS 122—Population Biology & Ecology (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); Residence at Bodega Marine Laboratory required. Biological and physical processes affecting plant and animal populations in the rich array of habitats at the Bodega Marine Laboratory ecological preserve. Emphasis on field experience, with complementing lectures to address population and community processes. See Bodega Marine Laboratory Program. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2008 Spring Quarter.

BIS 122P—Population Biology & Ecology/Advanced Laboratory Topics (5)

Laboratory—12 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 122 (can be concurrent). Residence at Bodega Marine Laboratory required. Training in scientific research, from hypothesis testing to publication, including methods of library research. Research will be related to a topic covered in BIS 122. Final presentation both oral and written. See Bodega Marine Laboratory Program. GE credit: SE, VL, WE. Effective: 2000 Spring Quarter.

BIS 123—Undergraduate Colloquium in Marine Science (1)

Seminar—1 hour(s). Prerequisite(s): Enrolled student at the Bodega Marine Laboratory. Series of weekly seminars by recognized authorities in various disciplines of marine science from within and outside the UC system. Includes informal discussion with speaker. Held at Bodega Marine Laboratory; see Bodega Marine Laboratory Program. (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS 124—Coastal Marine Research (6)

Laboratory—12 hour(s); Fieldwork—12 hour(s); Discussion/Laboratory—2 hour(s). Prerequisite(s): (EVE 114 (can be concurrent) or EVE 106 (can be concurrent) or ESP 152 (can be concurrent) or ESP 124 (can be concurrent)); Concurrent enrollment in one of the above listed courses required; upper division standing or consent of instructor. Student must complete the application at <http://www.bml.ucdavis.edu>. Independent research on topics related to an accompanying core Bodega Marine Laboratory summer course. Receive training in generating hypotheses, designing experiments, collecting and analyzing data, and scientific communication. May be repeated up to 2 time(s). GE credit: OL, QL, SE, VL, WE. Effective: 2018 Summer Session 1.

BIS 132—Introduction to Dynamic Models in Modern Biology (4)

Lecture—3 hour(s); Laboratory—2 hour(s). Prerequisite(s): MAT 016C; (STA 013 or STA 013Y); Or equivalents and one lower division course in biology or equivalent. Dynamic modeling in the biological sciences, including matrix models, difference equations, differential equations, and complex dynamics. Examples include classic models in ecology, cell biology, physiology, and neuroscience. Emphasis on understanding models, their assumptions, and implications for modern biology. GE credit: QL, SE, SL, VL, WE. Effective: 2018 Spring Quarter.

BIS 133—Collaborative Studies in Mathematical Biology (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): MAT 016A; MAT 016B; MAT 016C; (BIS 001A or BIS 001B or BIS 001C or BIS 002A or BIS 002B or BIS 002C or BIS 010); and Consent of Instructor. Or equivalents. Interdisciplinary research and training that uses mathematics and computation to solve current problems in biology. May be repeated up to 6 time(s). GE credit: QL, SE, SL, VL, WE. Effective: 2008 Fall Quarter.

BIS 134—Systems Biology: From Biological Circuits to Biological Systems (2)

Review all entries

Lecture/Discussion—2 hour(s); Term Paper. Prerequisite(s): BIS 101; (MCB 121 or MCB 161 or PLB 113); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C); or Consent of Instructor. Applying systems theory to understand the properties of biological networks in a variety of model organisms. Emphasis on both local biological circuits, and genome-scale biological networks. Topics include network motifs, robustness, modeling, emergent properties and integration of networks. GE credit: OL, QL, SE, VL. Effective: 2011 Winter Quarter.

BIS 134—Systems Biology: From Biological Circuits to Biological Systems (2)

Review all entries

Lecture/Discussion—2 hour(s); Term Paper. Prerequisite(s): BIS 101; (MCB 121 or PLB 113); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C) or (MAT 021AH, MAT 021BH, MAT 021CH); or Consent of Instructor. Applying systems theory to understand the properties of biological networks in a variety of model organisms. Emphasis on both local biological circuits, and genome-scale biological networks. Topics include network motifs, robustness, modeling, emergent properties and integration of networks. GE credit: OL, QL, SE, VL. Effective: 2020 Fall Quarter.

BIS 180L—Genomics Laboratory (5)

Lecture—2 hour(s); Laboratory—6 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 181 or BIS 183 or MCB 182; or Consent of Instructor. Computational approaches to model and analyze biological information about genomes, transcriptomes, and proteomes. Topics include genome assembly and annotation, mRNA and small RNA profiling, proteomics, protein-DNA and protein-protein interactions, network analysis, and comparative genomics. Computer programming experience is not required. Students who have received credit for taking BIT 150 will receive 3 units for completing BIS 180L. GE credit: SE. Effective: 2019 Spring Quarter.

BIS 181—Comparative Genomics (3)

Lecture—3 hour(s). Prerequisite(s): BIS 101 C- or better; or Consent of Instructor. Comparison of genomes at the population and species level. Genomic techniques for mapping disease (and other) genes, reconstruction of evolutionary history and migration patterns, determination of gene function, prediction of organismal traits, and metagenomics: determination of community composition and function. GE credit: QL, SE, SL. Effective: 2019 Fall Quarter.

BIS 183—Functional Genomics (3)

Lecture—3 hour(s). Prerequisite(s): BIS 101; (BIS 102 or BIS 105 recommended.). Overview of genomic methodologies and key biological findings obtained using genome-wide analyses. RNA profiling, small RNAs, epigenomics, chromatin immunoprecipitation, protein-DNA interactions, proteomics and network analysis. GE credit: QL, SE, VL. Effective: 2012 Spring Quarter.

BIS 185L—Systems & Synthetic Biology Lab (5)

Discussion—1 hour(s); Laboratory—6 hour(s); Lecture—2 hour(s). Prerequisite(s): BIS 015L C- or better; BIS 134 C- or better (can be concurrent); BIM 143 C- or better (can be concurrent); or Consent of Instructor. Principles & applications of systems and synthetic biology. Bistable & monostable switches, single cell sequencing, genetic circuits, design of biological parts and pathway modeling. Computational & experimental labs use single cell sequence data to determine switch types in cell identity, design and characterize promoter libraries and use genomics-enabled approaches to discover and characterize enzymes & metabolites. Effective: 2020 Winter Quarter.

BIS 192—Internship in Biological Sciences (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS 194H—Research Honors (2)

Independent Study—6 hour(s). Prerequisite(s): Senior standing. Students majoring in Biological Sciences who have completed two quarters (3-5 units per quarter) of 199 and who qualify for the honors program as defined by the current catalog. Opportunity for Biological Sciences majors to pursue intensive research culminating in the writing of a senior thesis with the guidance of faculty advisors. (P/NP grading only.) GE credit: SE, WE. Effective: 1997 Winter Quarter.

BIS 195A—Science Teaching Internship Program (4)

Lecture/Discussion—2 hour(s); Internship—6 hour(s). Prerequisite(s): Upper division standing in a science major or consent of instructor. Major in science; junior or senior status (based on units); application and interview; limited to 24 students. Basic teaching techniques including lesson planning, classroom management, and presentation skills. Interns spend time in K-12 science classrooms working with a master teacher observing, assisting with labs and activities, managing students, and teaching lessons. (P/NP grading only.) Effective: 2002 Spring Quarter.

BIS 195B—Science Teaching Internship (1-5)

Internship—1-5 hour(s). Prerequisite(s): BIS 195A. Reinforcement of teaching techniques learned in 195A with additional classroom experience in K-12 science classrooms working with a master teacher observing, assisting with labs and activities, managing students and teaching lessons. May be repeated up to 1 time(s) with consent of instructor. (P/NP grading only.) Effective: 2002 Spring Quarter.

BIS 197T—Tutoring in Biological Sciences (1-5)

Discussion—2-6 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in one of the Biological Sciences' regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2004 Spring Quarter.

BIS 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS 199—Special Study in Biological Sciences (1-5)

Independent Study—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. College of Biological Sciences staff members offer group study courses under this number. Effective: 1997 Winter Quarter.

BIT—Biotechnology

Courses in BIT:

BIT 001Y—Introduction to Biotechnology (4)

Lecture—2 hour(s); Web Virtual Lecture—1 hour(s); Discussion—1 hour(s). Principles and technologies of biotechnology as applied to agriculture, the environment, and medicine. Business plans and presentation pitches for new biotechnology products. Bioinformatics approaches exploring genomic databases and DNA manipulations in silica. GE credit: SE. Effective: 2014 Spring Quarter.

BIT 091—Undergraduate Seminars in Biotechnology (1)

Seminar—1 hour(s). Undergraduate oriented seminar series focused on biotechnology research and product development. Speakers from campus and the private sectors discuss ongoing research, product development and biotechnology careers. (P/NP grading only.) Effective: 2017 Winter Quarter.

BIT 092—Internship in Biotechnology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Work experience on or off campus in subject area pertaining to biotechnology or in a business, industry or agency associated with biotechnology. Internship supervised by faculty member in the animal or plant sciences. (P/NP grading only.) Effective: 1998 Fall Quarter.

BIT 098—Directed Group Study (1-5)

Variable—1-15 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

BIT 099—Special Study for Undergraduates (1-5)

Independent Study—3-15 hour(s). Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1998 Fall Quarter.

BIT 150—Applied Bioinformatics (4)

Lecture—2 hour(s); Discussion/Laboratory—2 hour(s). Prerequisite(s): BIS 101; (ECS 010 or ECS 015 or PLS 021); (PLS 120 or STA 013 or STA 013Y or STA 100); or Consent of Instructor. Limited enrollment. Concepts and programs needed to apply bioinformatics in biotechnology research. Sequence analysis and annotation and use of plant and animal databases for students in biological and agricultural sciences. Only 2 units of credit for students who have completed ECS 124. GE credit: SE, VL. Effective: 2018 Spring Quarter.

BIT 160—Principles of Plant Biotechnology (3)

Lecture—3 hour(s). Prerequisite(s): (BIS 001A or BIS 002A); (BIS 101 or PLS 152). Principles and concepts of plant biotechnology including recombinant DNA technology, molecular biology, genomics, cell and tissue culture, gene transfer and crop improvement strategies using transgenic crops. Not open for credit to students who have completed PLB 160. (Former PLB 160.). GE credit: SE. Effective: 2008 Winter Quarter.

BIT 161A—Genetics & Biotechnology Laboratory (6)

Lecture—3 hour(s); Laboratory—9 hour(s). Prerequisite(s): PLS 152 or BIS 101; and Consent of Instructor. Techniques of genetic analysis at the molecular level including recombinant DNA, gene mapping and basic computational biology. Not open for credit to students who have completed PLB 161A. GE credit: SE. Effective: 2010 Winter Quarter.

BIT 161B—Plant Genetics & Biotechnology Laboratory (4)

Lecture—1 hour(s); Laboratory—8 hour(s). Prerequisite(s): PLS 152 or BIS 101; and Consent of Instructor. Advanced techniques of genetic analysis at the molecular and cellular levels, including transformation, gene expression and analysis of transgenic plants. Not open for credit to students who have taken PLB 161B. (Former PLB 161B.). GE credit: SE, SL. Effective: 2011 Fall Quarter.

BIT 171—Professionalism & Ethics in Genomics & Biotechnology (3)

Lecture—1 hour(s); Discussion—2 hour(s). Prerequisite(s): Upper division standing in a natural science major. Real and hypothetical case studies to illustrate ethical issues in genomics and biotechnology. Training and practice in difficult ethical situations and evaluating personal and social consequences. GE credit: SE, SL, WE. Effective: 2005 Winter Quarter.

BIT 188—Undergraduate Research Proposal (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Upper division standing. Preparation and review of a scientific proposal. Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation. (Same course as PLS 188.) GE credit: OL, SE, WE. Effective: 2009 Spring Quarter.

BIT 189L—Laboratory Research in Genomics & Biotechnology (2-5)

Laboratory—3-12 hour(s); Discussion—1 hour(s). Prerequisite(s): BIT 188; and Consent of Instructor. Formulating experimental approaches to current questions in biotechnology; performance of proposed experiments. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2000 Spring Quarter.

BIT 192—Internship in Biotechnology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Work experience on or off campus in a subject area pertaining to biotechnology or in a business, industry or agency associated with biotechnology. Internship supervised by faculty member in the animal or plant sciences. (P/NP grading only.) Effective: 1998 Fall Quarter.

BIT 194H—Honors Thesis in Biotechnology (1-2)

Independent Study—3-6 hour(s). Prerequisite(s): BIT 188; BIT 189L; Consent of Instructor. Senior standing in Biotechnology with 3.250 GPA or higher. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.) GE credit: SE, WE. Effective: 2016 Winter Quarter.

BIT 198—Directed Group Study (1-5)

Variable—1-15 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

BIT 199—Special Study for Advanced Undergraduates (1-5)

Independent Study—3-15 hour(s). Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1998 Fall Quarter.

BPH—Biophysics

Courses in BPH:

BPH 200A—Current Techniques in Biophysics (3)

Lecture—3 hour(s). Prerequisite(s): BIS 102; CHE 110A; Or equivalents. Current Techniques in Biophysics. Topics include mathematical methods, modeling, mass spectrometry, stochastic process, scanning probe microscopy, electron microscopy, fluorescence, membrane diffusion/mechanics, and single particle tracking. (S/U grading only.) Effective: 2009 Winter Quarter.

BPH 200B—Current Techniques in Biophysics (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110A; BIS 102; Or equivalent of BIS 102. Current Techniques in Biophysics. Topics include protein folding, membrane structure and dynamics, Raman spectroscopy, fluorescence resonance energy transfer, time resolved fluorescence, quantum dot, fluorescence imaging, esr, high resolution nmr, and in vivo nmr. (S/U grading only.) Effective: 2007 Spring Quarter.

BPH 200LA—Biophysics Laboratory (3)

Laboratory—18 hour(s). Prerequisite(s): BPH 200 (can be concurrent). One five-week laboratory assignment in the research laboratory of a Biophysics Graduate Group faculty member. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated up to 4 time(s). Effective: 1997 Winter Quarter.

BPH 200LB—Biophysics Laboratory (6)

Laboratory. Prerequisite(s): BPH 200 (can be concurrent). Two five-week laboratory assignments in the research laboratories of Biophysics Graduate Group faculty members. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated up to 2 time(s). Effective: 1997 Winter Quarter.

BPH 231—Biological Nuclear Magnetic Resonance (3)

Lecture—3 hour(s). Prerequisite(s): MCB 221A; or Consent of Instructor. Or the equivalent. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as BCM 231.) Effective: 1997 Winter Quarter.

BPH 241—Membrane Biology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 102; BIS 103; BIS 104; or Consent of Instructor. Advanced topics on membrane biochemistry and biophysics. Relationship of the unique properties of biomembranes to their roles in cell biology and physiology. Effective: 2017 Winter Quarter.

BPH 255—Nanoscale Imaging for Molecular Medicine (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): BIM 202 highly recommended; graduate standing. Current and emerging technologies to visualize biological structures and processes at size scales = 100 nanometers – and their application towards the advancement of molecular medicine. Technologies include superresolution optical microscopy electron microscopy and tomography. Emphasis on quantitative imaging. (Same course as BIM 255.) Effective: 2017 Spring Quarter.

BPH 271—Optical Methods in Biophysics (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): BIS 102; EAD 108B; CHE 110A; Or equivalents. Principal optical techniques used to study biological structures and their related functions. Specific optical techniques useful in the studies of protein-nucleic acid, protein-membrane and protein-protein interactions. Biomedical applications of optical techniques. Effective: 2017 Spring Quarter.

BPH 288—Living Matter: Physical Biology of the Cell (3)

Lecture—3 hour(s). Open to any student possessing general background in any disciplines of physical or biological sciences and engineering. Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability. (Same course as BIM 288, EMS 288.) Effective: 2017 Winter Quarter.

BPH 290—Biophysics Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Presentation of current research by experts in biophysics. May be repeated for credit. (S/U grading only.) Effective: 2004 Winter Quarter.

BPH 290C—Research Conference in Biophysics (1)

Discussion—1 hour(s). Prerequisite(s): BPH 299 (can be concurrent); Graduate standing in Biophysics and/or consent of instructor. Presentation and discussion of faculty and graduate-student research in biophysics. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

BPH 293—Introduction to Research Topics (1)

Seminar—1 hour(s). Presentation of current research activities of the Biophysics Graduate Group faculty. Facilitation of students in developing their research interest, and promoting collegial interactions. May be repeated up to 1 time(s) when topics differ. (S/U grading only.) Effective: 2003 Fall Quarter.

BPH 298—Group Study (1-5)

Variable—1-5 hour(s). (S/U grading only.) Effective: 1997 Winter Quarter.

BPH 299—Research (1-12)

Variable—3-36 hour(s). (S/U grading only.) Effective: 1997 Winter Quarter.

BPT—Biophotonics

Courses in BPT:

BPT 201—Current Topics in Biophotonics & Bioimaging Research (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Designed to help graduate students develop and maintain familiarity with the current and past literature in the field of Biophotonics and Bioimaging research and related areas. May be repeated up to 4 time(s) when subject differs. Effective: 2016 Fall Quarter.

BST—Biostatistics

Courses in BST:

BST 222—Biostatistics: Survival Analysis (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): STA 131C. Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics. (Same course as STA 222.) Effective: 2002 Fall Quarter.

BST 223—Biostatistics: Generalized Linear Models (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): STA 131C. Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as STA 223.) Effective: 2002 Fall Quarter.

BST 224—Analysis of Longitudinal Data (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): (BST 222 or STA 222); (BST 223 or STA 223); STA 232B; or Consent of Instructor. Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings. (Same course as STA 224.) Effective: 2005 Spring Quarter.

BST 225—Clinical Trials (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): BST 223 or STA 223; or Consent of Instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as STA 225.) Effective: 2005 Spring Quarter.

BST 226—Statistical Methods for Bioinformatics (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): BST 131C or Consent of Instructor; Data analysis experience recommended. Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of -omics data. (Same course as STA 226.) Effective: 2007 Winter Quarter.

BST 227—Machine Learning in Genomics (4)

Lecture/Discussion—3 hour(s); Project (Term Project). Prerequisite(s): STA 208 or ECS 171; or Consent of Instructor. Emerging problems in molecular biology and current machine learning-based solutions to those problem. How deep learning, kernel methods, graphical models, feature selection, non-parametric models and other techniques can be applied to application areas such as gene editing, gene network inference and analysis, chromatin state inference, cancer genomics and single cell genomics. Effective: 2019 Spring Quarter.

BST 252—Advanced Topics in Biostatistics (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): BST 222; BST 223. Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit when topic differs with consent of advisor. (Same course as STA 252.) Effective: 2002 Fall Quarter.

BST 290—Seminar in Biostatistics (1)

Seminar—1 hour(s). Restricted to graduate standing. Seminar on advanced topics in the field of biostatistics. Presented by members of the Biostatistics Graduate Group and other guest speakers. May be repeated up to 12 time(s). (S/U grading only.) Effective: 2002 Fall Quarter.

BST 298—Directed Group Study (1-5)

Variable—3-15 hour(s). Special topics in Biostatistics appropriate for group study at the graduate level. May be repeated for credit. Effective: 2004 Spring Quarter.

BST 299—Special Study for Biostat Graduate Students (1-12)

Variable—3-36 hour(s). Special topics in Biostatistics appropriate for directed individual study on advanced topics not otherwise covered in the Biostatistics curriculum. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

BST 299D—Dissertation Research (1-12)

Variable—3-36 hour(s). Prerequisite(s): and Consent of Instructor. Advancement to Candidacy for Ph.D. Research in Biostatistics under the supervision of major professor. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

CAR—Cardiology

Courses in CAR:

CAR 192—Internship in Cardiology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in cardiology. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CAR 199—Cardiology Research (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions. (P/NP grading only.) Effective: 1997 Winter Quarter.

CAR 220—Basic Science in Cardiology (1)

Lecture—1 hour(s). Prerequisite(s): Graduate or medical student status. Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural control of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current information in their areas. (S/U grading only.) Effective: 1997 Winter Quarter.

CAR 299—Cardiology Research (1-12)

Variable—40 hour(s). Prerequisite(s): Consent of Instructor. Research or special studies. (S/U grading only.) Effective: 2010 Spring Quarter.

CAR 401—Clinical Cardiology Clerkship: Kaiser (3-18)

Clinical Activity—1-5 hour(s). Prerequisite(s): Third- and fourth-year medical students with advance approval by Division of Cardiology. Limited enrollment. Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CCU and elsewhere. Roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 460—Cardiology Clinical Clerkship (3-18)

Clinical Activity—2-12 hour(s). Prerequisite(s): IMD 430; Third- and fourth-year medical students in good academic standing with consent of instructor. Limited enrollment. Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiologic disorders. Two outpatient clinics per week. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 461—Management of Coronary Artery Disease: Coronary Care Unit (3-18)

Clinical Activity. Prerequisite(s): Completion of second-year of medical school and advance approval by Division of Cardiology. Limited enrollment. Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 464—Preventive Cardiology (3-6)

Seminar—2 hour(s); Clinical Activity. Prerequisite(s): Consent of Instructor. Completion of third-year medical school. Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery services. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 480—Insights in Cardiology (1-3)

Clinical Activity—3-9 hour(s). Prerequisite(s): Medical student in good academic standing and approval by Division of Cardiology. Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 493—Gender Specific Medicine SSM (6)

Lecture—5 hour(s); Lecture/Lab—10 hour(s); Laboratory—16 hour(s); Clinical Activity—4 hour(s). Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Special Studies Module, a four-week course on the topic Basic Science Principles Relating to Gender Specific Medicine. (Same course as OBG 493.) (H/P/F grading only.) Effective: 2007 Spring Quarter.

CAR 498—Special Group Study: EKG Unit (1-12)

Variable. Prerequisite(s): Medical student with advance approval by monthly attending faculty. Limited enrollment. Special group study in cardiology for medical students in EKG unit. May include lectures, directed reading, and/or discussion groups. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 499—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Approval by Division of Cardiology. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CDM—Cinema & Digital Media

Courses in CDM:**CDM 002—Introduction to Technocultural Studies (4)**

Lecture—3 hour(s); Discussion—1 hour(s). Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices. Not open for credit to students who have taken TCS 001. GE credit: AH, VL, WE. Effective: 2019 Winter Quarter.

CDM 003—Media Archaeology (4)

Lecture—3 hour(s); Term Paper. Evolution of media technologies and practices beginning in the 19th century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies. Not open for credit to students who have taken TCS 005. GE credit: AH, SE, VL, WE. Effective: 2019 Summer Session 1.

CDM 020—Filmmaking Foundations (5)

Lecture—3 hour(s); Laboratory—3 hour(s); Film Viewing—2 hour(s). Prerequisite(s): CDM 001 and/or CDM 003 recommended. Introduction to filmmaking concepts, principles, and methods. Emphasis on form, content and historical dialectic between classical narrative filmmaking conventions and artists' challenges to these conventions. Not open for credit to students who have taken CTS 020. GE credit: AH, VL. Effective: 2019 Winter Quarter.

CDM 041A—History of Cinema from 1895-1945 (4)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing—3 hour(s). Prerequisite(s): CDM 001 recommended. Examination of the cultural context of the emergence of cinema. Discussion of cinema as a product of the age of industrialization and conquest, as well as an element of urban culture, and mass transportation. Not open for credit to students who have taken CTS 041A. GE credit: AH, OL, VL, WC, WE. Effective: 2018 Summer Session 1.

CDM 072—Introduction to Games (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Introduction to the history, theory, and practice of play. Survey of both analog and digital games. Overview of gaming cultures, aesthetics, industries, and technologies. (Same course as ENL 072.) GE credit: AH, VL. Effective: 2017 Fall Quarter.

CDM 092—Internship (1-12)

Internship—1-12 hour(s). Prerequisite(s): Consent of Instructor. Supervised internship, on or off campus, in the area of cinema and digital media. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 098—Directed Group Study (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Directed group study in cinema and digital media. May be repeated for credit when topics differ. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 099—Special Study for Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Special study for undergraduates in cinema and digital media. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 100—Experimental Digital Cinema I (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CDM 020 or ART 012; or Consent of Instructor. Experimental approaches to the making of film and video in the age of digital technologies. Builds upon the foundation provided by CDM 020. Instruction in technical, conceptual, creative, and critical skills for taking a project from idea to fruition. GE credit: AH, OL, VL. Effective: 2019 Winter Quarter.

CDM 101—Experimental Digital Cinema II (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CDM 100; Consent of Instructor. Continuation of CDM 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition. GE credit: AH, VL. Effective: 2018 Summer Session 1.

CDM 103—Interactivity & Animation (4)

Laboratory—3 hour(s); Lecture/Discussion—3 hour(s). Fundamentals of creating interactive screen-based work. Theories of interactivity, linear versus non-linear structures & audience involvement and participation. Use of digital production tools to produce class projects. GE credit: AH, VL. Effective: 2020 Spring Quarter.

CDM 105—Feminist Media Production (6)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s); Fieldwork—6 hour(s). Prerequisite(s): (CTS 020 or CDM 020); or two WMS courses. Media production as a mode of cultural criticism, furthering feminist and social justice goals. Fundamentals of camera, editing and distribution via a social engagement model. Study and hands-on response to key historic and contemporary feminist and social justice media discourses. (Same course as WMS 165.) GE credit: ACGH, AH, DD, SS, VL. Effective: 2018 Fall Quarter.

CDM 107—Acting for Camera (4)

Lecture/Lab—6 hour(s). Prerequisite(s): Consent of Instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated up to 2 time(s) when instructor differs. (Same course as DRA 174.) GE credit: AH. Effective: 2020 Fall Quarter.

CDM 111—Community Media Production (4)

Laboratory—3 hour(s); Lecture/Discussion—3 hour(s). Prerequisite(s): CDM 020 recommended. Use of video and new media tools to address social issues among neighborhood and community groups. Use basic video, sound, and lighting techniques while working with local groups in a group video project. GE credit: AH, VL. Effective: 2018 Summer Session 1.

CDM 113—Community Networks & Social Media (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Impact and implications of computer-based networks in community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action. Effective: 2018 Summer Session 1.

CDM 121—Introduction to Sonic Arts (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Introduction to the use of sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works. Effective: 2018 Summer Session 1.

CDM 122—Intermediate Sonic Arts (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CDM 121; or Consent of Instructor. Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, found sounds to create multidimensional stories. Presentation of live performances, etc. Effective: 2018 Summer Session 1.

CDM 123—Sight & Soundtrack (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Use of sound to articulate, lend mood or subconsciously underscore visual, environmental, or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement. GE credit: AH. Effective: 2018 Fall Quarter.

CDM 125—Advanced Sound: Performance & Improvisation (4)

Practice—3 hour(s); Workshop—3 hour(s). Prerequisite(s): CDM 121; CDM 122; or Consent of Instructor. Culmination of CDM sound courses. Focuses on performance and improvisation, culminating in a final public performance. Expectation of extensive reading and rehearsal outside of class time. GE credit: AH. Effective: 2018 Summer Session 1.

CDM 130—Fundamentals of Computer Graphics (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Foundation course teaches the theory of three-dimensional computer graphics, including modeling, rendering and animation. Development of practical skills through the use of professional software to create computer graphics. Not open for credit to students who have taken TCS 130. GE credit: VL. Effective: 2018 Fall Quarter.

CDM 131—Character Animation (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CDM 130 or TCS 130. The art of character animation in three dimensional computer animation. Movement theory, principles of animation, animation timing. Development of technical and practical skills. Not open for credit to students who have taken TCS 131. GE credit: AH, VL. Effective: 2018 Fall Quarter.

CDM 135—Object-Oriented Programming for Artists (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CDM 002 recommended. Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations. GE credit: VL. Effective: 2018 Fall Quarter.

CDM 136—Electronics for Artists (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Creative application of electronic technology relevant to media and fine arts involving both electronic principles and hands-on application. Effective: 2019 Spring Quarter.

CDM 137—Topics in Virtuality (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): CDM 002 recommended. Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists' work and writing. GE credit: AH. Effective: 2019 Summer Session 1.

CDM 156—Epic Television: The Golden Age of TV? Sopranos, Wire, Girls, Walking Dead (4)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing—3 hour(s). Critically celebrated scripted television since the mid-1990s. Key themes including class, ethnicity, race, violence, and US politics. Major developments in the medium's history as context for recent wave of epic television. GE credit: AH, OL, VL, WE. Effective: 2018 Fall Quarter.

CDM 158—Technology & the Modern American Body (4)

Lecture/Discussion—3 hour(s); Term Paper. History and analysis of relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. Not open for credit to students who have taken TCS 158. (Same course as AMS 158.) GE credit: ACGH, AH, WE. Effective: 2019 Winter Quarter.

CDM 163—Art & Cinema: Between the White Cube & the Black Box (4)

Lecture—3 hour(s); Film Viewing—3 hour(s). Current debates between cinema studies and contemporary art. Issues covered include, experimental modes of filming, montaging, installing, screening, and displaying images between the White Cube (gallery/museum) and the Black Box (cinema). GE credit: AH, OL, VL, WE. Effective: 2017 Winter Quarter.

CDM 165E—Nazi & Fascist Cinema: Film & other Visual Media (4)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing. Analysis of nefarious and noxious cultural products in history: films made under the Nazis and other fascists, 1933-1945. Questions at heart of humanistic studies: relationship of culture to propaganda, politics, and even unfathomable crime. (Same course as GER 165E.) GE credit: OL, VL, WC, WE. Effective: 2018 Fall Quarter.

CDM 189—Special Topics in Cinema & Digital Media (4)

Lecture/Discussion—3 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): CDM 001 or CDM 002 recommended. Special topics in cinema & digital media. May be repeated up to 2 time(s) when topic differs. GE credit: AH, VL, WE. Effective: 2019 Fall Quarter.

CDM 192—Internship (1-12)

Internship—1-12 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Supervised internship, on or off campus, in the area of cinema and digital media. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 197T—Tutoring in Cinema & Digital Media (1-5)

Tutorial—1-5 hour(s). Prerequisite(s): Consent of Instructor. Consent of Department Chair. Leading small voluntary discussion groups affiliated with departmental courses under the supervision of the course instructor. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2018 Summer Session 1.

CDM 198—Directed Group Study (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Directed group study in cinema and digital media. For students with upper division standing. May be taught abroad. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 199—Special Study for Advanced Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Special study in cinema and digital media. For advanced undergraduates with upper division standing. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 396—Teaching Assistant Training Practicum (1-4)

Variable—3-12 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

CGS—Cognitive Science

Courses in CGS:

CGS 001—Introduction to Cognitive Science (4)

Lecture/Discussion—4 hour(s). Pass One open to Cognitive Science majors only. Introduction to the interdisciplinary cognitive scientific approach to the study of mind, drawing concepts and methods from psychology, philosophy, linguistics, artificial intelligence, and other disciplines. (Same course as PHI 010.) GE credit: SE, SL. Effective: 2017 Fall Quarter.

CGS 098—Directed Group Study (0.5-5)

Variable—1-15 hour(s). Prerequisite(s): Consent of Instructor. Directed group study in cognitive science. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2019 Winter Quarter.

CGS 099—Special Study for Lower Division Students (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Special study for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

CGS 107—Neuroeconomics/Reinforcement Learning & Decision Making (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): (PSC 100 or PSC 100Y or PSC 135 or ECN 100A or ARE 100A or NPB 162 or NPB 163); (STA 013 or STA 013Y or STA 100 or PSC 103A); or Consent of Instructor. Theoretical and empirical approaches to neuroeconomics (neuroscience of decision making) from psychology, neuroscience, economics, and computer science. Neuroscience of judgment and decision making, behavioral economics, and reinforcement learning. (Same course as ECN 107, PSC 133.) GE credit: SL, SS. Effective: 2018 Spring Quarter.

CGS 138—Consciousness & Cognition (4)

Lecture—4 hour(s). Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 100Y or PSC 135). Current theoretical and empirical evidence in the study of cognition and consciousness. Theories of consciousness, psychological and neural basis of conscious and unconscious processes such as attention, intentionality, and dreams. (Same course as PSC 138.) Effective: 2018 Spring Quarter.

CGS 192—Fieldwork in Cognitive Science (1-5)

Fieldwork—3-15 hour(s). Prerequisite(s): Consent of Instructor. Supervised internship off and on campus, in community and institutional settings. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2019 Winter Quarter.

CGS 194HA—Special Study for Honors Students (3)

Independent Study—9 hour(s). Prerequisite(s): Consent of Instructor. Senior standing in Cognitive Science; qualifications for admission into college honors program. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. Effective: 2019 Fall Quarter.

CGS 194HB—Special Study for Honors Students (3)

Independent Study—9 hour(s). Prerequisite(s): Consent of Instructor. Senior standing in Cognitive Science; qualifications for admission into college honors program. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. Effective: 2020 Spring Quarter.

CGS 198—Directed Group Study (0.5-5)

Variable—1-15 hour(s). Prerequisite(s): Consent of Instructor. Directed group study in cognitive science. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2019 Winter Quarter.

CGS 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

CHA—Cell Biology & Human Anatomy

Courses in CHA:**CHA 101—Human Gross Anatomy (4)**

Lecture—4 hour(s). Prerequisite(s): BIS 002A; Concurrent enrollment in EXB 106L or CHA 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as EXB 106.) GE credit: SE. Effective: 2010 Fall Quarter.

CHA 101L—Human Gross Anatomy Laboratory (3)

Laboratory—9 hour(s). Prerequisite(s): BIS 002A; (EXB 106 (can be concurrent) or CHA 101 (can be concurrent)); If EXB 106 or CHA 101 is not taken concurrently, it must have been already completed. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of prosected human cadavers in small group format with extensive hands-on experience. (Same course as EXB 106L.) GE credit: SE. Effective: 2010 Fall Quarter.

CHA 102—Human Microscopic Anatomy: Structure & Function of Human Tissues & Organ Systems (4.5)

Lecture—3 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): BIS 104. Limited enrollment. Complements Gross Anatomy by extending the study of structure to the microscopic level. Shows how cells are assembled into tissues, and tissues into organs, with an emphasis on demonstrating how microscopic structure explains function. GE credit: SE. Effective: 2017 Winter Quarter.

CHA 103—Human Clinical Neuroanatomy (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHA 101; or Consent of Instructor. Open to upper division students. Clinically relevant anatomy of the normal human nervous system, including external and internal anatomy of the brain, spinal cord, and cranial nerves. Blood supply to the brain and spinal cord. Functional neuroanatomy of motor, sensory, and cognitive systems. Application of neuroanatomical principles relevant to clinical problem solving for students entering health care professions. (Same course as NEU 103.) GE credit: SE. Effective: 2018 Spring Quarter.

CHA 192—Internship in Morphology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship. Experience of supervised internship in research laboratories of members of the department. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 197T—Tutoring in Cell Biology & Human Anatomy (1-5)

Discussion—1 hour(s); Laboratory—6-9 hour(s). Prerequisite(s): CHA 101 B or better; and Consent of Instructor. Provides laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 198—Directed Group Study (1-5)

Discussion—1-10 hour(s). Prerequisite(s): Consent of Instructor. Directed reading, discussion, and/or laboratory experience on selected topics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 200—Graduate Human Gross Anatomy (6)

Lecture—4 hour(s); Laboratory—6 hour(s). Prerequisite(s): Consent of Instructor. Open only to full-time graduate students. Lectures on human gross anatomy and cadaver dissection laboratory. Topics arranged by region; emphasis on osteology, neuromuscular anatomy, cardiovascular anatomy, gastrointestinal anatomy and anatomy of reproductive systems. Only 2 units of credit for students who have completed CHA 101. Effective: 2008 Winter Quarter.

CHA 202—Microscopic Anatomy for Researchers (3)

Lecture—2 hour(s); Discussion/Laboratory—3 hour(s). Open to graduate students in the biomedical sciences (no consent required); advanced undergraduates seeking research careers in the biomedical sciences (consent of instructor required). The growing importance of the use of gene knock-out studies and imaging technology requires significant understanding of basic anatomy. Designed to familiarize students in diverse fields with anatomical, cellular and tissue organization of typical animal models. Effective: 2017 Spring Quarter.

CHA 203—Neurobiology (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Two upper division or one graduate course in Neurobiology. Physiology and anatomy of the normal human nervous system in an integrated format. Effective: 2004 Spring Quarter.

CHA 290—Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHA 290C—Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate student with research experience (may be taken concurrently). Discussion of problems, progress and literature groups relevant to current research undertaken by laboratory groups Human Anatomy. (S/U grading only.) Effective: 1997 Winter Quarter.

CHA 298—Advanced Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

CHA 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHA 400—Developmental, Gross & Radiologic Anatomy (7.5)

Lecture—3 hour(s); Laboratory—5 hour(s). Prerequisite(s): Consent of Instructor. Medical students only. Integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth. (P/F grading only.) Effective: 2011 Summer Quarter.

CHA 402—Cell & Tissue Biology (4.5)

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): Consent of Instructor. Medical student only. Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and identification of sectioned material at the light microscopic and ultrastructural levels. (P/F grading only.) Effective: 2011 Summer Quarter.

CHA 403—Medical Neuroanatomy (5)

Lecture—3 hour(s); Laboratory—1 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): CHA 400; Block 1. Restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as HPH 403.) (P/F grading only.) Effective: 2007 Summer Quarter.

CHA 493B—Anatomy Medical Education Special Study Module (6)

Seminar—10 hour(s); Clinical Activity—14 hour(s); Auto Tutorial—6 hour(s); Independent Study—10 hour(s). Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Attend all of the lectures and laboratory sessions for CHA 400 and CHA 402 during the four-week section; approximately seven anatomy labs and three-four histology labs. Tutor first-year students during the laboratory sessions. Prepare and present a clinical correlate session. (H/P/F grading only.) Effective: 2007 Spring Quarter.

CHA 497T—Tutoring in Human Anatomy (3-6)

Tutorial—3-15 hour(s). Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Fall Quarter.

CHA 498—Advanced Group Study (1-12)

Variable. Prerequisite(s): Medical students, interns, and residents with consent of instructor. Directed reading and group discussions and/or laboratory experience on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CHA 499—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CHE—Chemistry

Courses in CHE:

Chemistry Placement Requirement. Students who enroll in Chemistry (CHE) 002A, 002AH, or 003A must satisfy the Chemistry Placement Requirement. Students who do not meet the placement requirement will be administratively dropped from these Chemistry courses. For more information about the placement requirements, see [Chemistry Placement Requirement](#).

The Academic Assistance & Tutoring Centers (AATC) provide review materials, workshops, drop-in and group tutoring, and additional resources. For additional information, see [AATC Chemistry](#).

For additional help, Chemistry Graduate Students Tutors are also listed on the Department of Chemistry, see [Tutors in Chemistry](#). To learn about other resources to help satisfy the Chemistry Placement Requirement, feel free to contact a Department of Chemistry advisor at chemundergrads@ucdavis.edu.

CHE 002A—General Chemistry (5) *Review all entries*

Lecture—3 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): High school chemistry and physics, and concurrent enrollment in mathematics at or above the level of MAT 012 strongly recommended; any one of the following: (A) SAT Mathematics score = 600+; (B) ACT Mathematics score = 27+; (C) AP Chemistry exam score of = 3+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 24+ on first attempt; in lieu of A-E, either completion of ALEKS online Preparatory Chemistry course with 100% Pie Mastery or completion of Workload 041C with a grade of C or better (Workload 041C offered in fall quarter only to students who do not meet A-E). Periodic table, stoichiometry, chemical equations, physical properties and kinetic theory of gases, atomic and molecular structure and chemical bonding. Laboratory experiments in stoichiometric relations, properties and collection of gases, atomic spectroscopy, and introductory quantitative analysis. Not open for credit to students who have taken CHE 002AH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002A—General Chemistry (5) *Review all entries*

Lecture—3 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): High school chemistry and physics, and concurrent enrollment in mathematics at or above the level of MAT 012 strongly recommended; must earn a qualifying score of 24 or better on the Chemistry Placement Exam; ore information about the Chemistry Placement Requirements to ensure enrollment in CHE 002A can be found at <https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements>. Periodic table, stoichiometry, chemical equations, physical properties and kinetic theory of gases, atomic and molecular structure and chemical bonding. Laboratory experiments in stoichiometric relations, properties and collection of gases, atomic spectroscopy, and introductory quantitative analysis. Not open for credit to students who have taken CHE 002AH. GE credit: QL, SE, SL. Effective: 2020 Summer Session 1.

CHE 002AH—Honors General Chemistry (5) *Review all entries*

Lecture—3 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): Consent of Instructor. High school chemistry and physics, and concurrent enrollment in mathematics at or above the level of MAT 012 strongly recommended; must earn a qualifying score of 33 or better on the Chemistry Placement Exam; more information about the Chemistry Placement Requirements to ensure enrollment in CHE 002A can be found at <https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements>. Limited enrollment course with a more rigorous treatment of material covered in CHE 002A. Students completing CHE 002AH can continue with CHE 002BH or CHE 002B. Not open for credit to students who have taken CHE 002A. GE credit: QL, SE, SL. Effective: 2020 Summer Session 1.

CHE 002AH—Honors General Chemistry (5) *Review all entries*

Lecture—3 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): Consent of Instructor. High school chemistry and physics. Any ONE of the following: (A) SAT Mathematics score = 670+; (B) ACT Mathematics score = 30+; (C) AP Chemistry exam score = 4+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 33+ on first attempt; (F) UC Davis Chemistry Placement Examination score = 30+ AND UC Davis Mathematics Placement Examination score = 45+, both on first attempts; consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in CHE 002A. Students completing CHE 002AH can continue with CHE 002BH or CHE 002B. Not open for credit to students who have taken CHE 002A. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002B—General Chemistry (5)

Lecture—3 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): CHE 002A C- or better or CHE 002AH C- or better. Continuation of CHE 002A. Condensed phases and intermolecular forces, chemical thermodynamics, chemical equilibria, acids and bases, solubility. Laboratory experiments in thermochemistry, equilibria, and quantitative analysis using volumetric methods. Not open for credit to students who have taken CHE 002BH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002BH—Honors General Chemistry (5)

Lecture—3 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): CHE 002A or CHE 002AH C or better; MAT 021B (can be concurrent); or Consent of Instructor. CHE 2A with consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in CHE 002B. Students completing CHE 002BH can continue with CHE 002CH or CHE 002C. Not open for credit to students who have taken CHE 002B. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002C—General Chemistry (5)

Lecture—3 hour(s); Discussion/Laboratory—4 hour(s). Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better. Continuation of CHE 002B. Kinetics, electrochemistry, spectroscopy, structure and bonding in transition metal compounds, application of principles to chemical reactions. Laboratory experiments in selected analytical methods and syntheses. Not open for credit to students who have taken CHE 002CH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002CH—Honors General Chemistry (5)

Lecture—3 hour(s); Discussion/Laboratory—6 hour(s). Prerequisite(s): CHE 002B or CHE 002BH C or better; MAT 021C (can be concurrent); or Consent of Instructor. CHE 002B with consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in CHE 002C. Not open for credit to students who have taken CHE 002C. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 003A—Chemistry for Life Sciences: Determining Structure & Predicting Properties (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): High high school chemistry and physics strongly recommended; satisfactory score on the Chemistry and Mathematics Placement Examinations or satisfactory completion of the ALEKS Summer Chemistry Prep Course; a satisfactory grade in WKL 041C ('P' or 'C' or better) will suffice in lieu of a satisfactory Chemistry Placement Examination score. Concurrent enrollment with CHE 002A, CHE 002B, CHE 002C, CHE 002AH, CHE 002BH, CHE 002CH prohibited; not open for enrollment to students who have completed CHE 002C or 002CH with a C- or better. Integrated General and Organic Chemistry intended for majors in the life sciences. Core concepts of chemical composition, structure and properties. Includes phase changes, separation methods, composition, spectroscopy, atomic and molecular structure, periodicity, bonding, charge distribution, intermolecular forces, and physical properties. Only 3 units credit for students who have completed CHE 002A or CHE 002AH with a C- or better; only 1 unit of credit to students who have completed CHE 002B or CHE 002BH with a C- or better. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 003B—Chemistry for Life Sciences: Predicting & Characterizing Chemical Change (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 003A C- or better; Note: C- or better in CHE 002A or 002AH does not satisfy the prerequisite requirement. Concurrent enrollment with CHE 002A, CHE 002B, CHE 002C, CHE 002AH, CHE 002BH, CHE 002CH prohibited. Continuation of CHE 003A covering core concepts of characterization of chemical processes and predicting chemical changes. Includes modeling chemical reactions, understanding proportions/stoichiometry, tracking energy, activation energy, reaction kinetics, thermodynamics, and equilibrium. Only 3 units credit for students who have completed CHE 002B or CHE 002BH with a C- or better. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

CHE 003C—Chemistry for Life Sciences: Controlling Processes & Synthetic Pathways (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 003B C- or better; Note: C- or better in CHE 002B or 002BH does not satisfy the prerequisite requirement. Concurrent enrollment with CHE 002A, CHE 002B, CHE 002C, CHE 002AH, CHE 002BH, CHE 002CH prohibited. Continuation of CHE 003B covering core concepts of harnessing energy, controlling reaction extent, and organic chemistry synthetic pathways. Includes acids and bases, thermodynamics, chemical equilibria, organic chemistry terminology and mechanisms. Only 3 units credit for students who have completed CHE 002C or CHE 002CH with a C- or better. GE credit: QL, SE, SL. Effective: 2017 Spring Quarter.

CHE 008A—Organic Chemistry: Brief Course (2)

Lecture—2 hour(s). Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better. With CHE 008B, an introduction to the nomenclature, structure, chemistry, and reaction mechanisms of organic compounds. Intended for students majoring in areas other than organic chemistry. No credit to students who have completed CHE 118A or 128A. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 008B—Organic Chemistry: Brief Course (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 008A or CHE 118A or CHE 128A. Laboratory concerned primarily with organic laboratory techniques and the chemistry of the common classes of organic compounds. Lecture portion a continuation of CHE 008A. Varying credit hours according to courses taken previously and corresponding expected workload for this course; full credit to students who complete CHE 118A or 128A; 3 units credit to students who have completed CHE 128A and CHE 129A (students who have completed CHE 129A are exempt from the laboratory portion of CHE 008B); 2 units credit to students who have completed CHE 128B; 1 unit credit to students who have completed CHE 118B or CHE 128B and CHE 129A (students who have completed CHE 118B are exempt from the laboratory portion of CHE 008B). GE credit: SE. Effective: 2016 Fall Quarter.

CHE 010—Concept of Chemistry (4)

Lecture—4 hour(s). Survey of basic concepts and contemporary applications of chemistry. Designed for non-science majors and not as preparation for CHE 002A. Not open for credit to students who have had CHE 002A; but students with credit for CHE 010 may take CHE 002A for full credit. GE credit: SE, SL. Effective: 1997 Winter Quarter.

CHE 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special study for undergraduates. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 100—Environmental Water Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 002C or CHE 002CH. Practical aspects of water chemistry in the environment, including thermodynamic relations, coordination chemistry, solubility calculations, redox reactions and rate laws. Computer modeling of the evolution in water chemistry from contact with minerals and gases. Effective: 2016 Winter Quarter.

CHE 103A—Chemistry for Life Sciences: Determining Organic Structures & Properties (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better; (CHE 008A or CHE 118A or CHE 128A). Not open for enrollment to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, CHE 128C with a C- or better. Continuation of PHE 003C. Core concepts of organic structure, nomenclature, functional groups, organic acids and bases, resonance and delocalization, aromaticity, intermolecular forces, three-dimensional structure and conformational analysis, spectroscopy. Only 3 Units of credit for students who have completed CHE 008A with a C- or better; only 2 units of credit for students who have completed CHE 118A or CHE 128A with a C- or better; not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, CHE 128C with a C- or better. GE credit: SE, SL. Effective: 2017 Fall Quarter.

CHE 103B—Chemistry for Life Sciences: Predicting & Controlling Organic Pathways (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 103A C- or better. Not open for enrollment to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, or CHE 128C with a C- or better. Continuation of CHE 103A. Core concepts of functional group transformations, synthesis, mechanisms, sustainable chemistry, structure and function of biomolecules, organic reactions in biological systems, molecular design, detection, separation, and identification of organic molecules. Not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, or CHE 128C. GE credit: SE, SL. Effective: 2018 Winter Quarter.

CHE 104—Forensic Applications of Analytical Chemistry (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 002C or CHE 002CH. Theory and application of standard methods of chemical analysis to evidentiary samples. Use and evaluation of results from screening tests, FTIR, GC and GCMS to various sample types encountered in forensics. Effective: 2016 Winter Quarter.

CHE 105—Analytical & Physical Chemical Methods (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): CHE 110A (can be concurrent) or CHE 107B (can be concurrent). Fundamental theory and laboratory techniques in; analytical and physical chemistry, errors and data analysis methods, basic electrical circuits in instruments, advanced solution equilibria, potentiometric analysis, chromatographic separations, UV-visible spectroscopy, lasers. GE credit: QL, SE, SL. Effective: 2016 Spring Quarter.

CHE 107A—Physical Chemistry for the Life Sciences (3)

Lecture—3 hour(s). Prerequisite(s): CHE 002C or CHE 002CH; (MAT 016C or MAT 017C or MAT 021C); (PHY 007C or PHY 009C or PHY 009HC). Physical chemistry intended for majors in the life science area. Introductory development of classical and statistical thermodynamics including equilibrium processes and solutions of both non-electrolytes and electrolytes. The thermodynamic basis of electrochemistry and membrane potentials. GE credit: SE. Effective: 2017 Spring Quarter.

CHE 107B—Physical Chemistry for the Life Sciences (3)

Lecture—3 hour(s). Prerequisite(s): CHE 107A. Continuation of CHE 107A. Kinetic theory of gases and transport processes in liquids. Chemical kinetics, enzyme kinetics and theories of reaction rates. Introduction to quantum theory, atomic and molecular structure, and spectroscopy. Application to problems in the biological sciences. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 108—Molecular Biochemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128C or CHE 118C. Pass One open to Chemistry majors. Chemical principles and experimental methods applied to the biological sciences to understand the molecular structure and function of proteins, nucleic acids, carbohydrates, and membrane lipids. Effective: 2016 Winter Quarter.

CHE 110A—Physical Chemistry: Introduction to Quantum Mechanics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (PHY 007C or PHY 009C or PHY 009HC); (CHE 002C or CHE 002CH); (MAT 016C or MAT 017C or MAT 021C); Completion of MAT 021D, MAT 022A, MAT 022AL; PHY 009C or PHY 009HC, strongly recommended. Introduction to the postulates and general principles of quantum mechanics. Approximations based on variational method and time independent perturbation theory. Application to harmonic oscillator, rigid rotor, one-electron and many-electron atoms, and homo-and hetero-nuclear diatomic molecules. GE credit: QL, SE. Effective: 2017 Spring Quarter.

CHE 110B—Physical Chemistry: Properties of Atoms & Molecules (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 110A. Group theory. Application of quantum mechanics to polyatomic molecules and molecular spectroscopy. Intermolecular forces and the gas, liquid and solid states. Distributions, ensembles and partition functions. Transport properties. Effective: 1999 Fall Quarter.

CHE 110C—Physical Chemistry: Thermodynamics, Equilibria & Kinetics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 110B. Development and application of the general principles of thermodynamics and statistical thermodynamics. Chemical kinetics, rate laws for chemical reactions and reaction mechanisms. Effective: 1999 Fall Quarter.

CHE 115—Instrumental Analysis (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): CHE 105; (CHE 110B (can be concurrent) or (CHE 107A, CHE 107B)). Intermediate theory and laboratory techniques in analytical and physical chemistry. Advanced data analysis methods and goodness-of-fit criteria. Fourier-transform spectroscopic methods and instrumentation. Mass spectrometry. Electrochemistry. Liquid chromatography. GE credit: QL, SE, WE. Effective: 2006 Fall Quarter.

CHE 118A—Organic Chemistry for Health & Life Sciences (4)

Lecture—3 hour(s); Discussion/Laboratory—1.5 hour(s). Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better. The 118A-C series is for students planning professional school studies in health and life sciences. Rigorous, in-depth presentation of basic principles with emphasis on stereochemistry and spectroscopy and preparations and reactions of nonaromatic hydrocarbons, haloalkanes, alcohols and ethers. Only 2 units credit for students who have completed CHE 008A; not open for credit to students who have completed CHE 008B or CHE 128A. GE credit: SE, SL. Effective: 2017 Spring Quarter.

CHE 118B—Organic Chemistry for Health & Life Sciences (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 118A or CHE 128A. Continuation of CHE 118A, with emphasis on spectroscopy and the preparation and reactions of aromatic hydrocarbons, organometallic compounds, aldehydes and ketones. Only 1 unit of credit to students who completed CHE 128B.; not open for credit to students who have completed 8 or more units of CHE 128 and CHE 129. GE credit: SE, SL. Effective: 2017 Fall Quarter.

CHE 118C—Organic Chemistry for Health & Life Sciences (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 118B or (CHE 128B, CHE 129A). Open to students changing from the CHE 128 course sequence only if they have completed prior organic laboratory work (at least course CHE 129A). Continuation of CHE 118B, with emphasis on the preparation, reactions and identification of carboxylic acids and their derivatives, alkyl and acyl amines, β -dicarbonyl compounds, and various classes of naturally occurring, biologically important compounds. Not open for credit to students who have completed CHE 128C. GE credit: SE, SL. Effective: 2018 Winter Quarter.

CHE 121—Introduction to Molecular Structure & Spectra (4)

Lecture—4 hour(s). Prerequisite(s): CHE 110B. Modern theoretical and experimental methods used to study problems of molecular structure and bonding; emphasis on spectroscopic techniques. Effective: 1997 Winter Quarter.

CHE 122—Chemistry of Nanoparticles (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110C (can be concurrent) or CHE 107B (can be concurrent). Chemical and physical aspects of inorganic nanoparticles. Topics include synthesis, structure, colloidal behavior, catalytic activity, size and shape dependency of physical properties, analytical methods and applications. Effective: 2016 Winter Quarter.

CHE 124A—Inorganic Chemistry: Fundamentals (3)

Lecture—3 hour(s). Prerequisite(s): CHE 002C or CHE 002CH. Symmetry, molecular geometry and structure, molecular orbital theory of bonding (polyatomic molecules and transition metals), solid state chemistry, energetics and spectroscopy of inorganic compounds. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 124B—Inorganic Chemistry: Main Group Elements (3)

Lecture—3 hour(s). Prerequisite(s): CHE 124A. Synthesis, structure and reactivity of inorganic and heteroorganic molecules containing the main group elements. Effective: 1997 Winter Quarter.

CHE 124C—Inorganic Chemistry: d & f Block Elements (3)

Lecture—3 hour(s). Prerequisite(s): CHE 124A. Synthesis, structure and reactivity of transition metal complexes, organometallic and bioinorganic chemistry, the lanthanides and actinides. Effective: 1997 Winter Quarter.

CHE 124L—Laboratory Methods in Inorganic Chemistry (2)

Laboratory—6 hour(s). Prerequisite(s): CHE 124B or CHE 124C (can be concurrent). The preparation, purification and characterization of main group and transition metal inorganic and organometallic compounds. Effective: 2000 Spring Quarter.

CHE 125—Advanced Methods in Physical Chemistry (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): CHE 110C (can be concurrent); CHE 115. Advanced theory and laboratory techniques in analytical and physical chemistry. Advanced spectroscopic methods. Thermodynamics. Kinetics. Chemical literature. Digital electronics and computer interfacing. Laboratory measurements and vacuum techniques. GE credit: QL, SE, WE. Effective: 2000 Spring Quarter.

CHE 128A—Organic Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 002C C or better or CHE 002CH C or better. Introduction to the basic concepts of organic chemistry with emphasis on stereochemistry and the chemistry of hydrocarbons. Designed primarily for majors in chemistry. Chemistry majors should enroll in CHE 129A concurrently. May be taught abroad. Only 2 units credit allowed for students who have completed CHE 008A; not open for credit to students who have completed CHE 008B or 118A. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 128B—Organic Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128A; or Consent of Instructor. Continuation of CHE 128A with emphasis on the chemistry of alcohols, ethers, their sulfur analogs, and carbonyl compounds. Introduction to the application of spectroscopic methods to organic chemistry. Introduction to synthesis of moderately complex organic molecules. May be taught abroad. Full credit to students who completed CHE 008B or CHE 118A; not open for credit to students who have completed CHE 118B. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 128C—Organic Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128B. Continuation of CHE 128B with emphasis on enolate condensations and the chemistry of amines, phenols, and sugars; selected biologically important compounds. May be taught abroad. Full credit to students who completed CHE 118B; Not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129A—Organic Chemistry Laboratory (2)

Lecture—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): (CHE 002C C or better or CHE 002CH C or better); CHE 128A (can be concurrent). Introduction to laboratory techniques of organic chemistry. Emphasis on methods used for separation and purification of organic compounds. May be taught abroad. Full credit to students who completed CHE 008B; not open for credit to students who have completed CHE 118B. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129B—Organic Chemistry Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): CHE 129A; CHE 128B (can be concurrent). Continuation of CHE 129A. Emphasis on methods used for synthesis and isolation of organic compounds. Not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129C—Organic Chemistry Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): CHE 128C (can be concurrent); CHE 129B. continuation of PHE 129B. Effective: 1997 Winter Quarter.

CHE 130A—Pharmaceutical Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 118C or CHE 128C. Examination of the design principles and experimental methods used in pharmaceutical and medicinal chemistry. May be taught abroad. Effective: 2006 Fall Quarter.

CHE 130B—Pharmaceutical Chemistry (3)

Lecture—2 hour(s); Lecture/Lab—1 hour(s). Prerequisite(s): CHE 130A (can be concurrent). Continuation of CHE 130A with emphasis on case studies of various drugs and the use of computational methods in drug design. May be taught abroad. Effective: 2017 Spring Quarter.

CHE 130C—Case Studies in Pharmaceutical Chemistry (1)

Seminar—2 hour(s); Independent Study. Prerequisite(s): CHE 130A (can be concurrent); CHE 130B (can be concurrent). Seminar. Exploration of medicinal and pharmaceutical chemistry topics through seminars presented by professional chemists (and allied professionals). Designed to highlight career opportunities for students with a degree in pharmaceutical chemistry. (P/NP grading only.) Effective: 2017 Spring Quarter.

CHE 131—Modern Methods of Organic Synthesis (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128C or CHE 118C. Introduction to modern synthetic methodology in organic chemistry with emphasis on retrosynthetic analysis, reaction mechanisms, and application to multistep syntheses of pharmaceuticals and natural products. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 135—Advanced Bio-organic Chemistry Laboratory (3)

Lecture—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): CHE 130B (can be concurrent). Separation, purification, identification and biological evaluation of organic compounds using modern methods of synthesis, computational chemistry and instrumentation. Emphasis on pharmaceutical and medicinal substances. Effective: 2017 Fall Quarter.

CHE 145—Good Quality Practices (3)

Discussion—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): CHE 118B or CHE 129B. Open to Chemistry and science majors. Preparation for work in GQP laboratories in both research and industry. Context within GQP-Good Quality Practices (GMP Good Manufacturing Practice, GCP Good Clinical Practices). Lab practice in GQP skills. GE credit: SE. Effective: 2016 Winter Quarter.

CHE 150—Chemistry of Natural Products (3)

Lecture—3 hour(s). Prerequisite(s): CHE 118C or CHE 128C. Chemistry of terpenes, steroids, acetogenins, and alkaloids: isolation, structure determination, biosynthesis, chemical transformations, and total synthesis. May be taught abroad. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 155—Scientific Programming for Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): ECS 010 or ECS 032A; or equivalent; or Consent of Instructor. Chemical applications of computer programming with Python. Numpy, Scipy, Matplotlib libraries. Multidimensional arrays, data visualization, linear algebra routines. Force fields and molecular dynamics simulations. Numerical integration of differential equations with applications to chemical kinetics. Least squares fitting of experimental data. Effective: 2018 Fall Quarter.

CHE 192—Internship in Chemistry (1-6)

Internship—3-18 hour(s). Prerequisite(s): Upper division standing; project approval by faculty sponsor prior to enrollment. Supervised internship in chemistry; requires a final written report. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 194HA—Undergraduate Honors Research (2)

Independent Study—2 hour(s). Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 1997 Winter Quarter.

CHE 194HB—Undergraduate Honors Research (2)

Independent Study—2 hour(s). Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 1997 Winter Quarter.

CHE 194HC—Undergraduate Honors Research (2)

Independent Study—2 hour(s). Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 2005 Fall Quarter.

CHE 195—Careers in Chemistry (1)

Seminar—2 hour(s). Prerequisite(s): Junior or senior standing in Chemistry. Designed to give Chemistry undergraduate students an in-depth appreciation of career opportunities with a bachelors degree in chemistry. Professional chemists (and allied professionals) describe research and provide career insights. (P/NP grading only.) Effective: 2001 Fall Quarter.

CHE 197—Projects in Chemical Education (1-4)

Discussion/Laboratory. Prerequisite(s): Consent of Instructor. Participation may include development of laboratory experiments, lecture demonstrations, autotutorial modules or assistance with laboratory sessions. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics and physics. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics, and physics. Special study for advanced undergraduates. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 201—Chemical Uses of Symmetry & Group Theory (3)

Lecture—3 hour(s). Prerequisite(s): CHE 124A; CHE 110B; or Consent of Instructor. Symmetry elements and operations, point groups, representations of groups. Applications to molecular orbital theory, ligand field theory, molecular vibrations, and angular momentum. Crystallographic symmetry. Effective: 1997 Winter Quarter.

CHE 204—Mathematical Methods in Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110C. Graduate standing in Chemistry. Introduction to mathematical and numerical methods in chemistry. Real and complex functions. Methods of integration. Differential equations. Linear algebra and matrices. Special functions. Integral transforms. Statistics. Effective: 2005 Fall Quarter.

CHE 205—Symmetry, Spectroscopy, & Structure (3)

Lecture—3 hour(s). Prerequisite(s): CHE 201; Or equivalent. Vibrational and rotational spectra; electronic spectra and photoelectron spectroscopy; magnetism; electron spin and nuclear quadrupole resonance spectroscopy; nuclear magnetic resonance spectroscopy; other spectroscopic methods. Effective: 1997 Winter Quarter.

CHE 209—Special Topics in Physical Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 210A; CHE 211A. Graduate standing in Chemistry. Advanced topics in physical chemistry, biophysical chemistry or chemical physics chosen from areas of current research interest. May be repeated for credit when topics differ. Effective: 2005 Fall Quarter.

CHE 210A—Quantum Chemistry: Introduction & Stationary-State Properties (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110B; CHE 110C; or Consent of Instructor. Stationary-state quantum chemistry: postulates of quantum mechanics, simple solutions, central field problems and angular momenta, hydrogen atom, perturbation theory, variational theory, atoms and molecules. Effective: 1997 Winter Quarter.

CHE 210B—Quantum Chemistry: Time-Dependent Systems (3)

Lecture—3 hour(s). Prerequisite(s): CHE 210A. Matrix mechanics and time-dependent quantum chemistry: matrix formulation of quantum mechanics, Heisenberg representation, time-dependent perturbation theory, selection rules, density matrices, and miscellaneous molecular properties. Effective: 1997 Winter Quarter.

CHE 210C—Quantum Chemistry: Molecular Spectroscopy (3)

Lecture—3 hour(s). Prerequisite(s): CHE 210B. Molecular spectroscopy: Born-Oppenheimer approximation, rotational, vibrational and electronic spectroscopy, spin systems, and molecular photophysics. Effective: 1997 Winter Quarter.

CHE 211A—Advanced Physical Chemistry: Statistical Thermodynamics (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Principles and applications of statistical mechanics; ensemble theory; statistical thermodynamics of gases, solids, liquids, electrolyte solutions and polymers; chemical equilibrium. Effective: 1997 Winter Quarter.

CHE 211B—Statistical Mechanics (3)

Lecture—3 hour(s). Prerequisite(s): CHE 211A. Statistical mechanics of nonequilibrium systems, including the rigorous kinetic theory of gases, continuum mechanics transport in dense fluids, stochastic processes, brownian motion and linear response theory. Effective: 1997 Winter Quarter.

CHE 212—Chemical Dynamics (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Introduction to modern concepts in chemical reaction dynamics for graduate students in chemistry. Emphasis will be placed on experimental techniques as well as emerging physical models for characterizing chemical reactivity at a microscopic level. Effective: 1997 Winter Quarter.

CHE 215—Theoretical & Computational Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 211A; CHE 210B; or Consent of Instructor. Mathematics of wide utility in chemistry, computational methods for guidance or alternative to experiment, and modern formulations of chemical theory. Emphasis will vary in successive years. May be repeated for credit. Effective: 1997 Winter Quarter.

CHE 216—Magnetic Resonance Spectroscopy (3)

Lecture—3 hour(s). Prerequisite(s): CHE 210A; CHE 210B (can be concurrent). Quantum mechanics of spin and orbital angular momentum, nuclear magnetic resonance, theory of chemical shift and multiplet structures, electron spin resonance, theory of g-tensor in organic and transition ions, spin Hamiltonians, nuclear quadrupolar resonance, spin relaxation processes. Effective: 1997 Winter Quarter.

CHE 217—X-Ray Structure Determination (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Introduction to x-ray structure determination; crystals, symmetry, diffraction geometry, sample preparation and handling, diffraction apparatus and data collection, methods of structure solution and refinement, presentation of results, text, tables and graphics, crystallographic literature. Effective: 1997 Winter Quarter.

CHE 218—Macromolecules: Physical Principles (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110A; CHE 110B; CHE 110C; Or equivalent. Relationship of higher order macromolecular structure to subunit composition; equilibrium properties and macromolecular dynamics; physical chemical determination of macromolecular structure. Effective: 2001 Winter Quarter.

CHE 219—Spectroscopy of Organic Compounds (4)

Lecture—3 hour(s); Laboratory—2.5 hour(s). Prerequisite(s): CHE 128C; Or equivalent. Identification of organic compounds and investigation of stereochemical and reaction mechanism phenomena using spectroscopic methods—principally NMR, IR and MS. Effective: 2006 Fall Quarter.

CHE 219L—Laboratory in Spectroscopy of Organic Compounds (1)

Laboratory—2.5 hour(s). Prerequisite(s): CHE 219 (can be concurrent). Restricted to Chemistry graduate students only or consent of instructor Practical application of NMR, IR and MS techniques for organic molecules. Effective: 2009 Summer Session 1.

CHE 221A—Special Topics in Organic Chemistry (3)

Lecture—3 hour(s). Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 221B—Special Topics in Organic Chemistry (3)

Lecture—3 hour(s). Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 221C—Special Topics in Organic Chemistry (3)

Lecture—3 hour(s). Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 221D—Special Topics in Organic Chemistry (3)

Lecture—3 hour(s). Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 221E—Special Topics in Organic Chemistry (3)

Lecture—3 hour(s). Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 221F—Special Topics in Organic Chemistry (3)

Lecture—3 hour(s). Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 221G—Special Topics in Organic Chemistry (3)

Lecture—3 hour(s). Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 221H—Special Topics in Organic Chemistry (3)

Lecture—3 hour(s). Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 222—Chemistry of Nanoparticles (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): CHE 110C; Or equivalent. Chemical and physical aspects of inorganic nanoparticles, including synthesis, purification, reactivity, characterization, and applications for technology. Emphasis is on problems from the current literature. Not open for credit to students who have taken CHE 122. Effective: 2009 Winter Quarter.

CHE 226—Principles of Transition Metal Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 124A; or equivalent. Electronic structures, bonding, and reactivity of transition metal compounds. Effective: 1997 Winter Quarter.

CHE 228A—Bio-inorganic Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 226; or Consent of Instructor. Defines role of inorganic chemistry in the functioning of biological systems by identifying the functions of metal ions and main group compounds in biological systems and discussing the chemistry of model and isolated biological compounds. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228B—Main Group Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 226; or Consent of Instructor. Synthesis, physical properties, reactions and bonding of main group compounds. Discussions of concepts of electron deficiency, hypervalency, and non-classical bonding. Chemistry of the main group elements will be treated systematically. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228C—Solid-State Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 124A; CHE 110B; CHE 226; Or equivalent. Design and synthesis, structure and bonding of solid-state compounds; physical properties and characterization of solids; topics of current interest such as low-dimensional materials, inorganic polymers, materials for catalysis. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228D—Homogeneous Catalysis (3)

Lecture—3 hour(s). Prerequisite(s): CHE 226. Overview of homogeneous catalysis and related methods, with emphasis on kinetics, mechanisms, and applications for organic synthesis. The related methods may include cluster, colloid, phase transfer, enzymatic, heterogeneous and polymer-supported catalysis. Offered every third year. Effective: 2001 Fall Quarter.

CHE 228E—Magnetochemistry (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 124A or CHE 201; Or an equivalent class from either Physics or Chemical Engineering and Materials Science. Covers the basic principles and concepts of magnetism, methods used for characterization of magnetic properties, as well as specific state-of-the-art magnetic materials and topics from the recent chemistry literature. Effective: 2016 Winter Quarter.

CHE 231A—Organic Synthesis: Methods & Strategies (4)

Lecture—3 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): CHE 128C; Or equivalent. Current strategies and methods in synthetic organic chemistry. Focus on construction of carbon frameworks, control of relative and absolute stereochemistry and retrosynthetic strategies. Use of databases and molecular modeling software in multistep strategies. Effective: 2017 Winter Quarter.

CHE 231B—Advanced Organic Synthesis (3)

Lecture—3 hour(s). Prerequisite(s): CHE 231A. Current strategies and methods in synthetic organic chemistry. Continuation of CHE 231A. Organic synthesis of complex target molecules. Stereochemical considerations and asymmetric synthesis. Organometallics for selective transformations. Carbocyclic and heterocyclic ring formation. Effective: 2016 Fall Quarter.

CHE 233—Physical-Organic Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; CHE 110A; CHE 110B; CHE 110C; Or equivalent. Introduction to elementary concepts in physicalorganic chemistry including the application of simple numerical techniques in characterizing and modeling organic reactions. Effective: 1997 Winter Quarter.

CHE 234—Chemical & Molecular Neuroscience (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128C; BIS 102; or equivalent courses. Basic principles in chemistry and molecular biology applied to questions in neuroscience. Chemical and molecular tools driving innovative work in chemical and molecular biology. Effective: 2020 Winter Quarter.

CHE 235—Organometallic Chemistry in Organic Synthesis (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128C. Current trends in use of organometallics for organic synthesis; preparations, properties, applications, and limitations of organometallic reagents derived from transition and/or main group metals. Effective: 1997 Winter Quarter.

CHE 236—Chemistry of Natural Products (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128C; Or equivalent. Advanced treatment of chemistry of naturally occurring compounds isolated from a variety of sources. Topics will include isolation, structure determination, chemical transformations, total synthesis, biological activity, and biosynthesis. Biosynthetic origin will be used as a unifying theme. Effective: 1997 Winter Quarter.

CHE 237—Bio-organic Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 128C; Or equivalent. Structure and function of biomolecules; molecular recognition; enzyme reaction mechanisms; design of suicide substrates for enzymes; enzyme engineering; design of artificial enzymes and application of enzymes in organic synthesis. Effective: 1997 Winter Quarter.

CHE 238—Introduction to Chemical Biology (3)

Lecture—3 hour(s). Prerequisite(s): CHE 118C or CHE 128C; Or equivalent; CHE 130A, CHE 130B and BIS 102, BIS 103, and BIS 104, or the equivalents recommended. Synthesis of complex molecules in nature. Use of biosynthetic pathways in synthesis of new chemical entities. Applications of small molecules in chemical genetics and structural biology. Solving biological problems using synthetic biomolecules. Effective: 2009 Winter Quarter.

CHE 240—Advanced Analytical Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110A; CHE 115; Or equivalent. Numerical treatment of experimental data; thermodynamics of electrolyte and non-electrolyte solutions; complex equilibria in aqueous and non-aqueous solutions; potentiometry and specific ion electrodes; mass transfer in liquid solutions; fundamentals of separation science, including column, gas and liquid chromatography. Effective: 1997 Winter Quarter.

CHE 241A—Surface Analytical Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110C; Or equivalent. Concepts of surfaces and interfaces: physical properties, unique chemistry and electronic effects. Focus on gas-solid interfaces, with some discussion of liquid-solid interfaces. Effective: 2002 Fall Quarter.

CHE 241B—Laser & X-ray Spectroscopy (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110B; Or equivalent. Concepts and mechanisms of light-matter interactions. Chemical applications of modern spectroscopic methods, including multiphoton spectroscopy, time-resolved laser and x-ray photolysis, and phase-contrast x-ray imaging. Effective: 2002 Fall Quarter.

CHE 241C—Mass Spectrometry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Mass spectrometry and related methods with emphasis on ionization methods, mass analyzers, and detectors. Related methods may include ion-molecule reactions, unimolecular dissociation of organic and bio-organic compounds, and applications in biological and environmental analysis. Effective: 2002 Winter Quarter.

CHE 241D—Electroanalytical Chemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Electroanalytical chemistry with consideration of mass transfer and electrode kinetics for polarizable electrodes. Current-potential curves for a variety of conditions, including both potentiostatic and galvanostatic control, and their application in chemical analysis. Effective: 2002 Winter Quarter.

CHE 241E— Microscopy & Imaging Techniques (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Introduction to modern microscopy and imaging techniques: scanning tunneling, atomic force, far-field optical, fluorescence, scanning near-field optical, and scanning electron microscopy. Application to nanoscience and analytical and bioanalytical chemistry. Some laboratory demonstrations. Effective: 2002 Fall Quarter.

CHE 245—Mechanistic Enzymology (3)

Lecture—3 hour(s). Advanced topics in chemical kinetics relevant to enzymes, enzyme kinetics, theory of enzyme catalysis, and the analysis of a selection of organic enzyme reaction mechanisms by the tools introduced in the first part of the course. Effective: 2013 Fall Quarter.

CHE 261—Current Topics in Chemical Research (2)

Lecture—2 hour(s). Prerequisite(s): Graduate standing in Chemistry or consent of instructor. Designed to help chemistry graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. when topic differs. Effective: 1997 Winter Quarter.

CHE 262—Introduction to Chemistry Research (1)

Lecture/Discussion—2 hour(s). Pass One restricted to graduate students; Pass Two open to all majors. Group and individual discussion of research activities in the Department and research topic selection. Designed for incoming graduate students preparing for higher degrees in chemistry. (S/U grading only.) Effective: 2020 Fall Quarter.

CHE 263—Introduction to Chemical Research Methodology (3)

Discussion/Laboratory—9 hour(s). Prerequisite(s): CHE 293; and Consent of Instructor. Graduate student standing in Chemistry. Introduction to identification, formulation, and solution of meaningful scientific problems including experimental design and/or theoretical analyses of new and prevailing techniques, theories and hypotheses. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 264—Advanced Chemical Research Methodology (6)

Discussion/Laboratory—18 hour(s). Prerequisite(s): CHE 263; or Consent of Instructor. Applications of the methodology developed in CHE 263 to experimental and theoretical studies. Advanced methods of interpretation of results are developed. Includes the preparation of manuscripts for publication. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 290—Seminar (2)

Seminar—2 hour(s). Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 293—Introduction to Chemistry Research (1) *Review all entries*

Discussion—2 hour(s). Designed for incoming graduate students preparing for higher degrees in chemistry. Group and individual discussion of research activities in the Department and research topic selection. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 293—Introduction to Chemistry Research (1) *Review all entries Discontinued*

Discussion—2 hour(s). Designed for incoming graduate students preparing for higher degrees in chemistry. Group and individual discussion of research activities in the Department and research topic selection. (S/U grading only.) Effective: 2020 Fall Quarter.

CHE 294—Presentation of Chemistry Research (1)

Seminar—2 hour(s). Prerequisite(s): Graduate standing. Restricted to graduate students in Chemistry who have not yet given their departmental presentation. Introduces first- and second-year Chemistry graduate students to the process of giving an effective research presentation. Advanced Ph.D. students give formal seminars describing the design and execution of their research projects. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2009 Winter Quarter.

CHE 295—Careers in Chemistry (1)

Seminar—2 hour(s). Prerequisite(s): Graduate standing in Chemistry. Designed to give Chemistry graduate students an in-depth appreciation of career opportunities with a M.S. or Ph.D. degree in chemistry. Professional chemists (and allied professionals) give seminars describing both research and career insights. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2001 Fall Quarter.

CHE 296—Research in Pharmaceutical Chemistry (6)

Laboratory—18 hour(s). Prerequisite(s): CHE 130A; CHE 130B; CHE 135; CHE 233 (can be concurrent); and Consent of Instructor. Restricted to students in the Integrated B.S./M.S. Program in Chemistry. Laboratory provides qualified graduate students with the opportunity to pursue original investigation in Pharmaceutical Chemistry and allied fields in order to fulfill the letter-graded research requirement of the Integrated B.S./M.S. Program in Chemistry (Pharmaceutical Chemistry Emphasis). May be repeated up to 3 time(s) when topic differs. Effective: 2009 Fall Quarter.

CHE 298—Group Study (1-5)

Variable. Effective: 1997 Winter Quarter.

CHE 299—Research (1-12)

Variable. The laboratory is open to qualified graduate students who wish to pursue original investigation. Students wishing to enroll should communicate with the department well in advance of the quarter in which the work is to be undertaken. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 390—Methods of Teaching Chemistry (2)

Lecture—1 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate student standing in Chemistry. Practical experience in methods and problems of teaching chemistry. Includes analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting of discussion sessions and student laboratories. Participation in the teaching program required for Ph.D. in chemistry. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 392—Advanced Methods of Teaching Chemistry (2)

Lecture—2 hour(s). Prerequisite(s): CHE 390. Advanced topics in teaching chemistry. Analysis and discussion of curricular design, curricula materials, teaching methods and evaluation. For students who are planning a career in teaching chemistry. (S/U grading only.) Effective: 1997 Winter Quarter.

CHI—Chicano Studies

Courses in CHI:

CHI 010—Introduction to Chicana/o Studies (4)

Lecture—3 hour(s); Discussion—1 hour(s). Analysis of the situation of the Chicana/o (Mexican-American) people, emphasizing their history, literature, political movements, education and related areas. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 021—Chicana/o & Latina/o Health Care Issues (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHI 010. Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education in limited access to health care. GE credit: OL, WE. Effective: 1997 Winter Quarter.

CHI 021S—Chicana/o & Latina/o Health Care Issues (4)

Lecture—4 hour(s). Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; Or equivalent. Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education and limited access to health care. All course instruction in Spanish. May be taught abroad. Not open for credit to students who have completed CHI 021. GE credit: OL, WC, WE. Effective: 2018 Spring Quarter.

CHI 023—Qualitative Research Methods (4)

Lecture/Discussion—3 hour(s); Discussion—1 hour(s). Dominant models of qualitative inquiry in educational and social science research as well as mestizo approaches to research with latinos. Emphasis given to choosing and designing culturally appropriate strategies to investigate latino health, education, social context, and policy issues. GE credit: AH, OL, SS, WE. Effective: 2005 Spring Quarter.

CHI 030—United States Political Institutions & Chicanas/os (4)

Discussion/Laboratory—3 hour(s); Term Paper. Overview of the major political institutions and ideologies of the United States and the Chicana/o people's historical and contemporary role in, effects from, and responses to them. Theory, method and critical analysis. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 040—Comparative Health: Top Leading Causes of Death (4)

Lecture/Discussion—3 hour(s); Discussion—1 hour(s). Prerequisite(s): STA 013 or STA 013Y; or Consent of Instructor. Introduction to the epidemiology of the leading causes of death for ethnic/racial minorities. Assessment of disproportionate rates at which ethnic/racial minorities suffer and die from chronic and infectious diseases and injuries and statistical methods used to calculate these rates. Not open for credit to students who have completed CHI 040S. GE credit: QL, SE, WE. Effective: 2018 Spring Quarter.

CHI 040S—Comparative Health: Leading Causes of Death (4)

Lecture—4 hour(s). Prerequisite(s): STA 013 or STA 013Y; or Consent of Instructor. Introduction to epidemiology of leading causes of death for ethnic/racial minorities. Assessment of disproportionate rates at which ethnic/racial minorities suffer & die from chronic and infectious diseases & injuries & statistical methods used to calculate these rates. May be taught abroad. Not open for credit to students who have completed CHI 040. GE credit: QL, SE, WC, WE. Effective: 2018 Spring Quarter.

CHI 042—Food Justice: Chicana/o & Indigenous Communities (4)

Lecture/Discussion—4 hour(s). Issues surrounding food justice in Chicana/o and Indigenous Communities. Emphasis on discourses and practices of growing a food justice movement centered on the ecological care of the earth and decolonized environmental methodologies. GE credit: ACGH, SL, SS, VL. Effective: 2019 Spring Quarter.

CHI 050—Chicana & Chicano Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Interdisciplinary survey of Chicana/o cultural representation in the 20th century. Examines Chicana/o culture within a national and transnational context. Explores how Chicano cultural forms and practices intersect with social/material forces, intellectual formations and cultural discourses. (Former CHI 020.) GE credit: ACGH, AH, DD, WC, WE. Effective: 1997 Winter Quarter.

CHI 060—Chicana & Chicano Representation in Cinema (4)

Lecture—3 hour(s); Discussion—1 hour(s); Film Viewing—2 hour(s). Introductory-level study of Chicana and Chicano representation in cinema. Depiction of Chicana and Chicano experience by Chicana/o filmmakers, as well as by non-Chicanos, including independent filmmakers and the commercial industry. GE credit: ACGH, AH, DD, VL, WE. Effective: 2005 Spring Quarter.

CHI 065—New Latin American Cinema (4)

Lecture/Discussion—2 hour(s); Discussion—1 hour(s); Film Viewing—3 hour(s). Historical, critical, and theoretical survey of the cinemas of Latin America and their relationship to the emergence of U.S. Latino cinema. Emphasis on representation and social identity including gender, sexuality, class, race and ethnicity GE credit: AH, VL, WC, WE. Effective: 2005 Spring Quarter.

CHI 070—Survey of Chicana/ o Art (4)

Lecture—4 hour(s). Survey of contemporary Chicana/o art in context of the social turmoil from which it springs. Includes political use of the poster and the mural, the influence of the Mexican mural and graphic movement, and social responsibility of the artist. GE credit: ACGH, AH, DD, VL, WC, WE. Effective: 1997 Winter Quarter.

CHI 073—Chicana/ o Art Expression Through Silk Screen (4)

Studio—8 hour(s); Laboratory—4 hour(s). Introductory level studio course using silk screen and basic printing techniques to explore and develop images of Chicana/o cultural themes and expressions. Students experiment with images and symbols from their immediate environment/culture. Integrated approach to Chicana/o philosophy of art. GE credit: ACGH, AH, DD, OL, VL, WC. Effective: 1997 Winter Quarter.

CHI 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): CHI 010; or Consent of Instructor. Academic guidance combined with internship in community agencies serving Mexican/Latina/Latino/Chicana/Chicano clients. Students will use their bilingual skills and knowledge of history, culture, economics, politics and social issues. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2004 Fall Quarter.

CHI 098—Directed Group Study (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHI 099—Special Study for Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHI 100—Chicana/ Chicano Theoretical Perspective (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): CHI 010; CHI 050. Critical examination of emerging Chicana/o Studies theoretical perspectives in light of contemporary intellectual frameworks in the social sciences, arts, and humanities. Includes analysis of practices of self-representation, and socio-cultural developments in the Chicana/o community. GE credit: ACGH, DD, SS, WC, WE. Effective: 1997 Winter Quarter.

CHI 102A—Chicana/o Feminist Theoretical Understandings of K-20 Educational Disparities (4)

Lecture/Discussion—3 hour(s); Fieldwork. Examination of educational disparities of the K-20 educational system. Chicana/o education theory and analysis with a specific emphasis on feminist frameworks and analytical tools used to guide and inform educational policy-making. Effective: 2018 Fall Quarter.

CHI 102B—Grassroots Community Activism & Mobilization Efforts Challenging Educational Inequity (4)

Lecture/Discussion—3 hour(s); Fieldwork. Exploration and research on effective grassroots community activism and mobilization efforts by Chicana/o students, along with their teachers, families, and other allies to protest structured inequality of the U.S. educational system. Mentoring and tutoring in a school under the supervision of a faculty member is required. Effective: 2018 Fall Quarter.

CHI 102C—Policy & Law Challenging Segregation & Educational Inequity (4)

Lecture/Discussion—3 hour(s); Fieldwork. Focus on successful lawsuits against school segregation of Mexican-origin children in the United States. Mentoring and tutoring in a school under the supervision of a faculty member is required. Effective: 2018 Fall Quarter.

CHI 110—Sociology of the Chicana/o Experience (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CHI 010 or SOC 001. The Chicana/o experience in the American society and economy viewed from theoretical perspectives. Immigration, history of integration of Chicana/o labor into American class structure, education inequality, ethnicity, the family and Chicana/o politics. (Former course SOC 110.) GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 111—Chicanas/Mexicanas in Contemporary Society (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CHI 010 or CHI 050; (WMS 050 or HIS 169B). Analysis of the role and status of Chicanas/Mexicanas in contemporary society. Special emphasis on their historical role, the political, economic and social institutions that have affected their status, and their contributions to society and their community. (Former CHI 102.) GE credit: ACGH, DD, SS, WE. Effective: 1997 Winter Quarter.

CHI 112—Globalization, Transnational Migration, & Chicana/o & Latina/o Communities (4)

Lecture—4 hour(s). Prerequisite(s): CHI 010. Chicana/o and Latina/o migration experiences within a global context. Topics include national and/or transnational migration in Mexico, Central America, and the United States. GE credit: ACGH, DD, OL, SS, WE. Effective: 2005 Winter Quarter.

CHI 113—Latin American Women’s Engagement in Social Movements (4)

Lecture/Discussion—3 hour(s); Term Paper. Examination of how women of different racial/ethnic and class backgrounds in Latin America challenge their marginalization. Exploration of US foreign policy, its effects on Latin American’s institutions and on Latin American citizens. Using Chicana feminist perspective. GE credit: ACGH, DD, SS, WC, WE. Effective: 2013 Fall Quarter.

CHI 114—Women of Color Reproductive Health & Reproductive Politics in a Global Perspective (4)

Lecture/Discussion—3 hour(s); Term Paper. Study contemporary issues in reproductive health and reproductive politics, both globally and in the U.S., for women of color. GE credit: ACGH, DD, SS, WC, WE. Effective: 2013 Fall Quarter.

CHI 114S—Women of Color Reproductive Health & Gender Politics in Cuba & the U.S. (4)

Lecture/Discussion—3 hour(s); Term Paper. Study of contemporary issues in reproductive health, reproductive politics, and gender politics both in Cuba and in the U.S., for women of color. GE credit: ACGH, DD, SS, WC, WE. Effective: 2015 Spring Quarter.

CHI 120—Chicana/ o Psychology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHI 021; Introductory psychology course recommended. Introduction to the field of Chicana/o psychology. Analysis of socio-cultural context of Chicanas/os and Latinas/os. Special attention to issues of ethnic identity development, bilingualism, and development of self esteem. Impact of minority experience, migration, acculturation are examined. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 121—Chicana/ o Community Mental Health (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): CHI 010; or CHI 020. Mental health needs, problems, and service utilization patterns of Chicanas/os and Latinas/os will be analyzed. An analysis of social service policy, and the economic context of mental health programs. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 122—Psychology Perspectives Chicana/o & Latina/o Family (4)

Lecture—4 hour(s). Prerequisite(s): CHI 010; and Consent of Instructor. Introductory psychology course highly recommended. Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies. GE credit: SS, WE. Effective: 1997 Winter Quarter.

CHI 122S—Psychology Perspectives Chicana/o & Latina/o Family (4)

Lecture—4 hour(s). Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies. May be taught abroad. Not open for credit to students who have completed CHI 122. GE credit: OL, SS, WC, WE. Effective: 2006 Spring Quarter.

CHI 123—Psychological perspectives on Chicana/o & Latina/o Children & Adolescents (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): CHI 010 or CHI 021. Restricted to upper division standing. Psychological and educational development of Chicano/Latino children and adolescents, with particular attention to the formation of ethnic, gender, class, race, and sexual identities. GE credit: ACGH, DD, OL, SS, WE. Effective: 2005 Spring Quarter.

CHI 125S—Latino Families in the Age of Globalization: Migration & Transculturation (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): SPA 003 or the equivalent highly recommended. Impact of globalization on Latino families in the American continent. Relationships of political structure, economics and family. Intimate partner violence, child maltreatment and alcohol/drug abuse in contemporary Latino families. Offered in a Spanish speaking country; may be taught abroad. GE credit: OL, SS, WC, WE. Effective: 2007 Spring Quarter.

CHI 130—United States-Mexican Border Relations (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): Upper division standing. Theories of U.S.-Mexican border relations, with an overview of the political, economic, and social relationships and an in-depth analysis of immigration issues, border industrialization, women's organizations, economic crises, and legal issues. GE credit: ACGH, DD, SS, WE. Effective: 1997 Winter Quarter.

CHI 131—Chicanas in Politics & Public Policy (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CHI 030 or POL 001. Historical and political analysis of Chicana/Latina political involvement and activities in the general political system, women's movement, Chicano movement, and Chicana movement. Examines the public policy process and the relationship of Chicanas/Latinas to public policy formation. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 131S—Chicanas in Politics & Public Policy (4)

Lecture/Discussion—4 hour(s). Historical and political analysis of Chicana/Latina political involvement and activities in the general political system, women's movement, Chicano/a movement. Examines the public policy process and the relationship of Chicanas/Latinas to public policy formation. May be taught abroad. Not open for credit to students who have completed CHE 131. GE credit: OL, SS, WC, WE. Effective: 2006 Spring Quarter.

CHI 132—Political Economy of Chicana/o Communities (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): Upper division standing; lower division Chicana/o Studies (CHI) course recommended. Historical and contemporary study of political and economic forces which define and influence the development of Chicana/o communities. Includes critiques of traditional and Marxian theories and concepts applicable to Chicana/o communities, case studies of Chicana/o communities, especially in California and Texas. GE credit: ACGH, DD, OL, WE. Effective: 1997 Winter Quarter.

CHI 135S—Transnational Latina/o Political Economy (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; or Consent of Instructor. Or equivalent; ECN 001A and ECN 001B recommended. Intensive reading, discussion and research on selected topics from Latin America and the U.S. with regard to immigrant and native communities. Topics include comparative immigration and macroeconomic policies in the U.S. and Latin America. Offered in a Spanish speaking country; may be taught abroad. GE credit: OL, WC, WE. Effective: 2018 Spring Quarter.

CHI 140A—Quantitative Methods: Chicano/Latino Health Research (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): Two years of high school algebra or the equivalent in college. Focuses on measuring Latino/Chicano health outcomes using a quantitative approach. Assesses main types of study designs and addresses measurement of disease frequency and health effects. GE credit: ACGH, DD, QL, SE. Effective: 2006 Spring Quarter.

CHI 141—Community-Based Participatory Research & Chicana/o & Latina/o Health (4)

Lecture/Discussion—3 hour(s); Term Paper. Overview of CBPR, as well as methodological CBPR considerations in building community partnerships, community assessment, issue analysis, research planning, data gathering, and data sharing with Chicana/o and Latina/o communities in particular. GE credit: DD, WE. Effective: 2015 Spring Quarter.

CHI 145S—Bi-National Health (5)

Lecture—5 hour(s). Prerequisite(s): BIS 001A; BIS 001B; BIS 001C; (SPA 021 or SPA 021V or SPA 021Y or SPA 031); or Consent of Instructor. Upper division standing only. Examination of health status and intervention strategies presented in public health care settings, private clinics and by indigenous healers in Mexico. Analysis of impact of high risk diseases. Offered in a Spanish speaking country under supervision of UC Davis faculty/lecturer; may be taught abroad. GE credit: OL, WC, WE. Effective: 2018 Spring Quarter.

CHI 146S—Public Health in Latin America (5)

Lecture/Discussion—4 hour(s); Term Paper. Critical examination of emerging Public Health issues in Latin America in light of economic, political and social conditions. Contemporary behavioral frameworks used in public health. Includes analysis of clinical medicine and health care systems. Effective: 2011 Fall Quarter.

CHI 147S—Indigenous Healing & Biodiversity in Latin America (5)

Lecture—4 hour(s); Term Paper. Contrast between western and traditional healing practices in Latin America and the role of the natural environment in creating sustainable health delivery systems. Questions of health status attributable to public health and environmental risk factors. May be taught abroad. GE credit: OL, WC, WE. Effective: 2011 Fall Quarter.

CHI 148—Decolonizing Spirit (4)

Lecture—3 hour(s); Term Paper. Legacies of colonization and decolonization; indigenous forms of spirituality and sacredness. Emphasis on remembering traditions, practices, relations, and forms of indigenous knowledge. GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.

CHI 150—The Chicana & Chicano Movement (4)

Lecture—3 hour(s); Term Paper. Development of the Chicano Movement within the context of the socio-political movements of the 1960's in a national and global perspective. Ideological/political perspectives and the implications for political strategies. GE credit: ACGH, AH, DD, SS, WC, WE. Effective: 2005 Spring Quarter.

CHI 154—The Chicana/o Novel (4)

Lecture—4 hour(s). Prerequisite(s): Intermediate Spanish or consent of instructor. Introduction to the forms and themes of the Chicana/o novel with special attention to the construction of gender, nationality, sexuality, social class, and the family by contemporary Chicana/o novelists. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course SPA 126A.) GE credit: ACGH, AH, DD, OL, WC, WE. Effective: 1997 Winter Quarter.

CHI 155—Chicana/o Theater (4)

Lecture—4 hour(s). Prerequisite(s): Intermediate Spanish or consent of instructor. Examination of the formal and thematic dimensions of Chicana/o theater in the contemporary period with special emphasis on El Teatro Campesino and Chicana Feminist Theater. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course SPA 126B.) GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 1997 Winter Quarter.

CHI 156—Chicana/o Poetry (4)

Lecture—4 hour(s). Prerequisite(s): Intermediate Spanish or consent of instructor. Survey of Chicana/o poetry with special emphasis on its thematic and formal dimensions. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course SPA 126C.) GE credit: ACGH, AH, DD, OL, WC, WE. Effective: 1997 Winter Quarter.

CHI 157—Chicana & Chicano Narrative (4)

Lecture/Discussion—3 hour(s); Term Paper. Exploration of contemporary forms of the Chicana and Chicano narrative, encompassing visual art, fiction, poetry, film, theater, and creative nonfiction. Exposure to a variety of artists and scholars whose work shapes our evolving understanding of the Chicana/o experience. GE credit: ACGH, AH, DD, VL, WC, WE. Effective: 2013 Fall Quarter.

CHI 160—Mexican Film & Greater Mexican Identity (4)

Lecture/Discussion—4 hour(s); Film Viewing—1 hour(s). Prerequisite(s): Intermediate Spanish. Survey of the role Mexican cinema plays in consolidation and contestation of post-revolutionary Mexican state and in the formation of a Greater Mexican cultural identity including Chicana/o identity. Showcases genres, periods, auteurs, movements and emphasis on gendered and sexualized narratives. GE credit: AH, VL, WC, WE. Effective: 2001 Winter Quarter.

CHI 161—Queer Latinidad (4)

Lecture/Discussion—3 hour(s); Term Paper/Discussion. Introduction to queer Latina and Latino studies with a focus on Chicana and Chicano theory and cultural production. GE credit: ACGH, AH, DD, SS, WE. Effective: 2015 Fall Quarter.

CHI 165—Chicanas, Latinas & Mexicanas in Commercial Media (4)

Lecture/Discussion—4 hour(s); Laboratory—2 hour(s). Prerequisite(s): CHI 060; Or other film or feminist theory course; conversational fluency in Spanish. The portrayal of Chicanas, Latinas and Mexicanas in commercial media. The relation between the representation of Chicana, Latina, and Mexicana women in commercial television and cinema and the role of women in Mexican and U.S. societies. GE credit: AH, VL, WC, WE. Effective: 1997 Fall Quarter.

CHI 170—Contemporary Issues in Chicano Art (4)

Lecture—4 hour(s). Issues and conflicts in the dismantling of the Contemporary Chicano Art Movement. Response and challenge to the dominant culture. GE credit: ACGH, AH, DD, VL, WC, WE. Effective: 2007 Winter Quarter.

Studio—8 hour(s); Independent Study—1 hour(s). Prerequisite(s): CHI 070; and Consent of Instructor. The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques. May be repeated up to 1 time(s). (Same course as ART 171.) GE credit: AH, VL. Effective: 1997 Winter Quarter.

CHI 172—Chicana/o Voice/Poster Silk Screen Workshop (4)

Studio—8 hour(s); Independent Study—1 hour(s). Prerequisite(s): CHI 070 or CHI 073; and Consent of Instructor. The poster as a voice art form used by Chicanas/os and other people of color to point to the defects of social and political existence and the possibility for change, from the Chicana/o artists' perspective. May be repeated up to 1 time(s). GE credit: AH, OL, VL, WC. Effective: 1997 Winter Quarter.

CHI 180—Grant Writing in the Chicana/o/Latina/o Community (4)

Lecture—4 hour(s). Prerequisite(s): CHI 010 or CHI 023; or Consent of Instructor. Upper division standing. Overview of key elements for grant writing. Topics include community needs assessments, development of human subjects protocols, data collection, methods, evaluation designs and community based methodologies for grant development applications in the Latino community. Effective: 2006 Spring Quarter.

CHI 181—Chicanas & Latinas in the U.S.: Historical Perspectives (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CHI 010 or WMS 050. Historical issues in the lives of Chicanas and Latinas in the U.S. and their diverse countries of origin. GE credit: ACGH, AH, DD, SS, WE. Effective: 2017 Fall Quarter.

CHI 182—Race & Juvenile Justice (4)

Lecture—4 hour(s). Prerequisite(s): CHI 010; Or equivalent. Individual and institutional responses to "troublesome" youth of color through history and in contemporary society. Emphasis on how race, as well as ethnicity, class, and gender have informed the treatment of "delinquent" youth. GE credit: ACGH, DD, OL, SS, WE. Effective: 2007 Winter Quarter.

CHI 184—Latino Youth Gangs in Global Perspective (4)

Lecture—3 hour(s); Term Paper. Comparative analysis of Latino youth gangs in Europe, Latin America, and the United States. Social, economic, political, and cultural factors leading to youth gangs as well as the responses are considered within a global perspective. Not open for credit to students who have completed CHI 184S. GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2013 Fall Quarter.

CHI 184S—Latino Youth Gangs in Global Perspective (4)

Lecture/Discussion—12 hour(s). Comparative analysis of Latino youth gangs in Europe, Latin America, and the United States. Social, economic, political, and cultural factors leading to youth gangs as well as the responses to the youths are considered within a global perspective. May be taught abroad. Not open for credit to students who have completed CHI 184. GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2013 Fall Quarter.

CHI 192—Internship in the Chicana/Chicano/Latina/Latino Community (1-12)

Internship—3-36 hour(s). Prerequisite(s): (CHI 010 or CHI 021 or CHI 050); (SPA 003 or SPA 003V); Or equivalent of SPA 003. Academic guidance combined with internship in community agencies serving Mexican/Latina/Latino/Chicana/Chicano clients. Use of bilingual skills and knowledge of history, culture, economics, politics and social issues. Internship project required. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: OL. Effective: 2018 Winter Quarter.

CHI 192S—Internship (1-12)

Internship. Prerequisite(s): (CHI 010 or CHI 021 or CHI 050); (SPA 003 or SPA 003V or SPA 003Y); and Consent of Instructor. Or equivalent of SPA 003, SPA 003V, SPA 003Y. Internship. May be taught abroad. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

CHI 194HA—Senior Honors Research Project (2-5)

Independent Study—6-15 hour(s). Prerequisite(s): Consent of Instructor. Senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. GE credit: OL, WE. Effective: 1997 Winter Quarter.

CHI 194HB—Senior Honors Research Project (2-5)

Independent Study—6-15 hour(s). Prerequisite(s): Consent of Instructor. Senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. GE credit: OL, WE. Effective: 1997 Winter Quarter.

CHI 194HC—Senior Honors Research Project (2-5)

Independent Study—6-15 hour(s). Prerequisite(s): Consent of Instructor. Senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. GE credit: OL, WE. Effective: 1997 Winter Quarter.

CHI 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Upper division standing and consent of Program Chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHI 198S—Directed Group Study (1-5)

Prerequisite(s): Consent of Instructor. Directed group study. May be taught abroad. May be repeated for credit. (P/NP grading only.) Effective: 2006 Winter Quarter.

CHI 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Upper division standing and consent of Program Chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHI 199S—Special Study for Advanced Undergraduates (1-5)

Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. May be taught abroad. May be repeated for credit. (P/NP grading only.) Effective: 2006 Winter Quarter.

CHI 230—Chicano/Latino Hispanic Politics (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Two undergraduate courses in Chicana/o Studies (CHI) or consent of instructor. Examination of Chicano/Latino political experiences. Evaluate theories, ideology, and practice of Chicano politics. Brief history of Chicano/Latino/Hispanic political activity, comparisons among political modes, gendered politics, and understanding relationships among Chicano, Mexican, American and world politics. Effective: 1997 Spring Quarter.

CHI 241—Community Based Participatory Research (4)

Lecture/Discussion—3 hour(s); Term Paper. Provides knowledge & skills to plan and implement participatory & community based projects that highlight community empowerment framework. Effective: 2020 Spring Quarter.

CHI 298—Group Study for Graduate Students (1-5)

Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit when topics differs. (S/U grading only.) Effective: 1997 Winter Quarter.

CHI 299—Special Study for Graduate Students (1-12)

Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

CHI 396—Teaching Assistant Training Practicum (1-4)

Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

CHN—Chinese

Courses in CHN:

CHN 001—Elementary Chinese (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): No background in Chinese or placement exam or consent of instructor. Developing elementary level skills of listening, speaking, reading and writing in Mandarin Chinese in everyday communication settings. Introduction of fundamentals of pronunciation, grammar, and Chinese characters will be introduced. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

CHN 001A—Accelerated Intensive Elementary Chinese (15)

Lecture/Discussion—15 hour(s). Prerequisite(s): No background in Chinese or placement exam or consent of instructor. Introduction and practice in contexts of pronunciation, writing system, basic grammar and vocabulary as basis of communicative competency in Mandarin Chinese within a special nine-week intensive course which combines CHN 001, CHN 002 and CHN 003. Not open for credit to students who have completed CHN 001, CHN 002, or CHN 003. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

CHN 001BL—Accelerated Written Chinese I (5)

Lecture—5 hour(s). Prerequisite(s): Placement exam or consent of instructor. Trainings on all the communicative skills of listening, speaking, reading, and writing for students who already have elementary level ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations. Not open for credit to students who have completed CHN 008. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

CHN 001CN—Mandarin for Cantonese Speakers I (5)

Lecture—5 hour(s). Prerequisite(s): Placement exam or consent of instructor. Training in spoken Mandarin, particularly in the phonetic transcription system known as pinyin, for students who already read and write Chinese. Not open for credit to students who have completed CHN 007. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

CHN 002—Elementary Chinese (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): CHN 001; Or placement exam or consent of instructor. Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 002BL—Accelerated Written Chinese II (5)

Lecture—5 hour(s). Prerequisite(s): CHN 001BL; Or placement exam or consent of instructor. Further trainings on all the communicative skills of listening, speaking, reading, and writing for students that already have elementary level ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations. Not open for credit to students who have completed CHN 018. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 002CN—Mandarin for Cantonese Speakers II (5)

Lecture—5 hour(s). Prerequisite(s): CHN 001CN; Or placement exam or consent of instructor. Continuation of CHN 001CN. Training in spoken Mandarin for students who can already read and write Chinese. Not open for credit to students who have completed CHN 017. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 003—Elementary Chinese (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): CHN 002; Or placement exam or consent of instructor. Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 003BL—Accelerated Written Chinese III (5)

Lecture—5 hour(s). Prerequisite(s): CHN 002BL; Or placement exam or consent of instructor. Continuation of CHN 002BL with further trainings on all the communicative skills of listening, speaking, reading, and writing with emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations in more communication settings. Not open for credit to students who have completed CHN 028. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 003CN—Mandarin for Cantonese Speakers III (5)

Lecture—5 hour(s). Prerequisite(s): CHN 002CN; Or placement exam or consent of instructor. Continuation of CHN 002CN. Prepares students for entering upper division courses in Chinese. Not open for credit to students who have completed CHN 027. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 004—Intermediate Chinese (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): CHN 003 or placement exam or consent of instructor. Continuation of intermediate-level communication skills in spoken and written Mandarin, based on language skills developed in CHN 003. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 004A—Accelerated Intensive Intermediate Chinese (15)

Lecture/Discussion—15 hour(s). Prerequisite(s): CHN 003 or CHN 001A or placement exam or consent of instructor. Special nine-week accelerated, intensive summer session course that combines the work of CHN 004, CHN 005, and CHN 006. Intermediate-level training in spoken and written Chinese in cultural and communicative contexts, based on language skills developed in CHN 003 or CHN 001A. Not open to students who have completed CHN 004, CHN 005, or CHN 006. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 005—Intermediate Chinese (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): CHN 004 or placement exam or consent of instructor. Training continues at intermediate-level in spoken and written Chinese in cultural contexts, based on language skills developed in CHN 004. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 006—Intermediate Chinese (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): CHN 005; CHN 005 or placement exam or consent of instructor. Intermediate-level training in spoken and written Chinese in cultural contexts, based on language skills developed in CHN 005. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 007—Chinese Business Culture (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Open to non-heritage students who have no prior knowledge of, or background in, the Chinese language; anyone who has taken Chinese language classes before or after being enrolled at UC Davis, or anyone who is currently enrolled in a Chinese language class, or who speaks any Mandarin or Chinese dialect (e.g., Cantonese), cannot take the course for credit without the instructor's permission. Introduction to business culture of China. Basic conversation and Romanization of Chinese words. GE credit: AH, OL, SS, WC. Effective: 2015 Winter Quarter.

CHN 010—Modern Chinese Literature (In English) (4)

Lecture—3 hour(s); Term Paper/Discussion—1 hour(s). Introductory course requiring no knowledge of Chinese language or history. Reading and discussion of short stories and novels and viewing of two films. Designed to convey a feeling for what China has experienced in the 20th century. Not open for credit to students who have already taken, or are taking concurrently, CHN 104. GE credit: AH, WC. Effective: 2008 Spring Quarter.

CHN 011—Great Books of China (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Selected readings in English translation are supplemented with background information on periods, authors and the interrelationships of culture, literature and social change. Methods of analysis are introduced and applied in class discussions. GE credit: AH, WC. Effective: 1997 Winter Quarter.

CHN 050—Introduction to the Literature of China & Japan (4)

Lecture/Discussion—4 hour(s). Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced. (Same course as JPN 050.) GE credit: AH, WC. Effective: 2012 Fall Quarter.

CHN 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 100A—Chinese Intellectual Traditions: Daoist Traditions (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): A course in Chinese history recommended. English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist divinities; Daoism and the state. (Same course as RST 175A.) GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 100B—Confucian Traditions (4)

Lecture/Discussion—4 hour(s). Key aspects of the Confucian tradition in dynastic China. Major themes addressed include ritual, classical studies, and Confucian influences on the Chinese family and state. GE credit: AH, WC. Effective: 2014 Fall Quarter.

CHN 101—Chinese Film (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). English language survey of Chinese film, from its inception to the end of the 20th century. Chinese films as important texts for understanding national, transnational, racial, gender, and class politics of modern China. (Same course as CTS 147A.) GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

CHN 103—Modern Chinese Drama (4)

Lecture—3 hour(s); Term Paper/Discussion—1 hour(s). English language survey of modern Chinese spoken drama in the 20th century and its major playwrights, in the context of Chinese history and the interaction of Chinese culture with other cultures. GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

CHN 104—Modern Chinese Fiction (in English) (4)

CHN 105—Western Influences on 20th-Century Chinese Literature (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction of Western literary thought into modern China, the experimentation with Western literary forms and techniques, and the development of Marxism in contemporary literary writing. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 106—Chinese Poetry (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Organized topically and chronologically, the lyric tradition is explored from the dawn of folk songs down to modern expressions of social protest. Topics include friendship, love, oppression, war, parting, death, ecstasy and beauty. All readings are in English. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 107—Traditional Chinese Fiction (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). English-language course studying the dawn of Chinese fiction and its development down to modern times. Combines survey history with close reading of representative works such as *The Story of the Stone* and famous Ming-Qing short stories. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 108—Poetry of China & Japan (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). A comparative approach to Chinese and Japanese poetry, examining poetic practice in the two cultures; includes a general outline of the two traditions, plus study of poetic forms, techniques, and distinct treatments of universal themes: love, nature, war, etc. (Same course as JPN 108.) GE credit: AH, WC. Effective: 1997 Winter Quarter.

CHN 109A—Topics in Chinese Literature: Crime & Punishment (4)

Lecture—3 hour(s); Discussion—1 hour(s). Topics in Chinese literature; crime and punishment. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109C—Topics in Chinese Literature: Women Writers (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Topics in Chinese literature; women writers. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109D—Topics in Chinese Literature: The Knight-Errant (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Topics in Chinese literature; the knight-errant. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109E—Topics in Chinese Literature: The City in Fiction (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Topics in Chinese literature; the city in fiction. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109G—Topics in Chinese Literature: The Literature of 20th-Century Taiwan (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Topics in Chinese literature; the literature of 20th-century Taiwan. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109H—Topics in Chinese Literature: Popular Literature (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Topics in Chinese literature; popular literature. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109I—Topics in Chinese Literature: Scholar & The Courtesan (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Topics in Chinese literature; the scholar and the courtesan. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 110—Great Writers of China: Texts & Context (in English) (4)

Lecture—3 hour(s); Discussion—1 hour(s). Examination of major theoretical concepts and interpretive methods in the study of literature by using examples from the Chinese tradition; discussions of classical and modern works with an emphasis on the relations between literature, author, society, and culture. GE credit: AH, WC. Effective: 2017 Spring Quarter.

CHN 111—Modern Chinese: Reading & Discussion (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 006 C- or better or CHN 003BL C- or better or CHN 004A C- or better; Or placement exam or consent of instructor. Building on Chinese 006/003BL, further development of communication skills in Modern Standard Mandarin-speaking environments. Reading of dialogues/articles pertaining to contemporary China. GE credit: AH, OL, WC. Effective: 2017 Spring Quarter.

CHN 111A—Intensive Third-Year Chinese (12)

Lecture/Discussion—13.3 hour(s). Prerequisite(s): CHN 006 or CHN 003BL or CHN 004A; Or placement exam or consent of instructor. Not open to students who have completed CHN 111, CHN 112, or CHN 113. Nine-week intensive summer course combines CHN 111, CHN 112, and CHN 113. Training at intermediate-high and advanced-low level in spoken and written Chinese in cultural and communicative contexts based on language skills developed in CHN 006. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 112—Modern Chinese: Reading & Discussion (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 111; Or placement exam or consent of instructor. Further development of communication skills from CHN 111 in Modern Standard Mandarin-speaking environments. Reading dialogues/articles pertaining to contemporary China issues and discussing ethical, moral, aesthetic, social, and cultural concerns. GE credit: AH, OL, WC. Effective: 2018 Winter Quarter.

CHN 113—Modern Chinese: Reading & Discussion (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 112; Or placement exam or consent of instructor. Continuation of CHN 112, further developing communication skills in Modern Standard Mandarin-speaking environments. Read dialogues/articles pertaining to contemporary China issues and discuss ethical, moral, aesthetic, social, and cultural concerns. Study strategies for moving between simplified and traditional Chinese characters. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 114—Introduction to Classical Chinese (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 112; Consent of Instructor. Or equivalent language proficiency. Introduction to the language in which, until the 20th century, most official, documentary, scholarly, and belle-lettristic Chinese literature was written. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 115—Introduction to Classical Chinese II (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 114; or Consent of Instructor. Continuation of enhancing classical Chinese reading skills with literature ranging from the prose found in Han dynasty historical works, Six Dynasties anecdotal literature, and Tang occasional texts, as well as the poetic shi and fu genres. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 116—Introduction to Classical Chinese III (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 115; or Consent of Instructor. Translations of extended readings in the original sources and brief analyses of syntax. These sources will include texts written by well-known figures from the 8th through 15th centuries, composing in a wide variety of genres. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 120—Advanced Chinese (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 113; Or placement exam or consent of instructor. Evaluation of readings from various genres (literature, newspapers, TV and movies, etc.) develop advanced reading, writing, aural comprehension, and formal/professional speech skills in Mandarin Chinese. Chinese society/cultural studies, especially those sociocultural issues reflected in the language used in learning materials. May be repeated up to 1 time(s) when material is different for each quarter of an academic year; cannot be for the same quarter taken in a previous academic year. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 130—Readings in Traditional Chinese Fiction (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 111; Or equivalent language proficiency. Examination of representative works of traditional Chinese fiction popular from the 12th Century until the 17th and 18th centuries. Translations in English of the Chinese texts will be available to students as reference. May be repeated up to 1 time(s). GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

CHN 131—Readings in Traditional Chinese Poetry (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 111; Consent of Instructor. Or equivalent language proficiency. Traditional Chinese poetry from its beginnings to the golden ages of Tang and Song, surveying forms and poets that best reveal the Chinese poetic sensibility and the genius of the language of Chinese poetry. GE credit: AH. Effective: 2016 Spring Quarter.

CHN 132—Readings in Modern Chinese Poetry (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHN 111; Consent of Instructor. Or equivalent language proficiency. Chinese poetry from the Literary Revolution of 1917 to the present, surveying works that embody exciting innovations and reflect the modernity of 20th-century Chinese society and culture. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 133—Readings in Modern Chinese Prose & Drama (4) *Review all entries*

Lecture—4 hour(s). Prerequisite(s): CHN 111; or equivalent language proficiency, or consent of instructor. Literary works and scholarly essays on selected topics of Chinese prose and drama, development of a deep understanding of Chinese culture and society through sophisticated reading materials of these two important genres of the modern period. GE credit: AH, WC. Effective: 2020 Fall Quarter.

CHN 133—Readings in Modern Chinese Prose & Drama (4) *Review all entries*

Lecture—4 hour(s). Prerequisite(s): CHN 111; Or equivalent language proficiency. Literary works and scholarly essays on selected topics of Chinese prose and drama, development of a deep understanding of Chinese culture and society through sophisticated reading materials of these two important genres of the modern period. Conducted in Chinese. May be repeated up to 2 unit(s) when topic differs. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 134—Chinese Film in Chinese Language (4)

Lecture—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): CHN 111; Or equivalent language proficiency. Chinese film and scholarly essays on Chinese cinema and film history. Develop a deep understanding of Chinese culture and society through viewing and studying Chinese films in the Chinese language. GE credit: AH, OL, SS, VL, WC. Effective: 2016 Spring Quarter.

CHN 140—Readings in Classical Chinese (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Study and philological analysis of selected texts from the first millennium of Imperial China. May be repeated up to 2 time(s). GE credit: AH. Effective: 1997 Winter Quarter.

CHN 150—Fifth-Year Chinese: Selected Topics in Chinese Language, Literature, & Culture (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CHN 120; Or placement exam or consent of instructor. Examination of literary works and scholarly essays on selected topics of Chinese culture and society. Development of a deep understanding of Chinese culture and society through sophisticated Chinese speaking and writing exercises. May be repeated up to 3 time(s) when topic differs. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

CHN 160—The Chinese Language (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CHN 006 (can be concurrent) or CHN 003BL (can be concurrent) or CHN 003CN (can be concurrent) or CHN 004A (can be concurrent); Or placement exam or consent of instructor. LIN 001 recommended. Introduction to structural features of Chinese (Mandarin) sounds, lexicon, grammar, and writing (characters), as well as relevant dialectal and sociolinguistic issues of the language. GE credit: AH, WC. Effective: 2018 Fall Quarter.

CHN 192—Chinese Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Upper division standing and consent of instructor. Work experience in the Chinese language, with analytical term paper on a topic approved by instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 194H—Senior Thesis Honors Project (1-5)

Independent Study—3-15 hour(s). Prerequisite(s): Consent of Instructor. Senior standing and qualification for the Chinese honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Chinese literature, civilization, or language studies. May be repeated up to 8 unit(s). (P/NP grading only.) GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

CHN 197T—Tutoring in Chinese (1-4)

Tutorial—1-4 hour(s). Prerequisite(s): Consent of Department. Leading of small voluntary discussion groups affiliated with one of the Department's regular courses. May be repeated up to 4 unit(s). (P/NP grading only.) Effective: 2016 Summer Session 1.

CHN 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Summer Session 1.

CHN 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 297—Directed Independent Study (4)

Term Paper; Independent Study; Conference—1 hour(s). Prerequisite(s): Consent of Instructor. Restricted to graduate students. Directed independent study on a topic culminating in a term paper. Independent studies may only be arranged with consent of the instructor and when graduate seminars are unavailable. May be repeated up to 5 time(s). Effective: 2017 Winter Quarter.

CHN 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHN 396—Teaching Assistant Training Practicum (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Any course taught by a graduate student under the direction of the Director. May be repeated for credit. (S/U grading only.) Effective: 2016 Spring Quarter.

CLA—Classics

Courses in CLA:

CLA 001—Ancient Near East & Early Greece: 3000-500 B.C.E. (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to the literature, art, and social and political institutions of ancient Mesopotamia, Egypt, Palestine, and early Greece from 3000 to 500 B.C.E. GE credit: AH, WC, WE. Effective: 2015 Fall Quarter.

CLA 002—Ancient Greece & the Near East: 500-146 B.C.E. (4)

Lecture—3 hour(s); Term Paper. Introduction to the literature, art and thought and the political and social institutions and values of Greece and its eastern Mediterranean neighbors—the Persians, Egyptians, and Judeans. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

CLA 003—Rome & the Mediterranean: 800 B.C.E. -500 C.E. (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to the history, literature, material culture, political and social institutions and values of Roman Civilization, with an emphasis on the development of the Roman Empire and the interactions of Roman culture with other Mediterranean cultures. GE credit: AH, WC, WE. Effective: 2008 Spring Quarter.

CLA 004—Late Antiquity (4)

Lecture—3 hour(s); Discussion—1 hour(s). History and culture of the Roman and Byzantine empires from the 3rd to the 8th century. Transformation of the classical Mediterranean world through political and cultural interactions, rise of Christianity and Islam, beginning of the medieval period in Europe. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 010—Greek, Roman, & Near Eastern Mythology (3)

Lecture—3 hour(s). Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation. GE credit: AH, VL, WC. Effective: 1997 Winter Quarter.

CLA 010Y—Greek, Roman, & Near Eastern Mythology—Hybrid (3)

Lecture—2 hour(s); Web Virtual Lecture—1 hour(s). Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation. GE credit: AH, VL, WC. Effective: 2016 Winter Quarter.

CLA 015—Women & Gender in Classical Antiquity (4)

Lecture/Discussion—3 hour(s); Term Paper. Lives and roles of women and men in ancient Greece and Rome. Readings from history, philosophy, medical and legal documents, literature and myth. GE credit: AH, VL, WC, WE. Effective: 2011 Fall Quarter.

CLA 020—Pompeii AD 79 (4)

Lecture—3 hour(s); Term Paper. Roman life in an urban community at the time of the eruption of Vesuvius. Slide presentations of the archeological evidence will be supplemented by selected readings from Petronius' Satyricon and other ancient authors. GE credit: AH, VL, WC, WE. Effective: 1997 Winter Quarter.

CLA 025—The Classical Heritage in America (4)

Lecture/Discussion—3 hour(s); Term Paper. Classical heritage in the New World, with emphasis on the United States from its colonial past to the present day. The reception of Greco-Roman thought and values as expressed in art, architecture, education, law, government, literature, and film. GE credit: ACGH, AH, WE. Effective: 2011 Fall Quarter.

CLA 030—Greek & Latin Elements in English Vocabulary (3)

Lecture—3 hour(s). Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected. Not open for credit to students who have completed CLA 030F. GE credit: AH. Effective: 2014 Fall Quarter.

CLA 030F—Greek & Latin Elements in English Vocabulary (3)

Lecture—3 hour(s). Restricted to incoming freshmen. Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected. Not open for credit to students who have completed CLA 030. GE credit: AH. Effective: 2014 Fall Quarter.

CLA 031—Greek & Latin Elements in Technical Vocabulary (3)

Lecture—3 hour(s). Knowledge of Greek and Latin not required. Elements of Greek and Latin vocabulary to increase understanding of English word formation in medical, scientific and technical terminology and improve ability to understand and retain unfamiliar terms. GE credit: AH. Effective: 1997 Winter Quarter.

CLA 035—Food & Wine in the Ancient Mediterranean (3)

Lecture/Discussion—3 hour(s). Social, political, and economic history of food and wine in ancient Mediterranean cultures. Development of agriculture and technology, trade, empires. Representation of food and wine in literary and visual arts, religious significance. GE credit: AH, VL, WC. Effective: 2019 Fall Quarter.

CLA 040—Life & Economy in the Ancient Mediterranean World (4)

Lecture/Discussion—3 hour(s); Term Paper. Characterization of ancient Mediterranean economies, with emphasis on Greece and Rome. Utilization of archaeological, art historical, and literary evidence. Craft production, labor specialization, trade networks, ancient technology, urban growth, agricultural productivity, coinage systems, and household economies. GE credit: AH, VL, WC, WE. Effective: 2016 Fall Quarter.

CLA 050—Ancient Science (4)

Lecture—3 hour(s); Discussion—1 hour(s). Study of science in ancient Greece and Rome; consideration of its social context; concentration on the basic concepts of physics, the world of medicine and biology, the history of mathematics, and the practices of astronomy, astrology and meteorology. (Same course as STS 050.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 051—Ancient Medicine (4)

Lecture—3 hour(s); Discussion—1 hour(s). Medicine in ancient Greece and Rome; physiological conceptions of the body within scientific and social frameworks; exploration of sanitation technology and health in antiquity; medical treatment of the female body; medicine and the economy. (Same course as STS 051.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

CLA 098—Directed Group Study (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2007 Fall Quarter.

CLA 101A—Topics in Ancient Mediterranean Civilizations (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Topics may be ordered by time or place (e.g. Hellenistic Egypt) or by theme or genre (e.g. slavery in the ancient world). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101B—Topics in Greek Civilization (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Topics may be ordered by time or place (e.g. the world of Homer) or by theme or genre (e.g. the Greek art of war). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101C—Topics in Roman Civilization (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Topics may be ordered by time or place (e.g. Julius Caesar and his age) or by theme or genre (e.g. gladiators: blood in the arena). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101D—Topics in Classical Receptions (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Topics in classical reception from late antiquity to the present. Topics may be ordered by time or place (e.g. the classical tradition in Washington, D.C.) or by theme or genre (e.g. cinematic representations of the ancient world). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101E—Topics in Ancient Science (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): CLA 050 or CLA 051; or Consent of Instructor. Topics may be ordered by discipline (e.g. ancient medicine), historical figure (e.g. Galen) or topic (e.g. science and the economy). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 102—Film & the Classical World (4)

Lecture—3 hour(s); Film Viewing—2.5 hour(s). Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Classical World as portrayed in films. Viewings and discussions of modern versions of ancient dramas, modern dramas set in the Ancient Mediterranean world, and films imbued with classical themes and allusions. Supplementary readings in ancient literature and mythology. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 103—Love & Beauty in the Ancient World (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Philosophical and literary traditions connecting love, beauty, and goodness in ancient thought. Moral and ethical implications, ideologies of sexuality and gender; transmission into the medieval and modern world. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

CLA 105—Theory & Practice of Greek & Roman Mythology (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Thematically focused study of mythological narratives. Emphasis on the historical development of myths and the variety of theoretical approaches for the study of myth. GE credit: AH, WE. Effective: 2016 Fall Quarter.

CLA 110—Origins of Rhetoric (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Issues in the development of rhetoric from its origins in ancient Greece to A.D.430. Special attention to works of Plato, Aristotle, Cicero, and Quintilian. Role of grammar and rhetoric in schools of Roman Empire. The Christian rhetoric of Saint Augustine. Not open for credit to students who have completed RCM 110 or CMN 110. (Former RCM 110.). GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 111—Forms of Knowledge in the Ancient World (4)

Extensive Writing; Lecture/Discussion—3 hour(s). History of knowledge preservation and transfer in the ancient Mediterranean. Oral tradition, technology, innovations, forms of writing, libraries, ancient scholarship, cultural exchange and influence. GE credit: AH, VL, WC, WE. Effective: 2017 Fall Quarter.

CLA 120—Greek & Roman Historiography (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Survey of Greek and Roman historical writing in English translation. Authors to be read may include Herodotus, Thucydides, Sallust, Livy, and Tacitus. Focus on the development of historical writing as a literary genre. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 125—Roman Political Thought (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Survey of Roman thinking about politics, as expressed both in formal theorizing and in a variety of other contexts, including oratory, historiography, and epic. Study of Roman political reflection in its historical, cultural, and literary context. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 140—Homer & Ancient Epic (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Reading of the classical epics of Homer (Iliad, Odyssey) and Virgil (Aeneid) in English. Discussion of techniques of composition, the beliefs and values of their respective societies, and the generic tradition of ancient epic. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 141—Greek & Roman Comedy (4)

Lecture—3 hour(s); Conference—1 hour(s). Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Readings in Aristophanes, Menander, Plautus, and Terence; lectures on the development of ancient comedy. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 142—Greek & Roman Novel (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Examination of the ancient Greek romances and their development into the grotesque realism of Petronius' Satyricon, and the religious mysticism of Apuleius' The Golden Ass. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

CLA 143—Greek Tragedy (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Reading in English of selected plays of Aeschylus, Sophocles, and Euripides. Discussion of the development and influence of Athenian tragedy. GE credit: AH, WE. Effective: 2016 Fall Quarter.

CLA 150—Socrates & Classical Athens (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Study of the major sources of our knowledge of Socrates, assessment of his role in the politics and culture of ancient Athens, his method of teaching, and his place in Western thought. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 170—Cultural Interactions in the Ancient Mediterranean World (4)

Lecture/Discussion—3 hour(s); Term Paper. Exploration of the role of colonial encounters in the spread of ideas throughout the ancient Mediterranean from an archaeological and artistic perspective. Emphasis on material and literary expressions of culture, trade routes, and theories pertaining to culture contact. GE credit: AH, VL, WC, WE. Effective: 2016 Fall Quarter.

CLA 171—Mediterranean Bronze Age Archaeology (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Archaeological monuments of the ancient Near East, including Egypt and Mesopotamia, and of Greece and Crete during the Bronze Age. Special emphasis on the problems of state formation and on the co-existence and collapse of Bronze Age societies. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CLA 172A—Early Greek Art & Architecture (4)

Lecture—3 hour(s); Term Paper. Examination of the origin and development of the major monuments of Greek art and architecture from the 8th century to the mid-5th century B.C. (Same course as AHI 172A.) GE credit: AH, VL, WE. Effective: 2015 Fall Quarter.

CLA 172B—Later Greek Art & Architecture (4)

Lecture—3 hour(s); Term Paper. Study of the art and architecture of later Classical and Hellenistic Greece, from the mid-5th century to the 1st century B.C. (Same course as AHI 172B.) GE credit: AH, VL. Effective: 2015 Fall Quarter.

CLA 173—Roman Art & Architecture (4)

Lecture—3 hour(s); Term Paper. Art and architecture of Rome and the Roman Empire, from the founding of Rome through the 4th century C.E. (Same course as AHI 173.) GE credit: AH, VL, WE. Effective: 2014 Fall Quarter.

CLA 174—Greek Religion & Society (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): A lower division Classics (CLA) course or consent of instructor. Cults, festivals, and rituals of Greek religious practice and their relationship to Greek social and political institutions, and to Greek private life. Includes discussion of major sanctuaries at Olympia, Delphi, Athens, and others. GE credit: AH, WC. Effective: 2017 Winter Quarter.

CLA 175—Architecture & Urbanism in Mediterranean Antiquity (4)

Lecture—3 hour(s); Extensive Writing. Architecture and urban development in the ancient Near East, Greece, and Rome. Special emphasis on the social structure of the ancient city as expressed in its architecture, and on the interaction between local traditions and the impact of Greco-Roman urbanism. (Same course as AHI 175.) GE credit: AH, VL, WC, WE. Effective: 2017 Spring Quarter.

CLA 176—Roman Religions (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Roman religion from republic to empire. Gods, rituals, and festivals at Rome; sacrifice, sacred places, magic. Gender roles, social status, national identity. Influences from other cultures, especially Egypt and the eastern Mediterranean. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

CLA 190—Senior Seminar (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Completion of one upper division course in Latin (LAT), Greek (GRK) or Hebrew (HEB) or consent of instructor. Advanced interdisciplinary study of a problem in the ancient Mediterranean world using the techniques of history, archaeology, art history and philology. May be repeated for credit. GE credit: AH, WE. Effective: 1997 Winter Quarter.

CLA 194HA—Special Study for Honors Students (3)

Discussion—1 hour(s); Independent Study; Term Paper. Prerequisite(s): Admission to the Honors Program; consent of faculty member supervising honors thesis. Directed reading, research and writing culminating in the completion of a senior honors thesis under the direction of faculty advisor. (P/NP grading only.) GE credit: AH. Effective: 2003 Fall Quarter.

CLA 194HB—Special Study for Honors Students (3)

Discussion—1 hour(s); Independent Study; Term Paper. Prerequisite(s): Admission to the Honors Program and consent of faculty member supervising honors thesis. Directed reading, research, and writing culminating in the completion of a senior honors thesis under the direction of faculty advisor. (P/NP grading only.) GE credit: AH. Effective: 2004 Winter Quarter.

CLA 197TC—Community Tutoring in Classical Languages (1-5)

Tutorial—1-5 hour(s). Prerequisite(s): Consent of Instructor. Supervised instruction of Greek or Latin in nearby schools by qualified students in department. May be repeated up to 5 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CLA 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1999 Fall Quarter.

CLA 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1999 Fall Quarter.

CLA 200A—Approaches to the Classical Past (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate student status or consent of instructor. Survey of major areas of classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture. Effective: 2016 Fall Quarter.

CLA 200B—Approaches to the Classics Past (4)

Independent Study—4 hour(s). Prerequisite(s): CLA 200A; Graduate student status or consent of instructor. Restricted to graduate students. Research project on major area of Classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture. Effective: 2016 Fall Quarter.

CLA 201—Introduction to Classical Philology (4)

Seminar—3 hour(s); Term Paper. Survey of major contemporary areas of classical scholarship with special attention devoted to current problems in literary and textual criticism. Effective: 1997 Winter Quarter.

CLA 202—Homer (4)

Seminar—3 hour(s); Term Paper. Readings in the Iliad and Odyssey: the origins and transmission of the poems. Effective: 1997 Winter Quarter.

CLA 203—Vergil (4)

Seminar—3 hour(s); Term Paper. Reading of selected books of the Bucolics, Georgics, and Aeneid. Emphasis will be placed on the study of Vergilean poetic language. Effective: 1997 Winter Quarter.

CLA 204—Greek & Roman Comedy (4)

Seminar—3 hour(s); Term Paper. Historical and critical problems in Aristophanes or New Comedy. May be repeated for credit. Effective: 1997 Winter Quarter.

CLA 205—Latin Lyric & Elegy (4)

Seminar—3 hour(s); Term Paper. Critical examination of the works of Catullus, Horace, or Propertius. May be repeated for credit. Effective: 1997 Winter Quarter.

CLA 206—Greek Historiography (4)

Seminar—3 hour(s); Term Paper. Development of historical writing in Greece. May be repeated for credit. Effective: 1997 Winter Quarter.

CLA 207—Greek Drama (4)

Seminar—3 hour(s); Term Paper. Literary and philological analysis of the plays of Euripides, Sophocles, or Aeschylus. May be repeated for credit. Effective: 1997 Winter Quarter.

CLA 299—Research (1-12)

Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CLA 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

CLH—Clinical Research

Courses in CLH:**CLH 200—Introduction to Translational Research (1)**

Lecture—1 hour(s). Prerequisite(s): Consent of Instructor. One of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (S/U grading only.) Effective: 2018 Summer Quarter.

CLH 201—Strategies for Grant Writing (2)

Lecture—2 hour(s). Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training program. Practical skills and strategies to create successful grant proposals in NIH style/format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (Former MDS 461CR.) (S/U grading only.) Effective: 2008 Summer Special Session.

CLH 202—Introduction to Clinical Research (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, MRCTP program, Clinical Research Certificate or other SOM/CTSC training programs. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs: cross-sectional, case-control, and cohort. Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. Effective: 2019 Winter Quarter.

CLH 203—Methods in Clinical Research (3)

Lecture—4 hour(s); Discussion—1 hour(s); Independent Study—10 hour(s). Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training programs. Overview of major approaches to clinical research, including health services research techniques, informatics, GCRC, and preclinical methodologies to enhance clinical projects. Overview of UC Davis clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (S/U grading only.) Effective: 2015 Spring Quarter.

CLH 204—The Ethics of Research (1)

Lecture—1 hour(s). Prerequisite(s): Consent of Instructor. Priority given to those with acceptance into the Clinical Research Graduate Group, K12, T32 or other SOM/CTSC training program. Acquire information about ethical responsibilities; Explore major questions in ethics; Apply ethical principles, concepts and values; Gain an appreciation of the role of trust in scientific research. Recommend three quarters of CLH204. Must enroll in Fall to continue through Spring. May be repeated up to 3 unit(s). (S/U grading only.) Effective: 2016 Fall Quarter.

CLH 207—Team Science (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Participation in CTSC Research Education and Training Programs, or consent of instructor. Restricted to 25 students. Today's scientific challenges necessitate cross-disciplinary engagement and high collaboration levels. Offers guidance on how best to engage in team science to pursue complex questions, work effectively with team members, and produce high impact research that meets society's needs. (S/U grading only.) Effective: 2015 Winter Quarter.

CLH 208—Introduction to Grant Writing, I (2)

Lecture/Discussion—2 hour(s); Extensive Writing. First in a two-quarter series. Scholars are encouraged to enroll in both classes. The two-course sequence provides training in practical aspects of competitive grant writing. The focus is NIH, but information will apply to other funding agencies. (S/U grading only.) Effective: 2014 Fall Quarter.

CLH 209—Introduction to Grant Writing, II (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): CLH 208; Consent of Instructor. Restricted to students who have completed CLH 208. Second in a two-quarter series. Two-course sequence provides training in practical aspects of competitive grant writing. (S/U grading only.) Effective: 2016 Fall Quarter.

CLH 210Y—Principles & Methods of Comparative Effectiveness Research (4)

Web Virtual Lecture—4 hour(s); Discussion—2 hour(s); Project (Term Project)—6 hour(s); Web Electronic Discussion. Prerequisite(s): Consent of Instructor. Familiarity with research methodology, and a course in introductory statistics. Provides an introduction to Comparative Effectiveness Research (CER) and methods for conducting CER. (S/U grading only.) Effective: 2015 Winter Quarter.

CLH 211—Critical Assessment of the Biomedical Literature (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Exposure to topical issues and controversies in the design of interdisciplinary translational research, with an emphasis on critical assessment of the biomedical and health sciences literature. Extends students' knowledge of study design through practical application. May be repeated up to 3 unit(s). (S/U grading only.) Effective: 2016 Fall Quarter.

CLH 212—Introduction to Stem Cell Biology (3)

Lecture/Discussion—3 hour(s). Open to graduate students with a fundamental knowledge of cell biology. Introduction to Stem Cell Biology. Each week will focus on different aspects of stem cells, including general concepts, stem cells in lower organisms, embryonic stem cells and cellular reprogramming. Effective: 2016 Spring Quarter.

CLH 214A—Biodesign I (2)

Lecture—2 hour(s). Prerequisite(s): Consent of Instructor. Prior approval by instructor required; student must commit to taking both courses; Biodesign I and Biodesign II. Focuses on the principles of needs identification and invention of biomedical technologies. Two part course provides a basic understanding of the elements of the innovation process and how to translate these principles into biomedical device design. Effective: 2016 Fall Quarter.

CLH 214B—Biodesign II (2)

Lecture—2 hour(s). Prerequisite(s): CLH 214A; Consent of Instructor. Prior approval by instructor required; student must commit to taking both courses; Biodesign I and Biodesign II. Focuses on the implementation of biomedical technologies and translational process. Two part course provides a basic understanding of the elements of the innovation process and how to translate these principles into biomedical device design. Effective: 2017 Winter Quarter.

CLH 220—Basics of Stem & Progenitor Cells (1)

Lecture—1 hour(s). Prerequisite(s): MCP 200L; MCP 200; Consent of Instructor; Graduate standing. Lecture designed for graduate students who have experience in cell culture techniques. Designed to give a broad overview of the field and current cells of interest to the greater research community. (S/U grading only.) Effective: 2007 Spring Quarter.

CLH 222—Ethical Issues in Stem Cell Biology (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent articles in stem cell biology and small group discussions of the ethical issues surrounding this area of research. (S/U grading only.) Effective: 2007 Winter Quarter.

CLH 225—Stem Cell Biology & current Good Manufacturing Practice (2)

Lecture/Discussion—2 hour(s); Laboratory—1 hour(s). Prerequisite(s): Must have foundational knowledge of biology and chemistry; graduate students preferred, other students upon instructor's consent. Graduate students preferred, other students upon instructor's consent. Introduction to human stem cell biology; development of cellular therapeutics based on human stem cells for the treatment of currently incurable diseases; introduction to current Good Manufacturing Practice (cGMP), and theoretical & practical exploration of cGMP to manufacture such cellular therapies. Effective: 2019 Summer Special Session.

CLH 230—Congestive Heart Failure, Mechanism of Disease (3)

Lecture/Discussion—2 hour(s); Project (Term Project). Prerequisite(s): Consent of Instructor. Graduate standing. Underlying mechanisms of cardiomyopathy and heart failure. Presentation of fundamental knowledge of and recent basic research on heart failure. Student team projects: investigation and presentation of a research topic and bench research project to advance research in the same area. Effective: 2008 Summer Session 1.

CLH 231—Current Techniques in Clinical Research (2)

Lecture—1 hour(s); Clinical Activity—3 hour(s). Prerequisite(s): CLH 250; and Consent of Instructor. Graduate standing. Current techniques used in clinical research such as electrophysiology, cardiovascular surgery, cardiac catheterization and echocardiography, team science, and patient management. Lectures are presented by experts on each technique, with an emphasis on use in translational research. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 233—Molecular Mechanisms of Disease: Cancer (3)

Lecture/Discussion—2 hour(s); Project (Term Project)—3 hour(s). Prerequisite(s): Consent of Instructor. Restricted to students pursuing the designated emphasis in Translational Research; graduate standing. Cutting edge of research on underlying mechanisms of cancer development, progression and prevention—clinical trials/drug development, signaling pathways and molecular mechanisms of cancer development, recent basic research on cancer stem cells, genetics and epigenetic events and animal models used. Effective: 2013 Fall Quarter.

CLH 240—Predoctoral Clinical Research Training Program Research Integration (1)

Seminar—0.5 hour(s); Discussion—0.5 hour(s). Prerequisite(s): Consent of Instructor. Enrollment in the Predoctoral Clinical Research Training Program in the CTSC, School of Medicine. Alternating sessions: journal club, seminar/discussion, and research integration sessions. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2007 Fall Quarter.

CLH 244—Introduction to Medical Statistics (4)

Lecture—4 hour(s). Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only 1 unit of credit for students who have completed STA 100 or MPM 402. (Same course as SPH 244.) Effective: 2017 Winter Quarter.

CLH 245—Biostatistics for Biomedical Science (4)

Lecture—4 hour(s). Prerequisite(s): CLH 244 or SPH 244; Consent of Instructor. Or equivalent. Analysis of data and design of experiments for laboratory data. (Same course as SPH 245.) Effective: 2015 Spring Quarter.

CLH 246—Biostatistics for Clinical Research (4)

Lecture—4 hour(s). Prerequisite(s): CLH 245 or SPH 245. Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians. May be repeated for credit. (Same course as SPH 246.) Effective: 2015 Winter Quarter.

CLH 247—Statistical Analysis for Laboratory Data (4)

Lecture—4 hour(s). Prerequisite(s): CLH 245 or SPH 245. Statistical methods for experimental design and analysis of laboratory data including gene expression arrays, RNA-Seq, and mass spec. (Same course as SPH 247.) Effective: 2015 Spring Quarter.

CLH 250—Integrating Medicine Into Basic Science (6)

Lecture—3.8 hour(s); Discussion—6 hour(s); Seminar—2.5 hour(s); Clinical Activity—8 hour(s). Graduate standing; acceptance into HHMI Integrating Medicine into Basic Science program. Four-week summer institute consisting of didactic lectures, reading assignments, group discussions, and clinical rotations to acculturate students to the human medical environment; integrate medical principles, physiology and pathophysiology into basic research; introduce high-impact clinical studies related to medicine and health. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290A—Hot Topics in Clinical Research (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290B—Hot Topics in Stem Cell Biology (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Seminars presented by guest lecturers on subjects of their own research (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290C—Literature in Stem Cell Biology (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent journal articles in stem cell biology by students. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290D—Literature in Translational Research (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.) Effective: 2009 Fall Quarter.

CLH 298—Group Study in Clinical Research (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the Mentored Clinical Research Training Program. Special topics in Clinical Research appropriate for group study at the graduate level. May be repeated for credit. (S/U grading only.) Effective: 2006 Winter Quarter.

CLH 299—Clinical Research (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the Mentored Clinical Research Training Program. Independent research and special topics in clinical research appropriate for graduate level. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

CMN—Communication**Courses in CMN:**

Students must have satisfied the Entry Level Writing requirement before taking any course in Communication.

CMN 001—Introduction to Public Speaking (4)

Lecture—2 hour(s); Discussion—2 hour(s). Practice in the preparation and delivery of speeches based on principles and strategies of informing and persuading audiences drawn from the social sciences and humanities. GE credit: AH, OL, SS, WE. Effective: 2017 Winter Quarter.

CMN 003—Interpersonal Communication Competence (4)

Lecture—2 hour(s); Discussion—2 hour(s). Communication competence in professional settings. Managing face-to-face and virtual teams. Leadership, conflict management and negotiation skills. Communication in diverse organizations. Leveraging communication networks. Effective interviewing. GE credit: SS, WE. Effective: 2018 Spring Quarter.

CMN 003V—Interpersonal Communication Competence (4)

Web Virtual Lecture—2 hour(s); Web Electronic Discussion—2 hour(s). Communication competence in professional settings. Managing face-to-face and virtual teams. Leadership, conflict management and negotiation skills. Communication in diverse organizations. Leveraging communication networks. Effective interviewing. GE credit: SS, WE. Effective: 2018 Spring Quarter.

CMN 003Y—Interpersonal Communication Competence (4)

Web Virtual Lecture—2 hour(s); Discussion—2 hour(s). Communication competence in professional settings. Managing face-to-face and virtual teams. Leadership, conflict management and negotiation skills. Communication in diverse organizations. Leveraging communication networks. Effective interviewing. GE credit: SS, WE. Effective: 2018 Spring Quarter.

CMN 005—Global English & Communication (4)

Lecture—2 hour(s); Discussion—2 hour(s). English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as LIN 005.) GE credit: AH, OL, SS, WC. Effective: 2012 Spring Quarter.

CMN 010V—Introduction to Communication (4)

Web Virtual Lecture—3 hour(s); Web Electronic Discussion—1 hour(s). Basic principles of communication and communication processes; models of communication; foundations of empirical research in communication; contexts of communication and communication research, including interpersonal, intercultural, news, entertainment, mediated, and others. Not open for credit to students who have taken CMN 010Y. GE credit: SS. Effective: 2016 Fall Quarter.

CMN 010Y—Introduction to Communication (4)

Web Virtual Lecture—3 hour(s); Discussion—1 hour(s). Basic principles of communication and communication processes; models of communication; foundations of empirical research in communication; contexts of communication and communication research including interpersonal, intercultural, news, entertainment, mediated, and others. Not open for credit to students who have taken CMN 010V. GE credit: SS. Effective: 2017 Winter Quarter.

CMN 012Y—Data Visualization in the Social Sciences (4)

Lecture—2 hour(s); Laboratory—1.5 hour(s); Web Virtual Lecture—1.5 hour(s). Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as SOC 012Y, POL 012Y, PSC 012Y.) GE credit: QL, VL. Effective: 2016 Spring Quarter.

CMN 076—Video Games & Virtual Environments (4)

Lecture—3 hour(s); Discussion—1 hour(s). Impact of video games on players and society. Topics include motivations for playing games; cognitive, emotional, and behavioral effects, including violence and addiction; interpersonal and group processes in online games; virtual communities; and video games for education. GE credit: SS, VL. Effective: 2015 Winter Quarter.

CMN 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CMN 101—Communication Theories (4)

Lecture—3 hour(s); Discussion—1 hour(s). Forms, functions, development, and testing of communication theory, with emphasis on social scientific approaches. Survey and comparison of significant micro and macro theories and models of face-to-face and mediated communication. Application of theories to real-world problems. Not open for credit to students who have taken CMN 101Y. GE credit: SS. Effective: 2018 Fall Quarter.

CMN 101Y—Communication Theories (4)

Web Virtual Lecture—3 hour(s); Discussion—1 hour(s). Forms, functions, development, and testing of communication theory, with emphasis on social scientific approaches. Survey and comparison of significant micro and macro theories and models of face-to-face and mediated communication. Application of theories to real-world problems. Not open for credit to students who have taken CMN 101. GE credit: SS. Effective: 2018 Fall Quarter.

CMN 102—Empirical Methods in Communication (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): STA 013 or STA 013Y; Or equivalent of STA 013. Social scientific research methods employed in Communication. Topics include research design, measurement, sampling, questionnaire construction, survey research, experimental design, content analysis and qualitative field methods. GE credit: SS. Effective: 2018 Winter Quarter.

CMN 110—Communication Networks (4)

Lecture/Discussion—3 hour(s); Discussion/Laboratory—1 hour(s). Theoretical approaches to communication networks, practical applications of network studies, and network analysis tools. Friendship, political discussion, social support, organizational, social media, and disease transmission networks are examined. Impact of emerging technologies on network creation, maintenance, and expansion. GE credit: SS. Effective: 2017 Fall Quarter.

CMN 111—Gender Differences in Communication (4)

Lecture—4 hour(s). Pass One open to Communication majors only. Examination of communication differences between men and women as sources of male/female stereotypes, misunderstandings, dilemmas, and difficulties (real and imagined). Treatment of genders as cultures. Topics include male/female differences in discursive practices and patterns, language attitudes, and relationship dynamics. Not open for credit to students who have taken CMN 103. GE credit: DD, SS. Effective: 2015 Fall Quarter.

CMN 112—Theories of Persuasion (4)

Lecture/Discussion—4 hour(s). Pass One open to Communication majors only. Theories and models of persuasion that account for the effects of source, channel and audience factors on message recipients. Examination of message strategies for altering attitudes and gaining compliance. Contexts of application include interpersonal relationships, advertising, politics, and health. Not open for credit to students who have taken CMN 152. GE credit: SS. Effective: 2015 Fall Quarter.

CMN 114—Communication & Cognition (4)

Lecture/Discussion—4 hour(s). Pass One open to Communication majors only. Relationship between communication and cognition in interpersonal and mediated contexts. Discourse comprehension and production, impact of language attitudes on social judgments, the effects of information processing on decision making. Not open for credit to students who have completed CMN 138. GE credit: SS, WE. Effective: 2018 Winter Quarter.

CMN 120—Interpersonal Communication (4)

Lecture—4 hour(s). Pass One open to Communication majors only. Theories and principles of interpersonal communication related to perception, verbal and nonverbal channels, mutual understanding, and relationship development. Communication processes in face-to-face and technologically-mediated encounters. Consideration of different relationship contexts, including friendships, dating and family relationships, and the workplace. Not open for credit to students who have completed CMN 134. GE credit: SS. Effective: 2016 Winter Quarter.

CMN 121—Language Use in Conversation (4)

Lecture/Discussion—4 hour(s). Pass One open to Communication majors only. Examination of how people use language in social interaction, how they exchange meaning during conversation, and how their use of language plays a central role in turn-taking, speech acts, attitude formation, figurative speech, politeness, and other aspects of conversation. Not open for credit to students who have taken CMN 105. GE credit: SS. Effective: 2016 Spring Quarter.

CMN 122—Nonverbal Communication (4)

Lecture—4 hour(s). Pass One open to Communication majors only. Examination of the interaction between nonverbal communication and verbal communication channels in influencing outcomes in interpersonal relationships. Underlying functions served by nonverbal communication are considered. Not open for credit to students who have completed CMN 135. GE credit: SS. Effective: 2015 Fall Quarter.

CMN 123—Intercultural Communication (4)

Seminar—3 hour(s); Term Paper. Major concepts and theories of intercultural communication. Topics include cultural similarities and differences in verbal and nonverbal communication; dimensions of cultural variations, barriers to intercultural communication, and intercultural communication competence. Not open for credit to students who have taken CMN 137. GE credit: DD, SS. Effective: 2016 Winter Quarter.

CMN 124—Family Communication (4)

Lecture/Discussion—4 hour(s). Theories and research on family communication. Communication in courtship, marriage, and relational dissolution. Processes and outcomes of parent-child, sibling, family roles, and inter-generational communication. Interaction patterns associated with marital/family satisfaction, maintenance, divorce, and dysfunction. Cultural influences on family communication. GE credit: SS. Effective: 2017 Fall Quarter.

CMN 130—Group Communication (4)

Lecture—3 hour(s); Discussion—1 hour(s). Communication processes in the development and maintenance of effective groups and teams in organizations. Examination of both face-to-face and computer-mediated group interaction. Topics include group development, power, norms, cohesion, decision making, problem solving, creativity, conflict management, working remotely, and leadership. GE credit: SS. Effective: 2014 Fall Quarter.

CMN 131—Strategic Communication in Public Relations (4)

Lecture/Discussion—4 hour(s). Principles, evolution, and professional practice of public relations. Planning and execution of effective, ethical communication strategies and campaigns. Distribution of messages through traditional and new media, including social media. Cultivation of relationships between organizations and their publics. Crisis communication management. GE credit: SS, WE. Effective: 2018 Fall Quarter.

CMN 132—Social Media for Public Relations (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CMN 131. Uses of social media technologies in contemporary public relations practice. Social and behavioral theories of social media processes and effects. Strategies and tools for authoring content that builds relationships and creates conversations with key publics. GE credit: SS. Effective: 2016 Fall Quarter.

CMN 136—Organizational Communication (4)

Lecture—4 hour(s). Pass One open to Communication majors only. Organizational communication theory and practice is examined with an emphasis on the use of effective communication strategies for achieving organizational goals. GE credit: SS. Effective: 2016 Spring Quarter.

CMN 139—Advanced Organizational Communication (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): CMN 136. Pass One open to Communication majors only. Communication processes within and among social organizations. Examines formal organizations as information processing systems. Topics include general systems theory, input-output analysis, structural-functionalism, cybernetics, organizational network analysis, organization environments, organizations as cultures, organizational learning, information technologies, and communication diagnostic/auditing strategies. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 140—Introduction to Mass Communication (4)

Lecture—3 hour(s); Discussion—1 hour(s). History of mass media and media research traditions. Organization and economics of the media industry. Media policy, law, regulation and ethics. Impact of the media on individuals and society. Traditional, new and emerging communication technologies. GE credit: SS. Effective: 2017 Fall Quarter.

CMN 141—Media Effects: Theory & Research (4)

Lecture/Discussion—4 hour(s). Pass One open to Communication majors only. Social scientific studies of the effects of mass media messages on audience members' actions, attitudes, beliefs, and emotions. Topics include the cognitive processing of media messages, television violence, political socialization, cultivation of beliefs, agenda-setting, and the impact of new technologies. GE credit: SS. Effective: 2018 Winter Quarter.

CMN 142—Newsmaking (4)

Lecture/Discussion—4 hour(s). Pass One open to Communication majors only. The making of news. How journalists construct news and how consumers and newsmakers use it. Effects of news, technology's challenges to journalism, and the relationship of news to other institutions. GE credit: ACGH, SS. Effective: 2018 Winter Quarter.

CMN 143—Analysis of Media Messages (4)

Lecture/Discussion—3 hour(s); Term Paper. Pass One open to Communication majors only. Examination of alternative approaches to the analysis, interpretation, and evaluation of media messages, including those disseminated through broadcasting, print, and new technologies. GE credit: ACGH, SS, WE. Effective: 2018 Winter Quarter.

CMN 144—Media Entertainment (4)

Lecture/Discussion—3 hour(s); Term Paper. Pass One open to Communication majors only. Effects and appeal of media entertainment, emphasizing emotional reactions. Topics include key concepts of entertainment research such as mood management, and the respective features and emotional/social-psychological effects of genres such as comedy, mystery, thriller, sports, music, horror, and erotica. GE credit: SS, WE. Effective: 2017 Spring Quarter.

CMN 145—Political Communication (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Pass One open to Communication majors only. Relationships among the mass media, citizens, and politics, production of political news, campaign strategies, and citizens' attitudes and behaviors. Frameworks for mediated politics, the news, and elite discourse and campaign messages. GE credit: ACGH, SS, WE. Effective: 2018 Winter Quarter.

CMN 146—Communication Campaigns (4)

Lecture/Discussion—4 hour(s); Term Paper. Pass One open to Communication majors only. Strategic uses of media and interpersonal communication channels in health, environmental advocacy, and political campaigns. Emphasis on general principles relevant to most campaign types, including public information, social marketing, and media advocacy campaigns. GE credit: SS. Effective: 2016 Fall Quarter.

CMN 147—Children, Adolescents, & the Media (4)

Lecture/Discussion—4 hour(s). Open to Communication majors only on Pass 1. Research on the adaptive and maladaptive effects of media (e.g., television, movies, video games, social media) on the social, emotional, cognitive, and physical development of youth, considering the protective role of parents, teachers, ethics, and policy. GE credit: SS. Effective: 2016 Fall Quarter.

CMN 148—Contemporary Trends In Media (4)

Lecture/Discussion—4 hour(s). Pass One open to Communication majors only. Global trends in media, including media and globalization, impacts of the new media economy, media and security, and effects of ownership on media content and culture. GE credit: OL, SS, WC. Effective: 2017 Spring Quarter.

CMN 149—Race & Media (4)

Lecture/Discussion—4 hour(s). Examines how race and ethnicity as social categories are shaped by mass media. Focuses on the impact of race and ethnicity role portrayals in content and style of news, television and cinema. GE credit: DD, SS. Effective: 2019 Fall Quarter.

CMN 150V—Computational Social Science (4)

Web Virtual Lecture—2 hour(s); Web Electronic Discussion—2 hour(s). Nontechnical survey of modern computational research methods. Web scraping, artificial intelligence, visualizing social networks, and computer simulations. Hands-on use of diverse software applications. Professors from all ten UC campuses contribute. GE credit: QL, SS. Effective: 2017 Winter Quarter.

CMN 151—Simulating Communication Processes (4)

Lecture/Discussion—3 hour(s); Term Paper. Simulations of communication and sociality using agent-based models. Focus on strategic behavior, cooperation, coordination, self-organization, information diffusion, and other communication phenomena. No programming skills assumed. GE credit: QL, SS, WE. Effective: 2018 Fall Quarter.

CMN 152V—Social Science with Online Data (4)

Extensive Problem Solving; Web Virtual Lecture—1 hour(s); Web Electronic Discussion—1.5 hour(s). Prerequisite(s): Programming experience helpful, but not required. Survey of web-driven social science and its methods. Focus on web scraping and social media API's. Covers wrangling and analysis of data from social networks, online experiments, and other digital traces. Python programming skills helpful, but not assumed. GE credit: QL, SL, SS. Effective: 2019 Fall Quarter.

CMN 161—Health Communication (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Health communication theories and research. Health literacy, social support and coping, doctor-patient interaction, health communication campaigns, media influences on health, and applications of new technologies in health promotion. GE credit: SS, WE. Effective: 2017 Fall Quarter.

CMN 165—Media & Health (4)

Lecture/Discussion—4 hour(s). Content and effects of health messages in the media. Topics include health news reporting; portrayals of disease, disability, death and health-related behaviors; promotion of drugs and other health products; and tobacco and alcohol advertising. GE credit: SS, WE. Effective: 2018 Winter Quarter.

CMN 170—Digital Technology & Social Change (4)

Lecture/Discussion—4 hour(s). Conceptual understanding of how digital communication technologies transform our lives through social media, mobile connectivity, globalization, and big data. Contexts include education, health, entrepreneurship, democracy, and poverty. Not open for credit to students who have completed CMN 170V. GE credit: SS. Effective: 2016 Spring Quarter.

CMN 170V—Digital Technology & Social Change (4)

Web Virtual Lecture—3 hour(s); Web Electronic Discussion—1 hour(s). Conceptual understanding of how digital technologies transform our lives, through social media, mobile connectivity, globalization, big data, and artificial intelligence. Context includes education, health, entrepreneurship, democracy, among others. Not open for credit to students who have completed CMN 170. GE credit: SS. Effective: 2016 Winter Quarter.

CMN 172—Interpersonal Technologies (4)

Lecture—3 hour(s); Discussion—1 hour(s). Pass One open to Communication majors only. Theories and research findings on how people use technologies for interpersonal and relational purposes, including impression formation, self-presentation, deception, anonymity, friendship maintenance, online dating, and emotional expression. GE credit: SS. Effective: 2017 Fall Quarter.

CMN 174—Social Media (4)

Lecture/Discussion—4 hour(s). Application of communication theories to the study and design of social media. Examination of social media in contexts such as political activism and collaboration. Topics include online credibility, participatory culture, viral media and privacy. GE credit: ACGH, SS, WE. Effective: 2018 Spring Quarter.

CMN 176—Video Games Theory & Research (4)

Lecture/Discussion—2 hour(s); Discussion/Laboratory—2 hour(s). Communication theory and research on the uses and effects of video games. Research methods available for investigating game use and the impact of games on behavior. Application of those methods in a research project. GE credit: SS. Effective: 2018 Winter Quarter.

CMN 178—Persuasive Technologies (4)

Lecture/Discussion—3 hour(s); Term Paper. Designing and testing ethical, technology-based communication interventions in the domains of health, marketing, education, and environment. Social media, mobile apps, wearable devices, recommendation systems, serious games, and augmented reality. GE credit: SS, WE. Effective: 2017 Fall Quarter.

CMN 180—Current Topics in Communication (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CMN 101; CMN 102; Or a research methods course equivalent to CMN 102. Pass One open to Communication majors only. Group study of a special topic in communication. May be repeated up to 1 time(s) when topic differs. GE credit: SS. Effective: 2011 Fall Quarter.

CMN 189A—Proseminar in Social Interaction (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): CMN 101; CMN 102; CMN 136; and Consent of Instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in the specialty of social interaction. Potential topics include relationship initiation, maintenance, and deterioration; communication failure; nonverbal communication; conversational management; semantics and pragmatics of languages; and family/marital communication. May be repeated for credit when topic differs. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 189B—Proseminar in Mass Communication (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): CMN 101; CMN 102; CMN 140; and Consent of Instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in the specialty of mass communication. Potential topics include, agenda-setting, the cultivation of beliefs, television violence, media portrayals of underprivileged groups, mediated political discourse, interactive technologies, and international/global communications. May be repeated for credit when topic differs. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 189C—Proseminar in Health Communication (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): CMN 101; CMN 102; (CMN 161 or CMN 165); and Consent of Instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in health communication. Potential topics include health communication design and evaluation, media advocacy, physician-patient interaction, uses of communication technologies in health settings, and health-related advertising. May be repeated for credit when topic differs. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 189D—Proseminar in Organizational Communication (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): CMN 101; CMN 102; CMN 136; and Consent of Instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in the specialty of organizational communication. Potential topics include organizational networks, organizational conflict and its resolution, mediation, bargaining and negotiation, superior-subordinate interaction, leadership styles, and inter-organizational communication. May be repeated for credit when topic differs. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 189E—Proseminar in Information & Communication Technologies (4)

Discussion—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Reading, discussion, research and writing on a selected topic in information and communication technologies. Potential topics include the role played by digital technologies in social change, serious games for change, and virtual and offline worlds. May be repeated up to 2 time(s) when topic differs. GE credit: SS. Effective: 2018 Fall Quarter.

CMN 192—Internship in Communication (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Communication majors who have completed 20 units of upper division communication courses. Open to Communication majors only. Supervised work experience requiring the application of communication principles and strategies or the evaluation of communication practices in a professional setting. Relevant experiences include public relations, advertising, sales, human resources, health promotion, political campaigns, journalism, and broadcasting. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

CMN 194H—Senior Honors Thesis (4)

Seminar—1 hour(s); Project (Term Project)—3 hour(s). Prerequisite(s): Senior standing and approval by Honors Committee. Directed reading, research, and writing culminating in the preparation of honors thesis under direction of faculty advisor. GE credit: SS, WE. Effective: 1997 Winter Quarter.

CMN 197T—Tutoring in Communication (2-4)

Seminar—1-2 hour(s); Laboratory—1-2 hour(s). Prerequisite(s): Upper division standing with major in Communication and consent of Department Chairperson. Tutoring in undergraduate Communication courses, including leadership of discussion groups affiliated with departmental courses. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Fall Quarter.

CMN 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CMN 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

CMN 201—Theoretical Perspectives on Communication (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing in Communication. Open to Communication graduate students only. Social scientific study of Communication. Research on interpersonal, organizational, mass, political, and health communication; communication technologies (e.g., video games, social media, persuasive technologies); and communication network analysis. Effective: 2017 Fall Quarter.

CMN 202—Communication Theory Construction (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Alternative meta-theoretical perspectives for theory generation in communication inquiry. Processes of construct explication, operationalization and theory construction. Emphasis on the critique of extant communication theories and the development of theory construction skills. Effective: 2006 Winter Quarter.

CMN 203—Scientific Methods for Communication (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): CMN 201; CMN 202; PSC 204A; PSC 204B; Or equivalents. Social scientific research methods commonly employed in Communication. Topics include research design measurement sampling questionnaire construction survey research experimental design evaluation research content analysis and qualitative field methods. Effective: 2014 Winter Quarter.

CMN 204—Biological Foundations of Communication (4)

Lecture/Discussion—3 hour(s); Term Paper. Communibiological, evolutionary, neuroscience, and neurophysiological perspectives on communication. Methodologies for examining human physiological responses to messages, such as heart rate, skin conductance, electromyography, and cortical activity. Effective: 2017 Fall Quarter.

CMN 210—Experimental Methods & Analysis in Communication (4)

Lecture—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing; one course in inferential statistics. Experimental designs in communication. Topics include: causation; threats to validity; conceptualization, operationalization, and measurement; hypothesis testing; ethics; data analysis software focusing on the analysis of variance and planned contrasts; and the practical and effective implementation and writing of experiments. Effective: 2010 Fall Quarter.

CMN 211—Survey Research Methods in Communication (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing; one course in inferential statistics. Methods for designing personal interview, phone, mail, and web-based surveys in communication. Topics include: sampling strategies, sources of error and bias in survey designs, questionnaire construction, cognitive interviewing, interviewer behavior, and analysis of complex survey data using standard software packages. Effective: 2011 Winter Quarter.

CMN 212—Web Science Research Methods (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Applications of data science to web-based communication research. Design, implementation, analysis, and reporting of studies using online data. Use of Python to scrape, organize, analyze, and visualize web data. Effective: 2018 Spring Quarter.

CMN 213—Simulation Methods in Communication Research (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Simulation methods for modeling human communication. Single and multiple agent approaches to developing process theories of cooperation, coordination, strategic behavior, information and innovation diffusion, and other aspects of sociality. Effective: 2018 Fall Quarter.

CMN 214—Analysis of Communication Networks (4)

Lecture/Discussion—3 hour(s); Term Paper. Theoretical and analytic issues pertaining to network perspectives on communicating and organizing. Consideration of structural and dynamic features of communication networks. Introduction to network analysis software and various analysis techniques. Effective: 2018 Fall Quarter.

CMN 220—Persuasion Theories & Message Design (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Major social scientific theories and perspectives on attitude change and persuasion. Application of persuasion theories and principles to persuasive message design in applied contexts. Effective: 2005 Fall Quarter.

CMN 221—Communication & Cognition (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Explores the cognitive structures and processes that enable the production, comprehension and interpretation of messages in face-to-face and mediated communication contexts. Explores the communication outcomes associated with these processes. Effective: 2005 Fall Quarter.

CMN 222—Risk Communication (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Theories and models of individual risk information processing. Media depictions of threats and risk-related information and their potential effects on audiences. Implications for the design and implementation of messages concerning threat and risk. Effective: 2005 Fall Quarter.

CMN 230—Social Interaction Theory & Research (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Survey of theories and research on social interaction and interpersonal communication. Covers communication codes, individual differences in communication, communication and relationship development, family communication, conflict, cognitive and emotional processes underlying social interaction, social influence, intercultural communication, and nonverbal behavior. Effective: 2005 Fall Quarter.

CMN 231—Tactics of Interpersonal Influence (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Achievement of interpersonal goals in social interaction. Topics include message production; tactics, strategies and planning; anticipating potential obstacles; resisting and thwarting goals; plan recognition; and goal detection. Examined goals include compliance gaining, attitude change, ingratiation, information seeking, comforting, and deception. Effective: 2005 Fall Quarter.

CMN 232—Health Communication (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Health communication theories and research traditions. Topics include consumer health information seeking; physician-patient interaction; information, social marketing, “edutainment,” and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery. (Same course as SPH 232.) Effective: 2011 Fall Quarter.

CMN 233—Persuasive Technologies for Health (4)

Lecture/Discussion—3 hour(s); Term Paper. Theorizing, designing and evaluating ethical technology-based health communication interventions. Uses of social media, mobile communication apps, wearable devices, computer-generated tailored messages, educational games, and computational approaches in health promotion and healthcare delivery. (Same course as SPH 233.) Effective: 2017 Fall Quarter.

CMN 234—Intercultural Communication (4)

Seminar—3 hour(s); Term Paper. Restricted to graduate standing. Theories and research on intercultural communication. Topics include national, racial, and ethnic similarities and differences in communication practices; cultural beliefs and values; identity and conflict; and technological influences on intercultural communication. Methodological issues in intercultural communication research are also examined. Effective: 2016 Spring Quarter.

CMN 235—Health Communication Campaigns (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Principles of health communication campaign planning, implementation and evaluation. Strategies for changing health behaviors, shaping policy, and improving healthcare organizations' relations with stakeholders. (Same course as SPH 235.) Effective: 2017 Fall Quarter.

CMN 243—Media & Health (4)

Seminar—3 hour(s); Term Paper. Restricted to graduate standing. Survey of research on media and health. Topics include health news coverage; depictions of health, illness and disability in entertainment; health campaigns; advertising of health products and services; and the influence of gaming and other new media on health behaviors. Effective: 2010 Fall Quarter.

CMN 244—Organizational Communication (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Theory and research on communication processes in organizations. Effective: 1997 Winter Quarter.

CMN 250—Mediated Communication Theory & Research (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Survey of major theories on the intended and unintended effects of mediated communication. Topics include media's effects on learning, political behavior, interpersonal violence, sexual socialization, consumer behavior, race relations, gender socialization, and cultural processes. Effective: 2005 Fall Quarter.

CMN 251—Digital Technology & Social Change (4)

Seminar—3 hour(s); Term Paper. Conceptual, theoretical, and international consideration of how digital communication technologies transform social organization and development. Topics include social media, big data, political revolutions, e-democracy, digital divide, e-education, e-health, entrepreneurship, public policies, poverty reduction, technological innovations, microfinance, and entertainment. Not open to students who have taken CMN 251Y. Effective: 2017 Spring Quarter.

CMN 251Y—Digital Technology & Social Change (4)

Web Virtual Lecture—2 hour(s); Discussion—2 hour(s). Discussion and research on how digital technologies transform our lives through social media, mobility, big data, global connectivity, and artificial intelligence; changing business, health, democracy, globalization, families, dating, and education. Not open to students who have taken CMN 251. Effective: 2017 Fall Quarter.

CMN 252—Computer-Mediated Communication (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Effective: 2005 Fall Quarter.

CMN 253—Children, Adolescents, & the Media (4)

Lecture/Discussion—3 hour(s); Term Paper. Theory and research on the uses and effects of traditional and new media on children and adolescents, emphasizing social, emotional, cognitive, and physical development. Methodological approaches and ethical issues in studies of underage populations. Parent and family mediation of effects. Effective: 2017 Winter Quarter.

CMN 254—Communication Campaigns (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Strategic uses of media and interpersonal channels to promote social change through social marketing, information, and media advocacy campaigns. Focus on theory-based interventions in a variety of applied contexts. Effective: 2005 Fall Quarter.

CMN 255—Social Media (4)

Seminar—3 hour(s); Term Paper. Theoretical, conceptual and analytic issues pertaining to social media research. Topics include motivation, participation, virality, and social-technical capital. Examination of social media in various contexts. Introduction to online behavioral data collection and analysis methods. Effective: 2014 Fall Quarter.

CMN 256—Communication Perspective on Video Games (4)

Seminar—3 hour(s); Term Paper. Review of theory and research on the uses and effects of video games and virtual environments developed for entertainment and education. Study of the research methods available for documenting and measuring game use and effects on behavior. Effective: 2014 Fall Quarter.

CMN 259—Cognitive Approaches to Media (4)

Seminar—3 hour(s); Term Paper. Restricted to graduate standing. Interdisciplinary examination of cognitive approaches to mediated communication. Application of studies on mediated message processing, cognitive and emotional information processing, psychophysiology, and neuroscience to mass communication. Review of media research and methods on attention, memory, motivation, and limited capacity. Effective: 2014 Fall Quarter.

CMN 260—Political Communication (4)

Lecture/Discussion—3 hour(s); Term Paper. Theories and research on the connections between media, politics, and citizens in the digital age. Critical framework for understanding the nature of mediated politics by assessing inter-relationships between production of news, political elites' campaign strategies, and behaviors of citizens. Effective: 2017 Winter Quarter.

CMN 270—Diffusion of Innovations (4)

Seminar—3 hour(s); Term Paper. Communication processes by which information and innovations spread through social systems. Models of diffusion, including spatial, network, time dependent, semantic and cognitive frameworks. Impact of communication technologies on diffusion. Practical application of diffusion models in a variety of contexts. Effective: 2015 Spring Quarter.

CMN 275Y—Computational Social Science (4)

Web Virtual Lecture—1.5 hour(s); Discussion—2 hour(s); Term Paper. Survey of modern computational research methods. Big data, social network analysis, machine learning, Agent-based computer simulations. Online lectures are taught by faculty from all 10 UC campuses. Local face-to-face discussion section. Only 2 units of credit to students who have taken CMN 150V. Effective: 2019 Fall Quarter.

CMN 280—Special Topics in Social Interaction (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Reading, discussion, research, and writing on a selected topic in the specialty of social interaction. May be repeated for credit when topic differs. Effective: 2005 Fall Quarter.

CMN 281—Special Topics in Mediated Communication (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Reading, discussion, research, and writing on a selected topic in the specialty of mediated communication. May be repeated for credit when topic differs. Effective: 2005 Fall Quarter.

CMN 282—Special Topics in Health Communication (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Reading, discussion, research and writing on a focused topic in health communication. May be repeated for credit when topic differs. Effective: 2016 Fall Quarter.

CMN 283—Special Topics in Organizational Communication (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Reading, discussion, research, and writing on a selected topic in the specialty of organizational communication. May be repeated for credit when topics differ. Effective: 2005 Fall Quarter.

CMN 284—Special Topics in Political Communication (4)

Lecture/Discussion—4 hour(s). Reading, discussion, research, and writing on a selected topic in the specialty of political communication. May be repeated up to 4 time(s) when topic differs. Effective: 2018 Fall Quarter.

CMN 298—Group Study (1-5)

Lecture—3 hour(s). (S/U grading only.) Effective: 1997 Winter Quarter.

CMN 299—Individual Study (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

CMN 299R—Thesis/Dissertation Research & Writing (1-12)

Independent Study—3-36 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing in Communication. Students in the Department of Communication graduate programs conduct dissertation research and writing under the supervision of a faculty member. May be repeated up to 21 time(s) as across campus, students use 299 courses to reach the 12-unit requirement for full time student status; in saying students may repeat 21 times, we assume students complete their doctoral programs within seven years (five is the norm); the value 21 is based on the calculation 3 quarters x 7 years. (S/U grading only.) Effective: 2017 Winter Quarter.

CMN 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

CNS—Consumer Sciences

Courses in CNS:

Questions pertaining to the following courses should be directed to the Food Science Advising office in 1204 RMI South.

CNS 092—Internship in Consumer Science (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Internship on and off campus in a consumer science related area. (P/NP grading only.) Effective: 1997 Winter Quarter.

CNS 100—Consumer Behavior (3)

Lecture—3 hour(s). Prerequisite(s): Preparation in areas of psychology or sociology and economics recommended. Provides a set of behavioral concepts and theories useful in understanding consumer behavior on the part of the individual, business, and social organizations. Conceptual models to help guide and understand consumer research will be presented. GE credit: SS, WE. Effective: 1997 Winter Quarter.

CNS 192—Internship in Consumer Science (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units. Internship on and off campus in a consumer science related area (P/NP grading only.) Effective: 1997 Winter Quarter.

CNS 198—Directed Group Study (1-5)

(P/NP grading only.) Effective: 1997 Winter Quarter.

CNS 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

CNS 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

CNS 396—Teaching Assistant Training Practicum (1-4)

Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM—Comparative Literature

Courses in COM:

Note. Many courses in Comparative Literature require that students have met the [Entry Level Writing Requirement \(ELWR\)](#) for the University of California.

COM 001—Major Works of the Ancient World (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction, through class discussion and frequent written assignments, to some of the major works of the ancient world (up to 5th century CE) such as *The Odyssey*, the Bible, Augustine's *Confessions*, and works by Plato and Confucius. Examined genres include religious texts, the epic, philosophy, drama, poetry. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.

COM 002—Major Works of the Medieval & Early Modern World (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction, through class discussion and frequent written assignments, to some of the major works of the medieval and early modern worlds (6th century to the mid-17th century) such as Dante's *Comedy*, *1001 Nights*, *The Tale of Genji*, and Elizabethan/Jacobean plays. Examined genres include framed narratives, courtly literature, and early modern drama. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.

COM 003—Major Works of the Modern World (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction, through class discussion and frequent written assignments, to some of the major works of the modern world (mid-17th to the mid-20th centuries) such as those by Dostoevsky, Tolstoy, Flaubert, Woolf, Lu Xun, Borges and Yeats. Examined genres include realist fiction, modernist fiction, and modernist poetry. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.

COM 004—Major Works of the Contemporary World (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Comparative study of selected major Western and non-Western texts composed in the period from 1945 to the present. Intensive focus on writing about these texts, with frequent papers written about these works. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

COM 005—Fairy Tales, Fables, & Parables (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to fairy tales, fables, and parables as recurrent forms in literature, with such readings as tales from Aesop & Grimm, Chaucer & Shakespeare, Kafka & Borges, Buddhist & Taoist parables, the *Arabian Nights*, and African American folklore. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 006—Myths & Legends (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to the comparative study of myths and legends, with readings selected from Near Eastern, Teutonic, Celtic, Indian, Japanese, Chinese, African and Native American literary sources. GE credit: AH, WC, WE. Effective: 2019 Winter Quarter.

COM 007—Literature of Fantasy & the Supernatural (4)

Lecture—3 hour(s); Discussion—1 hour(s). Role of fantasy and the supernatural in literature: tales of magic, hallucination, ghosts, and metamorphosis, including diverse authors such as Shakespeare, P'u Sung-Ling, Kafka, Kawabata, Fuentes, and Morrison. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 008—Utopias & Their Transformations (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Consideration, in literary works from different ages, of visionary and rational perceptions of a lost paradise, Golden Age, or Atlantis—and of the inhuman nightmares that can result from perversions of the utopian dream of perfection. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 009—The Short Story & Novella (4)

Lecture/Discussion—3 hour(s); Term Paper. Introduction to shorter forms of prose fiction by major authors of different countries, with special emphasis on the modern period. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 010A—Master Authors in World Literature: Gilgamesh, Ramayana, Beowulf, Nibelungenlied (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Gilgamesh, Ramayana, Beowulf, Nibelungenlied. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010B—Master Authors in World Literature: Metamorphoses, Decameron, Arabian Nights, Canterbury Tales (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Metamorphoses, Decameron, Arabian Nights, Canterbury Tales. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010C—Master Authors in World Literature: Chanson de Roland, El Cid, Igor's Campaign, Morte D'Arthur (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Chanson de Roland, El Cid, Igor's Campaign, Morte D'Arthur. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010D—Master Authors in World Literature: Sakuntala, Tristan & Isolde, Aucassin and Nicolette, Gawain & the Green Knight (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Sakuntala, Tristan and Isolde, Aucassin and Nicolette, Gawain and the Green Knight. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010E—Master Authors in World Literature: Swift, Rabelais, La Celestina, Simplicissimus (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Swift, Rabelais, La Celestina, Simplicissimus. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010F—Master Authors in World Literature: Cervantes, Saikaku, Fielding, Voltaire (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Cervantes, Saikaku, Fielding, Voltaire. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010G—Master Authors in World Literature: Machiavelli, Shakespeare, Lope de Vega/Calderón, Molière/Racine, Lessing/Schiller (2) (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Machiavelli, Shakespeare, Lope de Vega/Calderón, Molière/Racine, Lessing/Schiller. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010H—Master Authors in World Literature: Goethe, Byron, Stendhal, Pushkin, Lermontov (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Goethe, Byron, Stendhal, Pushkin, Lermontov. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010I—Master Authors in World Literature: Hoffmann, Gogol, Poe, Hawthorne, Maupassant, Chekhov, Melville (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Hoffmann, Gogol, Poe, Hawthorne, Maupassant, Chekhov, Melville. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010J—Master Authors in World Literature: Flaubert, Twain, Turgenev, Galdós, Ibsen (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Flaubert, Twain, Turgenev, Galdós, Ibsen. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010K—Master Authors in World Literature: Balzac, Dostoevski/Tolstoi, Hardy, Shaw, Strindberg (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Balzac, Dostoevski/Tolstoi, Hardy, Shaw, Strindberg. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010L—Master Authors in World Literature: Unamuno, Svevo, Conrad, Gide, Kafka, Faulkner (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Unamuno, Svevo, Conrad, Gide, Kafka, Faulkner. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010M—Master Authors in World Literature: Rilke/Yeats, Joyce/Woolf, Mann/Céline, Bulgakov/Tanizaki, O'Neill/Brecht, Lorca/Pirandello (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Rilke/Yeats, Joyce/Woolf, Mann/Céline, Bulgakov/Tanizaki, O'Neill/Brecht, Lorca/Pirandello. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 010N—Master Authors in World Literature: Camus/Sartre, García Márquez/Grass, Borges/Sarraute, Bellow/Nabokov, Beckett/Pinter, Genet/Dürrenmatt (2)

Lecture/Discussion—1 hour(s). Limited enrollment. Designed primarily to acquaint the non-literature major with a cross-section of writings by the world's most important authors; readings in English translation. Content alternates among the following segments: Camus/Sartre, García Márquez/Grass, Borges/Sarraute, Bellow/Nabokov, Beckett/Pinter, Genet/Dürrenmatt. May be repeated for credit in different subject area. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 011—Travel & the Modern World (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Examination of travel as a quintessential human activity and experience of global modernity and cross-cultural encounters from the 18th to the 21st century with an emphasis on German-speaking culture. Travelogues, literature, art, memoirs, and films in English translation. (Same course as GER 011.) GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

COM 012—Introduction to Women Writers (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Survey of fiction, drama, and poetry by women writers from all continents. Concerns of women compared in light of their varied social and cultural traditions. Literary analysis of voice, imagery, narrative strategies and diction. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 013—Dramatic Literature (3)

Lecture—3 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction, through careful reading of selected plays, to some of the major forms of Western drama, from the earliest tragedies of ancient Greece to the contemporary American theater. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 014—Introduction to Poetry (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Comparative study of poetry in a variety of lyric and other poetic forms from different historical periods and different linguistic, national, and cultural traditions. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 020—Humans & the Natural World (4)

Lecture/Discussion—3 hour(s); Term Paper. Changing relationship between humans and the natural environment in ancient and modern authors as Virgil, Li Po, Basho, Darwin, and Thoreau. GE credit: AH, WC, WE. Effective: 2007 Fall Quarter.

COM 022—Literature of the Abnormal Psyche (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Representations of the human psyche in literature and other media (film, visual arts, music) spanning cultures and historical contexts. Depictions of abnormal psychological states, including madness, obsession, and self-fragmentation. Textual interpretation informed by psychological theories. Rhetorical persuasion and nuanced argumentation. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

COM 024—Animals in Literature (4)

Lecture—3 hour(s); Term Paper/Discussion. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Study of literary texts from various periods and cultures whose theme is the representation of animals. GE credit: AH, WC, WE. Effective: 2012 Fall Quarter.

COM 025—Ethnic Minority Writers in World Literature (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Consideration of a broad range of writers who speak from an ethnic perspective different from the nominally or politically dominant culture of their respective countries and who explore the challenges faced by characters significantly affected by their ethnic minority status. GE credit: AH, WC, WE. Effective: 2011 Winter Quarter.

COM 053A—Literature of East Asia (4)

Lecture—3 hour(s); Term Paper. Introduction to representative masterpieces of East Asia with readings from such works as *The Story of the Stone*, *The Peach Blossom Fan*, T'ang and Sung poetry, classical Japanese poetry, drama, and travel diaries, and *The Tale of Genji*. GE credit: AH, OL, WC, WE. Effective: 2015 Spring Quarter.

COM 053B—Literature of South Asia (4)

Lecture—3 hour(s); Term Paper. Introduction to representative masterpieces of South Asia with readings from such works as the *Mahabharata* and *Ramayana*, *The Cloud Messenger*, *Shakuntala*, *The Little Clay Cart*, and the stories and poems of both ancient and modern India and Southeast Asia. GE credit: AH, OL, WC, WE. Effective: 2015 Spring Quarter.

COM 053C—Literatures of the Islamic World (4)

Lecture—3 hour(s); Term Paper. Introduction to classical Islamic culture through translations of literature primarily from Arabic and Persian, as well as other languages. Topics include the concept of the self, society and power, spirituality, the natural world, the cosmos, and the supernatural. GE credit: AH, OL, WC, WE. Effective: 2015 Fall Quarter.

COM 090X—Lower Division Seminar (1-2)

Seminar—1-4 hour(s). Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. Effective: 1997 Winter Quarter.

COM 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 100—World Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR), upper division standing, or consent of instructor. Comparative, cross-cultural study of a topic, theme, or movement in world cinema beyond the boundary of a single national tradition. Topics may include "postsocialist cinemas in East Europe and Asia," "cinema and globalization," and "popular Asian cinemas." May be repeated up to 3 time(s) when topic differs. GE credit: AH, VL, WC, WE. Effective: 2017 Spring Quarter.

COM 110—Hong Kong Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR), upper division standing, or consent of instructor. Hong Kong cinema, its history, industry, styles, genres, directors, and stars. Special attention to its polyglot, multicultural, transnational, colonial, and postcolonial environment. GE credit: AH, VL, WC, WE. Effective: 2017 Spring Quarter.

COM 112—Japanese Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): Consent of Instructor. Or upper-division standing. Introduction to Japanese cinema from early silent films to the present. Explores important directors, genres, stars, themes and techniques in relation to specific historical and cultural contexts. Lectures and readings in English. Films in Japanese with English subtitles. GE credit: AH, VL, WC, WE. Effective: 2018 Spring Quarter.

COM 120—Writing Nature: 1750 to the Present (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Study of representations, descriptions, and discussions of humankind's problematical relationship with the non-human world in texts written in a variety of European and American traditions between 1750 and the present. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 135—Women Writers (4)

Lecture/Discussion—3 hour(s); Term Paper. Exploration of women's differing views of self and society as revealed in major works by female authors of various times and cultures. Readings, principally of fiction, will include such writers as Lady Murasaki, Mme de Lafayette, and Charlotte Bronte. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 138—Gender & Interpretation in the Renaissance (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Critical analysis of Renaissance texts with primary focus on issues such as human dignity, education and gender politics; "high" and "low" culture and its relation to literary practices. (Same course as ITA 141.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

COM 139—Shakespeare & the Classical World (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Shakespeare's representations of the classical world in the light of selected ancient texts and Renaissance conceptions of Antiquity, with special attention to the depiction of politics and history. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 140—Thematic & Structural Study of Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Interpretation of selected works illustrating the historical evolution of themes, as well as of formal and structural elements. May be repeated for credit. GE credit: AH, WE. Effective: 1997 Winter Quarter.

COM 141—Introduction to Critical Theoretical Approaches to Literature & Culture (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to critical theory and its use for interpreting literary texts, film, and media forms in global culture. (Same course as CRI 101.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

COM 142—Critical Reading & Analysis (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Close reading of selected texts; scrutiny of very limited amount of material, with attention to the problems of texts in translation. GE credit: AH, WE. Effective: 1997 Winter Quarter.

COM 144—The Grotesque (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Study of the "grotesque" in selected texts from the Renaissance to the 20th century, with attention to the "grotesque" as a means of social, cultural, and political commentary, as well as of aesthetic innovation. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 145—Representations of the City (4)

Lecture—2 hour(s); Discussion—1 hour(s); Extensive Writing. Exploration of the representation of the city in major translated literary texts from a variety of literary traditions and periods. Emphasis on the diversity of urban experience in literature. Topics include public and private space, memory, and gender. GE credit: AH, WC, WE. Effective: 2004 Spring Quarter.

COM 146—Myth in Literature (4)

Novels and plays by Dickens, Zola, Flaubert, Dreiser, Ibsen, and Strindberg investigate marriage & adultery, the city & its perils, the hardships of industrialization, the war between the sexes, the New Woman, and other 19th-century themes. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 169—The Avant-Garde (4)

Lecture/Discussion—3 hour(s); Term Paper. Studies in movements such as surrealism, expressionism and the absurd. GE credit: AH, WE. Effective: 1997 Winter Quarter.

COM 170—The Contemporary Novel (4)

Lecture—3 hour(s); Term Paper. Study of important novels from different parts of the world, including Asia, Africa, Latin America, Europe, and the United States, in the period from the Second World War to the present. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 171—Partition Literature: South Asia (4)

Lecture—3 hour(s); Term Paper. An exploration of novels, short stories, plays, and films in translation and in English, produced about the Partition of India in 1947. GE credit: AH, WC, WE. Effective: 2020 Fall Quarter.

COM 172—A Story for a Life: The Arabian Nights (4)

Lecture/Discussion—3 hour(s); Term Paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as ARB 140, MSA 121C.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

COM 175—Shahnameh: The Persian Book of Kings (4)

Lecture/Discussion—3 hour(s); Term Paper. In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature. (Same course as MSA 121A.) GE credit: AH, WC, WE. Effective: 2015 Winter Quarter.

COM 180—Selected Topics in Comparative Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR); at least one course in literature. Study of a selected topic or topics appropriate to student and faculty interests and areas of specialization of the instructor. May be repeated up to 1 time(s). GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 180S—Selected Topics in Comparative Literature (Taught Abroad) (4)

Lecture/Discussion—6 hour(s); Extensive Writing; Fieldwork—6 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR); at least one course in literature or consent of instructor. Study of selected topics appropriate to student and faculty interests and areas of specialization of the instructor. May be taught abroad. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2007 Fall Quarter.

COM 192—Internship in Comparative Literature (1-12)

Internship—1-12 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Restricted to Comparative Literature majors. Internships in fields where students can practice their skills. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

COM 194H—Special Study for Honors Students (1-5)

Independent Study—1-5 hour(s). Prerequisite(s): Consent of Instructor. Open only to majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a comparative topic. May be repeated for credit. (P/NP grading only.) GE credit: AH, WE. Effective: 1997 Winter Quarter.

COM 195—Senior Seminar in Comparative Literature (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Senior standing as a Comparative Literature major or minor or consent of instructor. Open only to Comparative Literature majors or minors in or consent of instructor. Advanced study of selected topics and texts in Comparative Literature, with explicit emphasis on the theoretical and interpretive approaches that define Comparative Literature as a discipline and distinguish it from other literary disciplines. Required for the major. GE credit: AH, WE. Effective: 2012 Fall Quarter.

COM 197T—Tutoring in Comparative Literature (1-5)

Discussion—2-4 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing with declared major in Comparative Literature. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with current courses offered by Comparative Literature. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 198—Directed Group Study for Advanced Undergraduates (1-5)

Variable. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 210—Topics & Themes in Comparative Literature (4)

Discussion—3 hour(s); Term Paper. Prerequisite(s): Graduate standing in Comparative Literature, English, or a foreign-language literature, or consent of instructor. Comparative, interpretive study of the treatment of specific topics and themes in literary works from various periods, societies, and cultures, in light of these works' historical and sociocultural contexts. May be repeated for credit. Effective: 1997 Winter Quarter.

COM 214—Approaches to Lyric Poetry (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Analysis and interpretation of poetic texts in different historical periods and national literatures, with consideration of major theoretical developments in the understanding of poetic discourse. Effective: 1998 Fall Quarter.

COM 215—Forms of the Spiritual Quest (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor; knowledge of at least one foreign language. An exploration, culminating in a research paper, of changing forms of the quest for transcendence in different cultures, mainly in major works of Western literature, but also in other traditions and from the perspectives of other disciplines. Effective: 1997 Winter Quarter.

COM 220—Literary Genres (4)

Discussion—3 hour(s); Term Paper. Prerequisite(s): Graduate standing in Comparative Literature, English, or a foreign-language literature or consent of instructor. Comparative literature of major works in a particular genre from various linguistic, national, and cultural traditions, with particular attention to historical developments within the genre and to genre theory. May be repeated for credit. Effective: 1997 Winter Quarter.

COM 238—Gender & Interpretation (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Study of how literary texts from different periods, societies, and cultures represent gender roles and gender hierarchy, building on recent work on gender in anthropology, literature, psychology, and women's studies. Effective: 1998 Fall Quarter.

COM 250A—Research in Primary Literature (4)

Project (Term Project). Individually guided research in the primary literature of concentration, under the supervision of a faculty member culminating in a conference paper. Required of M.A. and Ph.D. candidates. Effective: 2011 Fall Quarter.

COM 250B—Research in Second Literature (4)

Project (Term Project). Individually guided research in the secondary literature of concentration, under the supervision of a faculty member, culminating in a paper. Required of Ph.D. candidates. Effective: 2011 Fall Quarter.

COM 250C—Research in Third Literature or Special Topic (4)

Conference—1 hour(s); Term Paper; Independent Study—8 hour(s). Individually guided research, under the supervision of a faculty member, in the third literature of concentration or on a special topic culminating in a paper. Required of Ph.D. candidates. Effective: 2016 Winter Quarter.

COM 250D—Dissertation Prospectus (4)

Independent Study. Individually guided writing of the dissertation prospectus under supervision of a faculty member. Must be taken prior to completion of the qualifying exam. Required of Ph.D. candidates. (S/U grading only.) Effective: 2006 Spring Quarter.

COM 255—Proseminar: Comparative Literature: Past, Present, Future (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Restricted to graduate students. History, theory, and methodology of comparative literature. Issues of national literature, world literature, and comparative literature. Relation of comparative literature to other disciplines and diverse expressions. Discussion of current problems in teaching and research in comparative literature. Required of M.A. and Ph.D. candidates. Effective: 2016 Winter Quarter.

COM 260—Contexts of the 19th-Century Novel (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Development in 19th-century history, culture, and society in relation to major trends in the 19th-century novel. Effective: 1998 Fall Quarter.

COM 297—Directed Independent Study in Primary, Secondary, or Third Literature (4)

Conference—1 hour(s); Term Paper; Independent Study—8 hour(s). Prerequisite(s): Consent of Instructor. Restricted to graduate students. Directed Independent Study in Primary, Secondary, or Third Literature culminating in term paper. Only for languages with no graduate course offerings. May be repeated for credit when no seminars are available and topic differs. Effective: 2016 Spring Quarter.

COM 298—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

COM 299—Individual Study (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

COM 299D—Special Study for the Doctoral Dissertation (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

COM 390—Teaching Comparative Literature in College (4)

Lecture—2 hour(s); Discussion—2 hour(s). Prerequisite(s): Appointment as a Comparative Literature Associate Instructor or consent of instructor. Restricted to graduate students. Discussion of the theory and practice of teaching composition at the college level in a department of comparative literature in relation to the major cultural and social developments and with specific application to the introductory COM 001, COM 002, COM 003, COM 004. (S/U grading only.) Effective: 2016 Winter Quarter.

COM 392—Teaching Internship in Comparative Literature (2)

Discussion—2 hour(s). Restricted to graduate students. Regular consultations between the student instructor teaching Comparative Literature courses and a supervisor. Specifically designed for first-time TAs in COM 005, COM 006, COM 007, and COM 010. Instruction in the teaching of writing in a literature course, grading of papers, leading discussions. (S/U grading only.) Effective: 2016 Winter Quarter.

COM 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

CRD—Community & Regional Development

Courses in CRD:

CRD 001—The Community (4)

Lecture—3 hour(s); Discussion—1 hour(s). Basic concepts of community analysis and planned social change. The dynamics of community change through case studies of communities including peasant, urban ghetto, suburban mainline, and California farm workers. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2012 Fall Quarter.

CRD 002—Ethnicity & American Communities (4)

Lecture—3 hour(s); Discussion—1 hour(s). Historical and cultural survey of the role of various ethnic groups in the development of American communities. Examines ethnicity as a cultural factor, ethnicity as power and issues related to selected American ethnic groups. GE credit: ACGH, DD, SS, WE. Effective: 2012 Fall Quarter.

CRD 020—Food Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Social aspects of agri-food systems. Social science perspectives applied to food and agricultural sustainability in relation to ecology, knowledge, technology, power, governance, labor, social difference, and social movements. Social and environmental effects of commodity chains in comparative global context. GE credit: OL, SS, VL, WE. Effective: 2012 Fall Quarter.

CRD 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 098—Directed Group Study for Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 099—Special Study for Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 118—Technology & Society (4)

Lecture—3 hour(s); Discussion—1 hour(s); Extensive Writing; Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002. Impact of technology on labor relations, employment, industrial development and international relations. Internal relations of technology development and deployment. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

CRD 140—Dynamics of Regional Development (4)

Lecture—4 hour(s); Extensive Writing; Term Paper; Project (Term Project). Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002. Industrial cluster formation and institutions. Technology, labor relations and interfirm linkages in global value chains. California and other regions are used as case studies. GE credit: SS, WE. Effective: 2016 Fall Quarter.

CRD 141—Organization of Economic Space (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002. Globalization and technological restructuring of economic activity focusing on new spatial patterns of production and circulation and their implications for workers, communities and societies, both in the U.S. and around the globe. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

CRD 142—Rural Change in the Industrialized World (4)

Lecture—3 hour(s); Discussion—1 hour(s); Extensive Writing; Term Paper. Prerequisite(s): SOC 001 or CRD 001 or CRD 002 or ANT 002. Geography of rural environment with emphasis on rural restructuring. Demographics, community, economy, governance, agriculture, and environmental conservation in rural areas of industrialized world. Case studies from and comparisons drawn between North America, Europe, Australia, New Zealand, and Japan. GE credit: SS, WE. Effective: 2016 Fall Quarter.

CRD 147—Community Youth Development (4)

Lecture/Discussion—4 hour(s); Project (Term Project); Extensive Writing/Discussion; Term Paper. Community influences on youth well-being, youth as agents of community change, and policies to support healthy communities for young people. Special emphasis on disparities in youth well-being related to race, class, immigration status, gender, sexual-orientation. GE credit: DD, OL, SS, VL, WE. Effective: 2016 Fall Quarter.

CRD 149—Community Development Perspectives on Environmental Justice (4)

Lecture/Discussion—4 hour(s); Extensive Writing/Discussion; Project (Term Project); Term Paper. Environmental justice social movements; inequitable distribution of pollution on low-income communities of color; histories, policies, and innovations associated environmental justice movements in the United States and around the world. GE credit: DD, OL, SS, VL, WE. Effective: 2016 Fall Quarter.

CRD 150—Quantitative Methods in Community Research (5)

Lecture—4 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): SOC 046B or STA 013 or STA 032; Consent of Instructor. Introduction to statistical analysis of social data relevant to community research, planning and assessment, emphasizing data sources and acquisition, descriptive and inferential analysis techniques, and data interpretation and presentation. Emphasis on spatial data and methods, focusing on the sources, processing, analysis, and presentation of spatial data in a community assessment context. GE credit: QL, SL, SS. Effective: 2018 Fall Quarter.

CRD 151—Community Field Research: Theory & Analysis (5)

Lecture—4 hour(s); Laboratory—2 hour(s). Prerequisite(s): CRD 001; (STA 013 or STA 013Y or SOC 046B); any upper division Community & Regional Development (CRD) course recommended. Design and analysis of community research considering the relationship between theory and practice. Community research methods, including elite interviewing, ethnographic approaches, and statistical methods, descriptive statistics and OLS regression. Requires design and completion of field research project. GE credit: ACGH, QL, SS, WE. Effective: 2020 Spring Quarter.

CRD 152—Community Development (4)

Lecture—4 hour(s); Extensive Writing; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or CRD 151 or SOC 002 or ANT 002 or ASA 100 or CHI 132 or AAS 101. Introduction to principles and strategies of community organizing and development. Examination of non-profit organizations, citizen participation, poverty reduction, community needs assessment, and regional development strategies. Comparison of community development approaches of the U.S.A./California with other western and non-western societies. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

CRD 153A—International Community Development: Asia (4)

Project (Term Project)—3 hour(s); Lecture/Discussion—3 hour(s). Prerequisite(s): Consent of Instructor. 2.000 GPA; good academic standing. For summer and quarter abroad versions, limited to 30 students; for the Seminar Abroad version, limited to 15 students; this allows for the small group learning methodology as well as the active collaboration with in-country university students; available for undergraduate and graduate students; applications through UC Davis Study Aboard accepted on a first-come, first-served basis for qualified applicants. Examination and analysis of community development efforts in a range of Asian countries and the impact of global forces in different settings. Includes classroom lectures, workshops, field trips, and collaborative action research projects. Taught abroad. GE credit: OL, SS, WC, WE. Effective: 2018 Fall Quarter.

CRD 153B—International Community Development: Europe (4)

Lecture—4 hour(s). Prerequisite(s): ANT 002 or IAD 010 or CRD 001 or CRD 002 or SOC 001 or SOC 002 or POL 001. Examination and analysis of community development efforts in Europe and the impact of global forces in different settings. Alternative strategies with emphasis on self-reliance and locally controlled development. Based in Freiburg, Germany, including field trips to France and Switzerland; taught abroad. GE credit: SS, WC. Effective: 2016 Fall Quarter.

CRD 153C—International Community Development: Africa (4)

Lecture—2 hour(s); Fieldwork—2 hour(s). Prerequisite(s): CRD 001 or CRD 002 or ANT 002 or IAD 010 or SOC 001 or SOC 002 or POL 001. Examination and analysis of community development efforts in Africa and the impact of global forces in urban and rural settings. Focus on strategies that promote self-reliance and locally controlled development. Based in South Africa; includes field trips. GE credit: SS, WC. Effective: 2016 Fall Quarter.

CRD 154—Social Theory & Community Change (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CRD 001 or SOC 001 or ANT 002; or Consent of Instructor. Comparative overview of the dominant social science paradigms for the study of community development and change. Among the paradigms discussed are functionalism, conflict theory/Marxism, structuralism, community capitals, social exchange, post-positivism, feminist theories and social constructivism. GE credit: ACGH, DD, SS, WE. Effective: 2020 Winter Quarter.

CRD 156—Community Economic Development (5)

Lecture—4 hour(s); Laboratory—2 hour(s). Prerequisite(s): CRD 152 or PLS 021 or ECS 015; and Consent of Instructor. How government and community organizations help firms grow and create jobs through local economic development corporations, small business centers, revolving loan funds, incubators, and other programs. Techniques to analyze community economic potential and identification of appropriate intervention tools. Group project. GE credit: QL, SS, WE. Effective: 2016 Fall Quarter.

CRD 157—Politics & Community Development (4)

Lecture—4 hour(s). Analyzes political, economic and sociocultural forces shaping the form and function of local communities in the U.S. Considers theories of the state, the community and social change and case studies of actual community development in comparative historical perspective. GE credit: ACGH, DD, SS, WE. Effective: 2016 Fall Quarter.

CRD 158—Community Governance (4)

Lecture/Discussion—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): CRD 001 or SOC 001 or POL 001. Governing institutions and political processes at the local level. Local government organization, community autonomy, leadership, political change, policy development, and select policy issues including public finance. Topics change depending on student interest. Field research on coalition building or policy issues in select communities. GE credit: ACGH, DD, SS, WE. Effective: 2020 Spring Quarter.

CRD 162—People, Work & Technology (5)

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): CRD 001 or SOC 001 or ANT 001; Upper division standing recommended. Analysis of the relationship between work, technology, and the human experience. Theories of the causes and consequences of labor process, changes under capitalism and globalization, impacts of race/ethnicity, class, gender, and citizenship status on work in the United States and globally; responses of workers, communities, and policy-makers to workplace changes. GE credit: ACGH, DD, SS, WE. Effective: 2018 Fall Quarter.

CRD 164—Theories of Organizations & Their Role in Community Change (5)

Lecture—4 hour(s); Laboratory—2 hour(s). Prerequisite(s): (STA 013 or STA 013Y or SOC 046B); (CRD 001 or CRD 002 or SOC 001 or ANT 002). Planned change within and through community organizations. Private voluntary organizations, local community associations, and local government. Relationship between community organizations and social capital. Collaborative original data gathering and professional report writing. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2018 Spring Quarter.

CRD 171—Housing & Social Policy (4)

Lecture—4 hour(s); Term Paper. Social impact, economics, and politics of housing in the United States. Special attention given to federal, state, and local policy and program strategies to produce and preserve affordable housing and inclusive neighborhoods. Effective: 2016 Fall Quarter.

CRD 172—Social Inequality: Issues & Innovations (4)

Lecture/Discussion—4 hour(s); Extensive Writing; Term Paper; Project (Term Project). Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002; Upper division standing recommended. Focus on the dimensions, causes, and means of alleviating social inequality in the U.S. Examination and analysis of major theories and forms (class, race/ethnicity, gender, and citizenship status) of inequality. Policy-based and grassroots approaches to change. Effective: 2016 Fall Quarter.

CRD 176—Comparative Ethnicity (4)

Lecture—4 hour(s); Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002; Upper division standing recommended. Role of ethnicity in shaping social systems and interaction. Analytical approaches to and issues arising from the study of ethnicity, through utilization of data from a range of different societies. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

CRD 180—Transnational Community Development (4)

Lecture/Discussion—4 hour(s); Extensive Writing; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or ANT 002 or SOC 001. The effects of grassroots, non-state, non-corporate actors from abroad on local, national and international development. Socioeconomic, political, and cultural implications of transnational actions undertaken by international non-governmental organizations, individual migrants, and migrant grassroots civic organizations. GE credit: SS, WC, WE. Effective: 2012 Fall Quarter.

CRD 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 194HA—Special Study for Honors Students (4)

Independent Study—3 hour(s); Seminar—1 hour(s); Project (Term Project); Term Paper. Prerequisite(s): Consent of Instructor. Completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis advisor. Community & Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty advisor. Effective: 2012 Fall Quarter.

CRD 194HB—Special Study for Honors Student (4)

Independent Study—3 hour(s); Seminar—1 hour(s); Project (Term Project); Term Paper. Prerequisite(s): Consent of Instructor. Completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis advisor. Community & Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty advisor. Effective: 2012 Fall Quarter.

CRD 197T—Tutoring in Community & Regional Development (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing; completion of course to be tutored. Assisting instructor in one of the Community & Regional Development's regular courses by tutoring individual students or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary activities. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

CRD 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 200—Planning for Health (4)

Lecture/Discussion—2 hour(s); Extensive Writing; Project (Term Project)—1 hour(s). Focused on the intersection of city planning and public health. The health of an individual or community is determined not only by the health care they receive, but also by the natural, social, physical, economic, and political environment. Covers topics such as food access, air quality, water quality, waste and energy infrastructure, community engagement, and the planning process. Provides an overview of available public spatially explicit data. Effective: 2018 Fall Quarter.

CRD 230—Spatial Methods in Community Research (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing. Spatial analysis of social data relevant to community research, with focus on neighborhoods as units of analysis. Clustering, segregation, geodemographic modelling, spatial regression, multilevel models, spatial data management, accessibility. Effective: 2019 Spring Quarter.

CRD 240—Community Development Theory (4)

Lecture/Discussion—4 hour(s). Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects. (Same course as GEO 240.) Effective: 2014 Winter Quarter.

CRD 241—The Economics of Community Development (4)

Seminar—4 hour(s). Prerequisite(s): Graduate standing. Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy. (Same course as GEO 241.) Effective: 2015 Spring Quarter.

CRD 242—Community Development Organizations (4)

Seminar—4 hour(s). Prerequisite(s): CRD 240; and Consent of Instructor. Limited to 15 students. Theory and praxis of organizations with social change agendas at the community level. Emphasis on non-profit organizations and philanthropic foundations. Effective: 2012 Fall Quarter.

CRD 242S—Community Development Organizations (International) (4)

Fieldwork—10 hour(s); Lecture—5 hour(s); Workshop—5 hour(s). Prerequisite(s): CRD 240. Limited to 10 students. Theory and praxis of organizations with social change agendas at the community level. Emphasis on local governance, non-profit organizations and philanthropic foundations at an international level. May be taught abroad. Effective: 2012 Fall Quarter.

CRD 243—Critical Environmental Justice Studies (4)

Seminar—4 hour(s); Extensive Writing. Prerequisite(s): Consent of Instructor. Open to graduate students only. Application of social science theories of race, ethnicity, class, gender, and power to understand the production and contestation of environmental inequities. Effective: 2017 Fall Quarter.

CRD 244—Political Ecology of Community Development (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing. Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries. (Same course as GEO 254.) Effective: 2014 Winter Quarter.

CRD 245—The Political Economy of Urban & Regional Development (4)

Lecture—4 hour(s). Prerequisite(s): CRD 157; CRD 244; Or equivalent. How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California. (Same course as GEO 245.) Effective: 2014 Spring Quarter.

CRD 246—The Political Economy of Transnational Migration (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as GEO 246.) Effective: 2014 Winter Quarter.

CRD 247—Transformation of Work (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing in history or social science degree program or consent of instructor. Exploration of the ways that the experience, organization, and systems of work are being reconfigured in the late-20th century. The impacts of economic restructuring on local communities and workers. Effective: 2012 Fall Quarter.

CRD 248—Social Policy, Welfare Theories & Communities (4)

Seminar—4 hour(s). Prerequisite(s): Graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context. Not open for credit to students having completed CRD 248A and CRD 248B. (Same course as GEO 248.) Effective: 2013 Fall Quarter.

CRD 248A—Social Policy, Welfare Theories & Communities I (2)

Seminar—2 hour(s). Prerequisite(s): Graduate standing. Theories and comparative histories of modern welfare states. Theories of welfare & social policy in relation to normative, organizational, and administrative aspects of welfare & social policy. Effective: 2017 Winter Quarter.

CRD 248B—Social Policy, Welfare Theories & Communities II (2)

Seminar—2 hour(s). Prerequisite(s): Graduate standing. Concurrent enrollment in CRD 248A. Analysis of a specific set of social issues within the U.S./California context. Issues may include poverty, hunger, housing, health, family, disability, economic opportunity, affirmative action orientations, gender, old age, or special social groups. Effective: 2017 Winter Quarter.

CRD 249—Media Innovation & Community Development (4)

Seminar—4 hour(s). Open to graduate students. Role of innovative media in communities and social change. Studies historical, practical and theoretical issues involving media in community organizing, social justice movements, democracy initiatives, and economic justice. Effective: 2014 Spring Quarter.

CRD 250—Professional Skills for Community Development (4)

Lecture/Discussion—2 hour(s); Project (Term Project)—2 hour(s); Fieldwork; Extensive Writing/Discussion. Prerequisite(s): CRD 240. Priority enrollment for Masters & Ph.D. students in Community & Regional Development. Help develop the practical skills needed to work professionally in organizations that are involved in community development. Provides an overview of community development planning, project management, and consultation skills. Effective: 2016 Fall Quarter.

CRD 260—Thesis Seminar (2)

Seminar—2 hour(s). Workshop to help finalize thesis proposals and complete thesis. May be repeated for credit. Effective: 2020 Winter Quarter.

CRD 290—Community Development Seminar (1)

Seminar—1 hour(s). Pass One restricted to graduate students in the CDGG masters program; open to other programs by consent of the instructor. Speaker series on key topics in community development. May be repeated for credit as CDGG MS students must take four quarters to satisfy the MS degree requirements; may take course as many times as student chooses. (S/U grading only.) Effective: 2019 Winter Quarter.

CRD 292—Graduate Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit and student may register in more than one internship section per term. (S/U grading only.) Effective: 2012 Fall Quarter.

CRD 293—Community Development Graduate Proseminar (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Enrollment in Community Development graduate group. Restricted to first year Community Development graduate students only. Introduction to graduate training in Community Development. Seminar designed to introduce students entering graduate work in the Community Development Graduate Group to its ongoing activities. (S/U grading only.) Effective: 2012 Fall Quarter.

CRD 298—Group Study (1-5)

Variable. Effective: 2012 Fall Quarter.

CRD 299—Research (1-12)

Variable. (S/U grading only.) Effective: 2012 Fall Quarter.

CRI—Critical Theory

Courses in CRI:

CRI 101—Introduction to Critical Theoretical Approaches to Literature & Culture (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to critical theory and its use for interpreting literary texts, film, and media forms in our present global culture. (Same course as COM 141.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CRI 200A—Approaches to Critical Theory (4)

Seminar—3 hour(s); Term Paper. Restricted to Graduate students. Critical overview of modern theoretical texts (e.g., semiotics, hermeneutics, deconstruction, social and cultural critique, feminist theory, psychoanalysis). Effective: 2016 Spring Quarter.

CRI 200B—Problems in Critical Theory (4)

Seminar—3 hour(s); Term Paper. Restricted to Graduate students. Focused study of a particular critical theoretical approach, school or perspective. Topics may include but are not limited to: critical approaches to the study of literature, culture, film, historiography, visual culture, the body, and aesthetics. May be repeated for credit when topic differs and with consent of instructor. Effective: 2016 Spring Quarter.

CRI 200C—History of Critical Theory (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate student standing. Restricted to Graduate students. Critical analysis and discussion of pre-20th century theories of literary and cultural criticism. Topics may include but are not limited to: ancient and early modern philosophy; nature and culture in the Renaissance; theories of Mimesis from antiquity to the Renaissance. May be repeated for credit when topic differs and with consent of instructor. Effective: 2016 Spring Quarter.

CRI 201—Critical Theory Special Topics (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate student standing. Application of theoretical principles to one specific research topic. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

CRI 202—Visual Culture (4)

Lecture/Discussion—4 hour(s). Restricted to Graduate student standing. Analysis of image production in the contemporary world (photography, film, television, advertising, etc.) and their effects on individual subjectivities and collective social identities. Effective: 2016 Spring Quarter.

CRI 298—Directed Group Study (1-5)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Restricted to Graduate student standing. Effective: 2016 Spring Quarter.

CRI 299—Individual Study (1-12)

Variable—3-36 hour(s). Prerequisite(s): Consent of Instructor. Graduate student standing. (S/U grading only.) Effective: 2016 Spring Quarter.

CST—Cultural Studies

Courses in CST:**CST 200A—Histories of Cultural Studies (4)**

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor required. Undergraduate coursework in the humanities or social sciences recommended. Histories and traditions of cultural studies internationally; multiple legacies of cultural studies as a field of inquiry in various geographical contexts; foregrounds important critical perspectives resulting from social and intellectual movements worldwide. Effective: 2000 Fall Quarter.

CST 200B—Theories of Cultural Studies (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CST 200A; or Consent of Instructor. Definitions of "critical" scholarship and examination of various contexts in which cultural studies theory has emerged worldwide. Both mainstream and alternative theoretical traditions, such as those developed by people of color and by other minoritized groups. Effective: 2000 Fall Quarter.

CST 200C—Practices of Cultural Studies (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CST 200A; CST 200B; or Consent of Instructor. Methodological and practical applications of cultural studies research. Critical analyses of ethnography, textual analysis, social change, community development, and identity formation. Emphasis given to students' unique versions of cultural studies practices. Effective: 2000 Fall Quarter.

CST 204—History & Theory of Sexualities (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CST 200A (can be concurrent); or Consent of Instructor. Studies of sexuality in feminist, literary, historical, and cultural studies research, specifically examining the emergence of "sexuality" as a field of research and the relationship of sexuality studies to cultural forms, subjectivity, and social relations generally. May be repeated up to 2 time(s). Effective: 2014 Spring Quarter.

CST 206—Studies in Race Theory (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CST 200A (can be concurrent); or Consent of Instructor. Theoretical framework for the critical study of race, drawing on contemporary cultural studies and postcolonial scholarship in order to understand the social production of "race" as a category for organizing social groups and determining group processes. Effective: 2000 Fall Quarter.

CST 208—Studies in Nationalism, Transnationalism, & Late Capitalism (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CST 200A (can be concurrent); or Consent of Instructor. Contemporary theories of nation, nationalism, postcolonialism, and transnationalism. Specific attention to the relationship between cultural production and the formation of ideas about nation and nationalism, including examination of both "legitimizing" and resistant discourses. Effective: 2000 Fall Quarter.

CST 210—Memory, Culture, & Human Rights (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, inter-group conflicts, and human rights struggles. (Same course as HMR 200B.) Effective: 2013 Fall Quarter.

CST 212—Studies in the Rhetorics of Culture (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CST 200A (can be concurrent); or Consent of Instructor. Survey of critical and analytical approaches to the study of texts. Examination of multi-mediated objects to understand their cultural import by focusing on discursive production, dispersal, and reception processes, and related shifts in power relations. Effective: 2000 Fall Quarter.

CST 214—Studies in Political & Cultural Representations (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): CST 200A (can be concurrent); Consent of graduate advisor required. Framework for the analysis of political and popular cultural representations. Emphasis on concepts, theories, and methodologies illuminating dominant and vernacular cultural representation, appropriation, and innovation in transnational contexts. May be repeated up to 4 time(s) when topic differs. Effective: 2003 Fall Quarter.

CST 250—Research Seminar (4)

Seminar—4 hour(s). Prerequisite(s): CST 200A; CST 200B; CST 200C; or Consent of Instructor. Designed to facilitate student interaction and promote student research by guiding students through the production of a publishable essay. Essays submitted, distributed, and discussed by seminar participants. May be repeated up to 12 unit(s). Effective: 2000 Fall Quarter.

CST 270A—Individually Guided Research in Cultural Studies (4)

Discussion—1 hour(s); Independent Study—2 hour(s); Extensive Writing. Prerequisite(s): CST 200C; CST 250; and Consent of Instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2003 Fall Quarter.

CST 270B—Individually Guided Research in Cultural Studies (4)

Discussion—1 hour(s); Independent Study—2 hour(s); Extensive Writing. Prerequisite(s): CST 200C; CST 250; and Consent of Instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2003 Fall Quarter.

CST 270C—Individually Guided Research in Cultural Studies (4)

Discussion—1 hour(s); Independent Study—2 hour(s); Extensive Writing. Prerequisite(s): CST 200C; CST 250; and Consent of Instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2003 Fall Quarter.

CST 290—Colloquium (1)

Lecture—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Designed to provide cohort identity and faculty student exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative news, exchange information, and make announcements. May be repeated up to 12 unit(s). (S/U grading only.) Effective: 2000 Fall Quarter.

CST 295—Special Topics (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Special topics courses offered according to faculty and student interests and demands. May be repeated for credit with consent of advisor. Effective: 2000 Fall Quarter.

CST 298—Group Research (1-5)

May be repeated for credit. (S/U grading only.) Effective: 2002 Spring Quarter.

CST 299—Directed Research (1-5)

May be repeated for credit. (S/U grading only.) Effective: 2002 Spring Quarter.

CST 299D—Dissertation Research (1-12)

Independent Study—3-36 hour(s). Prerequisite(s): Advancement to doctoral candidacy. May be repeated for credit. (S/U grading only.) Effective: 2004 Winter Quarter.

CST 396—Teaching Assistant Training Practicum (1-4)

Variable—3-12 hour(s). Prerequisite(s): Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2004 Winter Quarter.

CTS—Cinema & Technocultural Studies

Courses in CTS:

CTS 012—Introduction to Media Computation (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming are covered as well as analysis of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students. (Same course as ECS 012.) GE credit: AH, SE, VL. Effective: 2013 Fall Quarter.

CTS 040A—Media History 1, Guttenberg to Oppenheimer (4)

Lecture—3 hour(s); Discussion—1 hour(s); Film Viewing—2 hour(s); Extensive Writing. History of Media to 1945, with particular focus on mechanically reproduced mass media technologies including the printing press, the newspaper, photography, cinema, radio and early computing technology. Analysis of inter-related cultural and political topics. (Same course as STS 040A.) GE credit: AH, OL, SS, VL, WE. Effective: 2014 Fall Quarter.

CTS 040B—Media History 2 1945-Present (4)

Lecture—3 hour(s); Discussion—1 hour(s); Film Viewing—2 hour(s); Extensive Writing. Prerequisite(s): CTS 040A. History of media from 1945 to present, with particular focus on the development of the computer, digital network and Internet technologies in the context of other media infrastructures like radio, television and satellite networks. Analysis of inter-related cultural/political topics. (Same course as STS 040B.) GE credit: AH, OL, SS, VL, WE. Effective: 2015 Winter Quarter.

CTS 041B—History of Cinema from 1945 to the present (4)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing—3 hour(s); Extensive Writing. Examination of cinema in the postwar period. Study of world cinema trends and the economic and socio-political conditions enabling innovative work in the film industry. GE credit: AH, OL, VL, WC, WE. Effective: 2014 Fall Quarter.

CTS 116—Design on Screen (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinematography. Introductory principles and practice, history. May be repeated up to 2 time(s) when topic differs. (Same course as DRA 116.) GE credit: AH, VL. Effective: 2013 Fall Quarter.

CTS 124E—Costume Design for Film (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): DRA 024; or Consent of Instructor. Pass One restricted to Theatre & Dance majors. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films. (Same course as DRA 124E.) GE credit: AH, OL, VL. Effective: 2017 Spring Quarter.

CTS 146A—Modern Iranian Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): Upper division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required. (Same course as MSA 131A.) GE credit: AH, OL, VL, WC, WE. Effective: 2013 Fall Quarter.

CTS 146B—Modern South Asia Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): Upper division standing or consent of instructor. South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc. (Same course as MSA 131B, ANT 147.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

CTS 147A—Chinese Film (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): HIS 009A; Or any course on traditional China; upper division standing. English language survey of Chinese film, from its inception to the end of the 20th century. Chinese films as important texts for understanding national, transnational, racial, gender, and class politics of modern China. (Same course as CHN 101.) GE credit: AH, VL, WC. Effective: 2014 Winter Quarter.

CTS 148B—Japanese Literature on Film (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Survey of films based on works of Japanese literature, emphasis on pre-modern and early modern texts. Introduction to major directors of Japan, with a focus on cinematic adaptation. Lectures and readings in English. Films in Japanese with English subtitles. (Same course as JPN 156.) GE credit: AH, VL, WC, WE. Effective: 2016 Winter Quarter.

CTS 150—Media Theory (5)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing—3 hour(s); Extensive Writing. Critical and theoretical approaches to the emergence of new technologies since the invention of photography. Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics, visual and gamer theory). (Same course as STS 151.) GE credit: AH, OL, SS, VL, WE. Effective: 2014 Fall Quarter.

CTS 162—Surveillance Technologies & Social Media (4)

Lecture—3 hour(s); Film Viewing—3 hour(s); Term Paper. Prerequisite(s): TCS 001 or STS 020. Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Study boundaries between security and control, information and spying. (Same course as STS 162.) GE credit: ACGH, AH, OL, SS, VL, WE. Effective: 2015 Winter Quarter.

CTS 172—Video Games & Culture (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): TCS 001 or ENL 003 or STS 001; or equivalent of these courses. Critical approaches to the study of video games, focusing on formal, historical, and cultural modes of analysis. History of software and hardware in North American and global contexts. Relations of games to society, politics, economics, literature, media, and the arts. (Same course as STS 172, ENL 172.) GE credit: ACGH, AH, SS, VL. Effective: 2014 Fall Quarter.

CTS 174—Acting for Camera (4) *Review all entries*

Lecture/Lab—6 hour(s). Prerequisite(s): Consent of Instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated up to 8 unit(s) when instructor differs. (Same course as DRA 174.) Effective: 2013 Spring Quarter.

CTS 174—Acting for Camera (4) *Review all entries Discontinued*

Lecture/Lab—6 hour(s). Prerequisite(s): Consent of Instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated up to 8 unit(s) when instructor differs. (Same course as Dramatic Art 174.) Effective: 2020 Fall Quarter.

DEB—Designated Emphasis, Biotechnology

Courses in DEB:

DEB 263—Biotechnology Fundamentals & Application (2)

Lecture—2 hour(s). Prerequisite(s): BIS 101; BIS 102; MIC 102; or Consent of Instructor. Must be a graduate student in good standing. Fundamentals of molecular biology and chemical engineering involved in recombinant DNA technology. Topics: principles of rate processes of biological systems, optimization of bioreactors, and issues related to overexpression and production of recombinant molecules. Participation in student-directed team projects. Effective: 2016 Winter Quarter.

DEB 282—Biotechnology Internship (7-12)

Internship—21-36 hour(s). Prerequisite(s): Graduate standing and Consent of Instructor. Open only to students participating in the Designated Emphasis in Biotechnology program. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of three months as part of the Designated Emphasis in Biotechnology Program. (S/U grading only.) Effective: 2017 Winter Quarter.

DEB 294—Current Progress in Biotechnology (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as ECH 294.) (S/U grading only.) Effective: 2018 Winter Quarter.

DER—Dermatology

Courses in DER:

DER 192—Internship in Cutaneous Biology (1-4)

Internship—8-20 hour(s). Prerequisite(s): Upper division standing or consent of instructor. Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. Final report. (P/NP grading only.) Effective: 1997 Winter Quarter.

DER 199—Special Study in Cutaneous Biology (1-4)

Variable. Prerequisite(s): Advanced undergraduate standing and/or consent of instructor. Special study by individual arrangement of specialized topics in biology of skin. Work may be assigned readings, laboratory research or a combination. (P/NP grading only.) Effective: 1997 Winter Quarter.

DER 299—Research in Cutaneous Biology (1-12)

Laboratory—3-36 hour(s). Prerequisite(s): Consent of Instructor. Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology. (S/U grading only.) Effective: 1997 Winter Quarter.

DER 420—Integumentary System (2)

Lecture/Discussion—3 hour(s); Clinical Activity—0.3 hour(s). Prerequisite(s): Approval of School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must have passed all SOM Year 1 courses. Cell biology, pathology, and physical diagnosis of the skin. Recognition of normal variations, and common or important dermatoses. Patient demonstrations of select conditions. (P/F grading only.) Effective: 2013 Fall Quarter.

DER 460—Dermatology Clinical Clerkship (3-9)

Clinical Activity—40 hour(s). Prerequisite(s): Completion of three years of medical school; or consent of instructor. Limited enrollment. Observation and participation in dermatology clinics/practice and participation in Ward Rounds and Dermatology Clinics at UC Davis Medical Center, Kaiser, and private practitioner offices. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

DER 465—Specialty Externship in Dermatology (3-16)

Clinical Activity—30 hour(s). Prerequisite(s): Consent of Instructor. Externship provides in-depth exposure to one of a variety of sub-specialties in Dermatology. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

DER 466—Away Acting Internship in Dermatology (3-18)

Clinical Activity—40 hour(s); Lecture—6 hour(s); Variable—3-18 hour(s). Prerequisite(s): Consent of Instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Summer Quarter.

DER 470—Introduction to Dermatopathology (6)

Clinical Activity—20 hour(s); Independent Study—20 hour(s); Lecture/Discussion—6 hour(s). Prerequisite(s): Consent of Instructor. Previous rotation in a Dermatology Clerkship. Restricted to fourth-year medical student. Integrated, multi-specialty approach to the microscopic diagnosis of inflammatory and neoplastic skin disorders. (H/P/F grading only.) Effective: 2010 Spring Quarter.

DER 475—Telehealth in Dermatology (6)

Clinical Activity—4 hour(s); Project (Term Project)—36 hour(s). Restricted to Medical students. Introduction to the application of telehealth in dermatology to provide diagnoses, consultation, treatment, and education. Participate in teledermatology clinics with remote sites throughout California, conduct telehealth project(s), and review the latest literature in telehealth application in improving healthcare access. May be repeated up to 6 unit(s) for additional time to complete telehealth project or to work on new telehealth projects. (H/P/F grading only.) Effective: 2012 Winter Quarter.

DER 480—Insights in Dermatology (1-3)

Clinical Activity—3-9 hour(s). Prerequisite(s): Consent of Instructor. First- and second- year medical students in good academic standing. Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences. (H/P/F grading only.) Effective: 1997 Winter Quarter.

DER 495—Wound Healing: From Bench to Bedside (6)

Clinical Activity—12 hour(s); Laboratory—8 hour(s); Auto Tutorial—15 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Restricted to medical students only. An integrated, multi-specialty approach to clinical soft tissue wound healing. (H/P/F grading only.) Effective: 2001 Summer Quarter.

DER 498—Special Topics in Clinical Dermatology (1-6)

Independent Study—3-18 hour(s). Prerequisite(s): Medical students with consent of instructor. Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients. (H/P/F grading only.) Effective: 1997 Winter Quarter.

DER 499—Research in Cutaneous Biology (1-12)

Laboratory—3-36 hour(s). Prerequisite(s): Consent of Instructor. Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty. (H/P/F grading only.) Effective: 1997 Winter Quarter.

DES—Design

Courses in DES:

Questions pertaining to the following courses should be directed to the instructor or to the Design Advising office in 107 Art; 530-752-6244. Scheduling of classes is subject to change; please contact the Advising office to confirm when a course is offered.

DES 001—Introduction to Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Priority given to Design majors. Introduction to design discipline through readings, writing, visual problem solving, and critical analysis. Topics: design principles and elements, vocabulary, color theory, Gestalt principles, conceptualization strategies. Role of designer and products in contemporary culture including social responsibility and sustainability. GE credit: AH, VL. Effective: 2013 Spring Quarter.

DES 014—Design Drawing (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001 (can be concurrent); students with a background in drawing or Advanced Placement Art Studio units are encouraged to submit a portfolio for review to waive this course. Priority given to Design majors. Drawing as a tool for design. Basic skills in objective observation and representation, including line, shape, tone, and space. Drawing as a tool for formulating and working through design problems. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 015—Form & Color (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority given to Design majors. Understanding color, form and composition as ways of communicating design concepts and content. Color theory, color mixing, interaction of color. Design principles and elements. Gestalt theory. Explores a variety of materials, media and presentation techniques. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 016—Graphic Design & Computer Technology (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority given to Design majors. Introduction to digital tools with emphasis on graphic design including theory, practice and technology. Includes principles of color, resolution, pixels, vectors, image enhancement, layout, visual organization, visual hierarchy, typography. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 021—Drafting & Perspective (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority given to Design majors. Introduction to mechanical drafting, including scaled drawing, orthogonal projection, isometric, axonometric and perspective. Includes basic rendering techniques. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 040A—Energy, Materials, & Design Over Time (4)

Lecture—3 hour(s); Discussion—1 hour(s). Global history of design across time, viewed through the lens of the effects of the creation and discovery of new energy sources, processes, and materials on design. (Same course as SAS 043.) GE credit: AH, WC. Effective: 2018 Spring Quarter.

DES 040B—Ideologies of Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Priority to Design majors. Introduction to the history and theory of design in particular relation to political, philosophical, cultural, economic, and environmental debates and objectives. GE credit: AH, WE. Effective: 2014 Spring Quarter.

DES 040C—Design for Aesthetics & Experience (4)

Lecture—3 hour(s); Discussion—1 hour(s). Priority to Design majors. Global historical survey of design's engagement with changing notions of aesthetics and experience. Relates transformations in the theory, production, and reception of all aspects of design (objects, landscapes, architectures, etc.) to larger cultural, social, and political contexts. Not open for credit to students who have taken DES 040 or DES 140. GE credit: AH, DD, WE. Effective: 2014 Spring Quarter.

DES 050—Introduction to Three-Dimensional Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; or Consent of Instructor. Priority given to Design majors. Design concept development and detailing as it relates to the making of objects, structures and models using form, scale and materials. Product design and rapid prototyping methods using a range of techniques for advancing the design process. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 051—Computer-Assisted Drawing for Designers (4)

Studio—6 hour(s). Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Computer-assisted drawing (CAD) and modeling using a mid-level, multi-use CAD program. Basic architectural drawing and modeling technique in both two-dimensional and three-dimensional CAD environments. Not open for credit to students who have taken DES 150A. GE credit: AH, VL. Effective: 2019 Fall Quarter.

DES 070—Introduction to Textile Design Structures (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority to Design majors. Introduction to diverse methods for creating textile structures. Exploration of the creative potential of hand-constructed textiles, manipulation of fabric to create dimensional surfaces, and the basics of building and joining fabric structures. Only 2 units of credit to students who have completed DES 023 or DES 024; not open for credit for students who have completed both DES 023 & DES 024. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 077—Introduction to Structural Design for Fashion (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority given to Design majors. Study and practice of designing clothing for the human body. Emphasis on flat pattern development, structural joining sequences and the development of three-dimensional garments from two-dimensional drawings. Not open for credit to students who have completed DES 077A. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

DES 107—Advanced Structural Design for Fashion (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 077; or Consent of Instructor. Priority given to Design majors. Advanced study and practice of designing clothing for the human body through pattern development and structural joining. Emphasis on draping techniques and advanced conceptualization for fashion design. GE credit: AH, VL. Effective: 2017 Spring Quarter.

DES 111—Coding for Designers (4)

Studio—6 hour(s). Prerequisite(s): DES 001; DES 015; DES 016; or Consent of Instructor. Pass One restricted to Design majors. Programming concepts/skills for design. Algorithm-based design and development flowcharts. Pseudo-code entry level programming. Principles of coding logic syntax structure. Analysis of history. Development iteration presentation of design projects. Not open for credit to students who completed DES 037. GE credit: SE, VL. Effective: 2018 Spring Quarter.

DES 112—UI/UX Design: Principles & Practices (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016. Pass One restricted to Design Majors. Conceptual approaches, technical practice for interactive media using the front-end stack (html, css, js). Conceptual framework, user experience, visual interface and interaction design. Research and written pre-production materials required. May be repeated up to 1 time(s). GE credit: AH. Effective: 2018 Fall Quarter.

DES 113—Photography & Digital Imaging (4)

Studio—6 hour(s). Prerequisite(s): DES 001; DES 015; DES 016. Pass One restricted to Design majors. Digital imaging techniques using black/white and color. Critical analysis of photographs and the role of photography in society. Explore use and meaning of single, sequence and single composite images. Not open for credit to students who have taken DES 031. GE credit: AH, VL. Effective: 2017 Fall Quarter.

DES 115—Letterforms & Typography (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Fundamentals of letterforms and typography. Characteristics of typefaces; formatting and composition of type. Principles of legibility, visual hierarchy, grid systems, and the integration of type and image. Not available for credit to students who have completed DES 022. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 116—Visual Communication: Graphic Design Studio (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 115; or Consent of Instructor. Priority given to Design majors. Multiple, conceptually-linked assignments focusing on the fundamental choices designers make in translating concepts into effective graphic form. Problem finding and analysis of audience needs. Design process from research and initial concepts to project prototypes. May be taught abroad. Not open for credit to students who have completed DES 152 or DES 152A. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 117—Interactive Media I (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Practice of creating interactive visual media for network-based applications and principles of human computer interaction. Responsive design. User-centered research, information architecture, interface and interaction. Analysis of usability. Development and presentation of design production materials and completed interactive projects. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 126—Design Ethnography (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DES 001; or Consent of Instructor. Pass One restricted to Design majors. Practical introduction to design ethnography through project-based work. Tools and methods, observation, interviews, fieldnotes, and synthesis of qualitative data. Exploration of participatory design. Examination of the ethical questions. GE credit: AH. Effective: 2017 Spring Quarter.

DES 127A—Sustainable Design (4)

Discussion—1 hour(s); Lecture—3 hour(s). Prerequisite(s): DES 001. Pass One open to Design Majors. Principles, practice and materials of contemporary sustainable design in the context of environmental crisis. History of sustainable design in relation to the fields of product design, material science, energy, architecture, and transportation. GE credit: AH, VL. Effective: 2019 Fall Quarter.

DES 127B—Studio Practice in Sustainable Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 127A; DES 001; or Consent of Instructor. Priority to Design majors. Analysis and practice of sustainable design within studio context. Design project that incorporate the reuse of post consumer waste; standard materials vs. sustainable materials; Cradle to Cradle philosophy and practice. Field trips required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 128—BioDesign Theory & Practice (4)

Lecture/Discussion—3 hour(s); Term Paper. Pass One restricted to Design and Art History majors. Recent biological theories and their influence upon design theory and practice; includes bio-based materials in contemporary design. GE credit: VL. Effective: 2017 Winter Quarter.

DES 131—Global Fashion & Product Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Exploration of materials, embellishments, and structural techniques derived from historic and contemporary world cultures. Emphasis on unique qualities of individual expression applied to hand made textiles, fashion and textile products. May be taught abroad. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 132A—Textile Design: Woven Structures (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Foundation in handwoven textile structure and design, emphasizing yarn identification, basic drafting, basic weaves and their derivatives explored in context of original color effects and yarn combinations. May be repeated up to 1 time(s) with consent of instructor. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 132B—Loom-Constructed Textile Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 132A; or Consent of Instructor. Priority to Design majors. Intermediate level study of complex fabric structure with emphasis on pattern in relation to surface, dimension, and material. May be repeated up to 1 time(s) with consent of instructor. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 134A—Introduction to Interior Design—Residential (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 021 or DES 150A); or Consent of Instructor. Priority to Design majors. Introduction to the theory and practice of interior design with focus on residential spaces. Basic methods of design conceptualization, development, and presentation. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 134B—Introduction to Interior Design—Commercial & Technical Spaces (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 021 or DES 150A); or Consent of Instructor. Pass One priority given to Design majors. Introduction to the theory and practice of interior design with focus on small commercial and technical spaces. Archetypal spaces, non-residential building systems, ADA accessibility, design programming and research methods. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 135A—Furniture Design & Detailing (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Development of designs for contemporary furniture. Consideration of behavioral and physical requirements, cultural and historic expression, and structural and aesthetic qualities. Process includes research, drawings, and construction of scale models. Required field trip. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 135B—Furniture Design & Prototyping (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Design and construction of full size prototype furniture based on preliminary work completed in DES 135A. Material technology, construction methods, and finishes discussed. Development of shop drawings and furniture construction. Required field trip. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 136A—Lighting Technology & Design (4)

Laboratory—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Introduction to lighting design and technology. Understanding the role of lighting and vision in the development of functional and aesthetically pleasing environments. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 136B—Designing with Light—Industrial Design (4)

Laboratory—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 136A; or Consent of Instructor. Priority to Design majors. Design and manipulation of light sources, luminaires, and lighting controls to enhance the functional and aesthetic impact of interior and exterior spaces. Industrial design projects explore lighting effects, light distribution characteristics, and luminaire design. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 137A—Daylighting & Interior Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Emphasis on understanding the effect of daylight on the perception of interior designs as well as on vision, luminous and thermal comfort, health and energy efficiency. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 137B—Daylighting Design Studio (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Introduction to daylighting through observation of its effects on interior designs using scale models of interior designs of choice and photographing them outdoors and in CLTC's Heliodon to understand year-round performance. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 138—Materials & Methods in Interior Design (4)

Lecture/Discussion—3 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): DES 001; or Consent of Instructor. Priority to Design majors. Introduction to the finish materials used for interior design with special emphasis on sustainable and recycled products. Performance factors, relative costs and energy impacts, installation conditions and construction details, and design potential for a full range of interior materials. GE credit: AH, VL, WE. Effective: 2016 Fall Quarter.

DES 142A—World Textiles: Eastern Hemisphere (4)

Lecture—4 hour(s). Social contexts, meanings, aesthetics, stylistic developments, and methods significant in eastern hemisphere textiles. Emphasis on Japan, China, Indonesia, Oceania, Southern and Central Asia, Africa. GE credit: AH. Effective: 2016 Fall Quarter.

DES 142B—World Textiles: Western Hemisphere (4)

Lecture—4 hour(s). Social context, aesthetics, stylistic developments and methods significant in western hemisphere textiles. Emphasis on the Middle East, Europe, and the Americas up to contemporary times. Two required field trips. GE credit: AH. Effective: 2016 Fall Quarter.

DES 143—History of Fashion (4)

Lecture—3 hour(s); Discussion—1 hour(s). Priority to Design majors. History of fashion design from the earliest times to the present focusing on the ancient Middle East and Common Era North America and Europe. Emphasis on aesthetic, functional, social, economic, political and cultural aspects of clothing and personal adornment. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 144—History of Interior Architecture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Pass One priority to Design majors. Thematic survey of interior architecture. Emphasis on dwellings in their cultural settings and development of modern interior design theories. Interiors considered in relation to buildings' exteriors, sites, and uses. GE credit: AH, WE. Effective: 2017 Fall Quarter.

DES 145—History of Visual Communication (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): DES 001; or Consent of Instructor. Priority to Design majors. Historical developments of visual communication, concentrating on the technological and aesthetic development of graphic design; origins and manifestations of current issues in visual communication; provide framework for analysis of current and future trends in visual communication. GE credit: AH, VL, WE. Effective: 2016 Fall Quarter.

DES 149—Information Design: Principles & Practice (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Upper division standing or consent of instructor. Restricted to students with upper division standing. Design principles and visual strategies for effective information display; analysis of contemporary and historical examples of visual representations and visual narratives in science, humanities, and the arts; emergence of digital methods for interactive data presentation. GE credit: AH, VL. Effective: 2014 Winter Quarter.

DES 150—Computer-Assisted Drawing for Designers (4) *Review all entries Discontinued*

Effective: 2002 Winter Quarter.

DES 150—Computer-Assisted Presentations for Interior Architecture (4) *Review all entries*

Studio—6 hour(s). Prerequisite(s): DES 051. Open to Design Majors only. Computer-assisted architectural presentation including the development of complex 3D models, techniques of photo-realistic rendering and computer simulation of movement through architectural and interior space. GE credit: AH, VL. Effective: 2020 Fall Quarter.

DES 150A—Computer-Assisted Drawing for Designers (4) *Review all entries Discontinued*

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 021 preferred. Priority given to Design majors. Computer assisted drawing and modeling using a mid-level, multi-use CAD program. Basic architectural drawing and modeling technique in both two-dimensional and three-dimensional CAD environments. Not open for credit to students who have taken DES 150. GE credit: AH, VL. Effective: 2020 Fall Quarter.

DES 150A—Computer-Assisted Drawing for Designers (4) *Review all entries*

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 021 preferred. Priority given to Design majors. Computer assisted drawing and modeling using a mid-level, multi-use CAD program. Basic architectural drawing and modeling technique in both two-dimensional and three-dimensional CAD environments. Not open for credit to students who have taken DES 150. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 150B—Computer-Assisted Presentations for Interior Architecture (4) *Review all entries*

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 150A; or Consent of Instructor. DES 021 recommended. Priority given to Design majors. Computer-assisted architectural presentation including the development of complex 3D models, techniques of photo-realistic rendering and computer simulation of movement through architectural and interior space. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 150B—Computer-Assisted Presentations for Interior Architecture (4) *Review all entries*
Discontinued

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 150A; or Consent of Instructor. DES 021 recommended. Priority given to Design majors. Computer-assisted architectural presentation including the development of complex 3D models, techniques of photo-realistic rendering and computer simulation of movement through architectural and interior space. GE credit: AH, VL. Effective: 2020 Fall Quarter.

DES 151—Type in Motion (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 115 recommended. Priority given to Design majors. Fundamentals of creating motion-based, screen-based typography. Consideration of narrative structures, movement assemblage, and other visual languages, synthesized within a nuanced understanding of typography within digital space. May be taught abroad. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 154—Visual Communication: Message Campaign Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 115; DES 116; DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Principles and application of visual design strategies for projects that address a broad public audience. Emphasis on design for social awareness/interaction/benefit. Creation of public visual-media campaign. Not open for credit to students who have completed DES 152B. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 155A—Pattern, Form & Surface (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; DES 115; (DES 014 or DES 021); DES 015; DES 016; (DES 031 or DES 113); or Consent of Instructor. Priority given to Design majors. Experimental approaches to form-making through an examination of pattern, form, and surface in historical and contemporary contexts. Explorations of alternative design processes, methods, and materials that open up new possibilities for content creation and invention in design practice. GE credit: VL. Effective: 2017 Fall Quarter.

DES 156—Graphitecture: Architecture in the Age of New Media (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016. Priority to Design majors. New media and its impact on environmental design; analysis of contemporary projects at the intersection of architecture and new media; time-based strategies of representation; digital narrative. GE credit: AH, VL. Effective: 2020 Winter Quarter.

DES 157—Interactive Media II (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; (DES 037 or DES 111); DES 117; or Consent of Instructor. Priority to Design majors. Conceptual approaches, technical practice for interactive media using the front-end stack (html, css, js). Conceptual framework, user experience, visual interface and interaction design. Research and written pre-production materials required. GE credit: AH, VL. Effective: 2018 Fall Quarter.

DES 159—Design for Understanding (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 115; DES 116; or Consent of Instructor. DES 117 recommended. Pass One open to Design majors. Principles of effective information display including aspects of language, structure, legibility, sequencing, and context. Analysis of historical examples of typographic, diagrammatic, and cartographic excellence. User-centered research. Development and presentation of iterative design prototypes. Design that informs, connects, and inspires. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 160—Textile Surface Design: Patterns & Resists (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; or Consent of Instructor. Pass one restricted to Design majors. Use of traditional and contemporary processes to create images and patterns on fabric using a variety of dyes, including direct applications, bound and mechanical resists, and surface additives. GE credit: AH, VL. Effective: 2017 Fall Quarter.

DES 161—Textile Surface Design: Screen & Digital Printing (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016. Pass One restricted to Design majors. Design of textiles and screen printing on fabrics; soft-product development; integration of hand-produced and digitally generated imagery on cloth. GE credit: AH, VL. Effective: 2017 Spring Quarter.

DES 165—Studio Practices in Industrial Design (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 050; or Consent of Instructor. Pass One restricted to Design majors. 3D studio methods for design, including: historic and contemporary developments in industrial design; innovation in material and fabrication technology; design based projects for everyday objects including soft goods, electronics, transportation. GE credit: SE, VL. Effective: 2018 Fall Quarter.

DES 166—Human Centered Design (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015. Pass One restricted to Design majors. Human-centered approach to problem solving, ethnography, ideation, project framing, rapid prototypes, visual communication, and experiential learning. Creative approaches to graphic design, industrial design, fashion, business, and entrepreneurship. GE credit: AH, VL. Effective: 2020 Spring Quarter.

DES 167—Prototyping: From Objects to Systems (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; or Consent of Instructor. Pass One restricted to Design majors. Exploration of rapid prototyping techniques for objects, interactive experiences, services and organizations. Understanding of additive manufacturing, foam models, digital interfaces and business models. GE credit: SE, VL. Effective: 2018 Fall Quarter.

DES 169—Advanced Explorations in Textile Design (4)

Studio—6 hour(s). Prerequisite(s): DES 001; DES 014 or DES 021; DES 015; DES 016; DES 160 or DES 161; or Consent of Instructor. DES 070 recommended. Pass One restricted to Design majors. Advanced exploration of textile design aimed at developing unique textiles for a specific end product such as a fashion collection, functional interior design, art textile or surface design competition. May be repeated up to 1 time(s) with consent of instructor; topics and themes change yearly; criteria is: (1) space with first priority to students not previously taken the course and (2) course content must be sufficiently different from the previous time the student took the course. GE credit: AH. Effective: 2017 Spring Quarter.

DES 170—Experimental Fashion & Textile Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Experimental approaches to fashion and textile design. Emphasis on developing conceptual ideas and translating them into one-of-a-kind garments and soft products. Exploration of a variety of current topics including sustainability, pattern design, new technologies, and social activism. May be repeated up to 1 time(s) with consent of instructor. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 171—Fashion Drawing: Technical & Illustration (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 014 recommended. Priority to Design majors. Exploration of fashion design processes for industry within the social and physical context. Emphasis on two-dimensional conceptualization of ideas, garment construction, and ideation processes utilizing commercial textiles. Field trip required. GE credit: AH, VL. Effective: 2019 Spring Quarter.

DES 177—Computer-Assisted Fashion Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 077; DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Advanced exploration of apparel design processes for industry and personal expression with emphasis on computer-assisted design applications. Field trip required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 178—Design & Wearable Technology (4)

Studio—6 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; (DES 037 or DES 111); or Consent of Instructor. Pass One restricted to Design majors. Introduction to wearable technology and related technologies. Emphasis on designing, and fabricating prototypes of wearable technology for value-added designs and to improve quality of life. GE credit: AH, VL. Effective: 2020 Winter Quarter.

DES 179—Fashion Design: Signature Collection (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 077; (DES 107 or DES 177); DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Advanced exploration of fashion design with an emphasis on professional portfolio development and presentation. Emphasis on conceptualizing, designing, and fabricating a cohesive line of wearable garments suitable for presenting in a public fashion show. May be repeated up to 1 time(s). Not open for credit to students who have taken more than 8 units of DES 191A. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 180A—Advanced Interior Design: Institutional Spaces (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 021 or DES 150A); or Consent of Instructor. Priority to Design majors. Advanced interior design problems focused on complex institutional spaces. Introduction to building codes related to interior design. Integration of building systems with interior design solutions. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 180B—Advanced Interior Architecture (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): (DES 180A or DES 134B); DES 134A; or Consent of Instructor. Priority to Design majors. Advanced problems in interior architectural design emphasizing space planning for corporate and institutional environments. Field trips required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 185—Exhibition Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 150A recommended. Priority to Design majors. Design of cultural and commercial exhibition environments, including exhibition development and object selection, spatial planning and architectural finishes, object placement and staging, interpretive strategies, exhibition and promotional graphics. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 186—Environmental Graphic Design (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 115 recommended. Priority to Design majors. Design of informational and directional graphics for the built environment. Application and integration of typography, imagery and symbols into the architectural landscape. Development of universal wayfinding and graphic navigational systems to help people find their way. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 187—Narrative Environments (4)

Studio—4 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): (DES 185 or DES 186); (DES 014 or DES 021); DES 001; DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Design of storytelling environments and multi-sensory experiences for cultural, commercial, entertainment and public spaces. Interpretive planning and design for specific exhibit audiences. Manipulation of objects and the communication of complex ideas in the exhibition environment. May be taught abroad. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 190—Proseminar (1)

Seminar—1 hour(s). Prerequisite(s): Design major or consent of instructor. Philosophies of design explored through discussion and presentation of research results. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

DES 191A—Workshops in Design (4-12)

Seminar—1 hour(s); Studio—3 hour(s). Prerequisite(s): DES 014; DES 015; and Consent of Instructor. Upper division standing. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Costume. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections. Effective: 1997 Winter Quarter.

DES 191B—Workshops in Design (4-12)

Seminar—1 hour(s); Studio—3 hour(s). Prerequisite(s): DES 014; DES 015; and Consent of Instructor. Upper division standing. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Environment. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections. Effective: 1997 Winter Quarter.

DES 191C—Workshops in Design (4-12)

Seminar—1 hour(s); Studio—3 hour(s). Prerequisite(s): DES 014; DES 015; and Consent of Instructor. Upper division standing. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Graphics. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections. Effective: 1997 Winter Quarter.

DES 191D—Workshops in Design (4-12)

Seminar—1 hour(s); Studio—3 hour(s). Prerequisite(s): DES 014; DES 015; and Consent of Instructor. Upper division standing. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Textiles. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections. Effective: 1997 Winter Quarter.

DES 192—Internship (1-6)

Internship—3-18 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Enrollment limited to 3 units per quarter or 6 units per IV session. Supervised internship, off and on campus, in areas of design including environmental, costume, textile, museum, display and interior design. (P/NP grading only.) Effective: 1997 Winter Quarter.

DES 194HA—Special Study for Honors Students (3)

Independent Study—9 hour(s). Prerequisite(s): Consent of Instructor. Qualification for Letters and Science Honors Program; senior standing; approval of Design Honors Program proposal by the Curriculum Committee and major advisor. Limited enrollment. Preparation and presentation of a culminating project. Supervision of an instructor in one of the creative or scholarly areas of Design. Effective: 2013 Spring Quarter.

DES 194HB—Special Study for Honors Students (3)

Independent Study—9 hour(s). Prerequisite(s): DES 194HA; and Consent of Instructor. Qualification for Letters and Science Honors Program; senior standing. Limited enrollment. Preparation and presentation of a culminating project. Supervision of an instructor in one of the creative or scholarly areas of Design. Effective: 2013 Spring Quarter.

DES 197T—Tutoring in Design (1-5)

Discussion—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Leading of small discussion groups or studio meetings affiliated with one of the department's regular courses. (P/NP grading only.) Effective: 1997 Winter Quarter.

DES 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Upper division standing. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

DES 198F—Student-Taught Course (1-4)

Variable—1-4 hour(s). Student-facilitated (taught) course intended for upper division students (P/NP grading only.) Effective: 2016 Fall Quarter.

DES 199—Special Study of Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

DES 199FA—Student Facilitated Course Development (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Planning and development for student led DES 198F under the supervision of a faculty member. (P/NP grading only.) Effective: 2017 Fall Quarter.

DES 199FB—Student Facilitated Teaching (1-4)

Variable—1-4 hour(s). Prerequisite(s): DES 199FA; and Consent of Instructor. Student-facilitated course under the supervision of a faculty member, an undergraduate student teaching a course under 098F/198F. (P/NP grading only.) Effective: 2018 Spring Quarter.

DES 221—Theory & Issues in Design (4)

Seminar—3 hour(s); Independent Study. Prerequisite(s): Graduate standing in Design or consent of instructor. Perspectives on theoretical and aesthetic issues related to the design professions such as methodology in historical and contemporary contexts, implications of technology on design theory and practice, and design relationships to environmental sustainability, recycling, and other social issues. Effective: 2011 Spring Quarter.

DES 222—Research Methods & Critical Writing for Design (4)

Seminar—3 hour(s); Independent Study. Prerequisite(s): DES 221; Graduate standing in Design or consent of instructor. Focused on research methods and critical writing related to design topics including case studies, original and secondary sources, critical reviews. Expectation of a paper meeting professional standards suitable for publication from each student at end of course. May be repeated up to 1 time(s). Effective: 2006 Fall Quarter.

DES 223—Professional Practice & Ethics in Design (4)

Seminar—3 hour(s); Independent Study. Prerequisite(s): DES 221; DES 222; Graduate standing in Design or consent of instructor. Introduce students to issues of professional design practice: business ethics, contracts and business practices, social responsibility through case studies, guest lectures and field trips, and readings. Short written assignments and presentations will be required. Effective: 2006 Fall Quarter.

DES 224—Seminar in Design Research & Teaching (4)

Independent Study—6 hour(s); Extensive Writing—4 hour(s); Discussion—2 hour(s). Prerequisite(s): DES 221; DES 222; DES 223; and Consent of Instructor. Concurrent academic appointment (TA) in DES 142A, DES 142B, DES 143, DES 144, DES 145; graduate standing in Design. Work closely with instructor on a research and writing project related to subject matter of undergraduate history courses noted above with the goal of introducing student to advanced historical research processes and development of writing skills. May be repeated up to 2 time(s). Effective: 2007 Fall Quarter.

DES 225—Studio Practice in Design (4)

Studio—6 hour(s). Prerequisite(s): DES 221. Restricted to graduate standing in Design or consent of instructor. Students work together on a collective project to experience the multiple phases of design through an iterative process. Design projects will be geared towards relevance in contemporary social, cultural and political contexts. May be repeated up to 2 time(s). Effective: 2017 Fall Quarter.

DES 290—Seminar in Design (4)

Seminar—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Selected topics in design methodology, research, communication, and education. May be repeated for credit. Effective: 1997 Winter Quarter.

DES 292—Practicum in Design (1-12)

Variable—3-36 hour(s). Prerequisite(s): Graduate standing in Design or consent of instructor. Interaction with a working professional in the student's field of interest to apply theories and concepts to working practice. (S/U grading only.) Effective: 2014 Fall Quarter.

DES 298—Directed Group Study for Graduate Students (1-5)

Studio. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

DES 299—Individual Focused Study (1-12)

Variable—3-36 hour(s). Prerequisite(s): Graduate standing in Design or consent of instructor. Advanced study in studio practice on independent projects with faculty consultation. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

DES 299D—Project Concentration (1-12)

Variable—3-36 hour(s). Prerequisite(s): Graduate standing in Design or consent of instructor; minimum of 22 units must be taken in Project Concentration and Individual Focused Study. Student creates a body of original work at a professional level, with written and visual documentation of process and concepts underlying the project, culminating in public presentation. (S/U grading only.) Effective: 2014 Fall Quarter.

DES 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

DRA—Dramatic Art

Courses in DRA:

DRA 001—Theatre, Performance & Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Not open to students who have completed DRA 001S. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." GE credit: AH, DD, VL, WE. Effective: 2013 Fall Quarter.

DRA 001S—Theatre, Performance & Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Not open to students who have completed DRA 001. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." For Short Term Programs Abroad; may be taught abroad. Effective: 2005 Spring Quarter.

DRA 002—Acting: The Basics: History & Practice (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to the historical evolution of the actor—from ancient Greece & Asia to the Hollywood icon & postdramatic performer—and the practical foundations of acting for stage and screen. Onstage opportunities within lecture course structure. GE credit: AH, OL, VL. Effective: 2015 Winter Quarter.

DRA 005—Understanding Performance: Appreciation of Modern Theatre, Dance, Film & Performance Art for the Humanities & Sciences (4)

Lecture/Discussion—3 hour(s); Discussion/Laboratory—1 hour(s). Relevance of theatre and performance to modern culture, science and society. Approaches to theatre/dance/media/performance art, integrated into Mondavi Center for the Arts and Theatre & Dance Department programs. (Same course as SAS 041.) GE credit: AH, DD, OL, VL, WC, WE. Effective: 2015 Winter Quarter.

DRA 010—Introduction to Acting (4)

Discussion/Laboratory—4 hour(s). Fundamentals of movement, speech, theatre games, and improvisation. Selected reading and viewing of theatre productions. Intended for students not specializing in Dramatic Art. GE credit: OL, VL. Effective: 2015 Spring Quarter.

DRA 011—Introduction to Presentation Skills (2)

Lecture/Lab—4 hour(s). Limited to 20 students. Development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a basic level. Effective: 2013 Spring Quarter.

DRA 014—Introduction to Contemporary Dance (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Introduction to basic issues and methods in contemporary dance. Focus on preparing the student for dancing and dance-making through basic techniques of improvisation and composition. Consideration of dance as a cultural practice. GE credit: VL. Effective: 2012 Fall Quarter.

DRA 020—Introduction to Dramatic Art (4)

Lecture—3 hour(s); Discussion—1 hour(s). Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts. GE credit: AH, VL, WC, WE. Effective: 2013 Fall Quarter.

DRA 021A—Fundamentals of Acting (4) *Review all entries*

Lecture—2 hour(s); Laboratory—4 hour(s). Open to students planning to major in Theatre & Dance. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of theatre productions. GE credit: OL, VL. Effective: 2016 Fall Quarter.

DRA 021A—Fundamentals of Acting (4) *Review all entries*

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): Consent of Instructor. Open to Theatre & Dance majors only; all other students may enroll in DRA 010. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of theatre productions. GE credit: OL, VL. Effective: 2020 Fall Quarter.

DRA 024—Visual Aspects of Dramatic Art (4)

Lecture/Discussion—4 hour(s). Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup. GE credit: AH, VL. Effective: 2013 Fall Quarter.

DRA 025—Technical Aspects of Dramatic Production (3)

Lecture—3 hour(s). Technical principles of dramatic production emphasizing the three areas of scenic, costume and lighting studios. Subjects covered include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production. Effective: 1997 Winter Quarter.

DRA 026—Performing Arts Production Management (3)

Lecture—3 hour(s). Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction, audience control, box office, promotion, safety, accommodations for persons with disabilities and emergency procedures. Effective: 1997 Winter Quarter.

DRA 028—Entertainment Engineering & Management: Stagecraft to Stage Management (4)

Lecture/Discussion—4 hour(s). Introduction to technical production and management in theatre and dance. Topics include stage management, theatrical mechanics, backstage protocols, scenic construction, properties, lighting, basic shop tools, costume shop use and construction, basic make-up, sound equipment, graphics and robotics for theatre. GE credit: AH. Effective: 2015 Spring Quarter.

DRA 030—Theatre Laboratory (1-5)

Project (Term Project)—2 hour(s). Prerequisite(s): Consent of Instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated up to 11 unit(s). Effective: 2016 Spring Quarter.

DRA 040A—Beginning Modern Dance (2)

Discussion/Laboratory—4 hour(s). Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated up to 2 time(s) if a non-Dance major; a Dance major may apply to the dance faculty advisor for permission to repeat more times as dance is a repetitive practice that involves constant reiteration and demands this for improvement and better understanding of the somatic and proprioceptive skills. GE credit: AH, VL. Effective: 2017 Spring Quarter.

DRA 040B—Intermediate Modern Dance (2)

Discussion/Laboratory—4 hour(s). Prerequisite(s): DRA 040A; or Consent of Instructor. Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history. May be repeated up to 1 time(s) if a Dance major; further repeats negotiated with the Dance faculty advisor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 041A—Beginning Jazz Dance (2)

Discussion/Laboratory—4 hour(s). Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated up to 1 time(s). Effective: 2017 Spring Quarter.

DRA 041B—Intermediate Jazz Dance (2)

Discussion/Laboratory—4 hour(s). Prerequisite(s): DRA 041A; or Consent of Instructor. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated up to 1 time(s) with consent of instructor. Effective: 2016 Spring Quarter.

DRA 042A—Beginning Ballet (2)

Discussion/Laboratory—4 hour(s). Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 042B—Intermediate Ballet (2)

Discussion/Laboratory—4 hour(s). Prerequisite(s): DRA 042A; or Consent of Instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 043A—Contact Improvisation Dance (2)

Lecture/Lab—4 hour(s). Fundamentals of contact improvisation and its applications to all forms of dance, performance, sports, physical safety and health. Solo improvisation, safety, communication, alignment, basic lifting and weight-sharing, intuition, developing relaxed readiness and personal expression. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2014 Fall Quarter.

DRA 043B—Intermediate Contact Improvisation (2)

Lecture/Lab—4 hour(s). Prerequisite(s): DRA 043A; or Consent of Instructor. Building on the fundamentals. Reviewing basics, extended improvising, skillfully working with partners of different sizes and abilities, advanced lifting, advanced safety practices, embracing risk and disorientation, subtle nuances of communication. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 044A—Beginning Hip Hop Dance (2)

Discussion/Laboratory—4 hour(s). Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

DRA 044B—Intermediate Hip Hop Dance (2)

Discussion/Laboratory—4 hour(s). Prerequisite(s): DRA 044A; or Consent of Instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

DRA 055—Contemporary Local, National & Global Theatre, Dance & Performance (4)

Lecture/Discussion—4 hour(s). Introduction a range of contemporary theatre, dance and performance in local, national and international settings. Training in critical approaches to and aesthetic appreciation of these forms. Emphasis varies based on instructor. GE credit: AH, DD, VL, WC. Effective: 2015 Fall Quarter.

DRA 056A—History of Theatre & Dance I: Myth, Magic & Madness (4)

Lecture/Discussion—4 hour(s). Exploration of aesthetic movements in various disciplines of theatre and dance from the origins to 1550. Examination of Greek, Roman, Sanskrit, Kathakali, Chinese, Japanese, Mesoamerican, Medieval European, and Indigenous theatre and dance including oral, ritual and shamanic performance. Offered once a year. GE credit: AH, VL, WC. Effective: 2014 Fall Quarter.

DRA 056B—History of Theatre & Dance II: Romance, Revenge & Rebellion (4)

Lecture/Discussion—4 hour(s). Exploration of aesthetic movements in various disciplines of theatre and dance from 1550-1850. Examination of genres related to romance, revenge and rebellion using European, North and South American, and Asian examples. Offered once a year. GE credit: AH, VL, WC. Effective: 2015 Winter Quarter.

DRA 056C—History of Theatre & Dance III: Sex, Society & the State (4)

Lecture/Discussion—4 hour(s). Exploration of aesthetic movements in various disciplines of theatre and dance from 1850-1968. Examination of melodrama, popular theatre, naturalism, psychological realism, and the avant-garde using European, North and South American, Asian, and African examples. Offered once a year. GE credit: AH, VL, WC. Effective: 2015 Spring Quarter.

DRA 092—Internship in Dramatic Art (1-12)

Variable—1-12 hour(s). Prerequisite(s): Consent of instructor and department chairperson. Restricted to lower division students with less than 84 units completed. Internship outside the Department of Theatre & Dance enabling students to practice their skills. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2006 Fall Quarter.

DRA 098—Directed Group Study (1-5)

Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

DRA 099—Special Study for Undergraduates (1-5)

(P/NP grading only.) Effective: 1997 Winter Quarter.

DRA 111—Advanced Presentation Skills (2)

Lecture/Lab—4 hour(s). Limited 20 students. Development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a competent to fluent level. GE credit: OL. Effective: 2013 Spring Quarter.

DRA 111S—Representation & Identity in Culture & Cinema (4)

Lecture/Discussion—2 hour(s); Film Viewing—4 hour(s). Issues of personal and collective identity via study of film narratives from different cultures. Reflection of dominant cultural identities in film. May be taught abroad in Australia. Effective: 2006 Spring Quarter.

DRA 114—Theatre on Film (4)

Lecture/Discussion—3 hour(s); Film Viewing—2 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Study of six/eight plays on film, using mixed casts and raising issues of diversity. Focus: sociohistorical context for production and reception, interpretation and analysis of topics (gender, ethnicity, age, politics, philosophy), and filming, screenwriting, design, and acting/directing for film. GE credit: AH, SS, VL. Effective: 2016 Fall Quarter.

DRA 115—Advanced Study of Major Film Makers (4)

Lecture/Discussion—3 hour(s); Film Viewing—2 hour(s). Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films. May be repeated for credit when different film creator studied, or studied with a different methodological approach. GE credit: VL. Effective: 2016 Spring Quarter.

DRA 116—Design on Screen (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinematography. Introductory principles and practice, history. May be repeated up to 2 time(s) when topic differs. (Same course as CTS 116.) GE credit: AH, VL. Effective: 2013 Fall Quarter.

DRA 120—Intermediate Acting/Gateway: The Actor's Toolkit (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 021A; or Consent of Instructor. Limited enrollment. Implementation of acting tools drawn predominantly from Stanislavsky's 'system'. Gateway into the Advanced Acting courses. GE credit: OL, VL. Effective: 2013 Spring Quarter.

DRA 121A—Advanced Acting: Scene Study & Script Analysis (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. In-depth study, analysis and performance of texts from different eras, genres and styles. Implementation of tools to undertake independent preparation of character creation. May be repeated up to 8 unit(s) (twice) as acting requires repetition to habituate the body and imagination to new practices; new scripts and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2013 Spring Quarter.

DRA 121B—Advanced Acting: Rehearsal Processes & Practices (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. Development of rehearsal practice and etiquette, using a variety of scenes from different eras and genres. Established to enable visiting artists in residence to undertake the instruction, as well as faculty. May be repeated up to 8 unit(s) (twice) as student is exposed to different professional practitioners' working processes; new etudes, scripts and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2013 Spring Quarter.

DRA 121C—Advanced Acting: Character & Style (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. Study of psycho-physical techniques to create characters with an emphasis on non-realistic styles. May be repeated up to 8 unit(s) (twice) as acting requires repetition to habituate the body and imagination to new practices; new scripts and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2012 Fall Quarter.

DRA 122A—Advanced Acting: Devising & Collaboration (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. Study and practice of various devising techniques, to collaborate on and produce a series of short etudes and dramatic scenes/short plays. May be repeated up to 8 unit(s) (twice) as acting requires repetition to habituate the body and imagination to new practices; new scripts and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2016 Spring Quarter.

DRA 122B—Advanced Acting: Shakespeare & His Contemporaries (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. Study and performance of classical texts (monologues and dialogues), with a focus on Shakespeare and the Elizabethan world view. May be repeated up to 8 unit(s) (twice) as acting requires repetition to habituate the body and imagination to new practices; new monologues and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2013 Spring Quarter.

DRA 122C—Advanced Acting: Special Topics in Acting (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 120; and Consent of Instructor. Restricted to Theatre & Dance majors; limited enrollment. Intensive study and practical exploration of a specialized area; for example, World Theatre, Social Theatre, Physical Theatre, Musical Theatre, the Ancient Greeks, etc. May be repeated up to 8 unit(s). GE credit: AH, OL, VL. Effective: 2016 Fall Quarter.

DRA 124A—Principles of Theatrical Design: Scenery (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. upper division standing; Pass One restricted to Theatre & Dance majors. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction. GE credit: AH, VL. Effective: 2019 Winter Quarter.

DRA 124B—Principles of Theatrical Design: Scenery (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing; Pass One restricted to Theatre & Dance majors. Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays. GE credit: AH, VL. Effective: 2019 Winter Quarter.

DRA 124C—Principles of Theatrical Design: Lighting (4)

Lecture/Lab—4 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing; Pass One restricted to Theatre & Dance majors. Theories of lighting the stage, equipment and control systems, execution of lighting plots. GE credit: AH, VL. Effective: 2019 Winter Quarter.

DRA 124D—Principles of Theatrical Design: Costume (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): upper division standing or consent of instructor. Upper division standing; Pass One restricted to Theatre & Dance majors. Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern and period plays. GE credit: AH, OL, VL. Effective: 2019 Spring Quarter.

DRA 124E—Costume Design for Film (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Pass One restricted to Theatre & Dance majors. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films. (Same course as CTS 124E.) GE credit: AH, OL, VL. Effective: 2018 Winter Quarter.

DRA 125—Scenic Painting: Studio (4)

Lecture—2 hour(s); Studio—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): DRA 024 or DRA 028; or Consent of Instructor. upper division standing in Theatre & Dance, Art Studio, or Design. Scene painting techniques, practices and materials including color mixing and matching, wood graining, faux painting techniques, glazing, creating foliage, stone and brick. May be repeated up to 1 time(s) with consent of instructor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 126—Principles of Performing Arts Stage Management (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Stage management principles for theatre, dance, musical theatre, music, and concerts. The dynamical role of the stage manager in the performing arts, upper-management team. Effective: 2014 Fall Quarter.

DRA 127A—Principles of Directing (4)

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): Consent of Instructor. Director's creative approach to the play and to its staging. GE credit: VL. Effective: 2016 Spring Quarter.

DRA 127B—Principles of Directing (4)

Lecture—2 hour(s); Laboratory—4 hour(s); Rehearsal. Prerequisite(s): DRA 127A; or Consent of Instructor. Director's creative approach to the actor. GE credit: VL. Effective: 2016 Spring Quarter.

DRA 128—Principles of Theatre Sound (3)

Lecture/Discussion—2 hour(s); Laboratory—3 hour(s). Fundamentals of sound, sound equipment, and sound design as used in modern theatre and other performance venues. Assembly, set-up, and operation of basic theatre sound reinforcement system, recording system, and theatrical playback system. Effective: 2004 Winter Quarter.

DRA 130—Approaches to Theatrical Design: Practice & Theory (4)

Seminar—2 hour(s); Studio—4 hour(s). Prerequisite(s): DRA 124A or DRA 124B or DRA 124C or DRA 124D or DRA 124E; Upper division standing in Theatre & Dance, Art Studio or Design; or consent of instructor. Advanced design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, scenery, lighting, costume, makeup, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres. May be repeated up to 3 time(s) when topic differs; when instructor differs. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 135—Voice in Performance (2)

Performance Instruction—4 hour(s). Prerequisite(s): DRA 021B; or Consent of Instructor. Progression of exercises to free, develop and strengthen the voice, as a human and then as an actor's instrument with emphasis on how the voice works, to freeing the channel for sound, to interpersonal communication. May be repeated up to 2 time(s). Effective: 2009 Fall Quarter.

DRA 140A—Dance Composition (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): DRA 040A or DRA 041A or DRA 042A; or Consent of Instructor. Introduction to the craft of choreography. Compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy. GE credit: VL. Effective: 2016 Spring Quarter.

DRA 140B—Dance Composition (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): DRA 140A. Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment. Effective: 1999 Spring Quarter.

DRA 140C—Dance Composition (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): DRA 140A; DRA 140B. Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it through creation of short dance studies. Effective: 1999 Spring Quarter.

DRA 141—Introduction to the Fundamentals of Movement (4)

Lecture/Discussion—4 hour(s). Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of various body mind specialists including Laban, Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga. GE credit: VL. Effective: 2014 Fall Quarter.

DRA 142—History of Modern Dance (4)

Lecture/Discussion—4 hour(s). Modern Dance tradition, focusing on its theorizations of individual and social identity. Students will write and choreograph analyses of principle dances in this tradition. GE credit: AH, VL, WE. Effective: 2015 Winter Quarter.

DRA 143—Dance & Movement Studio (1-4)

Discussion/Laboratory—2-8 hour(s). Prerequisite(s): Consent of Instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions. May be repeated up to 8 unit(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 144—Introduction to Traditional Chinese Physical Culture (4)

Lecture/Discussion—4 hour(s). Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: AH, SS. Effective: 2011 Fall Quarter.

DRA 144A—Introduction to Traditional Chinese Embodied Culture (4)

Lecture/Discussion—4 hour(s). Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: AH, DD, SS, VL, WC. Effective: 2014 Winter Quarter.

DRA 144B—Traditional Chinese Physical Culture (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): DRA 144A. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. May be repeated up to 2 time(s) when content and instructor differs and if student progression is required. GE credit: AH, DD, SS, VL, WC. Effective: 2014 Winter Quarter.

DRA 144C—Daoist Philosophy in Traditional Chinese Movement Culture (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): DRA 144B. Daoist practices of movement and their relation to daoist philosophy, explored through work in dance laboratory conditions. Integration of practice with conceptual analysis, and critical philosophy around values and ethical action. May be repeated up to 2 time(s) when content or instructor differs and if student progression is required. GE credit: AH, DD, VL, WC. Effective: 2014 Winter Quarter.

DRA 145—Directed Choreography Projects (2) *Review all entries*

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 140A or DRA 140B or DRA 140C; or Consent of Instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals. May be repeated up to 4 time(s) with consent of instructor. GE credit: AH. Effective: 2020 Winter Quarter.

DRA 145—Directed Choreography Projects (4) *Review all entries*

Lecture/Lab—6 hour(s); Rehearsal. Prerequisite(s): DRA 140A or DRA 140B or DRA 140C; or Consent of Instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagecraft and directing the on-stage rehearsals. May be repeated up to 4 time(s) with consent of instructor. GE credit: AH. Effective: 2020 Fall Quarter.

DRA 146A—Professional Track Modern Dance I (4)

Lecture/Lab—6 hour(s). Prerequisite(s): Consent of Instructor. Professionally oriented performance training. Rigorous, consistent training regimen based on traditional modern dance technique. Breath and voice, skeletal and muscular placement, moving from the spine, contraction technique, movement intention. May be repeated up to 2 time(s). GE credit: VL. Effective: 2016 Spring Quarter.

DRA 146B—Professional Track Modern Dance II (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 146A; and Consent of Instructor. Body and space relationships in solos, duets and group work; stylistic variations of Graham technique; works of Paul Taylor. May be repeated up to 1 time(s). GE credit: VL. Effective: 2016 Spring Quarter.

DRA 146C—Professional Track Modern Dance III (4)

Lecture/Lab—6 hour(s). Prerequisite(s): DRA 146A; DRA 146B; and Consent of Instructor. Continuation of DRA 146B. Time as a theatrical device, sustaining movement and non-movement, phrasing, musicality. May be repeated up to 1 time(s). GE credit: VL. Effective: 2017 Winter Quarter.

DRA 150—American Theatre & Drama (4)

Lecture—4 hour(s). The history of the theatre from Colonial times to the present. Readings of selected plays. GE credit: ACGH, AH, DD, VL, WE. Effective: 2014 Winter Quarter.

DRA 151S—Australian Performance & Culture (4)

Lecture/Discussion—2 hour(s); Seminar—2 hour(s). Australian performance and theatre practices as a product of its culture of origin. Relationships between art and society. May be taught abroad in Australia. Effective: 2006 Spring Quarter.

DRA 154—Asian Theatre & Drama: Contexts & Forms (4)

Lecture/Discussion—4 hour(s). Selected Asian plays and performance forms in their cultural and artistic contexts; myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; intercultural performance—the fusion of Asian and Western traditions. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

DRA 155—Representing Race in Performance (4)

Lecture—4 hour(s). Representation and performance of "race" in American culture featuring different sub-headings such as "African American Theatre" or "Asian-Americans on Stage." May be repeated up to 1 time(s) when topic differs. GE credit: AH, DD, WE. Effective: 2012 Spring Quarter.

DRA 155A—African American Dance & Culture in the United States, Brazil & the Caribbean (4)

Lecture/Discussion—4 hour(s). Comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as AAS 155A.) GE credit: AH, VL, WC. Effective: 2012 Fall Quarter.

DRA 155B—Ancient & Contemporary Greek Theatre & Dance (6)

Discussion/Laboratory—10 hour(s); Performance Instruction—10 hour(s); Seminar—13 hour(s). Origins of early theatres and the first actors, playwrights and dancers and their powerful influence on western performance and thought up to present day. Offered in Greece. GE credit: AH. Effective: 2011 Fall Quarter.

DRA 156A—History of Theatre and Dance: Ancient to 1650 (4) *Review all entries Discontinued*

Lecture—4 hour(s). CANCELLED IN 2006 Effective: 2006 Fall Quarter.

DRA 156A—Performance Analysis (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Performance on the stage, in the street, in everyday life, ritual and in politics. Satire, irony, creative protest and performance. Social movements, the state and performance as tactical intervention. GE credit: AH, DD, WE. Effective: 2020 Fall Quarter.

DRA 156AN—Performance Analysis (4) *Review all entries Discontinued*

Lecture—3 hour(s); Discussion—1 hour(s). Performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE credit: AH, DD, WE. Effective: 2020 Fall Quarter.

DRA 156AN—Performance Analysis (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE credit: AH, DD, WE. Effective: 2016 Spring Quarter.

DRA 156B—Theatre in History & Place: Local, National & Global Conditions for Production (4)

Lecture—3 hour(s); Discussion—1 hour(s). Exploration of local, national and global issues in theatre production, with special attention to historical changes in social and political contexts for performance. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

DRA 156C—Modern Aesthetic Movements in Performance (4)

Discussion/Laboratory—3 hour(s); Discussion—1 hour(s). Important movements in performance, especially theatre and dance, from realism to the present. Primary emphasis on Western traditions though others may be studied. GE credit: AH, WE. Effective: 2017 Spring Quarter.

DRA 156D—Theatre History Through Shakespeare (4)

Lecture—4 hour(s); Extensive Writing. Shakespeare's plays, theatre history, and theatre today. European contexts from 1590-2004 and international theatre from 20th century. Stagecraft, different media (print, stage, film), social/political environments, design, and cultural change (gender, sexuality and ethnicity). May be repeated up to 1 time(s). GE credit: AH, OL, WC, WE. Effective: 2014 Spring Quarter.

DRA 158—Performance Studies Undergraduate Seminar (4) *Review all entries*

Seminar—4 hour(s). Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic issues as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry. May be repeated for credit. GE credit: WE. Effective: 2020 Fall Quarter.

DRA 158—Performance Studies Undergraduate Seminar (4) *Review all entries*

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. DRA 156AN recommended. Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic issues as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry. May be repeated for credit. GE credit: WE. Effective: 2016 Spring Quarter.

DRA 159—Contemporary Experimental Performance, Theatre & Drama (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Evaluation and examination of the "New Theatre;" its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. May be repeated up to 3 time(s) when content differs. GE credit: AH, DD, VL, WC, WE. Effective: 2014 Spring Quarter.

DRA 159S—Contemporary Experimental Performance, Theatre & Drama (4)

Lecture/Discussion—4 hour(s). Evaluation and examination of the "New Theatre;" its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. May be taught abroad. May be repeated up to 12 unit(s) when instructor or content differs. GE credit: AH, WE. Effective: 2015 Winter Quarter.

DRA 160A—Principles of Playwriting (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE. Effective: 2018 Winter Quarter.

DRA 160B—Principles of Playwriting (4)

Lecture—4 hour(s). Prerequisite(s): DRA 160A; and Consent of Instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE. Effective: 2016 Spring Quarter.

DRA 170—Media Theatre (4)

Lecture—1 hour(s); Rehearsal—2 hour(s); Performance Instruction—1 hour(s). New media and application of in theatre devising and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2017 Spring Quarter.

DRA 174—Acting for Camera (4) *Review all entries*

Lecture/Lab—6 hour(s). Prerequisite(s): Consent of Instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated up to 2 time(s) when instructor differs. (Same course as CDM 107) GE credit: AH. Effective: 2020 Fall Quarter.

DRA 174—Acting for Camera (4) *Review all entries*

Lecture/Lab—6 hour(s). Prerequisite(s): Consent of Instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated up to 8 unit(s) when instructor differs. (Same course as CTS 174.) Effective: 2013 Spring Quarter.

DRA 175—Small Scale Film Production (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Lecture and intensive workshop teaching small-scale film production. Appointments as a(n) director, director of photography, actor, writer, lighting designer, sound designer and other critical positions are used to produce and submit a short film to a film festival. May be repeated up to 2 time(s). (Same course as TCS 175.) Effective: 2011 Fall Quarter.

DRA 180—Theatre Laboratory (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit. Effective: 2016 Spring Quarter.

DRA 180A—Theatre Laboratory: Performance (1-5)

Rehearsal—12 hour(s). Prerequisite(s): Consent of Instructor. Limited enrollment; admission by audition. Rehearsal and performance of a production directed or choreographed by visiting Granada Artists-in-Residence and/or faculty, and/or the UG Edge Festival. May be repeated for credit as each production involves different scripts, directions, challenges of rehearsal practices and performance processes, it is possible for students to appear in a variety of productions in the course of their education. Effective: 2013 Spring Quarter.

DRA 180B—Theatre Laboratory: Design (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Design-related participation in Theatre & Dance productions involves research, creation and implementation of design concept in collaboration with the director and other members of the production team. May be repeated for credit as each theatrical piece is conceived and produced afresh with new source material, scripts, and production style, the challenges and assignments for the designers are new each time they design a show. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 180C—Theatre Laboratory: Management, Directing, other Production Team (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Participation in Theatre & Dance production in management, direction, choreography, dramaturgy, writing or other production related role; research, creation and implementation of production concept in collaboration with members of the production team and cast. May be repeated for credit with required permission from the Theatre & Dance department. Effective: 2020 Winter Quarter.

DRA 180D—Theatre Laboratory: Crew (2-4)

Laboratory—6-12 hour(s). Prerequisite(s): Consent of Instructor. Participation in Theatre & Dance productions as backstage running crew which will involve skill development, rehearsal and execution of performance. May be repeated for credit. Effective: 2013 Spring Quarter.

DRA 180E—Theatre Laboratory: Scenic (1-4)

Laboratory—3-12 hour(s). Prerequisite(s): Consent of Instructor. Practical experience working on scenery and properties for Theatre & Dance department productions. Study and execution of basic scenery and prop engineering, construction, painting, rigging. Study of techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement. May be repeated for credit. Effective: 2013 Spring Quarter.

DRA 180F—Theatre Laboratory: Costume (1-4)

Laboratory—3-12 hour(s). Prerequisite(s): Consent of Instructor. Practical experience working on costumes for Theatre & Dance department productions. Study and execution of basic costume construction techniques and materials, tools, and equipment use. Skills development, professional etiquette. Safety training requirement. May be repeated for credit. Effective: 2013 Spring Quarter.

DRA 180G—Theatre Laboratory: Lighting/Sound/Projection (1-4)

Laboratory—3-12 hour(s). Prerequisite(s): Consent of Instructor. Practical experience working on lighting, sound or projections for Theatre & Dance department productions. Study and execution of basic techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement. May be repeated for credit. Effective: 2013 Spring Quarter.

DRA 192—Internships in Theatre & Dance (1-12)

Internship—3-36 hour(s). Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. May be repeated up to 12 unit(s). Not open to students who have completed DRA 192S. (P/NP grading only.) Effective: 2004 Fall Quarter.

DRA 192S—Internships in Theatre & Dance (1-12) *Review all entries*

Internship—3-36 hour(s). Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. May be taught abroad in Sydney, Australia. May be repeated up to 12 unit(s). Not open to students who have completed DRA 192. (P/NP grading only.) Effective: 2005 Spring Quarter.

DRA 192S—Internships in Theatre & Dance (1-12) *Review all entries*

Internship—3-36 hour(s). Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. May be taught abroad. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2021 Winter Quarter.

DRA 194HA—Special Study for Honors Students (3)

Independent Study—9 hour(s). Prerequisite(s): Qualification for Letters & Science Honors Program and admission to Theatre & Dance Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Theatre & Dance. (P/NP grading only.) Effective: 2016 Spring Quarter.

DRA 194HB—Special Study for Honors Students (3)

Independent Study—9 hour(s). Prerequisite(s): Consent of Instructor. Qualification for Letters & Science Honors Program and admission to Theatre & Dance Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Theatre & Dance. Effective: 2016 Spring Quarter.

DRA 195—Senior Capstone Experience (2)

Project (Term Project); Lecture/Discussion—1 hour(s). Open to Theatre & Dance Majors who have completed 135 or more units. Capstone experience for majors. Examination, reflection and synthesis on development. Discussion of professional development and translatable skills. Individual project and development of portfolio. (P/NP grading only.) GE credit: AH, WE. Effective: 2016 Fall Quarter.

DRA 197T—Tutoring in Dramatic Art (1-5)

Tutorial—1-5 hour(s). Prerequisite(s): Consent of Instructor. Upper division or graduate standing with major in Theatre & Dance; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2016 Spring Quarter.

DRA 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

DRA 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

DRA 200—Methods & Materials in Theatre Research (4)

Seminar—3 hour(s); Term Paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field. Effective: 1997 Winter Quarter.

DRA 211—Advanced Voice & Speech (3)

Lecture/Discussion—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): Consent of Instructor. Open only to Dramatic Arts Students and Ph.D. students with an emphasis in Performance and Theatre. Review a progression of exercises to free, develop and strengthen the voice, first as a human instrument, and then as an actor's instrument using various texts such as Shakespeare, Ibsen and contemporary plays. Required for the M.F.A. degree in Acting. May be repeated up to 2 time(s). Effective: 2016 Spring Quarter.

DRA 212—Advanced Stage Movement (3)

Laboratory—6 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing in the MFA Program. Open to advanced undergraduates by consent of instructor. Application of modes of exploration, breath placement, and the use of imagery as well as Laban's effort/shape system as a method of analysis in classic and modern plays. May be repeated for credit. Effective: 2016 Spring Quarter.

DRA 221—Special Problems in Advanced Acting (4)

Seminar—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): Consent of Instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit. Effective: 1997 Winter Quarter.

DRA 224A—Seminar in Theatrical Design: Ancient Worlds; Early 17th Century (4)

Seminar—2 hour(s); Project (Term Project)—2 hour(s). Prerequisite(s): Consent of Instructor. Group study while focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Greek, Medieval, Renaissance, Shakespearean, Jacobean, early 17th century. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills. Effective: 2016 Spring Quarter.

DRA 224B—Seminar in Theatrical Design: Mid-17th Century to 1900 (4)

Seminar—2 hour(s); Project (Term Project)—2 hour(s). Prerequisite(s): Consent of Instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Cavalier, Restoration 18th century opera and ballet, 19th century drama. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills. Effective: 2016 Spring Quarter.

DRA 224C—Seminar in Theatrical Design: the 20th Century (4)

Seminar—2 hour(s); Project (Term Project)—2 hour(s). Prerequisite(s): Consent of Instructor. Group study focusing primarily on one discipline—scenic, costume or lighting design. Genres covered in 20th century: Realism, Brecht, Musicals, Contemporary Dance, short narrative film. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills. Effective: 2016 Spring Quarter.

DRA 224D—Seminar in Theatrical Design: Contemporary Concepts (4)

Seminar—2 hour(s); Project (Term Project)—2 hour(s). Prerequisite(s): Consent of Instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on contemporary design concepts for new works and classics: Shakespeare, modern dance, concept plays and musicals. Script and character analysis for design in performance, research, design projects. Effective: 2016 Spring Quarter.

DRA 224E—Seminar in Theatrical Design: Advanced Concepts (4)

Seminar—2 hour(s); Project (Term Project)—2 hour(s). Prerequisite(s): Consent of Instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on special issues in contemporary design concepts for new works and classics. Script and character analysis for design in performance, research, design projects. Effective: 2016 Spring Quarter.

DRA 225—Performance Design Studio: Techniques & Media (2)

Studio—2 hour(s). Prerequisite(s): DRA 224A (can be concurrent) or DRA 224B (can be concurrent) or DRA 224C (can be concurrent) or DRA 224D (can be concurrent) or DRA 224E (can be concurrent); Consent of Instructor. Exploration and development of techniques and skills in the performance design process. Drafting, model building, drawing, painting and rendering, costume drawing, color theory, lighting techniques, design portfolio preparation and presentation. May be repeated up to 5 time(s). Effective: 2016 Spring Quarter.

DRA 228—Seminar in Directing Theory: Non-Realism (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays-Greek to the present; emphasis on textual analysis. Effective: 2016 Spring Quarter.

DRA 229—Special Problems in Directing (4)

Seminar—2 hour(s); Laboratory—2 hour(s); Rehearsal—4 hour(s). Prerequisite(s): Consent of Instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated up to 2 time(s). Effective: 2014 Spring Quarter.

DRA 230—Advanced Problems in Choreography & Performance (2)

Discussion/Laboratory—2 hour(s). Prerequisite(s): Consent of Instructor. Explores contemporary issues of choreography and performance in depth and how those issues pertain to performance work. Focus will include contemporary thought on representation, legibility, new forms, and cultural attitudes. May be repeated up to 6 time(s). Effective: 2012 Winter Quarter.

DRA 244—Critical Approaches to Traditional Systems of Body Movement (4)

Discussion/Laboratory—6 hour(s); Project (Term Project); Term Paper. Prerequisite(s): Consent of Instructor. Introduction to traditional systems for body movement, development of critical approaches to them, and experiments in how they inform training and practice in theatre, dance, and performance. May be repeated up to 5 time(s). Effective: 2016 Fall Quarter.

DRA 250—Modern Theatre (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced. Effective: 2016 Spring Quarter.

DRA 251—Scoring & Scripting in Performance (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists' "scores" will layer and transform the "script" into performance for specific time, place, spectators. Effective: 2016 Spring Quarter.

DRA 252—Performance: Concepts of Space, Place, & Time (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Innovative theories of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consideration of various tempi from music and movement. Effective: 2016 Spring Quarter.

DRA 253—Approaches to Collaboration (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Exploration of different approaches to collaboration among artists in different media and their influence on the creative process. Effective: 2016 Spring Quarter.

DRA 254—Performing Identities/Personae (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Historical and contemporary theories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual orientation. Effective: 2016 Spring Quarter.

DRA 255—Composition in the Arts (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Examine manner in which specific elements utilized by actors, dancers, directors, choreographers, and designers are combined or related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products. May be repeated up to 1 time(s). Effective: 2016 Spring Quarter.

DRA 256—Visual Language for Performance (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Restricted to graduate students. Exploration of different approaches and methods to the visual elements of performance. Focus on design and style for different media and genres, storytelling through visual elements of performance. Effective: 2017 Winter Quarter.

DRA 257—Interdisciplinary Seminar in Theatre, Dance & Performance (1)

Seminar—1.5 hour(s); Project (Term Project)—1.5 hour(s). Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the M.F.A. in Dramatic Art; students taking the Ph.D. in Performance Studies or the D.E. in Studies in Performance & Practice. Interdisciplinary seminar for first- and second-year M.F.A. students in Theatre & Dance. Topics range from current practice in dance, theatre, film and performance, to leading edge developments by outstanding practitioners in the field. May be repeated up to 2 time(s). Effective: 2017 Spring Quarter.

DRA 259—Topics in Contemporary Theatre & Performance (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship; e.g., "Brecht & After," "British Theater," "Race & Gender in Performance." May be repeated up to 5 time(s). Effective: 2016 Spring Quarter.

DRA 260—Approaches & Methodologies to Studies in Performance & Practice (4)

Seminar—3 hour(s); Term Paper; Project (Term Project). Prerequisite(s): Admission to any graduate program in the University and consent of instructor. Preference to students enrolled in the Designated Emphasis in Studies in Performance and Practice. Instruction is offered a variety of disciplinary approaches and methodologies in Performance & Practice, with a focus is on cross-disciplinary learning and research. Usually offered each quarter. May be repeated for credit when content differs. Effective: 2016 Fall Quarter.

DRA 265A—Performance Studies: Modes of Production (4)

Seminar—3 hour(s); Term Paper; Project (Term Project). Prerequisite(s): Consent of Instructor. Introduces students to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory. Usually offered in alternate years. May be repeated up to 3 time(s) when topic and instructor differs. Effective: 2016 Fall Quarter.

DRA 265B—Performance Studies: Signification & the Body (4)

Seminar—3 hour(s); Term Paper; Project (Term Project). Prerequisite(s): Consent of Instructor. Introduces students to analysis of the body in performance, drawing on theoretical models from several fields. May be repeated up to 3 time(s) when topic differs. Effective: 2016 Fall Quarter.

DRA 265C—Performance Studies: Performance & Society (4)

Seminar—3 hour(s); Term Paper; Project (Term Project). Prerequisite(s): Consent of Instructor. Introduces students to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. May be repeated up to 3 time(s) when topic differs. Effective: 2016 Fall Quarter.

DRA 265D— Performance studies: Theory, History, Criticism (4)

Seminar—3 hour(s); Term Paper; Project (Term Project). Prerequisite(s): Consent of Instructor. Introduction to the theory, history and criticism, informing performance studies. May be repeated up to 3 time(s) when topic differs. Effective: 2016 Fall Quarter.

DRA 280—Theatre Laboratory (1-12)

Variable. Prerequisite(s): Consent of Instructor. Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit. Effective: 2016 Fall Quarter.

DRA 298—Group Study (1-5)

Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

DRA 299—Individual Study (1-12)

Variable. Prerequisite(s): Consent of Instructor. Individual study. (S/U grading only.) Effective: 2016 Fall Quarter.

DRA 299D—Dissertation Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Dissertation research. (S/U grading only.) Effective: 2016 Fall Quarter.

DRA 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2016 Spring Quarter.

DRA 413—Stage Make-up (1)

Lecture/Lab—2 hour(s). Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up. Effective: 1997 Winter Quarter.

DVM—Veterinary Clinical Rotation

Courses in DVM:

Courses in DVM are not displayed. For information, contact the School of Veterinary Medicine at 530-752-1360; <http://www.vetmed.ucdavis.edu>.

EAD—Engineering Applied Science-Davis

Courses in EAD:**EAD 230—Topics in Computational Fluid Dynamics (3)**

Lecture—3 hour(s). Prerequisite(s): EAD 210A; EAD 210B; or Consent of Instructor. Hands-on approach to numerical methods for compressible fluid flow. Readings and discussions of solution strategies will be complemented with programming exercises and projects to give first-hand experience with performance and accuracy of several computational methods; from upwind differencing to Godunov methods. Effective: 2000 Fall Quarter.

EAD 289A—Special Topics in Applied Science: Atomic, Molecular, & Optical Physics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Atomic, Molecular, and Optical Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289B—Special Topics in Applied Science: Chemical Physics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Chemical Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289C—Computational Physics: Computational Physics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Computational Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289D—Special Topics in Applied Science: Biophotonics/Biotechnology (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Biophotonics/Biotechnology. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289E—Special Topics in Applied Science: Materials Science (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Materials Science. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289F—Special Topics in Applied Science: Imaging Science & Photonics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Imaging Science and Photonics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289G—Special Topics in Applied Science: Nonlinear Optics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Nonlinear Optics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289H—Special Topics in Applied Science: Plasma/Fusion Energy Physics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Plasma/Fusion Energy Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289I—Special Topics in Applied Science: Quantum Electronics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Quantum Electronics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289J—Special Topics in Applied Science: Condensed Matter/Statistical Physics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Condensed Matter/Statistical Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289K—Special Topics in Applied Science: Classical Optics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Classical Optics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289L—Special Topics in Applied Science: Microwave & Millimeter-Wave Technology (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Microwave and Millimeter-Wave Technology. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289M—Special Topics in Applied Science: Synchrotron Radiation Science (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Synchrotron Radiation Science. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289N—Special Topics in Applied Science: Space Physics (1-5)

Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Space Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 290—Seminar (1-2)

Seminar—1-2 hour(s). (S/U grading only.) Effective: 1997 Winter Quarter.

EAD 290C—Graduate Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EAD 298—Group Study (1-5)

Lecture—3-15 hour(s). (S/U grading only.) Effective: 1997 Winter Quarter.

EAD 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EAE—Aerospace Science & Engineering

Courses in EAE:

EAE 001—Introduction to Aerospace Science Engineering (1)

Lecture—1 hour(s). Description of the field of aerospace engineering with examples from industry, government, and research. Aerospace engineering principles, ethics, and responsibilities. (P/NP grading only.) Effective: 2002 Fall Quarter.

EAE 010—From the Wright Brothers to Drones & Quadcopters (2)

Lecture—2 hour(s). History of aircraft and its influence on society. Topics covered will include Unmanned Aerial Vehicles, safety considerations, economics and privacy issues. Aerodynamics, stability and control will also be introduced. GE credit: SE, SS. Effective: 2015 Summer Session 1.

EAE 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAE 126—Theoretical & Computational Aerodynamics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 103 C- or better; ENG 105 C- or better; (ENG 180 C- or better or EAD 115 C- or better or MAT 128C C- or better or EME 115 C- or better). Development of general equations of fluid motion. Study of flow field kinematics and dynamics. Flow about a body. Thin airfoil theory. Viscous effects. Applications of numerical methods to wing analysis and design. GE credit: SE. Effective: 2020 Spring Quarter.

EAE 127—Applied Aircraft Aerodynamics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EME 106 C- or better. Principles, governing equations, and predictive theories for aircraft aerodynamics. Lift and drag of 2D airfoils, 3D wings, and high-lift devices. GE credit: SE, WE. Effective: 2017 Fall Quarter.

EAE 129—Stability & Control of Aerospace Vehicles (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 102 C- or better. Restricted to upper division standing. Aircraft and spacecraft stability and control. Derivation of fundamental equations of motion for aircraft/spacecraft. Fundamentals of feedback. Aircraft flight control systems. Spacecraft attitude control systems. GE credit: SE. Effective: 2017 Fall Quarter.

EAE 130A—Aircraft Performance & Design (4)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): EAE 127 C- or better; EAE 129 C- or better (can be concurrent). Major aircraft design experience with multiple realistic constraints including aerodynamics, performance analysis, weight estimation, stability and control, and appropriate engineering standards. GE credit: SE. Effective: 2017 Fall Quarter.

EAE 130B—Aircraft Performance & Design (4)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): EAE 130A C- or better. Restricted to upper division standing. Major aircraft design experience including detailed design, cost analysis, analysis of aircraft structure, propulsion system, aerodynamics, aircraft handling qualities, manufacturing, or meeting relevant engineering standards. GE credit: OL, SE. Effective: 2017 Fall Quarter.

EAE 133—Finite Element Methods in Structures (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 104 C- or better. Open to College of Engineering Students. Introduction to the aerospace structural design process. History of aircraft and spacecraft materials. Effects of loading beyond elastic limit. Deflections and stresses due to combined loading. Virtual work principles, and finite element methods. Applications to aerospace structures. GE credit: SE. Effective: 2011 Fall Quarter.

EAE 135—Aerospace Structures (4)

Lecture—4 hour(s). Prerequisite(s): ENG 104 C- or better; EAE 126 or EAE 127 recommended. Analysis and design methods used in aerospace structures. Shear flow in open, closed and multicell beam cross-sections, buckling of flat and curved sheets, tension field beams, local buckling. GE credit: SE. Effective: 2017 Fall Quarter.

EAE 137—Structural Composites (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 104 C- or better. Overview of materials and technology for creating structures from fiber reinforced resin matrix composite material systems. Elementary design analysis and case studies emphasizing aeronautical applications. GE credit: SE. Effective: 2010 Fall Quarter.

EAE 138—Aircraft Propulsion (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EME 106 C- or better. Analysis/design of modern aircraft gas turbine engines. Development/application of cycle performance prediction techniques. Introduction to design of inlets, compressors, burners, turbines, and nozzles. Cycle design for specific applications. GE credit: SE. Effective: 2017 Fall Quarter.

EAE 140—Rocket Propulsion (4)

Lecture—4 hour(s). Prerequisite(s): EME 106 C- or better. Restricted to upper division standing. Fluid and thermodynamics of rocket engines, liquid and solid rocket propulsion. Space propulsion concepts and space mission requirements. Not open for credit to students who have taken identical EAE 189A prior to Fall Quarter 2013. GE credit: SE. Effective: 2016 Winter Quarter.

EAE 141—Space Systems Design (4)

Lecture—2 hour(s); Discussion—2 hour(s). Prerequisite(s): ENG 102 C- or better; EME 106 C- or better. Introduction to space systems design including space project organization, requirements definition and specification, concepts formulation, system tradeoffs, subsystem design. Prototype space mission concepts are presented and a multidisciplinary mission design is developed that considers all relevant architecture elements. GE credit: SE. Effective: 2013 Fall Quarter.

EAE 142—Orbital Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): ENG 102 C- or better. Restricted to upper division standing. Satellite orbits, multistage rockets, current global boosters, and new technologies. Design application problems include satellites, trajectory optimizations, and interplanetary trajectories. Not open for credit to students who have completed EAE 189B prior to Fall Quarter 2013. GE credit: SE. Effective: 2013 Fall Quarter.

EAE 143A—Space Vehicle Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 102 C- or better; ENG 103 C- or better; ENG 105 C- or better. Governing equations and operational practices of robotic and human space travel. Principles of Systems Engineering are introduced and are used as a basis for a team project in spacecraft reverse-engineering and design. Effective: 2019 Fall Quarter.

EAE 189C—Flight Simulation & Testing in Design of Aircraft & Spacecraft (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 102; and Consent of Instructor. Teaches flight test techniques together with data analysis methods to prepare students for any type of flight testing including fixed wing, rotary wing and launch vehicles. GE credit: SE. Effective: 2013 Fall Quarter.

EAE 198—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAE 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAP—Education Abroad Program

Courses in EAP:

EAP 090X—International Education Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Open to lower division applicants for EAP or UC Davis study abroad and international internship programs. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only.) Effective: 1998 Winter Quarter.

EAP 180—Education Abroad: Special Topics (1-12)

Lecture/Discussion—3-12 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): Minimum GPA requirement for each study abroad program as specified in the written agreement between UC Davis and the host institution; prerequisites for language courses may also apply. Students who participate in approved international programs take this course up to 12 units while studying abroad. May be repeated for credit when credits are reviewed by departments & Dean's Office to determine how they fulfill UC Davis requirements. Effective: 2014 Winter Quarter.

EAP 190X—International Education Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Open to upper division applicants for EAP or UC Davis study abroad and international internship programs. Seminar examines the academic, cultural, and personal issues of study abroad, including academic programs abroad, country-specific history and culture, cross-cultural experiences, culture shock, racial and gender issues. May be repeated for credit. (P/NP grading only.) Effective: 1998 Winter Quarter.

EAP 192—Internship in Education Abroad (1-12)

Internship—3-36 hour(s). Prerequisite(s): Participation in a study abroad program. Internship with Education Abroad program, potentially either at university or taught abroad. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2017 Winter Quarter.

EAS—East Asian Studies

Courses in EAS:**EAS 088—Korean Culture & Society: From Ancient Three Kingdoms to the Global K-Pop (4)**

Lecture/Discussion—4 hour(s). Evolution of Korean society from Three Kingdoms period (B.C.E 57 to C.E. 676) to the contemporary era emphasizing the perseverance and transformations of traditional social and cultural patterns. (Same course as HIS 009C.) GE credit: AH, WC. Effective: 2019 Winter Quarter.

EAS 113—Cinema & Society in China (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): HIS 190C; HIS 193; or Consent of Instructor. Knowledge of Chinese not required. Viewing and analysis of one Chinese film with English subtitles each week, followed by discussion and short essays. Cinematic technique, social values and film topics from 1930s to today. Not open for credit to students who have completed CHN 113. Effective: 1997 Winter Quarter.

EAS 190—East Asian Studies Seminar (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Upper division standing or consent of instructor. Political, social, cultural, and economic issues in East Asia. Topic varies each year. May be repeated for credit when topic differs. Effective: 2004 Summer Session 2.

EAS 192—East Asian Studies Seminar (1-12)

Internship—3-36 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Upper division standing. Work experience in the East Asian Studies field, with analytical term paper on a topic approved by the instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAS 194H—Special Study for Honors Students (1-5)

Independent Study—1-5 hour(s). Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in East Asian Studies culture, society, or language. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAS 196A—Honors Seminar (4)

Seminar—2 hour(s); Conference—2 hour(s). Prerequisite(s): Consent of Instructor. GPA of 3.500 in the major; senior standing. A two-quarter research project culminating in an Honors thesis. A grade of B or higher must be earned to qualify the student for honors distinction at graduation. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAS 196B—Honors Seminar (4)

Seminar—2 hour(s); Conference—2 hour(s). Prerequisite(s): Consent of Instructor. GPA of 3.500 in the major; senior standing. A two-quarter research project culminating in an Honors thesis. A grade of B or higher must be earned to qualify the student for honors distinction at graduation. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAS 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EBS—Engineering Biological Systems

Courses in EBS:

EBS 001—Foundations of Biological Systems Engineering (4)

Lecture—2 hour(s); Laboratory—6 hour(s); Project (Term Project). Open only to students in Biological Systems Engineering. Introduction to engineering and the engineering design process with examples drawn from the field of biological systems engineering. Introduction to computer-aided design and mechanical fabrication of designs. Quarter-long group design project. GE credit: OL, QL, SE, SL, VL. Effective: 2009 Fall Quarter.

EBS 075—Properties of Materials in Biological Systems (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIS 002A; PHY 009C (can be concurrent). Properties of typical biological materials; composition and structure with emphasis on the effects of physical and biochemical properties on design of engineered systems; interactions of biological materials with typical engineering materials. GE credit: QL, SE, SL, VL, WE. Effective: 2016 Fall Quarter.

EBS 075—Properties of Materials in Biological Systems (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIS 002A; PHY 009B (can be concurrent). Properties of typical biological materials; composition and structure with emphasis on the effects of physical and biochemical properties on design of engineered systems; interactions of biological materials with typical engineering materials. GE credit: QL, SE, SL, VL, WE. Effective: 2020 Fall Quarter.

EBS 090C—Research Group Conference in Biological Systems Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing in Biological Systems Engineering or Food Engineering. Research group conference. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 092—Internship in Biological Systems Engineering (1-5)

Internship. Prerequisite(s): Consent of Instructor. Lower division standing; project approval prior to period of internship. Supervised work experience in biological systems engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Group study of selected topics; restricted to lower division students. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 099—Special Study for Lower Division Students (1-5)

Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 103—Fluid Mechanics Fundamentals (4)

Lecture—4 hour(s). Prerequisite(s): PHY 009B. Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as HYD 103N.) GE credit: QL, SE, VL. Effective: 2005 Spring Quarter.

EBS 114—Principles of Field Machinery Design (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 102; ENG 104. Traction and stability of vehicles with wheels or tracks. Operating principles of field machines and basic mechanisms used in their design. GE credit: QL, SE, VL, WE. Effective: 1998 Spring Quarter.

EBS 115—Forest Engineering (3)

Lecture—3 hour(s). Prerequisite(s): ENG 104. Applications of engineering principles to problems in forestry including those in forest regeneration, harvesting, residue utilization, and transportation. GE credit: QL, SE, SL, VL. Effective: 2016 Fall Quarter.

EBS 120—Power Systems Design (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 017; ENG 102; ENG 103; ENG 105. Design and performance of power devices and systems including combustion engines, electric generators and motors, fluid power systems, fuels, and emerging technologies. Selection of units for power matching and optimum performance. GE credit: QL, SE, SL, VL, WE. Effective: 2002 Fall Quarter.

EBS 125—Heat Transfer in Biological Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIS 002A; EBS 075; ENG 103; ENG 105. Fundamentals of heat transfer with application to biological systems. Steady and transient heat transfer. Analysis and simulation of heat conduction, convection and radiation. Heat transfer operations. GE credit: OL, QL, SE, VL, WE. Effective: 2020 Spring Quarter.

EBS 127—Mass Transfer & Kinetics in Biological Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EBS 125. Fundamentals of mass transfer and kinetics in biological systems. Molecular diffusion and convection. Thermodynamics and bioenergetics. Biological and chemical rate equations. Heterogeneous kinetics. Batch and continuous reaction processes. Mass transfer operations. GE credit: QL, SE, VL, WE. Effective: 2009 Fall Quarter.

EBS 128—Biomechanics & Ergonomics (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): STA 100; ENG 102. Limited enrollment. Anatomical, physiological, and biomechanical bases of physical ergonomics. Human motor capabilities, body mechanics, kinematics and anthropometry. Use of bioinstrumentation, industrial surveillance techniques and the NIOSH lifting guide. Cumulative trauma disorders. Static and dynamic biomechanical modeling. Emphasis on low back, shoulder and hand/wrist biomechanics. GE credit: QL, SE, SL, VL, WE. Effective: 2000 Spring Quarter.

EBS 130—Modeling of Dynamic Processes in Biological Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 006 or ECS 032A); (MAT 022B C- or better or MAT 027B C- or better); EBS 075. Techniques for modeling processes through mass & energy balance, rate equations, and equations of state. Computer problem solution of models. Example models include package design, evaporation, respiration heating, thermal processing of foods, and plant growth. GE credit: QL, SE, SL, VL. Effective: 2020 Spring Quarter.

EBS 135—Bioenvironmental Engineering (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EBS 125; EBS 130. Biological responses to environmental conditions. Principles and engineering design of environmental control systems. Overview of environmental pollution problems and legal restrictions for biological systems, introduction of environmental quality assessment techniques, and environmental pollution control technologies. GE credit: QL, SE, SL, VL, WE. Effective: 1998 Spring Quarter.

EBS 144—Groundwater Hydrology (4)

Lecture—4 hour(s). Prerequisite(s): MAT 016B or MAT 021A; HYD 103 or ENG 103 recommended. Fundamentals of groundwater flow and contaminant hydrology. Occurrence, distribution, and movement of groundwater. Well-flow systems. Aquifer tests. Well construction operation and maintenance. Groundwater exploration and quality assessment. Agricultural threats to groundwater quality: fertilizers, pesticides, salts. (Same course as HYD 144.) GE credit: QL, SE, SL, VL. Effective: 2003 Fall Quarter.

EBS 145—Irrigation & Drainage Systems (4)

Lecture—4 hour(s). Prerequisite(s): EBS 103 or HYD 103N. Engineering and scientific principles applied to the design of surface, sprinkle and micro irrigation systems and drainage systems within economic, biological, and environmental constraints. Interaction between irrigation and drainage. GE credit: QL, SE, SL, VL. Effective: 2016 Fall Quarter.

EBS 147—Runoff, Erosion & Water Quality Management (3)

Lecture/Lab—3 hour(s); Fieldwork. Prerequisite(s): (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (ECI 142 or HYD 141 or ESM 100); or equivalent. Practical hydrology and runoff water quality management from disturbed watersheds. Development of hillslope and soils restoration concepts and practice, modeling and application. (Same course as HYD 147.) GE credit: SE. Effective: 2018 Spring Quarter.

EBS 161—Kinetics & Bioreactor Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EBS 127. Provide the basic principles of reactor design for bioprocess applications. Emphasizes the following topics: 1) kinetics and reactor engineering principles; 2) bio-reaction kinetics; and 3) bioreactor design. GE credit: QL, SE, VL. Effective: 2012 Spring Quarter.

EBS 165—Bioinstrumentation & Control (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 100. Instrumentation and control for biological production systems. Measurement system concepts, instrumentation and transducers for sensing physical and biological parameters, data acquisition and control. GE credit: QL, SE, SL, VL, WE. Effective: 1998 Fall Quarter.

EBS 170A—Engineering Design & Professional Responsibilities (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): EBS 001; ENG 102; ENG 104. Engineering design including professional responsibilities. Emphasis on project selection, data sources, specifications, human factors, biological materials, safety systems, and professionalism. Detailed design proposals developed for EBS 170B and EBS 170BL. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1998 Spring Quarter.

EBS 170B—Engineering Projects: Design (2)

Discussion—2 hour(s). Prerequisite(s): EBS 170A; EBS 170BL (can be concurrent); EBS 170BL required concurrently. Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. Project for study is jointly selected by student and instructor. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2006 Spring Quarter.

EBS 170BL—Engineering Projects: Design Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): EBS 170B (can be concurrent); EBS 170B required concurrently. Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2006 Spring Quarter.

EBS 170C—Engineering Projects: Design Evaluation (1)

Discussion—1 hour(s). Prerequisite(s): EBS 170B; EBS 170CL (can be concurrent); EBS 170CL required concurrently. Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems. Project for study previously selected by student and instructor in EBS 170B. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1999 Winter Quarter.

EBS 170CL—Engineering Projects: Design Evaluation (2)

Laboratory—6 hour(s). Prerequisite(s): EBS 170C (can be concurrent); EBS 170C required concurrently. Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1999 Winter Quarter.

EBS 175—Rheology of Biological Materials (3)

Lecture—3 hour(s). Prerequisite(s): EBS 103 or ENG 103. Fluid and solid rheology, viscoelastic behavior of foods and other biological materials, and application of rheological properties to food and biological systems (i.e., pipeline design, extrusion, mixing, coating). GE credit: QL, SE, VL. Effective: 2016 Fall Quarter.

EBS 189A—Special Topics in Biological Systems Engineering: Agricultural Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Agricultural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

EBS 189B—Special Topics in Biological Systems Engineering: Aquacultural Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Aquacultural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

EBS 189C—Special Topics in Biological Systems Engineering: Biomedical Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Biomedical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

EBS 189D—Special Topics in Biological Systems Engineering: Biotechnical Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Biotechnical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

EBS 189E—Special Topics in Biological Systems Engineering: Ecological Systems Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Ecological Systems Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

EBS 189F—Special Topics in Biological Systems Engineering: Food Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Food Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

EBS 189G—Special Topics in Biological Systems Engineering: Forest Engineering (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Forest Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

EBS 190C—Research Group Conference in Biological Systems Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Biological Systems Engineering of Food Engineering. Research group conference. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 192—Internship in Biological Systems Engineering (1-5)

Internship. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project prior to period of internship. Supervised work experience in biological systems engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 197T—Tutoring in Biological Systems Engineering (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring individual students, leading small voluntary discussion groups, or assisting the instructor in laboratories affiliated with one of the department's regular courses. May be repeated for credit when topic differs. (P/NP grading only.) GE credit: SE. Effective: 2004 Winter Quarter.

EBS 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 200—Research Methods in Biological Systems Engineering (2)

Lecture—2 hour(s). Prerequisite(s): Graduate standing. Planning, execution and reporting of research projects. Literature review techniques and proposal preparation. Record keeping and patents. Uncertainty analysis in experiments and computations. Graphic analysis. Oral and written presentation of research results, manuscript preparation, submission and review. Effective: 1997 Spring Quarter.

EBS 215—Soil-Machine Relations in Tillage & Traction (3)

Lecture—3 hour(s). Prerequisite(s): EBS 114. Mechanics of interactions between agricultural soils and tillage and traction devices; determination of relevant physical properties of soil; analyses of stress and strains in soil due to machine-applied loads; experimental and analytical methods for synthesizing characteristics of overall systems. Effective: 1997 Winter Quarter.

EBS 216—Energy Systems (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ENG 105; or equivalent. Theory and application of energy systems. Systems analysis, energy conversion technologies, environmental considerations, economics and system optimization. (Same course as EGG 200.) Effective: 2018 Spring Quarter.

EBS 218—Solar Thermal Engineering (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Course in heat transfer. Analysis and design of solar energy collection systems. Sun-earth geometry and estimation of solar radiation. Steady-state and dynamic models of solar collectors. Modeling of thermal energy storage devices. Computer simulation. Effective: 2014 Spring Quarter.

EBS 220—Pilot Plant Operations in Aquacultural Engineering (3)

Lecture—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): (ECI 243A, ECI 243B) or (ABT 161, ABT 163). Topics in water treatment as they apply to aquaculture operations. Laboratory study of unit operations in aquaculture. Effective: 1997 Winter Quarter.

EBS 228—Occupational Musculoskeletal Disorders (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Epidemiology and etiology of occupational musculoskeletal disorders (MSDs) with focus on low back and upper extremities disorders; anatomical and biomechanical functions of lower back and upper extremities; MSDs risk factors assessment and control; research opportunities related to MSDs. Effective: 2002 Spring Quarter.

EBS 231—Mass Transfer in Food & Biological Systems (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Graduate standing. Application of mass transfer principles to food and biological systems. Study of mass transfer affecting food quality and shelf life. Analysis of mass transfer in polymer films used for coating and packaging foods and controlling release of biologically active compounds. Effective: 1997 Spring Quarter.

EBS 233—Analysis of Processing Operations: Drying & Evaporation (3)

Lecture—3 hour(s). Prerequisite(s): Course in food or process engineering, familiarity with FORTRAN. Diffusion theory in drying of solids. Analysis of fixed-bed and continuous-flow dryers. Steady-state and dynamic models to predict performance evaporators: multiple effects, mechanical and thermal recompression, control systems. Effective: 1997 Winter Quarter.

EBS 235—Advanced Analysis of Unit Operations in Food & Biological Engineering (3)

Lecture—3 hour(s). Prerequisite(s): EBS 132. Analysis and design of food processing operations. Steady state and dynamic heat and mass transfer models for operations involving phase change such as freezing and frying. Separation processes including membrane applications in food and fermentation systems. Effective: 1997 Winter Quarter.

EBS 237—Thermal Process Design (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): Course in heat transfer. Heat transfer and biological basis for design of heat sterilization of foods and other biological materials in containers or in bulk. Effective: 1997 Spring Quarter.

EBS 239—Magnetic Resonance Imaging in Biological Systems (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing. Theory and applications of magnetic resonance imaging to biological systems. Classical Bloch model of magnetic resonance. Applications to be studied are drying of fruits, flow of food suspensions, diffusion of moisture, and structure of foods. Effective: 1997 Winter Quarter.

EBS 240—Infiltration & Drainage (3)

Lecture—3 hour(s). Prerequisite(s): SSC 107; ENG 103. Aspects of multi-phase flow in soils and their application to infiltration and immiscible displacement problems. Gas phase transport and entrapment during infiltration, and oil-water-gas displacement will be considered. Effective: 1999 Fall Quarter.

EBS 241—Precision Irrigation Systems & Management (3)

Lecture—3 hour(s). Prerequisite(s): EBS 145; SSC 100; ABT 110; HYD 110. Advanced irrigation science and engineering for agricultural, horticultural, engineering, and hydrology graduate students. Precision irrigation techniques for application of water to meet specific requirements of individual plants or management units and maximum economic benefits of crop production. (Same course as HYD 241.) Effective: 2020 Spring Quarter.

EBS 242—Hydrology & Sustainability of Irrigated Lands (3)

Lecture—3 hour(s). Prerequisite(s): ABT 110 or ESM 110 or HYD 110 or EBS 145. Impact of irrigated agricultural on groundwater depletion, surface water and groundwater quality, soil salinization, downstream ecosystems, and seawater intrusion. Exploration of efficient resource use, and policies adopted in California to enhance sustainability of irrigated crop production. (Same course as HYD 242.) Effective: 2020 Spring Quarter.

EBS 243—Water Resource Planning & Management (3)

Lecture—3 hour(s). Prerequisite(s): HYD 141; Or equivalent. Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design, and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as HYD 243.) Effective: 1997 Fall Quarter.

EBS 245—Waste Management for Biological Production Systems (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Characterization of solid and liquid wastes from animal, crop, and food production systems. Study of methods and system design for handling, treatment, and disposal/utilization of these materials. Effective: 1997 Spring Quarter.

EBS 260—Analog Instrumentation (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 100. Instrument characteristics: generalized instrument models, calibration, and frequency response. Signal conditioning: operational amplifier circuits, filtering, and noise. Transducers: motion, force, pressure, flow, temperature, and photoelectric. Effective: 1997 Winter Quarter.

EBS 262—Computer Interfacing & Control (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 100; EBS 165. Procedural and object-oriented programming in C++, analog and digital signal conversion, data acquisition and computer control. Effective: 2000 Winter Quarter.

EBS 265—Design & Analysis of Engineering Experiments (5)

Lecture—3 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): STA 100; ASE 120; or an introductory course in statistics. Simple linear, multiple, and polynomial regression, correlation, residuals, model selection, one-way ANOVA, fixed and random effect models, sample size, multiple comparisons, randomized block, repeated measures, and Latin square designs, factorial experiments, nested design and subsampling, split-plot design, statistical software packages. Effective: 2000 Spring Quarter.

EBS 267—Renewable Bioprocessing (3)

Lecture—3 hour(s). Prerequisite(s): EBS 160; (BIS 101 or MIC 102). Applications of biotechnology and bioprocess engineering toward the use of agricultural and renewable feedstocks for the production of biochemicals. Design and modeling of microbial- and plant-based production systems including associated fermentation, extraction, and purification processes. Effective: 2005 Winter Quarter.

EBS 268—Polysaccharides Surface Interactions (3)

Lecture—3 hour(s). Prerequisite(s): Graduate students in science or engineering. Study of fundamental surface science theories as applied to physical and chemical interactions of carbohydrates and polysaccharides. (Same course as ECH 268.) Effective: 2017 Winter Quarter.

EBS 270—Modeling & Analysis of Biological & Physical Systems (3)

Lecture—3 hour(s). Prerequisite(s): Familiarity with a programming language. Mathematical modeling of biological systems: model development; analytical and numerical solutions. Case studies from various specializations within Biological & Agricultural Engineering. Effective: 2001 Spring Quarter.

EBS 275—Physical Properties of Biological Materials (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): Consent of Instructor. Selected topics on physical properties, such as mechanical, optical, rheological, and aerodynamic properties, as related to the design of harvesting, handling, sorting, and processing equipment. Techniques for measuring and recording physical properties of biological materials. Effective: 1997 Winter Quarter.

EBS 289A—Selected Topics in Biological Systems Engineering: Animal Systems Engineering (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Animal Systems Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289B—Selected Topics in Biological Systems Engineering: Aquacultural Engineering (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Aquacultural Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289C—Selected Topics in Biological Systems Engineering: Biological Engineering (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Biological Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289D—Selected Topics in Biological Systems Engineering: Energy Systems (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Energy Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289E—Selected Topics in Biological Systems Engineering: Environmental Quality (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topic in Environmental Quality. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289F—Selected Topics in Biological Systems Engineering: Food Engineering (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Food Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289G—Selected Topics in Biological Systems Engineering: Forest Engineering (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Forest Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289H—Selected Topics in Biological Systems Engineering: Irrigation & Drainage (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Irrigation & Drainage. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289I—Selected Topics in Biological Systems Engineering: Plant Production & Harvest (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Plant Production & Harvest. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289J—Selected Topics in Biological Systems Engineering: Postharvest Engineering (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Postharvest Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289K—Selected Topics in Biological Systems Engineering: Sensors & Actuators (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Sensors & Actuators. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 290—Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Weekly seminars on recent advances and selected topics in biological systems engineering. Theme changes from quarter to quarter. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EBS 290C—Graduate Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Research problems, progress and techniques in biological systems engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EBS 298—Group Study (1-5)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EBS 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EBS 390—Supervised Teaching in Biological & Agricultural Engineering (1-3)

Laboratory—3 hour(s); Tutorial—3-9 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Tutoring and teaching students in undergraduate courses offered in the Department of Biological and Agricultural Engineering. Weekly conferences with instructor; evaluation of teaching. Preparing for and conducting demonstrations, laboratories and discussions. Preparing and grading exams. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

ECH—Engineering Chemical

Courses in ECH:

ECH 001—Design of Coffee—An Introduction to Chemical Engineering (3)

Lecture—1 hour(s); Laboratory—2 hour(s); Project (Term Project)—1 hour(s). Non-mathematical introduction to how chemical engineers think, illustrated by elucidation of the process of roasting and brewing coffee. Qualitative overview of the basic principles of engineering analysis and design. Corresponding experiments testing design choices on the sensory qualities of coffee. Not open for credit to students who have completed ECH 001Y, ECM 001, ECM 005 or ECH 005. GE credit: SE, SL, VL. Effective: 2020 Spring Quarter.

ECH 001Y—Design of Coffee—An Introduction to Chemical Engineering (3)

Web Virtual Lecture—1 hour(s); Laboratory—2 hour(s); Project (Term Project)—1 hour(s). Non-mathematical introduction to how chemical engineers think, illustrated by elucidation of the process of roasting and brewing coffee. Qualitative overview of the basic principles of engineering analysis and design. Corresponding experiments testing design choices on the sensory qualities of coffee. Not open for credit to students who have completed ECH 001, ECM 001, ECM 005 or ECH 005. GE credit: SE, SL, VL. Effective: 2020 Spring Quarter.

ECH 005—Introduction to Analysis & Design in Chemical Engineering (3)

Lecture—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): MAT 021A; MAT 021B (can be concurrent). Quantitative introduction to the engineering principles of analysis and design. Applications of differential and integral calculus. Laboratory experiments using coffee to illustrate chemical engineering concepts and to conduct an engineering design competition. Only 2 units of credit to students who have completed ECM 001 or ECH 001; not open for credit to students who have completed ECM 005. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECH 051—Material Balances (4)

Lecture—4 hour(s). Prerequisite(s): MAT 021C C- or better; MAT 021D (can be concurrent). Application of the principle of conservation of mass to single and multicomponent systems in chemical process calculations. Studies of batch, semi-batch, and continuous processes involving mass transfer, phase change, and reaction stoichiometry. Not open for credit to students who have completed ECH 151. GE credit: SE. Effective: 2017 Fall Quarter.

ECH 060—Engineering Problem Solving Using MATLAB (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): MAT 021C. Problem solving in chemical, biochemical and materials engineering using MATLAB. Programming styles, data structures, working with lists, functions and rules. Applications drawn from material balances, statistics, numerical methods, bioinformatics, transport phenomena, kinetics, and computational analysis. GE credit: QL, SE. Effective: 2017 Spring Quarter.

ECH 080—Chemical Engineering Profession (1)

Lecture/Discussion—1 hour(s); Term Paper. Professional opportunities and professional responsibilities of chemical engineers. Opportunities and needs for post-baccalaureate education. Relationship of chemical engineering to contemporary issues. GE credit: SE, SS. Effective: 2017 Winter Quarter.

ECH 090X—Honors Discussion Section (1)

Discussion—1 hour(s). Open only to students in the Chemical Engineering or Biochemical Engineering Honors Programs. Examination of special topics covered in selected lower division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. May be repeated for credit when topic differs. Effective: 2017 Fall Quarter.

ECH 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Directed Group Study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

ECH 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special Study for Undergraduates (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

ECH 140—Mathematical Methods in Biochemical & Chemical Engineering (4)

Lecture/Discussion—3 hour(s); Laboratory—1 hour(s). Prerequisite(s): MAT 022B; (ECH 060 or ENG 006); or equivalents of ECH 060 or ENG 006. Mathematical methods for solving problems in chemical and biochemical engineering, with emphasis on transport phenomena. Fourier series and separation of variables. Sturm-Liouville eigenvalue problems. Similarity transformations. Tensor analysis. Finite difference methods for solving time-dependent diffusion problems. Not open for credit to students who have completed ECH 159. GE credit: SE. Effective: 2017 Spring Quarter.

ECH 141—Fluid Mechanics for Biochemical & Chemical Engineers (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ECH 051 C- or better; ECH 140. Principles and applications of fluid mechanics in chemical and biochemical engineering. Hydrostatics. Stress tensor and Newton's law of viscosity. Not open for credit to students who have completed ECH 150B. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECH 142—Heat Transfer for Biochemical & Chemical Engineers (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ECH 141. Conduction, convection, and radiation of thermal energy in applications to chemical and biochemical engineering. Derivation of thermal and mechanical energy equations. Thermal boundary layers. Macroscopic balances. Applications: heat transfer in tubes, channels, and integrated circuits, and analysis of heat exchangers. Not open for credit to students who have completed ECH 153. GE credit: QL, SE. Effective: 2019 Spring Quarter.

ECH 143—Mass Transfer for Biochemical & Chemical Engineers (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ECH 141. Derivation of species conservation equations describing convective and diffusive mass transfer. Fick's law and the Stefan-Maxwell constitutive equations. Mass transfer coefficients. Multicomponent mass transfer across gas/liquid interfaces. Applications include drying, heterogeneous chemical reactions, and membrane separations. GE credit: SE. Effective: 2019 Spring Quarter.

ECH 144—Rheology & Polymer Processing (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): ECH 141. Deformation in steady shear, unsteady shear, and elongational flows. Linear and non-linear viscoelastic constitutive models. The principle of material indifference and admissibility of constitutive equations. Introduction to the unit operations of polymer processing. Not open for credit to students who have completed ECH 150C. GE credit: SE. Effective: 2017 Winter Quarter.

ECH 145A—Chemical Engineering Thermodynamics Laboratory (3)

Laboratory—2 hour(s); Discussion—2 hour(s); Extensive Writing. Prerequisite(s): ECH 152A; ECH 152B (can be concurrent). Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, & Biochemical Engineering. Laboratory experiments in chemical engineering thermodynamics. GE credit: SE, WE. Effective: 2017 Winter Quarter.

ECH 145B—Chemical Engineering Transport Lab (3)

Laboratory—2 hour(s); Discussion—2 hour(s); Extensive Writing. Prerequisite(s): ECH 141; ECH 145A. Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, & Biochemical Engineering. Laboratory experiments in chemical engineering transport phenomena. GE credit: SE, WE. Effective: 2017 Spring Quarter.

ECH 148A—Chemical Kinetics & Reaction Engineering (3)

Lecture—3 hour(s). Prerequisite(s): ECH 143; ECH 152B. Ideal chemical reactors. Rate laws and stoichiometry. Design and analysis of isothermal reactors with multiple reactions. Not open for credit to students who have taken ECH 146. GE credit: SE. Effective: 2017 Winter Quarter.

ECH 148B—Chemical Kinetics & Reaction Engineering (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECH 148A. Design and analysis of non-isothermal reactors. Reactions in packed beds with pressure drop. Adsorption and heterogeneous catalysis. Transport limitations. Not open for credit to students who have taken ECH 146. GE credit: SE. Effective: 2017 Winter Quarter.

ECH 152A—Chemical Engineering Thermodynamics (3)

Lecture—3 hour(s). Prerequisite(s): ECH 060 or ENG 006; or equivalents. Application of principles of thermodynamics to chemical processes. Not open for credit to students who have completed ENG 105 or ENG 105A. GE credit: SE. Effective: 2017 Spring Quarter.

ECH 152B—Chemical Engineering Thermodynamics (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ECH 152A. Continuation of ECH 152A. GE credit: SE. Effective: 2017 Spring Quarter.

ECH 155—Chemical Engineering Kinetics & Reactor Design Laboratory (4)

Laboratory—6 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): ECH 145B; ECH 148A; ECH 148B (can be concurrent); ECH 157 (can be concurrent); Upper division English composition requirement (can be concurrent). Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, and Biochemical Engineering. Laboratory experiments in chemical kinetics, reactor design and process control. Not open for credit to students who have taken ECH 155B. GE credit: OL, SE, VL, WE. Effective: 2017 Spring Quarter.

ECH 157—Process Dynamics & Control (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ECH 140. Fundamentals of dynamics and modeling of chemical processes. Design and analysis of feedback control of chemical processes. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECH 158A—Process Economics & Green Design (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ECH 142; ECH 143. Senior design experience in process and product creation and design with multiple realistic constraints. Cost accounting and capital investment estimation. Profitability analysis techniques. Green chemistry, health risk assessment and life cycle assessment concepts. GE credit: SE, SL, SS, VL. Effective: 2017 Winter Quarter.

ECH 158B—Separations & Unit Operations (4)

Lecture—4 hour(s). Prerequisite(s): ECH 158A. Senior design experience with multiple realistic constraints. Heuristic and rigorous design of chemical process equipment. Separation by filtration, distillation and extraction. Synthesis of reactor and separation networks, heat and power integration. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECH 158C—Plant Design Project (4)

Discussion/Laboratory—2 hour(s); Project (Term Project)—2 hour(s). Prerequisite(s): ECH 158B or ECH 161C. Senior design experience for chemical and biochemical processes. Impact of multiple realistic constraints. Design, costing and profitability analysis of complete plants. Use of computer-aided design techniques. GE credit: SE, SS, VL. Effective: 2018 Winter Quarter.

ECH 160—Fundamentals of Biomanufacturing (3)

Lecture—3 hour(s). Prerequisite(s): MIC 102 or BIS 102 or ABI 102. Principles of large scale bioreactor production of metabolites, enzymes, and recombinant proteins including the development of strains/cell lines, fermentor/bioreactor design, monitoring and operation, product recovery and purification, and biomanufacturing economics. Not open for credit to students who have completed ECH 161C or both ECH 161A and ECH 161B; only 2 units of credit to students who have completed either ECH 161A or ECH 161B. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

ECH 161A—Biochemical Engineering Fundamentals (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ECH 148A. Biokinetics; bioreactor design and operation; transport phenomena in bioreactors; microbial, plant, and animal cell cultures. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

ECH 161B—Bioseparations (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ECH 143. Product recovery and purification of biochemicals. Cell disruption, centrifugation, filtration, membrane separations, extraction, and chromatographic separation. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECH 161C—Biotechnology Facility Design & Regulatory Compliance (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECH 158A, ECH 161A (can be concurrent), ECH 161B (can be concurrent)) or DEB 263 (can be concurrent). Design of biotechnology manufacturing facilities. Fermentation and purification equipment, and utility systems. Introduction to current good manufacturing practices, regulatory compliance, and documentation. GE credit: QL, SE, SL, SS, VL. Effective: 2020 Winter Quarter.

ECH 161L—Bioprocess Engineering Laboratory (4)

Laboratory—9 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): (ECH 145B, ECH 161A, ECH 161B) or VEN 186 or (BIS 103, MCB 120L). Pass One restricted to chemical/biochemical engineering majors. Laboratory experiments in the operation and analysis of bioreactors; determination of oxygen mass transfer coefficients in bioreactors and ion exchange chromatography. GE credit: QL, SE, VL, WE. Effective: 2019 Spring Quarter.

ECH 166—Catalysis (3)

Lecture—3 hour(s). Prerequisite(s): ECH 148A; and Consent of Instructor. Principles of catalysis based on an integration of principles of physical, organic, and inorganic chemistry and chemical kinetics and chemical reaction engineering. Catalysis in solution; catalysis by enzymes; catalysis in swellable polymers; catalysis in microscopic cages (zeolites); catalysis on surfaces. GE credit: SE. Effective: 2017 Winter Quarter.

ECH 169—The Design of Cocktails: Applied Thermodynamics & Transport Phenomena in Mixed Drinks (1)

Discussion/Laboratory—1 hour(s). Prerequisite(s): ECH 145B; ECH 152B; and Consent of Instructor. Enrollment by permission of instructors only; limited to students over 21 years old. Scientific and engineering principles underlying the preparation of mixed drinks. Thermodynamics and kinetics of ice crystallization; phase diagram of ethanol-water-ice mixtures; mass transfer of aromatics; solubility of sucrose and carbon dioxide; colloidal behavior of dispersed solids and emulsified oils. Corresponding laboratory experiments testing the effect of design choices on the sensory quality of cocktails. (P/NP grading only.) GE credit: SE. Effective: 2018 Spring Quarter.

ECH 170—Introduction to Colloid & Surface Phenomena (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110A. Introduction to the behavior of surfaces and disperse systems. Fundamentals will be applied to the solution of practical problems in colloid science. Should be of value to engineers, chemists, biologists, soil scientists, and related disciplines. GE credit: SE. Effective: 2017 Winter Quarter.

ECH 190C—Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Chemical Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

ECH 190X—Honors Discussion Section (1)

Discussion—1 hour(s). Open only to students in the Chemical Engineering or Biochemical Engineering Honors Programs. Examination of special topics covered in selected upper division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. May be repeated for credit when topic differs. Effective: 2017 Fall Quarter.

ECH 192—Internship in Chemical or Biochemical Engineering (1-5)

Internship—3-15 hour(s). Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in Chemical or Biochemical Engineering. May be repeated for credit when project differs. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

ECH 198—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Group study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

ECH 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

ECH 200—Preparing for Graduate Student Success (1)

Seminar—1.5 hour(s). Restricted to graduate students in Chemical Engineering. Introduction to the soft-skills and campus resources needed to succeed in graduate school. Emphasis on the student-mentor relationship and the process of selecting a research mentor. (Same course as EMS 200.) (S/U grading only.) Effective: 2018 Fall Quarter.

ECH 206—Biochemical Engineering (3)

Lecture—3 hour(s). Prerequisite(s): MIC 102; MIC 102L; BIS 101; BIS 102; BIS 103; MCB 120L; MCB 200A; or Consent of Instructor. FST 205 recommended. Interaction of chemical engineering, biochemistry, and microbiology. Mathematical representations of microbial systems. Kinetics of growth, death, and metabolism. Continuous fermentation, agitation, mass transfer and scale-up in fermentation systems, product recovery, enzyme technology. Effective: 2017 Winter Quarter.

ECH 226—Enzyme Engineering (3)

Lecture—3 hour(s). Prerequisite(s): MIC 102; MIC 102L; BIS 102; BIS 103; MCB 122; MCB 120L; MCB 200A; or Consent of Instructor. Application of basic biochemical and engineering principles of practical enzymatic processes. Lectures cover large scale production and separation of enzymes, immobilized enzyme systems, enzyme related biotechnology, reactor design and optimization, and new application of enzymes in genetic engineering. Effective: 2017 Winter Quarter.

ECH 245—Micro- & Nano-Technology in Life Sciences (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as EEC 245, EMS 245, MAE 245.) Effective: 2019 Winter Quarter.

ECH 246—Advanced Biochemical Engineering (2)

Lecture—2 hour(s). Prerequisite(s): ECH 206; or Consent of Instructor. Advances in the field of biotechnology including genetic engineering, enzyme engineering, fermentation science, and renewable resources development. The important results of original research will be evaluated for understanding of the fundamental principles and for potential practical application. Effective: 2017 Winter Quarter.

ECH 252—Statistical Thermodynamics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECH 152B; ENG 105B or the equivalent. A treatment of the statistical basis of thermodynamics; introduction to statistical mechanics; discussion of the laws of thermodynamics; application of thermodynamic relationships to phase and chemical reaction equilibrium; introduction to molecular simulations and the evaluation of thermodynamic properties from molecular simulations. Effective: 2017 Winter Quarter.

ECH 253A—Advanced Fluid Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): ECH 141; ECH 259. Kinematics and basic principles of fluid flow. Principles of constitutive equations. Navier-Stokes equations for Newtonian fluids. Survey of rectilinear creeping flow, lubrication flow and boundary layer theory. Effective: 2017 Winter Quarter.

ECH 253B—Advanced Heat Transport (4)

Lecture—4 hour(s). Prerequisite(s): ECH 142; ECH 259; Or the equivalent. Fundamental energy postulates and derivation of microscopic and macroscopic energy equations. Mechanisms of conduction. Isotropic, thermoelastic and anisotropic materials solution problems using Greens functions and perturbation theory. Effective: 2017 Winter Quarter.

ECH 253C—Advanced Mass Transfer (4)

Lecture—4 hour(s). Prerequisite(s): ECH 253A; Or the equivalent. Kinematics and basic conservation principles for multicomponent systems. Constitutive equations for momentum, heat and mass transfer, applications to binary and ternary systems. Details of diffusion with reaction, and the effects of concentration. Effective: 2017 Winter Quarter.

ECH 254—Colloid & Surface Phenomena (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing in science or engineering or consent of instructor. Thermodynamics and rate processes at interfaces. These fundamental processes will be applied to determine the collective properties of thin films and membranes, self-assembled systems, liquid crystals and colloidal systems. Experimental techniques in surface analysis. Effective: 2017 Winter Quarter.

ECH 256—Chemical Kinetics & Reaction Engineering (4)

Lecture—4 hour(s). Prerequisite(s): ECH 146; Or the equivalent. Analysis of the performance of chemical reactors and design of chemical reactors based on the principles of chemical kinetics and transport phenomena. Consideration of noncatalytic/catalytic reactions in single fluid phases and emphasis on reactions in multiphase mixtures, especially gas-solid reactors. Effective: 2017 Winter Quarter.

ECH 259—Advanced Engineering Mathematics (4)

Lecture—4 hour(s). Prerequisite(s): MAT 021D; MAT 022A; MAT 022B. Applications of methods of applied mathematics to the analytical and numerical solution of linear and nonlinear ordinary and partial differential equations arising in the study of transport phenomena. Effective: 2017 Winter Quarter.

ECH 261—Molecular Modelling of Soft & Biological Matter (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): EMS 247 or ECH 252; or equivalent course in advanced thermodynamics/statistical mechanics. Modern molecular simulation techniques with a focus on soft matter like polymers, biologically relevant systems, and glasses. Effective: 2017 Winter Quarter.

ECH 262—Transport Phenomena in Multiphase Systems (3)

Discussion/Laboratory—3 hour(s). Prerequisite(s): ECH 253C. Heat, mass and momentum transfer in multiphase, multicomponent systems with special emphasis on transport processes in porous media. Derivation of the averaging theorem and application of the method of volume averaging to multicomponent, reacting systems. Effective: 2017 Winter Quarter.

ECH 263—Rheology & Mechanics of Non-Newtonian Fluids (3)

Lecture—3 hour(s). Prerequisite(s): ECH 253A; ECH 259; or Consent of Instructor. Mechanics of polymer solutions and suspension, especially the development of properly invariant constitutive equations. Topics include: viscometry, linear and nonlinear viscoelasticity, continuum mechanics, kinetic theory. Effective: 2017 Winter Quarter.

ECH 265—Emulsions, Microemulsions & Bilayers (3)

Lecture—3 hour(s). Prerequisite(s): An undergraduate course in physical chemistry. Thermodynamic and mechanical descriptions of surfactant-laden interfaces. Forces between and within interfaces. Physics of micelle and microemulsion formation. Structure and stability of emulsions. Properties of phospholipid bilayers, with emphasis on vesicles. Effective: 2017 Winter Quarter.

ECH 267—Advanced Process Control (3)

Lecture—3 hour(s). Prerequisite(s): ECH 157; Or the equivalent. Advanced course in analysis and synthesis of linear multivariable systems. Emphasis on frequency domain techniques and applications to chemical processes. Topics include singular value analysis, internal model control, robust controller design methods as well as self-tuning control techniques. Effective: 2017 Winter Quarter.

ECH 268—Polysaccharides Surface Interactions (3)

Lecture—3 hour(s). Prerequisite(s): Graduate students in science or engineering. Study of fundamental surface science theories as applied to physical and chemical interactions of carbohydrates and polysaccharides. (Same course as EBS 268.) Effective: 2017 Winter Quarter.

ECH 269—Cell & Molecular Biophysics for Bioengineers (4)

Lecture—4 hour(s). Prerequisite(s): BIM 284; or equivalent; graduate standing; undergraduate students by consent of instructor. Introduction to fundamental mechanisms governing the structure, function, and assembly of bio-macromolecules. Emphasis is on a quantitative understanding of the nano-to-microscale interactions between and within individual molecules, as well as of their assemblies, in particular membranes. Not open for credit to students who have completed BIM 162. (Same course as BIM 262.) Effective: 2017 Winter Quarter.

ECH 289A—Special Topics in Chemical Engineering: Fluid Mechanics (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Fluid Mechanics. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289B—Special Topics in Chemical Engineering: Nonlinear Analysis & Numerical Methods (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Nonlinear Analysis and Numerical Methods. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289C—Special Topics in Chemical Engineering: Process Control (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Process Control. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289D—Special Topics in Chemical Engineering: Chemistry of Catalytic Processes (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Chemistry of Catalytic Processes. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289E—Special Topics in Chemical Engineering: Biotechnology (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Biotechnology. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289F—Special Topics in Chemical Engineering: Interfacial Engineering (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Interfacial Engineering. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289G—Special Topics in Chemical Engineering: Molecular Thermodynamics (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Molecular Thermodynamics. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289H—Special Topics in Chemical Engineering: Membrane Separations (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Membrane Separations. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289I—Special Topics in Chemical Engineering: Advanced Materials Processing (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Advanced Materials Processing. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289J—Special Topics in Chemical Engineering: Novel Experimental Methods (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Novel Experimental Methods. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289K—Special Topics in Chemical Engineering: Advanced Transport Phenomena (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Advanced Transport Phenomena. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289L—Special Topics in Chemical Engineering: Biomolecular Engineering (1-5)

Lecture—1-5 hour(s); Laboratory—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Biomolecular Engineering. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 290—Seminar (1)

Seminar—1 hour(s). Seminar. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 290C—Graduate Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Research problems, progress and techniques in chemical engineering. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 294—Current Progress in Biotechnology (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as DEB 294.) (S/U grading only.) Effective: 2018 Winter Quarter.

ECH 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Group study. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 299—Research (1-12)

Variable. Research. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 390—Teaching of Chemical Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Qualifications and acceptance as teaching assistant and/or associate-in in chemical engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

ECI—Engineering Civil & Environmental

Courses in ECI:

ECI 003—Civil Infrastructure & Society (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): MAT 021A (can be concurrent). Pass One restricted to lower division students; Civil Engineering majors. Introduction to civil infrastructure and its relationship with society and the natural environment. Exposure to innovative research on civil engineering and environmental systems. Participation in laboratory experiments illustrative of the solution of representative but simplified engineering problems. Not open for credit to upper division students. GE credit: OL, SE, SS. Effective: 2016 Winter Quarter.

ECI 016—Spatial Data Analysis (2)

Lecture—1 hour(s); Laboratory—3 hour(s). Restricted to Civil Engineering and Biological Systems Engineering majors; non-majors accommodated on a space-available basis. Computer-aided design and geographic information systems in civil engineering practice. GE credit: QL, SE. Effective: 2010 Spring Quarter.

ECI 040—Introduction to Environmental Engineering (4)

Lecture—4 hour(s). Prerequisite(s): CHE 002B. Pass One open to students in the College of Engineering. Introduction to topics in environmental engineering; discussion on influence of literary work, art, and media on the evolution of environmental engineering practice, relevant laws, and regulations; presentations of historical case studies. GE credit: AH. Effective: 2017 Winter Quarter.

ECI 090X—Lower Division Seminar (1-4)

Seminar—1-4 hour(s). Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 092—Internship for Engineering (1-5)

Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 100—Introduction to Fluid Mechanics for Civil & Environmental Engineers (4)

Review all entries

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better. Pass One restricted to Civil Engineering, Environmental Engineering and Hydrology majors. Fluid flow in civil & environmental engineering, basis for design, buoyancy, hydrostatics, gravity dams, hydraulic modeling: similarity & scaling, conservation laws, flow in bends, nozzles, pipes, pumps, turbines, complimentary lab experiments. Not open for credit to students who have taken ENG 103. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 100—Introduction to Fluid Mechanics for Civil & Environmental Engineers (4)

Review all entries

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 035 C- or better; (MAT 022B C- or better or MAT 027B C- or better); PHY 009B C- or better. Pass One restricted to Civil Engineering, Environmental Engineering and Hydrology majors. Fluid flow in civil & environmental engineering, basis for design, buoyancy, hydrostatics, gravity dams, hydraulic modeling: similarity & scaling, conservation laws, flow in bends, nozzles, pipes, pumps, turbines, complimentary lab experiments. Not open for credit to students who have taken ENG 103. GE credit: SE. Effective: 2020 Fall Quarter.

ECI 114—Probabilistic Systems Analysis for Civil Engineers (4)

Lecture—4 hour(s). Prerequisite(s): MAT 021C C- or better. Probabilistic concepts and models in engineering. Statistical analysis of engineering experimental and field data. Introduction to stochastic processes and models of engineering systems. Not open for credit to students who have completed STA 120. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 115—Computer Methods in Civil & Environmental Engineering (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (ENG 006 C- or better or ECS 030 C- or better or ECS 032A C- or better); (MAT 022B C- or better or MAT 027B C- or better). Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 123—Urban Systems & Sustainability (4)

Lecture—4 hour(s). Prerequisite(s): Upper division standing. Systems-level approach of how to evaluate and then modify sustainability of urban systems based on interaction with natural environments. Topics include: definition/metrics of urban sustainability; system analyses of urban systems; enabling technology, policies, legislation; measures and modification of ecological footprints. GE credit: ACGH, DD, SE, SL, SS, WE. Effective: 2006 Fall Quarter.

ECI 125—Building Energy Performance (4)

Lecture—4 hour(s). Prerequisite(s): Upper division standing in Engineering. Open to students in the College of Engineering. Mechanisms of energy consumption in buildings including end uses, thermal loads, ventilation, air infiltration, thermal energy distribution, and HVAC systems; energy performance simulation; methods and strategies of energy efficiency. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 130—Structural Analysis (4)

Lecture—4 hour(s). Prerequisite(s): ENG 104 C- or better; (MAT 022A or MAT 027A). Open to Civil Engineering majors. Elastic structural analysis of determinate and indeterminate trusses, beams and frames. Plastic bending and limit analysis. GE credit: QL, SE. Effective: 2020 Winter Quarter.

ECI 131—Matrix Structural Analysis (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 104 C- or better; ENG 006. Open to Engineering majors only. Matrix formulation and computer analysis of statically indeterminate structures. Stiffness and flexibility formulations for elastic structures. Finite element methods for elasticity and bending problems. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 132—Structural Design: Metallic Elements (4)

Lecture—4 hour(s). Prerequisite(s): ECI 130 C- or better. Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECI 135—Structural Design: Concrete Elements (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECI 130 C- or better. Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECI 136—Building Design (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (ECI 130 C- or better or ECI 131 C- or better); (ECI 135 or ECI 132). Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. GE credit: SE. Effective: 2019 Winter Quarter.

ECI 137—Construction Principles & Project Management (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Restricted to upper division standing in Engineering. Project management, with civil engineering construction and design applications, including project scope, schedule, resources, cost, quality, risk, and control. Construction industry overview. Interactions between planning, design, construction, operations. Construction operations analysis. Contract issues. Project management software, field trips, guest lectures. GE credit: ACGH, OL, QL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.

ECI 138—Earthquake Loads on Structures (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECI 130 C- or better or ECI 131 C- or better. Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2019 Winter Quarter.

ECI 139—Advanced Structural Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): ENG 104 C- or better. Review of stress, strain, equilibrium, compatibility, and elastic material behavior. Plane stress and plane strain problems in elasticity; energy methods. Theories for unsymmetric bending, straight and curved beams. Beams on elastic foundations; stresses in plates and shells; elastic stability. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 140A—Environmental Analysis of Aqueous Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 002B C- or better; ECI 040 (can be concurrent). Pass One restricted to Environmental Engineering majors. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECH 140 or CHE 100. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 140B—Chemical Principles for Environmental Engineers (4)

Lecture—4 hour(s). Prerequisite(s): CHE 002B C- or better. Aqueous chemistry; equilibrium relationships; carbonate system; thermodynamics; kinetics & rate laws; precipitation, adsorption, & volatilization phenomenon; oxidation & reduction reactions; pH, pE and predominance diagrams; organic chemicals. Not open for credit to students who have taken ECI 140. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 140C—Biological Principles for Environmental Engineering (4) *Review all entries*

Lecture—4 hour(s). Prerequisite(s): ECI 140B C- or better; ECI 040. Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, bioremediation, air pollution control and biotransformations in environmental engineered systems. Only 2 units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2020 Fall Quarter.

ECI 140C—Biological Principles for Environmental Engineering (4) *Review all entries*

Lecture—4 hour(s). Prerequisite(s): (ECI 140A C- or better or ECI 140B C- or better); ECI 040. Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, bioremediation, air pollution control and biotransformations in environmental engineered systems. Only 2 units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 140D—Water & Wastewater Treatment System Design (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better); ECI 040. Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 140D—Water & Wastewater Treatment System Design (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECI 140B C- or better; ECI 140C C- or better; ECI 040. Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2021 Spring Quarter.

ECI 141—Engineering Hydraulics (3)

Lecture—3 hour(s). Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better. Nature of flow of a real fluid; flow in pipes; open channel flow; turbomachinery; fluid forces on objects: boundary layers, lift and drag. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 141L—Engineering Hydraulics Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): ECI 141 (can be concurrent). Open to Engineering students only. Laboratory experiments and demonstrations on flow measurements, sluice gates, hydraulic jump, flow characteristics, and centrifugal pumps. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 142—Engineering Hydrology (4)

Lecture—4 hour(s). Prerequisite(s): ECI 141 (can be concurrent). Restricted to students in the College of Engineering. The hydrologic cycle. Evapotranspiration, interception, depression storage and infiltration. Streamflow analysis and modeling. Flood routing through channels and reservoirs. Frequency analysis of hydrologic variables. Precipitation analysis for hydrologic design. Hydrologic design. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 143—Green Engineering Design & Sustainability (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Upper division standing. Restricted to upper division standing; Pass One restricted to Civil Engineering majors. Application of concepts, goals and metrics of sustainability, green engineering and industrial ecology to engineering design. Other topics include life-cycle assessments, analysis of environmental management systems, and economics of pollution prevention and sustainability. GE credit: QL, SE, SL, SS. Effective: 2017 Winter Quarter.

ECI 143—Green Engineering Design & Sustainability (4) *Review all entries Discontinued*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Upper division standing. Restricted to upper division standing; Pass One restricted to Civil Engineering majors. Application of concepts, goals and metrics of sustainability, green engineering and industrial ecology to engineering design. Other topics include life-cycle assessments, analysis of environmental management systems, and economics of pollution prevention and sustainability. GE credit: QL, SE, SL, SS. Effective: 2020 Fall Quarter.

ECI 144—Groundwater Systems Design (4)

Lecture—4 hour(s). Prerequisite(s): ECI 141. Groundwater occurrence, distribution, and movement; groundwater flow systems; radial flow to wells and aquifer testing; aquifer management; groundwater contamination; solute transport by groundwater; fate and transport of subsurface contaminants. Groundwater supply and transport modeling. GE credit: SE. Effective: 2005 Spring Quarter.

ECI 144L—Groundwater Systems Design Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): ECI 144 (can be concurrent); ECI 144 required concurrently. Computer modeling of groundwater flow under regional gradient, well injection/withdrawal, and natural and engineered boundary conditions. Use of Groundwater Vistas computer program. Effective: 2010 Fall Quarter.

ECI 145—Hydraulic Structure Design (4)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECI 141 C- or better. Project-based course on the design of an integrated urban drainage system with focus on consideration of design alternatives, multiple realistic constraints, quantification of uncertainty, codes and standards, technical drawing and cost analysis. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 146—Water Resources Simulation (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better. Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 146—Water Resources Simulation (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECI 141 C- or better. Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies. GE credit: SE. Effective: 2020 Fall Quarter.

ECI 148A—Water Quality Management (4)

Lecture—4 hour(s). Prerequisite(s): CHE 002B C- or better. Basic concepts of water quality measurements and regulations. Introduction to physical, biological and chemical processes in natural waters. Fundamentals of mass balances in water and wastewater treatment. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 149—Air Pollution (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better). Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ATM 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ECI 150—Air Pollution Control System Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECI 149 C- or better or ATM 149 C- or better. Design and evaluation of air pollution control devices and systems. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 153—Deterministic Optimization & Design (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): MAT 021C; (MAT 022A or MAT 027A); computer programming course. Operations research. Optimization techniques such as linear programming, dynamic programming, and non-linear programming. Applications in civil engineering disciplines, including multiple realistic constraints, through computer-based course projects. GE credit: QL, SE, SL. Effective: 2020 Winter Quarter.

ECI 155—Water Resources Engineering Planning (4)

Lecture—4 hour(s). Prerequisite(s): (ENG 106 or ECN 001A or ECN 001AV); ECI 114. Basic engineering planning concepts; role of engineering, economic, environmental and social information and analysis; institutional, political and legal aspects. Case studies and computer models illustrate the planning of water resource systems. GE credit: QL, SE, SL, SS, WE. Effective: 2018 Winter Quarter.

ECI 161—Transportation System Operations (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 021C C- or better; PHY 009A C- or better. Principles of transportation system operations; traffic characteristics and methods of measurement; models of transportation operations and congestion applied to urban streets and freeways. GE credit: QL, SE. Effective: 2016 Fall Quarter.

ECI 163—Energy & Environmental Aspects of Transportation (4) *Review all entries*

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ESP 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

ECI 163—Energy & Environmental Aspects of Transportation (4) *Review all entries*

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): Upper division standing in engineering or economics or environmental studies. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ESP 163.) GE credit: SE, SL, SS, WE. Effective: 2020 Fall Quarter.

ECI 165—Transportation Policy (3)

Lecture—3 hour(s). Transportation and associated environmental problems confronting urban areas, and prospective technological and institutional solutions. Draws upon concepts and methods from economics, engineering, political science and environmental studies. GE credit: QL, SE, SS. Effective: 2013 Fall Quarter.

ECI 171—Soil Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): (ENG 103 (can be concurrent) or ECI 100 (can be concurrent)); ENG 104 C- or better; ECI 171L (can be concurrent); ECI 171L required concurrently. Restricted to Civil Engineering and Environmental Engineering majors only. Soil formations, mass-volume relationships, soil classification, effective stress, soil-water-void relationships, compaction, seepage, capillarity, compressibility, consolidation, strength, states of stress and failure, lateral earth pressures, and slope stability. GE credit: SE. Effective: 2018 Spring Quarter.

ECI 171L—Soil Mechanics Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): ECI 171 (can be concurrent); ECI 171 required concurrently. Laboratory studies utilizing standard testing methods to determine physical, mechanical and hydraulic properties of soil and demonstration of basic principles of soil behavior. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 173—Foundation Design (4)

Lecture—4 hour(s). Prerequisite(s): ECI 171. Foundation analysis and design, including site characterization, evaluation of shallow and deep foundation alternatives, evaluation of bearing capacity and settlements, design of retaining structures, and case-based design experiences. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 175—Geotechnical Earthquake Engineering (4)

Lecture—4 hour(s). Prerequisite(s): ECI 171 C- or better. Tectonics, faults, site response, and probabilistic ground motion prediction equations. Cyclic loading and liquefaction of soil elements and layers. Empirical procedures and field tests for evaluation of triggering and consequences, of liquefaction. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 179—Pavement Engineering (4)

Lecture—3 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): ENG 104 C- or better. Pavement types (rigid, flexible, unsurfaced, rail), their applications (roads, airfields, ports, rail) and distress mechanisms. Materials, traffic and environment characterization. Empirical and mechanistic-empirical design procedures. Maintenance, rehabilitation and reconstruction; construction quality; asphalt concrete mix design. GE credit: QL, SE, SL, VL. Effective: 2013 Fall Quarter.

ECI 189A—Selected Topics in Civil Engineering: Environmental Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189B—Selected Topics in Civil Engineering: Hydraulics & Hydrologic Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics & Hydrologic Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189C—Selected Topics in Civil Engineering: Engineering Planning (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189D—Selected Topics in Civil Engineering: Geotechnical Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189E—Selected Topics in Civil Engineering: Structural Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189F—Selected Topics in Civil Engineering: Structural Mechanics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189G—Selected Topics in Civil Engineering: Transportation Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189H—Selected Topics in Civil Engineering: Transportation Planning (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189I—Selected Topics in Civil Engineering: Water Resources Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189J—Selected Topics in Civil Engineering: Water Resources Planning (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 190C—Research Group Conferences in Civil & Environmental Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Civil and Environmental Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 192—Internship in Engineering (1-5)

Internship. Prerequisite(s): Upper division standing; approval of project prior to the period of the internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 193A—Civil & Environmental Engineering Senior Design (4)

Lecture—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): (ECI 140D C- or better) or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better or ECI 135 C- or better) or (ECI 161 C- or better or ECI 163 C- or better) or (ECI 141 C- or better, ECI 141L C- or better); and Consent of Instructor. One other ECI major depth course with a C- or better; students must be in their final year of study. Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Fall Quarter.

ECI 193B—Civil & Environmental Engineering Senior Design (4)

Lecture—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECI 193A. Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, VL, WE. Effective: 2017 Fall Quarter.

ECI 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 199—Special Study for Advanced Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

ECI 201—Introduction to Theory of Elasticity (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 104. Fundamental equations of elasticity in three dimensions; plane stress and plane strain; flexure and torsion of bars of various shapes. Introduction to variational and approximate methods. Effective: 1997 Winter Quarter.

ECI 203—Inelastic Behavior of Solids (3)

Lecture—3 hour(s). Prerequisite(s): ECI 201. Fundamentals of theories of plasticity, viscoelasticity and viscoplasticity for solids. Macroscopic constitutive modelling for engineering materials, e.g., metals, polymers, soils, etc., and microscopic motivation. Effective: 1997 Winter Quarter.

ECI 205—Continuum Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): ECI 201. Tensor formulation of the field equations for continuum mechanics, including large deformation effects. Invariance and symmetry requirements. Introduction to nonlinear thermoelasticity and thermodynamics. Solution of three-dimensional problems. Selected topics. Effective: 2020 Spring Quarter.

ECI 206—Fracture Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): ECI 201; ENG 104. Linear and nonlinear fracture mechanics, stress analysis, energy concepts, brittle fracture criteria, path independent integrals, Dugdale-Barenblatt model, general cohesive zone models, ductile fracture criteria, crack tip fields for stationary and propagating cracks, fatigue. Application of numerical methods for fracture mechanics. Effective: 2006 Winter Quarter.

ECI 211—Advanced Matrix Structural Analysis (4)

Lecture—4 hour(s). Prerequisite(s): ECI 131. Analysis of complex frameworks by the displacement method; treatment of tapered beams, curved beams, and beams on elastic foundations; partially rigid connections; geometric and material nonlinearities; buckling; flexibility-based formulations; FEM-software for nonlinear analysis of structures. Effective: 2003 Winter Quarter.

ECI 212A—Finite Element Procedures in Applied Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): EAD 115 or (MAT 128A, MAT 128B (can be concurrent)). Weighted-residual and Rayleigh-Ritz methods. Weak/variational formulation and development of discrete equations using finite element approximations. Application to one- and two-dimensional problems (heat conduction). Effective: 2003 Winter Quarter.

ECI 212B—Finite Elements: Application to Linear & Non-Linear Structural Mechanics Problems (4)

Lecture—4 hour(s). Prerequisite(s): ECI 212A. Application to linear and nonlinear structural mechanics problems. Linear elasticity, weak form, and finite element approximation. Incompressible media problems. Non-linear problems with material nonlinearity. Effective: 2003 Winter Quarter.

ECI 213—Analysis of Structures Subjected to Dynamic Loads (4)

Lecture—4 hour(s). Prerequisite(s): ECI 211 (can be concurrent). Analysis of structures subjected to earthquake, wind and blast loading; distributed, consistent and lumped mass techniques; computer implementation; nonlinear response spectrum; frequency and time domain analysis; seismic protection of structures; numerical methods in linear and nonlinear structural dynamics. Effective: 2012 Fall Quarter.

ECI 214—Probabilistic Seismic Hazard Analysis & Design Ground Motions (4)

Lecture—4 hour(s). Probabilistic seismic hazard analysis for use in developing design spectra and for seismic risk analyses, including the development of earthquake ground motion time series for use in dynamic analyses of structures. Effective: 2016 Winter Quarter.

ECI 216—Meshfree Methods & Partition of Unity Finite Elements (4)

Lecture—4 hour(s). Prerequisite(s): ECI 201; ECI 212A. Advanced discretization techniques such as meshfree methods and partition of unity finite elements for the Galerkin solution of boundary-value problems in solid and structural mechanics. Application of meshfree and extended finite element methods in computational fracture. Effective: 2016 Winter Quarter.

ECI 221—Theory of Plates & Introduction to Shells (3)

Lecture—3 hour(s). Prerequisite(s): ECI 201 (can be concurrent). Development of classical and refined plate theories. Application to isotropic, orthotropic and composite plates. Solutions for rectangular and circular plates. Membrane theory for axisymmetric shells and bending of circular shells. Effective: 1997 Winter Quarter.

ECI 223—Advanced Dynamics, Signal Processing, & Smart Structures Technology (4)

Lecture—4 hour(s). Prerequisite(s): ECI 213; Or equivalent. Signal processing and system identification of structures under dynamic excitations; Fourier and Laplace transforms; data acquisition and sensor design fundamentals; sensor technologies/techniques for nondestructive evaluation; structural control; actuators and dampers for smart structures; piezoelectrics and acoustic emissions; micro- and nano-fabrication. Effective: 2011 Winter Quarter.

ECI 232—Advanced Topics in Concrete Structures (4)

Lecture—4 hour(s). Prerequisite(s): ECI 130; ECI 135; ECI 138; Graduate standing. Ductility of reinforced concrete; strength of two-way slabs; modified compression field theory. Effective: 2001 Fall Quarter.

ECI 233—Advanced Design of Steel Structures (4)

Lecture—4 hour(s). Prerequisite(s): (ECI 130 or ECI 131); ECI 132. Review of Load and Resistance Factor Design (LRFD); steel-plate girder design; plastic design of indeterminate systems; moment frames and bracing systems; connection design; seismic design of steel structures; vibration of flooring systems; steel-concrete composite design. Effective: 2004 Winter Quarter.

ECI 234—Prestressed Concrete (4)

Lecture—4 hour(s). Prerequisite(s): ECI 135; (ECI 130 or ECI 131). Survey of methods and applications; prestressing materials and systems; prestress losses; flexural design; design for shear and torsion; deflection computation and control; continuous beams and indeterminate structures; floor systems; partial prestressing; design of compression members; strut-and-tie models. Effective: 2003 Fall Quarter.

ECI 235—Cement Composites (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 104. Applications of cement composites; materials selection and proportioning; component and composite properties; hydration reactions and microstructure development; mechanisms of failure; nondestructive test methods; fiber reinforcement; concrete durability; novel reinforcing materials; ferrocement; repair and retrofit technologies; applications to structural design. Effective: 2002 Fall Quarter.

ECI 236—Design of Fiber Reinforced Polymer Composite Structures (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECI 135. Basics of mechanics and design of polymer matrix composites: composite classification, manufacturing process, micromechanical property determination, classical lamination theory, strength theories, first-ply-failure, test methods, design practice, strengthening and retrofitting of existing reinforced concrete structures. Effective: 2008 Winter Quarter.

ECI 237—Bridge Design (4)

Lecture—4 hour(s). Prerequisite(s): ECI 130; ECI 135; ECI 234 recommended. Open to Graduate Students only. Bridge types, behavior and construction characteristics; design philosophy, details according to Caltrans and American Association of State Highway and Transportation Officials codes, principles; seismic design and retrofit of concrete bridges; modern bridges using advanced fiber reinforced polymer composites; fieldtrip required. Effective: 2007 Fall Quarter.

ECI 238—Performance-Based Seismic Engineering (4)

Lecture—4 hour(s). Prerequisite(s): ECI 138; ECI 213. Modern seismic design; performance-based seismic design; seismic hazard; seismic demands: linear and nonlinear procedures; performance assessment: deterministic and probabilistic procedure; review of FEMA-350, FEMA-356, ATC-40 and other performance-based guidelines. Effective: 2005 Spring Quarter.

ECI 239—Design of Materials & Systems for Sustainability (4)

Lecture—4 hour(s). Prerequisite(s): ENG 104 C or better; or Consent of Instructor. Restricted to Graduate Students. Effects on environmental impacts from materials selection and design in the built environment. Material mechanics, design constraints, and life cycle assessment in the development of “greener” materials and systems. Design of engineered materials through selecting constituents & processing techniques and the influence on mechanical properties, microstructure, and environmental impacts. Role of materials in the environmental impacts of buildings, infrastructure, and other systems. Effective: 2019 Fall Quarter.

ECI 240—Water Quality (4)

Lecture—4 hour(s). Prerequisite(s): ECI 141; ECI 142. Quality requirements for beneficial uses of water. Hydrologic cycle of quality. Hydromechanics in relation to quality of surface and groundwaters; transport and fate of waterborne pollutants. Heat budget for surface waters; predictive methods; introduction to water quality modeling. Effective: 2000 Fall Quarter.

ECI 241—Environmental Reactive Chemical Transport Modeling (4)

Lecture—4 hour(s). Prerequisite(s): CHE 002A or CHE 002B or ECI 149; Or equivalent. Modeling of reactive chemical transport in air and water including kinetic reactions, equilibrium reactions, and phase partitioning. Emphasis on numerical solution schemes and programming techniques to provide deeper insight into model performance and limitations. Effective: 2014 Fall Quarter.

ECI 242—Air Quality (4)

Lecture—4 hour(s). Prerequisite(s): ENG 105; ECI 141; ECI 149; Or equivalents. Factors determining air quality. Effects of air pollutants. Physical and chemical fundamentals of atmospheric transport and reaction. Introduction to dispersion modeling. Effective: 2002 Fall Quarter.

ECI 243A—Water & Waste Treatment (4)

Lecture—4 hour(s). Prerequisite(s): ECI 148A; Or the equivalent. Open to Graduate majors only. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 2019 Spring Quarter.

ECI 243B—Water & Waste Treatment (4)

Lecture—4 hour(s). Prerequisite(s): ECI 243A. Open to graduate majors only. Continuation of ECI 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2019 Spring Quarter.

ECI 243L—Pilot Plant Laboratory (4)

Lecture—1 hour(s); Discussion—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Open to graduate majors only. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2019 Spring Quarter.

ECI 244A—Life Cycle Assessment for Sustainable Engineering (4)

Lecture—4 hour(s). Enrollment restricted to graduate students. Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy. Not open to students who have taken ECI 244. (Same course as EGG 201.) Effective: 2019 Winter Quarter.

ECI 245A—Applied Environmental Chemistry: Inorganic (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 105; ECI 140; CHE 002B; Or the equivalent of CHE 002B; CHE 002C or CHE 107A recommended. Chemistry of natural and polluted waters. Topics include chemical, kinetic and equilibrium principles, redox reactions, gas solution and solid-solution equilibria, thermodynamics, carbonate systems, coordination chemistry, interfacial phenomena. Effective: 2000 Spring Quarter.

ECI 245B—Applied Environmental Chemistry: Organic (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; Or the equivalent; CHE 002C or CHE 107A recommended. Transport and transformation of organic chemicals in the environment. Topics include application of thermodynamics to predict solubility and activity coefficients; distribution of organic chemicals between the aqueous phase and air, solvent, or solid phases; chemical, photochemical and biological transformation reactions. Effective: 2001 Spring Quarter.

ECI 246N—Understanding Climate Change: Causes & Consequences (4)

Lecture—4 hour(s). Open to graduate students. Diverse physical processes that govern climate and drive climate change. Observational, experimental and modeling techniques and methods used in the development of our scientific understanding of the Earth system. Effective: 2016 Spring Quarter.

ECI 247—Aerosols (4)

Lecture—4 hour(s). Prerequisite(s): ENG 103; ENG 105; ECI 141; ECI 149. Behavior of airborne particles including particle formation, modification, and removal processes. Effective: 2002 Fall Quarter.

ECI 247L—Aerosols Laboratory (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): ECI 247. Methods of generation and characterization of aerosols. Detailed topics may include flow rate measurement, aerosol generation, aerosol collection, ions measurement, metals measurement, and carbon measurement. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

ECI 249—Probabilistic Design & Optimization (4)

Lecture—4 hour(s). Prerequisite(s): ECI 114; ECI 153; ENG 106; Or equivalents. Design by optimization for probabilistic systems, decision theory, the value of information, probabilistic linear programming, probabilistic dynamic programming, nonlinear probabilistic optimization. Applications in civil engineering design, project evaluation, and risk management. Effective: 2006 Winter Quarter.

ECI 250—Civil Infrastructure System Optimization & Identification (4)

Lecture—4 hour(s). Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 and mathematical modeling course recommended. Restricted to graduate standing. Applied mathematics with a focus on modeling, identifying, and controlling dynamic, stochastic, and underdetermined systems. Applications in transportation networks, water resource planning, and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 251—Transportation Demand Analysis (4)

Lecture—4 hour(s). Prerequisite(s): ECI 114; Or the equivalent. Procedures used in urban travel demand forecasting. Principles and assumptions of model components (trip generation, trip distribution, model split). New methods of estimating travel demand. Computer exercises using empirical data to calibrate models and forecast travel demand. Effective: 1999 Fall Quarter.

ECI 253—Dynamic Programming & Multistage Decision Processes (4)

Lecture—4 hour(s). Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 recommended. Operations research. Optimization techniques with a focus on dynamic programming in treating deterministic, stochastic, and adaptive multistage decision processes. Brief review of linear programming and non-linear programming. Applications in transportation networks and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 254—Exploring Data from Built Environment Using R (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Introduction to modern data science, specifically data acquisition, exploratory data analysis, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment. (Same course as GEO 279.) Effective: 2017 Fall Quarter.

ECI 256—Urban Traffic Management & Control (4)

Lecture—4 hour(s). Prerequisite(s): ECI 114. Basic concepts, models, and methods related to the branch of traffic science that deals with the movement of vehicles on a road network, including travel speed, travel time, congestion concepts, car-following and hydrodynamic traffic models. Effective: 2000 Fall Quarter.

ECI 257—Flow in Transportation Networks (4)

Lecture—4 hour(s). Prerequisite(s): ECI 153; ECI 161 or ECI 256 recommended. Elements of graph theory, a survey of pertinent optimization techniques, extremal principles in network flow problems, deterministic equilibrium assignment, stochastic equilibrium assignment, extensions of equilibrium assignments and dynamic transportation network assignment. Effective: 2000 Winter Quarter.

ECI 259—Asphalt & Asphalt Mixes (4)

Lecture—4 hour(s). Prerequisite(s): ECI 179; or Consent of Instructor. Asphalts and asphalt mix types and their use in civil engineering structures, with primary emphasis on pavements. Asphalt, aggregate properties and effects on mix properties. Design, construction, recycling. Recent developments and research. Effective: 2006 Winter Quarter.

ECI 260—Sediment Transport (4)

Lecture—4 hour(s). Prerequisite(s): ECI 141; Or equivalent. Sediment transport in hydrologic systems. Process-oriented course which will emphasize how sediment moves and the physical processes that affect sediment transport. Field trip. Effective: 2006 Winter Quarter.

ECI 261—Colloids in Soil & Water (4)

Lecture—4 hour(s). Prerequisite(s): CHE 002B; (ENG 103 or ECI 100); Upper division or graduate standing. Pass One restricted to graduate standing; Pass Two restricted to upper division standing or graduate standing. Colloid occurrence, properties, behavior in different environments, and transport mechanisms in water and soils. Emphasis on their role in water contamination. Effective: 2018 Fall Quarter.

ECI 264A—Transport, Mixing & Water Quality in River & Lakes (4)

Lecture—4 hour(s). Prerequisite(s): ECI 141; ECI 240. Principal causes of mixing and transport in rivers, lakes and reservoirs, and their impacts on water quality. Case studies of specific lakes and rivers. Effective: 2000 Fall Quarter.

ECI 264B—Transport, Mixing & Water Quality in Estuaries & Wetlands (4)

Lecture—4 hour(s). Prerequisite(s): ECI 141; ECI 240. Principal causes of mixing and transport in estuaries and wetlands, and their impacts on water quality. Topics include advection/diffusion; tides; transverse mixing; longitudinal dispersion; sediment transport; nutrient cycling; computer modeling of estuaries. Case studies of specific systems. Effective: 2000 Spring Quarter.

ECI 265—Stochastic Hydrology & Hydraulics (4)

Lecture—4 hour(s). Prerequisite(s): ECI 266; or Consent of Instructor. Physics-based stochastic methods in modeling hydrologic and hydraulic processes; theory for modeling hydrologic-hydraulic governing equations as stochastic partial differential equations applied to various hydrologic-hydraulic processes under uncertainty, including transport, open channel flow, overland flow, soil water flow, and groundwater. Effective: 2015 Winter Quarter.

ECI 266—Applied Stochastic Methods in Engineering (4)

Lecture—4 hour(s). Prerequisite(s): ECI 114 or MAT 131 or STA 130A or STA 131A or MAT 118A (can be concurrent). Stochastic processes classification; Gaussian random fields; stochastic calculus in mean square; Ito and Stratonovich stochastic differential equations; Fokker-Planck equation; stochastic differential equations with random coefficients. Effective: 1999 Fall Quarter.

ECI 267—Water Resource Management (3)

Lecture—3 hour(s). Prerequisite(s): ECI 114; ECI 141; ECI 142; ECI 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as GEO 212.) Effective: 2013 Fall Quarter.

ECI 268—Infrastructure Economics (3)

Lecture—3 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ENG 106; Or the equivalent. Economics applied to infrastructure engineering planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; effect of uncertainty; optimization economics; non-classical economics; public finance. Effective: 2018 Spring Quarter.

ECI 269—Transportation-Air Quality: Theory & Practice (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECI 149; Or the equivalent. Health and regulatory aspects of airborne pollutants. Principles of modeling vehicle emissions. Conformity issues and the regulatory framework. Regional and micro-scale modeling. Effective: 1999 Fall Quarter.

ECI 270—Advanced Water Resources Management (3)

Lecture—3 hour(s). Prerequisite(s): ECI 153; ECI 267; Or the equivalent. Discussion of technical papers related to planning theory, system maintenance, regionalization, multi-objective methods, risk analysis, institutional issues, pricing model application, economic development, forecasting, operations, and other topics. Effective: 1997 Winter Quarter.

ECI 271—Inverse Problems (4)

Lecture—4 hour(s). Prerequisite(s): ECI 114; ECI 144; Or equivalents. Inverse calibration of distributed parameter models, using data representing model outputs. Forward and inverse mappings, stability, uniqueness, identifiability. Optimization formulation of inverse problems, maximum likelihood and other objective functions, indirect and direct approaches, solution by UCODE in hands-on project format. Effective: 2010 Fall Quarter.

ECI 272A—Advanced Hydrogeology (4)

Lecture—4 hour(s). Prerequisite(s): ECI 144; MAT 118A recommended. Flow in confined, unconfined, and leaky aquifers. Geological aspects of aquifers. Regional groundwater flow and hydraulics of pumping and recharging wells. Identification of aquifer parameters. Isotope hydrogeology and recharge estimation. Effective: 2000 Fall Quarter.

ECI 272B—Advanced Hydrogeology (4)

Lecture—4 hour(s). Prerequisite(s): ECI 212A; ECI 272A. Processes of subsurface flows and transport. Numerical methods of subsurface fluid flow and transport systems. Flow in the unsaturated zone. Fresh water-salt water interface in coastal aquifers. Macrodispersion. Identification of regional aquifer parameters. Modeling of aquifer systems. Effective: 2000 Fall Quarter.

ECI 272C—Multiphase Reactive Transport (4)

Lecture—4 hour(s). Prerequisite(s): ECI 142; ECI 144; ECI 148A. Multicomponent reactive transport including multiple phases. Advective/dispersive transport, chemical equilibria, and mass transformation kinetics. Natural chemical/microbiological processes including sorption, complexation, biodegradation, and diffusive mass transfer. Eulerian and Lagrangean averaging methods. Applications to contaminant remediation problems in river and subsurface hydrology. Effective: 2004 Fall Quarter.

ECI 273—Water Resources Systems Engineering (4)

Lecture—4 hour(s). Prerequisite(s): ECI 114; ECI 153; Or the equivalent. Planning and management of water resource systems. Deterministic and stochastic simulation and optimization techniques. Capacity design and operation of reservoir systems for water supply, hydropower, flood control, and environmental objectives. Effective: 2018 Winter Quarter.

ECI 275—Hydrologic Time-Series Analysis (4)

Lecture—4 hour(s). Prerequisite(s): ECI 114; ECI 142. Application of statistical methods for analysis and modeling of hydrologic series. Statistical simulation and prediction of hydrologic sequences using time series methodology. Effective: 2003 Fall Quarter.

ECI 276—Watershed Hydrology (4)

Lecture—4 hour(s). Prerequisite(s): ECI 142; Or the equivalent. Analysis and mathematical modeling of hydrologic processes taking place in a watershed. Precipitation analysis and modeling. Theory of overland flow and its kinematic wave approximation. Analysis and modeling of saturated and unsaturated subsurface flow processes taking place on a hill slope. Effective: 1997 Winter Quarter.

ECI 277A—Computational River Mechanics I (4)

Lecture—4 hour(s). Prerequisite(s): EAD 115 (can be concurrent); ECI 141 (can be concurrent). Unsteady open channel flows, computation of water surface profiles, shallow water equations, St. Venant equations, method of characteristics, finite difference methods, stability and accuracy of explicit and implicit schemes, flood routing in simple and compound channels, advection of plumes. Not open for credit to students who have taken ECI 277. Effective: 2004 Fall Quarter.

ECI 277B—Computational River Mechanics II (4)

Lecture—4 hour(s). Prerequisite(s): ECI 277A. Open channel flows, physical aspects of river mechanics, formulation of depth-averaged equations, boundary conditions, coordinates transformation and grid generation, finite-difference solution techniques, applications to two-dimensional momentum and pollutant transport in rivers. Effective: 2004 Fall Quarter.

ECI 277C—Turbulence & Mixing Processes (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing. Nature of turbulent flows, conservation equations, momentum, heat and mass transport in free and wall-bounded flows, body forces and mixing, roughness effects, turbulence modeling and simulation. Effective: 2004 Fall Quarter.

ECI 278—Hydrodynamics (3)

Lecture—3 hour(s). Prerequisite(s): ECI 141. Perturbation methods. Basic water waves. Governing equations for fluid motion on a rotating earth. Rotation effects, vorticity dynamics, Ekman layer. Stratification effects, internal waves and turbulent mixing. Combined effects. Effective: 1997 Winter Quarter.

ECI 279—Advanced Mechanics of Fluids (4)

Lecture—4 hour(s). Prerequisite(s): ECI 141. Rotational flows. Navier-Stokes equations and solutions for laminar flow; boundary layer equations and solution techniques. Nature of turbulence. Reynolds equations. Introduction to turbulence modeling. Effective: 1997 Winter Quarter.

ECI 280A—Nonlinear Finite Elements for Elastic-Plastic Problems (4)

Lecture—4 hour(s). Prerequisite(s): Consent of Instructor. State of the art finite element methods and tools for elasticplastic problems, including computational techniques based on the finite element method and the theory of elastoplasticity. Effective: 2008 Spring Quarter.

ECI 280B—Nonlinear Dynamic Finite Elements (4)

Lecture—4 hour(s). Prerequisite(s): Consent of Instructor. State of the art computational methods and tools for analyzing linear and nonlinear dynamics problems. Effective: 2009 Spring Quarter.

ECI 281A—Advanced Soil Mechanics (4)

Lecture—4 hour(s). Prerequisite(s): ECI 171. Consolidation and secondary compression. Preloading and wick drains. Seepage and seepage pressures. Filtration, drainage, and dewatering. Shear strength: friction, cohesion, dilatancy and critical states. Effective: 2004 Fall Quarter.

ECI 281B—Advanced Soil Mechanics (5)

Lecture—4 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECI 281A. Site investigation and soil characterization within the context of slope stability analysis. Effective: 2014 Spring Quarter.

ECI 282—Pavement Design & Rehabilitation (4)

Lecture—4 hour(s). Prerequisite(s): ECI 179; or Consent of Instructor. Advanced pavement design and structural/functional condition evaluation for concrete and asphalt pavements. Highways, airfields, port facilities; new facilities, rehabilitation, reconstruction. Mechanistic-empirical procedures, materials, climate and traffic characterization. Use of current design methods; recent developments and research. Effective: 2004 Winter Quarter.

ECI 283—Physico-Chemical Aspects of Soil Behavior (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECI 171. Study of the geotechnical behavior of soils considering formation, transport, mineralogy, soil-fluid-electrolyte systems, surface tension, particle mechanics, shape, fabric, and structure. Laboratories demonstrate effects of fundamental interparticle forces (contact, Van Der Waals, capillarity and chemical). Effective: 2012 Fall Quarter.

ECI 284—Theoretical Geomechanics (4)

Lecture—4 hour(s). Prerequisite(s): ECI 171. Elasticity, plasticity, micromechanics, coupled behavior and large deformations for geomaterials. Prediction of stress-strain-volume change behavior of geomaterials. Monotonic and cyclic loading, anisotropy, bifurcation of deformation. Effective: 2004 Winter Quarter.

ECI 286—Advanced Foundation Design (4)

Lecture—4 hour(s). Prerequisite(s): ECI 173. Design and analysis of pile and pier foundations, including seismic effects; deep excavation systems; tie-back, nailing, and anchor systems; coffer dams; loads on buried conduits; ground modification techniques; and other related topics. Effective: 2004 Spring Quarter.

ECI 287—Geotechnical Earthquake Engineering (4)

Lecture—4 hour(s). Prerequisite(s): ECI 138; ECI 281A. Characteristics and estimation of earthquake ground motions; wave propagation and local site response; liquefaction potential and remediation; residual strength and stability considerations; ground deformations; dynamic soil-structure interaction. Effective: 2004 Spring Quarter.

ECI 288—Earth & Rockfill Dams (4)

Lecture—4 hour(s). Prerequisite(s): ECI 281A; ECI 281B (can be concurrent). Site selection; design considerations; layout; seismic effects including considerations of fault movements; construction; environmental considerations, instrumentation; maintenance remediation and retrofit of existing dams. Effective: 2004 Winter Quarter.

ECI 289A—Selected Topics in Civil Engineering: Environmental Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289B—Selected Topics in Civil Engineering: Hydraulics & Hydrologic Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics & Hydrologic Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289C—Selected Topics in Civil Engineering: Engineering Planning (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289D—Selected Topics in Civil Engineering: Geotechnical Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289E—Selected Topics in Civil Engineering: Structural Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289F—Selected Topics in Civil Engineering: Structural Mechanics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289G—Selected Topics in Civil Engineering: Transportation Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289H—Selected Topics in Civil Engineering: Transportation Planning (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289I—Selected Topics in Civil Engineering: Water Resources Engineering (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 290—Seminar (1)

Seminar—1 hour(s). Discussion of current graduate research, and guest lectures on recent advances. Oral presentation of individual study. Required of graduate degree candidates. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 290C—Graduate Research Group Conference (1)

Discussion—1 hour(s). Research problems, progress, and techniques in civil engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 296—Topics in Water & Environmental Engineering (1)

Seminar—2 hour(s). Seminars presented by visiting lecturers, UC Davis faculty, and graduate students. May be repeated for credit. (S/U grading only.) Effective: 2000 Winter Quarter.

ECI 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 390—The Teaching of Civil Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Civil Engineering. Participation as teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated up to 9 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

ECL—Ecology

Courses in ECL:

ECL 200AN—Principles & Applications of Ecology (5)

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): STA 102; MAT 016A; MAT 016B; or Consent of Instructor. First course in Ecology (e.g., ESP 100). Pass One open to graduate majors. Covers principles of community structure and functioning, species diversity patterns, ecosystem ecology and biogeochemistry, landscape ecology, biogeography and phylogenetics. Effective: 2017 Winter Quarter.

ECL 200BN—Principles & Applications of Ecology (5)

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): STA 102; MAT 016A; MAT 016B; or Consent of Instructor. First course in Ecology (e.g., ESP 100). Pass One open to graduate majors. Provides a broad background in the principles and applications of ecology, and serves as a foundation for advanced ecology courses. Topics include ecophysiology, behavioral ecology, population ecology, genetics and evolution. Emphasis on historical developments, current understanding, and real world applications. Effective: 2017 Winter Quarter.

ECL 205—Community Ecology (4)

Lecture—2 hour(s); Discussion—2 hour(s). Prerequisite(s): An upper division course in Ecology (ECL). Introduction to literature and contemporary research into processes structuring ecological communities. Effective: 1997 Winter Quarter.

ECL 206—Concepts & Methods in Plant Community Ecology (4)

Lecture—3 hour(s); Laboratory—4 hour(s). Prerequisite(s): Consent of Instructor. Introductory courses in statistics and plant ecology. Principles and techniques of vegetation analysis, including structure, composition, and dynamics. Emphasis given to sampling procedures, association analysis, ordination, processes and mechanisms of succession, and classification. Most techniques are demonstrated or conducted during field trips and laboratories. Effective: 1997 Winter Quarter.

ECL 207—Plant Population Biology (3)

Lecture—2 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): Advanced undergraduate ecology course (e.g., ESP 100, EVE 101, ENT 104 or PLB 117), and advanced undergraduate course in genetics and/or evolution (e.g., BIS 101 or EVE 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as PBG 207.) Effective: 2000 Winter Quarter.

ECL 208—Issues in Conservation Biology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Introductory biology (e.g. BIS 002B) and an upper division organismal biology class. Graduate-level introduction to current research in conservation biology. Emphasizes reading and discussing primary literature. Specific topics will reflect the research interests of UC Davis conservation biology faculty. Effective: 1997 Winter Quarter.

ECL 212A—Environmental Policy Process (4)

Lecture—3 hour(s); Discussion—1 hour(s). Restricted to Graduate Standing. Introduction to selected topics of the policy process and applications to the field of environmental policy. Develops critical reading skills, understanding of policy theory, and an ability to apply multiple theories to the same phenomena. (Same course as ESP 212A, ENV 200C.) Effective: 2020 Winter Quarter.

ECL 212B—Environmental Policy Evaluation (4)

Lecture—2 hour(s); Discussion—1 hour(s); Seminar—2 hour(s). Restricted to Graduate Standing. Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems. (Same course as ESP 212B, ENV 200B.) Effective: 2020 Winter Quarter.

ECL 214—Marine Ecology: Concepts & Practice (3)

Lecture—1 hour(s); Discussion—1.5 hour(s); Fieldwork—1.5 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing or one course in ecology, one course in evolution or genetics; survey course in marine ecology recommended. Critical review and analysis of concepts and practices in modern marine ecology at the interface of several fields of study including oceanography, evolution, behavior, and physiology. Emphasis on critical thinking, problem solving, and hands-on study. Two field trips required. Effective: 2016 Fall Quarter.

ECL 215—Social Ecological Systems (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Completion of core courses for specific graduate programs, for example ECL 200A, ECL 200B. Overview of social-ecological systems that links environmental policy and decision-making to ecological processes. Delves deeper into different social science topics related to this broader idea. Applying of course readings to case studies chosen by students and a final paper. Effective: 2016 Fall Quarter.

ECL 216—Ecology & Agriculture (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): EVE 011; or Consent of Instructor. Ecological principles as relevant to agriculture. Integration of ecological approaches into agricultural research to increase ecosystem functions and services. Topics include crop autoecology, biotic interactions among crops and pests, ecosystem and landscape ecology. Not open for credit to students who have completed VCR 216. (Former VCR 216). Effective: 2011 Fall Quarter.

ECL 219—Ecosystem Biogeochemistry (4)

Lecture—3 hour(s); Discussion/Laboratory—2 hour(s). Prerequisite(s): Introductory courses in ecology/biology and soils are recommended; undergraduates accepted with consent of instructor. Multi-disciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere, and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as SSC 219.) Effective: 1997 Winter Quarter.

ECL 225—Terrestrial Field Ecology (4)

Seminar—1 hour(s); Fieldwork—12 hour(s). Prerequisite(s): Introductory ecology and introductory statistics or consent of instructor. Field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results are stressed. (Same course as ENT 225, PBG 225.) Effective: 1997 Spring Quarter.

ECL 231—Mathematical Methods in Population Biology (3)

Lecture—3 hour(s). Prerequisite(s): MAT 016C or MAT 021C; Or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as PBG 231.) Effective: 1997 Spring Quarter.

ECL 232—Theoretical Ecology (3)

Lecture—3 hour(s). Examination of major conceptual and methodological issues in theoretical ecology. Model formulation and development will be emphasized. Topics differ from year to year. May be repeated for credit. Effective: 1997 Winter Quarter.

ECL 233—Computational Methods in Population Biology (3)

Lecture/Lab—2 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): A course in theoretical ecology (e.g., ECL 231 or an equivalent to ESP 121 from your undergraduate institution) or consent of instructor; no programming experience required. Numerical methods for simulating population dynamics using the computational software package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R. (Same course as PBG 233.) (S/U grading only.) Effective: 2013 Fall Quarter.

ECL 242—Ecological Genetics: Applied Genetics for Ecology, Health, & Conservation of Natural Populations (3) *Review all entries*

Lecture—2 hour(s); Discussion—0.5 hour(s); Laboratory—0.5 hour(s). Prerequisite(s): Undergraduate genetics and ecology/conservation biology courses recommended. Restricted to graduate students, 2nd or 3rd year veterinary students; advanced undergraduate students with consent of instructor. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. Effective: 2017 Spring Quarter.

ECL 242—Ecological Genetics: Applied Genetics for Ecology, Health, & Conservation of Natural Populations (3) *Review all entries Discontinued*

Lecture—2 hour(s); Discussion—0.5 hour(s); Laboratory—0.5 hour(s). Prerequisite(s): Undergraduate genetics and ecology/conservation biology courses recommended. Restricted to graduate students, 2nd or 3rd year veterinary students; advanced undergraduate students with consent of instructor. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. Effective: 2021 Winter Quarter.

ECL 243—Ecological Genomics (4)

Lecture/Discussion—3 hour(s); Term Paper/Discussion. Prerequisite(s): ECL 242; Or equivalent training in ecology and genetics according to the discretion of the instructors. Genomics concepts, technologies, and analyses for ecology research. Mixture of lecture, discussion of recent literature, hands-on training in data analysis and experimental design, and research proposal preparation and evaluation. One all-day field trip is required. Effective: 2015 Fall Quarter.

ECL 245—Climate Change, Water & Society (4)

Lecture—4 hour(s). Limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as HYD 245, ATM 245.) Effective: 2015 Spring Quarter.

ECL 262—Advanced Population Dynamics (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing; advanced course in ecology (e.g., EVE 101), population dynamics (e.g., WFC 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended. Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research. (Same course as WFC 262.) Effective: 2016 Spring Quarter.

ECL 271—Research Conference in Ecology (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter. May be repeated for credit. (Same course as PBG 271.) (S/U grading only.) Effective: 2014 Winter Quarter.

ECL 280—Current Anthropology Journal Editorial Workshop (4)

Workshop—1 hour(s); Independent Study—3 hour(s). Prerequisite(s): Consent of Instructor. Students must enroll for all three quarters. Reading and offering workshop critiques of manuscripts submitted for publication, and reading and discussion of other relevant work in anthropology and human ecology. Track and edit published comments and authors' replies that accompany major features. Participation in the development of new sections for the electronic edition of the journal, including a "news and views" section and a debate section. May be repeated up to 12 unit(s) with consent of instructor. (Same course as ANT 280.) (S/U grading only.) Effective: 2000 Fall Quarter.

ECL 290—Seminar in Ecology (1-4)

Seminar—1-4 hour(s). Prerequisite(s): Consent of Instructor. Topics in ecology. Students are expected to present an oral seminar on a particular aspect of the general topic under consideration. (S/U grading only.) Effective: 2011 Fall Quarter.

ECL 296—Topics in Ecology & Evolution (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Seminars presented by visiting lecturers, UC Davis faculty, and graduate students. May be repeated for credit. (Same course as PBG 292.) (S/U grading only.) Effective: 1997 Winter Quarter.

ECL 297T—Tutoring in Ecology (1-4)

Lecture—1 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing in ecology. Teaching ecology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECL 298—Group Study (1-5)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECL 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ECN—Economics

Courses in ECN:

ECN 001A—Principles of Microeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). ECN 001A & ECN 001B may be taken in either order. Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems. GE credit: ACGH, QL, SS. Effective: 2004 Fall Quarter.

ECN 001AV—Principles of Microeconomics (4)

Web Virtual Lecture—3 hour(s); Web Electronic Discussion—1 hour(s). Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems. Not open for credit to students who have taken ECN 001A. GE credit: ACGH, QL, SS. Effective: 2020 Spring Quarter.

ECN 001B—Principles of Macroeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). ECN 001A & ECN 001B may be taken in either order. Analysis of the economy as a whole; determinants of the level of income, employment and prices; money and banking, economic fluctuations, international trade, economic development; the role of public policy. GE credit: ACGH, QL, SS. Effective: 2004 Fall Quarter.

ECN 090X—Lower Division Seminar (1-2)

Seminar—1-2 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Limited enrollment. Examination of a special topic in Economics through shared readings, discussions, and written assignments. Effective: 1997 Winter Quarter.

ECN 092—Internship & Field Work (1-12)

Internship—3-36 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Intensive study of practical application of concepts in economics, stressing research methods and empirical analysis. (P/NP grading only.) Effective: 2019 Winter Quarter.

ECN 098—Group Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECN 099—Individual Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECN 100A—Intermediate Micro Theory: Consumer & Producer Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); ECN 001B C- or better; (MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better); (MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better). Consumer and producer theory. Equilibrium and welfare analysis. Topics include competitive markets, consumer and producer surplus at an intermediate level. Not open for credit to students that have taken ARE 100A or ECN 100. Effective: 2018 Winter Quarter.

ECN 100B—Intermediate Micro Theory: Imperfect Competition & Market Failure (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 100A. Imperfect competition and market failure. Topics include exchange, monopoly, game theory, uncertainty, asymmetric information, and public goods. Not open for credit to students that have taken ARE 100B. Effective: 2017 Fall Quarter.

ECN 101—Intermediate Macro Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); ECN 001B C- or better; ((MAT 016A C- or better, MAT 016B C- or better) or (MAT 021A C- or better, MAT 021B C- or better) or (MAT 017A C- or better, MAT 017B C- or better)). Theory of income, employment and prices under static and dynamic conditions, and long term growth. Effective: 2018 Winter Quarter.

ECN 102—Analysis of Economic Data (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; (STA 013 or STA 013Y or STA 032); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); or Consent of Instructor. Analysis of economic data to investigate key relationships emphasized in introductory micro and macro economics. Obtaining, transforming, displaying data; statistical analysis of economic data; basic univariate and multivariate regression analysis. Only 2 units of credit for students who have completed ECN 140 or ARE 106, and STA 108. GE credit: VL. Effective: 2018 Winter Quarter.

ECN 103—Economics of Uncertainty & Information (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or (ARE 100A, ARE 100B)), ECN 100B, (MAT 016A or MAT 017A or MAT 021A), (MAT 016B or MAT 017B or MAT 021B). Optimal decisions under uncertainty, expected utility theory, economics of insurance, asymmetric information, signalling in the job market, incentives and Principal-Agent theory, optimal search strategies and the reservation price principle. Effective: 2019 Winter Quarter.

ECN 106—Decision Making (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ((MAT 016A C- or better, MAT 016B C- or better) or (MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better)); (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better); or Consent of Instructor. Descriptive and normative analysis of individual decision making, with applications to personal, professional, financial, and public policy decisions. Emphasis on decision making under uncertainty and over time. Heuristics and biases in the psychology of decisions; overcoming decision traps. Effective: 2018 Winter Quarter.

ECN 107—Neuroeconomics/Reinforcement Learning & Decision Making (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): (PSC 100 or PSC 100Y or PSC 135 or ARE 100A or ECN 100A or NPB 162 or NPB 163); (STA 013 or STA 013Y or STA 100 or PSC 103A); or Consent of Instructor. Theoretical and empirical approaches to neuroeconomics (neuroscience of decision making) from psychology, neuroscience, economics, and computer science. Neuroscience of judgment and decision making, behavioral economics, and reinforcement learning. (Same course as PSC 133, CGS 107.) GE credit: SL, SS. Effective: 2018 Spring Quarter.

ECN 110A—World Economic History Before the Industrial Revolution (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Development and application of analytical models to explain the nature and functioning of economies before the Industrial Revolution. Examples will be drawn from a variety of societies, including England, China, Polynesia, and Pre-Columbian America. GE credit: SS. Effective: 2018 Spring Quarter.

ECN 110B—World Economic History Since the Industrial Revolution (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Development and application of analytical models to explain the nature and functioning of economies since the Industrial Revolution. Examples will be drawn from a variety of societies, including England, China, Germany, and India. GE credit: SS. Effective: 2018 Winter Quarter.

ECN 111A—Economic History (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; or Consent of Instructor. Survey of economic change in the United States from Colonial times to 1865; reference to other regions in the Western Hemisphere. GE credit: SS. Effective: 2018 Spring Quarter.

ECN 111B—Economics History (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV) or ECN 001B; or Consent of Instructor. Survey of economic change in the United States from 1865 to the post World War II era. GE credit: SS. Effective: 2018 Spring Quarter.

ECN 115A—Economic Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Major issues encountered in emerging from international poverty, including problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization. (Same course as ARE 115A.) GE credit: SS, WC. Effective: 2018 Winter Quarter.

ECN 115B—Economic Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Major macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. (Same course as ARE 115B.) GE credit: SS, WC. Effective: 2018 Spring Quarter.

ECN 115BY—Economic Development (4) *Review all entries*

Lecture—1.5 hour(s); Web Virtual Lecture—1.5 hour(s); Term Paper. Prerequisite(s): ECN 001A; ECN 001B. Major macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. GE credit: SS. Effective: 2016 Fall Quarter.

ECN 115BY—Economic Development (4) *Review all entries*

Lecture—1.5 hour(s); Web Virtual Lecture—1.5 hour(s); Term Paper. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Pass One open to Economics, Managerial Economics, and International Relations Majors. Macroeconomic issues of developing countries. Problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Issues of policy concerning international borrowing and external debt of developing countries. (Same course as ARE 115BY.) GE credit: SS, WC. Effective: 2020 Fall Quarter.

ECN 116—Comparative Economic Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B). Economics analysis of the relative virtues of capitalism and socialism, including welfare economics. Marxian exploitation theory, the socialist calculation debate (Hayek and Lange), alternative capitalist systems (Japan, Germany, U.S.) and contemporary models of market socialism. GE credit: WC. Effective: 2019 Winter Quarter.

ECN 117—Economics of International Immigration (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Pass One open to Economics majors only. Introduction to research on the economics of immigration. Immigrant demographics and reasons for migrating. Immigrant success and effects on native populations. Influence of immigrants on those left behind. Discussion of migration policy in the US and other countries. Not open for credit to students who have previously completed an upper division economics course in international immigration. Effective: 2019 Spring Quarter.

ECN 121A—Industrial Organization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B). Appraisal of the role of competition and monopoly in the American economy; market structure, conduct, and economic performance of a variety of industries. GE credit: SS. Effective: 2019 Winter Quarter.

ECN 121B—Industrial Organization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B). Study of antitrust and economic regulation. Emphasis on applying theoretical models to U.S. industries and case studies, including telecommunications, software, and electricity markets. Topics include natural monopoly, optimal and actual regulatory mechanisms, deregulation, mergers, predatory pricing, and monopolization. GE credit: ACGH. Effective: 2019 Winter Quarter.

ECN 122—Theory of Games & Strategic Behavior (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (MAT 016A, MAT 016B) or (MAT 021A, MAT 021B) or (MAT 017A, MAT 017B); or Consent of Instructor. Introduction to game theory. Explanation of the behavior of rational individuals with interacting and often conflicting interests. Non-cooperative and cooperative theory. Applications to economics, political science and other fields. Effective: 2016 Fall Quarter.

ECN 125—Energy Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 100 or ECN 100A or ARE 100A; Consent of Instructor. Pass One open to Economics Majors, Energy Systems, Transportation Technology & Policy, and Civil & Environmental Engineering Graduate students and Graduate School of Management. Application of theoretical and empirical models to examine efficiency in energy production and use. Energy and environmental policy, market structure and power, global climate change, optimal regulation, and real-world applications; e.g., California electricity crisis. GE credit: SS. Effective: 2020 Winter Quarter.

ECN 130—Public Microeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B). Public expenditures; theory and applications. Efficiency and equity of competitive markets; externalities, public goods, and market failures; positive and normative aspects of public policy for expenditure, including benefit-cost analysis. Topics include consumer protection, pollution, education, poverty and crime. Effective: 2019 Winter Quarter.

ECN 131—Public Finance (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B). Economic burden of taxation; equity and efficiency considerations in tax design; structure and economic effects of the U.S. tax system (including personal income tax, corporation income tax, and property tax); tax loopholes; recent developments; tax reform proposals. Effective: 2019 Winter Quarter.

ECN 132—Health Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102 or ECN 140 or ARE 106 or STA 108); ECN 100B; or Consent of Instructor. The health care market, emphasizing the role and use of economics. Individual demand, provision of services by doctors and hospitals, health insurance, managed care and competition, the role of government access to health care. Effective: 2019 Winter Quarter.

ECN 133Y—Poverty, Inequality & Public Policy (4)

Web Virtual Lecture—2 hour(s); Discussion—2 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B. Limited to 99; 3 sections of 33 each. Examination of the economics of poverty and inequality in the United States, including measurement, trends, and related policies. Effective: 2019 Winter Quarter.

ECN 134—Financial Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (STA 013 or STA 013Y); (ECN 100B or ARE 100B). General background and rationale of corporation; finance as resource allocation over time; decision making under uncertainty and the role of information; capital market and interest rate structure; financial decisions. No credit for students who have completed ARE 171A. Effective: 2020 Spring Quarter.

ECN 135—Money, Banks, & Financial Institutions (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 101; (STA 013 or STA 013Y). Banks and the banking system. Uncertainty and asymmetric information in the lending process; efficiency of competitive equilibrium in lending markets. Regulation and the conduct of monetary policy. Effective: 2019 Winter Quarter.

ECN 136—Topics in Macroeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 101. Advanced Topics in macroeconomics theory. Develops the theoretical and empirical analysis of a specific field of macroeconomics. Possible topics include, business cycle theories, growth theory, monetary economics, political economics and theories of unemployment and inflation. Effective: 2007 Fall Quarter.

ECN 137—Macroeconomic Policy (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B); ECN 101; (STA 013 or STA 013Y). Theory and practice of macroeconomic policy, both monetary and fiscal. Effective: 2019 Winter Quarter.

ECN 140—Econometrics (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102 or STA 108); or Consent of Instructor. Pass One open to Economics Majors. Problems of observation, estimation and hypotheses testing in economics through the study of the theory and application of linear regression models. Critical evaluation of selected examples of empirical research and exercises in applied economics. Only 2 units of credit allowed to students who have completed two or more of ECN 102, ARE 106 or STA 108. Effective: 2019 Fall Quarter.

ECN 140—Econometrics (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102 or STA 108); or Consent of Instructor. Pass One open to Economics Majors. Problems of observation, estimation and hypotheses testing in economics through the study of the theory and application of linear regression models. Critical evaluation of selected examples of empirical research and exercises in applied economics. Effective: 2020 Fall Quarter.

ECN 145—Transportation Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102, STA 108); or Consent of Instructor. Examination of fundamental problems of planning and financing transportation "infrastructure" (roads, ports, airports). The economics of the automobile industry, as well as the impact of government regulation and deregulation in the airlines and trucking industries. Intended for advanced Economics undergraduates. Effective: 2019 Fall Quarter.

ECN 151A—Economics of the Labor Market (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 100 or ECN 100A or ARE 100A. Theory of labor supply and demand; determination of wages and employment in the labor market. Policy issues: labor force participation by married women; minimum wages and youth unemployment; effect of unions on wages. Effective: 2019 Winter Quarter.

ECN 151B—Economics of Human Resources (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 100 or ECN 100A or ARE 100A. Human resource analysis; introduction to human capital theory and economics of education; the basic theory of wage differentials, including theories of labor market discrimination; income distribution; poverty. Policy issues; negative income tax; manpower training programs; incomes policy. Effective: 2019 Winter Quarter.

ECN 152—Economics of Education (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 100 C- or better or ECN 100A or ARE 100A C- or better); (ECN 100B or ARE 100B C- or better); ECN 102 C- or better; (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better); or Consent of Instructor. Application of theoretical and empirical tools of economics to the education sector. Demand for Education; Education Production and Market Structures in Education. Policy applications: class size reduction, school finance equalization, accountability, and school choice. Effective: 2019 Winter Quarter.

ECN 160A—International Microeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 100 or ECN 100A or ARE 100A. International trade theory; impact of trade on the domestic and world economies; public policy toward external trade. Only 2 units of credit allowed to students who have completed ECN 162. Effective: 2019 Winter Quarter.

ECN 160B—International Macroeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 101. Macroeconomic theory of an open economy. Balance of payments adjustment mechanism, international monetary economics issues; international financial institutions and their policies. Only 2 units of credit allowed to students who have completed ECN 162. Effective: 2019 Winter Quarter.

ECN 162—International Economic Relations (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; or Consent of Instructor. International trade & monetary relations, trade policy, exchange rate policy, policies toward international capital migration and investment. Emphasis on current policy issues. Intended especially for non-majors. Not open for credit to students who have completed ECN 160A or ECN 160B. GE credit: SS, WC. Effective: 2018 Winter Quarter.

ECN 167—Economic Development in Weak States (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 100A; ECN 100B. Pass One open to Economics majors only. Barriers to economic development in developing countries. Economic and policy tools to address barriers within a functioning, well-intentioned government and non-functioning or ill-intentioned governments. Conflict between the state and other subnational actors for legitimate political control. Field experiments and other methodology to understand the success of economic and policy tools in weak states Not open for credit to students who have previously completed an upper division economics course in economic development in weak states. GE credit: SS. Effective: 2019 Fall Quarter.

ECN 171—Economy of East Asia (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; or Consent of Instructor. Intensive reading, discussion and research on selected topics from the economies of the countries of East Asia. Consult department for course scheduling. Effective: 2018 Spring Quarter.

ECN 190—Topics in Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Selected topics in economic analysis and public policy. Variable content. May be repeated for credit when topic differs. Effective: 2007 Fall Quarter.

ECN 190X—Upper Division Seminar (1-4)

Seminar—1-4 hour(s). Prerequisite(s): (ECN 100 or ECN 100A); ECN 100B; ECN 101; and Consent of Instructor. Limited enrollment. In-depth examination at an upper division level of a special topic in Economics. Emphasis on focused analytical work. May not be repeated for credit. Effective: 2019 Winter Quarter.

ECN 192—Internship (1-6)

Internship—3-18 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Internship experience off and on campus in all subject areas offered in the Department of Economics. Supervised by a member of the staff. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

ECN 194HA—Special Study for Honors Students (4)

Independent Study—3 hour(s); Seminar—1 hour(s). Prerequisite(s): Major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.500 in courses counted toward the major. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor. Effective: 1997 Winter Quarter.

ECN 194HB—Special Study for Honors Students (4)

Independent Study—3 hour(s); Seminar—1 hour(s). Prerequisite(s): Major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.500 in courses counted toward the major. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor. Effective: 1997 Winter Quarter.

ECN 197T—Tutoring in Economics (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Consent of instructor and chairperson. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2004 Fall Quarter.

ECN 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECN 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECN 200A—Microeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as ARE 200A.) Effective: 2018 Fall Quarter.

ECN 200B—Microeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200A. Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure. (Same course as ARE 200B.) Effective: 2018 Fall Quarter.

ECN 200C—Microeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200B. Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as ARE 200C.) Effective: 2018 Fall Quarter.

ECN 200D—Macroeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 101; MAT 021A; MAT 021B; MAT 021C; or equivalent courses. Macro static theory of income, employment, and prices. Effective: 2018 Fall Quarter.

ECN 200E—Macroeconomic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200B (can be concurrent); ECN 200D. Macrodynamic theory of income, employment, and prices. Effective: 1997 Winter Quarter.

ECN 201A—History of Economic Thought (4)

Lecture—3 hour(s); Discussion—1 hour(s). Economic thought from the classical Greece era to modern times. Effective: 1997 Winter Quarter.

ECN 201B—History of Economic Thought II (4)

Lecture—3 hour(s); Discussion—1 hour(s). Origins and emergence of modern economic analysis. Effective: 1997 Winter Quarter.

ECN 203A—Advanced Economic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200A; ECN 200B. Advanced topics in general equilibrium theory and welfare economics: existence, determinateness and efficiency; intertemporal economies; uncertainty. Effective: 2007 Fall Quarter.

ECN 203B—Advanced Economic Theory: Game Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200A; ECN 200B; ECN 200C. Covers the most recent developments in game theory, with the focus changing from year to year. Main topics are: refinements Nash equilibrium, repeated games, evolution, social situations, bounded rationality, and bargaining theory. Effective: 1997 Winter Quarter.

ECN 203C—Topics in Economic Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200A; ECN 200B; ECN 200C. Selected topics in contemporary microeconomic theory. May be repeated for credit with the consent of the Graduate Studies Committee. Effective: 1997 Winter Quarter.

ECN 210A—Economic History (4)

Lecture/Discussion—4 hour(s). Economic history of the eastern hemisphere in the modern period. Medieval Europe or other regions may be studied, depending on student interest. Effective: 1997 Winter Quarter.

ECN 210B—Economic History (4)

Lecture/Discussion—4 hour(s). The United States from Colonial times to the present. Other areas of the western hemisphere may be studied, according to student interest. Effective: 1997 Winter Quarter.

ECN 210C—Economic History (4)

Seminar—4 hour(s). Prerequisite(s): A graduate course in economic history. Selected topics and issues, emphasis on current research. (Quarter offered to be flexible.) Effective: 1997 Winter Quarter.

ECN 214—Development Economics (4)

Lecture—4 hour(s). Prerequisite(s): ARE 100A; ARE 100B; ECN 101; ARE 204/ECN 204 and ECN 160A-ECN 160B recommended. Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts. (Same course as ARE 214.) Effective: 1997 Winter Quarter.

ECN 215A—Microdevelopment Theory & Methods I (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200A or ECN 204; ECN 240A recommended. Agricultural development theory, with a focus on microeconomics. Agricultural household behavior with and without market imperfections and uncertainty. Analysis of rural land, labor, credit and insurance markets, institutions, and contracts. (Same course as ARE 215A.) Effective: 1999 Fall Quarter.

ECN 215B—Open Macroeconomics of Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ARE 200A or ECN 200A); (ARE 204 or ECN 204); (ECN 214 or ECN 215A); ECN 200D or ECN 205. Models and policy approaches regarding trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. Basic analytical focus is real exchange rate and its impact on sectoral allocation of resources. (Same course as ARE 215B.) Effective: 1997 Winter Quarter.

ECN 215C—Microdevelopment Theory & Methods II (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 215A. Extension of development theory and microeconomic methods. Agricultural growth and technological change; poverty and income inequality; multisectoral, including village and regional models. Computable general equilibrium methods and applications. (Same course as ARE 215C.) Effective: 1999 Fall Quarter.

ECN 215D—Environmental & Economic Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200A; (ECN 204 or ARE 275). Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics. (Same course as ARE 215D.) Effective: 1998 Spring Quarter.

ECN 216—Energy & Climate Policy (4)

Lecture—3 hour(s); Extensive Writing/Discussion. Prerequisite(s): ECN 100A or ARE 100A; or Consent of Instructor. Pass One restricted to graduate students in the following programs: Economics, Energy Graduate Group, and Transportation Technology and Policy Graduate Group. Fundamentals of energy technology, economics, and policy. Survey and analysis of current and prospective climate policies at the local and global level, including but not limited to cap-and-trade, emissions offsets, intensity standards, technology standards, mandates and subsidies. (Same course as EGG 202.) Effective: 2018 Spring Quarter.

ECN 221A—The Theory of Industrial Organization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200A; ECN 200B; ECN 200C. Game theory is used to analyze strategic interaction of firms in industries. Topics include models of competition, product differentiation, entry-deterring strategies, contractual arrangements, vertical control and antitrust issues. Effective: 2001 Fall Quarter.

ECN 221B—Empirical Analysis in Industrial Organization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 221A; ECN 240B. Recent empirical work in industrial organization. Topics include empirical analysis of cartels, product differentiation, innovation and technological change, and imperfect competition in international markets. Effective: 2002 Winter Quarter.

ECN 221C—Industrial Organization & Regulation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 221A; ECN 240B. Optimal regulation of natural monopoly. Topics include regulatory mechanisms for single and multiple output firms under symmetric and asymmetric information, optimality without regulation, the economic theory of regulation, and empirical studies of regulation and deregulation. Effective: 2002 Spring Quarter.

ECN 230A—Public Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200C. Measures of deadweight loss and consumer surplus; optimal commodity and income taxation; tax incidence; policy issues in personal taxation, corporate taxation, and social insurance; the evaluation of effective tax rates. Effective: 2001 Fall Quarter.

ECN 230B—Public Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 240A; ECN 240B. Effects of government policies on economic behavior; labor supply, program participation, investment, consumption and savings. Effective: 2016 Fall Quarter.

ECN 230C—Public Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200C; ECN 240B. Advanced topics in economics of the public sector, with emphasis on current research. Topics differ from year to year. Effective: 2001 Fall Quarter.

ECN 233—Poverty & Public Policy (4)

Lecture/Discussion—4 hour(s). Interdisciplinary course covering qualitative and quantitative U.S. based poverty research. Topics include measurement, statistics, theories and evidence on the causes and consequences of poverty, and the history and efficacy of major anti-poverty programs. Effective: 2016 Fall Quarter.

ECN 235A—Macroeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200D; or Consent of Instructor. Frontiers of applied/empirical macroeconomics. Evidence and lessons from macroeconomic history for The Great Depression, financial crises, efficient markets, parity conditions, capital flows, default, financial crises, exchange rates, growth, and other current empirical research topics. Effective: 2016 Fall Quarter.

ECN 235B—Macroeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200D; or Consent of Instructor. Search theory, theory of real-world markets characterized by search frictions, with applications: Labor economics: models of unemployment and wages differentials; Financial economics: determination of asset prices in OTC financial markets; Monetary Economics: foundations for money as a medium of exchange. Effective: 2016 Fall Quarter.

ECN 235C—Macroeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200D; or Consent of Instructor. Basic numerical methods for analytically intractable problems in economics. Techniques presented applicable in a wide range of fields including macroeconomics, econometrics, resource economics, labor economics, economic theory, international trade, finance, game theory, public finance, contract theory, and others. Effective: 2016 Fall Quarter.

ECN 235D—Macroeconomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Selected topics in Macroeconomics. May be repeated for credit with consent of Economics Graduate Studies Committee. Effective: 2017 Winter Quarter.

ECN 239—Econometric Foundations (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Prepares students for econometric theory and empirical work by examining the statistical foundation of econometrics. Special attention is paid to problems specific to non-experimental data common to social sciences. Topics from matrix algebra are also covered. (Same course as ARE 239.) Effective: 2016 Fall Quarter.

ECN 240A—Econometric Methods (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 239; or Consent of Instructor. Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables. (Same course as ARE 240A.) Effective: 2017 Fall Quarter.

ECN 240B—Econometric Methods (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 240A. Topics include asymptotic theory and instrumental variables, pooled time-series cross-section estimation, seemingly unrelated regression, classical hypothesis tests, identification and estimation of simultaneous equation models, cointegration, error correction models, and qualitative and limited dependent variable models. (Same course as ARE 240B.) Effective: 2000 Spring Quarter.

ECN 240C—Time Series Econometrics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 240B; or Consent of Instructor. Probability theory; estimation, inference and forecasting of time series models; trends and non-standard asymptotic theory; vector time series methods and cointegration; time series models for higher order moments and transition data; state-space modeling and the Kalman filter. (Same course as ARE 240C.) Effective: 2016 Fall Quarter.

ECN 240D—Cross Section Econometrics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 240B; or Consent of Instructor. Estimation and inference for nonlinear regression models for cross-section data; models for discrete data and for limited dependent variables; models for panel data; additional topics such as bootstrap and semiparametric regression. (Same course as ARE 240D.) Effective: 2016 Fall Quarter.

ECN 240E—Topics in Time Series Econometrics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 240C; or Consent of Instructor. Modern econometric techniques for time series data. Expand on topics covered in ECN 240A, ECN 240B, ECN 240C. Content may differ year to year. (Same course as ARE 240E.) Effective: 2016 Fall Quarter.

ECN 240F—Topics in Cross Section Econometrics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 240D; or Consent of Instructor. Modern econometrics techniques for cross-section data. Expand on topics covered in ECN 240A, ECN 240B, ECN 240D. Content may differ year to year. (Same course as ARE 240F.) Effective: 2016 Fall Quarter.

ECN 250A—Labor Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECN 150A and ECN 150B) or the equivalent. Philosophy, theory and history of American and foreign labor movements; union structure, organization and collective bargaining under changing labor market conditions; current labor market issues. Effective: 1997 Winter Quarter.

ECN 250B—Labor Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 151A; or Consent of Instructor. ECN 204 or ECN 200A recommended. Microeconomic theory of labor supply and labor demand, estimation of labor supply and demand functions; human capital theory; labor market analysis. Effective: 1997 Winter Quarter.

ECN 260A—International Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200A or ECN 204. Theory of trade determinants; gains from trade; tariffs and effective protection; economic unions. Effective: 1997 Winter Quarter.

ECN 260B—International Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200D; ECN 200E. Balance of payments adjustment mechanisms; foreign exchange markets theories of balance of payments policy and international monetary mechanisms. Effective: 1997 Winter Quarter.

ECN 260CN—International Investment & Trade (4)

Seminar—4 hour(s). Prerequisite(s): ECN 260A. Analysis of foreign investment and its links to trade; theories of the firm as they relate to firm's export and investment decisions; and an introduction to the political economy of trade policies. Effective: 1999 Winter Quarter.

ECN 260D—Topics in International Macroeconomics (4)

Seminar—4 hour(s). Prerequisite(s): ECN 260B; or Consent of Instructor. Survey of current literature in international macroeconomic theory. Effective: 1998 Spring Quarter.

ECN 260E—Topics in International Trade (4)

Seminar—4 hour(s). Prerequisite(s): ECN 260A; ECN 260B. Current literature in international trade theory. Effective: 1999 Winter Quarter.

ECN 260F—International Macroeconomic Policy (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 260B. Theory and practice of international macroeconomic policy. Topics include exchange rate regimes, international financial institutions, crises and current topics. Effective: 2011 Fall Quarter.

ECN 270A—Economics of Growth (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200D; ECN 200E. Modern theories and empirics of economic growth beginning with the neoclassical theories up to current endogenous growth models. Emphasis on the analysis of human capital and growth, technological innovation, its diffusion and empirical evidence on growth. Effective: 2002 Fall Quarter.

ECN 270B—Economics of Growth (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200D; ECN 200E. Empirical analysis of growth patterns and growth models. Emphasis on the relationship between macroeconomic management and long-term growth; the use of foreign capital in accelerating growth and its occasional mishaps; the comparison of growth performance in East Asia and Latin America since WW2; the experiences of centrally-planned economies and transitions to market-based growth; and the transformation from an industrial economy to a knowledge economy. Effective: 2003 Winter Quarter.

ECN 270C—Economics of Growth (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 200D; ECN 200E. Institutional bases; politics; contracts and commitment; money and finance; malthusian dynamics; modern economic growth; transition of industrialization; dual economies, core and periphery; sources of convergence and divergence; openness and growth; resources, demography, and geography; institutions, imperialism, and class conflicts. Effective: 2003 Spring Quarter.

ECN 280—Orientation to Economic Research (2)

Discussion—2 hour(s). Bridge the gap between students' classwork and their subsequent research. Topics such as the origination of a research project, some mechanics of empirical research and hints on the submission of research papers. (S/U grading only.) Effective: 1997 Winter Quarter.

ECN 290—Topics in Economics (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Selected topics in economic analysis and public policy, focusing on current research. May be repeated for credit. Effective: 1997 Winter Quarter.

ECN 291—Contemporary Economics Seminar (2)

Seminar—2 hour(s). Prerequisite(s): Graduate standing in Economics. Seminar series on topics of current interest. May be repeated for credit. (S/U grading only.) Effective: 2007 Fall Quarter.

ECN 298—Group Study (1-5)

Discussion—1-5 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ECN 299—Individual Study (1-12)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ECN 299D—Dissertation Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECN 397—Teaching of Economics (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Graduate standing in economics. Teaching of economics: methods of instruction, organization of courses, examination and evaluation procedures. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS—Engineering Computer Science

Courses in ECS:

ECS 012—Introduction to Media Computation (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming are covered as well as analysis of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students. Only 2 units of credit for students that have taken ECS 010 or ECS 030 or ENG 006. (Same course as CTS 012.) GE credit: AH, SE, VL. Effective: 2015 Spring Quarter.

ECS 015—Introduction to Computers (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Computer uses in modern society. Emphasis on uses in non-scientific disciplines. Includes word processing, spreadsheets, web-page creation, elementary programming, basic computer organization, the Internet, the uses of computers and their influence on society. Not intended for Computer Science or Computer Science & Engineering majors. Only 2 units of credit allowed to students who have completed PLS 021; not open for credit to students who have completed ECS 030. GE credit: QL, SE, WE. Effective: 2013 Fall Quarter.

ECS 020—Discrete Mathematics For Computer Science (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Discrete mathematics of particular utility to computer science. Proofs by induction. Propositional and first-order logic. Sets, functions, and relations. Big-O and related notations. Recursion and solutions of recurrence relations. Combinatorics. Probability on finite probability spaces. Graph theory. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECS 032A—Introduction to Programming (4)

Lecture—3 hour(s); Discussion—1 hour(s). Not open to students who have completed ECS 036A; open to undergraduate students only. Introduction to programming and problem solving in Python. Aimed primarily at non-major students. No credit to students who completed previous ECS 010, ECS 030 or higher. GE credit: SE. Effective: 2020 Spring Quarter.

ECS 032B—Introduction to Data Structures (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 010 C- or better or ECS 030 C- or better or ECS 032A C- or better or ECS 036A C- or better. Design and analysis of data structures using Python; trees, heaps, searching, sorting, and graphs. No credit to students who completed ECS 036C or ECS 060 or higher. GE credit: SE. Effective: 2018 Fall Quarter.

ECS 034—Software Development in UNIX & C/C++ (5)

Lecture—3 hour(s); Discussion—1 hour(s); Extensive Problem Solving. Prerequisite(s): ECS 032B C- or better; or Consent of Instructor. UNIX Operating system tools and programming environment. Methods for debugging and verification. Principles of C and object-oriented programming in C++. Extensive programming. Only 3 units of credit for students who have previously taken ECS 036B. GE credit: SE. Effective: 2018 Fall Quarter.

ECS 036A—Programming & Problem Solving (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 032A C- or better or ECS 010 C- or better; or must satisfy computer science placement exam; prior experience with basic programming concepts (variable, loops, conditional statements) required. Pass One restricted to Computer Science, Computer Science & Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only; Pass Two open to undergraduate students only. Computers and computer programming for students with some prior experience, algorithm design, and debugging. Good programming style. Use of basic UNIX tools. Only 2 units if completed ECS 032A; no credit for students who have completed ECS 032B or previous ECS 030. GE credit: SE. Effective: 2020 Spring Quarter.

ECS 036B—Software Development & Object-Oriented Programming in C++ (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 030 C- or better or ECS 036A C- or better. Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Object-oriented programming in C++. Basic data structures and their use. Writing good programs of increased complexity and efficiency. Methods for debugging and verification. Not open for credit to students who have taken ECS 034, previous ECS 040 or ECS 060. GE credit: SE. Effective: 2018 Fall Quarter.

ECS 036C—Data Structures, Algorithms, & Programming (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 040 C- or better or ECS 036B C- or better); ECS 020 C- or better. Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Design and analysis of data structures for a variety of applications; trees, heaps, searching, sorting, hashing, and graphs. Extensive programming. Not open for credit to students who have taken ECS 032B or previous ECS 060. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 050—Computer Organization & Machine-Dependent Programming (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 040 C- or better or ECS 034 C- or better or ECS 036B C- or better. Pass One open to Computer Science, Computer Science & Engineering, Computer Engineering, and Cognitive Science Majors only. Comparative study of different hardware architectures via programming in the assembly languages of various machines. Role of system software in producing an abstract machine. Introduction to I/O devices and programming. Only 1 unit of credit allowed for students who have taken EEC 070. GE credit: SE. Effective: 2020 Spring Quarter.

ECS 089A—Special Topics in Computer Science: Computer Science Theory (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Science Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089B—Special Topics in Computer Science: Architecture (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Architecture. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089C—Special Topics in Computer Science: Programming Languages & Compilers (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Programming Languages & Compilers. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089D—Special Topics in Computer Science: Operating Systems (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Operating Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089E—Special Topics in Computer Science: Software Engineering (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Software Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089F—Special Topics in Computer Science: Databases (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Databases. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089G—Special Topics in Computer Science: Artificial Intelligence (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Artificial Intelligence. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089H—Special Topics in Computer Science: Computer Graphics (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Graphics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089I—Special Topics in Computer Science: Networks (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089J—Special Topics in Computer Science: Computer-Aided Design (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer-Aided Design. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089K—Special Topics in Computer Science: Scientific Computing (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Scientific Computing. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089L—Special Topics in Computer Science: Computer Science (1-5)

Lecture; Laboratory. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 092—Internship in Computer Science (1-5)

Internship. Prerequisite(s): Lower division standing; project approval prior to period of internship. Supervised work experience in computer science. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 098—Directed Group Study (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 098F—Student Facilitated Course (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 099—Special Study for Lower Division Students (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 113—Computer Security for Non-Majors (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 010 or ECS 030 or ECS 032A or ECS 036A. Principles, mechanisms, implementation, and sound practices of computer security and data protection. Cryptography, authentication and access control. Internet security. Malicious software. Common vulnerabilities. Practical security in everyday life. Not intended for Computer Science or Computer Science & Engineering majors. No credit allowed to students who have completed ECS 153 or ECS 155. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 120—Theory of Computation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 020 or MAT 108); (ECS 32B or ECS 36C Recommended). Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Fundamental ideas in the theory of computation, including formal languages, computability and complexity. Reducibility among computational problems. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECS 122A—Algorithm Design & Analysis (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 020; (ECS 060 or ECS 032B or ECS 036C). Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Complexity of algorithms, bounds on complexity, analysis methods. Searching, sorting, pattern matching, graph algorithms. Algorithm design techniques: divide-conquer, greedy, dynamic programming. Approximation methods. NP-complete problems. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 122B—Algorithm Design & Analysis (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 122A; (ECS 060 or ECS 034 or ECS 036C). Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Theory and practice of hard problems, and problems with complex algorithm solutions. NP-completeness, approximation algorithms, randomized algorithms, dynamic programming and branch and bound. Theoretical analysis, implementation and practical evaluations. Examples from parallel, string, graph, and geometric algorithms. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECS 124—Theory & Practice of Bioinformatics (4)

Lecture—3 hour(s); Laboratory—1 hour(s). Prerequisite(s): (ECS 010 or ECS 032A or ECS 030 or ECS 036A or ENG 006); (STA 012 or STA 013 or STA 013Y or STA 032 or STA 100 or STA 131A or MAT 135A or BIM 105); (BIS 002A or MCB 010). Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, mathematical and algorithmic models underlying bioinformatics and systems biology; sequence analysis, database search, genome annotation, clustering and classification, functional gene networks, regulatory network inference, phylogenetic trees, applications of common bioinformatics tools in molecular biology and genetics. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 127—Cryptography (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 020 or MAT 108); (ECS 010 or ECS 032A or ECS 030 or ECS 036A). Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to the theory and practice of cryptographic techniques used in computer security. Encryption (secret-key and public-key), message authentication, digital signatures, entity authentication, key distribution, and other cryptographic protocols. The social context of cryptography. GE credit: QL, SE, SL. Effective: 2019 Winter Quarter.

ECS 129—Computational Structural Bioinformatics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (BIS 002A or MCB 010); (ECS 010 or ECS 032A or ECS 036A). Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, chemical and algorithmic models underlying computational structural biology; protein structure and nucleic acids structure; comparison of protein structures; protein structure prediction; molecular simulations; databases and online services in computational structural biology. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 130—Scientific Computation (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 030 or ENG 006 or ECS 032A or ECS 010 or ECS 036A); (MAT 022A or MAT 067). Pass One open to Computer Science and Computer Science Engineering Majors only. Matrix-vector approach using MATLAB for floating-point arithmetic, error analysis, data interpolation, least squares data fitting, quadrature, zeros, optimization and matrix eigenvalues and singular values. Parallel computing for matrix operations and essential matrix factorizations. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 130—Scientific Computation (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 030 or ENG 006 or ECS 032A or ECS 010 or ECS 036A); (MAT 022A or MAT 027A or MAT 067). Pass One open to Computer Science and Computer Science Engineering Majors only. Matrix-vector approach using MATLAB for floating-point arithmetic, error analysis, data interpolation, least squares data fitting, quadrature, zeros, optimization and matrix eigenvalues and singular values. Parallel computing for matrix operations and essential matrix factorizations. GE credit: SE. Effective: 2020 Fall Quarter.

ECS 132—Probability & Statistical Modeling for Computer Science (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 040 or ECS 034 or ECS 036B); ECS 020; MAT 021C; (MAT 022A or MAT 027A or MAT 067). Pass One open to Computer Science and Computer Science Engineering Majors only. Univariate and multivariate distributions. Estimation and model building. Markov/Hidden Markov models. Applications to data mining, networks, security, software engineering and bioinformatics. GE credit: QL, SE. Effective: 2020 Fall Quarter.

ECS 132—Probability & Statistical Modeling for Computer Science (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 040 or ECS 034 or ECS 036B); ECS 020; MAT 021C; (MAT 022A or MAT 067). Pass One open to Computer Science and Computer Science Engineering Majors only. Univariate and multivariate distributions. Estimation and model building. Markov/Hidden Markov models. Applications to data mining, networks, security, software engineering and bioinformatics. GE credit: QL, SE. Effective: 2020 Spring Quarter.

ECS 140A—Programming Languages (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 050; (ECS 060 or ECS 032B or ECS 036C); ECS 020; ECS 150. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages. GE credit: SE. Effective: 2019 Fall Quarter.

ECS 140B—Programming Languages (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 140A. Pass One open to Computer Science and Computer Science Engineering Majors only. Continuation of programming language principles. Further study of programming language paradigms such as functional and logic; additional programming language paradigms such as concurrent (parallel); key implementation issues for those paradigms; and programming language semantics. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 142—Compilers (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 140A; ECS 120; ECS 122A recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Principles and techniques of lexical analysis, parsing, semantic analysis, code generation, and code optimization. Implementation of compilers. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 145—Scripting Languages & Their Applications (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 034 or ECS 036C or ECS 060; or Consent of Instructor. Pass One open to Computer Science and Computer Science Engineering Majors only. Goals and philosophy of scripting languages, with Python and R as prime examples. Applications include networking, data analysis and display, and graphical user interfaces (GUIs). GE credit: SE. Effective: 2019 Winter Quarter.

ECS 150—Operating Systems & System Programming (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 034 or ECS 036C or ECS 060); (ECS 154A or EEC 170). Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Basic concepts of operating systems and system programming. Processes and interprocess communication/synchronization; virtual memory, program loading and linking; file and I/O subsystems; utility programs. Study of a real operating system. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 152A—Computer Networks (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032). Pass One open to Computer Science and Computer Science Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as EEC 173A.) GE credit: SE. Effective: 2019 Winter Quarter.

ECS 152B—Computer Networks (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 150; (ECS 152A or EEC 173A). Pass One open to Computer Science and Computer Science Engineering Majors only. TCP/IP protocol suite, computer networking applications, client-server and peer-to-peer architectures, application-layer protocols, transport-layer protocols, transport-layer interfaces, sockets, network programming, remote procedure calls, and network management. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 152C—Advanced Topics in Computer Networks (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 173A or ECS 152A. Advanced topics in computer networks, wireless networks, multimedia networking, traffic analysis and modeling, network design and management, network simulation and performance analysis, and design projects in communication networks. (Same course as EEC 173B.) GE credit: SE. Effective: 2014 Fall Quarter.

ECS 153—Computer Security (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 150; (ECS 152A or EEC 173A). Pass One open to Computer Science and Computer Science Engineering Majors only. Principles, mechanisms, and implementation of computer security and data protection. Policy, encryption and authentication, access control, and integrity models and mechanisms; network security; secure systems; programming and vulnerabilities analysis. Study of an existing operating system. Not open for credit to students who have completed ECS 155. GE credit: SE. Effective: 2018 Fall Quarter.

ECS 154A—Computer Architecture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 050 or EEC 070. Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to digital design. Interfacing of devices for I/O, memory and memory management. Input/output programming, via wait loops, hardware interrupts and calls to operating system services. Hardware support for operating systems software. Only 1 unit of credit allowed for students who have taken EEC 170. GE credit: SE. Effective: 2017 Winter Quarter.

ECS 154B—Computer Architecture (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 154A or (EEC 170, EEC 180A). Pass One open to Computer Science and Computer Science Engineering Majors only. Hardwired and microprogrammed CPU design. Memory hierarchies. Uniprocessor performance analysis under varying program mixes. Introduction to pipelining and multiprocessors. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 154B—Computer Architecture (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 154A or EEC 170 or EEC 180A. Pass One open to Computer Science and Computer Science Engineering Majors only. Hardwired and microprogrammed CPU design. Memory hierarchies. Uniprocessor performance analysis under varying program mixes. Introduction to pipelining and multiprocessors. Not open for credit to students who have taken ECS 201A. GE credit: SE. Effective: 2020 Fall Quarter.

ECS 158—Programming on Parallel Architectures (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 150; ECS 154B recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Techniques for software development using the shared-memory and message-passing paradigms, on parallel architectures and networks of workstations. Locks, barriers, and other techniques for synchronization. Introduction to parallel algorithms. GE credit: SE. Effective: 2018 Winter Quarter.

ECS 160— Software Engineering (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 140A; extensive programming experience recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Requirements, specification, design, implementation, testing, and verification of large software systems. Study and use of software engineering methodologies. Team programming. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 161—Modern Programming Tools (4)

Lecture—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): (ECS 040 or ECS 032B or ECS 036B). Pass One open to Computer Science and Computer Science Engineering Majors only. Concepts and practice of collaborative software development using modern software tools. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 162—Web Programming (4)

Lecture—3 hour(s); Laboratory—1 hour(s). Prerequisite(s): ECS 030 or ECS 034 or ECS 036B; or equivalent programming experience in C and the Unix environment. Pass One open to Computer Science and Computer Science Engineering Majors only. Technical aspects of building websites, including both server-side and client-side software development. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECS 163—Information Interfaces (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 060 or ECS 032B or ECS 036C. Pass One open to Computer Science and Computer Science Engineering Majors only. Art and science of information visualization and interfaces for information systems. Design principles of human-computer interaction. Visual display and navigation of nonspatial and higher dimensional data. Implementations, performance issues, tradeoffs, and evaluation of interactive information systems. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECS 164—Human-Computer Interaction (4)

Lecture—3 hour(s); Discussion—1 hour(s). Pass One restricted to computer science and computer science & engineering students only. Introduction to concepts and practice of modern human-computer interaction design. GE credit: SE. Effective: 2019 Fall Quarter.

ECS 165A—Database Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 060 or ECS 032B or ECS 036C. Pass One open to Computer Science and Computer Science Engineering Majors only. Database modeling and design (E/R model, relational model), relational algebra, query languages (SQL), file and index structures, query processing, transaction management. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 165B—Database Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 165A; (ECS 060 or ECS 034 or ECS 036C). Pass One open to Computer Science and Computer Science Engineering Majors only. Data modeling (object-relational, graph-based, spatiotemporal models). Querying semistructured data (XML). Database theory (normalization, integration, provenance). Database programming (stored procedures, embedded SQL, web programming). Advanced topics (data warehousing, parallel data processing). GE credit: SE. Effective: 2019 Winter Quarter.

ECS 170—Introduction to Artificial Intelligence (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 060 or ECS 032B or ECS 036C. Pass One open to Computer Science and Computer Science & Engineering Majors only; Pass Two open to undergraduate students only. Design and implementation of intelligent computer systems. Knowledge representation and organization. Memory and inference. Problem solving. Natural language processing. GE credit: SE. Effective: 2020 Spring Quarter.

ECS 171—Machine Learning (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 060 or ECS 032B or ECS 036C; or Consent of Instructor. Probability equivalent to STA 032 or STA 131A or ECS 132 recommended; linear algebra equivalent to MAT 22A recommended. Pass One open to Computer Science and Computer Science & Engineering Majors only; Pass Two open to undergraduate students only. Introduction to machine learning. Supervised & unsupervised learning, including classification, dimensionality reduction, regression & clustering using modern machine learning methods. Applications of machine learning to other fields. GE credit: SE. Effective: 2020 Spring Quarter.

ECS 172—Recommender Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 032B or ECS 036B or ECS 040); (ECS 132 or STA 130A or STA 131A or ECN 140); (MAT 022A or MAT 027A or MAT 067). Pass One restricted to Computer Science and Computer Science & Engineering students only. Collaborative filtering and content-based methods for building recommender systems. Statistical, matrix factorization, textual analysis, and nearest-neighbor approaches. Case studies. GE credit: SE. Effective: 2020 Spring Quarter.

ECS 173—Image Processing & Analysis (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (MAT 067 C- or better or MAT 027A C- or better or MAT 022A C- or better); (ECS 060 or ECS 032B or ECS 036C). Pass One open to Computer Science and Computer Science Engineering Majors only. Techniques for automated extraction of high-level information from images generated by cameras, three-dimensional surface sensors, and medical devices. Typical applications include detection of objects in various types of images and describing populations of biological specimens appearing in medical imagery. GE credit: SE. Effective: 2020 Fall Quarter.

ECS 173—Image Processing & Analysis (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (MAT 067 C- or better or MAT 022A C- or better); (ECS 060 or ECS 032B or ECS 036C). Pass One open to Computer Science and Computer Science Engineering Majors only. Techniques for automated extraction of high-level information from images generated by cameras, three-dimensional surface sensors, and medical devices. Typical applications include detection of objects in various types of images and describing populations of biological specimens appearing in medical imagery. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 174—Computer Vision (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (STA 032 or STA 131A or MAT 135A or EEC 161 or ECS 132 recommended); (MAT 022A or MAT 067 recommended). Pass One open to Computer Science and Computer Science and Engineering Majors only. Computer vision is the study of enabling machines to "see" the visual world; e.g., understand images and videos. Explores several fundamental topics in the area, including feature detection, grouping and segmentation, and recognition. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 174—Computer Vision (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); recommended (STA 032 or STA 131A or MAT 135A or EEC 161 or ECS 132); (MAT 022A or MAT 27A or MAT 067). Pass One open to Computer Science and Computer Science and Engineering Majors only. Computer vision is the study of enabling machines to "see" the visual world; e.g., understand images and videos. Explores several fundamental topics in the area, including feature detection, grouping and segmentation, and recognition. GE credit: SE. Effective: 2020 Fall Quarter.

ECS 175—Computer Graphics (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 060 or ECS 034 or ECS 036C); (MAT 022A or MAT 027A or MAT 067). Pass One open to Computer Science and Computer Science Engineering Majors only. Principles of computer graphics, with a focus on interactive systems. Current graphics hardware, elementary operations in two-and three-dimensional space, geometric transformations, camera models and interaction, graphics system design, standard graphics APIs, individual projects. GE credit: SE, VL. Effective: 2020 Fall Quarter.

ECS 175—Computer Graphics (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 060 or ECS 034 or ECS 036C); (MAT 022A or MAT 067). Pass One open to Computer Science and Computer Science Engineering Majors only. Principles of computer graphics, with a focus on interactive systems. Current graphics hardware, elementary operations in two-and three-dimensional space, geometric transformations, camera models and interaction, graphics system design, standard graphics APIs, individual projects. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECS 177—Scientific Visualization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 175. Pass One open to Computer Science and Computer Science Engineering Majors only. Computer graphics techniques for generating images of various types of measured or computer-simulated data. Typical applications for these graphics techniques include study of air flows around car bodies, medical data, and molecular structures. GE credit: SE, VL. Effective: 2016 Fall Quarter.

ECS 178—Geometric Modeling (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 175. Pass One open to Computer Science and Computer Science Engineering Majors only. Interactive graphics techniques for defining and manipulating geometrical shapes used in computer animation, car body design, aircraft design, and architectural design. GE credit: SE, VL. Effective: 2016 Fall Quarter.

ECS 188—Ethics in an Age of Technology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Upper division standing. Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Foundations of ethics. Views of technology. Technology and human values. Costs and benefits of technology. Character of technological change. Social context of work in computer science and engineering. GE credit: SL, SS, WE. Effective: 2019 Spring Quarter.

ECS 189A—Special Topics in Computer Science: Computer Science Theory (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189B—Special Topics in Computer Science: Architecture (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Architecture. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189C—Special Topics in Computer Science: Programming Languages & Compilers (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Programming Languages & Compilers. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189D—Special Topics in Computer Science: Operating Systems (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Operating Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189E—Special Topics in Computer Science: Software Engineering (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Software Engineering May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189F—Special Topics in Computer Science: Databases (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic Databases. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189G—Special Topics in Computer Science: Artificial Intelligence (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Open to undergraduate students only. Special topic in Artificial Intelligence. May be repeated for credit when topic differs. GE credit: SE. Effective: 2020 Spring Quarter.

ECS 189H—Special Topics in Computer Science: Computer Graphics (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Graphics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189I—Special Topics in Computer Science: Networks (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189J—Special Topics in Computer Science: Computer-Aided Design (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer-Aided Design. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189K—Special Topics in Computer Science: Scientific Computing (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Scientific Computing. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189L—Special Topics in Computer Science: Computer Science (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189M—Special Topics in Computer Security: Computer Security (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Security. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.

ECS 189N—Special Topics in Bioinformatics & Computational Biology (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Bioinformatics & Computational Biology. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.

ECS 190C—Research Group Conferences in Computer Science (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Computer Science or Computer Science and Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

ECS 190X—Senior Seminar (2)

Seminar—2 hour(s). Prerequisite(s): Senior standing. Examination of a special topic in a small group setting. Effective: 1997 Winter Quarter.

ECS 192—Internship in Computer Science (1-5)

Internship. Prerequisite(s): Completion of a minimum of 84 units; project approval prior to period of internship. Supervised work experience in computer science. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 193A—Senior Design Project (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): ECS 160 (can be concurrent); Senior standing in Computer Science or Computer Science and Engineering or consent of instructor. Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Responding to real-life client design challenges, student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. Project supervised by a faculty member. Must take ECS 193A & ECS 193B to receive credit. GE credit: SE. Effective: 2017 Winter Quarter.

ECS 193B—Senior Design Project (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): ECS 193A IP or better. Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Responding to real-life client design challenges, student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. Project supervised by a faculty member. Must take ECS 193A & ECS 193B to receive credit. GE credit: SE. Effective: 2017 Spring Quarter.

ECS 197T—Tutoring in Computer Science (1-3)

Discussion—1 hour(s); Discussion/Laboratory—3-6 hour(s). Prerequisite(s): Consent of Instructor. Restricted to upper division standing. Tutoring in computer science courses, especially introductory courses. (P/NP grading only.) Effective: 2014 Fall Quarter.

ECS 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 198F—Student Facilitated Course (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 199FA—Student Facilitated Course Development (1-4)

Variable—1-4 hour(s). Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 199FB—Student Facilitated Teaching (1-4)

Variable—1-4 hour(s). Prerequisite(s): ECS 199FA; Consent of Instructor. STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 201A—Advanced Computer Architecture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 154A or EEC 170. Pass One and Pass Two open to only Graduate Students in Computer Science. Modern research topics and methods in computer architecture. Design implications of memory latency and bandwidth limitations. Performance enhancement via within-processor and between-processor parallelism. One unit of credit if student has previously taken ECS 154B after Fall 2019. Effective: 2020 Spring Quarter.

ECS 201B—High-Performance Uniprocessing (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): ECS 201A. Open to Graduate Students in Computer Science only. Maximizing uniprocessor performance. Barriers to high performance; solutions to the problems; historical and current processor designs. Not open for credit to students who have completed ECS 250B. Effective: 2020 Winter Quarter.

ECS 201C—Parallel Architectures (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): ECS 201A. Open to Graduate Students in Computer Science only. Evolution of parallel architectures from special-purpose machines to commodity servers. Emphasis on recent machines and applications that drive them. Not open for credit to students who have completed ECS 250C. Effective: 2020 Winter Quarter.

ECS 203—Novel Computing Technologies (4)

Lecture—3 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): ECS 201A. Open to Graduate Students in Computer Science only. Novel computing technologies that could revolutionize computer architecture. Quantum computing technologies, including algorithms, devices, and fault tolerance. A survey of other unconventional technologies including nanoscale electronics, MEMS devices, biological devices, and nanotechnology. Effective: 2020 Winter Quarter.

ECS 220—Theory of Computation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 120; ECS 122A. Open to Graduate Students in Computer Science only. Time and space complexity classes. Reductions, completeness, and the role of randomness. Logic and undecidability. Effective: 2020 Winter Quarter.

ECS 221—Computational Methods in Systems & Synthetic Biology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Computational methods related to systems and synthetic biology. An overview of machine learning techniques related to the analysis of biological data, biological networks. Predictive modeling and simulation of biological systems. Topics on biological circuit construction. Effective: 2016 Spring Quarter.

ECS 222A—Design & Analysis of Algorithms (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 122A; STA 031A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Techniques for designing efficient algorithms, analyzing their complexity and applying these algorithms to a broad range of applications. Methods for recognizing and dealing with difficult problems. Effective: 2016 Spring Quarter.

ECS 222B—Advanced Design & Analysis of Algorithms (4)

Lecture—3 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): ECS 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in complexity theory. Problem classification. The classes P, NP, P-space, co-NP. Matching and network flow algorithms. Matrix multiplication. Approximation algorithms. Effective: 2016 Spring Quarter.

ECS 223—Parallel Algorithms (4)

Discussion/Laboratory—3 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): ECS 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Models of parallel computer systems including PRAMs, loosely coupled systems and interconnection networks. Parallel algorithms for classical problems and general techniques for their design and analysis. Proving lower bounds on parallel computation in several settings. Effective: 2016 Spring Quarter.

ECS 224—String Algorithms & Applications in Computational Biology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 122A. Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithms that operate on strings. Pattern matching, sets of patterns, regular expression pattern matching, suffix trees and applications, inexact similarity, parametric sequence alignment, applications to DNA sequencing and protein database searching. Effective: 2016 Spring Quarter.

ECS 225—Graph Theory (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing in electrical engineering or computer science or consent of instructor. Open to Graduate Students in Computer Science only. Fundamental concepts. Planar graphs: Kuratowski's theorem. Packings and coverings. Menger's theorem, representation of cuts, Hamilton graphs, rigid graphs, chordal graphs, graph coloring, graph isomorphism, applications and some algorithms. Effective: 2018 Winter Quarter.

ECS 226—Computational Geometry (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 175; ECS 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Mathematics of unstructured data. Algorithms for data structures such as Voronoi diagrams, oct-trees, and arrangements. Applications in computer graphics, concentrating on problems in three-dimensions. Effective: 2016 Spring Quarter.

ECS 227—Modern Cryptography (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 220 or ECS 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Modern cryptography as a discipline emphasizing formal definitions and proofs of security. One-way functions, pseudo-randomness, encryption, digital signatures, zero-knowledge, secure protocols. Effective: 2016 Spring Quarter.

ECS 228—Cryptograpy for E-Commerce (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 222A. Pass One and Pass Two open to Graduate Students in Computer Science only. Cryptographic primitives and protocols of importance to e-commerce, present and future, including content distribution mechanisms, payment mechanisms, pricing mechanisms, anonymity and privacy mechanisms, fair exchange mechanisms. Effective: 2016 Spring Quarter.

ECS 229—Advanced Computational Structural Bioinformatics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing. Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithmic problems in structural biology; protein structure classification; protein structure prediction (including comparative modeling and ab initio protein structure prediction); molecular simulations (molecular dynamics and Monte Carlo simulations). Effective: 2016 Spring Quarter.

ECS 230—Applied Numerical Linear Algebra (4)

Discussion/Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 130 or EAD 209 or MAT 167. Pass One and Pass Two open to Graduate Students in Computer Science only. Numerical linear algebra (NLA) with emphasis on applications in engineered systems; matrix factorizations; perturbation and rounding error analyses of fundamental NLA algorithms. Effective: 2016 Spring Quarter.

ECS 231—Large-Scale Scientific Computation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 130. Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithms and techniques for large-scale scientific computation, including basics for high performance computing, iterative methods, discrete approximation, fast Fourier transform, Poisson solvers, particle methods, spectral graph partition and its applications. Effective: 2016 Spring Quarter.

ECS 234—Computational Functional Genomics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 124; Graduate standing in Computer Science or Life Sciences. Pass One and Pass Two open to Graduate Students in Computer Science only. Bioinformatics methods for analysis and inference of functional relationships among genes using large-scale genomic data, including methods for integration of gene expression, promoter sequence, TF-DNA binding and other data, and approaches in modeling of biological networks. Effective: 2016 Spring Quarter.

ECS 235A—Computer & Information Security (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): ECS 150; ECS 152A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Modern topics in computer security, including: protection, access control, operating systems security, network security, applied cryptography, cryptographic protocols, secure programming practices, safe languages, mobile code, malware, privacy and anonymity, and case studies from real-world systems. Not open for credit to students who have taken ECS 235. Effective: 2016 Fall Quarter.

ECS 235B—Foundations of Computer & Information Security (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): ECS 235A; (ECS 120 and ECS 150 recommended.). Pass One and Pass Two open to Graduate Students in Computer Science only. Theoretical foundations of methods used to protect data in computer and communication systems. Access control matrix and undecidability of security; policies; Bell-LaPadula, Biba, Chinese Wall models; non-interference and non-deducibility; information flow and the confinement problem. Not open for credit to students who have taken ECS 235. Effective: 2016 Fall Quarter.

ECS 236—Computer Security: Intrusion Detection Based Approach (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 150; ECS 153 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts of intrusion detection, anomaly detection based on machine learning, signature-based detection using pattern matching, automated response to attacks using artificial intelligence planning, tracing intruders based on principal component analysis, security policy languages. Effective: 2016 Spring Quarter.

ECS 240—Programming Languages (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 140A; ECS 142. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in programming languages, including formal syntax and semantics, the relation between formal semantics and verification, an introduction to the lambda calculus. Additional topics will include language design principles, alternative programming languages, in-depth semantic theory and models of language implementation. Effective: 2016 Spring Quarter.

ECS 242—Translation of Programming Languages (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECS 240. Pass One and Pass Two open to Graduate Students in Computer Science only. Lexical analysis, parsing, storage management, symbol table design, semantic analysis and code generation. LR, LALR grammars. Compilercompilers. Effective: 2016 Spring Quarter.

ECS 243—Code Generation & Optimization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 201A or EEC 270. Pass One and Pass Two open to Graduate Students in Computer Science only. Compiler optimizations for performance, code size and power reduction. Topics include control- and data-flow analysis, redundancy elimination, loop and cache optimizations, register allocation, local and global instruction scheduling, and modulo scheduling. Effective: 2016 Fall Quarter.

ECS 244—Principles of Concurrent Programming (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECS 020; ECS 150. Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamental concepts and applications of concurrent programs; concurrent program verification and derivation; synchronization mechanisms in programming languages; distributed programming techniques; case studies of languages. Effective: 2016 Spring Quarter.

ECS 247—Concurrent Programming Languages (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECS 140A; ECS 150. Pass One and Pass Two open to Graduate Students in Computer Science only. Language design parameters. Models of parallel machines. Load balancing. Scalability. Portability. Efficiency measures. Design and implementation techniques for several classes of concurrent programming languages (such as object-oriented, functional, logic, and constraint programming languages). Effective: 2016 Fall Quarter.

ECS 251—Operating Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 150. Pass One and Pass Two open to Graduate Students in Computer Science only. Models, design, implementation, performance evaluation in operating systems. Algorithms, internal architectures for single processor OS and distributed systems. Concurrency control, recovery, security. OS kernel-level programming. Special topics embedded systems, real-time system, device driver, NPU (Network Processor Unit). Effective: 2016 Spring Quarter.

ECS 252—Computer Networks (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECS 152B. Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Internet protocol based computer networks applications, transport, network layer protocols. High speed LAN technologies: Ethernet, Asynchronous Transfer Mode (ATM). Delay models in data networks: analysis of multiaccess techniques in polling, ring, random access networks. Multimedia applications requirements and design. Effective: 2016 Spring Quarter.

ECS 253—Network Theory & Applications (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): MAT 022A; MAT 022B; (STA 013 or STA 013Y or STA 120); Experience with computer software, or consent of instructor. Develops the mathematical theory underlying growth, structure and function of networks with applications to physical, social, biological and engineered systems. Topics include network growth, resilience, epidemiology, phase transitions, software and algorithms, routing and search control, cascading failures. (Same course as MAE 253.) Effective: 2018 Fall Quarter.

ECS 255—Resource Management in Wireless Communication Networks (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 252A. Advanced research issues in wireless communication networks, including multi-user diversity and cross-layer optimization, basic network information theory, MIMO systems and the impact on networks, and dynamics spectrum management. Effective: 2009 Winter Quarter.

ECS 256—Probability Models for Computer Science (4)

Lecture—3 hour(s); Project (Term Project); Extensive Problem Solving. Prerequisite(s): A calculus-based course in probability, such as ECS132, STA 131A, or EEC 161; programming skills and familiarity with matrix algebra. Pass One and Pass Two open to graduate students in Computer Science only. Probabilistic and statistical models useful in computer/data science. Applications to networks, bioinformatics, database management, machine learning, software engineering and image processing. Not open for credit to students who have completed ECS 256A. Effective: 2019 Spring Quarter.

ECS 257—Mobile & Wireless Networks (4)

Lecture—3 hour(s); Independent Study—1 hour(s). Prerequisite(s): ECS 252. Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamental techniques in design of second generation wireless networks: cellular network and protocols, medium access techniques, handoff control, signaling and mobility management, wireless data works, Internet mobility and Personal Communication Services (PCS). Third generation wideband systems, novel technologies, adhoc networks. Effective: 2016 Fall Quarter.

ECS 259—Optical Networks (4)

Lecture—3 hour(s); Independent Study—1 hour(s). Prerequisite(s): ECS 252. Pass One and Pass Two open to Graduate Students in Computer Science only. Optical networks. Enabling technologies. Multiplexing techniques. WDM. Broadcast networks. Wavelength-routed networks. Network architectures. Protocols. Network algorithms. Device-network interface. Optimization problems. Effective: 2016 Fall Quarter.

ECS 260—Software Engineering (4)

Lecture—3 hour(s); Project (Term Project)—3 hour(s). Prerequisite(s): ECS 142; ECS 160 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced techniques for domain-specific software reuse. Effective: 2016 Fall Quarter.

ECS 261—Program Verification (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): PHI 112; or MAT 125 or familiarity with first-order logic; knowledge of an integrative and functional programming language. Methods of proving correctness of programs with respect to formal specifications, with attention to those suited for employing automated deduction. Logic background, symbolic execution, techniques suited to iterative programming, methods from denotational semantics, termination, dynamic logic and proofs of concurrent programs. Effective: 1997 Fall Quarter.

ECS 262—Formal Specification (3)

Lecture—3 hour(s). Prerequisite(s): ECS 261. Pass One and Pass Two open to Graduate Students in Computer Science only. Formal specification of modules, and its relationship to topdown programming development and verification. Abstract data types, together with methods for specifying them. Implementations and proofs of implementation. Using specifications to reason about programs. Parameterized types. Constructing good formal specifications. Effective: 2016 Fall Quarter.

ECS 265—Distributed Database Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 165A. Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts of distributed database systems and architectures, distributed database design, distributed query processing and optimization, transaction management and concurrency control, heterogeneous and multidatabase systems. Effective: 2016 Fall Quarter.

ECS 266—Spatial Databases (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 165A. Concepts, models, and architectures for spatial databases, spatial access methods, query processing, spatio-temporal data management, moving objects, spatial data mining.

Effective: 2008 Winter Quarter.

ECS 267—Wide-Area Distributed Information Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 152B or ECS 165A. Pass One and Pass Two open to Graduate Students in Computer Science only. Wide-area distributed information systems, data broadcast, multicast, publish/subscribe, service differentiation, information retrieval, Web caching. Effective: 2016 Fall Quarter.

ECS 268—Scientific Data & Workflow Management (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 165A. Scientific data integration, metadata, knowledge representation, ontologies, scientific workflow design and management. Effective: 2008 Winter Quarter.

ECS 269—Visual Recognition (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 171 or ECS 174; or equivalent. Graduate seminar course on computer vision with an emphasis on object recognition, activity recognition, and scene understanding. Effective: 2018 Fall Quarter.

ECS 270—Artificial Intelligence (3)

Lecture—3 hour(s). Prerequisite(s): ECS 140A; ECS 172. Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts and techniques underlying the design and implementation of models of human performance on intelligent tasks. Representation of high-level knowledge structures. Models of memory and inference. Natural language and story understanding. Common sense planning and problem solving. Effective: 2016 Fall Quarter.

ECS 271—Machine Learning & Discovery (4)

Lecture—3 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): ECS 170. Pass One and Pass Two open to Graduate Students in Computer Science only. Artificial intelligence techniques for knowledge acquisition by computers. Fundamental problems in machine learning and discovery. Systems that learn from examples, analogies, and solved problems. Systems that discover numerical laws and qualitative relationships. Projects centering on implementation and evaluation. Effective: 2016 Fall Quarter.

ECS 272—Information Visualization (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECS 163 or ECS 175 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in information visualization: perceptually effective display methods, color design and selection, interaction models and techniques, focus-context techniques, distortion methods, large graph visualization techniques, visual data mining methods, and evaluation methods. Effective: 2016 Fall Quarter.

ECS 273—Applied Visual Computing (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): Graduate standing. Visual computing paradigms, current visualization technologies, principles of 3-d graphics, user interface designs, and exploratory visualization. Effective: 2002 Winter Quarter.

ECS 274—Automated Deduction (4)

Lecture—3 hour(s). Prerequisite(s): PHI 112; or MAT 125 or familiarity with first order logic. Techniques of mechanical theorem proving. Methods based on resolution and termrewriting. Decision procedures. Induction. Applications to program verification, question/answering and plan generation. Study existing mechanical theorem provers. Effective: 1997 Fall Quarter.

ECS 275A—Advanced Computer Graphics (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECS 175 or ECS 177 or ECS 178. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in computer graphics. Hidden surface models, rendering of various surface types, subdivision methods, shading techniques, anti-aliasing, modeling techniques. Effective: 2016 Fall Quarter.

ECS 275B—Advanced Computer Graphics (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECS 175 or ECS 177 or ECS 178. Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Advanced topics in computer graphics and geometric modeling. Topics taken from advanced research papers in computer graphics, image synthesis, visualization and geometric modeling. Discussion of current research in the field. Effective: 2016 Spring Quarter.

ECS 276—Advanced Volume Visualization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 177. Pass One and Pass Two open to Graduate Students in Computer Science only. Applications, available tools and techniques, the challenges confronting the field of volume visualization, and some of the advanced topics in the field. Primary emphasis on advanced software and hardware techniques to achieve interactive visualization. Effective: 2016 Fall Quarter.

ECS 277—Advanced Visualization (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 177. Visualization of 3D data, including scalar fields, vector fields, and medical data. Effective: 2000 Fall Quarter.

ECS 278—Computer-Aided Geometric Design (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ECS 175. Pass One and Pass Two open to Graduate Students in Computer Science only. Mathematical techniques for the definition and manipulation of curves and surfaces. Bezier curves and surfaces, B-spline curves and surfaces, subdivision surfaces, wavelets. Integration into various computer graphics rendering models, visualization systems and computer-aided design systems. Effective: 2016 Fall Quarter.

ECS 279—Computer Animation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 175; or ECS 275. Pass One and Pass Two open to Graduate Students in Computer Science only. Surveys current research and fundamental techniques that lie behind character animation tools. Emphasis on improving expressive aspects of movement and how physics, motion capture data, the arts and psychology literature, and interactive techniques can be used towards this goal. Effective: 2016 Fall Quarter.

ECS 280—Virtual Reality Technology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECS 175. Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamentals and principles of Virtual Reality (VR) technology. Potential and limits for its useful application. Developing a complete virtual reality application. Effective: 2016 Spring Quarter.

ECS 289A—Special Topics in Computer Science: Computer Science Theory (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science Theory. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289B—Special Topics in Computer Science: Architecture (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Architecture. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289C—Special Topics in Computer Science: Programming Languages & Compilers (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Programming Languages & Compilers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289D—Special Topics in Computer Science: Operating Systems (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Operating Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289E—Special Topics in Computer Science: Software Engineering (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Software Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289F—Special Topics in Computer Science: Databases (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Databases. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289G—Special Topics in Computer Science: Artificial Intelligence (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Artificial Intelligence. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289H—Special Topics in Computer Science: Computer Graphics (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Graphics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289I—Special Topics in Computer Science: Networks (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Networks. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289J—Special Topics in Computer Science: Computer-Aided Design (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer-Aided Design. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289K—Special Topics in Computer Science: Scientific Computing (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Scientific Computing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289L—Special Topics in Computer Science: Computer Science (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289M—Special Topics in Computer Science: Security (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Security. May be repeated for credit when topic differs. Effective: 2001 Winter Quarter.

ECS 289N—Special Topics in Bioinformatics & Computational Biology (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Bioinformatics & Computational Biology. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.

ECS 290—Seminar in Computer Science (1)

Seminar—1 hour(s). Participating seminar; discussion and presentation of current research and development in computer science. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 290C—Graduate Research Group Conference (1)

Discussion—1 hour(s). Research problems, progress and techniques in computer science. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 293A—Research in Computer Science (1)

Lecture—1 hour(s). Prerequisite(s): Graduate standing in computer science. Pass One and Pass Two open to Graduate Students in Computer Science only. Study of research topics in computer science, Ph.D. level research methodologies (experimental, applied and theoretical). Study skills necessary to successfully find/solve significant research problems. Finding and successfully interacting with a research advisor. Ethical issues in research/collaborative work. (S/U grading only.) Effective: 2016 Fall Quarter.

ECS 293B—Research in Computer Science (1)

Lecture—1 hour(s). Prerequisite(s): Graduate standing in computer science; ECS 293A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Study of Ph.D. level research methodologies (experimental, applied and theoretical), presenting research results for the computer science community. Study skills necessary to successfully find/solve significant research problems. (S/U grading only.) Effective: 2016 Fall Quarter.

ECS 298—Group Study (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 390—The Teaching of Computer Science (1)

Discussion—1 hour(s). Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Computer Science. Pass One and Pass Two open to Graduate Students in Computer Science only. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2016 Spring Quarter.

ECS 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EDU—Education

Courses in EDU:

EDU 065A—Foundations for University Success: Introduction to the University System (2)

Lecture/Discussion—2 hour(s); Fieldwork. Prerequisite(s): Consent of Instructor. Student must be a part of an approved Foundations for University Success program. Introduction to resources supporting first year student academic success and transition to a tier one research university. (P/NP grading only.) Effective: 2017 Summer Session 2.

EDU 065B—Foundations for University Success: Introduction to Research at a Tier 1 University (2)

Lecture/Discussion—2 hour(s); Fieldwork. Prerequisite(s): Consent of Instructor. Student must be a part of an approved Foundations for University Success program. Development of important skills necessary for research including critical thinking, study skills, writing skills, and presentation skills. (P/NP grading only.) GE credit: OL. Effective: 2020 Winter Quarter.

EDU 065C—Foundations for University Success: Internships, Graduate School & Careers (2)

Lecture/Discussion—2 hour(s); Fieldwork. Prerequisite(s): Consent of Instructor. Student must be a part of an approved Foundations for University Success program. Resources to explore academic and career connections and opportunities including internships, volunteer opportunities, graduate schools and careers. (P/NP grading only.) Effective: 2017 Summer Session 2.

EDU 081—Learning in Science & Mathematics (2)

Lecture/Discussion—2 hour(s); Fieldwork—2 hour(s). Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning. (Same course as GEL 081.) (P/NP grading only.) GE credit: SS, VL, WE. Effective: 2007 Winter Quarter.

EDU 092—Internship (1-3)

Internship—3-9 hour(s). Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern placements. Internship as a teacher's aide or tutor in K-12 classrooms under the supervision of a faculty member. May be repeated for credit. (P/NP grading only.) Effective: 2001 Fall Quarter.

EDU 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EDU 100—Introduction to Schools (4)

Lecture—3 hour(s); Fieldwork—3 hour(s). Study of occupational concerns of teachers; skills for observing classroom activities; school organization and finance; school reform movement; observing, aiding, and tutoring in schools. GE credit: ACGH, DD, OL, SS. Effective: 2016 Fall Quarter.

EDU 110—Educational Psychology: General (4)

Lecture/Discussion—4 hour(s). Learning processes, cognitive development, individual differences, testing and evaluation. GE credit: SS, WE. Effective: 2016 Fall Quarter.

EDU 114—Quantitative Methods in Educational Research (4)

Lecture/Discussion—4 hour(s). Problems and methods in data analysis. Design of research projects. Some consideration of procedures suited to digital computers. GE credit: QL. Effective: 2016 Fall Quarter.

EDU 115—Educating Children with Disabilities (2)

Lecture—2 hour(s). Educational issues and processes involved in teaching children with disabilities. Focuses on the structure of special education, with an emphasis on meeting the educational needs of children who are mainstreamed in regular classes. GE credit: SS. Effective: 2016 Fall Quarter.

EDU 119—Use & Misuse of Standardized Tests (4)

Lecture—3 hour(s); Discussion—1 hour(s). Principles underlying educational and psychological testing. Purposes of testing for individual achievement and evaluation of school programs. Interpretation and misinterpretations of outcomes. Analysis of SAT, GRE and other common tests. Experience in test administration and outcome interpretation. GE credit: QL, SS. Effective: 2019 Fall Quarter.

EDU 120—Philosophical & Social Foundations of Education (4)

Lecture—3 hour(s); Discussion—1 hour(s). Philosophical, historical, and sociological study of education and the school in our society. GE credit: ACGH, SS, WE. Effective: 2016 Fall Quarter.

EDU 121—Introduction to Education Policy Analysis: Tools, Methods & Frameworks (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduces students to the field of education policy analysis with a specific emphasis on the quantitative frameworks and analytical tools—drawn primarily from economics and statistics—that are used to guide and inform educational policymaking. GE credit: QL, SS. Effective: 2014 Fall Quarter.

EDU 122—Children, Learning & Material Culture (4)

Lecture/Discussion—3 hour(s); Extensive Writing/Discussion—1 hour(s); Fieldwork. How material artifacts shape what and how children learn in school, at home, and in the community. Artifacts examined include books, computers, household appliances, toys and games, entertainment media, collectibles, sports equipment, clothing, folk arts and crafts, and neighborhood space. GE credit: SS, VL, WE. Effective: 2017 Summer Session 1.

EDU 130—Issues in Higher Education (4)

Discussion—3 hour(s); Fieldwork—3 hour(s). Analysis of current issues in higher education and of some practical implications of varying philosophical approaches to the role of the university. GE credit: SS, WE. Effective: 2017 Summer Session 1.

EDU 142—Introduction to Environmental Education (4)

Lecture/Discussion—3 hour(s); Fieldwork. Study of history, philosophy, principles and approaches to environmental education (EE) and outreach; learning theories, teaching strategies and techniques in EE and outreach; evaluation of EE curricula in non-formal and in-school contexts; observing, aiding and facilitating local environmental education programs. GE credit: OL, SS. Effective: 2009 Fall Quarter.

EDU 147—Anglos, Latinos & the Spanish Black Legend: Origins & Educational Implications of Anti-Hispanic Prejudice (4)

Lecture/Discussion—3 hour(s); Fieldwork; Term Paper. Examination of anti-Hispanic prejudice in the United States focusing on the "Black Legend," a 16th-century, anti-Spanish myth underpinning the doctrine of "Manifest Destiny." Exploration of the Legend's presence in contemporary American society through interviews and analysis of school textbooks. (Same course as SPA 147.) GE credit: ACGH, AH, DD, WE. Effective: 2016 Fall Quarter.

EDU 150—Cultural Diversity & Education in a Sociopolitical Context (4)

Lecture/Discussion—4 hour(s); Extensive Writing. Introduction to cultural diversity and education in a sociopolitical context. Interactive course. Small and large-group discussions explore, extend, and apply readings; range of writing genres for responses to assignments and course themes; lectures, slide shows, speakers, brief fieldwork, and presentations. GE credit: DD, SS, WE. Effective: 2011 Fall Quarter.

EDU 151—Language Development in the Chicano Child (3)

Lecture/Discussion—3 hour(s). Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish and the role of dialect varieties in the classroom. Not open for credit to students who have completed EDU 151T. Effective: 2016 Fall Quarter.

EDU 151T—Language Development in the Chicano Child (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Acceptance in Teaching Credential Program. Open to UC Davis Teacher Credential candidates only. Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish and the role of dialect varieties in the classroom. Not open for credit to students who have completed EDU 151. Effective: 2016 Fall Quarter.

EDU 152—Academic Spanish for Bilingual Teachers (3)

Lecture/Discussion—3 hour(s); Fieldwork; Recitation—3 hour(s). Prerequisite(s): Acceptance in Teaching Credential Program or consent of instructor. Communicative class taught in Spanish focused on the development of Spanish communication skills for current and/or future bilingual teachers. Main topics are related to school content areas in bilingual settings, with an emphasis on standard and Southwest Spanish dialects. GE credit: AH, OL, SS, WE. Effective: 2016 Fall Quarter.

EDU 153—Diversity in the K-12 Classroom (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Acceptance in Teaching Credential Program. Analysis of research on learning styles among culturally diverse students with review and evaluation of responsive curricula and classroom teaching techniques. The ethnographic interview as a research tool. Effective: 2016 Fall Quarter.

EDU 160A—Introduction to Peer Counseling (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Consent of Instructor. Introduction to peer counseling techniques and development of peer counseling skills. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 160B—Issues in Peer Counseling (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Consent of Instructor. In-depth review and development of skills for specific counseling topics. May be repeated up to 1 time(s) when topic differs. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 163—Guidance & Counseling (4)

Lecture—4 hour(s). Nature and scope of pupil personnel services; basic tools and techniques of guidance; theory and practice of counseling psychology, with emphasis on educational and vocational adjustment. Effective: 2016 Fall Quarter.

EDU 173—Language Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): LIN 001 or LIN 001Y; or Consent of Instructor. LIN 103A, LIN 103B recommended. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as LIN 173.) GE credit: SS. Effective: 2018 Spring Quarter.

EDU 180A—Computers in Education (1)

Lecture/Discussion—1 hour(s); Laboratory—2 hour(s); Project (Term Project)—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 180B—Computers in Education (1)

Lecture/Discussion—1 hour(s); Laboratory—2 hour(s); Project (Term Project)—3 hour(s). Prerequisite(s): EDU 180A; Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 180C—Computers in Education (1)

Lecture/Discussion—1 hour(s); Laboratory—2 hour(s); Project (Term Project)—3 hour(s). Prerequisite(s): EDU 180B; Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 181—Teaching in Science & Mathematics (2)

Lecture/Discussion—2 hour(s); Fieldwork—2 hour(s). Prerequisite(s): Consent of Instructor. Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus. Limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as GEL 181.) (P/NP grading only.) GE credit: SS, WE. Effective: 2011 Fall Quarter.

EDU 182—Computer Project for Curricular Integration (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Design and implementation of a curricular unit to integrate computer technology into a K-12 classroom setting. A project-based seminar intended for students with substantial prior experience with instructional use of computers and related technologies. Not open for credit to students who have completed EDU 180 or EDU 181. Effective: 2016 Fall Quarter.

EDU 183—Teaching High School Mathematics & Science (3)

Lecture/Discussion—2 hour(s); Fieldwork. Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as GEL 183.) GE credit: OL, SS, WE. Effective: 2018 Fall Quarter.

EDU 185—Learning in a Digital Age: Information, Schooling, & Society (4)

Lecture/Discussion—2 hour(s); Lecture/Lab—2 hour(s). Focus on the changing nature of learning in a digital age: social media, ubiquitous connectivity, online education, electronic communication, writing, gaming, and youth culture. Readings drawn from major recent works detailing fundamental shifts in information, schooling, and society. GE credit: OL, SS, VL. Effective: 2013 Fall Quarter.

EDU 192—Internship (1-3)

Internship—2-8 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Internship as a tutor, teacher's aide, or peer counselor in a school or educational counseling setting under the supervision of a faculty member. May be taught abroad. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 197T—Tutoring in Education (1-2)

Tutorial—1-2 hour(s). Prerequisite(s): Consent of Instructor. Leading of small voluntary discussion groups affiliated with the School's upper division courses under the supervision of, and at the option of, the course instructor, who will submit a written evaluation of the student's work. May be repeated up to 1 time(s) up to 4 units. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

EDU 199—Special Study for Advanced Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 200—Educational Research (4)

Lecture—2 hour(s); Discussion—2 hour(s). Prerequisite(s): Introductory statistics or consent of instructor. Defining educational research questions, reviewing relevant literature, developing research designs, developing research instruments, selecting appropriate data analysis procedures, and writing research projects. A case problem will provide practice in designing and reporting research. Effective: 2016 Fall Quarter.

EDU 201—Qualitative Research in Education (4)

Seminar—2 hour(s); Lecture—2 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Examines the design and conduct of educational research using non-numerical data (e.g., text, discourse, imagery and artifacts). Focuses on issues (e.g., validity, reliability, generalizability, ethics) and reporting genres (e.g., narrative accounts, case studies, and arguments). Effective: 1997 Fall Quarter.

EDU 202N—Computer Analysis of Qualitative Data (4)

Seminar—3 hour(s); Laboratory—2 hour(s). Critical and practical understanding of how to use computer software programs to analyze qualitative data (text, images, and videotape) in conducting social research. Effective: 2016 Fall Quarter.

EDU 203—Educational Testing & Evaluation (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Introduces the theoretical assumptions underlying traditional test construction, as well as the basic statistical principles involved in the design, evaluation, and interpretation of standardized tests. Introduces the debates surrounding the uses of different kinds of tests and evaluation tools. Effective: 1997 Winter Quarter.

EDU 204A—Quantitative Methods in Educational Research: Analysis of Correlational Designs (4)

Discussion—2 hour(s); Discussion/Laboratory—2 hour(s). Prerequisite(s): Introductory statistics or consent of instructor. Methods for analysis of correlational data in educational research. Topics include multiple correlation and regression, discriminant analysis, logistic regression, and canonical correlation. Emphasis on conceptual understanding of the techniques and use of statistical software. Effective: 2016 Fall Quarter.

EDU 204B—Quantitative Methods in Educational Research: Experimental Designs (4)

Discussion—2 hour(s); Discussion/Laboratory—2 hour(s). Prerequisite(s): Introductory statistics or consent of instructor. Methods for analysis of experimental data in educational research. Topics include ANOVA, fixed v. random effects models, repeated measures ANOVA, analysis of co-variance, MANOVA, chi square tests, small sample solutions to t and ANOVA. Effective: 2016 Fall Quarter.

EDU 205A—Ethnographic Research in Schools I: Current Theory & Practice (4)

Lecture—4 hour(s). Current literature from anthropology and society related to schools. Emphasis on the organizational structure of institutions, and the analysis of face-to-face interaction. Explore the relationship between field-based research and theory development on the acquisition of knowledge in specific social and cultural contexts. Effective: 2016 Fall Quarter.

EDU 205B—Ethnographic Research in Schools II: Field-Based Research Projects (4)

Discussion—4 hour(s). Prerequisite(s): EDU 205A. Student research projects in specific schools with cooperative critical analysis of the design, data collection, and inferencing by researchers. Students will continue to meet with instructor as a group throughout the quarter to discuss specific projects. Effective: 2016 Fall Quarter.

EDU 206A—Inquiry into Classroom Practice: Traditions & Approaches (2)

Lecture/Discussion—2 hour(s); Fieldwork. Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to traditions and approaches of teachers conducting research in their own classrooms: purposes, focal areas, methods of data collection and analysis, and written genre conventions. Effective: 2016 Fall Quarter.

EDU 206B—Inquiry into Classroom Practice: Application of Teacher Research Approaches (4)

Lecture/Discussion—3 hour(s); Fieldwork—1 hour(s). Prerequisite(s): EDU 206A; or Consent of Instructor. Open to Graduate Teaching Credential students. Analysis and application of teacher research through the development, implementation and evaluation of a short-term classroom research-based intervention. Particular attention to research that enhances learning of English language learners and under-performing students. Effective: 2007 Spring Quarter.

EDU 206C—Inquiry into Classroom Practice: Study Design (4)

Seminar—3 hour(s); Fieldwork—1 hour(s). Prerequisite(s): EDU 206B; or Consent of Instructor. Open to Graduate MA Credential students. Proposal development for classroom-based inquiry designed to address student learning needs. Mixed methods research design and preliminary data collection approaches. Design and application of baseline student assessment for proposal development. Literature review. Data collection in K-12 classrooms required. Effective: 2007 Spring Quarter.

EDU 206D—Inquiry into Classroom Practice: Data Analysis & Research Reporting (4)

Seminar—2 hour(s); Fieldwork—1 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): EDU 206C; or Consent of Instructor. Open to Graduate MA Credential students. Support of the inquiry in EDU 206C through continuous collaborative critique and feedback resulting in the writing and presentation of a research study. Effective: 2007 Winter Quarter.

EDU 207—Concepts of the Curriculum (4)

Lecture—2 hour(s); Discussion—2 hour(s). Prerequisite(s): Consent of Instructor. Development of the skills of philosophical analysis and argument for the establishment of a point of view, in the consideration of curriculum theory and practice. Classical and contemporary approaches to subject matter and activity emphases, hidden curriculum, and moral education. Effective: 2016 Fall Quarter.

EDU 208—Presenting Educational Research in Written Reports (4)

Seminar—3 hour(s); Extensive Writing. Prerequisite(s): Consent of Instructor. Rhetorical and substantive challenges of presenting educational research through written reports; research rhetoric and genres; competing discourse conventions of educational research, policy, and practice; the social organization of publishing educational research. May be repeated up to 1 time(s). Effective: 2016 Fall Quarter.

EDU 209—Image-Based Field Research (4)

Lecture/Discussion—3 hour(s); Fieldwork—2 hour(s). Critical and practical understanding of video tape and still photography as resources for enhancing field research in schools and other social setting. Effective: 2016 Fall Quarter.

EDU 210—Psychological Perspectives on School Learning (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Study of human learning theory and research related to learning of academic content. Review of contemporary issues of constructivism, problem solving, expertise, conceptual change, transfer, and metacognition. Effective: 2016 Fall Quarter.

EDU 211—Sociocultural & Situative Perspectives on Learning & Cognition (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Sociocultural and situative theories of cognition and learning. Major ideas of L.S. Vygotsky, followed by modern perspectives: situated cognition, cognitive apprenticeship, situated learning, communities of practice, cultural-historical activity theory, and distributed cognition. Implications of each theoretical perspective for educational practice. Effective: 2016 Fall Quarter.

EDU 213—Individual Assessment (4)

Lecture—4 hour(s). Prerequisite(s): Introductory statistics or consent of instructor. Theories of intellectual functioning and the measurement of cognitive abilities in school-aged children. Supervised practice in administration and scoring of contemporary tests for children including the WISC-R, the WAIS-R, the Stanford Binet, the McCarthy Scales of Children's Ability. Effective: 2016 Fall Quarter.

EDU 215—Research on Achievement Motivation in Education (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Analysis and critique of recent research on cognitive processes related to achievement motivation in school settings. Topics include self-determination theory, attribution theory, goal theory, intrinsic and extrinsic motivation, learned helplessness, psychological reactance, gender and culture, and research design. Effective: 2016 Fall Quarter.

EDU 220—Concepts & Methods of Policy Analysis (4)

Seminar—3 hour(s); Fieldwork; Term Paper. Introduction to concepts and methods of policy analysis. Emphasis on the relationship between educational issues and problems; policy development; constructing persuasive policy analyses; issues related to policy process. Effective: 2016 Fall Quarter.

EDU 221—Culture & Social Organization of Schools (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Culture and social organization of schools. Examines perspectives of social researchers, educational policy-makers, and school members and their implications for educational research, policy and practice. Effective: 2016 Fall Quarter.

EDU 222—School Change & Educational Reform (4)

Lecture/Discussion—2 hour(s); Seminar—2 hour(s). Analysis of models, processes, and case studies of school change and educational reform with respect to variable characteristics of schools and schooling, planned and unplanned change, the moral evaluation of school change, and the role of educational research. Effective: 2016 Fall Quarter.

EDU 223—Education & Social Policy (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Focuses on understanding the social and political context of education in the U.S. and California and how education policy is formed in the broader public arena. Develops skills in educational policy analysis. (Former EDU 237.) Effective: 2016 Fall Quarter.

EDU 225—Education Policy & Law (4)

Lecture/Discussion—4 hour(s). Examination of law as an instrument of social policy. Specific focus on the legalization of education decision making, its causes, dimensions, and effects on administrative and teacher authority. Effective: 2016 Fall Quarter.

EDU 226—Culture & Social Organization of Higher Education (4)

Seminar—3 hour(s); Fieldwork—1 hour(s). Prerequisite(s): Consent of Instructor. Critical study of culture and social organization of higher education institutions policies and functions in the U.S., with some attention to other countries. Effective: 2016 Fall Quarter.

EDU 228—Politics & Governance of Education (4)

Seminar—3 hour(s); Term Paper. Examination of political power, representation, influence, decision-making and inter-governmental relations in the public schools. Effective: 2016 Fall Quarter.

EDU 229—Education Finance Policy (4)

Seminar—3 hour(s); Term Paper. Examination of (1) United States financing public education, (2) the relationship between school finance and education policy, and (3) the relationship between education finance and education practice. Effective: 2016 Fall Quarter.

EDU 230—Special Topics in Education Policy (4)

Seminar—3 hour(s); Term Paper. Selected topics in education policy. Designed to facilitate preparation for the qualifying examination or dissertation. Critically analyze scholarly work including their own works in progress. May be repeated for credit when topic differs. Effective: 2016 Fall Quarter.

EDU 235—Critical Pedagogy (4)

Seminar—4 hour(s). A socio-cultural critique, from an interdisciplinary perspective, of educational reform and change. The critique will include an analysis of the influence of text content on the perpetuation of social power differences. Effective: 2016 Fall Quarter.

EDU 236—Application of Hierarchical Linear Models in Education Research (4)

Lecture—2 hour(s); Discussion/Laboratory—2 hour(s); Term Paper. Prerequisite(s): EDU 204A; Or similar course with permission of the instructor. Application of hierarchical linear models in education research across multiple areas, such as policy, curriculum, and assessment. Develop working knowledge of hierarchical linear modeling and an understanding of its use in existing research as well as student's work. Effective: 2009 Spring Quarter.

EDU 237—Survey Research Methods (4)

Lecture/Discussion—3 hour(s); Fieldwork—1 hour(s); Term Paper. Theories, principles and application of survey research methodology. Students develop, validate, and administer survey instruments; select representative samples; conduct focus groups; and collect, organize, and analyze survey data. Familiarity with introductory concepts in descriptive and inferential statistics is assumed. Effective: 2016 Fall Quarter.

EDU 238—Participatory Action Research (PAR) (4)

Lecture/Discussion—3 hour(s); Fieldwork—1 hour(s). Prerequisite(s): Introductory research methods course recommended. Principles and strategies of PAR and related methodologies that emphasize collaborating with those affected by the issue being researched in order to educate, take action or effect social change. Conduct interviews with potential collaborators, case analyses and research proposals. Effective: 2016 Fall Quarter.

EDU 239—Interview Methods (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): EDU 201 or equivalent course recommended. Introduction to qualitative interviewing, focused in particular on narrative and self-story as both practical method and theoretical stance. Complete a case-focused interview project during the course: designing an interview protocol, conducting the interview, transcribing, analyzing, and presenting their research. Effective: 2015 Winter Quarter.

EDU 242—Research on Text Comprehension (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Analysis of recent research related to cognitive processing of written texts. Topics include word decoding, schema theory, background knowledge, assimilation, accommodation, working memory, processing depth, vocabulary acquisition, sentence-level processes, text-level processes, text structure, implications for curriculum and instruction. Effective: 2016 Fall Quarter.

EDU 243—Research on the Teaching & Learning of Writing (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Study of issues in research on composition; history of composition studies; data analysis techniques; product and process approaches; cognitive and social perspectives. Effective: 2016 Fall Quarter.

EDU 244—Topical Seminar in Language, Literacy & Culture (4)

Seminar—3 hour(s); Term Paper. Critical study of selected issues of language, literacy, and culture as they relate to education. May be repeated for credit when topics differ. Effective: 2020 Spring Quarter.

EDU 245—Theory & Research in Early Literacy (4)

Seminar—3 hour(s); Fieldwork—1 hour(s). Analysis of children's initial processes in learning to read extending from the preschool years into second grade. Topics include emergent literacy, phonological awareness, word recognition, decoding, spelling, vocabulary, comprehension, second language reading, assessment, intervention, and instruction. GE credit: SS. Effective: 2016 Fall Quarter.

EDU 246—Reading as a Social & Cultural Process (4)

Lecture—3 hour(s); Fieldwork—1 hour(s). Prerequisite(s): EDU 211 recommended. Recent theoretical and empirical work on reading in social contexts. Topics include reading as an individual interactive process; reading as a social and cultural process; critical perspectives on reading; implications of contrastive theoretical perspectives for curriculum and instruction in reading. Effective: 2016 Fall Quarter.

EDU 247—Research on Response to Culturally Diverse Literature, K-12 (4)

Seminar—3 hour(s); Fieldwork—1 hour(s). Research on response to culturally diverse literature in classrooms and other K-12 settings. Topics include reader response theories, values in expanding the literary canon, problems of cultural authenticity, resistance to multicultural literature, and instruction for diverse texts and learners. Effective: 2006 Fall Quarter.

EDU 248—Academic Language & Literacies (4)

Seminar—3 hour(s); Fieldwork; Project (Term Project). Exploration of theories and research on academic language and literacies for the schooling of first and second language learners. Students use basic qualitative methods to collect and analyze classroom language and literacy data. Effective: 2011 Fall Quarter.

EDU 249—Discourse Analysis in Educational Settings (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): An introductory linguistics or sociolinguistics course or consent of instructor. Examines form and type in discourse (e.g., narration, conversation, routines), approaches to discourse analysis, and research on classroom discourse (lessons, teaching/learning interactional sequences). Final term paper is an analysis of discourse data tape-recorded by student in a field setting. Effective: 2016 Fall Quarter.

EDU 251—Research in Bilingual & Second Language Education (3)

Seminar—3 hour(s). Discussion and analysis of recent research in bilingual and second language education. Topics include: language acquisition in second language learners and bilinguals, second language teaching methods, language-use models in bilingual education, interaction analysis in bilingual/cross-cultural classrooms, use of the vernacular in classrooms. Effective: 2016 Fall Quarter.

EDU 253—Language & Literacy in Linguistic Minorities (3)

Seminar—2 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Analysis and application of research on oral language development and literacy in language minority students, through the development, implementation, and evaluation of research-based language arts curriculum. Effective: 2016 Fall Quarter.

EDU 255—Curriculum Development & Evaluation in Mathematics (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Analysis of curricular issues and goals in mathematics education, including long-term trends, current status and influences, proposed changes, and evaluation issues. Selected curriculum projects examined. Effective: 2016 Fall Quarter.

EDU 256A—Research in Mathematics Education (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Examination of research process in mathematics education; review of critical productive problems identified by researchers; evolution of trends, issues, theories and hypotheses in various areas of mathematics education research. Emphasizes foundations. Effective: 2016 Fall Quarter.

EDU 256B—Research in Mathematics Education (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Current research issues and activities in mathematics education: status, trends, theories and hypotheses. Formulation of research questions and design of studies. Projection of future directions for research. Effective: 2016 Fall Quarter.

EDU 257—Computer Technology in Mathematics Education (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Roles of calculators, computers, and graphing calculators in mathematics education will be addressed, with emphasis on the impact of these technologies on curriculum reform. Selected efforts to integrate technology into mathematics instruction will be examined. Effective: 2016 Fall Quarter.

EDU 260—The Modern History of Science Education (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. History of curricular issues and goals in science education from the late-19th century forward, including long-term trends, current status and influences, proposed changes, and evaluation issues. National science standards and curriculum projects. Effective: 2016 Fall Quarter.

EDU 262A—Research Topics in Science Education I (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Research process and product in science education; review of critical science education issues; evolution of trends, theories and hypotheses in various areas of science education research. Survey of current major research in science education. Effective: 2016 Fall Quarter.

EDU 262B—Research Topics in Science Education II (4)

Seminar—4 hour(s). Current research issues and activities in science education: status, trends, theories and hypotheses. Formulation of research questions, design of studies and critical, in-depth review of literature related to the student's research interests. Effective: 2016 Fall Quarter.

EDU 264—Scientific Literacy & Science Education Reform (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Current trends in science education reform locally, regionally, and nationally focusing on scientific literacy. Equity, access and "science for all." Effective: 2016 Fall Quarter.

EDU 270—Research on Teacher Education & Development (4)

Seminar—3 hour(s); Project (Term Project). Research on teacher preparation in university credential programs and on professional development of in-service teachers, with special attention to teacher preparation for work with culturally and linguistically diverse youth. Effective: 2016 Fall Quarter.

EDU 271—Supervision of Student Teachers: Research, Theory & Practice (4)

Lecture/Discussion—3 hour(s); Fieldwork—1 hour(s). Research, theory and practice in the preparation and supervision of teachers. Practice in the supervision of candidates in university teaching credential programs during the student teaching field placement and the mentoring of novice teachers by expert teachers. Effective: 2016 Fall Quarter.

EDU 275A—Effective Instruction: Curriculum & Assessment-Theory, Research, & Practice (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to Teaching Credential majors. Examination of contemporary theories of curriculum development, research about the relationship among instructional planning, classroom assessment, and student learning to guide teaching practice. Effective: 2013 Fall Quarter.

EDU 275B—Effective Instruction: English Language Development & Instructing English Language Learners (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Acceptance in the Teaching Credential Program. Analysis and application of English language acquisition and development research to teaching practice. Particular attention to research that enhances learning of English language learners and under-performing students. Effective: 2016 Fall Quarter.

EDU 280A—Inquiry & Practice: Qualitative Research for Educational Leaders (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Prepares students to understand the nature/assumptions/logic of qualitative methodology as applied to educational settings, focusing on issues of design/conceptualization/ interpretation/ application of qualitative research procedures. Use these methods in conducting studies in their educational settings. Effective: 2009 Fall Quarter.

EDU 280B—Inquiry & Practice: Quantitative Research for Educational Leaders (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Focus is on field-based and general quantitative research methods in education. Acquire skills and knowledge to collect, organize, analyze, and interpret univariate and multivariate quantitative data in educational research, dissertation projects, and field-based projects. Effective: 2010 Winter Quarter.

EDU 280C—Inquiry & Practice: Research Design & Application for Educational Leaders (4)

Lecture—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Educational leaders are introduced to qualitative, quantitative, and mixed-methods educational research methods and learn to frame research questions, identify data/data sources, use descriptive statistics, critically examine research studies, make sense of educational research/policy, and conduct independent studies. Effective: 2010 Spring Quarter.

EDU 281A—Problem-Based Learning Courses: Part 1 (4)

Lecture/Discussion—4 hour(s); Extensive Writing/Discussion; Fieldwork. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students identify problems from their educational settings, engage in data collection/analysis, write-up the process/results, and present to class. Work may become a dissertation proposal, if the problem or its extension is of sufficient interest and value. Effective: 2009 Fall Quarter.

EDU 281B—Problem-Based Learning Courses: Part 2 (4)

Lecture/Discussion—4 hour(s); Extensive Writing/Discussion; Fieldwork. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Continuation of part one. Effective: 2010 Winter Quarter.

EDU 281C—Problem-Based Learning Courses: Part 3 (4)

Lecture/Discussion—4 hour(s); Extensive Writing/Discussion; Fieldwork. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Continuation of part two. Effective: 2010 Spring Quarter.

EDU 282A—Beginning Issues & Practices: Contemporary Educational Leadership (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Explore the history and emergent relationships among leadership theories/ practice and their application to current educational settings. Reflect on and refine their personal theory of leadership. Effective: 2009 Fall Quarter.

EDU 282B—Beginning Issues & Practices: Diversity Issues for Educational Leaders (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Diversity of stakeholders and community issues in California schools and colleges will be explored. Emphasis will be placed on the interaction between underrepresented segments of society and educational institutions. Best Practices in leading diverse schools will be explored. Effective: 2010 Winter Quarter.

EDU 283A—Advanced Issues & Practices: Leadership Across Communities (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Examine the theory/practice/process of leadership in community-building and collaboration in/across communities, while addressing the utilization of human and material resources and the creation of partnerships, community linkages, and collaborative efforts. Effective: 2010 Spring Quarter.

EDU 283B—Advanced Issues & Practices: Leadership & Student Services (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Practical and theoretical perspectives for building a sense of vision to lead the profession of student affairs and to meet the needs of the whole student. Effective: 2010 Spring Quarter.

EDU 284A—Policy: History & Theory of Educational Policy (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Learn/analyze the history/theory of educational policy. Explore how education leaders have/can positively influence the process and implement effective policies in their local institutions. Policy issues covered: educational opportunity, equity, access, regulation, testing, tenure, accountability. Effective: 2009 Fall Quarter.

EDU 284B—Policy: Formulating & Influencing Policy (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Conduct critical analyses of policy at the federal, judicial, state, regional and local levels. Specific California and federal policy environment structures, processes and people will be examined for intended consequences, ethical dilemmas, social justice and equity issues. Effective: 2010 Winter Quarter.

EDU 284C—Policy: Possibilities & Limitations of Educational Policy in a Democracy (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Critically examine the democratic purposes of education in light of existing National, State, and local policy reform efforts. Questions include, "In what ways are these reforms and policies guided by democratic ideas and challenged by those ideals." Effective: 2010 Winter Quarter.

EDU 285A—Educational Finance, Human Resources, & Law: Integrated Seminar: Human & Financial Assets: Allocations, & Budgets (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Topics include: education finance theory, contemporary finance policy issues, intergovernmental relations, effective resource management, budget analysis and preparation. Effective: 2010 Spring Quarter.

EDU 285B—Educational Finance, Human Resources, & Law: Ethical & Legal Issues in Education (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Human resource and legal concepts and activities governing decisions of school leaders in public education. Attention to theory, application, and practice of personnel and risk management, curriculum, student services, teacher rights, torts, student rights. Effective: 2009 Fall Quarter.

EDU 285C—Educational Finance, Human Resources, & Law: Human Resources & Personnel (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Human resource management research and theory and for applying human resource techniques in the educational setting. Effective: 2010 Spring Quarter.

EDU 286A—Organizational Structures & Change: Data-Driven Decision-Making for Change (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Use and examine multiple sources of information and data and trends found in making quality decisions to improve P-12/community college settings and addressing problems at sites. Learn limitations of these data sources. Effective: 2009 Fall Quarter.

EDU 286B—Organizational Structures & Change: Curriculum & Instruction Issues in Education (4)

Lecture/Discussion—4 hour(s); Fieldwork; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Addresses the historical development of various curriculum and instructional methodologies found in public and private schools and colleges, and their impact on current curriculum development and reform efforts at the national, state and local level. Effective: 2010 Winter Quarter.

EDU 287—CANDEL Dissertation Seminars (6-12)

Variable—18-36 hour(s). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Third-year seminars encourage students to complete dissertations within the year. Cohort members meet together in every three-week meetings with faculty members and share their writing, data collection, analysis, discussion of results, development of conclusions/implications. May be repeated up to 9 time(s) until dissertation is completed. (S/U grading only.) Effective: 2009 Fall Quarter.

EDU 287D—CANDEL Dissertation (6-12)

Variable—18-36 hour(s). Prerequisite(s): Consent of Instructor. Passing of qualifying exams in CANDEL program and advancement to candidacy. Cohort members continue to meet with faculty and share their writing, data collection, analysis, development of conclusions/implications. May be repeated up to 9 time(s) until dissertation is completed. (S/U grading only.) Effective: 2016 Fall Quarter.

EDU 291—Proseminar in Education (4)

Seminar—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Admission to the M.A. or Ph.D. graduate program in Education. Professional induction into educational research field and Graduate Group in Education at UC Davis. Introduction to landscape of educational research methodologies, purposes and theories. Analysis of debates within field. Investigation of K-12 educational outreach efforts at UC Davis. May be repeated up to 2 time(s) divided as an M.A. student once; as a Ph.D. student once. Effective: 2016 Fall Quarter.

EDU 292—Special Topics in Education (2-4)

Variable—2-4 hour(s). Prerequisite(s): Consent of Instructor. Selected topics in education. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress. May be repeated for credit. Effective: 2016 Fall Quarter.

EDU 294—Special Topics in Science, Agriculture & Mathematics Education (4)

Seminar—3 hour(s); Term Paper; Project (Term Project). Critical study of special topics of research relevant to science, agricultural and mathematics education. Students and faculty present work-in-progress on a major research project, and critically analyze and discuss one another's developing scholarly work. May be repeated for credit when topic differs. Effective: 2016 Fall Quarter.

EDU 295—Special Topics in Learning & Mind Science (4)

Seminar—3 hour(s); Term Paper. Critical study of selected issues in the learning sciences, neurodevelopmental disorders, and psychometrics and measurement, as they relate to education. May be repeated for credit when topics differs. Effective: 2016 Fall Quarter.

EDU 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Group study. (S/U grading only.) Effective: 2016 Fall Quarter.

EDU 299—Individual Study (1-6)

Variable—3-18 hour(s). Prerequisite(s): Consent of Instructor. Individual study under the direction of a faculty member. (S/U grading only.) Effective: 2016 Fall Quarter.

EDU 299D—Research (1-12)

Independent Study—3-36 hour(s). Prerequisite(s): Consent of Instructor. Research for individual graduate students. (S/U grading only.) Effective: 2016 Fall Quarter.

EDU 300—Reading in the Elementary School (4)

Lecture—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas. Effective: 2016 Fall Quarter.

EDU 300A—Reading in the Elementary School, Part A (1)

Seminar—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas. (P/NP grading only.) Effective: 2018 Summer Quarter.

EDU 300B—Reading in the Elementary Schools, Part B (3)

Seminar—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas. Effective: 2018 Summer Quarter.

EDU 301—Reading in the Secondary School (4)

Discussion—4 hour(s). Prerequisite(s): Graduate standing, enrollment in the secondary credential program or consent of instructor. Principles, procedures, and materials to help secondary school teachers improve the reading competence of students. Strategies for enhancing learning through reading and writing in all disciplines, with special attention to linguistically diverse populations. Effective: 1997 Winter Quarter.

EDU 301A—Teaching Literacy in High School Contexts (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Restricted to students enrolled in the secondary credential program. Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards. Effective: 2016 Fall Quarter.

EDU 301B—Teaching Literacy in High School Contexts (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to students enrolled in the secondary credential program. Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards. Effective: 2016 Fall Quarter.

EDU 302—Language Arts in the Elementary School (2)

Lecture—2 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for the teaching of oral and written expression, listening skills, drama, and children's literature in elementary schools. Effective: 2016 Fall Quarter.

EDU 303—Art Education in the Elementary School (2)

Lecture/Discussion—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Understanding the principles of education in the arts through participation. Development of concepts, introduction to media, and techniques suitable for the elementary school with emphasis on cross-discipline exploration. Effective: 2016 Fall Quarter.

EDU 304A—Teaching in the Elementary Schools (2-18)

Lecture/Discussion—2 hour(s); Fieldwork—9-48 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Selection and organization of teaching materials. Introduction to techniques of diagnosing school achievement of children. Effective: 2016 Fall Quarter.

EDU 304B—Teaching in the Elementary Schools (2-18)

Lecture/Discussion—2 hour(s); Fieldwork—9-48 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Current conceptions of elementary school curriculum, emphasis on contributions from the social, biological, and physical sciences. Emphasis on effective teaching methods. Effective: 2016 Fall Quarter.

EDU 304C—Teaching in the Elementary Schools (2-18)

Lecture/Discussion—2 hour(s); Fieldwork—9-48 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Evaluation of teaching materials including instructional technology. Current elementary school curriculum with emphasis on contributions from fine arts and humanities. Effective: 2016 Fall Quarter.

EDU 305A—Teaching in the Middle Grades (5-8)

Lecture—2 hour(s); Seminar—2 hour(s); Variable—15-30 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular or special education classrooms in middle grades. Current conceptions of the middle-grades curriculum with emphasis on social, biological, and physical sciences. Effective teaching methods. Effective: 2016 Fall Quarter.

EDU 306A—Teaching in the Secondary Schools (2-18)

Lecture/Discussion—2 hour(s); Fieldwork—9-48 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 306B—Teaching in the Secondary Schools (2-18)

Lecture/Discussion—2 hour(s); Fieldwork—9-48 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 306C—Teaching in the Secondary Schools (2-18)

Lecture/Discussion—2 hour(s); Fieldwork—9-48 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 307—Methods in Elementary Science (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for teaching the biological and physical sciences in elementary schools. Effective: 2016 Fall Quarter.

EDU 308—Methods in Elementary Social Studies (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for teaching history and the social sciences in elementary schools. Effective: 2016 Fall Quarter.

EDU 309—The Teaching of Mathematics, K-9 (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations. Effective: 2016 Fall Quarter.

EDU 309A—The Teaching of Mathematics, K-9, Part A (1)

Seminar—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations. (P/NP grading only.) Effective: 2018 Summer Quarter.

EDU 309B—The Teaching of Mathematics, K-9, Part B (2)

Seminar—2 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations. Effective: 2018 Summer Quarter.

EDU 310—Teaching as Reflective Practice (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Presentation of issues related to classroom instruction and professional practice, reflections on classroom instruction and other documentation related to student teaching experience. May be repeated up to 6 time(s). Effective: 2016 Fall Quarter.

EDU 320—Creating Classroom Communities (1)

Lecture/Discussion—2 hour(s); Fieldwork—30 hour(s). Acceptance in Teacher Credential Program. Observation of classrooms at beginning of academic year for first-hand experience with teachers' approaches to creating communities and setting routines. Candidates are placed with students they will teach during student teaching. Candidates may take on teaching tasks as appropriate. Effective: 2016 Summer Special Session.

EDU 322A—Pedagogical Preparation for Secondary Social Science I (3)

Lecture/Discussion—2 hour(s); Discussion—1 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to teaching methods and curriculum approaches for secondary social science teaching. State and national curriculum standards; application of learning theory to effective instruction; interdisciplinary teaching and active learning approaches; effective teaching strategies for English learners. Effective: 2016 Fall Quarter.

EDU 322B—Pedagogical Preparation for Secondary Social Science II (3)

Lecture/Discussion—1 hour(s); Discussion—2 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Intermediate teaching methods and curriculum approaches for secondary social science teaching. Interdisciplinary approaches to teaching major themes across social science content areas; teaching potentially controversial social science topics; teaching democratic civic values, student assessment and evaluation. Effective: 2016 Fall Quarter.

EDU 323A—Physical Science in the Secondary School (3)

Discussion/Laboratory—2 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Activity-based overview of concepts and processes in secondary school physical sciences. Emphasis upon philosophy, appropriate teaching methods, materials, assessment and evaluation of learning. Effective: 2016 Fall Quarter.

EDU 323B—Life Sciences in the Secondary School (3)

Discussion/Laboratory—2 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Activity-based overview of concepts and processes in secondary school biology and life sciences. Emphasis on philosophy, appropriate teaching methods, materials, assessment and evaluation of learning, and issues. Effective: 2016 Fall Quarter.

EDU 324A—Methods & Technology in Secondary Mathematics I (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Introduction to methods and curriculum for teaching mathematics at the secondary level. Introduction to applications of computer technology as instructional, intellectual, and communication tools for mathematics teachers. Effective: 2016 Fall Quarter.

EDU 324B—Methods in Secondary Mathematics II (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Expansion of methods and curriculum for teaching mathematics at the secondary level. Intermediate applications of computer technology as instructional, intellectual, and communication tools in mathematics teaching. Effective: 2016 Fall Quarter.

EDU 325—Research & Methods in Secondary English Language Arts (4)

Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Research on teaching and learning in the language arts. Principles, procedures and materials for improving the writing, reading and oral language of secondary students, with special attention to students from culturally and linguistically diverse populations. Effective: 2016 Fall Quarter.

EDU 326—Teaching Language Minority Students in Secondary Schools: Methods & Research (4)

Seminar—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Research on principles, procedures and curricula for teaching discipline-specific concepts to language-minority students in secondary schools. Second-language acquisition principles and instructional strategies. Effective: 2016 Fall Quarter.

EDU 327A—Teaching Methods for Secondary Foreign Language/Spanish, Part I (3)

Lecture—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to methods for teaching Spanish as a foreign and a heritage language in secondary schools. State and National Standards. Theories on second language acquisition. Lesson plans. Effective teaching strategies and class management. Effective: 2016 Fall Quarter.

EDU 327B—Teaching Methods for Secondary Foreign Language/Spanish, Part II (3)

Lecture—3 hour(s). Prerequisite(s): Acceptance in Teacher Credential Program. Continuation to methods for teaching Spanish as a foreign and a heritage language in secondary schools. Research and practice on foreign and heritage language teaching. Expansion of effective teaching strategies and class management. Effective: 2016 Fall Quarter.

EDU 398—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EDU 399—Individual Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC—Engineering Electrical & Computer

Courses in EEC:

EEC 001—Introduction to Electrical & Computer Engineering (1)

Lecture—1 hour(s); Laboratory—1 hour(s). Introduction to Electrical & Computer Engineering with focus on sub-disciplines of Electrical & Computer Engineering, engineering design, and problem solving. Microcontrollers, analog circuits, signal processing, and communications links. Application of topics to create a functional device. GE credit: SE. Effective: 2020 Winter Quarter.

EEC 007—Introduction to Programming & Microcontrollers (4)

Lecture—3 hour(s); Laboratory—2 hour(s). Pass One restricted to Electrical Engineering majors only. Programming computers using C/C++ languages. Software engineering and object-oriented design. Programming for hardware devices. Only 2 units of credit for students who have previously taken ECS 036A or ECS 032A. Effective: 2019 Winter Quarter.

EEC 010—Introduction to Digital & Analog Systems (4)

Lecture—2 hour(s); Laboratory—3 hour(s); Project (Term Project). Prerequisite(s): (PHY 009C (can be concurrent) or PHY 009HD (can be concurrent)); (ECS 030 or ECS 036B or EEC 007); ENG 017; Consent of Instructor. Interactive and practical introduction to fundamental concepts of electrical and computer engineering by implementing electronic systems, which can be digitally controlled and interrogated, with a programmable microcontroller with the ability to program the electrical connections between analog and digital components. GE credit: SE. Effective: 2020 Spring Quarter.

EEC 018—Digital Systems I (5)

Lecture—3 hour(s); Laboratory—4 hour(s). Prerequisite(s): ENG 017. Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. No credit to students who have previously completed EEC 180A. Effective: 2019 Winter Quarter.

EEC 089A—Special Topics in Electromagnetics (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089B—Special Topics in Physical Electronics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special topics in Physical Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089C—Special Topics in Active & Passive Circuits (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special topics in Active & Passive Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089D—Special Topics in Signals & Systems (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special topics in Signals & Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089E—Special Topics in Computer Systems & Software (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special topics in Computer Systems & Software. May be repeated for credit when topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089F—Special Topics in Digital System Design (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special topics in Digital System Design. May be repeated for credit when topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 090C—Research Group Conference in Electrical & Computer Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 090X—Lower Division Seminar (1-4)

Seminar—1-4 hour(s). Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. Effective: 1997 Winter Quarter.

EEC 092—Internship in Electrical & Computer Engineering (1-5)

Internship—3-15 hour(s). Prerequisite(s): Lower division standing; project approval prior to period of internship. Supervised work experience in Electrical & Computer Engineering. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 099—Special Study for Lower Division Students (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 100—Circuits II (5) *Review all entries*

Laboratory—3 hour(s); Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 017 C- or better; MAT 022B. Restricted to the following majors: Electrical Engineering, Computer Engineering, Computer Science & Engineering, Electronic Materials Engineering, Electrical Engineering/Materials Science, Optical Science & Engineering, Biomedical Engineering, Applied Physics, Electrical & Computer Engineering graduate students. Theory, application, and design of analog circuits. Methods of analysis including frequency response, SPICE simulation, and Laplace transform. Operational amplifiers and design of active filters. Students who have completed ENG 100 may receive 3.5 units of credit. GE credit: QL, SE, VL. Effective: 2018 Fall Quarter.

EEC 100—Circuits II (5) *Review all entries*

Laboratory—3 hour(s); Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 017 C- or better; (MAT 022B or MAT 027B). Restricted to the following majors: Electrical Engineering, Computer Engineering, Computer Science & Engineering, Electrical Engineering/Materials Science, Biomedical Engineering, Applied Physics, graduate students in the Electrical & Computer Engineering major. Theory, application, and design of analog circuits. Methods of analysis including frequency response, SPICE simulation, and Laplace transform. Operational amplifiers and design of active filters. Students who have completed ENG 100 may receive 3.5 units of credit. GE credit: QL, SE, VL. Effective: 2020 Fall Quarter.

EEC 105A—EE-Emerge 1 (1)

Workshop—1 hour(s). Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students. Work in groups to conceive, design and prototype electronic exhibits to promote engineering to the public. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 105B—EE-Emerge 2 (2)

Workshop—2 hour(s). Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students. Work in groups to construct electronic exhibits. . (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 105C—EE-Emerge 3 (1)

Workshop—1 hour(s). Prerequisite(s): EEC 105B. Work in groups to present electronic exhibits to the public. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 110A—Electronic Circuits I (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 100; EEC 140A (can be concurrent). Use and modeling of nonlinear solid-state electronic devices in basic analog and digital circuits. Introduction to the design of transistor amplifiers and logic gates. GE credit: SE, VL. Effective: 2018 Winter Quarter.

EEC 110B—Electronic Circuits II (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 110A. Analysis and design of integrated circuits. Single-stage amplifiers, cascaded amplifier stages, differential amplifiers, current sources, frequency response, and return-ratio analysis of feedback amplifiers. GE credit: SE, VL. Effective: 2009 Fall Quarter.

EEC 111—Digital Electronic Circuits (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 100. Open to Computer Engineering majors only. MOS device fundamentals, introduction to the design of CMOS logic gates, layout, circuits, and modeling. Examination of voltage transfer characteristics, and propagation delay. Only 3 units of credit for those who have completed EEC 140A; only 2 units of credit for those who have completed EEC 110A. GE credit: SE. Effective: 2021 Winter Quarter.

EEC 112—Communication Electronics (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 110A; EEC 150A; EEC 110B recommended. Electronic circuits for analog and digital communication, including oscillators, mixers, tuned amplifiers, modulators, demodulators, and phase-locked loops. Circuits for amplitude modulation (AM) and frequency modulation (FM) are emphasized. GE credit: SE. Effective: 2014 Spring Quarter.

EEC 113—Power Electronic Circuits (4)

Lecture/Lab—4 hour(s). Electronic circuits for power applications, including linear voltage regulators, switching DC-DC converters, DC-AC converters (inverters) and AC-DC converters (rectifiers). Control loop and stability of circuits. Effective: 2020 Spring Quarter.

EEC 116—VLSI Design (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 110A; EEC 018 or 180A recommended. CMOS devices, layout, circuits, and functional units; VLSI fabrication and design methodologies. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 118—Digital Integrated Circuits (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 110A; (EEC 018 or EEC 180A). Analysis and design of digital integrated circuits. Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer characteristics, propagation delay, and power consumption. Regenerative circuits, sequential elements, interconnect, RAMs, ROMs, and PLAs. GE credit: SE. Effective: 2019 Spring Quarter.

EEC 119A—Integrated Circuit Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 116 or EEC 118. Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 119B—Integrated Circuit Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 119A. Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 130A—Electromagnetics I (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 021D; (PHY 009C or PHY 009HD); ENG 017. Basics of static electric and magnetic fields and fields in materials. Work and scalar potential. Maxwell's equations in integral and differential form. Plane waves in lossless media. Lossless transmission lines. GE credit: SE. Effective: 2016 Fall Quarter.

EEC 130B—Introductory Electromagnetics II (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 130A. Plane wave propagation in lossy media, reflections, guided waves, simple modulated waves and dispersion, and basic antennas. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 132A—RF & Microwaves in Wireless Communication (5)

Lecture—3 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 110A; EEC 130B. Study of Radio Frequency and Microwave theory and practice for design of wireless electronic systems. Transmission lines, microwave integrated circuits, circuit analysis of electromagnetic energy transfer systems, the scattering parameters. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 132B—RF & Microwaves in Wireless Communication (5)

Lecture—3 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 132A. Passive RF and microwave device analysis, design, fabrication, and testing for wireless applications. RF and microwave filter and coupler design. Introductory analysis and design of RF and microwave transistor amplifiers. GE credit: SE. Effective: 2007 Winter Quarter.

EEC 132C—RF & Microwaves in Wireless Communications (5)

Lecture—3 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 132B. RF and microwave amplifier theory and design, including transistor circuit models, stability considerations, noise models and low noise design. Theory and design of microwave transistor oscillators and mixers. Wireless system design and analysis. GE credit: SE. Effective: 2009 Spring Quarter.

EEC 133—Electromagnetic Radiation & Antenna Analysis (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 130B. Properties of electromagnetic radiation; analysis and design of antennas: ideal cylindrical, small loop, aperture, and arrays; antenna field measurements. GE credit: SE. Effective: 2018 Fall Quarter.

EEC 133—Electromagnetic Radiation & Antenna Analysis (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 130B. Properties of electromagnetic radiation; analysis and design of antennas: ideal, small loop, aperture, and arrays; antenna simulations/measurements. GE credit: SE. Effective: 2020 Fall Quarter.

EEC 134A—RF/Microwave Systems Design (3)

Workshop—3 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 130B or EEC 110B or EEC 150A. Limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 134B—RF/Microwave Systems Design (3)

Workshop—3 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 134A. Limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 135—Optoelectronics for High-Speed Data Networking & Computing Systems (4)

Lecture—4 hour(s). Prerequisite(s): EEC 130B. Principles of optical communication systems. Planar dielectric waveguides. Optical fibers. Silicon photonics. Attenuation and dispersion in optical fibers. Optical sources, detectors, transmitters, receivers, modulators, optical amplifiers, and optical multiplexers/demultiplexers. Optics in data centers and computing systems. Design of digital optical communication links. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 136A—Electronic Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): (ECS 036B or ECS 030 or ECS 034 or EEC 007); EEC 100; (EEC 018 or EEC 180A); (EEC 110B or EEC 157A (can be concurrent) or EEC 180 or EEC 180B). Pass One restricted to major. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 136B—Electronic Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 136A. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 140A—Principles of Device Physics I (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 017 (can be concurrent); (PHY 009D or PHY 009HE). Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals. GE credit: SE, SL. Effective: 2018 Fall Quarter.

EEC 140B—Principles of Device Physics II (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 140A. Electrical properties, designs, models and advanced concepts for MOS, Bipolar, and Junction Field-Effect Transistors, including scaling, minority-carrier distributions, non-ideal effects, and device fabrication methods. MESFET and heterojunction bipolar transistors (HBTs). Fundamentals of solar cells, photodetectors, LEDs and semiconductor lasers. GE credit: SE. Effective: 2010 Spring Quarter.

EEC 145—Electronic Materials (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 140A. Electronic and physical properties of materials used in electronics, ICs, optoelectronics and MEMS. Semiconductors, dielectrics, metals, optical materials, organic semiconductive, optical and nonlinear properties, as well as their synthesis and deposition methods. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 146A—Integrated Circuits Fabrication (4)

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): EEC 140A. Theoretical and experimental study of basic fabrication processes for metal oxide semiconductor integrated circuits, including oxidation, photolithography, impurity diffusion, metallization, wet chemical etching, and characterization. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 146B—Advanced Integrated Circuits Fabrication (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 146A. Restricted to Electrical, Computer, and Electrical/Materials Science majors and Electrical Engineering graduate students; non-majors accommodated when space available. Fabrication processes for CMOS VLSI. Laboratory projects examine deposition of thin films, ion implantation, process simulation, anisotropic plasma etching, sputter metallization, and C-V analysis. Topics include isolation, projection alignment, epilayer growth, thin gate oxidation, and rapid thermal annealing. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 150A—Introduction to Signals & Systems I (4)

Lecture—4 hour(s). Prerequisite(s): EEC 100; (ENG 006 (can be concurrent) or MAT 022AL (can be concurrent)). Characterization and analysis of continuous-time linear systems. Fourier series and transforms with applications. Introduction to communication systems. Transfer functions and block diagrams. Elements of feedback systems. Stability of linear systems. GE credit: QL, SE. Effective: 2013 Fall Quarter.

EEC 150B—Introduction to Signals & Systems II (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 150A. Characterization and analysis of discrete time systems. Difference equation models. Ztransform analysis methods. Discrete and fast Fourier transforms. Introduction to digital filter design. GE credit: QL, SE. Effective: 2012 Fall Quarter.

EEC 152—Digital Signal Processing (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 150B; (EEC 070 or ECS 050). Theory and practice of real-time digital signal processing. Fundamentals of real-time systems. Programmable architectures including I/O, memory, peripherals, interrupts, DMA. Interfacing issues with A/D and D/A converters to a programmable DSP. Specification driven design and implementation of simple DSP applications. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 157A—Control Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 100. Analysis and design of feedback control systems. Examples are drawn from electrical and mechanical systems as well as other engineering fields. Mathematical modeling of systems, stability criteria, root-locus and frequency domain design methods. GE credit: SE. Effective: 2013 Fall Quarter.

EEC 157B—Control Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 157A. Control system design; transfer-function and state-space methods; sampled-data implementation, digital control. Laboratory includes feedback system experiments and simulation studies. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 160—Signal Analysis & Communications (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 150A. Signal analysis based on Fourier methods. Fourier series and transforms; time-sampling, convolution, and filtering; spectral density; modulation: carrier-amplitude, carrier-frequency, and pulse-amplitude. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 161—Probabilistic Analysis of Electrical & Computer Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 100; (ENG 006 or MAT 022AL). Probabilistic and statistical analysis of electrical and computer systems. Discrete and continuous random variables, expectation and moments. Transformation of random variables. Joint and conditional densities. Limit theorems and statistics. Noise models, system reliability and testing. GE credit: SE. Effective: 2016 Spring Quarter.

EEC 165—Statistical & Digital Communication (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 160; EEC 161. Introduction to random process models of modulated signals and noise, and analysis of receiver performance. Analog and digitally modulated signals. Signal-to-noise ratio, probability of error, matched filters. Intersymbol interference, pulse shaping and equalization. Carrier and clock synchronization. GE credit: SE. Effective: 2017 Winter Quarter.

EEC 170—Introduction to Computer Architecture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 036B or ECS 030 or ECS 034 or EEC 007); (EEC 018 or EEC 180A). Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 171—Parallel Computer Architecture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 170 or ECS 154B. Organization and design of parallel processors including shared-memory multiprocessors, cache coherence, memory consistency, snooping protocols, synchronization, scalable multiprocessors, message passing protocols, distributed shared memory and interconnection networks. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 172—Embedded Systems (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): (EEC 170 or ECS 154A); EEC 100. Introduction to embedded-system hardware and software. Topics include: embedded processor and memory architecture; input/output hardware and software, including interrupts and direct memory access; interfacing with sensors and actuators; wired and wireless embedded networking. GE credit: SE. Effective: 2016 Winter Quarter.

EEC 173A—Computer Networks (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032). Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as ECS 152A.) GE credit: SE. Effective: 2019 Winter Quarter.

EEC 173B—Advanced Topics in Computer Networks (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 173A or ECS 152A. Advanced topics in computer networks, wireless networks, multimedia networking, traffic analysis and modeling, network design and management, network simulation and performance analysis, and design projects in communication networks. (Same course as ECS 152C.) GE credit: SE. Effective: 2020 Winter Quarter.

EEC 180—Digital Systems II (5)

Lecture—3 hour(s); Laboratory—4 hour(s). Prerequisite(s): EEC 018 or EEC 180A. Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. No credit to students who have previously completed EEC 180B. Effective: 2019 Winter Quarter.

EEC 181A—Digital Systems Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): (EEC 180 or EEC 180B); EEC 170. Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. Team project includes a final presentation and report. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 181B—Digital Systems Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 181A. Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. Team project includes a final presentation and report. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 183—Testing & Verification of Digital Systems (5)

Lecture—3 hour(s); Laboratory—4 hour(s). Prerequisite(s): EEC 170; EEC 180B. Computer aided-testing and design verification techniques for digital systems; physical fault testing; simulation-based design verification; formal verification; timing analysis. GE credit: SE. Effective: 2012 Spring Quarter.

EEC 189A—Special Topics in Electrical Engineering & Computer Science: Computer Science (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189B—Special Topics in Electrical Engineering & Computer Science: Programming Systems (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189C—Special Topics in Electrical Engineering & Computer Science: Digital Systems (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189D—Special Topics in Electrical Engineering & Computer Science: Communications (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Communications. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189E—Special Topics in Electrical Engineering & Computer Science: Signal Transmission (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189F—Special Topics in Electrical Engineering & Computer Science: Digital Communication (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189G—Special Topics in Electrical Engineering & Computer Science: Control Systems (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Control Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189H—Special Topics in Electrical Engineering & Computer Science: Robotics (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Robotics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189I—Special Topics in Electrical Engineering & Computer Science: Signal Processing (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189J—Special Topics in Electrical Engineering & Computer Science: Image Processing (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Image Processing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189K—Special Topics in Electrical Engineering & Computer Science: High-Frequency Phenomena & Devices (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in High-Frequency Phenomena & Devices. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189L—Special Topics in Electrical Engineering & Computer Science: Solid-State Devices & Physical Electronics (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Solid-State Devices & Physical Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189M—Special Topics in Electrical Engineering & Computer Science: Systems Theory (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189N—Special Topics in Electrical Engineering & Computer Science: Active & Passive Circuits (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Active & Passive Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189O—Special Topics in Electrical Engineering & Computer Science: Integrated Circuits (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189P—Special Topics in Electrical Engineering & Computer Science: Computer Software (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Software. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189Q—Special Topics in Electrical Engineering & Computer Science: Computer Engineering (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189R—Special Topics in Electrical Engineering & Computer Science: Microprocessing (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189S—Special Topics in Electrical Engineering & Computer Science: Electronics (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189T—Special Topics in Electrical Engineering & Computer Science: Electromagnetics (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189U—Special Topics in Electrical Engineering & Computer Science: Opto-Electronics (1-5)

Lecture; Laboratory; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Opto-Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189W—Special Topics in Electrical Engineering & Computer Science: Computer Networks (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special topics in Computer Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 190C—Research Group Conferences in Electrical & Computer Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Electrical and Computer Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2013 Spring Quarter.

EEC 192—Internship in Electrical & Computer Engineering (1-6)

Internship—3-18 hour(s). Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in electrical and computer engineering. May be repeated for credit when project differs. (P/NP grading only.) GE credit: SE. Effective: 2018 Fall Quarter.

EEC 193A—Senior Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 196 (can be concurrent); and Consent of Instructor. Restricted to senior standing in Electrical or Computer Engineering. Team design project for seniors in Electrical or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project is supervised by a faculty member. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 193B—Senior Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 193A. Team design project for seniors in Electrical Engineering or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project supervised by a faculty member. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 195A—Autonomous Vehicle Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): (ECS 030 or ECS 036B or ECS 034 or EEC 007); (EEC 018 or EEC 180A); (EEC 110B or EEC 157A (can be concurrent) or ECS 060 or (EEC 180B or EEC 180)). Pass One restricted to major. Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 195B—Autonomous Vehicle Design Project (3)

Workshop—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 195A. Design and construct an autonomous race car. Students work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 196—Issues in Engineering Design (1)

Seminar—1 hour(s). Prerequisite(s): Senior standing in Electrical or Computer Engineering. Covers various electrical and computer engineering standards and realistic design constraints including economic, manufacturability, sustainability, ethical, health & safety, environmental, social, and political. GE credit: SE. Effective: 2008 Fall Quarter.

EEC 197T—Tutoring in Electrical & Computer Engineering (1-3)

Discussion—1 hour(s); Discussion/Laboratory—2-8 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring in Electrical & Computer Engineering courses, especially introductory circuits. For upper division undergraduate students who will provide tutorial assistance. (P/NP grading only.) Effective: 2007 Fall Quarter.

EEC 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. May be repeated up to 3 time(s). (P/NP grading only.) GE credit: SE. Effective: 2007 Fall Quarter.

EEC 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2007 Fall Quarter.

EEC 201—Digital Signal Processing (4)

Lecture—4 hour(s). Prerequisite(s): EEC 150B; STA 120 or MAT 131 or MAT 167 recommended. Theory and design of digital filters. Classification of digital filters, linear phase systems, all-pass functions, FIR and IIR filter design methods and optimality measures, numerically robust structures for digital filters. Effective: 2006 Winter Quarter.

EEC 205—Computational Methods in Biomedical Imaging (4)

Lecture—4 hour(s). Prerequisite(s): (BIM 105 or STA 120); (BIM 108 or EEC 150A). Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as BIM 252.) Effective: 2011 Fall Quarter.

EEC 206—Digital Image Processing (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 150B. Two-dimensional systems theory, image perception, sampling and quantization, transform theory and applications, enhancement, filtering and restoration, image analysis, and image processing systems. Effective: 1997 Winter Quarter.

EEC 210—MOS Analog Circuit Design (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 110B; EEC 140A. Analysis and design of MOS amplifiers, bias circuits, voltage references and other analog circuits. Stability and compensation of feedback amplifiers. Introduction to noise analysis in MOS circuits. Effective: 2020 Spring Quarter.

EEC 211—Advanced Analog Circuit Design (3)

Lecture—3 hour(s). Prerequisite(s): EEC 210; STA 131A and EEC 112 recommended. Noise and distortion in electronic circuits and systems. Application to communication circuits. Specific applications include mixers, low-noise amplifiers, power amplifiers, phase-locked loops, oscillators and receiver architectures. Effective: 2002 Winter Quarter.

EEC 212—Analog MOS IC Design for Signal Processing (4)

Lecture—3 hour(s); Extensive Problem Solving. Prerequisite(s): EEC 210. Analysis and design of analog MOS integrated circuits. Passive components, Single-ended and fully differential op amps, Sampled-data and continuous-time filters. Effective: 2020 Spring Quarter.

EEC 213—Data-Conversion Techniques & Circuits (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 210. Digital-to-analog and analog-to-digital conversion; component characteristics and matching; sample-and-hold, comparator, amplifier, and reference circuits. Effective: 2020 Spring Quarter.

EEC 215—Circuits for Digital Communications (3)

Lecture—3 hour(s). Prerequisite(s): EEC 150B; EEC 210 (can be concurrent); EEC 165, EEC 166, or EEC 265 recommended. Analog, digital, and mixed-signal CMOS implementations of communication-circuit blocks: gain control, adaptive equalizers, sampling detectors, clock recovery. Effective: 2000 Fall Quarter.

EEC 216—Low Power Digital Integrated Circuit Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 118. Integrated circuit design for low power and energy consumption. Low power architectures, logic styles and circuit design. Variable supply and threshold voltages. Leakage management. Power estimation. Energy sources, power electronics, and energy recovery. Applications in portable electronics and sensors. Thermodynamic limits. Effective: 2019 Fall Quarter.

EEC 221—Radio Frequency & Microwave Filter Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 132A; or Consent of Instructor. Design of radio frequency and microwave filters including filter specification and approximation theory. Passive LC filter design covers doubly-terminated reactance two-port synthesis and coupling matrix based synthesis. Active filter design includes sensitivity, op-amp building blocks, and cascade filter design. Effective: 2019 Fall Quarter.

EEC 222—RF IC Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 210. Radio frequency (RF) solid-state devices, RF device modeling and design rules; non-linear RF circuit design techniques; use of non-linear computer-aided (CAD) tools; RF power amplifier design. Effective: 2020 Winter Quarter.

EEC 223—RF Integrated Circuits for Wireless Communications (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 132A; EEC 112. Integrated RF front end circuit design of receivers and synthesizers for wireless communications, such as LNA, mixers, PLL; noise and linearity analysis and specifications; theory and working mechanism of synthesizers and phase noise analysis. Effective: 2020 Winter Quarter.

EEC 224—Terahertz & mm-Wave Integrated Circuit Design (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 132A; EEC 112; or Consent of Instructor. Fundamental theory of RF transmitter and receiver, including noise analysis, transceiver architectures, and antenna arrays. Fundamental limitations, theory and design of amplifiers, oscillators and signal sources at THz and mm-wave frequencies Effective: 2018 Winter Quarter.

EEC 228—Advanced Microwave Circuit & Device Design Techniques (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 132B. Theory, design, fabrication, analysis of advanced microwave circuits and devices. Wideband transformers, stripline/microstripline broadband couplers. Lumped and distributed filter synthesis. Broadband matching theory applied to microwave devices. Wideband and low noise FET/HEMT amplifiers. Advanced microwave oscillator theory. Phase noise analysis. Effective: 2007 Spring Quarter.

EEC 229—RF-MEMS & Adaptive Wireless Frontends (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 130A. Focuses on the modeling, design, fabrication, and characterization of RF-MEMS while providing a thorough introduction to the technology with an emphasis on how it will benefit the design of adaptive RF/microwave wireless systems. Effective: 2015 Fall Quarter.

EEC 230—Electromagnetics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 130B. Maxwell's equations, plane waves, reflection and refraction, complex waves, waveguides, resonant cavities, and basic antennas. Effective: 2020 Spring Quarter.

EEC 231A—Plasma Physics & Controlled Fusion I (4)

Lecture—4 hour(s). Graduate Standing in Engineering or Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves & instabilities in a fluid plasma; plasma kinetic theory & transport coefficients; linear & nonlinear Vlasov theory; fluctuations, correlations & radiation; inertial & magnetic confinement systems in controlled fusion. Effective: 2020 Winter Quarter.

EEC 231B—Plasma Physics & Controlled Fusion II (4)

Lecture—4 hour(s). Prerequisite(s): EEC 231A; or Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves & instabilities in a fluid plasma; plasma kinetic theory & transport coefficients; linear & nonlinear Vlasov theory; fluctuations, correlations & radiation; inertial & magnetic confinement systems in controlled fusion. Effective: 2020 Winter Quarter.

EEC 231C—Plasma Physics & Controlled Fusion III (4)

Lecture—4 hour(s). Prerequisite(s): EEC 231B; or Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves & instabilities in a fluid plasma; plasma kinetic theory & transport coefficients; linear & nonlinear Vlasov theory; fluctuations, correlations & radiation; inertial & magnetic confinement systems in controlled fusion. Effective: 2020 Winter Quarter.

EEC 232A—Advanced Applied Electromagnetics I (4)

Lecture—4 hour(s). Prerequisite(s): EEC 132B or EEC 230. The exact formulation of applied electromagnetic problems using Green's functions. Applications of these techniques to transmission circuits. Effective: 2020 Spring Quarter.

EEC 232B—Advanced Applied Electromagnetics II (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EEC 132B. An advanced treatment of electromagnetics with applications to passive microwave devices and antennas. Effective: 2000 Fall Quarter.

EEC 233—High Speed Signal Integrity (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 130B. Design and analysis of interconnects in high-speed circuits and sub-systems; understanding of high-speed signal propagation and signal integrity concepts; electromagnetic modeling tools and experimental techniques. Effective: 2020 Spring Quarter.

EEC 234A—Physics & Technology of Microwave Vacuum Electron Beam Devices I (4)

Lecture—4 hour(s). Prerequisite(s): B.S. degree in physics or engineering or the equivalent background or consent of instructor. Physics & technology of electron beam emission, flow and transport, electron gun design, space charge waves & klystrons with applications to accelerator systems, RF power sources for radar & communication systems, thermionic energy conversion, and electric space propulsion. Recent advances in materials & manufacturing technologies are also reviewed. Effective: 2020 Winter Quarter.

EEC 234B—Physics & Technology of Microwave Vacuum Electron Beam Devices II (4)

Lecture—4 hour(s). Prerequisite(s): EEC 234A; or Consent of Instructor. Theory, modeling, & experimental design of traveling wave tubes, backward wave oscillators, and extended interaction oscillators employed in satellite communications, plasma imaging, and underground imaging systems. Effective: 2020 Winter Quarter.

EEC 234C—Physics & Technology of Microwave Vacuum Electron Beam Devices III (4)

Lecture—4 hour(s). Prerequisite(s): EEC 234B; or Consent of Instructor. Physics & technology of gyrotrons, gyro-amplifiers, free electron lasers, magnetrons, cross-field amplifiers, and relativistic devices employed in plasma fusion reactors, microwave heating, and high power microwave applications. Effective: 2020 Winter Quarter.

EEC 235—Photonics (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 130B; EEC 230 recommended. Optical propagation of electromagnetic waves and beams in photonic components and the design of such devices using numerical techniques. Effective: 2020 Spring Quarter.

EEC 236—Nonlinear Optical Applications (3)

Lecture—3 hour(s). Prerequisite(s): EEC 130B; EEC 230 (can be concurrent). Nonlinear optical interactions in optical communication, optical information processing and integrated optics. Basic concepts underlying optical nonlinear interactions in materials and guided media. Not open for credit to students who have completed EEC 233. Effective: 2000 Fall Quarter.

EEC 237A—Lasers (3)

Lecture—3 hour(s). Prerequisite(s): EEC 235; EEC 130B; Or the equivalent of EEC 130B. Theoretical and practical description of lasers. Theory of population inversion, amplification and oscillation using semiclassical oscillator model and rate equations. Description and design of real laser system. Not open for credit to students who have completed EEC 226A. Effective: 1998 Winter Quarter.

EEC 237B—Laser Physics II (4)

Lecture—3 hour(s); Extensive Problem Solving. Prerequisite(s): EEC 237A or EAD 265A. Oscillation threshold. Coupled cavity/atomic rate equations, Linear pulse propagation; dispersion, broadening, compression. Nonlinear pulse propagation. Energy extraction. Optical beams, resonators, eigenmodes, axial/transverse modes. Paraxial ray optics, resonator stability, ABCD matrices. Laser dynamics; transients, spiking, Q-switching, active and passive modelocking. Not open for credit to students who have completed EEC 226B. Effective: 2014 Fall Quarter.

EEC 238—Semiconductor Lasers & Photonic Integration (4)

Lecture—4 hour(s). Prerequisite(s): EEC 140A. Understanding of fundamental optical transitions in semiconductors and quantum-confined systems are applied to diode & unipolar lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Photonic integrated circuits based on active (with optical gain) and passive (without optical gain). Effective: 2019 Fall Quarter.

EEC 239A—Optical Communication Technologies for High-Speed Data Networking (4)

Lecture—4 hour(s). Prerequisite(s): EEC 130B. Enabling technologies for optical fiber communication and data center networks. Physical layer issues for component and system technologies in high-speed data optical communications. High-capacity data multiplexing technologies including wavelength-division-multiplexing, time-division-multiplexing, and advanced coherent modulation. Optical signal transmission, optical amplification, and optical switching for telecom and data center networks. Effective: 2019 Winter Quarter.

EEC 239B—High-Capacity Optical Data Systems & Networks (4)

Lecture—4 hour(s). Prerequisite(s): EEC 239A. High-capacity optical data systems and networks, built-on modern optical communication technologies. Technologies behind data center networking, software defined networking, and RF-optical networking. Physical layer issues in light of networking architectures and protocols. Optical communications systems design and integration. Systems technologies and higher-level network architecture, case studies. WDM, TDM, and EON networking, optical and wireless access technologies based on PON and ROF. Effective: 2019 Fall Quarter.

EEC 240—Semiconductor Device Physics (3)

Lecture—3 hour(s). Prerequisite(s): EEC 140B. Physical principles, characteristics and models of fundamental semiconductor device types, including P-N and Schottky diodes, MOSFETs and MESFETs Bipolar Junction Transistors, and light emitters/detectors. Effective: 1998 Fall Quarter.

EEC 241—Introduction to Molecular Electronics (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Examines molecules for electronic devices and sensors. Covers: electronic states of molecules, charge transport in nanoscale systems, and fabrication and measurement of molecular-scale devices. Specific Topics: Hartree-Fock & Density Functional Theory, Landauer formalism, coulomb blockade, tunneling and hopping transport. Effective: 2016 Spring Quarter.

EEC 242—Advanced Nanostructured Devices (3)

Lecture—3 hour(s). Prerequisite(s): EEC 130A; EEC 140A. Physics of nano-structured materials and device operation. Overview of new devices enabled by nanotechnology; fabrication and characterization methods; applications of nano-structures and devices. Effective: 2005 Fall Quarter.

EEC 243—Optical Imaging & Microscopy (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): PHY 009B; EEC130AB recommended. Theory and techniques of optical imaging & microscopy. Fourier optics; light propagation & light detection; imaging contrast mechanisms; optical & microscopy techniques. Effective: 2020 Spring Quarter.

EEC 244A—Design of Microelectromechanical Systems (MEMS) (3)

Lecture—3 hour(s). Prerequisite(s): EEC 140A; EEC 140B; or Consent of Instructor. Theory and practice of MEMS design. Micromechanical fundamentals, CAD tools, and case studies. A MEMS design project is required. Designs will be fabricated in a commercial foundry and tested in EEC 244B. Effective: 1997 Fall Quarter.

EEC 244B—Microsciences (4)

Lecture/Discussion—4 hour(s). Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic mechanics, micromechanical properties, intermolecular interactions and micro tribology. (Same course as BIM 218.) Effective: 2011 Fall Quarter.

EEC 245—Micro- & Nano-Technology in Life Sciences (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as ECH 245, EMS 245, MAE 245.) Effective: 2019 Winter Quarter.

EEC 246—Advanced Projects in IC Fabrication (3) *Review all entries*

Discussion—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): EEC 146B. Individualized projects in the fabrication of analog or digital integrated circuits. Effective: 1997 Winter Quarter.

EEC 246—Advanced Projects in IC Fabrication (4) *Review all entries*

Discussion—1 hour(s); Laboratory—9 hour(s). Prerequisite(s): EEC 146B. Individualized projects in the fabrication of analog or digital integrated electronic or optoelectronic circuits. Effective: 2020 Fall Quarter.

EEC 247—Advanced Semiconductor Devices (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): Graduate standing in Engineering. Semiconductor devices, including MOSFETs, heterojunction transistors, light-emitting diodes, lasers, sensors, detectors, power and high-voltage transistors, MEMS resonators, organic semiconductors and photovoltaics. All material is from recent literature, encouraging students to utilize search methods and critically assess the latest research. Effective: 2011 Fall Quarter.

EEC 248—Photovoltaics & Solar Cells (3)

Lecture—3 hour(s). Prerequisite(s): EEC 140B; or Consent of Instructor. Or equivalent. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as EMS 246.) Effective: 2014 Fall Quarter.

EEC 249—Nanofabrication (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing in Engineering. Theory and practice of nanofabrication (top-down and bottom-up approaches), used for producing integrated circuits, electronic devices, sensors, and microstructures. Process development and characterization. Effective: 2020 Spring Quarter.

EEC 250—Linear Systems & Signals (4)

Lecture—4 hour(s). Prerequisite(s): EEC 150A. Mathematical description of systems. Selected topics in linear algebra. Solution of the state equations and an analysis of stability, controllability, observability, realizations, state feedback and state estimation. Discrete-time signals and systems, and the Z-transform. Effective: 2002 Fall Quarter.

EEC 251—Nonlinear Systems (4)

Lecture—4 hour(s). Prerequisite(s): EEC 250. Nonlinear differential equations, second-order systems, approximation methods, bifurcations, Lyapunov stability, absolute stability, Popov criterion, circle criterion, sliding-mode control, feedback linearization techniques. Effective: 2020 Spring Quarter.

EEC 252—Multivariable Control System Design (4)

Lecture—4 hour(s). Prerequisite(s): EEC 250. Review of single-loop feedback design. Stability, performance and robustness of multi-input multi-output control systems. H-infinity design. Frequency response methods. Optimization-based design. Algebraic design methods for uncertain systems. Effective: 2020 Spring Quarter.

EEC 254—Optimization (3)

Lecture—3 hour(s). Prerequisite(s): MAT 022A; Knowledge of FORTRAN or C. Modeling optimization problems in engineering design and other applications; optimality conditions; unconstrained optimization (gradient, Newton, conjugate gradient and quasi-Newton methods); duality and Lagrangian relaxation constrained optimization. (Primal method and an introduction to penalty and augmented Lagrangian methods.) Effective: 1997 Winter Quarter.

EEC 255—Robotic Systems (3)

Lecture—3 hour(s). Introduction to robotic systems. Mechanical manipulators, kinematics, manipulator positioning and path planning. Dynamics of manipulators. Robot motion programming and control algorithm design. Effective: 2006 Winter Quarter.

EEC 256—Stochastic Optimization in Dynamic Systems (4)

Lecture—4 hour(s). Prerequisite(s): EEC 260; Or the equivalent. Markov Decision Processes (MDP), dynamic programming, multi-armed bandit, Partially observable MDP, optimal stopping, stochastic scheduling, sequential detection and quickest change detection, competitive MDP and game theory, applications in dynamic systems such as queueing networks, communication systems, and multi-agent systems. Effective: 2012 Spring Quarter.

EEC 260—Random Signals & Noise (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 150A; EEC 161. Random processes as probabilistic models for signals and noise. Probability and random variables, Convergence and limit theorems, Specification of random processes, Markov Chains, Wiener process and white Gaussian noise, Poisson process and shot noise, Processing and frequency analysis of random signals. Effective: 2020 Spring Quarter.

EEC 261—Signal Processing for Communications (4)

Lecture—4 hour(s). Prerequisite(s): EEC 165; EEC 260; or Consent of Instructor. Signal processing in wireless and wireline communication systems. Characterization and distortion of wireless and wireline channels. Channel equalization and maximum likelihood sequence estimation. Channel precoding and pre-equalization. OFDM and transmit diversity. Array processing. Effective: 2003 Spring Quarter.

EEC 262—Multi-access Communications Theory (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): (EEC 173A or ECS 152A); STA 120; Or equivalent of STA 120. Maximum stable throughput of Poisson collision channels. Classic collision resolution algorithms. Carrier sensing multiple access and its performance analysis. System stability analysis. Joint design of the physical/medium access control layers. Capacity region of multi-access channels. Multi-access with correlated sources. Effective: 2006 Spring Quarter.

EEC 263—Optimal & Adaptive Filtering (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 260. Geometric formulation of least-squares estimation problems. Theory and applications of optimum Wiener and Kalman filtering. MAP and maximum likelihood estimation of hidden Markov models, Viterbi algorithm. Adaptive filtering algorithms, properties and applications. Effective: 2002 Spring Quarter.

EEC 264—Estimation & Detection of Signals in Noise (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 260. Introduction to parameter estimation and detections of signals in noise. Bayes and Neyman-Pearson likelihood-ratio tests for signal detection. Maximum-likelihood parameter estimation. Detection of known and Gaussian signals in white or colored noise. Applications to communications, radar, signal processing. Effective: 2007 Fall Quarter.

EEC 265—Principles of Digital Communications (4)

Lecture—4 hour(s). Prerequisite(s): EEC 165; EEC 260; or Consent of Instructor. Introduction to digital communications. Coding for analog sources. Characterization of signals and systems. Modulation and demodulation for the additive Gaussian channel. Digital signaling over bandwidth-constrained linear filter channels and over fading multipath channels. Spread spectrum signals. Effective: 1997 Winter Quarter.

EEC 266—Information Theory & Coding (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 161. Topics include Entropy, Relative Entropy, Mutual Information; Asymptotic Equipartition Property; Entropy Rates of Stochastic Process; Data Compression; Channel Capacity; Differential Entropy; Gaussian Channel; Rate Distortion Theory; Network Information Theory. Effective: 2020 Spring Quarter.

EEC 267—Mobile Communications (4)

Lecture/Lab—3 hour(s). Prerequisite(s): EEC 260; EEC 265 (can be concurrent). Time-varying multi-path fading channel models and receiver performance in fading channels; multiple access techniques and multiple access receivers design and performance; optimum design and the capacity of wireless channels. Effective: 2013 Spring Quarter.

EEC 269A—Error Correcting Codes I (3)

Lecture—3 hour(s). Prerequisite(s): MAT 022A; EEC 160. Introduction to the theory and practice of block codes, linear block codes, cyclic codes, decoding algorithms, coding techniques. Effective: 2001 Fall Quarter.

EEC 269B—Error Correcting Codes II (3)

Lecture—3 hour(s). Prerequisite(s): EEC 165; EEC 269A. Introduction to convolutional codes, turbo codes, trellis and block coded modulation codes, soft-decision decoding algorithms, the Viterbi algorithm, reliability-based decoding, trellis-based decoding, multistage decoding. Effective: 2002 Spring Quarter.

EEC 270—Computer Architecture (3) *Review all entries*

Lecture—3 hour(s). Prerequisite(s): EEC 170 or ECS 154B. Introduction to modern techniques for high-performance single and multiple processor systems. Topics include advanced pipeline design, advanced memory hierarchy design, optimizing pipeline and memory use, and memory sharing among multiprocessors. Case studies of recent single and multiple processor systems. Effective: 1999 Winter Quarter.

EEC 270—Computer Architecture (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 170 or ECS 154B. Introduction to modern techniques for high-performance single and multiple processor systems. Topics include advanced pipeline design, advanced memory hierarchy design, optimizing pipeline and memory use, and memory sharing among multiprocessors. Case studies of recent single and multiple processor systems. Effective: 2020 Fall Quarter.

EEC 272—High-Performance Computer Architecture (4)

Lecture—4 hour(s). Prerequisite(s): EEC 270 or ECS 201A. Designing and analysis of high performance computer architecture with emphasis on vector processing, on-chip interconnect networks, chip-level multiprocessors, memory and storage subsystem design and impact of technological advances on computer architecture. Effective: 2015 Spring Quarter.

EEC 273—Networking Architecture & Resource Management (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): ECS 152A or EEC 173A. Pass One and Pass Two only open to Graduate Students in Computer Science and Electrical & Computer Engineering. Design & implementation principles of networking architecture and protocols. Internet, data center, and telephony case studies. Topics: Internet data & control planes; application & services; resource management; Quality of Service (QoS) provisioning; traffic engineering; performance evaluation, software-defined networks, & future research issues. Effective: 2020 Spring Quarter.

EEC 274—Internet Measurements & Network Interference (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 173A or ECS 152A. Internet measurements and network inference, covering the entire data pipeline from data collection, analysis, modeling, to design of data-driven novel/intelligent networked systems. Operational networks: Internet backbone, cellular networks, edge networks, software-defined networks and network function virtualization, data center networks, cloud infrastructure, peer-to-peer and content distribution networks, online social networks, and networked Internet-of-things (IoT). Effective: 2020 Spring Quarter.

EEC 276—Fault-Tolerant Computer Systems: Design & Analysis (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EEC 170; EEC 018. Introduces fault-tolerant digital system theory and practice. Covers recent and classic fault-tolerant techniques based on hardware redundancy, time redundancy, information redundancy, and software redundancy. Examines hardware and software reliability analysis, and example fault-tolerant designs. Effective: 2020 Spring Quarter.

EEC 277—Graphics Architecture (3)

Lecture—3 hour(s). Prerequisite(s): (ECS 154B or EEC 170); ECS 175. Design and analysis of the architecture of computer graphics systems. Topics include the graphics pipeline with a concentration on hardware techniques and algorithms, exploiting parallelism in graphics, and case studies of noteworthy and modern graphics architectures. Effective: 2004 Winter Quarter.

EEC 279—Modern Parallel Computing (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): ECS 036B or ECS 034; EEC 170 or ECS 154A recommended. Exploration of the architecture of modern parallel computers, their programming models, and their programming systems. Effective: 2020 Spring Quarter.

EEC 281—VLSI Digital Signal Processing (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 150B; EEC 170; (EEC 180 or EEC 180B); or Consent of Instructor. Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Effective: 2019 Winter Quarter.

EEC 283—Advanced Design Verification of Digital Systems (4)

Lecture—3 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): EEC 170; (EEC 018 or EEC 180A). Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Effective: 2019 Winter Quarter.

EEC 284—Design & Optimization of Embedded Computing Systems (4)

Lecture—4 hour(s). Prerequisite(s): EEC 170; (EEC 180 or EEC 180B); or Consent of Instructor. ECS 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. Effective: 2019 Winter Quarter.

EEC 286—Introduction to Digital System Testing (4)

Lecture—3 hour(s); Project (Term Project). Prerequisite(s): EEC 018. Review of several current techniques used to detect physical faults in both combinational and sequential circuits. Topics include fault modeling, fault simulation, test generation, compression techniques, and testing architectures. Effective: 2020 Spring Quarter.

EEC 289A—Special Topics in Electrical & Computer Engineering: Computer Science (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289B—Special Topics in Electrical & Computer Engineering: Programming Systems (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289C—Special Topics in Electrical & Computer Engineering: Digital Systems (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289D—Special Topics in Electrical & Computer Engineering: Digital Systems (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289E—Special Topics in Electrical & Computer Engineering: Signal Transmission (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289F—Special Topics in Electrical & Computer Engineering: Digital Communication (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289G—Special Topics in Electrical & Computer Engineering: Control Systems (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Control Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289H—Special Topics in Electrical & Computer Engineering: Robotics (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Robotics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289I—Special Topics in Electrical & Computer Engineering: Signal Processing (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289J—Special Topics in Electrical & Computer Engineering: Image Processing (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Image Processing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289K—Special Topics in Electrical & Computer Engineering: High Frequency Phenomena & Devices (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in High Frequency Phenomena & Devices. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289L—Special Topics in Electrical & Computer Engineering: Solid-State Devices & Physical Electronics (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Solid-State Devices & Physical Electronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289M—Special Topics in Electrical & Computer Engineering: Systems Theory (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289N—Special Topics in Electrical & Computer Engineering: Active & Passive Circuits (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Active & Passive Circuits. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289O—Special Topics in Electrical & Computer Engineering: Integrated Circuits (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289P—Special Topics in Electrical & Computer Engineering: Computer Software (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Computer Software. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289Q—Special Topics in Electrical & Computer Engineering: Computer Engineering (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289R—Special Topics in Electrical & Computer Engineering: Microprocessing (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289S—Special Topics in Electrical & Computer Engineering: Electronics (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Electronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289T—Special Topics in Electrical & Computer Engineering: Electromagnetics (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289U—Special Topics in Electrical & Computer Engineering: Optoelectronics (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Optoelectronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289W—Special Topics in Electrical Engineering & Computer Science: Computer Networks (1-5)

Lecture/Lab—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in Computer Networks. May be repeated for credit when topic differs. Effective: 2018 Winter Quarter.

EEC 290—Seminar in Electrical & Computer Engineering (1)

Seminar—1 hour(s). Discussion and presentation of current research and development in Electrical & Computer Engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 290C—Graduate Research Group Conference in Electrical & Computer Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Research problems, progress, and techniques in electrical and computer engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 290P—Capstone Project For MS Plan II (4)

Term Paper; Lecture—1 hour(s); Extensive Problem Solving. Prerequisite(s): Consent of Instructor. Conducting research projects in electrical and computer engineering. Communicating research results in written reports and oral presentations. Systemic project implementation to answer a comprehensive scientific or technical question in the area of electrical and computer engineering. (S/U grading only.) Effective: 2019 Spring Quarter.

EEC 291—Solid-State Circuit Research Laboratory Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Lectures on solid-state circuit and system design by various visiting experts in the field. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 292—Seminar in Solid-State Technology (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Lectures on solid-state technology by various visiting experts in the field. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 293—Computer Engineering Research Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Lectures, tutorials and seminars on topics in computer engineering. May be repeated up to 4 time(s). (S/U grading only.) Effective: 2000 Winter Quarter.

EEC 294—Communications, Signal & Image Processing Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Communications, signal and image processing, video engineering and computer vision. May be repeated for credit. (S/U grading only.) Effective: 2003 Winter Quarter.

EEC 295—Systems, Control & Robotics Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Seminars on current research in systems and control by faculty and visiting experts. Technical presentations and lectures on current topics in robotics research and robotics technology. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

EEC 296—Photonics Research Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Lectures on photonics and related areas by faculty and visiting experts. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

EEC 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 390—The Teaching of Electrical Engineering (1)

Discussion—1 hour(s). Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Electrical Engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EGG—Energy Systems

Courses in EGG:

EGG 200—Energy Systems (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ENG 105; or equivalent. Theory and application of energy systems. Systems analysis, energy conversion technologies, environmental considerations, economics and system optimization. (Same course as EBS 216) Effective: 2018 Spring Quarter.

EGG 201—Life Cycle Assessment for Sustainable Engineering (4)

Lecture—4 hour(s). Enrollment restricted to graduate students. Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy. Not open to students who have taken ECI 244. (Same course as ECI 244A.) Effective: 2019 Winter Quarter.

EGG 202—Energy & Climate Policy (4)

Lecture—3 hour(s); Extensive Writing/Discussion. Prerequisite(s): ECN 100A or ARE 100A; or Consent of Instructor. Pass One restricted to graduate students in Economics, Energy Graduate Group, and Transportation Technology & Policy Graduate Group. Fundamentals of energy technology, economics, and policy. Survey and analysis of current and prospective climate policies at the local and global level, including but not limited to cap-and-trade, emissions offsets, intensity standards, technology standards, mandates and subsidies. (Same course as ECN 216.) Effective: 2018 Spring Quarter.

EGG 290—Energy Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Selected topics of current interest in energy. Topics vary and will be announced at the beginning of each quarter. Seminar speakers include invited speakers from outside the university as well as faculty. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2018 Fall Quarter.

EGG 298A—Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Directed reading and discussion on select topics May be repeated for credit when topic differs. Effective: 2020 Spring Quarter.

EGG 298B—Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Directed reading and discussion on select topics. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2020 Spring Quarter.

EGG 299—Research (1-12)

Variable—1-12 hour(s). Prerequisite(s): Consent of Instructor. Research May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

EME—Engineering Mechanical

Courses in EME:

EME 001—Mechanical Engineering (1)

Lecture—1 hour(s). Description of the field of mechanical engineering with examples taken from industrial applications, discussions of the practice with respect to engineering principles, ethics, and responsibilities. (P/NP grading only.) Effective: 2001 Fall Quarter.

EME 005—Computer Programming for Engineering Applications (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 016A (can be concurrent) or MAT 021A (can be concurrent). Structured programming in C for solving problems in engineering. Introduction to MATLAB and comparison study of C/C++ with MATLAB. GE credit: SE. Effective: 2017 Fall Quarter.

EME 050—Manufacturing Processes (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 004 C- or better; PHY 009A C- or better. Restricted to Mechanical Engineering and Mechanical Engineering/Materials Science Engineering majors. Modern manufacturing methods, safety, manufacturing instructions, computer-aided manufacturing and their role in the engineering design and development process. GE credit: SE. Effective: 2017 Fall Quarter.

EME 092—Internship in Mechanical Engineering (1-5)

Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work-study experience in engineering. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EME 097TC—Mentoring & Tutoring Engineering in the Community (1-4)

Variable—3-12 hour(s). Prerequisite(s): Consent of Instructor. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

EME 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

EME 106—Thermo-Fluid Dynamics (4)

Lecture—4 hour(s). Prerequisite(s): ENG 103 C- or better; ENG 105 C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, and Mechanical Engineering/Materials Science Engineering majors. Inviscid incompressible flow, compressible flow, ideal gas mixtures, psychrometrics, reacting mixtures and combustion. GE credit: SE. Effective: 2013 Winter Quarter.

EME 108—Measurement Systems (4)

Lecture—2 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better; ENG 104 recommended. Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science & Engineering. Experiments to illustrate principles of mechanical systems. Signal analysis; Demonstration of basic sensors for mechanical systems; Experimental project design; Experiments involving voltage measurement; strain gauges, dynamic systems of 1st order. Only 3 units of credit for students who have previously taken BIM 111; 2 units of credit for students who have previously taken EBS 165; 1 unit of credit allowed for students who have completed EME 107B (former version of EME 108). GE credit: SE, WE. Effective: 2017 Fall Quarter.

EME 109—Experimental Methods for Thermal Fluids (4)

Lecture—2 hour(s); Laboratory—1.5 hour(s); Discussion—1 hour(s); Extensive Writing. Prerequisite(s): EME 106 C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science Engineering Majors. Experiments illustrating principles of thermal-fluid systems and related measurement devices. Statistical design of experiments and uncertainty analysis of data; thermodynamic cycles, combustion, compressible and incompressible flows. Only 3 units of credit for students who have previously taken ECH 155A; 2 units of credit for students who have previously taken ECH 155B; 3 units of credit for students who have previously taken ECI 141L; 1 unit of credit for students who have already completed EME 107A (former version of EME 109). GE credit: SE. Effective: 2017 Fall Quarter.

EME 115—Introduction to Numerical Analysis & Methods (4) *Review all entries*

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better or ECM 006 C- or better); (MAT 021A C- or better, MAT 021B C- or better, MAT 021C C- or better, MAT 021D C- or better, MAT 022A C- or better, MAT 022B C- or better); (PHY 009A C- or better, PHY 009B C- or better, PHY 009C C- or better). Number representation, Taylor expansions, error and stability analysis, roots of nonlinear equations, sets of linear equations, numerical integration, ordinary differential equations. Not open for credit to students who have taken EAD 115. GE credit: SE. Effective: 2013 Fall Quarter.

EME 115—Introduction to Numerical Analysis & Methods (4) *Review all entries*

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better or ECS 032A C- or better or ECS 036A C- or better or ECH 060 C- or better or ECM 006 C- or better); ((MAT 021A C- or better, MAT 021B C- or better, MAT 021C C- or better, MAT 021D C- or better, (MAT 022A C- or better or MAT 027A C- or better), (MAT 022B C- or better or MAT 027B C- or better)), (PHY 009A C- or better, PHY 009B C- or better, PHY 009C C- or better). Number representation, Taylor expansions, error and stability analysis, roots of nonlinear equations, sets of linear equations, numerical integration, ordinary differential equations. Not open for credit to students who have taken EAD 115. GE credit: SE. Effective: 2020 Fall Quarter.

EME 121—Engineering Applications of Dynamics (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 102 C- or better; (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better). Restricted to Mechanical Engineering, Aerospace Science & Engineering, and Mechanical Engineering/Materials Science Engineering majors. Technical elective that revisits dynamic principles with emphasis on engineering applications; Equations of motion are derived and put into a format for computer solution; There is a computer laboratory where real engineering systems are simulated. GE credit: SE. Effective: 2017 Fall Quarter.

EME 134—Vehicle Stability (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 102 C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, and Mechanical Engineering/Materials Science Engineering majors. Analytical and experimental studies of the dynamics, stability and control of vehicles such as cars, trailers, airplanes, motorcycles, bicycles and rail cars. GE credit: SE. Effective: 2017 Fall Quarter.

EME 139—Stability of Flexible Dynamic Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 102 C- or better; ENG 103 C- or better. Stability of flexible systems. Introduction to fluid-structure interaction. Mechanical vibrations. Design of mechanical subsystems or systems under constraints. Dynamic instabilities. Flutter. Control effectiveness. Energy extraction from fluid-structure interactions. Design applications to aerospace, mechanical and biomedical systems. No credit for students who have completed EAE 139. GE credit: SE. Effective: 2016 Spring Quarter.

EME 150A—Mechanical Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 104 C- or better, EME 050 C- or better (can be concurrent)). Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering majors. Principles of mechanics applied to design. Deformation and stress analysis. Structural integrity under static and fluctuating loads. Projects demonstrate progression from concept to engineering analysis, with emphasis on strength and durability. GE credit: SE, WE. Effective: 2017 Fall Quarter.

EME 150B—Mechanical Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EME 150A C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of engineering mechanics applied to the design and selection of mechanical components. Design projects, which concentrate on conceptual design, engineering analysis, methods of manufacture, material selection, and cost. GE credit: SE. Effective: 2017 Fall Quarter.

EME 151—Statistical Methods in Design & Manufacturing (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EME 150A C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering. Methods of statistical analysis with emphasis on applications in mechanical design and manufacturing. Applications include product evaluation and decision making, probabilistic design, systems reliability, and fatigue under random loading. GE credit: SE. Effective: 2017 Fall Quarter.

EME 152—Computer-Aided Mechanism Design (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 102 C- or better; (EME 005 C- or better or ENG 006 C- or better or ECS 030 C- or better). Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of computer-aided mechanism design. Computer-aided kinematic, static, and dynamic analysis and design of planar mechanisms such as multiple-loop linkages and geared linkages. Introduction to kinematic synthesis of mechanisms. GE credit: SE. Effective: 2017 Fall Quarter.

EME 154—Mechatronics (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better; EME 050 C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering. Overview of mechatronics system and control system design concepts, control software architecture, control hardware architecture, microcontroller and interface technology for mechatronics control, sensor for mechatronics systems, actuator drives. GE credit: SE. Effective: 2017 Fall Quarter.

EME 161—Combustion & the Environment (4)

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): EME 106 C- or better. Introduction to combustion kinetics; premixed and diffusion flames; turbulent combustion; pollutant formation; examples of combustion devices such as internal combustion engines, gas turbines, furnaces and incinerators; alternative fuels. GE credit: SE. Effective: 2017 Fall Quarter.

EME 163—Internal Combustion Engines & Future Alternatives (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): EME 050 C- or better; EME 106 C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering. Fundamentals of internal combustion engine design and performance. Future needs to adapt to environmental concerns, and the feasibility of better alternatives in the future. GE credit: SE. Effective: 2017 Fall Quarter.

EME 164—Introduction to Heating, Ventilation & Air Conditioning Systems (4)

Lecture—4 hour(s). Prerequisite(s): EME 106 C- or better; EME 165 C- or better. Introduction to basic mechanisms and processes associated with heating, ventilation and air conditioning (HVAC), including equipment and systems used for HVAC in residential and commercial buildings. Only 2 units for students who have completed ECI 125. GE credit: SE. Effective: 2017 Winter Quarter.

EME 165—Heat Transfer (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better); ENG 103 C- or better; ENG 105 C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering. Conduction, convection, and radiation heat transfer. Computational modeling of heat transfer in engineering. Applications to engineering equipment with the use of digital computers. GE credit: SE. Effective: 2017 Winter Quarter.

EME 171—Analysis, Simulation & Design of Mechatronic Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering. Modeling of dynamic engineering systems in various energy domains. Analysis and design of dynamic systems. Response of linear systems. Digital computer simulation and physical experiments. GE credit: SE. Effective: 2017 Fall Quarter.

EME 172—Automatic Control of Engineering Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better. Restricted to Mechanical Engineering, Aerospace Science & Engineering, Mechanical Engineering/Materials Science and Engineering. Classical feedback control systems; block diagrams; performance specifications; steady state errors; rise and settling times; root locus; PID controllers; Bode and Nyquist plots; stability; phase and gain margins; advanced topics as time allows. GE credit: SE. Effective: 2017 Fall Quarter.

EME 185A—Mechanical Engineering Systems Design Project (4)

Lecture—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): EME 050 C- or better; EME 150A C- or better; EME 165 C- or better (can be concurrent); ENG 003, CMN 001 or CMN 003 recommended; upper division composition recommended. Restricted to Senior standing in Mechanical Engineering (EMEC). Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. GE credit: OL, SE, VL. Effective: 2019 Winter Quarter.

EME 185B—Mechanical Engineering Systems Design Project (4)

Lecture—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): EME 185A; senior standing in the Department of Mechanical and Aerospace Engineering. Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. GE credit: SE. Effective: 2017 Fall Quarter.

EME 189A—Selected Topics in Mechanical Engineering: Energy Systems & the Environment (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Energy Systems & the Environment. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189B—Selected Topics in Mechanical Engineering: Engineering Controls (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Controls. May be repeated for credit when topic differs. GE credit: SE. Effective: 2008 Summer Session 1.

EME 189C—Selected Topics in Mechanical Engineering: Engineering Dynamics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Dynamics. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189D—Selected Topics in Mechanical Engineering: Biomechanics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Biomechanics. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189E—Selected Topics in Mechanical Engineering: Fluid Mechanics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Fluid Mechanics. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189F—Selected Topics in Mechanical Engineering: Manufacturing Engineering (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Manufacturing Engineering. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189G—Selected Topics in Mechanical Engineering: Mechanical Engineering & Product Design (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Mechanical Engineering & Product Design. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189H—Selected Topics in Mechanical Engineering: Mechatronics Systems (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Mechatronics Systems. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189I—Selected Topics in Mechanical Engineering: MEMS/Nanotechnology (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in MEMS/Nanotechnology. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189J—Selected Topics in Mechanical Engineering: Solid & Structural Mechanics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Solid & Structural Mechanics. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189K—Selected Topics in Mechanical Engineering: Thermodynamics (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Thermodynamics. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 189L—Selected Topics in Mechanical Engineering: Vehicle & Transportation Systems (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study in Vehicle & Transportation Systems. May be repeated for credit when topic differs. Effective: 2008 Summer Session 1.

EME 192—Internship in Engineering (1-5)

Variable. Prerequisite(s): Upper division standing; approval of project prior to period of internship. Supervised work experience in mechanical engineering. May be repeated for credit. (P/NP grading only.) Effective: 1997 Fall Quarter.

EME 197TC—Mentoring & Tutoring Engineering in the Community (1-4)

Variable—3-12 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

EME 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EME 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EMR—Emergency Medicine

Courses in EMR:

EMR 092—Emergency Medicine Clinical Research Internship (1-4)

Internship—6-12 hour(s). Prerequisite(s): Consent of Instructor. Undergraduate student in good academic standing at UC Davis. Intended to give the undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students will learn the basics of conducting and developing clinical research studies, using examples from ongoing studies. May be repeated up to 4 unit(s). Units awarded depend on hours worked. (P/NP grading only.) Effective: 2007 Summer Session 1.

EMR 092C—Joan Viteri Memorial Clinic Preceptorship (1.5)

Clinical Activity; Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Directed towards the undergraduate students at UC Davis that volunteer at the Joan Viteri Memorial Clinic (JVMC). May be repeated for credit. (P/NP grading only.) Effective: 2017 Spring Quarter.

EMR 192—Emergency Medicine Clinical Research Internship (1-4)

Internship—6-12 hour(s). Prerequisite(s): Consent of Instructor. Undergraduate student in good academic standing at UC Davis. Intended to give the upper division undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students learn the basics of conducting and developing clinical research studies. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2007 Summer Quarter.

EMR 192A—Joan Viteri Memorial Clinic (JVMC) Student Volunteer (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Open to undergraduate students only. Field experience in health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. Students must apply and interview. May be repeated up to 9 time(s). (P/NP grading only.) Effective: 2019 Spring Quarter.

EMR 199A—Special Study for Advanced Undergraduates (4-12)

Variable—4-12 hour(s). Prerequisite(s): Consent of Instructor. Experienced RA's who have successfully performed in the EMRAP program for a minimum of three quarters; must have database skills. For students interested in working on specific EM projects in a more extensive way. Must commit at least four hours per week for two quarters. Credit awarded upon completion of EMR 199B. Effective: 2007 Fall Quarter.

EMR 299—Research (1-12)

Variable—1-12 hour(s). Prerequisite(s): Consent of Instructor. Directed research in the Department of Emergency Medicine. May be repeated for credit. (S/U grading only.) Effective: 2017 Spring Quarter.

EMR 401—Preceptorship in Emergency Medicine (1-6)

Clinical Activity—10 hour(s). Prerequisite(s): Consent of Instructor. Exposure to the specialty of Emergency Medicine and observation of a wide array of patients in the Emergency Department. May be repeated for credit. (P/F grading only.) Effective: 2012 Spring Quarter.

EMR 405A—Fundamentals of Point-of-Care Ultrasound (1)

Lecture—5 hour(s); Discussion/Laboratory—4 hour(s). First in a longitudinal elective course spanning the first two years of medical school. Introduces the fundamental concepts and technique of ultrasonography in preparation for patient assessment during clinical work. Through a series of lectures accompanied by hands-on practice sessions and case challenges, spaced teaching and deliberate practice, students will grasp the fundamentals of diagnostic ultrasound and solidify their knowledge of key medical science concepts. (P/F grading only.) Effective: 2019 Fall Quarter.

EMR 405B—Fundamentals of Point-of-Care Ultrasound (1)

Lecture—5 hour(s); Discussion/Laboratory—4 hour(s). Second longitudinal elective course spanning the first two years of medical school. Introduces the fundamental concepts and technique of ultrasonography in preparation for patient assessment during clinical work. Through a series of lectures accompanied by hands-on practice sessions and case challenges, spaced teaching and deliberate practice, students will grasp the fundamentals of diagnostic ultrasound and solidify their knowledge of key medical science concepts. (P/F grading only.) Effective: 2020 Summer Quarter.

EMR 430—Introduction to Medical Toxicology (3-6)

Variable—40 hour(s). Prerequisite(s): Consent of Instructor. Fourth-year medical student in good standing. In-depth review of clinical and medical toxicologic emergencies. Rotation includes contact with toxicology trained emergency faculty, didactic lectures, journal club, simulation training and exposure to a very busy poison control center. (H/P/F grading only.) Effective: 2012 Spring Quarter.

EMR 431—Diagnostic Medicine for the Undifferentiated Patient (3)

Clinical Activity. Distance Learning Didactic Elective. Develop skills for clinical assessment and diagnostic planning for common acute complaints. Develop a process for further expansion of clinical assessment skills that can be utilized for any chief complaint. Develop a broad differential diagnosis based solely on the chief complaint; “scripts” are created. Problem-based learning, self-study, and a diagnostic modality project is utilized. (P/F grading only.) Effective: 2020 Spring Quarter.

EMR 435—Wilderness Medicine (3-6)

Lecture/Discussion—20 hour(s); Clinical Activity—12 hour(s); Independent Study—8 hour(s). Prerequisite(s): Consent of Instructor. Introductory elective course for students to explore how physicians can interact with the environment in austere conditions through lectures, hands-on/field experience, and case-based learning. (P/F grading only.) Effective: 2018 Spring Quarter.

EMR 440—Emergency Medicine Clerkship (6)

Clinical Activity—46 hour(s); Lecture/Discussion—4 hour(s). Prerequisite(s): Satisfactory completion of Medicine, Surgery, and Pediatric Clerkship. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Fall Quarter.

EMR 445—Emergency Medicine Ultrasound for Fourth-Year Medical Student (3-6)

Variable. Prerequisite(s): Fourth-year Medical Student in good standing; interest in Emergency Medicine or Critical Care is recommended; EMR 440 or equivalent is recommended prior to the rotation. Limited enrollment. Intended for students interested in learning both the technical and cognitive skills of bedside ultrasound. Emphasis will be on the use of ultrasound in emergency medicine as a diagnostic tool and in procedural guidance. (H/P/F grading only.) Effective: 2008 Fall Quarter.

EMR 450—Ambulatory Elective in Emergency Medicine (3-18)

Variable. Restricted to MS4 students in good standing; externships/away rotations only. Credit will be given for approved non-AI Emergency Medicine courses at other institutions to which there is not an equal learning experience at UC Davis. May be repeated up to 2 time(s). (H/P/F grading only.) Effective: 2016 Fall Quarter.

EMR 455A—Focus on POCUS A (6)

Clinical Activity—30 hour(s). Prerequisite(s): Consent of Instructor. Directed towards gaining a greater proficiency of point-of-care ultrasound. Particularly useful for those pursuing careers that use this modality heavily in clinical practice such as primary care, pediatrics, emergency medicine, critical care, physical medicine and rehabilitation, etc. (H/P/F grading only.) Effective: 2017 Summer Quarter.

EMR 455B—Focus on POCUS B (6)

Clinical Activity—30 hour(s). Prerequisite(s): Consent of Instructor. Directed towards gaining a greater proficiency of point-of-care ultrasound. Particularly useful for those pursuing careers that use this modality heavily in clinical practice such as primary care, pediatrics, emergency medicine, critical care, physical medicine and rehabilitation, etc. (H/P/F grading only.) Effective: 2017 Summer Quarter.

EMR 465—Externship in Emergency Medicine (3-9)

Clinical Activity—36 hour(s); Lecture/Discussion—4 hour(s). Prerequisite(s): Satisfactory completion of Medicine, Surgery and Pediatrics. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

EMR 470—Pediatric Emergency Medicine Clerkship (3-6)

Clinical Activity—36 hour(s); Lecture/Discussion—4 hour(s). Prerequisite(s): Satisfactory completion of Medicine, Surgery, and Pediatrics. Restricted to fourth-year medical student in good standing only. See patients in the Pediatric area of the Emergency Department under the supervision of an Emergency Medicine Attending. Emphasis on recognition and management of the acutely ill pediatric patient and treatment of common pediatric complaints. (H/P/F grading only.) Effective: 2017 Summer Quarter.

EMR 480—Understanding Health Policy: A Focus on Analysis & Translation (1-6)

Lecture—4 hour(s); Discussion—16 hour(s); Independent Study—10 hour(s). Prerequisite(s): Consent of Instructor. Paradigm of healthcare delivery in the U.S. is changing rapidly. To prepare the next generation of physician leaders, provide the skills, tools, and knowledge needed to impact decisions made at the policy level. (H/P/F grading only.) Effective: 2015 Fall Quarter.

EMR 490—Emergency Procedures Elective (3)

Discussion/Laboratory—24 hour(s); Web Virtual Lecture—8 hour(s); Tutorial—4 hour(s); Independent Study—4 hour(s). Prerequisite(s): Current basic life support (BLS) certification. Restricted to fourth-year medical student in good standing only. Simulator-based skills training for emergency procedures. Topics include airway management, central venous access, chest tube placement, and general critical care resuscitation skills. (P/F grading only.) Effective: 2010 Summer Quarter.

EMR 493A—Cardiac Arrest, Resuscitation & Repfusion SSM (3)

Lecture—5 hour(s); Lecture/Lab—10 hour(s); Laboratory—16 hour(s); Clinical Activity—4 hour(s). Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four-week course specific to the topics of Cardiac Arrest, Resuscitation & Repfusion. (H/P/F grading only.) Effective: 2010 Summer Quarter.

EMR 493B—Cardiac Arrest, Resuscitation & Repfusion SSM (3)

Lecture—5 hour(s); Lecture/Lab—10 hour(s); Laboratory—16 hour(s); Clinical Activity—4 hour(s). Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four-week course specific to the topics of Cardiac Arrest, Resuscitation & Repurfusion. (H/P/F grading only.) Effective: 2010 Summer Quarter.

EMR 499—Research (2-18)

Laboratory. Prerequisite(s): Consent of Instructor. Elective where topics may be selected in either basic or clinical research areas of Emergency and/or Critical Care Medicine. The goals will be tailored to each individual student. Enrollment requires prior discussion and consent of instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

EMS—Engineering Materials Science

Courses in EMS:

EMS 002—Materials Marvels: The Science of Superheroes (3)

Lecture—2 hour(s); Discussion—1 hour(s). Introduction to science and technology of materials as key engineering ingredients. Explores the relationship between art and materials, and how superheroes are both products and resources of ideas for new materials' technologies. GE credit: SE, SL, WE. Effective: 2018 Winter Quarter.

EMS 006H—Honors Materials Science Computer Applications (1)

Discussion—1 hour(s). Prerequisite(s): ENG 006 (can be concurrent); Enrollment in the Materials Science & Engineering Honors Program; ENG 006 required concurrently. Restricted to students in the Materials Science & Engineering Honors Program. Examination of materials science computer applications through additional readings, discussions, collaborative work, or special activities which may include projects or computer simulations. Effective: 2017 Winter Quarter.

EMS 009H—Honors Solid-State Materials Science (1)

Discussion—1 hour(s). Prerequisite(s): PHY 009D (can be concurrent); Enrollment in the Materials Science & Engineering Honors Program; PHY 009D required concurrently. Restricted to students in the Materials Science & Engineering Honors Program. Examination of solid-state materials science and modern physics topics through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

EMS 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special study for undergraduates with lower division standing. May be repeated for credit with consent of instructor. (P/NP grading only.) Effective: 2020 Winter Quarter.

EMS 147—Principles of Polymer Materials Science (3)

Lecture—3 hour(s). Prerequisite(s): CHE 002A; CHE 002B; ((CHE 008A, CHE 008B) or (ENG 045 or ENG 045Y)); introductory physics. Basic principles of polymer science presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as FPS 100.) GE credit: QL, SE. Effective: 2018 Spring Quarter.

EMS 160—Thermodynamics of Materials (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); PHY 009B C- or better; MAT 022B C- or better; CHE 002C recommended. Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion. GE credit: SE, SL. Effective: 2019 Fall Quarter.

EMS 162—Structure & Characterization of Engineering Materials (4)

Lecture—4 hour(s). Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); MAT 022A C- or better; PHY 009B C- or better. Description of the structure of engineering materials on the atomic scale by exploring the fundamentals of crystallography. Importance of this structure to materials' properties. Description of experimental determination using x-ray diffraction techniques. GE credit: QL, SE. Effective: 2018 Winter Quarter.

EMS 162L—Structure & Characterization of Materials Laboratory (3)

Laboratory—3 hour(s); Discussion—1 hour(s); Extensive Writing. Prerequisite(s): EMS 162 (can be concurrent); Concurrent enrollment in EMS 162 recommended. Experimental investigations of structure of solid materials are combined with techniques for characterization of materials. Laboratory exercises emphasize methods used to study structure of solids at the atomic and microstructural levels. Methods focus on optical, x-ray and electron techniques. GE credit: SE, WE. Effective: 2020 Winter Quarter.

EMS 164—Kinetics of Materials (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 160; (ECH 060 or ENG 006). Basic kinetic laws and the principles governing phase transformations. Applications in diffusion, oxidation, nucleation, growth and spinodal transformations. GE credit: QL, SE, SL, VL. Effective: 2020 Spring Quarter.

EMS 170—Sustainable Energy Technologies: Batteries, Fuel Cells, & Photovoltaic Cells (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 045 or ENG 045Y. Open to students in Engineering or related fields. Basic principles of future energy devices such as lithium batteries, fuel cells, and photovoltaic cells. Examines the current status of these energy technologies and analyze challenges that still must be overcome. GE credit: SE. Effective: 2018 Winter Quarter.

EMS 170L—Sustainable Energy Technologies Laboratory (3)

Laboratory—3 hour(s); Extensive Writing; Discussion—1 hour(s). Prerequisite(s): ENG 045; EMS 170 (can be concurrent); EMS 172 (recommended). Fundamentals of manufacturing and characterization of energy devices, such as lithium batteries, fuel cells and photovoltaic cells. Discussion on limiting factors in the performance of the devices. GE credit: SE. Effective: 2019 Fall Quarter.

EMS 172—Smart Materials (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 110A or PHY 009D; ENG 006 or ECH 060 or equivalent recommended. Electronic, optical, and magnetic properties of materials as related to structure and processing of solid state materials. Physical principles for understanding the properties of metals, semiconductors, ceramics, and amorphous solids and the applications of these materials in engineering. GE credit: SE, VL. Effective: 2019 Fall Quarter.

EMS 172L—Smart Materials Laboratory (3)

Laboratory—3 hour(s); Discussion—1 hour(s); Extensive Writing. Prerequisite(s): EMS 172 (can be concurrent); Concurrent enrollment in EMS 172 recommended. Experimental investigation of electronic, optical and magnetic properties of engineering materials, emphasizing the fundamental relationship between microstructure and properties as well as the influence of rate processes on the evolution of the microstructure and properties. GE credit: SE, WE. Effective: 2019 Fall Quarter.

EMS 174—Mechanical Behavior of Materials (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 162 recommended. Microscopic and macroscopic aspects of the mechanical behavior of engineering materials, with emphasis on recent development in materials characterization by nondestructive testing. Fundamental aspects of plasticity in engineering materials, strengthening mechanisms and mechanical failure modes of materials systems. GE credit: QL, SE, SL, VL. Effective: 2018 Spring Quarter.

EMS 174L—Mechanical Behavior Laboratory (3)

Laboratory—3 hour(s); Discussion—1 hour(s); Extensive Writing. Prerequisite(s): EMS 174 (can be concurrent); Concurrent enrollment recommended. Experimental investigation of mechanical behavior of engineering materials. Laboratory exercises emphasize the fundamental relationship between microstructure and mechanical properties, and the evolution of the microstructure as a consequence of rate process. GE credit: SE, WE. Effective: 2020 Winter Quarter.

EMS 180—Materials in Engineering Design (4)

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better. Restricted to students with upper division standing. Quantitative treatment of materials selection for engineering applications. Discussion of design & material selection strategy; process & process selection strategy; process economics; life-cycle thinking & eco-design. Use of materials selection software. GE credit: OL, SE, SL, VL. Effective: 2020 Spring Quarter.

EMS 181—Manufacturing of 3D & Composite Materials (4)

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EMS 164). Fundamental physical and chemical principles underlying various processing techniques, used in manufacturing processes for bulk (3D) and composite structural and functional materials. Effects of processing variables on structure-property relationships. GE credit: SE. Effective: 2020 Winter Quarter.

EMS 182—Failure Analysis (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; EMS 174 recommended. Analysis of the way materials fail. Effects of temperature, mechanical deformation and corrosion on the properties of materials. Forensics and methodologies for investigating failures of materials including optical microscopy, x-ray analysis and scanning electron microscopy. Investigation of practical problems. GE credit: QL, SE, VL, WE. Effective: 2018 Spring Quarter.

EMS 183—Processing of 2D & Nanomaterials (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EMS 164). Fundamentals of processing methods for two-dimensional materials, including thin films and graphene-like materials; as well as nanomaterials, including nanoparticles, nanowires, and quantum dots. GE credit: SE. Effective: 2019 Fall Quarter.

EMS 188A—Materials Design Project (4)

Laboratory—4 hour(s); Discussion—1 hour(s). Prerequisite(s): EMS 160; EMS 162; EMS 164; EMS 172; EMS 174. Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project. GE credit: OL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

EMS 188AH—Honors Materials Design (1)

Discussion—1 hour(s). Prerequisite(s): Enrollment in the Materials Science & Engineering Honors Program. Open only to students in the Materials Science & Engineering Honors Program. Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

EMS 188B—Materials Design Project (4)

Laboratory—4 hour(s); Discussion—1 hour(s). Prerequisite(s): EMS 188A. Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project. GE credit: OL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

EMS 188BH—Honors Materials Design (1)

Discussion—1 hour(s). Prerequisite(s): Enrollment in the Materials Science & Engineering Honors Program. Open only to students in the Materials Science & Engineering Honors Program. Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

EMS 190C—Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Individual and/or group conference on problems, progress and techniques in materials research. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

EMS 192—Internship in Materials Science & Engineering (1-5)

Internship—3-15 hour(s). Prerequisite(s): Consent of Instructor. Supervised work experience in the Materials Science & Engineering field. May be repeated for credit with consent of instructor. (P/NP grading only.) Effective: 2019 Fall Quarter.

EMS 198—Directed Group Study (1-5)

Lecture—1-5 hour(s). Prerequisite(s): Consent of Instructor. Group study of selected topics. (P/NP grading only.)
Effective: 2017 Winter Quarter.

EMS 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.)
Effective: 2017 Winter Quarter.

EMS 200—Preparing for Graduate Student Success (1)

Seminar—1.5 hour(s). Restricted to graduate students in Materials Science & Engineering. Introduction to the soft-skills and campus resources needed to succeed in graduate school. Emphasis on the student-mentor relationship and the process of selecting a research mentor. (Same course as ECH 200.) (S/U grading only.)
Effective: 2018 Fall Quarter.

EMS 230—Fundamentals of Electron Microscopy (3)

Lecture—2 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): EMS 162. Principles and techniques of scanning and transmission of electron microscopy used in the study of materials will be described. Emphasis upon practical applications. Effective: 2017 Winter Quarter.

EMS 230L—Laboratory for Electron Microscopy (2)

Laboratory—6 hour(s). Prerequisite(s): EMS 230 (can be concurrent); EMS 230 required concurrently. Practical application of techniques of electron scanning and transmission microscopy including x-ray microanalysis.
Effective: 2017 Winter Quarter.

EMS 244—Interaction of Materials & their Environment (3)

Lecture—3 hour(s). Prerequisite(s): (ENG 045 or ENG 045Y); ENG 105A recommended; or consent of instructor. Thermodynamic and kinetic foundations of the corrosion and oxidation processes. Practical aspects of corrosion control and prevention. Stress-corrosion and gas-embrittlement phenomena. Special topics in corrosion; microbiological and atmospheric corrosion. Effective: 2018 Spring Quarter.

EMS 245—Micro- & Nano-Technology in Life Sciences (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as EEC 245, ECH 245, MAE 245.) Effective: 2019 Winter Quarter.

EMS 246—Photovoltaics & Solar Cells (3)

Lecture—3 hour(s). Prerequisite(s): EEC 140B; or Consent of Instructor. Or equivalent. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as EEC 248.)
Effective: 2017 Winter Quarter.

EMS 248—Fracture of Engineering Materials (3)

Lecture—3 hour(s). Prerequisite(s): EMS 174. Description of the failure of materials by crack propagation. Topics include the stress fields about elastic cracks, the Griffith-Irwin analysis, descriptions of plastic zones, fracture toughness testing, microstructural aspects of fracture and failure at elevated temperatures. Effective: 2017 Winter Quarter.

EMS 249—Mechanisms of Fatigue (3)

Lecture—3 hour(s). Prerequisite(s): EMS 174; or Consent of Instructor. EMS 248 recommended. Microstructural description of the mechanisms of fatigue in metals. Topics include a phenomenological treatment of cyclic deformation, dislocation processes in cyclic deformation, fatigue crack nucleation, Stage I growth, threshold effects and high temperature cyclic deformation. Effective: 2017 Winter Quarter.

EMS 250A—Special Topics in Polymer & Fiber Science (3)

Lecture—3 hour(s). Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered. (Same course as FPS 250A.) Effective: 2017 Winter Quarter.

EMS 250B—Special Topics in Polymer & Fiber Science (3)

Lecture—3 hour(s). Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered. (Same course as FPS 250B.) Effective: 2017 Winter Quarter.

EMS 250E—Special Topics in Polymer & Fiber Science (3)

Lecture—3 hour(s). Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered. (Same course as FPS 250E.) Effective: 2017 Winter Quarter.

EMS 260—Advanced Thermodynamics of Solids (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): EMS 160. Thermodynamic principles, formalism and their application to solid materials. Statistical mechanics and the relations between microscopic and macroscopic properties. Prediction of phase diagrams and phase stability, particularly for solids. Effective: 2019 Fall Quarter.

EMS 262—Advanced Topics in Structure of Materials (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EMS 162; EMS 174 recommended; graduate standing in Engineering or consent of instructor. Nature of microstructure in engineering materials. Crystalline and non-crystalline structures, with special emphasis on grain boundary segregation in the development of polycrystalline microstructure and the radial distribution function of amorphous materials. Not open for credit to students who previously completed (cancelled) EMS 245. Effective: 2017 Winter Quarter.

EMS 264—Transport Phenomena in Materials Processes (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing in Engineering. Thermodynamic driving forces and atomic-scale mechanisms underlying diffusive mass transport and interface motion in materials. Nucleation, growth and coarsening dynamics of phase transformations. Not open for credit to students who previously completed EMS 240. Effective: 2017 Winter Quarter.

EMS 268—Advanced Materials Characterization (4)

Lecture/Discussion—4 hour(s). Open to graduate students in Chemistry, Physics, and Engineering. Fundamental working principles for characterization methods used in structural and compositional analysis of engineering materials. Topics include x-ray, electron, ion, and neutron interactions with materials and techniques include diffraction, spectroscopy, and imaging methods. Effective: 2019 Spring Quarter.

EMS 272—Advanced Functional Properties of Materials (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing in Physics, Chemistry, and Engineering. Fundamental physical properties of solid materials important to solid state devices, specifically electronic, magnetic, and optical properties. Topics include band structures, metals, superconductors, semiconductors, dielectrics, optical properties, and magnetic properties and implementation of these properties into devices. Effective: 2017 Winter Quarter.

EMS 274—Advanced Mechanical Properties of Materials (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EMS 174. Comprehensive study of mechanical properties of materials, with special attention to dislocations and deformation and fracture control mechanisms. Mechanical properties of conventional engineering materials as well as advanced materials such as nanocrystalline solids and thin films are considered. Effective: 2017 Winter Quarter.

EMS 280A—Graduate Capstone Project (4)

Laboratory—4 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing in an engineering discipline. Advanced materials design experience involving analysis of engineering applications of materials, including synthesis, processing, and fabrication. Additional consideration of critical assessments of economics, manufacturing, and ethical constraints. Fundamental principles of materials science are integrated into a culminating capstone project. Effective: 2019 Fall Quarter.

EMS 280B—Graduate Capstone Project (4)

Discussion—1 hour(s); Laboratory—4 hour(s). Prerequisite(s): EMS 280A. Advanced materials design experience involving analysis of engineering applications of materials, including synthesis, processing and fabrication. Additional consideration of critical assessments of economics, manufacturing, and ethical constraints. Fundamental principles of materials science are integrated into a culminating capstone project. Effective: 2019 Fall Quarter.

EMS 282—Glass: Science & Technology (3)

Lecture—2 hour(s); Extensive Writing—1 hour(s). Prerequisite(s): Graduate standing in Chemistry, Physics or Engineering, or consent of instructor. Modern paradigms in glass science and their applications to technologies. Relation of macroscopic properties of glasses and glass-forming liquids to atomic-level structures, including principles of formation, relaxation, transport phenomena, nucleation, crystallization and phase separation in glasses. Effective: 2017 Winter Quarter.

EMS 285—Advanced Computational Materials Science (3)

Lecture—3 hour(s). Prerequisite(s): Prior numerical programming experience and familiarity with control flow statements is recommended. Restricted to graduate students. Capabilities and limitations of modern approaches in computational materials science. Implementation and use of these approaches. Molecular dynamics, cellular automata, and phase field techniques. Effective: 2020 Spring Quarter.

EMS 288—Living Matter: Physical Biology of the Cell (3)

Lecture—3 hour(s). Open to any student possessing general background in any disciplines of physical or biological sciences and engineering. Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability. (Same course as BIM 288, BPH 288.) Effective: 2016 Fall Quarter.

EMS 289A—Special Topics in Materials Science (1-5)

Lecture/Discussion—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special topics in the discipline of Materials Science & Engineering. Topics will vary by instructor. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 290—Materials Science & Engineering Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Selected topics of current interest in Materials Science & Engineering. Subjects covered vary from year to year and are announced at the beginning of each quarter. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

EMS 290C—Graduate Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Individual and/or group conference on problems, progress, and techniques in Materials Science & Engineering research. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

EMS 292—Materials Science & Engineering Internship (1-12)

Internship. Prerequisite(s): Consent of Instructor. Graduate level standing. Work or lab experience in industry or off-campus lab focusing on Materials Science & Engineering applications at the graduate level. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2019 Fall Quarter.

EMS 294—Materials Science Seminar (1)

Seminar—1 hour(s). Current literature and developments in materials science with presentations by individual students. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

EMS 298—Group Study (1-5)

Variable. Group study. Effective: 2017 Winter Quarter.

EMS 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Research. (S/U grading only.) Effective: 2017 Winter Quarter.

EMS 390—The Teaching of Materials Science (1)

Discussion—1 hour(s). Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Materials Science & Engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

ENG—Engineering

Courses in ENG:

Students are encouraged to carefully adhere to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

ENG 001—Introduction to Engineering (1)

Lecture—1 hour(s). Open to first year students only. Introduction to the role of engineers in the acquisition and development of engineering knowledge, the differences and similarities among engineering fields, and the work ethic and skills required for engineering. (P/NP grading only.) GE credit: SE. Effective: 2011 Fall Quarter.

ENG 003—Introduction to Engineering Design (4)

Lecture—2 hour(s); Studio—2 hour(s); Project (Term Project)—2 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Pass One restricted to lower division College of Engineering students; Pass Two restricted to lower division students. Introduction to the engineering design process that incorporates the development of oral and written communication skills integral to the design process. Conducted in workshop format with hands-on engagement in the design process. GE credit: OL, SE, SS. Effective: 2018 Fall Quarter.

ENG 004—Engineering Graphics in Design (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Engineering design, descriptive geometry, pictorial sketching, computer-aided graphics, and their application in the solution of engineering problems. GE credit: SE, VL. Effective: 2003 Spring Quarter.

ENG 006—Engineering Problem Solving (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better); (MAT 016B C- or better (can be concurrent) or MAT 017B C- or better (can be concurrent) or MAT 021B C- or better (can be concurrent)). Methodology for solving engineering problems. Engineering computing and visualization based on MATLAB. Engineering examples and applications. GE credit: QL, SE. Effective: 2013 Spring Quarter.

ENG 008—Introduction to Entrepreneurship (3)

Lecture—3 hour(s). Students from all majors will learn the processes involved in modern entrepreneurship and identify an opportunity for innovation. The 3 C's of the entrepreneurial mindset (developed by KEEN) will be covered: Curiosity, Connections, and Creating Values. GE credit: SS. Effective: 2018 Fall Quarter.

ENG 010—The Science Behind the Technology in Our Lives (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): High school algebra. Understanding of how the technology in our lives works using only basic concepts and rudimentary mathematics. GE credit: SE, SS. Effective: 2001 Fall Quarter.

ENG 011A—Issues in Engineering (1)

Lecture—1 hour(s). Prerequisite(s): Consent of Instructor. Engineering profession and its role in society; engineering design and development process; introduction to the engineering grand challenges; and professional resources for students. (P/NP grading only.) GE credit: SE. Effective: 2019 Spring Quarter.

ENG 011B—Issues in Engineering (1)

Lecture—1 hour(s). Prerequisite(s): Consent of Instructor. Engineering disciplines; the engineering profession's methods, principles, and career opportunities; professional resources for students. No credit for students who have completed ENG 001. (P/NP grading only.) GE credit: SE. Effective: 2019 Spring Quarter.

ENG 017—Circuits I (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 021C; C- or better recommended. Basic electric circuit analysis techniques, including electrical quantities and elements, resistive circuits, transient and steady-state responses of RLC circuits, sinusoidal excitation and phasors, and complex frequency and network functions. GE credit: SE, VL. Effective: 2018 Fall Quarter.

ENG 020—Introduction to Space Exploration: Understanding the Technological & Environmental Challenges to Our Exploration of the Solar System (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): High school level Algebra, Geometry, General Science (Physics and Chemistry). Introductory overview of the space environment. Discussion of space exploration technology including propulsion, orbital mechanics, and spacecraft engineering. GE credit: QL, SE, SL. Effective: 2014 Winter Quarter.

ENG 035—Statics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (PHY 009A C- or better or PHY 009HA C- or better); MAT 021D C- or better (can be concurrent). Force systems and equilibrium conditions with emphasis on engineering problems. GE credit: SE. Effective: 2018 Fall Quarter.

ENG 045—Properties of Materials (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (MAT 016C C- or better or MAT 021C C- or better); CHE 002A C- or better; PHY 009A C- or better. Introduction to the properties of engineering materials and their relation to the internal structure of materials. GE credit: SE. Effective: 2020 Winter Quarter.

ENG 045H—Honors Properties of Materials (1)

Discussion—1 hour(s). Prerequisite(s): ENG 045 (can be concurrent) or ENG 045Y (can be concurrent); Enrollment in the Materials Science and Engineering Honors Program; ENG 045 or ENG 045Y required concurrently. Open only to students in the Materials Science and Engineering Honors Program. Examination of special materials science and engineering topics through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2018 Spring Quarter.

ENG 045Y—Properties of Materials (4)

Web Virtual Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (MAT 016C C- or better or MAT 021C C- or better); CHE 002A C- or better; PHY 009A C- or better. Introduction to the properties of engineering materials and their relation to the internal structure of materials. GE credit: SE. Effective: 2020 Winter Quarter.

ENG 080—Launching a Company (3)

Lecture—3 hour(s). Prerequisite(s): ENG 008; or Consent of Instructor. Technological innovation and product development. Working as a team to turn ideas into companies through customer development. No credit for students that have previously completed ENG 002. GE credit: SE, SS. Effective: 2020 Spring Quarter.

ENG 098—Directed Group Study (1-4)

Variable. Restricted to College of Engineering students only. May be repeated up to 3 time(s) when content differs. (P/NP grading only.) Effective: 2001 Spring Quarter.

ENG 100—Electronic Circuits & Systems (3)

Laboratory—3 hour(s); Lecture—2 hour(s). Prerequisite(s): ENG 017; C- or better recommended. Introduction to analog and digital circuit and system design through hands on laboratory design projects. Students who have completed EEC 100 may receive only 1.5 units of credit. GE credit: SE, VL. Effective: 2014 Spring Quarter.

ENG 102—Dynamics (4) *Review all entries*

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better. Open to College of Engineering students only. Kinematics and kinetics of particles, systems of particles, and of rigid bodies; application of these topics are applied to engineering problems. Only 2 units of credit allowed to students who have previously taken ENG 036. GE credit: SE, VL. Effective: 2017 Fall Quarter.

ENG 102—Dynamics (4) *Review all entries*

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 035 C- or better; (MAT 022B C- or better or MAT 027B C- or better). Open to College of Engineering students only. Kinematics and kinetics of particles, systems of particles, and of rigid bodies; application of these topics are applied to engineering problems. Only 2 units of credit allowed to students who have previously taken ENG 036. GE credit: SE, VL. Effective: 2020 Fall Quarter.

ENG 103—Fluid Mechanics (4) *Review all entries*

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 035 C- or better; PHY 009B C- or better; (MAT 022B C- or better or MAT 027B C- or better). Open to students in the College of Engineering and Hydrology majors. Fluid properties, fluid statics, continuity and linear momentum equations for control volumes, flow of incompressible fluids in pipes, dimensional analysis and boundary-layer flows. Not open for credit to students who have completed ECH 150A. GE credit: SE. Effective: 2020 Fall Quarter.

ENG 103—Fluid Mechanics (4) *Review all entries*

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better. Open to students in the College of Engineering and Hydrology majors. Fluid properties, fluid statics, continuity and linear momentum equations for control volumes, flow of incompressible fluids in pipes, dimensional analysis and boundary-layer flows. Not open for credit to students who have completed ECH 150A. GE credit: SE. Effective: 2018 Fall Quarter.

ENG 104—Mechanics of Materials (4)

Lecture—4 hour(s). Prerequisite(s): ENG 035 C- or better; (MAT 022B C- or better or MAT 027B C- or better). Open to Engineering majors only. Uniaxial loading and deformation. General concepts of stress-strain-temperature relations and yield criteria. Torsion of shafts. Bending of beams. Deflections due to bending. Introduction to stability and buckling. GE credit: QL, SE. Effective: 2020 Winter Quarter.

ENG 104L—Mechanics of Materials Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): ENG 104. Experiments which illustrate the basic principles and verify the analysis procedures used in the mechanics of materials are performed using the basic tools and techniques of experimental stress analysis. GE credit: SE. Effective: 1997 Winter Quarter.

ENG 105—Thermodynamics (4) *Review all entries*

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): MAT 022B C- or better; PHY 009B C- or better. Open to College of Engineering students only. Fundamentals of thermodynamics: heat energy and work, properties of pure substances, First and Second Law for closed and open systems, reversibility, entropy, thermodynamic temperature scales. Applications of thermodynamics to engineering systems. May be taught abroad. GE credit: SE, VL. Effective: 2017 Fall Quarter.

ENG 105—Thermodynamics (4) *Review all entries*

Lecture—4 hour(s); Discussion—1 hour(s). Prerequisite(s): PHY 009B C- or better; (MAT 022B C- or better or MAT 027B C- or better). Open to College of Engineering students only. Fundamentals of thermodynamics: heat energy and work, properties of pure substances, First and Second Law for closed and open systems, reversibility, entropy, thermodynamic temperature scales. Applications of thermodynamics to engineering systems. May be taught abroad. GE credit: SE, VL. Effective: 2020 Fall Quarter.

ENG 106—Engineering Economics (3)

Lecture—3 hour(s). Prerequisite(s): Upper division standing in Engineering. The analysis of problems in engineering economy; the selection of alternatives; replacement decisions. Compounding, tax, origins and cost of capital, economic life, and risk and uncertainty are applied to methods of selecting most economic alternatives. GE credit: QL, SE, SL, SS, VL. Effective: 1997 Winter Quarter.

ENG 111—Electric Machinery Fundamentals (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 017 C- or better. Principles of AC and DC electric motors and generators, their control systems and power sources. Selection of electric power equipment components based on their construction features and performance characteristics. GE credit: QL, SE, SL, VL. Effective: 2017 Winter Quarter.

ENG 121—Fluid Power Actuators & Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better. Hydraulic and pneumatic systems with emphasis on analysis and control of actuators. Design of hydraulic and pneumatic systems, specification and sizing of components, and selection of electro-hydraulics/electro-pneumatics, servo valves, and closed loop systems to solve basic control problems. GE credit: QL, SE, SL, VL, WE. Effective: 2011 Fall Quarter.

ENG 122—Introduction to Mechanical Vibrations (4)

Lecture—4 hour(s). Prerequisite(s): ENG 102 C- or better; (ENG 006 C- or better or ENG 005 C- or better or ECS 030 C- or better); Ability to program in MATLAB. Free and forced vibrations in lumped-parameter systems with and without damping; vibrations in coupled systems; electromechanical analogs; use of energy conservation principles. GE credit: SE. Effective: 2017 Fall Quarter.

ENG 160—Environmental Physics & Society (3)

Lecture—3 hour(s). Prerequisite(s): (PHY 009D or PHY 010 or PHY 001B); MAT 016B; Or the equivalent of MAT 016B. Impact of humankind on the environment are discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications are considered. In the College of Engineering, students may receive only 1 unit of credit towards the Technical Electives requirement. (Same course as PHY 160.) GE credit: SE, SL. Effective: 1997 Winter Quarter.

ENG 180—Engineering Analysis (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better); (MAT 021D C- or better, MAT 022B C- or better). Solutions of systems of linear and nonlinear algebraic equations; approximation methods; solutions of ordinary differential equations; initial and boundary value problems; solutions of partial differential equations of Elliptic, parabolic, and hyperbolic types; Eigen value problems. GE credit: SE. Effective: 2013 Fall Quarter.

ENG 180—Engineering Analysis (4) *Review all entries*

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better or ECS 032A C- or better or ECS 036A C- or better); ((MAT 021D C- or better, (MAT 022B C- or better or MAT 027B C- or better)). Solutions of systems of linear and nonlinear algebraic equations; approximation methods; solutions of ordinary differential equations; initial and boundary value problems; solutions of partial differential equations of Elliptic, parabolic, and hyperbolic types; Eigen value problems. GE credit: SE. Effective: 2020 Summer Session 1.

ENG 188—Science & Technology of Sustainable Power Generation (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): PHY 007C or PHY 009C; upper division standing. Focus on scientific understanding and development of power generation that is the basis of modern society. Concentration on power generation methods that are sustainable, in particular, discussion of the most recent innovations. GE credit: SS. Effective: 2012 Fall Quarter.

ENG 190—Professional Responsibilities of Engineers (3)

Lecture—3 hour(s). Restricted to upper division students in the College of Engineering. Organization of the engineering profession; introduction to contracts, specifications, business law, patents, and liability; discussion of professional, ethical, societal, and political issues related to engineering. GE credit: SS. Effective: 2013 Winter Quarter.

ENG 198—Directed Group Study (1-5)

Directed group study. May be taught abroad. May be repeated up to 3 time(s) when content differs. (P/NP grading only.) GE credit: SE. Effective: 2001 Winter Quarter.

ENG 250—Technology Management (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Management of the engineering and technology activity. Functions of design, planning, production, marketing, sales, and maintenance. Technological product life cycle. Research and development activity. Project planning and organization. Manufacturing issues. Case studies. Effective: 1999 Spring Quarter.

ENH—Environmental Horticulture

Courses in ENH:

Questions pertaining to the following courses should be directed to the instructor or to the Plant Sciences Advising Office in 1224 Plant & Environmental Sciences Building; 530-752-7738.

ENH 001—Introduction to Environmental Horticulture/Urban Forestry (3)

Lecture—3 hour(s). Introduction to the use of plants to enhance the physical, visual and social environment, the use of ecological principles in developing sustainable, low maintenance landscape systems, and the career opportunities in these areas. GE credit: SE, SL. Effective: 2016 Winter Quarter.

ENH 006—Introduction to Environmental Plants (4)

Lecture—1 hour(s); Discussion—2 hour(s); Laboratory—3 hour(s). Classification, nomenclature and variation of environmental plants. The use of floral and vegetative characteristics and terminology to key unknown plants. Characteristics of plant groups and basics of climate, soils and plant selection. Identification of 150 common landscape plants. GE credit: SE, VL. Effective: 1999 Fall Quarter.

ENH 100—Urban Forestry (4)

Lecture—2 hour(s); Laboratory—3 hour(s); Term Paper. Prerequisite(s): ENH 001 or PLS 002 or BIS 002B. Principles and practices of planning and managing urban vegetation. Basics of tree appraisal, natural resource inventory, and development of long term urban forest management plans. GE credit: SE. Effective: 2017 Winter Quarter.

ENH 101—Trees of the Urban Forest (2)

Lecture—1 hour(s); Laboratory—2 hour(s). Prerequisite(s): ENH 006; or Consent of Instructor. Identification and evaluation of 200 tree species of the urban forest on campus, in the Arboretum, and in the city of Davis; appraised and aesthetic values, condition, and branch structure; contribution of trees to this ecosystem. Bicycle required. GE credit: SE, VL. Effective: 2004 Fall Quarter.

ENH 102—Physiological Principles in Environmental Horticulture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 001C. Physiological principles and processes essential to floriculture, nursery crop production, turf culture and landscape horticulture. Emphasis on the control of vegetative and reproductive development for a broad species range in greenhouse and extensive landscape environments. GE credit: SE. Effective: 1997 Winter Quarter.

ENH 105—Taxonomy & Ecology of Environmental Plant Families (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): ENH 006; or Consent of Instructor. Classification and identification of introduced and native species used in urban forests, with emphasis on floral and vegetative characteristics of the prominent families of angiosperms and gymnosperms, adaptations to environmental variations in western landscapes, and horticultural classification. GE credit: SE, VL. Effective: 1998 Spring Quarter.

ENH 120—Management of Container Media (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): SSC 010 or SSC 100. Principles of soil science and practices related to management of container media are taught, emphasizing appropriate use of soils and amendments, irrigation, and fertilizers. Physical and chemical properties are tested and effects of management on crops are evaluated in the laboratory. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

ENH 125—Greenhouse & Nursery Crop Production (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): PLS 002 or BIS 002C. Principles and techniques for the production of ornamental greenhouse and nursery crops. Hands-on experience producing greenhouse crops. Optional weekend field trip. GE credit: SE, WE. Effective: 2017 Winter Quarter.

ENH 133—Woody Plants in the Landscape: Growth, Ecology & Management (4)

Lecture—3 hour(s); Laboratory—2 hour(s); Discussion—1 hour(s). Prerequisite(s): PLS 002 or BIS 002C. Principles and practices of managing trees and shrubs in the urban landscape and other managed environments. Topics include woody plant form; growth response and adaptation; tree management in relation to soil, moisture, climate; plant problems. GE credit: SE. Effective: 2017 Winter Quarter.

ENH 150—Genetics & Plant Conservation: The Biodiversity Crisis (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): BIS 001C; Or the equivalent. Conservation of genic diversity, measurement of diversity, threats to diversity and reasons for protection, the process of extinction, distribution of diversity, determination of what to conserve and means of conservation. Examples drawn largely from forest tree species. GE credit: SE, SL. Effective: 1998 Winter Quarter.

ENH 160—Restoration Ecology (4)

Lecture/Discussion—3 hour(s); Project (Term Project). Prerequisite(s): PLB 117 or EVE 117 or PLS 147; or equivalent course in ecology/plant ecology. Broad, interdisciplinary approach to effective restoration. Design and implementation of restoration projects based on principles of physiology, population, community, ecosystem and landscape ecology. GE credit: SE, SL. Effective: 2020 Spring Quarter.

ENH 160L—Restoration Ecology Laboratory (1)

Discussion/Laboratory—3 hour(s). Prerequisite(s): ENH 160 (can be concurrent); and Consent of Instructor. Companion field course to ENH 160. Series of part-day and all day visits to various field sites, involving site evaluations, guest field presentations by local restorationists, and actual restoration activities. Not open for credit to students who completed ENH 160 prior to spring 2004. GE credit: SE, SL. Effective: 2004 Spring Quarter.

ENL—English

Courses in ENL:**ENL 003—Introduction to Literature (4)**

Lecture/Discussion—4 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introductory study of several genres of English literature, emphasizing both analysis of particular works and the range of forms and styles in English prose and poetry. Frequent writing assignments will be made. GE credit: AH, WE. Effective: 2012 Winter Quarter.

ENL 003A—Writers' Workshop (2)

Discussion/Laboratory—2 hour(s). Concurrent enrollment in a lower division writing course required, preferably ENL 003; if necessary, based upon demand and academic advisor approval, students may concurrently enroll in an equivalent course instead; e.g., UWP 001 or NAS 005. Focuses on the development of writing and revision strategies, exploring ways to understand a writing task; to develop appropriate content for a writing task; to revise content to reflect competence as a communicator. Effective: 2018 Fall Quarter.

ENL 004—Critical Inquiry & Literature: Freshman Seminar (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Completion of Entry Level Writing Requirement (ELWR). Enrollment limited to freshmen. Critical inquiry into significant literary texts. Emphasis on close reading, classroom dialogue, and the writing of several papers or a longer seminar paper. GE credit: AH, WE. Effective: 2017 Winter Quarter.

ENL 005F—Introduction to Creative Writing: Fiction (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Elementary principles of writing fiction. Write both in prescribed forms and in experimental forms of their own choosing. No final examination. May be repeated up to 1 time(s). GE credit: AH, WE. Effective: 2014 Winter Quarter.

ENL 005NF—Introduction to Creative Writing: Non-Fiction (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Elementary principles of writing creative non-fiction. Work in prescribed literary forms (such as essay, meditation, biography, memoir, book review, documentary, or experimental non-fiction forms) and forms of students' choosing. No final examination. May be repeated up to 1 time(s) when instructor differs. GE credit: AH, WE. Effective: 2015 Fall Quarter.

ENL 005P—Introduction to Creative Writing: Poetry (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Elementary principles of writing poetry. Write both in prescribed forms and in experimental forms of their own choosing. No final examination. May be repeated up to 1 time(s). GE credit: AH. Effective: 2014 Winter Quarter.

ENL 010A—Literatures in English I: To 1700 (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Historical introduction to English language and literature from 800-1700. Linguistic borrowing, innovation, and change. Emergence of key literary genres. Colonial America as a new site of English literary production and consumption. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 010B—Literatures in English II: 1700-1900 (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Historical introduction to English language and literature from 1700-1900. Linguistic borrowing, innovation, colonization, and change. Emergence and development of key literary genres. America, Britain, Ireland, Scotland, and India as important sites of English literary production and consumption. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 010C—Literatures in English III: 1900 to Present (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Historical introduction to English language and literature from 1900-present. Linguistic borrowing, innovation, and change. Emergence and development of key literary genres. Formal experimentation. Modernism as transnational phenomenon. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 040—Introductory Topics in Literature (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Study of a special topic. Literature written in English in any period or place or genre. Thematic, formal, or temporal focus. May be repeated up to 2 time(s) when content differs. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 041—Introductory Topics in Literature & Media (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or equivalent. Study of a topic centered on the relationships between literature and moving-image media. May be repeated up to 2 time(s) when content differs. GE credit: AH, VL, WE. Effective: 2018 Spring Quarter.

ENL 042—Approaches to Reading (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or equivalent. Close reading and interpretation of literature from a variety of traditional and contemporary approaches. Topics include traditional textual and historical approaches; new criticism; formalism; psychological criticism; feminism and gender; reader-response; materialist approaches. Frequent written assignments. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 043—Introductory Topics in Drama (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Close reading of, and topics relating to selected works of British and American drama from a range of historical periods. May be repeated up to 2 time(s) when content differs. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 044—Introductory Topics in Fiction (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or equivalent. Close reading of, and topics relating to, British and American Fiction: short stories, novellas, novels. May be repeated up to 2 time(s) when content differs. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 045—Introductory Topics in Poetry (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or equivalent. Topical study and close reading of selections from English and American poetry. May be repeated up to 2 time(s) when content differs. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 051—Hot Bars, Supreme Lyrics, & Rhymes for Days: Hip Hop as Poetry (3)

Lecture/Discussion—3 hour(s). Literary approaches to hip hop as poetry. Formal examination of rap lyrics in relation to technology, visual expression, dance, and knowledge production. Historical and cultural consideration of race, ethnicity, gender, urban culture, and politics. GE credit: ACGH, AH, DD. Effective: 2018 Winter Quarter.

ENL 052—Pop Culture Shakespeare (3)

Lecture/Discussion—3 hour(s). Critical approaches to the study of Shakespeare's afterlife in contemporary American media. Focus on visual, audio, and kinesthetic modes of analysis and presentation. Relation of Shakespeare to contemporary society, politics, media, and economics. GE credit: AH, DD, VL. Effective: 2018 Winter Quarter.

ENL 053—Youth in Revolt (3)

Lecture/Discussion—3 hour(s). American literary and cultural representations of adolescence as a time of rebellious refusals and wild behaviors in relation to questions of gender and sexuality, psychological states, economic pressures, racial inequality, and methods of discipline and punishment. GE credit: AH, DD. Effective: 2019 Winter Quarter.

ENL 072—Introduction to Games (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Introduction to the history, theory, and practice of play. Survey of both analog and digital games. Overview of gaming cultures, aesthetics, industries, and technologies. (Same course as CDM 072.) GE credit: AH, VL. Effective: 2017 Fall Quarter.

ENL 092—Internship in English (1-12)

Internship—3-36 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; and Consent of Instructor. Internships in fields where students can practice their skills. May be taught abroad. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2018 Winter Quarter.

ENL 098—Directed Group Study (1-5)

Variable. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; and Consent of Instructor. (P/NP grading only.) Effective: 2018 Winter Quarter.

ENL 098F—Student Facilitated Course (1-4)

Variable—1-4 hour(s). Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Consent of Instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Effective: 2018 Spring Quarter.

ENL 099—Special Study for Undergraduates (1-5)

(P/NP grading only.) Effective: 1997 Winter Quarter.

ENL 100F—Creative Writing: Fiction (4)

Discussion—4 hour(s). Prerequisite(s): ENL 005F or ENL 005P; ENL 005NF; and Consent of Instructor. Priority given to English (Creative Writing) majors. Writing of fiction. No final examination. May be repeated for credit with consent of instructor. Effective: 2017 Winter Quarter.

ENL 100FA—Creative Writing Advanced Fiction (4)

Discussion—4 hour(s). Prerequisite(s): ENL 100F. Priority given to English majors; admission by application only. Development and evaluation of students' work in prose, primarily in the workshop format. Some reading and discussion of published novels and short stories. Conferences with individual students once per quarter. May be repeated up to 1 time(s) with consent of instructor. Effective: 2011 Fall Quarter.

ENL 100NF—Creative Writing: Non-Fiction (4)

Discussion—4 hour(s). Prerequisite(s): ENL 005F or ENL 005P or ENL 005NF; and Consent of Instructor. Priority given to English (Creative Writing) majors. Writing of non-fiction. No final examination. May be repeated for credit with consent of instructor. Effective: 2017 Winter Quarter.

ENL 100P—Creative Writing: Poetry (4)

Discussion—4 hour(s). Prerequisite(s): ENL 005F or ENL 005P or ENL 005NF; and Consent of Instructor. Priority given to English (Creative Writing) majors. Writing of poetry. May be repeated for credit with consent of instructor. Effective: 2007 Winter Quarter.

ENL 100PA—Creative Writing Advanced Poetry (4)

Discussion—4 hour(s). Prerequisite(s): ENL 100P. Priority to English majors; admission by application only. Development and evaluation of students' work in poetry, primarily in the workshop format. Some reading and discussion of published works of poetry. Conferences with individual students once per quarter. May be repeated up to 1 time(s) with consent of instructor. Effective: 2011 Fall Quarter.

ENL 105—History of the English Language (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or the equivalent. History of the English language. Examination of the language as recorded from Old English to present-day English. Relationship of English to other languages; development of vocabulary, phonology, and grammatical patterns. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 106—English Grammar (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENL 003 or LIN 001 or UWP 001 or UWP 001V or UWP 001Y; or Consent of Instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as LIN 106, UWP 106.) GE credit: AH. Effective: 2018 Winter Quarter.

ENL 106P—English Grammar Practicum (2)

Discussion—2 hour(s). Prerequisite(s): ENL 106; LIN 106 (can be concurrent). Practice in teaching the principles of grammar to the kinds of audiences teachers encounter in California. Discussions with teachers who teach in these areas. Examination of pedagogical research on teaching grammar. (P/NP grading only.) Effective: 2000 Fall Quarter.

ENL 107—Freedom of Expression (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or the equivalent. Historical development of fundamental issues and contemporary controversies about freedom of expression, with emphasis on literary and artistic censorship. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 110A—Introduction to Literary Theory (4)

Lecture/Discussion—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Key theoretical terms, concepts, and thinkers from the Greeks to the modern era. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 110B—Introduction to Modern Literary & Critical Theory (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. History of literary criticism in the modern era, with emphasis on the ties with the past and the special problems presented by modern literary theory. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 111—Topics in Medieval Literature (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused intensive examination of selected topics in Medieval British literature. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 113A—Chaucer: Troilus & the "Minor" Poems (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Development of the poet's artistry and ideas from his first work to his masterpiece, "Troilus and Criseyde." GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 113B—Chaucer: The Canterbury Tales (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Literary analysis of the complete "Canterbury Tales." Courtly love, literary forms, medieval science and astrology, theology and dogma as they inform the reading of Chaucer's work. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

ENL 115—Topics in 16th- & 17th-Century Literature (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Historically or thematically focused study of works of the Renaissance. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 117—Shakespeare (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Historically, generically, or thematically focused study of Shakespeare's works. May be repeated up to 2 time(s) when content differs. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

ENL 120—Law & Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically, thematically, or generically focused study of the relationship between law and literature. GE credit: ACGH, AH, DD, OL, WE. Effective: 2018 Spring Quarter.

ENL 122—Milton (4)

Lecture/Discussion—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Selected major works, including Paradise Lost. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

ENL 123—18th-Century British Literature (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Historically or thematically focused study of 18th-century English literature. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 125—Topics in Irish Literature (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Intensive study or treatment of special topics relating to the emergence, invention, and re-invention of Irish literature. May be repeated up to 2 time(s) when content differs. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 130—British Romantic Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of works of Romantic English literature. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 133—19th-Century British Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of works of 19th-century English literature. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 137—British Literature, 1900-1945 (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of works of British literature (drama, poetry, prose fiction) from the period between 1900 and the end of World War II. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 138—British Literature, 1945 to Present (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of works of British literature (drama, poetry, prose fiction) from the period between 1945 and the present. May be taught abroad. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 139—Topics in Global Literatures & Cultures (4)

Lecture—3 hour(s); Extensive Writing/Discussion. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Historically or regionally focused study of world literatures in English (other than the national literatures of British Isles and the United States), particularly from post-colonial regions in Africa, the Caribbean, and Asia, and immigrant cultures in the English-speaking world. May be repeated up to 2 time(s) when content differs. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 140—Topics in Postcolonial Literatures & Cultures (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Study of postcolonial literature of Anglophone colonies. Specific emphases may include literature from and about Anglophone India, the Caribbean, the Middle East, South Asia, Africa, and/or South America. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 141—Topics in Diasporic Literatures & Migration (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Study of literatures, histories, and cultures of one or more diasporic groups. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 142—Early American Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of American literature of the 17th and 18th centuries. GE credit: ACGH, AH, WE. Effective: 2018 Spring Quarter.

ENL 143—19th-Century American Literature to the Civil War (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of works of 19th-century American literature. GE credit: ACGH, AH, DD, WE. Effective: 2018 Spring Quarter.

ENL 144—Post-Civil War American Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of works of post-Civil War American literature. GE credit: ACGH, AH, WE. Effective: 2018 Spring Quarter.

ENL 146—American Literature 1900-1945 (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of American literature (drama, poetry, prose fiction) from the period between 1900 and the end of World War II. GE credit: ACGH, AH, DD, WE. Effective: 2018 Spring Quarter.

ENL 147—American Literature, 1945 to the Present (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Historically or thematically focused study of American literature (drama, poetry, prose fiction) from the period between 1945 and the present. GE credit: ACGH, AH, DD, WE. Effective: 2018 Spring Quarter.

ENL 149—Topics in Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Intensive examination of literature considered in topical terms, not necessarily historically. May be taught abroad. May be repeated for credit when content differs. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 150A—British Drama to 1800 (4)

Lecture/Discussion—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of works of English drama prior to 1800. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 150B—Drama from 1800 to the Present (4)

Lecture—3 hour(s); Extensive Writing/Discussion. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused study of works of British drama from 1800 to the present. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 153—Topics in Drama (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Historical or thematic study of drama. May be repeated for credit when topic differs. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 154—The Graphic Novel (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent courses. Thematically, historically, and formally focused study of the graphic novel genre. Contents may include any regional, national, or transnational group of graphic novels. GE credit: AH, VL, WE. Effective: 2018 Spring Quarter.

ENL 155A—18th-Century British Novel (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically organized examination of the 18th-century British novel, with particular emphasis on its evolution, including the epistolary novel, the picaresque novel, and the Gothic novel: Richardson, Fielding, Sterne, Austen. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 155B—19th-Century British Novel (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically organized examination of 19th-century British novelists, with emphasis on the historical novel, the social novel, and novels by women: Scott, Dickens, the Brontes, Eliot, Hardy. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 155C—20th-Century British Novel (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically organized examination of the 20th-century British novel, with emphasis on impressionism; the revolt against naturalism; the experimental novel; the anti-modernist reaction: Conrad, Joyce, Woolf, Lawrence, Drabble, Rhys. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 156—The Short Story (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. The short story as a genre; its historical development, techniques, and formal character as a literary form. European as well as American writers. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 157—Detective Fiction (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Historically, formally, and thematically focused study of novels and short stories in the detective fiction genre. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 158A—The American Novel to 1900 (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically organized examination of the rise and development of the American novel from its beginnings; Hawthorne, Melville, Twain, James, and others. GE credit: ACGH, AH, WE. Effective: 2018 Spring Quarter.

ENL 158B—The American Novel from 1900 to the Present (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically organized examination of important American novelists from 1900 to the present: authors may include Willa Cather, Nathanael West, William Faulkner, Ralph Ellison, Zora Neale Hurston, Thomas Pynchon, Ishmael Reed, Maria Helena Viramontes, Rachel Kushner, and others. GE credit: AH, DD, WE. Effective: 2018 Spring Quarter.

ENL 159—Topics in the Novel (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Examination of major novels arranged thematically. Topics might include Bildungsroman, stream-of-consciousness novel, Gothic novel, historical novel. May be repeated for credit when topic differs. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 160—Film as Narrative (4)

Lecture—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Study of modern film (1930 to present) as a storytelling medium. GE credit: AH, VL, WE. Effective: 2018 Spring Quarter.

ENL 161A—Film History I: Origins to 1945 (4)

Lecture—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Cultural and aesthetic history of film making from its origins in the 1890's through 1945. ENL 161A & ENL 161B need not be taken in sequence. GE credit: AH, VL, WE. Effective: 2018 Spring Quarter.

ENL 161B—Film History II: 1945 to present (4)

Lecture—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Cultural and aesthetic history of film making from its origins in the 1890's through 1945. ENL 161A & ENL 161B need not be taken in sequence. GE credit: AH, VL, WE. Effective: 2018 Spring Quarter.

ENL 162—Film Theory & Criticism (4)

Lecture—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Film theory and criticism, with a study of ten major works of international film art. GE credit: AH, VL, WE. Effective: 2018 Spring Quarter.

ENL 163—Literary Study in the British Isles (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Enrollment by application only through the Education Abroad Center. Literary Study in the British Isles: On-site study of the literature, film, and/or performance of the British Isles. Taught abroad. May be repeated up to 2 time(s) when subject differs. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 164—Writing Science (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003; STS 001; Or equivalent. Texts and writing practices in the production of scientific knowledge. Surveys the literary structure of scientific arguments; history of scientific genres; rhetoric and semiotics in scientific culture; graphical systems in the experimental laboratory; narratives of science, including science fiction. (Same course as STS 164.) GE credit: AH, SL, WE. Effective: 2006 Fall Quarter.

ENL 165—Topics in Poetry (4)

Lecture/Discussion—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): (ENL 003 or UWP 001 or UWP 001V or UWP 001Y); ENL 045. Intensive examination of various topics expressed in poetry from all periods of English and American literature. May be repeated for credit when topic covers different poets & poems. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 166—Love & Desire in Contemporary American Poetry (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Close reading of contemporary American poems on the theme of love and desire by poets of diverse ethnicities and of gay, lesbian, and heterosexual orientations. GE credit: ACGH, AH, WE. Effective: 2018 Winter Quarter.

ENL 167—20th-Century African American Poetry (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V; UWP 001Y; Or the equivalent. African American poetry in the 20th-century, including oral and literary traditions. Authors covered may include Gwendolyn Brooks, Countee Cullen, Robert Hayden, and Langston Hughes. GE credit: ACGH, AH, WE. Effective: 2018 Spring Quarter.

ENL 168—20th-Century American Poetry (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historical Study of American poetry since 1900, with thematic and formal focus at the instructor's discretion. GE credit: ACGH, AH, WE. Effective: 2018 Spring Quarter.

ENL 171A—The Bible as Literature: The Old Testament (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Selected readings from the Old Testament illustrating various literary forms. Emphasis on the Pentateuch, the Historical Books, and the Wisdom Books. May be taken independently of ENL 171B. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 171B—The Bible as Literature: Prophets & New Testament (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Selected readings from the Old Testament prophets and the New Testament. May be taken independently of ENL 171A. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 172—Video Games & Culture (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): TCS 001 or STS 001 or ENL 003; Or equivalent of any. Critical approaches to the study of video games, focusing on formal, historical, and cultural modes of analysis. History of software and hardware in North American and global contexts. Relations of games to society, politics, economics, literature, media, and the arts. (Same course as CTS 172, STS 172.) GE credit: ACGH, AH, SS, VL. Effective: 2014 Fall Quarter.

ENL 173—Science Fiction (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ENL 003 or STS 001; Or equivalent. Literary modes and methods of science fiction. Representative texts, authors, and themes of the genre—e.g., time travel, alternative universes, and utopias. Relations of science fiction to science, philosophy, and culture. (Same course as STS 173.) GE credit: AH, WE. Effective: 2008 Winter Quarter.

ENL 175—American Literary Humor (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or standing above freshman level. American humorous vision of man, nature, and the supernatural. Includes one or more of the following: colonial humor; southwestern and New England humor; pre- and post-Civil War masters; local colorists; journalistic gadflies; anti-provincialists; modernist poets and prose writers; black humor. GE credit: ACGH, AH, WE. Effective: 2018 Spring Quarter.

ENL 177—Study of an Individual Author (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 110A or ENL 110B. In-depth study of an author's works; historical context; relation to predecessors and contemporaries; critical reception; influence. May be repeated up to 1 time(s) when author differs. GE credit: AH, WE. Effective: 2010 Fall Quarter.

ENL 178—Topics in Nations, Regions, & Other Cultural Geographies (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Literary productions of a local, regional, national, transnational, or other geographical formation; e.g., the global South; literature of Hawaii; literature of Australia. May be repeated up to 2 time(s) when topic differs. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 179—Multi-Ethnic Literature of the United States (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or standing above freshman level. Writings by American authors of diverse races and ethnicities (African American, Asian, Jewish, Latin American, Native American, and mixed ancestry) clarifying the roles of story-telling and cultural heritage in constructing identity, experiencing displacement, recovering history, and cultivating an inclusive society. May be repeated up to 2 time(s). GE credit: ACGH, AH, DD, WE. Effective: 2018 Winter Quarter.

ENL 180—Children's Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Historical backgrounds and development of types of children's literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 181A—African American Literature to 1900 (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. African American literature from the colonial period to 1900. Particular attention to the rapid development of the African American literary culture from a primarily oral tradition to various literary genres, including the slave narrative. GE credit: ACGH, AH, DD, WE. Effective: 2018 Winter Quarter.

ENL 181B—African American Literature 1900-Present (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Major African American writers in the context of cultural history from 1900 to the present. Writers may include Richard Wright, Ann Petry, James Baldwin, Ralph Ellison, Paule Marshall, Toni Morrison, Alice Walker, Clarence Major. GE credit: ACGH, AH, DD, WE. Effective: 2018 Spring Quarter.

ENL 182—Literature of California (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Focus is on the diverse contributions to the rise of California literature. Reading of poetry, fiction, and essays. Emphasis on 19th- and 20th-century naturalists, turn of the century novelists, the Beats, and writers of the last two decades. GE credit: ACGH, AH, DD, WE. Effective: 2018 Spring Quarter.

ENL 183—Young Adult Literature (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Theoretical, critical, and literary issues informing the study and teaching of American young adult literature. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 184—Literature & the Environment (4)

Discussion/Laboratory—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Historical and/or thematic survey of topics in writing about the environment. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 185A—Women's Writing I (4)

Lecture/Discussion—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Women's Writing in English before 1800; organized by period, place, genre, or theme. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 185B—Women's Writing II (4)

Lecture/Discussion—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Women's Writing in English from 1800 to 1900; organized by period, place, genre, or theme. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 185C—Women's Writing III (4)

Lecture/Discussion—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Women's Writing in English after 1900; organized by period, place, genre, or theme. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 186—Literature, Sexuality, & Gender (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused intensive examinations of gender and sexuality in British and American literature. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 187A—Topics in Literature & Media (4)

Seminar—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): ENL 110A or ENL 110B; and Consent of Instructor. Group study of a topic centered on the relationships between literature and film or other moving-image media. Effective: 2009 Fall Quarter.

ENL 188A—Topics in Literary & Critical Theory (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ENL 110A or ENL 110B; and Consent of Instructor. Intensive examination of theories addressing a particular problem, topic, or question. Effective: 2009 Fall Quarter.

ENL 189—Seminar in Literary Studies (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ENL 110A or ENL 110B. Intensive, focused study of literature at an advanced level. May be organized by topic, author, period, movement, or genre. High participation. GE credit: AH, WE. Effective: 2013 Fall Quarter.

ENL 192—Internship in English (1-12)

Internship—3-36 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y. Internships in fields where students can practice their skills. A maximum of 4 units is allowed toward the major in English. May be taught abroad. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2018 Winter Quarter.

ENL 194H—Seminar for Honors Students (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ENL 110A or ENL 110B; One advanced study course; admission to English Department Senior Honors Program in Literature, Criticism, and Theory. Limited enrollment. Preparation for writing an honors thesis in ENL 195H. High level of participation expected. GE credit: AH, WE. Effective: 2010 Fall Quarter.

ENL 195H—Honors Thesis (4)

Independent Study—12 hour(s). Prerequisite(s): ENL 194H. Preparation of a thesis, under the supervision of an instructor. Students satisfying requirements for the general major or the teaching emphasis write on a scholarly or critical subject; creative writing students submit a volume of poems or fiction. GE credit: AH, WE. Effective: 1997 Winter Quarter.

ENL 197T—Tutoring in English (1-5)

Tutorial. Prerequisite(s): Upper division standing and consent of Chairperson. Leading of small voluntary discussion groups designed to develop reading and writing skills and affiliated with one of the university's regular courses. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 2019 Winter Quarter.

ENL 197TC—Community Tutoring in English (1-4)

Tutorial—1-4 hour(s). Prerequisite(s): Upper division standing and a major in English; consent of Chairperson. Field experience, with individuals or in classroom in instruction of English language, literature, and composition. Does not fulfill requirement for major. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ENL 198—Directed Group Study (1-5)

Variable. Prerequisite(s): ENL 003 or ENL 005F or ENL 005P or UWP 001 or UWP 001V or UWP 001Y. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 2018 Winter Quarter.

ENL 198F—Student Facilitated Course (1-4)

Variable—1-4 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Consent of Instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Effective: 2018 Spring Quarter.

ENL 198S—Directed Group Study (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ENL 163S (can be concurrent); and Consent of Instructor. ENL 163S required concurrently. Group study closely tied to the texts and periods studied in ENL 163S. Investigations of historical sites, museums, galleries, and performances. May be taught abroad in London. (P/NP grading only.) Effective: 2002 Winter Quarter.

ENL 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ENL 199FA—Student Facilitated Course Development (1-4)

Variable—1-4 hour(s). Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Consent of Instructor. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 098F/198F. (P/NP grading only.) Effective: 2018 Winter Quarter.

ENL 200—Introduction to Graduate Studies in English (4)

Seminar—3 hour(s); Term Paper/Discussion—1 hour(s). Prerequisite(s): Graduate standing. Introduction to literary scholarship with special attention to the elements of professionalism and to different modes of literary investigation. (S/U grading only.) Effective: 2000 Fall Quarter.

ENL 205—Anglo-Saxon Language & Culture (4)

Lecture—3 hour(s); Term Paper/Discussion. The language and culture of Anglo-Saxon England; readings in Old English prose and poetry. (S/U grading only.) Effective: 1997 Winter Quarter.

ENL 206—Beowulf (4)

Discussion—3 hour(s); Conference; Term Paper/Discussion. Prerequisite(s): ENL 205; Or the equivalent. A study of the poem and the Heroic Age of Germanic literature. Effective: 1997 Winter Quarter.

ENL 207—Middle English (4)

Discussion—3 hour(s); Term Paper. Study of the phonology, morphology, syntax, and lexicon between 1100 and 1500 with investigation of the regional dialects; pertinent facts on both the internal and external linguistic history; intensive reading of texts. Effective: 1997 Winter Quarter.

ENL 210—Readings in English & American Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Upper division course in area studied. Content varies according to specialty of instructor. May be repeated for credit when topic differs. Effective: 2005 Winter Quarter.

ENL 225—Topics in Irish Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Graduate standing. Varied topics, including the 19th-century novel, contemporary Irish poetry, rise of the drama, or a study of a major author. May be repeated for credit when topic differs. Effective: 2004 Fall Quarter.

ENL 230—Study of a Major Writer (4)

Seminar—3 hour(s); Conference—1 hour(s). Artistic development of one major writer and his intellectual and literary milieu. May be repeated for credit when writer differs. Effective: 1997 Winter Quarter.

ENL 232—Problems in English Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Selected issues in the current study and critical assessment of a limited period or topic in English literature. May be repeated for credit when period or topic differs. Effective: 1997 Winter Quarter.

ENL 233—Problems in American Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Selected topics for intensive investigation. May be repeated for credit when period or topic differs. Effective: 1997 Winter Quarter.

ENL 234—Dramatic Literature (4)

Lecture—3 hour(s); Conference—1 hour(s). Historical introduction to dramatic theory; the genres of tragedy, comedy, and tragicomedy. May be repeated for credit when content differs. Effective: 2004 Fall Quarter.

ENL 235—Theory of Fiction (4)

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Graduate standing. Theories of fiction as they relate to the professional writer's practice of the craft. For students in the Creative Writing Program. May be repeated for credit when content differs. Effective: 1998 Spring Quarter.

ENL 236—Poetics (4) *Review all entries*

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Graduate standing. Theories of poetry as revealed in structure, prosody, and idiom of British and American poems, variably approached-through intensive study of a single poet, historically, or theoretically-at the instructor's discretion. For students in the Creative Writing Program. May be repeated for credit when content differs. Effective: 1998 Spring Quarter.

ENL 236—Poetics (4) *Review all entries Discontinued*

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Graduate standing. Theories of poetry as revealed in structure, prosody, and idiom of British and American poems, variably approached-through intensive study of a single poet, historically, or theoretically-at the instructor's discretion. For students in the Creative Writing Program. May be repeated for credit when content differs. Effective: 2020 Fall Quarter.

ENL 237—Seminar for Writers (4)

Seminar—3 hour(s); Extensive Writing. Prerequisite(s): Graduate standing. Varied topics in the study of literature and literary culture craft and poetics from the perspective of the writer/practitioner. May be repeated up to 2 time(s) when focus differs. Effective: 2015 Fall Quarter.

ENL 238—Special Topics in Literary Theory (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): ENL 237; Or the equivalent. Advanced topics in literary theory and criticism. Preparation and evaluation of research paper. May be repeated for credit when topic and/or reading list differs. Effective: 1997 Winter Quarter.

ENL 240—Medieval Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies of Medieval literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1998 Fall Quarter.

ENL 242—16th-Century Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in 16th-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 244—Shakespeare (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in Shakespeare. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1998 Fall Quarter.

ENL 246—17th-Century Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in 17th-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 248—18th-Century Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in 18th-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 250—Romantic Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in Romantic literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 252—Victorian Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in Victorian literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 254—20th-Century British Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in 20th-century British literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 256—Early American Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in Early American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 258—American Literature: 1800 to the Civil War (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in American literature from 1800 to Civil War. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 260—American Literature: Civil War to 1914 (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in American literature from the Civil War to 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ENL 262—American Literature after 1914 (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in American literature after 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1998 Fall Quarter.

ENL 264—Studies in Modern British & American Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in modern British and American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic differs. Effective: 1998 Fall Quarter.

ENL 270—Studies in Contemporary World Literature (4)

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Graduate standing, consent of instructor, with preference given to those enrolled in the masters program in Creative Writing. Emerging global, international or transnational techniques, theories, and individual works of contemporary world prose or poetry. Discussion, seminar reports, research papers. May be repeated for credit when topic differs. Effective: 1998 Spring Quarter.

ENL 275—Proseminar in Research Practices (2)

Lecture/Discussion—2 hour(s). Must have passed Departmental Preliminary Exam. Study of various practical and technical skills needed to perform research in literary studies. Materials to be selected by the instructor. Evaluation based on student projects that involve hands-on application of skills taught in the proseminar. May be repeated for credit when content differs. Effective: 2016 Fall Quarter.

ENL 280—Seminar in Research Practices (4)

Lecture/Discussion—3 hour(s); Project (Term Project). Must have passed Departmental Preliminary Exam. Study of various practical and technical skills needed to perform research in literary studies. Course materials to be selected by the instructor. Evaluation based on student projects that involve hands-on application of skills taught in the seminar. May be repeated for credit when content differs. Effective: 2016 Fall Quarter.

ENL 285—Literature by Women (4)

Seminar—3 hour(s); Conference—1 hour(s). Studies in literature by women and the theoretical approaches to literature by women. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when topic and/or reading list differs. Effective: 1997 Winter Quarter.

ENL 287—Topics in Literature & Media (4)

Seminar—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): Graduate standing. Study of a topic centered on film or other moving-image media. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit when content differs. Effective: 2009 Fall Quarter.

ENL 288—Prospectus Workshop (2)

Conference—2 hour(s). Must have passed Departmental Preliminary Exam. Training in writing the dissertation prospectus. Participation in group discussions of preparatory assignments and final proposal. (S/U grading only.) Effective: 2011 Fall Quarter.

ENL 289—Article Writing Workshop (2)

Conference—2 hour(s). Prerequisite(s): Consent of Instructor. Limited to 12 students; nomination for admission by Dissertation Director. Training in preparing an article for publication. Participation in group discussions of article drafts. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2011 Fall Quarter.

ENL 290—Creative Writing: Special Topic (4)

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Consent of Instructor. Writing that falls outside the generic confines of traditional genres (fiction, poetry, and nonfiction) or traditional workshop formats. Evaluation of written materials and individual student conferences. May be repeated for credit. Effective: 2015 Fall Quarter.

ENL 290F—Creative Writing: Fiction (4)

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing, with preference given to those enrolled in master's program in Creative Writing. Writing of prose fiction. Evaluation of written materials and individual student conferences. May be repeated for credit. Effective: 2016 Winter Quarter.

ENL 290NF—Creative Writing: Non-Fiction (4)

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing; with preference given to those enrolled in the master's program in Creative Writing. Writing of literary non-fiction, with emphasis on autobiography, biography, memoir, the occasional or nature essay, or other non-fiction prose narratives. May be repeated for credit. Effective: 2016 Winter Quarter.

ENL 290P—Creative Writing: Poetry (4)

Seminar—3 hour(s); Conference—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing, with preference given to those enrolled in master's program in Creative Writing. Writing of poetry. Evaluation of written materials and individual student conferences. May be repeated for credit. Effective: 2016 Winter Quarter.

ENL 298—Directed Group Study (1-5)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ENL 299—Individual Study (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ENL 299D—Special Study for the Doctoral Dissertation (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ENL 391—Teaching Creative Writing (2)

Discussion—2 hour(s). Prerequisite(s): Graduate standing; appointment as Teaching Assistant in the English Department. Designed for new instructors of ENL 005F or ENL 005P; discussion of ways to facilitate creative writing workshops and to respond to student manuscripts. (S/U grading only.) Effective: 2007 Winter Quarter.

ENL 393—Teaching Literature & Composition (2)

Discussion—2 hour(s). Prerequisite(s): Graduate standing; appointment as Teaching Assistant in the English Department. Designed for new instructors of ENL 003 or the equivalent courses; discussion of problems related to teaching literature and composition to lower division students. (S/U grading only.) Effective: 2007 Winter Quarter.

ENL 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ENM—Endocrinology & Metabolism

Courses in ENM:

ENM 192—Internship in Endocrinology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in endocrinology. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

ENM 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Endocrinology research. (S/U grading only.) Effective: 1997 Winter Quarter.

ENM 460—Endocrinology Clinical Clerkship (3-18)

Clinical Activity. Prerequisite(s): IMD 430; And/or consent of instructor. Limited enrollment. Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders. (H/P/F grading only.) Effective: 1997 Winter Quarter.

ENM 465—Clinical Nutrition Clerkship (3-18)

Clinical Activity—30 hour(s). Prerequisite(s): IMD 430; Consent of IOR. In-depth experience in assessment and monitoring of nutritional support of patients whose illnesses are complicated by malnutrition and of patients with problems in under-nutrition due to various illnesses. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

ENM 480—Insights in Endocrinology (1-3)

Clinical Activity—3-9 hour(s). Prerequisite(s): Consent of Instructor. Student in good academic standing. First- or second-year students observe in morning Endocrine and Diabetes clinics; attend bi-weekly noon and afternoon endocrine conferences. Present brief endocrine physiology oral presentation to the endocrine group. (H/P/F grading only.) Effective: 1997 Winter Quarter.

ENM 499—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

ENT—Entomology

Courses in ENT:

ENT 001—Art, Science & the World of Insects (3)

Lecture—3 hour(s); Laboratory—3 hour(s). Fusion of entomology and art to create an appreciation of insect biology, ecology, interactions with humans and importance in human culture. Multidisciplinary approaches in education and career paths in entomology and art will be highlighted. GE credit: AH, OL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.

ENT 002—Biodiversity (3)

Lecture—2 hour(s); Lecture/Discussion—1 hour(s). Introduction to nature, scope and geographical distribution of biodiversity (diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity; domestication, aesthetics, ethics and valuation. Species richness and "success." Biodiversity through time; monitoring, evaluation and conservation. Biomes-global, continental and Californian. (Same course as EVE 002.) GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 010—Natural History of Insects (3)

Lecture—3 hour(s). Introduction to the insects detailing their great variety, structures and functions, habits, and their significance in relation to plants and animals including man. Designed for students not specializing in entomology. Not open for credit to students who have had ENT 100, but students who have taken this course may take ENT 100 for credit. GE credit: SE, SL. Effective: 2013 Fall Quarter.

ENT 090X—Special Topics in Entomology (2)

Seminar—2 hour(s). Prerequisite(s): Consent of Instructor. Freshman seminar course for indepth examination of a special topic within the subject area. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 092—Internship (1-12)

Variable—3-36 hour(s). Prerequisite(s): Consent of Instructor. Work-learn experience on and off campus in all subject areas offered by the department, supervised by a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 099—Special Study for Undergraduates (1-5)

Effective: 2013 Fall Quarter.

ENT 100—General Entomology (4)

Lecture—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): BIS 002B; or Consent of Instructor. Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare. GE credit: WE. Effective: 2019 Winter Quarter.

ENT 100L—General Entomology Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): ENT 100 (can be concurrent). Anatomy, development, population ecology, methods of collecting, classification and identification of insects of all orders and of major families. GE credit: VL. Effective: 2013 Fall Quarter.

ENT 101—Functional Insect Morphology (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENT 100. Study of the basic external and internal structures, organs and tissues of insects, with emphasis on functional systems. Functional anatomy, histology and fine structures of important organs and tissues will be discussed. Effective: 2013 Fall Quarter.

ENT 102—Insect Physiology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ENT 100; Or course in physiology or invertebrate zoology. Processes by which insects maintain themselves, reproduce, and adapt to environment. Insects as models for basic/applied research through detailed analysis of metabolic, physiological, and behavioral processes. Emphasis on analysis of methodology, fact, and theory. GE credit: SE, WE. Effective: 2013 Fall Quarter.

ENT 103—Insects Systematics (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): Introductory course in zoology or entomology. Principles and methods of systematics, with particular reference to insects. Emphasis on different theories of classification, and analysis of phylogenetic relationships. Effective: 2013 Fall Quarter.

ENT 104—Behavioral Ecology of Insects (3)

Lecture—3 hour(s). Prerequisite(s): Introductory biology or zoology. Basic principles and mechanisms of insect behavior and ecology. An evolutionary approach to understanding behavioral ecology of insects. Effective: 2013 Fall Quarter.

ENT 105—Insect Ecology (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): BIS 002B (can be concurrent); or Consent of Instructor. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. GE credit: OL, SE, SL, WE. Effective: 2019 Spring Quarter.

ENT 107—California Insect Diversity (5)

Lecture—1 hour(s); Laboratory—6 hour(s); Fieldwork—6 hour(s). Prerequisite(s): An introductory course in entomology. Survey of the diversity of insects from selected ecological zones in California with emphasis on collection, identification, and natural history. GE credit: SE. Effective: 2013 Fall Quarter.

ENT 109—Field Taxonomy & Ecology (7)

Lecture—2 hour(s); Laboratory—36 hour(s). Prerequisite(s): An introductory course in entomology or consent of instructor. Study of insects in their natural habitats; their identification and ecology. GE credit: SE. Effective: 2013 Fall Quarter.

ENT 110—Arthropod Pest Management (5)

Lecture—3 hour(s); Laboratory—6 hour(s). Prerequisite(s): (STA 013 or STA 100 C- or better); BIS 002B C- or better; or Consent of Instructor. Sustainable management & ecology of arthropod pests in agricultural systems. Techniques for effective, management of arthropod pests via in-depth knowledge about pest biology, life strategies, spatial ecology, and food web functions. Lab & field trip exercises in applied research in pest management, ecology, and evolution using digital technologies (apps, remote sensing, cloud-based decision support). GE credit: SE, WE. Effective: 2020 Winter Quarter.

ENT 116—Freshwater Macroinvertebrates (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIS 002B; Or equivalent. Limited enrollment. Biology, ecology and taxonomy of freshwater macroinvertebrates, including insects, crustaceans, molluscs, worms, leeches, flatworms and others. Adaptations to life in freshwater. Aquatic food webs. Uses of macroinvertebrates in water quality monitoring. Field trips during regular lab hours. GE credit: SE, SL. Effective: 2013 Fall Quarter.

ENT 116L—Aquatic Insect Collection (2)

Laboratory—4 hour(s); Fieldwork—2 hour(s). Prerequisite(s): ENT 100L or ENT 116 (can be concurrent); Or prior experience with insect/arthropod identification to Family level. Restricted to 25 students. Collection of aquatic insects and identification to the Family level. Collections will require two, one-day weekend field trips (by arrangement). Collection requirement is 40 Families. Effective: 2016 Fall Quarter.

ENT 117—Longevity (4)

Lecture—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): Upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as HDE 117.) GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 119—Apiculture (3)

Lecture—3 hour(s). Biology and behavior of honeybees; communication, orientation, social organization, foraging activities, honey production, pollination activities. GE credit: OL, SE, VL, WE. Effective: 2016 Fall Quarter.

ENT 123—Plant-Virus-Vector Interaction (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as PLB 123, PLP 123.) GE credit: SE, SL, WE. Effective: 2014 Winter Quarter.

ENT 135—Introduction to Biological Control (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ENT 100 or ENT 110. Effective: 2013 Fall Quarter.

ENT 153—Medical Entomology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; BIS 002B; or Consent of Instructor. Upper division standing in one of the biological sciences. Basic biology and classification of medically important arthropods with special emphasis on the ecology of arthropodborne diseases and principles of their control. Relationships of arthropods to human health. GE credit: SE, SL, WE. Effective: 2019 Winter Quarter.

ENT 156—Biology of Parasitism (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): BIS 002A; or Consent of Instructor. Lectures on the biological and ecological aspects affecting host-parasite relationships using selected examples from protozoan and metazoan fauna. GE credit: SE. Effective: 2019 Spring Quarter.

ENT 156L—Biology of Parasitism Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): ENT 156 (can be concurrent); ENT 156 required concurrently or consent of instructor. Laboratory demonstrations using selected examples of protozoan and metazoan organisms along with various techniques used in parasitology to exemplify concepts presented in the lecture course. GE credit: SE. Effective: 2013 Fall Quarter.

ENT 158—Forensic Entomology (3)

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): ENT 100; or Consent of Instructor. Upper division standing. Arthropods, their general biology, succession, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods, development of reasoning abilities, implication, development of opinions and evidence. GE credit: WE. Effective: 2019 Winter Quarter.

ENT 180A—Experimental Ecology & Evolution in the Field (4)

Lecture/Lab—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): EVE 100 (can be concurrent); (ENT 105 (can be concurrent) or ESP 100 (can be concurrent) or EVE 101 (can be concurrent)); Due to the unusual nature of this course, all prospective students are strongly encouraged to contact the instructor. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180A.) GE credit: QL, SE, VL. Effective: 2019 Winter Quarter.

ENT 180B—Experimental Ecology & Evolution in the Field (4)

Lecture/Lab—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): EVE 180A or ENT 180A. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180B.) GE credit: QL, SE, VL, WE. Effective: 2019 Spring Quarter.

ENT 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Laboratory experience or fieldwork off and on campus in all subject areas offered in the Department of Entomology. Internships supervised by a member of the faculty. (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 197T—Tutoring in Entomology (1-3)

Discussion—1-3 hour(s). Leading small discussion groups. Preview assignments and prepare guidelines for discussion. (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 212—Molecular Biology of Insects & Insect Viruses (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Molecular biological analysis of insect systematics, physiology, and defense mechanisms. Molecular biology of insect viruses. Baculovirus expression vectors and post-translation modification of expressed polypeptides. Biological control of using neuropeptides and toxin genes in insect viruses. Effective: 2013 Fall Quarter.

ENT 214—Vector-borne Infectious Diseases: Changing Patterns (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Open to graduate students, MPVM and MPH students, DVM and medical students with second- or third-year standing. Open to upper division undergraduate students with consent of instructor(s). Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. (Same course as PMI 214.) Effective: 2013 Fall Quarter.

ENT 225—Terrestrial Field Ecology (4)

Seminar—1 hour(s); Fieldwork—12 hour(s). Prerequisite(s): Introductory ecology and introductory statistics or consent of instructor. Field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results are stressed. (Same course as ECL 225, PBG 225.) Effective: 2013 Fall Quarter.

ENT 230—Advanced Biological Control (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): Graduate or upper division standing in biological science or consent of instructor. Principles and current issues in biological control of arthropod pests and weeds; laboratory devoted to identification and life history of the major groups of parasitic and predaceous arthropods. Effective: 2013 Fall Quarter.

ENT 253—Advanced Medical Entomology (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): One upper division ENT course (other than ENT 153) and one course in Microbiology; ENT 153 strongly recommended. An analysis of several arthropod-borne human diseases with emphasis on the relationships of the biology of the vector to the ecology of the disease. Discussion includes demonstration of vectors and techniques. Effective: 2013 Fall Quarter.

ENT 290—Exploratory Topics in Entomology (2)

Seminar—2 hour(s). Interdisciplinary topics in entomology, including innovative applications of entomological concepts to other fields of research and human endeavor (e.g. medicine, technology, art, criminology). May be repeated up to 8 unit(s) when topic differs. Effective: 2013 Fall Quarter.

ENT 291—Current Topics in Medical & Veterinary Entomology (2)

Seminar—2 hour(s). Prerequisite(s): ENT 153. Discussions of parasitology, ecology and epidemiology related to vectors of pathogens causing disease in humans and animals. May be repeated up to 1 time(s). Effective: 2013 Fall Quarter.

ENT 292—Current Topics in Insect Physiology & Behavior (2)

Seminar—2 hour(s). Prerequisite(s): ENT 102 if topic is physiology, a course in behavior if topic is behavior, or either if topic bridges both. Analysis of contemporary advances in insect physiology, biochemistry and/or behavior. Interpretation and description of physiological and behavioral mechanisms and functions. Application of general principles to solution of problems in the laboratory and field. May be repeated up to 8 unit(s) when topic differs. Effective: 2013 Fall Quarter.

ENT 293N—Current Topics in Insect Biotechnology & Genomics (2)

Seminar—2 hour(s). Prerequisite(s): ENT 212. Discussion of advances in insect biotechnology, including genetic engineering and genomics. May be repeated up to 6 unit(s) when topic differs. Effective: 2013 Fall Quarter.

ENT 294—Current Topics in Insect Ecology, Evolution, & Systematics (2)

Seminar—2 hour(s). Prerequisite(s): ENT 103; General course in ecology or evolution. Discussions of advanced topics in ecology, evolution and systematics with emphasis on analysis of factors influencing the distribution, abundance, adaptations and evolutionary relationships of insects. Includes consideration of applications of basic theory; e.g. biological control. May be repeated up to 8 unit(s) when topic differs. Effective: 2013 Fall Quarter.

ENT 295—Current Topics in Agricultural Entomology & Bee Biology (2)

Seminar—2 hour(s). Prerequisite(s): ENT 110 if topic relates to pests and beneficial predators; ENT 119 if topic is bee biology; either if topic bridges both. Discussion of advanced topics about the biology, ecology, behavior, and management of pest and beneficial insects. May be repeated up to 8 unit(s) when topic differs. Effective: 2013 Fall Quarter.

ENT 297N—Seminar in Entomology (1)

Seminar—1 hour(s). Weekly Entomology seminar. May be repeated up to 9 unit(s) when topic differs. (S/U grading only.) Effective: 2013 Summer Quarter.

ENT 298—Group Study (1-5)

Variable. (S/U grading only.) Effective: 2013 Fall Quarter.

ENT 299—Research (1-12)

Variable. (S/U grading only.) Effective: 2013 Fall Quarter.

ENV—Environmental Policy & Management

Courses in ENV:

ENV 200A—Analysis of Environmental Management & Policy (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing. Introduction to rational decision making for public policy problems. Modeling natural/human system interactions, data gathering and hypothesis testing. Predicting outcomes of policy options. Effective: 2017 Fall Quarter.

ENV 200B—Environmental Policy Evaluation (4)

Lecture—2 hour(s); Discussion—1 hour(s); Seminar—2 hour(s). Restricted to Graduate Standing. Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems. (Same course as ECL 212B, ESP 212B.) Effective: 2020 Winter Quarter.

ENV 200C—Environmental Policy Process (4)

Lecture—3 hour(s); Discussion—1 hour(s). Restricted to Graduate Standing. Introduction to selected theories of the policy process and applications to the field of environmental policy. Develops critical reading skills, understanding of policy theory, and an ability to apply multiple theories to the same phenomena. (Same course as ECL 212A, ESP 212A.) Effective: 2020 Winter Quarter.

ENV 201—Environmental Law (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing. Roles of legislatures, agencies, and courts in creating and interpreting law; legal strategies for addressing environmental problems; major environmental statutes; and the relationship between federal and state/local legal authority. Effective: 2018 Spring Quarter.

ENV 202—Strategies of Environmental Administration & Management (4)

Lecture—4 hour(s). Bureaucracy and public management, organizational theory, analysis of environmental management by US agencies, NGOs, and business. Overview of natural resource management, analyzes the strengths and limitations of different administrative approaches. Effective: 2017 Fall Quarter.

ENV 203—Environmental Policy Clinic (4)

Laboratory—4 hour(s). Prerequisite(s): Graduate standing. Teams of students analyze an environmental policy problem from scientific, legal, and economic perspectives. Hands-on learning partnering with rotating clients. May be repeated up to 1 time(s) in winter once and spring once. Effective: 2018 Winter Quarter.

ENV 292—Graduate Internship (1-12)

Internship—1-12 hour(s). Prerequisite(s): Consent of Instructor. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

ENV 296—Environmental Policy & Management Practicum (2-6)

Internship—0.5 hour(s). Prerequisite(s): Consent of Instructor. Practicum experience integrating coursework into an applied professional setting. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

ENV 297—Professional Development Seminar (1)

Seminar—1.5 hour(s). Prerequisite(s): Graduate standing. Weekly seminar inviting policy and management professionals to come and discuss their challenges and achievements. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2020 Spring Quarter.

ENV 298—Group Study (1-5)

Variable—1-5 hour(s). Group Study. May be repeated for credit when topic differs. Effective: 2020 Fall Quarter.

ENV 299—Research (1-12)

Variable—1-12 hour(s). Individual study under the direction of a faculty member. May be repeated for credit. (S/U grading only.) Effective: 2020 Spring Quarter.

EPI—Epidemiology

Courses in EPI:

EPI 202—Quantitative Epidemiology I: Probability (5)

Lecture—4 hour(s); Laboratory—2 hour(s). Prerequisite(s): ((MAT 016A, MAT 016B) or (MAT 017A, MAT 017B) or (MAT 021A, MAT 021B)); STA 102; STA 108; or PHR 402 & PHR 403 or equivalent of any listed course; concurrent or previous enrollment in a basic epidemiology course (e.g., EPI 205). Foundations in probability for epidemiologists. Emphasis on properties of and relationships between distributions and application of probability concepts to epidemiology. Includes a mathematical skills laboratory to assist in solution of epidemiologic problems. Effective: 2013 Fall Quarter.

EPI 203—Quantitative Epidemiology II: Statistical Inference (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): (EPI 202 or STA 130A or STA 131A or STA 133); EPI 205; A basic epidemiology course (EPI 205 or equivalent). Provides the mathematical statistics foundation for statistical models, methods, and data analysis. Effective: 2014 Winter Quarter.

EPI 204—Quantitative Epidemiology III: Statistical Models (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): (EPI 203 or STA 130B or STA 131B or STA 133); EPI 205; STA 108 recommended; a basic epidemiology course (EPI 205 or equivalent); consent of instructor. Introduces statistical models, methods, and data analysis in the areas of generalized linear model and survival analysis methodology. Effective: 2014 Spring Quarter.

EPI 204A—Foundation of Statistical Models, Methods, & Data Analysis for Scientists (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): STA 130A or STA 131A or STA 133; EPI 228 recommended. Provides the mathematical statistics foundation for statistical models, methods, and data analysis. Effective: 2006 Winter Quarter.

EPI 204B—Statistical Models, Methods, & Data Analysis for Scientists (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): EPI 204A; STA 108 recommended. Introduces statistical models, methods, and data analysis in the areas of generalized linear, survival, and correlated data methodology. Effective: 2006 Winter Quarter.

EPI 205—Principles of Epidemiology (4)

Lecture—4 hour(s). Prerequisite(s): MPM 202; or Consent of Instructor. An introductory statistics course. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as MPM 205.) Effective: 2017 Winter Quarter.

EPI 205B—Integration of Epidemiologic Concepts (2)

Discussion—2 hour(s). In-depth analysis and integration of basic epidemiologic concepts and approaches to epidemiologic research presented in MPM 405/EPI 205A, with more mathematical and theoretical basis and examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of diagnostic tests, study design, and surveillance. Effective: 1999 Fall Quarter.

EPI 206—Epidemiologic Study Design (4)

Lecture—30 hour(s); Discussion—9 hour(s); Laboratory—2 hour(s). Prerequisite(s): EPI 205; or Consent of Instructor. Builds on concepts presented in EPI 205. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in EPI 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as MPM 206.) Effective: 2014 Spring Quarter.

EPI 207—Advanced Epidemiologic Methodology (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): EPI 206. In-depth integration of advanced epidemiological concepts. Theory, methods, and applications for observational studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity, estimability, and interpretation of effect measures, and advanced study designs. (Same course as SPH 207.) Effective: 2016 Winter Quarter.

EPI 208—Analysis & Interpretation of Epidemiologic Data (3)

Lecture—16 hour(s); Laboratory—21 hour(s); Project (Term Project). Prerequisite(s): EPI 204 (can be concurrent); EPI 207; (STA 144 or PHR 202); And entry level skill in standard statistical software (eg. SPSS, BMDP, SAS, Stata, MinTab, S-Plus). Application of theory and concepts of statistics and epidemiology to analysis and interpretation of data typically found in veterinary and human epidemiologic research. Effective: 2001 Spring Quarter.

EPI 209—History of Epidemiology in Public Health (2)

Lecture—0.5 hour(s); Discussion—1.5 hour(s). Introduction to the history of epidemiology in solving major public health problems. Original historical articles will be read/discussed. Topics may include: infectious disease, accidents/adverse events, nutritional deficiencies, community vaccination trials, occupational exposures, cancer, birth defects, cardiovascular disease, and smoking. (Same course as SPH 209.) Effective: 2014 Fall Quarter.

EPI 220—Problems in Epidemiologic Study Design (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): MPM 405; STA 102; STA 106; or the equivalent; MPM 406 or the equivalent; PHR 207 required concurrently. Design and development of research protocols and funding applications for peer review. Application of research methods data collection and management and statistical analysis in research proposals. Methods of evaluating research proposals, mechanisms of funding, specifying human subjects considerations. Effective: 1997 Winter Quarter.

EPI 222—Epidemiological Modeling (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): MPM 405. Techniques of model building and simulation of infectious diseases will be explored. Epidemiologic modeling philosophy, construction and validation will be emphasized. Effective: 1997 Winter Quarter.

EPI 223—Spatial Epidemiology (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): EPI 205A or MPM 205. Geographic Information Systems (GIS) and spatial statistics. Students are expected to complete a term project based on their graduate research. Effective: 1997 Winter Quarter.

EPI 224—Health & Ecological Risk Analysis (4)

Lecture—2 hour(s); Laboratory—4 hour(s). Methodological approach to risk analysis for human and animal-related health and ecological issues. Basic principles of risk analysis, including perception, communication, assessment and management. Emphasis on the assessment of risk. Effective: 2017 Winter Quarter.

EPI 225—Advanced Topics in Epidemiology Methods (2)

Discussion—2 hour(s). Prerequisite(s): EPI 205B; EPI 206; EPI 207; Or equivalents, with consent of instructor. An in-depth study of topics in epidemiology theory and methods, selected from: causal inference, confounding, study design, or other related areas, with year to year variation. Readings are assigned and students are expected to lead discussions on them. May be repeated for credit when topic differs. Effective: 2006 Winter Quarter.

EPI 226—Methods for Longitudinal & Repeated Measurement Data (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): EPI 204; or Consent of Instructor. Mixed models for longitudinal data (LD)/repeated measurements; Mean and covariance models; General linear LD models; Random coefficients models; Linear mixed effects models for continuous outcome; Generalized linear mixed effects model for discrete outcome including binary, ordinal and count data. Effective: 2009 Fall Quarter.

EPI 227—Meta Analysis (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): A course in basic statistics or consent of instructor. Systematic review, standard and advanced statistical methods for meta-analysis and syntheses of knowledge and evidence. Quantitative analysis of published data, primarily in aggregate form. Students demonstrate skills in study design, protocol, analysis, and results reporting through presentation of drafted first author paper. Effective: 2018 Fall Quarter.

EPI 229—Geographic Information Systems for Health Professionals (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Emphasis on basic geographic and data management principles. Focus on software proficiency in application to analyzing/solving health-related problems. For graduate and professional students in epidemiology, public health, preventive veterinary medicine, health informatics with interest in spatial techniques in research. Effective: 2010 Spring Quarter.

EPI 230—Introduction to Molecular Epidemiology (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): EPI 205. Overview of the modern field of molecular epidemiology. Integrates molecular biology into traditional epidemiologic research by identifying pathways, molecules and genes that influence the risk of developing disease. Effective: 2014 Fall Quarter.

EPI 231—Infectious Disease Epidemiology (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): Introductory epidemiology course (e.g., EPI 205). Infectious disease epidemiology and prevention, with emphasis on human and veterinary diseases of global health importance. Major global health epidemics and challenges of infectious diseases, by mode of transmission. Effective: 2017 Spring Quarter.

EPI 232—Advanced Data Analysis with SAS (3)

Lecture—3 hour(s). Prerequisite(s): EPI 202; EPI 203; EPI 204; or the equivalent, or Consent of Instructor. Provide an overview of common advanced statistical methods as well as a treatment of how to use SAS to implement them. Learn the ideas of reproducible research and reporting of statistical analyses. Effective: 2017 Winter Quarter.

EPI 240—Principles of Injury Epidemiology (3)

Lecture/Discussion—3 hour(s). Overview of the epidemiology of human injury, including general principles, surveillance methods, behavioral factors, environmental factors, treatment issues and engineering and legal interventions related to vehicular injuries, drownings, falls, fires and burns, poisonings, firearm injuries, and other intentional injuries. Effective: 1997 Winter Quarter.

EPI 242—Critical Thinking in Epidemiology (3)

Discussion—3 hour(s). Prerequisite(s): EPI 205 B or better; EPI 206 B or better; EPI 207 (can be concurrent). Open to Epidemiology Graduate Group students or advanced medical students only; limited to 15 students. Critical thinking in epidemiology. Effective: 2018 Fall Quarter.

EPI 251—Environmental Epidemiology (3)

Lecture—3 hour(s). Prerequisite(s): MPM 405 (can be concurrent); Upper division undergraduates who have completed EST 126; or the equivalent. Examination of the human health effects and the risk of disease from community, occupational, and personal exposure to toxic substances. Effective: 1997 Winter Quarter.

EPI 252—Social Epidemiology (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): EPI 205A; and Consent of Instructor. Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. (Same course as SPH 252.) Effective: 2009 Spring Quarter.

EPI 260—Epidemiology of Chronic Diseases & Aging (3)

Lecture/Discussion—3 hour(s). Overview of the epidemiology of chronic disease in old age. Topics include biology of aging, epidemiology of cardiovascular disease, neoplasms, osteoporosis and fractures, psychosocial factors and health in old age, dementias, functional status and prevention of disease. Effective: 1997 Winter Quarter.

EPI 270—Research Methods in Occupational Epidemiology (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): (EPI 205A or MPM 205); (MPM 202 or STA 102). Methods used in epidemiologic research on occupational hazards. Topics include design and analysis of cohort and case-control studies, sample size, measuring dose, choosing a control group, validation of employment and health data, interpreting negative studies, and analysis software. Effective: 1997 Winter Quarter.

EPI 272—Cancer Epidemiology (2)

Recitation—1 hour(s); Discussion—1 hour(s). Prerequisite(s): EPI 205A; EPI 205B; EPI 206 (can be concurrent); STA 102; must have basic understanding of epidemiologic and statistical concepts covered in the listed courses. We will cover the underlying concepts essential to understanding cancer epidemiology, such as trends in incidence and survival, epidemiologic methods used to assess cancer etiology, prevention and control, and an introduction to the cancer initiation and progression multi-stage model. Effective: 2005 Winter Quarter.

EPI 277—Mathematical Models in Epidemiology (3)

Lecture/Discussion—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): MPM 403; MPM 405; and Consent of Instructor. Although not required, students encouraged to refresh their knowledge of high school calculus and differential equations. Limited to 30 students. Theory of epidemics and mathematical modeling concepts for infectious diseases to include discrete and continuous time models, their use to explore disease dynamics and investigate prevention and control strategies for human and veterinary infectious diseases. (Same course as PHR 277.) Effective: 2013 Fall Quarter.

EPI 280—Introduction to SAS Programming (3)

Lecture—2 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): Introductory statistics course (e.g., MPM 402, STA 102). Introduction to SAS, an integrated software system for data retrieval and management, data manipulation and programming. (Same course as SPH 280.) Effective: 2016 Fall Quarter.

EPI 290—Seminars in Epidemiology (0.5)

Seminar—0.5 hour(s). Faculty and students will present and lead discussion of ongoing or published epidemiologic research. (S/U grading only.) Effective: 2015 Winter Quarter.

EPI 291—Seminars in Human Health Services Research & Clinical Epidemiology (1)

Seminar—1 hour(s). Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as GMD 291.) (S/U grading only.) Effective: 1998 Fall Quarter.

EPI 298—Group Study (1-5)

Seminar—1-5 hour(s). Group study in selected areas of epidemiology. Effective: 1997 Winter Quarter.

EPI 299—Research (1-12)

Variable. Research in selected areas of epidemiology. (S/U grading only.) Effective: 1997 Winter Quarter.

ESM—Environmental Science & Management

Courses in ESM:

ESM 008—Water Quality at Risk (3)

Lecture—2 hour(s); Discussion—1 hour(s). Not open to students who have successfully completed ERS 008. (Formerly ERS 008.) Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination. (Same course as SAS 008.) GE credit: SE, SL, SS, WE. Effective: 2011 Fall Quarter.

ESM 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 098—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 098F—Student Facilitated Course Development (1-3)

Variable—1-3 hour(s). Prerequisite(s): Consent of Instructor. Student-facilitated (taught) course intended for lower division students. (P/NP grading only.) Effective: 2016 Winter Quarter.

ESM 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 100—Principles of Hydrologic Science (4)

Lecture—4 hour(s). Prerequisite(s): CHE 002B; MAT 016B; (PHY 007A or PHY 009A). Not open to students who have successfully completed ERS 100. (Formerly ERS 100.) Topics include hydrology (surface and ground water), hydraulic flow through porous media, water in the soil-plant-atmosphere continuum, water quality, flow through open channels, and representative water-resource problems. GE credit: QL, SE, SL. Effective: 2011 Fall Quarter.

ESM 108—Environmental Monitoring (3)

Lecture/Discussion—2 hour(s); Laboratory—2 hour(s); Fieldwork. Prerequisite(s): EVE 101; ESP 100; ETX 101; WFC 100; ERS 100; SSC 100; ENH 100; LDA 050; Or the equivalent for any of these courses. Not open to students who have successfully completed ERS 108. (Formerly ERS 108.) Instrumentation and methods for environmental and ecological monitoring; GPS, sensors, datalogging, and GIS. Wide range of measurement techniques for environmental parameters. GE credit: SE, SL. Effective: 2011 Fall Quarter.

ESM 110—Irrigation Systems & Water Management (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): PHY 007A; SSC 100 recommended. Soil and plant aspects of irrigation and drainage. Soil-water principles including water storage and movement, plant response to irrigation, water use by crops, irrigation systems (i.e., micro-irrigation, sprinkler irrigation and surface irrigation), and related salinity and water quality impacts. (Same course as ABT 110, HYD 110.) GE credit: SE, SL. Effective: 2020 Fall Quarter.

ESM 118—Evapotranspiration Principles, Measurement & Modeling (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): HYD 124 C or better; Consent of Instructor. Estimation of evapotranspiration (ET) for irrigation management and water resources planning; including the basic principles and key factors controlling evaporation and ET rates, methods of measuring these factors in the field and remotely, and determination of likely water requirements for crops and various landscape conditions as needed for water resources planning. (Same course as HYD 118.) GE credit: SE. Effective: 2019 Fall Quarter.

ESM 120—Global Environmental Interactions (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): One college level chemistry course; one college level biology course. Limited to 25 students per discussion section; not open to students who have successfully completed ERS 060 or 120. (Formerly ERS 060 & 120.) Relationships among climate, hydrology, biogeochemical cycles, soils and vegetation distribution in diverse landscapes and biomes. Emphasis on physical, chemical, and biological processes affecting ecosystems from the poles to the equator, and human impacts on the environment. Effective: 2010 Fall Quarter.

ESM 121—Water Science & Management (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): PHY 010 or GEL 001. Not open to students who have successfully completed ERS 121. (Formerly ERS 121.) Role of water as an essential natural resource in contemporary society. Aspects of the scientific method, including descriptions of natural phenomena and underlying physical causes. Water for cities, agriculture, industry, wildlife and recreation; case studies of water management. GE credit: QL, SE, SL. Effective: 2011 Fall Quarter.

ESM 131—Air as a Resource (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): (CHE 010 or CHE 002A); CHE 002B. Not open to students who have successfully completed ERS 131. (Formerly ERS 131.) Degradation of the atmospheric resource, historical aspects and effects of air pollution examined. Evaluation of primary gaseous and particulate pollutants and discussion of their impact. GE credit: QL, SE, SL. Effective: 2019 Winter Quarter.

ESM 141—Role of Fire in Natural Ecosystems (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): (BIS 002A or PLS 002); (BIS 002B or BIS 002C); Basic biological, ecology/evolution concepts. Not open to students who have successfully completed ERS 141. (Formerly ERS 141.) Fire regimes and roles in major North American vegetation types, especially in the west. Physics of fire, fire effects on organisms and ecosystem functioning, reconstructing fire histories, fire in resource management, and fire use by indigenous people. GE credit: SE, SL, WE. Effective: 2011 Fall Quarter.

ESM 144—Trees & Forests (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): PLS 002 or BIS 001C or BIS 002C. Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry. Not open for credit to students who have completed PLB 144 or ENH 144 or ERS 144. (Former PLB 144 or ENH 144 or ERS 144.) (Same course as PLS 144.) GE credit: SE, VL. Effective: 2011 Fall Quarter.

ESM 185—Aerial Photo Interpretation & Remote Sensing (4)

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): Upper division standing. Not open to students who have successfully completed ERS 185. (Formerly ERS 185.) Basics of remote sensing and photogrammetry, grids and map projections, aerial photo interpretation, sensors and platforms for aerial and space photography and non-photographic imaging systems, aerial thermography, microwave sensing, and introduction to remote sensing applications. Effective: 2011 Fall Quarter.

ESM 186—Environmental Remote Sensing (5)

Lecture—3 hour(s); Laboratory—6 hour(s). Prerequisite(s): MAT 016B; (PHY 007C or PHY 009B); Upper division standing; LDA 150 recommended. Not open to students who have successfully completed HYD 186 or ERS 186. (Formerly HYD 186 & formerly ERS 186.) Overview of satellite, airborne, and ground-based remote sensing, building on properties of electromagnetic radiation. Applications include hydrologic processes, weather and climate, ecology and land use, soils, geology, forestry, and agriculture. Computer based analysis and visualization of images and processing techniques. GE credit: QL, SE, VL. Effective: 2014 Winter Quarter.

ESM 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 194H—Senior Honor Thesis (2-6)

Independent Study—2-6 hour(s). Prerequisite(s): Senior standing, overall GPA of 3.50 or higher and consent of master advisor. Independent study, guided research on an environmentally related subject of special interest to the student. May be repeated for credit. GE credit: SE, WE. Effective: 2011 Fall Quarter.

ESM 195—Integrating Environmental Science & Management (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Consent of Instructor. Senior status in Environmental Science & Management major or other environmental science major (e.g. Environmental Resource Science; Environmental Biology & Management; Environmental Toxicology; Environmental Policy Analysis & Planning; Wildlife, Fish, & Conservation Biology; Hydrologic Science). Practical aspects of environmental improvement through integrated analyses of contemporary issues or problems associated with advocacy, regulation, science and resource management from the perspectives of the physical and ecological sciences and current policy/management. May be repeated up to 2 time(s). GE credit: SE, SS. Effective: 2011 Fall Quarter.

ESM 198—Directed Group Study (1-5)

Variable. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 198F—Student Facilitated Course (1-3)

Variable—1-3 hour(s). Prerequisite(s): Consent of Instructor. Restricted to upper division standing or consent of instructor. Student-facilitated (taught) course intended for upper division students. (P/NP grading only.) Effective: 2016 Spring Quarter.

ESM 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 199FA—Student Teaching Course Development (1-3)

Variable—1-3 hour(s). Prerequisite(s): Consent of Instructor. Restricted to upper division standing. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will teach under 098F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ESM 199FB—Student Teaching Course Development (1-3)

Variable—1-3 hour(s). Prerequisite(s): Consent of Instructor. Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ESP—Environmental Science & Policy

Courses in ESP:

ESP 001—Environmental Analysis (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): UWP 001 (can be concurrent) or UWP 001Y (can be concurrent) or UWP 001V (can be concurrent) or ENL 003 (can be concurrent); Or equivalent; sophomore standing; ECN 001A and BIS 002B recommended. Analysis of the physical, biological, and social interactions which constitute environmental problems. Emphasis on analysis of environmental problems, the consequences of proposed solutions, and the interaction of environmental science and public policy in creating solutions. GE credit: SE, SL, SS. Effective: 2018 Spring Quarter.

ESP 010—Current Issues in the Environment (3)

Lecture—3 hour(s). Prerequisite(s): Elementary biology recommended. Science behind environmental issues, and policies affecting our ability to solve domestic and international environmental problems. Resources, environmental quality, regulation, environmental perception and conservation. Integrative case studies. Not open for credit to students who have completed ESP 001. GE credit: SE, SL, SS, WE. Effective: 2004 Fall Quarter.

ESP 092—Internship (1-12)

Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the College of Agricultural & Environmental Sciences. Internship supervised by member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 100—General Ecology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); STA 013 recommended. Theoretical & experimental analysis of the distribution, growth & regulation of species populations; predator-prey & competitive interactions; and the organization of natural communities. Application of evolutionary & ecological principles to selected environmental problems. GE credit: SE, SL. Effective: 2020 Spring Quarter.

ESP 101—Ecology, Nature, & Society (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as ANT 101.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ESP 110—Principles of Environmental Science (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (PHY 001A or PHY 007A); (MAT 016B or MAT 017B or MAT 021B); BIS 002A or BIS 010 recommended; upper division standing. Application of physical and chemical principles, ecological concepts, and systems approach to policy analysis of atmospheric environments, freshwater and marine environments, land use, energy supplies and technology, and other resources. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ESP 111—Marine Environmental Issues (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes. May be repeated up to 2 time(s) when topic differs. (Same course as EVE 111.) GE credit: SE, SL. Effective: 2015 Summer Session 1.

ESP 116N—Oceanography (3)

Lecture—2 hour(s); Laboratory—3 hour(s); Fieldwork. Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 050. Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as GEL 116N.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

ESP 121—Population Ecology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002B; (MAT 016B or MAT 017B or MAT 021B or MAT 021BH). Development of exponential and logistic growth models for plant and animal populations, analysis of age structure and genetic structure, analysis of competition and predator-prey systems. Emphasis is on developing models and using them to make predictions and solve problems. GE credit: QL, SE, SL. Effective: 2020 Spring Quarter.

ESP 123—Introduction to Field & Laboratory Methods in Ecology (4) *Review all entries*

Lecture—2 hour(s); Laboratory—2 hour(s); Fieldwork—4 hour(s). Prerequisite(s): (ESP 100 or EVE 101); (STA 013 or STA 013Y or STA 100); or equivalent. Introduction to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis. GE credit: SE, SL. Effective: 2020 Fall Quarter.

ESP 123—Introduction to Field & Laboratory Methods in Ecology (4) *Review all entries*

Lecture—2 hour(s); Laboratory—2 hour(s); Fieldwork—4 hour(s). Prerequisite(s): (ESP 100 or EVE 101); STA 100; Or equivalent of EVE 101 and STA 100. Introduces students to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis. GE credit: SE, SL. Effective: 2015 Spring Quarter.

ESP 124—Marine & Coastal Field Ecology (3)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Upper division standing or consent of instructor. Introductory animal biology (BIS 001B) recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Ecology of marine populations and communities living in diverse habitats along the California coast. Hands-on learning using scientific process and tools of the biological trade to address ecological questions arising during field trips. Critical thinking through discussing scientific literature. GE credit: SE, SL. Effective: 2006 Summer Session 1.

ESP 127—Plant Conservation Biology (4)

Lecture/Discussion—3 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): ESP 100 or EVE 101; Or equivalent upper division general ecology. Principles governing the conservation of plant species and plant communities, including the roles of fire, exotic species, grazing, pollination, soils, and population genetics; analytic and practical techniques for plant conservation; and introduction to relevant legal, ethical, and policy issues. GE credit: SE, SL. Effective: 2016 Fall Quarter.

ESP 150A—Physical & Chemical Oceanography (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ESP 116N or GEL 116N); (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (CHE 002C or GEL 055); and Consent of Instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as GEL 150A.) GE credit: QL, SE. Effective: 2020 Winter Quarter.

ESP 150B—Geological Oceanography (3)

Lecture—3 hour(s). Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N). Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as GEL 150B.) GE credit: SE. Effective: 2017 Winter Quarter.

ESP 150C—Biological Oceanography (4)

Lecture—3 hour(s); Discussion—1 hour(s); Fieldwork. Prerequisite(s): BIS 002A; Consent of Instructor. A course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required. (Same course as GEL 150C.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

ESP 151—Limnology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002A; BIS 002B; (BIS 002C and ESP 100 or EVE 101 recommended.). Biology and productivity of inland waters with emphasis on the physical and chemical environment. GE credit: SE. Effective: 2017 Spring Quarter.

ESP 151L—Limnology Laboratory (3)

Laboratory—6 hour(s). Prerequisite(s): ESP 151 (can be concurrent); Junior, senior, or graduate standing. Limnological studies of lakes, streams, and reservoirs with interpretation of aquatic ecology. GE credit: SE. Effective: 1997 Winter Quarter.

ESP 152—Coastal Oceanography (3)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Upper division standing or consent of the instructor; physics (PHY 009B), calculus (MAT 021B) and exposure to physical and chemical oceanography (GEL 150A and ESP 150A) are recommended; residence at or near Bodega Marine Laboratory required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Oceanography of coastal waters, including bays, river plumes, nearshore and estuaries; focus on transport patterns, how they are forced and implications for ecological and environmental problems. Pertinent for students in oceanography, ecology, environmental engineering, geology and hydrology. GE credit: SE, SL. Effective: 2006 Summer Special Session.

ESP 155—Wetland Ecology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002A; Or equivalent of BIS 002A; ESP 100 or EVE 101 recommended. Introduction to wetland ecology. The structure and function of major wetland types and principles that are common to wetlands and that distinguish them from terrestrial and aquatic ecosystems. GE credit: SE. Effective: 2016 Fall Quarter.

ESP 155L—Wetland Ecology Laboratory (3)

Lecture—1 hour(s); Laboratory—6 hour(s); Fieldwork. Prerequisite(s): ESP 155 (can be concurrent). Modern and classic techniques in wetland field ecology. Emphasis on sampling procedures, vegetation analysis, laboratory analytical procedures, and examples of successful wetland restoration techniques. GE credit: SE, SL. Effective: 1997 Winter Quarter.

ESP 160—The Policy Process (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): POL 001; ECN 001A and STA 013 recommended. Alternative models of public policymaking and application to case studies in the U.S. and California. GE credit: SS. Effective: 2016 Fall Quarter.

ESP 161—Environmental Law (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Upper division standing; one course in environmental science or political science recommended. Introduction for non-Law School students to some of the principal issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA. GE credit: SS, WE. Effective: 2019 Fall Quarter.

ESP 162—Environmental Policy (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ECN 001A or ECN 001AV. Compares economic with socio-cultural approaches to understanding the causes of environmental problems and strategies for addressing them. Includes different approaches to the policy process, policy instruments, and environmental behavior. Applies these principles to several problems. GE credit: SS. Effective: 2018 Winter Quarter.

ESP 163—Energy & Environmental Aspects of Transportation (4) *Review all entries*

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ECI 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

ESP 163—Energy & Environmental Aspects of Transportation (4) *Review all entries*

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): Upper division standing in engineering or economics or environmental studies. Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ECI 163.) GE credit: SE, SL, SS, WE. Effective: 2020 Fall Quarter.

ESP 165—Climate Policy (3)

Lecture—3 hour(s). Prerequisite(s): ESP 001 or ECN 001A or ECN 001AV; or Consent of Instructor. Models, data and assumptions behind competing arguments regarding societal response to the prospect of climate change at the state, national and international level from economic, ethical and policy science perspectives. Effective: 2018 Spring Quarter.

ESP 166—Ocean & Coastal Policy (3)

Lecture—3 hour(s). Prerequisite(s): ESP 001; or Consent of Instructor. Limited enrollment. Overview of U.S. and International ocean and coastal policy, including energy, coastal land-use and water quality, protected areas and species. GE credit: SS. Effective: 2017 Spring Quarter.

ESP 167—Energy Policy (4)

Lecture—4 hour(s); Term Paper. Prerequisite(s): (ECN 001A or ECN 001AV); (MAT 016B or MAT 017B or MAT 021B); or Consent of Instructor. Survey of primary energy resources (fossil, renewable, nuclear), energy conversion methods, future energy demand scenarios, and environmental impacts of energy. Overview of energy policy in the U.S. Analysis of policy alternatives for addressing energy-related environmental and national security issues. GE credit: SS. Effective: 2018 Spring Quarter.

ESP 168A—Methods of Environmental Policy Evaluation (5)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): (ESP 001 or ESP 010); (STA 013 or STA 013Y or STA 100); (ECN 001A or ECN 001AV); ECN 100 recommended. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefit-cost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation. GE credit: SS. Effective: 2018 Summer Quarter.

ESP 168B—Methods of Environmental Policy Analysis (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ESP 168A. Continuation of ESP 168A. Emphasis on examination of the literature for applications of research & evaluation techniques to problems of transportation, air & water pollution, land use, and energy policy. GE credit: SS. Effective: 1997 Winter Quarter.

ESP 169—Water Policy & Politics (3)

Lecture—3 hour(s). Prerequisite(s): ECN 001A or POL 001 recommended. Governance of water, including issues of water pollution/quality and water supply. Politics of water decision-making and effectiveness of water policy. Broad focus on federal water policy, with case examples from nationally significant U.S. watersheds. GE credit: SS. Effective: 2016 Fall Quarter.

ESP 170—Conservation Biology Policy (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): One course in environmental science (e.g., ESP 001), conservation (e.g., WFC 011 or WFC 154), or government (e.g., POL 001) recommended. Analysis of policies designed to conserve species and their habitats. Emphasis on how individual incentives affect the success of conservation policies. Valuation of endangered species and biodiversity. Criteria for deciding conservation priorities. GE credit: SE, SS. Effective: 2016 Fall Quarter.

ESP 171—Urban & Regional Planning (4)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): ESP 001 recommended. How cities plan for growth in ways that minimize environmental harm. Standard city planning tools (general plan, zoning ordinance) and innovative new approaches. Focus on planning requirements and practices in California. Relationships between local, regional, state, and federal policy. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ESP 172—Public Lands Management (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): POL 001 and ECN 001A recommended. Investigation of alternative approaches to public lands management by Federal and state agencies. Role each agency's legislation plays in determining the range of resource allocations. GE credit: ACGH, SS. Effective: 2019 Spring Quarter.

ESP 173—Land Use & Growth Controls (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Upper division standing; one course in environmental policy. Exposes students to the economic, political, and legal factors affecting land use and growth controls, and helps students critically evaluate written materials in terms of their arguments and supporting data. May be taught abroad. GE credit: SS. Effective: 2016 Fall Quarter.

ESP 175—Natural Resource Economics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better. Pass One open to Managerial Economics (AMGE), Environmental Policy Analysis & Planning (AEPP) Majors, Agricultural & Resource Economics (GARE) Graduate Majors. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as ARE 175.) GE credit: SS. Effective: 2018 Fall Quarter.

ESP 178—Applied Research Methods (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): STA 103 or STA 100 or STA 108 or SOC 106 or ARE 106; Or the equivalent. Research methods for analysis of urban and regional land use, transportation, and environmental problems. Survey research and other data collection techniques; demographic analysis; basic forecasting, air quality, and transportation models. Collection, interpretation, and critical evaluation of data. GE credit: QL, SS. Effective: 2016 Fall Quarter.

ESP 179—Environmental Impact Assessment (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ESP 001; Or the equivalent. Introduction to the information resources and methods typically used in environmental impact analysis. Emphasis on how environmental information is applied to planning, environmental regulation, and public policymaking, with case studies from California land use and natural resource policy. GE credit: SS. Effective: 2016 Fall Quarter.

ESP 179L—Environmental Impact Reporting Using Geographic Information (2)

Discussion/Laboratory—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): ESP 179 (can be concurrent); ESP 179 required concurrently. Introduction to Geographic Information Systems (GIS) by using ArcView for assessment and environmental planning. Not open for credit to students who have completed ABT 180, ABT 181, or ASE 132. GE credit: SE. Effective: 2002 Fall Quarter.

ESP 190—Workshops on Environmental Problems (1-8)

Laboratory—2-16 hour(s). Prerequisite(s): Consent of Instructor. Open to all upper division and graduate students on application. Workshops featuring empirical analyses of contemporary environmental problems by multidisciplinary student teams. Guided by faculty and lay professionals, the teams seek to develop an integrated view of a problem and outline a series of alternative solutions. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ESP 191A—Workshop on Food System Sustainability (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): PLS 015; CRD 020; ARE 121; PLS 150; or Consent of Instructor. Upper division standing. Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. First in a two-quarter senior capstone course sequence. Identify projects addressing specific problems and opportunities of sustainable agriculture and food systems, form multidisciplinary teams, and identify and consult with key stakeholders to understand their needs and concerns. GE credit: SE. Effective: 2009 Fall Quarter.

ESP 191B—Workshop on Food System Sustainability (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): ESP 191A. Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. Continuation of ESP 191A. Teams conduct analyses of a specific issue in sustainable agriculture or food systems, prepare a critical assessment of technological, economic, environmental, and social dimensions of options for action and present their results to stakeholders. GE credit: SE. Effective: 2010 Winter Quarter.

ESP 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 197T—Tutoring in Environmental Science & Policy (1-5)

Tutorial—2-6 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Experience in teaching under guidance of faculty member. (P/NP grading only.) Effective: 2014 Winter Quarter.

ESP 198—Directed Group Study (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 212A—Environmental Policy Process (4)

Lecture—3 hour(s); Discussion—1 hour(s). Restricted to Graduate Standing. Introduction to selected theories of the policy process and applications to the field of environmental policy. Develops critical reading skills, understanding of policy theory, and an ability to apply multiple theories to the same phenomena. (Same course as ECL 212A, ENV 200C.) Effective: 2020 Winter Quarter.

ESP 212B—Environmental Policy Evaluation (4)

Lecture—2 hour(s); Discussion—1 hour(s); Seminar—2 hour(s). Restricted to Graduate Standing. Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems. (Same course as ECL 212B, ENV 200B.) Effective: 2020 Spring Semester.

ESP 220—Tropical Ecology (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): ESP 100; EVE 101; EVE 117; EVE 138 recommended. Open to graduate and undergraduate students who meet requirement subject to consent of instructor. An overview of present status of knowledge on structure and processes of major tropical ecosystems. Differences and similarities among tropical and temperate systems stressed. Effective: 1997 Winter Quarter.

ESP 228—Advanced Simulation Modeling (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): (STA 108 or ARE 106); (ESP 128 and ESP 128L). Advanced techniques in simulation modeling; optimization and simulation, dynamic parameter estimation, linear models, error propagation, and sensitivity testing. Latter half of course introduces model evaluation in ecological and social system models. Effective: 1997 Winter Quarter.

ESP 275—Economic Analysis of Resource & Environmental Policies (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): ARE 204 or ECN 204. Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as ARE 275.) Effective: 1999 Spring Quarter.

ESP 278—Research Methods in Environmental Policy (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): ARE 106; Or the equivalent. Introduction to scientific research in environmental policy. Major issues in the philosophy of the social sciences. How to design research that acknowledges theoretical assumptions and that is likely to produce evidence in an intersubjectively reliable fashion with explicit recognition of its uncertainties. Effective: 1998 Winter Quarter.

ESP 298—Directed Group Study (1-5)

Variable. Effective: 1997 Winter Quarter.

ESP 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ESP 396—Teaching Assistant Training Practicum (1-4)

Variable—3-12 hour(s). Prerequisite(s): Consent of Instructor. Open to graduate students only. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) Effective: 2017 Spring Quarter.

ETX—Environmental Toxicology

Courses in ETX:

ETX 010—Introduction to Environmental Toxicology (3)

Lecture—3 hour(s). Hazardous substances, their effects on humans and their actions and movement in the environment. Emphasis on substances of current concern. GE credit: SE, SL. Effective: 2000 Fall Quarter.

ETX 020—Introduction to Forensic Science (3)

Lecture—3 hour(s). Basic principles of forensic science, types of information on which investigations focus, how information is obtained and used in criminal investigations, types of scientific skills required to practice forensic science, guidance on training. Real cases discussed; demonstrations of methods provided. GE credit: SE, SL, VL. Effective: 2012 Spring Quarter.

ETX 030—Chemical & Drug Use & Abuse (3)

Lecture—3 hour(s). Overview of chemical use and abuse in our society. Effects of chemicals (therapeutic drugs, pesticides, food additives, herbal remedies, environmental contaminants, and recreational drugs) on humans and other living systems. GE credit: SE. Effective: 2006 Winter Quarter.

ETX 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the College of Agricultural & Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 101—Principles of Environmental Toxicology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); BIS 001A. Principles of toxicology with a focus on environmental, industrial, and natural chemicals. Topics include fate and effects of chemicals in organisms and the environment, air pollutants, insecticides, aquatic toxicology, endocrine disruptors, biomarkers and bioassays, and risk assessment. GE credit: SE, SL. Effective: 2003 Fall Quarter.

ETX 102A—Environmental Fate of Toxicants (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 008B or CHE 118B or CHE 128B; or Consent of Instructor. Properties of toxic chemicals influencing their distribution and transformations; action of environmental forces affecting toxicant breakdown, movement, and accumulation; sources and occurrence of major classes of environmental toxicants. Not open for credit to students who have completed ETX 112A. GE credit: QL, SE, SL, VL, WE. Effective: 2019 Fall Quarter.

ETX 102B—Quantitative Analysis of Environmental Toxicants (5)

Lecture—3 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ETX 102A. Sample preparation methods for trace analysis of environmental toxicants. Concept and techniques of advanced analytical instrumentation. Interpretation and use of analytical data. Not open for credit to students who have completed ETX 112B. GE credit: SE, VL. Effective: 2004 Spring Quarter.

ETX 103A—Biological Effects of Toxicants (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 102; ETX 101 and NPB 101 recommended. Biological effects of toxic substances in living organisms. Metabolism, cellular and tissue targets, mechanisms of action, and pathological effects. Not open for credit to students who have taken ETX 114A. GE credit: SE. Effective: 2004 Winter Quarter.

ETX 103B—Biological Effects of Toxicants: Experimental Approaches (5)

Lecture—3 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ETX 103A. Experimental approaches for assessing the biological effects of toxicants. Not open for credit to students who have taken ETX 114B. GE credit: SE, VL, WE. Effective: 2004 Spring Quarter.

ETX 104—Environmental & Nutritional Factors in Cellular Regulation & Nutritional Toxicants (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 101; (BIS 103 or ABI 103). Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as NUT 104.) GE credit: OL, SE, SL. Effective: 2005 Spring Quarter.

ETX 110—Toxic Tragedies & Their Impact on Society (2)

Lecture—2 hour(s). Prerequisite(s): BIS 010; or Consent of Instructor. Or equivalent; CHE 118A recommended. Examination of toxic tragedies, their origins, consequences, and effects on toxic regulation. GE credit: OL, SE, SL, WE. Effective: 2004 Winter Quarter.

ETX 111—Introduction to Mass Spectrometry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 118C or CHE 128C. Introduction to mass spectrometry, including ionization techniques, mass analyzers, interpretation of mass spectra, and applications of mass spectrometry. Emphasis on fundamental concepts of mass spectrometry necessary to identify and quantify organic molecules. GE credit: SE. Effective: 2019 Fall Quarter.

ETX 120—Perspectives in Aquatic Toxicology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 008B; (CHE 118B or CHE 128B); BIS 001A; or Consent of Instructor. Toxic substances, their fate in marine and freshwater systems, and their effects on aquatic organisms, populations, and ecosystems. Emphasis will be on substances and issues of current concern. GE credit: OL, SE, SL, VL, WE. Effective: 2004 Winter Quarter.

ETX 127—Environmental Stress & Development in Marine Organisms (10)

Lecture—4 hour(s); Laboratory—12 hour(s); Discussion—2 hour(s). Prerequisite(s): ETX 101 or BIS 102 or BIS 104; and Consent of Instructor. Or the equivalent; ETX 114A or NUT 114 recommended. Taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as NUT 127.) GE credit: OL, QL, SE, SL, VL, WE. Effective: 2002 Summer Session 1.

ETX 128—Food Toxicology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 102; BIS 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as FST 128.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 130—Role & Applications of Toxicology in Modern Industry (3)

Lecture—3 hour(s). Prerequisite(s): ETX 101; ETX 103A recommended. Role of toxicology in industry research and development, human health and environmental protection, hazard and risk evaluations, risk management and communications, product stewardship, and regulatory compliance. Scientific principles and methods of toxicology in chemical, energy, pharmaceutical, pesticide, biotechnology industries. GE credit: OL, SE, SL, VL, WE. Effective: 2008 Spring Quarter.

ETX 131—Environmental Toxicology of Air Pollutants (3)

Lecture—3 hour(s). Prerequisite(s): CHE 008B (can be concurrent); Or the equivalent; BIS 102 recommended. Field trip required. Toxicology of air pollutants in the ambient, indoor, and occupational environments. Health effects, sources, environmental fates, pulmonary responses, sampling and analyses, and air-quality criteria and standards. Field trip required. GE credit: SE, VL. Effective: 2003 Fall Quarter.

ETX 135—Health Risk Assessment of Toxicants (3)

Lecture—3 hour(s). Prerequisite(s): ETX 101; ETX 114A recommended. Current practices of health risk assessment of environmental chemicals using toxicological principles and their application to regulatory control of these chemicals. GE credit: QL, SE, SL, VL. Effective: 1997 Winter Quarter.

ETX 138—Legal Aspects of Environmental Toxicology (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. ETX 010 or ETX 101 recommended. Federal and California legislation concerning air and water pollution, pesticide use, food and feed additives, consumer protection, and occupational exposure to toxic substances; roles of federal regulatory agencies; alternatives to government control. GE credit: SE, VL, WE. Effective: 2001 Fall Quarter.

ETX 140—Genes & the Environment (3) *Review all entries*

Lecture/Discussion—3 hour(s). Prerequisite(s): BIS 002A (can be concurrent) or MCB 010 (can be concurrent) or BIS 101 (can be concurrent); college-level coursework in environmental toxicology recommended. Evaluation of evidence that human health and disease susceptibility result from complex interactions between genes and the environment. Critical thinking through problem solving using the scientific method with examples of cancer, metabolic, cardiovascular, and neurological health outcomes related to environmental and genetic risk factors and mechanisms. GE credit: QL, SE, SL. Effective: 2020 Fall Quarter.

ETX 140—Genes & the Environment (3) *Review all entries*

Lecture/Discussion—3 hour(s). Prerequisite(s): BIS 101; Biological Science 101 required or permission of instructor; coursework in genetics and molecular biology and/or environmental toxicology recommended. Evaluation of evidence that human health and disease susceptibility result from complex interactions between genes and the environment. Emphasis on cancer, metabolic, cardiovascular, and neurological health outcomes assessed by genotoxicity and toxicogenomic methods. Effective: 2015 Fall Quarter.

ETX 146—Exposure & Dose Assessment (3)

Lecture—3 hour(s). Prerequisite(s): ETX 112A; ETX 135 recommended. Exposure component of risk assessment; specifically, the presence and/or formation of toxic substances in environmental media, their movement within and between contaminated media, and the contacts of human populations with those media. GE credit: QL, SE, SL, VL. Effective: 1997 Winter Quarter.

ETX 190—Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Selected topics presented by students, faculty, or outside speakers covering current research and instructional activities within environmental toxicology. Reports and discussion concerning oral and written presentations, literature sources, and career opportunities. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 190C—Research Group Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Weekly conference of advanced research methods and the interpretation of research results. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 190S—Environmental Toxicology Career Seminar (1)

Seminar—1 hour(s). Careers in environmental toxicology; discussions with graduates from the Department of Environmental Toxicology and other experts in the field. (P/NP grading only.) GE credit: SE. Effective: 2003 Fall Quarter.

ETX 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 194HA—Honors Research (3)

Discussion—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): Consent of Instructor. Senior standing; minimum GPA of 3.250. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings. GE credit: SE. Effective: 1997 Winter Quarter.

ETX 194HB—Honors Research (3)

Discussion—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): Consent of Instructor. Senior standing; minimum GPA of 3.250. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 194HC—Honors Research (3)

Laboratory—9 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Senior standing, minimum GPA of 3.250. Continuation of ETX 194HA & ETA 194HB. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 197T—Tutoring in Environmental Toxicology (1-5)

Variable. Prerequisite(s): Consent of Instructor. Advanced standing in Environmental Toxicology, a related major, or the equivalent experience. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated up to 5 unit(s). (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 203—Environmental Toxicants (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 008B or CHE 128C; and Consent of Instructor. Or the equivalent of CHE 128C. Toxic chemicals: selected topics illustrating their occurrence, structure, and the reactions underlying detection, toxicity, fate, and ecological importance. Effective: 1997 Winter Quarter.

ETX 214—Mechanisms of Toxic Action (3)

Lecture—3 hour(s). Prerequisite(s): BIS 102; BIS 103; and Consent of Instructor. Chemical, biochemical, and molecular mechanisms underlying the adverse effects of toxic chemicals. Students are required to write a grant proposal and participate in a grant review panel. Effective: 1999 Spring Quarter.

ETX 220—Analysis of Toxicants (3)

Lecture—3 hour(s). Prerequisite(s): Coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as FOR 220.) Effective: 2006 Winter Quarter.

ETX 220L—Analysis of Toxicants Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): ETX 220 (can be concurrent); and Consent of Instructor. Laboratory techniques for microanalysis of toxicants. Separation, detection, and quantitative determination of toxicants using chemical and instrumental methods. Effective: 1997 Winter Quarter.

ETX 228—Gas Chromatography/Mass Spectrometry of Toxic Chemicals (3)

Lecture—1 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): ETX 220; CHE 129C; and Consent of Instructor. Application of GC/MS techniques to investigate toxic chemicals. Mass spectral fragmentations and their application to the structural elucidation. Practical application of GC/MS in current research. Preference given to environmental toxicology graduate students. Effective: 1997 Winter Quarter.

ETX 234—Current Topics in Neurotoxicology (3)

Lecture—3 hour(s). Prerequisite(s): Core courses in one of the following graduate programs: Pharmacology & Toxicology (PTX), Agricultural & Environmental Chemistry (AGC), Biochemistry & Molecular Biology (BMB), Cell & Developmental Biology (CDB), Immunology (IMM), Molecular Cellular & Integrative Physiology (MCP) or Neuroscience (NSC). Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as VMB 234, MCP 234.) Effective: 2010 Fall Quarter.

ETX 240—Ecotoxicology (3)

Lecture—3 hour(s). Prerequisite(s): or Consent of Instructor. Elementary course in toxicology and ecology or the equivalent. Principles of toxicology as applied to chemical action on natural populations, communities, and ecosystems. Physical, chemical, and biological characteristics which influence ecotoxic effects, modeling, and field research. Selected case histories are analyzed and presented in class. Effective: 1997 Winter Quarter.

ETX 250—Reproductive Toxicology (3)

Lecture—1.5 hour(s); Lecture/Discussion—1.5 hour(s). Prerequisite(s): PTX 203. Application of toxicological principles in reproductive studies. Effects of toxicants on the male, female, and developing embryo/fetus. Critical evaluation of reproductive toxicity studies and development of mechanistic approaches to understanding how chemical exposure can adversely affect reproduction. Effective: 2000 Winter Quarter.

ETX 260—Immunotoxicology (3)

Lecture—3 hour(s). Prerequisite(s): Undergraduate or graduate introduction to immunology coursework recommended but not required; graduate standing or consent of instructor. Provides students with skills and knowledge for evaluating and applying research on the impact of environmental toxicants on immunological function in human and wildlife populations. Effective: 2005 Fall Quarter.

ETX 270—Toxicology of Pesticides (3)

Lecture—3 hour(s). Prerequisite(s): ETX 101; One course each in (a) Organic Chemistry, (b) Biochemistry, (c) Toxicology (ETX 101 or equivalent), or with consent of instructor; graduate standing. Classification and chemical properties of pesticides, their mode of action, metabolism and disposition, pesticide resistance, effects on human health and ecological health and methods of risk benefit analyses. Effective: 2007 Winter Quarter.

ETX 278—Molecular Techniques (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as FOR 278.) Effective: 2002 Spring Quarter.

ETX 280—Forensic DNA Analysis (3)

Lecture—3 hour(s). Prerequisite(s): Coursework in genetics and molecular biology. Graduate standing; consent of instructor required for all students not enrolled in the MS Forensics program. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as FOR 280.) Effective: 2003 Spring Quarter.

ETX 281—Principles & Practice of Forensic Serology & DNA Analysis (3)

Lecture—2 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): (FOR 278 or ETX 278) or (FOR 280 or ETX 280); Or equivalent; consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA. (Same course as FOR 281.) Effective: 2011 Spring Quarter.

ETX 284—Non-Human Forensic DNA; Theory & Casework Application (2)

Lecture—2 hour(s). Prerequisite(s): Consent of instructor required for all students not enrolled in the MS Forensics program; upper division Molecular Biology and Genetics or its equivalent. Restricted to graduate standing. Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit. (Same course as FOR 284.) Effective: 2010 Fall Quarter.

ETX 290—Seminar (1)

Seminar—1 hour(s). Current topics in environmental toxicology. (S/U grading only.) Effective: 1997 Winter Quarter.

ETX 290C—Advanced Research Conference (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Presentation and critical discussion of advanced research methods and interpretation of research results. Designed primarily for graduate students. (S/U grading only.) Effective: 1997 Winter Quarter.

ETX 297T—Tutoring in Environmental Toxicology (1-5)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing in Environmental Toxicology, a related major, or the equivalent experience. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated up to 5 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

ETX 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

ETX 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ETX 396—Teaching Assistant Training Practicum (1-4)

Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EVE—Evolution & Ecology

Courses in EVE:

EVE 002—Biodiversity (3)

Lecture—2 hour(s); Lecture/Discussion—1 hour(s). Introduction to nature, scope and geographical distribution of biodiversity (the diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity; domestication, aesthetics, ethics and valuation. Species richness and "success." Biodiversity through time; monitoring, evaluation and conservation. Biomes - global, continental and Californian. (Same course as ENT 002.) GE credit: SE, SL, WE. Effective: 2001 Fall Quarter.

EVE 010—Evolution for Non-Biologists (3)

Lecture—3 hour(s). Introduction to evolutionary biology for the general population. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

EVE 011—Principles of Ecology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Elementary biology recommended. Ecological principles with emphasis on humans and their interactions with the environment; how humans affect and depend on natural ecosystems; the future of the Earth's biosphere. GE credit: OL, SE, SL, WE. Effective: 2004 Spring Quarter.

EVE 012—Life in the Sea (3)

Lecture—3 hour(s). Diversity of life in the sea; adaptations to physical/chemical ocean environment; marine science research methods; utilization of living marine resources by humans; factors and processes that influence diversity of sea life, including humans. GE credit: SE, SL. Effective: 2015 Spring Quarter.

EVE 013—Sex in the Natural World (3)

Lecture/Discussion—3 hour(s). Explores the diversity, mechanisms and evolution of sexual behaviors across the kingdoms of life. GE credit: SE, SL, VL. Effective: 2014 Fall Quarter.

EVE 016—Wild Davis: A California Naturalist Certification Course (4)

Lecture—3 hour(s); Fieldwork. Natural history and urban ecology of Davis. Basics of ecological observation, community science and service, and California's unique natural communities. If fee is paid, completion of the course provides certification in the UC California Naturalist Program. GE credit: SE, SL, WE. Effective: 2019 Spring Quarter.

EVE 017—Dining with Darwin: Evolutionary Insights Into Your Diet (3)

Lecture—3 hour(s). Crave salty, fatty, sugary foods? Want to know why? Evolution of cravings, metabolism and dentition, and of cooking our food. Relate Paleo, South Beach, and vegan diets to ancestral and global diets and current metabolism. For majors and nonmajors. GE credit: SE, SS, WC. Effective: 2016 Fall Quarter.

EVE 020—Darwinian Medicine (3)

Lecture—3 hour(s). Introduction for non-biologists to the evolved traits of humans and pathogens that influence human biological variation, health, and disease. GE credit: QL, SE, SL. Effective: 2017 Fall Quarter.

EVE 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the Department of Evolution & Ecology. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2010 Spring Quarter.

EVE 098—Directed Group Study (1-5)

Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2004 Winter Quarter.

EVE 099—Special Study for Lower Division Students (1-5)

Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EVE 100—Introduction to Evolution (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); STA 100 recommended. General survey of the origins of biological diversity and evolutionary mechanisms. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

EVE 101—Introduction to Ecology (4)

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); Or the equivalent. General survey of the principles of ecology. GE credit: QL, SE, SL, VL. Effective: 2018 Winter Quarter.

EVE 101Q—Introduction to Computer Models in Ecology (1)

Auto Tutorial—1.5 hour(s); Extensive Problem Solving—1.5 hour(s). Prerequisite(s): EVE 101 (can be concurrent); EVE 101 required concurrently. Computational methods and mathematical models used to study ecological phenomena. Effective: 2006 Fall Quarter.

EVE 102—Population & Quantitative Genetics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 101; (STA 100 or STA 102); EVE 100. Evolution as caused by random mating, genetic drift, natural selection, inbreeding, migration, and mutation in theory and actuality. The resemblance between relatives and consequences of selection for quantitative traits. Application of these ideas to topics such as the evolution of sex. GE credit: SE. Effective: 1997 Winter Quarter.

EVE 103—Phylogeny, Speciation & Macroevolution (4)

Lecture—3 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): EVE 100. Statistical inference of evolutionary patterns and processes above the species level. Topics include estimation of phylogenies and divergence times, character evolution, biogeographic history, and rates and patterns of lineage diversification, with an emphasis on the origin of species. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

EVE 104—Community Ecology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EVE 101 or ESP 100. Population growth and density dependence; predation; exploitative, interference and apparent competition; coexistence mechanisms; niches, spatial and temporal variation; stability, diversity, and productivity of food webs; applications to conservation and biological control. Emphasis on quantitative understanding through models, concepts, and empirical evidence. GE credit: SE, SL, VL. Effective: 1999 Spring Quarter.

EVE 105—Phylogenetic Analysis of Vertebrate Structure (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002B, BIS 002C). The structure of the classes and subclasses of vertebrates is described and interpreted in terms of phylogeny. GE credit: SE. Effective: 2008 Fall Quarter.

EVE 106—Mechanical Design in Organisms (3)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Upper division standing or consent of instructor; introductory animal biology (BIS 001B or BIS 002B), invertebrate zoology (EVE 112), and/or ecology (EVE 101) are recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Explores fundamental principles in the form and function of organisms, examining how basic properties of size, shape, structure, and habitat constrain ways in which plants and animals interact and cope with their physical surroundings. GE credit: QL, SE, VL, WE. Effective: 2008 Summer Session 1.

EVE 107—Animal Communication (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 002B. How animals use songs, dances, colors, chemicals, electricity and vibrations to communicate. Mechanisms of signal production and detection (sensory systems), theory of information transfer and signal design, and the role of natural selection in shaping communication. GE credit: QL, SE, VL. Effective: 2013 Fall Quarter.

EVE 108—Systematics & Evolution of Angiosperms (5)

Lecture—3 hour(s); Laboratory—6 hour(s). Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C). Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as PLB 108.) Effective: 2008 Spring Quarter.

EVE 109—Molecular Ecology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EVE 100. Use of molecular tools to answer fundamental questions in ecology and evolution of natural populations. Use of DNA and protein sequences to measure diversity and natural selection within and between populations and species and application to the fields of ecology and conservation. Hands-on manipulation and analysis of data in R. Effective: 2019 Fall Quarter.

EVE 110—Running, Swimming & Flying (3)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Upper division standing or consent of instructor; introductory animal biology (BIS 001B or BIS 002B), invertebrate zoology (EVE 112), and/or ecology (EVE 101) are recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Examines the bases of organism movement in terrestrial, aquatic, and aerial environments, emphasizing both the unifying principles underlying locomotion, as well as a range of strategies employed across diverse groups of organisms. GE credit: QL, SE, VL, WE. Effective: 2008 Summer Session 1.

EVE 111—Marine Environmental Issues (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes. May be repeated up to 2 time(s) when topic differs. (Same course as ESP 111.) GE credit: SE, SL. Effective: 2015 Summer Session 1.

EVE 112—Biology of Invertebrates (3)

Lecture—3 hour(s). Prerequisite(s): BIS 001B or (BIS 002B, BIS 002C); Courses in systematics, ecology, and evolution recommended. Limited enrollment. Survey of the invertebrate phyla, emphasizing aquatic forms, and focusing on morphology, development, natural history, ecology, and phylogenetic relationships. Effective: 2008 Fall Quarter.

EVE 112L—Biology of Invertebrates Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): (BIS 001B or (BIS 002B, BIS 002C)), EVE 112 (can be concurrent); EVE 112 required concurrently. Enrollment limited to 50 students. Field and laboratory experience with representative members of the major invertebrate phyla discussed in EVE 112. Emphasis on comparative morphology, natural history, ecology, and behavior of living invertebrates. Two field trips required. Effective: 2008 Fall Quarter.

EVE 114—Experimental Invertebrate Biology (3)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): Upper division standing or consent of instructor; introductory cell, animal and plant biology (BIS 001A and BIS 001B and BIS 001C, or BIS 002B), invertebrate zoology (EVE 112), ecology (EVE 101), and/or evolution (EVE 100) are recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at <http://www.bml.ucdavis.edu>. Biology, ecology, and evolution of local marine invertebrates with a focus on adaptations to environmental and biological factors encountered on the California coast. Hands-on field and laboratory learning with an emphasis on generating and testing hypotheses. GE credit: QL, SE, VL, WE. Effective: 2008 Summer Session 1.

EVE 115—Marine Ecology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EVE 101 or ESP 100 or BIS 002B; or Consent of Instructor. Processes affecting the distribution, abundance, and diversity of plant and animal life in the sea. Introduction to marine habitat diversity and human impacts on marine ecosystems. GE credit: SE, SL, VL, WE. Effective: 2008 Fall Quarter.

EVE 117—Plant Ecology (4)

Lecture—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); PLB 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as PLB 117.) Effective: 2008 Fall Quarter.

EVE 119—Population Biology of Invasive Plants & Weeds (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); Introductory statistics recommended. Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. (Same course as PLB 119.) GE credit: SE. Effective: 2011 Spring Quarter.

EVE 120—Global Change Ecology (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): EVE 100; EVE 101; Or equivalents. Treatment of historical evolution of the biosphere resulting from physical, chemical, and biological influences. Special focus upon changes caused by humans. Topics pertain to biodiversity, resources, conservation, and ecosystem services. Effective: 2010 Spring Quarter.

EVE 131—Human Genetic Variation & Evolution (3)

Lecture—3 hour(s). Prerequisite(s): BIS 001B or BIS 002B. Introduction to genome-wide nucleotide sequence variation in human populations and computational methods for its analysis. Topics to include forensics, disease gene mapping, and studies of human evolutionary history. Misuses, such as eugenics, and ethical/legal issues will be discussed. Effective: 2010 Spring Quarter.

EVE 138—Ecology of Tropical Latitudes (5)

Lecture—3 hour(s); Discussion—1 hour(s); Extensive Writing. Prerequisite(s): and Consent of Instructor. One course in Biological Sciences (BIS), Entomology (ENT), Wildlife, Fish, & Conservation Biology (WFC), Geography (GEO), or tropical experience. Biological, physical, and human-related aspects of the ecology of low latitudes. Distribution, numbers, and relationships of tropical organisms. Problems of development and conservation in the context of ecological and evolutionary theory. GE credit: SE, SL, WE. Effective: 1999 Spring Quarter.

EVE 140—Paleobotany (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C). Introduction to plant fossil record, beginning with invasion of land in the Silurian, emphasizing origin and evolution of major groups and adaptations and changing composition and distribution of floras in relation to plate tectonics and climatic change. Effective: 2008 Fall Quarter.

EVE 141—Principles of Systematics (3)

Lecture—2 hour(s); Independent Study. Prerequisite(s): BIS 001B or BIS 001C or BIS 002B; EVE 100 recommended. Historical background, philosophical rationale, contemporary approaches, and working rules of biosystematics, including International Code of Zoological Nomenclature. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2008 Fall Quarter.

EVE 147—Biogeography (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): BIS 002B or (BIS 001A, BIS 001B). Movements of terrestrial organisms. The role of geologic, climatic, and biologic changes in the geographic distribution of organisms. GE credit: QL, SE, SL, VL, WE. Effective: 2008 Fall Quarter.

EVE 149—Evolution of Ecological Systems (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): (EVE 101 or ESP 100); EVE 100; Or equivalent courses. Evolution as an organizing force in natural communities. Coadaptation in trophic and competitive relationships. Ecology of polymorphisms, clines, and speciation. GE credit: SE, SL, WE. Effective: 1997 Winter Quarter.

EVE 150—Evolution of Animal Development (3)

Lecture—3 hour(s). Prerequisite(s): BIS 101; EVE 100; EVE 100 (may be waived for graduate students with consent of instructor). Comparative analysis of animal development and the genetic basis of morphological diversification. GE credit: SE, WE. Effective: 2013 Winter Quarter.

EVE 161—Microbial Phylogenomics; Genomic Perspectives on the Diversity & Diversification of Microbes (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; Or equivalent. Use of DNA and genomic sequencing in studies of the diversity of microorganisms. Diversity of microbes, phylogenetics, genome sequencing, comparative genomics, phylogenomics, lateral gene transfer, molecular ecology, metagenomics, and studies of the human microbiome. GE credit: SE. Effective: 2013 Spring Quarter.

EVE 175—Computational Genetics (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): BIS 101; (STA 100 or STA 102). The use of computers to solve problems in genetics and evolution. Introduction to a general purpose computer language (Python), computational statistical methods, and applications such as QTL mapping, linkage detection, estimation of rates of evolution, and gene finding. Effective: 2004 Winter Quarter.

EVE 180A—Experimental Ecology & Evolution in the Field (4)

Lecture/Lab—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): EVE 100 (can be concurrent); (EVE 101 (can be concurrent) or ESP 100 (can be concurrent) or ENT 105 (can be concurrent)); Due to the unusual nature of this course, all prospective students are strongly encouraged to contact the instructor. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as ENT 180A.) GE credit: QL, SE, VL. Effective: 2019 Winter Quarter.

EVE 180B—Experimental Ecology & Evolution in the Field (4)

Lecture/Lab—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): EVE 180A or ENT 180A. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as ENT 180B.) GE credit: QL, SE, VL, WE. Effective: 2019 Spring Quarter.

EVE 181—Ecology & Evolution of Animal-Plant Interactions (4)

Lecture—1.5 hour(s); Lecture/Discussion—1.5 hour(s); Term Paper; Extensive Writing/Discussion. Prerequisite(s): BIS 002B; BIS 002C (can be concurrent). Animal adaptations for eating plants, pollinating flowers, dispersing seeds. Plant adaptations to herbivore defense, attraction of mutualists; role of coevolutionary arms race, mutualists and cheaters in plant/animal speciation. Exploration through lectures, original scientific literature, discussions and term paper. GE credit: OL, QL, SE, SL, WE. Effective: 2010 Fall Quarter.

EVE 189—Introduction to Biological Research (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing in Evolution & Ecology or related biological science. Introduction to research methods in biology. Presentation and discussion of research by faculty, graduate, and undergraduate students. May be repeated up to 6 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2010 Winter Quarter.

EVE 190—Undergraduate Seminar (2)

Seminar—2 hour(s). Prerequisite(s): Upper division standing in the biological sciences or a related discipline. Student reports on current topics with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EVE 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in the Department of Evolution & Ecology. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

EVE 194HA—Research Honors (2)

Laboratory—6 hour(s). Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. GE credit: SE, WE. Effective: 1997 Winter Quarter.

EVE 194HB—Research Honors (2)

Laboratory—6 hour(s). Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. GE credit: SE, WE. Effective: 1997 Winter Quarter.

EVE 194HC—Research Honors (2)

Laboratory—6 hour(s). Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. GE credit: SE, WE. Effective: 1997 Winter Quarter.

EVE 197T—Tutoring in Biological Sciences 2B (1-2)

Tutorial—3 hour(s). Prerequisite(s): BIS 001B B or better. Assisting the instructor by tutoring students in a Biological Sciences 2B laboratory. Tutoring is voluntary and is supervised by a Laboratory Teaching Assistant and the Laboratory Coordinator. May be repeated up to 3 time(s). (P/NP grading only.) GE credit: SE. Effective: 2008 Fall Quarter.

EVE 198—Directed Group Study (1-5)

Variable. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

EVE 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EVE 210—Molecular Phylogenetic Analysis (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as NEM 210.) Effective: 2001 Spring Quarter.

EVE 211—Applied Phylogenetics (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): EVE 103 or EVE 210 or PBG 200C; Or equivalent, graduate standing. Applications of phylogenetic methods to fields outside of systematics. Core lectures/labs in remedial phylogenetics, phylogeography, conservation and comparative morphology. Special topics vary yearly. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

EVE 220—Species & Speciation (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): EVE 100 or PHI 108; Or the equivalent; HPS 130B recommended. Current status of species concepts, models of speciation, current research on speciation, and relevance of species to conservation biology. Effective: 2005 Winter Quarter.

EVE 231—Principles of Biological Data Analysis (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Introduction to the principles of data analysis, experimental design, statistical modeling, inference, and hypothesis tests. Statistical methods of particular importance in biological applications will be emphasized. Examples will be presented from the fields of ecology and evolutionary genetics. (S/U grading only.) Effective: 2006 Winter Quarter.

EVE 240—Paleobotany & Angiosperm Evolution (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): PLB 108 or PLB 116 or EVE 140. Critical analysis of the plant fossil record as a source of evidence on origin, evolution, and phylogeny of the angio-sperms, Cretaceous and Tertiary climates, geographic history of modern taxa, and origin of modern vegetation types. Effective: 1997 Winter Quarter.

EVE 290C—Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Presentation and discussion of faculty and graduate student research in biology. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EVE 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EVE 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EVE 390—Methods of Teaching (2)

Lecture—1 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Practical experience in the methods and problems of teaching. Includes analyses of texts and supporting material, discussion of teaching techniques and preparing and conducting of laboratory and discussion sections. May be repeated up to 8 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

EXB—Exercise Biology

Courses in EXB:

EXB 090C—Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): EXB 099 (can be concurrent); Lower division standing in Exercise Biology or related biological science and consent of instructor; EXB 099 required concurrently. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

EXB 090X—Lower Division Seminar (1-2)

Lecture—1-2 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Gives freshman or sophomore level students the opportunity to study a special topic in the general area of Exercise Biology in a small class setting. GE credit: SE. Effective: 1997 Winter Quarter.

EXB 092—Exercise Biology Internship (1-5)

Internship—3-15 hour(s). Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated up to 1 time(s). No internship units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 097T—Tutoring in Exercise Biology (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Assisting the professor by tutoring students in exercise biology course-related projects. May be repeated up to 10 unit(s) including EXB 097TC, EXB 197T, EXB 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2004 Fall Quarter.

EXB 097TC—Tutoring Exercise Biology in the Community (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of instructor and chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

EXB 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EXB 101—Exercise Physiology (4)

Lecture—4 hour(s). Prerequisite(s): NPB 101 or NPB 110C; or Consent of Instructor. Physiology of Exercise; acute responses and adaptations to training. Neuromuscular function; bioenergetics; metabolic responses to acute exercise; adaptation to trainings; cardiorespiratory; and, applications to environmental physiology, and human health. GE credit: SE. Effective: 2019 Spring Quarter.

EXB 102—Introduction to Motor Learning & the Psychology of Sport & Exercise (4)

Lecture—4 hour(s). Prerequisite(s): PSC 001 recommended. Theoretical and practical issues in motor learning, sport psychology, and exercise psychology are examined. Emphasis is placed on how motor skills are acquired and retained, and on the application of social psychology and human motivation studies to human performance. Only 2 units of credit allowed for students who have completed EXB 104; only 2 units of credit allowed for students who have completed EXB 105; not open for credit to students who have completed EXS 104 and EXS 105. GE credit: SS. Effective: 2002 Winter Quarter.

EXB 104L—Exercise Biology Laboratory (3)

Laboratory—3 hour(s); Lecture—1 hour(s); Discussion—1 hour(s). Prerequisite(s): EXB 101 (can be concurrent); EXB 102 (can be concurrent); EXB 103 (can be concurrent); courses may be taken concurrently. Principles and analytical procedures for assessing fundamental physiological, biomechanical, motor learning and motor control factors which underlie human movement and performance. Only 1 unit of credit allowed to students who have completed EXS 101L; only 1 unit of credit allowed to students who have completed EXS 103; not open for credit to students who have completed EXS 101L and EXS 103. (Former EXS 101L and EXS 103.) GE credit: SE, WE. Effective: 2004 Winter Quarter.

EXB 106—Human Gross Anatomy (4)

Lecture—4 hour(s). Prerequisite(s): BIS 002A; Concurrent enrollment in EXB 106L or CHA 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as CHA 101.) GE credit: SE. Effective: 2010 Fall Quarter.

EXB 106L—Human Gross Anatomy Laboratory (3)

Laboratory—9 hour(s). Prerequisite(s): BIS 002A; EXB 106 (can be concurrent) or CHA 101 (can be concurrent); Must have completed EXB 106 or CHA 101 or required concurrently. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of prosected human cadavers in small group format with extensive hands-on experience. (Same course as CHA 101L.) GE credit: SE. Effective: 2010 Fall Quarter.

EXB 110—Exercise Metabolism (3)

Lecture—3 hour(s). Prerequisite(s): EXB 101 or NPB 101 or NPB 110C. Exercise metabolism, with emphasis on skeletal muscle and cardiac muscle metabolism during activity and inactivity. Basics of bioenergetics, substrate utilization, and cell signaling; mechanisms that regulate these properties, and differences between skeletal muscle and cardiac muscle metabolism. GE credit: SE. Effective: 2018 Winter Quarter.

EXB 111—Environmental Effects on Physical Performance (3)

Lecture—2 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): EXB 101; or Consent of Instructor. The effects of thermal, barometric and gravitational conditions on physiological function and physical performance of humans. Acute and chronic effects, emphasizing physiological adaptations and limitations, will be studied. GE credit: QL, SE. Effective: 2007 Winter Quarter.

EXB 112—Clinical Exercise Physiology (4)

Lecture—3 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): NPB 101 or NPB 110C; or Consent of Instructor. Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods. GE credit: SE. Effective: 2019 Winter Quarter.

EXB 115—Biomechanical Bases of Movement (3)

Lecture—2 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): EXB 103; or Consent of Instructor. Biomechanical bases of human movement investigated; topics include musculo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application made to sport, clinical, and work environments, including extensive analysis of locomotion. GE credit: QL, SE, VL, WE. Effective: 1997 Winter Quarter.

EXB 116—Nutrition for Physically Active Persons (3)

Lecture—3 hour(s). Prerequisite(s): EXB 101; NPB 101. The role of nutrition and exercise in modifying metabolism, body composition, performance and health of humans. GE credit: SE. Effective: 1997 Winter Quarter.

EXB 117—Exercise & Aging in Health & Disease (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): NPB 101 or NPB 110C; or Consent of Instructor. Etiology of and standard therapy for various diseases associated with inactivity and aging; e.g., cardiovascular, pulmonary, diabetes, obesity, lipemias, etc. Exercise will then be considered as a protective and/or therapeutic modality. GE credit: SE. Effective: 2019 Spring Quarter.

EXB 120—Sport in American Society (3)

Lecture—3 hour(s). Sociological approaches to the study of sport and contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as PHE 120.) GE credit: SS. Effective: 2009 Summer Session 1.

EXB 121—Advanced Sport Psychology (3)

Lecture—3 hour(s). Prerequisite(s): EXB 102; PSC 001 recommended. Advanced study and consideration of major theoretical and practical issues in sport psychology. Emphasis on practical application to sport and human performance. Effective: 2010 Winter Quarter.

EXB 122—Psychological Effects of Physical Activity (3)

Lecture—3 hour(s). Prerequisite(s): PSC 001 or PSC 001Y. Upper division standing. Physical activity is evaluated in terms of its ability to enhance the quality of life. Topics studied include: individual factors (self concept, type A); special populations (elderly, cardiovascular); and mental health changes (depression, anxiety). Effective: 2018 Spring Quarter.

EXB 124—Physiology of Maximal Human Performance (4)

Lecture—3 hour(s); Practice—4 hour(s). Prerequisite(s): EXB 101; or Consent of Instructor. BIS 101, BIS 102, and BIS 103 recommended. Molecular mechanisms underlying adaptation to training. Learn how to exercise to maximize their own performance as well as learning how the frequency, intensity and timing of exercise and nutrition affect the molecular signals that underlie performance. GE credit: SE. Effective: 2011 Winter Quarter.

EXB 125—Neuromuscular & Behavioral Aspects of Motor Control (3)

Lecture—2 hour(s); Discussion/Laboratory—2 hour(s). Prerequisite(s): EXB 101. Factors which affect control of movement from neuropsychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and closed loop theories, motor programming, cognitive learning strategies, and the effects of biochemical and biomechanical influences. GE credit: SE. Effective: 2006 Fall Quarter.

EXB 148—Theory & Practice of Exercise Testing (1)

Lecture/Discussion—1 hour(s). Prerequisite(s): EXB 112 (can be concurrent). Theory and practice of exercise testing applied to older adult populations. Physiological responses to and limitations of exercise testing. Application of exercise testing and training to healthy and diseased populations. (P/NP grading only.) GE credit: SE. Effective: 2006 Fall Quarter.

EXB 148L—Adult Fitness Testing Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): EXB 148 (can be concurrent); EXB 148 required concurrently. Testing symptomatic and asymptomatic older adults for functional aerobic capacity, body composition, blood lipids, pulmonary function, and cardiovascular disease risk. Counseling adults in appropriate exercise programs and lifestyle modifications. Two quarters minimum; third quarter permitted. (Former course PHE 148L). May be repeated up to 2 time(s). (P/NP grading only.) GE credit: QL, SE. Effective: 2006 Fall Quarter.

EXB 179—Frontiers in Exercise Biology (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): EXB 101; EXB 102; EXB 103 (can be concurrent); EXB 104L recommended. Lectures by leading authorities and discussion of the latest research in newly emerging areas in exercise biology. Offered every fourth year. GE credit: SE. Effective: 2007 Spring Quarter.

EXB 189—International Perspectives in Exercise Biology (4)

Lecture—4 hour(s). Prerequisite(s): EXB 010; Or upper division standing in Exercise Biology; consent of instructor: students will be accepted based upon academic merit, personal experience, and academic discipline in order to provide multidisciplinary perspectives. Restricted to 22 students. Compare and contrast exercise science issues between the US and an international location. Identify political, economic, cultural, technological and environmental issues that impact human exercise, physical activity, wellness, and sport from a global perspective. Effective: 2009 Summer Session 1.

EXB 190C—Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): EXB 099 (can be concurrent); Upper division standing in Exercise Biology or related biological science and consent of instructor; EXB 199 required concurrently. Restricted to upper division students. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

EXB 192—Exercise Biology Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required. May be repeated up to 15 unit(s) including EXB 092. (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 194H—Research Honors (2)

Independent Study—6 hour(s). Prerequisite(s): Senior standing; minimum of 6 units of EXB 199; 3.500 GPA or greater in major courses; consent of honors thesis advisor. Completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty advisor, culminating in written honors thesis. (P/NP grading only.) GE credit: SE. Effective: 2004 Fall Quarter.

EXB 197T—Tutoring in Exercise Biology (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in exercise biology course-related projects. May be repeated up to 10 unit(s) including EXB 097T, EXB 097TC, EXB 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2004 Fall Quarter.

EXB 197TC—Tutoring Exercise Biology in the Community (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 10 unit(s) including EXB 097T, EXB 097TC, EXB 197T. (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of instructor and chairperson. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EXB 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

EXS—Exercise Science

Courses in EXS:

EXS 201—Exercise Cardiorespiratory Physiology (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Undergraduate course in systemic physiology, exercise physiology, and biochemistry (intermediary metabolism). Advanced course on integrated responses of the cardiovascular and respiratory systems to exercise. Includes hemodynamic, neurohormonal, and autonomic aspects of cardiac and vascular function, principles of myocardial metabolism, and mechanisms underlying changes in pulmonary function and gas transport. Effective: 2001 Fall Quarter.

FAH—Fine Arts & Humanities

Courses in FAH:

FAH 098—Directed Group Study (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

FAH 198—Directed Group Study (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

FAP— Family & Community Medicine

Courses in FAP:

FAP 092C—Primary Care Clinic (2)

Clinical Activity—8 hour(s); Seminar—2 hour(s); Lecture—2 hour(s). Prerequisite(s): Consent of Instructor. Enrollment at the UC Davis campus, for freshman and sophomore students. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience exposes lower division students to health care delivery, patient histories, physical examinations, health promotion, disease prevention, diagnosis; treatment of episodic, acute, chronic illness; appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

FAP 192C—Primary Care Clinics (1-2)

Clinical Activity—6-8 hour(s); Seminar—2 hour(s); Lecture—1-2 hour(s). Prerequisite(s): Consent of Instructor. Enrollment at the UC Davis campus; upper division standing. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience introduces students to health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.) Effective: 2004 Fall Quarter.

FAP 195—Health Care to Underserved Populations (1)

Lecture—1 hour(s). Prerequisite(s): Sociology, political science, or applied behavioral science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations in California impacting their health; roles of family/interpersonal relationships in making health care decisions; and clinician's perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

FAP 401—Introductory Preceptorship in Family Practice (3-9)

Clinical Activity—20-40 hour(s). Prerequisite(s): Completion of first-year of medical training. Preceptorship in family practice offered as an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician's office, doing patient interviews, history taking, and performing physical exams. (H/P/F grading only.) Effective: 1999 Summer Quarter.

FAP 405—The Healer's Art (1)

Lecture—0.6 hour(s); Workshop—3 hour(s). Prerequisite(s): Consent of Instructor. Limited to first-year medical students. Learning to strengthen your humanity and remain open-hearted can make the difference between burnout and a fulfilling life. Learn tools for selfcare, healing, finding meaning, strengthening commitment and becoming a true physician. May be repeated for credit. (P/F grading only.) Effective: 2016 Fall Quarter.

FAP 411—Selected Studies of Systems for Chronic Illness Care (3)

Clinical Activity—4 hour(s); Discussion—4 hour(s). Prerequisite(s): FAP 400A; FAP 400B; FAP 400C; Medical students with consent of instructor. Understanding of chronic illness, particularly diabetes, participate in patient care, alternative techniques. May be repeated up to 1 time(s). (H/P/F grading only.) Effective: 2004 Spring Quarter.

FAP 430—Family Medicine Clerkship (3-12)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Family medicine clerkship for third year medical students. (H/P/F grading only.) Effective: 2020 Spring Quarter.

FAP 430FA—SJVP Longitudinal Family Medicine Clerkship (1.5-6)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430FB—SJVP Longitudinal Family Medicine Clerkship (1.5-6)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430FC—SJVP Longitudinal Family Medicine Clerkship (1.5-6)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430FD—SJVP Longitudinal Family Medicine Clerkship (1.5-6)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430R—Rural PRIME Family Medicine Longitudinal Clerkship (2)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RA—Rural PRIME Family Medicine Longitudinal Clerkship (3)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RB—Rural PRIME Family Medicine Longitudinal Clerkship (3)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RC—Rural PRIME Family Medicine Longitudinal Clerkship (3)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RD—Rural PRIME Family Medicine Longitudinal Clerkship (1)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430TA—TeachMS Longitudinal Primary Care Clerkship (A) (4)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.

FAP 430TB—TeachMS Longitudinal Primary Care Clerkship (B) (6)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.

FAP 430TC—TeachMS Longitudinal Primary Care Clerkship (C) (2)

Clinical Activity—45 hour(s); Lecture—2 hour(s); Workshop—2 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.

FAP 431—Introduction to Primary Care Continuity Clinic (1)

Clinical Activity—4 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2016 Fall Quarter.

FAP 431A—Primary Care Continuity Clinic (1)

Clinical Activity—4 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431B—Primary Care Continuity Clinic (1)

Clinical Activity—4 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431C—Primary Care Continuity Clinic (1)

Clinical Activity—4 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431D—Primary Care Continuity Clinic (1)

Clinical Activity—4 hour(s); Project (Term Project)—1 hour(s). Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Attend clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431KA—ACE-PC Continuity Clinic (6)

Clinical Activity—40 hour(s). Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 431KB—ACE-PC Continuity Clinic (0.5)

Clinical Activity—2 hour(s). Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 431KC—ACE-PC Continuity Clinic (0.5)

Clinical Activity—2 hour(s). Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 431KD—ACE-PC Continuity Clinic (0.5)

Clinical Activity—2 hour(s). Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the second year of the ACE-PC Program. Start with a four-week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 434—Primary Care Clinics—Clínica Tepati (1-12)

Clinical Activity—32-36 hour(s); Seminar; Lecture—1-2 hour(s). Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2020 Spring Quarter.

FAP 435—Primary Care Clinics-Imani Clinic (1-12)

Clinical Activity—32-36 hour(s); Seminar; Lecture—1-2 hour(s). Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2020 Spring Quarter.

FAP 436—Continuity Clinic in Primary Care; Shifa Clinic (3-12)

Clinical Activity—32-36 hour(s); Seminar; Lecture—1-2 hour(s); Variable. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2010 Winter Quarter.

FAP 437—Primary Care Clinics: Knights Landing (1-12)

Clinical Activity—3 hour(s); Lecture—1 hour(s). Must complete an application and interview prior to registering. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations in the community of Knights Landing. May be repeated for credit. (P/F grading only.) Effective: 2020 Spring Quarter.

FAP 439D—Directed Clinical Studies in Family Medicine (1-12)

Clinical Activity—40 hour(s). Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

FAP 439R—Directed Studies in Family Medicine (1-12)

Clinical Activity—30 hour(s); Independent Study—10 hour(s). Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

FAP 444—Advanced Preceptorship in Family Medicine (3-18)

Clinical Activity—40 hour(s). Prerequisite(s): Completion of third-year primary care plus clerkship or consent of instructor. Open to medical students only. Preceptorships with primary care physicians in a variety of settings. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an out patient setting. May be repeated up to 18 unit(s). (H/P/F grading only.) Effective: 2002 Fall Quarter.

FAP 450—CAM in Family & Community Health (3-18)

Variable—20-40 hour(s). Complementary and alternative medicine courses at away institutions that cover various aspects of integrative medicine, including but not limited to: botanicals, homeopathy, mind/body, naturopathy, nutrition, traditional Chinese medicine, osteopathy, and energy medicine. Intended to grant units for away rotations; not offered at the UC Davis Medical Center. (H/P/F grading only.) Effective: 2011 Winter Quarter.

FAP 460—Geriatrics in Community Health (3-6)

Fieldwork—24 hour(s); Clinical Activity—12 hour(s); Lecture—4 hour(s). Prerequisite(s): FAP 430. Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and case management specialists. Observation and participation in MMSE's, patient-family conferences, interdisciplinary team meetings, neuropsychiatric testing and home visit evaluations. (H/P/F grading only.) Effective: 2001 Spring Quarter.

FAP 468—International Preceptorship (3-12)

Clinical Activity—40 hour(s). Prerequisite(s): Medical students with consent of instructor. Preceptorship with a family practitioner in a foreign country (Arranged by student contact or with assistance of the Family and Community Medicine Department.) Participate in clinical activities, analyze and report characteristics of the practice. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2002 Fall Quarter.

FAP 469—Inpatient Acting Internship in Family Medicine (3-12)

Clinical Activity—40 hour(s). Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of inpatients on a family medicine hospital service. Available sites are university-based family medicine residency programs and programs within the UC Davis Network of Affiliated Family Medicine Residency Programs. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Spring Quarter.

FAP 470—Inpatient Clinical Elective in Family Medicine (3-12)

Clinical Activity—40 hour(s). Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of patients on a family medicine hospital service. Usually includes inpatient and outpatient experience. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Spring Quarter.

FAP 475—Combined Inpatient/Outpatient Clinical Elective in Family Medicine (3-12)

Clinical Activity—40 hour(s). Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to Medical students only. Combined inpatient and outpatient elective. Consists of comprehensive primary medical care of patients on a family medicine hospital service and in a family medicine outpatient clinic. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Fall Quarter.

FAP 488—Selected Studies in Family Practice (1-9)

Variable—3-27 hour(s). Prerequisite(s): Medical students with consent of instructor. Assigned readings in family practice to increase understanding on selected topics relating to family medicine and primary health care delivery; visits to and written analysis of selected health care programs; and/or exposure to family practice with a community physician preceptor. May be repeated up to 9 unit(s). (H/P/F grading only.) Effective: 2002 Fall Quarter.

FAP 490—Health Care to Underserved Populations (1)

Lecture—1 hour(s). Prerequisite(s): Sociology, Political Science, or Applied Behavioral Science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations impacting health; roles of family/interpersonal relationships in making health care decisions; the nature of ethnic/racial/socioeconomic health care disparities; and clinicians' perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/F grading only.) Effective: 2012 Winter Quarter.

FAP 493—Aging & Health (6)

Seminar—12 hour(s). Prerequisite(s): Consent of Instructor. Is disease and infirmity the inevitable consequence of aging? We will spend four weeks exploring this question by reviewing the biology of aging, physiologic changes seen in aged individuals and disease processes commonly found in elderly persons. (H/P/F grading only.) Effective: 2010 Summer Quarter.

FAP 495—LGBTIQQA Healthcare Lecture Series (1)

Lecture—6 hour(s). Increase the awareness of medical issues surrounding the LGBTIQQA community and arm students with knowledge of the health disparities the community faces. Provide better quality care to the LGBTIQQA patients cared for as physicians. May be repeated for credit. (P/F grading only.) Effective: 2012 Winter Quarter.

FAP 498—Directed Group Study (1-5)

Variable—3-15 hour(s). Explore in-depth various topics in primary care. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2008 Spring Quarter.

FAP 499—Research (1-12)

Prerequisite(s): Medical students with consent of instructor. Research in various aspects of the health care delivery system. (H/P/F grading only.) Effective: 1997 Winter Quarter.

FMS—Film Studies

Courses in FMS:

FMS 001—Introduction to Film Studies (4)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing—3 hour(s). Analysis of film form and narrative, including cinematography, editing, and sound. Issues in film studies, including authorship, stardom, race, gender, class, and cultural identity. Includes introduction to selected cinematic movements and national film traditions. Not open for credit to students who have taken HUM 010. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 045—Vampires & Other Horrors in Film & Media (4)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing—3 hour(s). History of representations of vampires and horror generally from the 19th-21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity. (Same course as GER 045.) GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 090X—Lower Division Seminar (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Study of a special topic in Film Studies in a small class setting. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 120—Italian-American Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): FMS 001. Exploration of representations of Italian-American identity in American (U.S.) cinema. Analysis of both Hollywood and independently produced films, especially as they represent ethnicity, gender, and social class of Italian Americans. Not open for credit to students who have taken HUM 120. GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 121—New Italian Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): FMS 001; and upper division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as ITA 121.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 121S—New Italian Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): FMS 001; and upper division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. May be taught abroad. (Same course as ITA 121S.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 124—Topics in U.S. Film History (4)

Lecture—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): FMS 001. Study of an aspect of American film history (such as the silent era; the studio system; U.S. avant-garde cinema), including the influences of technological, economic, regulatory, cultural, and artistic forces. May be repeated up to 2 time(s) when topic differs. Not open for credit to students who have completed HUM 124, unless topic differs. GE credit: ACGH, AH, DD, OL, VL, WE. Effective: 2012 Fall Quarter.

FMS 125—Topics in Film Genres (4)

Lecture—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): FMS 001. A study of one or more of the film genres (such as the documentary, the musical, film noir, screwball comedy, or the western), including genre theory and the relationship of the genre(s) to culture, history, and film industry practices. May be repeated up to 2 time(s) when topic differs. Not open for credit to students who have completed HUM 125, unless topic differs. GE credit: AH, OL, VL, WE. Effective: 2012 Fall Quarter.

FMS 127—Film Theory (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): FMS 001; or Consent of Instructor. Survey of the conceptual frameworks used to study film (including semiotics, psychoanalysis, spectatorship, auteur, genre and narrative theories). Historical survey of major film theorists. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 129—Russian Film (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): Completion of Subject A requirement. History of Russian film; film & social revolution, the cult of Stalin, dissident visions; film & the collapse of the Soviet empire; gender and the nation in Russian film. Taught in English; Russian films with English subtitles. (Same course as RUS 129.) GE credit: AH, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 142—New German Cinema (4)

Lecture/Discussion—3 hour(s); Extensive Writing. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorf, Kluge, Wenders. Knowledge of German is not required. May be repeated for credit with consent of instructor. (Same course as GER 142.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 176A—Classic Weimar Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): HUM 001. German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama. Not open for credit to students who have taken HUM 176. (Same course as GER 176A.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 176B—Postwar German Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): FMS 001. Exploration of German cinema from 1945 to 1980, when the Nazi past was a central theme. Includes study of postwar "rubble films," escapist "homeland films," and New German Cinema of the 1970s (including films by Fassbinder, Kluge, Syberberg, and Herzog). Not open for credit to students who have taken HUM 177. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 190X—Upper Division Seminar (4)

Seminar—4 hour(s). Prerequisite(s): Upper division standing or consent of instructor. Study of a special topic in film studies in a small class setting. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 194H—Special Study for Honors Students (1-5)

Independent Study—3-15 hour(s). Prerequisite(s): Consent of Instructor. Senior standing; GPA of at least 3.500. Guided research on a topic in Film Studies in preparation for the writing of an honors thesis in FMA 195H or the creation of an honors project in FMS 196H. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 195H—Honors Thesis (1-5)

Independent Study—3-15 hour(s). Prerequisite(s): FMS 194H; and Consent of Instructor. GPA of at least 3.500; senior standing. Writing of an honors thesis on a topic in Film Studies under the direction of a faculty member. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: AH, VL, WE. Effective: 2012 Fall Quarter.

FMS 196H—Honors Project (1-5)

Project (Term Project)—3-15 hour(s). Prerequisite(s): FMS 194H; and Consent of Instructor. Senior standing, GPA of at least 3.500. Creation of an honors film, video, or mixed-media project under the direction of a faculty member. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: AH, VL, WE. Effective: 2012 Fall Quarter.

FOR—Forensic Science

Courses in FOR:

FOR 200—Fundamental Concepts in Forensic Science (3)

Lecture—2 hour(s); Fieldwork—0.3 hour(s); Lecture/Lab—0.3 hour(s); Seminar—0.5 hour(s). Restricted to students enrolled in the M.S. in Forensic Science Program. Overview of Forensic Science. Problem definition, strategies for problem solving, analytical tools, and professional and ethical considerations. Effective: 2003 Winter Quarter.

FOR 201A—Forensic Science Fundamentals-A (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Enrolled in the Forensic Science Graduate Program. Open to Forensic Science Graduate Program students only. Professional responsibilities and ethics, physical evidence concepts, drug chemistry and toxicology, controlled substances and analytical chemistry and instrumentation as practiced in the forensic sciences. First of three courses that, in part, covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC). Effective: 2018 Spring Quarter.

FOR 201B—Forensic Science Fundamentals-B (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Enrolled in the Forensic Science Graduate Program. Open to Forensic Science Graduate Program students only. Forensic biology and DNA, microscopy and materials analysis and pattern evidence as practiced in the forensic sciences. Second in a series of three courses which covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC). Effective: 2018 Spring Quarter.

FOR 201C—Forensic Science Fundamentals-C (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Enrolled in the Forensic Science Graduate Program. Arson and explosives, quality assurance and accreditation, the law and science interface and court testimony as practiced in the forensic sciences. Third in a series of three courses that covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC). Effective: 2018 Spring Quarter.

FOR 205—Microscopy & Microanalytical Methods in Forensic Science (3)

Lecture—2 hour(s); Laboratory—1 hour(s). Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the M.S. in Forensic Science Program; a minimum, year each of the following chemistry, organic chemistry, calculus, & physics. Introduction to optical and electron microscopy. Transmission, diffraction, reflection and absorption; polarized light and polarizing crystals; phase contrast. Radiography; image recording, SEM analysis of gunshot residues, paints, glass. EDS, XRF analysis, signal-to-noise ratios, minimum detectable levels and homogeneity. Effective: 2006 Spring Quarter.

FOR 207—Advanced Spectroscopy Methods in Forensic Science (3)

Lecture—3 hour(s). Restricted to Forensic Science Graduate program or consent of instructor. Discuss, evaluate and interpret advanced molecular spectra/structure, Infrared Spectroscopy, such as chemical applications of spectroscopic methods, vibrational, rotational spectra; electronic spectra, photoelectron spectroscopy generated by various analytical instruments used in forensic science community. Effective: 2014 Fall Quarter.

FOR 208—Forensic Toxicology (3)

Lecture—3 hour(s). Forensic toxicology as related to driving under the influence of drugs (DUID) investigations, detection, and evaluation through the use of standardized field sobriety tests and drug recognition protocols. Effective: 2018 Spring Semester.

FOR 209—Forensic Alcohol (3)

Lecture—3 hour(s). Prerequisite(s): FOR 220 (can be concurrent); and Consent of Instructor. Analytical methods used in the determination and quantitation of ethanol in biological matrices commonly encountered in cases involving operating a motor vehicle. Effective: 2018 Fall Quarter.

FOR 210—Personal Identification Methods In Forensic Science (3)

Lecture—3 hour(s). Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of instructor. Methods for identifying individuals from evidence collected at crime scenes, suspects or victims, crime scene examination and analytical methods used to support such investigations. Topics include forensic anthropology and odontology; latent prints; shoe prints; facial reconstruction/recognition; eyewitness identifications; biometric systems. Effective: 2003 Spring Quarter.

FOR 212—Scientific Evidence & Courtroom Testimony (3)

Lecture—2 hour(s); Discussion—1 hour(s). Restricted to graduate students enrolled in the MS Forensic Science program or by the consent of the instructor. Explores the relationship between science and the criminal justice system. Admissibility of scientific testimony and documentary proof during the trial, concepts of relevancy, hearsay and opinion rule, examination of expert witnesses, impact of Kelley-Fry and Daubert decisions & court testimony. Effective: 2007 Fall Quarter.

FOR 215—Forensic Fire & Arson Investigation (3)

Lecture—3 hour(s). Restricted to students enrolled in the M.S. Forensic Science program or by consent of the Forensic Science Program Director Principles and techniques of scientific investigation of fires and related crimes; offer peer-reviewed protocols for processing fire and explosion scenes; discuss recognition, collection, analysis of physical evidence, and describe the scientific method for decision-making in fire/arson investigation. Effective: 2007 Fall Quarter.

FOR 218—Technical Writing in Forensic Science (3)

Lecture—2 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): Consent of the instructor required for all students not enrolled in the Forensic Science program. Restricted to graduate standing in the Forensic Science program. How to write clear, credible forensic science reports and scientific articles, that (a) serve the ends of the justice system, (b) meet their readers' varying needs and (c) reflect well on the author. Effective: 2011 Fall Quarter.

FOR 220—Analysis of Toxicants (3)

Lecture—3 hour(s). Prerequisite(s): Coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as ETX 220.) Effective: 2006 Winter Quarter.

FOR 221L—Forensic Science Analytical Instrumentation (2)

Discussion/Laboratory—1 hour(s); Laboratory—3 hour(s). Enrollment limited to students accepted in the Forensic Science Graduate program or subject to the approval of the instructor if the student has the appropriate chemistry, calculus and physics courses required of students in the graduate forensic science program. Methodology and instruments used for the analysis of substances of interest in the discipline of Forensic Science. Practical experience with modern instrumental techniques & methodologies used in the advanced forensic science laboratory. Effective: 2007 Fall Quarter.

FOR 240—Homicide Crime Scene Investigation (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Restricted to Forensic Science Masters Program Students; enrollment is limited to 15 students per class. Processing and evaluating complex homicide scenes. Functions and activities of police agencies. Recognition, documentation, identification, and collection of evidence. Event sequence reconstruction. Evidence collection, preservation, report writing. Courtroom presentation. Effective: 2004 Winter Quarter.

FOR 263—Forensic Computer Science Investigations (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate student. Restricted to students in the Forensic Science Graduate program unless approved by instructor. Discuss the threats to the security of any kind of evidence that is captured, transmitted, or stored digitally and develop critical thinking and basic knowledge of computer forensic science issues in the evaluation of digital evidence. Effective: 2013 Fall Quarter.

FOR 268—Statistics in Forensic Science (3)

Lecture—3 hour(s). Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of forensic program director. Statistics that are used by the forensic scientist, their limitations/applications in presenting evidential results in such areas as DNA-STR results, trace evidence correlation, fingerprint statistics, population sampling and the Bayes method. Effective: 2006 Spring Quarter.

FOR 276—Population Genetics (3)

Lecture—3 hour(s). Prerequisite(s): FOR 280; FOR 281; or Consent of Instructor. Open only to majors in Forensic Science Program unless by consent of the Chair Forensic Science Graduate group. Principles, theories, and models of population genetics as they apply to forensic science. Effective: 2018 Fall Quarter.

FOR 277—Forensic Genetics; Next Generation Techniques & Applications (3)

Lecture—3 hour(s). Prerequisite(s): Undergraduate courses in fundamental and applied principles of: genetics, biochemistry, and molecular biology, or consent of instructor. Restricted to Forensic Science Graduate students (GFOR) or consent of instructor. Review organization/function of the human genome, recent developments, next generation sequencing techniques including the preparation of DNA samples, principles of the new generation sequencing assay formats and biochemical reactions. Includes quality control parameter, and bioinformatic approaches. Effective: 2013 Fall Quarter.

FOR 278—Molecular Techniques (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as ETX 278.) Effective: 2002 Spring Quarter.

FOR 280—Forensic DNA Analysis (3)

Lecture—3 hour(s). Prerequisite(s): Coursework in genetics and molecular biology. Graduate standing; consent of instructor required for all students not enrolled in the M.S. Forensics program. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as ETX 280.) Effective: 2003 Spring Quarter.

FOR 281—Principles & Practice of Forensic Serology & DNA Analysis (3)

Lecture—2 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): (FOR 278 or ETX 278) or (FOR 280 or ETX 280); and Consent of Instructor. Or equivalent of FOR 280/ETX 280. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA. (Same course as ETX 281.) Effective: 2011 Spring Quarter.

FOR 283—Forensic Biology (3)

Lecture—2 hour(s); Discussion—1 hour(s). Restricted to students enrolled in the M.S. in Forensic Science program or by consent of the Forensic Science Program Director. Overview to the foundational concepts in forensic biology: chemistry and molecular biology of biological evidence, genetic basis of biological uniqueness, evolutionary basis of species differences, patterns and dynamics of evidence deterioration, and the legal/professional considerations associated with biological evidence. Effective: 2009 Fall Quarter.

FOR 284—Non-Human Forensic DNA; Theory & Casework Application (2)

Lecture—2 hour(s). Prerequisite(s): Consent of instructor required for all students not enrolled in the M.S. Forensics program; upper division Molecular Biology and Genetics or its equivalent. Restricted to graduate standing. Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit. (Same course as ETX 284.) Effective: 2010 Fall Quarter.

FOR 289—Survey in Forensic Science (3)

Lecture—3 hour(s). Restricted to students enrolled in the M.S. in Forensic Science Program. Analytical methods in contemporary forensic science. Clandestine laboratories in California, crime scene management, examination and analysis of human hair, forensic ballistics/trajectory reconstruction, shoe/tire print impressions, serial number restoration, forensic aspects of alcohol impairment, bloodstain pattern interpretation, microscopy of building materials, biological aspect of forensic science. May be repeated for credit when topic differs. Effective: 2002 Fall Quarter.

FOR 290—Seminar in Forensic Science (1)

Seminar—3 hour(s). Restricted to students enrolled in the M.S. in Forensic Science Program. Students will be exposed to topical areas in Forensic Science by presentations conducted by expert guest speakers. The seminar will also serve as a medium whereby the exiting students will present the research conducted as part of their thesis requirement. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2006 Spring Quarter.

FOR 290C—Graduate Research Conference in Forensic Science (1)

Independent Study—1 hour(s). Restricted to students enrolled in the M.S. in Forensic Science Program. Individual and/or group conference on problems, progress and techniques in forensic science and research. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2003 Winter Quarter.

FOR 293—Forensic Science Research Methodology (2)

Lecture—1.5 hour(s); Extensive Writing/Discussion—0.5 hour(s). Restricted to students enrolled in the Graduate Forensic Science program or by consent of the instructor. Introduction to identification, formulation, and solution of meaningful scientific problems encountered in the Forensic Science area including experimental design and/or theoretical analysis of new and prevailing techniques, theories and hypotheses. Students will present and defend their thesis research/journal article proposals. (S/U grading only.) Effective: 2007 Fall Quarter.

FOR 298—Group Study in Forensic Science (1-5)

Independent Study—1-5 hour(s). Restricted to students enrolled in the M.S. in Forensic Science Program. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2002 Fall Quarter.

FOR 299—Research in Forensic Science (1-12)

Independent Study—1-12 hour(s). Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the M.S. in Forensic Science Program. May be repeated for credit. (P/NP grading only.) Effective: 2002 Fall Quarter.

FPS—Fiber & Polymer Science

Courses in FPS:

FPS 100—Principles of Polymer Materials Science (3)

Lecture—3 hour(s). Prerequisite(s): CHE 002A; CHE 002B; ((CHE 008A, CHE 008B) or (ENG 045 or ENG 045Y)); Introductory physics. Basic principles of polymer science are presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as EMS 147.) GE credit: QL, SE. Effective: 2019 Fall Quarter.

FPS 110—Plastics in Society & the Environment (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 010; Or introductory course in physical sciences. Basic concepts and methodologies in the study of plastics. Formation, classification, structure, properties, processing, and formulation. Their application to societal needs, and their impact on society and the environment. GE credit: SE, SL, SS, WE. Effective: 2019 Fall Quarter.

FPS 150—Polymer Syntheses & Reactions (3)

Lecture—3 hour(s). Prerequisite(s): (CHE 128B or CHE 008B); CHE 107A. Organic and physical chemistry aspects of polymer syntheses and reactions including polymerization mechanisms, kinetics and thermodynamics for major types of organic high polymers. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2019 Fall Quarter.

FPS 161—Structure & Properties of Fibers (3)

Lecture—3 hour(s). Prerequisite(s): TXC 006; CHE 008B. Structure, properties and reactions of natural- and man-made fibers; the relations between molecular structure of fibers and their physical properties; interactions of fibers and detergents. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2019 Fall Quarter.

FPS 161L—Textile Chemical Analysis Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): FPS 161 (can be concurrent). Laboratory methods and procedures employed in qualitative and quantitative analysis of textile fibers and auxiliaries. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2019 Fall Quarter.

FPS 180A—Introduction to Research in Fiber & Polymer Science (2)

Lecture/Discussion—6 hour(s). Prerequisite(s): Consent of Instructor. Senior standing in major related to Fiber and Polymer Science. Senior thesis on independent problems. Research begun in TXC 180A continued and completed in TXC 180B. GE credit: QL, SE, VL, WE. Effective: 2019 Fall Quarter.

FPS 180B—Introduction to Research in Fiber & Polymer Science (2)

Lecture/Discussion—6 hour(s). Prerequisite(s): Consent of Instructor. Senior standing in major related to Fiber and Polymer Science. Senior thesis on independent problems. Research begun in TXC 180A continued and completed in TXC 180B. GE credit: QL, SE, VL, WE. Effective: 2019 Fall Quarter.

FPS 197T—Tutoring in Fiber & Polymer Science (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Consent of Instructor. Upper division fiber and polymer science related major. Tutoring of students in Fiber & Polymer Science courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring in another Fiber & Polymer Science course. (P/NP grading only.) Effective: 2019 Fall Quarter.

FPS 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Group Study (P/NP grading only.) Effective: 2019 Fall Quarter.

FPS 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Upper division standing. Special Study (P/NP grading only.) Effective: 2019 Fall Quarter.

FPS 250A—Special Topics in Polymer & Fiber Science (3)

Lecture—3 hour(s). Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered. (Same course as EMS 250A.) Effective: 2019 Fall Quarter.

FPS 250B—Special Topics in Polymer & Fiber Science (3)

Lecture—3 hour(s). Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered. (Same course as EMS 250B.) Effective: 2019 Fall Quarter.

FPS 250E—Special Topics in Polymer & Fiber Science (3)

Lecture—3 hour(s). Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics vary each time course is offered. (Same course as EMS 250E.) Effective: 2019 Fall Quarter.

FPS 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. Teaching assistant, training practicum. May be repeated for credit. (P/NP grading only.) Effective: 2019 Fall Quarter.

FRE—French

Courses in FRE:

FRE 001—Elementary French (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit to students who have taken FRE 001A; students who have successfully completed FRE 002 or FRE 003 in the 10th or higher grade in high school or who have successfully completed two or more years of high school in a French-speaking country or in a French-language high school may receive unit credit for this course on a P/NP grading basis only, although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 001A—Accelerated Intensive Elementary French (15)

Lecture/Discussion—15 hour(s). Prerequisite(s): Placement exam required. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Special 12-week, accelerated, intensive summer session course that combines the work of FRE 001, FRE 002, and FRE 003. Not open for credit to students who have completed FRE 001, FRE 001S, FRE 002, FRE 002S, FRE 003, or FRE 003S. GE credit: AH, WC. Effective: 2014 Winter Quarter.

FRE 002—Elementary French (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Prerequisite(s): FRE 001. Continuation of FRE 001. Not open for credit to students who have taken FRE 001A; students who have successfully completed two or more years of high school in a French-speaking country or in a French language high school may receive unit credit for this course on a P/NP grading basis only. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 003—Elementary French (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Prerequisite(s): FRE 002. Continuation of FRE 002. Not open for credit to students who have taken FRE 001A; students who have successfully completed two or more years of high school in a French-speaking country or in a French-language high school may receive unit credit for this course on a P/NP grading basis only. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 021—Intermediate French (5)

Lecture/Discussion—4 hour(s); Laboratory—1 hour(s). Prerequisite(s): FRE 001A or FRE 003 or FRE 003S. Review of grammar and vocabulary acquired in the elementary sequence, as well as the study of new grammatical structures and a continuing enrichment of vocabulary through oral work in class, written exercises, readings and compositions. Not open for credit to students who have completed FRE 021S. GE credit: AH, OL, WC, WE. Effective: 2014 Winter Quarter.

FRE 022—Intermediate French (5)

Lecture/Discussion—4 hour(s); Laboratory—1 hour(s). Prerequisite(s): FRE 021 or FRE 021S. Continuation of FRE 021 or FRE 021S. Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed FRE 022S. GE credit: AH, OL, WC, WE. Effective: 2014 Winter Quarter.

FRE 023—Intermediate French (5)

Lecture/Discussion—4 hour(s); Laboratory—1 hour(s). Prerequisite(s): FRE 022 or FRE 022S. Continuation of FRE 022 or FRE 022S. Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed FRE 023S. GE credit: AH, OL, WC, WE. Effective: 2014 Winter Quarter.

FRE 050—French Film (4)

Lecture—1 hour(s); Discussion—2 hour(s); Term Paper. Introduction to the tradition of French cinema from its invention by Méliès and the Lumière brothers through New Wave (especially the works of Truffaut and Godard) and more recent developments in French and Francophone film. Taught in English. GE credit: AH, VL, WC, WE. Effective: 1997 Winter Quarter.

FRE 051—Major Works of French Literature in Translation (4)

Lecture—2 hour(s); Discussion—1 hour(s); Term Paper—1 hour(s). Readings in English translation of key works of French and Francophone literature from the Middle Ages to the Present. Particular attention is given to the long-standing interest of French writers in issues of social, regional, gender, sexual, and ethnic identity. GE credit: AH, WC, WE. Effective: 2002 Fall Quarter.

FRE 052—France & the French-Speaking World (4)

Lecture—2 hour(s); Discussion—1 hour(s); Term Paper—1 hour(s). Taught in English. Survey of the history and culture of France and the French-speaking world, especially Canada, the Caribbean and Africa. Study of social, historical and cultural issues that occupy the French-speaking world, with particular attention to mass media. GE credit: AH, WC, WE. Effective: 2002 Spring Quarter.

FRE 053—French as a World Language (4)

Lecture/Discussion—3 hour(s); Term Paper. The linguistic status of French and its function in multilingual societies and international arenas. Linguistico-political landscape of communities in Euroasia, Africa, and the Americas. Sociolinguistic concepts and emergence of French as a world language. GE credit: AH, OL, WC, WE. Effective: 2007 Fall Quarter.

FRE 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 100—Composition in French (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): FRE 023. Instruction and practice in expository writing in French, with emphasis on organization, correct syntax, and vocabulary building. GE credit: AH, WC, WE. Effective: 2004 Spring Quarter.

FRE 101—Introduction to French Poetry (4)

Lecture—3 hour(s). Prerequisite(s): FRE 100; or Consent of Instructor. Analysis and evaluation of works representing the main types of French poetry. Study of French poetic conventions and versification. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

FRE 102—Introduction to French Drama (4)

Lecture—3 hour(s). Prerequisite(s): FRE 100; or Consent of Instructor. Analysis and evaluation of plays representing the main types of French drama, with emphasis on dramatic structure and techniques. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

FRE 103—Introduction to French Prose (4)

Lecture—3 hour(s). Prerequisite(s): FRE 100; or Consent of Instructor. Analysis and evaluation of works representing main types of French prose, with emphasis on narrative structure and techniques. GE credit: WE. Effective: 1997 Winter Quarter.

FRE 104—Translation (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): FRE 100; Or the equivalent. Practice in English-to-French and French-to-English translation using a variety of non-literary materials, illustrating different problems and styles. Effective: 2004 Fall Quarter.

FRE 105—Advanced French Grammar (4)

Lecture—3 hour(s); Extensive Writing/Discussion—1 hour(s). Prerequisite(s): FRE 023; Or equivalent. Understanding of, and extensive practice with, various grammatical structures in French. Lexical-semantic, morphological, and syntactic analysis. GE credit: WE. Effective: 2005 Winter Quarter.

FRE 106—French in Business & the Professions (4)

Lecture—1 hour(s); Discussion—2 hour(s). Prerequisite(s): FRE 100; or Consent of Instructor. French language as used in the commercial sphere. Emphasis on proper style and form in letter-writing, and in non-literary composition. Technical terminology in such diverse fields as government and world business. GE credit: WE. Effective: 1997 Winter Quarter.

FRE 107—The Making of Modern France (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): FRE 023; Consent of Instructor. Introduction to French culture through a historical approach to topics such as the citizen and the state (politics, justice, social security), the nation and centralization, the rise of public education, colonization, class and social relationships. GE credit: AH, WE. Effective: 2016 Fall Quarter.

FRE 107A—Pre- & Early-Modern France (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): FRE 023; Consent of Instructor. Introduction to pre- and early-modern French culture through a historical approach to topics such as the feudal system, the rise of the monarchy, the Reformation and religious wars. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 107B—The Making of Modern France (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): FRE 023; Consent of Instructor. Introduction to French culture through a historical approach to topics such as the absolute monarchy, the role of the parlements, the French revolution, and the political regimes of the 19th century. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 108—Modern French Culture (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): FRE 023. Survey of modern French culture from the Dreyfus affair to the present day. Topics may include women and French culture, decolonialization and modernization, education, social welfare and immigration. GE credit: WC, WE. Effective: 2016 Spring Quarter.

FRE 109—French Phonetics (4)

Lecture/Discussion—3 hour(s); Laboratory—1 hour(s). Prerequisite(s): FRE 023; Or equivalent. Introduction to the sound-inventory of French and practice in phonetic transcription, with a focus on ways in which phonetic contrasts signal grammatical contrasts; spoken forms and spelling; formal differences between the "Standard" and other varieties across the French-speaking world. GE credit: SS. Effective: 2005 Spring Quarter.

FRE 110—Stylistics & Creative Composition (4)

Lecture—3 hour(s). Prerequisite(s): FRE 100; or Consent of Instructor. Intensive course in creative composition using a variety of techniques and literary styles, patterned on Queneau's Exercices de style. Practice in such stylistic modifications as inversion, antithesis, changes in tense, mood, tonality, etc. The writing of poetry. GE credit: WE. Effective: 1999 Fall Quarter.

FRE 115—Medieval French Literature & Society (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Social and cultural life of medieval France as studied through its representation in such literary works as La Chanson de Roland, courtly love lyric, the Arthurian romances of Chrétien de Troyes, Aucassin et Nicolette, selected fabliaux and farces. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 116—The French Renaissance (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Overview of major works and writers with particular attention to the historical context of the turbulent 16th century. Writers to be read may include Rabelais, Marot, Ronsard, Du Bellay, Labé, Marguerite de Navarre, Montaigne, and D'Aubigné. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 117A—Baroque & Preclassicism (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Literature and intellectual culture of the period between the Renaissance and French classicism. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 117B—The Classical Moment (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Literature, culture, and politics in the Age of Louis XIV. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 118A—Age of Reason & Revolution (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100. Literature and philosophy of the French Enlightenment. Readings from such authors as Bayle, Fontenelle, Montesquieu, Voltaire, Rousseau and Diderot. GE credit: AH, OL, WC, WE. Effective: 2011 Fall Quarter.

FRE 118B—Private Lives & Public Secrets: The Early French Novel (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. History of the French roman from the Middle Ages to the Revolution with particular emphasis on the novels of the 18th century. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 119A—The Romantic Imaginary (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Major concepts and themes of French Romanticism, such as dream and the supernatural, impossible love, exoticism, revolution, individualism, nature, the mal du siècle, Romantic irony, the creative imagination, the cult of ruin. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 119B—Realism, History & the Novel (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Narrative and historical codes of French realist fiction, with emphasis on the representation of history in the realist novel, its depiction of social "realities" such as class and gender, and its relation to the historical situation of post-revolutionary society. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 119C—From Baudelaire to Surrealism (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Study of the main poets and poetic movements from the mid-19th to the early 20th century, including Baudelaire, the Symbolists, and the Surrealists. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 120—Modern French Thought (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Overview of post-Second World War French intellectual currents from existentialism to structuralism and deconstructionism. Readings will include Sartre and de Beauvoir, Camus, Lévi-Strauss, Lacan, Barthes, Foucault, Derrida, Kristeva, Sollers, Cixous, and Irigaray. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 121—20th-Century French Novel (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Novels and theories of the novel, from Proust to the Nouveau Roman and beyond. Readings from among Gide, Sartre, de Beauvoir, Camus, Breton, Beckett, Robbe-Grillet, Sarraute, Simon, Barthes, Duras, Tournier, Perec, Modiano, Guibert, Toussaint. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 122—French & Francophone Film (4)

Lecture/Discussion—3 hour(s); Extensive Writing; Film Viewing—3 hour(s). Prerequisite(s): FRE 100; or Consent of Instructor. French and Francophone film from the Lumière Brothers to the present. Topics may include analysis of film form and narrative, major filmmakers and filmic traditions, and film theory. May be repeated up to 1 time(s) when topic differs. GE credit: AH, VL, WC, WE. Effective: 2007 Fall Quarter.

FRE 124—Post-Colonial & Francophone Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Post-Independence Black African and/or Caribbean and/or North African literatures written in French. Selected topics include: identity & subjectivity, the role of the intellectual, women's voices, languages & oral literatures, cultural syncretism, theories of post-colonialism. May be repeated up to 1 time(s) with consent of major advisor & instructor; when content differs; for example, when the geographical focus (West Africa, North, African or Caribbean) or theme is substantially different from previous iterations. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

FRE 125—French Literature & Other Arts (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Relationship between French literature and other arts—painting, music, cinema, architecture, opera—from different periods. May be repeated up to 1 time(s) when topic differs. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

FRE 127—Paris: Modernity & Metropolitan Culture (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Representation of Paris in 19th- and 20th-century texts and its importance in defining the experience and art of modernity. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

FRE 128—Topics in French Culture (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): FRE 100; or Consent of Instructor. In-depth study of a particular topic in French culture. Topics may include the Court of Louis XIV, the French Revolution and Immigration. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.

FRE 130—From Page to Stage: Theatre & Theatricality (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. French theater as literature and performance. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

FRE 133—Gender & Politics in French Literature & Culture (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Thematic, theoretical and political tendencies in contemporary French fiction. Barthes, Foucault, Duras, Guibert, considered in terms of their writing on identity and gender. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

FRE 140—Study of a Major Writer (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Concentrated study of works of a single author. May be repeated up to 1 time(s) when author/subject differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

FRE 141—Selected Topics in French Literature (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): FRE 100; or Consent of Instructor. Subjects and themes such as satiric and didactic poetry of the Middle Ages, poetry of the Pléiade, theater in the 18th century, pre-romantic poetry, autobiography, literature and film, etc. May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

FRE 160—Linguistic Study of French: Sound & Form (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): FRE 100 or LIN 001 or LIN 001Y. Introduction to the linguistic study of modern French, with focus on sound structure and form, inflection and derivation. GE credit: AH, SS, WE. Effective: 2018 Spring Quarter.

FRE 161—Linguistic Study of French: Form & Meaning (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): FRE 100 or LIN 001 or LIN 001Y. Introduction to the linguistic study of modern French, with focus on sentence construction and constituency, meaning and discourse functions. GE credit: AH, SS. Effective: 2018 Spring Quarter.

FRE 162—History of the French Language (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): FRE 100 or LIN 001 or LIN 001Y. Main periods in development of the French language, from Latin to contemporary popular aspects, with emphasis on relationship between socio-cultural patterns and evolution of the language. GE credit: AH, SS, WC, WE. Effective: 2018 Spring Quarter.

FRE 192—Internship (1-12)

Internship—3-36 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Upper division standing. Practical application of the French language through work experience in government and/or business, culminating in an analytical term paper on a topic approved by the sponsoring instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 194H—Special Study for Honors Students (4)

Independent Study—4 hour(s). Prerequisite(s): Open only to French majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in French literature, civilization, or language studies. (P/NP grading only.) GE credit: AH, WC, WE. Effective: 1998 Fall Quarter.

FRE 195H—Honors Thesis (4)

Independent Study—4 hour(s). Prerequisite(s): FRE 194H. Writing of an honors thesis on a topic in French literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.) GE credit: AH, WC, WE. Effective: 1998 Fall Quarter.

FRE 197T—Tutoring in French (1-4)

Seminar—1-2 hour(s); Laboratory—1-2 hour(s). Prerequisite(s): Upper division standing and consent of Chairperson. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 197TC—Tutoring in the Community (2-4)

Seminar—1-2 hour(s); Laboratory—1-2 hour(s). Prerequisite(s): Upper division standing and consent of Chairperson. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 198S—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Group study on focused topics in French literature and culture. Taught abroad. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

FRE 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 200—Introduction to Graduate Study in French (2)

Seminar—2 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Introduction to a range of methodologies and critical practices in the field of French Studies, including literature, culture, and linguistics. Covers basic principles of bibliographic research in the humanities. (S/U grading only.) Effective: 2016 Spring Quarter.

FRE 201—History of French (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Presentation of the main changes in the grammatical structures of French, from Latin to contemporary usage, involving textual analysis and sociolinguistic description. Effective: 2016 Spring Quarter.

FRE 202—Topics in French Civilization (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Interdisciplinary approach to the study of French and Francophone civilization from the Middle Ages to the present. Content varies by instructor. May be repeated for credit when content differs. Effective: 2016 Spring Quarter.

FRE 204—Topics in Medieval Literature (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Study of Medieval French literature, focusing on a particular period, milieu, literary movement, genre, or theoretical approach. May be repeated for credit when topic differs. Effective: 2016 Spring Quarter.

FRE 205A—16th-Century Literature: The Humanists (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. French humanism in its most varied forms. Although at different times Rabelais and Montaigne will be primarily studied, other leading intellectuals and religious writers will also receive attention. May be repeated for credit when topic differs. Effective: 2016 Spring Quarter.

FRE 206A—17th-Century Literature: Theater (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Works of Corneille, Racine, Molière, and minor dramatists. One or more authors may be covered. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 206B—17th-Century Literature: Prose (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Works of authors such as Pascal, Descartes, Mme de Lafayette. One or more authors may be covered. May be repeated for credit with consent of instructor as topics differ from quarter to quarter. Effective: 2016 Spring Quarter.

FRE 206C—17th-Century Literature: Poetry (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Studies of the works of one or more poets of the period. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

FRE 207A—18th-Century Literature: Philosophies (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Not a course in philosophy, but an examination of the role of philosophy in the design and context of literary works. Study of one or more authors. May be repeated for credit. Effective: 2016 Spring Quarter.

FRE 207B—18th-Century Literature: Novel (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Rise of the novel. Study of narrative experiments in the context of the philosophical climate and new literary values. May treat one or more novelists of the period. May be repeated for credit when topic differs. Effective: 2016 Spring Quarter.

FRE 208A—19th-Century Literature: Fiction (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Study of the works of one or several novelists and/or short-story writers of the period. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 208B—19th-Century Literature: Poetry (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 209A—20th-Century: Prose (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Study of the works of one or several writers of the period. Effective: 2016 Spring Quarter.

FRE 209B—20th-Century: Theater (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Study of the works of one or several dramatists of the period. Effective: 2016 Spring Quarter.

FRE 209C—20th-Century: Poetry (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Study of the works of one or several poets of the period. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

FRE 210—Studies in Narrative Fiction (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 211—Studies in Criticism (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 212—Studies in Theater (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 213—Studies in Poetry (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 214—Study of a Literary Movement (4)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 215—Topics in French & Francophone Film (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Aspects of French and Francophone film from the Lumière Brothers through the present. Topics may include a specific historical period of filmmaking, film theories and the analysis of film form and narrative, and major filmmakers and filmic traditions. May be repeated up to 2 time(s). Effective: 2016 Winter Quarter.

FRE 224—Francophone Literatures (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Study of cultural productions (literature, film, visual arts) by Francophone peoples such as found in North Africa, West Africa, the Caribbean, South-East Asia, the Americas, and Metropolitan France. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.

FRE 250A—French Linguistics I (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Theoretical approach to the forms and functions of French, with emphasis on phonology and morphology. Overview of current linguistic theories and their application to French. Offered in alternate years. Effective: 2016 Spring Quarter.

FRE 250B—French Linguistics II (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Theoretical approach to the forms and functions of French, with emphasis on syntax and semantics. Overview of current linguistic theories and their application to French. Offered in alternate years. Effective: 2016 Spring Quarter.

FRE 251—Topics in the Linguistic Study of French (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Questions relevant to the linguistic study of French, such as language acquisition, sociolinguistics, or theoretical examination of structure. Intended for students in French Linguistics and those applying linguistic models to literature or teaching. May be repeated for credit when topic differs. Effective: 2016 Spring Quarter.

FRE 291—Foreign Language Learning in the Classroom (4)

Seminar—3 hour(s); Project (Term Project). Prerequisite(s): Consent of Instructor. Graduate standing. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as GER 291, SPA 291.) Effective: 2016 Spring Quarter.

FRE 297—Individual Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 2016 Spring Quarter.

FRE 298—Group Study (1-5)

Seminar—1-5 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

FRE 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 2016 Spring Quarter.

FRE 299D—Dissertation Research (1-12)

Variable—3-36 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 2016 Spring Quarter.

FRE 300—Teaching of a Modern Foreign Language (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Senior or graduate standing; a major or minor in a modern foreign language. Effective: 1997 Winter Quarter.

FRE 390A—The Teaching of French in College (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. May be repeated for credit with consent of instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

FRE 390B—The Teaching of French in College (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.) Effective: 1997 Winter Quarter.

FRE 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

FRS—Freshman Seminar

Courses in FRS:

Questions pertaining to FRS courses should be directed to the instructor or to the First-Year Seminars Office in Undergraduate Education. FRS courses are open only to undergraduate students.

FRS 001—First-Year Seminar (1)

Seminar—1 hour(s). Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit when topic differs. Effective: 2009 Fall Quarter.

FRS 002—First-Year Seminar (2)

Seminar—2 hour(s). Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit when topic differs. Effective: 2009 Fall Quarter.

FRS 003—First-Year Seminar (1)

Seminar—1 hour(s). Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2009 Fall Quarter.

FRS 004—First-Year Seminar (2)

Seminar—2 hour(s). Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2009 Fall Quarter.

FSM—Food Service Management

Courses in FSM:

Questions pertaining to the following courses should be directed to the instructor or to the Nutrition Department Advising office in 3202 Meyer Hall; 530-752-2512; 530-752-7094.

FSM 120—Principles of Quantity Food Production (4)

Lecture—3 hour(s); Independent Study—1 hour(s). Prerequisite(s): FST 100B; (FST 101B or NUT 106). Restricted to upper division Clinical Nutrition students only. Fundamental principles of food service management, including quantity food preparation, institutional equipment, receiving and storage, service, menu planning, merchandising, and safety. Students earn food safety certification. Effective: 2019 Fall Quarter.

FSM 120L—Quantity Food Production Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): FSM 120. Laboratory experience in quantity food production and service. Effective: 1997 Winter Quarter.

FSM 122—Food Service Systems Management (3)

Lecture—3 hour(s). Prerequisite(s): ARE 112; FSM 120. Principles of quantity food production management: production schedules, portion control, financial management, layout and equipment planning, evaluation of alternative systems, and computer applications. Effective: 2017 Winter Quarter.

FSM 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. One upper division course in Food Service Management (FSM). Work experience on or off campus in practical aspects of food service management, supervised by a faculty member. (P/NP grading only.) Effective: 1997 Winter Quarter.

FSM 197T—Tutoring in Food Service Management (1-2)

Discussion/Laboratory—3-6 hour(s). Prerequisite(s): Dietetics or related major; completion of the Food Service Management (FSM) course in which tutoring is done. Tutoring of students in food service management, assistance with discussion groups or laboratory sections; weekly conference with instructor in charge of course; written evaluations. May be repeated for credit when tutoring a different course. (P/NP grading only.) Effective: 1997 Winter Quarter.

FSM 198—Directed Group Study (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

FSM 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

FST—Food Science & Technology

Courses in FST:**FST 001—Principles of Food Science (3)**

Lecture—2 hour(s); Discussion—1 hour(s). Not open for credit to students who have completed any FST course, except FST 010. Food science fundamentals. Fresh and processed food technologies; world food problems; food composition; food microbiological and toxicological safety; food laws; evaluation of acceptability and nutritional value. GE credit: SE, VL. Effective: 2001 Winter Quarter.

FST 003—Introduction to Brewing & Beer (3)

Lecture—3 hour(s). Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. Not open for credit to students who have taken FST 003V. GE credit: SE, SL. Effective: 2017 Fall Quarter.

FST 003V—Introduction to Brewing & Beer (3)

Web Virtual Lecture—1 hour(s); Web Electronic Discussion—1.5 hour(s); Project (Term Project). Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. Not open for credit to students who have taken FST 003. GE credit: SE, SL. Effective: 2017 Spring Quarter.

FST 010—Food Science, Folklore & Health (3)

Lecture—3 hour(s). Not open for credit to students who have completed FST 002. Ancient and modern food folklore in relation to health and well-being. Food safety, organic food, herbalism, food preservation, and nutritional enhancement. GE credit: SE, SL, SS, VL, WC. Effective: 2000 Fall Quarter.

FST 050—Introduction to Food Preservation (3)

Lecture—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): CHE 002A; BIS 002A (can be concurrent); (STA 013 (can be concurrent) or STA 013Y (can be concurrent) or STA 100 (can be concurrent)). Pass One restricted to Food Science majors; Pass Two open to all students. Introduction to modes of fresh food preservation including use of chemicals and microbes, heat and energy, control of water and atmosphere, and by indirect approaches such as packaging, hygienic design and sanitation. GE credit: QL, SE. Effective: 2018 Fall Quarter.

FST 055—Food in American Culture (4)

Lecture—3 hour(s); Discussion—1 hour(s). Relationship between food and culture; relationship between food and the social order; influences on eating habits and the tensions between them including identity, convenience, and responsibility; multiple disciplines and genres. (Same course as AMS 055.) GE credit: ACGH, AH, DD, SS, WE. Effective: 2018 Winter Quarter.

FST 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FST 100A—Food Chemistry (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); BIS 002A recommended. Open to Food Science, Clinical Nutrition, and Nutrition Science majors only. Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water. GE credit: SE, VL. Effective: 2018 Fall Quarter.

FST 100B—Food Properties (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): FST 100A; CHE 008B; and Consent of Instructor. Sensory quality, chemical and microbial safety, and nutritional properties of foods. Effects of food processing and preparation on these properties. Selected properties of food commodities. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

FST 100C—Food Physical Chemistry (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): FST 100A. Fundamentals of thermodynamics and kinetics related to food physical chemistry. Phase behavior, crystallization, water activity and food stability, solubility, aroma volatility, formation of glasses, gels and dispersions, biopolymers and rheology. Effective: 2019 Winter Quarter.

FST 101A—Food Chemistry Laboratory (3)

Discussion—1 hour(s); Lecture—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): FST 100A (can be concurrent). Open to Food Science and Clinical Nutrition majors only. Study of basic chemical and physical properties that influence the reactivity and functional properties of components in food systems. GE credit: QL, SE, VL, WE. Effective: 2018 Fall Quarter.

FST 101B—Food Properties Laboratory (2)

Lecture/Lab—3 hour(s). Prerequisite(s): FST 100B (can be concurrent); Must be taken concurrently. Study of properties of food described in FST 100B. GE credit: QL, SE, VL, WE. Effective: 2017 Winter Quarter.

FST 102A—Malting & Brewing Science (4)

Lecture—4 hour(s). Prerequisite(s): (BIS 102, BIS 103) or BIS 105; Senior standing recommended. Technology of the malting, brewing and fermentation processes is integrated with the chemistry, biochemistry and microbiology that determine industrial practices and product quality. Not open for credit to students who have taken FST 102. GE credit: SE. Effective: 2018 Fall Quarter.

FST 102B—Practical Malting & Brewing (4)

Lecture/Discussion—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): FST 102A; CHE 002C. Open to seniors only in Fermentation Science or Food Science and Technology. Provides practical working knowledge of analytical methods used in malting and brewing and experience with brewing materials and processes, by analysis of samples that illustrate the range of values experienced in practice and pilot scale brewing. GE credit: QL, SE. Effective: 2017 Winter Quarter.

FST 103—Physical & Chemical Methods for Food Analysis (4)

Lecture—2 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 002C; CHE 008B; BIS 103; FST 100B. Theory and application of physical and chemical methods for determining the constituents of foods. Modern separation and instrumental analysis techniques are stressed. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

FST 104—Food Microbiology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; BIS 103. Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry. GE credit: QL, SE, VL. Effective: 2019 Fall Quarter.

FST 104L—Food Microbiology Laboratory (4)

Lecture—1 hour(s); Discussion—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): BIS 002A; BIS 103; FST 104. Restricted to juniors and seniors in the Food Science major. Cultural and morphological characteristics of microorganisms involved in food spoilage, in foodborne disease, and food fermentation. Analysis of microbiological quality of foods. May be taught abroad. GE credit: QL, SE, VL, WE. Effective: 2020 Spring Quarter.

FST 106—Food Chemistry for Clinical Nutrition (5)

Lecture—3 hour(s); Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 008B C- or better or CHE 118B C- or better or CHE 128B C- or better; concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as NUT 106.) GE credit: SE, SL, WE. Effective: 2019 Spring Quarter.

FST 107—Food Sensory Science (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): FST 117 (can be concurrent); (STA 013 or STA 013Y). Critical examination of techniques and theories of sensory measurement of food; measures of consumer perception and acceptance. An introduction to the sensory and cognitive systems associated with the perception of food. Not open for credit to students who have completed FST 107A. GE credit: QL, SE, WE. Effective: 2018 Spring Quarter.

FST 109—Principles of Quality Assurance in Food Processing (3)

Lecture—3 hour(s). Prerequisite(s): STA 013 or STA 013Y. Quality assurance systems for food industry with essential measurement & analysis techniques and discussion of QA management & control programs. Regulations and audit, as well as the processes for validation and verification of quality of food systems, are emphasized. GE credit: QL, SE. Effective: 2020 Winter Quarter.

FST 110—Food Processing (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): PHY 007A; PHY 007B; PHY 007C (can be concurrent); (MAT 016C or MAT 017C or MAT 021C). Application of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, heat and mass transfer. Quantitative analysis through problem solving and simulation. Not open for credit to students enrolled in College of Engineering. GE credit: QL, SE, VL. Effective: 2018 Fall Quarter.

FST 110L—Food Processing Laboratory (2)

Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): FST 110 (can be concurrent). Open to Food Science majors only. Laboratory exercises to gain experience with common food processing operations at the bench and pilot plant scales. GE credit: QL, SE, SL, VL. Effective: 2018 Fall Quarter.

FST 114—Fermented Foods (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): BIS 103; MIC 102; or Consent of Instructor. Pass One restricted to upper division or graduate level Food Science and Viticulture & Enology majors. Physiology, biochemistry, and genetics of microorganisms important in food fermentations. How microorganisms are used in fermentations and how raw materials are converted into finished fermented foods and beverages. (Same course as VEN 114.) Effective: 2019 Spring Quarter.

FST 117—Design & Analysis for Sensory Food Science (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): STA 013. Methods of design and analysis for sensory food science. Experimental design strategies. Use of taste panels and consumer testing. Data analysis and computation including the relative merits and limitations of parametric and nonparametric approaches. Modifications for quality assurance. GE credit: QL, SE. Effective: 2017 Spring Quarter.

FST 119—Chemistry & Technology of Milk & Dairy Products (4)

Lecture—4 hour(s). Prerequisite(s): BIS 002A; BIS 102; Consent of Instructor. Composition, structure and properties of milk and products derived from milk. Relates chemical, microbiological, and technological principles to commercial practices in processing of milk and its products. GE credit: QL, SE, VL. Effective: 2017 Spring Quarter.

FST 123—Introduction to Enzymology (3)

Lecture—3 hour(s). Prerequisite(s): FST 123L (can be concurrent); BIS 102; BIS 103. Principles of physical, chemical and catalytic properties of enzymes and their importance. Purification, characterization, and quantitative evaluation of reaction conditions on activity are stressed. Specificity and mechanism of action illustrated by use of selected enzymes. (Former course BCP 123.) GE credit: QL, SE, VL. Effective: 2017 Spring Quarter.

FST 123L—Enzymology Laboratory (2)

Lecture—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): BIS 103; FST 123 (can be concurrent); FST 123 required concurrently. Laboratory procedures involved in detection, purification and characterization of enzymes. (Former course BCP 123L.) GE credit: QL, SE, VL, WE. Effective: 1997 Winter Quarter.

FST 127—Sensory Evaluation of Foods (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): FST 117. Critical examination of methods of sensory measurement applied to food and beverage systems; descriptive analysis and consumer tests and their application to quality assurance, product development and optimization. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

FST 128—Food Toxicology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 102; BIS 103. Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as ETX 128.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 131—Food Packaging (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 008B; BIS 001B; PHY 007C. Limited to 50 students. Principles of food packaging. Functions of packaging. Properties of metal, glass, paper and plastic materials and packages. Design, fabrication, and applications of food packaging. Packaging of fresh and processed foods, including fruits and vegetables, dairy foods, beer and wine. GE credit: SE. Effective: 2016 Summer Session 1.

FST 151Y—Food Freezing (1)

Discussion—1 hour(s); Web Virtual Lecture. Prerequisite(s): FST 110A; Or the equivalent. Mechanisms of ice crystallization, interpretation of freezing diagrams, and modes of heat transfer. Food properties at sub-freezing temperatures, refrigeration requirements, and estimation of freezing times. Industrial systems used in freezing foods. GE credit: QL, SE. Effective: 2013 Fall Quarter.

FST 159—New Food Product Ideas (3)

Lecture—3 hour(s). Prerequisite(s): FST 050; BIS 002A; PHY 007A; PHY 007B; PHY 007C; CHE 002A; CHE 002B; CHE 002C. Create, refine, test and present viable ideas for new food products. Activities include trend monitoring, consumer research, idea generation, concept screening, and new product concept presentations. GE credit: AH, OL, SS, WE. Effective: 2017 Spring Quarter.

FST 160—Food Product Development (4)

Lecture—1 hour(s); Discussion—1 hour(s); Laboratory—6 hour(s). Prerequisite(s): FST 050; FST 103; FST 104; FST 110. Product implementation stage of food product development including preliminary product description, prototype development, product testing, and formal presentation of a new product development. GE credit: OL, SE, VL. Effective: 2017 Winter Quarter.

FST 190—Senior Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Senior standing or consent of instructor. Selected topics presented by students on recent advances in food science and technology. Reports and discussions concerning oral and written presentations, literature sources and career opportunities. GE credit: OL, SE. Effective: 1997 Winter Quarter.

FST 192—Internship for Advanced Undergraduates (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Work experience on or off campus in the practical application of food science. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study. May be taught abroad. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 201—Food Chemistry & Biochemistry (4)

Lecture—4 hour(s). Prerequisite(s): Undergraduate courses in organic chemistry and biochemistry; undergraduate course in food chemistry is recommended. Restricted to Food Science graduate level standing or consent of instructor. Advanced topics in food chemistry and biochemistry, emphasizing the application of the basic principles of chemistry and biochemistry to food composition, properties, preservation and processing. Chemical structures, interactions, reaction mechanisms and experimental methods are stressed. Effective: 2017 Fall Quarter.

FST 202—Physical Chemistry of Foods (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): CHE 107A; CHE 107B; BIS 102 recommended. Fundamental principles of chemistry and physics are applied to a study of changes in water binding properties and activity, changes in proteins, nutrients, toxic constituents, and other compounds during storage, heating, freezing, dehydrating, and concentrating of food materials. Effective: 2017 Winter Quarter.

FST 203—Food Processing (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): FST 110A; PHY 007C; CHE 107B; or Consent of Instructor. Principles of food engineering applied to food processing. Relationship of Newtonian and non-Newtonian fluid properties to heat and momentum transfer. Application of mass transfer in controlling kinetics and quality changes of foods. Effective: 2013 Spring Quarter.

FST 204—Advanced Food Microbiology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Undergraduate level coursework in microbiology, or consent of instructor. Principles and recent developments in food microbiology. Mechanisms of foodborne disease, pathogen detection, parameters of microbial growth and control in foods, intestinal microbiology including probiotics and prebiotics, and the microbiology of food and beverage fermentations. Effective: 2019 Winter Quarter.

FST 205—Industrial Microbiology (3)

Lecture—3 hour(s). Prerequisite(s): BIS 001A; BIS 102; BIS 103; MIC 130A and MIC 130B or BIS 101 recommended. Use of microorganisms for producing substances such as amino acids, peptides, enzymes, antibiotics and organic acids. Emphasis on metabolic regulation of pathways leading to fermentation products, on yeast fermentations, and on genetic manipulations (including recombinant DNA techniques) of industrial microorganisms. Effective: 1997 Winter Quarter.

FST 207—Advanced Sensory-Instrumental Analyses (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): FST 107; and Consent of Instructor. Basic principles of measurement of color, texture, and flavor of foods by sensory and instrumental methods. Advanced statistical analysis of relation of colorimetry, texturometry, and chemistry of volatile compounds to perception of appearance, texture, flavor. Effective: 1997 Winter Quarter.

FST 210—Proteins: Functional Activities & Interactions (3)

Lecture—3 hour(s). Prerequisite(s): BIS 103. Relationships of structure of proteins to their biological functions. Structural proteins, complexing proteins, and catalytic proteins in plant and animal materials and products. Effective: 1997 Winter Quarter.

FST 211—Lipids: Chemistry & Nutrition (3)

Lecture—3 hour(s). Prerequisite(s): BIS 103; CHE 107B; CHE 128B. Chemistry of lipids as it pertains to research in food and nutrition. Relations between lipid structure and their physical properties in tissues and foods. Regulation of absorption, transport, and metabolism of lipids. Implications of dietary fats and health. Effective: 1997 Winter Quarter.

FST 213—Flavor Chemistry of Foods & Beverages (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): CHE 008B; VEN 123; (VEN 123L or FST 103); or Consent of Instructor. Become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods. Required to read and critically evaluate flavor chemistry literature. (Same course as VEN 213.) Effective: 2009 Spring Quarter.

FST 217—Advanced Food Sensory Science (3)

Lecture—3 hour(s). Prerequisite(s): FST 107 (can be concurrent); or Consent of Instructor. Advanced study of the techniques and theory of the sensory measurement of food as an analytical tool and as a measure of consumer perception and acceptance. Advanced examination of the sensory and cognitive systems associated with the perception of food. Effective: 2010 Fall Quarter.

FST 219—Biochemistry, Microbiology & Technology of Cheeses of the World (4)

Lecture—4 hour(s). Prerequisite(s): FST 119; (BIS 103 or FST 100A); FST 123; BIS 103; CHE 107B; CHE 128B; or Consent of Instructor. Restricted to graduate level students or senior undergraduate students with appropriate background in biochemistry and microbiology. Compositional and physico-chemical aspects of milk and their implications on cheesemaking; enzymatic, microbiological and physical aspects of cheesemaking; cheese as a biological composite; designing cheese quality attributes; cheese aging. Cheese from all over the world tasted and discussed. Effective: 2008 Fall Quarter.

FST 227—Food Perception & the Chemical Senses (2)

Lecture—2 hour(s). Prerequisite(s): FST 107B (can be concurrent); and Consent of Instructor. Examination of the anatomy and physiology of the chemical senses (taste, smell, and the trigeminal senses) and how they are involved in the perception of food and food intake. Effective: 1997 Winter Quarter.

FST 228—Sustainable Food Systems (3)

Lecture/Discussion—3 hour(s). Environmental impacts of food systems. Methods for quantifying resource use and managing waste for food production and processing. Influence of policies, technologies, and consumer demand on advancing sustainable food systems. Effective: 2018 Fall Quarter.

FST 230—Food & Gut Microbiota (4)

Lecture—1.5 hour(s); Discussion—1.5 hour(s); Term Paper. Prerequisite(s): Microbiology and molecular biology undergraduate coursework or Consent of Instructor. Upper division or graduate standing. Impact of specific food structures on the structure and function of the animal gut microbiota. How food is transformed by, and modulates, the gut microbiota to provide the host with nutrients and protection. Effective: 2017 Spring Quarter.

FST 290—Seminar (1)

Seminar—1 hour(s). May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 290C—Advanced Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and evaluation of original research by graduate students. Planning of research programs and proposals. Discussion led by individual major instructors for their research group. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 291—Advanced Food Science Seminar (1)

Seminar—1 hour(s). Prerequisite(s): FST 290; Completion of at least one quarter of FST 290. Oral presentation of student's original research, discussion, and critical evaluation. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 298—Group Study (1-5)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

GAS—Gastroenterology

Courses in GAS:

GAS 192—Internship in Gastroenterology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in gastroenterology. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

GAS 299—Research (1-12)

Variable. Research in gastroenterology. (S/U grading only.) Effective: 1997 Winter Quarter.

GAS 460—Gastroenterology Clinical Clerkship (3-18)

Clinical Activity—30 hour(s). Prerequisite(s): Consent of Instructor. Completion of third-year of medical school. Work-up, manage, and follow-up new patients on active inpatient consulting service. Gastroenterology/Hepatology patients. Daily rounds with attending physician. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

GAS 480—Insights in Gastroenterology (1-3)

Clinical Activity—3-9 hour(s). Prerequisite(s): Consent of Instructor. Student in good academic standing. To gain insight in clinical activities of Gastroenterology Division through attendance at any of the following: endoscopic procedures, ward rounds, outpatient clinic, and G.I. grand rounds. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GAS 499—Research (1-12)

Clinical Activity. Prerequisite(s): Consent of Instructor. Medical student status. Part-time participation in active clinical and basic research projects. Some will involve both patient care and relevant laboratory procedures. Basic research includes liver metabolism, cancer markers, porphyrias diet and cancer, folate metabolism. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GDB—Global Disease Biology

Courses in GDB:

GDB 090—Introduction to Global Disease Biology (1)

Seminar—1 hour(s). Prerequisite(s): Open to GDB majors only, or Consent of Instructor. Open to Global Disease Biology majors only. Introduction to the Global Disease Biology major, research and internship opportunities, and potential career paths in human, animal, and plant health. Communication, ethics and the nature of science. (P/NP grading only.) Effective: 2019 Fall Quarter.

GDB 101—Epidemiology (4)

Lecture—2 hour(s); Laboratory—3 hour(s); Discussion—1 hour(s). Prerequisite(s): SAS 013; BIS 002A; BIS 002B; BIS 002C; ((STA 013 or STA 013Y) or (STA 100 or PLS 120)). Pass One restricted to Global Disease Biology majors only. Principles and practice of epidemiology as applied to human, animal, and plant populations and the environment in which these populations co-exist. Quantitative analysis of both infectious and non-infectious disease. Interdependence between epidemiological analysis, decision-making and policy formulation will be highlighted. GE credit: QL, SE. Effective: 2019 Fall Quarter.

GDB 102—Disease Intervention & Policy (4)

Lecture—3 hour(s); Discussion—1 hour(s); Project (Term Project). Prerequisite(s): GDB 101; SAS 013; BIS 002A; BIS 002B; BIS 002C; PMI 129Y; VME 158. Pass One restricted to Global Disease Biology majors only. Examination of the prevention and treatment of diseases affecting humans, animals, and plants. Case studies illustrate the merits of a unified approach to promoting health at local, regional, and global scales. GE credit: OL, SE, SL. Effective: 2019 Fall Quarter.

GDB 103—Microbiome of People, Animals, & Plants (3)

Lecture—3 hour(s). Prerequisite(s): BIS 002A; BIS 002B; BIS 002C. Examination of the structure and function of microbial communities that live inside and on host organisms. Introduction to general concepts of the microbiome and microbiota, and their relationship to host health and disease. GE credit: SE, SL. Effective: 2015 Fall Quarter.

GDB 187—Global Disease Biology Seminar (3)

Seminar—1 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): GDB 090; SAS 013. Open to junior standing; Global Disease Biology majors. Seminar leading to development of the research proposal and academic plan for the Global Disease Biology major. Effective: 2015 Fall Quarter.

GDB 189—Global Disease Biology Senior Research (3)

Independent Study—3 hour(s). Prerequisite(s): GDB 090; GDB 189D (can be concurrent); SAS 013; GDB 189D required concurrently the first time GDB 189 is taken. Restricted to senior standing; Global Disease Biology majors only. Capstone research experience for the Global Disease Biology major. Project may be experimental, library research, or some other creative activity. May be repeated up to 1 time(s) for student research conducted over two quarters; second quarter used to finish writing the research paper. (P/NP grading only.) Effective: 2015 Fall Quarter.

GDB 189D—Global Disease Biology Research Discussion (1)

Discussion—1 hour(s). Prerequisite(s): GDB 090; GDB 187; SAS 013; GDB 189; or Consent of Instructor. Restricted to junior standing; Global Disease Biology majors only. Prevent or solve problems during the students' research activity. Independent advising and assistance on research proposal. (P/NP grading only.) Effective: 2019 Fall Quarter.

GEL—Geology

Courses in GEL:

GEL 001—The Earth (4)

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have taken GEL 050; only 2 credits for students who have taken GEL 002. GE credit: SE, SL. Effective: 2019 Winter Quarter.

GEL 002—Earth System Science (3)

Lecture—3 hour(s). Solid and fluid earth and its place in the solar system. How the solid earth interacts with the atmosphere, hydrosphere, biosphere, and extraterrestrial environment. Only 2 units credit for students who have taken GEL 050; only 2 units credit for students who have taken GEL 001. GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 002G—Earth System Science Discussion (1)

Discussion—1 hour(s). Prerequisite(s): GEL 002 (can be concurrent); GEL 002 required concurrently. Small group discussion and preparation of short papers for GEL 002. GE credit: SE. Effective: 2018 Fall Quarter.

GEL 003—History of Life (3)

Lecture—3 hour(s). Prerequisite(s): GEL 001 recommended. The history of life during the three and one-half billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 003G—History of Life: Discussion (1)

Discussion—1 hour(s). Prerequisite(s): GEL 003 (can be concurrent); GEL 003 required concurrently. Small group discussion and preparation of short papers for GEL 003. GE credit with concurrent enrollment in GEL 003: WE. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 003L—History of Life Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): GEL 003 (can be concurrent); GEL 003 required concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 004—Evolution: Science & World View (3)

Lecture—2 hour(s); Discussion—1 hour(s). Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

GEL 009—Geology Field Experience (1)

Fieldwork—1 session(s). Prerequisite(s): Consent of Instructor. At least one previous GEL class, or concurrent enrollment. Pass One open to non-Geology Majors only. Exposure to geologic features and earth processes in the field. Experiential instruction in earth-science concepts, spatial visualization, landscape evolution, deep time, critical thinking skills, and integrative scientific themes. One 4-5 day field trip. May be repeated up to 1 time(s) when field trip destination differs. (P/NP grading only.) GE credit: SE. Effective: 2018 Fall Quarter.

GEL 010—Modern & Ancient Global Environmental Change (3)

Lecture—3 hour(s). Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of nonsustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

GEL 012—Evolution & Paleobiology of Dinosaurs (2)

Lecture—2 hour(s). Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 016—The Oceans (3)

Lecture—3 hour(s). Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources. Not open for credit to students who have taken GEL 116. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 016G—The Oceans: Discussion (2)

Discussion/Laboratory—2 hour(s); Term Paper/Discussion—4 hour(s). Prerequisite(s): GEL 016 (can be concurrent). Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper. Not open for credit to students who have taken GEL 116G. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 016V—The Oceans (3)

Web Virtual Lecture—3 hour(s). Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources. Not open for credit to students who have taken GEL 116. GE credit: SE, SL. Effective: 2020 Winter Quarter.

GEL 017—Earthquakes & Other Earth Hazards (2)

Lecture—2 hour(s). Impact of earthquakes, tsunami, volcanoes, landslides, and floods on humans, structures, and the environment. Discussion of the causes and effects of disasters and catastrophes, and on prediction, preparation, and mitigation of natural hazards. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 018—Energy & the Environment (3)

Lecture—3 hour(s). Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

GEL 018V—Energy & the Environment (3)

Web Virtual Lecture—1.5 hour(s); Web Electronic Discussion—1.5 hour(s). Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century. GE credit: SE, SL, WE. Effective: 2015 Winter Quarter.

GEL 020—Geology of California (2)

Lecture—2 hour(s). The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. Offered in alternate years. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

GEL 025—Geology of National Parks (3)

Lecture—3 hour(s). Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. GE credit: SE, SL, VL. Effective: 2014 Winter Quarter.

GEL 025V—Geology of National Parks (3)

Web Virtual Lecture—1 hour(s); Web Electronic Discussion—2 hour(s). Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. No credit for students who have completed GEL 025. GE credit: SE. Effective: 2015 Spring Quarter.

GEL 028—Astrobiology (3)

Lecture—3 hour(s). Origin, evolution and distribution of life in our solar system and the Universe. Detecting habitable worlds, Drake equations, necessities and raw materials for life, philosophical implications of the search for life elsewhere. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 030—Fractals, Chaos & Complexity (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): MAT 016A or MAT 017A or MAT 021A. Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. (Same course as PHY 030.) GE credit: QL, SE. Effective: 2020 Winter Quarter.

GEL 032—Volcanoes (3)

Lecture—3 hour(s). Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 035—Rivers (3)

Lecture—3 hour(s). Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 036—The Solar System (4)

Lecture—3 hour(s); Discussion—1 hour(s). Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course GEL 113 & GEL 113G.) GE credit: SE, VL, WE. Effective: 2013 Fall Quarter.

GEL 050—Physical Geology (3)

Lecture—3 hour(s). Prerequisite(s): High school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for GEL 001 or the equivalent may receive only 2 units for GEL 050. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 050L—Physical Geology Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): GEL 050 (can be concurrent). Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for GEL 001L or the equivalent may receive only 1 unit for GEL 050L. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 053—Introduction to Geobiology (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): GEL 001 or GEL 002 or GEL 050. Introduction to interactions between Earth and life with an emphasis on how metabolism, cellular processes, evolution and ecology emerged within natural environments and have changed Earth's surface. GE credit: SE. Effective: 2019 Fall Quarter.

GEL 055—Introduction to Geochemistry (3)

Lecture—3 hour(s). Prerequisite(s): (GEL 001 or GEL 002 or GEL 050); (CHE 002A or CHE 002AH); (CHE 002B or CHE 002BH). Introduction to key geochemical principles in Earth & Planetary Sciences; chemical bonding, geochemical affinity of elements, redox & acid base equilibria in geological systems, radioactive decay, isotopic fractionation and paleoclimate records. GE credit: QL, SE, VL. Effective: 2020 Winter Quarter.

GEL 056—Introduction to Geophysics (4)

Lecture/Discussion—3 hour(s); Laboratory—2 hour(s). Prerequisite(s): (GEL 001 or GEL 050); (PHY 007B or PHY 009B). Introduction to geophysical topics essential to all aspects of Earth and planetary sciences: theory of plate tectonics, gravitational field of planets, diffusion, rheology, seismology, and earthquakes. GE credit: QL, SE, VL. Effective: 2019 Spring Quarter.

GEL 060—Earth Materials: Introduction (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (CHE 002A or CHE 002AH); (MAT 016A or MAT 017A or MAT 021A); (GEL 001 or GEL 050); GEL 050L. Physical and chemical properties of Earth materials; structure, chemical composition, and identification of rock-forming minerals; mineral-rock associations, and their origin from silicate liquids, aqueous fluids, and solid state transformations. GE credit: SE. Effective: 2019 Fall Quarter.

GEL 062—Optical Mineralogy (2)

Lecture—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): GEL 060 (can be concurrent). Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section. GE credit: SE, VL. Effective: 2016 Fall Quarter.

GEL 081—Learning in Science & Mathematics (2)

Lecture/Discussion—2 hour(s); Fieldwork—2 hour(s). Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning. (Same course as EDU 081.) (P/NP grading only.) GE credit: SS, VL, WE. Effective: 2013 Fall Quarter.

GEL 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Work-learn experience on and off campus in all subject areas offered by the department. Internships supervised by a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 098—Directed Group Study (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated up to 3 time(s) when content differs. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Special study for undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 101—Structural Geology (3)

Lecture—3 hour(s). Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); (MAT 016A or MAT 017A or MAT 021A); Consent of Instructor. Limited to 35 students. Study of processes and products of rock deformation. Introduction to structural geology through a survey of the features and geometries of faults and folds, techniques of strain analysis, and continuum mechanics of rock deformation. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 101L—Structural Geology Lab (2)

Laboratory—6 hour(s); Fieldwork—2 hour(s). Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); GEL 101 (can be concurrent); Consent of Instructor. Limited to 15 students per session. Laboratory study of the processes and products of rock deformation. Introduction to the practice of structural geology through observations and analysis of rock deformation, including field measurement techniques and geologic mapping. GE credit: SE, VL. Effective: 2016 Fall Quarter.

GEL 103—Field Geology (4)

Lecture—1 hour(s); Fieldwork—6 hour(s); Term Paper. Prerequisite(s): GEL 101; GEL 101L. Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days for field trips will occur on weekends during the quarter. GE credit: SE, SL, VL, WE. Effective: 2020 Spring Quarter.

GEL 105—Earth Materials: Igneous Rocks (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): GEL 060; (MAT 016A or MAT 017A or MAT 021A); CHE 002B (can be concurrent). Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SE, WE. Effective: 2020 Winter Quarter.

GEL 106—Earth Materials: Metamorphic Rocks (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): GEL 105. Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 107—Earth History: Paleobiology (3)

Lecture—3 hour(s). Prerequisite(s): GEL 003 or GEL 053 or BIS 002A or BIS 002B. Evolution and ecological structure of the biosphere from the origin of life to the present. GE credit: SE. Effective: 2020 Spring Quarter.

GEL 107L—Earth History: Paleobiology Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): GEL 107 (can be concurrent). Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory. GE credit: SE. Effective: 2020 Spring Quarter.

GEL 108—Earth History: Paleoclimates (3)

Lecture—3 hour(s). Prerequisite(s): (GEL 001 or GEL 050 or GEL 116N or ESP 116N); CHE 002A; Consent of Instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SE, SL, WE. Effective: 2016 Fall Quarter.

GEL 109—Earth History: Sediments & Strata (3)

Lecture—3 hour(s). Prerequisite(s): (GEL 001 or GEL 050); GEL 050L. Sediment formation, transport, and deposition. Interpretations of sedimentary processes across landscapes and through time in the context of environmental and geological problems. Reconstruction of ancient environmental change from sedimentary rocks. GE credit: SE. Effective: 2019 Fall Quarter.

GEL 109L—Earth History: Sediments & Strata Laboratory (2)

Laboratory—6 hour(s). Prerequisite(s): GEL 109 (can be concurrent). Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit with concurrent enrollment in GEL 109. Includes four one-day field trips. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 110—Summer Field Geology (8) *Review all entries*

Fieldwork. Prerequisite(s): GEL 060; GEL 103; GEL 109; GEL 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. Eight hours/day, six days/week for six weeks. GE credit: SE, VL, WE. Effective: 2017 Spring Quarter.

GEL 110—Summer Field Geology (8) *Review all entries Discontinued*

Fieldwork. Prerequisite(s): GEL 060; GEL 103; GEL 109; GEL 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. Eight hours/day, six days/week for six weeks. GE credit: SE, VL, WE. Effective: 2020 Summer Special Session.

GEL 110A—Summer Field Geology: Structures & Neotectonics (4)

Fieldwork—40 hour(s). Prerequisite(s): GEL 060; GEL 103; GEL 109. Advanced application of geologic field methods to the study of deformed rocks and their interpretation in terms of tectonic processes. Includes development and interpretation of geologic maps, cross sections and stratigraphic sections. Six days/week for three weeks in an off-campus location. Not open for credit to students who have taken GEL 110. GE credit: SE, SL, VL, WE. Effective: 2020 Summer Special Session.

GEL 110B—Summer Field Geology: Volcanology (4)

Fieldwork—40 hour(s). Prerequisite(s): GEL 105; GEL 109. Advanced application of geologic field methods to the study of volcanic and plutonic rocks and their interpretation in terms of igneous processes. Includes development and interpretation of geologic maps, cross sections, stratigraphic sections, and outcrop scale observations. Six days/week for three weeks in an off-campus location. Not open for credit to students who have taken GEL 110. GE credit: SE, SL, VL, WE. Effective: 2020 Summer Special Session.

GEL 110C—Summer Field Geology: Special Projects (4)

Fieldwork—40 hour(s). Prerequisite(s): Consent of Instructor. Advanced application of geologic field methods to a special project location and the interpretation of field observations in terms of its geologic processes and geologic history. Variable field location and specific activities. Six days/week for three weeks in an off-campus location. GE credit: SE, SL, WE. Effective: 2020 Summer Special Session.

GEL 115—Earth Science, History, & People (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): GEL 001 or GEL 050. Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: OL, SE, WE. Effective: 2017 Winter Quarter.

GEL 116N—Oceanography (3)

Lecture—2 hour(s); Laboratory—3 hour(s); Fieldwork. Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 050. Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as ESP 116N.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 120—Origins: From the Big Bang to Today (3)

Lecture—3 hour(s). Limited enrollment. Long-term and large-scale perspectives on the origins of the universe, stars and planets, life, human evolution, the rise of civilization and the modern world. Multi-disciplinary approach to "Big History" involving cosmology, astronomy, geology, climatology, biology, anthropology, archeology and traditional history. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 130—Non-Renewable Natural Resources (3)

Lecture—3 hour(s). Prerequisite(s): GEL 001 or GEL 050. Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 131—Risk: Natural Hazards & Related Phenomena (3)

Lecture—3 hour(s). Risk, prediction, prevention and response for earthquakes, volcanic eruptions, landslides, floods, storms, fires, impacts, global warming. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 132—Introductory Inorganic Geochemistry (3)

Lecture—3 hour(s). Prerequisite(s): GEL 060 (can be concurrent); CHE 002B. Nucleosynthesis of chemical elements, physical and chemical properties of elements, ionic substitution, elemental partition, distribution and transport among planetary materials, basic thermodynamics and phase diagrams, isotopic geochronometers, stable isotope fractionation, mixing and dilution, advection and diffusion, geochemical cycles. Effective: 2016 Fall Quarter.

GEL 133—Environmental Geochemistry (3)

Lecture—3 hour(s). Prerequisite(s): CHE 002A; CHE 002B. Introduction to Earth surface processes with a focus on topics of current environmental interest such as nuclear power and waste disposal, acid mine drainage, carbon sequestration, history of polar ice sheets and sea level change. Effective: 2020 Spring Quarter.

GEL 134—Environmental Geology & Land Use Planning (3)

Lecture—3 hour(s). Prerequisite(s): GEL 001 or GEL 050; Consent of Instructor. One course in Geology (GEL). Geologic aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 136—Ecogeomorphology of Rivers & Streams (5)

Lecture—1 hour(s); Discussion/Laboratory—2 hour(s); Fieldwork; Term Paper. Prerequisite(s): Consent of Instructor. Upper division or graduate standing in any physical science, biological science, or engineering. Restricted to advanced students in the physical sciences, biological sciences, or engineering. Integrative multidisciplinary field analysis of streams. Class project examines hydrology, geomorphology, water quality and aquatic and riparian ecology of degraded and pristine stream systems. Includes cooperative two-week field survey in remote wilderness settings with students from diverse scientific backgrounds. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 138—Introductory Volcanology (4)

Lecture—2 hour(s); Fieldwork—6 hour(s). Prerequisite(s): GEL 060; GEL 109; Consent of Instructor. Principles of physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field component. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 139—Rivers: Form, Function & Management (4)

Lecture—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): GEL 050 or GEL 050L; MAT 016B or MAT 017B or MAT 021B recommended. Analysis of river form and processes, emphasis on fluvial geomorphology, and river and stream restoration; case studies to illustrate concepts and applications. Two weekend field trips required. Offered irregularly. GE credit: SE. Effective: 2020 Winter Quarter.

GEL 140—Introduction to Process Geomorphology (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (GEL 001 or GEL 050); (MAT 016B or MAT 017B or MAT 021B). Quantitative description and interpretation of landscapes with emphasis on the relationships between physical processes, mass conservation, and landform evolution. Topics covered include physical & chemical weathering, hillslopes, debris flows, fluvial systems, alluvial fans, pedogenesis, eolian transport, glaciation and Quaternary geochronology. Effective: 2020 Winter Quarter.

GEL 141—Evolutionary History of Vertebrates (3)

Lecture—3 hour(s). Prerequisite(s): GEL 003 or GEL 053 or BIS 002A. Evolutionary history of vertebrates; fossil record and phylogeny; timing of major evolutionary events; appearance of major vertebrate groups; physical constraints in vertebrate evolution; paleobiogeography of vertebrates; effect of continental movement on vertebrate evolution; dinosaurs and other strange vertebrates. Offered in alternate years. GE credit: SE. Effective: 2020 Winter Quarter.

GEL 141L—Evolutionary History of Vertebrates Laboratory (1)

Laboratory—3 hour(s). Prerequisite(s): GEL 141 (can be concurrent). Augments lecture GEL 141 through handling of specimens enabling in-person examination of three dimensional features observed in vertebrate skeletons, both fossil and living. Offered in alternate years. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 142—Basin Analysis (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): GEL 050; GEL 050L; GEL 109. Analysis of sedimentary basins from initiation to maturity, including controls on sedimentary fill, subsidence analysis, sequence stratigraphy, core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered irregularly. GE credit: SE, VL. Effective: 2013 Fall Quarter.

GEL 143—Advanced Igneous Petrology (5)

Lecture—3 hour(s); Laboratory—6 hour(s). Prerequisite(s): GEL 105; (MAT 016C or MAT 017C or MAT 021C); (CHE 002C or GEL 055). Physical and chemical properties of magmatic environments and processes of igneous rock formation. Laboratory study of representative igneous rocks. Offered irregularly. GE credit: SE. Effective: 2020 Winter Quarter.

GEL 144—Historical Ecology (3)

Lecture—3 hour(s). Prerequisite(s): Upper division course in environmental science or ecology, or an introductory course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion, evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical perspective on the biosphere of future. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 145—Advanced Metamorphic Petrology (5)

Lecture—3 hour(s); Laboratory—6 hour(s). Prerequisite(s): GEL 106; (HYD 134 or CHE 002C or GEL 055); (MAT 016C or MAT 017C or MAT 021C). Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites. Offered irregularly. GE credit: SE. Effective: 2020 Winter Quarter.

GEL 146—Radiogenic Isotope Geochemistry & Cosmochemistry (3) *Review all entries*

Lecture—3 hour(s). Prerequisite(s): (CHE 002C or GEL 055); (PHY 007C or PHY 009C or GEL 056); (MAT 016C or MAT 017C or MAT 021C). Basic principles of nuclear chemistry and physics applied to geology to determine the ages of terrestrial rocks, meteorites, archeological objects, age of the Earth, to trace geological/environmental processes, and explain formation of the chemical elements in the Universe. Offered irregularly. GE credit: QL, SE. Effective: 2020 Fall Quarter.

GEL 146—Radiogenic Isotope Geochemistry & Cosmochemistry (3) *Review all entries*

Lecture—3 hour(s). Prerequisite(s): CHE 002C; PHY 007C; MAT 016C. Basic principles of nuclear chemistry and physics applied to geology to determine the ages of terrestrial rocks, meteorites, archeological objects, age of the Earth, to trace geological/environmental processes, and explain formation of the chemical elements in the Universe. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 147—Geology of Ore Deposits (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (CHE 002C or HYD 134); GEL 060; GEL 062; GEL 105. Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 147—Geology of Ore Deposits (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (CHE 002C or GEL 055 or HYD 134); GEL 060; GEL 105. Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered irregularly. GE credit: QL, SE. Effective: 2020 Fall Quarter.

GEL 148—Stable Isotopes & Geochemical Tracers (3) *Review all entries*

Lecture—3 hour(s). Prerequisite(s): (CHE 002C or GEL 055 or HYD 134); GEL 050; GEL 050L; GEL 060. Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered irregularly. GE credit: QL, SE. Effective: 2020 Fall Quarter.

GEL 148—Stable Isotopes & Geochemical Tracers (3) *Review all entries*

Lecture—3 hour(s). Prerequisite(s): (CHE 002C or HYD 134); GEL 050; GEL 050L; GEL 060. Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 149—Geothermal Systems (3)

Lecture—3 hour(s); Fieldwork. Prerequisite(s): GEL 050; GEL 050L; CHE 002B. Geology, geochemistry, and geophysics of geothermal systems, including electrical power generation and direct use applications. Includes one day field trip on a weekend during the quarter. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 150A—Physical & Chemical Oceanography (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (ESP 116N or GEL 116N); (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (CHE 002C or GEL 055); and Consent of Instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as ESP 150A.) GE credit: QL, SE. Effective: 2020 Winter Quarter.

GEL 150B—Geological Oceanography (3)

Lecture—3 hour(s). Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N). Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as ESP 150B.) GE credit: SE. Effective: 2017 Winter Quarter.

GEL 150C—Biological Oceanography (4)

Lecture—3 hour(s); Discussion—1 hour(s); Fieldwork. Prerequisite(s): BIS 002A; Consent of Instructor. A course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required. (Same course as ESP 150C.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 152—Paleobiology of Protista (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): GEL 107 or BIS 002A; Consent of Instructor. Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 156—Hydrogeology & Contaminant Transport (5)

Lecture—3 hour(s); Laboratory—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): HYD 144 or ECI 144; Or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as HYD 146.) GE credit: SE. Effective: 2020 Spring Quarter.

GEL 160—Geological Data Analysis (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): MAT 016A or MAT 017A or MAT 021A. Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. GE credit: QL, SE. Effective: 2020 Winter Quarter.

GEL 161—Geophysical Field Methods (3)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): (GEL 001 or GEL 050); (MAT 016C or MAT 017C or MAT 021C); (PHY 007C or PHY 009C or GEL 056). Geophysical methods applied to determining subsurface structure in tectonics, hydrogeology, geotechnical engineering, hydrocarbon and mineral exploration. Theory, survey design & interpretation of gravity, electrical resistivity, electromagnetic, reflection & refraction seismology, and ground-penetrating radar measurements. GE credit: QL, SE. Effective: 2020 Winter Quarter.

GEL 162—Geophysics of the Solid Earth (3)

Lecture—3 hour(s). Prerequisite(s): (MAT 016C or MAT 017C or MAT 021C); (PHY 007C or PHY 009C or GEL 056); Consent of Instructor. Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered irregularly. GE credit: QL, SE. Effective: 2020 Winter Quarter.

GEL 163—Planetary Geology & Geophysics (3)

Lecture—3 hour(s). Prerequisite(s): (GEL 001 or GEL 002 or GEL 028 or GEL 036 or GEL 050 or AST 010G or AST 010L or AST 010S or AST 025); (MAT 016A or MAT 017A or MAT 021A); (PHY 007A or PHY 009A); or High School Physics. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. GE credit: QL, SE. Effective: 2019 Winter Quarter.

GEL 175—Advanced Field Geology (3)

Discussion—3 hour(s); Fieldwork—6 hour(s). Prerequisite(s): Consent of Instructor. Advanced field studies of selected geologic terrains, interpretation and discussion of field observations. Offered irregularly. May be repeated up to 2 time(s) when instructors differs. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 181—Teaching in Science & Mathematics (2)

Lecture/Discussion—2 hour(s); Fieldwork—2 hour(s). Prerequisite(s): Consent of Instructor. Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus. Limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as EDU 181.) (P/NP grading only.) GE credit: SS, WE. Effective: 2013 Fall Quarter.

GEL 182—Field Studies in Marine Geochemistry (2-8)

Lecture—3 hour(s); Laboratory—1-3 hour(s); Fieldwork—6-40 hour(s). Prerequisite(s): Consent of Instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Offered irregularly. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 183—Teaching High School Mathematics & Science (3)

Lecture/Discussion—2 hour(s); Fieldwork. Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as EDU 183.) GE credit: OL, SS, WE. Effective: 2018 Fall Quarter.

GEL 185A—Conceptual Integrated Science for Non-Science Majors: The Physical World (2)

Lecture—1 hour(s); Discussion/Laboratory—3 hour(s). Conceptual, inquiry-based integrated science course. Topics in the Next Generation Science Standards. Elementary school level teaching practice. Physics, chemistry, and science inquiry. GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 185B—Conceptual Integrated Science for Non-Science Majors: Earth System Science (2)

Lecture—1 hour(s); Discussion/Laboratory—3 hour(s). Conceptual, inquiry-based integrated science course. Topics in the Next Generation Science Standards. Elementary school level teaching practice. Earth, space and environmental science, and science inquiry. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 186—Facilitating Learning in STEM Classrooms (1)

Lecture/Discussion—1 hour(s). STEM Learning Assistant Seminar. Theoretical and practical issues of effective teaching in discussion/labs: student-centered, active, cooperative learning environments, responsive teaching, and differentiated classroom instruction. GE credit: SS. Effective: 2016 Fall Quarter.

GEL 190—Seminar in Geology (1)

Discussion—1 hour(s); Seminar—1 hour(s). Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. Written abstracts. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

GEL 192—Internship in Geology (1-12)

Internship. Prerequisite(s): Upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated up to 10 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 194A—Senior Thesis (3)

Variable. Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of a senior thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194B—Senior Thesis (3)

Variable. Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of a senior thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194HA—Senior Honors Project (3)

Independent Study—9 hour(s). Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of an honors thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194HB—Senior Honors Project (3)

Independent Study—9 hour(s). Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of an honors thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 198—Directed Group Study (1-5)

Variable—3-15 hour(s). Prerequisite(s): Senior standing in Geology or consent of instructor. Group study focused on topics in Geology. (P/NP grading only.) GE credit: SE. Effective: 2016 Spring Quarter.

GEL 199—Special Study for Advanced Undergraduates (1-5)

Variable. Special study for advanced undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 205—Advanced Field Stratigraphy (3)

Lecture—1 hour(s); Fieldwork—2 hour(s). Prerequisite(s): GEL 109; GEL 110; or Consent of Instructor. GEL 206 recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 206—Stratigraphic Analysis (3)

Lecture—3 hour(s). Prerequisite(s): GEL 109; GEL 109L; or Consent of Instructor. GEL 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 214—Active Tectonics (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 216—Tectonics (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): GEL 101; or Consent of Instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth's deformed belts. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 217—Topics in Geophysics (3)

Lecture—1 hour(s); Seminar—2 hour(s). Prerequisite(s): Consent of Instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. Offered in alternate years. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 218—Analysis of Structures in Deformed Rocks (3)

Seminar—3 hour(s). Prerequisite(s): GEL 101; GEL 101L; or Consent of Instructor. Recent advances in the understanding and analysis of structures in brittlely and ductilely deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered irregularly. Effective: 2020 Winter Quarter.

GEL 219—Fracture & Flow of Rocks (3)

Lecture—3 hour(s). Prerequisite(s): GEL 101; or Consent of Instructor. Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered irregularly. Effective: 2020 Winter Quarter.

GEL 220—Mechanics of Geologic Structures (3)

Lecture—3 hour(s). Prerequisite(s): PHY 009A; MAT 021C; or Consent of Instructor. MAT 021D and (MAT 022A or MAT 027A or BIS 027A recommended.). Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic structures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered irregularly. Effective: 2020 Winter Quarter.

GEL 226—Advanced Sedimentary Petrology (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): GEL 144; or Consent of Instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 227—Stable Isotopes Biogeochemistry (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Discussion and application of stable isotope techniques for scientific research problems. Emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory develops basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 228—Topics in Paleoceanography (3)

Lecture—3 hour(s). Prerequisite(s): GEL 108; GEL 150A; or Consent of Instructor. Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the geologic record. Topics vary. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 230—Geomorphology & River Management (3)

Seminar—3 hour(s). Prerequisite(s): GEL 139; Or equivalent; graduate standing. Impacts of management and land use activities on the geomorphology of rivers and streams. Evaluation and use of analytical tools for river assessment. Assessment of river and stream restoration strategies and emerging issues in river management. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 232—Oceans & Climate Change (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Modern climate change and linkages between the ocean-atmosphere-cryosphere-terrestrial climate system. Importance of the ocean in forcing climate change, and the impacts of anthropogenic processes on the ocean. Topics vary. Offered irregularly. May be repeated up to 3 time(s). Effective: 2013 Fall Quarter.

GEL 235—Surface Processes (3)

Seminar—3 hour(s). Prerequisite(s): GEL 050; GEL 050L; MAT 016B or MAT 017B or MAT 021B recommended. Recent advances in the analysis of landforms and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. Offered irregularly. May be repeated for credit. Effective: 2020 Winter Quarter.

GEL 236—Inverse Theory in Geology & Geophysics (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Inversion of data for model parameters. Evaluation of parameter uncertainties. Linear and nonlinear problems for discrete and continuous models. Bakus-Gilbert inversion. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 238—Theoretical Seismology (3)

Lecture—3 hour(s). Prerequisite(s): Consent of Instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. (P/F grading only.) Effective: 2013 Fall Quarter.

GEL 240—Geophysics of the Earth (3)

Lecture—3 hour(s). Prerequisite(s): PHY 009B; (MAT 022B or MAT 027B or BIS 027B). Physics of the earth's crust, mantle, and core. Laplace's equation and spherical harmonic expression of gravity and magnetic fields. Elastic wave equation in geologic media. Body and surface seismic waves. Equations of state, thermal structure of the earth. Offered irregularly. Effective: 2020 Winter Quarter.

GEL 241—Geomagnetism (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing. Nature and origin of the Earth's magnetic field. Present field and recent secular variation. Spherical harmonic analysis. Paleosecular variation. Polarity transitions and geomagnetic excursions. Statistics of polarity intervals. Dynamo theory. Planetary magnetism. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 242—Paleomagnetism (3)

Lecture—3 hour(s). Prerequisite(s): Graduate standing. Principles and applications of paleomagnetism. Physical basis of rock and mineral magnetism. Field and laboratory techniques. Instrumentation. Analysis of paleomagnetic data. Statistical methods. Rock magnetic properties. Geological and geophysical applications. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 246—Physical Chemistry of Metamorphic Processes (3)

Lecture—3 hour(s). Prerequisite(s): GEL 145; CHE 110A; or Consent of Instructor. Physiochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 247—Metamorphic Petrology Seminar (3)

Seminar—3 hour(s). Prerequisite(s): GEL 145; or Consent of Instructor. GEL 246 recommended. Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). Offered irregularly. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 250—Advanced Geochemistry Seminar (3)

Seminar—3 hour(s). Prerequisite(s): GEL 146; or Consent of Instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geology, origin and chemistry of the oceans. Subject varies yearly depending on student interest. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 251—Advanced Topics in Isotope Geochemistry & Cosmochemistry (3)

Lecture/Discussion—2 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Astrophysical context on origin of Solar System, synthesis of chemical elements, condensation sequence, star and planet formation, cosmochronology, building blocks of planets, development on planets' layered structure, atmosphere and hydrosphere and the role of comets/asteroids for volatile delivery. Offered irregularly. May be repeated up to 3 time(s) when topics differs. Effective: 2013 Fall Quarter.

GEL 253—Current Topics in Igneous Petrology (3)

Seminar—3 hour(s). Prerequisite(s): GEL 143; or Consent of Instructor. Graduate standing in Geology. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 254—Physical Chemistry of Igneous Processes (3)

Lecture—3 hour(s). Prerequisite(s): CHE 110A; GEL 143; and Consent of Instructor. GEL 143 or consent of instructor; CHE 110B and CHE 110C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 255—Experimental Petrology (3)

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): GEL 143; or Consent of Instructor. Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 260—Paleontology (3)

Seminar—3 hour(s). Prerequisite(s): Graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 261—Paleobiology Graduate Seminar 1: Evolutionary Aspects (3)

Lecture—1 hour(s); Seminar—2 hour(s). Prerequisite(s): Graduate standing in Geology or a biological science; qualified undergraduates will be accepted on an exception-only basis. Treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction & phylogeny, phylogeny of major phyla, and the relation between taxonomy & phylogeny. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 262—Paleobiology Graduate Seminar: Methodological Aspects (3)

Lecture—1 hour(s); Seminar—2 hour(s). One or more major methods used in the study of fossils: Morphometrics and three-dimensional reconstruction of fossils, phylogenetic methodology, the application of geochemical techniques, and electron microscopy. May be repeated up to 4 time(s) when topic differs. Effective: 2013 Fall Quarter.

GEL 281N—Instrumental Techniques for Earth Scientists (3) *Review all entries*

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); (MAT 016C or MAT 017C or MAT 021C); ((PHY 007A or PHY 009A); (PHY 007B or PHY 009B); (PHY 007C or PHY 009C)); or Consent of Instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research. Effective: 2020 Fall Quarter.

GEL 281N—Instrumental Techniques for Earth Scientists (3) *Review all entries*

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): MAT 021A; MAT 021B; MAT 021C; ((PHY 007A, PHY 007B, PHY 007C) or (PHY 009A, PHY 009B, PHY 009C)); or Consent of Instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research. Effective: 2013 Fall Quarter.

GEL 285—Field Studies in Marine Geochemistry (2-8)

Lecture—3 hour(s); Laboratory—1-3 hour(s); Fieldwork—6-40 hour(s). Prerequisite(s): Consent of Instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of seafloor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Effective: 2013 Fall Quarter.

GEL 290—Seminar in Geology (1)

Seminar—1 hour(s); Discussion—1 hour(s). Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 291—Geology of the Sierra Nevada (1)

Seminar. Prerequisite(s): Consent of Instructor. Short oral presentations by students and faculty concerning results of their past work and plans for future work in the Sierra. A written abstract is required following the format required at professional meetings. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 292—River Forum (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing. Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 293—Geologic Event of the Week (1)

Seminar—0.5 hour(s); Discussion—0.5 hour(s). Prerequisite(s): Graduate standing. Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observations, the physical processes behind each event, the geological setting, and societal consequences. Offered irregularly. May be repeated up to 3 time(s) up to 3 units. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 294—Structure/Tectonics Forum (1)

Seminar—1 hour(s). Prerequisite(s): Graduate student in geology or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 295—Geophysics Forum (1)

Seminar—0.5 hour(s); Discussion—0.5 hour(s). Prerequisite(s): GEL 101; or Consent of Instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2020 Winter Quarter.

GEL 296—Advanced Problems in Tectonics (3)

Seminar—3 hour(s). Prerequisite(s): GEL 101; and Consent of Instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. Offered irregularly. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 297—Geophysics Forum (1)

Seminar—0.5 hour(s); Discussion—0.5 hour(s). Prerequisite(s): Graduate student status in the Geology Department, or consent of instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 298—Group Study (1-5)

Variable. Group study. Effective: 2013 Fall Quarter.

GEL 299—Research (1-12)

Variable. Research. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 390—Methods of Teaching Geology (2)

Extensive Writing/Discussion—2 hour(s). Prerequisite(s): Graduate student standing in Geology. Introduction to graduate-level writing and undergraduate-level teaching skills in geology. Persuasive (proposal) writing workshop; discussions on campus teaching resources, presenting information, managing classroom dynamics, evaluating student performance. Participation in teaching program required for Ph.D. in Geology. (S/U grading only.) Effective: 2014 Spring Quarter.

GEL 391—Ethical Issues in Earth Science (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing in Geology or consent of instructor. Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 396—Teaching Assistant Training Practicum (1-4)

Variable. Teaching assistant training. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

GEO—Geography

Courses in GEO:

GEO 200A—Research Trends in Geography (1)

Seminar—1 hour(s). Major current research themes and trends in geography. (S/U grading only.) Effective: 1999 Fall Quarter.

GEO 200AN—Geographical Concepts (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Graduate standing in Geography or consent of instructor. Concepts and thematic content of the discipline, including contemporary research questions. A brief review of the history of geographic thought and practice is done at the beginning of the course. Effective: 2011 Fall Quarter.

GEO 200BN—Theory & Practice of Geography (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing. Limited to 20 students. Development, application, and philosophical background of theory in discipline of geography and geographical knowledge production. Similarities and differences in theories employed in physical and human geography and cartography. Geographic contributions to interdisciplinary theory bridging biophysical sciences, social sciences, and humanities. Effective: 2011 Fall Quarter.

GEO 200CN—Quantitative Geography (4)

Lecture—2 hour(s); Laboratory—6 hour(s). Limited to 25 students. Provides an overview of quantitative approaches in spatial data analysis. Overview of different approaches used for inference, modeling, and prediction. Also learn how to write computer programs to implement these methods. Effective: 2012 Spring Quarter.

GEO 200DN—Socio-Spatial Analysis in Geography (4)

Lecture/Discussion—4 hour(s). Limited to 25 students. Introduction to methodologies of socio-spatial analysis in interviews, and ethnographic fieldwork. Students develop a critical understanding of different methodological and theoretical approaches, and their appropriate applications in overall research design. Effective: 2011 Fall Quarter.

GEO 200E—Advanced Research Design in Geography (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): GEO 200AN; GEO 200BN; GEO 200CN; GEO 200DN; Graduate standing. Limited to 15 students. Helps Ph.D. students develop their research question, design their research plan and complete a full dissertation research proposal. Effective: 2011 Fall Quarter.

GEO 201—Sources & General Literature of Geography (4)

Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing in geography. Designed for students preparing for higher degrees in geography. May be repeated for credit in one or more subfields: physical, cultural, economic, urban, historical, political, conservation, regional geography. Effective: 1997 Winter Quarter.

GEO 210—Topics in Biogeography (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): EVE 147 or WFC 156 (can be concurrent); Or equivalent. Consent of instructor required for undergraduates. Current topics in historical and ecological biogeography, including macroecology and areography, GIS and remote sensing, phylogeography, vegetation, plant and animal community and species geography. Systematics, climate change, and conservation will be addressed. Effective: 2004 Fall Quarter.

GEO 211—Physical Geography Traditions & Methods (3)

Discussion/Laboratory—2 hour(s); Term Paper. Prerequisite(s): Introductory course in physical geography. Graduate-level standing in geography or related discipline. Discussion of the physical science tradition in geography, including key concepts and current research in climatology, geomorphology, soils geography, biogeography, climate change, watershed science, and coastal studies. Research paradigms, programs, and methods as used by physical geographers will be discussed. May be repeated up to 3 time(s). Effective: 2008 Fall Quarter.

GEO 212—Water Resource Management (3)

Lecture—3 hour(s). Prerequisite(s): GEO 114; GEO 141; GEO 142; GEO 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as ECI 267.) Effective: 2013 Fall Quarter.

GEO 214—Seminar in Geographical Ecology (2)

Seminar—2 hour(s). Prerequisite(s): EVE 100 or EVE 101; or Consent of Instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. May be repeated for credit. (Same course as PBG 296.) (S/U grading only.) Effective: 2013 Spring Quarter.

GEO 215—Ecologies of Infrastructure (4)

Seminar—4 hour(s). Open to graduate standing or consent of instructor. Focus on design practices and theory associated with ecological conceptions of infrastructure, including networked infrastructure, region, bioregion, regionalization, ecological engineering, reconciliation ecology, novel ecosystems, and theory/articulation of landscape change. (Same course as LDA 215.) Effective: 2016 Winter Quarter.

GEO 220—Topics in Human Geography (4)

Seminar—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Limited to 20 students. Examination of philosophy and theory in human geography with an emphasis on contemporary debates and concepts in social, cultural, humanistic, political, and economic geographies. Specific discussion of space, place, scale and landscape; material and imagined geographies. Effective: 2016 Winter Quarter.

GEO 230—Citizenship, Democracy, & Public Space (4)

Seminar—4 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as LDA 200.) Effective: 2012 Fall Quarter.

GEO 233—Urban Planning & Design (4)

Lecture—2 hour(s); Discussion—2 hour(s). Limited to graduate students. Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals. (Same course as LDA 205.) Effective: 2016 Winter Quarter.

GEO 236—Transportation Planning & Policy (4)

Lecture/Discussion—4 hour(s). Limited enrollment. Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies. Students taking this course previously as TTP 289 cannot repeat it for credit; taking other TTP 289 offerings does not preclude taking TTP 220 for credit. (Same course as TTP 220.) Effective: 2013 Winter Quarter.

GEO 240—Community Development Theory (4)

Lecture/Discussion—4 hour(s). Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects. (Same course as CRD 240.) Effective: 2014 Winter Quarter.

GEO 241—The Economics of Community Development (4)

Seminar—4 hour(s). Prerequisite(s): Graduate standing. Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy. (Same course as CRD 241.) Effective: 2015 Spring Quarter.

GEO 245—The Political Economy of Urban & Regional Development (4)

Lecture—4 hour(s). Prerequisite(s): CRD 157; CRD 244; Or the equivalent. How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California. (Same course as CRD 245.) Effective: 2014 Spring Quarter.

GEO 246—The Political Economy of Transnational Migration (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as CRD 246.) Effective: 2014 Winter Quarter.

GEO 248—Social Policy, Welfare Theories & Communities (4)

Seminar—4 hour(s). Prerequisite(s): Graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context. Not open for credit to students having completed CRD 248A and CRD 248B. (Same course as CRD 248.) Effective: 2011 Fall Quarter.

GEO 254—Political Ecology of Community Development (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing. Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries. (Same course as CRD 244.) Effective: 2014 Winter Quarter.

GEO 260—Global Political Ecology (4)

Seminar—3 hour(s); Term Paper/Discussion—1 hour(s). Open to graduate students only or consent of instructor. Background, genesis, current debates in political ecology. Examination of political-economic and social-cultural causes of environmental change. Introduction to development theory, globalization, history of science and power/knowledge. Cases of social movements, justice, resistance, gender, race and class. Focus outside North America. Effective: 2014 Fall Quarter.

GEO 279—Exploring Data from Built Environment Using R (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Introduction to modern data science, specifically data acquisition, exploratory data, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment. (Same course as ECI 254.) Effective: 2017 Fall Quarter.

GEO 280—Field Studies in Geography (3)

Lecture—1 hour(s); Fieldwork—6 hour(s). Prerequisite(s): Consent of Instructor. Undergraduate or graduate coursework in geography. Limited to 20 students. A topic or sub-discipline of geography forms the theme for the course in any given offering, with a focus on current research on this topic, field methodologies, and data analysis in human and physical geography. May be repeated up to 2 time(s). Effective: 2005 Spring Quarter.

GEO 281—Transportation Survey Methods (4)

Lecture—4 hour(s). Prerequisite(s): (STA 013 or STA 013Y); ECI 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have taken ECI 255. (Same course as TTP 200.) Effective: 2018 Spring Quarter.

GEO 286—Selected Topics in Environmental Remote Sensing (3)

Discussion—2 hour(s); Lecture—1 hour(s); Project (Term Project). Prerequisite(s): ERS 186; and Consent of Instructor. Or equivalent required; ERS 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. May be repeated for credit. (Same course as HYD 286.) Effective: 2014 Fall Quarter.

GEO 290—Seminar in Geography (1-3)

Seminar—1-3 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Seminar focuses on specified topical areas within geography, which will vary quarter to quarter. Students expected to present an oral seminar on an aspect of the general topic under discussion. May be repeated up to 6 time(s). (S/U grading only.) Effective: 2008 Fall Quarter.

GEO 291—Seminar in Cultural Geography (4)

Seminar—3 hour(s). Effective: 1997 Winter Quarter.

GEO 293—Graduate Internship (1-12)

Variable—3-36 hour(s). Prerequisite(s): Consent of Instructor. Individually designed, supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

GEO 295—Seminar in Urban Geography (4)

Seminar—3 hour(s). Effective: 1997 Winter Quarter.

GEO 297—Graduate Group in Geography (2)

Lecture/Discussion—1 hour(s); Term Paper. Prerequisite(s): Graduate standing. Seminars by UC Davis faculty and prominent national and international scholars; research presentations by Graduate Group in Geography Ph.D. candidates. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

GEO 298—Group Study (1-5)

Seminar—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. May be repeated up to 10 unit(s). (S/U grading only.) Effective: 2000 Spring Quarter.

GEO 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

GEO 299D—Individual Study (1-12)

Variable. Prerequisite(s): and Consent of Instructor. Graduate student status in Geography. (S/U grading only.) Effective: 1997 Winter Quarter.

GER—German

Courses in GER:**GER 001—Elementary German (5)**

Discussion—5 hour(s); Laboratory—1 hour(s). Not open to students who have taken GER 001A. Introduction to German grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed GER 002 or GER 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH, WC. Effective: 2007 Spring Quarter.

GER 001A—Accelerated Intensive Elementary German (15)

Lecture/Discussion—12.5 hour(s). Special 12-week accelerated, intensive summer session course that combines the work of GER 001, GER 002, and GER 003. Introduction to German grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed GER 001, GER 002, or GER 003. GE credit: AH, WC. Effective: 2018 Summer Session 1.

GER 002—Elementary German (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Prerequisite(s): GER 001. Not open for credit to students who have taken GER 001A. Continuation of GER 001 in areas of grammar and basic language skills. GE credit: AH, WC. Effective: 2007 Spring Quarter.

GER 003—Elementary German (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Prerequisite(s): GER 002. Not open to students who have taken GER 001A. Completion of grammar sequence and continuing practice of all language skills through cultural texts. GE credit: AH, OL, WC. Effective: 2015 Winter Quarter.

GER 010—German Fairy Tales from the Grimms to Disney (4)

Lecture/Discussion—3 hour(s); Term Paper. Introduction to the genre of fairy tale with a focus on the Brothers Grimm and Hans Christian Andersen in their respective political/cultural contexts. Discusses filmic adaptations by Disney, the East German DEFA and Hollywood. GE credit: AH, VL, WC, WE. Effective: 2012 Fall Quarter.

GER 011—Travel & the Modern World (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Examination of travel as an essential human activity and experience of global modernity and cross-cultural encounters from the 18th to the 21st century with an emphasis on German-speaking culture. Travelogues, literature, art, memoirs, and films in English translation. (Same course as COM 011.) GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 020—Intermediate German (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 003; can be concurrent with GER 006. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts. GE credit: AH, OL, WC, WE. Effective: 2015 Winter Quarter.

GER 021—Intermediate German (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 020. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts; addresses social relations and cultural practices in Germany; discusses history of Germany. GE credit: AH, OL, WC, WE. Effective: 2016 Winter Quarter.

GER 022—Intermediate German (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 021. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts. GE credit: AH, OL, WC, WE. Effective: 2015 Winter Quarter.

GER 040—Great German Short Stories (in English) (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Major German short stories from Goethe at the end of the 18th century to Thomas Mann at the beginning of the 20th century. GE credit: AH, OL, WC, WE. Effective: 2005 Fall Quarter.

GER 045—Vampires & Other Horrors in Film & Media (4)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing—3 hour(s). History of representations of vampires and horror generally from the 19th-21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity. (Same course as FMS 045.) GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

GER 048—Myth & Saga in the Germanic Cultures (4)

Lecture—3 hour(s); Term Paper. Knowledge of German not required. English translation from the Norse Eddas, the Volsung and Sigurd-Siegfried cycles, and the Gudrun lays; literary mythology in German Romanticism culminating in Wagner's "total art-work" concept and The Ring of the Nibelung cycle. May not be counted toward major in German. GE credit: AH, VL, WC, WE. Effective: 2015 Winter Quarter.

GER 049—Freshman Colloquium (2)

Seminar—2 hour(s). Prerequisite(s): Open only to students who have completed 40 or fewer quarter units of transferable college level work. Readings, discussion and written projects treating topics such as communist-capitalist tension in German literary culture; masculine "versus" feminine authorial consciousness; disintegration and reconstitution of language reflecting cultural transformation; exorcising post-Holocaust national guilt and individual frustration-Germany's new European "mission." Effective: 1997 Winter Quarter.

GER 092—Field Work in German (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Restricted to lower division standing. Total immersion program in Germany or a German speaking setting in the U.S. to further develop students' proficiency in the German language. (P/NP grading only.) Effective: 2001 Fall Quarter.

GER 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

GER 099—Special Study for Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

GER 101A—Survey of German Literature, 800-1800 (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. German literature from the Middle Ages to Classicism (800-1800) with an overview of major movements and authors. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 101B—Survey of German Literature, 1800-Present (4)

Lecture/Discussion—3 hour(s). Prerequisite(s): GER 022. German literature from the Age of Romanticism (1800) to the present with an overview of major movements and authors. GE credit: AH. Effective: 2005 Winter Quarter.

GER 103—Writing Skills in German (4)

Lecture—3 hour(s); Extensive Writing—1 hour(s). Prerequisite(s): GER 022; or Consent of Instructor. Practice in different kinds of writing, such as abstracts, correspondence, lecture summaries, analysis of or response to short literary texts. GE credit: AH, OL, WC, WE. Effective: 2016 Fall Quarter.

GER 104—Translation (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Exercises in German-to-English, English-to-German translation using texts from the areas of culture and commerce. Not open for credit to students who have completed GER 104A. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 105—The Modern German Language (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Introduction to the linguistic analysis of contemporary German, including its phonology, morphology, syntax and semantics, as well as sociolinguistic considerations. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

GER 109A—Business German (4)

Lecture/Discussion—3 hour(s); Laboratory—1 hour(s). Prerequisite(s): GER 022; or Consent of Instructor. Specialized language course using business-oriented information and publications as the basis for discussions, roleplay, reports, compositions and translations. Effective: 2005 Spring Quarter.

GER 109B—Advanced Business German (4)

Lecture/Discussion—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): GER 022; or Consent of Instructor. Specialized advanced language course providing in-depth study of major business topics with the help of authentic texts and videos. Effective: 2005 Spring Quarter.

GER 112—Topics in German Literature (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): upper division standing or consent of instructor. Knowledge of German not required. Investigation of significant themes and issues within their European context. May be repeated up to 1 time(s). GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

GER 113—Goethe's Faust (4)

Discussion—3 hour(s); Term Paper—1 hour(s). Knowledge of German not required. Intensive study of Goethe's Faust in its entirety. Discussions and readings in English; reading the text in the original is encouraged. GE credit: AH, WC, WE. Effective: 2010 Fall Quarter.

GER 114— From Marlene Dietrich to Run, Lola Run: German Women & Film (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): ANT 001 (can be concurrent). Knowledge of German not required. Women in German film from the Weimar Republic to present, with special emphasis on conceptualizations of gender, historical and political context, aesthetic and filmic innovations. GE credit: AH, OL, VL, WC, WE. Effective: 2018 Spring Quarter.

GER 115—German Literature Since 1945 (4)

Lecture—3 hour(s); Extensive Writing. Knowledge of German not required. Major writers of the post-war generation of Austria, Switzerland and Germany: novelists, such as Böll, Grass, Johnson, Walser, Handke; playwrights such as Frisch, Dürrenmatt and Hochhuth; and poets, such as Celan, Enzensberger, and Aichinger. May be repeated for credit when topic differs. GE credit: AH, WC, WE. Effective: 1998 Fall Quarter.

GER 116—Readings in Jewish Writing & Thought in German Culture (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): RST 023; or Consent of Instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German-speaking world; what it means to be "other" in the mainstream culture. May be repeated up to 2 time(s) when topic differs. No credit will be given to those students who have completed HUM 121. (Same course as JST 116.) GE credit: AH, OL, WC, WE. Effective: 2007 Spring Quarter.

GER 117—After the Catastrophe: Jews & Jewish Life in Post-1945 Germany (4)

Discussion/Laboratory—3 hour(s); Term Paper. Jews and Jewish life in post-1945 Germany, with special attention given to literature, historical debates, photography, film, as well as websites and other new media. GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2011 Fall Quarter.

GER 118A—Vienna at the Turn of the 20th Century (The End of the Habsburg Empire) (4)

Lecture—1 hour(s); Discussion—2 hour(s); Extensive Writing—1 hour(s). Knowledge of German not required. Cultural ferment in Vienna, capital of the multinational Habsburg empire, at the turn of the century, with consideration of innovations in literature, music, graphic arts, architecture philosophy and psychology, heralding European modernism. GE credit: AH, WC. Effective: 2001 Fall Quarter.

GER 118B—Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism (4)

Lecture—1 hour(s); Discussion—2 hour(s); Extensive Writing—1 hour(s). Knowledge of German not required. Expressionism in graphic arts, literature, film, New Objectivity, Brecht, and Bauhaus considered in the context of the failure of the German experiment in democracy, the Weimar Republic of 1919-33. GE credit: AH, WC, WE. Effective: 2000 Fall Quarter.

GER 118C—Germany Under the Third Reich (4)

Lecture/Discussion—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): Background in Modern European History; GER 118B recommended. No knowledge of German required. Interdisciplinary study of German society and culture during the Third Reich (1933-45); readings in aesthetics, history, and philosophy; study of Fascist culture in literature, film, architecture, and the graphic arts; focus on everyday life in Hitler's Germany. GE credit: WC, WE. Effective: 2001 Fall Quarter.

GER 118E—Contemporary German Culture (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Political, economic, social and cultural scene of Germany today. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

GER 119—From German Fiction to German Film (4)

Lecture—3 hour(s); Discussion—1 hour(s); Term Paper. Examines a number of film adaptations of major German prose works and plays to ascertain the types of changes involved in the shift in medium and the positive and negative effects achieved by such transferences. GE credit: AH, OL, VL, WC. Effective: 1997 Winter Quarter.

GER 120—Survey of German Culture (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Major developments in German arts, philosophical thought, social institutions, and political history. GE credit: AH, OL, VL, WC, WE. Effective: 2019 Winter Quarter.

GER 121—The Medieval Period in German Literature (4)

Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Literary-philosophical profile of the Mittelhochdeutsche Blütezeit in terms of the significant epics, romances, and lyric poetry. Readings in German. GE credit: AH. Effective: 2016 Spring Quarter.

GER 122—Reformation & Baroque (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Exemplary literary works of the 16th and 17th centuries tracing the principal lines of development and showing the reflection in literature of the social, as well as religious, scenes. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Fall Quarter.

GER 123—Literature of the Classical Age (4)

Discussion—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Critical assessment of principal works of Goethe and Schiller within the historical and philosophical context of their times. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

GER 124—Major Movements in German Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Significant movements and schools in German literary history (e.g., the medieval troubadours, Storm and Stress, the romanticists, the George Circle, the expressionists), with emphasis on the broader cultural dynamics and ideologies as these apply to individual literary works. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC. Effective: 2016 Fall Quarter.

GER 125—Short Fiction: 1880-1914 (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Reading of short German fiction from the fin-de-siècle period and representative of various prose styles and cultural currents. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 126—Modern German Literature (4)

Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Selections from significant works of major contemporary writers, such as Hesse, Mann, Kafka, Rilke, Brecht, Grass. May be repeated up to 1 time(s) with consent of advisor. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 127— Major Writers in German (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Examination of representative works by a major writer, set in the broader cultural context of the relevant period or movement. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 129—Postwar Women Writers (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Major writers in both Germanies, Austria, and Switzerland since 1945. Topics include the concept of a feminist aesthetics, East vs. West German writers, and the status of minority women writers in Germany (Jewish, Turkish-German, Afro-German). GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 131—German Lyric Poetry (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Study of the genre of lyric poetry from the late Middle Ages through Renaissance, Baroque, Classical, Romantic, and Modern periods in correlation with other literary forms and the social climate of each period. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

GER 132—The German Novelle (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Inquiry into the art of the "Novelle" through analysis of the materials and formal devices of representative authors from Goethe to Kafka. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 133—The German Drama (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Readings in the works of Germany's leading dramatists from the 18th century to the present day, such as Lessing, Goethe, Schiller, Kleist, Büchner, Hauptmann, Brecht. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 134—Topics in German Intellectual History (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Topics in German intellectual history with materials from a number of periods, genres, and disciplines. May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 141—The Holocaust & its Literary Representation (4)

Lecture—2 hour(s); Discussion—1 hour(s); Term Paper. Knowledge of German not required. Aesthetic representation and metaphorical transformation of the Holocaust in its human and historical perspectives. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

GER 142—New German Cinema (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Knowledge of German not required. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorff, Kluge, Wenders. May be repeated for credit with consent of instructor and when content differs. (Same course as FMS 142.) GE credit: AH, OL, VL, WC, WE. Effective: 2006 Winter Quarter.

GER 143—Language Through Media (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Study of contemporary German-language news media (press, video, film, CD-ROM, Internet) for insight into political and cultural developments in the German-speaking countries. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 144—Marx, Nietzsche, Freud (4)

Lecture/Discussion—3 hour(s); Term Paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. (Same course as HUM 144.) GE credit: AH, WC. Effective: 2011 Spring Quarter.

GER 160—Love in the Middle Ages (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): GER 022; or Consent of Instructor. Analysis of the phenomenon of love in selected medieval lyrical poems and romances of the 12th- and 13th-century Blütezeit. Origins of courtly love, love & individualism, love & the Church, love & adultery. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

GER 165E—Nazi & Fascist Cinema: Film & other Visual Media (4)

Lecture—2 hour(s); Discussion—1 hour(s); Film Viewing. Analysis of nefarious and noxious cultural products in history: films made under the Nazis and other fascists, 1933-1945. Questions at heart of humanistic studies: relationship of culture to propaganda, politics, and even unfathomable crime. (Same course as CDM 165E.) GE credit: OL, VL, WC, WE. Effective: 2018 Fall Quarter.

GER 168—Multiculturalism in German Literature (4)

Lecture/Discussion—3 hour(s); Term Paper/Discussion—1 hour(s). Prerequisite(s): GER 022; or Consent of Instructor. Examples of German literature from the High Middle Ages to the present that explore the "encounter with the other" (people of color, different beliefs and cultures, and inner-German minorities). GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 176A—Classic Weimar Cinema (4)

Lecture/Discussion—3 hour(s); Film Viewing—3 hour(s). Prerequisite(s): HUM 001. "German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama." Not open for credit to students who have completed HUM 176. (Same course as FMS 176A.) GE credit: AH, OL, VL, WC, WE. Effective: 2006 Fall Quarter.

GER 185—The Age of Bismarck (4)

Discussion—3 hour(s); Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Notable literary repercussions of the zenith of Germany's international status at the time of Bismarck's Chancellorship. The poetry of Storm, the prose of Fontane, the drama of Hauptmann. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 192—Field Work in German (1-12)

Internship—3-36 hour(s). Prerequisite(s): GER 109A; or Consent of Instructor. Total immersion program in Germany or a German speaking setting in the U.S. to further develop student proficiency in the German language. May be repeated up to 2 time(s) or up to 12 units of credit with consent of instructor. (P/NP grading only.) Effective: 2002 Winter Quarter.

GER 194HA—Honors Program (3)

Independent Study—2 hour(s); Term Paper. Prerequisite(s): Open only to majors with a 3.500 minimum GPA in at least 135 graduation units. Research of an integrative nature (in either "General" or "Area Studies Emphasis" fields of major), guided by thesis advisor chosen by student. (P/NP grading only.) Effective: 1997 Winter Quarter.

GER 194HB—Honors Program (3)

Independent Study—2 hour(s); Term Paper. Prerequisite(s): Open only to majors with a 3.500 minimum GPA in at least 135 graduation units. Writing of Honors Thesis on topic selected by student in consultation with thesis advisor. (P/NP grading only.) Effective: 1997 Winter Quarter.

GER 197T—Tutoring in German (1-4)

Tutorial—3-12 hour(s). Prerequisite(s): Consent of German Program Director. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with department courses. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 2004 Fall Quarter.

GER 198—Directed Group Study (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

GER 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

GER 202—Middle High German (4)

Discussion—3 hour(s); Lecture—1 hour(s). Graduate standing. Outline of grammar; selections from Middle High German epic, romance, and lyric poetry. Effective: 2016 Spring Quarter.

GER 206—Cognitive Grammar for Applied Linguists (4)

Lecture/Discussion—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): Graduate standing. Analysis of grammar and application of cognitive grammar to language instruction. Syntactical problems and analyses relevant to the language which the student will teach. Effective: 2002 Spring Quarter.

GER 210—Techniques of Literary Scholarship (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Bibliographical, organizational, and methodological tools and resources for advanced, independent research. Effective: 2016 Spring Quarter.

GER 211—Concepts in Literary Theory (4)

Seminar—3 hour(s). Graduate standing. Advanced course in concepts of literary theory and criticism. Discussion of the emergence of theoretical concepts and their impact on the understanding and appreciation of literary works. Discussion in German and English, readings in German. Effective: 2016 Spring Quarter.

GER 212—Contemporary Approaches to Literary Theory (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Study of contemporary theoretical approaches such as structuralism, deconstruction, feminism, Marxism/Frankfurt School, and reception theory in conjunction with the works of major authors. Effective: 2016 Spring Quarter.

GER 239—Narrative & Narrative Theory (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Studies, in a theoretical and literary historical context, major elements of 19th- and 20th-century narrative, such as techniques of framing, refraction, and montage; narrative perspective; mimesis; and self-consciousness. Focuses on paradigmatic prose texts alongside a spectrum of critical approaches. Effective: 2016 Spring Quarter.

GER 240—Forms of German Verse (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Development of German verse from the Middle Ages to the present, with special emphasis on different techniques of text analysis and interpretation. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

GER 241—The German Drama (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Major forms of German drama from its origins to the middle of the 20th century. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

GER 242—The German Novelle (4)

Seminar—3 hour(s); Term Paper. Graduate standing. The major German Novellisten, with particular emphasis on the flowering of this genre in the 19th century. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

GER 243—Fontane & the Rise of the Modern German Novel (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Fontane, the father of the modern German novel and the chief German representative of the European novel at its greatest, in the context of the 19-century European political and social scene. Effective: 2016 Spring Quarter.

GER 244—Gender & Comedy (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Studies of genre and gender in German-language comedy by male and female writers from the 18th century to the present. Authors treated include Lessing, Kleist, Büchner, Ebner-Eschenbach, Hauptmann, Hofmannsthal, Frisch, Langner, and Jelinek. Effective: 2016 Spring Quarter.

GER 252—The Writing of Lessing (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Study of Lessing's theory of literature with particular emphasis upon his critical attacks on French drama. Effective: 2016 Spring Quarter.

GER 253—Goethe (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Study of the origins of Goethe's thought in German Pietism, and his principal artistic, autobiographical, scientific, and philosophical works. Effective: 2016 Spring Quarter.

GER 254—Schiller (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Critical analysis of Schiller's major works and his impact on the intellectual climate in Germany during the late-18th and early-19th centuries. Effective: 2016 Spring Quarter.

GER 255—Aesthetics in the Age of Goethe (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Emergence of aesthetic autonomy from 18th-century normative poetics during the Age of Goethe. The shift from a model based on the imitation of nature (and the Ancients) to a new concept grounded in the individuality of aesthetic experience. Effective: 2003 Spring Quarter.

GER 257—Heinrich von Kleist (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Kleist's important dramatic and prose works; special attention will be given to the peculiar hermeneutic problems in modern German, French, and Anglo-American Kleist criticism. Effective: 2016 Spring Quarter.

GER 258—The Novels of Thomas Mann (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Reading of selected novels with emphasis on aesthetic techniques, originality, ethical and political views, and influence on the contemporary literary scene in Germany. Effective: 2016 Spring Quarter.

GER 259—Studies in Kafka (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Study of Kafkas narrative techniques with special emphasis in the shorter works on the existential development from its roots in Expressionism. Effective: 2016 Spring Quarter.

GER 260—The Poetry of Rilke (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Study of the principal motifs, myths, images, and problems in the poetry of Rainer Maria Rilke. Effective: 2016 Spring Quarter.

GER 261—Brecht & the Epic Theater (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Reading of Brechts works with emphasis on the ideas which impelled the development of new literary forms and concepts. Effective: 2016 Spring Quarter.

GER 262—Studies in Turn-of-the-Century Culture (4)

Seminar—3 hour(s); Term Paper. Graduate standing. Investigates literary currents in turn-of-the-century Germany and Austria against the background of contemporaneous developments in psychology, the visual arts, philosophy, and music. Authors treated include Hauptmann, Holz and Schlaf, Schnitzler, T. Mann, Wedekind, Musil, Hofmannsthal. Effective: 2016 Spring Quarter.

GER 285—Middle High German Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Extensive reading of Middle High German texts in the original language. Examines linguistic and literary problems. May be repeated for credit when topic differs. Effective: 2016 Spring Quarter.

GER 288—Renaissance & Reformation in German Literature (4)

Seminar—3 hour(s); Term Paper. Restricted to graduate standing. Parabolic and didactic style in Germany's literature during the 16th century. May be repeated for credit with consent of instructor. Effective: 2016 Fall Quarter.

GER 289—German Literature of the Baroque (4)

Seminar—3 hour(s); Term Paper. Graduate standing. The "Elegantiadeal" and the varying methods used to portray it in 17th-century German literature. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

GER 290—The Enlightenment in German Literature (4)

Seminar—3 hour(s); Term Paper. Revolt against the concept of the Elegantiadeal, and evolution of a new literature based on reason and wit. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

GER 291—Foreign Language Learning in the Classroom (4)

Seminar—3 hour(s); Project (Term Project). Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as FRE 291, SPA 291.) Effective: 2006 Fall Quarter.

GER 292—Sentimentality & Sturm und Drang in German Literature (4)

Seminar—3 hour(s). Reaction to overemphasis on Reason: theories of Hamann and Herder and works of poets such as Lenz, Leisewitz, the early Goethe and Schiller. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

GER 293—The Classical Age of German Literature (4)

Seminar—3 hour(s); Term Paper. Inquiry into the aesthetic and humanistic qualities of Germany's greatest literary epoch. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

GER 294—The Romantic Period in German Literature (4)

Seminar—3 hour(s); Term Paper. Survey of the works of early 19th-century authors in reaction against the age of classicism. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

GER 295—Poetic Realism in German Literature (4)

Seminar—3 hour(s); Term Paper. Outstanding figures in German literature between 1840 and 1890. Important phases in their developments will be treated. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

GER 296—20th-Century German Literature (4)

Seminar—3 hour(s); Term Paper. Considers the revolt of the Hauptmann generation, Symbolism, Expressionism, and the chief currents of the contemporary scene. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

GER 297—Special Topics in German Literature (4)

Seminar—3 hour(s); Term Paper. Various special topics in German literature, which may cut across the more usual period and genre rubrics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

GER 298—Group Study (1-5)

Variable. Effective: 1997 Winter Quarter.

GER 299—Individual Study (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

GER 299D—Special Study for the Doctoral Dissertation (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

GER 390A—The Teaching of German (2)

Lecture—2 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) Effective: 1997 Winter Quarter.

GER 390B—The Teaching of German (2)

Lecture—2 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) Effective: 1997 Winter Quarter.

GER 390C—The Teaching of German (2)

Lecture—2 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) Effective: 1997 Winter Quarter.

GER 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

GER 400—Tutorial & Instructional Internship (1-3)

Discussion—1-3 hour(s). Prerequisite(s): Graduate standing. Apprentice training in ongoing undergraduate literature courses taught by regular staff, with supplementary weekly critique sessions; intern leadership of discussion sections under staff supervision. May be repeated for credit. Effective: 1997 Winter Quarter.

GGG—Genetics

Courses in GGG:

GGG 201A—Advanced Genetic Analysis (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): BIS 101; STA 100; Or the equivalent, graduate standing. Fundamentals of genetic analysis and chromosome structure using model organisms including mutation, transmission, complementation, suppression, and enhancement as well as epigenetic phenomena at the whole organism and molecular levels. Effective: 2002 Fall Quarter.

GGG 201B—Genomics (5)

Lecture—3 hour(s); Discussion—2 hour(s). Prerequisite(s): GGG 201A; GGG 201C; Or equivalents that provide a basic understanding of genetics and molecular biology. Class limited to 40 students; priority to Genetics Graduate Group students. Prokaryotic and eukaryotic genomes. Experimental strategies and analytical challenges of modern genomics research and the theory and mechanics of data analysis. Structural, functional, and comparative genomics. Related issues in bioinformatics. Effective: 2004 Spring Quarter.

GGG 201C—Molecular Genetic Mechanisms in Disease (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): BIS 101; Or the equivalent. Pass One restricted to graduate students in genetics, microbiology or biochemistry and molecular biology graduate groups. Exploration of how basic mechanisms of molecular biology contribute to health and disease. Diseases related to animals, plants, and microbes will highlight fundamental concepts in the assembly, function and regulation of DNA, RNA, and protein. Effective: 2012 Fall Quarter.

GGG 201D—Quantitative & Population Genetics (5)

Lecture—5 hour(s). Prerequisite(s): GGG 201A; or Consent of Instructor. Basic concepts of quantitative and population genetics including gene and genotypic frequencies, multiple factor hypothesis, phenotypic and genotypic values, heritability, selection, genetic variation, the detection of quantitative trait loci and evolution in populations. Experimental and analytical methods. Effective: 2002 Fall Quarter.

GGG 205—Molecular Genetics Laboratory (5)

Laboratory—15 hour(s). Prerequisite(s): BIS 101 (can be concurrent); Or the equivalent, enrolled in Genetics Graduate Group. Students will conduct experiments in molecular genetics laboratories. Individual research problems will emphasize experimental design, experience with methodologies, and data interpretation. May be repeated up to 3 time(s). (S/U grading only.) Effective: 1997 Winter Quarter.

GGG 210—Horizontal Gene Transfer (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Background in basic microbiology and genetics required; introductory course in molecular biology, biotechnology and microbial and animal/plant genetics recommended. Transfer of genes between unrelated organisms in nature. Dissemination of foreign DNA from genetically engineered organisms, including plants and animals. Mechanisms by which genes are transferred horizontally, and between kingdoms. Effective: 1999 Fall Quarter.

GGG 211—Concepts in Human Genetics & Genomics (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): GGG 201A; Or equivalent; GGG 201B and GGG 201C or equivalent are recommended. Pass One restricted to graduate students enrolled in the Human Genetics Focus Group; Pass Two restricted to graduate students enrolled in Genetics Graduate Group; after that, open enrollment for graduate students up to 12 students, then undergraduates. Human genomic organization; genetic structure of populations; positional cloning, application of linkage, association, and haplotypes; quantitative trait loci analyses; integrative genetic studies of gene expression; DNA repair mechanisms in genetic disease; mutation analyses; epigenetics; mitochondrial disease; gene manipulation and therapy. Effective: 2004 Winter Quarter.

GGG 220—Genomics & Biotechnology of Plant Improvement (3)

Lecture—3 hour(s). Prerequisite(s): BIS 101; Or equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. (Same course as PLS 220.) Effective: 2002 Winter Quarter.

GGG 225—Gene & Cellular Therapies (3)

Lecture/Discussion—3 hour(s). Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues. (Same course as PHA 225.) Effective: 2017 Winter Quarter.

GGG 250—Functional Genomics: From Bench to Bedside (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): GGG 201C; MCB 214; Or equivalent. Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery. (Same course as PHA 250.) Effective: 2015 Spring Quarter.

GGG 290—Seminar in Evolutionary, Developmental & Population Genetics (1)

Seminar—1 hour(s). Topics of current interest in evolutionary, population, and developmental genetics. May be repeated for credit. (S/U grading only.) Effective: 2014 Fall Quarter.

GGG 290A—Graduate Student Conference in Genetics (1)

Conference—1 hour(s). Restricted to Genetics Graduate Group students. Student-given seminars on topics in genetics, with critiques by instructor and peers. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

GGG 291—Seminar in History of Genetics (2)

Seminar—2 hour(s). Prerequisite(s): BIS 101. The development of modern genetic theories beginning with Mendel. Effective: 1997 Winter Quarter.

GGG 292—Seminar in Genomics & Epigenomics (1)

Seminar—1 hour(s). Topics of current interest in genomics and epigenomics. May be repeated for credit. (S/U grading only.) Effective: 2014 Winter Quarter.

GGG 293—Seminar in Animal Genetics (1-3)

Seminar—1-3 hour(s). Prerequisite(s): GGG 201A; or Consent of Instructor. Emphasis on recent advances in the field of animal genetics, ranging from quantitative genetics to molecular biology as it relates to animals. Effective: 1997 Winter Quarter.

GGG 294—Seminar in Human Genetics (2)

Seminar—2 hour(s). Prerequisite(s): GGG 201A; and Consent of Instructor. Topics of current interest in human genetics and genomics. May be repeated up to 5 time(s) when topic differs. Effective: 2004 Fall Quarter.

GGG 295—Seminar in Molecular Genetics (1-3)

Seminar—1-3 hour(s). Prerequisite(s): GGG 201A; or Consent of Instructor. Topics of current interest related to the structure, modification and expression of genes. Effective: 1997 Winter Quarter.

GGG 296—Scientific Professionalism & Integrity (2)

Lecture—1 hour(s); Seminar—1 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Review of basic skills required of contemporary scientists. Topics include scientific conduct, manuscript preparation, grant writing, seminar presentations, and time management. Emphasis on responsibilities of scientists to factually and thoughtfully communicate results. (P/NP grading only.) Effective: 2017 Spring Quarter.

GGG 297—Seminar in Plant Genetics (1-3)

Seminar—1-3 hour(s). Prerequisite(s): GGG 201A; or Consent of Instructor. Current topics in plant genetics will be examined in student-conducted seminars and discussion format. The integration of molecular, organismal and population genetics to address questions in plant biology will be emphasized. Effective: 1997 Winter Quarter.

GGG 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Group study of selected topics in genetics. (S/U grading only.) Effective: 1997 Winter Quarter.

GGG 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

GGG 300—Methods in Teaching Genetics (1-3)

Lecture/Discussion; Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Practical experience in the methods and problems of teaching genetics. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion or laboratory sections, formulating examinations under supervision of instructor. May be repeated up to 3 time(s) or 9 units when teaching in different genetics related course. (S/U grading only.) Effective: 2001 Fall Quarter.

GMD—General Medicine

Courses in GMD:

GMD 192—Internship in General Medicine (1-12)

Internship—3-36 hour(s). Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in general medicine. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

GMD 291—Seminars in Human Health Services Research & Clinical Epidemiology (1)

Seminar—1 hour(s). Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. (Same course as EPI 291.) (S/U grading only.) Effective: 1998 Fall Quarter.

GMD 460—General Medicine Consults (1-18)

Clinical Activity—1-18 hour(s); Variable—1-18 hour(s). Prerequisite(s): Fourth-year medical students with consent of instructor; a general medicine clerkship. Limited enrollment. Supervised opportunity to see entire spectrum of medical problems encountered by a general internist. Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consultation Service is particularly concerned with medical evaluation of surgical patients. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GMD 470—Health Care Ethics (3-9)

Lecture/Discussion—2 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): Consent of Instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as NRS 470.) (H/P/F grading only.) Effective: 2012 Spring Quarter.

GMD 485—Introduction to Health Care Ethics (1)

Lecture. Prerequisite(s): Medical student in good standing. Introduction to concepts and methods of healthcare ethics. Emphasis on problems and methods. (H/P/F grading only.) Effective: 1997 Fall Quarter.

GMD 499—General Medicine Research (1-18)

Discussion—3 hour(s); Clinical Activity—8-40 hour(s). Prerequisite(s): Consent of Instructor. Student will be involved in a clinical research problem within the areas, interest and expertise of members of Division of General Internal Medicine. Alternatively, the research effort will be directed toward investigation of a clinical problem of general medical interest. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GRK—Greek

Courses in GRK:

GRK 001—Elementary Greek (5)

Lecture—5 hour(s). Introduction to the basic grammar and vocabulary of Classical and New Testament Greek. Development of translation skills with emphasis on Greek-English. GE credit: AH. Effective: 1997 Winter Quarter.

GRK 002—Elementary Greek (5)

Lecture—5 hour(s). Prerequisite(s): GRK 001; Or the equivalent. Continuation of GRK 001. GE credit: AH. Effective: 2016 Spring Quarter.

GRK 002NT—Elementary New Testament Greek (1)

Lecture—1 hour(s). Prerequisite(s): GRK 002 (can be concurrent); Concurrent attendance required. Supplementary study of New Testament Greek. GE credit: AH. Effective: 2016 Spring Quarter.

GRK 003—Intermediate Greek (5)

Lecture—5 hour(s). Prerequisite(s): GRK 002; Or the equivalent. Continuation of GRK 002. Selected readings from Greek authors. GE credit: AH. Effective: 2016 Spring Quarter.

GRK 003NT—Elementary New Testament Greek (1)

Lecture—1 hour(s). Prerequisite(s): GRK 003 (can be concurrent); or Consent of Instructor. Concurrent attendance required. Supplementary study of New Testament Greek. GE credit: AH. Effective: 2016 Spring Quarter.

GRK 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

GRK 100—Readings in Greek Prose (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): GRK 003; Or equivalent. Review of Greek morphology, syntax, and vocabulary. Readings in Greek prose authors, including Xenophon. GE credit: AH. Effective: 2015 Fall Quarter.

GRK 101—Plato (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 102—Euripides (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 103A—Homer: Iliad (4)

Recitation—3 hour(s); Term Paper. Prerequisite(s): GRK 003. GE credit: AH, WE. Effective: 1997 Winter Quarter.

GRK 103B—Homer: Odyssey (4)

Recitation—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 104—Menander (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 105—Attic Orators (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from the orators of 4th- and 5th- century Athens. May be repeated up to 1 time(s) with consent of instructor and when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

GRK 106—Greek Hexameter Poetry (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from ancient Greek hexameter poetry. Wisdom poetry, hymns, epyllia, idylls, epic, natural history and other texts from the hexameter tradition. May be repeated for credit when topic differs. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

GRK 110—Readings in the Greek Novel (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from Greek prose fiction of the late classical, Hellenistic and imperial periods. May be repeated up to 2 time(s) with consent of instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 111—Sophocles (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 112—Aristophanes (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 113—Thucydides (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 114—Lyric Poetry (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 115—Aeschylus (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 116—Herodotus (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 121—Greek Prose Composition (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): GRK 100; or Consent of Instructor. Intensive grammar and vocabulary review through exercises in Greek prose composition. GE credit: AH. Effective: 2016 Fall Quarter.

GRK 130—Readings in Later Greek (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Translation and discussion of selected readings from Hellenistic to Byzantine Greek literature. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 131—Readings in Ancient Greek Philosophy & Science (4)

Extensive Writing; Lecture/Discussion—3 hour(s). Prerequisite(s): GRK 100 (can be concurrent); or Consent of Instructor. Selected readings from ancient Greek philosophical and scientific writers. Texts on logical truth and empirical sense data, material and social contexts of ancient Greek philosophy and science. May be repeated for credit when topics differ. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

GRK 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

GRK 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

HDE—Human Development

Courses in HDE:

HDE 012—Human Sexuality (3)

Lecture—3 hour(s). Vocabulary, structure/function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing/maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction, cultural differences in attitudes towards sexuality. GE credit: ACGH, DD, SS. Effective: 2012 Fall Quarter.

HDE 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Field work experience or at least one course (e.g. HDE 100A, HDE 100B, HDE 140 or HDE 140L) related to fieldwork assignment. Supervised internship, off campus and on campus, in community and institutional setting. Involves progressively greater (supervised) participation in program delivery or assessment. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 098—Directed Group Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 099—Special Study for Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 100A—Infancy & Early Childhood (4)

Lecture—4 hour(s). Prerequisite(s): (PSC 001 or PSC 001Y); (BIS 002A or BIS 010 or BIS 001A or BIS 010V) or MCB 010 or NPB 010 or NPB 012 or MIC 010. Pass One restricted to Human Development majors. Biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six. Two observations of preschool children required. Effective: 2018 Winter Quarter.

HDE 100B—Middle Childhood & Adolescence (4)

Lecture—4 hour(s). Prerequisite(s): (HDE 100A or PSC 140); (PSC 001 or PSC 001Y). Interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence. Effective: 2018 Winter Quarter.

HDE 100C—Adulthood & Aging (4)

Lecture—4 hour(s). Prerequisite(s): PSC 001 or PSC 001Y. Development during early, middle, and late adulthood; biological, cognitive, and psycho-social aspects of adult development. Emphasis on normative patterns of development which characterize "successful aging." Effective: 2018 Spring Quarter.

HDE 101—Cognitive Development (4)

Lecture—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): HDE 100A or HDE 100B or PSC 140. Pass One restricted to Human Development and Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as PSC 141.) GE credit: WE. Effective: 2012 Fall Quarter.

HDE 102—Social & Personality Development (4)

Lecture—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): HDE 100A or HDE 100B or PSC 140. Pass One open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as PSC 142.) GE credit: SS, WE. Effective: 2012 Fall Quarter.

HDE 103—Cross-Cultural Study of Children (4)

Lecture—4 hour(s). Prerequisite(s): HDE 100A or PSC 140; Consent of Instructor. Cross-cultural studies of children in developing countries and among minority groups in the U.S. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.

HDE 110—Contemporary American Family (4)

Lecture—4 hour(s). Prerequisite(s): PSC 001 or PSC 001Y or SOC 001 or SOC 002. Factors currently influencing American families including changing economic conditions, changing sex roles, divorce, and parenthood; theories and research on family interaction. Effective: 2018 Winter Quarter.

HDE 117—Longevity (4)

Lecture—3 hour(s); Term Paper—1 hour(s). Prerequisite(s): Upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as ENT 117.) GE credit: SE, SL, WE. Effective: 2012 Fall Quarter.

HDE 120—Research Methods in Human Development (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): STA 013 or STA 013V or STA 013Y or EDU 114 or PSC 041 or (SOC 046A, SOC 046B). Scientific process, research designs, and experimental controls; APA manuscript style and scientific writing; statistical analysis and interpretation of results. Laboratory exercises to collect data, analyze and interpret results, and write scientific papers. GE credit: SS, WE. Effective: 2018 Winter Quarter.

HDE 121—Psychological Assessment (4)

Lecture—4 hour(s). Prerequisite(s): (HDE 100A or HDE 100B); (STA 013 or STA 013Y or PSC 041 or (SOC 046A, SOC 046B)). Current issues and methodology related to the process of psychological assessment with children. Effective: 2018 Spring Quarter.

HDE 130—Developmental Psychopathology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (HDE 100A, HDE 100B) or PSC 140; Consent of Instructor. Foundational principles and current issues in developmental psychopathology, the study of mental health problems and disorders that originate in childhood and adolescence (e.g., disruptive behavior, mood and anxiety disorders). Effective: 2018 Winter Quarter.

HDE 132—Individual Differences in Cognition (4)

Lecture—4 hour(s). Prerequisite(s): (PSC 001 or PSC 001Y); (HDE 100A or HDE 100B). Individual differences in cognition, including learning disabilities and giftedness. Education implications and neurodevelopmental substrates of individual differences in cognition. Effective: 2018 Spring Quarter.

HDE 140—Communication & Interaction with Young Children (2)

Lecture—2 hour(s). Prerequisite(s): HDE 100A; HDE 140L (can be concurrent); and Consent of Instructor. HDE 140L required concurrently. Enrollment requires sign up for laboratory time at the Child & Family Studies Center located at 244 First Street, Davis, CA. Integration of research, theory and practice in child development, emphasizing the role of relationships in creating a growth-promoting environment for young children. Includes: peer relationships, emotional understanding and self regulation, attachment, communication and school readiness. Effective: 2012 Fall Quarter.

HDE 140L—Laboratory in Early Childhood (3-5)

Laboratory—6-15 hour(s); Discussion/Laboratory—3 hour(s). Prerequisite(s): HDE 140 (can be concurrent); and Consent of Instructor. HDE 140 must be taken concurrently for first 3 units of credit; students must contact the Center for Child & Family Studies to enroll. Limited enrollment. Application of theories of learning and development to interaction with infants, toddlers, and preschoolers at Early Childhood Laboratory. Applied skills in communication, guidance and curriculum. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 141—Field Study With Children & Adolescents (4-6)

Lecture—2 hour(s); Fieldwork—6-12 hour(s). Prerequisite(s): HDE 100A or HDE 100B; and Consent of Instructor. Study of children's affective, cognitive and social development within the context of family/school environments, hospitals and foster group homes. May be repeated up to 12 unit(s). Effective: 2012 Fall Quarter.

HDE 142—Field Study with Emotionally Distressed Children & Adolescents (4-6)

Discussion—1.5 hour(s); Fieldwork—6-12 hour(s). Prerequisite(s): HDE 130 (can be concurrent); and Consent of Instructor. Field study with children who are identified as emotionally distressed, including those with internalizing and externalizing behavioral problems. May be repeated up to 12 unit(s). Effective: 2012 Fall Quarter.

HDE 143—Field Studies of the Elderly (4-6)

Discussion—2 hour(s); Fieldwork—6-12 hour(s); Variable. Prerequisite(s): HDE 100C or HDE 160 (can be concurrent); and Consent of Instructor. Apply theory and research on adult development and aging, work with older adults in a variety of settings, and develop skills relevant to that application. Develop a small research project. Effective: 2016 Fall Quarter.

HDE 160—Social Aspects of Aging (4)

Lecture—4 hour(s). Prerequisite(s): HDE 100C. How the social context affects adult development and aging. Emphasis on demography, social policy, culture, and adaptation. Oral histories as class projects. Effective: 2016 Fall Quarter.

HDE 161—Technology Use, Health, & Aging (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): (PSC 001 or PSC 001Y); HDE 100C; or Consent of Instructor. Principles from gerontology applied to older adults' use of technology to support health and well-being across a variety of domains (e.g., cognitive and physical fitness, social engagement) and contexts (assisted living, aging in place). Cognitive, sensory, and physical changes in later life that impact technology use. GE credit: SS, WE. Effective: 2020 Winter Quarter.

HDE 163—Cognitive Neuropsychology in Adulthood & Aging (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): (PSC 001 or PSC 001Y); HDE 100C recommended. Theories, methods, and findings concerning the relationship between cognitive processes and brain functioning. Readings, lectures, and in-class discussions cover research on normal younger and older adults, neuropsychological case studies, and selected patient groups (e.g., amnesia, schizophrenia, Alzheimer's disease). Effective: 2018 Spring Quarter.

HDE 190C—Introductory Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): Involvement in ongoing research; consent of instructor. Instructors lead discussions with undergraduate students who involve themselves in a research project. Research papers are reviewed and aspects of project proposals developed out of class are presented and evaluated. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

HDE 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Supervised internship off and on campus, in community, and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 198—Directed Group Study (1-5)

Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 199—Special Study for Advanced Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 200A—Early Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing; basic biology or physiology; one upper division course in psychology or a related field; one upper division or graduate course in developmental psychology (can be concurrent). Theory and research on the biological, social, cognitive, and cultural aspects of development from conception to the age of five years. Effective: 2012 Fall Quarter.

HDE 200B—Middle Childhood & Adolescence (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing; basic biology or physiology, and at least two upper division or graduate level courses in psychology or related fields. Theory and research on biological, cognitive, social, and cultural influences on behavioral development from age five years until late adolescence. Effective: 2012 Fall Quarter.

HDE 200C—Development in Adulthood (4)

Lecture/Discussion—4 hour(s). Theory and research focusing on social, personality, cognitive, and biological development from early to late adulthood. Emphasis is on theory development and continuity and change. Effective: 2016 Fall Quarter.

HDE 203—Adolescent Behavioral & Emotional Development (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): HDE 200B. Analysis of recent theories, research methods, and major findings on adolescent behavioral and emotional development, including contextual and genetic influences on adolescence, pubertal transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development. Effective: 2012 Fall Quarter.

HDE 204—Developmental Neuroscience & Adolescent Psychopathology (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing in Human Development, Psychology, Education, Neuroscience or consent of instructor. Introduction to human developmental neuroscience. Understanding of adolescence and its characterization as a time of risky and unhealthy behavior and vulnerability to onset of mental disorder as well as issues around plasticity of the adolescent brain and prevention/intervention. Effective: 2012 Fall Quarter.

HDE 205—Longitudinal Data Analysis (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): PSC 204B; Or equivalent graduate courses in statistics or consent of instructor; familiarity with multiple regression and the basics of matrix algebra. Open to graduate students only. Introduction to longitudinal data manipulation, organization, description, and modeling in the multilevel modeling and structural equation modeling frameworks. Effective: 2019 Spring Quarter.

HDE 207—Topics in Technology Use, Health & Aging (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing in one of the following Graduate Groups: Human Development, Psychology, Communication, Education, and Nursing Science and Healthcare Leadership, or consent of instructor. Principles from gerontology applied to older adults' use of technology to support health and well-being across a variety of domains (e.g., cognitive and physical fitness, social engagement) and contexts (assisted living, aging in place). Cognitive, sensory, and physical changes in later life that impact technology use. Effective: 2020 Spring Quarter.

HDE 210—Theories of Behavioral Development (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): Graduate standing in behavioral sciences. Consideration of enduring issues in theories of behavioral development; analysis of adequacy of major theoretical schools (e.g., social learning, Piagetian) as scientific theories. Effective: 2012 Fall Quarter.

HDE 211—Physiological Correlates of Behavioral Development (4)

Seminar—4 hour(s). Prerequisite(s): Consent of Instructor. An overview of mechanisms of organismic development and the implications of developmental biology for the analysis of behavioral ontogeny; consideration of parallels between processes of organismic development and behavioral development in children and infra-human mammals. Effective: 2012 Fall Quarter.

HDE 220—Research Methods in Human Growth & Development (4)

Lecture—4 hour(s). Prerequisite(s): STA 013 or STA 013Y; Or the equivalent and at least two upper division courses in Human Biology or Developmental Psychology. Overview of qualitative and quantitative approaches to empirical inquiry in the social sciences, with a focus on theory and research methods in biological growth and cognitive and social/emotional development from prenatal period to death. Effective: 2018 Winter Quarter.

HDE 232—Cognition & Aging (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): HDE 200C. Manner in which cognitive processes are affected by aging as well as an understanding of the changes in the central nervous system occurring with aging. Effective: 2012 Fall Quarter.

HDE 234—Children's Learning & Thinking (3)

Seminar—3 hour(s). Prerequisite(s): HDE 200A or PSC 212 recommended. Analysis of theories, research methods, and major findings of children's higher-order cognition, including origins of knowledge, development of problem-solving skills, reasoning strategies, and scientific concepts, with an emphasis on the underlying mechanism involved in children's thinking and learning processes. Effective: 2012 Fall Quarter.

HDE 238—The Context of Individual Development (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): Graduate standing in Human Development, Child Development, Education, Psychology, Anthropology, Sociology, or consent of instructor. Analysis of human development within the context of daily life. Contextualizing theories and methods of developmental psychology will be distinguished from contextual theories and methods. Developmental psychology models will be distinguished from child psychology models. Effective: 2012 Fall Quarter.

HDE 239—Developmental Psychopathology (4)

Discussion/Laboratory—3 hour(s); Term Paper. Prerequisite(s): Graduate standing in Human Development, Psychology, Sociology, a related social science, or consent of instructor. Theories, current issues, and empirical studies of atypical development from infancy to adulthood that integrate multiple system levels from genes, neurobiology, cognition, emotion, family and peer dynamics to community and cultural contexts. Effective: 2019 Winter Quarter.

HDE 240—Peer Relationships during Adolescence (4)

Lecture/Discussion—4 hour(s). Graduate standing in Human Development, Psychology, Education, or consent of instructor. Examines the role of peer relationships in adolescent development including forms and functions at the individual, dyadic and group levels. Ethnicity and cross cultural research will be discussed. Emphasis on methodology, including surveys, peer nominations/sociometrics, experimental, and observational designs. Effective: 2012 Fall Quarter.

HDE 250—Current Research on Family Relationships (4)

Discussion/Laboratory—3 hour(s); Term Paper. Graduate standing in Human Development Graduate Group, Psychology, Sociology, a related social science, or consent of instructor. Discussion of theories, methods, and current research on the nature and development of sibling, romantic, and parent-child relationships across the lifespan. Emphasis on interpersonal and family processes examined in ethnic/cultural contexts. Implications for individual development will be addressed. Effective: 2012 Fall Quarter.

HDE 252—Family Research, Programs & Policy (4)

Seminar—3 hour(s); Term Paper. Graduate standing in Human Development, Psychology, Sociology, related social sciences, or consent of instructor. Examines the competing interests of research, policy, and service on current issues of family functioning and individual well being. Considers communication barriers between researchers, practitioners, and policy makers. Effective: 2012 Fall Quarter.

HDE 290—Seminar (3)

Seminar—3 hour(s). Discussion and evaluation of theories, research, and issues in human development. Different topics each quarter. Effective: 2012 Fall Quarter.

HDE 290C—Research Conference (1)

Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

HDE 291—Research Issues in Human Development (4)

Seminar—4 hour(s). Prerequisite(s): Graduate Standing in the behavioral sciences. In-depth presentations of research issues in particular areas of behavioral development. May be repeated for credit. Effective: 2012 Fall Quarter.

HDE 292—Graduate Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of faculty (internship sponsor) and satisfactory completion of placement relevant course work, for example: EDU 213, EDU 216; HDE 222, HDE 242; LAW 272, LAW 273. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated up to 12 unit(s) with justified skill acquisition and promise of informing evaluation research. (S/U grading only.) Effective: 2012 Fall Quarter.

HDE 298—Group Study (1-5)

Variable. Effective: 2012 Fall Quarter.

HDE 299—Human Development (1-12)

Variable. (S/U grading only.) Effective: 2012 Fall Quarter.

HDE 396—Teaching Assistant Training Practicum (1-4)

Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

HEB—Hebrew

Courses in HEB:**HEB 001—Elementary Hebrew (5)**

Lecture/Discussion—5 hour(s). Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew. GE credit: AH, OL, WC. Effective: 2020 Winter Quarter.

HEB 001A—Accelerated Intensive Elementary Hebrew (15)

Lecture/Discussion—15 hour(s). Special 12-week accelerated, intensive summer session course that combines the work of HEB 001, HEB 002, and HEB 003. Introduction to Hebrew grammar and development of language skills in a cultural context with emphasis on communication. Not open to students who have completed HEB 001, HEB 002, or HEB 003. GE credit: AH, WC. Effective: 2018 Fall Quarter.

HEB 002—Elementary Hebrew (5)

Lecture/Discussion—4 hour(s); Laboratory—1 hour(s). Prerequisite(s): HEB 001; Or the equivalent. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

HEB 003—Elementary Hebrew (5)

Lecture/Discussion—4 hour(s); Laboratory—1 hour(s). Prerequisite(s): HEB 002; Or the equivalent. Speaking, listening comprehension, reading and writing fundamentals of modern Hebrew. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

HEB 010—Introduction to Biblical Hebrew (3)

Lecture/Discussion—3 hour(s). Introduction to the Hebrew Alphabet and basic grammar rules of the biblical language. Students will learn to read most any biblical text and learn how to find the meaning of words by their roots and morphological structure. GE credit: AH, WC. Effective: 2018 Fall Quarter.

Lecture/Discussion—3 hour(s). Prerequisite(s): HEB 010. Continuation of HEB 010. Biblical text reading, simple/literal translation, verb and noun patterns, compounding of prepositions and nouns. GE credit: AH, WC. Effective: 2018 Fall Quarter.

HEB 012—Introduction to Biblical Hebrew (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): HEB 011. Continuation of HEB 011. Biblical text reading, simple/literal translation, verb and noun patterns, compounding of prepositions and nouns. GE credit: AH, WC. Effective: 2018 Fall Quarter.

HEB 021—Intermediate Modern Hebrew I (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): HEB 003; Consent of Instructor. Development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Not open to students who have taken HEB 100 or HEB 100A. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

HEB 022—Intermediate Modern Hebrew II (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): HEB 021; Consent of Instructor. Continued development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Not open to students who have taken HEB 101 or HEB 100B. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

HEB 023—Intermediate Modern Hebrew III (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): HEB 022; Consent of Instructor. Continued development of grammar, composition, language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Further development of writing and translating skills. Not open to students who have taken HEB 100C or HEB 102. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

HEB 098—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

HEB 099—Special Study for Undergraduates (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

HEB 100AN—Advanced Modern Hebrew I (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): HEB 023; or Consent of Instructor. students who took HEB 100A as second-year Hebrew may take HEB 100AN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. GE credit: AH. Effective: 2018 Fall Quarter.

HEB 100BN—Advanced Modern Hebrew II (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): HEB 100AN; or Consent of Instructor. students who took HEB 100B as second-year Hebrew may take HEB 100BN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. GE credit: AH. Effective: 2018 Fall Quarter.

HEB 100CN—Advanced Modern Hebrew III (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): HEB 100BN. Third-year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. Students who have taken HEB 100C as second-year Hebrew may take HEB 100CN. GE credit: AH. Effective: 2018 Fall Quarter.

HIN—Hindi/Urdu

Courses in HIN:

HIN 001—Elementary Hindi/Urdu I (5)

Lecture/Discussion—5 hour(s). Introduction to Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency. GE credit: AH, WC. Effective: 2018 Fall Quarter.

HIN 001A—Accelerated Intensive Elementary Hindi (15)

Lecture/Discussion—15 hour(s). Special 12-week accelerated, intensive summer session course that combines the work of HIN 001, HIN 002, and HIN 003. Introduction to Devnagari Script through development of all language skills in cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed HIN 001, HIN 002 or HIN 003. GE credit: AH, WC. Effective: 2018 Fall Quarter.

HIN 002—Elementary Hindi/Urdu II (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): HIN 001. Continuation of HIN 001. Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency. GE credit: AH, WC. Effective: 2018 Fall Quarter.

HIN 003—Elementary Hindi/Urdu III (5)

Lecture/Discussion—5 hour(s). Prerequisite(s): HIN 002. Introduction to listening, speaking, reading, and writing skills in Hindi using the Devanagari script and brief introduction to basic literacy in Urdu using the Nasataliq script. GE credit: AH, WC. Effective: 2019 Winter Quarter.

HIN 021—Intermediate Hindi/Urdu I (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): HIN 003. Intermediate level course for students who have completed Elementary Hindi/Urdu or the equivalent. Students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

HIN 022—Intermediate Hindi/Urdu II (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): HIN 021. Intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

HIN 023—Intermediate Hindi/Urdu III (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): HIN 022. Intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

HIN 098—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

HIN 099—Special Study for Undergraduates (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

HIN 396—Teaching Assistant Training Practicum (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Restricted to graduate students. Teaching practicum. May be repeated up to 18 time(s). (S/U grading only.) Effective: 2018 Fall Quarter.

HIS—History

Courses in HIS:

HIS 001—Introduction to History (2)

Lecture—1 hour(s); Discussion—1 hour(s). Introduction to history, its key methodologies, writing tasks, and research practices. Examination of the development of history as an academic discipline; ethics in historical research. Topical focus changes regularly. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

Lecture—3 hour(s); Discussion—1 hour(s). History of women and gender in America since 1865, emphasizing intersections of gender, race, class, and sexuality. Covers emancipation, migration, immigration, war, media, same-sex and opposite-sex relationships, and the birth control, suffrage, labor, civil rights, feminist, and anti-feminist movements. GE credit: ACGH, AH, DD, SS, WE. Effective: 2014 Fall Quarter.

HIS 080—The History of the United States in the Middle East (2)

Lecture—2 hour(s). History of the United States in the Middle East from 1900 to the present. Examination of U.S. foreign relations toward the Middle East, their regional ramifications and domestic repercussions. GE credit: ACGH, AH, SS, WC. Effective: 2018 Spring Quarter.

HIS 080W—The History of the United States in the Middle East (2)

Lecture/Discussion—1 hour(s); Extensive Writing. Must enroll in HIS 080 concurrently. History of the United States in the Middle East from 1900 to the present. Examination of U.S. foreign relations toward the Middle East, their regional ramifications and domestic repercussions with extensive writing. GE credit: AH, SS, WE. Effective: 2018 Spring Quarter.

HIS 085—Nature, Man, & the Machine in America (4)

Seminar—4 hour(s); Term Paper. Limited enrollment. History of the attitudes and behavior of Americans toward their natural environment and their technology, from colonial times to the present. No final examination. GE credit: AH, SS, WE. Effective: 2016 Spring Quarter.

HIS 090—Research in History (4)

Seminar—3 hour(s); Extensive Writing. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Emphasis on primary sources and archival research. GE credit: AH, WE. Effective: 2019 Fall Quarter.

HIS 092—Internship in History (1-12)

Internship—1-12 hour(s). Prerequisite(s): Consent of Instructor. Supervised internship and study as a historian, archivist, curator, or an in another history-related capacity, in an approved organization or institution. May be repeated for credit. (P/NP grading only.) Effective: 2017 Fall Quarter.

HIS 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

HIS 099—Special Study for Undergraduates (1-5)

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

HIS 100—Selected Topics in History (4)

Lecture—3 hour(s); Term Paper. Selected Topics in History may be organized around a particular geography (e.g., the Balkans), a chronological framework (e.g., the 1960s around the world) or a thematic approach (e.g., the rise of ethnic or racial identities in a particular region). May be repeated for credit when topic differs. GE credit: AH, WE. Effective: 2019 Fall Quarter.

HIS 101—Introduction to Historical Thought & Writing (5)

Lecture/Discussion—4 hour(s); Term Paper. Study of the history of historical thought and writing, analysis of critical and speculative philosophies of history and evaluation of modes of organization, interpretation, and style in historical writing. GE credit: WE. Effective: 2016 Fall Quarter.

HIS 102A—Undergraduate Proseminar in History: Ancient (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Ancient. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102B—Undergraduate Proseminar in History: Medieval (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Medieval. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102D—Undergraduate Proseminar in History: Modern Europe to 1815 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Modern Europe to 1815. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102E—Undergraduate Proseminar in History: Europe Since 1815 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Europe since 1815. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102F—Undergraduate Proseminar in History: Russia (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Russia. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102G—Undergraduate Proseminar in History: China to 1800 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. China to 1800. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102H—Undergraduate Proseminar in History: China Since 1800 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. China since 1800. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102I—Undergraduate Proseminar in History: Britain (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Britain. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102J—Undergraduate Proseminar in History: Latin America Since 1810 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Latin America since 1810. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102K—Undergraduate Proseminar in History: American History to 1787 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. American History to 1787. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102L—Undergraduate Proseminar in History: United States, 1787-1896 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. United States, 1787-1896. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102M—Undergraduate Proseminar in History: United States Since 1896 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. United States since 1896. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102N—Undergraduate Proseminar in History: Japan (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Japan. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102O—Undergraduate Proseminar in History: Africa (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Africa. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102P—Undergraduate Proseminar in History: Christianity & Culture in Europe, 50-1850 (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Christianity and Culture in Europe, 50-1850. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102Q—Undergraduate Proseminar in History: India (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. India. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102R—Undergraduate Proseminar in History: Muslim Societies (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Muslim Societies. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102S—Undergraduate Proseminar in History: Education Abroad Program (5)

Seminar—3 hour(s); Term Paper. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Education Abroad Program; may be taught abroad. May be repeated for credit. GE credit: AH, SS, WE. Effective: 2006 Spring Quarter.

HIS 102X—Undergraduate Proseminar in History: Comparative History (5)

Seminar—3 hour(s); Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Comparative History, selected topics in cultural, political, economic, and social history that deal comparatively with more than one geographic field. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 103—Topics in Historical Research (4)

Discussion—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Individual research resulting in a research paper on a specific topic in one of various fields of history. May be repeated for credit. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 104A—Introduction to Historical Research & Interpretation (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Acceptance into History Department Honors Program. Directed reading and research aimed at preparing students to select appropriate topics and methodologies for a senior honors essay and to situate their topics within a meaningful, broad context of historical interpretations. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 104B—Honors Thesis (4)

Tutorial—4 hour(s). Prerequisite(s): HIS 104A. Research in preparation of a senior honors thesis under the direction of a faculty advisor. GE credit: WE. Effective: 2002 Winter Quarter.

HIS 104C—Honors Thesis (4)

Tutorial—4 hour(s). Prerequisite(s): HIS 104A; HIS 104B. Completion of a senior honors thesis under the direction of a faculty advisor. GE credit: WE. Effective: 2002 Spring Quarter.

HIS 105—Teaching History (4)

Lecture—3 hour(s); Term Paper. Teaching of American and world history at the K-12 level. Emphasis on introducing college students to the multiple ways in which history is taught, and on understanding how history education is determined. GE credit: ACGH, AH, SS, WE. Effective: 2014 Fall Quarter.

HIS 107—Medicine's Histories: Human & Veterinary Medicine from the Ancient World to One Health (4)

Lecture/Discussion—3 hour(s); Project (Term Project). Global, comparative study of the related histories of human and veterinary medicine from the ancient world to today's interdisciplinary One Health. Emphasis on reintegration of human and veterinary medicine to meet the biggest health challenges today. GE credit: AH, SS. Effective: 2017 Spring Quarter.

HIS 108—Global Environmental History (4)

Lecture/Discussion—3 hour(s); Project (Term Project). Global, comparative study of how environmental change, human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500, emphasis on critically analyzing many common ideas of environmental change. Not open for credit to students who have taken HIS 109A. GE credit: AH, SS. Effective: 2014 Fall Quarter.

HIS 109—Environmental Change, Disease & Public Health (4)

Lecture/Discussion—3 hour(s); Project (Term Project). Analysis of environmental changes from pre-history to the present and their influence on disease distribution, virulence and public health. Focus on critical study of many human-driven environmental changes and the accelerated transformation/spread of pathogens under globalization. Not open for credit to students who have taken HIS 109B. (Same course as SAS 109.) GE credit: SE, SL, SS, WC. Effective: 2016 Fall Quarter.

HIS 110—Themes in World History (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): Upper division standing recommended. Topics will emphasize the interaction of diverse regions of the world as well as common patterns of historical change. May be repeated for credit when instructor and/or topic differs. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 110A—Colonialism & the Making of the Modern World (4)

Lecture—3 hour(s); Term Paper. History of the modern world, focusing on struggles between Europeans and colonized peoples; the global formation of capitalism; the creation of nation-states; and the constitution of bourgeois bodies and racial selves in modern societies. GE credit: AH, SS, VL, WC, WE. Effective: 2014 Fall Quarter.

HIS 111A—Ancient History (4)

Lecture—3 hour(s). History of ancient empires of the Near East and of their historical legacy to the Western world. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 111B—Ancient History (4)

Lecture—3 hour(s). Political, cultural and intellectual study of the Greek world from Minoan-Mycenaean period to end of Hellenistic Age. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 111C—Ancient History (4)

Lecture—3 hour(s). Development of Rome from earliest times. Rise and fall of the Roman Republic; the Empire to 476 A.D. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 112A—Topics in Pre-Modern Jewish History (4)

Lecture—3 hour(s); Term Paper. Topics in the history of Jews from the Biblical era to the eras of Jewish emancipation. Topics can be framed chronologically (eg., medieval Jewry) or thematically (eg., trade and Jewish communities). May be repeated once for credit. May be repeated up to 1 time(s). GE credit: AH, SS, WC, WE. Effective: 1997 Fall Quarter.

HIS 112B—Topics in Modern Jewish History (4)

Lecture—3 hour(s); Term Paper. Topics in the history of Jews from the era of Jewish emancipation to the present. Topics can be framed chronologically or thematically (eg. Zionism, assimilation, the post Holocaust Diaspora). May be repeated once for credit. May be repeated up to 1 time(s). GE credit: AH, SS, WC, WE. Effective: 1997 Fall Quarter.

HIS 112C—History of Jews in the Muslim World (4)

Lecture—3 hour(s); Term Paper. History of Jewish communities in the lands of Islam from the time of the Prophet Muhammad to the present day. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 113—History of Modern Israel (4)

Lecture—3 hour(s); Term Paper. Topics include the rise and fall of utopian Zionism, the century-long struggle between Jews and Arabs, the development of modern Hebrew culture, the conflict between religious and secular Jews, and the nature of Israel's multicultural society. GE credit: AH, SS, WC, WE. Effective: 2004 Spring Quarter.

HIS 115A—History of West Africa (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): HIS 015 recommended. West and Central Africa from 1500 to the present. Origins and impact of precolonial states and societies, the trans-Atlantic slave trade, colonialism, decolonization, nationalism, and changes in religions, politics, economics, gender, and culture. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

HIS 115B—History of East Africa & the Indian Ocean (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): HIS 015 recommended. Eastern Africa and the Indian Ocean world from 1500 to the present. Origins and impact of precolonial states and societies, slavery, trade, colonialism, decolonization, nationalism, and changes in religions, politics, economics, gender, and culture. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

HIS 115C—History of Southern Africa from Exploration to the Rainbow Nation (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): HIS 015 recommended. Southern Africa from 1500 to the present. Origins and impact of precolonial states and societies, European colonization, industrialization, urbanization, nationalism, apartheid, and changes in religions, politics, economics, gender, and culture. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

HIS 115D—Postcolonial Africa (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): HIS 015 recommended. Survey of social, political, cultural and economic change in African societies since the ending of European colonial rule in the 20th century. Themes include development, health and medicine, war and conflict, urbanization, global and inter-continental migration, and family and gender. GE credit: AH, SS, WC, WE. Effective: 2017 Spring Quarter.

HIS 115E—Slavery, Africa, & the Atlantic World (4)

Lecture—3 hour(s); Term Paper. History of the African Slave trades, from the early Egyptian and Saharan trades in the pre-modern period to the trans-Atlantic trade (15th-19th century) and the contemporary trafficking of humans. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HIS 115F—History of Modern North Africa, 1800 to the Present (4)

Lecture—3 hour(s); Term Paper. History of Morocco, Algeria, Tunisia and Libya (the Maghrib), 1800 to the present. Topics include conquest and pacification, reform movements, the rise of nationalism, decolonization, state capitalism, economic liberalization, Islamism, democratization and human rights, the interplay of history and memory. GE credit: AH, SS, WC, WE. Effective: 2011 Fall Quarter.

HIS 116—African History: Special Themes (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): HIS 015 recommended. Themes of African history, such as African states and empires, slave trade, relationship of Egypt to rest of Africa, Bantu origins and migrations, and French policy of Assimilation and Association. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 119—World War I (4)

Lecture—3 hour(s); Extensive Writing. The First World War and the settlement that followed from 1914-1919. Causes, conduct, and consequences of the war including military, political, economic, social, and cultural factors, with special emphasis on connections between the home front and the battlefield. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

HIS 120—World War II (4)

Lecture—3 hour(s); Extensive Writing. The Second World War from 1931 to 1945 in all of its theaters. Causes, conduct, and consequences of the war including military, political, economic, social, and cultural factors, with special emphasis on battlefield strategy and mobilization of the home front. GE credit: SS, WC, WE. Effective: 2011 Fall Quarter.

HIS 121A—Medieval History (4)

Lecture/Discussion—3 hour(s). European history from "the fall of the Roman Empire" to the 8th century. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 121B—Medieval History (4)

Lecture/Discussion—3 hour(s). European history from Charlemagne to the 12th century. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 121C—Medieval History (4)

Lecture/Discussion—3 hour(s). European history from the Crusades to the Renaissance. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 122—Selected Themes in Medieval History (4)

Lecture—3 hour(s); Term Paper. Each offering will focus on single major theme, such as medieval agrarian history, feudalism, the family, medieval Italy, or the Crusades. Readings include original sources in English translation and modern works. May be repeated for credit. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 125—Topics in Early Modern European History (4)

Discussion/Laboratory—3 hour(s); Term Paper. Social and cultural history, 1300-1800. Topics such as medieval and Renaissance Italy, early modern Italy, Ancient Regime France, family and sexuality, and material culture and daily life. May be repeated for credit. GE credit: AH, SS, WC, WE. Effective: 2016 Spring Quarter.

HIS 126Y—The History of Human Rights in Europe (4)

Lecture—3 hour(s); Web Electronic Discussion—1 hour(s). History of the origins, development, and state of international humanitarian law (IHL) and international human rights law (IHRL) in Europe. Emphasis on Enlightenment-era and modern theories of the source, utility, and limits of human rights. (Same course as HMR 162Y.) GE credit: SS, WC. Effective: 2017 Fall Quarter.

HIS 130A—Christianity & Culture in Europe: 50-1450 (4)

Lecture—3 hour(s). History of the ideas and institutions of Christianity and their impact on the late Roman Empire and medieval Europe in terms of outlook on life, art, politics and economics. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 130B—Christianity & Culture in Europe: 1450-1600 (4)

Lecture—3 hour(s). History of the Lutheran, Zwinglian-Calvinist, Radical, Anglican, and Catholic Reformations as foundation stones of a new culture in Europe, with special attention to the interconnections between the revival of antiquity and the different reform movements. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 130C—Christianity & Culture in Europe: 1600-1850 (4)

Lecture—3 hour(s). Survey of the intellectual, cultural and political reorientation of European society in the aftermath of the Wars of Religion. "Secularization" will be discussed in the context of the Enlightenment and Romanticism. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 131A—Early Modern European History (4)

Lecture—3 hour(s). Western European history from about 1350 to about 1500. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 131B—European History During the Renaissance & Reformation (4)

Lecture—3 hour(s); Term Paper. Survey of European society, politics, and culture from the late 15th through the early 17th centuries, with particular focus on the Italian and Northern Renaissance, on the Protestant Reformation, and the Catholic Counter Reformation. GE credit: AH, SS, WC, WE. Effective: 1997 Fall Quarter.

HIS 131C—The Old Regime: Absolutism, Enlightenment & Revolution in Europe (4)

Lecture—3 hour(s); Term Paper. Survey of European society, politics, and culture in the 17th and 18th centuries, focusing on religious warfare, absolutism, Scientific Revolution, Enlightenment and the growth of religious tolerance, the French Revolution and the collapse of the old regime. GE credit: AH, SS, WC, WE. Effective: 1997 Fall Quarter.

HIS 132—Crime & Punishment in Early Modern Europe (4)

Lecture—3 hour(s); Term Paper. Deviance and crime in early modern Europe, contrasting imaginary crimes, e.g. witchcraft, with "real" crimes such as highway robbery and infanticide. Examines impact of gender, sexual orientation, ethnicity, and class in processes of criminalization. GE credit: AH, SS, WC, WE. Effective: 1997 Fall Quarter.

HIS 133—European Thought & Culture from the Renaissance to the Enlightenment (4)

Lecture—3 hour(s); Term Paper. History of European thought on politics, society, science, and religion from 1400 to 1800. Cultural impact of printing press, Protestant Reformation, wars, exploration, and empire. GE credit: AH, SS, WC. Effective: 2019 Summer Session 1.

HIS 134A—The Age of Revolution (4)

Lecture—3 hour(s). Ideas and institutions during the French Revolution and the Napoleonic era. GE credit: AH, SS, WE. Effective: 1997 Winter Quarter.

HIS 135A—History of Science to the 18th Century (4)

Lecture/Discussion—3 hour(s); Term Paper. Survey of the historical development of science, technology, and medicine from the ancient world to the 18th century, with special emphasis on Isaac Newton as the culmination of the 17th-century scientific revolution. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 135B—History of Science, 18th to 20th Centuries (4)

Lecture/Discussion—3 hour(s); Term Paper. Survey of the historical development of scientific thought in geology, biology, chemistry, physics, and cosmology from the 18th to the 20th century, with special emphasis on emergence of broad explanatory principles that serve more than one science. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 136—Scientific Revolution (4)

Lecture/Discussion—3 hour(s); Term Paper. The rise of modern science in Europe, 1500–1750. The transformation of ideas about nature, knowledge, medicine, and technology in the age of Copernicus, Vesalius, Galileo, Descartes, and Newton. GE credit: AH, SS. Effective: 2019 Winter Quarter.

HIS 138A—The Rise of the Russian Empire, 1304-1825 (4)

Lecture—3 hour(s); Term Paper. Expansion of the Russian state in Muscovite and imperial era. Emphasis on autocratic rule, the incorporation of non-Russian peoples, and emergence of Russia as a Great Power. Only 2 units of credit will be allowed to students who have completed former HIS 137B. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 138B—Reform & Revolution in Tsarist Russia, 1825-1917 (4)

Lecture—3 hour(s); Term Paper. Processes of state reform and social change in the 19th century; failure of reform and collapse of the Russian Empire; the revolutions of 1917. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 138C—Russian History: The Rise & Fall of the Soviet Union, 1917 to Present (4)

Lecture—3 hour(s); Term Paper. Emergence of the Soviet Union as a socialist system and a Great Power; the decline and collapse of the Soviet Union and the formation of independent nation states in its place. Not open for credit to students who have completed former HIS 137C. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 139A—Medieval & Renaissance Medicine (4)

Discussion/Laboratory—3 hour(s); Term Paper. History of medicine, circa 1000-1700. Revival of ancient medicine; role of the universities; development of anatomy, chemistry and natural history; ideas about the body; cultural understanding of disease; hospital and the public health system. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 139B—Medicine, Society, & Culture in Modern Europe (4)

Lecture—2 hour(s); Discussion—1 hour(s); Term Paper. History of European medicine, 18th to 20th centuries, by examining the development of medical knowledge in epidemiology and anatomy; function of this knowledge, how it changed with technological breakthroughs and professionalization; and role of medicine in attitudes toward poverty, women, race, disease. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 140—The Rise of Capitalism in Europe (4)

Lecture—3 hour(s); Term Paper. Comparative analysis of major interpretations of the rise of merchant capitalism during the Middle Ages and Renaissance; European expansion overseas, 1450-1815; the transition to modern capitalism via industrial revolution. Interplay of social, political, cultural, and economic history. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 141—France Since 1815 (4)

Lecture—3 hour(s); Term Paper. France since 1815. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 142A—History of the Holocaust (4)

Lecture—3 hour(s); Term Paper. Topics include comparative genocide, medieval and modern antisemitism, modern German history, the rise of Nazism, Jewish life in Europe before the Nazi period, and the fate of the Jewish communities and other persecuted groups in Europe from 1933-1945. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 142B—The Memory of the Holocaust (4)

Lecture—3 hour(s); Term Paper. Examination of the literary, philosophical, theological and artistic responses to the Holocaust of the European Jews. Exploration of how memory is constructed, by whom and for what purposes. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 143—History of Eastern Europe & the Balkans (4)

Lecture—3 hour(s). History of the Baltic, Danubian, and Balkan lands since the Middle Ages. National cultures and conflicts in the Polish Commonwealth and the Habsburg and Ottoman Empires; nationalist movements, 1789-1914; the 20th century, including an analysis of the contemporary scene. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 144A—History of Germany, 1450 to 1789 (4)

Lecture—3 hour(s); Extensive Writing. Survey of early modern Germany, 1450 to 1789, covering the theology and social history of the Reformation, the Peasants War of 1525, religious warfare, state building and absolutism, the rise of Prussia, Austro-Prussian dualism, and the German Enlightenment. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 144B—History of Germany since 1789 (4)

Lecture/Discussion—3 hour(s); Extensive Writing. History of the German lands in the age of the French Revolution; 19th-century liberalism, nationalism, and industrialization; the World Wars, National Socialism, and the Holocaust; east and west Germany in the Cold War; the post-reunification scene. Not open for credit to students who have completed former HIS 144. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 145—War & Revolution in Europe: 1789-1918 (4)

Lecture—3 hour(s); Term Paper. Survey of revolutionary movements, international crises, and wars in Europe from the French Revolution to World War I. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 146A—Europe in the 20th Century (4)

Lecture—3 hour(s); Term Paper. Survey of the history of Europe from 1919 to 1939. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 146B—Europe in the 20th Century (4)

Lecture—3 hour(s); Term Paper. Survey of the history of Europe since 1939. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 147A—European Intellectual History: 1800-1870 (4)

Lecture—3 hour(s); Term Paper. European thought in the early industrial era. Shifting cultural frameworks, from romanticism to scientism; liberal and socialist reactions to social change. Focus on the work of Goethe, Hegel, J.S. Mill, Marx, Darwin and Flaubert. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 147B—European Intellectual History: 1870-1920 (4)

Lecture—3 hour(s); Term Paper. Cultural and intellectual watershed of the late-19th and early-20th centuries. Emergence of modern art and literature; psychoanalysis and the new social sciences. Focus on the work of Baudelaire, Wagner, Nietzsche, Freud, Weber and Kafka. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 147C—European Intellectual History: 1920-1970 (4)

Lecture—3 hour(s); Term Paper. European thought and culture since World War I. Coverage includes: literature and politics; Communism and Western Marxism; Fascism; Existentialism; Structuralism; Feminism. Particular attention to Lenin, Brecht, Hitler, Sartre, Camus, Beckett, Marcuse, Foucault, Woolf and de Beauvoir. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 148A—Women & Society in Europe: 1500-1789 (4)

Lecture—3 hour(s); Term Paper. Roles and perceptions of women from the Renaissance to the French Revolution. Emphasis on social and economic factors as well as on discussions of women in the writings of political theorists and social commentators. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 148B—Women & Society in Europe: 1789-1920 (4)

Lecture—3 hour(s); Term Paper. Roles and perceptions of women from the French Revolution to World War I, primarily in France and England. Emphasis on social and economic developments within a loosely chronological and comparative framework. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 148C—Women in Society in Europe: 1914-Present (4)

Lecture—3 hour(s); Term Paper. History of 20th-century Europe from the perspective of women and the family, and of sexual and gender relations. Emphasis on the impact on women of major events and movements, such as World War I, fascism, Soviet communism, World War II, the welfare state, feminism, and mass culture. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 149—Comparative Cultural History of Modern Britain & France, 1880-1914 (4)

Lecture—3 hour(s); Term Paper. Cultural comparison of the histories of Britain and France during the fin de siècle. Addresses cultural debates of the period (including gender, race, class) and the practices of cultural history. GE credit: AH, SS, WC, WE. Effective: 1999 Winter Quarter.

HIS 151A—England: The Middle Ages (4)

Lecture—3 hour(s); Term Paper. Origins of England to the accession of the Lancastrians. Survey includes: impact of Norman Conquest on Anglo-Saxon institutions; rise of the Church, common law, parliament, and the economy; thought, arts, and literature to the age of Chaucer and Wyclif. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 151B—England: The Early Modern Centuries (4)

Lecture—3 hour(s); Term Paper. From Lancaster and York to the Glorious Revolution. Includes growth of the Church of England; beginnings of modern worldwide economy; rise of the gentry and parliament; thought, arts, and literature in the times of More, Shakespeare, Hobbes, Wren, and Newton. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 151C—18th-Century England (4)

Lecture—3 hour(s); Term Paper. English history from the Glorious Revolution to the French Revolution. Examination of the transformation of one of Europe's most politically unstable kingdoms into the firmly established constitutional monarchy which provided an environment fit to engender the industrial revolution. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 151D—Industrial England (4)

Lecture—3 hour(s); Term Paper. English history from Waterloo to the Battle of Britain; the rise and continuance of the first industrial nation, examining the transformation of landed to class society, oligarchy to democracy and bureaucracy, Bentham to Bloomsbury, empire to commonwealth. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 156—Latin American Migration History (4)

Lecture—3 hour(s); Term Paper. Migrations to, from, and within Latin America, with a focus on the period from independence to the present day. The historical development of settler colonialism, inter-regional migrations, rural-to-urban migration, migration promotion, restriction laws, naturalization, and sanctuary across Latin American scenarios. Research paper required. Not open for credit to students who have previously completed an upper division history course in latin american migration history. GE credit: SS, WC, WE. Effective: 2020 Winter Quarter.

HIS 157—Business, Biomes & Knowledge: Latin American Environmental History (4)

Lecture—3 hour(s); Project (Term Project). Introduction to the geography, political ecology, environmental movements of Latin America and the Caribbean, regional biomes, commodity markets, and the relationships between non-human ecosystems and Latin American societies. Development of extractive processes, land law, agricultural practices, scientific knowledge, and environmental conservation in neotropical forests, Sonoran Desert, the Amazon, Andes and Pampas, among other ecologies. GE credit: SS, WC, WE. Effective: 2020 Spring Quarter.

HIS 158—Special Topics in Latin American History (4)

Lecture—3 hour(s); Term Paper. Topics in the history of Latin America. Topics may be framed geographically (e.g., Central America), chronologically (e.g., The Cold War) or thematically (e.g., environmental history). May be repeated up to 3 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

HIS 159—Women & Gender in Latin American History (4)

Lecture—3 hour(s); Extensive Writing. Roles of women and men in the history of Latin America, with an emphasis on the intersection of gender with racial and class categories. Introduction to the theoretical premises of women's and gender history. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 160—Spain & America in the 16th Century (4)

Lecture—3 hour(s); Term Paper. Atlantic world in the 16th century, particularly the transcultural and reciprocal social and economic relations between Spain and America in the course of colonization. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 161—Human Rights in Latin America (4)

Lecture—3 hour(s); Term Paper. History of the origins, denial and protection of Human Rights in Latin America. Emphasis on dictatorships, political violence, social resistance, democracy, justice, accountability, truth commissions, memory. (Same course as HMR 161.) GE credit: AH, SS, VL, WC, WE. Effective: 2015 Spring Quarter.

HIS 162—History of the Andean Region (4)

Lecture/Discussion—3 hour(s). History of the Andean region, the area that now comprises modern Peru, Bolivia, and Chile, from the beginning of human settlement to the present. May be taught abroad. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 163A—History of Brazil (4)

Lecture—3 hour(s). The history of colonial and imperial Brazil from 1500 to 1889. Written reports. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 163B—History of Brazil (4)

Lecture—3 hour(s). The history of the Brazilian republic from 1889 to the present. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 164—History of Chile (4)

Lecture—3 hour(s); Term Paper. Emphasis on the history of Chilean political economy from 1930 to the present. Various strategies of development (modernization, Marxism, Neo-Liberalism); the rise of mass politics; the course of foreign relations; and the richness of Chilean literature. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 165—Latin American Social Revolutions (4)

Lecture—3 hour(s). Major social upheavals since 1900 in selected Latin American nations; similarities and differences in cause, course, and consequence. May be taught abroad. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 166A—History of Mexico to 1848 (4)

Lecture/Discussion—3 hour(s). Political, economic, and social development of pre-Columbian, colonial and national Mexico to 1848. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 166B—History of Mexico since 1848 (4)

Lecture/Discussion—3 hour(s). History of Mexico from 1848 to the present. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 167—Modern Latin American Cultural & Intellectual History (4)

Lecture—3 hour(s); Term Paper. Introduce to the cultural and intellectual history of modern Latin America including architecture, cinema, painting, music and literature. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 168—History of Inter-American Relations (4)

Lecture—3 hour(s). Diplomatic history of Latin America since independence, intra-Latin American relations, relations with the United States, participation in international organizations, and communism in Latin America. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 169A—Mexican-American History (4)

Lecture/Discussion—3 hour(s). Economic, social, religious, cultural and political development of the Spanish-speaking population of the Southwestern United States from about 1800 to 1910. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): HIS 009A or upper division standing recommended. Patterns and problems of Chinese life traced through the Ming and Ching dynasties (c.1500-1800), prior to the confrontation with the West in the Opium War. Readings include primary sources and novels portraying elite ethos as well as popular culture. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 191D—19th-Century China: The Empire Confronts the West (4)

Lecture—2 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): HIS 009A or upper division standing recommended. Decline and fall of the Chinese Empire, with particular attention to the social and political crises of the 19th century, and the response of government officials, intellectuals, and ordinary people to the increasing pressures of Western imperialism. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 191E—The Chinese Revolution (4)

Lecture—2 hour(s); Discussion—1 hour(s); Extensive Writing. Prerequisite(s): Upper division standing recommended. Analysis of China's cultural and political transformation from Confucian empire into Communist state. Emphasis on emergence and triumph of peasant revolutionary strategy (to 1949), with some attention to its implications for post-revolutionary culture and politics. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 191F—History of the People's Republic of China (4)

Lecture—2 hour(s); Discussion—1 hour(s); Extensive Writing. Prerequisite(s): Upper division standing recommended. Comprehensive analysis of recent Chinese history, including land reform, the Cultural Revolution, the post-Mao era, and the consequences of the new economic policies of the 1980s. Not open for credit to students who have completed HIS 190C. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 191G—Special Topics in Chinese History to 1800 (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): HIS 009A recommended. Topics in the history of China from the beginning of the imperial period through the high Qing dynasty. Topics may be framed chronologically (e.g., the Ming Dynasty) or thematically (e.g., Trade in early Chinese history). May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

HIS 191H—Special Topics in Chinese History after 1800 (4)

Lecture—3 hour(s); Extensive Writing. Prerequisite(s): HIS 009A recommended. Topics in the history of China since 1800. Topics may be framed chronologically (e.g., The Republican Period (1911-1948)) or thematically (e.g., The Modern Evolution of Chinese Law). May be repeated up to 1 time(s) when topics differs. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

HIS 191J—Sex & Society in Modern Chinese History (4)

Lecture—3 hour(s); Term Paper. Role of sex, gender, and family relations in the development of Chinese politics, society, and personal life in the modern period, 1900-present. GE credit: AH, WC, WE. Effective: 2015 Winter Quarter.

HIS 192—Internship in History (1-12)

Variable. Prerequisite(s): Consent of Instructor. Enrollment dependant on availability of intern positions, with priority to History majors. Supervised internship and study as historian, archivist, curator, or in another history-related capacity, in an approved organization or institution. (P/NP grading only.) Effective: 1997 Winter Quarter.

HIS 193A—History of the Modern Middle East, 1750-1914 (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): HIS 006 recommended. State and society within the Middle East from 1750 to 1914 under pressure of the changing world economy and European imperialism. Themes: colonialism, Orientalism, intellectual renaissance, Islamic reform, state-formation, role of subaltern groups. GE credit: AH, SS, VL, WC, WE. Effective: 2017 Fall Quarter.

HIS 193B—History of the Modern Middle East, From 1914 (4)

Lecture—3 hour(s); Term Paper. Middle East from the turn of the 20th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, Palestine/Israel, Islamic revival, gender, revolutionary movements, politics of oil and war, cultural modernism, exile and diaspora. GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

HIS 193C—The Middle East Environment: Historical Change & Current Challenges (4)

Lecture/Discussion—3 hour(s); Project (Term Project). Examines Middle East environment and human use of nature over last 10,000 years. Introduction to desert ecology, environmental history and current environmental problems. Case Studies of Egypt, Maghreb countries, Arabian peninsula/Gulf countries, desertification, water, indigenous knowledge, and national parks. GE credit: AH, SS. Effective: 2016 Fall Quarter.

HIS 193D—History of Modern Iran, From 1850 to Present (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): HIS 006 recommended. Modern Iran from the mid 19th century to the present. Themes include the legacy of imperialism, cultural renaissance, the World Wars, nationalism, modernization, Islamic revival, gender, revolutionary movements, politics of oil and war. GE credit: AH, SS, VL, WC, WE. Effective: 2011 Fall Quarter.

HIS 194A—Aristocratic & Feudal Japan (4)

Lecture—3 hour(s); Term Paper; Discussion. Broad survey of the cultural, social, religious, and political aspects of Japanese history from mythological times through the 16th century emphasizing comparison of the organizations, values, and beliefs associated with the aristocratic and feudal periods. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 194B—Early Modern Japan (4)

Lecture—3 hour(s); Term Paper/Discussion. Survey of the cultural, social, economic, and political aspects of Japanese history from the 17th through the 19th centuries emphasizing the development of those patterns of thought and political organization with which Japan met the challenge of the nineteenth-century Western expansionism. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 194C—Modern Japan (4)

Lecture—3 hour(s); Term Paper/Discussion. Survey of the cultural, social, economic, and political aspects of Japanese history in the 20th century emphasizing labor and social movements, militarism and the Pacific war, and the emergence of Japan as a major economic power. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 194D—Business & Labor in Modern Japan (4)

Lecture—3 hour(s); Term Paper. Survey of labor and management relations in Japan from the mid-18th century to the present. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 194E—Education & Technology in Modern Japan (4)

Lecture—3 hour(s); Term Paper. Survey of education and technology in Japan from the mid-18th century to the present. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 195B—History of Modern Korea (4)

Lecture—3 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): Upper division standing recommended. History of Modern Korea, from Yi dynasty period to 1990s. Covers the political and socioeconomic changes in 19th century, modernization under Japanese colonialism, postwar economic growth and effects of the Cold War. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 195C—A History of Vietnam (4)

Lecture/Discussion—4 hour(s). Overview of Vietnamese history: early state formation in Southeast Asia; expansion/contention in the 17th and 18th centuries; colonial period; war with the US; and post-war developments (with an emphasis on relations with China and the US). GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HIS 196A—Medieval India (4)

Lecture—3 hour(s); Discussion—1 hour(s). Survey of history of India in the millennium preceding arrival of British in the 18th century, focusing on interaction of the civilizations of Hinduism and Islam and on the changing nature of the state. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 196B—Modern India (4)

Lecture—3 hour(s); Discussion—1 hour(s). Survey of cultural, social, economic, and political aspects of South Asian history from arrival of the British in the 18th century to formation of new independent states-India, Bangladesh, and Pakistan in the 20th century. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 197T—Tutoring in History (2)

Discussion—1 hour(s); Laboratory—3 hour(s). Prerequisite(s): Enrolled as a History major with senior standing and consent of department chairperson. Tutoring of students in lower division courses. Weekly meeting with instructors in charge of courses. Written reports on methods and materials required. No final examination. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

HIS 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Upper division standing. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

HIS 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

HIS 201A—Sources & General Literature of History: Ancient (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Ancient. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201B—Sources & General Literature of History: Medieval (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Medieval. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201C—Sources & General Literature of History: Renaissance & Reformation (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Renaissance & Reformation. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201D—Sources & General Literature of History: Early Modern Europe (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Early Modern Europe. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201E—Sources & General Literature of History: Europe Since 1815 (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. (E) Europe since 1815. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201F—Sources & General Literature of History: China to 1880 (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. China to 1880. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201G—Sources & General Literature of History: China Since 1880 (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. China since 1880. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201H—Sources & General Literature of History: Britain (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Britain. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201I—Sources & General Literature of History: Latin America Since 1810 (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Latin America since 1810. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201J—Sources & General Literature of History: American History to 1787 (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. American History to 1787. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201K—Sources & General Literature of History: United States, 1787-1896 (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. United States, 1787-1896. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201L—Sources & General Literature of History: United States Since 1896 (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. United States since 1896. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201M—Sources & General Literature of History: Middle East (4)

Seminar—3 hour(s); Term Paper. Addresses various theoretical and methodological approaches to the study of the Modern Middle East. Survey Modern Middle East historiography in light of theoretical innovations such as post-Orientalism, World Systems theory, and postcolonial theory. May be repeated for credit when subject differs. Effective: 2011 Winter Quarter.

HIS 201N—Sources & General Literature of History: Modern Japan (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Modern Japan. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201P—Sources & General Literature of History: African Historiography (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. African Historiography. May be repeated for credit when subject differs. Effective: 2005 Winter Quarter.

HIS 201Q—Sources & General Literature of History: Cross-Cultural Women's History (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Cross-Cultural Women's History. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201S—Sources & General Literature of History: History of Science & Medicine (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. History of Science and Medicine. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201T—Sources & General Literature of History: Jewish History (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Jewish History. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 201W—Sources & General Literature of History: Advanced Topics in World History (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. Advanced Topics in World History. May be repeated for credit when subject differs. Effective: 2007 Spring Quarter.

HIS 201X—Sources & General Literature of History: World History (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Designed primarily for students preparing for higher degrees in history. (X) World History. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202A—Major Issues in Historical Interpretation: Ancient (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Ancient. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202B—Major Issues in Historical Interpretation: Medieval Europe (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Medieval Europe. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202C—Major Issues in Historical Interpretation: Modern Europe (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Modern Europe. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202D—Major Issues in Historical Interpretation: India (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. India. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202E—Major Issues in Historical Interpretation: India (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Africa. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202F—Major Issues in Historical Interpretation: China (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. China. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202G—Major Issues in Historical Interpretation: Japan (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Japan. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202H—Major Issues in Historical Interpretation: United States (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. United States. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 202I—Major Issues in Historical Interpretation: Latin America (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Latin America. Readings, papers, and class reports. May be repeated for credit when subject differs. Effective: 1997 Winter Quarter.

HIS 203A—Research Seminar (4)

Seminar—3 hour(s); Tutorial—1 hour(s). Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. Effective: 2003 Fall Quarter.

HIS 203B—Research Seminar (4)

Seminar—3 hour(s); Tutorial—1 hour(s). Prerequisite(s): HIS 203A. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. Effective: 2004 Winter Quarter.

HIS 203C—Research Seminar (4)

Seminar—3 hour(s); Tutorial—1 hour(s). Prerequisite(s): HIS 203A. Designed for students preparing for higher degrees in History. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. Effective: 2004 Spring Quarter.

HIS 204—Historiography (4)

Seminar—3 hour(s); Term Paper. Major issues in the philosophy and methodology of history. Effective: 1997 Winter Quarter.

HIS 221—Medieval History (4)

Seminar—3 hour(s). Prerequisite(s): HIS 121A, HIS 121B, HIS 121C recommended. Topics in the history of medieval and early Renaissance Europe. Effective: 1997 Winter Quarter.

HIS 245—Modern European History (4)

Seminar—3 hour(s). Prerequisite(s): HIS 201E. Primary sources and research methodologies in the history of modern France and Germany. May be repeated once for credit. May be repeated up to 1 time(s). Effective: 1997 Winter Quarter.

HIS 261—Latin American History (4)

Seminar—3 hour(s). Prerequisite(s): Two courses in Latin American history; reading knowledge of Spanish or Portuguese. Effective: 1997 Winter Quarter.

HIS 271A—United States History (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): (HIS 201J, HIS 201K, HIS 201L) or HIS 202H. Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. Effective: 1998 Winter Quarter.

HIS 271B—United States History (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): (HIS 201J, HIS 201K, HIS 201L) or HIS 202H. Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. Effective: 1998 Winter Quarter.

HIS 291A—Chinese History (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Research on topics to be chosen by the students for the purpose of writing article-length papers. May be repeated for credit. Effective: 1997 Winter Quarter.

HIS 291B—Chinese History (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Consent of Instructor. Completion of article-length papers on topics chosen by students. May be repeated for credit. Effective: 1997 Winter Quarter.

HIS 291C—Methods & Issues in Chinese History (4)

Seminar—2 hour(s); Tutorial—1 hour(s). Prerequisite(s): Consent of Instructor. Reading knowledge of Chinese. Readings in Chinese historical materials. Training in the use of Chinese reference works (including on-line resources). May be repeated for credit. Effective: 2007 Fall Quarter.

HIS 292—College Teaching Internship (4)

Internship—4 hour(s). Prerequisite(s): HIS 300 (may be taken concurrently). Student prepares and teaches one lower division history course in a nearby community college under the supervision of a UC Davis instructor and a community college instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 298—Group Study (1-5)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 299—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 299D—Research (1-12)

Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 389—Introductory Seminar for Teaching Assistants (1)

Seminar—1 hour(s). Prerequisite(s): HIS 390 (can be concurrent); HIS 390 required concurrently. An introduction to the broad comparative and theoretical issues of teaching methods and techniques in history. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 390—Teaching History in College (2)

Discussion—2 hour(s). Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.) Effective: 1997 Winter Quarter.

HMR—Human Rights

Courses in HMR:**HMR 001—Human Wrongs/Human Rights (4)**

Lecture—3 hour(s); Discussion—1 hour(s). Introduction to Human Rights and the problems they seek to address. Using key episodes of inhumanity like slavery, genocide, and racism. Examines how international movements for social justice led to the emergence of the international Human Rights system. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HMR 120A—Art, Architecture, & Human Rights (4)

Lecture/Discussion—4 hour(s). Study of human rights as they relate to art, architecture, and cultural heritage. Examines museums, art collections, and cultural-heritage management, their relation to the cultural prerogatives of communities and indigenous groups, and protection of cultural heritage during war and conflict. (Same course as AHI 120A.) GE credit: AH, DD, SS, VL, WC, WE. Effective: 2017 Fall Quarter.

HMR 130—Special Topics in Human Rights (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): HMR 134 or RST 134 recommended. Thematic study of human rights. Topics may include contemporary or historical issues in the promotion, protection, and violation of human rights; human rights and the arts, religion, literature are possible topical areas. May be repeated for credit when topic differs. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HMR 131—Genocide (4)

Lecture/Discussion—3 hour(s); Term Paper/Discussion—1 hour(s). Prerequisite(s): Upper division standing. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. GE credit: AH, SS, VL, WC, WE. Effective: 2018 Fall Quarter.

HMR 134—Human Rights (4)

Lecture/Discussion—3 hour(s); Term Paper/Discussion—1 hour(s). Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. No credit for students who have completed RST 090. GE credit: AH, SS, WC, WE. Effective: 2019 Winter Quarter.

HMR 136—Human Rights in the Middle East (4)

Lecture/Discussion—3 hour(s); Term Paper. Study of the experience of Human Rights in the modern Middle East, with special attention to the Human Rights issues raised by events of Arab Spring; Palestine-Israel conflict; history of genocide, mass killing and totalitarianism in the region. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HMR 138—Human Rights, Gender, & Sexuality (4)

Lecture/Discussion—3 hour(s); Term Paper. Gender and sexuality in the context of human rights. Topics include women's participation in the public sphere, the right to change gender, the right for family privacy, and the right to marriage. GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.

HMR 140A—Human Rights & the Popular Imagination (4)

Lecture—3 hour(s); Term Paper/Discussion—1 hour(s). Arts, music, literature, film and television in the rise of human rights movements and the protection, promotion and violation of human rights. Topics may include: human rights & science fiction; human rights & the graphic novel; human rights & contemporary cinema; human rights & rock and roll. May be repeated up to 1 time(s) when topic differs. GE credit: AH, SS, WC, WE. Effective: 2020 Winter Quarter.

HMR 140B—The Art & Politics of Memory in Latin America: Truth, Justice, & Reconciliation (4)

Lecture—3 hour(s); Term Paper/Discussion—1 hour(s). Critical analysis of the dictatorships and civil conflicts that took place in Cold War Latin America. Case studies focus on the violation of human rights as well as on the political and cultural battles for truth, justice, and reconciliation that take place in the aftermath of those violations. Emphasis on how memory is constructed, in what forms, by whom, and for what purposes. GE credit: AH, SS, WC, WE. Effective: 2019 Summer Session 2.

HMR 161—Human Rights in Latin America (4)

Lecture—3 hour(s); Term Paper. History of the origins, denial and protection of Human Rights in Latin America. Emphasis on dictatorships, political violence, social resistance, democracy, justice, accountability, truth commissions, memory. (Same course as HIS 161.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Fall Quarter.

HMR 162Y—The History of Human Rights in Europe (4)

Lecture—3 hour(s); Web Electronic Discussion—1 hour(s). History of the origins, development, and state of international humanitarian law (IHL) and international human rights law (IHRL) in Europe. Emphasis on Enlightenment-era and modern theories of the source, utility, and limits of human rights. (Same course as HIS 126Y.) GE credit: SS, WC. Effective: 2017 Fall Quarter.

HMR 190—Seminar (4)

Seminar—3 hour(s); Term Paper. Emphasis on current scholarly debate about the methods for analyzing and comparing diverse human rights issues with the intention of integrating disciplined study of the field. Effective: 2017 Fall Quarter.

HMR 198—Directed Group Study (1-4)

Variable. Prerequisite(s): Consent of Instructor. Group study on focused topics in human rights. May be taught abroad. May be repeated for credit. (P/NP grading only.) Effective: 2017 Fall Quarter.

HMR 199—Special Study for Advanced Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. Opportunity for advanced undergraduate students to work with a faculty member in a focused manner on a topic or topics of human rights. May be repeated for credit. (P/NP grading only.) Effective: 2017 Fall Quarter.

HMR 200A—History, Theory & Criticism of Human Rights (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar engages with criticism of Human Rights and develops research and teaching within disciplinary and interdisciplinary frameworks. (Same course as REL 231E.) Effective: 2017 Fall Quarter.

HMR 200B—Memory, Culture, & Human Rights (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, inter-group conflicts, and human rights struggles. (Same course as CST 210.) Effective: 2017 Fall Quarter.

HMR 298—Group Study (1-4)

Variable—1 hour(s). Prerequisite(s): Consent of Instructor. Restricted to graduate students. Group study on focused topics in human rights. Four-unit courses may serve as electives for the Designated Emphasis in Human Rights. May be repeated up to 16 unit(s) when topic differs. Effective: 2017 Fall Quarter.

HMR 299—Individual Study (1-12)

Variable—1-12 hour(s). Prerequisite(s): Consent of Instructor. Restricted to graduate students. Individual study for the designated emphasis in human rights. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

HMR 396—Teaching Assistant Training Practicum (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. Restricted to graduate students. Teaching Assistant Training Practicum. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

HNR—Honors Challenge

Courses in HNR:**HNR 090X—Honors Discussion Section (1)**

Discussion—1 hour(s). Prerequisite(s): Open only to students in the Davis Honors Challenge. Examination of special topics in selected lower division courses through additional readings, discussions, term papers, collaborative work, or special activities, including projects, field and laboratory experiences, computer simulations, creative works. May be repeated for credit. Effective: 1997 Spring Quarter.

HNR 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Fall Quarter.

HNR 094—Honors Seminar (4)

Seminar—4 hour(s). Open to students in the Davis Honors Challenge. Collaborative, multidisciplinary exploration of complex contemporary problem. Focus on critical thinking and analytical interpretation, on oral and written communication, and on the use of electronic media in gathering information. May be repeated for credit. GE credit: WE. Effective: 2013 Winter Quarter.

HNR 098—Directed Group Study (1-5)

Discussion—1-5 hour(s). Prerequisite(s): Consent of Instructor. Open to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.) Effective: 1997 Summer Quarter.

HNR 099—Special Study for Undergraduates (1-5)

Independent Study—1-5 hour(s). Prerequisite(s): Consent of Instructor. Student in the Davis Honors Challenge. (P/NP grading only.) Effective: 1997 Winter Quarter.

HNR 190X—Honors Contract (1)

Independent Study; Discussion. Prerequisite(s): Open only to students in the Davis Honors Challenge. In-depth examination of material in an upper division course as defined in an Honors Contract Proposal submitted by the student. Contract must be approved by the instructor and the Honors Council of the Academic Senate. May be repeated for credit. Effective: 1997 Fall Quarter.

HNR 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Open only to students in the Davis Honors Challenge. Supervised work experience under the auspices of the Davis Honors Challenge. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Fall Quarter.

HNR 194—Honors Seminar (3)

Seminar—3 hour(s). Prerequisite(s): Consent of Instructor. Open only to students in the Davis Honors Challenge. Team-based work on actual problems drawn from the public or private sector. Focus on critical thinking and analytic interpretation, oral and written communication skills, and development of practical solutions to real-world problems. Effective: 2000 Fall Quarter.

HNR 195—Honors Thesis/Honors Project (1-3)

Independent Study—3-9 hour(s). Prerequisite(s): Open only to students in the Davis Honors Challenge. Guided independent study of a selected topic leading to the presentation of an honors thesis/honors project. May be repeated up to 9 unit(s). Effective: 1999 Fall Quarter.

HNR 198—Directed Group Study (1-5)

Discussion—1-5 hour(s). Prerequisite(s): Consent of Instructor. Open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.) Effective: 1997 Fall Quarter.

HNR 199—Special Study for Advanced Undergraduates (1-5)

Independent Study—1-5 hour(s). Prerequisite(s): Open only to students in the Davis Honors Challenge. May be repeated for credit. (P/NP grading only.) Effective: 1997 Fall Quarter.

HON—Hematology & Oncology

Courses in HON:

HON 199—Research in Hematology-Oncology (1-5)

Laboratory. Prerequisite(s): Consent of Instructor. Upper division standing. Experience in laboratory research. (P/NP grading only.) Effective: 1997 Winter Quarter.

HON 298—Topics in Hematology (1-4)

Variable. Prerequisite(s): One year of graduate work and/or consent of instructor. Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics to be dictated by the interest and background of the students. Effective: 1997 Winter Quarter.

HON 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.) Effective: 1997 Winter Quarter.

HON 420—Oncology (4)

Lecture/Discussion—2 hour(s). Prerequisite(s): Approval by the SOM Committee on Student Promotions. Restricted to Medical student only; students must pass all Year 1 SOM courses. Covers the principles of oncology and the pathophysiology of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses. (P/F grading only.) Effective: 2015 Fall Quarter.

HON 460—Hematology-Oncology Consult Clerkship (6-12)

Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Acting intern on inpatient hematology/oncology ward service. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HON 461—Hematology-Oncology Consult Clerkship (6-12)

Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HON 462—Hematology-Oncology Ambulatory Clerkship (3-18)

Clinical Activity—30 hour(s). Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Winter Quarter.

HON 493—Cancer as a Process (1-6)

Seminar—10 hour(s); Clinical Activity—14 hour(s); Auto Tutorial—6 hour(s); Independent Study—10 hour(s). Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Covers cancer as a process, beginning with risks and prevention, preneoplasia, microinvasion, treatment options, metastases and systemic therapy, pain medicine and palliative care, and cancer communication. Format includes traditional lectures, student-led case discussions, and problem-based learning. (H/P/F grading only.) Effective: 2012 Summer Quarter.

HON 499—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HPH—Human Physiology

Courses in HPH:

HPH 098F—Student Facilitated Course (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Effective: 2019 Fall Quarter.

HPH 099—Special Study for Undergraduates (1-5)

Variable—3-15 hour(s). Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2004 Fall Quarter.

HPH 115—Cannabis & Cannabinoids in Physiology & Medicine (3)

Lecture—3 hour(s). Prerequisite(s): NPB 100 or NPB 101 or NPB 110B; or Consent of Instructor. In-depth scientific analysis of cannabis and cannabinoids, topics include biochemical, physiological, behavioral, pharmacological, social and therapeutic aspects of cannabinoids, with emphasis on the physiological impacts on major organ systems in humans and animals, and the potential medicinal uses. GE credit: SE, SL. Effective: 2017 Spring Quarter.

HPH 157—Advanced Physiology of Animal/Human Disease (3)

Lecture—1 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): NPB 101 B+ or better or NPB 110C B+ or better; Consent of Instructor. Limited to 35 students initially. Centers on fundamental mechanisms and pathophysiological basis for animal and human diseases. Case-based and uses animal and human diseases to help exemplify the physiological consequences of organ dysfunction. (Same course as NPB 157.) Effective: 2017 Spring Quarter.

HPH 192—Internship in Human Physiology (1-12)

Internship—3-36 hour(s). Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in physiology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

HPH 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed reading, discussion and/or laboratory experience on selected topics. (P/NP grading only.) Effective: 1997 Winter Quarter.

HPH 198F—Student Facilitated Course (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Effective: 2019 Fall Quarter.

HPH 199—Special Study for Advanced Undergraduates (1-5)

Laboratory—3-15 hour(s). Prerequisite(s): Consent of Instructor. Senior standing in biology, chemistry, physics, psychology, or engineering. (P/NP grading only.) Effective: 1997 Winter Quarter.

HPH 199FA—Student Facilitated Course Development (1-4)

Variable—1-4 hour(s). Prerequisite(s): Consent of Instructor. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will teach under 098F/198F. (P/NP grading only.) Effective: 2019 Fall Quarter.

HPH 199FB—Student Facilitated Teaching (1-4)

Variable. Prerequisite(s): Consent of Instructor. Under the supervision of a faculty member, an undergraduate student teaches a course under 098F/198F. (P/NP grading only.) Effective: 2019 Fall Quarter.

HPH 210A—Advanced Physiology (5)

Lecture—3 hour(s); Discussion—2 hour(s). Prerequisite(s): Physiology Ph.D. program or consent of instructor. HPH 210A (or MCP 210A) is a required core course for the MCIP graduate group; course contains thermodynamics discussions and requires substantial math and physics background in order to succeed; approval for registering from Co-IRs is required to get CRN. Advanced course on fundamental principles of cell physiology, transport physiology, signal transduction, physiology of excitable cells, and muscle physiology. (Same course as MCP 210A.) Effective: 2019 Winter Quarter.

HPH 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. Effective: 1997 Winter Quarter.

HPH 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

HPH 400—Human Physiology (6)

Lecture—3 hour(s); Laboratory—2 hour(s). Medical student only. General and cellular physiology of neurons, muscle, and epithelial cells and systemic physiology of cardiovascular, respiratory, gastrointestinal, and renal systems. (P/F grading only.) Effective: 2011 Summer Quarter.

HPH 403—Medical Neuroanatomy (5)

Lecture—3 hour(s); Laboratory—1 hour(s); Discussion/Laboratory—1 hour(s). Prerequisite(s): HPH 400; Block 1. Restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as CHA 403.) (P/F grading only.) Effective: 2007 Summer Quarter.

HPH 440—Cannabis & Cannabinoids in Physiology & Medicine (3)

Lecture. Prerequisite(s): Consent of Instructor. Provides an in-depth scientific analysis of current knowledge on cannabis and cannabinoids pertaining to human physiology and potential medicinal uses. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Winter Quarter.

HPH 493—Physiological Principles in SICU SSM (6)

Lecture—5 hour(s); Lecture/Lab—10 hour(s); Laboratory—16 hour(s); Clinical Activity—4 hour(s). Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Study Module, a four-week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems. (Same course as SUR 493C.) (H/P/F grading only.) Effective: 2008 Winter Quarter.

HPH 497T—Tutoring in Human Physiology (1-5)

Tutorial—3-15 hour(s). Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (S/U grading only.) Effective: 1997 Winter Quarter.

HPH 498—Directed Reading & Group Study (1-4)

Discussion—2-8 hour(s). Prerequisite(s): Consent of Instructor. Medical student. Directed reading and discussion on selected topics in human physiology. (S/U grading only.) Effective: 1997 Winter Quarter.

HPH 499—Research (1-6)

Variable. Prerequisite(s): Medical students with consent of instructor. Laboratory investigation on selected topics. (S/U grading only.) Effective: 1997 Winter Quarter.

HRT—Horticulture

Courses in HRT:

HRT 200A—Horticulture & Agronomy: Principles (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Graduate standing. Core course to introduce students to the principles that are of general importance in horticultural and agronomic research, including agroecology, plant developmental physiology, crop improvement, and biotechnology. Generally taken in the first year of the graduate program. Effective: 2016 Winter Quarter.

HRT 200B—Horticulture & Agronomy: Practices (4)

Lecture/Discussion—2 hour(s); Fieldwork—3 hour(s); Seminar—3 hour(s). Prerequisite(s): HRT 200A recommended; graduate standing. Introduction to horticultural and agronomic cropping systems. Covers current applied research within agroecology, crop improvement, crop production, postharvest biology. Effective: 2016 Spring Quarter.

HRT 203—Research Perspectives in Horticulture (3)

Lecture—1 hour(s); Lecture/Discussion—2 hour(s). Prerequisite(s): Graduate standing. Following lectures/discussions of scientific methodology, students develop research proposals aided by classroom discussions and individual interactions with instructors. Lectures and critiques of classical papers provide a sense of the evolution of the current concepts in perennial plant biology. Effective: 2017 Winter Quarter.

HRT 251—Modeling Horticultural Systems (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): PLS 142; or Consent of Instructor. Calculus. Development and application of models. Emphasis on physiological and ecological models, with examples from areas of interest to class participants. Applications to horticultural systems. Effective: 2008 Fall Quarter.

HRT 290—Seminar (1)

Seminar—1 hour(s). Prerequisite(s): Graduate standing at UC Davis. Seminars presented by invited speakers, students, or faculty on selected topics in horticulture. (S/U grading only.) Effective: 1997 Winter Quarter.

HRT 298—Group Study (1-5)

Variable. May be repeated for credit. Effective: 2007 Fall Quarter.

HRT 299—Research (1-12)

Variable—3-36 hour(s). Prerequisite(s): Consent of Instructor. Research. May be repeated for credit. (S/U grading only.) Effective: 2016 Winter Quarter.

HUM—Humanities

Courses in HUM:

HUM 001—Humanities Forum (2)

Lecture—2 hour(s). Concurrent enrollment in a section of HUM 001D for an additional 2 units. Reading and discussion of a single work representative of a particular culture, historical period, or genre and significant for its ongoing cultural impact in the humanities, sciences, social sciences, technology, and popular arenas. Attention to provocative implications for contemporary society. May be repeated up to 1 time(s) when topic differs. GE credit: AH. Effective: 2020 Winter Quarter.

HUM 001D—Issues & Concepts in the Humanities (2)

Discussion—2 hour(s). Prerequisite(s): HUM 001 (can be concurrent); HUM 001 required concurrently. Concurrent enrollment in HUM 001 required. Small group discussions and preparation of short papers for HUM 001. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WE. Effective: 2019 Fall Quarter.

HUM 002A—Global Humanities Forum (4)

Lecture—3 hour(s); Extensive Writing. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in world arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2010 Fall Quarter.

HUM 002B—American Humanities Forum (4)

Lecture—3 hour(s); Extensive Writing. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in American arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated up to 1 time(s) when topic differs. GE credit: ACGH, AH, WE. Effective: 2010 Fall Quarter.

HUM 003—Medicine & Humanities (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): Satisfaction of Entry Level Writing Requirement (ELWR). Evolution of the "medical arts" into the "science of medicine." Culture of medicine in the context of society, medical ethics. GE credit: AH, SS, WE. Effective: 1999 Winter Quarter.

HUM 004—Animals & Human Culture (2)

Lecture—2 hour(s). Meaning of human relations with animals studied across a variety of historical periods and cultures and from a variety of humanistic perspectives. GE credit: AH. Effective: 2001 Spring Quarter.

HUM 004D—Animals & Human Culture: Discussion (2)

Discussion—2 hour(s). Prerequisite(s): HUM 004 (can be concurrent); HUM 004 required concurrently. Small group discussions and preparation of short papers for HUM 004. GE credit: AH, WE. Effective: 2001 Spring Quarter.

HUM 007—Travel & Travel Literature (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): Satisfaction of Entry Level Writing Requirement (ELWR). History of travel from the age of exploration to the modern era. Contemporary trends in travel, including mas tourism, adventure travel, and ecotourism. Social, economic, and cultural issues related to modern trends in travel. Analysis of literary representations of travel. GE credit: AH, WC, WE. Effective: 2000 Spring Quarter.

HUM 008—Introduction to Perspectives on Narrative (4)

Lecture/Discussion—3 hour(s); Extensive Writing. Prerequisite(s): Satisfaction of Entry Level Writing Requirement (ELWR). Interdisciplinary approach to the use of story across time, culture, and discipline. How the telling and retelling of particular stories reflect the values, concerns, and assumptions of their original audiences and genres. GE credit: AH, WE. Effective: 1999 Spring Quarter.

HUM 009—Don Quixote & the Modern World (2)

Lecture—2 hour(s). Reading Don Quixote as emblem of modernity in the West. Issues of reality versus illusion, heroism, freedom and self-fulfillment, racial tolerance and love. Don Quixote in other cultural and popular media: film, dance, art, musical drama, and television. GE credit with concurrent enrollment in HUM 009D: ArtHum, Wrt. GE credit: AH, WC. Effective: 1999 Winter Quarter.

HUM 009D—Don Quixote & the Modern World Discussion (2)

Discussion—2 hour(s). Prerequisite(s): HUM 009 (can be concurrent); HUM 009 required concurrently. Small group discussions and preparation of short papers for HUM 009. GE credit: AH, WC, WE. Effective: 1999 Winter Quarter.

HUM 010—How to be a Critic: Understanding Cultural Products & Practices (2)

Lecture—2 hour(s). Introduction to key topics and methodologies of interest to humanists. Series uses a variety of critical approaches to examine the cultural significance of subjects such as: fashion, film, architecture, music, food, dance. May be repeated up to 1 time(s) when topic differs. GE credit: AH. Effective: 2017 Fall Quarter.

HUM 010D—How to be a Critic: Discussion (2)

Discussion—2 hour(s). Concurrent enrollment in HUM 010 required. Optional discussion section can be taken concurrently with HUM 10. Small group discussions and preparation of short papers. GE credit: WE. Effective: 2017 Fall Quarter.

HUM 013—Witches: Myth & Historical Reality (4)

Lecture—3 hour(s); Extensive Writing. Examines the historical construction of the witch. Four areas covered are: European pagan religions and the spread of Christianity; the "Burning' Times" in early modern Europe; 17th-century New England and the Salem witch trials; and fairy tales. GE credit: AH, WC, WE. Effective: 2006 Spring Quarter.

HUM 015—Language & Identity (4)

Lecture/Discussion—3 hour(s); Extensive Writing—1 hour(s). Introduction to topics related to the construction of identity through language use, including geographical and social factors affecting language groups. Language ideology affecting linguistic groups, including bilinguals and non-native speakers of English. GE credit: AH, SS, WE. Effective: 2002 Spring Quarter.

HUM 060—Narrative & Argumentative Approaches to Major Current Issues in the Media, Culture, & Society (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): English A or the equivalent. Interdisciplinary approach to contemporary issues (abortion, AIDS, civil rights, war and peace, welfare state) around which individuals, communities and institutions define themselves in American society, by applying principles of narrative theory to the narratives where those issues are embedded. GE credit: AH, WE. Effective: 1998 Winter Quarter.

HUM 092—Internship (1-12)

Internship—3-36 hour(s). Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.) Effective: 2004 Fall Quarter.

HUM 144—Marx, Nietzsche, Freud (4)

Lecture/Discussion—3 hour(s); Term Paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. (Same course as GER 144.) GE credit: AH, WC. Effective: 2011 Spring Quarter.

HUM 180—Topics in the Humanities (4)

Lecture/Discussion—3 hour(s); Term Paper. Analysis of interdisciplinary issues in the Humanities. Topics vary. May be taught abroad. May be repeated up to 1 time(s). GE credit: AH, WE. Effective: 2005 Winter Quarter.

HUM 192—Internship (1-12)

Internship—3-36 hour(s). Internships in fields where students can practice their skills. May be repeated for credit. (P/NP grading only.) Effective: 2004 Fall Quarter.

HUM 198—Directed Group Study (1-4)

Variable. Prerequisite(s): Consent of Instructor. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

HUM 199—Special Study for Advanced Undergraduates (1-4)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

HUM 250—Topics in the Humanities (4)

Seminar—3 hour(s); Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Topics in the humanities, selected by the instructor. May be repeated up to 1 time(s). Effective: 1997 Winter Quarter.

HUM 292—Graduate Internship (1-15)

Lecture—3 hour(s); Lecture/Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated up to 15 unit(s). (S/U grading only.) Effective: 2005 Spring Quarter.

HUM 298—Directed Group Study (1-5)

Variable. (S/U grading only.) Effective: 2005 Spring Quarter.

HUM 299—Individual Research (1-4)

Variable. Individual research in the humanities resulting in a formal written research report. (S/U grading only.) Effective: 1997 Winter Quarter.

HUM 396—Teaching Assistant Training Practicum (1-4)

Variable—3-12 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2005 Winter Quarter.

HYD—Hydrologic Science

Courses in HYD:

HYD 010—Water, Power, Society (3)

Lecture—2 hour(s); Discussion—1 hour(s). Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as SAS 010.) GE credit: SE, SL, SS. Effective: 2005 Spring Quarter.

HYD 092—Hydrologic Science Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Lower division student. Work experience off and on campus in Hydrologic Science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2002 Spring Quarter.

HYD 103N—Fluid Mechanics Fundamentals (4)

Lecture—4 hour(s). Prerequisite(s): PHY 009B. Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as EBS 103.) GE credit: QL, SE, VL. Effective: 2005 Spring Quarter.

HYD 110—Irrigation Principles & Practices (3) *Review all entries*

Lecture—2 hour(s); Laboratory—3 hour(s). Prerequisite(s): PHY 007A; SSC 100 recommended. General course for agricultural and engineering students dealing with soil and plant aspects of irrigation and drainage. Soil-water principles including water movement, plant responses to irrigation regimes, water use by crops; also irrigation systems and water quality. Not open for credit to students who have completed WSC 110. GE credit: SE, SL. Effective: 2009 Fall Quarter.

HYD 110—Irrigation Systems & Water Management (4) *Review all entries*

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): PHY 007A; SSC 100 recommended. Soil and plant aspects of irrigation and drainage. Soil-water principles including water storage and movement, plant response to irrigation, water use by crops, irrigation systems (i.e., micro-irrigation, sprinkler irrigation and surface irrigation), and related salinity and water quality impacts. (Same course as ABT 110, ESM 110.) GE credit: SE, SL. Effective: 2020 Fall Quarter.

HYD 118—Evapotranspiration Principles, Measurement & Modeling (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): HYD 124 C or better; Consent of Instructor. Estimation of evapotranspiration (ET) for irrigation management and water resources planning; including the basic principles and key factors controlling evaporation and ET rates, methods of measuring these factors in the field and remotely, and determination of likely water requirements for crops and various landscape conditions as needed for water resources planning. (Same course as ESM 118.) GE credit: SE. Effective: 2019 Fall Quarter.

HYD 124—Plant-Water-Soil Relationships (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): (SSC 100 (can be concurrent) or SSC 107 (can be concurrent)); (PLS 100A (can be concurrent) or PLB 111 (can be concurrent)); or Consent of Instructor. Principles of plant interactions with soil and atmospheric water environments and practical applications to crop management (e.g., irrigation) and plant eco-physiology (e.g., drought). Not open for credit to students who have completed WSC 104. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

HYD 134—Aqueous Geochemistry (6)

Lecture—4 hour(s); Laboratory—3 hour(s). Prerequisite(s): CHE 002B. Chemistry of natural waters; dielectric properties of water; thermodynamic and mass-action relations; metal hydrolysis; acid-base equilibria; metal-coordination chemistry; solubility calculations; electron-exchange reactions; sorptive partitioning; ion exchange; and dissolved organic matter. GE credit: QL, SE. Effective: 2009 Fall Quarter.

HYD 141—Physical Hydrology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): PHY 009B; MAT 021B; HYD 100 recommended. Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quantitative description of the following processes: precipitation, infiltration, evaporation, transpiration, surface runoff, and groundwater runoff. GE credit: QL, SE, SL, VL. Effective: 1997 Fall Quarter.

HYD 142—Systems Hydrology (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): HYD 141 or ECI 142. General course considering hydrologic processes from a systems or statistical model perspective. General probability concepts are applied to frequency, time series and spatial data analysis. Linear systems are also considered in conjunction with Kalman filter techniques. GE credit: OL, QL, SE. Effective: 1998 Winter Quarter.

HYD 143—Ecohydrology (4)

Lecture/Discussion—3 hour(s); Extensive Problem Solving. Prerequisite(s): HYD 010 or HYD 141 or ESP 001 or ESM 100 or ESM 108 or ESM 120 or GEL 001 or GEL 050 or SSC 100; or Consent of Instructor. Movement and storage of water in individual ecosystems and the integrated functioning of water and biota at the watershed scale. GE credit: OL, QL, SE, SL. Effective: 2017 Winter Quarter.

HYD 144—Groundwater Hydrology (4)

Lecture—4 hour(s). Prerequisite(s): MAT 016B or MAT 021A; HYD 103 or ENG 103 recommended. Fundamentals of groundwater flow and contaminant hydrology. Occurrence, distribution, and movement of groundwater. Well-flow systems. Aquifer tests. Well construction operation and maintenance. Groundwater exploration and quality assessment. Agricultural threats to groundwater quality: fertilizers, pesticides, salts. (Same course as EBS 144.) GE credit: QL, SE, SL, VL. Effective: 2006 Fall Quarter.

HYD 145—Water Science & Design (4)

Lecture—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): (HYD 141 or ESM 100); (MAT 016B or MAT 021B); or Consent of Instructor. Introduction to watershed engineering, storm water management, design of hydraulic systems. Topics include hydrological risk analysis, flood routing, design storms, open channel flow, pipes, culverts, spillways, and detention basins. Class project and field trips will apply theory to real-life problems. GE credit: QL, SE, SL, WE. Effective: 2018 Fall Quarter.

HYD 146—Hydrogeology & Contaminant Transport (5)

Lecture—3 hour(s); Laboratory—2 hour(s); Term Paper—1 hour(s). Prerequisite(s): HYD 144 or ECI 144; Or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as GEL 156.) GE credit: SE. Effective: 2002 Winter Quarter.

HYD 147—Runoff, Erosion & Water Quality Management (3)

Lecture/Lab—3 hour(s); Fieldwork. Prerequisite(s): (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (ECI 142 or HYD 141 or ESM 100); or equivalent. Practical hydrology and runoff water quality management from disturbed watersheds. Development of hillslope and soils restoration concepts and practice, modeling and application. (Same course as EBS 147.) GE credit: SE. Effective: 2018 Spring Quarter.

HYD 150—Water Law (3)

Lecture—3 hour(s). Prerequisite(s): Consent of instructor or upper division standing. Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal/state relations. Basic water quality acts, endangered species act, water transfers and current water issues. GE credit: ACGH, SS. Effective: 2016 Fall Quarter.

HYD 151—Field Methods in Hydrology (4)

Lecture—2 hour(s); Laboratory—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): ERS 100 or HYD 141. Measurement methods and data analysis for evaluation of water storage, movement and contamination in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used. GE credit: QL, SE, SL. Effective: 2003 Winter Quarter.

HYD 182—Environmental Analysis using GIS (4)

Lecture—2 hour(s); Laboratory—4 hour(s). Prerequisite(s): ABT 150 or LDA 150; Or equivalent GIS experience and skills; general biology and/or ecology courses are recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. (Same course as ABT 182.) GE credit: QL, SE, SL, VL. Effective: 2018 Winter Quarter.

HYD 192—Hydrologic Science Internship (1-12)

Internship—3-40 hour(s). Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in water science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 198—Directed Group Study (1-5)

Variable. Directed group study. May be taught abroad. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 199—Special Study for Advanced Undergraduate (1-5)

Variable. Prerequisite(s): Senior standing. (P/NP grading only.) Effective: 1997 Fall Quarter.

HYD 201A—Hydrologic Sciences Core Survey (3)

Lecture/Discussion—2 hour(s); Project (Term Project). Considers the primary sub-disciplines while reviewing the fundamental scientific concepts/processes of the hydrologic sciences research community, and includes a basic writing component. Effective: 2017 Fall Quarter.

HYD 201B—Hydrologic Sciences Core Seminar (1)

Seminar—2 hour(s). Exposes students to the research underway in the Hydrologic Sciences Graduate Group as well as provide them the opportunity to present and refine their research through interaction with other students in the Graduate Group. (P/NP grading only.) Effective: 2018 Winter Quarter.

HYD 210—Vadose Modeling & Characterization (3)

Lecture—1.5 hour(s); Laboratory—3 hour(s); Discussion—0.5 hour(s). Prerequisite(s): SSC 107; or Consent of Instructor. Principles and modeling of water flow and chemical transport in the vadose zone, with specific applications to soils. Topics include hydraulic properties, finite difference application to unsaturated water flow, parameter optimization, diffusive and convective transport in gaseous and liquid phases. Effective: 2015 Spring Quarter.

HYD 241—Precision Irrigation Systems & Management (3)

Lecture—3 hour(s). Prerequisite(s): ABT 110; SSC 100; HYD 110; EBS 145. Advanced irrigation science and engineering for agricultural, horticultural, engineering, and hydrology graduate students. Precision irrigation techniques for application of water to meet specific requirements of individual plants or management units and maximum economic benefits of crop production. (Same course as EBS 241.) Effective: 2020 Spring Quarter.

HYD 242—Hydrology & Sustainability of Irrigated Lands (3)

Lecture—3 hour(s). Prerequisite(s): ABT 110 or ESM 110 or HYD 110 or EBS 145. Impact of irrigated agricultural on groundwater depletion, surface water and groundwater quality, soil salinization, downstream ecosystems, and seawater intrusion. Exploration of efficient resource use, and policies adopted in California to enhance sustainability of irrigated crop production. (Same course as EBS 242.) Effective: 2020 Spring Quarter.

HYD 243—Water Resource Planning & Management (3)

Lecture—3 hour(s). Prerequisite(s): HYD 141 or ECI 142. Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as EBS 243.) Effective: 1997 Fall Quarter.

HYD 245—Climate Change, Water & Society (4)

Lecture—4 hour(s). Limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as ATM 245, ECL 245.) Effective: 2015 Spring Quarter.

HYD 252—Hillslope Geomorphology & Sediment Budgets (4)

Lecture—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): HYD 141 or GEL 035 or ECI 142; or Consent of Instructor. Exploration of theoretical and empirical foundations of sediment production on hillslopes using computer models and field experiments to promote an understanding of how watersheds evolve naturally and with human impacts. Effective: 2001 Spring Quarter.

HYD 254Y—Ecohydraulics (3)

Web Virtual Lecture—1 hour(s); Discussion—1 hour(s); Extensive Problem Solving. Use of 2D hydrodynamic modeling to perform instream flow assessment by exploring flow-dependent hydraulic patterns at multiple spatial scales and extrapolating results with empirical and analytical functions to evaluate geomorphic resilience and ecological functions. Effective: 2014 Fall Quarter.

HYD 256—Geomorphology of Estuaries & Deltas (4)

Lecture—3 hour(s); Fieldwork—3 hour(s). Prerequisite(s): HYD 141 or GEL 035; or ECI 042 or Consent of Instructor. Survey of the processes and landforms associated with sediment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Effective: 2002 Spring Quarter.

HYD 264—Modeling of Hydrologic Processes (3)

Lecture—3 hour(s). Prerequisite(s): HYD 141; STA 102; Or the equivalents. Techniques used to model the spatio-temporal structure of rainfall and runoff are introduced. Procedures studied include those based on stochastic point processes, chaos theory, fractal geometry, and fractional noises. Effective: 1997 Winter Quarter.

HYD 269—Numerical Modeling of Groundwater Systems (3)

Lecture—3 hour(s). Prerequisite(s): MAT 022B; (ECI 144; or HYD 145A); HYD 145B. Finite difference and finite element techniques in modeling groundwater flow and transport. Fundamentals of constructing and calibrating models with hands-on applications. Methods and limitations of numerical solution of transport equations. Model interpretation and ethics. Effective: 1997 Winter Quarter.

HYD 273—Introduction to Geostatistics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): STA 130A; STA 130B; Or the equivalent. Statistical treatment of spatial data with hydrologic emphasis. Topics: theory of random functions, variogram analysis, Kriging/co-Kriging, indicator geostatistics, and stochastic simulation of spatial variability. Geostatistical software use. Effective: 2018 Winter Quarter.

HYD 274—Practice of Groundwater Flow & Transport Modeling (3)

Lecture—2 hour(s); Lecture/Lab—0.5 hour(s); Lecture/Discussion—0.5 hour(s). Prerequisite(s): HYD 269; (ECI 272B or ECI 272C). Selecting and building groundwater flow and transport models. Planning, preparation, execution, presentation, and review of modeling projects. Review of methods, assumptions, and limitations of groundwater models; practicing with MODFLOW, MT3D, associated GUI, and with other groundwater modeling software of choice. Effective: 2012 Fall Quarter.

HYD 275—Analysis of Spatial Processes (3)

Lecture—3 hour(s). Prerequisite(s): STA 102; Or the equivalent; HYD 273 or STA 273A recommended. Characterization of homogeneous random fields; extremes and spectral parameters; geometry of excursions, local averaging; scale of fluctuation; non-Gaussian and irregular random fields; geostatistical applications. Effective: 1997 Winter Quarter.

HYD 286—Selected Topics in Environmental Remote Sensing (3)

Discussion—2 hour(s); Lecture—1 hour(s); Project (Term Project). Prerequisite(s): ERS 186; Consent of Instructor. Or equivalent; ERS 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. May be repeated for credit. (Same course as GEO 286.) Effective: 2014 Fall Quarter.

HYD 290—Seminar in Hydrologic Science (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Graduate standing and background in Hydrologic Science. Seminars and critical review of problems, issues, and research in hydrologic sciences. Oral presentations of research. Topics vary. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 298—Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 299—Research (1-12)

Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 396—Teaching Assistant Training Practicum (1-4)

Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 440—Hazardous Waste Operations Training (3)

Lecture—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): Upper division standing in College of Agricultural and Environmental Sciences. Forty-hour course designed to meet the requirements of Federal OSHA regulation CFR 1910.120. Covers the health, regulatory, processing and safe handling issues/problems associated with working with hazardous materials. (P/NP grading only.) Effective: 1997 Spring Quarter.

IAD—International Agricultural Development

Courses in IAD:

IAD 010—Introduction to International Agricultural Development (4)

Lecture—3 hour(s); Discussion—1 hour(s). Theories, practices and institutions relating to agricultural development; the interaction of changing social, cultural and economic organization through successive stages of economic development; impact of new agricultural technology on underdeveloped regions. GE credit: SS, WC, WE. Effective: 2011 Spring Quarter.

IAD 092—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 103—Social Change & Agricultural Development (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Introductory social science course (Anthropology (ANT), Sociology (SOC), Economics (ECN), International Agricultural Development (IAD)). How social and cultural factors influence technological change in agriculture; theories of diffusion of innovations; social impact analysis and technology assessment. GE credit: SS, WE. Effective: 2011 Spring Quarter.

IAD 142—Equipment & Technology for Small Farms (2)

Lecture—1 hour(s); Laboratory—3 hour(s). Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as ABT 142.) GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

IAD 160—Agroforestry: Global & Local Perspectives (3)

Lecture/Discussion—3 hour(s). Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; (PLS 142 or PLS 150 or BIS 002B); Or general ecology course in lieu of PLS 142 or PLS 150 or BIS 002B. Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have taken previously taken AMR 160. (Former AMR 160.). (Same course as PLS 160.) GE credit: SE. Effective: 2011 Spring Quarter.

IAD 170—Program Development for International Agriculture (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): IAD 010. Principles of leadership and management for international agricultural development. Organizations and organizational behavior, and the implications for planning and administering organizations involved in the global development effort. Effective: 2011 Spring Quarter.

IAD 190—Proseminar in International Agricultural Development (1)

Seminar—1 hour(s). Presentation and discussion of current topics in international agricultural development by visiting lecturers, staff and students. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 192—Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 198—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 199—Special Study for Advanced Undergraduates (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 200N—Philosophy & Practice of Agricultural Development (5)

Lecture/Discussion—5 hour(s); Term Paper. Introduces key elements of philosophy and practice of agricultural development in less developed countries; major paradigms of development; historical context within which these paradigms operate; various development techniques and initiatives emerging from agricultural production to institutional capacity building and management. Not open for credit to students who have completed former IAD 202. Effective: 2011 Spring Quarter.

IAD 201—Economics of Small Farms & Farming Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): ARE 100A or ECN 100; or the equivalent. Economic perspective on small farm development. Establishes a basis for predicting farmers' responses to changes in the economic environment, and for proposing government policies to increase small farm production and improve farmer and national welfare. Effective: 2017 Winter Quarter.

IAD 202N—Analysis & Determinants of Farming Systems (4)

Lecture—3 hour(s); Discussion—1 hour(s). Prerequisite(s): PLS 110C or PLS 111; or the equivalent. Unifying concepts of cropping systems in temperate and tropical climatic zones; agroecosystems stability, diversity and sustainability; management strategies, resource use efficiency and their interactions; role of animals, their impact on energy use efficiency, nutrient cycling, and providing food and power. Not open for credit to students who have completed former IAD 200. Effective: 2017 Winter Quarter.

IAD 203N—Project Planning & Evaluation (4)

Discussion—1 hour(s); Workshop—3 hour(s). Prerequisite(s): IAD 200N; or Consent of Instructor. Interdisciplinary setting for application of student skills and specialization to a "real world" development project. Focus on team-building and effective interdisciplinary problem-solving methods, with the objective of producing a project document and presentation within a specified deadline. Not open for credit to students who have completed former IAD 203. Effective: 2017 Winter Quarter.

IAD 290—Seminar in International Agricultural Development (1-2)

Seminar—1-2 hour(s). Prerequisite(s): Consent of Instructor. Discussion and critical evaluation of advanced topics and issues in international agricultural development. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 291—Topics in International Agricultural Development (1-3)

Lecture/Discussion—1-3 hour(s). Prerequisite(s): Consent of Instructor. Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content. May be repeated up to 1 time(s). Effective: 2011 Spring Quarter.

IAD 292—Graduate Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Participation in H. Humphrey Fellow Program or consent of instructor. Individually designed supervised internship, off or on campus, in community, business or institutional setting. Developed with advice of faculty mentor and Humphrey Coordinator. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 298—Directed Group Study (1-5)

Variable—1-5 hour(s). Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 299—Research (1-12)

Variable—1-12 hour(s). Prerequisite(s): Consent of Instructor. Research. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 396—Teaching Assistant Training Practicum (1-4)

Variable—3-12 hour(s). Prerequisite(s): Graduate standing. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

ICL—International Commercial Law

Courses in ICL:**ICL 201—Orientation in United States Law (7)**

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Investigation of the Common Law System of the United States. Includes structure of the U.S. government, Constitutional law, contracts, torts, real property, consumer law, securities law, intellectual property, antitrust, taxation, labor law, environmental law, ethics, remedies, legal research and trial practice. Effective: 2002 Summer Special Session.

ICL 201A—Fundamentals in United States Law (4)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Investigation of the Common Law System of the U.S. Includes the American constitutional system, the American judiciary, the American civil trial, and foundational substantive and procedural law such as real property, torts, criminal law and procedure, civil procedure, and contracts. Effective: 2013 Summer Session 1.

ICL 201B—Advanced Topics in United States Law (3)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Orientation to advanced topics in U.S. law: Intellectual Property (including copyright and trademarks), Commercial and Consumer Law, Advanced Contracts, Antitrust, Taxation, Remedies, Labor Law, Environmental Law, Dispute Resolution, Remedies and introduction to trial techniques and legal research/writing. Effective: 2013 Summer Special Session.

ICL 202—Introduction to Contracts (4)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2009 Fall Semester.

ICL 202A—Introduction to Contracts Formation (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2013 Summer Session 1.

ICL 202AS—Introduction to Contracts Formation (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2014 Winter Quarter.

ICL 202B—Contracts Performance (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2013 Fall Quarter.

ICL 202BS—Contract Performance (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 202A; Or equivalent; Law school education or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2014 Winter Quarter.

ICL 203—Civil Procedure (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes. Effective: 2009 Fall Semester.

ICL 204—International Joint Ventures (3)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or equivalent. International and U.S. business and legal transactions. Legal planning, problem solving, decision making and negotiations related to the break-up and dissolution of a major international joint venture. U.S. laws including finance, tax, bankruptcy, labor, antitrust, environmental, corporate structures and intellectual property. Offered every three years. Effective: 2002 Summer Special Session.

ICL 205—Introduction to Constitutional Law (4)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government. Effective: 2009 Fall Semester.

ICL 205A—Overview of US Constitutional Law (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government. Effective: 2013 Summer Special Session.

ICL 205AS—Overview of US Constitutional Law (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government. Effective: 2013 Fall Quarter.

ICL 205B—Constitutional Law—Protection of Individual Rights (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Principles, doctrines and controversies regarding the U.S. Constitution Bill of Rights, including due process of law, equal protection, freedom of expression, freedom of religion, state action, and congressional legislation in aid of civil rights and liberties. Effective: 2013 Summer Special Session.

ICL 211—Negotiations & Alternative Dispute Resolution (1)

Lecture/Discussion—10 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Mechanisms for resolving disputes including the alternatives to litigation such as negotiation, mediation, and arbitration. Advantages and disadvantages of each approach. Offered every three years. Effective: 2002 Summer Special Session.

ICL 212—Introduction to Negotiation (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes. Effective: 2009 Fall Semester.

ICL 212S—Introduction to Negotiation (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes. Effective: 2013 Fall Quarter.

ICL 214—Advanced Negotiation (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements. Effective: 2009 Fall Semester.

ICL 214S—Advanced Negotiation (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements. Effective: 2012 Spring Quarter.

ICL 215—Business Associations (4)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships. Effective: 2002 Summer Special Session.

ICL 215S—Business Associations (4)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships. Effective: 2012 Spring Quarter.

ICL 216—International Business Transactions (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Legal problems arising from international business transactions. Focus on international sales contracts, choice of law, forum selection clauses, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, foreign exchange problems, and national efforts to control imports. Effective: 2002 Summer Special Session.

ICL 217—Alternative Dispute Resolution (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Introduces students to a wide variety of alternative dispute resolution procedures, with an in-depth emphasis on negotiation, mediation and arbitration. Effective: 2009 Fall Semester.

ICL 219—Advanced Writing Project (4)

Project (Term Project). Prerequisite(s): ICL 201; Law school education or the equivalent. The completion of a written research project under the active supervision of a faculty member in satisfaction of the research-writing requirement. (S/U grading only.) Effective: 2002 Summer Special Session.

ICL 220—United States Taxation of Multinational Investments (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. An analysis of the United States taxation of multinational investments including jurisdiction of tax, the U.S. tax system, foreign tax credits, treaties, and transfer pricing. Effective: 2002 Summer Special Session.

ICL 227—Criminal Procedure (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Federal constitutional limits on government authority to gather evidence and investigate crime. Includes Fourth Amendment limits on search, seizure, and arrest; Fifth Amendment privilege against self-incrimination; Sixth Amendment right to counsel. Effective: 2009 Summer Quarter.

ICL 228A—Mergers & Acquisitions Law (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions. Effective: 2013 Fall Quarter.

ICL 228AS—Mergers & Acquisitions Law (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions. Effective: 2013 Fall Quarter.

ICL 236—United States Securities Law & Regulation (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Structural and jurisdictional issues associated with securities practice. Topics include the regulation of public offerings, transactions by corporate insiders, regulation of corporate disclosure and conduct, and the liabilities of corporations and individuals under anti-fraud provisions. Effective: 2002 Summer Special Session.

ICL 239—Mediation (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Introduction to the mediation process. Development of communication skills, the ability to analyze disputes, to understand why mediations succeed or fail, and understand the advantages and limitations of mediation as a method of resolving disputes. Effective: 2009 Fall Semester.

ICL 242—Private International Law (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws. Effective: 2004 Summer Special Session.

ICL 242S—Private International Law (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws. Effective: 2011 Fall Quarter.

ICL 247—Banking Law (1)

Lecture/Discussion—10 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Institutional features of international banking transactions, the structure of a large financial deal, and the mechanics of overseeing large loans. Emphasis on negotiable instruments such as bills of lading, letters of credit, standby letters of credit, and interbank transactions. Offered every three years. Effective: 2002 Summer Special Session.

ICL 249—Comparative Law (1)

Lecture/Discussion—10 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. A comparative study of the development of schools of legal thought, chiefly Common law systems and Civil law traditions. Attention to the historical reasons for their divergence, contemporary approaches to universal problems such as succession, torts, and contracts, the cross-fertilization of laws and difficulties commonly associated with importing foreign law into new territory. Effective: 2002 Summer Special Session.

ICL 250—International Trade Law (3)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. An investigation of global trading systems including international trade in goods and services, e-commerce, international intellectual property, international tax planning and investment. Includes substantive and procedural provisions of the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA). Offered every three years. Effective: 2002 Summer Special Session.

ICL 251—United States Litigation Issues (1)

Lecture/Discussion—10 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Prevention and resolution of disputes in international commerce. Emphasis on preparing for a trial in the United States. Includes the study of pre-trial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies. Offered every three years. Effective: 2002 Summer Special Session.

ICL 262—Antitrust (1)

Lecture/Discussion—10 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Historical and institutional background of Antitrust law in the United States. The statutory framework including price fixing, limits on distribution, monopolization and mergers, and reporting requirements. Effective: 2002 Summer Special Session.

ICL 270—Financing International Transactions (3)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. How capital is raised in international markets. Investment strategies for U.S. markets. Taxation of financial investments, international currency regulation, and assessing rates of return on international investments. Offered every three years. Effective: 2002 Summer Special Session.

ICL 274—Intellectual Property (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition. Effective: 2002 Summer Special Session.

ICL 274S—Intellectual Property (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law school education or the equivalent. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition. Effective: 2011 Fall Quarter.

ICL 283—Contract Remedies (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II. Effective: 2014 Winter Quarter.

ICL 283S—Contract Remedies (2)

Discussion/Laboratory—20 hour(s). Prerequisite(s): ICL 202A; ICL 202B; Or equivalent; Law School education or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II. Effective: 2014 Winter Quarter.

ICL 285—Environmental Law (2)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Introduction to federal and state environmental law. Historical development of environmental law; the role of courts, the legislature and the executive branch in the development and implementation of environmental policy. Review of major statutes. Effective: 2009 Fall Semester.

ICL 289—Licensing Academy in Intellectual Property & Technology Commercialization (4)

Lecture/Discussion—20 hour(s). Prerequisite(s): ICL 201; Law School education or equivalent. Intellectual property as it relates to current forms of legal protection and how new innovations fit into these models, including public-private technology transfer, patents, institutional objectives, technology transfer offices, startups, and licenses. Effective: 2013 Summer Special Session.

ICL 290—American Legal System Research Seminar (1)

Seminar—5 hour(s). Prerequisite(s): ICL 201; Law School education or equivalent. American legal system and its structure. Legal research methodologies and presentation with attention to analysis, synthesis, organization, and editing techniques common to legal writing. (S/U grading only.) Effective: 2004 Summer Special Session.

ICL 291C—International Commercial Law Seminar (4)

Seminar—20 hour(s). Prerequisite(s): ICL 201; Law School education or equivalent. Advanced seminar on a current topic in International Commercial Law. Offered at the University of Cologne in Cologne, Germany for two weeks each summer. May be repeated up to 3 time(s) when topic differs. Effective: 2013 Summer Special Session.

ICL 292—International Commercial Law Seminar (1-4)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic changes each year course is offered. May be repeated up to 2 time(s) when topic differs. Effective: 2013 Summer Session 1.

ICL 292S—International Commercial Law Seminar (1-4)

Lecture/Discussion—20 hour(s). Prerequisite(s): Law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic changes each year course is offered. May be repeated up to 2 time(s) when topic differs. Effective: 2013 Spring Semester.

ICL 299—Advanced Research in Legal Problems (1-4)

Variable—3-40 hour(s). Prerequisite(s): ICL 201; Law School education or equivalent. Permission of supervising instructor. Student individualized research projects under faculty supervision. (S/U grading only.) Effective: 2002 Summer Special Session.

IDI—Infectious Diseases

Courses in IDI:

IDI 141—Infectious Diseases of Humans (1)

Lecture—1 hour(s). Prerequisite(s): Introductory knowledge in biology and chemistry recommended. Integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history. (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 192—Research Internship in Internal Medicine (1-12)

Internship—3-36 hour(s). Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 199—Infectious Diseases Research (1-5)

Variable. Prerequisite(s): Consent of Instructor. Chemistry through organic chemistry (in addition, physical and biochemistry preferred), biology through basic bacteriology (in addition, microbiology and immunology preferred). Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presentation. (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 211—Epidemiology & Prevention of Infectious Diseases (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): EPI 205B; (EPI 207; or IMD 421). Infectious disease epidemiology and prevention, with equal emphasis on human and veterinary diseases. Major categories of infectious diseases by mode of transmission. Effective: 2002 Spring Quarter.

IDI 299—Research in Infectious Diseases (1-12)

Variable. Prerequisite(s): Consent of Instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.) Effective: 1997 Winter Quarter.

IDI 440—Introduction to AIDS & Related Disorders (1.5-6)

Clinical Activity—30 hour(s); Discussion—10 hour(s). Prerequisite(s): First- and second-year medical students must be in good academic standing and have consent from the instructor. Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Interview patients, observe patient care and participate in ongoing clinic research as well as examine alternative lifestyles. May be repeated for credit. (H/P/F grading only.) Effective: 2005 Spring Quarter.

IDI 450—Clinical & Social Care of the Injection Drug User (1-6)

Lecture—1 hour(s); Clinical Activity—3 hour(s). Prerequisite(s): Consent of Instructor. First- and second-year medical students in good academic standing. Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users. May be repeated for credit. (H/P/F grading only.) Effective: 2020 Spring Quarter.

IDI 460—Infectious Diseases Clinical Clerkship (3-6)

Clinical Activity. Prerequisite(s): Successful completion of two years of study in an accredited medical school. Limited enrollment with priority to fourth-year medical students. Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Instruction in clinical microbiology and the proper use of the laboratory will be provided. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IDI 470— Outbreak Investigation & Infection Prevention (6)

Lecture. Outbreak investigation is a central aspect of infectious disease epidemiology. Gathering of clinical data and its analysis for surveillance underpins outbreak identification, response and control. Focuses on understanding routine and unusual outbreak and the application of methods for detection, investigation and control in both inpatient and outpatient settings as well as local and global environments. (P/F grading only.) Effective: 2020 Spring Quarter.

IDI 493—Correctional Medicine SSM; Evaluation of HIV & Hepatitis C Patients (6)

Clinical Activity—30 hour(s); Discussion—5 hour(s). Primary agenda focuses on the evaluation of treatment of HIV and Hepatitis C patients in the correctional environment. (H/P/F grading only.) Effective: 2016 Fall Quarter.

IDI 499—Research Topics in Infectious Disease (2-12)

Variable. Prerequisite(s): Successful completion of the first-year of study in School of Medicine, graduate students (approved for graduate credit), and/or consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presentation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IMD—Internal Medicine

Courses in IMD:**IMD 090—Seminar in Medical Ethics (1)**

Lecture—1 hour(s). Seminar Series covering the current topics in Medical Ethics. (P/NP grading only.) Effective: 2017 Winter Quarter.

IMD 092—Internship (1-4)

Internship—3-12 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Supervised internship in internal medicine and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

IMD 098—Directed Group Study (1-2)

Seminar—1-2 hour(s). Prerequisite(s): Consent of Instructor. Lower division standing. Directed group study in medicine and related fields. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 099—Undergraduate Research in Medicine: Molecular & Cell Biology (1-3)

Variable. Prerequisite(s): Consent of Instructor. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 164—Practicum in Community Health Clinic: Bayanihan Clinic (1-2)

Clinical Activity—5 hour(s). Through active participation in the medical aspects of community health clinics, the undergraduate student gains knowledge of the organization, administration, and problem-solving capabilities. May be repeated for credit. (P/NP grading only.) Effective: 2014 Winter Quarter.

IMD 192—Internship in Internal Medicine (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Supervised work experience in internal medicine and related fields. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 194—Practicum in Community Health Clinics (1-3)

Clinical Activity—5-15 hour(s). Prerequisite(s): Consent of Instructor. The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities. May be repeated for credit. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 198—Directed Group Study (1-3)

Seminar—1-2 hour(s); Extensive Problem Solving—2 hour(s). Prerequisite(s): Consent of Instructor. Directed group study in medicine and related fields. (P/NP grading only.) Effective: 2014 Winter Quarter.

IMD 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 214—Topics in Medical Ethics (1)

Seminar—1 hour(s). The complex moral, legal and ethical dilemmas that patients, families, and health care providers face in today's clinics. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2001 Fall Quarter.

IMD 220D—Cardiovascular System (2.5)

Lecture/Discussion—5.5 hour(s). Prerequisite(s): HPH 200; and Consent of Instructor. Graduate student status. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. Effective: 2002 Fall Quarter.

IMD 250—Medicine & the Law (3)

Lecture/Discussion—2 hour(s); Project (Term Project)—2 hour(s). Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (S/U grading only.) Effective: 2002 Winter Quarter.

IMD 414—One Health: A Course on Global Health (1)

Conference—8 hour(s). Global health problems are complex and require culturally-sensitive, socially-acceptable, and action-oriented approaches to create practical and cost-effective solutions. Will examine major health problems created by the convergence of human, animal, and environmental influences. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

IMD 416—Summer Institute on Race & Health (6)

Independent Study—30 hour(s). Prerequisite(s): Consent of Instructor. Limited enrollment. Using field trips, media, readings, and clinical experiences, eight-ten first-year medical students explore issues of race, health disparities and related issues in a four-week institute during the summer break. (P/F grading only.) Effective: 2011 Spring Quarter.

IMD 420A—Hematology (2)

Lecture/Discussion—1 hour(s); Discussion—1 hour(s). Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Malignant disorders of blood cells and transfusion therapy. Covers acute leukemia, myelodysplasia, myeloproliferative disorders, lymphoma, and myeloma. (P/F grading only.) Effective: 2010 Summer Quarter.

IMD 420B—Gastrointestinal System (2.5)

Lecture/Discussion—2 hour(s); Discussion—2 hour(s). Prerequisite(s): Approval of Committee on Student Progress. Restricted to Medical students only. Basic pathophysiologic principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiologic basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management. (P/F grading only.) Effective: 2008 Winter Quarter.

IMD 420C—Pulmonary & Critical Care Medicine (2.5)

Lecture/Discussion—5.5 hour(s). Prerequisite(s): Approval of SOM's Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Clinical aspects of respiratory anatomy, physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases & disorders, and critical care medicine. (P/F grading only.) Effective: 2013 Fall Quarter.

IMD 420D—Cardiovascular System (2.5)

Lecture/Discussion—5.5 hour(s). Prerequisite(s): Approval of the School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. (P/F grading only.) Effective: 2013 Fall Quarter.

IMD 420E—Nephrology (2)

Lecture—2 hour(s); Discussion—2 hour(s); Laboratory—2 hour(s). Prerequisite(s): Approval of Student Progress Committee. Fundamental aspects of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections. (P/F grading only.) Effective: 2002 Winter Quarter.

IMD 430—Medicine Clerkship (3-12)

Clinical Activity—45 hour(s). Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Clerkship is divided into two, four-week blocks, one each at UCDCM and at Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2020 Spring Quarter.

IMD 430FA—SJVP Longitudinal Medicine Clerkship (1.5-6)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FB—SJVP Longitudinal Medicine Clerkship (1.5-6)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FC—SJVP Longitudinal Medicine Clerkship (1.5-6)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FD—SJVP Longitudinal Medicine Clerkship (1.5-6)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430R—Rural PRIME Internal Medicine Longitudinal Clerkship (2)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430RA—Rural PRIME Internal Medicine Longitudinal Clerkship (3)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430RB—Rural PRIME Internal Medicine Longitudinal Clerkship (3)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430RC—Rural PRIME Internal Medicine Longitudinal Clerkship (3)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430RD—Rural PRIME Internal Medicine Longitudinal Clerkship (1)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430TA—TeachMS Longitudinal Medicine Clerkship (A) (4)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

IMD 430TB—TeachMS Longitudinal Medicine Clerkship (B) (6)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

IMD 430TC—TeachMS Longitudinal Medicine Clerkship (C) (2)

Clinical Activity—45 hour(s). Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

IMD 439D—Directed Clinical Studies in Internal Medicine (1-12)

Clinical Activity—40 hour(s). Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

IMD 439R—Directed Studies in Internal Medicine (1-12)

Clinical Activity—30 hour(s); Independent Study—10 hour(s). Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

IMD 450A—Medicine & the Law (1.5)

Seminar—2 hour(s); Discussion—2 hour(s). Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (H/P/F grading only.) Effective: 2010 Summer Quarter.

IMD 450B—Medicine & the Law (1.5)

Seminar—2 hour(s); Discussion—2 hour(s). Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (H/P/F grading only.) Effective: 2010 Summer Quarter.

IMD 459—Oncology: Research & Treatment of Cancer (2)

Lecture/Discussion—2 hour(s). Prerequisite(s): Second-, third-, or fourth-year medical student and/or consent of instructor. Comprehensive review of current treatment practices of cancer and state-of-the-art research impacting treatment and prevention of cancer. Emphasis on epidemiology, molecular biology, and pharmacology. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IMD 460—Correctional Health Care Clerkship (1-12)

Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.) Effective: 2019 Winter Quarter.

IMD 461—Mather VA Internal Medicine AI (6)

Clinical Activity—50 hour(s); Lecture/Discussion—5 hour(s); Independent Study—5 hour(s). Prerequisite(s): Consent of Instructor. Limited enrollment. Acting Internship in Internal Medicine for qualified 4th year Medical Students from the UC Davis School of Medicine at the Sacramento VA Hospital. Experiences will somewhat mirror those of AIs at UCDMC. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Summer Quarter.

IMD 462—Medicine Wards AI (6)

Clinical Activity—40 hour(s). Prerequisite(s): Consent of Instructor. MDS 431; demonstrated ability to accept responsibility. Limited enrollment. Assume role of acting intern and be primary physician on medical ward under direction of medical resident and staff. Teams I-V take call every fifth night. Emphasis on evidence-based inpatient care. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Fall Quarter.

IMD 463—Acting Internship in Medicine Intensive Care Unit (MICU) (3-6)

Clinical Activity—40 hour(s). Prerequisite(s): Completion of third-year in medical school; consent of Director of MICU. Limited enrollment. At UCDMC, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU. On call in hospital every fourth night. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Spring Quarter.

IMD 464—Bayanihan Primary Care Clinic (1-12)

Clinical Activity—0.6 hour(s). Restricted to medical students in all four years of medical school. Under the guidance and supervision of a physician, learn patient history taking, medical documentation, counseling, diagnosis and treatment of patients with chronic and acute disease. Provides exposure to the special needs of various ethnic and socioeconomic groups. May be repeated for credit. (P/F grading only.) Effective: 2020 Spring Quarter.

IMD 465—Medicos-Global Health Sciences (9)

Lecture—5 hour(s); Clinical Activity—25 hour(s); Fieldwork—5 hour(s); Project (Term Project)—5 hour(s). Prerequisite(s): Consent of Instructor. Medical students only. Travel to foreign country for four weeks to collaborate with faculty from local universities and work in urban and rural environments, including hands-on experience with clinic patients. Cultural exchange and awareness of global health care. (P/F grading only.) Effective: 2007 Summer Quarter.

IMD 466—Medical Spanish for Providers (3)

Lecture—40 hour(s). Provides ample experience in Spanish patient interviews, supervision of interview styles and Spanish-language skills, discussion of common diagnoses, procedural consent, management/treatment plans, and patient education in Spanish to empower medical students to practice medicine with the nationally growing monolingual Spanish-speaking patient population. Curriculum adapted with permission from the Medical Spanish Taskforce. (P/F grading only.) Effective: 2020 Winter Quarter.

IMD 468—Ambulatory Internal Medicine Externship (3-18)

Clinical Activity—40 hour(s); Variable—12-40 hour(s). Prerequisite(s): IMD 430; and Consent of Instructor. Demonstrated ability to accept responsibility. Limited enrollment. Hands-on primary care clinical experience in the ambulatory setting supervised by a general internist. Emphasis on evidence-based outpatient care. (H/P/F grading only.) Effective: 2010 Summer Quarter.

IMD 470—Critical Evaluation of Landmark Studies in Evidence-Based Medicine (3)

Seminar. Prerequisite(s): Fourth-year medical student. Primary objective is to prepare future physicians to effectively integrate evidence-based medicine into their clinical practice. While this course has an Internal Medicine emphasis, the skills the course aims to impart—formulating focused clinical questions, searching the medical literature, evaluating the quality of research, and integrating evidence into clinical practice, giving effective article presentations—apply to all future clinicians, regardless of their specialty. (P/F grading only.) Effective: 2017 Fall Quarter.

IMD 480—Person Centered Assessment (1)

Lecture—1 hour(s). Prerequisite(s): Open to all medical students. Person-centered assessment modalities and diagnostic approaches with regards to Internal Medicine and its different subspecialties. (P/F grading only.) Effective: 2002 Fall Quarter.

IMD 490—Medical Care for Underserved & Marginalized Communities (3)

Lecture/Discussion—24 hour(s). Review the evidence about health outcomes for marginalized communities, to use the frameworks of 'structural competency' and 'implicit bias' to understand phenomena that drive disparities, to study the cases of several underserved communities in the Sacramento area, experience first-hand community organizations that are providing care to marginalized communities and practice how to identify in the clinical setting unmet social needs and their impact on health. (P/F grading only.) Effective: 2020 Winter Quarter.

IMD 493—Palliative Care: Essentials in Communication, Pain & Symptom Management (6)

Clinical Activity—24 hour(s); Discussion—4 hour(s); Independent Study—2 hour(s). Prerequisite(s): Consent of Instructor. Spend one week with the inpatient palliative care service, one week with the inpatient pain pharmacy service, and two weeks with Snowline Hospice. (P/F grading only.) Effective: 2019 Spring Quarter.

IMD 494—Practicum in Community Health Clinics (1-12)

Clinical Activity—15-40 hour(s). Prerequisite(s): Medical student with consent of instructor. Assigned to clinical settings that demonstrate ethnic, urban/rural, or other related aspects of clinical community health. Through active participation in health care delivery, learn to relate conceptual with practical aspects of primary health care. May be repeated for credit. (H/P/F grading only.) Effective: 2020 Spring Quarter.

IMD 497—Medicine, Bioethics & the Holocaust (3)

Lecture/Discussion—10 hour(s). Prerequisite(s): Consent of Instructor. Medical students only. Concept of "evil" and the role of collaborators, bystanders and participants exemplified by the holocaust and compared to problems physicians face in practice today. Demonstration that evil emerges incrementally until taken for granted. (P/F grading only.) Effective: 2004 Winter Quarter.

IMD 498—Group Study in Internal Medicine (1-18)

Variable. Prerequisite(s): Consent of Instructor. Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care responsibility on campus, at UCDCM or off campus by specific arrangement. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IMD 499—General Medicine Research (1-18)

Independent Study—20 hour(s). (H/P/F grading only.) Effective: 2006 Winter Quarter.

IMM—Immunology

Courses in IMM:

IMM 201—Introductory Immunology (4)

Lecture—4 hour(s). Prerequisite(s): Graduate standing. Enrollment limited to 30 students. Comprehensive introduction to the principles of immunology. Effective: 2006 Fall Quarter.

IMM 201L—Advanced Immunology Laboratory Rotations (4)

Discussion/Laboratory—12 hour(s). Laboratory assignment in two research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. Student writes a project outline and gives oral presentation. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

IMM 202L—Advanced Immunology Laboratory Rotations (5)

Discussion/Laboratory—15 hour(s). One four-week and one six week assignment in immunology research laboratories. Individual research problems with an emphasis on methodological/procedural experience and experimental design. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

IMM 203—Cancer Immunology (2)

Lecture—1 hour(s); Term Paper—1 hour(s). Covers concepts in cancer biology, progression and immune evasion. It will also cover topics such as: immune surveillance, immune effector mechanisms and current concepts in immune therapy. Effective: 2011 Fall Quarter.

IMM 204—Topics in Innate Immunity (2)

Extensive Writing/Discussion—1 hour(s); Performance Instruction—1 hour(s). Prerequisite(s): IMM 201; Or equivalent; IMM 293 preferred. Restricted to first- or second-year GGI and MGG students; others with permission of instructor; enrollment limited to 18 students. Covers current topics in the field of innate immunity through student seminar presentations and critical evaluation of the literature. Concepts include: pathogen recognition, intercellular communication, specialized cellular function and effector/signaling molecules. Effective: 2010 Spring Quarter.

IMM 210—Topics on Neuroimmunology & Neuroinflammation (1)

Seminar—1 hour(s). Prerequisite(s): Consent of Instructor. Topics will include a broad range of frontiers in neuroimmunology and neuroinflammation. Research articles in current literature will serve to guide in-depth discussions of experimental approaches, technical aspects of experimental techniques, data interpretation, and other relevant aspects of each topic. May be repeated for credit. (S/U grading only.) Effective: 2016 Winter Quarter.

IMM 291—Introduction to Critical Analysis of Immunology Research Literature (2)

Seminar—2 hour(s). Prerequisite(s): IMM 201 (can be concurrent); or Consent of Instructor. Introduction to critical reading of primary research papers in Immunology. Guided discussions on recent primary research papers provided to students before each class. May be repeated up to 2 time(s). (S/U grading only.) Effective: 2018 Fall Quarter.

IMM 292—Immunotoxicology Seminar (2)

Seminar—2 hour(s). Prerequisite(s): Graduate standing in Pharmacology/Toxicology, Immunology, Physiology, or Biochemistry. Seminar presentations dealing with principles of xenobiotic effects on immune system functions and specific examples of drugs and environmental chemicals exerting toxic effects on the immune system. (S/U grading only.) Effective: 1997 Winter Quarter.

IMM 293—Current Concepts in Immunology (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): PMI 126; or Consent of Instructor. Innate and acquired immunity as defense mechanisms against disease. Mechanisms regulating the distinct cell types driving these responses and current concepts in the literature. Effective: 2002 Winter Quarter.

IMM 294—Comparative Clinical Immunology (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): PMI 126; or Consent of Instructor. Clinical immunology in animals and man. Pathogenesis of representative infectious diseases, hypersensitive reactions, and autoimmunity. Emphasis on specific and nonspecific immune effector mechanisms to combat infections or mediate pathology. Not open for credit to students who have completed IMM 294A. Effective: 2003 Winter Quarter.

IMM 295—Cytokines (3)

Lecture—2 hour(s); Discussion—1 hour(s). Prerequisite(s): IMM 293; or Consent of Instructor. Cytokines and their involvement in human and animal physiology/disease, molecular mechanisms and receptor signaling. Immune and non-immune actions. Overlapping/redundant functions (referred to as the "cytokine network"). Effective: 2003 Spring Quarter.

IMM 296—Advanced Topics in Immunology (1)

Seminar—2 hour(s). Prerequisite(s): Graduate standing or consent of instructor. Presentation and discussion of faculty research topics in Immunology May be repeated for credit. (S/U grading only.) Effective: 2019 Winter Quarter.

IMM 297—Mucosal Immunology (2)

Lecture—1 hour(s); Discussion—1 hour(s); Term Paper. Prerequisite(s): IMM 201; Or equivalent. Basic concepts and current research topics in the field of mucosal immunology, with an emphasis on human immunology. Major emphases include innate and adaptive mucosal immunity, the gastrointestinal tract, the lung, lymphocyte trafficking, and mucosal vaccination. Effective: 2006 Summer Session 1.

IRE—International Relations

Courses in IRE:

IRE 001—Global Interdependence (4)

Lecture—3 hour(s); Discussion—1 hour(s). Development of the concept of global interdependence along its political, economic, demographic, cultural, technological, and environmental dimensions. Focus on the ways societies and states interact. Provides the foundation for upper division multidisciplinary work in international relations. GE credit: SS, WE. Effective: 1997 Winter Quarter.

IRE 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 099—Special Study for Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 104—The Political Economy of International Migration (4)

Lecture—3 hour(s); Term Paper/Discussion—1 hour(s). Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 004 recommended. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as SOC 104.) GE credit: SS, WC. Effective: 2016 Fall Quarter.

IRE 190—Topics in International Relations (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): Consent of Instructor. Selected topics in international relations. Variable content. May be repeated for credit when topic differs. GE credit: WE. Effective: 1997 Winter Quarter.

IRE 192—International Relations Internship (1-12)

Internship—3-36 hour(s). Prerequisite(s): Consent of Instructor. Upper division standing. Work experience in international relations, with term paper summarizing the practical experience of the student. (P/NP grading only.) GE credit: SS, WE. Effective: 1997 Winter Quarter.

IRE 194HA—Special Study for Honors Students (4)

Seminar—2 hour(s); Term Paper. Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty advisor. GE credit: OL, SS, WE. Effective: 1997 Winter Quarter.

IRE 194HB—Special Study for Honors Students (4)

Seminar—2 hour(s); Term Paper. Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty advisor. GE credit: OL, SS, WE. Effective: 1997 Winter Quarter.

IRE 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

IST—Integrated Studies

Courses in IST:**IST 008—Colloquium (1)**

Discussion—1 hour(s). Lectures, films, and readings on the interrelation between the arts and sciences. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

IST 008A—Special Topics in Natural Science & Mathematics (4)

Lecture—3 hour(s); Discussion—1 hour(s). Limited enrollment. Group study of a special topic in natural sciences and mathematics. Varies with topic offered. May be repeated for credit. GE credit: SE, SL. Effective: 1997 Winter Quarter.

IST 008B—Special Topics in Humanities (4)

Lecture—3 hour(s); Discussion—1 hour(s). Limited enrollment. Group study of a special topic in humanities. Varies with topic offered. May be repeated for credit. GE credit: AH. Effective: 1997 Winter Quarter.

IST 008C—Special Topics in the Social Sciences (4)

Lecture—3 hour(s); Discussion—1 hour(s). Limited enrollment. Group study of a special topic in the Social Sciences. Varies with topic offered. May be repeated for credit. GE credit: SS. Effective: 1997 Winter Quarter.

IST 009—Seminar (1)

Seminar—1 hour(s). Preparation of a research report. Normally taken with IST 008. May be repeated for credit. (P/NP grading only.) Effective: 2017 Fall Quarter.

IST 090—Seminar (1)

Seminar—1 hour(s). Prerequisite(s): IST 009; and Consent of Instructor. And completion of 45 units with a minimum GPA of 3.250. Enrollment limited to sophomores who participated in the Integrated Studies Honors Program during their freshman year and transfer students by consent of instructor. Interrelation between the arts and sciences, focusing on a special topic. (P/NP grading only.) Effective: 2007 Fall Quarter.

IST 094—Introduction to Undergraduate Research (1)

Seminar—1 hour(s). Prerequisite(s): IST 009; and Consent of Instructor. And completion of 45 units with a minimum GPA of 3.500. Restricted to sophomores who participated in the Integrated Studies Honors Program during their freshman year and other students by consent of instructor. The nature of research at the undergraduate level. (P/NP grading only.) Effective: 2008 Winter Quarter.

IST 190—Topics in Integrated Studies (1)

Seminar—1 hour(s). Prerequisite(s): IST 009; and Consent of Instructor. Discussion of the integration of the arts and sciences, focusing on a special topic. May be repeated up to 3 time(s) when topic differs. (P/NP grading only.) Effective: 2003 Spring Quarter.

IST 194HA—Special Study for Honors Students (4)

Independent Study—3 hour(s); Seminar—1 hour(s). Prerequisite(s): IST 009; and Consent of Instructor. And completion of 90 units with a minimum GPA of 3.500. A program of research culminating in the writing of a junior honors thesis under the direction of a faculty advisor. May be repeated up to 1 time(s). Effective: 2004 Fall Quarter.

IST 194HB—Special Study for Honors Students (4)

Independent Study—3 hour(s); Seminar—1 hour(s). Prerequisite(s): IST 009; and Consent of Instructor. And completion of 90 units with a minimum GPA of 3.500. A program of research culminating in the writing of a junior honors thesis under the direction of a faculty advisor. May be repeated up to 1 time(s). Effective: 2005 Winter Quarter.

IST 197T—Tutoring in Integrated Studies (1-4)

Tutorial—1 hour(s). Prerequisite(s): Consent of Director of Integrated Studies. Open to students in the Integrated Studies Program only. Tutoring in Integrated Studies courses, usually in small discussion groups. Weekly discussions with the instructor on the subject matter of the course being tutored and on the art and craft of teaching. May be repeated up to 8 time(s). (P/NP grading only.) Effective: 2004 Spring Quarter.

ITA—Italian

Courses in ITA:**ITA 001—Elementary Italian (5)**

Discussion—5 hour(s); Laboratory—1 hour(s). Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed ITA 002 or ITA 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.; not open for credit to students who have taken ITA 001A or ITA 001S. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 001A—Accelerated Intensive Elementary Italian (15)

Lecture/Discussion—15 hour(s). Special 12-week accelerated, intensive summer session course that combines the work of ITA 001, ITA 002, and ITA 003. Introduction to Italian grammar and development of all language skills in a cultural context with emphasis on communicative ability. Not open for credit to students who have completed ITA 001, ITA 002, or ITA 003. Effective: 2006 Summer Special Session.

ITA 001S—Elementary Italian (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. May be taught abroad. Students who have successfully completed ITA 002 or ITA 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed; not open for credit to students who have taken ITA 001 or ITA 001A. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 002—Elementary Italian (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Prerequisite(s): ITA 001 or ITA 001S. Continuation of ITA 001 or ITA 001S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Not open for credit to students who have taken ITA 001A or ITA 002S. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 002S—Elementary Italian (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Prerequisite(s): ITA 001 or ITA 001S. Continuation of ITA 001 or ITA 001S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. May be taught abroad. Not open for credit to students who have completed ITA 001A or ITA 002. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 003—Elementary Italian (5)

Lecture/Discussion—5 hour(s); Laboratory—1 hour(s). Prerequisite(s): ITA 002 or ITA 002S. Continuation of ITA 002 or ITA 002S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Not open for credit to students who have taken ITA 001A or ITA 003S. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 003S—Elementary Italian (5)

Discussion—5 hour(s); Laboratory—1 hour(s). Prerequisite(s): ITA 002 or ITA 002S. Continuation of ITA 002 or ITA 002S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. May be taught abroad. Not open for credit to students who have taken ITA 001A or ITA 003. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 004—Intermediate Italian (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ITA 003 or ITA 003S. Review of grammar and syntax through written exercises and short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. GE credit: WC. Effective: 2016 Spring Quarter.

ITA 004S—Intermediate Italian (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ITA 003 or ITA 003S; Or the equivalent. Review of grammar and syntax through written exercises and readings of short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. May be taught abroad. Not open for credit to students who have completed ITA 004. GE credit: WC. Effective: 2012 Spring Quarter.

ITA 005—Intermediate Italian (4)

Lecture/Discussion—3 hour(s); Laboratory—3 hour(s). Prerequisite(s): ITA 004 or ITA 004S. Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian. GE credit: WC. Effective: 2016 Spring Quarter.

ITA 005S—Intermediate Italian (4)

Lecture/Discussion—3 hour(s); Term Paper—1 hour(s). Oral history methodologies and application to an in-depth oral history interview about Jewish life. Topics include oral history practices and ethics, immigration, migration, religious practice, ethnic relations, and community organization structures. No credit given to students who have completed HUM 123. GE credit: SS. Effective: 2001 Fall Quarter.

LAT—Latin

Courses in LAT:

LAT 001—Elementary Latin (5)

Lecture—5 hour(s). Introduction to basic grammar and vocabulary and development of translation skills with emphasis on Latin to English. Students who have successfully completed LAT 002 or LAT 003 in the 10th grade or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH. Effective: 1997 Winter Quarter.

LAT 002—Elementary Latin (5)

Lecture—5 hour(s). Prerequisite(s): LAT 001; Or equivalent. Continuation of LAT 001. GE credit: AH. Effective: 2016 Spring Quarter.

LAT 003—Intermediate Latin (5)

Lecture—5 hour(s). Prerequisite(s): LAT 002; Or equivalent. Continuation of LAT 002. Selected readings from Latin authors. GE credit: AH. Effective: 2016 Spring Quarter.

LAT 098—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

LAT 100—Readings in Latin Prose (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): LAT 003; Or equivalent. Review of Latin morphology, grammar, and vocabulary. Readings in prose authors, including Julius Caesar. GE credit: AH. Effective: 2016 Fall Quarter.

LAT 101—Livy (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Livy GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 102—Roman Comedy (5)

Lecture—4 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Roman comedy. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 103—Vergil: Aeneid (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Vergil: Aeneid. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 104—Sallust (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Sallust. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 105—Catullus (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Catullus. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 106—Horace: Odes & Epodes (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Horace: Odes & Epodes. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 108—Horace: Satires & Epistles (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Horace: Satires & Epistles. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 109—Roman Elegy (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Roman elegy. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 110—Ovid (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): LAT 100; Or equivalent. Translation and discussion of selected readings from the works of Ovid. May be repeated up to 1 time(s) with consent of instructor and when topic differs. GE credit: AH, WC, WE. Effective: 2011 Fall Quarter.

LAT 112—Cicero (4)

Recitation—3 hour(s); Term Paper. Prerequisite(s): LAT 100; Or equivalent. Translation and discussion of selected readings from the works of Cicero. May be repeated up to 1 time(s) with consent of instructor and when readings differ. GE credit: AH, WE. Effective: 2011 Fall Quarter.

LAT 115—Lucretius (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Lucretius. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 116—Vergil: Eclogues & Georgics (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Vergil: Eclogues & Georgics. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 118—Roman Historians (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): LAT 100; Or equivalent. Readings in Latin from one or more of the major Roman historians and biographers. Authors may include Sallust, Nepos, Livy, Tacitus, Suetonius, and Ammianus Marcellinus. GE credit: AH, WC, WE. Effective: 2011 Fall Quarter.

LAT 119—Readings in Republican Latin Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): LAT 100; Or equivalent. Translation and discussion of selected readings from Republican Latin literature. May be repeated for credit when topic differs. GE credit: AH, WC, WE. Effective: 2012 Summer Session 2.

LAT 120—Readings in Imperial Latin Literature (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): LAT 100; Or equivalent. Readings in Imperial Latin literature. May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2014 Winter Quarter.

LAT 121—Latin Prose Composition (4)

Lecture/Discussion—4 hour(s). Prerequisite(s): LAT 100; Or equivalent. Intensive grammar and vocabulary review through exercises in Latin prose composition. GE credit: AH. Effective: 2015 Fall Quarter.

LAT 122—Early Christian Writers (4)

Extensive Writing; Lecture/Discussion—3 hour(s). Prerequisite(s): LAT 100 (can be concurrent); or Consent of Instructor. Latin style of selected early Christian writers. Topics may include: Latin translations of Greek and Hebrew scriptures, Christian Latin, with focus on North Africa, Palestine, or Spain; High literary Christian Latin; Christian Latin oratorical style. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

LAT 125—Medieval Latin (4)

Lecture—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Selected readings from the Vulgate and various medieval authors provide an introduction to the developments in the Latin Language and literature from the 4th to the 15th centuries. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 130—Readings in Late Latin (4)

Lecture/Discussion—3 hour(s); Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Translation and discussion of selected readings from late imperial-early medieval Christian and pagan literature. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

LAT 135—Themes in Latin Literature (4)

Extensive Writing; Lecture/Discussion—3 hour(s). Prerequisite(s): LAT 100 (can be concurrent); or Consent of Instructor. Readings in Latin that trace a theme across times, genres, and authors. May be repeated for credit when topic differs. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

LAT 198—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. Directed group study. (P/NP grading only.) Effective: 2016 Spring Quarter.

LAT 199—Special Study for Advanced Undergraduates (1-5)

Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) Effective: 2016 Fall Quarter.

LAW—Law

Courses in LAW:

Courses of Instruction. The courses listed below have all been taught at least once in the last three years. There is no guarantee that any given course will be taught within the next three years. The numbers in parentheses indicate the number of semester credits. For current information, see [Law School Course Descriptions](#).

LAW 200—Introduction to Law (1)

Discussion—1 hour(s). Introduction to basic concepts of the law, the historical roots of common law and equity, the precedent system in its practical operation, the modes of reasoning used by courts and attorneys, and the fundamentals of statutory interpretation. (S/U grading only.) Effective: 1997 Winter Quarter.

LAW 200A—U.S. Legal System Seminar (LL.M.) (2)

Discussion—2 hour(s). History and fundamental principles of the United States legal system. Important current legal issues, developments and trends. Required for LL.M. students who have not attended a U.S. law school. Fall semester only. Effective: 2017 Fall Semester.

LAW 200B—U.S. Legal Methods I (LL.M.) (3)

Lecture. Restricted to LL.M. students. Designed to provide background skills necessary to succeed in both law school and legal practice. Gain an introductory working knowledge of the US legal methods which includes learning various forms of legal writing and speaking. Effective: 2017 Fall Semester.

LAW 200BT—U.S. Legal Methods A (LL.M.) (3)

Lecture/Discussion—3 hour(s). Designed to provide background skills necessary to succeed in both law school and legal practice. Gain an introductory working knowledge of the U.S. legal method which includes learning various forms of legal writing and speaking. Effective: 2017 Spring Semester.

LAW 200C—U.S. Legal Methods II (LL.M.) (3)

Lecture. Restricted to LL.M. students. Designed to provide background skills necessary to succeed in both law school and legal practice. Gain an introductory working knowledge of the US legal method which includes learning various forms of legal writing and speaking. Effective: 2017 Fall Semester.

LAW 200CT—U.S. Legal Methods B (LL.M.) (3)

Lecture/Discussion—3 hour(s). Designed to provide background skills necessary to succeed in both law school and legal practice. Gain an introductory working knowledge of the U.S. legal method which includes learning various forms of legal writing and speaking. Effective: 2017 Spring Semester.

LAW 200D—American Legal Concepts I (LL.M.) (3)

Lecture. Prerequisite(s): Consent of Instructor. Restricted to LL.M. students. Designed to provide basic skills necessary to succeed in both law school and legal practice. Effective: 2017 Fall Semester.

LAW 200DT—Advanced Introduction to American Legal Concepts & Methods (LL.M.) (3)

Lecture—3 hour(s). Restricted to LL.M. students. Building on the Introduction to American Law course, provides additional instruction in American law and legal methods. Audit selected substantive courses and produce a series of legal memoranda. Effective: 2017 Spring Semester.

LAW 200E—American Legal Concepts II (LL.M.) (3)

Lecture. Restricted to LL.M. students. Designed to provide basic skills necessary to succeed in both law school and legal practice. Effective: 2017 Fall Semester.

LAW 200L—Lawyering Process Lab (0)

Laboratory. Lab which accompanies Lawyering Skills course for first-year law students. (S/U grading only.) Effective: 2019 Spring Semester.

LAW 200S—Lawyering Process (2)

Discussion. Hone interactive lawyering skills needed for effective transactional and litigation work, including client interviewing and negotiation. Learn the role that interpersonal skills play in effective lawyering and contemplate the professional identity they wish to cultivate. (S/U grading only.) Effective: 2019 Spring Semester.

LAW 201—Property (4)

Discussion—4 hour(s). Prerequisite(s): AAS 010; LAW 200A; or Consent of Instructor. text here. Study of doctrines and concepts of property law with primary emphasis on real property. Coverage includes: the estates in land system; the landlord-tenant relationship, conveyancing, and private and public land use control. Effective: 2006 Fall Semester.

LAW 202—Contracts (4)

Discussion—4 hour(s). Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts or fails to adjust to changing social demands Effective: 2018 Fall Semester.

LAW 203—Civil Procedure (5)

Discussion—5 hour(s). Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes. Effective: 2006 Summer Special Session.

LAW 204—Torts (4)

Discussion—4 hour(s). Familiarizes students with legal rules, concepts and approaches pertinent to the recovery for personal injuries, property damages and harm done to intangible interests. Effective: 2019 Spring Semester.

LAW 205—Constitutional Law I (4)

Discussion—4 hour(s). Principles, doctrines and controversies regarding the basic structure of and division of powers in American government. Specific topics include judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among the branches of the federal government. Effective: 2004 Fall Semester.

LAW 206—Criminal Law (3)

Discussion—3 hour(s). Study of the bases and limits of criminal liability. Coverage of the constitutional, statutory, and case law rules which define, limit, and provide defenses to individual liability for the major criminal offenses. Effective: 1997 Winter Quarter.

LAW 207—Legal Research & Writing I (2)

Discussion/Laboratory—2 hour(s). Integrated legal research and writing skills course taught by Wydick Fellowship Program faculty. Basic legal research resources and strategies are introduced and practiced. Fall semester. Effective: 2016 Fall Semester.

LAW 207A—Legal Research (LL.M.) (1)

Discussion—1 hour(s). Restricted to LL.M. students only. Description of the evolution and use of sources of law and secondary authority. Effective: 2016 Fall Semester.

LAW 207B—Advanced Legal Research (2)

Seminar—2 hour(s). Restricted to 35 students. Introduction to advanced legal research tools and techniques used in practice, including efficient computer research techniques. Effective: 2009 Fall Semester.

LAW 207C—California Civil Procedure Research (1)

Lecture. Prerequisite(s): LAW 207; LAW 208. Includes lectures and in-class exercises working with print, and electronic, legal research materials to prepare responses to various fact patterns. Extensive use of real-world case scenarios to mimic conditions likely encountered by legal practitioners. Half of the course time is lecture; half is in-class practical assignments or discussion designed to enhance the students' understanding of the concepts introduced. Effective: 2019 Spring Semester.

LAW 207D—Intellectual Property Research (1)

Lecture. Prerequisite(s): LAW 207; LAW 208. Includes lectures and in-class exercises working with print, and electronic, legal research materials to prepare responses to various fact patterns. Extensive use of real-world case scenarios to mimic conditions likely encountered by legal practitioners working in the intellectual property legal practice. Effective: 2019 Spring Semester.

LAW 208—Legal Research & Writing II (2)

Discussion—2 hour(s). Focuses on persuasive writing and oral advocacy. Complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief, with oral arguments by all students. Effective: 2007 Fall Semester.

LAW 208A—Legal Research & Writing II (LL.M.) (2)

Discussion—2 hour(s). Persuasive writing and oral advocacy. LL.M. students complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief with oral arguments. Effective: 2017 Spring Semester.

LAW 208E—Introduction to U.S. Legal Methods A (3)

Lecture. Prerequisite(s): Consent of Instructor. Restricted to LL.M. students. Designed to provide foreign students with background skills at a more basic level than U.S. Legal Methods A and B. Audit carefully selected courses in the regular curriculum and complete assignments related to those courses. Effective: 2017 Fall Semester.

LAW 208F—Introduction to U.S. Legal Methods B (LLM) (3)

Seminar. Prerequisite(s): Consent of Instructor. Restricted to LL.M. students. Designed to provide foreign students with background skills at a more basic level than U.S. Legal Methods A and B. Audit carefully selected courses in the regular curriculum and complete assignments related to those courses. Effective: 2017 Fall Semester.

LAW 208G—U.S. Legal Methods A (LL.M.) (3)

Lecture. Restricted to LL.M. students. Designed to provide foreign and other students with background skills necessary to succeed in both law school and legal practice. Effective: 2017 Fall Semester.

LAW 208H—U.S. Legal Methods B (LL.M.) (3)

Seminar. Description of the evolution and use of sources of law and secondary authority. Effective: 2017 Fall Semester.

LAW 208M—LL.M. Legal Essay Writing A (1)

Seminar. Improve legal writing skills with a focus on law school essay exams. Focuses on the following skills: 1) how to understand the goals of a US law school exam and the expectations of the professor; 2) how to structure an answer logically; 3) how to write clearly; 4) how to explain reasoning and discuss complex legal issues. Experiential class. Effective: 2019 Spring Semester.

LAW 208N—LL.M Legal Essay Writing B (1)

Seminar. Improve legal writing skills with a focus on bar essay exams. Focuses on the following skills: 1) how to understand the goals of a US bar; 2) how to structure an answer logically; 3) how to write clearly; 4) how to explain reasoning and discuss complex legal issues. Experiential class. Effective: 2019 Spring Semester.

LAW 209A—Patent Law (3)

Discussion—3 hour(s). Prerequisite(s): LAW 274; or Consent of Instructor. Covers all essential aspects of patent law: patentable subject matter, novelty, utility, nonobviousness, enablement, prosecution, infringement, and remedies. Effective: 2011 Fall Semester.

LAW 209B—Patent Prosecution & Practice (2)

Seminar. Examines core requirements and strategies for drafting and prosecuting a patent application before the U.S. Patent & Trademark Office. Interact with real inventors and US PTO examiners to gain the experience of getting a patent issued. Effective: 2018 Fall Semester.

LAW 209C—Patentable Subject Matter: Genes, Methods, & Software (2)

Seminar. In-depth look at recent cases and debates behind genetic patenting, software; business models; diagnostic methods, and others. Reviews the crucial and rapidly evolving field of patent law which affects some of the most important hi-tech industries. Effective: 2018 Spring Semester.

LAW 209DT—Innovation Law (2)

Seminar—2 hour(s). Explores range of legal issues that innovation lawyers face, from establishing a start-up to high stakes technology mergers & acquisitions, to data protection and privacy, protecting intellectual property through strategic patent litigation. Effective: 2017 Spring Semester.

LAW 209E—Patent Litigation (1)

Lecture—1 hour(s). Introduces the basics of Patent Law and examines the U.S. patent enforcement system. Learn how a patent litigation proceeds, focusing on both pre- and post-trial proceedings and examines substantive patent laws. Effective: 2018 Spring Semester.

LAW 209G—Privacy, Technology, & the Law (2)

Seminar. Seminar evaluates the privacy law issues that arise from technological advancements and data trade transactions. Likely topics that the course will cover include the Internet of Things and legal responses to privacy related problems, such as the European General Data Protection Regulation and the California Consumer Privacy Act of 2018. Effective: 2020 Spring Semester.

LAW 209T—Innovation & Technology Transfer Seminar (2)

Seminar—2 hour(s). Prerequisite(s): LAW 209A or LAW 274, recommended but not required. Restricted to 15 students. From biomedicine to cleantech, public institutions are playing leading roles in developing cutting-edge technologies. Explores the law and policy of publicly-supported innovation and technology transfer. Effective: 2010 Fall Semester.

LAW 210—Reforming the Police & Criminal Justice (2)

Seminar—2 hour(s). Limited to 25 students. Focus on major current issues: policing ethnic neighborhoods; use of deadly force; modernizing the work of prosecutors and defense counsel. Effective: 2016 Fall Semester.

LAW 210A—Privatization of Criminal Justice Seminar (2)

Seminar—2 hour(s). Prerequisite(s): Prior social theory or criminal procedure knowledge not required; completion of LAW 227A strongly recommended. Restricted to 10 students. Analyze the legal, historical, and sociological aspects of the growing private sector provision of criminal justice services traditionally assumed by government, including prisons, policing, and adjudication. Effective: 2005 Fall Semester.

LAW 210B—Law of Policing (2)

Seminar—2 hour(s). Limited enrollment. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies. Effective: 2020 Spring Semester.

LAW 210C—Sexual Assault & the Law (2)

Seminar—2 hour(s). Criminal law of sexual assault, traditional and modern offenses, and proposals for reform. Discussion of procedural developments, victim's counsel, evidentiary reform, and ADR. Implications for civil law, tort liability, Title VI, Title IX, and civil liability of perpetrators. Effective: 2015 Fall Semester.

LAW 210DT—Wrongful Convictions (2)

Seminar—2 hour(s). Explore the magnitude and complexity of the wrongful convictions, their causes and remedies under existing law, and possible fixes (reforms). Emphasizes relevant legal rules (Criminal Procedure, Evidence, Post-Conviction Review). Effective: 2016 Fall Semester.

LAW 210ET—Race, Mass Incarceration & Policing (2)

Seminar—2 hour(s). Key issues in the historical development and the current state of modern American imprisonment, policing structures, and the criminal justice system in relation to race. Effective: 2017 Spring Semester.

LAW 210F—Restorative Justice (2)

Seminar. Explore both the theory and practice of restorative justice as an alternative approach to the retributive justice model of our current criminal law system and many other institutions. Effective: 2017 Fall Semester.

LAW 210FA—Aoki Center Restorative Justice Practicum I (2)

Seminar. Part one of a two-part practicum. Learn about restorative justice principles and practices, receive training in restorative justice facilitation, and participate in and lead restorative justice circles in Davis & Sacramento schools, Yolo County Juvenile Hall, and other venues. (S/U grading only.) Effective: 2020 Fall Semester.

LAW 210FB—Aoki Center Restorative Justice Practicum II (2)

Seminar. Part two of a two-part practicum. Learn the principles and practices of restorative justice, receive training in restorative justice facilitation, participate in & conduct restorative justice circles with young people in Davis & Sacramento schools and the Yolo County Juvenile Hall. (S/U grading only.) Effective: 2020 Spring Semester.

LAW 210G—Aoki Center Restorative Justice Practicum (2)

Fieldwork. Learn about restorative justice principles and practices, receive training in restorative justice facilitation, and participate in and lead restorative justice circles in Davis & Sacramento schools, Yolo County Juvenile Hall, and other venues. (S/U grading only.) Effective: 2019 Fall Semester.

LAW 210H—Aoki Federal Court Amicus Project (3)

Project (Term Project). Prerequisite(s): LAW 219; LAW 227A; both required or consent of instructor. Work on actual federal criminal cases in the Ninth Circuit Court of Appeals and United States Supreme Court. File briefs amicus curiae on critical issues, and develop research, writing, and oral advocacy skills. Effective: 2019 Fall Semester.

LAW 210J—Best Practices for Justice Seminar: Advocates Working to Improve the Criminal Justice System (2)

Lecture. Prerequisite(s): LAW 206; LAW 227A (can be concurrent). The Criminal Justice System continues to evolve as perceptions regarding judges, police officers and criminal attorneys change. Analyzes how our sense of justice is formed and what it looks like in the actual practice of criminal law. Effective: 2019 Fall Semester.

LAW 210K—Sexual Assaults in the Criminal Justice System (2)

Seminar. Focuses on the criminal prosecution and defense of sexual assaults, from reporting to sentencing, through examination of pertinent criminal statutes, evidence code sections, jury instructions, court documents and specific case studies. Effective: 2020 Spring Semester.

LAW 210M—Criminal Justice in the Era of Prison Downsizing (2)

Lecture. Learn about how different parts of the criminal justice system work and to consider practical solutions to addressing crime in a context where the emphasis on incarceration is declining. Effective: 2020 Fall Semester.

LAW 210N—Aoki Sentence Reduction Practicum (3)

Fieldwork. Assist the Yolo County District Attorney's Office in evaluating prisoners for early release. Review records, make presentations to prosecutors and potentially file motions asking judges to reduce sentences. Study the principles of sentencing. May be repeated up to 4 time(s). Effective: 2020 Fall Semester.

LAW 211—Negotiations (2)

Discussion—2 hour(s). Limited enrollment. Skills course teaches theoretical and empirical approaches to negotiation strategy for the purposes of making deals and resolving disputes. Participate in simulations to hone their negotiation skills, and write analytical papers. Effective: 2016 Fall Semester.

LAW 211A—Advanced Negotiations Strategy & Client Counseling (3)

Discussion—3 hour(s). Prerequisite(s): Consent of Instructor. Application course; must apply and secure professor approval to enroll; will involve participating in discussions and a series of simulations; your classmates will be counting on you to actively participate and be well prepared for every simulation; do not apply to take this course unless you are willing and able to participate fully and can accept constructive feedback; if you anticipate missing more than two class sessions, do not apply to take this course. Understand the dynamics of interviewing and counseling process. Designed to be relevant to a broad spectrum of negotiation problems that are faced by legal professionals. Effective: 2012 Fall Semester.

LAW 211B—International Business Negotiations (3)

Lecture/Discussion. Prerequisite(s): LAW 215 (can be concurrent); Prerequisites: Prior or concurrent enrollment in Business Associations (LAW 215) required; prior enrollment in Negotiations (LAW 211) and/or International Business Transactions (LAW 270) preferred. Structured around a simulated negotiation exercise with students from a similar class at Stanford Law School. Experience the development of a business transaction over an extended negotiation in a context that replicates actual legal practice. Effective: 2019 Spring Semester.

LAW 211C—Negotiating Joint Ventures (2)

Seminar. Business negotiation and dispute resolution strategies through simulations, reading, and writing assignments. Effective: 2019 Spring Semester.

LAW 211D—Treatymaking: International Agreement Negotiations (3)

Lecture/Discussion. Negotiation simulation intended to produce a multinational convention on a subject to be determined that is timely and meaningfully contributes to the real-world discourse. Begins with lectures/discussions of the fundamentals of treaty law. Followed by the class seeking Circular-175 authorization to enter into negotiations, and a variety of written and oral exercises/simulations leading to eventual conclusion of a multinational instrument. Effective: 2020 Fall Semester.

LAW 212A—Medical Liability Law & Policy (2)

Discussion—2 hour(s). Considers the many ways in which society seeks to establish and maintain quality in patient care. Effective: 2007 Fall Semester.

LAW 213A—Transnational Criminal Law (3)

Discussion—3 hour(s). Prerequisite(s): LAW 205; LAW 206. Examines the laws responses to a particular aspect of globalization, transnational crime. Explore the phenomenon of transnationality and how it affects the power of nation-states, acting alone or together, to prosecute certain crimes. Effective: 2006 Fall Semester.

LAW 213T—Terrorism & International Law (2)

Seminar—2 hour(s). International terrorism remains a pressing concern. Devising effective remedies for responding to it within the bounds of the law is critical. The new generation of international lawyers needs to be familiar with the relevant law and standards. Effective: 2013 Fall Semester.

LAW 214—Tax Issues Related to Estate Planning (2)

Discussion—2 hour(s). Prerequisite(s): LAW 221 recommended. Tax issues Related to estate planning. Effective: 2017 Fall Semester.

LAW 214A—Migration, Work, & Taxation (2)

Seminar. Explores workers' and prospective workers' choices to move from one place to another, both across and within national borders. In particular, explores how tax policy and broader economic forces shape those choices. Effective: 2018 Fall Semester.

LAW 215—Business Associations (4)

Discussion—4 hour(s). Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms. Effective: 2005 Fall Semester.

LAW 215A—The Law of Corporate Governance Seminar (2)

Seminar—2 hour(s). Prerequisite(s): LAW 215. Advanced issues in the governance of publicly held corporations. Separation of ownership and control and how the law has addressed this issue at the theoretical level and in the context of topics such as the duties of corporate directors, shareholder voting rights, and competition among states to attract corporate charters. Effective: 2003 Fall Semester.

LAW 215B—Corporate Integrity & Responsibility (2)

Lecture. Equips future business lawyers with the legal knowledge and technical skills to better understand, the U.S, European and Asian (select jurisdictions) regulatory responses to ethical and socially responsible corporate governance practices. Instruction seeks to re-define the aim of corporate governance as a tool to address efficiency, reduce agency costs and improve access to capital, as well as an emerging anti-corruption tool and a means to ensure more ethical corporate behavior. Effective: 2019 Spring Semester.

LAW 215S—Special Session Business Associations (4)

Discussion—4 hour(s). Provides a broad survey of the legal rules and concepts applicable to business associations, both public and closely. Effective: 2011 Spring Semester.

LAW 216A—Law & Religion (2)

Discussion—2 hour(s). Restricted to 20 students. Federal constitutional law relating to religion; the interpretation and application of the Free Exercise Clause and the Establishment Clause of the First Amendment. Effective: 2014 Spring Semester.

LAW 217—Insurance Law (2)

Discussion. Covers the following topics: I. Insurance Law and Society, II. The Impact of Insurance, III. Contract Law Foundations, IV. First-Party Insurance, V. Liability Insurance: Coverage Issues, VI. Liability Insurance: Relationship Issues. Effective: 2019 Spring Semester.

LAW 217A—Comparative Telecommunications Law (2)

Lecture. Explores the key issues facing policy-makers in designing telecommunications regulatory systems (e.g. licensing, universal service, economic regulation, relationship with antitrust law), and the various ways in which different jurisdictions have chosen to address these issues. Effective: 2019 Fall Semester.

LAW 218—Constitutional Law II (4)

Discussion—4 hour(s). Not open to students who have completed LAW 218A or LAW 218B. Principally covers the First Amendment and the Equal Protection Clause. Effective: 2011 Fall Semester.

LAW 218A—Constitutional Law II: Equal Protection (2)

Discussion—2 hour(s). Students who have previously taken LAW 218, or who plan to take LAW 218 for 4 units in spring 2011, may not take this course; students enrolled in this course will be given priority registration spring semester 2011 to enroll in LAW 218B. Focuses on the Equal Protection Clause of the Fourteenth Amendment. Effective: 2010 Fall Semester.

LAW 218B—Constitutional Law II: First Amendment (2)

Discussion—2 hour(s). Students who have previously taken LAW 218 or who plan to take LAW 218 for 4 units in spring 2011 may not take this course; students not required to take LAW 218A in order to take this course. Principally covers the free speech clause of the First Amendment. Effective: 2010 Fall Semester.

LAW 218D—Constitutional Theory Seminar (2)

Seminar—2 hour(s). Provides students with a broad understanding of the shape of modern constitutional theory, and the ability to understand the implications of that theory for concrete historical and modern constitutional disputes. Effective: 2015 Fall Semester.

LAW 218ET—California Constitutional Law (2)
